NUCLEAR REGULATORY COMMISSION

[Docket No. 70–7038; CEQ ID EISX–429–00–000–1770360643; NRC–2026–2906]

Orano Enrichment USA, LLC; Uranium Enrichment Facility; Draft Environmental Impact Statement

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft Environmental Impact Statement (EIS) regarding a license application from Orano Enrichment USA, LLC (Orano) to construct and operate a gaseous centrifuge uranium enrichment facility in Roane County, Tennessee. The draft EIS evaluates the environmental impacts of the proposed action of issuing a license that would authorize Orano to construct and operate a uranium enrichment facility on a 624-acre site, 6.7 miles southwest of Oak Ridge, Tennessee. The environmental impacts of the no-action alternative (*i.e.,* denying the license application) are also evaluated.

DATES: Members of the public are invited to submit comments by January 11, 2027. Comments received after that date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before that date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

II. Discussion

The NRC has prepared a draft EIS as part of its environmental review of Orano's application for a license to construct and operate a uranium enrichment facility on a 188-acre portion of 624 acres of undeveloped land on a former U.S. Department of Energy site in Roane County, Tennessee. This draft EIS assesses the potential environmental impacts of the Orano license application and the associated proposal to construct, operate, and decommission the enrichment facility, as well as the no-action alternative to the proposed action (*i.e.,* denying the license application).

The proposed Federal action is the issuance of a license that would authorize Orano to receive title to, own, acquire, receive, possess, use, transfer, and/or deliver source material, special nuclear material, and byproduct material as specified in the license for the purposes of constructing, and then operating for up to 40 years, a facility that uses gaseous centrifuge technology to enrich uranium. The facility would be authorized to produce uranium enriched up to 10 percent by weight in the isotope uranium-235 for use in nuclear fuel applications.

The draft EIS contains the NRC staff's preliminary analysis of the environmental impacts of the proposed action and the no-action alternative to the proposed action. The draft EIS also contains the NRC staff's preliminary recommendation on the proposed action, which is based on the following factors: The NRC staff's review of Orano's environmental report (included as part of the Orano license application) and associated responses from Orano to request from the NRC staff for clarifying information; NRC staff's review of comments received as part of the scoping process; NRC staff's communications with Federal, State, and local agencies, as well as Tribal officials; and the NRC staff's independent environmental review.

The NRC staff's preliminary recommendation, unless safety issues mandate otherwise, is that the NRC issue the license to construct and operate the proposed enrichment facility to Orano.

Authority: 42 U.S.C. 2011 *et seq.*

Dated: November 23, 2026.

For the Nuclear Regulatory Commission.

Joseph O'Hara,

Acting Chief, Environmental Review Materials Branch, Division of Storage of Fuel, Transportation, and Environmental, Office of Nuclear Material Safety, and Safeguards.
