by this notice. *https://www.sedarweb.org.*

FOR FURTHER INFORMATION CONTACT: Emily Ott, SEDAR Coordinator; (843) 302–8434. Email: *Emily.Ott@safmc.net.*

SUPPLEMENTARY INFORMATION: The Gulf, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with the NMFS and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the SEDAR process. SEDAR is a participatory process for developing, evaluating and reviewing information used for fisheries management advice. This multi-step process for determining the status of fish stocks in the Southeast Region may include (1) a data stage, (2) an assessment stage, and (3) a review stage. Each stage produces a report summarizing decisions made during that stage. A final stock assessment report is produced at the end of a SEDAR process documenting data sets used, model configurations, and the opinions from the independent peer review. Participants for SEDAR projects are appointed by the Gulf, South Atlantic, and Caribbean Fishery Management Councils and National Marine Fisheries Service Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants may include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations; International experts; and staff of Councils, Commissions, and State and Federal agencies.

The items of discussion in the SEDAR 90 Assessment Webinar 14 are as follows:

Participants will review recommendations made on Assessment Webinar 13 and continue discussion of new modeling topics. Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 24, 2026.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Endangered Species; File No. 29909

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that the U.S. Fish and Wildlife Service, Maryland Fish and Wildlife Conservation Office, 177 Admiral Cochrane Drive, Annapolis, MD 21401 (Responsible Party: Michael Mangold), has applied in due form for a permit to take Atlantic sturgeon (*Acipenser oxyrinchus*) and shortnose sturgeon (*A. brevirostrum*) for purposes of scientific research.

DATES: Written comments must be received on or before December 28, 2026.

ADDRESSES: The application and related documents are available for review by selecting ''Records Open for Public Comment'' on the Authorizations and Permits for Protected Species home page, *https://www.webapps.nwfsc.noaa.gov/apex/ifq/r/ifqws/apps/home,* and then selecting File No. 29909 from the list of available applications. These documents are also available upon written request via email to *NMFS.Pr1Comments@noaa.gov.*

Written comments on this application should be submitted via email to *NMFS.Pr1Comments@noaa.gov.* Please include File No. 29909 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request via email to *NMFS.Pr1Comments@noaa.gov.* The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Erin Markin, Ph.D., or Shasta McClenahan, Ph.D., (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

The applicant proposes to conduct research on adult, sub-adult, and juvenile Atlantic and shortnose sturgeon captured in tributaries of the Chesapeake Bay, specifically in the James, York, Nanticoke, Potomac, Rappahannock, Pocomoke, and Chester Rivers, to understand reproductive success, abundance, movement patterns, and habitat preference. Atlantic and shortnose sturgeon would be marked (dart and passive integrated transponder tags), measured, biologically sampled (fin clip), photographed/videoed, and weighed, prior to release. A subset of sturgeon would be anesthetized and tagged (internal or external acoustic). Early life stages would be collected using egg mats or D-frame nets. The applicant requests unintentional mortality of up to 1 adult or subadult Atlantic sturgeon, annually, and up to 2 juvenile Atlantic sturgeon annually, not to exceed 10 juvenile Atlantic sturgeon over the life of the permit. The permit would be valid for up to 10 years from the date of issuance.

Dated: November 24, 2026.

Nature McGinn,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.
