

Federal Register

8-23-06

Vol. 71 No. 163

Wednesday

Aug. 23, 2006

Pages 49309-49978

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.archives.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** www.gpoaccess.gov/nara, available through GPO Access, is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

For more information about GPO Access, contact the GPO Access User Support Team, call toll free 1-888-293-6498; DC area 202-512-1530; fax at 202-512-1262; or via e-mail at gpoaccess@gpo.gov. The Support Team is available between 7:00 a.m. and 9:00 p.m. Eastern Time, Monday–Friday, except official holidays.

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 71 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington DC 20402, along with the entire mailing label from the last issue received.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

- FOR:** Any person who uses the Federal Register and Code of Federal Regulations.
- WHO:** Sponsored by the Office of the Federal Register.
- WHAT:** Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
 2. The relationship between the Federal Register and Code of Federal Regulations.
 3. The important elements of typical Federal Register documents.
 4. An introduction to the finding aids of the FR/CFR system.
- WHY:** To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WHEN: Tuesday, September 12, 2006
9:00 a.m.–Noon

WHERE: Office of the Federal Register
Conference Room, Suite 700
800 North Capitol Street, NW.
Washington, DC 20002

RESERVATIONS: (202) 741-6008

Rules and Regulations

Federal Register

Vol. 71, No. 163

Wednesday, August 23, 2006

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

Animal and Plant Health Inspection Service

7 CFR Part 330

9 CFR Part 94

[Docket No. 05-002-4]

RIN 0579-AC12

Interstate Movement of Garbage From Hawaii; Municipal Solid Waste

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations pertaining to certain garbage to provide for the interstate movement of garbage from Hawaii subject to measures designed to protect against the dissemination of plant pests into noninfested areas of the continental United States. We are amending these regulations upon request in order to provide the State of Hawaii with additional waste disposal options, and after determining that the action is highly unlikely to result in the introduction and dissemination of plant or animal pests or diseases into the continental United States from Hawaii. We are also making other amendments to the garbage regulations to clarify their intent and make them easier to understand.

DATES: *Effective Date:* September 22, 2006.

FOR FURTHER INFORMATION CONTACT: Ms. Shannon Hamm, Assistant Deputy Administrator, Policy and Program Development, APHIS, 4700 River Road Unit 20, Riverdale, MD 20737-1231; (301) 734-4957.

SUPPLEMENTARY INFORMATION:

Background

Under 7 CFR 330.400 and 9 CFR 94.5 (referred to elsewhere in this document as the regulations), the Animal and Plant Health Inspection Service (APHIS) regulates the importation and interstate movement of garbage that may pose a risk of introducing or disseminating animal or plant pests or diseases that are new to or not widely distributed within the United States. Not all movements of waste material are regulated by APHIS;¹ only movements of waste that meets APHIS's definition of "garbage" are regulated, and even then, only under certain circumstances. Under the regulations, the term "garbage" is defined as "all waste material derived in whole or in part from fruits, vegetables, meats, or other plant or animal (including poultry) material, and other refuse of any character whatsoever that has been associated with any such material on board any means of conveyance, and including food scraps, table refuse, galley refuse, food wrappers or packaging materials, and other waste material from stores, food preparation areas, passengers' or crews' quarters, dining rooms, or any other areas on means of conveyance." Garbage also means "meals and other food that were available for consumption by passengers and crew on an aircraft but were not consumed."

Waste material that meets the definition of garbage is regulated by APHIS if it is removed from a means of conveyance that:

- Within the last 2 years, has been in any port outside the United States or Canada; or
- Within the last year, has moved from Hawaii or a U.S. territory to another U.S. State.²

However, garbage onboard a conveyance that meets one of the two conditions above may be exempted from regulation if the conveyance is cleared of all regulated garbage, and after cleaning and disinfection, an inspector certifies that the conveyance contains no garbage that poses a risk of pest

¹ The operation of landfills and incinerators and the intrastate and interstate movement of garbage are regulated predominantly by State and local governments. The U.S. Environmental Protection Agency (EPA) regulates the interstate movement of hazardous wastes. See EPA's Web site for additional information: <http://www.epa.gov/epaoswer/osw/index.htm>.

² "State" is defined as any of the 50 States and any U.S. territory or possession.

introduction into the United States. Garbage from Canada is also exempted from regulation.

The regulations were established to address the risk posed by garbage that originates on or is onboard conveyances that have been located in areas where exotic animal or plant pests or diseases are present. Such garbage includes waste generated during the course of commercial and private air travel and commercial or private transit of goods or persons by sea. The regulations were not intended to address risks posed by movements of municipal solid waste (MSW).

Due to a limited availability of landfill space in Hawaii, business interests and public officials are exploring other options for disposal of the State's waste. These persons have requested that APHIS allow the interstate movement of MSW from Hawaii. We believe the regulations require amendment to provide for the movement of garbage generated in Hawaii.

Pest Risk Assessment

As part of our evaluation of the request by business interests and public officials in Hawaii, we prepared a draft pest risk assessment (PRA), titled "The Risk of Introduction of Pests to the Continental United States via Plastic-Baled Municipal Solid Waste from Hawaii" (March 2006) to evaluate the interstate movement of garbage from Hawaii to the mainland of the United States. The objective of the PRA was to evaluate whether a baling technology that would bundle, wrap, and seal the MSW into airtight bales will effectively mitigate potential plant pest risks associated with MSW from Hawaii. The PRA focused on the planned use of the baling technology because airtight enclosure from creation to burial will mitigate the risks of establishment by any plant pests. The PRA addressed the following three issues:

- The ability of the baling technology to provide a strong, airtight barrier;
- The examination of the occurrence of ruptures or punctures; and
- The examination of general pathway procedures to reduce pest incidence in the bales and the chances of escape in the event of accidental ruptures or punctures.

In addition, the PRA provides qualitative risk ratings for different pest types based on the likelihood of introduction. Only those pathway

processes likely to be common to all company proposals to transport baled Hawaiian waste were considered. We will prepare separate assessments for other company proposals which will address factors such as the destination landfill, type of transportation to be used on the mainland, and pest species that may pose particular threats.

The PRA concluded that transporting MSW from Hawaii to the continental United States in airtight bales poses a low risk of pest introduction and dissemination because the baling technology mitigates the risk from all types of plant pests. In addition, the other pathway procedures should adequately protect against accidental ruptures or punctures in bales during the handling and transport process. Pest mitigation processes such as the baling technology itself or features of the proposed pathway, including the waste type, and how bales are staged, handled, transported, and buried, are added safeguards that we conclude will prevent the introduction and dissemination of exotic pests. As a complement to the baling technology, the PRA recommends proper staging of bales and certification that they are mollusk-free to mitigate against contaminating pests. As long as those processes and the procedures proposed by the companies (including diversion of yard and agricultural waste, prompt shipment, monitoring and inspection of bales, and thorough cleanup of any ruptures that do occur) are followed, establishment of Hawaiian plant pests via this pathway is highly unlikely.

On April 19, 2006, we published in the **Federal Register** (71 FR 20030–20041, Docket No. 05–002–2) a proposal³ to amend the regulations in “Subpart—Garbage” (7 CFR 330.100 through 330.400) and 9 CFR 94.5 pertaining to certain garbage to provide for the interstate movement of garbage from Hawaii subject to measures designed to protect against the dissemination of plant pests into noninfested areas of the continental United States.

We solicited comments on the proposed rule for 30 days ending on May 19, 2006. We received five comments by that date, including a request to extend the comment period. In a document published in the **Federal Register** on May 31, 2006 (Docket No. APHIS–2005–0047, 71 FR 30834), we

reopened and extended the deadline for comments until June 5, 2006. We received an additional seven comments by that date. The comments came from several municipalities in Hawaii, waste companies, congressional representatives, the State of California, a tribal representative, and members of the general public. Of the 12 comments, 8 fully supported the proposal. The remaining commenters raised several issues, which are discussed below.

Bale Technology

Comment: APHIS must test the bale technology to ensure that the plastic bales will not breach. In addition, APHIS should use its own experts to validate the research data provided by the technology vendors and their consultants regarding the safety of bale technology.

Response: As cited in the PRA, independent researchers have tested the baling technology in a variety of situations and firmly established its utility and effectiveness at creating airtight bales of MSW. Because these studies have been peer reviewed, APHIS believes that it is not necessary to repeat the testing performed in the underlying research.

Pest Risk Assessment

Comment: APHIS should revisit its PRA to clarify the roles played by compaction and shredding because whole fruit containing fruit fly or other insect eggs or larvae will not be affected by the anoxic conditions of the bales.

Response: While insect eggs and larvae, including those of fruit flies and other agricultural pests, could theoretically survive in whole fruit under short-term anoxic conditions, whole fruit would not be present in the bales due to the processing, i.e., pulverizing or shredding followed by compaction, of the MSW prior to being baled. As described in the PRA, bale densities are expected to be in excess of 800 kg/m³, so compaction will likely kill most insects, including fruit flies, regardless of stage, and may also neutralize some weed seeds and nematodes. Moreover, bales that remain airtight from creation until burial completely mitigate the risk from all plant pests because the pests and pest propagules cannot escape. That mitigation is universal, i.e., it does not depend on pest type or taxonomy, and probably applies equally to both current and future pests that establish in Hawaii.

Comment: How will APHIS ensure that noxious weeds would not be included in the bales of MSW?

Response: As we discussed in the PRA, the exclusion of most yard and agricultural waste from the baling process will greatly reduce the likelihood that seeds of regulated pest plants will be present in the baled MSW. In addition, very few regulated species are likely to have viable seeds in the bales, either because they mostly reproduce vegetatively, or because they are not found in yards and gardens in residential areas in Hawaii. Species of concern to particular mainland States will be further evaluated in site-specific PRAs to identify any exceptions and assess their potential risks.

Environmental Impacts

Comment: APHIS should research the consequences of any spill of baled MSW during transport.

Response: APHIS conducted several evaluations, including a PRA and an EA to determine the consequences of any spill involving bales containing MSW during transport from Hawaii to the mainland United States. We have determined that there is a very low likelihood that plant pests or noxious weeds would be introduced and disseminated into the mainland United States as a result of this action. As described in the PRA, there is a series of mitigations that would take place including limiting waste materials that would exist in the bales and ensuring proper staging, handling, transport, and burial of these bales. There will also be specific contingency plans for emergency response to potential spills outlined in compliance agreements with specific sites. In addition, short of a barge capsizing (which would be considered catastrophic events and would be cause to initiate emergency consultation), there is essentially no risk of impact on aquatic life from the transport of baled MSW from Hawaii to the mainland United States. Situations where there is potential for impacts occur wherever bales are moved from one staging area or mode of transportation to another. These transfer points include: The facility in Honolulu where bales are initially loaded onto the barges; the unloading facility on the mainland where bales are unloaded from the barges and loaded onto trucks; and the final destination where bales are unloaded from trucks and placed into the landfill. In some scenarios there could be intermediate steps requiring the handling of bales, e.g., an ocean-going barge may offload its bales onto smaller-sized barges to navigate a river; an ocean-going barge may offload its bales onto railcars; and railcars would then need to transfer their bales onto

³ To view the proposed rule and the comments we received, go to <http://www.regulations.gov>, click on the “Advanced Search” tab, and select “Docket Search.” In the Docket ID field, enter APHIS–2005–0047, then click on “Submit.” Clicking on the Docket ID link in the search results page will produce a list of all documents in the docket.

trucks for the final leg of the trip to the landfill.

At each of the bale transfer points identified above, there is a small potential for dropping a bale into the water or, more likely, compromising the integrity of one or more bales of MSW which could result in spillage of the contents on the ground or into the water. In most cases the spilled MSW would be retrieved and the bale repackaged. If this were to happen over water, it would be more difficult to retrieve the spilled MSW, particularly if the integrity of the bale was breached. Any spill, in the event of a broken bale, would be handled in accordance with a spill cleanup plan, attached to each compliance agreement, that provides guidance on what detergents and disinfectants to use, how to safely use them, and how to avoid aquatic contamination.

Comment: Shipping MSW to the mainland from Hawaii should only be done if alternative disposal options are not available.

Response: Municipal jurisdictions within the State of Hawaii will be responsible for determining which disposal option to pursue. APHIS will be responsible for ensuring that if the disposal option includes the movement of MSW from Hawaii to the mainland United States, it occurs in accordance with conditions provided in our regulations and compliance agreements.

Comment: Sending barges with MSW through the Columbia and Snake Rivers would negatively impact the number of fish in the area.

Response: We do not believe that there will be a significant increase in barge traffic in this region due to this action. We will have the opportunity to quantify this assertion when we conduct a site specific PRA and EA for the Columbia River Basin. In addition, APHIS does not regulate barge traffic. Under our authority we ensure that safeguards are in place to prevent the introduction and dissemination of plant pests, noxious weeds, and animal diseases.

APHIS did conduct a biological assessment for this action to determine impacts on listed species of fish and wildlife. We found that there are two types of risks that must be considered in such a situation. One is a physical disruption of the environment caused by the broken bales and the physical retrieval of their strewn contents. Compromised bales or spilled MSW that is on land can be retrieved relatively easily. MSW that is spilled into waterways will be more difficult to retrieve, and some may not be retrievable, resulting in an incremental

degradation of the natural aquatic environment. Since hazardous wastes are not permitted, any negative impacts will be restricted to physical ones and no chemical pollution is likely to result from the MSW itself.

The second type of risk that could result from breaking bales and the spilling of MSW could be from detergents and disinfectants that may be used during a cleanup of any spilled MSW that may occur on land. Detergents and disinfectants would not be effective in aquatic situations, and therefore, would not be used if spills were in or over water. If such tools were used during a cleanup effort, care must be taken to prevent them from entering waterways. Their use would be in accordance with a spill cleanup plan, attached to each compliance agreement, that provides guidance on what detergents and disinfectants to use, how to safely use them, and how to avoid aquatic contamination.

As mentioned above, APHIS will develop a site-specific pest risk assessment and environmental assessment which will examine any risks associated with transporting MSW into specific regions. The public will have an opportunity to comment on those documents before they are finalized.

Comment: Has APHIS conducted any studies on the potential to introduce new plant and animal pathogens to the Columbia Basin Region?

Response: This final rule provides a general framework which will allow for the interstate movement of MSW from Hawaii under certain conditions. One condition of that movement will be that shipments will be moved under provisions outlined in a compliance agreement. A compliance agreement will be developed for each individual site on the mainland of the United States into which these shipments would be moved. For each compliance agreement, APHIS will develop a site-specific pest risk assessment and environmental assessment to examine the risks associated with transporting MSW into the specific region, including into the Columbia Basin region.

Requested Change to the Regulations

Comment: APHIS should add the staging requirement and certification of snail free shipments language found in the PRA to the regulatory text.

Response: The regulations state that garbage must be processed, packaged, safeguarded, and disposed of using a methodology that the Administrator has determined is adequate to prevent the introduction and dissemination of plant pests into noninfested areas of the

United States. In addition, specific provisions will be outlined in individual compliance agreements for site-specific shipments. These provisions would be consistent with those in § 318.13–8, which pertain to inspection of articles and persons moved from Hawaii. We believe that the current provisions in the regulations, combined with site-specific compliance agreements, are sufficient to prevent the introduction and dissemination of snails and other hitchhikers.

Tribal Consultation

Comment: APHIS did not consult with Indian Tribes as directed under Executive Order (EO) 13175 and requested government-to-government consultation.

Response: We were petitioned to amend our regulations by the operators of several landfills located in the area of the Columbia River Basin who expressed an interest in receiving MSW from Hawaii. Therefore, our initial contacts were limited to tribes located within that area. To comply with EO 13175, APHIS contacted the tribal chairs of each of the 13 tribes generally considered as Columbia River Basin Tribes (Burn Paiute Tribe, Coeur d'Alene Tribe, Colville Tribe, Kalispel Tribe, Kootenai Tribe, Nez Perce Tribe, Salish Kootenai Tribes, Shoshone Bannock Tribes, Shoshone Paiute Tribe, Spokane Tribe, Umatilla Indian Reservation, Warm Springs Reservation, and Yakama Indian Nation) in early November 2005. Each of these tribes has ties to the land and resources in and near the Columbia River and its drainage. APHIS believes that if there were any effects on tribes resulting from this rule, these are the tribes most likely to be affected. Each tribe was provided information on our proposed rule, environmental assessment, and pest risk analysis and offered an opportunity to request consultation.

At about the same time, APHIS contacted tribal organizations to determine which additional tribes may be affected and should be contacted. The tribal organizations contacted were the Affiliated Tribes of Northwest Indians (ATNI), the National Congress of American Indians, the National Tribal Environmental Council, and the Intertribal Agriculture Council. In addition, APHIS contacted the Columbia Basin Fish and Wildlife Authority.

In mid-February 2006, an Agency official provided a presentation about the proposed rule at the Winter Conference of the ATNI, and invited requests for tribal consultation. ATNI represents over 55 tribes in the Pacific

Northwest. In early March 2006, the Agency sent reminders to tribal chairs stating that APHIS would consider requests for consultation until March 20, 2006. Although we received both oral and written comments from tribes and tribal members, we received no requests for consultation.

In mid-April 2006, upon publication of the proposed rule, copies of the proposed rule, environmental assessment, and pest risk analysis were mailed to the tribal chairs of each of the above-listed tribes and also to the listed tribal organizations. APHIS encouraged tribes and tribal organizations to submit comments. Based on our actions as described above, we believe that we have complied with EO 13175 for the purposes of this rulemaking. We will follow this final rule with risk and environmental assessments as well as compliance agreements with specific waste management sites located on the mainland of the United States that have expressed interest in receiving MSW from Hawaii. At the time that we make the site-specific assessments available to the public, we will also invite potentially affected tribal governments to engage in consultations with APHIS.

Change Regarding Agricultural and Yard Waste

In the proposed rule, the regulations in 7 CFR 330.402(a)(2) and 9 CFR 94.5(d)(1)(ii) provided that "The interstate movement of agricultural wastes and yard waste from Hawaii to the continental United States is prohibited." After further consideration, we have concluded that this provision, which implies a zero tolerance for agricultural or yard waste, is unrealistic. Despite the presence of yard waste recycling programs in Hawaii and the efforts of waste management companies to separate various types of waste, the presence of an incidental amount of agricultural or yard waste in baled MSW is, in practical terms, unavoidable. This situation was taken into account in the PRA, which recognized that there will likely be some minimal volume of agricultural and yard waste entering the pathway despite efforts to exclude that waste. Therefore, we have modified 7 CFR 330.402(a)(2) and 9 CFR 94.5(d)(1)(ii) in this final rule to read: "The interstate movement from Hawaii to the continental United States of agricultural wastes and yard waste (other than incidental amounts (less than 3 percent) that may be present in municipal solid waste despite reasonable efforts to maintain source

separation) is prohibited."⁴ We believe this change will establish a more practical standard with respect to agricultural and yard waste while continuing to prohibit the interstate movement of dedicated shipments or large quantities of such waste.

Therefore, for the reasons given in the proposed rule and in this document, we are adopting the proposed rule as a final rule, with the change discussed in this document.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

We are amending the regulations pertaining to certain garbage to provide for the interstate movement of garbage from Hawaii subject to measures designed to protect against the dissemination of plant pests into noninfested areas of the continental United States. We are amending these regulations upon request in order to provide the State of Hawaii with additional waste disposal options, and after determining that the action will not result in the introduction of plant or animal pests or diseases into the continental United States from Hawaii.

For the purposes of this analysis, we have determined that the Island of Oahu (where Honolulu is located) is expected to be the source of most, if not all, of any MSW that is moved to the continental United States under the regulations. Oahu has only one municipal landfill (Waimanalo Gulch), and there is no alternative landfill on the island at the present time.

Oahu generates approximately 1.6 million tons of MSW per year. That figure is expected to rise an additional 20,000 tons and remain at that level for the next 10 years. Of the current total, 500,000 tons are recycled, 600,000 tons are burned for electricity, and 500,000 tons are landfilled. Of the 500,000 tons that are landfilled, 200,000 tons go to a privately operated construction and demolition landfill and 300,000 tons go to Waimanalo Gulch municipal landfill. Waimanalo Gulch landfill is owned by the City of Honolulu and managed by a private company.

⁴ Based on the mean percentage of yard waste at the Waimanalo Gulch landfill, Oahu (6.0 percent $\pm$ 3.4 percent) and on Hawaii (5.4 percent), if companies are only 50 percent effective with additional screening and removal of visible yard waste in transfer stations or on bale processing lines, the fraction of yard waste in baled Hawaiian MSW should be reduced to 3 percent or less.

The Island of Hawaii (where Hilo is located) is another potential source of MSW that would move to the continental United States if the proposal is adopted. The island's only two landfills are located approximately 75 miles apart, and one (South Hilo Sanitary Landfill) may be nearing capacity. To date, one waste management service company has proposed to bale and move at least some of the island's MSW to a landfill in Washington State. Approximately 200 tons of garbage per day is landfilled at the South Hilo facility.⁵

This rule will allow for the garbage to be compacted into bales, and then wrapped in plastic for transport to the mainland (the baling and wrapping would take place in the State of Hawaii). Estimates of the annual volume of MSW that would be shipped from Oahu to the continental United States range from 100,000 tons to 350,000 tons.⁶

Need for Rule and Alternatives Considered

These are being amended upon request to provide public officials in Hawaii another option for disposal of the State's waste. The only other regulatory alternative is to leave the regulations unchanged, but that alternative would unnecessarily limit Hawaiian officials' disposal options.

Small Entity Impact

The Regulatory Flexibility Act (RFA) requires that agencies consider the economic impact of rules on small entities, *i.e.*, small businesses, organizations, and governmental jurisdictions. The changes to the regulations will allow for the movement of MSW from Hawaii to the continental United States.

These changes will not have a significant economic impact on a substantial number of small entities, because few entities, large or small, are likely to be affected. Only a handful of businesses are potentially affected by the rule—*e.g.*, the company or companies that would secure the contract to move the waste from Hawaii, the barge line or lines that would physically move the waste to the mainland, the trucking company/railroad on the mainland that would physically move the waste to the interior landfill locations, and perhaps a few companies on Hawaii that would be forced to discontinue participation (or play a reduced role) in the State's waste

⁵ Source: News accounts in the *Honolulu Star-Bulletin*.

⁶ Source: News accounts in the *Honolulu Star-Bulletin* and APHIS staff. Similar estimates for the Island of Hawaii are not available.

disposal process once shipments to the mainland began. Those businesses that will participate in the movement of the waste to the mainland could be expected to benefit, since they will generate additional revenue and, presumably, profits from the increased business activity. Conversely, those businesses that will either no longer participate or will play a reduced role in Hawaii's waste disposal process could be expected to suffer lost revenue.

The revenues generated by the private company that manages the Waimanalo Gulch landfill, for example, are presumably tied to the volume of waste that is landfilled there. If waste is diverted from Waimanalo Gulch to the mainland, that company's revenues are likely to be reduced. The City of Honolulu and the County of Hawaii are also potentially affected by the proposed changes.

The preceding discussion assumes that the rule will not have significant environmentally related economic consequences for small entities. There are several reasons. First, the environmental assessment in this document concludes that the movement of MSW from Hawaii to the continental United States (using the plastic-baled methodology) will not have a significant impact on the environment. Second, site-specific environmental assessments will also be prepared as requests for compliance agreements are made. The site-specific assessments, which will be made available for public comment, will allow APHIS to address any environmental issues that may arise based on precise destination and handling protocols for the proposed movements, which are now unknown.

Although the size of virtually all of the businesses potentially affected by the rule is unknown, it is reasonable to assume that at least some could be small. This assumption is based on composite data for providers of the same and similar services in the United States. As an example, North American Industry Classification System (NAICS) category 562 ("Waste Management and Remediation Services") consists of establishments engaged in the collection, treatment, and disposal of waste materials. Under the U.S. Small Business Administration's (SBA) size standards, the small entity threshold for establishments that fall into most of the activity subcategories under NAICS 562 is annual receipts of \$10.5 million. For all 18,405 U.S. establishments in NAICS 562 in 2002, average per-establishment receipts that year were \$2.8 million, an indication that most waste management

service companies are small entities.⁷ Annual receipt data for three of the four firms that have proposed to move Hawaii's waste to the mainland are not available. Although annual receipt data for the fourth company are also not available, that company is considered large by virtue of it being a subsidiary of a publicly owned firm with receipts (operating revenues) of over \$13 billion in 1999.⁸ The private company that currently manages the Waimanalo Gulch landfill is also a subsidiary of that publicly owned firm.

As another example, there were 677 U.S. entities in NAICS category 483113 in 2002. NAICS 483113 consists of entities primarily engaged in providing deep sea transportation of cargo to and from domestic ports. For all 677 entities, average per-entity employment that year was 36, well below the SBA's small entity threshold of 500 employees for entities in that NAICS category.⁹

Under the RFA, the term "small governmental jurisdiction" generally means cities, counties, townships, etc., with a population of less than 50,000. The City of Honolulu, which owns the Waimanalo Gulch landfill, does not qualify as a small entity because its population exceeds 50,000. The County of Hawaii, where Hilo is located, also has a population that exceeds 50,000.

The changes to the regulations will not, as noted previously, have a significant economic impact on a substantial number of small entities, because few entities, large or small, are likely to be affected. The size of virtually all of the businesses potentially affected by the changes to the regulations is unknown, but it is reasonable to assume that at least some could be small.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

Executive Order 12988

This final rule has been reviewed under Executive Order 12988, Civil

⁷ Source: U.S. Census Bureau (2002 Economic Census) and SBA.

⁸ Source: Various Internet sites.

⁹ Source: U.S. Census Bureau (2002 Economic Census) and SBA.

Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are inconsistent with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

National Environmental Policy Act

An environmental assessment and finding of no significant impact have been prepared for this final rule. The environmental assessment provides a basis for the conclusion that the importation of MSW from Hawaii to the mainland United States will not have a significant impact on the quality of the human environment. Based on the finding of no significant impact, the Administrator of the Animal and Plant Health Inspection Service has determined that an environmental impact statement need not be prepared.

The environmental assessment and finding of no significant impact were prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

The environmental assessment and finding of no significant impact may be viewed on the Regulations.gov Web site.¹⁰ Copies of the environmental assessment and finding of no significant impact are also available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue, SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect copies are requested to call ahead on (202) 690–2817 to facilitate entry into the reading room. In addition, copies may be obtained by writing to the individual listed under **FOR FURTHER INFORMATION CONTACT.**

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the information collection or recordkeeping requirements included in this rule have been approved by the Office of Management and Budget

¹⁰ Go to <http://www.regulations.gov>, click on the "Advanced Search" tab and select "Docket Search." In the Docket ID field, enter APHIS–2005–0047, click on "Submit," then click on the Docket ID link in the search results page. The environmental assessment and finding of no significant impact will appear in the resulting list of documents.

(OMB) under OMB control number 0579-0292.

E-Government Act Compliance

The Animal and Plant Health Inspection Service is committed to compliance with the E-Government Act to promote the use of the Internet and other information technologies, to provide increased opportunities for citizen access to Government information and services, and for other purposes. For information pertinent to E-Government Act compliance related to this rule, please contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734-7477.

List of Subjects

7 CFR Part 330

Customs duties and inspection, Imports, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Transportation.

9 CFR Part 94

Animal diseases, Imports, Livestock, Meat and meat products, Milk, Poultry and poultry products, Reporting and recordkeeping requirements.

■ Accordingly, we are amending 7 CFR part 330 and 9 CFR part 94 as follows:

Title 7—[Amended]

PART 330—FEDERAL PLANT PEST REGULATIONS; GENERAL; PLANT PESTS; SOIL, STONE, AND QUARRY PRODUCTS; GARBAGE

■ 1. The authority citation for part 330 continues to read as follows:

Authority: 7 U.S.C. 450, 7701-7772, 7781-7786, and 8301-8317; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.3.

■ 2. In § 330.100, a definition for *State* is added and the definition for *United States* is revised to read as follows:

§ 330.100 Definitions.

* * * * *

State. Any of the several States of the United States, the Commonwealth of the Northern Mariana Islands, the Commonwealth of Puerto Rico, the District of Columbia, Guam, the Virgin Islands of the United States, or any other territory or possession of the United States.

* * * * *

United States. All of the States.

* * * * *

■ 3. Subpart—Garbage, § 330.400, is revised to read as follows:

Subpart—Garbage

Sec.

330.400 Regulation of certain garbage.

330.401 Garbage generated onboard a conveyance.

330.402 Garbage generated in Hawaii.

330.403 Compliance agreement and cancellation.

Subpart—Garbage

§ 330.400 Regulation of certain garbage.

(a) *Certain interstate movements and imports*—(1) *Interstate movements of garbage from Hawaii and U.S. territories and possessions to other States.* Hawaii, Puerto Rico, American Samoa, the Commonwealth of the Northern Mariana Islands, the Federated States of Micronesia, Guam, the U.S. Virgin Islands, Republic of the Marshall Islands, and the Republic of Palau are hereby quarantined, and the movement of garbage therefrom to any other State is hereby prohibited except as provided in this subpart in order to prevent the introduction and spread of exotic plant pests and diseases.

(2) *Imports of garbage.* In order to protect against the introduction of exotic animal and plant pests and diseases, the importation of garbage from all foreign countries except Canada is prohibited except as provided in § 330.401(b).

(b) *Definitions—Agricultural waste.* Byproducts generated by the rearing of animals and the production and harvest of crops or trees. Animal waste, a large component of agricultural waste, includes waste (e.g., feed waste, bedding and litter, and feedlot and paddock runoff) from livestock, dairy, and other animal-related agricultural and farming practices.

Approved facility. A facility approved by the Administrator, Animal and Plant Health Inspection Service, upon his determination that it has equipment and uses procedures that are adequate to prevent the dissemination of plant pests and livestock or poultry diseases, and that it is certified by an appropriate Government official as currently complying with the applicable laws for environmental protection.

Approved sewage system. A sewage system approved by the Administrator, Animal and Plant Health Inspection Service, upon his determination that the system is designed and operated in such a way as to preclude the discharge of sewage effluents onto land surfaces or into lagoons or other stationary waters, and otherwise is adequate to prevent the dissemination of plant pests and livestock or poultry diseases, and that is certified by an appropriate Government official as currently complying with the applicable laws for environmental protection.

Carrier. The principal operator of a means of conveyance.

Garbage. All waste material that is derived in whole or in part from fruits, vegetables, meats, or other plant or animal (including poultry) material, and other refuse of any character whatsoever that has been associated with any such material.

Incineration. To reduce garbage to ash by burning.

Interstate. From one State into or through any other State.

Sterilization. Cooking garbage at an internal temperature of 212 °F for 30 minutes.

Stores. The food, supplies, and other provisions carried for the day-to-day operation of a conveyance and the care and feeding of its operators.

Yard waste. Solid waste composed predominantly of grass clippings, leaves, twigs, branches, and other garden refuse.

§ 330.401 Garbage generated onboard a conveyance.

(a) *Applicability.* This section applies to garbage generated onboard any means of conveyance during international or interstate movements as provided in this section and includes food scraps, table refuse, galley refuse, food wrappers or packaging materials, and other waste material from stores, food preparation areas, passengers' or crews' quarters, dining rooms, or any other areas on the means of conveyance. This section also applies to meals and other food that were available for consumption by passengers and crew on an aircraft but were not consumed.

(1) Not all garbage generated onboard a means of conveyance is regulated for the purposes of this section. Garbage regulated for the purposes of this section is defined as "regulated garbage" in paragraphs (b) and (c) of this section.

(2) Garbage that is commingled with regulated garbage is also regulated garbage.

(b) *Garbage regulated because of movements outside the United States or Canada.* For purposes of this section, garbage on or removed from a means of conveyance is regulated garbage, if, when the garbage is on or removed from the means of conveyance, the means of conveyance has been in any port outside the United States and Canada within the previous 2-year period. There are, however, two exceptions to this provision. These exceptions are as follows:

(1) *Exception 1: Aircraft.* Garbage on or removed from an aircraft is exempt from requirements under paragraph (d) of this section if the following

conditions are met when the garbage is on or removed from the aircraft:

(i) The aircraft had previously been cleared of all garbage and of all meats and meat products, whatever the country of origin, except meats that are shelf-stable; all fresh and condensed milk and cream from countries designated in 9 CFR 94.1 as those in which foot-and-mouth disease exists; all fresh fruits and vegetables; and all eggs; and the items previously cleared from the aircraft as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraphs (d)(2) and (d)(3) of this section.

(ii) After the garbage and stores referred to in paragraph (b)(1)(i) of this section were removed, the aircraft has not been in a non-Canadian foreign port.

(2) *Exception 2: Other conveyances.* Garbage on or removed in the United States from a means of conveyance other than an aircraft is exempt from requirements under paragraph (d) of this section if the following conditions are met when the garbage is on or removed from the means of conveyance:

(i) The means of conveyance is accompanied by a certificate from an inspector stating the following:

(A) That the means of conveyance had previously been cleared of all garbage and of all meats and meat products, whatever the country of origin, except meats that are shelf-stable; all fresh and condensed milk and cream from countries designated in 9 CFR 94.1 as those in which foot-and-mouth disease exists; all fresh fruits and vegetables; and all eggs; and the items previously cleared from the means of conveyance as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraphs (d)(2) and (d)(3) of this section.

(B) That the means of conveyance had then been cleaned and disinfected in the presence of the inspector; and

(ii) Since being cleaned and disinfected, the means of conveyance has not been in a non-Canadian foreign port.

(c) *Garbage regulated because of certain movements to or from Hawaii, territories, or possessions.* For purposes of this section, garbage on or removed from a means of conveyance is regulated garbage, if at the time the garbage is on or removed from the means of conveyance, the means of conveyance has moved during the previous 1-year period, either directly or indirectly, to the continental United States from any territory or possession or from Hawaii, to any territory or possession from any

other territory or possession or from Hawaii, or to Hawaii from any territory or possession. There are, however, two exceptions to this provision. These exceptions are as follows:

(1) *Exception 1: Aircraft.* Garbage on or removed from an aircraft is exempt from requirements under paragraph (d) of this section if the following two conditions are met when the garbage is on or removed from the aircraft:

(i) The aircraft had been previously cleared of all garbage and all fresh fruits and vegetables, and the items previously cleared from the aircraft as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraphs (d)(2) and (d)(3) of this section.

(ii) After the garbage and stores referred to in paragraph (c)(1)(i) of this section were removed, the aircraft has not moved to the continental United States from any territory or possession or from Hawaii; to any territory or possession from any other territory or possession or from Hawaii; or to Hawaii from any territory or possession.

(2) *Exception 2: Other conveyances.* Garbage on or removed from a means of conveyance other than an aircraft is exempt from requirements under paragraph (d) of this section if the following two conditions are met when the garbage is on or removed from the means of conveyance:

(i) The means of conveyance is accompanied by a certificate from an inspector stating that the means of conveyance had been cleared of all garbage and all fresh fruits and vegetables; and the items previously cleared from the means of conveyance as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraphs (d)(2) and (d)(3) of this section.

(ii) After being cleared of the garbage and stores referred to in paragraph (c)(2)(i) of this section, the means of conveyance has not moved to the continental United States from any territory or possession or from Hawaii; to any territory or possession from any other territory or possession or from Hawaii; or to Hawaii from any territory or possession.

(d) *Restrictions on regulated garbage.* (1) Regulated garbage may not be disposed of, placed on, or removed from a means of conveyance except in accordance with this section.

(2) Regulated garbage is subject to general surveillance for compliance with this section by inspectors and to disposal measures authorized by the Plant Protection Act and the Animal

Health Protection Act to prevent the introduction and dissemination of pests and diseases of plants and livestock.

(3) All regulated garbage must be contained in tight, covered, leak-proof receptacles during storage on board a means of conveyance while in the territorial waters, or while otherwise within the territory of the United States. All such receptacles shall be contained inside the guard rail if on a watercraft. Such regulated garbage shall not be unloaded from such means of conveyance in the United States unless such regulated garbage is removed in tight, covered, leak-proof receptacles under the direction of an inspector to an approved facility for incineration, sterilization, or grinding into an approved sewage system, under direct supervision by such an inspector, or such regulated garbage is removed for other handling in such manner and under such supervision as may, upon request in specific cases, be approved by the Administrator as adequate to prevent the introduction and dissemination of plant pests and animal diseases and sufficient to ensure compliance with applicable laws for environmental protection. *Provided that*, a cruise ship may dispose of regulated garbage in landfills at Alaskan ports only, if and only if the cruise ship does not have prohibited or restricted meat or animal products on board at the time it enters Alaskan waters for the cruise season, and only if the cruise ship, except for incidental travel through international waters necessary to navigate safely between ports, remains in Canadian and U.S. waters off the west coast of North America, and calls only at continental U.S. and Canadian ports during the entire cruise season.

(i) Application for approval of a facility or sewage system may be made in writing by the authorized representative of any carrier or by the official having jurisdiction over the port or place of arrival of the means of conveyance to the Administrator, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Washington, DC 20250. The application must be endorsed by the operator of the facility or sewage system.

(ii) Approval will be granted if the Administrator determines that the requirements set forth in this section are met. Approval may be denied or withdrawn at any time, if the Administrator determines that such requirements are not met, after notice of the proposed denial or withdrawal of the approval and the reasons therefor, and an opportunity to demonstrate or achieve compliance with such

requirements, has been afforded to the operator of the facility or sewage system and to the applicant for approval. However, approval may also be withdrawn without such prior procedure in any case in which the public health, interest, or safety requires immediate action, and in such case, the operator of the facility or sewage system and the applicant for approval shall promptly thereafter be given notice of the withdrawal and the reasons therefor and an opportunity to show cause why the approval should be reinstated.

(e) The Plant Protection and Quarantine Programs and Veterinary Services, Animal, and Plant Health Inspection Service, will cooperate with other Federal, State, and local agencies responsible for enforcing other statutes and regulations governing disposal of the regulated garbage to the end that such disposal shall be adequate to prevent the dissemination of plant pests and livestock or poultry diseases and comply with applicable laws for environmental protection. The inspectors, in maintaining surveillance over regulated garbage movements and disposal, shall coordinate their activities with the activities of representatives of the Environmental Protection Agency and other Federal, State, and local agencies also having jurisdiction over such regulated garbage.

§ 330.402 Garbage generated in Hawaii.

(a) *Applicability.* This section applies to garbage generated in households, commercial establishments, institutions, and businesses prior to interstate movement from Hawaii, and includes used paper, discarded cans and bottles, and food scraps. Such garbage includes, and is commonly known as, municipal solid waste.

(1) Industrial process wastes, mining wastes, sewage sludge, incinerator ash, or other wastes from Hawaii that the Administrator determines do not pose risks of introducing animal or plant pests or diseases into the continental United States are not regulated under this section.

(2) The interstate movement from Hawaii to the continental United States of agricultural wastes and yard waste (other than incidental amounts (less than 3 percent) that may be present in municipal solid waste despite reasonable efforts to maintain source separation) is prohibited.

(3) Garbage generated onboard any means of conveyance during interstate movement from Hawaii is regulated under § 330.401.

(b) *Restrictions on interstate movement of garbage.* The interstate movement of garbage generated in

Hawaii to the continental United States is regulated as provided in this section.

(1) The garbage must be processed, packaged, safeguarded, and disposed of using a methodology that the Administrator has determined is adequate to prevent the introduction or dissemination of plant pests into noninfested areas of the United States.

(2) The garbage must be moved under a compliance agreement in accordance with § 330.403. APHIS will only enter into a compliance agreement when the Administrator is satisfied that the Agency has first satisfied all its obligations under the National Environmental Policy Act and all applicable Federal and State statutes to fully assess the impacts associated with the movement of garbage under the compliance agreement.

(3) All such garbage moved interstate from Hawaii to any of the continental United States must be moved in compliance with all applicable laws for environmental protection.

§ 330.403 Compliance agreement and cancellation.

(a) Any person engaged in the business of handling or disposing of garbage in accordance with this subpart must first enter into a compliance agreement with the Animal and Plant Health Inspection Service (APHIS). Compliance agreement forms (PPQ Form 519) are available without charge from local USDA/APHIS/Plant Protection and Quarantine offices, which are listed in telephone directories.

(b) A person who enters into a compliance agreement, and employees or agents of that person, must comply with the following conditions and any supplemental conditions which are listed in the compliance agreement, as deemed by the Administrator to be necessary to prevent the dissemination into or within the United States of plant pests and livestock or poultry diseases:

(1) Comply with all applicable provisions of this subpart;

(2) Allow inspectors access to all records maintained by the person regarding handling or disposal of garbage, and to all areas where handling or disposal of garbage occurs;

(3)(i) If the garbage is regulated under § 330.401, remove garbage from a means of conveyance only in tight, covered, leak-proof receptacles;

(ii) If the garbage is regulated under § 330.402, transport garbage interstate in packaging approved by the Administrator;

(4) Move the garbage only to a facility approved by the Administrator; and

(5) At the approved facility, dispose of the garbage in a manner approved by the Administrator and described in the compliance agreement.

(c) Approval for a compliance agreement may be denied at any time if the Administrator determines that the applicant has not met or is unable to meet the requirements set forth in this subpart. Prior to denying any application for a compliance agreement, APHIS will provide notice to the applicant thereof, and will provide the applicant with an opportunity to demonstrate or achieve compliance with requirements.

(d) Any compliance agreement may be canceled, either orally or in writing, by an inspector whenever the inspector finds that the person who has entered into the compliance agreement has failed to comply with this subpart. If the cancellation is oral, the cancellation and the reasons for the cancellation will be confirmed in writing as promptly as circumstances allow. Any person whose compliance agreement has been canceled may appeal the decision, in writing, within 10 days after receiving written notification of the cancellation. The appeal must state all of the facts and reasons upon which the person relies to show that the compliance agreement was wrongfully canceled. As promptly as circumstances allow, the Administrator will grant or deny the appeal, in writing, stating the reasons for the decision. A hearing will be held to resolve any conflict as to any material fact. Rules of practice concerning a hearing will be adopted by the Administrator. This administrative remedy must be exhausted before a person can file suit in court challenging the cancellation of a compliance agreement.

(e) Where a compliance agreement is denied or canceled, the person who entered into or applied for the compliance agreement may be prohibited, at the discretion of the Administrator, from handling or disposing of regulated garbage.

(Approved by the Office of Management and Budget under control numbers 0579–0015, 0579–0054, and 0579–0292)

Title 9—[AMENDED]

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), EXOTIC NEWCASTLE DISEASE, AFRICAN SWINE FEVER, CLASSICAL SWINE FEVER, AND BOVINE SPONGIFORM ENCEPHALOPATHY: PROHIBITED AND RESTRICTED IMPORTATIONS

■ 4. The authority citation for part 94 continues to read as follows:

Authority: 7 U.S.C. 450, 7701–7772, 7781–7786, and 8301–8317; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.4.

■ 5. In § 94.0, a definition for *State* is added and the definition for *United States* is revised to read as follows:

§ 94.0 Definitions.

* * * * *

State. Any of the several States of the United States, the Commonwealth of the Northern Mariana Islands, the Commonwealth of Puerto Rico, the District of Columbia, Guam, the Virgin Islands of the United States, or any other territory or possession of the United States.

* * * * *

United States. All of the States.

* * * * *

■ 6. Section 94.5 is revised to read as follows:

§ 94.5 Regulation of certain garbage.

(a) *General restrictions*—(1) *Interstate movements of garbage from Hawaii and U.S. territories and possessions to the continental United States.* Hawaii, Puerto Rico, American Samoa, the Commonwealth of the Northern Mariana Islands, the Federated States of Micronesia, Guam, the U.S. Virgin Islands, Republic of the Marshall Islands, and the Republic of Palau are hereby quarantined, and the movement of garbage therefrom to any other State is hereby prohibited except as provided in this section in order to prevent the introduction and spread of exotic plant pests and diseases.

(2) *Imports of garbage.* In order to protect against the introduction of exotic animal and plant pests, the importation of garbage from all foreign countries except Canada is prohibited except as provided in paragraph (c)(2) of this section.

(b) *Definitions*—*Agricultural waste.* Byproducts generated by the rearing of animals and the production and harvest of crops or trees. Animal waste, a large component of agricultural waste, includes waste (e.g., feed waste, bedding and litter, and feedlot and paddock

runoff) from livestock, dairy, and other animal-related agricultural and farming practices.

Approved facility. A facility approved by the Administrator, Animal and Plant Health Inspection Service, upon his determination that it has equipment and uses procedures that are adequate to prevent the dissemination of plant pests and livestock or poultry diseases, and that it is certified by an appropriate Government official as currently complying with the applicable laws for environmental protection.

Approved sewage system. A sewage system approved by the Administrator, Animal and Plant Health Inspection Service, upon his determination that the system is designed and operated in such a way as to preclude the discharge of sewage effluents onto land surfaces or into lagoons or other stationary waters, and otherwise is adequate to prevent the dissemination of plant pests and livestock or poultry diseases, and that is certified by an appropriate Government official as currently complying with the applicable laws for environmental protection.

Carrier. The principal operator of a means of conveyance.

Continental United States. The 49 States located on the continent of North America and the District of Columbia.

Garbage. All waste material that is derived in whole or in part from fruits, vegetables, meats, or other plant or animal (including poultry) material, and other refuse of any character whatsoever that has been associated with any such material.

Incineration. To reduce garbage to ash by burning.

Inspector. A properly identified employee of the U.S. Department of Agriculture or other person authorized by the Department to enforce the provisions of applicable statutes, quarantines, and regulations.

Interstate. From one State into or through any other State.

Person. Any individual, corporation, company, association, firm, partnership, society, or joint stock company.

Shelf-stable. The condition achieved in a product, by application of heat, alone or in combination with other ingredients and/or other treatments, of being rendered free of microorganisms capable of growing in the product under nonrefrigerated conditions (over 50 °F or 10 °C).

Sterilization. Cooking garbage at an internal temperature of 212 °F for 30 minutes.

Stores. The food, supplies, and other provisions carried for the day-to-day operation of a conveyance and the care and feeding of its operators.

Yard waste. Solid waste composed predominantly of grass clippings, leaves, twigs, branches, and other garden refuse.

(c) *Garbage generated onboard a conveyance*—(1) *Applicability.* This section applies to garbage generated onboard any means of conveyance during international or interstate movements as provided in this section and includes food scraps, table refuse, galley refuse, food wrappers or packaging materials, and other waste material from stores, food preparation areas, passengers' or crews' quarters, dining rooms, or any other areas on the means of conveyance. This section also applies to meals and other food that were available for consumption by passengers and crew on an aircraft but were not consumed.

(i) Not all garbage generated onboard a means of conveyance is regulated for the purposes of this section. Garbage regulated for the purposes of this section is defined as "regulated garbage" in paragraphs (c)(2) and (c)(3) of this section.

(ii) Garbage that is commingled with regulated garbage is also regulated garbage.

(2) *Garbage regulated because of movements outside the United States or Canada.* For purposes of this section, garbage on or removed from a means of conveyance is regulated garbage, if, when the garbage is on or removed from the means of conveyance, the means of conveyance has been in any port outside the United States and Canada within the previous 2-year period. There are, however, two exceptions to this provision. These exceptions are as follows:

(i) *Exception 1: Aircraft.* Garbage on or removed from an aircraft is exempt from requirements under paragraph (c)(4) of this section if the following conditions are met when the garbage is on or removed from the aircraft:

(A) The aircraft had previously been cleared of all garbage and of all meats and meat products, whatever the country of origin, except meats that are shelf-stable; all fresh and condensed milk and cream from countries designated in § 94.1 as those in which foot-and-mouth disease exists; all fresh fruits and vegetables; and all eggs; and the items previously cleared from the aircraft as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraphs (c)(4)(ii) and (c)(4)(iii) of this section.

(B) After the garbage and stores referred to in paragraph (c)(2)(i)(A) of this section were removed, the aircraft

has not been in a non-Canadian foreign port.

(ii) *Exception 2: Other conveyances.* Garbage on or removed in the United States from a means of conveyance other than an aircraft is exempt from requirements under paragraph (c)(4) of this section if the following conditions are met when the garbage is on or removed from the means of conveyance:

(A) The means of conveyance is accompanied by a certificate from an inspector stating the following:

(1) That the means of conveyance had previously been cleared of all garbage and of all meats and meat products, whatever the country of origin, except meats that are shelf-stable; all fresh and condensed milk and cream from countries designated in § 94.1 as those in which foot-and-mouth disease exists; all fresh fruits and vegetables; and all eggs; and the items previously cleared from the means of conveyance as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraphs (c)(4)(ii) and (c)(4)(iii) of this section.

(2) That the means of conveyance had then been cleaned and disinfected in the presence of the inspector; and

(B) Since being cleaned and disinfected, the means of conveyance has not been in a non-Canadian foreign port.

(3) *Garbage regulated because of certain movements to or from Hawaii, territories, or possessions.* For purposes of this section, garbage on or removed from a means of conveyance is regulated garbage, if at the time the garbage is on or removed from the means of conveyance, the means of conveyance has moved during the previous 1-year period, either directly or indirectly, to the continental United States from any territory or possession or from Hawaii, to any territory or possession from any other territory or possession or from Hawaii, or to Hawaii from any territory or possession. There are, however, two exceptions to this provision. These exceptions are as follows:

(i) *Exception 1: Aircraft.* Garbage on or removed from an aircraft is exempt from requirements under paragraph (c)(4) of this section if the following two conditions are met when the garbage is on or removed from the aircraft:

(A) The aircraft had been previously cleared of all garbage and all fresh fruits and vegetables, and the items previously cleared from the aircraft as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraphs (c)(4)(ii) and (c)(4)(iii) of this section.

(B) After the garbage and stores referred to in paragraph (c)(3)(i)(A) of this section were removed, the aircraft has not moved to the continental United States from any territory or possession or from Hawaii, to any territory or possession from any other territory or possession or from Hawaii, or to Hawaii from any territory or possession.

(ii) *Exception 2: Other conveyances.* Garbage on or removed from a means of conveyance other than an aircraft is exempt from requirements under paragraph (c)(4) of this section if the following two conditions are met when the garbage is on or removed from the means of conveyance:

(A) The means of conveyance is accompanied by a certificate from an inspector stating that the means of conveyance had been cleared of all garbage and all fresh fruits and vegetables, and the items previously cleared from the means of conveyance as prescribed by this paragraph have been disposed of according to the procedures for disposing of regulated garbage, as specified in paragraphs (c)(4)(ii) and (c)(4)(iii) of this section.

(B) After being cleared of the garbage and stores referred to in paragraph (c)(3)(ii)(A) of this section, the means of conveyance has not moved to the continental United States from any territory or possession or from Hawaii; to any territory or possession from any other territory or possession or from Hawaii; or to Hawaii from any territory or possession.

(4) *Restrictions on regulated garbage.*

(i) Regulated garbage may not be disposed of, placed on, or removed from a means of conveyance except in accordance with this section.

(ii) Regulated garbage is subject to general surveillance for compliance with this section by inspectors and to disposal measures authorized by the Plant Protection Act and the Animal Health Protection Act to prevent the introduction and dissemination of pests and diseases of plants and livestock.

(iii) All regulated garbage must be contained in tight, covered, leak-proof receptacles during storage on board a means of conveyance while in the territorial waters, or while otherwise within the territory of the United States. All such receptacles shall be contained inside the guard rail if on a watercraft. Such regulated garbage shall not be unloaded from such means of conveyance in the United States unless such regulated garbage is removed in tight, covered, leak-proof receptacles under the direction of an inspector to an approved facility for incineration, sterilization, or grinding into an approved sewage system, under direct

supervision by such an inspector, or such regulated garbage is removed for other handling in such manner and under such supervision as may, upon request in specific cases, be approved by the Administrator as adequate to prevent the introduction and dissemination of plant pests and animal diseases and sufficient to ensure compliance with applicable laws for environmental protection. *Provided that*, a cruise ship may dispose of regulated garbage in landfills at Alaskan ports only, if and only if the cruise ship does not have prohibited or restricted meat or animal products on board at the time it enters Alaskan waters for the cruise season, and only if the cruise ship, except for incidental travel through international waters necessary to navigate safely between ports, remains in Canadian and U.S. waters off the west coast of North America, and calls only at continental U.S. and Canadian ports during the entire cruise season.

(A) Application for approval of a facility or sewage system may be made in writing by the authorized representative of any carrier or by the official having jurisdiction over the port or place of arrival of the means of conveyance to the Administrator, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Washington, DC 20250. The application must be endorsed by the operator of the facility or sewage system.

(B) Approval will be granted if the Administrator determines that the requirements set forth in this section are met. Approval may be denied or withdrawn at any time, if the Administrator determines that such requirements are not met, after notice of the proposed denial or withdrawal of the approval and the reasons therefor, and an opportunity to demonstrate or achieve compliance with such requirements, has been afforded to the operator of the facility or sewage system and to the applicant for approval. However, approval may also be withdrawn without such prior procedure in any case in which the public health, interest, or safety requires immediate action, and in such case, the operator of the facility or sewage system and the applicant for approval shall promptly thereafter be given notice of the withdrawal and the reasons therefore and an opportunity to show cause why the approval should be reinstated.

(iv) The Plant Protection and Quarantine Programs and Veterinary Services, Animal, and Plant Health Inspection Service, will cooperate with other Federal, State, and local agencies

responsible for enforcing other statutes and regulations governing disposal of the regulated garbage to the end that such disposal shall be adequate to prevent the dissemination of plant pests and livestock or poultry diseases and comply with applicable laws for environmental protection. The inspectors, in maintaining surveillance over regulated garbage movements and disposal, shall coordinate their activities with the activities of representatives of the U.S. Environmental Protection Agency and other Federal, State, and local agencies also having jurisdiction over such regulated garbage.

(d) *Garbage generated in Hawaii*—(1) *Applicability*. This section applies to garbage generated in households, commercial establishments, institutions, and businesses prior to interstate movement from Hawaii, and includes used paper, discarded cans and bottles, and food scraps. Such garbage includes, and is commonly known as, municipal solid waste.

(i) Industrial process wastes, mining wastes, sewage sludge, incinerator ash, or other wastes from Hawaii that the Administrator determines do not pose risks of introducing animal or plant pests or diseases into the continental United States are not regulated under this section.

(ii) The interstate movement from Hawaii to the continental United States of agricultural wastes and yard waste (other than incidental amounts (less than 3 percent) that may be present in municipal solid waste despite reasonable efforts to maintain source separation) is prohibited.

(iii) Garbage generated onboard any means of conveyance during interstate movement from Hawaii is regulated under paragraph (c) of this section.

(2) *Restrictions on interstate movement of garbage*. The interstate movement of garbage generated in Hawaii to the continental United States is regulated as provided in this section.

(i) The garbage must be processed, packaged, safeguarded, and disposed of using a methodology that the Administrator has determined is adequate to prevent the introduction and dissemination of plant pests into noninfested areas of the United States.

(ii) The garbage must be moved under a compliance agreement in accordance with paragraph (e) of this section. APHIS will only enter into a compliance agreement when the Administrator is satisfied that the Agency has first satisfied all its obligations under the National Environmental Policy Act and all applicable Federal and State statutes to fully assess the impacts associated

with the movement of garbage under the compliance agreement.

(iii) All such garbage moved interstate from Hawaii to any of the continental United States must be moved in compliance with all applicable laws for environmental protection.

(e) *Compliance agreement and cancellation*—(1) Any person engaged in the business of handling or disposing of garbage in accordance with this section must first enter into a compliance agreement with the Animal and Plant Health Inspection Service (APHIS). Compliance agreement forms (PPQ Form 519) are available without charge from local USDA/APHIS/Plant Protection and Quarantine offices, which are listed in telephone directories.

(2) A person who enters into a compliance agreement, and employees or agents of that person, must comply with the following conditions and any supplemental conditions which are listed in the compliance agreement, as deemed by the Administrator to be necessary to prevent the introduction and dissemination into or within the United States of plant pests and livestock or poultry diseases:

(i) Comply with all applicable provisions of this section;

(ii) Allow inspectors access to all records maintained by the person regarding handling or disposal of garbage, and to all areas where handling or disposal of garbage occurs;

(iii)(A) If the garbage is regulated under paragraph (c) of this section, remove garbage from a means of conveyance only in tight, covered, leak-proof receptacles;

(B) If the garbage is regulated under paragraph (d) of this section, transport garbage interstate in sealed, leak-proof packaging approved by the Administrator;

(iv) Move the garbage only to a facility approved by the Administrator; and

(v) At the approved facility, dispose of the garbage in a manner approved by the Administrator and described in the compliance agreement.

(3) Approval for a compliance agreement may be denied at any time if the Administrator determines that the applicant has not met or is unable to meet the requirements set forth in this section. Prior to denying any application for a compliance agreement, APHIS will provide notice to the applicant thereof, and will provide the applicant with an opportunity to demonstrate or achieve compliance with requirements.

(4) Any compliance agreement may be canceled, either orally or in writing, by an inspector whenever the inspector

finds that the person who has entered into the compliance agreement has failed to comply with this section. If the cancellation is oral, the cancellation and the reasons for the cancellation will be confirmed in writing as promptly as circumstances allow. Any person whose compliance agreement has been canceled may appeal the decision, in writing, within 10 days after receiving written notification of the cancellation. The appeal must state all of the facts and reasons upon which the person relies to show that the compliance agreement was wrongfully canceled. As promptly as circumstances allow, the Administrator will grant or deny the appeal, in writing, stating the reasons for the decision. A hearing will be held to resolve any conflict as to any material fact. Rules of practice concerning a hearing will be adopted by the Administrator. This administrative remedy must be exhausted before a person can file suit in court challenging the cancellation of a compliance agreement.

(5) Where a compliance agreement is denied or canceled, the person who entered into or applied for the compliance agreement may be prohibited, at the discretion of the Administrator, from handling or disposing of regulated garbage.

(Approved by the Office of Management and Budget under control numbers 0579–0015, 0579–0054, and 0579–0292)

Done in Washington, DC, this 17th day of August 2006.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. E6–13968 Filed 8–22–06; 8:45 am]

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 352

[Docket No. 00–086–2]

Untreated Oranges, Tangerines, and Grapefruit From Mexico Transiting the United States to Foreign Countries

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations to allow untreated oranges, tangerines, and grapefruit from Mexico to be moved overland by truck or rail to Corpus Christi and Houston, TX, for export to another country by water. We

are taking this action in response to requests by the port authorities of Corpus Christi and Houston, TX. We are also requiring that untreated oranges, tangerines, and grapefruit from Mexico transiting the United States for export to another country be shipped in sealed, refrigerated containers and insect-proof packaging and via routes that avoid citrus production areas. We are taking this action to provide additional protection against the possible introduction of fruit flies via untreated oranges, tangerines, and grapefruit from Mexico that transit the United States.

EFFECTIVE DATE: October 23, 2006.

FOR FURTHER INFORMATION CONTACT: Mr. Dave Hanken, Senior Staff Officer, or Ms. Candace Funk, Staff Officer, Quarantine Policy, Analysis, and Support, PPQ, APHIS, 4700 River Road Unit 60, Riverdale, MD 20737-1236; (301) 734-8295.

SUPPLEMENTARY INFORMATION:

Background

The plant quarantine safeguard regulations in 7 CFR part 352 relieve restrictions for certain products or articles that are classified as prohibited or restricted products or articles under our other regulations in title 7. Such articles include fruits and vegetables that are moved into the United States for: (1) A temporary stay where unloading or landing is not intended, (2) unloading or landing for transshipment and exportation, (3) unloading or landing for transportation and exportation, or (4) unloading and entry at a port other than the port of first arrival. Fruits and vegetables that are moved into the United States under these circumstances are subject to inspection and must be handled in accordance with conditions assigned under the safeguard regulations to prevent the introduction and dissemination of plant pests.

The regulations in § 352.30 (referred to below as the regulations) address the movement into or through the United States of untreated oranges, tangerines, and grapefruit from Mexico that transit the United States en route to foreign countries. The regulations currently allow untreated oranges, tangerines, and grapefruit from Mexico to enter the United States at the ports of Nogales, AZ, or Eagle Pass, El Paso, or Laredo, TX. The fruit may then be moved, under certain conditions, by truck or railcar to the seaport at Galveston, TX, for export by water to another country. The port authorities of Corpus Christi and Houston, TX, have requested that those ports be added to the regulations as ports to which untreated Mexican

oranges, tangerines, and grapefruit may be moved for export by water.

In response to these requests, on December 4, 2001, we published in the **Federal Register** (66 FR 63004-63007, Docket No. 00-086-1) a proposal to amend the regulations by adding Corpus Christi and Houston, TX, to the list of ports to which we allow untreated oranges, tangerines, and grapefruit from Mexico to be moved overland by truck or rail for export by water to another country. We took this action based on our finding that the risk posed by allowing untreated oranges, tangerines, and grapefruit to transit the United States for export at the ports of Corpus Christi and Houston, TX, would be no different than the risk currently posed by in-transit shipments of untreated oranges, tangerines, and grapefruit moved from Mexico to Galveston, TX, for export.

The regulations in § 352.30(b) prescribe that trucks transporting untreated oranges, tangerines, and grapefruit from Mexico on overland routes either must be of the van type or must have a tarpaulin tightly tied down over the cargo. In our December 2001 proposed rule, we proposed to amend these regulations to require that such fruit be transported in sealed, refrigerated containers of the type commonly used by the maritime and commercial trucking industries. Fruit flies are known to exist in some areas of Mexico where oranges, tangerines, and grapefruit are grown, and the areas that untreated oranges, tangerines, and grapefruit from Mexico may transit within the United States while en route to export include some citrus-producing areas. Given those circumstances, we believed the transport conditions in place should be amended to better assure protection against the introduction of fruit flies into the United States. The requirement that untreated oranges, tangerines, and grapefruit be shipped in sealed, refrigerated containers would help, we stated, to reduce the risk of such an introduction.

We also proposed to update the regulations in § 352.30(e), which contains a cross-reference to our regulations in § 319.56-2h that list areas in Mexico that are free of certain fruit flies. Paragraph (e) of § 352.30 names only Sonora as a region in Mexico free of fruit flies; however, other regions of Mexico have been listed in § 319.56-2(h) as being free of fruit flies since § 352.30(e) was established. We proposed to eliminate the reference to Sonora and simply refer to the list of fruit fly-free areas in § 319.56-2(h) to make the regulations consistent.

We solicited comments concerning our proposal for 60 days ending February 4, 2002. We received 5 comments by that date. They were from industry representatives and representatives of State governments. They are discussed below by topic.

Two commenters wanted APHIS to withdraw the proposed rule on the grounds that any rule that might increase the risk of fruit flies being introduced into the United States should be opposed. One commenter cited the discovery of Mediterranean fruit fly larvae in cold-treated Spanish clementines in 2001 in arguing that allowing untreated oranges, tangerines, and grapefruit to transit the United States for eventual export posed an unacceptable risk. This commenter also noted that recent fruit fly eradication programs in Florida and California have been costly.

As stated above, APHIS currently allows untreated oranges, tangerines, and grapefruit to transit the United States under certain conditions for eventual export to another country from the seaport at Galveston, TX. We proposed to allow such fruit to be exported from Corpus Christi and Houston, TX, based on our finding that the risk posed by allowing untreated oranges, tangerines, and grapefruit to transit the United States for export at the ports of Corpus Christi and Houston, TX, would be no different than the risk currently posed by in-transit shipments of untreated oranges, tangerines, and grapefruit moved from Mexico to Galveston, TX, for export. Therefore, we believe there is no increase in the risk of introduction of fruit flies into the United States associated with allowing in-transit shipments of untreated oranges, tangerines, and grapefruit to be moved from Mexico to Corpus Christi or Houston, TX.

It is true that if the ability to use the ports at Corpus Christi and Houston, TX, made the process of exporting more convenient or less costly for Mexican exporters of oranges, tangerines, and grapefruit, a greater volume of the fruits in question might move through the United States, which could potentially increase the risk of introducing fruit flies. However, the proposed rule included new safeguards not found in the current regulations against the possible introduction of fruit flies. In response to comments we received on the proposed rule, this final rule retains those proposed new safeguards and adds additional safeguards, which include insect-proof packaging, transportation of the fruit in refrigerated containers, transportation and exportation permits, required

supervision by inspectors of transloading if it is necessary, and verification of the seals on the containers. Because we are adding these safeguards for shipments of untreated oranges, tangerines, and grapefruit from Mexico transiting the United States, we believe we are not relaxing our regulations or increasing the risk of introduction of fruit flies into the United States.

One of the commenters stated that allowing untreated oranges, tangerines, and grapefruit to transit the United States for eventual export from Galveston, TX, as is currently allowed by the regulations, poses an unacceptable risk of introducing fruit flies into the United States. The commenter requested that shipments of untreated oranges, tangerines, and grapefruit from Mexico that transit the United States be suspended immediately if any breaches in biological security are identified.

We believe that the safeguards we are adding to the regulations in this final rule, as summarized above, minimize the risk of introducing fruit flies or other plant pests into the United States via shipments of untreated oranges, tangerines, and grapefruit from Mexico transiting the United States for eventual export. If we become aware of a breach in biological security or any other evidence indicating that these shipments pose a higher risk of plant pest introduction than we had previously believed, we will take any actions we deem necessary to address this risk. These actions may include, but may not necessarily be limited to, suspending these shipments.

Two commenters expressed concerns about the seals the proposed rule specified would be used on refrigerated containers carrying untreated oranges, tangerines, and grapefruit from Mexico to ensure that the containers are not opened before arrival at the port of export. One commenter asked APHIS to clarify that the containers should be sealed prior to entering the United States and remain sealed until shipments have departed Texas and other southern States where fruit fly host material exists. Another commenter stated that border inspectors in the Rio Grande Valley often break open the seals on shipping containers to perform inspections. Accidents during shipping or investigations of such accidents could also result in the seals being broken. Once a seal is broken, the untreated oranges, tangerines, and grapefruit could be mixed with other citrus.

We agree that it is important to maintain the integrity of the seals on

containers in which untreated oranges, tangerines, and grapefruit from Mexico transit the United States. Therefore, we are adding a requirement to the final rule that an inspector at the port of entry must be contacted immediately if the seal on a container of untreated oranges, tangerines, or grapefruit is broken, for any reason, before the container leaves the United States. The inspector will then be able to assess the situation and take appropriate action to reduce the risk of introducing fruit flies. We are also requiring that, if untreated fruit from Mexico is transloaded to another container, the transloading must be supervised by an inspector and a replacement official seal must be applied to the container to which the fruit is moved. We believe that these measures will enable inspectors to take any required corrective action quickly and effectively if a seal is broken during transit.

Note: To reflect the reassignment of some inspection duties to the Bureau of Customs and Border Protection, we have replaced the definition of *inspector* in § 352.1 with the following definition: "Any individual authorized by the Administrator of APHIS or the Commissioner of Customs and Border Protection, Department of Homeland Security, to enforce the regulations in this part." We have also amended references to representatives and seals of the Plant Protection and Quarantine Programs to simply refer to inspectors and seals, respectively.

One commenter supported allowing untreated oranges, tangerines, and grapefruit from Mexico to transit the United States for eventual export, but took issue with the proposed safeguards, saying that more safeguards should be in place to allow for unexpected delays caused by mechanical failure, lack of refrigeration, human error, or other causes. Other commenters asked generally for more safeguards to be added for such shipments.

We have carefully reviewed the safeguards in the proposed rule for transporting untreated oranges, grapefruit, and tangerines by truck, and we have decided to make several changes in addition to the changes described above. In this final rule, we are adding a requirement that the untreated oranges, grapefruit, and tangerines must be shipped in insect-proof boxes or crates that prevent the escape or entry of adult, larval, or pupal fruit flies. Insect-proof boxes or crates will help ensure that any fruit flies that may be present in the fruit, regardless of life stage, are prevented from emerging from the containers while the fruit transits the United States for export.

This final rule also specifies that the temperature in refrigerated containers must be maintained at 60°F or lower. Refrigerating the containers to this temperature will inhibit pupation in any fruit flies that may be present in the untreated oranges, tangerines, and grapefruit, thereby preventing the fruit flies from emerging from the containers into the United States. An inspector must be notified if the cooling system of any refrigerated container fails, and untreated oranges, tangerines, and grapefruit that are transported in a refrigerated container whose cooling system fails must be transloaded into a container with an operable cooling system under the conditions described above. This will ensure that the untreated oranges, grapefruit, and tangerines are adequately refrigerated and that an inspector supervises the transfer of untreated oranges, tangerines, and grapefruit to another container if they are not.

We are also adding a requirement that a transportation and exportation permit must be issued by an inspector for shipments of these fruits. This permit can be obtained only from APHIS headquarters. The transportation and exportation permit allows the untreated fruit to transit the country on the condition that it must not enter the commerce of the United States.

Currently, the regulations require that the owner of the oranges, tangerines, and grapefruit to be shipped procure a formal permit as provided in § 352.6; paragraph (a) of that section refers the reader to § 352.5 to see the requirements for permits for shipping plants and plant products. Paragraph (a) of § 352.5 states that a permit required under the regulations "may consist of a general authorization, as set out in paragraphs (b), (c), or (d) of this section or § 352.11, or it may be a specific permit." This final rule makes this general requirement more specific, allowing shippers to know in advance what permit they will have to secure. This additional permit requirement also enables inspectors to know the routing of shipments of untreated oranges, tangerines, and grapefruit from Mexico while they are transiting the United States, facilitating intervention should it prove necessary.

We are also requiring that all shipments of untreated oranges, tangerines, and grapefruit from Mexico through the United States must move in U.S. Customs bond. Previously, we had required that air and rail shipments of these fruits move in U.S. Customs bond; this final rule extends that requirement to shipments transported by truck and vessel. We believe that the requirement

that truck and vessel shipments must move in U.S. Customs bond will serve as an additional safeguard.

Together, these safeguards will augment the safeguards described in the proposed rule to minimize the risk of introduction of fruit flies or other plant pests due to shipments of untreated oranges, tangerines, and grapefruit from Mexico transiting the United States.

One commenter welcomed the safeguards specified in the proposed rule but argued further that these safeguards should apply to all fruit fly host material transported from Mexico to or through the United States and to shipments of fruit fly host material transported not only by truck but also by rail.

We agree that rail shipments of untreated oranges, tangerines, and grapefruit from Mexico transiting the United States should employ the same safeguards that truck shipments of those fruits do. Accordingly, we have amended the regulations on rail shipments of untreated oranges, tangerines, and grapefruit to indicate that such untreated fruit may only be shipped in insect-proof packaging and in sealed, refrigerated containers. Those containers will also be required to maintain a temperature of 60 °F or below while in transit. Shippers of containers shipped by rail will have to follow the requirement that an inspector must be notified if the seal on the containers is broken or if the refrigeration system in the container breaks down, as well as the requirement that authorized personnel supervise the transfer of untreated oranges, tangerines, and grapefruit from one container to another. They will also move under a transportation and exportation permit. We believe that these safeguards will help to protect against the introduction of fruit flies into the United States associated with untreated oranges, tangerines, and grapefruit from Mexico transiting the United States by rail.

Extending the safeguards to cover all fruit fly host material transported from Mexico to or through the United States is beyond the scope of this rulemaking, and we cannot address it in this final rule.

One commenter urged APHIS to clarify restrictions on the transportation of shipments of untreated oranges, tangerines, and grapefruit in the regulations. Current APHIS policy, this commenter stated, is to reroute such shipments through Laredo, TX, and away from the Rio Grande Valley citrus production area. There is presently no restriction on the routes such shipments must follow in the regulations. The commenter expressed concern that if

overland transportation of untreated oranges, tangerines, and grapefruit through the Rio Grande Valley citrus production area was not clearly prohibited, shipments of untreated oranges, tangerines, and grapefruit would traverse that area. Since fruit flies may be present in untreated oranges, tangerines, and grapefruit from Mexico, allowing shipments of these fruits to traverse the Rio Grande Valley, which has many potential fruit fly hosts, would increase the risk of introduction of fruit flies into the United States.

We agree that this restriction needs to be clarified in the regulations. Therefore, we have added a provision to the regulations stating that no shipment of untreated oranges, tangerines, or grapefruit shall traverse the counties of Cameron, Hidalgo, Starr, and Willacy, TX, which together comprise the Rio Grande Valley citrus production area.

We have additionally specified that truck shipments shall only traverse the territory within the United States bounded on the west by a line starting at Laredo, TX, on to El Paso, TX, to Salt Lake City, UT, and then to Portland, OR, and on the east by a line drawn from Laredo, TX to Hebbronville, TX, to Corpus Christi, TX, to Galveston, TX, to Kinder, LA, to Memphis, TN, and then to Louisville, KY, and routes directly northward. This ensures that truck shipments of untreated oranges, tangerines, and grapefruit from Mexico that transit the United States en route to Canada will not pass through any areas in Texas where citrus is produced.

Paragraph (a)(4)(ii) of the regulations has required that shipments of untreated oranges, tangerines, and grapefruit from Mexico transiting the United States via truck be convoyed by an inspector from the point of arrival in the United States to the point of unloading or move under such other safeguards as the inspector shall provide. Because we are adding these route restrictions and a requirement for a transportation and exportation permit to shipments of untreated oranges, tangerines, and grapefruit from Mexico transiting the United States via truck, we no longer believe the requirement that truck shipments move under convoy is necessary, and we have removed it in this final rule.

The proposed rule included a revised description of the area through which shipments of untreated oranges, tangerines, and grapefruit may traverse the United States via rail. However, our proposed revision would have allowed rail shipments of these fruits to traverse the Rio Grande Valley citrus-producing area. Therefore, we are rewording that description so that it is identical to the

territory that truck shipments of untreated oranges, tangerines, and grapefruit may traverse, as described above.

One commenter requested that APHIS conduct fruit fly trapping in areas in the United States that have commercial, ornamental, or native plants that could serve as fruit fly hosts and through which untreated oranges, tangerines, and grapefruit from Mexico are moved. The commenter requested that this additional trapping be undertaken in the coastal area from Brownsville to Port Arthur, TX, and in any other areas through which untreated oranges, tangerines, and grapefruit may be moved.

APHIS already surveys this area for fruit flies, because it is close to areas in Mexico where fruit flies exist. By clarifying that shipments of untreated oranges, tangerines, and grapefruit may not move through the Rio Grande Valley citrus production area, as defined above, we have ensured that such shipments will not be transported through any areas in Texas where citrus is produced. This step reduces the risk that fruit flies may be introduced into the United States due to these shipments. Under these circumstances, we do not believe that additional fruit fly trapping is necessary or warranted at the present time. If, in the future, we find evidence that additional fruit fly trapping is necessary, we will take appropriate action.

Miscellaneous

This final rule requires that all untreated oranges, tangerines, and grapefruit from Mexico transiting the United States be moved in refrigerated containers, whether transported by rail or by truck, and that the containers must maintain a temperature of 60 °F or less. Therefore, we are removing § 352.30(b)(4)(ii), which sets out icing requirements for refrigerator cars transported by rail that are no longer relevant to such transport under this final rule. In addition, § 352.30(c)(3), which specifies requirements for transport of untreated oranges, tangerines, and grapefruit from Mexico in refrigerated holds of ships leaving from the United States, is no longer applicable, as the untreated fruit must be transported in refrigerated containers whose seal may not be broken except by an inspector or after the container has left the United States. Therefore, we are removing this paragraph.

In addition, we are making several changes to § 352.30(a) to change references to refrigerated cars or trucks to refer to refrigerated containers, and we are removing § 352.30(b)(1) because

it sets out a packaging requirement that is not relevant if all untreated oranges, tangerines, and grapefruit are shipped in sealed, refrigerated containers.

Finally, paragraph (b)(5) of the regulations sets out requirements for the transportation of untreated oranges, tangerines, and grapefruit from Mexico that transit the United States via air carrier. These requirements have included transporting the shipment under U.S. Customs bond and without change of Customs entry in the United States. Because we are making it a general requirement that shipments of untreated oranges, tangerines, and grapefruit from Mexico transiting the United States must move under U.S. Customs bond, we are removing that requirement from this paragraph. In addition, given that this final rule requires that the fruit be shipped in sealed, refrigerated containers, we do not believe the requirement that the shipment move under the same Customs entry is necessary, and we have removed it. Paragraph (b)(5) also states that if an emergency occurs en route to the port of export that will require transshipment to another carrier, the owner should apply to the Plant Protection and Quarantine Programs for information as to applicable conditions. We are simplifying this requirement to indicate that if such an emergency occurs, the owner must contact an inspector immediately.

We are also making miscellaneous nonsubstantive changes to the

regulations for the purpose of clarity and ease of reading.

Therefore, for the reasons given in the proposed rule and in this document, we are adopting the proposed rule as a final rule, with the changes discussed in this document.

Effective Date

As described above, this final rule adds several safeguards against the introduction of fruit flies into the United States via untreated oranges, tangerines, and grapefruit from Mexico transiting the United States to the regulations. Because persons currently engaged in transporting such fruit when it is in the United States will need some time to implement the changes we are making in this final rule, we have set the effective date for this final rule at 60 days after publication in the **Federal Register**.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

This final rule amends the regulations to allow untreated oranges, tangerines, and grapefruit from Mexico to be moved overland by truck or rail to Corpus Christi and Houston, TX, for export to another country by water. We are taking this action in response to requests by the port authorities of Corpus Christi

and Houston, TX. This final rule will also require that untreated oranges, tangerines, and grapefruit from Mexico transiting the United States for export to another country be shipped in sealed, refrigerated containers and insect-proof packaging and via routes that avoid citrus production areas. We are taking this action to provide additional protection against the possible introduction of fruit flies via untreated oranges, tangerines, and grapefruit from Mexico that transit the United States.

For the 4 years 2000 through 2003, the amount of in-transit Mexican citrus shipped through the United States was relatively small, ranging in volume between 2 percent and 10 percent compared to the quantities of Mexican citrus imported into the United States (table 1). In 2004, there was a notable increase in the in-transit quantity; the amount equaled 23 percent of Mexican citrus imported by the United States (10.5 thousand metric tons, compared to 46.3 thousand metric tons).

For the years 2000 through 2004, the percentage of in-transit Mexican citrus that was shipped to Texas ports varied between 15 percent in 2001 and 93 percent in 2003 (table 2). The availability of the two additional ocean ports in Texas will help accommodate growth of this in-transit corridor. More than 43 percent of untreated Mexican citrus that transited the United States between 2000 and 2004 entered the country through a Texas port (maritime, airport, or land-border).

TABLE 1.—ORANGES, TANGERINES, AND GRAPEFRUIT FROM MEXICO IMPORTED INTO THE UNITED STATES AND TRANSITING THE UNITED STATES TO ANOTHER COUNTRY

Fresh and dried oranges, tangerines, and grapefruit imported into the United States from Mexico			Oranges, tangerines, and grapefruit from Mexico transiting the United States en route to another country
Year	Value (\$1,000)	Volume (metric tons)	Volume (metric tons)
2000	11,369	57,770	4,419 (8 percent of imports that go into U.S. commerce).
2001	8,628	50,209	3,562 (7 percent of imports that go into U.S. commerce).
2002	9,292	53,804	5,487 (10 percent of imports that go into U.S. commerce).
2003	11,934	64,000	1,337 (2 percent of imports that go into U.S. commerce).
2004	6,982	46,319	10,576 (23 percent of imports that go into U.S. commerce).

Harmonized Schedule codes: Oranges (HS 080510), grapefruit (080540) and tangerines (080520).

In-transit produce is not included in U.S. imports of Mexican oranges, grapefruits, and tangerines.

TABLE 2.—VOLUME OF ORANGES, TANGERINES, AND GRAPEFRUIT FROM MEXICO TRANSITING THE U.S. TO ANOTHER COUNTRY (METRIC TONS)

Year	Total Mexican oranges, tangerines, and grapefruit in-transit through all eligible U.S. ports	In-transit through Texas ports ¹	In-transit through non-Texas ports
2000	4,418.1	1,610.6 (36 percent of total in-transit)	2,808.5

TABLE 2.—VOLUME OF ORANGES, TANGERINES, AND GRAPEFRUIT FROM MEXICO TRANSITING THE U.S. TO ANOTHER COUNTRY (METRIC TONS)—Continued

Year	Total Mexican oranges, tangerines, and grapefruit in-transit through all eligible U.S. ports	In-transit through Texas ports ¹	In-transit through non-Texas ports
2001	3,561.9	535.0 (15 percent of total in-transit)	3,026.9
2002	5,487.2	3,252.1 (59 percent of total in-transit)	2,235.1
2003	1,337.2	1,249.2 (93 percent of total in-transit)	88.0
2004	10,576.0	2,500.5 (24 percent of total in-transit)	8,075.5

Harmonized Schedule codes: Oranges (HS 080510), grapefruit (080540) and tangerines (080520).

¹ Maritime ports: Galveston, TX; Land border ports: Laredo, TX; El Paso, TX; Eagle Point, TX; Airports: Houston, TX; Austin, TX.

Source: USDA/APHIS/PPQ data from the ports, compiled by Robert English, PPQ.

Currently, the Houston port is the second-largest among U.S. ports in terms of trade volume.¹ Two major railroads, 150 trucking lines, and two international airports connect the port of Houston to the rest of the continental United States, Canada, Mexico, and beyond. It is estimated that 1,263 firms were operating within Houston's port authority in 2005, providing services to the cargo and vessels at the marine terminals. They contribute over 144,500 jobs to the area and generate over \$10 billion in business revenue annually. The port also contributes to the welfare of the local economy, generating over \$640 million in State and local taxes annually.

It is estimated that 312 firms were operating within Corpus Christi's port authority in 2003.² The port employed some 11,859 people directly; an estimated 19,060 indirect jobs and 8,930 induced jobs within the regional economy could be attributed to the port's operations. The 312 firms had a combined annual payroll of more than \$555.8 million in direct wages and salaries, with an average salary of \$48,600.

In 2003, the port of Corpus Christi began operating a refrigerated warehouse facility that has resulted in revenues of over \$100,000 annually. The cold storage facility includes rooms with freezing and chilling capabilities, a treatment facility, and rail and truck docks that are temperature-controlled. This facility can serve the growing market for refrigerated shipments of citrus fruit exported from Mexico to other countries.

Increased volumes of in-transit oranges, tangerines, and grapefruit received from Mexico resulting from the addition of the two ocean ports are expected to generate additional business for the U.S. trucking industry. Mexican trucks are confined to narrow commercial zones that extend 20 kilometers, at most, within the U.S. border, at which point they are required to transfer their goods to U.S. haulers.

Additional Federal expenses associated with increased workloads or personnel needed to monitor the loading and unloading of in-transit shipments of untreated oranges, tangerines, and grapefruit at the two ports are expected to be funded by the respective port authorities.

Although the rule is expected to increase the volume of oranges, tangerines, and grapefruit from Mexico that transit the United States, the risk of introduction of pests, specifically fruit flies, is not expected to increase. Additional safeguards against the possible introduction of fruit flies have been included in this final rule, such as insect-proof packaging, transportation of the fruit in refrigerated containers, transportation and exportation permits, and repeated checks of the seals on the containers.

Impact on Small Entities

The Regulatory Flexibility Act requires that agencies specifically consider the economic impact of their regulations on small entities. The Small Business Administration (SBA) has established size criteria using the North American Industry Classification System (NAICS) to determine which economic entities meet the definition of a small firm.

Small businesses at the ports of Houston and Corpus Christi will benefit by this rule to the extent that they are involved in handling the in-transit shipments of untreated oranges,

tangerines, and grapefruit arriving at their ports. Small businesses at the port of Galveston could experience some negative economic effects because of the rule, if in-transit shipments are diverted from Galveston to the Corpus Christi or Houston ports. There are approximately 1,263 firms operating at the port of Houston and 312 firms at the port of Corpus Christi. There is also an unknown number of firms located near the two ports that provide services related to port activities. The number of affected entities that can be considered small is unknown. During the comment period for our proposed rule we did not receive any information on the number of small entities that might be affected.

Firms within the U.S. freight trucking industry (NAICS category 48411) will benefit from the rule by providing transportation services for the Mexican oranges, tangerines, and grapefruit between U.S. land ports and the ocean ports of Corpus Christi and Houston. The majority of U.S. trucking businesses (81 percent) are considered small entities according to SBA criteria.

U.S. firms overall will benefit from the availability of the two additional ocean ports to handle and export in-transit oranges, tangerines, and grapefruit from Mexico, to the extent that the shipments handled at these two ports are additional volumes rather than diversions that would otherwise transit through the seaport of Galveston or elsewhere.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires

¹ Port of Houston Authority, Economic Impact. See: <http://www.portofhouston.com/geninfo/economicimpact.html>.

² Martin Associates, February 2004: The Local and Regional Economic Impacts of the Port of Corpus Christi. See: <http://www.portofcorpuschristi.com/pdfs/Economic%20Impact%20Report.pdf>.

intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

Executive Order 12988

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are inconsistent with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

The proposed rule that preceded this final rule contains no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). However, due to changes made in response to comments, the information collection burden in this final rule includes 200 hours that were not included in the proposed rule. Specifically, the additional hours are for the trucking industry and shippers to obtain permits for moving untreated oranges, tangerines, or grapefruit through the United States, which were added to the coverage of the final rule. In accordance with section 3507(d) of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), we submitted this information collection requirement for approval to the Office of Management and Budget (OMB). OMB has approved the information collection for a period of 6 months under control number 0579-0303. We plan, in the near future, to request continuation of that approval for 3 years.

E-Government Act Compliance

The Animal and Plant Health Inspection Service is committed to compliance with the E-Government Act to promote the use of the Internet and other information technologies, to provide increased opportunities for citizen access to Government information and services, and for other purposes. For information pertinent to E-Government Act compliance related to this proposed rule, please contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734-7477.

List of Subjects in 7 CFR Part 352

Customs duties and inspection, Imports, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Transportation.

■ Accordingly, we are amending 7 CFR part 352 as follows:

PART 352—PLANT QUARANTINE SAFEGUARD REGULATIONS

■ 1. The authority citation for part 352 continues to read as follows:

Authority: 7 U.S.C. 7701–7772 and 7781–7786; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.3.

■ 2. In § 352.1, paragraph (b), the definition of *inspector* is revised to read as follows:

§ 352.1 Definitions.

* * * * *

(b) * * *

Inspector. Any individual authorized by the Administrator of APHIS or the Commissioner of Customs and Border Protection, Department of Homeland Security, to enforce the regulations in this part.

* * * * *

■ 3. Section 352.30 is amended as follows:

■ a. By revising the section heading to read as set forth below.

■ b. In the introductory text, by adding the word “untreated” before the word “oranges.”

■ c. In paragraph (a)(3), in the paragraph heading, by removing the words “refrigerator cars and aircraft” and adding the words “refrigerated containers” in their place, and in the first sentence after the paragraph heading, by removing the words “Refrigerator cars and aircraft” and adding the words “Refrigerated containers” in their place.

■ d. By revising paragraph (a)(4)(ii) to read as set forth below.

■ e. In paragraph (a)(4)(iii), by removing the words “trucks, refrigerator cars, aircraft, and ships” and adding the words “refrigerated containers” in their place.

■ f. By revising paragraph (b) to read as set forth below.

■ g. By removing paragraph (c)(3).

■ h. By revising paragraph (e) to read as set forth below.

■ i. By adding an OMB paperwork citation to read as set forth below.

§ 352.30 Untreated oranges, tangerines, and grapefruit from Mexico.

* * * * *

(a) * * *

(4) * * *

(ii) Untreated oranges, tangerines, and grapefruit arriving from Mexico at authorized ports in the United States for movement to a foreign country shall be loaded into refrigerated containers and preinspected by an inspector for freedom of citrus leaves before entry into the United States or be accompanied by an acceptable certificate from an inspector as to such

freedom. Refrigerated containers loaded with untreated oranges, tangerines, and grapefruit that are not free of such leaves will be denied entry into the United States.

* * * * *

(b) *Additional conditions for overland movement of certain untreated fruit.*

Untreated oranges, tangerines, and grapefruit from Mexico may move overland through the United States to a foreign country only in accordance with the following additional conditions:

(1) *Ports of entry.* Such fruit may enter only at Nogales, AZ, or Eagle Pass, El Paso, or Laredo, TX.

(2) *General transit conditions.* The following conditions apply to all shipments of untreated oranges, tangerines, and grapefruit from Mexico transiting the United States for movement to a foreign country:

(i) The fruit must be packed in insect-proof boxes or crates that prevent the escape or entry of adult, larval, or pupal fruit flies.⁴

(ii) Boxes or cartons of fruit must be enclosed in sealed, refrigerated containers of the type commonly used by the maritime or commercial trucking industry. An official seal must be applied to the container at the port of entry. The seal must not be removed except by an inspector, or after the shipment has left the United States.

(iii) The temperature in the refrigerated containers in which the fruit is transported must be maintained at 60 °F or lower.

(iv) If the seal on the containers in which such fruit is shipped is found to have been broken, for any reason, before the container leaves the United States, or if the cooling system in the containers fails at any point during transit, an inspector at the port of entry must be contacted immediately.

(v) A transportation and exportation permit must be issued by an inspector for each shipment. This permit can be obtained from APHIS headquarters.⁵

(vi) If untreated fruit is transloaded to another container while in the United States, the transloading must be supervised by an inspector and a replacement official seal must be applied to the container to which the fruit is moved.

⁴ If there is a question as to whether packaging is adequate, send a request for approval of the packaging, together with a sample of the packaging, to the Animal and Plant Health Inspection Service, Plant Protection and Quarantine, Center for Plant Health Science and Technology, 1730 Varsity Drive, Suite 400, Raleigh, NC 27606.

⁵ To obtain this permit, contact the Animal and Plant Health Inspection Service, Plant Protection and Quarantine, Permit Unit, 4700 River Road Unit 133, Riverdale, MD 20737.

(vii) Shipments of such fruit must move by direct route, in Customs bond and under official seal, without diversion or change of entry en route, from the port of entry to the port of exit or to an approved port in the United States for export to another foreign country.

(viii) Shipments of such fruit may not traverse the counties of Cameron, Hidalgo, Starr, or Willacy, TX. Shipments of such fruit may only traverse areas listed under each type of carrier listed below.

(3) *Truck movement.* Trucks may haul refrigerated containers of such fruit from Mexico to shipside, or to approved refrigerated storage pending lading aboard ship, in Corpus Christi, Galveston, or Houston, TX, or alongside railway carriers or aircraft at the ports named in paragraph (b)(2) of this section for movement to a foreign country. Shipments of such fruit via truck may traverse only the territory within the United States bounded on the west by a line starting at Laredo, TX, on to El Paso, TX, to Salt Lake City, UT, and then to Portland, OR, and on the east by a line drawn from Laredo, TX to Hebbbronville, TX, to Corpus Christi, TX, to Galveston, TX, to Kinder, LA, to Memphis, TN, and then to Louisville, KY, and routes directly northward.

(4) *Rail movement.* Shipments must move by direct route from the port of entry to the port of exit or to an approved North Atlantic port in the United States for export to another foreign country, as follows: The fruit may be entered at Nogales, AZ, only for direct rail routing to El Paso, TX, after which it shall traverse only the territory bounded on the west by a line drawn from Laredo, TX, to El Paso, TX, to Salt Lake City, UT, and then to Portland, OR, and on the east by a line drawn from Laredo, TX, to Hebbbronville, TX, to Corpus Christi, TX, to Galveston, TX, to Kinder, LA, to Memphis, TN, and then to Louisville, KY, and routes directly northward. Such fruit may also enter the United States from Mexico at any port listed in paragraph (b)(1) of this section, for direct eastward rail movement, without diversion en route, for reentry into Mexico.

(5) *Air cargo movement.* Shipments of such fruit may move by direct route as air cargo, without change of entry while in the United States en route from the port of entry, to Canada. If an emergency occurs en route to the port of export that will require transshipment to another carrier, an inspector at the port of entry must be contacted immediately.

* * * * *

(e) *Untreated fruit from certain municipalities in Mexico.* Oranges,

tangerines, and grapefruit in transit to foreign countries may be imported from certain municipalities in Mexico listed in § 319.56–2(h) of this chapter in accordance with the applicable conditions in §§ 319.56 through 319.56–8 of this chapter.

* * * * *

(Approved by the Office of Management and Budget under control number 0579–0303)

Done in Washington, DC, this 17th day of August 2006.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2005–22876; Directorate Identifier 2005–NE–39–AD; Amendment 39–14734; AD 2006–17–13]

RIN 2120–AA64

Airworthiness Directives; RECARO Aircraft Seating GmbH & Co. (RECARO) Model 3410 Seats

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain RECARO Model 3410 302, 303, 306, 307, 314, 316, 317, 791, 792, and 795 series seats. This AD requires replacing the existing attachment bolts for the seat belts with longer attachment bolts. This AD results from a report of short attachment bolts that don't allow enough thread to properly secure the locknuts. We are issuing this AD to prevent a seat belt from detaching due to a loose locknut and attachment bolt, which could result in injury to an occupant during emergency conditions.

DATES: This AD becomes effective September 27, 2006. The Director of the **Federal Register** approved the incorporation by reference of certain publications listed in the regulations as of September 27, 2006.

ADDRESSES: You can get the service information identified in this AD from RECARO Aircraft Seating GmbH & Co. K, Technical Publications, Daimlerstrasse 21, 74523 Schwebisch Hall, Germany; Telephone 49 791 503 7183; fax 49 791 503 7220.

You may examine the AD docket on the Internet at <http://dms.dot.gov> or in

Room PL–401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT:

Jeffrey Lee, Aerospace Engineer, Boston Aircraft Certification Office, FAA, Engine & Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803; telephone (781) 238–7161; fax (781) 238–7170.

SUPPLEMENTARY INFORMATION: The FAA proposed to amend 14 CFR part 39 with a proposed AD. The proposed AD applies to certain RECARO Model 3410 302, 303, 306, 307, 314, 316, 317, 791, 792, and 795 series seats. We published the proposed AD in the **Federal Register** on February 8, 2006 (71 FR 6420). That action proposed to require replacing the existing attachment bolts for the seat belts with longer attachment bolts.

Examining the AD Docket

You may examine the docket that contains the AD, any comments received, and any final disposition in person at the Docket Management Facility Docket Offices between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Office (telephone (800) 647–5227) is located on the plaza level of the Department of Transportation Nassif Building at the street address stated in **ADDRESSES**. Comments will be available in the AD docket shortly after the DMS receives them.

We provided the public the opportunity to participate in the development of this AD. We have considered the comment received.

One commenter, the Boeing Airplane Company, asks us to remove the 737 aircraft minor model designator “–200” from the applicability of this AD. Boeing states that research of the configurations for all delivered Boeing 737–200 airplanes failed to reveal any of the affected seats installed on those airplanes. However, Boeing states that RECARO reported to Boeing that seats were installed in a 737–200 airplane. Boeing believes an operator installed the seats after production of the airplane. Boeing also has records of installing seats with the affected model numbers on 737–700 and 737–800 airplanes. Boeing states that those seats incorporate the longer bolts specified in RECARO service bulletin SB–No.: 3410–25MR477, Revision 3, dated May 17, 2004, and we should use the generic 737 designation without a minor model designator. We partially agree. This AD applies to the RECARO seat models identified in paragraph (c) of this AD.

We list the known airplane models that use these types of seats to help owners and operators to determine if their airplane might use these seats. Listing the minor model designators for the 737 airplanes that could use these seats will help operators determine if this AD might apply to them. We retained the -200 designation, and added the -700 and -800 designations to the "used on but not limited to" statement in the Applicability.

Conclusion

We have carefully reviewed the available data, including the comment received, and determined that air safety and the public interest require adopting the AD with the changes described previously. We have determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

Costs of Compliance

We estimate that this AD will affect 3,101 seats installed in airplanes of U.S. registry. We also estimate that it will take about 0.10 work-hour per seat to perform the actions, and that the average labor rate is \$65 per work-hour. Required parts will cost about \$10 per seat. Based on these figures, we estimate the total cost of this AD to U.S. operators to be \$51,166.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and

responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866;
- (2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a summary of the costs to comply with this AD and placed it in the AD Docket. You may get a copy of this summary at the address listed under ADDRESSES.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2006-17-13 RECARO Aircraft Seats GmbH & Co.: Amendment 39-14734. Docket No. FAA-2005-22876; Directorate Identifier 2005-NE-39-AD.

Effective Date

- (a) This airworthiness directive (AD) becomes effective September 27, 2006.

Affected ADs

- (b) None.

Applicability

- (c) This AD applies to certain RECARO Aircraft Seats GmbH & Co. (RECARO) Model 3410 302, 303, 306, 307, 314, 316, 317, 791, 792, and 795 series seats. These seats are installed on, but not limited to, Boeing 737-200, 737-700, and 737-800 series, 747-400 series, 777-200 and 777-300 series; and Airbus Industries A319-100 series, A320-200 series, and A321-200 series airplanes.

Unsafe Condition

- (d) This AD results from a report of short attachment bolts that don't allow enough thread to secure the locknuts properly. We are issuing this AD to prevent a seat belt from detaching due to a loose locknut and attachment bolt, which could result in injury to an occupant during emergency conditions.

Compliance

- (e) You are responsible for having the actions required by this AD performed within 60 days after the effective date of this AD, unless the actions have already been done.

Replacing the Attachment Bolt

- (f) For RECARO Model 3410 302, 303, 306, 307, 314, 316, 317, 791, 792, and 795 series seats with a serial number listed in section 1.A. Effectivity of RECARO service bulletin SB-No.: 3410-25MR477, Revision 3, dated May 17, 2004, replace the seat belt attachment bolt and nut. Use section 2. Accomplishment Instructions of RECARO service bulletin SB-No.: 3410-25MR477, Revision 3, dated May 17, 2004.

Alternative Methods of Compliance

- (g) The Manager, Boston Aircraft Certification Office, has the authority to approve alternative methods of compliance for this AD if requested using the procedures found in 14 CFR 39.19.

Related Information

- (h) Luftfahrt-Bundesamt airworthiness directive D-2004-151R1, dated June 6, 2004, also addresses the subject of this AD.

Material Incorporated by Reference

- (i) You must use RECARO service bulletin SB-No.: 3410-25MR477, Revision 3, dated May 17, 2004 to perform the bolt replacements required by this AD. The Director of the Federal Register approved the incorporation by reference of this service bulletin in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Contact RECARO Aircraft Seating GmbH & Co. K, Technical Publications, Daimlerstrasse 21, 74523 Schwäbisch Hall, Germany; telephone 49 791 503 7183; fax 49 791 503 7220, for a copy of this service information. You may review copies at the FAA, New England Region, Office of the Regional Counsel, 12 New England Executive Park, Burlington, MA; or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Burlington, Massachusetts, on August 16, 2006.

Thomas A. Boudreau,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

Airworthiness Directives; Boeing Model 767-400ER Series Airplanes and Model 777-200 and -300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain Boeing Model 767-400ER series airplanes and Model 777-200 and -300 series airplanes. This AD requires, for certain airplanes, repetitive testing of the fill and safety fittings of the cargo fire extinguishing bottles in the forward cargo compartment for leaks; and repetitive application of a corrosion inhibiting compound (CIC) or replacement of the cargo fire extinguishing bottles with reworked fire extinguishing bottles, as necessary. For all airplanes, this AD requires replacement of the cargo fire extinguishing bottles with reworked fire extinguishing bottles, which ends the repetitive tests and CIC applications if applicable. This AD results from failure of the safety fittings for the cargo fire extinguishing bottles. We are issuing this AD to prevent failure of the safety fittings for the cargo fire extinguishing bottles due to corrosion, which could result in leakage of extinguishing agent. If a fire occurs in the cargo bay, the cargo fire extinguishing bottles could have less than enough extinguishing agent to control a fire.

DATES: This AD becomes effective September 27, 2006.

The Director of the **Federal Register** approved the incorporation by reference of certain publications listed in the AD as of September 27, 2006.

ADDRESSES: You may examine the AD docket on the Internet at <http://dms.dot.gov> or in person at the Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street, SW., Nassif Building, Room PL-401, Washington, DC.

Contact Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124-2207, for service information identified in this AD.

FOR FURTHER INFORMATION CONTACT:

Barbara Mudrovich, Aerospace Engineer, Cabin Safety and Environmental Systems Branch, ANM-150S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98057-3356; telephone (425) 917-6477; fax (425) 917-6590.

SUPPLEMENTARY INFORMATION:**Examining the Docket**

You may examine the airworthiness directive (AD) docket on the Internet at <http://dms.dot.gov> or in person at the Docket Management Facility office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Management Facility office (telephone (800) 647-5227) is located on the plaza level of the Nassif Building at the street address stated in the **ADDRESSES** section.

Discussion

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an AD that would apply to certain Boeing Model 767-400ER series airplanes and Model 777-200 and -300 series airplanes. That NPRM was published in the **Federal Register** on July 5, 2005 (70 FR 38632). That NPRM proposed to require, for certain airplanes, repetitive testing of the fill and safety fittings of the fire extinguishing bottles in the forward cargo compartment for leaks; and repetitive application of a corrosion inhibiting compound (CIC) or replacement of the fire extinguishing bottles with reworked fire extinguishing bottles, as necessary. That NPRM also proposed to require, for all airplanes, replacement of the fire extinguishing bottles with reworked fire extinguishing bottles, which would end the repetitive tests and CIC applications if applicable.

Actions Since NPRM Was Issued

Since we issued the NPRM, Boeing has published Special Attention Service Bulletin 767-26-0124, Revision 1, dated April 13, 2006. We referenced the original issue of that service bulletin, dated December 5, 2002, in the NPRM as the appropriate source of service information for testing the cargo fire extinguishing bottles on Model 767-400ER series airplanes. The procedures in Revision 1 of the service bulletin are essentially the same as those in the original issue. Revision 1 corrects a reference to the Boeing 767 Aircraft Maintenance Manual (AMM), which we noted as a difference in the NPRM. Therefore, we have revised this AD to reference Revision 1 of the service bulletin as the appropriate source of service information for testing the cargo

fire extinguishing bottles on Model 767-400ER series airplanes. We have also added a new paragraph (k) to this AD, giving credit for testing done before the effective date of this AD in accordance with the original issue of the service bulletin. We have reidentified the subsequent paragraphs accordingly.

Comments

We provided the public the opportunity to participate in the development of this AD. We have considered the comments received.

Request for Credit for Additional Model Airplanes

Boeing requests that we revise paragraph (j) of the NPRM to include Model 767-400ER series airplanes and Model 777-300 series airplanes. (The NPRM provided credit only for Model 777-200 series airplanes.) As justification, Boeing states that this change will provide credit for all three affected model airplanes, not just the Model 777-200 series airplanes. We infer Boeing would like credit for accomplishment of Boeing Special Attention Service Bulletin 767-26-0124, dated December 5, 2002, for Model 767-400ER series airplanes; and Boeing Special Attention Service Bulletin 777-26-0034, dated January 22, 2004, for Model 777-300 series airplanes.

We agree to provide credit for all Model 767-400ER series airplanes. As stated previously, we have given credit to Model 767-400ER series airplanes in paragraph (k) of this AD.

We agree only to provide credit for certain Model 777-300 series airplanes. Certain Model 777-300 series airplanes were misidentified as Group 1 airplanes in the original issue of Boeing Special Attention Service Bulletin 777-26-0034. Revision 1 of Boeing Service Bulletin 777-26-0034, dated July 1, 2004, states that more work is necessary on Model 777-300 series airplanes if the Group 1 instructions of the original service bulletin were accomplished on those airplanes. However, no additional work is necessary for Model 777-300 series airplanes if the Group 2 instructions of the original service bulletin were accomplished on those airplanes. Therefore, we have revised paragraph (j) of this AD to give credit only for Model 777-300 series airplanes identified as Group 2 in the original issue of the service bulletin. Under the provisions of paragraph (l) of this AD, we may consider requests for approval of an alternative method of compliance (AMOC) if sufficient data are submitted to substantiate that such a method

would provide an acceptable level of safety.

Request To Clarify the Affected Fire Extinguishing Bottles

Boeing requests that we specifically refer to "cargo" fire extinguishing bottles in the NPRM. As justification, Boeing states that this will avoid confusion with the fire extinguishing bottles for the engine/auxiliary power unit. We agree and have revised all references accordingly in this AD.

Request To Revise Terminology

Boeing states that the safety disc inside the fill fitting is referred to as "fill and safety fittings," "safety fittings," or "burst disc inside the safety fitting" in several paragraphs in the NPRM. Boeing requests that we revise the NPRM to use its preferred terminology of "safety disc inside the fill fitting."

We agree and have revised the terminology in paragraph (g)(1) of this AD. We point out that we used the term "burst disc inside the safety filling" in the NPRM to match the terminology used in the referenced Boeing and Kidde Aerospace service bulletins for replacing the cargo fire extinguishing bottles. We have continued using the term "fill and safety fittings" in paragraph (g) of this AD as it is specified in the applicable Kidde Aerospace service bulletins.

Request To Revise Model Designation

Boeing also requests that we fix the typographical error for the model designation in the first row of the Estimated Costs table of the NPRM. Boeing states the correct model designation is Model 767-400ER. We agree and have revised the Estimated Costs table in this AD accordingly.

Request To Revise "Discussion" Section

Boeing also requests that we revise the first sentence of the first paragraph in the Discussion section of the NPRM as follows:

We have received a report indicating that failed safety fittings of the fire extinguishing bottles located in the forward lower lobe.

* * *

The commenter also requests that we change the second paragraph of the Discussion section to the following:

The cargo fire extinguishing bottles installed on Model 767-400ER series airplanes are identical to metered cargo fire bottles on the 777-300 series airplanes. Therefore, all of these models are subject to the same unsafe condition.

As justification for the second part of its request, Boeing states that all the cargo fire extinguishing bottles installed

on Model 767-400ER series airplanes are identical to one of the bottles that is installed on Model 777-300 series airplanes, but not installed on Model 777-200 series airplanes.

We agree with Boeing's statements. However, the Discussion section of an NPRM is not restated in the AD. Therefore, no change to this AD is necessary in this regard.

Request To Identify the Affected Cargo Fire Extinguishing Bottles

The Modification and Repair Parts Association (MARPA) requests that we include sufficient information to specify the precise applicability of the NPRM. MARPA states that the NPRM relies on certain Boeing and Kidde Aerospace service bulletins that were not incorporated by reference when the NPRM was published in the **Federal Register**. Since these service bulletins are copyrighted material, MARPA states it cannot determine the precise applicability of the NPRM. We infer the commenter would like us to identify the affected cargo fire extinguishing bottles in this AD.

We do not agree to specify the affected part numbers in this AD. It is our general practice to reference the appropriate service information, since the affected part numbers are clearly specified in that referenced information. Not only does it appear redundant to repeat those part numbers in this AD, but if there was a large number of parts involved, it would increase the risk of error in repeating those part numbers in this AD. However, we are currently in the process of reviewing issues surrounding the posting of service bulletins on the Department of Transportation's Docket Management System (DMS) as part of an AD docket. Once we have thoroughly examined all aspects of this issue and have made a final determination, we will consider whether our current practice needs to be revised. However, we consider that to delay this AD action would be inappropriate, since we have determined that an unsafe condition exists and that replacement of certain parts must be accomplished to ensure continued safety. Therefore, no change has been made to this AD in this regard.

Request To Reference Parts Manufacturer Approval (PMA) Parts

MARPA also requests that we add language to the NPRM to account for the possible existence of alternative PMA equivalent parts. MARPA states that, under 14 CFR 21.303, there may be PMA parts that should also be affected by the NPRM. As justification, MARPA states that some PMA parts appear to be

similar to the affected parts addressed in the NPRM, and that further research should be conducted to ensure that all affected parts are included in the NPRM. MARPA further states that there may also be PMA parts equivalent to the "new and improved" replacement parts specified in the NPRM.

We concur with MARPA's general request that, if we know that an unsafe condition also exists in PMA parts, the AD should address those parts, as well as the original parts. At this time, we are not aware of other PMA parts equivalent to the affected cargo fire extinguishing bottles.

Furthermore, we infer that MARPA would like the AD to permit installation of any equivalent PMA parts so that it is not necessary for an operator to request approval of an AMOC in order to install an "equivalent" PMA part. Whether an alternative part is "equivalent" in adequately resolving the unsafe condition can only be determined on a case-by-case basis, based on a complete understanding of the unsafe condition. We are not currently aware of any such parts. Our policy is that, in order for operators to replace a part with one that is not specified in the AD, they must request an AMOC. This is necessary so that we can make a specific determination that an alternative part is or is not susceptible to the same unsafe condition.

MARPA's remarks are timely in that the Transport Airplane Directorate currently is in the process of reviewing this issue as it applies to transport category airplanes. We acknowledge that there may be other ways of addressing this issue to ensure that unsafe PMA parts are identified and addressed. Once we have thoroughly examined all aspects of this issue, including input from industry, and have made a final determination, we will consider whether our policy regarding addressing PMA parts in ADs needs to be revised. We consider that to delay this AD action would be inappropriate, since we have determined that an unsafe condition exists and that replacement of certain parts must be accomplished to ensure continued safety. Therefore, no change has been made to this AD in this regard.

Request To Delete Difference Paragraph

Boeing states that it intends to publish Revision 1 to Boeing Special Attention Service Bulletin 767-26-0124 to correct the reference to the AMM, which we identified as a difference in the NPRM. Boeing also states that Revision 1 is currently being routed for approval. We infer the commenter would like us to

delete the difference paragraph. We disagree, since the difference paragraph is not restated in this AD. Since we have already revised this AD to reference Revision 1 of the service bulletin, as described previously, no additional change to this AD is necessary.

Request To Revise the Costs of Compliance Paragraph

American Airlines states that the total cost for testing the cargo fire extinguishing bottles as specified in Boeing Special Attention Service Bulletin 777-26-0033, dated December 5, 2002, is \$5,460, per test cycle. The commenter also states that the total cost for replacing the cargo fire extinguishing bottles as specified in Boeing Service Bulletin 777-26-0034, Revision 1, dated July 1, 2004, is \$287,573. We infer that American Airlines would like us to revise the Costs of Compliance paragraph.

We disagree. The cost information in an AD describes only the direct costs of

the specific actions required by the AD. Based on the best data available, the manufacturer provided the number of work hours necessary to do the required actions. This number represents the time necessary to perform only the actions actually required by this AD. We recognize that, in doing the actions required by an AD, operators may incur incidental costs in addition to the direct costs. The cost analysis in AD rulemaking actions, however, typically does not include incidental costs such as the time required to gain access and close up, time necessary for planning, or time necessitated by other administrative actions. Those incidental costs, which may vary significantly among operators, are almost impossible to calculate. Therefore, no change has been made to this AD in this regard.

Clarification of AMOC Paragraph

We have revised this action to clarify the appropriate procedure for notifying

the principal inspector before using any approved AMOC on any airplane to which the AMOC applies.

Conclusion

We have carefully reviewed the available data, including the comments received, and determined that air safety and the public interest require adopting the AD with the changes described previously. We have determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

Costs of Compliance

There are about 322 airplanes of the affected design in the worldwide fleet. This AD affects about 167 airplanes of U.S. registry. The following table provides the estimated costs, at an average labor rate of \$65 per hour, for U.S. operators to comply with this AD.

ESTIMATED COSTS

Airplanes	Action	Work hours	Parts	Cost per airplane	Number of U.S.-registered airplanes	Fleet cost
Model 767-400ER series airplanes (for all 4 cargo fire extinguishing bottles).	Leak test, per test cycle.	4	None	\$260, per test cycle	36	\$9,360, per test cycle.
	Replacement	8	\$2,800	\$3,320	36	\$119,520.
Model 777-200 and -300 series airplanes (for all 5 cargo fire extinguishing bottles).	Leak test, per test cycle.	5	None	\$325, per test cycle	130	\$42,250, per test cycle.
	Replacement	10	\$3,400	\$4,050	131	\$530,550.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866;
- (2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket. See the **ADDRESSES** section for a location to examine the regulatory evaluation.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

- Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority : 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The Federal Aviation Administration (FAA) amends § 39.13 by adding the following new airworthiness directive (AD):

2006-17-11 Boeing: Amendment 39-14732. Docket No. FAA-2005-21713; Directorate Identifier 2005-NM-085-AD.

Effective Date

(a) This AD becomes effective September 27, 2006.

Affected ADs

(b) None.

Applicability

(c) This AD applies to the airplanes listed in Table 1 of this AD, certificated in any category:

TABLE 1.—APPLICABILITY

Boeing Model—	As Identified in—
767–400ER series airplanes.	Boeing Special Attention Service Bulletin 767–26–0125, dated January 22, 2004.
777–200 and –300 series airplanes.	Boeing Service Bulletin 777–26–0034, Revision 1, dated July 1, 2004.

Unsafe Condition

(d) This AD was prompted by failure of the safety fittings for the cargo fire extinguishing bottles. We are issuing this AD to prevent failure of the safety fittings for the cargo fire

extinguishing bottles due to corrosion, which could result in leakage of extinguishing agent. If a fire occurs in the cargo bay, the cargo fire extinguishing bottles could have less than enough extinguishing agent to control a fire.

Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Service Bulletin References

(f) The term “service bulletin,” as used in this AD, means the Accomplishment Instructions of the service bulletins identified in Table 2 of this AD, as applicable:

TABLE 2.—SERVICE BULLETIN REFERENCES

For model—	Boeing—	For the—
767–400ER series airplanes	Special Attention Service Bulletin 767–26–0124, Revision 1, dated April 13, 2006. Special Attention Service Bulletin 767–26–0125, dated January 22, 2004	Test specified in paragraph (g) of this AD. Replacement specified in paragraph (h) of this AD.
777–200 and –300 series airplanes	Special Attention Service Bulletin 777–26–0033, dated December 5, 2002. Service Bulletin 777–26–0034, Revision 1, dated July 1, 2004	Test specified in paragraph (g) of this AD. Replacement specified in paragraph (h) of this AD.

Repetitive Testing of Cargo Fire Extinguishing Bottles

(g) For all Model 767–400ER series airplanes; and the Model 777–200 and –300 series airplanes identified in Boeing Special Attention Service Bulletin 777–26–0033, dated December 5, 2002: Within 18 months or 6,000 flight hours after the effective date of this AD, whichever is first, test the fill and safety fittings of the cargo fire extinguishing bottles in the forward cargo compartment for leaks, in accordance with the applicable service bulletin. Repeat the test thereafter at intervals not to exceed 18 months or 6,000 flight hours, whichever is first, in accordance with the service bulletin, until the

replacement required by paragraph (h) of this AD is accomplished.

(1) If no leak is found or if the leak rate is below the calibrated rate specified in the service bulletin, before further flight, apply the corrosion inhibiting compound (CIC) to the safety disc inside the fill fitting and reidentify the cargo fire extinguishing bottle, in accordance with the applicable service bulletin.

(2) If any leak above the calibrated rate specified in the service bulletin is found, before further flight, replace and reidentify the cargo fire extinguishing bottle with new or reworked fire extinguishing bottles, in accordance with the applicable service bulletin; except where the service bulletin

specifies that the replacement may be accomplished according to an operator's “equivalent procedure,” replace in accordance with a method approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA. Chapter 26–23–02/401 of the Boeing 767 Aircraft Maintenance Manual (AMM) or Chapter 26–23–01/401 of the Boeing 777 AMM, as applicable, is one approved method.

Note 1: The Boeing service bulletins listed in Table 3 of this AD refer to certain Kidde Aerospace service bulletins, as applicable, as additional sources of service information for testing and reidentifying the cargo fire extinguishing bottles.

TABLE 3.—ADDITIONAL SERVICE INFORMATION FOR TESTING

For model—	Boeing Special Attention Service Bulletin—	Refers to Kidde Aerospace Service Bulletin—
767–400ER series airplanes.	767–26–0124, Revision 1, dated April 13, 2006.	473876–26–454. Revision 1, dated March 12, 2003, is the latest version of this service bulletin.
777–200 and –300 series airplanes.	777–26–0033, dated December 5, 2002	473474–26–442. Revision 1, dated March 12, 2003, is the latest version of this service bulletin. 473475–26–443. Revision 1, dated March 12, 2003, is the latest version of this service bulletin. 473854–26–444. Revision 1, dated March 12, 2003, is the latest version of this service bulletin. 473876–26–445. Revision 1, dated March 12, 2003, is the latest version of this service bulletin.

Replacement of Cargo Fire Extinguishing Bottles

(h) For all airplanes: Within 60 months after the effective date of this AD, replace the existing cargo fire extinguishing bottles with reworked fire extinguishing bottles, in accordance with the applicable service

bulletin. Replacement of a cargo fire extinguishing bottle with a reworked fire extinguishing bottle terminates the repetitive tests and CIC applications required by paragraph (g) of this AD for that fire extinguishing bottle only.

Note 2: The Boeing service bulletins listed in Table 4 of this AD refer to certain Kidde

Aerospace service bulletins, as applicable, as additional sources of service information for reworking the cargo fire extinguishing bottles.

TABLE 4.—ADDITIONAL SERVICE INFORMATION FOR REPLACEMENT

For model—	Boeing—	Refers to Kidde Aerospace Service Bulletin—
767–400ER series airplanes	Special Attention Service Bulletin 767–26–0125, dated January 22, 2004	473876–26–453, dated January 22, 2004.
777–200 and –300 series airplanes	Service Bulletin 777–26–0034, Revision 1, dated July 1, 2004.	473474–26–450, dated January 22, 2004. 473475–26–451, dated January 22, 2004. 473854–26–452, dated January 22, 2004. 473876–26–453, dated January 22, 2004.

Parts Installation

(i) For all airplanes: As of the effective date of this AD, no person may install a cargo fire extinguishing bottle, part numbers (P/Ns) 473474–1 and –2, P/Ns 473475–1 and –2, P/Ns 473854–1 and –2, or P/Ns 473876–1 and –2, on any airplane, unless the initial test required by paragraph (g) of this AD is accomplished.

Credit for Previous Service Bulletins

(j) For all Model 777–200 series airplanes; and Model 777–300 series airplanes identified as Group 2 in Boeing Special Attention Service Bulletin 777–26–0034, dated January 22, 2004: Actions done before the effective date of this AD in accordance with Boeing Special Attention Service Bulletin 777–26–0034, dated January 22, 2004, are acceptable for compliance with the corresponding requirements of this AD.

(k) For all Model 767–400ER series airplanes: Actions done before the effective

date of this AD in accordance with Boeing Special Attention Service Bulletin 767–26–0124, dated December 5, 2002, are acceptable for compliance with the corresponding requirements of this AD.

Alternative Methods of Compliance (AMOCs)

(l)(1) The Manager, Seattle ACO, FAA, has the authority to approve AMOCs for this AD, if requested in accordance with the procedures found in 14 CFR 39.19.

(2) Before using any AMOC approved in accordance with 14 CFR 39.19 on any airplane to which the AMOC applies, notify the appropriate principal inspector in the FAA Flight Standards Certificate Holding District Office.

Material Incorporated by Reference

(m) You must use the service information in Table 5 of this AD to perform the actions that are required by this AD, unless the AD

specifies otherwise. The Director of the **Federal Register** approved the incorporation by reference of these documents in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Contact Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124–2207, for a copy of this service information. You may review copies at the Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street, SW., Room PL–401, Nassif Building, Washington, DC; on the Internet at <http://dms.dot.gov>; or at the National Archives and Records Administration (NARA). For information on the availability of this material at the NARA, call (202) 741–6030, or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

Airworthiness Directives; Bombardier Model DHC–8–100, DHC–8–200, and DHC–8–300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain Bombardier Model DHC–8–100, DHC–8–200, and DHC–8–300 series airplanes. This AD requires repetitive inspections of the fluorescent light tube assemblies

of the cabin, lavatory, and sidewall, and corrective actions if necessary. This AD also provides for optional terminating action for the repetitive inspections. This AD results from reports of overheating due to arcing between the fluorescent tube pins and the lamp holder contacts. The tubes had not been properly seated during installation. We are issuing this AD to prevent fumes, traces of visible smoke, and fire at the fluorescent light tube assembly.

DATES: This AD becomes effective September 27, 2006.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in the AD as of September 27, 2006.

ADDRESSES: You may examine the AD docket on the Internet at <http://dms.dot.gov> or in person at the Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street

SW., Nassif Building, Room PL-401, Washington, DC.

Contact Bombardier, Inc., Bombardier Regional Aircraft Division, 123 Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada, for service information identified in this AD.

FOR FURTHER INFORMATION CONTACT:

Douglas Wagner, Aerospace Engineer, Systems and Flight Test Branch, ANE-172, FAA, New York Aircraft Certification Office, 1600 Stewart Avenue, suite 410, Westbury, New York 11590; telephone (516) 228-7306; fax (516) 794-5531.

SUPPLEMENTARY INFORMATION:

Examining the Docket

You may examine the airworthiness directive (AD) docket on the Internet at <http://dms.dot.gov> or in person at the Docket Management Facility office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Management Facility office (telephone (800) 647-5227) is located on the plaza level of the Nassif Building at the street address stated in the ADDRESSES section.

Discussion

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an AD that would apply to certain Bombardier Model DHC-8-100, DHC-8-200, and DHC-8-300 series airplanes. That NPRM was published in the **Federal Register** on April 4, 2006 (71 FR 16725). That NPRM proposed to require repetitive inspections of the fluorescent light tube assemblies of the cabin, lavatory, and sidewall, and corrective actions if necessary. That NPRM also proposed to provide for optional terminating action for the repetitive inspections.

Comments

We provided the public the opportunity to participate in the development of this AD. We have considered the comments received.

Request To Extend Compliance Time

Piedmont Airlines states that its C-check inspection interval can go up to 6,258 flight hours. Piedmont describes the grievous effect the NPRM compliance times will have on the airline. The NPRM specifies a compliance time of 5,000 flight hours or 36 months, whichever occurs first, for the initial compliance time, and repetitive intervals of 5,000 flight hours. The commenter requests that the initial inspection be done within the next C-check or 36 months and that the repetitive interval be done at intervals not to exceed the next C-check.

We agree to extend the compliance time, although we cannot refer to "the next C-check" because the variability among operators' maintenance schedules would not guarantee that the required work would be done within an appropriate time. We have instead revised paragraph (f) of this final rule to require an initial compliance time of 6,300 flight hours or 36 months, whichever occurs first, with a repetitive interval of 6,300 flight hours. We have determined that such an extension will not adversely affect safety, and will allow the work to be performed during regularly scheduled maintenance at a base where special equipment and trained maintenance personnel will be available if necessary.

Request To Clarify Parts Replacement Requirements

Piedmont requests that we clarify paragraph (h) of the NPRM, which prohibits installing a ballast part number (P/N) BA08006-1 or BA08006-

28-1 as of the effective date of the AD. Piedmont questions whether that statement applies when parts are removed for other maintenance, or only when the part is replaced.

We acknowledge the commenter's concern, but do not find it necessary to revise the final rule. The intent of paragraph (h) is to specifically prohibit replacing a ballast with another ballast having P/N BA08006-1 or BA08006-28-1. By simply reinstalling a part removed during maintenance, the operator is not "installing" a different part.

Gaining access and installing that part for other maintenance activities not associated with the AD is acceptable.

Additional Change to NPRM

Paragraph (f) of the NPRM refers to "Chapter 33-20-00, Section D," of the airplane maintenance manual (AMM) as one approved repair method. We have removed the section reference (there is no Section D) in this final rule. Acceptable repair instructions are found in Chapter 33-22-00 of the applicable AMM.

Conclusion

We have carefully reviewed the available data, including the comments received, and determined that air safety and the public interest require adopting the AD with the changes described previously. We have determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

Costs of Compliance

The following table provides the estimated costs for U.S. operators to comply with this AD. This AD will affect about 121 U.S.-registered airplanes.

ESTIMATED COSTS, PER INSPECTION CYCLE

Action	Work hours	Average labor rate per hour	Parts	Cost per airplane
Inspection, per inspection cycle	6 maximum	\$80	None	Up to \$480.
Ballast replacement (optional)	2, per ballast ¹	80	\$486, per ballast	Up to \$41,344.

¹NUMBER OF BALLASTS PER AIRPLANE

Area	Airplane model	Number of ballasts
Lavatory	DHC-8-100 and -200	1
	DHC-8-300	1
Sidewall	DHC-8-100 and -200	19
	DHC-8-300	30
Cabin	DHC-8-100 and -200	21
	DHC-8-300	33

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866;
- (2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and
- (3) Will not have a significant economic impact, positive or negative,

on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket. See the **ADDRESSES** section for a location to examine the regulatory evaluation.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority : 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The Federal Aviation Administration (FAA) amends § 39.13 by adding the following new airworthiness directive (AD):

2006–17–10 BOMBARDIER, INC. (Formerly de Havilland, Inc.):
Amendment 39–14731. Docket No. FAA–2006–24290; Directorate Identifier 2005–NM–243–AD.

Effective Date

(a) This AD becomes effective September 27, 2006.

Affected ADs

(b) None.

Applicability

(c) This AD applies to Bombardier Model DHC–8–102, –103, –106, –201, –202, –301, –311, and –315 airplanes; certificated in any category; serial numbers 003 through 407 inclusive, 409 through 412 inclusive, and 414 through 433 inclusive; excluding those with Hunting interiors.

Unsafe Condition

(d) This AD results from reports of overheating due to arcing between the fluorescent tube pins and the lamp holder contacts. The tubes had not been properly seated during installation. We are issuing this AD to prevent fumes, traces of visible smoke, and fire at the fluorescent light tube assembly.

Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Inspection

(f) Within 6,300 flight hours or 36 months after the effective date of this AD, whichever occurs first: Perform detailed inspections to detect signs of arcing of the fluorescent tube assemblies of the cabin, sidewalls, and lavatory, in accordance with the applicable temporary revision (TR) of the applicable maintenance program manual (MPM) identified in Table 1 of this AD. If any sign of arcing is found, repair before further flight using a method approved by either the Manager, New York Aircraft Certification Office (ACO), FAA; or Transport Canada Civil Aviation (or its delegated agent). Chapter 33–20–00 of the applicable airplane maintenance manual is one approved method. Repeat the inspection at intervals not to exceed 6,300 flight hours, until all ballast part numbers (P/Ns) BA08006–1 or BA08006–28–1 have been replaced in accordance with paragraph (g) of this AD.

TABLE 1.—TRS

Inspect the fluorescent tube assemblies of the—	In accordance with task—	of de Havilland TR—	To the de Havilland DASH 8 series—	For model—

	3320/03	MRB 3–156, dated May 3, 2005.	300 MPM PSM 1–83–7	DHC–8–301, –311, and –315 airplanes.
Sidewall	3320/02	MRB–147, dated May 3, 2005	100 MPM PSM 1–8–7	DHC–8–102, –103, and –106 airplanes.
	3320/02	MRB 2–25, dated May 3, 2005	200 MPM PSM 1–82–7	DHC–8–201 and –202 airplanes.
	3320/02	MRB 3–156, dated May 3, 2005.	300 MPM PSM 1–83–7	DHC–8–301, –311, and –315 airplanes.

Note 1: For the purposes of this AD, a detailed inspection is: "An intensive examination of a specific item, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at an intensity deemed appropriate. Inspection aids such as mirror, magnifying lenses, etc., may be necessary. Surface cleaning and elaborate procedures may be required."

Terminating Action

(g) The repetitive inspections required by this AD may be terminated if all ballasts installed on the airplane have P/N BR9000-21, installed in accordance with the Accomplishment Instructions of Bombardier Service Bulletin 8-33-51, Revision 'A,' dated

April 20, 2005 (to replace ballast P/N BA08006-1), or 8-33-52, dated April 15, 2005 (to replace ballast P/N BA08006-28-1). Ballasts installed before the effective date of this AD are also acceptable if done in accordance with Bombardier Service Bulletin 8-33-51, dated August 16, 2002.

Parts Installation

(h) As of the effective date of this AD: No person may install a ballast P/N BA08006-1 or BA08006-28-1 on any airplane.

Alternative Methods of Compliance (AMOCs)

(i)(1) The Manager, New York ACO, FAA, has the authority to approve AMOCs for this AD, if requested in accordance with the procedures found in 14 CFR 39.19.

(2) Before using any AMOC approved in accordance with § 39.19 on any airplane to which the AMOC applies, notify the appropriate principal inspector in the FAA Flight Standards Certificate Holding District Office.

Related Information

(j) Canadian airworthiness directive CF-2004-26R1, dated September 28, 2005, also addresses the subject of this AD.

Material Incorporated by Reference

(k) You must use the service information identified in Table 2 of this AD to perform the actions that are required by this AD, unless the AD specifies otherwise.

TABLE 2.—MATERIAL INCORPORATED BY REFERENCE

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2006-24034; Directorate Identifier 2006-NE-05-AD; Amendment 39-14729; AD 2006-17-08]

RIN 2120-AA64

Airworthiness Directives; Pratt & Whitney PW4077D, PW4084D, PW4090, and PW4090-3 Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for Pratt & Whitney (PW) PW4077D, PW4084D, PW4090, and PW4090-3 turbofan engines that were reassembled with certain previously used high pressure compressor (HPC) exit brush seal assembly parts and certain new or refurbished HPC exit diffuser air seal inner lands. This AD requires replacing the HPC exit inner and outer brush seal packs with new brush seal packs, or replacing the HPC exit brush seal assembly with a new HPC exit brush seal assembly. This AD results from a report of oil leaking into the high pressure turbine (HPT) interstage cavity and igniting, leading to an engine case penetration and engine in-flight shutdown. Although liberated engine

parts did not penetrate the engine nacelle, we are issuing this AD to prevent uncontained engine failure, damage to the airplane, and injury to passengers.

DATES: This AD becomes effective September 27, 2006. The Director of the Federal Register approved the incorporation by reference of certain publications listed in the regulations as of September 27, 2006.

ADDRESSES: You can get the service information identified in this ad from Pratt & Whitney, 400 Main St., East Hartford, CT 06108; telephone (860) 565-8770; fax (860) 565-4503.

You may examine the AD docket on the Internet at <http://dms.dot.gov> or in Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Antonio Cancelliere, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803; telephone (781) 238-7751; fax (781) 238-7199.

SUPPLEMENTARY INFORMATION: The FAA proposed to amend 14 CFR part 39 with a proposed airworthiness directive (AD). The proposed AD applies to Pratt & Whitney (PW) PW4077D, PW4084D, PW4090, and PW4090-3 turbofan engines that were reassembled with certain previously used HPC exit brush seal assembly parts and certain new or refurbished HPC exit diffuser air seal

inner lands. We published the proposed AD in the **Federal Register** on April 19, 2006 (71 FR 20042). That action proposed to require replacing the HPC exit inner and outer brush seal packs with new brush seal packs, or replacing the HPC exit brush seal assembly with a new HPC exit brush seal assembly.

Examining the AD Docket

You may examine the docket that contains the AD, any comments received, and any final disposition in person at the Docket Management Facility Docket Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Office (telephone (800) 647-5227) is located on the plaza level of the Department of Transportation Nassif Building at the street address stated in **ADDRESSES**. Comments will be available in the AD docket shortly after the DMS receives them.

Comments

We provided the public the opportunity to participate in the development of this AD. We have considered the comments received.

Request to More Accurately Describe the Unsafe Condition

The Boeing Company requests that we more accurately describe the unsafe condition. They propose that we state the unsafe condition as "This AD results from a report of oil leaking into the high pressure turbine (HPT) interstage cavity and igniting, leading to an engine case penetration and engine in-flight shutdown. Although liberated engine parts did not penetrate the engine nacelle, we are proposing this AD to prevent uncontained engine failure, damage to the airplane, and injury to passengers."

We agree and adopted the suggested language.

Request for Clarification

Japan Airlines requests clarification of the compliance on whether "cycles-since-last-overhaul (CSLO)" applies to the engine's last shop visit or if it applies to overhaul of the HPC diffuser assembly only.

We agree we need to clarify the compliance. The CSLO applies to overhaul of the HPC diffuser assembly only. As a result of the comment, we reworded compliance paragraphs (g)(1) and (g)(2) to read as follows:

"(1) By 3,000 cycles-in-service (CIS) since a used HPC exit inner brush seal pack and a new or refurbished HPC exit diffuser air seal land were installed in the engine, or by March 31, 2007, whichever occurs later; however

(2) If on March 31, 2007, the used HPC exit inner brush seal pack coupled with a new or refurbished HPC exit diffuser air seal inner land assembly has not accumulated 3,000 CIS, then by 3,000 CIS, or December 31, 2008, whichever occurs first."

Conclusion

We have carefully reviewed the available data, including the comments received, and determined that air safety and the public interest require adopting the AD with the changes described previously. We have determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

Costs of Compliance

We estimate that this AD will affect 76 PW PW4077D, PW4084D, PW4090, and PW4090-3 turbofan engines installed on airplanes of U.S. registry. We also estimate that it will take about 9 work-hours per engine to perform the parts replacement, and that the average labor rate is \$80 per work-hour. Required parts will cost about \$100,017 per engine. Based on these figures, we estimate the total cost of the AD to U.S. operators to be \$7,656,012.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866;
- (2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a summary of the costs to comply with this AD and placed it in the AD Docket. You may get a copy of this summary at the address listed under **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2006-17-08 Pratt & Whitney: Amendment 39-14729. Docket No. FAA-2006-24034; Directorate Identifier 2006-NE-05-AD.

Effective Date

- (a) This airworthiness directive (AD) becomes effective September 27, 2006.

Affected ADs

- (b) None.

Applicability

- (c) This AD applies to Pratt & Whitney (PW) PW4077D, PW4084D, PW4090, and PW4090-3 turbofan engines that were:

(1) Reassembled with a previously used high pressure compressor (HPC) exit inner brush seal pack, part number (P/N) 50J894-01; and

(2) Reassembled with a new or refurbished HPC exit diffuser air seal inner land, P/N 55H869.

- (d) These engines are installed on, but not limited to, Boeing 777 airplanes.

Unsafe Condition

- (e) This AD results from a report of oil leaking into the high pressure turbine (HPT) interstage cavity and igniting, leading to an engine case penetration and engine in-flight shutdown. Although liberated engine parts did not penetrate the engine nacelle, we are

issuing this AD to prevent uncontained engine failure, damage to the airplane, and injury to passengers.

Compliance

(f) You are responsible for having the actions required by this AD performed at the following compliance times, unless the actions have already been done.

(g) Replace the HPC exit inner and outer brush seal packs with new HPC exit inner and outer brush seal packs, or replace the HPC exit brush seal assembly with a new HPC exit brush seal assembly as follows:

(1) By 3,000 cycles-in-service (CIS) since a used HPC exit inner brush seal pack and a new or refurbished HPC exit diffuser air seal land were installed in the engine, or by March 31, 2007, whichever occurs later; however,

(2) If on March 31, 2007, the used HPC exit inner brush seal pack coupled with a new or refurbished HPC exit diffuser air seal inner land assembly has not accumulated 3,000 CIS, then by 3,000 CIS, or December 31, 2008, whichever occurs first.

(h) Use the Accomplishment Instructions of PW Service Bulletin No. PW4G-112-A72-280, Revision 1, dated March 21, 2006, to do the inner and outer brush pack replacements.

Alternative Methods of Compliance

(i) The Manager, Engine Certification Office, has the authority to approve alternative methods of compliance for this AD if requested using the procedures found in 14 CFR 39.19.

Related Information

(j) None.

Material Incorporated by Reference

(k) You must use Pratt & Whitney Service Bulletin No. PW4G-112-A72-280, Revision 1, dated March 21, 2006, to perform the replacements required by this AD. The Director of the Federal Register approved the incorporation by reference of this service bulletin in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Contact Pratt & Whitney, 400 Main St., East Hartford, CT 06108; telephone (860) 565-8770; fax (860) 565-4503, for a copy of this service information for a copy of this service information. You may review copies at the FAA, New England Region, Office of the Regional Counsel, 12 New England Executive Park, Burlington, MA; or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Burlington, Massachusetts, on August 14, 2006.

Thomas A. Boudreau,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2006-25657; Directorate Identifier 2006-NM-187-AD; Amendment 39-14735; AD 2006-17-14]

RIN 2120-AA64

Airworthiness Directives; Bombardier Model CL-600-2B19 (Regional Jet Series 100 & 440) Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule; request for comments.

SUMMARY: The FAA is superseding an existing airworthiness directive (AD) that applies to certain Bombardier Model CL-600-2B19 (Regional Jet Series 100 & 440) airplanes. The existing AD currently requires inspecting contactors 1K4XD, 2K4XD, and K4XA to determine the type of terminal base plate, and applying sealant on the terminal base plates, if necessary. This new AD revises the effective date of the existing AD. This AD results from incidents of short circuit failures of certain alternating current (AC) contactors located in the avionics bay. We are issuing this AD to prevent short circuit failures of certain AC contactors, which could result in arcing and consequent smoke or fire.

DATES: This AD becomes effective September 7, 2006.

On August 9, 2006 (71 FR 45364, August 9, 2006), the Director of the Federal Register approved the incorporation by reference of Bombardier Service Bulletin 601R-24-122, Revision A, dated July 13, 2006.

We must receive any comments on this AD by October 23, 2006.

ADDRESSES: Use one of the following addresses to submit comments on this AD.

- **DOT Docket Web site:** Go to <http://dms.dot.gov> and follow the instructions for sending your comments electronically.

- **Government-wide rulemaking Web site:** Go to <http://www.regulations.gov> and follow the instructions for sending your comments electronically.

- **Mail:** Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street, SW., Nassif Building, Room PL-401, Washington, DC 20590.

- **Fax:** (202) 493-2251.

- **Hand Delivery:** Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington,

DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Contact Bombardier, Inc., Canadair, Aerospace Group, P.O. Box 6087, Station Centre-ville, Montreal, Quebec H3C 3G9, Canada, for service information identified in this AD.

You may examine the contents of the AD docket on the Internet at <http://dms.dot.gov>, or in person at the Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street, SW., Room PL-401, on the plaza level of the Nassif Building, Washington, DC. This docket number is FAA-2006-25657; the directorate identifier for this docket is 2006-NM-187-AD.

FOR FURTHER INFORMATION CONTACT:

Wing Chan, Aerospace Engineer, Systems and Flight Test Branch, ANE-172, FAA, New York Aircraft Certification Office, 1600 Stewart Avenue, suite 410, Westbury, New York 11590; telephone (516) 228-7311; fax (516) 794-5531.

SUPPLEMENTARY INFORMATION:

Discussion

On July 31, 2006, the FAA issued AD 2006-16-07, amendment 39-14707 (71 FR 45364, August 9, 2006). That AD applies to certain Bombardier Model CL-600-2B19 (Regional Jet Series 100 & 440) airplanes. That AD requires inspecting contactors 1K4XD, 2K4XD, and K4XA to determine the type of terminal base plate, and applying sealant on the terminal base plates, if necessary. That AD resulted from incidents of short circuit failures of certain alternating current (AC) contactors located in the avionics bay. The actions specified in that AD are intended to prevent short circuit failures of certain AC contactors, which could result in arcing and consequent smoke or fire.

Actions Since AD Was Issued

Since we issued that AD, we have determined that the effective date of that AD was inadvertently specified as the same date as the publication date. The effective date of the AD should be 15 days after the date of publication in the **Federal Register**.

FAA's Determination and Requirements of This AD

This airplane model is manufactured in Canada and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, Transport Canada Civil Aviation (TCCA), which is the airworthiness

authority for Canada, has kept the FAA informed of the situation described above. We have examined TCCA's findings, evaluated all pertinent information, and determined that we need to issue an AD for products of this type design that are certificated for operation in the United States.

Therefore, we are issuing this AD to supersede AD 2006-16-07. This new AD retains the requirements of the existing AD. This AD also revises the effective date of the existing AD.

Interim Action

We consider this AD interim action. If final action is later identified, we may consider further rulemaking then.

FAA's Determination of the Effective Date

An unsafe condition exists that requires the immediate adoption of this AD; therefore, providing notice and opportunity for public comment before the AD is issued is impracticable, and good cause exists to make this AD effective in less than 30 days.

Comments Invited

This AD is a final rule that involves requirements that affect flight safety and was not preceded by notice and an opportunity for public comment; however, we invite you to submit any relevant written data, views, or arguments regarding this AD. Send your comments to an address listed in the **ADDRESSES** section. Include "Docket No. FAA-2006-25657; Directorate Identifier 2006-NM-187-AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of the AD that might suggest a need to modify it.

We will post all comments we receive, without change, to <http://dms.dot.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact with FAA personnel concerning this AD. Using the search function of that Web site, anyone can find and read the comments in any of our dockets, including the name of the individual who sent the comment (or signed the comment on behalf of an association, business, labor union, etc.). You can review the DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477-78), or you can visit <http://dms.dot.gov>.

Examining the Docket

You may examine the AD docket on the Internet at <http://dms.dot.gov>, or in person at the Docket Management

Facility office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Management Facility office (telephone (800) 647-5227) is located on the plaza level of the Nassif Building at the DOT street address stated in the **ADDRESSES** section. Comments will be available in the AD docket shortly after the Docket Management System receives them.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the regulation:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and
3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket. See the **ADDRESSES** section for a location to examine the regulatory evaluation.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the FAA amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The Federal Aviation Administration (FAA) amends § 39.13 by removing amendment 39-14707 (71 FR 45364, August 9, 2006) and adding the following new AD:

2006-17-14 Bombardier, Inc. (Formerly Canadair): Docket No. FAA-2006-25657; Directorate Identifier 2006-NM-187-AD; Amendment 39-14735.

Effective Date

(a) This AD becomes effective September 7, 2006.

Affected ADs

(b) This AD supersedes AD 2006-16-07.

Applicability

(c) This AD applies to Bombardier Model CL-600-2B19 (Regional Jet Series 100 & 440) airplanes, certificated in any category, serial numbers 7003 through 7990 inclusive and 8000 and subsequent.

Unsafe Condition

(d) This AD results from incidents of short circuit failures of certain alternating current (AC) contactors located in the avionics bay. We are issuing this AD to prevent short circuit failures of certain AC contactors, which could result in arcing and consequent smoke or fire.

Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Inspection and Corrective Action

(f) Within 800 flight hours or four months after the effective date of this AD, whichever occurs first: Do a general visual inspection of AC service bus contactors 1K4XD and 2K4XD, part number (P/N) D-18ZZA, and the utility bus contactor K4XA, P/N D-7GRZ, to determine which contactors have an Ultem 2200 terminal base plate (*i.e.*, the plate is made from a black molded thermal plastic material), and apply RTV sealant to the terminal base plate, as applicable, by doing all the actions specified in the Accomplishment Instructions of Bombardier Service Bulletin 601R-24-122, Revision A, dated July 13, 2006. Do all applicable applications of sealant before further flight.

Note 1: For the purposes of this AD, a general visual inspection is: "A visual examination of an interior or exterior area,

installation, or assembly to detect obvious damage, failure, or irregularity. This level of inspection is made from within touching distance unless otherwise specified. A mirror may be necessary to ensure visual access to all surfaces in the inspection area. This level of inspection is made under normally available lighting conditions such as daylight, hangar lighting, flashlight, or droplight and may require removal or opening of access panels or doors. Stands, ladders, or platforms may be required to gain proximity to the area being checked."

Previous Actions Accomplished According to Other Service Information

(g) Actions accomplished before the effective date of this AD in accordance with Bombardier Drawing Number K601R50180, dated June 2, 2006; or Bombardier Service Bulletin 601R-24-122, dated June 27, 2006; are considered acceptable for compliance with the actions specified in paragraph (f) of this AD.

Parts Installation

(h) As of the effective date of this AD, no person may install AC contactor 1K4XD, 2K4XD, or K4XA, having an Ultem 2200 terminal base plate, on any airplane, unless RTV sealant has been applied to the terminal base plate in accordance with Bombardier Service Bulletin 601R-24-122, Revision A, dated July 13, 2006.

Alternative Methods of Compliance (AMOCs)

(i)(1) The Manager, New York Aircraft Certification Office, FAA, has the authority to approve AMOCs for this AD, if requested in accordance with the procedures found in 14 CFR 39.19.

(2) Before using any AMOC approved in accordance with § 39.19 on any airplane to which the AMOC applies, notify the appropriate principal inspector in the FAA Flight Standards Certificate Holding District Office.

(3) AMOCs approved previously in accordance with AD 2006-16-07, are approved as AMOCs for the corresponding provisions of this AD.

Related Information

(j) Canadian airworthiness directive CF-2006-17, dated July 11, 2006, also addresses the subject of this AD.

Material Incorporated by Reference

(k) You must use Bombardier Service Bulletin 601R-24-122, Revision A, dated July 13, 2006, to perform the actions that are required by this AD, unless the AD specifies otherwise. On August 9, 2006 (71 FR 45364, August 9, 2006), the Director of the **Federal Register** approved the incorporation by reference of this document. Contact Bombardier, Inc., Canadair, Aerospace Group, P.O. Box 6087, Station Centre-ville, Montreal, Quebec H3C 3G9, Canada, for a copy of this service information. You may review copies at the Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street, SW., Room PL-401, Nassif Building, Washington, DC; on the Internet at <http://dms.dot.gov>; or at the National Archives and Records

Administration (NARA). For information on the availability of this material at the NARA, call (202) 741-6030, or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

Issued in Renton, Washington, on August 14, 2006.

Ali Bahrami,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. E6-13831 Filed 8-22-06; 8:45 am]

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2006-25584; Directorate Identifier 2000-NE-62-AD; Amendment 39-14733; AD 2006-17-12]

RIN 2120-AA64

Airworthiness Directives; Rolls-Royce plc RB211 Series Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), that is applicable to Rolls-Royce plc (RR) models RB211-535E4-37, RB211-535E4-37, RB211-535C-37, RB211-535E4-B-75, RB211-535E4-C, and RB211-22B-02 turbofan engines. That AD currently requires inspecting certain high pressure (HP) turbine discs, manufactured between 1989 and 1999, for cracks in the rim cooling air holes, and, if necessary, replacing the discs with serviceable parts. The manufacturer identified reaming-induced machining anomalies (RIMA) as the cause for the cracking. This amendment requires the same inspections, and reduces the compliance times for eddy current inspection (ECI) for the RR RB211-22B-02 engines. This amendment results from the manufacturer reducing their recommended compliance times for inspections on RB211-22B-02 engines. We are issuing this AD to prevent possible disc failure, which could result in an uncontained engine failure and damage to the airplane.

DATES: This AD becomes effective September 27, 2006. The Director of the Federal Register approved the incorporation by reference of certain publications listed in the regulations as of September 27, 2006.

The Director of the Federal Register approved the incorporation by reference

of RR Alert Service Bulletin (ASB) No. RB211-72-AE651, dated November 22, 2004, as of January 13, 2005 (69 FR 77881, December 29, 2004) and RR Service Bulletin (SB) No. RB211-72-C877, Revision 1, dated March 7, 2001, listed in the AD, as of December 24, 2001 (66 FR 57859, November 19, 2001).

ADDRESSES: You can get the service information identified in this proposed AD from Rolls-Royce plc, PO Box 31, Derby, England; telephone: 011 44 1332-249428, fax: 011 44 1332-249223.

You may examine the AD docket on the Internet at <http://dms.dot.gov> or in Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ian Dargin, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803; telephone (781) 238-7178, fax (781) 238-7199.

SUPPLEMENTARY INFORMATION: The FAA proposed to amend 14 CFR part 39 with a proposed airworthiness directive (AD). The proposed AD applies to RR models RB211-535E4-37, RB211-535E4-B-37, RB211-535C-37, RB211-535E4-B-75, and RB211-22B-02 turbofan engines. We published the proposed AD in the **Federal Register** on January 30, 2006 (71 FR 4832). That action proposed to reduce the inspection schedules required by AD 2004-26-03, for the high risk discs installed on model RB211-22B-02 engines.

Examining the AD Docket

You may examine the docket that contains the AD, any comments received, and any final disposition in person at the Docket Management Facility Docket Offices between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Office (telephone (800) 647-5227) is located on the plaza level of the Department of Transportation Nassif Building at the street address stated in **ADDRESSES**. Comments will be available in the AD docket shortly after the DMS receives them.

Comments

We provided the public the opportunity to participate in the development of this AD. We received no comments on the proposal or on the determination of the cost to the public.

Editorial Change To Add Background Information to the Summary

After we issued the NPRM, RR informed us that they identified reaming-induced machining anomalies (RIMA) as the cause for the cracking.

Docket Number Change

We are transferring the docket for this AD to the Docket Management System as part of our on-going docket management consolidation efforts. The new Docket No. is FAA-2006-25584. The old Docket No. became the Directorate Identifier, which is 2000-NE-62-AD. This final rule might get logged into the DMS docket, ahead of the proposed AD and comments received, as we are in the process of sending those items to the DMS.

Conclusion

We have carefully reviewed the available data and determined that air safety and the public interest require adopting the AD as proposed.

Costs of Compliance

We estimate that this AD will affect six RR RB211-22B engines installed on airplanes of U.S. registry. We also estimate that it will take about 4.0 work-hours per engine to perform the actions, and that the average labor rate is \$65 per work-hour. There are no required parts. Based on these figures, we estimate the total cost of the AD to U.S. operators to be \$1,560.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority

because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866;
- (2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a summary of the costs to comply with this AD and placed it in the AD Docket. You may get a copy of this summary at the address listed under **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Amendment 39-13915 (69 FR 77881, December 29, 2004) and by adding a new airworthiness directive, Amendment 39-14733, to read as follows:

2006-17-12 Rolls-Royce plc: Amendment 39-14733. Docket No. FAA-2006-25584; Directorate Identifier 2000-NE-62-AD.

Effective Date

(a) This airworthiness directive (AD) becomes effective September 27, 2006.

Affected ADs

(b) This AD supersedes AD 2004-26-03, Amendment 39-13915.

Applicability

(c) This AD applies to Rolls-Royce plc (RR) models RB211-535E4-37, RB211-535E4-B-37, RB211-535C-37, RB211-535E4-B-75, RB211-535E4-C, and RB211-22B-02 turbofan engines with turbine discs having part numbers and serial numbers listed in the following Tables 1, 3, and 5 of this AD. These turbofan engines are installed on, but not limited to, Boeing 757, Tupolev Tu204, and Lockheed L-1011 series airplanes.

Unsafe Condition

(d) This AD results from the manufacturer reducing the inspection compliance times for the RB211-22B-02 turbofan engines. We are issuing this AD to prevent possible disc failure, which could result in an uncontained engine failure and damage to the airplane.

Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified unless the actions have already been done.

Eddy Current Inspection for All Except Model RB211-22B-02 Engines

(f) For all except model RB211-22B-02 engines, do the following:

- (1) Perform an eddy current inspection of the high pressure (HP) turbine discs listed in Table 1 of this AD, for cracks in the rim cooling air holes. Use paragraph 3. of the Accomplishment Instructions of RR Alert Service Bulletin (ASB) No. RB.211-72-AE651, dated November 22, 2004, to perform the eddy current inspection.

(2) Use the compliance schedule in Table 2 of this AD.

TABLE 2.—COMPLIANCE SCHEDULE FOR HP TURBINE DISCS LISTED IN TABLE 1

If disc Cycles-Since-New (CSN) on October 8, 2004 are:	Then eddy current inspect:
(i) 12,750 CSN or more	Within 250 cycles-in-service (CIS) from October 8, 2004 or within 14,500 CSN, whichever occurs first.
(ii) Fewer than 12,750 CSN but 10,500 CSN or more.	Within 500 CIS from October 8, 2004.
(iii) Fewer than 10,500 CSN	Before 11,000 CSN or at next shop visit after the effective date of this AD, whichever occurs first.

(3) On discs that pass inspection, use paragraph 3. of the Accomplishment Instructions of RR ASB No. RB.211-72-AE651, dated November 22, 2004, to permanently etch NMSB 72-AE651 onto the disc, adjacent to the part number.

(4) Perform an eddy current inspection of the HP turbine discs listed in Table 3 of this AD, for cracks in the rim cooling air holes. Use paragraph 3. of the Accomplishment Instructions of RR ASB No. RB.211-72-AE651, dated November 22, 2004, to perform the eddy current inspection.

(5) Use the compliance schedule in Table 4 of this AD.

TABLE 4.—COMPLIANCE SCHEDULE FOR HP TURBINE DISCS LISTED IN TABLE 3

If disc CSN on January 29, 2001 are:	Then eddy current inspect:
(i) Fewer than 13,700 CSN	Before reaching 14,500 CSN, or at the next shop visit after the effective date of this AD, whichever occurs first.
(ii) 13,700 CSN or more	Before reaching one of the following, whichever occurs first after the effective date of this AD: (A) 15,300 CSN. (B) Within 800 CIS since January 29, 2001. (C) At next shop visit.

(6) For discs that pass inspection, use paragraph 3. of the Accomplishment Instructions of RR ASB No. RB.211-72-AE651, dated November 22, 2004, to permanently etch NMSB 72-AE651 onto the disc, adjacent to the part number.

Eddy Current Inspection for Model RB211-22B-02 Engines

(g) For model RB211-22B-02 engines, do the following:

(1) Perform an eddy current inspection of the HP turbine discs listed in Table 5 of this AD, for cracks in the rim cooling air holes. Use paragraph 3. of the Accomplishment Instructions of RR ASB No. RB.211-72-

AE717, dated January 21, 2005, to perform the eddy current inspection.

TABLE 5.—AFFECTED HP TURBINE DISCS IN RR MODEL RB211-02 TURBOFAN ENGINES

Part No.	Serial No.
UL28267	All.

(2) Use the compliance schedule in Table 6 of this AD.

TABLE 6.—COMPLIANCE SCHEDULE FOR HP TURBINE DISCS LISTED IN TABLE 5

If disc CSN on January 1, 2005 are:	Then eddy current inspect:
(i) More than 9,000 CSN	Within 500 CIS after January 1, 2005, but before 11,000 CSN, whichever is sooner.
(ii) More than 1,500, but fewer than 9,001 CSN	Before exceeding 9,500 CSN, or at the next shop visit after the effective date of this AD, whichever occurs first.

(3) For discs that pass inspection, use paragraph 3. of the Accomplishment Instructions of RR ASB No. RB.211-72-AE717, dated January 21, 2005, to permanently etch NMSB 72-AE717 onto the disc, adjacent to the part number.

Other Conditions for All Engines

(h) Do not perform the actions of this AD to a disc until that disc has reached at least 1,500 CSN.

(i) Engines with an affected HP turbine disc at shop visit on the effective date of this AD and without the HP turbine rotor installed in the combustor outer case, must have the disc eddy current inspected before assembling the engine.

(j) Engines with an affected HP turbine disc at shop visit on the effective date of this AD with the HPT rotor installed in the combustor case need not have the disc eddy current inspected at this time.

(k) HP turbine discs previously eddy current inspected at fewer than 1,500 CSN must be inspected again using this AD.

(l) Replace cracked HP turbine discs with a serviceable disc.

Definition

(m) For the purpose of this AD, next shop visit is defined as the first shop visit opportunity when the HPT rotor is removed from the combustion case.

(n) For the purpose of this AD, a serviceable part is one with cyclic life remaining and either not listed in any of the preceding tables or one listed in a preceding table, but previously eddy current inspected and permanently etch marked with the

Service Bulletin (SB) number NMSB 72-AE651 or NMSB 72-C877 on the disc.

Previous Credit

(o) Previous credit is allowed for the actions in this AD for HP turbine discs with 1,500 CSN or more that were eddy current inspected using applicable RR SB No. RB.211-72-C817, Revision 2, dated March 7, 2001, RR TSD 594-J, Overhaul Processes Manual, Task 70-00-00-200-223, or RR SB No. RB.211-72-C877, Revision 1, dated March 7, 2001.

Reporting Requirements

(p) For all except model RB211-22B-02 engines, report findings of the inspection using paragraph 3.E. of the Accomplishment Instructions of RR ASB RB.211-72-AE651, dated November 22, 2004. The Office of Management and Budget (OMB) has approved the reporting requirements specified in paragraph 3.E. of the Accomplishment Instructions of RR ASB RB.211-72-AE651, dated November 22, 2004, and assigned OMB control number 2120-0056.

(q) For model RB211-22B-02 engines, report findings of the inspection using paragraph 3.E. of the Accomplishment Instructions of RR ASB RB.211-72-AE717, dated January 21, 2005. The OMB has approved the reporting requirements specified in paragraph 3.E. of the Accomplishment Instructions of RR ASB RB.211-72-AE717, dated January 21, 2005, and assigned OMB control number 2120-0056.

Alternative Methods of Compliance

(r) The Manager, Engine Certification Office, has the authority to approve alternative methods of compliance for this AD if requested using the procedures found in 14 CFR 39.19.

Material Incorporated by Reference

(s) You must use the service information specified in Table 7 of this AD to perform the inspections required by this AD. The Director of the Federal Register approved the incorporation by reference of RR ASB RB.211-72-AE717, dated January 21, 2005, listed in Table 7 of this AD in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. The incorporation by reference of RR ASB No. RB.211-72-AE651, dated November 22, 2004, was approved previously by the Director of the Federal Register as of January 13, 2005 (69 FR 77881, December 29, 2004). The incorporation by reference of RR SB No. RB.211-72-C877, Revision 1, dated March 7, 2001, was approved previously by the Director of the Federal Register as of December 24, 2001 (66 FR 57859, November 19, 2001). You can get a copy from Rolls-Royce plc, PO Box 31, Derby, England; telephone: 011 44 1332-249428, fax: 011 44 1332-249223, for a copy of this service information. You may review copies at the FAA, New England Region, Office of the Regional Counsel, 12 New England Executive Park, Burlington, MA; or the National Archives and Records Administration (NARA). BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 71**

[Docket No. FAA-2006-24781; Airspace Docket No. 06-AWP-8]

Modification of Class E Airspace; Half Moon Bay, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies the Class E airspace area at Half Moon Bay, CA. The establishment of an Area Navigation (RNAV) Global Positioning System (GPS) Z Instrument Approach Procedure (IAP) to Runway (RWY) 30 to Half Moon Bay Airport, Half Moon Bay, CA has made this action necessary. Additional controlled airspace extending upward from 700 feet or more above the surface of the earth is needed to contain aircraft executing this RNAV (GPS) Z IAP to RWY 30 at Half Moon Bay Airport. The intended effect of this action is to provide adequate controlled airspace for Instrument Flight Rules operations at Half Moon Bay Airport, Half Moon Bay, CA.

EFFECTIVE DATE: 0901 UTC September 28, 2006. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

FOR FURTHER INFORMATION CONTACT: The Office of the Regional Western Terminal Operations, Federal Aviation Administration, OF 15000 Aviation Boulevard, Lawndale, California 90261, telephone (310) 725-6502.

SUPPLEMENTARY INFORMATION:**History**

On June 14, 2006, the FAA proposed to amend 14 CFR part 71 by modifying the Class E airspace area at Half Moon Bay, CA (06 FR 34296). Additional controlled airspace extending upward

from 700 feet or more above the surface is needed to contain aircraft executing the RNAV (GPS) Z IAP RWY 30 to Half Moon Bay Airport. This action will provide adequate controlled airspace for aircraft executing the RNAV (GPS) Z IAP RWY 30 to Half Moon Bay Airport, Half Moon Bay, CA.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. Class E airspace designations for airspace extending from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9N, dated September 1, 2005, and effective September 15, 2005, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 modifies the Class E airspace area at Half Moon Bay, CA. The establishment of a RNAV (GPS) Z IAP RWY 30 to Half Moon Bay Airport has made this action necessary. The effect of this action will provide adequate airspace for aircraft executing the RNAV (GPS) Z IAP RWY 30 to Half Moon Bay Airport, Half Moon Bay, CA.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

■ In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS, ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9N, Airspace Designations and Reporting Points, dated September 1, 2005, and effective September 15, 2005, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 71**

[Docket No. FAA-2006-23714; Airspace Docket No. 06-AAL-07]

Revision of Class E Airspace; Barter Island, AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revises Class E airspace at Barter Island, AK to provide adequate controlled airspace to contain aircraft executing two new Standard Instrument Approach Procedures (SIAPs) and one amended SIAP. This rule results in revised Class E airspace established upward from 700 feet (ft.) and 1,200 ft. above the surface at Barter Island Airport, AK.

EFFECTIVE DATE: 0901 UTC, November 23, 2006. The Director of the **Federal Register** approves this incorporation by reference action under 14 CFR 71.1, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

FOR FURTHER INFORMATION CONTACT: Gary Rolf, AAL-538G, Federal Aviation Administration, 222 West 7th Avenue, Box 14, Anchorage, AK 99513-7587; telephone number (907) 271-5898; fax: (907) 271-2850; e-mail: gary.ctr.rolf@faa.gov. Internet address: <http://www.alaska.faa.gov/at>.

SUPPLEMENTARY INFORMATION:

History

On Monday, June 19, 2006, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise Class E airspace upward from 700 ft. and 1,200 ft. above the surface at Barter Island, AK (71 FR 35225). The action was proposed in order to create Class E airspace sufficient in size to contain aircraft while executing two new and one amended SIAP for the Barter Island Airport. The new approaches are (1) Area Navigation (Global Positioning System) (RNAV (GPS)) RWY 07, Original; and (2) RNAV (GPS) RWY 25, Original. The amended approach is the Non Directional Beacon (NDB) RWY 07, Amendment 1. Class E controlled airspace extending upward from 700 ft. and 1,200 ft. above the surface in the Barter Island area is revised by this action. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No public comments have been received; thus the rule is adopted as proposed.

The area will be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as 700/1,200 ft. transition areas are published in paragraph 6005 of FAA Order 7400.9N, *Airspace Designations and Reporting Points*, dated September 1, 2005, and effective September 15, 2005, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 revises Class E airspace at the Barter Island Airport, Alaska. This Class E airspace is revised to accommodate aircraft executing two new SIAPs and

one amended SIAP, and will be depicted on aeronautical charts for pilot reference. The intended effect of this rule is to provide adequate controlled airspace for Instrument Flight Rule (IFR) operations at Barter Island Airport, Alaska.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle 1, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart 1, Section 40103, Sovereignty and use of airspace. Under that section, the FAA is charged with prescribing regulations to ensure the safe and efficient use of the navigable airspace. This regulation is within the scope of that authority because it creates Class E airspace sufficient in size to contain aircraft executing instrument procedures for the Barter Island Airport and represents the FAA’s continuing effort to safely and efficiently use the navigable airspace.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

■ In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

14 CFR Part 294

[OST Docket No. 2006-25691]

RIN 2105-AD58

Canadian Charter Air Taxi Operators

AGENCY: Department of Transportation (DOT); Office of the Secretary (OST).

ACTION: Final rule.

SUMMARY: DOT is updating its rule concerning Canadian charter air taxis to make the rule consistent with the 1995 U.S.-Canada bilateral aviation agreement. When promulgated in 1981, the rule comported with the 1974 U.S.-Canada bilateral aviation agreement governing non-scheduled air services. However, the rule has not been updated to reflect the more liberal 1995 bilateral. Consequently, the rule, in its current form, contains certain restrictions on Canadian charter air taxis that are contrary to the 1995 bilateral. This final rule eliminates or amends those provisions. It also makes several other

technical changes to the rule and adds a provision making it clear that Canadian charter air taxis are exempt from the statutory requirement of foreign air carriers to file family assistance plans.

DATES: *Effective Date:* This rule is effective on September 22, 2006.

FOR FURTHER INFORMATION CONTACT: Jonathan Dols, Supervisory Trial Attorney, Office of the Assistant General Counsel for Aviation Enforcement and Proceedings, Office of the General Counsel, U.S. Department of Transportation, 400 7th Street, SW., Room 4116, Washington, DC 20590; (202) 366-9342 (Voice) or (202) 366-7152 (Fax).

SUPPLEMENTARY INFORMATION:

Background

Part 294 of the Department's aviation economic regulations (14 CFR part 294) exempts foreign air carriers that have registered with the Department as "Canadian charter air taxis" from various provisions in Title 49 of the United States Code, including the requirement in sections 41301 and 41302 to obtain a foreign air carrier permit before engaging in foreign air transportation. In 1981, when the Civil Aeronautics Board¹ (CAB) promulgated part 294, it intended to provide Canadian charter air taxis with a simplified and expedited economic licensing process. Central to the CAB's reasoning in establishing this special licensing status for Canadian charter air taxis was its opinion that "we [the United States] have good aviation relations with our Canadian neighbors"—a description that is even more apt today.²

On February 24, 1995, the United States and Canada greatly liberalized their commercial aviation relationship by signing the *Air Transport Agreement Between the Government of the United States of America and the Government of Canada* (hereinafter the "Agreement" or the "1995 Bilateral"). Among other things, the Agreement granted American and Canadian air carriers, including Canadian charter air taxis, rights to conduct a wide array of operations not permitted under the countries' previous bilateral agreement governing non-scheduled air services, which had been in force since 1974 (hereinafter the

"1974 Bilateral").³ On November 10, 2005, Delegations from the United States and Canada initialed an *ad referendum* protocol to the Agreement that would further expand the traffic rights of the air carriers of both nations (hereinafter the "Protocol").⁴

In 1981, at the time part 294 was promulgated, it comported with the 1974 Bilateral. However, part 294 has not been updated since then to reflect the more liberal aviation relationship between the U.S. and Canada that is set forth in the 1995 Bilateral. Consequently, although intended to facilitate the trans-border operations of Canadian charter air taxis, part 294 has ironically become, in some respects, an impediment to them. For example, the plain language of the following provisions of part 294 contradicts either the spirit or the language of the Agreement or the language as proposed by the Protocol:

(1) Sections 294.81(b) and (b)(1) permit stopovers at points within the United States only on round-trip flights originating in Canada. The Agreement permits stopovers on one-way *and* round-trip flights originating in *either* country.⁵ Section 294.81(b)(2) requires that the same aircraft stay with its passengers throughout their journey. The Agreement contains no such restriction.

(2) Section 294.82 prohibits registrants from transporting persons or property whose journey includes a prior, intervening, or subsequent movement by air to or from a point not in the United States or Canada. However, the Agreement allows the transportation of persons and property by airlines designated by each party to carry international charter traffic of passengers and cargo between any point or points in the territory of the other party and any point or points in a third country or countries, provided such traffic is carried via the territory of the party that has designated the airline and makes a stopover in that territory for at least two consecutive nights.⁶ Moreover, the Protocol would further expand third-country traffic rights by removing the two-night stopover requirement,

and, instead, merely require that the flight in question make a traffic stop in the airline's homeland.⁷ Accordingly, we are removing section 294.82, as described below, in order to make clear that the third-country traffic rights applicable to Canadian charter air taxis are coextensive with the rights of all Canadian airlines under the Agreement, or, when the Protocol becomes effective, the new rights under that Protocol.

(3) Section 294.88 prohibits certain trans-border operations to or from points west of Blind River, Ontario, and east of the Ontario-Manitoba provincial line (the "Northwest Ontario restriction"). The Agreement grants traffic rights to the carriers of both nations between *any* points or points in the United States and any point or points in Canada.⁸ The CAB included the Northwest Ontario restriction in part 294 because the Canadian Air Transport Committee had imposed a similar restriction on the operations of U.S. air taxis.⁹ We are aware of no such restriction today on U.S. air taxis and, therefore, see no basis for the Northwest Ontario restriction to remain in part 294.

(4) Section 294.89 imposes an uplift ratio. The Agreement explicitly prohibits uplift ratios.¹⁰

These differences between part 294 and the Agreement have created confusion in the aviation industry and imposed unnecessary costs on Canadian charter air taxis.¹¹ Moreover, they undermine the original intent of part 294, which was to expedite the licensing process for Canadian charter air taxis. Under present circumstances, there is a strong incentive for Canadian charter air taxis to eschew the "expedited" registration process of part 294 in favor of undertaking to meet the very requirements from which the CAB sought to relieve them, *i.e.*, from having to obtain a foreign air carrier permit. In recognition of these issues, and because, as a general matter, the Department seeks to remove unnecessary regulatory burdens and to advance the United States-Canada air transport relationship,

⁷ Annex III of the Agreement, as proposed to be amended by Article 7 of the Protocol initialed at Washington, November 10, 2005.

⁸ Annex III.

⁹ Order 78-11-87, In the Matter of Charter Authority of Canadian Foreign Air Carriers, (CAB Docket 34051) (November 16, 1978).

¹⁰ Article 4 of the Agreement.

¹¹ The Department has anecdotal evidence of Canadian charter air taxi operators turning down business otherwise permitted under the Agreement for fear of violating part 294. Some carriers have incurred the added legal costs of applying to the Department for exemptions from certain of the contradictory provisions in part 294 as a means of avoiding possible enforcement action for violating those provisions.

¹ The Department assumed the CAB's jurisdiction over aviation economic matters when the CAB "sunsetted" on December 31, 1984. *Civil Aeronautics Board Sunset Act of 1984*, Public Law 98-443, October 4, 1984, and *Airline Deregulation Act of 1978*, Public Law 95-504, October 24, 1978.

² *Proposed Rule to Classify and Exempt Canadian Air Taxi Operators*, 45 FR 80117, December 3, 1980.

³ *Non-Scheduled Air Service Agreement Between the Government of the United States of America and the Government of Canada*, signed at Ottawa on May 8, 1974; entered into force May 8, 1974, with exchange of notes.

⁴ *Protocol to the Air Transport Agreement Between the Governments of the United States of America and the Government of Canada*, initialed *ad referendum* at Washington on November 10, 2005. The Protocol has not yet been signed by the two Governments. By its terms, it will not come into effect before September 1, 2006.

⁵ Annex III of the Agreement.

⁶ *Id.*

the Department amends 14 CFR 294.81 and removes 14 CFR 294.82; 294.88; and 294.89.

In addition, the Foreign Air Carrier Family Support Act of 1997 (Pub. L. 105-148) (hereinafter "FACFSA"), added to Title 49 of the United States Code section 41313, "Plans to address needs of families of passengers involved in foreign air carrier accidents." Section 41313 requires all foreign air carriers with authority to operate to or from the United States to develop and submit plans to the Department and the National Transportation Safety Board (NTSB) that address the needs of families of passengers involved in certain aircraft accidents.

In 1998, the Department interpreted section 41313 as not applying to small aircraft operations and issued an order that exempted all foreign air carriers holding Departmental authority to conduct foreign air transportation using only small aircraft from the requirements of section 41313.¹² Although this order was served on those Canadian charter air taxis that, at the time, were registered with the Department, the exemption was, through an administrative oversight, not subsequently codified in 14 CFR part 294. Therefore, the Department takes this opportunity to amend 14 CFR 294.10 (Exemption authority) to codify this order and, thereby, make it clear that Canadian charter air taxis are not required to submit family assistance plans to the Department or the NTSB.

As a final matter, the Department hereby makes the following additional, non-substantive administrative changes to part 294:

(1) Amend section 294.2(a) to reflect the current U.S.-Canada bilateral aviation agreement signed in 1995.

(2) Amend sections 294.20, 294.20(b), 294.21(b), 294.22, and 294.40 to reflect the change in organizational structure that occurred when the Special Authorities Division, which is the Departmental program office that administers part 294, was transferred from the Office of Aviation Analysis to the Office of International Aviation.

(3) Amend sections 294.3(e), 294.21(g), 294.50(d) to clarify that air carrier authority granted by the Government of Canada is a condition of receiving and maintaining an effective registration under part 294.

(4) Amend sections 294.21(e)(1) to make clear that the onus rests on the carrier, not the Department, to provide

the Federal Aviation Administration with a copy of the carrier's approved OST Form 4505.

(5) Amend sections 294.22 to make clear that a refiling may be made using electronic mail, as well as by other means, so long as it is received by the Department within 30 days of a change in a carrier's name or operations.

(6) Amend sections 294.32 to identify the correct section in 14 CFR part 212 that covers the bonding and escrow requirements applicable to foreign air carriers.

Regulatory Analysis and Notices

The Administrative Procedure Act (APA) (5 U.S.C. 553) generally requires public notice and an opportunity for public comment before issuance of a final rule. It, however, provides an exception when an agency finds that there is good cause for dispensing with such procedures because they are impracticable, unnecessary, or contrary to the public interest. We have determined that, under 5 U.S.C. 553(b)(3)(B), it is unnecessary and contrary to the public interest to utilize the notice of proposed rulemaking and public comment procedures for this rule because it is a corrective action required to make the regulation consistent with an international agreement. The Department notes that, as a temporary measure, it has in the past granted carrier-specific exemptions obviating any problems for the recipient that would have been caused by the discrepancies between part 294 and the Agreement.¹³ In addition, the rule codifies an existing Departmental order exempting Canadian charter air taxis from the statutory requirement of foreign air carriers to file family assistance plans. Thus, in effect, the revised regulations merely codify current Departmental practice. All other changes are purely administrative in nature.

Executive Order 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

The Department has determined that the amendments to 14 CFR part 294 in the final rule are not a significant regulatory action under Executive Order 12866 or under the Department's Regulatory Policies and Procedures. It has not been reviewed by the Office of Management and Budget. The amendments will impose no additional costs on the affected carriers. Rather, they will minimally reduce regulatory

compliance costs by eliminating any need for Canadian charter air taxis to apply for an exemption to the outdated provisions of 14 CFR part 294 that are not in consonance with the Agreement. Because these amendments will have minimal economic impact on the covered carriers, no further regulatory evaluation is necessary.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires an agency to assess the impact of regulation on small entities unless the agency determines that a rule is not expected to have a significant economic impact on a substantial number of small entities. The Department certifies that this final rule will not have a significant economic impact on a substantial number of small entities. The amendments to 14 CFR part 294 will not change U.S. law regarding the trans-border operations of Canadian charter air taxis or the rights available to Canadian charter air taxis under the 1995 U.S.-Canada bilateral aviation agreement, nor will they add any regulatory requirements.

Executive Order 13132 (Federalism)

This final rule has been analyzed in accordance with the principles and criteria contained in Executive Order 13132. The Department has determined that this proposal will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, and therefore has no federalism implications.

Executive Order 13084

This final rule has been analyzed in accordance with the principles and criteria contained in Executive Order 13084 ("Consultation and Coordination with Indian Tribal Governments"). Because this final rule will not significantly or uniquely affect the Indian tribal communities, and will not impose substantial direct compliance costs, the funding and consultation requirements of the Executive Order do not apply.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (the Act), enacted as Public Law 104-4 on March 22, 1995, requires each Federal agency, to the extent permitted by law, to prepare a written assessment of the effects of any Federal mandate in a proposed or final agency rule that may result in the expenditure by State, local, and tribal

¹² Order 98-1-31, *In the Matter of the Foreign Air Carrier Family Support Act of 1997 Exemption Under 49 U.S.C. § 40109*, (DOT Docket 98-3304) (January 29, 1998).

¹³ See, e.g., *Notice of Action Taken, London Air Services Limited, Exemption from 49 U.S.C. § 41301* (DOT Docket 2003-15123) (August 22, 2003).

governments, in the aggregate, or by the private sector, of \$100 million or more (adjusted annually for inflation) in any one year. This final rule does not contain any Federal mandate that would result in such expenditures. Therefore, the requirements of Title II of the Act do not apply.

Paperwork Reduction Act

This final rule does not contain information collection requirements that require approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act (44 U.S.C. 2507 *et seq.*).

List of Subjects in 14 CFR Part 294

Air taxis, Canada, Charter flights, Reporting and recordkeeping requirements.

■ For the reasons set forth in the preamble, the DOT amends 14 CFR part 294 as follows:

■ 1.–2. The authority for 14 CFR part 294 continues to read as follows:

Authority: 49 U.S.C. Chapters 401 and 417.

■ 3. Revise paragraph (a) of § 294.2 to read as follows:

§ 294.2 Definitions.

* * * * *

(a) *Agreement* means the *Air Transport Agreement Between the Government of the United States and the Government of Canada*, signed at Ottawa, February 24, 1995, with Annexes and any amendments, supplements, reservations, or supersessions to it.

* * * * *

■ 4. Revise paragraph (e) of § 294.3 to read as follows:

§ 294.3 General requirements for Canadian charter air taxi operators.

* * * * *

(e) Has effective authority from the Government of Canada to conduct charter air service between the United States and Canada.

* * * * *

■ 5. Add paragraph (d) to § 294.10 so that it reads as follows:

§ 294.10 Exemption authority.

* * * * *

(d) Section 41313 (aviation disaster family assistance plans for foreign air carriers)

§ 294.20 [Amended]

■ 6. Amend § 294.20 introductory text and paragraph (b) by removing the words “Office of Aviation Analysis” and adding in their place the words “Office of International Aviation.”

■ 7. In § 294.21, revise paragraph (b), paragraph (e)(1), and paragraph (g) to read as follows:

§ 294.21 Procedure on receipt of registration form.

* * * * *

(b) Any person objecting to the registration of a Canadian charter air taxi operator shall file an objection with the Office of International Aviation, Special Authorities Division, and serve a copy on the applicant within 28 days after the Department receives the properly completed registration application. Objections shall include any facts and arguments upon which they are based.

* * * * *

(e) * * *

(1) Issue the registration by stamping its effective date on OST Form 4505 and sending a copy of it to the carrier.

* * * * *

(g) A registration shall not be issued until the Department receives evidence that the applicant has effective authority issued by the Government of Canada. The applicant must provide copies of its Air Carrier Operating certificate and non-scheduled international license issued by the Government of Canada.

* * * * *

■ 8. In § 294.22, revise the introductory text and paragraph (a)(1) to read as follows:

§ 294.22 Notification to the Department of change in operations or identifying information.

Registrants shall refile a copy of OST Form 4505 with the Department's Office of International Aviation, Special Authorities Division, upon any of the following events. The refiling shall be sent by electronic mail, or other means, so as to be received by the Department not later than 30 days after the reported event has occurred.

(a) * * *

(1) A registration ceases to be in effect unless the Government of Canada amends the registrant's Air Carrier Operating Certificate to reflect the registrant's new name within 60 days of the name change and the registrant submits to the Department a copy of its amended Canadian authority.

* * * * *

■ 9. Revise paragraph (a) of § 294.32 to read as follows:

§ 294.32 Security arrangements for operating Public Charters.

* * * * *

(a) The Canadian charter air taxi operator shall meet the bonding or escrow requirements applicable to

foreign air carriers as set forth in § 212.8 of this chapter.

* * * * *

§ 294.40 [Amended]

■ 10. Remove the words “Office of Aviation Analysis” in § 294.40 and add in their place the words “Office of International Aviation.”

■ 11. Revise paragraph (d) of § 294.50 to read as follows:

§ 294.50 Cancellation, revocation, or suspension of registration.

* * * * *

(d) The Government of Canada terminates or suspends authority it granted to the registrant to conduct charter air service between the United States and Canada.

* * * * *

■ 12. Revise paragraph (a) of § 294.60 to read as follows:

§ 294.60 Applications for authorization to conduct individual operations or programs not otherwise permitted by this part.

(a) Where the terms, conditions, or limitations of this part, particularly § 294.81, require prior approval of individual flights or charter programs, the registrant shall apply for such approval by filing three copies of OST Form 4540 with the Office of International Aviation, Foreign Air Carrier Licensing Division. OST Form 4540 may be obtained from the Foreign Air Carrier Licensing Division.

* * * * *

§ 294.81 [Amended]

■ 13. Amend § 294.81 by revising paragraph (b) to read as follows:

§ 294.81 Local traffic prohibited.

* * * * *

(b) A registrant may grant stopover privileges at any point or points in the United States to passengers and their accompanied baggage as part of a single continuous operation to or from Canada.

§ 294.82 [Remove]

■ 14. Remove section 294.82.

§ 294.88 [Remove]

■ 15. Remove section 294.88.

§ 294.89 [Remove]

■ 16. Remove section 294.89.

Issued this 14th day of August, 2006, at Washington, DC, under authority delegated in 49 CFR 1.56a.

Susan McDermott,

Deputy Assistant Secretary of Transportation for Aviation and International Affairs.

BILLING CODE 4910–62–P

DEPARTMENT OF DEFENSE**Office of the Secretary****32 CFR Parts 71, 105, and 243****Removal of Obsolete Regulations****AGENCY:** Department of Defense.**ACTION:** Final rule.

SUMMARY: The Department of Defense is removing several CFR parts from Chapter I, Office of the Secretary of Defense. This administrative action removes obsolete information from the Code of Federal Regulations and notifies readers of the availability of the current DoD documents that contain the information being removed.

DATES: This rule is effective August 23, 2006.

FOR FURTHER INFORMATION CONTACT: L. Bynum 703-696-4970.

SUPPLEMENTARY INFORMATION: Each part has been removed to correspond with the cancellation of the DoD Directive for which the part was based. The chart below identifies the part number and its companion Directive. All three DoD Directives were canceled by a Director of Administration and Management memorandum dated August 8, 2006.

Part No.	Title	DoD directive No.
71	Eligibility Requirements for Education of Minor Dependents in Overseas Areas	1342.13
105	Employment and Volunteer Work of Spouses of Military Personnel	1400.33
243	Intergovernmental Coordination of DoD Federal Development Programs and Activities	4165.61

List of Subjects**32 CFR Part 71**

Elementary and secondary education; Military personnel; Panama Canal.

32 CFR Part 105

Military personnel.

32 CFR Part 243

Intergovernmental relations.

PARTS 71, 105, and 243—[REMOVED]

■ Accordingly, by the authority of 10 U.S.C. 301, 32 CFR parts 71, 105, and 243 are removed.

August 14, 2006.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 06-7010 Filed 8-22-06; 8:45 am]

BILLING CODE 5001-06-M

DEPARTMENT OF HOMELAND SECURITY**Coast Guard****33 CFR Part 117**

[CGD01-06-006]

RIN 1625-AA09

Drawbridge Operation Regulations; Jamaica Bay and Connecting Waterways, New York City, NY

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule; extension of effective period.

SUMMARY: The Coast Guard has changed the effective period for the temporary regulation governing the operation of the New York City Highway Bridge (Belt Parkway), at mile 0.8, across Mill Basin, at New York City, New York. This

temporary final rule allows the bridge owner to extend the effective period during which only one of the two moveable spans need open for the passage of vessel traffic. This rule is necessary to facilitate the completion of the ongoing bridge deck replacement.

DATES: This temporary rule is effective from September 8, 2006 through December 30, 2006.

ADDRESSES: Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, are part of docket CGD01-06-006 and are available for inspection or copying at the First Coast Guard District, Bridge Branch Office, 408 Atlantic Avenue, Boston, Massachusetts 02110, between 7 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Leung-Yee, Project Officer, First Coast Guard District, (212) 668-7195.

SUPPLEMENTARY INFORMATION:**Regulatory Information**

On January 30, 2006, we published a notice of proposed rulemaking (NPRM) entitled "Drawbridge Operation Regulations; Jamaica Bay and Connecting Waterways, New York City, NY," in the **Federal Register** (71 FR 4852). We received no comments in response to the NPRM.

On March 13, 2006, we published a temporary final rule (TFR) entitled "Drawbridge Operation Regulations; Jamaica Bay and Connecting Waterways, New York City, NY," in the **Federal Register** (71 FR 12621).

We did not publish an NPRM for this extension of the temporary final rule's effective period. Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing an NPRM because it is impracticable to issue an NPRM prior to the previously

announced September 7, 2006 expiration of the temporary final rule, and because any interruption of the arrangements permitted by the temporary final rule would be contrary to the public interest. For the same reason, the Coast Guard finds under 5 U.S.C. 553(d) that good cause exists for making this extension of the temporary final rule effective less than 30 days after publication. The deck replacement for the New York City Highway Bridge is ongoing, vital, and necessary work that must be performed without delay as a result of the deterioration of the existing bridge deck which could fail if not replaced with all due speed. Work is behind schedule due to unforeseen construction delays and bad weather. In order to assure the continued safe and reliable operation of the bridge, construction should be allowed to continue through December 30, 2006.

Background and Purpose

The New York City Highway Bridge (Belt Parkway), has a vertical clearance of 34 feet at mean high water and 39 feet at mean low water in the closed position. The existing regulations are listed at 33 CFR 117.795(b).

The owner of the bridge, New York City Department of Transportation (NYCDOT), requested a temporary change to the drawbridge operation regulations in November 2005, to facilitate the replacement of the bridge roadway deck. During the prosecution of that rehabilitation construction, the opening span that was undergoing deck replacement could not open for vessel traffic. As a result, the bridge owner requested that only one of the two opening spans open for the passage of vessel traffic from March 1, 2006 through September 7, 2006.

The Coast Guard published a temporary final rule (71 FR 12621) on March 13, 2006, effective from March 8,

2006 through September 7, 2006, to facilitate the above construction. The work was scheduled to be completed by September 7, 2006, but due to unforeseen construction delays and weather conditions, the work will not be completed by September 7, 2006, as planned.

As a result, the extension of the effective period of this regulation is necessary to allow the bridge owner to continue to open only one of the two moveable spans for the passage of vessel traffic from March 8, 2006 through December 30, 2006, to facilitate the completion of the ongoing bridge deck replacement.

Discussion of Rule

This temporary rule change would amend 33 CFR 117.795 by suspending paragraph (b), which lists the New York City Highway Bridge (Belt Parkway), and by adding a temporary paragraph (d) to allow single span bridge openings from March 8, 2006 through December 30, 2006.

Regulatory Evaluation

This rule is not a “significant regulatory action” under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3), of that Order. The Office of Management and Budget has not reviewed it under that Order.

This conclusion is based on the fact that the vessel traffic that normally transits this bridge should not be precluded from transiting due to single span bridge openings.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we considered whether this rule would have a significant economic impact on a substantial number of small entities. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

This rule would not have a significant economic impact on a substantial number of small entities for the following reason: Mill Basin is navigated predominantly by recreational vessels.

The single span bridge openings should not preclude vessel traffic from

transiting the bridge because the recreational vessels that normally use this waterway should be able to transit through the bridge with the reduced horizontal clearance of 67.5 feet due to their relative small size.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we offered to assist small entities in understanding the rule so that they could better evaluate its effects on them and participate in the rulemaking process.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency’s responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not affect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and

Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not concern an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This final rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a “significant energy action” under that order because it is not a “significant regulatory action” under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or

adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Commandant Instruction M16475.1D, and Department of Homeland Security Management Directive 5100.1, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded that there are no factors in this case that would limit the use of a categorical exclusion under section 2.B.2 of the Instruction. Therefore, this rule is categorically excluded, under figure 2–1, paragraph (32)(e) of the Instruction, from further environmental documentation considering that it relates to the promulgation of operating regulations or procedures for drawbridges. Under figure 2–1, paragraph (32)(e) of the Instruction, an “Environmental Analysis Check List” and a “Categorical Exclusion Determination” are not required for this rule.

List of Subjects in 33 CFR Part 117

Bridges.

■ For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 33 CFR 1.05–1(g); Department of Homeland Security Delegation No. 0170.1; section 117.255 also issued under the authority of Public Law 102–587, 106 Stat. 5039.

■ 2. From September 8, 2006 through December 30, 2006, § 117.795 is amended by suspending paragraph (b) and adding a temporary paragraph (d), to read as follows:

§ 117.795 Jamaica Bay and Connecting Waterways.

* * * * *

(d)(1) The New York City Highway Bridge (Belt Parkway), mile 0.8, across Mill Basin, need only open one moveable span for the passage of vessel traffic from March 8, 2006 through December 30, 2006. The draw need not be opened for the passage of vessel traffic from 12 p.m. to 9 p.m. on Sundays from May 15 through September 30, and on Memorial Day, Independence Day, and Labor Day. However, on these days the draw shall

open on signal from the time two hours before to one hour after the predicted high tide(s).

(2) For the purpose of this section, predicted high tide(s) occur 15 minutes later than that predicted for Sandy Hook, as documented in the tidal current data, which is updated, generated and published by the National Oceanic and Atmospheric Administration/National Ocean Service.

Dated: August 7, 2006.

Timothy S. Sullivan,

Rear Admiral, U.S. Coast Guard, Commander, First Coast Guard District.

BILLING CODE 4910–15–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2006–0165; FRL–8079–3]

Dimethenamid; Pesticide Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes tolerances for residues of dimethenamid in or on leek; onion, green; onion, Welsh; shallot, fresh leaves. Interregional Research Project No. 4 (IR-4) requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA).

DATES: This regulation is effective August 23, 2006. Objections and requests for hearings must be received on or before October 23, 2006, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: EPA has established a docket for this action under docket identification (ID) number EPA–HQ–OPP–2006–0165. All documents in the docket are listed in the index for the docket. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available in the electronic docket at <http://www.regulations.gov>, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Building),

2777 S. Crystal Drive, Arlington, VA. The Docket Facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket telephone number is (703) 305-5805.

FOR FURTHER INFORMATION CONTACT:

Barbara Madden, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; telephone number: (703) 305-6463; e-mail address: Madden.Barbara@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

- Crop production (NAICS 111), e.g., agricultural workers; greenhouse, nursery, and floriculture workers; farmers.
- Animal production (NAICS 112), e.g., cattle ranchers and farmers, dairy cattle farmers, livestock farmers.
- Food manufacturing (NAICS 311), e.g., agricultural workers; farmers; greenhouse, nursery, and floriculture workers; ranchers; pesticide applicators.
- Pesticide manufacturing (NAICS 32532), e.g., agricultural workers; commercial applicators; farmers; greenhouse, nursery, and floriculture workers; residential users.

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Access Electronic Copies of this Document?

In addition to accessing an electronic copy of this **Federal Register** document through the electronic docket at <http://www.regulations.gov>, you may access this **Federal Register** document electronically through the EPA Internet under the “**Federal Register**” listings at <http://www.epa.gov/fedrgstr>. You may also access a frequently updated electronic version of 40 CFR part 180 through the Government Printing

Office's pilot e-CFR site at <http://www.gpoaccess.gov/ecfr>. To access the OPPTS Harmonized Guidelines referenced in this document, go directly to the guidelines at <http://www.epa.gov/opptsfrs/home/guidelin.htm>

C. Can I File an Objection or Hearing Request?

Under section 408(g) of the FFDCA, as amended by the FQPA, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. The EPA procedural regulations which govern the submission of objections and requests for hearings appear in 40 CFR part 178. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA-HQ-OPP-2006-0165 in the subject line on the first page of your submission. All requests must be in writing, and must be mailed or delivered to the Hearing Clerk on or before October 23, 2006.

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing that does not contain any CBI for inclusion in the public docket that is described in **ADDRESSES**. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit your copies, identified by docket ID number EPA-HQ-OPP-2006-0165, by one of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.

- **Mail:** Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001.

- **Delivery:** OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. Deliveries are only accepted during the Docket's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket telephone number is (703) 305-5805.

II. Background and Statutory Findings

In the **Federal Register** of March 22, 2006 (71 FR 14521) (FRL-7766-7), EPA issued a notice pursuant to section 408(d)(3) of FFDCA, 21 U.S.C. 346a(d)(3), announcing the filing of a

pesticide petition (PP 4E6844) by Interregional Research Project No. 4 (IR-4), Technology Center of New Jersey, Rutgers, the State University of New Jersey, 681 U.S. Highway #1 South, North Brunswick, NJ 08902-3390. The petition requested that 40 CFR 180.464 be amended by establishing a tolerance for residues of the herbicide dimethenamid, (R,S)-2-chloro-N-[(1-methyl-2-methoxy) ethyl]-N-(2,4-dimethylthien-3-yl)-acetamide in or on the raw agricultural commodities: onion, green at 0.01 parts per million (ppm); leek at 0.01 ppm; onion, Welsh at 0.01 ppm; and shallot, fresh leaves at 0.01 ppm. That notice included a summary of the petition prepared by BASF Corporation, the registrant. There were no comments received in response to the notice of filing.

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is "safe." Section 408(b)(2)(A)(ii) of FFDCA defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue...."

EPA performs a number of analyses to determine the risks from aggregate exposure to pesticide residues. For further discussion of the regulatory requirements of section 408 of the FFDCA and a complete description of the risk assessment process, see <http://www.epa.gov/fedrgstr/EPA-PEST/1997/November/Day-26/p30948.htm>.

III. Aggregate Risk Assessment and Determination of Safety

Consistent with section 408(b)(2)(D) of FFDCA, EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure, consistent with section 408(b)(2) of FFDCA, for a tolerance for residues of dimethenamid, (R,S)-2-chloro-N-(1-methyl-2-methoxy) ethyl-N-(2,4-

dimethylthien-3-yl)-acetamide in or on the raw agricultural commodities: onion, green at 0.01 ppm; leek at 0.01 ppm; onion, Welsh at 0.01 ppm; and shallot, fresh leaves at 0.01 ppm. EPA's assessment of exposures and risks associated with establishing the tolerance follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered its validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children. Specific information on the studies received and the nature of the toxic effects caused by dimethenamid as well as the no-observed-adverse-effect-level (NOAEL) and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies can be found at <http://www.epa.gov/fedrgstr/EPA-PEST/2004/September/Day-24/p21501.htm>.

B. Toxicological Endpoints

For hazards that have a threshold below which there is no appreciable risk, the dose at which no adverse effects are observed (the NOAEL) from the toxicology study identified as appropriate for use in risk assessment is used to estimate the toxicological level of concern (LOC). However, the lowest dose at which adverse effects of concern are identified (the LOAEL) is sometimes used for risk assessment if no NOAEL was achieved in the toxicology study selected. An uncertainty factor (UF) is applied to reflect uncertainties inherent in the extrapolation from laboratory animal data to humans and in the variations in sensitivity among members of the human population as well as other unknowns.

The linear default risk methodology (Q*) is the primary method currently used by the Agency to quantify non-threshold hazards such as cancer. The Q* approach assumes that any amount of exposure will lead to some degree of cancer risk, estimates risk in terms of the probability of occurrence of additional cancer cases. More information can be found on the general principles EPA uses in risk characterization at <http://www.epa.gov/pesticides/health/human.htm>.

A summary of the toxicological endpoints for dimethenamid used for human risk assessment is discussed in Unit III.B. of the final rule published in the **Federal Register** of September 24, 2004 (69 FR 57197) (FRL-7680-1).

C. Exposure Assessment

1. *Dietary exposure from food and feed uses.* Tolerances have been established (40 CFR 180.464) for the residues of dimethenamid in or on a variety of raw agricultural commodities. Risk assessments were conducted by EPA to assess dietary exposures from chemical name in food as follows:

i. *Acute exposure.* Quantitative acute dietary exposure and risk assessments are performed for a food-use pesticide, if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a one-day or single exposure.

The Dietary Exposure Evaluation Model software with the Food Commodity Intake Database (DEEM-FCID™, Version 1.3) which incorporates food consumption data as reported by respondents in the USDA 1994-1996 and 1998 Nationwide Continuing Surveys of Food Intake by Individuals (CSFII), and accumulated exposure to the chemical for each commodity. The following assumptions were made for the acute exposure assessments: one hundred percent of proposed and registered crops are treated with dimethenamid (100% CT) and tolerance-level residues for all commodities.

ii. *Chronic exposure.*

In conducting the chronic dietary exposure assessment EPA used the Dietary Exposure Evaluation Model software with the Food Commodity Intake Database (DEEM-FCID™, Version 1.3) which incorporates food consumption data as reported by respondents in the USDA 1994-1996 and 1998 Nationwide Continuing Surveys of Food Intake by Individuals (CSFII), and accumulated exposure to the chemical for each commodity. The following assumptions were made for the chronic exposure assessments: one hundred percent of proposed and registered crops are treated with dimethenamid (100% CT) and tolerance-level residues for all commodities

iii. *Cancer.* Dimethenamid (50:50 S:R isomers) was classified as a group <<C>> (possible human carcinogen). The Agency concluded that the chronic risk assessment, making use of the cPAD, to be protective of any potential carcinogenic risk. Therefore, the exposure estimates for food and water discussed in Unit III.C.1.ii and III.C.2. for chronic exposures were also used to assess cancer. Dimethenamid could be considered a weak carcinogen. An intermediate dose showed marginally significant results ($p = 0.056$) with liver adenomas one species (rat) and one sex

(males). The incidence of liver tumors was just slightly increased from the level in the historical control data. Higher doses did not demonstrate the occurrence of liver adenomas significantly different from the controls. No dose-related tumors were seen in the mouse carcinogenicity study, and a battery of mutagenicity studies with dimethenamid-P (90:10 S:R isomers) were negative or equivocal for genetic mutations including unscheduled DNA synthesis.

2. *Dietary exposure from drinking water.*

The Agency lacks sufficient monitoring exposure data to complete a comprehensive dietary exposure analysis and risk assessment for dimethenamid in drinking water. Because the Agency does not have comprehensive monitoring data, drinking water concentration estimates are made by reliance on simulation or modeling taking into account data on the physical characteristics of dimethenamid. Further information regarding EPA drinking water models used in pesticide exposure assessment can be found at <http://www.epa.gov/oppefed1/models/water/index.htm>.

Based on the PRZM/EXAMS and SCIGROW models, the estimated environmental concentrations (EECs) of dimethenamid for acute exposures are estimated to be 49 parts per billion (ppb) for surface water and 0.42 ppb for ground water. The EECs for chronic exposures are estimated to be 7.9 ppb for surface water and 0.42 ppb for ground water. Modeled estimates of drinking water concentrations were directly entered into the dietary exposure model (DEEM-FCID™, Version 1.3). For acute dietary risk assessment, the peak water concentration value of 49 ppb was used to access the contribution to drinking water. For chronic dietary risk assessment, the annual average concentration of 7.9 ppb was used to access the contribution to drinking water

3. *From non-dietary exposure.* The term "residential exposure" is used in this document to refer to non-occupational, non-dietary exposure (e.g., for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets).

Dimethenamid is not registered for use on any sites that would result in residential exposure.

4. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of the FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider

"available information" concerning the cumulative effects of a particular pesticide's residues and "other substances that have a common mechanism of toxicity."

Unlike other pesticides for which EPA has followed a cumulative risk approach based on a common mechanism of toxicity, EPA has not made a common mechanism of toxicity finding as to dimethenamid and any other substances and dimethenamid does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has not assumed that dimethenamid has a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see the policy statements released by EPA's Office of Pesticide Programs concerning common mechanism determinations and procedures for cumulating effects from substances found to have a common mechanism on EPA's website at <http://www.epa.gov/pesticides/cumulative>.

D. Safety Factor for Infants and Children

1. *In general.* Section 408 of FFDCA provides that EPA shall apply an additional tenfold margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the data base on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. Margins of safety are incorporated into EPA risk assessments either directly through use of a MOE analysis or through using uncertainty (safety) factors in calculating a dose level that poses no appreciable risk to humans. In applying this provision, EPA either retains the default value of 10X when reliable data do not support the choice of a different factor, or, if reliable data are available, EPA uses a different additional safety factor value based on the use of traditional uncertainty factors and/or special FQPA safety factors, as appropriate.

2. *Prenatal and postnatal sensitivity.* No offspring pre- or postnatal susceptibility to either dimethenamid (50:50 S:R isomers) or dimethenamid-P (90:10 S:R isomers) was seen in a rabbit or two rat developmental studies and reproduction study. There is low concern for pre- or postnatal toxicity since the developmental effects from the

[S] and [RS] mixture are similar and occur at similar doses.

3. *Conclusion.* There is a complete toxicity data base for dimethenamid and exposure data are complete or are estimated based on data that reasonably accounts for potential exposures.

EPA determined that the safety factor for dimethenamid should be 100 (10X safety factor for interspecies extrapolation and 10X for intraspecies variation). The additional FQPA SF was removed taking into account the low concerns and lack residual uncertainties with regard to prenatal and postnatal toxicity and the completeness of the toxicity and exposure data base.

E. Aggregate Risks and Determination of Safety

The Agency currently has two ways to estimate total aggregate exposure to a pesticide from food, drinking water, and residential uses. First, a screening assessment can be used, in which the Agency calculates drinking water levels of comparison (DWLOCs) which are used as a point of comparison against estimated drinking water concentrations (EDWCs). The DWLOC values are not regulatory standards for drinking water, but are theoretical upper limits on a pesticide's concentration in drinking water in light of total aggregate exposure to a pesticide in food and residential uses. More information on the use of DWLOCs in dietary aggregate risk assessments can be found at <http://www.epa.gov/oppfead1/trac/science/screeningsop.pdf>. More recently the Agency has used another approach to estimate aggregate exposure through food, residential and drinking water pathways. In this approach, modeled surface and ground water EDWCs are directly incorporated into the dietary exposure analysis, along with food. This provides a more realistic estimate of exposure because actual body weights and water consumption from the CSFII are used. The combined food and water exposures are then added to estimated exposure from residential sources to calculate aggregate risks. The resulting exposure and risk estimates are still considered to be high end, due to the assumptions used in developing drinking water modeling inputs.

1. *Acute risk.* Using the exposure assumptions discussed in this unit for acute exposure, the acute dietary exposure from food and water to dimethenamid will occupy <1% of the aPAD for females 13 years and older. Therefore, EPA does not expect the aggregate exposure to exceed 100% of the aPAD.

2. *Chronic risk.* Using the exposure assumptions described in this unit for

chronic exposure, EPA has concluded that exposure to dimethenamid food and water will utilize <1 % of the cPAD for the U.S. population, 1.2 % of the cPAD for all infants < 1 year old, the subpopulation at greatest exposure, and <1 % of the cPAD for children 1-2 years old. There are no residential uses for dimethenamid. Therefore, EPA does not expect the aggregate exposure to exceed 100% of the cPAD.

3. Short-term and Intermediate-term risk.

Short-term and Intermediate-term aggregate exposures take into account residential exposure plus chronic exposure to food and water (considered to be a background exposure level).

Dimethenamid is not registered for use on any sites that would result in residential exposure. Therefore, the aggregate risk is the sum of the risk from food and water, which do not exceed the Agency's level of concern.

4. *Aggregate cancer risk for U.S. population.* The Agency considers the chronic aggregate risk assessment, making use of the cPAD, to be protective of any aggregate cancer risk. See Unit III.E.2.

5. *Determination of safety.* Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, and to infants and children from aggregate exposure to dimethenamid residues.

IV. Other Considerations

A. Analytical Enforcement Methodology

Adequate enforcement methodology (AM-0884-0193-1) is available to enforce the tolerance expression. AM-0884-0193-1 is a gas chromatography (GC) method using an HP-1 or HP-5 column and mass selective detection (MSD). The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755-5350; telephone number: (410) 305-2905; e-mail address: residuemethods@epa.gov.

B. International Residue Limits

There are no Codex, Canadian, or Mexican MRLs for dimethenamid in or on the proposed commodities. Therefore, harmonization of tolerances is not an issue.

V. Conclusion

Therefore, tolerance are established for residues of dimethenamid, (R,S)-2-chloro-N-[(1-methyl-2-methoxy) ethyl]-N-(2,4-dimethylthien-3-yl)-acetamide in or on the commodities onion, green at 0.01 ppm; leek at 0.01 ppm; onion, Welsh at 0.01 ppm; and shallot, fresh leaves at 0.01 ppm.

VI. Statutory and Executive Order Reviews

This final rule establishes a tolerance under section 408(d) of FFDCA in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993). Because this rule has been exempted from review under Executive Order 12866 due to its lack of significance, this rule is not subject to Executive Order 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* (66 FR 28355, May 22, 2001). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, or impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104-4). Nor does it require any special considerations under Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994); or OMB review or any Agency action under Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104-113, section 12(d) (15 U.S.C. 272 note). Since tolerances and exemptions that are established on the basis of a petition under section 408(d) of FFDCA, such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) do not apply. In addition, the Agency has determined that this action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999). Executive Order 13132 requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that

have federalism implications.” “Policies that have federalism implications” is defined in the Executive order to include regulations that have “substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.” This final rule directly regulates growers, food processors, food handlers and food retailers, not States. This action does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of section 408(n)(4) of FFDCA. For these same reasons, the Agency has determined that this rule does not have any “tribal implications” as described in Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000). Executive Order 13175, requires EPA to develop an accountable process to ensure “meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications.” “Policies that have tribal implications” is defined in the Executive order to include regulations that have “substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and the Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.” This rule will not have substantial direct effects on tribal governments, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this rule.

VII. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: August 7, 2006.

Donald R. Stubbs,

Acting Director, Registration Division, Office of Pesticide Programs.

■ Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Section 180.464 is amended by alphabetically adding commodities to the table in paragraph (a) to read as follows:

§ 180.464 Dimethenamid; tolerances for residues.

(a) * * *

Commodity	Parts per million
* * *	* *
Leek	0.01
* * *	* *
Onion, green	0.01
Onion, Welsh	0.01
* * *	* *
Shallot, fresh leaves	0.01
* * *	* *

BILLING CODE 6560-50-S

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA-HQ-OPP-2006-0461; FRL-8078-1]

Triflumizole; Pesticide Tolerances for Emergency Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes time-limited tolerances for combined residues of triflumizole in or on turnip, greens. Additionally, this regulation increases the tolerance levels and extends time-limited tolerances for Chinese Napa cabbage, collards, coriander leaves (cilantro), kale, kohlrabi, mustard greens and parsley. Further, this regulation extends time-limited tolerances for broccoli,

dandelion and Swiss chard. This action is in response to EPA’s granting of emergency exemptions under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) authorizing use of the pesticide on parsley, dandelion, Swiss chard, collards, kale, kohlrabi, mustard greens, Chinese Napa cabbage, broccoli, coriander leaves (cilantro), and turnip greens. This regulation establishes, revises, and/or extends a maximum permissible level for residues of triflumizole in these food commodities. These tolerances expire and are revoked on December 31, 2009.

DATES: This regulation is effective August 23, 2006. Objections and requests for hearings must be received on or before October 23, 2006, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: EPA has established a docket for this action under docket identification (ID) number EPA-HQ-OPP-2006-0461. All documents in the docket are listed on the regulations.gov website. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either in the electronic docket at <http://www.regulations.gov>, or, if only available in hard copy, at the Office of Pesticide Programs (OPP) Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket telephone number is (703) 305-5805.

FOR FURTHER INFORMATION CONTACT: Libby Pemberton, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; telephone number: (703) 308-9364; e-mail address: Sec-18-Mailbox@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially

affected entities may include, but are not limited to:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Access Electronic Copies of this Document?

In addition to accessing an electronic copy of this **Federal Register** document through the electronic docket at <http://www.regulations.gov>, you may access this **Federal Register** document electronically through the EPA Internet under the "**Federal Register**" listings at <http://www.epa.gov/fedrgstr>. You may also access a frequently updated electronic version of 40 CFR part 180 through the Government Printing Office's pilot e-CFR site at <http://www.gpoaccess.gov/ecfr>.

C. Can I File an Objection or Hearing Request?

Under section 408(g) of the FFDCA, as amended by the FQPA, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. The EPA procedural regulations which govern the submission of objections and requests for hearings appear in 40 CFR part 178. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA-HQ-OPP-2006-0461 in the subject line on the first page of your submission. All requests must be in writing, and must be mailed or delivered to the Hearing Clerk on or before October 23, 2006.

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing that does not contain any CBI for inclusion in the public docket that is described in **ADDRESSES**. Information not marked

confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit your copies, identified by docket ID number EPA-HQ-OPP-2006-0461, by one of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.
- **Mail:** Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001.
- **Delivery:** OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. Deliveries are only accepted during the Docket's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket telephone number is (703) 305-5805.

II. Background and Statutory Findings

EPA, on its own initiative, in accordance with sections 408(e) and 408(l)(6) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, is establishing tolerances for combined residues of the fungicide triflumizole, 1-(1-(4-chloro-2-trifluoromethyl)phenyl)imino)-2-propoxyethyl)-1H-imidazole, and its metabolites containing the 4-chloro-2-trifluoromethylaniline moiety, calculated as the parent compound, in or on turnip, greens at 20 parts per million (ppm) and increasing the tolerance levels in or on cabbage, Chinese, Napa at 20 ppm; collards at 20 ppm; coriander, leaves at 20 ppm; kale at 20 ppm; kohlrabi at 20 ppm; mustard, greens at 20 ppm; and parsley, leaves at 20 ppm. Further, this regulation extends time-limited tolerances for broccoli at 1.0 ppm; dandelion, leaves at 7.0 ppm and Swiss chard at 7.0 ppm. These tolerances expire and are revoked on December 31, 2009. EPA will publish a document in the **Federal Register** to remove the revoked tolerances from the Code of Federal Regulations (CFR).

Section 408(l)(6) of the FFDCA requires EPA to establish a time-limited tolerance or exemption from the requirement for a tolerance for pesticide chemical residues in food that will result from the use of a pesticide under an emergency exemption granted by EPA under section 18 of FIFRA. Such tolerances can be established without providing notice or period for public comment. EPA does not intend for its actions on section 18 related tolerances

to set binding precedents for the application of section 408 of the FFDCA and the new safety standard to other tolerances and exemptions. Section 408(e) of the FFDCA allows EPA to establish a tolerance or an exemption from the requirement of a tolerance on its own initiative, i.e., without having received any petition from an outside party.

Section 408(b)(2)(A)(i) of the FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is "safe." Section 408(b)(2)(A)(ii) of the FFDCA defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of the FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . ."

Section 18 of the FIFRA authorizes EPA to exempt any Federal or State agency from any provision of FIFRA, if EPA determines that "emergency conditions exist which require such exemption." This provision was not amended by the Food Quality Protection Act of 1996 (FQPA). EPA has established regulations governing such emergency exemptions in 40 CFR part 166.

III. Emergency Exemption for Triflumizole on Parsley, Dandelion, Swiss Chard, Collards, Kale, Kohlrabi, Mustard Greens, Chinese Napa Cabbage, Broccoli, Coriander Leaves (Cilantro), and Turnip Greens and FFDCA Tolerances

Texas has declared a crisis exemption under FIFRA section 18 for the use of triflumizole on parsley, dandelion, Swiss chard, collards, kale, kohlrabi, mustard greens, Chinese Napa cabbage, broccoli, coriander leaves (cilantro), and turnip greens for control of powdery mildew. Texas states that the effective control of powdery mildew over the 70-90 day growing season requires two additional applications of a systemic pesticide beyond those permitted on the currently registered alternative labels. After having reviewed the submission,

EPA concurs that emergency conditions exist for this State.

As part of its assessment of this emergency exemption, EPA assessed the potential risks presented by residues of triflumizole in or on parsley, dandelion, Swiss chard, collards, kale, kohlrabi, mustard greens, Chinese Napa cabbage, broccoli, coriander leaves (cilantro), and turnip greens. In doing so, EPA considered the safety standard in section 408(b)(2) of the FFDCA, and EPA decided that the necessary tolerances under section 408(l)(6) of the FFDCA would be consistent with the safety standard and with FIFRA section 18. Consistent with the need to move quickly on the emergency exemptions in order to address urgent non-routine situations and to ensure that the resulting foods are safe and lawful, EPA is issuing these tolerances without notice and opportunity for public comment as provided in section 408(l)(6) of the FFDCA. Although these tolerances expire and are revoked on June 30, 2009, under section 408(l)(5) of the FFDCA, residues of the pesticide not in excess of the amounts specified in the tolerances remaining in or on parsley, dandelion, Swiss chard, collards, kale, kohlrabi, mustard greens, Chinese Napa cabbage, broccoli, coriander leaves (cilantro), and turnip greens after that date will not be unlawful, provided the pesticide is applied in a manner that was lawful under FIFRA, and the residues do not exceed a level that was authorized by these tolerances at the time of that application. EPA will take action to revoke these tolerances earlier if any experience with, scientific data on, or other relevant information on this pesticide indicate that the residues are not safe.

Because these tolerances are being approved under emergency conditions, EPA has not made any decisions about whether triflumizole meets EPA's registration requirements for use on parsley, dandelion, Swiss chard, collards, kale, kohlrabi, mustard greens, Chinese Napa cabbage, broccoli, coriander leaves (cilantro), and turnip greens or whether permanent tolerances for these uses would be appropriate. Under these circumstances, EPA does not believe that these tolerances serve as a basis for registration of triflumizole by a State for special local needs under FIFRA section 24(c). Nor do these tolerances serve as the basis for any State other than Texas to use this pesticide on these crops under section 18 of FIFRA without following all provisions of EPA's regulations implementing FIFRA section 18 as identified in 40 CFR part 166. For additional information regarding the

emergency exemptions for triflumizole, contact the Agency's Registration Division at the address provided under **FOR FURTHER INFORMATION CONTACT**.

IV. Aggregate Risk Assessment and Determination of Safety

EPA performs a number of analyses to determine the risks from aggregate exposure to pesticide residues. For further discussion of the regulatory requirements of section 408 of the FFDCA and a complete description of the risk assessment process, see <http://www.epa.gov/fedrgstr/EPA-PEST/1997/November/Day-26/p30948.htm>.

Consistent with section 408(b)(2)(D) of the FFDCA, EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of triflumizole and to make a determination on aggregate exposure, consistent with section 408(b)(2) of the FFDCA, for time-limited tolerances for combined residues of triflumizole in or on parsley, leaves at 20 ppm; dandelion, leaves at 7.0 ppm; Swiss chard at 7.0 ppm; collards at 20 ppm; kale at 20 ppm; kohlrabi at 20 ppm; mustard, greens at 20 ppm; Cabbage, Chinese, Napa at 20 ppm; broccoli at 1.0 ppm; coriander, leaves at 20 ppm; and turnip, greens at 20 ppm. The most recent estimated aggregate risks resulting from the use of triflumizole are discussed in the **Federal Register** for April 8, 2005 (70 FR 17908) (FRL-7701-6). This final rule established time-limited tolerances for residues of triflumizole in or on parsley, leaves; dandelion, leaves; Swiss chard; collards; kale; kohlrabi; mustard greens; cabbage, Chinese, Napa; broccoli; and coriander, leaves (cilantro) in connection with a crisis exemption declared by the state of Texas, December 21, 2004.

A new risk assessment was conducted for the current action to include the proposed use on turnip greens and due to the submission of new residue chemistry data and subsequent necessary revision to the time-limited tolerances on the aforementioned crops. Refer to the April 8, 2005 **Federal Register** document for a detailed discussion of the aggregate risk assessments and determination of safety. Below is a brief summary of the aspects of the risk assessment which are affected by the change of tolerances.

EPA has evaluated the available toxicity data and considered its validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable

subgroups of consumers, including infants and children. A summary of the toxicological dose and endpoints for triflumizole for use in human risk assessment is discussed in Unit IV.A. of the **Federal Register** of April 8, 2005 (70 FR 17908).

EPA assessed risk scenarios for triflumizole under acute and chronic aggregate exposure (food + drinking water). Short-, intermediate-, and long-term aggregate risk assessments were not performed because there are no registered or proposed residential uses for triflumizole. A cancer aggregate risk assessment was not performed because triflumizole is not carcinogenic.

The Dietary Exposure Evaluation Model - Food Commodity Intake Database (DEEM-FCIDTM) analysis evaluated the individual food consumption as reported by respondents in the USDA 1994-1996, 1998 nationwide Continuing Surveys of Food Intake by Individuals (CSFII) and accumulated exposure to the chemical for each commodity.

Acute dietary exposure assessments were conducted for the general U.S. population (including infants and children) and females 13-49 years old using tolerance level residues and 100% crop treated (CT) information for all registered and proposed uses). Drinking water was incorporated directly in the dietary assessment using the acute (peak) concentration for surface water generated by the FIRST model.

Using these exposure assessments, the EPA concluded that triflumizole exposure from food and water consumption will utilize 9.3 % of the aPAD for U.S. Population, 21% of the aPAD for all infants less than 1 year old, 25% of the aPAD for children 1-2 years old, the subpopulation at greatest exposure and 17% of the aPAD for females 13-49 years old. Therefore, EPA does not expect the aggregate exposure to exceed 100% of the aPAD.

A refined, chronic dietary exposure assessment was performed for the general U.S. population and various population subgroups using anticipated residues (ARs) from average field trial residues for apple, grape, pear, cherry, cucurbit, strawberry, and milk commodities; registered and proposed tolerance for all other commodities; % CT information for apples, grapes and pear commodities; and 100% CT information for all other uses. Drinking water was incorporated directly into the dietary assessment using the chronic (annual average) concentration for surface water generated by the FIRST model.

Using these exposure assumptions, the EPA concluded that exposure to

triflumizole from food and water will utilize 17% of the cPAD for the general U.S. population, 24% of the cPAD for all infants less than 1 year old and 31% of the cPAD for children 1-2 years old, the subpopulation at greatest exposure. Therefore, EPA does not expect the aggregate exposure to exceed 100% of the cPAD.

V. Other Considerations

A. Analytical Enforcement Methodology

Adequate enforcement methodology (gas chromatography(GC)/nitrogen-phosphorus detector (NPD) method) has been deemed acceptable as a tolerance enforcement method. The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755-5350; telephone number: (410) 305-2905; e-mail address: residuemethods@epa.gov.

B. International Residue Limits

There are no Codex, Canadian or Mexican maximum residue limits established for triflumizole residues in/on crop commodities. Therefore, no compatibility issues exist with regard to the proposed U.S. tolerances discussed in this risk assessment.

VI. Conclusion

Therefore, tolerances are established/revised for combined residues of triflumizole, 1- (1-((4-chloro-2-(trifluoromethyl)phenyl)imino)-2-propoxyethyl)-1H-imidazole, and its metabolites containing the 4-chloro-2-trifluoromethylaniline moiety, calculated as the parent compound, in or on parsley, leaves at 20 ppm; dandelion, leaves at 7.0 ppm; Swiss chard at 7.0 ppm; collards at 20 ppm; kale at 20 ppm; kohlrabi at 20 ppm; mustard, greens at 20 ppm; cabbage, Chinese, Napa at 20 ppm; broccoli at 1.0 ppm; coriander, leaves at 20 ppm; and turnip, greens at 20 ppm.

VII. Statutory and Executive Order Reviews

This final rule establishes/revises time-limited tolerances under section 408 of the FFDCA. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993). Because this rule has been exempted from review under Executive Order 12866 due to its lack of significance, this rule is not subject to Executive Order 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* (66 FR 28355, May 22, 2001). This final rule

does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, or impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104-4). Nor does it require any special considerations under Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994); or OMB review or any Agency action under Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104-113, section 12(d) (15 U.S.C. 272 note). Since tolerances and exemptions that are established on the basis of a FIFRA section 18 exemption under section 408 of the FFDCA, such as the [tolerance/exemption] in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) do not apply. [If this rule is adopting a proposed rule add the following sentence: The Agency hereby certifies that this rule will not have significant negative economic impact on a substantial number of small entities.] In addition, the Agency has determined that this action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999). Executive Order 13132 requires EPA to develop an accountable process to ensure “meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.” “Policies that have federalism implications” is defined in the Executive order to include regulations that have “substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.” This final rule directly regulates growers, food processors, food handlers, and food

retailers, not States. This action does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of section 408(n)(4) of the FFDCA. For these same reasons, the Agency has determined that this rule does not have any “tribal implications” as described in Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000). Executive Order 13175, requires EPA to develop an accountable process to ensure “meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications.” “Policies that have tribal implications” is defined in the Executive order to include regulations that have “substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and the Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.” This rule will not have substantial direct effects on tribal governments, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this rule.

VIII. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: August 11, 2006.

Daniel J. Rosenblatt,

Acting Director, Registration Division, Office of Pesticide Programs.

■ Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Section 180.476 is amended, in paragraph (b), by revising the table to read as follows:

§ 180.476 Triflumizole; tolerances for residues.

(b) * * * *

Commodity	Parts per million	Expiration/revocation date
Broccoli	1.0	12/31/09
Cabbage, chinese, napa	20	12/31/09
Collards	20	12/31/09
Coriander, leaves	20	12/31/09
Dandelion, leaves	7.0	12/31/09
Kale	20	12/31/09
Kohlrabi	20	12/31/09
Mustard, greens	20	12/31/09
Parsley, leaves	20	12/31/09
Swiss chard	7.0	12/31/09
Turnip, greens	20	12/31/09

* * * *

[FR Doc. E6-13659 Filed 8-22-06; 8:45 am]

BILLING CODE 6560-50-S

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA-HQ-OPP-2005-0540; FRL-8086-9]

Azoxystrobin; Pesticide Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes tolerances for combined residues of azoxystrobin in or on vegetables, foliage of legume, group 7; vegetables, fruiting, group 8 (except tomato); pea and bean, succulent shelled, subgroup 6B; pea and bean, dried shelled, except soybean subgroup, 6C; citrus, dried pulp; citrus, oil; and fruit, citrus, Group 10. Interregional Research Project Number 4 (IR-4) requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA). EPA is also deleting several existing tolerances that are no longer needed as a result of this action.

DATES: This regulation is effective August 23, 2006. Objections and requests for hearings must be received on or before October 23, 2006, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the SUPPLEMENTARY INFORMATION).

ADDRESSES: EPA has established a docket for this action under docket identification (ID) number EPA-HQ-OPP-2005-0540. All documents in the

docket are listed in the index for the docket. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available in the electronic docket at <http://www.regulations.gov>, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. The Docket Facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket telephone number is (703) 305-5805.

FOR FURTHER INFORMATION CONTACT: Barbara Madden, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; telephone number: (703) 305-6463; e-mail address: madden.barbara@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

- Crop production (NAICS 111), e.g., agricultural workers; greenhouse, nursery, and floriculture workers; farmers.

- Animal production (NAICS 112), e.g., cattle ranchers and farmers, dairy cattle farmers, livestock farmers.

- Food manufacturing (NAICS 311), e.g., agricultural workers; farmers; greenhouse, nursery, and floriculture workers; ranchers; pesticide applicators.

- Pesticide manufacturing (NAICS 32532), e.g., agricultural workers; commercial applicators; farmers; greenhouse, nursery, and floriculture workers; residential users.

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Access Electronic Copies of this Document?

In addition to accessing an electronic copy of this **Federal Register** document through the electronic docket at <http://www.regulations.gov>, you may access this **Federal Register** document electronically through the EPA Internet under the “**Federal Register**” listings at <http://www.epa.gov/fedrgstr>. You may also access a frequently updated electronic version of 40 CFR part 180 through the Government Printing Office’s pilot e-CFR site at <http://www.gpoaccess.gov/ecfr>. To access the OPPTS Harmonized Guidelines referenced in this document, go directly

to the guidelines at <http://www.epa.gov/opptsfrs/home/guidelin.htm>.

C. Can I File an Objection or Hearing Request?

Under section 408(g) of the FFDCA, as amended by the FQPA, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. The EPA procedural regulations which govern the submission of objections and requests for hearings appear in 40 CFR part 178. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA-HQ-OPP-2005-0540 in the subject line on the first page of your submission. All requests must be in writing, and must be mailed or delivered to the Hearing Clerk on or before October 23, 2006.

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing that does not contain any CBI for inclusion in the public docket that is described in **ADDRESSES**. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit your copies, identified by docket ID number EPA-HQ-OPP-2005-0540 by one of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.

- **Mail:** Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001.

- **Delivery:** OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. Deliveries are only accepted during the Docket's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket telephone number is (703) 305-5805.

II. Background and Statutory Findings

In the **Federal Register** of March 8, 2006 (71 FR 11624) (FRL-7765-5), EPA issued a notice pursuant to section 408(d)(3) of FFDCA, 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 5E6916) by Interregional Research Project #4 (IR-4), 681 US Highway 1 South, North Brunswick, NJ 08902-3390. The petition

requested that 40 CFR 180.507 be amended by establishing a tolerance for combined residues of the fungicide of azoxystrobin, [methyl (E)-2-(2-(6-(2-cyanophenoxy)pyrimidin-4-yl)oxy)phenyl]-3-methoxyacrylate] and the Z isomer of azoxystrobin, [methyl (Z)-2-(2-(6-(2-cyanophenoxy)pyrimidin-4-yl)oxy)phenyl]-3-methoxyacrylate], in or on citrus, dried pulp at 20.0 parts per million (ppm); citrus, oil at 40.0 ppm; fruit, citrus, group 10 at 10.0 ppm; vegetable, foliage of legume, group 7 at 30.0 ppm; vegetable, fruiting, group 8, except tomato at 2.0 ppm; pea and bean, succulent shelled, subgroup 6B at 0.5 ppm; pea and bean, dried shelled, except soybean, subgroup 6C at 0.5 ppm; animal feed, nongrass, group 18, forage at 30.0 ppm; animal feed, nongrass, group 18 hay at 55.0 ppm. That notice included a summary of the petition prepared by Syngenta, the registrant on behalf of the Interregional Research Project Number 4 (IR-4). One comment was received on the notice of filing. EPA's response to this comment is discussed in Unit IV.C.

EPA is also deleting several established tolerances in § 180.507(a)(1) and (a)(3) that are no longer needed. The revisions to § 180.507(a)(1) are as follows:

- Delete eggplant and pepper tolerances at 2.0 ppm. Replaced with vegetable, fruiting group 8 (except tomato) at 2.0 ppm.

- Delete soybean, forage at 25.0. Replaced with vegetable, foliage of legume, group 7 at 30.0 ppm.

The revision to paragraph (a)(3) is to delete the time-limited tolerance for potato at 0.03 ppm because it has expired and remove it from § 180.507.

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is "safe." Section 408(b)(2)(A)(ii) of FFDCA defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue...."

EPA performs a number of analyses to determine the risks from aggregate exposure to pesticide residues. For further discussion of the regulatory requirements of section 408 of the FFDCA and a complete description of the risk assessment process, see <http://www.epa.gov/fedrgstr/EPA-PEST/1997/November/Day-26/p30948.htm>.

III. Aggregate Risk Assessment and Determination of Safety

Consistent with section 408(b)(2)(D) of FFDCA, EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure, consistent with section 408(b)(2) of FFDCA, for a tolerance for combined residues of azoxystrobin, [methyl (E)-2-(2-(6-(2-cyanophenoxy)pyrimidin-4-yl)oxy)phenyl]-3-methoxyacrylate] and the Z isomer of azoxystrobin, [methyl (Z)-2-(2-(6-(2-cyanophenoxy)pyrimidin-4-yl)oxy)phenyl]-3-methoxyacrylate] on citrus, dried pulp at 20.0 ppm; citrus, oil at 40.0 ppm; fruit, citrus, group 10 at 10.0 ppm; vegetable, foliage of legume, group 7 at 30.0 ppm; vegetable, fruiting, group 8, except tomato at 2.0 ppm; pea and bean, succulent shelled, subgroup 6B at 0.5 ppm; and pea and bean, dried shelled, except soybean, subgroup 6C at 0.5 ppm. EPA's assessment of exposures and risks associated with establishing the tolerance follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered its validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children. Specific information on the studies received and the nature of the toxic effects caused by azoxystrobin as well as the no-observed-adverse-effect-level (NOAEL) and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies can be found at <http://www.epa.gov/fedrgstr/EPA-PEST/2000/September/Day-29/p25051.htm>.

B. Toxicological Endpoints

For hazards that have a threshold below which there is no appreciable risk, the dose at which no adverse effects are observed (the NOAEL) from the toxicology study identified as appropriate for use in risk assessment is used to estimate the toxicological level

of concern (LOC). However, the lowest dose at which adverse effects of concern are identified (the LOAEL) is sometimes used for risk assessment if no NOAEL was achieved in the toxicology study selected. An uncertainty factor (UF) is applied to reflect uncertainties inherent in the extrapolation from laboratory animal data to humans and in the variations in sensitivity among members of the human population as well as other unknowns.

The linear default risk methodology (Q*) is the primary method currently used by the Agency to quantify non-threshold hazards such as cancer. The Q* approach assumes that any amount of exposure will lead to some degree of cancer risk, estimates risk in terms of the probability of occurrence of additional cancer cases. More information can be found on the general principles EPA uses in risk characterization at <http://www.epa.gov/pesticides/health/human.htm>.

A summary of the toxicological endpoints for azoxystrobin used for human risk assessment is discussed in Unit III.B. of the final rule published in the **Federal Register** of September 29, 2000 (65 FR 58404) (FRL-6749-1).

C. Exposure Assessment

1. *Dietary exposure from food and feed uses.* Tolerances have been established (40 CFR 180.507) for the combined residues of azoxystrobin, [methyl (E)-2-(2-(6-(2-cyanophenoxy)pyrimidin-4-yloxy)phenyl)-3-methoxyacrylate] and the Z isomer of azoxystrobin, [methyl (Z)-2-(2-(6-(2-cyanophenoxy)pyrimidin-4-yloxy)phenyl)-3-methoxyacrylate], in or on a variety of raw agricultural commodities. In addition, tolerances for livestock commodities have been established for the residues of azoxystrobin [methyl(E)-2-(2-(6-(2-cyanophenoxy)pyrimidin-4-yloxy)phenyl)-3-methoxyacrylate] in or on milk; meat, fat, and meat byproducts (mbyp) of cattle, goat, hog, horse, and sheep. Risk assessments were conducted by EPA to assess dietary exposures from azoxystrobin in food as follows:

i. *Acute exposure.* Quantitative acute dietary exposure and risk assessments are performed for a food-use pesticide, if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a one-day or single exposure.

In conducting the acute dietary exposure assessment EPA used the Dietary Exposure Evaluation Model software with the Food Commodity Intake Database (DEEM-FCID™), which incorporates food consumption data as reported by respondents in the USDA

1994-1996 and 1998 Nationwide Continuing Surveys of Food Intake by Individuals (CSFII), and accumulated exposure to the chemical for each commodity. The following assumptions were made for the acute exposure assessments: One hundred percent of proposed and registered crops are assumed treated with azoxystrobin and tolerance-level residues.

ii. *Chronic exposure.* In conducting the chronic dietary exposure assessment EPA used the Dietary Exposure Evaluation Model software with the Food Commodity Intake Database (DEEM-FCID™), which incorporates food consumption data as reported by respondents in the USDA 1994-1996 and 1998 Nationwide Continuing Surveys of Food Intake by Individuals (CSFII), and accumulated exposure to the chemical for each commodity. The following assumptions were made for the chronic exposure assessments: Some percent crop treated information for selected crops and tolerance-level residues.

iii. *Cancer.* Azoxystrobin is classified as "not likely to be a human carcinogen." Therefore, a cancer dietary exposure assessment was not performed.

iv. *Anticipated residue and percent crop treated (PCT) information.* Section 408(b)(2)(F) of FFDCA states that the Agency may use data on the actual percent of food treated for assessing chronic dietary risk only if the Agency can make the following findings: Condition 1, that the data used are reliable and provide a valid basis to show what percentage of the food derived from such crop is likely to contain such pesticide residue; Condition 2, that the exposure estimate does not underestimate exposure for any significant subpopulation group; and Condition 3, if data are available on pesticide use and food consumption in a particular area, the exposure estimate does not understate exposure for the population in such area. In addition, the Agency must provide for periodic evaluation of any estimates used. To provide for the periodic evaluation of the estimate of PCT as required by section 408(b)(2)(F) of FFDCA, EPA may require registrants to submit data on PCT.

The Agency used PCT information as follows: almond, 20%; apricot, 15%; asparagus, 1%; dry beans and peas, 1%; green beans, 25%; garden beets, 15%; sugar beets, 1%; blueberry, 15%; cabbage, 5%; cantaloupes, 10%; carrot, 10%; celery, 10%; cherry, 5%; sweet corn, 10%; cucumber, 15%; filbert, 5%; garlic, 50%; grape, 10%; grapefruit, 20%; guar, 1%; honeydew melon, 5%;

lettuce, 1%; mustard greens, 15%; onion, 10%; orange, 17%; parsley, 30%; peach, 5%; peanut, 10%; pecan, 1%; pepper, 10%; pistachio, 30%; prunes and plum, 1%; potato, 25%; pumpkin, 20%; rapeseed (canola), 5%; rice, 25%; safflower, 5%; soybean, 1%; spinach, 10%; summer and winter squash, 15%; strawberry, 20%; sunflower, 5%; tangerine, 20%; tomato, 20%; turnip greens, 15%; walnut, 1%; watermelon, 25%; and wheat, 1%.

EPA estimates projected percent crop treated (PPCT) for a new pesticide use by assuming that the percent crop treated (PCT) during the pesticide's initial five years of use on a specific use site will not exceed the average PCT of the dominant pesticide (i.e., the one with the greatest PCT) on that site over the three most recent surveys.

Comparisons are only made among pesticides of the same pesticide types (i.e., the dominant fungicide on the use site is selected for comparison with a new fungicide). The PCTs included in the average may be each for the same pesticide or for different pesticides since the same or different pesticides may dominate for each year selected. Typically, EPA uses USDA/NASS as the source for raw PCT data because it is publicly available and does not have to be calculated from available data sources. When a specific use site is not surveyed by USDA/NASS, EPA uses proprietary data and calculates the estimated PCT.

The estimated PPCT for azoxystrobin on PH oranges is based on the recent PCT of market leader imazilil. The estimated PPCT for this new use of azoxystrobin is a high-end estimate that is highly unlikely to be exceeded during the initial five years of actual use. This is based on the fact that azoxystrobin complements imazilil in fungicide resistance programs to control imazilil-resistant populations of *Penicillium* spp. (green mold disease) and to reduce the potential for crop losses from fungicide-resistant populations of the pathogen. Azoxystrobin is highly unlikely to exceed imazilil use because it is used in imazilil resistance management. Thus the given PPCT for azoxystrobin is appropriate for use in chronic dietary risk assessment.

2. *Dietary exposure from drinking water.* The Agency lacks sufficient monitoring exposure data to complete a comprehensive dietary exposure analysis and risk assessment for azoxystrobin in drinking water. Because the Agency does not have comprehensive monitoring data, drinking water concentration estimates are made by reliance on simulation or modeling taking into account data on

the physical characteristics of azoxystrobin. Further information regarding EPA drinking water models used in pesticide exposure assessment can be found at <http://www.epa.gov/oppefed1/models/water/index.htm>.

Based on the FIRST and SCI-GROW models, the estimated environmental concentrations (EECs) of azoxystrobin for chronic exposures are estimated to be 33 parts per billion (ppb) for surface water and 3.1 ppb for ground water. The estimated drinking water concentrations (EDWCs) for azoxystrobin were calculated based on a maximum application rate for turf of 0.55 lb ai/A/application with 9 applications per year. Modeled estimates of drinking water concentrations were directly entered into the dietary exposure model (DEEM-FCID). For chronic dietary risk assessment, the annual average concentration of 33 ppb was used to access the contribution to drinking water.

3. *From non-dietary exposure.* The term "residential exposure" is used in this document to refer to non-occupational, non-dietary exposure (e.g., for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets).

Azoxystrobin is currently registered for use on the following residential non-dietary sites: Residential turfgrass and ornamentals, as well as indoor surfaces. The risk assessment was conducted using the following residential exposure assumptions:

Residential handlers may receive short-term dermal and inhalation exposure to azoxystrobin when mixing, loading and applying the formulations. Adults and children may be exposed to azoxystrobin residues from dermal contact with foliage/surfaces during postapplication activities. Toddlers may receive short- and intermediate-term oral exposure from incidental ingestion during postapplication activities.

Inhalation daily doses for residential handlers were calculated for the WDG formulation using data for mixing, loading and applying a liquid. Based on PHED unit exposure values from other handler scenarios with these formulation types, the exposure from a WDG is expected to be less than that of handling a liquid. The open mixing, loading, and applying liquid using a low pressure handwand (PHED) handler scenario was evaluated. The residential exposure and risk assessment for turf and ornamentals was conducted using the application rate for turf because it is the highest use rate.

Exposures were estimated for residential handler activities including: Mix, load and spot application of liquid

formulation (low-pressure hand sprayer), and mix, load and broadcast application of liquid formulation (garden hose-end sprayer). In addition, short-term exposures were estimated for infants and children for postapplication exposure scenarios resulting from indoor surface treatment including: Toddlers' incidental ingestion of pesticide residues on hard indoor surfaces from hand-to-mouth transfer, and toddlers' incidental ingestion of pesticide residues on carpet/textile indoor surfaces from hand-to-mouth transfer. Intermediate-term exposures were also estimated for infants and children for residential post-application oral exposures.

The exposure estimates are based on some upper-percentile (i.e., maximum application rate, initial amount of transferable residue and duration of exposure) and some central tendency (i.e., surface area, hand-to-mouth activity, and body weight) assumptions and are considered to be representative of high-end exposures. The uncertainties associated with this assessment stem from the use of an assumed amount of pesticide available from turf, and assumptions regarding transfer of chemical residues and hand-to-mouth activity. The estimated exposures are believed to be reasonable high-end estimates.

4. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of the FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider "available information" concerning the cumulative effects of a particular pesticide's residues and "other substances that have a common mechanism of toxicity."

Unlike other pesticides for which EPA has followed a cumulative risk approach based on a common mechanism of toxicity, EPA has not made a common mechanism of toxicity finding as to azoxystrobin and any other substances and azoxystrobin does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has not assumed that azoxystrobin has a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see the policy statements released by EPA's Office of Pesticide Programs concerning common mechanism determinations and procedures for cumulating effects from substances found to have a common

mechanism on EPA's Web site at <http://www.epa.gov/pesticides/cumulative>.

D. Safety Factor for Infants and Children

1. *In general.* Section 408 of FFDCA provides that EPA shall apply an additional tenfold margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the data base on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. Margins of safety are incorporated into EPA risk assessments either directly through use of a MOE analysis or through using uncertainty (safety) factors in calculating a dose level that poses no appreciable risk to humans. In applying this provision, EPA either retains the default value of 10X when reliable data do not support the choice of a different factor, or, if reliable data are available, EPA uses a different additional safety factor value based on the use of traditional uncertainty factors and/or special FQPA safety factors, as appropriate.

2. *Prenatal and postnatal sensitivity.* The developmental and reproductive toxicity data, from a Prenatal Development Study in Rats, a Prenatal Development Study in Rabbits, and a Two-Generation Reproductive Toxicity Study in Rats, did not indicate increased susceptibility of young rats or rabbits to *in utero* and/or postnatal exposure.

3. *Conclusion.* There is a complete toxicity data base for azoxystrobin and exposure data are complete or are estimated based on data that reasonably account for potential exposures. The Agency has determined that the 10X FQPA safety factor to protect infants and children should be removed (that is, set to 1) because, in addition to the completeness of the toxicological database and the lack of increased susceptibility of young rats and rabbits to pre- and postnatal exposure to azoxystrobin, the unrefined acute and chronic dietary exposure estimates will overestimate dietary exposure from food, and ground and surface water modeling data produce upper-bound concentration estimates. The residential postapplication assessment is based upon the residential SOPs. The assessment is based upon surrogate study data. These data are reliable and are not expected to underestimate risk to adults or children. The residential SOPs are based upon reasonable "worst-case" assumptions and are not expected to underestimate risk.

E. Aggregate Risks and Determination of Safety

The Agency currently has two ways to estimate total aggregate exposure to a pesticide from food, drinking water, and residential uses. First, a screening assessment can be used, in which the Agency calculates drinking water levels of comparison (DWLOCs) which are used as a point of comparison against estimated drinking water concentrations (EDWCs). The DWLOC values are not regulatory standards for drinking water, but are theoretical upper limits on a pesticide's concentration in drinking water in light of total aggregate exposure to a pesticide in food and residential uses. More information on the use of DWLOCs in dietary aggregate risk assessments can be found at <http://www.epa.gov/oppfead1/trac/science/screeningsop.pdf>.

More recently the Agency has used another approach to estimate aggregate exposure through food, residential and drinking water pathways. In this approach, modeled surface and ground water EDWCs are directly incorporated into the dietary exposure analysis, along with food. This provides a more realistic estimate of exposure because actual body weights and water consumption from the CSFII are used. The combined food and water exposures are then added to estimated exposure from residential sources to calculate aggregate risks. The resulting exposure and risk estimates are still considered to be high end, due to the assumptions used in developing drinking water modeling inputs.

1. *Acute risk.* Using the exposure assumptions discussed in this unit for acute exposure, the acute dietary exposure from food and water to azoxystrobin will occupy 27 % of the aPAD for the U.S. population, 24 % of the aPAD for females 13 years and older, 24 % of the aPAD for infants (< 1 year old), and 74 % of the aPAD for children 1-2 years old, the subpopulation at greatest exposure. Therefore, EPA does not expect the aggregate exposure to exceed 100% of the aPAD.

2. *Chronic risk.* Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that exposure to azoxystrobin from food and water will utilize 8 % of the cPAD for the U.S. population, 6 % of the cPAD for all infants (<1 year old), and 19% of the cPAD for children 1-2 years old, the subpopulation at greatest exposure. Based on the use pattern, chronic residential exposure to residues of azoxystrobin is not expected. Therefore, EPA does not expect the

aggregate exposure to exceed 100% of the cPAD.

3. *Short-term risk.* Short-term aggregate exposure takes into account residential exposure plus chronic exposure to food and water (considered to be a background exposure level). Azoxystrobin is currently registered for use that could result in short-term residential exposure and the Agency has determined that it is appropriate to aggregate chronic food, water and short-term exposures for azoxystrobin.

Using the exposure assumptions described in this unit for short-term exposures, EPA has concluded that food, water and residential exposures aggregated result in aggregate MOEs of 1,800 for the U.S. population, 2,150 for youth 13-19 years old, 250 for all infants less than one year old, 200 for children one to two years old and 2,150 for females 13-49 years old. These aggregate MOEs do not exceed the Agency's level of concern, a MOE of 100, for aggregate exposure to food, water and residential uses.

4. *Intermediate-term risk.* Intermediate-term aggregate exposure takes into account residential exposure plus chronic exposure to food and water (considered to be a background exposure level) of the risk from food and water, which do not exceed the Agency's level of concern. Azoxystrobin is currently registered for use(s) that could result in intermediate-term residential exposure and the Agency has determined that it is appropriate to aggregate chronic food, water and intermediate-term exposures for azoxystrobin.

Using the exposure assumptions described in this unit for intermediate-term exposures, EPA has concluded that food, water and residential exposures aggregated result in aggregate MOEs of 260 for children one to two years old. These aggregate MOEs do not exceed the Agency's level of concern, a MOE of 100, for aggregate exposure to food, water and residential uses.

5. *Aggregate cancer risk for U.S. population.* Azoxystrobin has been classified as not likely to be carcinogenic to humans. Therefore, azoxystrobin is expected to pose at most a negligible cancer risk.

6. *Determination of safety.* Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, and to infants and children from aggregate exposure to azoxystrobin residues.

IV. Other Considerations

A. Analytical Enforcement Methodology

Adequate methodology is available for enforcement of these tolerances. The gas chromatography/nitrogen phosphorous detector (GC/ NPD) method (RAM 243/ 04) has undergone a method validation by the EPA analytical laboratory. EPA comments have been incorporated and the revised method (designated RAM 243) will be submitted to FDA for inclusion in PAM, Volume II as an enforcement method. The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755-5350; telephone number: (410) 305-2905; e-mail address: residuemethods@epa.gov.

B. International Residue Limits

There are no Codex MRLs for azoxystrobin. Canada and Mexico have a MRL for tomato at 0.2. Mexico also has a MRL for chili pepper at 2.0 ppm. These existing MRLs match those being established. There are no other Canadian or Mexican MRLs for commodities of concern in this action. Therefore, there are no international harmonization issues associated with this action.

C. Response to Comments

One comment was received from a private citizen who opposed the manufacturing and selling of this product due to potential effects on the environment. This comment is considered irrelevant because the safety standard for approving tolerances under section 408 of FFDCA focuses on potential harms to human health and does not permit consideration of effects on the environment.

V. Conclusion

Therefore, the tolerance is established for combined residues azoxystrobin, [methyl (E)-2-(2-(6-(2-cyanophenoxy)pyrimidin-4-yloxy)phenyl)-3-methoxyacrylate] and the Z isomer of azoxystrobin, [methyl (Z)-2-(2-(6-(2-cyanophenoxy)pyrimidin-4-yloxy)phenyl)-3-methoxyacrylate] on citrus, dried pulp at 20.0 ppm; citrus, oil at 40.0 ppm; fruit, citrus, group 10 at 10.0 ppm; vegetable, foliage of legume, group 7 at 30.0 ppm; vegetable, fruiting, group 8, except tomato at 2.0 ppm; pea and bean, succulent shelled, subgroup 6B at 0.5 ppm; and pea and bean, dried shelled, except soybean, subgroup 6C at 0.5 ppm.

VI. Statutory and Executive Order Reviews

This final rule establishes a tolerance under section 408(d) of FFDCA in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993). Because this rule has been exempted from review under Executive Order 12866 due to its lack of significance, this rule is not subject to Executive Order 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* (66 FR 28355, May 22, 2001). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, or impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104-4). Nor does it require any special considerations under Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994); or OMB review or any Agency action under Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104-113, section 12(d) (15 U.S.C. 272 note). Since tolerances and exemptions that are established on the basis of a petition under section 408(d) of FFDCA, such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) do not apply. In addition, the Agency has determined that this action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999). Executive Order 13132 requires EPA to develop an accountable process to ensure “meaningful and timely input by State and local officials in the development of regulatory policies that

have federalism implications.” “Policies that have federalism implications” is defined in the Executive order to include regulations that have “substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.” This final rule directly regulates growers, food processors, food handlers and food retailers, not States. This action does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of section 408(n)(4) of FFDCA. For these same reasons, the Agency has determined that this rule does not have any “tribal implications” as described in Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000). Executive Order 13175, requires EPA to develop an accountable process to ensure “meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications.” “Policies that have tribal implications” is defined in the Executive order to include regulations that have “substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and the Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.” This rule will not have substantial direct effects on tribal governments, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this rule.

VII. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: August 11, 2006.

Daniel J. Rosenblatt,

Acting Director, Registration Division, Office of Pesticide Programs.

■ Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Section 180.507 is amended in paragraph (a)(1), in the table, by removing the commodities eggplant; pepper; and soybean, forage; by alphabetically adding the commodities vegetable, foliage of legume; and vegetable, fruiting; and by revising the commodities citrus, dried pulp; citrus, oil; fruit, citrus; pea and bean, dried shelled, except soybean; and pea and bean, succulent shelled; and by removing paragraph (a)(3) to read as follows:

§ 180.507 Azoxystrobin; tolerances for residues.

(a) * * *

Commodity	Parts per million
* * *	* *
Citrus, dried pulp	20.0
Citrus, oil	40.0
* * *	* *
Fruit, citrus, group 10	10.0
* * *	* *
Pea and bean, dried shelled, except soybean, subgroup 6C	0.5
Pea and bean, succulent shelled, subgroup 6B	0.5
* * *	* *
Vegetable, foliage of legume, group 7	30.0
Vegetable, fruiting, group 8, except tomato	2.0
* * *	* *

* * *

BILLING CODE 6560-50-S

ENVIRONMENTAL PROTECTION AGENCY**40 CFR Part 180**

[EPA-HQ-OPP-2006-0216; FRL-8087-6]

Fenpyroximate; Pesticide Tolerance**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Final rule.

SUMMARY: This regulation establishes tolerances for combined residues of fenpyroximate and its z-isomer in or on hop, dried cones; almond hulls; nut, tree, group 14; pistachio; fruit, citrus, group 10; citrus, dried pulp; citrus, oil; peppermint, tops; and spearmint, tops. Interregional Project Number 4 (IR-4) requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA).

DATES: This regulation is effective August 23, 2006. Objections and requests for hearings must be received on or before October 23, 2006, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: EPA has established a docket for this action under docket identification (ID) number EPA-HQ-OPP-2006-0216. All documents in the docket are listed in the index for the docket. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available in the electronic docket at <http://www.regulations.gov>, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. The Docket Facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket telephone number is (703) 305-5805.

FOR FURTHER INFORMATION CONTACT: Shaja R. Brothers, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; telephone number: 703-308-3194; e-mail address: brothers.shaja@epa.gov.

SUPPLEMENTARY INFORMATION:**I. General Information***A. Does this Action Apply to Me?*

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

- Crop production (NAICS 111), e.g., agricultural workers; greenhouse, nursery, and floriculture workers; farmers.
- Animal production (NAICS 112), e.g., cattleranchers and farmers, dairy cattle farmers, livestock farmers.
- Food manufacturing (NAICS 311), e.g., agricultural workers; farmers; greenhouse, nursery, and floriculture workers; ranchers; pesticide applicators.
- Pesticide manufacturing (NAICS 32532), e.g., agricultural workers; commercial applicators; farmers; greenhouse, nursery, and floriculture workers; residential users.

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Access Electronic Copies of this Document?

In addition to accessing an electronic copy of this **Federal Register** document through the electronic docket at <http://www.regulations.gov>, you may access this **Federal Register** document electronically through the EPA Internet under the “**Federal Register**” listings at <http://www.epa.gov/fedrgstr>. You may also access a frequently updated electronic version of 40 CFR part 180 through the Government Printing Office’s pilot e-CFR site at <http://www.gpoaccess.gov/ecfr>.

C. Can I File an Objection or Hearing Request?

Under section 408(g) of the FFDCA, as amended by the FQPA, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. The EPA procedural regulations which govern the submission of objections and requests for hearings appear in 40 CFR part 178. You must file your objection or request a hearing on this regulation in

accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA-HQ-OPP-2006-0216 in the subject line on the first page of your submission. All requests must be in writing, and must be mailed or delivered to the Hearing Clerk on or before October 23, 2006.

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing that does not contain any CBI for inclusion in the public docket that is described in **ADDRESSES**. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit your copies, identified by docket ID number EPA-HQ-OPP-2006-0216, by one of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.
- **Mail:** Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001.
- **Delivery:** OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. Deliveries are only accepted during the Docket’s normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket telephone number is (703) 305-5805.

II. Background and Statutory Findings

In the **Federal Register** of August 10, 2005 (70 FR 46444) (FRL-7729-3), EPA issued a notice pursuant to section 408(d)(3) of FFDCA, 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 5E6943) by IR-4, 681 U.S. Highway #1 South, North Brunswick, NJ 08902-3390. The petition requested that 40 CFR 180.566 be amended by establishing tolerances for combined residues of the insecticide/miticide fenpyroximate, (E)-1,1-dimethylethyl 4-[[[[(1,3-dimethyl-5-phenoxy-1H-pyrazol-4-yl)methylene]amino]oxy]methyl]benzoate and its Z-isomer, (Z)-1,1-dimethylethyl 4-[[[[(1,3-dimethyl-5-phenoxy-1H-pyrazol-4-yl)methylene]amino]oxy]methyl]benzoate, in or on almond hulls at 1.8 parts per million (ppm); nut, tree, group 14 at 0.1 ppm; pistachio at 0.1 ppm; fruit, citrus, group 10; citrus at 0.4 ppm, fruit, citrus, dried pulp at 2.5

ppm; citrus, oil at 15 ppm; hop at 4.5 ppm; peppermint, tops at 3.0 ppm; and spearmint, tops at 3.0 ppm. That notice included a summary of the petition prepared by Nichino America, the registrant. Comments were received on the notice of filing. EPA's response to these comments is discussed in Unit IV.C. below.

Following review of the residue chemistry data, EPA determined that the commodity terms and tolerance levels should be revised to the following: Almond, hulls at 3.0 ppm; hop, dried cones at 10 ppm; nut, tree, group 14 at 0.10 ppm; pistachio at 0.10 ppm; fruit, citrus, group 10 at 0.60 ppm; fruit, citrus, dried pulp revised to read citrus, dried, pulp at 2.5 ppm; citrus, oil at 10 ppm; peppermint, tops at 7.0 ppm; and spearmint, tops at 7.0 ppm.

Time-limited tolerances for grape, wine and hop (currently revised to hop, dried cones) have expired under 40 CFR 180.566(a)(1). Permanent tolerances have been established for these commodities; therefore, grape, wine and hop, dried cones will be added to 40 CFR 180.566(a)(2). The petitioner for hop, dried cones has requested a domestic registration; therefore, footnote 1 to the table in § 180.566(a)(2) which reads "There are no U.S. registration on hops" has been removed. In addition, registrations for citrus fruits, hops, mint, tree nuts (including pistachio) have been deemed as conditional and are contingent upon submission of required additional data.

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is "safe." Section 408(b)(2)(A)(ii) of FFDCA defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue...."

EPA performs a number of analyses to determine the risks from aggregate exposure to pesticide residues. For further discussion of the regulatory requirements of section 408 of the

FFDCA and a complete description of the risk assessment process, see <http://www.epa.gov/fedrgstr/EPA-PEST/1997/November/Day-26/p30948.htm>.

III. Aggregate Risk Assessment and Determination of Safety

Consistent with section 408(b)(2)(D) of FFDCA, EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure, consistent with section 408(b)(2) of FFDCA, for tolerances for combined residues of fenpyroximate and its *z*-isomer on almond, hulls at 3.0 ppm; hop, dried cones at 10 ppm; nut, tree, group 14 at 0.10 ppm; pistachio at 0.10 ppm; fruit, citrus, group 10 at 0.60 ppm; citrus, dried, pulp at 2.5 ppm; citrus, oil at 10 ppm; peppermint, tops at 7.0 ppm; and spearmint, tops at 7.0 ppm. EPA's assessment of exposures and risks associated with establishing the tolerances follow.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered its validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children. Specific information on the studies received and the nature of the toxic effects caused by fenpyroximate as well as the no-observed-adverse-effect-level (NOEL) and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies can be found at <http://www.regulations.gov>, Docket No. EPA-HQ-OPP-2004-0174-0001, pages 2-4.

B. Toxicological Endpoints

For hazards that have a threshold below which there is no appreciable risk, the dose at which no adverse effects are observed (the NOEL) from the toxicology study identified as appropriate for use in risk assessment is used to estimate the toxicological level of concern (LOC). However, the lowest dose at which adverse effects of concern are identified (the LOAEL) is sometimes used for risk assessment if no NOEL was achieved in the toxicology study selected. An uncertainty factor (UF) is applied to reflect uncertainties inherent in the extrapolation from laboratory animal data to humans and in the variations in sensitivity among members of the human population as well as other unknowns.

The linear default risk methodology (Q*) is the primary method currently used by the Agency to quantify non-threshold hazards such as cancer. The Q* approach assumes that any amount of exposure will lead to some degree of cancer risk, estimates risk in terms of the probability of occurrence of additional cancer cases. More information can be found on the general principles EPA uses in risk characterization at <http://www.epa.gov/pesticides/health/human.htm>.

A summary of the toxicological endpoints for fenpyroximate used for human risk assessment is discussed at <http://www.regulations.gov>, Docket No. EPA-HQ-OPP-2005-0216-0001; pages 14-15.

C. Exposure Assessment

1. *Dietary exposure from food and feed uses.* Tolerances have been established in 40 CFR 180.566(a)(2) for the combined residues of fenpyroximate and its *z*-isomer, in or on a variety of raw agricultural commodities. Risk assessments were conducted by EPA to assess dietary exposures from fenpyroximate in food as follows:

i. *Acute exposure.* Quantitative acute dietary exposure and risk assessments are performed for a food-use pesticide, if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a one-day or single exposure.

An unrefined, Tier I acute dietary exposure assessment was conducted for females 13 to 49 years old. The unrefined, Tier I acute analyses assumed that fenpyroximate residues were present in all commodities at tolerance levels and that 100% of all commodities (registered and proposed uses) are treated. Adequate processing data on apples, grapes, oranges and mint are available. Modified processing factors based on these data were used for apple juice, pear juice, grape juice, raisins, citrus juice (orange, grapefruit, lemon and lime) and mint oils (peppermint and spearmint). The Dietary Exposure Evaluation Model (DEEM™) default processing factors were used for all other processed commodities.

ii. *Chronic exposure.* In conducting the chronic dietary exposure assessment EPA used the Dietary Exposure Evaluation Model software with the Food Commodity Intake Data base (DEEM-FCID™), which incorporates food consumption data as reported by respondents in the USDA 1994-1996 and 1998 Nationwide Continuing Surveys of Food Intake by Individuals (CSFII), and accumulated exposure to the chemical for each commodity. The

following assumptions were made for the chronic exposure assessments: An unrefined, Tier I chronic dietary exposure assessment was conducted for the general U.S. population, and various population subgroups. The unrefined, Tier I chronic analyses assumed that fenpyroximate residues were present in all commodities at tolerance levels and that 100% of all commodities (registered and proposed uses) are treated.

Adequate processing data on apples, grapes, oranges and mint are available. Modified processing factors based on these data were used for apple juice, pear juice, grape juice, raisins, citrus juice (orange, grapefruit, lemon and lime) and mint oils (peppermint and spearmint). DEEM™ default processing factors were used for all other processed commodities.

iii. *Cancer.* Fenpyroximate is classified as “not likely to be a human carcinogen.” Therefore, a cancer dietary exposure assessment was not performed.

2. *Dietary exposure from drinking water.* The Agency determined in addition to the parent compound (M-1), the M-3 metabolite should be included in the drinking water assessment for fenpyroximate. Based on the proposed application rates and the environmental fate properties of fenpyroximate, some surface and ground water contamination may occur. However, the risk of water contamination from parent compound is relatively low, based on its high sorption potential. Unlike parent compound, the sorption of the M-3 metabolite is much less, and it may move into water resources more readily. Environmental fate data indicate that parent and its Z-isomer are stable to photolysis in soil and immobile in soil. Major degradates formed in the aqueous layer were M-3 (50%), M-8 (36%), M-16 (4-hydroxymethylbenzoic acid, 58%) and M-11 (25 to 30%), and M-3 (>10%), M-11 (25 to 30%) and M8 (16 to 19%) in the soil. However, data from a field dissipation study showed M3 (32%) being the only significant degradate found in the field. Based on the structural similarity between parent and M-3, the Agency concluded that parent and M-3 be included in the risk assessment.

Based on Tier II screening-level surface water modeling for drinking water, the Agency estimated concentrations in surface water to be used for acute, chronic non-cancer, and cancer exposure assessment. Tier II surface water concentrations for parent fenpyroximate and M-3 were calculated using the Pesticide Root Zone Model/Exposure Analysis Modeling System (PRZM-EXAMS). The acute, and chronic

non-cancer concentrations for GA pecan (highest exposure) are 12.9 and 1.8 microgram/liter, respectively. EPA used the Screening Concentration in Ground Water model (SCI-GROW2) to estimate a groundwater concentration of 0.059 parts per billion (ppb). These results for both surface water and ground water are consistent with the fate and transport properties of fenpyroximate.

Modeled estimates of drinking water concentrations were directly entered into the dietary exposure model (DEEM-FCID). For the acute assessment, the peak concentration of 12.9 ppb was used to access the contribution to drinking water; for the chronic assessment, the annual mean value of 1.8 ppb was used to access the contribution to drinking water.

3. *From non-dietary exposure.* The term “residential exposure” is used in this document to refer to non-occupational, non-dietary exposure (e.g., for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets). Fenpyroximate is not registered for use on any sites that would result in residential exposure.

4. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of the FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider “available information” concerning the cumulative effects of a particular pesticide’s residues and “other substances that have a common mechanism of toxicity.” Unlike other pesticides for which EPA has followed a cumulative risk approach based on a common mechanism of toxicity, EPA has not made a common mechanism of toxicity finding as to fenpyroximate and any other substances and fenpyroximate does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has not assumed that fenpyroximate has a common mechanism of toxicity with other substances. For information regarding EPA’s efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see the policy statements released by EPA’s Office of Pesticide Programs concerning common mechanism determinations and procedures for cumulating effects from substances found to have a common mechanism on EPA’s Web site at <http://www.epa.gov/pesticides/cumulative/>.

D. Safety Factor for Infants and Children

1. *In general.* Section 408 of FFDCA provides that EPA shall apply an additional tenfold margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the data base on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. Margins of safety are incorporated into EPA risk assessments either directly through use of a MOE analysis or through using uncertainty (safety) factors in calculating a dose level that poses no appreciable risk to humans. In applying this provision, EPA either retains the default value of 10X when reliable data do not support the choice of a different factor, or, if reliable data are available, EPA uses a different additional safety factor value based on the use of traditional uncertainty factors and/or special FQPA safety factors, as appropriate.

2. *Prenatal and postnatal sensitivity.* The rat and rabbit developmental-toxicity studies were tested at doses that produced minimal maternal toxicity at best. These doses were supported partly by range finding data. The two generation reproductive-toxicity study indicated that maternal (decreased body weight) and offspring toxicity (decreased lactational weight gain) occurred at the same dose, suggesting no evidence of sensitivity or susceptibility. Reproductive parameters were not affected in this 2-generation reproduction study. There are no neurotoxicity studies other than a negative delayed acute-neurotoxicity study in the hen. There was no indication of neurotoxicity present in any of the existing subchronic or chronic toxicity studies. The toxicology data base is complete for FQPA purposes and that there are no residual uncertainties for prenatal/postnatal toxicity.

3. *Conclusion.* There is a complete toxicity data base for fenpyroximate and exposure data are complete or are estimated based on data that reasonably accounts for potential exposures. EPA determined that the 10X SF to protect infants and children should be changed to 1X for the following reasons:

- i. There are no concerns or residual uncertainties for prenatal or postnatal toxicity.
- ii. The toxicological data base is complete for the assessment of toxicity and susceptibility following prenatal and/or postnatal exposures. No clinical

signs of neurotoxicity or neuropathology were observed in the data base.

iii. There are no residual concerns regarding completeness of the exposure data base.

iv. The dietary food exposure assessment is Tier I, screening level, which is based on tolerance level residues and assumes 100% of all crops will be treated with fenpyroximate. By using these screening-level assessments, actual exposures/risks will not be underestimated.

v. The dietary drinking water assessment utilizes water concentration values generated by models and associated modeling parameters which are designed to provide conservative, health-protective, high-end estimates of water concentrations which will not likely be exceeded.

vi. There are currently no registered or proposed residential uses of fenpyroximate.

E. Aggregate Risks and Determination of Safety

1. *Acute risk.* An unrefined, acute dietary-exposure assessment was conducted for females 13 to 49 years old. Since an effect of concern attributable to a single dose in toxicity studies was not identified for the general U.S. population, an acute dietary-exposure assessment was not performed for this population. Using the exposure assumptions discussed in this unit for acute exposure, the acute dietary exposure from food and water to fenpyroximate will occupy 6.8% of the acute population adjusted dose (aPAD) for females 13 years and older. EPA does not expect the aggregate exposure to exceed 100% of the aPAD.

2. *Chronic risk.* Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that exposure to fenpyroximate from food and water will utilize 9.8% of the chronic adjusted population dose (cPAD) for the U.S. population, 20% of the cPAD for all infants < 1 year old, and 34% of the cPAD for children 1 to 2 years old. There are no residential uses for fenpyroximate that result in chronic residential exposure to fenpyroximate. Therefore, EPA does not expect the aggregate exposure to exceed 100% of the cPAD.

3. *Aggregate cancer risk for U.S. population.* Fenpyroximate has been classified as not likely to be carcinogenic to humans. Therefore, fenpyroximate is expected to pose at most a negligible cancer risk.

4. *Determination of safety.* Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general

population, and to infants and children from aggregate exposure to fenpyroximate residues.

IV. Other Considerations

A. Analytical Enforcement Methodology

An enforcement method has been developed which involves extraction of fenpyroximate from crops with acetone, filtration, partitioning and cleanup, and analysis by gas chromatography using a nitrogen/phosphorous detector. This method allows detection of residues at or above the proposed tolerances. The method has undergone independent laboratory validation.

B. International Residue Limits

Codex maximum residue limits (MRLs) are established for residues of fenpyroximate per se in/on apple, grapes, hops, oranges, and cattle commodities. The Codex MRLs differ from the proposed and established tolerances for all commodities except hops. Harmonization with the other Codex MRLs is not possible because the U.S. tolerance expressions include additional metabolites/isomers. There are currently no established Canadian or Mexican MRLs.

C. Response to Comments

Comments were received from a private citizen in Florham Park, New Jersey. The comments were in response to the notice of filing published in the **Federal Register** of August 10, 2005 (70 FR 46444) (FRL-7729-3). The commenter opposes the establishment of any food tolerances (greater than zero) and exemptions. However, under the existing legal framework provided by section 408 of the FFDCA, EPA is authorized to establish pesticide tolerances or exemptions where persons seeking such tolerances or exemptions have demonstrated that the pesticide meets the safety standard imposed by that statute. The commenter also believes IR-4 and Rutgers University are profiteering, and expressed concerns about the Agency's partnership with IR-4. This comment was earlier addressed in the **Federal Register** of June 30, 2005 (70 FR 37683) (FRL-7718-3).

V. Conclusion

Therefore, the tolerances are established for combined residues of fenpyroximate, (E)-1,1-dimethylethyl 4-[[[(1,3-dimethyl-5-phenoxy-1H-pyrazol-4-yl) methylene] amino]oxy]methyl]benzoate and its Z-isomer, (Z)-1,1-dimethylethyl 4-[[[(1,3-dimethyl-5-phenoxy-1H-pyrazol-4-yl) methylene] amino]oxy]methyl]benzoate, in or on almond, hulls at 3.0 ppm; hop, dried

cones at 10 ppm; nut, tree, group 14 at 0.10 ppm; pistachio at 0.10 ppm; fruit, citrus, group 10 at 0.60 ppm; citrus, dried, pulp at 2.5 ppm; citrus, oil at 10 ppm; peppermint, tops at 7.0 ppm; and spearmint, tops at 7.0 ppm.

VI. Statutory and Executive Order Reviews

This final rule establishes a tolerance under section 408(d) of FFDCA in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993). Because this rule has been exempted from review under Executive Order 12866 due to its lack of significance, this rule is not subject to Executive Order 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* (66 FR 28355, May 22, 2001). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, or impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104-4). Nor does it require any special considerations under Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994); or OMB review or any Agency action under Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104-113, section 12(d) (15 U.S.C. 272 note). Since tolerances and exemptions that are established on the basis of a petition under section 408(d) of FFDCA, such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) do not apply. In addition, the Agency has determined that this action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled

Federalism (64 FR 43255, August 10, 1999). Executive Order 13132 requires EPA to develop an accountable process to ensure “meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.” “Policies that have federalism implications” is defined in the Executive order to include regulations that have “substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.” This final rule directly regulates growers, food processors, food handlers and food retailers, not States. This action does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of section 408(n)(4) of FFDCA. For these same reasons, the Agency has determined that this rule does not have any “tribal implications” as described in Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000). Executive Order 13175, requires EPA to develop an accountable process to ensure “meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications.” “Policies that have tribal implications” is defined in the Executive order to include regulations that have “substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and the Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.” This rule will not have substantial direct effects on tribal governments, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this rule.

VII. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate,

the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: August 11, 2006.

Donald R. Stubbs,

Acting Director, Registration Division, Office of Pesticide Programs.

■ Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Section 180.566 is amended by removing paragraph (a)(1), by redesignating paragraph (a)(2) as paragraph (a)(1), by revising the table in newly redesignated paragraph (a)(1), and by redesignating paragraphs (a)(3) and (a)(4) as paragraphs (a)(2) and (a)(3), respectively, to read as follows:

§ 180.566 Fenpyroximate; tolerances for residues.

(a) * * *

(1) * * *

Commodity	Parts per million
Almond, hulls	3.0
Citrus, dried pulp	2.5
Citrus, oil	10
Cotton, gin byproducts	10
Cotton undelinted seed	0.10
Fruit, citrus, group 10	0.60
Fruit, pome, group 11	0.40
Grape	1.0
Hop, dried cones	10
Nut, tree, group 14	0.10
Peppermint, tops	7.0
Pistachio	0.10
Spearmint, tops	7.0

BILLING CODE 6560-50-S

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA-HQ-OPP-2006-0561; FRL-8084-3]

Phosphorous Acid; Exemption from the Requirement of a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes an exemption from the requirement of a tolerance for residues of phosphorous acid and its ammonium, sodium, and potassium salts in or all food commodities to allow for post-harvest application to stored potatoes at 35,600 parts per million (ppm) or less of phosphorus acid. This exemption is being issued at EPA’s own initiative under the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA), requesting an exemption from the requirement of a tolerance. This regulation eliminates the need to establish a maximum permissible level for residues of phosphorous acid and its ammonium, sodium, and potassium salts.

DATES: This regulation is effective August 23, 2006. Objections and requests for hearings must be received on or before September 7, 2006, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: EPA has established a docket for this action under docket identification (ID) number EPA-HQ-OPP-2006-0561. All documents in the docket are listed in the index for the docket. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available in the electronic docket at <http://www.regulations.gov>, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. The Docket Facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket telephone number is (703) 305-5805.

FOR FURTHER INFORMATION CONTACT: Linda Hollis, Biopesticides and

Pollution Prevention Division (7511P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; telephone number: (703) 308-8733; e-mail address: hollis.linda@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Access Electronic Copies of this Document?

In addition to accessing an electronic copy of this **Federal Register** document through the electronic docket at <http://www.regulations.gov>, you may access this "**Federal Register**" document electronically through the EPA Internet under the "**Federal Register**" listings at <http://www.epa.gov/fedrgstr>. You may also access a frequently updated electronic version of 40 CFR part 180 through the Government Printing Office's pilot e-CFR site at <http://www.gpoaccess.gov/ecfr>.

C. Can I File an Objection or Hearing Request?

Under section 408(g) of FFDCA, as amended by the FQPA, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. The EPA procedural regulations which govern the submission of objections and requests for hearings appear in 40 CFR part 178. You must file your objection or request a hearing on this regulation in accordance with the instructions

provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA-HQ-OPP-2006-0561 in the subject line on the first page of your submission. All requests must be in writing, and must be mailed or delivered to the Hearing Clerk on or before September 7, 2006.

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing that does not contain any CBI for inclusion in the public docket that is described in **ADDRESSES**. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit your copies, identified by docket ID number EPA-HQ-OPP-2006-0561, by one of the following methods.

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.

- **Mail:** Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001.

- **Delivery:** OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. Deliveries are only accepted during the Docket's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket telephone number is (703) 305-5805.

II. Background and Statutory Findings

In the **Federal Register** of June 28, 2006 (71 FR 36731-36736) (FRL-8075-5), EPA issued a notice pursuant to section 408(d)(3) of FFDCA, 21 U.S.C. 346a(d)(3), announcing the Agency initiated proposed rule. The proposed rule proposed to amend 40 CFR part 180 by establishing an exemption from the requirement of a tolerance for residues of phosphorous acid and its ammonium, sodium and potassium salt. There were no comments received in response to the Agency initiated proposed rule.

Section 408(c)(2)(A)(i) of FFDCA allows EPA to establish an exemption from the requirement for a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the exemption is "safe." Section 408(c)(2)(A)(ii) of FFDCA defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all

other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Pursuant to section 408(c)(2)(B), in establishing or maintaining in effect an exemption from the requirement of a tolerance, EPA must take into account the factors set forth in section 408(b)(2)(C), which require EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue...." Additionally, section 408(b)(2)(D) of FFDCA requires that the Agency consider "available information concerning the cumulative effects of a particular pesticide's residues" and "other substances that have a common mechanism of toxicity."

EPA performs a number of analyses to determine the risks from aggregate exposure to pesticide residues. First, EPA determines the toxicity of pesticides. Second, EPA examines exposure to the pesticide through food, drinking water, and through other exposures that occur as a result of pesticide use in residential settings.

III. Toxicological Profile

Consistent with section 408(b)(2)(D) of FFDCA, EPA has reviewed the available scientific data and other relevant information in support of this action and considered its validity, completeness, and reliability and the relationship of this information to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children.

The toxicity profile for phosphorous acid and its ammonium, potassium and sodium salts has already been assessed for its pesticidal use by the Agency and published in support of the tolerance exemption for residues of phosphorous acid in or on all food commodities when used as an agricultural fungicide. See 65 FR 59346 (October 5, 2000). For the purposes of this tolerance exemption amendment, the Agency has relied on the data and/or information previously submitted and has reassessed that data in order to evaluate the request to add post-harvest uses to the tolerance exemption. Additionally, the Agency has reviewed publicly available data and information on phosphoric acid, which is chemically and structurally similar to phosphorous acid. The Agency believes that in combination,

the data and other information relied upon for this tolerance exemption supports its conclusion that there is reasonable certainty of no harm that will result from the post-harvest treatment of potatoes with phosphorous acid when used according to the recommended application rate.

The technical grade of the active ingredient (TGAI) of phosphorous acid has also been fully characterized and assessed by the Agency in the Mineral Acids RED (December 1993) since it is an ingredient which falls within the class of compounds known as the mineral acids. Information on phosphorous acid indicates that it is classified in Toxicity Category III for the oral and dermal routes of exposure, and that it is corrosive to the eyes and skin. The corrosive nature of concentrated or technical grade phosphorous acid is not of a concern because phosphorus acid is applied at very dilute solutions such as 0.25 pounds of phosphorus acid per ton of stored potatoes. Phosphorous acid as applied at such very dilute rates is only slightly irritating to the skin. Further, when applied at such a permissible application rate, the residues of the applied phosphorous acid solution have an acute toxicity that is several hundred times lower than the acute toxicity of phosphorous acid in a 100% pure form.

As mentioned above, the Agency, on its own initiative, re-examined the previously reviewed toxicity data on an end use product that contains 35.6% phosphorus acid by weight and would be applied at 0.25 pounds of active ingredient per ton of stored potatoes. The results demonstrated that there is a margin of exposure of nearly 1,000 for children or the equivalent of a 30 kilogram (kg) child consuming 932 pounds of potatoes at one time. This large margin of exposure provides reasonable certainty of no harm at application rates in excess of that for the reviewed end use product. Specifically, an end use product containing 53.8% phosphorous acid by volume (or 35.6% phosphorus acid by weight) was tested on rats at > 5,000 milligrams/kilogram of bodyweight (mg/kg bodyweight). The total amount of phosphorous acid that would be consumed for each kg of potatoes based on a 30 kg child was calculated. Based on these calculations the acute oral toxicity was estimated to be equivalent to 1,780 mg PA/kg bodyweight for a 30 kg child. This is a conservative scenario which assumes that all of the phosphorous acid that is applied to stored potatoes will remain on the crop such that a 30 kg child would need to consume 424 kg of potatoes (to include peel and flesh) in one sitting. The Agency further assumed

that there are 2.2lbs/kg of potatoes which would mean that a child would need to consume 932 pounds of potatoes that have been treated post-harvest with phosphorous acid in one sitting to achieve the equivalent of a limit dose in laboratory animals. This is a margin of exposure of nearly a thousandfold.

The toxicological profile of a solution containing 53.8% phosphorous acid is briefly summarized below.

1. *Acute oral (rat) 449404-04*. LD₅₀ > 5,000 mg/kg body weight (53.8% phosphorous acid aqueous solution).

The test material is classified as a Toxicity Category IV for acute oral toxicity which demonstrates low toxicity. These results also demonstrate that a dilution of the active ingredient significantly decreases the order of toxicity as compared to the technical grade of the active ingredient (TGAI) and supports the Agency conclusion that use of the proposed end-use product eliminates the potential of the active ingredient to cause acute toxic effects. There were no adverse effects reported at 5,000 mg/kg.

2. *Acute dermal (rat) 449404-05*. LD₅₀ > 5,000 mg/kg body weight (53.8% phosphorous acid aqueous solution).

The test material is classified as a Toxicity Category IV for acute dermal toxicity and demonstrates that a dilution of the active ingredient significantly decreases the order of toxicity as compared to the TGAI and supports the Agency conclusion that use of the proposed end-use product will be slightly irritating to the skin.

3. *Acute inhalation (rat) 449404-06*. LC₅₀ > 2.06 mg/L (53.8% phosphorous acid aqueous solution). The test material is classified as a Toxicity Category IV for acute inhalation toxicity and demonstrates that a dilution of the active ingredient to a level that is comparable to concentration of phosphorous acid in the proposed end use product will not cause acute inhalation effects at greater than 2.06 milligrams/liter (mg/L).

4. *Developmental/reproductive effects, chronic effects and carcinogenicity*. There is adequate information available from literature sources to characterize the toxicity of phosphorous acid. Phosphorous acid can affect human health through inhalation of mist, ingestion, and contact with the skin and eyes. In a concentrated form, it will cause corrosive effects (burns or irreversible damage) to the eyes, skin, throat, digestive tract, upper respiratory tract and nose. Signs of overexposure to this chemical are severe burning of eyes and skin, possible nausea and vomiting,

coughing, burning and tightness of the chest and shortness of breath. Based on corrosivity and the current use patterns for the mineral acids, EPA did not require these studies as part of the Reregistration Eligibility Decision (RED) on the Mineral Acids (EPA 738-R-029; December 1993).

A typical end use product was tested for acute toxicity. As described above, a 53.8% phosphorous acid product did not cause acute toxicity at > 5,000 mg/kg bodyweight. This product would be further diluted when applied to stored potatoes so that something on the order of a quarter of a pound of phosphorous acid would be applied to a ton of stored potatoes. Calculated estimates of the residue from such an application would give a margin of exposure near 1,000 for young children.

The Agency concludes therefore that the primary hazards such as corrosivity and irritation that are associated with concentrated phosphorous acid are significantly reduced when used as a post-harvest treatment on potatoes at dilute application rates such as those in the typical end use product tested and evaluated by the Agency.

IV. Aggregate Exposures

In examining aggregate exposure, section 408 of FFDCA directs EPA to consider available information concerning exposures from the pesticide residue in food and all other non-occupational exposures, including drinking water from ground water or surface water and exposure through pesticide use in gardens, lawns, or buildings (residential and other indoor uses).

A. Dietary Exposure

The primary issue for adding post-harvest applications to a tolerance exemption is whether such application causes any new exposure that would not be safe. In order to evaluate that issue, the Agency relied on the existing toxicology data already reviewed on phosphorous acid to conduct a conservative dietary exposure and risk assessment to evaluate any additional risk that might result from post-harvest application of this chemical. In the absence of acute oral studies and any magnitude of residue data, the Agency based its risk assessment on default assumptions, (i.e. information from the inhalation data base was used to compare to dietary risks, a common approach in the Agency), to ensure that the maximum application rates will not result in unacceptable dietary risks. As a result of this risk assessment, the Agency concludes that the use of phosphorous acid as a post-harvest

treatment to stored potatoes at the recommended application rate will not add any new exposures or risks and is considered safe.

Phosphorous acid rapidly dissociates to form hydrogen and phosphite ions when applied to growing crops in the environment and therefore, it has already been established that no dietary exposure is expected from pre-harvest applications. The degradates of phosphorous acid, hydrogen and phosphite ions are important nutrients for plants and animals. Formation of these degradates however, may be compromised when phosphorous acid is applied as a post-harvest treatment. Since post-harvest treatment of phosphorous acid to potatoes is likely to occur in indoor storage facilities, the oxidation process of phosphorous acid will most likely be slowed down. The fact that the phosphorous acid at the time of post-harvest treatment has not been oxidized to its degradates is clear and it is unknown how much this oxidation process reduces the potential dietary exposure to phosphorous acid under the conditions of post-harvest treatment. However, even with these uncertainties, the Agency believes that when phosphorous acid is used as a post-harvest treatment at the recommended application rate, the remaining residues of PA on stored potatoes will not increase toxicity or add any new dietary exposure or risks and the toxicity of phosphorous acid would still be classified in category IV (which is low toxicity) and will be safe.

1. *Food.* The Agency has determined that post-harvest treatment of phosphorous acid to stored potatoes at the typical application rate evaluated by the Agency may reduce any new anticipated exposure to phosphorous acid. However, even if dietary exposure is not reduced, the Agency believes, based on its reassessment of the data and information, that post-harvest application of phosphorous acid to potatoes is safe.

2. *Drinking water exposure.* No significant drinking water exposure is expected to result from phosphorous acid when applied as a post-harvest treatment to potatoes because phosphorous acid rapidly degrades, is very soluble in water and is applied in storage facilities.

B. Other Non-Occupational Exposure

There are no residential, school or day care uses proposed for this product. Since the proposed use pattern is for agricultural food crops and post-harvest treatment on potatoes, the potential for non-occupational, non-dietary exposures to phosphorous acid by the

general population, including infants and children, is highly unlikely. Further, even if persons were exposed via the non-occupational route, the Agency believes that the low toxicity from a dilute application such as the one evaluated by the Agency is safe and the primary hazards associated with concentrated phosphorous acid (corrosivity and irritation) will be significantly reduced because the end use products are diluted and the residues following application are very low.

V. Cumulative Effects

Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider "available information" concerning the cumulative effects of a particular pesticide's residues and "other substances that have a common mechanism of toxicity." These considerations include the possible cumulative effects of such residues on infants and children.

BPPD has considered the potential for cumulative effects of phosphorous acid and other substances in relation to a common mechanism of toxicity. phosphorous acid may share a common metabolic mechanism with other salts of phosphorous acid (such as calcium); however, due to the low order of toxicity associated with and lack of reported dietary toxicity associated with the use of phosphorous fertilizers on crops, no cumulative effect from the use of phosphorous acid is expected.

VI. Determination of Safety for U.S. Population, Infants and Children

1. *U.S. population.* There is reasonable certainty that no harm will result to the U.S. population, including infants and children, from aggregate exposure to residues of phosphorous acid as a result of preharvest and post-harvest uses, as that toxicity and exposure is expected to be minimal. This includes all anticipated dietary exposures and all other exposures for which there is reliable information. This chemical will be applied as a fungicide to agricultural food crops and as a post-harvest treatment to stored potatoes at 35,600 ppm or less. There is very little potential for dietary exposure to phosphorous acid, exposure in drinking water, and from non-dietary, non-occupational exposures. Once released into the environment, the chemical rapidly dissociates to form hydrogen and phosphite ions, important nutrients for plants and animals. While the formation of these degradates may be compromised when phosphorous acid is

applied as a post-harvest treatment, the recommended application rate will significantly reduce any new dietary exposure or risks and is considered to be safe.

Many phosphite salts are generally recognized as safe (GRAS). Therefore, the health risk to humans is negligible based on the low toxicity of these ions and a low application rate and magnitude of dilution for post-harvest use of the active ingredient, and one can conclude that there is a reasonable certainty that no harm will result from aggregate exposure to phosphorous acid.

2. *Infants and children.* FFDCA section 408(b)(2)(C) provides that EPA shall apply an additional tenfold margin of exposure (MOE) for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the data base on toxicity and exposure, unless EPA determines that a different MOE will be safe for infants and children. Margins of exposure which are often referred to as uncertainty (safety) factors, are incorporated into EPA risk assessments either directly, or through the use of a MOE analysis, or by using uncertainty (safety) factors in calculating a dose level that poses no appreciable risk. In this instance, based on all reliable available information the Agency has reviewed on phosphorous acid, the Agency concludes that the additional MOE is not necessary to protect infants and children and that not adding any additional MOE will be safe for infants and children. Aggregate exposure to phosphorous acid is expected to be minimal. There is very little potential for exposure to phosphorous acid in drinking water and from non-dietary, non-occupational exposures. This chemical will be applied preharvest to agricultural food crops and as a post-harvest treatment on potatoes. Once released into the environment, the chemical rapidly dissociates to form hydrogen and phosphite ions. The hydrogen ions affect pH, but this is moderated by natural means. Many phosphite salts are "GRAS". Therefore, the health risk to humans is negligible based on the low toxicity of dilute applications of phosphorous acid. One can conclude that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to phosphorous acid residues.

VII. Other Considerations

A. Endocrine Disruptors

EPA is required under section 408(p) of FFDCA, as amended by FQPA, to develop a screening program to

determine whether certain substances (including all pesticide active and other ingredients) “may have an effect in humans that is similar to an effect produced by a naturally-occurring estrogen, or other such endocrine effects as the Administrator may designate.” Following the recommendations of its Endocrine Disruptor Screening and Testing Advisory Committee (EDSTAC), EPA determined that there was scientific basis for including, as part of the program, the androgen- and thyroid hormone systems, in addition to the estrogen hormone system. EPA also adopted EDSTAC’s recommendation that the program include evaluations of potential effects in wildlife. For pesticide chemicals, EPA will use FIFRA and, to the extent that effects in wildlife may help determine whether a substance may have an effect in humans, FFDCA authority to require the wildlife evaluations. As the science develops and resources allow, screening of additional hormone systems may be added to the Endocrine Disruptor Screening Program (EDSP).

At this time, the Agency is not requiring information on the endocrine effects of this active ingredient, phosphorous acid. Based on the weight-of-the-evidence of available data and the absence of any reports to the Agency of sensitivity or other adverse effects, no endocrine system related effects are identified for phosphorous acid and none are expected because of its use. To date there is no evidence that phosphorous acid affects the immune system, functions in a manner similar to any known hormone, or that it acts as an endocrine disruptor. Thus, there is no impact via endocrine-related effects on the Agency’s safety finding set forth in this rule amending the phosphorous acid exemption from the requirement of a tolerance.

B. Analytical Method(s)

Through this action, the Agency is amending the existing exemption from the requirement of a tolerance for phosphorous acid to include post-harvest treatment on potatoes for the reasons stated above which include low toxicity to mammals and negligible exposure from the pesticidal use of products containing phosphorous acid. For the same reasons, the Agency concludes that an analytical method is not required for enforcement purposes for phosphorous acid.

C. Codex Maximum Residue Level

No maximum residue levels (MRLs) have been established for phosphorous acid by the Codex Alimentarius Commission (CODEX).

VIII. Conclusions

The Agency concludes that if products containing phosphorous acid as an active ingredient are used in accordance with label directions, there is a reasonable certainty that no harm to the U.S. population, including infants and children, will result from aggregate exposure to residues of phosphorous acid, when used as an agricultural fungicide on all food commodities or when used as a post-harvest treatment on potatoes.

IX. Statutory and Executive Order Reviews

This final rule establishes an exemption from the requirement of a tolerance under section 408(d) of FFDCA in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993). Because this rule has been exempted from review under Executive Order 12866 due to its lack of significance, this rule is not subject to Executive Order 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* (66 FR 28355, May 22, 2001). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, or impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4). Nor does it require any special considerations under Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994); or OMB review or any Agency action under Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note). Since tolerances and exemptions that are established on the basis of a petition under section 408(d) of FFDCA, such as the exemption from the requirement of a tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory

Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) do not apply. The Agency hereby certifies that this rule will not have significant negative economic impact on a substantial number of small entities. In addition, the Agency has determined that this action will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999). Executive Order 13132 requires EPA to develop an accountable process to ensure “meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.” “Policies that have federalism implications” is defined in the Executive order to include regulations that have “substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.” This final rule directly regulates growers, food processors, food handlers and food retailers, not States. This action does not alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of section 408(n)(4) of FFDCA. For these same reasons, the Agency has determined that this rule does not have any “tribal implications” as described in Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000). Executive Order 13175, requires EPA to develop an accountable process to ensure “meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications.” “Policies that have tribal implications” is defined in the Executive order to include regulations that have “substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and the Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.” This rule will not have substantial direct effects on tribal governments, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified in Executive Order 13175.

Thus, Executive Order 13175 does not apply to this rule

X. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: August 14, 2006.

Janet L. Andersen,

Director, Biopesticides and Pollution Division, Office of Pesticide Programs.

■ Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Section 180.1210 is revised to read as follows:

§ 180.1210 Phosphorous acid; exemption from the requirement of a tolerance.

An exemption from the requirement of a tolerance is established for residues of phosphorous acid and its ammonium, sodium, and potassium salts in or on all food commodities when used as an agricultural fungicide and in or on potatoes when applied as a post-harvest treatment at 35,600 ppm or less phosphorous acid.

RIN 3090-AI19

Federal Travel Regulation; E-Gov Travel Service (ETS) and Use of Contract City-Pair Fares

AGENCY: Office of Governmentwide Policy, General Services Administration (GSA).

ACTION: Final rule.

SUMMARY: The General Services Administration (GSA) is amending the Federal Travel Regulation (FTR), by adding new requirements that address the use of other-than contract city pair airfares, the handling of receipts under the E-Gov Travel Service (ETS) environment, and new responsibilities for reviewing officials. This final rule also introduces and defines the term "online self-service booking tool" and provides for exceptions under certain circumstances to the required use of an agency's current Travel Management Service (TMS) or ETS once the agency has fully deployed ETS. Finally, this final rule requires agencies to develop and submit upon request to the ETS Program Management Office, a plan for maximizing the agency's adoption rate (*i.e.*, achieving the highest possible rate of use of the agency's online self-service booking tool) once the agency has fully deployed ETS. The explanation of changes is addressed in the supplementary information below. The FTR and any corresponding documents may be accessed at GSA's Web site at <http://www.gsa.gov/ftr>.

DATES: Effective Date: September 22, 2006.

FOR FURTHER INFORMATION CONTACT: The Regulatory Secretariat (VIR), Room 4035, GS Building, Washington, DC, 20405, (202) 208-7312, for information pertaining to status or publication schedules. For clarification of content, contact Ms. Umeki Gray Thorne, Office of Governmentwide Policy, Travel Management Policy, at (202) 208-7636. Please cite FTR Amendment 2006-04; FTR case 2005-305.

SUPPLEMENTARY INFORMATION:

Background

This final rule amends the Federal Travel Regulation as follows:

- Sections 301-10.106 and 301-10.107 are redesignated as sections 301-10.105 and 301-10.106, respectively.

- Newly redesignated section 301-10.106 language is revised by removing exceptions to the use of a contract city-pair fare and incorporating them into new section 301-10.107. Note to section 301-10.106 indicates that employees of the Government of the District of Columbia, with the exception of the District of Columbia Courts, are not eligible to use contract city-pair fares even though these employees otherwise may be covered by the FTR.

- New section 301-10.107 "Are there any exceptions to the use of a contract city-pair fare," incorporates exceptions to use of a contract city-pair fare (formerly contained in section 301-10.107, redesignated as section 301-10.106) for agency consideration in deciding whether to approve the use of other-than a contract city-pair fare. Note 1 to section 301-10.107 (previously Note 2 to this section) is revised to state that any group of 10 or more passengers traveling together on the same day, on the same flight, for the same mission requiring group integrity and identified as a group by the travel management system upon booking, may request contract city-pair service on an optional basis.

Note 2 to section 301-10.107 is added to clarify that contractors are not eligible to use contract city-pair fares in the performance of their contract.

Note 3 to section 301-10.107 is added to encourage agencies to optimize savings from the contract city pair program by comparing the cost savings achieved by use of capacity-controlled coach class contract city-pair fares (MCA, QCA, VCA, etc.) to the unrestricted coach class contract fare (YCA), when capacity-controlled fares are available and meet mission needs.

- Section 301-10.108 is amended by informing travelers that they are required to document on their travel authorization the approval and use of a non-contract city-pair air fare. This section also adds a note to clarify that air carrier preference is not a valid reason for approving the use of a non-contract airfare.

- Section 301-11.25 is revised to address the handling of receipts when an agency has fully deployed ETS.

- The section heading for section 301-50.3 is revised to include the term "TMS" and references to exceptions are included in the text.

- Sections 301-50.4 is revised to add TMS in its section heading and to incorporate when an exception to the use of an agency's current TMS may be granted.

- Section 50.6 is redesignated as section 50.8.

- New section 301–50.6 is added to define the term, “online self-service booking tool.”

- New section 301–50.7 is added to encourage travelers to use the agency’s online self-service booking tool in the ETS environment. A note is added to this section to describe when the use of an online self-service booking tool may not be feasible to use.

- Section 301–52.3 is amended by replacing the words “migrate(s) to” in the first and second sentences with the words “fully deploy(s)”.

- Section 301–71.201, paragraph (e), is amended to specify that “receipts, statements, justifications, etc.” include scanned electronic images of such documents when they are available under the ETS environment.

- Section 301–73.101 is amended to require use of ETS with certain exceptions, and to require agencies to establish goals, a plan and procedures to maximize use of the online self-service booking tool for all travel arrangements once agencies have fully deployed ETS. This section also requires agencies to make its goals, plan, and procedures available to the ETS Program Management Office upon the request of the ETS Program Management Office.

- The introductory paragraph in section 302–73.102 is revised to add TMS and conditions under which an agency may authorize an exception to use of the agency’s current TMS.

B. Executive Order 12866

This is not a significant regulatory action and, therefore, was not subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

C. Regulatory Flexibility Act

This final rule is not required to be published in the **Federal Register** for notice and comment; therefore, the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, does not apply.

D. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FTR do not impose recordkeeping or information collection requirements, or the collection of information from offerors, contractors, or members of the public that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

E. Small Business Regulatory Enforcement Fairness Act

This final rule is also exempt from congressional review prescribed under 5

U.S.C. 801 since it relates solely to agency management and personnel.

List of Subjects in 41 CFR Parts 301–10, 301–11, 301–50, 301–52, 301–71, and 301–73

Government employees, Travel and transportation expenses.

Dated: March 9, 2006.

David L. Bibb,

Acting Administrator of General Services.

■ For the reasons set forth in the preamble, under 5 U.S.C. 5701–5709, GSA amends 41 CFR parts 301–10, 301–11, 301–50, 301–52, 301–71, and 301–73 as set forth below:

CHAPTER 301—TEMPORARY DUTY (TDY) TRAVEL ALLOWANCES

PART 301–10—TRANSPORTATION EXPENSES

■ 1. The authority citation for 41 CFR part 301–10 continues to read as follows:

Authority: 5 U.S.C. 5707, 40 U.S.C. 121(c); 49 U.S.C. 40118, Office of Management and Budget Circular No. A–126, “Improving the Management and Use of Government Aircraft.” Revised May 22, 1992.

§§ 301–10.106 and 301–10.107 [Redesignated as §§ 301–10.105 and 301–10.106]

■ 2. Redesignate §§ 301–10.106 and 301–10.107 as §§ 301–10.105 and 301–10.106, respectively.

■ 3. Revise newly redesignated § 301–10.106 to read as follows:

§ 301–10.106 When must I use a contract city-pair fare?

If you are a civilian employee of an agency as defined in § 301–1.1 of this chapter, you must always use a contract city-pair fare for scheduled air passenger transportation service unless one of the limited exceptions in § 301–10.107 exist. An Internet listing of contract city-pair fares is available at <http://www.gsa.gov/citypairs>.

Note to § 301–10.106: Employees of the Government of the District of Columbia, with the exception of the District of Columbia Courts, are not eligible to use contract city-pair fares even though these employees otherwise may be covered by the FTR.

■ 4. Add new § 301–10.107 to read as follows:

§ 301–10.107 Are there any exceptions to the use of a contract city-pair fare?

Yes, your agency may authorize use of a fare other than a contract city-pair fare when—

(a) Space on a scheduled contract flight is not available in time to accomplish the purpose of your travel, or use of contract service would require

you to incur unnecessary overnight lodging costs which would increase the total cost of the trip;

(b) The contractor’s flight schedule is inconsistent with explicit policies of your Federal department or agency with regard to scheduling travel during normal working hours;

(c) A non-contract carrier offers a lower fare to the general public that, if used, will result in a lower total trip cost to the Government (the combined costs of transportation, lodging, meals, and related expenses considered);

Note to paragraph (c): This exception does not apply if the contract carrier offers the same or lower fare and has seats available at that fare, or if the fare offered by the non-contract carrier is restricted to Government and military travelers performing official business and may be purchased only with a contractor-issued charge card, centrally billed account (e.g., YDG, MDG, QDG, VDG, and similar fares) or GTR where the two previous options are not available;

(d) Cost effective rail service is available and is consistent with mission requirements; or

(e) Smoking is permitted on the contract air carrier and the nonsmoking section of the contract aircraft is not acceptable to you.

Note 1 to § 301–10.107: Any group of 10 or more passengers traveling together on the same day, on the same flight, for the same mission, requiring group integrity and identified as a group by the travel management system upon booking is not a mandatory user of the Government’s contract city-pair fares. For group travel, agencies are expected to obtain air passenger transportation service that is practical and cost effective to the Government.

Note 2 to § 301–10.107: Contractors are not authorized to use contract city-pair fares to perform travel under their contracts.

Note 3 to § 301–10.107: If the Government contract city-pair carrier offers a lower cost capacity-controlled coach class contract fare (MCA, QCA, VCA, etc.) in addition to the unrestricted coach class contract fares (YCA), the traveler should use the lower cost capacity-controlled fare when it is available and meet mission needs.

■ 5. Revise § 301–10.108 to read as follows:

§ 301–10.108 What requirements must be met to use a non-contract fare?

(a) Before purchasing a non-contract fare you must meet one of the exception requirements listed in § 301–10.107 and show approval on your travel authorization to use a non-contract fare; and

(b) If the non-contract fare is non-refundable, restricted, or has specific eligibility requirements, you must know or reasonably anticipate, based on your

planned trip, that you will use the ticket; and

(c) Your agency must determine that the proposed non-contract transportation is practical and cost effective for the Government.

Note to § 301–10.108: Carrier preference is not a valid reason for using a non-contract fare.

PART 301–11—PER DIEM EXPENSES

■ 6. The authority citation for 41 CFR part 301–11 continues to read as follows:

Authority: 5 U.S.C. 5707.

■ 7. Revise § 301–11.25 to read as follows:

§ 301–11.25 Must I provide receipts to substantiate my claimed travel expenses?

Yes. You must provide a lodging receipt and a receipt for every authorized expense over \$75, or provide a reason acceptable to your agency explaining why you are unable to furnish the necessary receipt(s) (see § 301–52.4 of this chapter).

Note to 301–11.25: Hard copy receipts should be electronically scanned and submitted with your electronic travel claim when your agency has fully deployed ETS and notifies you that electronic scanning is available within your agency (see § 301–50.3 of this chapter). You may submit a hard copy receipt, in accordance with your agency's policies, to support a claimed travel expense only when electronic imaging is not available within your agency.

PART 301–50—ARRANGING FOR TRAVEL SERVICES

■ 8. The authority citation for 41 CFR part 301–50 continues to read as follows:

Authority: 5 U.S.C. 5707; 40 U.S.C. 121 (c).

■ 9. Amend § 301–50.3 by revising the section heading and adding a sentence at the end of the section to read as follows:

§ 301–50.3 Must I use the ETS or TMS to arrange my travel?

* * * Your agency may grant an exception to required use of TMS/ETS under §§ 301–50.4, 301–73.102, or 301–73.104 of this chapter.

■ 10. Revise § 301–50.4 to read as follows:

§ 301–50.4 May I be granted an exception to the required use of TMS or ETS once my agency has fully deployed ETS?

Yes, your agency head or his/her designee may grant an individual case exception to required use of your agency's current TMS or to required use of ETS once your agency has fully

deployed ETS, but only when your travel meets one of the following conditions:

(a) Such use would result in an unreasonable burden on mission accomplishment (E.G., emergency travel is involved and TMS/ETS is not accessible; you are performing invitational travel; or you have special needs or require disability accommodations under part 301–13 of this chapter).

(b) Such use would compromise a national security interest.

(c) Such use might endanger your life (e.g., you are traveling under the Federal witness protection program, or you are a threatened law enforcement/investigative officer traveling under part 301–31 of this chapter).

§ 301–50.6 [Redesignated as § 301–50.8]

■ 11. Redesignate § 301–50.6 as § 301–50.8

■ 12. Add new §§ 301–50.6 and 301–50.7 to read as follows:

§ 301–50.6 What is an "online self-service booking tool?"

An online self-service booking tool is an Internet based system that permits travelers to make their own reservations for transportation (e.g., air, rail, and car rental) and lodging. ETS and some agency TMS's incorporate a self service booking tool.

§ 301–50.7 Should I use the online self-service booking tool once ETS is available within my agency?

Yes, you should use the online self-service booking tool offered by ETS or your agency's TMS until ETS becomes available to you.

Note to section 301–50.7: Some extenuating circumstances for which you may not be able to use online self-service booking are (1) when you are attending a conference where the conference sponsor has negotiated with one or more lodging facilities to set aside a specific number of rooms for conference attendees and to ensure that a set aside room is available to you, you are required to book lodging directly with the lodging facility, (2) when your travel is to a remote location and it is not possible to book lodging accommodations through the TMS or ETS, or (3) when such travel arrangements are so complex and circumstance will not allow you to book your travel through an online self-service booking tool.

PART 301–52—CLAIMING REIMBURSEMENT

■ 13. The authority citation to part 301–52 continues to read as follows:

Authority: 5 U.S.C. 5707; 40 U.S.C. 121(c); Sec. 2., Pub. L. 105–264, 112 Stat. 2350 (5 U.S.C. 5701 note).

§ 301–52.3 [Amended]

■ 14. Amend § 301–52.3 in the first sentence by removing "migrates to" and adding "fully deploys" in its place, and the second sentence, by removing "migrate to" and adding "fully deploy" in its place.

PART 301–71—AGENCY TRAVEL ACCOUNTABILITY REQUIREMENTS

■ 15. The authority citation for part 301–71 is revised to read as follows:

Authority: 5 U.S.C. 5707; 40 U.S.C. 121(c); Sec 2. Pub. L. 105–264, 112 Stat. 2350 (5 U.S.C. 5701 note).

■ 16. Amend section § 301–71.201 by revising paragraph (e) to read as follows:

§ 301–71.201 What are the revising official's responsibilities?

* * * * *

(e) The required receipts, statements, justifications, etc. are attached to the travel claim, or once the agency fully deploys ETS and implements electronic scanning, the electronic travel claim includes scanned electronic images of such documents.

PART 301–73—TRAVEL PROGRAMS

■ 17. The authority citation for part 301–73 continues to read as follows:

Authority: 5 U.S.C. 5707; 40 U.S.C. 121(c).

■ 18. Revise § 301–73.101 to read as follows:

§ 301–73.101 How must we prepare to implement ETS?

You must prepare to implement ETS as expeditiously as possible by—

(a) Developing a migration plan and schedule to deploy ETS across your agency as early as possible with full deployment required no later than September 30, 2006;

(b) Requiring employees to use your ETS unless you approve an exception under § 301–50.6, § 301–73.102 or § 301–73.104;

(c) Establishing goals, plans and procedures to maximize agency-wide traveler use of your online self-service booking tool once you have fully deployed ETS within your agency. These goals, plans, and procedures should be available for submission to the ETS PMO upon its request.

Note 1 to § 301–73.101: Your agency should work with the Office of Management and Budget (OMB) to allocate budget and personnel resources to support ETS migration and data exchange. Your agency is responsible for providing the funds required to establish interfaces between the ETS standard data output and applicable business systems (e.g., financial, human resources, etc.).

Note 2 to § 301–73.101: Best practices show that organizations are able to realize

significant benefits once they achieve a 70 percent or greater self-booking rate.

■ 19. Revise § 301–73.102 to read as follows:

§ 301–73.102 May we grant a traveler an exception from required use of TMS or ETS once we have fully deployed ETS within the agency?

(a) Yes, your agency head or his/her designee may grant an individual case by case exception to required use of your agency's current TMS or to required use of ETS once it is fully deployed within the agency, but only when travel meets one of the following conditions:

(1) Such use would result in an unreasonable burden on mission accomplishment (e.g., emergency travel is involved and TMS/ETS is not accessible; the traveler is performing invitational travel; or the traveler has special needs or requires disability accommodations in accordance with part 301–13 of this chapter).

(2) Such use would compromise a national security interest.

(3) Such use might endanger the traveler's life (e.g., the individual is traveling under the Federal witness protection program, or is a threatened law enforcement/investigative officer traveling under part 301–31 of this chapter).

(b) Any exception granted must be consistent with any contractual terms applicable to your current TMS or ETS, once it is fully deployed, and must not cause a breach of contract terms.

BILLING CODE 6820–14–S

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 15

[ET Docket No. 04–37 and ET Docket No. 03–104; FCC 06–113]

Broadband Over Power Line Systems

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document responds to the petitions for reconsideration of the Commission's rules for Access Broadband over Power Line (Access BPL) devices adopted in the *Report and Order* in this proceeding. The Commission is affirming the technical rules for BPL, and denying petitions for reconsideration that request delay, further study, or the exclusion of particular additional frequencies. The Commission is amending the rules to

change the exclusion zone requirement for the ten listed radio astronomy facilities to a consultation requirement, and to add a new exclusion zone for one Very Large Array (VLA) radio astronomy observatory site at 73.0–74.6 MHz. In addition, it is also amending the rules to add prospective protection for relocated aeronautical facilities and to correct the coordinates and email contact for the aeronautical facilities subject to BPL consultation. The Commission affirms the deadline for requiring certification for any equipment manufactured, imported or installed on BPL systems, with the proviso that uncertified equipment already in inventory can be used for replacing defective units or to supplement equipment on existing systems for one year within areas already in operation. The Commission believes these changes will further the development and growth of BPL devices. It is denying the petitions for reconsideration in all other respects.

DATES: Effective September 22, 2006.

FOR FURTHER INFORMATION CONTACT: Anh Wride, Office of Engineering and Technology, (202) 418–0577, e-mail: Anh.Wride@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Memorandum Opinion and Order*, ET Docket No. 04–37, and ET Docket No. 03–104, adopted August 3, 2006 and released August 7, 2006. The full text of this document is available on the Commission's Internet site at www.fcc.gov. It is also available for inspection and copying during regular business hours in the FCC Reference Center (Room CY–A257), 445 12th Street, SW., Washington, DC 20554. The full text of this document also may be purchased from the Commission's duplication contractor, Best Copy and Printing Inc., Portals II, 445 12th St., SW., Room CY–B402, Washington, DC 20554; telephone (202) 488–5300; fax (202) 488–5563; e-mail FCC@BCPIWEB.COM.

Summary of the Memorandum Opinion and Order

1. In the *Memorandum Opinion and Order*, the Commission further amends part 15 of its rules regarding the unlicensed operation of Access broadband over power line (BPL) systems. Specifically, the rules are amended to change the exclusion zone requirement for the ten listed radio astronomy facilities to a consultation requirement, and to add a new exclusion zone for one Very Large Array (VLA) radio astronomy observatory site at 73.0–74.6 MHz. In addition, the

Commission amends the rules to add prospective protection for relocated aeronautical facilities and to correct the coordinates and email contact for the aeronautical facilities subject to BPL consultation. The Commission affirms the July 7, 2006 deadline for requiring certification for any equipment manufactured, imported or installed on BPL systems, with the proviso that uncertified equipment already in inventory can be used for replacing defective units or to supplement equipment on existing systems for one year within areas already in operation. The Commission believes these changes will further the development and growth of BPL devices. The Commission denies the petitions for reconsideration in all other respects.

A. Notification to the Access BPL Database

2. In the *Report and Order*, 70 FR 1360, January 7, 2005, in this proceeding, the Commission adopted a requirement that the Access BPL industry establish a publicly accessible database for system information. Under this requirement, entities operating Access BPL systems must provide to the BPL industry designated database manager certain information on BPL installations 30 days prior to the initiation of any operation or service. The BPL industry requested elimination of this 30-day advance notification.

3. The Commission denied this request. It stated that the purpose of the database notification requirement is to ensure that licensed users of the spectrum have a publicly accessible and centralized source of information on BPL operations to determine whether there may be Access BPL operations on particular frequencies within their local area so that any incident of harmful interference can be resolved should it occur. The Commission noted that the BPL public database serves a unique function to identify the location and operating characteristics of BPL systems to entities other than those entitled to advance notification. The Commission however provided several clarifications regarding the notification process.

B. Transition Period

4. The rules adopted in the *Report and Order* require that all Access BPL devices that are manufactured, imported, marketed or installed 18 months or later after the **Federal Register** publication of the *Report and Order*, i.e., after July 7, 2006, must comply with the newly adopted requirements of Subpart G of part 15 for BPL devices, including certification of the equipment. The BPL industry

requested an extension for another 18-month period.

5. The Commission denied this request. It noted that an important element of interference avoidance and mitigation is the next generation of BPL equipment and its adherence to the rules adopted in the *Report and Order*. However, because BPL equipment manufacturers are only now submitting equipment for certification under the new rules, the Order permits for a period of 1 year the installation of existing equipment that otherwise meets the part 15 rules to replace defective units or to supplement equipment on existing systems within the areas where BPL systems are already in operation.

C. BPL Technical Parameters

6. *Extrapolation factor.* In the *Report and Order*, the Commission specified measurement guidelines that require BPL systems to be tested *in situ* at three typical installations with overhead lines. Because it may not be possible or practicable to measure at the proposed fixed distances of 10 and 3 meters, distance extrapolation would be necessary for *in situ* testing and the *Report and Order* requires the use of the existing part 15 distance extrapolation factors, i.e., 40 dB/decade for frequencies below 30 MHz and 20 dB/decade for frequencies above 30 MHz. ARRL requested that the rules be changed to use 20 dB/decade at all frequencies for testing BPL systems.

7. The Commission denied ARRL's petition. It stated that ARRL did not submit a convincing argument for modifying this requirement, and therefore it retains the existing extrapolation factors in part 15.

8. *Required Notch Depth.* In the *Report and Order*, the Commission required that Access BPL systems have the capability to remotely reduce power and adjust operating frequencies to avoid site-specific, local use of the same spectrum used by licensed services. Notch filters are required to be capable of attenuating emissions to a level at least 20 dB below the applicable part 15 limits in the case of frequencies below 30 MHz and to a level at least 10 dB below the applicable part 15 limits in the case of frequencies above 30 MHz. ARRL requested technical analysis supporting the 20 dB notch depth in the rules.

9. The Commission reiterated that Access BPL operator is required to ensure that its operations do not cause harmful interference to licensed operators and that, if a 20 dB notch is not sufficient to eliminate such interference in specific cases, the operator must take further actions to

eliminate that interference to fixed licensed operations. The Commission also explained in detail its decision for the selection of the 20 dB standard in response to ARRL's petition for reconsideration.

10. The Commission therefore clarified that, except for mobile operations, Access BPL operators are responsible for resolving harmful interference that may occur even where their systems employ a 20/10 dB notch. Where an Access BPL operator implements such notching, the Commission will not provide any further protection to mobile operations, nor will it require the operator to resolve complaints of harmful interference to mobile operations over and above the "notch."

11. *Protection of the amateur radio service.* On October 18, 2005, the ARRL filed a Petition for Issuance of Further Notice of Proposed Rule Making (FNPRM), in which it requested consideration of the same substantive points it submitted in its previous pleadings in this proceeding, e.g., avoid use of amateur radio frequencies by Access BPL systems, avoid use of the HF frequencies by Access BPL systems on overhead medium voltage lines, and require use of a 20 dB extrapolation factor in place of the existing 40 dB extrapolation factor. Although styled as a Petition for Further Notice of Proposed Rule Making, ARRL's pleading effectively constitutes a petition for reconsideration, as it seeks the same results previously sought by ARRL in this proceeding. The Commission therefore treated the Petition for FNPRM as a petition for reconsideration.

12. The Commission denied ARRL's Petition, and noted that the rules adopted in the *Report and Order*, as modified by this *Memorandum Opinion and Order*, adequately address interference concerns and measurement procedures raised by Access BPL. The Commission noted that one "solution" proposed by ARRL in its Petition for FNPRM—the use of wireless links for connection to the home—is not Access BPL, and thus, while a permissible service, is not pertinent to this proceeding. The other proposed "solution"—complete avoidance of all HF frequencies—would needlessly restrict BPL system design and reduce system capacity, without regard to whether there are amateurs that need protection from a particular BPL installation. The Commission concluded that this would result in a grossly inefficient utilization of Access BPL capacity, reducing the potential benefits of BPL and increasing its cost to the

public, without a corresponding benefit or need.

D. Further Study of Access BPL Characteristics and Other Technical Requests

13. A number of parties requested that all BPL deployments be prohibited pending the adoption of a definition for harmful interference and the completion of all ongoing studies of BPL and the initiation of further studies of BPL interference characteristics. They also requested more stringent technical restrictions on BPL operations.

14. The Commission denied all these requests. It stated that it has taken a proactive approach with regard to protection of licensed radio services in the *Report and Order* by placing additional technical and operational restrictions on BPL systems; and that the rules regarding emission levels and signal notching adopted in the *Report and Order* are adequate to fully protect fixed amateur operations and to protect the reasonable expectations and needs of mobile amateur operations. The Commission also noted that staying the rules as the ARRL requests could leave licensed radio services with less protection than is provided under the rules adopted in the BPL *Report and Order*. It also provided a detailed explanation for the basis of its decision making, and the Commission's statutory responsibilities under the Communications Act.

15. The Commission also disagreed with ARRL's assertion that allegations of interference at some experimental BPL sites demonstrate that the adopted mitigation rules are ineffective. It stated that the BPL rules adopted in the *Report and Order* must be given time to be implemented. It stated that Access BPL equipment currently deployed is typically not designed to fully incorporate the interference mitigation capabilities set forth in the rules that have been put in place. Therefore, until Access BPL operators implement all of the required mitigation techniques, the Commission finds that it is premature to conclude that these rules are ineffective.

E. Other Requests

16. *Federal Government radio astronomy facility.* The part 15 rules require Access BPL systems to avoid operating on the 73.0–74.6 MHz band used by the ten Very Long Baseline Array facilities of radio astronomy observatories within specific distances. The National Telecommunications and Information Administration (NTIA) requests changes in the exclusion zone requirements for certain radio astronomy facilities, including adding a

new exclusion zone for one Very Large Array (VLA) astronomy observatory site. It also requests a modification in the consultation requirements of the BPL rules to continue to protect the sites no longer covered by the exclusion zones. The Commission granted NTIA's request.

17. *Aeronautical service.* In order to protect aeronautical operations, Access BPL systems operating on medium voltage lines are required to avoid operating in the frequency bands reserved for Aeronautical (R) frequencies and in the 74.8–75.2 MHz band. Aeronautical Radio, Inc. (ARINC) representing the Aeronautical Service requested that both In-House and Access BPL systems operating over low-voltage lines be required to avoid using certain aeronautical frequencies. The Commission denied this request. It stated that it has already fully considered and disposed of this concern in the BPL *Report and Order*, and ARINC has provided no new argument or factual data to warrant reconsideration of this issue. It also noted that no interference complaints from aeronautical users traceable to In-House or low voltage BPL have been received or reported. The Commission however granted ARINC's request that the rules be clarified to state that continued protection will be provided for aeronautical facilities that are relocated.

18. *Broadcast television service.* The part 15 rules allow Access BPL systems to operate between 1.7 and 80 MHz, over medium or low voltage lines. Television channels 2 to 5 are located within the bands from 54 MHz to 82 MHz. The Association for Maximum Service Television, Inc. (MSTV) representing the *Broadcast Television service* requested that BPL operations be confined to below 50 MHz to avoid disruptions TV service, and to Digital Television transition in particular. The Commission denied this request. It noted that MSTV has presented no compelling technical argument to justify this request. It pointed out that all known Access BPL equipment currently operates below 50 MHz, and it stated that if BPL equipment that operates on TV band frequencies were developed in the future to increase capacity, a system using such equipment could avoid any potential for interfering with TV service by operating on channels that are not used by TV stations in the system's service area.

19. *Critical infrastructure industry (CII).* The rules require Access BPL operators to notify and consult with the public safety agencies in their local areas at least 30 days in advance of

initiation of service and to respond to complaints of harmful interference from public safety users within 24 hours. The rules do not, however, make any such provision for protection of CII entities. The American Petroleum Institute (API) requested that oil and natural gas companies be considered as Critical Infrastructure Industries, as identified in the *800 MHz Order*, in order to place them on par with public safety entities. The Commission denied API's request. It stated that its *800 MHz Order* is not directly pertinent to the considerations in the BPL proceeding, and in any event, did not give absolute public safety status to Critical Infrastructure Industries.

20. *Miscellaneous requests for additional operational restrictions on BPL.* A number of parties request placing additional operational and administrative restrictions on BPL operations. The Commission denied all of these requests.

Final Regulatory Flexibility Analysis

21. The Regulatory Flexibility Act of 1980, as amended (RFA),¹ requires that a regulatory flexibility analysis be prepared for rulemaking proceedings, unless the agency certifies that "the rule will not have a significant economic impact on a substantial number of small entities."² The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction."³ In addition, the term "small business" has the same meaning as the term "small business concern" under the Small Business Act.⁴ A "small business concern" is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).⁵

22. The *Report and Order* modified the part 15 rules to allow for Access

Broadband over Power Line (Access BPL) systems, a new type of carrier current system that operates on an unlicensed basis under part 15. A Final Regulatory Flexibility Analysis was incorporated in the *Report and Order*.⁶ Following publication of the *Report and Order*, fifteen parties filed for reconsideration regarding various aspects of the part 15 BPL regulations. A list of the petitioners, along with the abbreviations used to identify them and the parties that filed comments in response to the petitions, is attached as Appendix A to the *Memorandum Opinion and Order*. In the *Memorandum Opinion and Order*, the Commission amends the rules to replace the exclusion zone requirement for the ten listed radio astronomy facilities with an exclusion zone for one Very Large Array (VLA) radio astronomy observatory site at 73.0–74.6 MHz, which would significantly reduce potential deployment constraints on Access BPL installations. In addition, we are amending the rules to add prospective protection for relocated aeronautical facilities, which merely continues to provide protection to these stations. Finally, we correct the coordinates and e-mail contacts for the aeronautical facilities subject to BPL consultation.

23. The Commission found that these changes will not result in a "significant economic burden" on manufacturers. Therefore, the Commission certified that the amendments included in this *Memorandum Opinion and Order* will not have a significant economic impact on a substantial number of small entities.

24. The Commission will send a copy of the *Memorandum Opinion and Order*, including a copy of this final certification, in a report to Congress pursuant to the Small Business Regulatory Enforcement Fairness Act of 1996.⁷ In addition, the *Memorandum Opinion and Order* and this certification will be sent to the Chief Counsel for Advocacy of the Small Business Administration.

Ordering Clauses

25. Pursuant to the authority contained in sections 4(i), 301, 302, 303(e), 303(f) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. sections 154(i), 301, 302, 303(e), 303(f) and 303(r), this *Memorandum Opinion and Order* is *adopted* and part 15 of the

¹ The RFA, see 5 U.S.C. 601–612, has been amended by the Contract With America Advancement Act of 1996, Public Law 104–121, 110 Stat. 847 (1996) (CWAAA). Title II of the CWAAA is the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA).

Rules Changes

■ For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR part 15 to read as follows:

PART 15—RADIO FREQUENCY DEVICES

■ 1. The authority citation for part 15 continues to read as follows:

Authority: 47 U.S.C. 154, 302a, 303, 304, 307, 336, and 544a.

■ 2. Section 15.611 is amended by adding paragraph (c)(1)(iii) to read as follows:

§ 15.611 General technical requirements.

* * * * *

(c) * * *

(1) * * *

(iii) At locations where an Access BPL operator attenuates radiated emissions from its operations in accordance with the above required capabilities, we will not require that operator to take further actions to resolve complaints of harmful interference to mobile operations.

* * * * *

■ 3. Section 15.615 is amended by removing paragraph (f)(2)(iii) and by revising the introductory text of paragraphs (f)(2), (f)(3), and paragraph (f)(3)(ii) and by adding the point of contact for National Science Foundation, immediately following paragraph (f)(3)(ii) and by revising the point of contact text for ARINC located before Table 3b and by revising Table 3b to read as follows:

§ 15.615 General administrative requirements.

* * * * *

(f) * * *

(2) *Exclusion zones.* Exclusion zones encompass the operation of any Access BPL system within 1km of the boundary of coast station facilities at the coordinates listed in Tables 2 and 2.1. Exclusion zones also encompass the operation of Access BPL systems using overhead medium voltage power lines within 65 km of the Very Large Array observatory located at the coordinate 34°04'43.50" N, 107°37'03.82" W. Exclusion zones further encompass the operation of Access BPL systems using

overhead low voltage power lines or underground power lines within 47 km of the Very Large Array observatory located at the coordinate 34°04'43.50" N, 107°37'03.82" W. Within the exclusion zones for coast stations, Access BPL systems shall not use carrier frequencies within the band of 2173.5–2190.5 kHz. Within the exclusion zone for the Very Large Array radio astronomy observatory, Access BPL systems shall not use carrier frequencies within the 73.0–74.6 MHz band.

* * * * *

(3) *Consultation areas.* Access BPL operators shall provide notification to the appropriate point of contact specified regarding Access BPL operations at any frequencies of potential concern in the following consultation areas, at least 30 days prior to initiation of any operation or service. The notification shall include, at a minimum, the information in paragraph (a) of this section. We expect parties to consult in good faith to ensure that no harmful interference is caused to licensed operations and that any constraints on BPL deployments are minimized to those necessary to avoid harmful interference. In the unlikely event that a new or relocated aeronautical receive station is established for the 1.7–30 MHz band at a coordinate not specified in Table 3b, Access BPL operators are also required to coordinate with the appropriate point of contact regarding Access BPL operations at any frequencies of potential concern in the new or relocated consultation areas, and to adjust their system operating parameters to protect the new or relocated aeronautical receive station.

* * * * *

(f) * * *

(3) * * *

(ii) For frequencies in the 1.7–80.0 MHz frequency range, the areas within 4 km of facilities located at the coordinates specified for radio astronomy facilities in 47 CFR 2.106, Note U.S. 311.

Point of contact: Electromagnetic Spectrum Manager, National Science Foundation, Division of Astronomical Sciences, 4201 Wilson Blvd., Suite 1045, Arlington, VA 22230, (703) 292–4896, *esm@nsf.gov*.

BILLING CODE 6712-01-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[CG Docket No. 03-123; DA 06-1627]

Telecommunications Relay Services and Speech-to-Speech Services for Individuals With Hearing and Speech Disabilities

AGENCY: Federal Communications Commission.

ACTION: Clarification.

SUMMARY: In this document, the Commission clarifies waivers of certain telecommunications relay services (TRS) mandatory minimum standards for captioned telephone relay service, a form of TRS, which were set forth in a clarification and waiver document. The clarification and waiver document waived the following mandatory minimum standards for the provision of captioned telephone service: communications assistants (CAs) must be competent in interpreting typewritten American Sign Language (ASL); TRS providers must give CAs oral-to-type tests; and CAs may not refuse sequential calls. The Commission clarifies that these requirements do not apply to captioned telephone services that use voice recognition technologies (instead of typing) to convey messages, and that do not have the CA play a role in setting up the calls.

DATES: Effective August 14, 2006.

FOR FURTHER INFORMATION CONTACT: Thomas Chandler, Consumer &

Governmental Affairs Bureau, Disability Rights Office at (202) 418-1475 (voice), (202) 418-0597 (TTY), or e-mail at Thomas.Chandler@fcc.gov.

SUPPLEMENTARY INFORMATION: This document does not contain new or modified information collection requirements subject to the PRA of 1995, Public Law 104-13. In addition, it does not contain any new or modified "information collection burden for small business concerns with fewer than 25 employees," pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. 3506 (c)(4). This is a summary of the Commission's document DA 06-1627, *Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities*, Order, CG Docket No. 03-123, adopted August 14, 2006, released August 14, 2006 clarifying waivers of certain TRS mandatory minimum standards for caption telephone relay service waived in the clarification and waiver document published at 68 FR 55898, September 29, 2003. The full text of document DA 06-1627 and copies of any subsequently filed documents in this matter will be available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portals II, 445 12th Street, SW., Room CY-A257, Washington, DC 20554. Document DA 06-1627 and copies of subsequently filed documents in this matter may also be purchased from the Commission's duplicating contractor at Portals II, 445 12th Street, SW., Room CY-B402, Washington, DC 20554. Customers may contact the Commission's duplicating contractor at its Web site www.bcpweb.com or by calling 1-800-378-3160. To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an e-mail to fcc504@fcc.gov or call the

Consumer & Governmental Affairs Bureau at (202) 418-0530 (voice), (202) 418-0432 (TTY). Document DA 06-1627 can also be downloaded in Word or Portable Document Format (PDF) at: <http://www.fcc.gov/cgb/dro>.

Synopsis

Background

On September 29, 2003, the Commission published a clarification and waiver document that recognized captioned telephone service as a form of TRS compensable from the Interstate TRS Fund. As a general matter, captioned telephone service uses a special telephone that has a text display. It permits the user—typically someone who has the ability to speak and some residual hearing—to speak directly to the other party to the call, and in return to both listen to what is said over the telephone and simultaneously read captions of what the other person is saying. A CA using specially developed voice recognition technology generates the captions. As a result, there is no typing by the captioned telephone user at any time during the call, and the CA types only in rare instances when, e.g., words or proper names are used that the computer does not recognize. Further, as presently offered, to use this service the consumer directly dials the number he or she wishes to call, not the number of a relay provider, and is automatically connected to the captioned telephone CA at the TRS facility. The Commission concluded that some TRS mandatory minimum standards did not apply to the provision of this service and waived other requirements for limited periods of time.

On June 28, 2006, captioned telephone providers filed their annual report addressing the three outstanding waivers applicable to this service—CA competence in interpreting typewritten ASL, use of oral-to-type tests, and handling sequential calls (as applied to

outbound calls). Ultratec, Inc., Sprint-Nextel, Hamilton Relay, Inc., *Third Annual Report on Captioned Telephone Service and Petition to Make Captioned Telephone Waivers Permanent*, CG Docket No. 03–123 (June 28, 2006) (*Captioned Telephone Waiver Petition*). The rule requiring CAs to be competent in interpreting typewritten ASL is intended to ensure that CAs can accurately understand and interpret the message the TRS user has typed when the user uses the syntax, grammar, and language unique to ASL. The oral-to-type test is intended to ensure that a CA can meet the 60 words per minute typing speed required by the rules. The rule requiring the handling of sequential calls is intended to ensure that a CA does not disconnect the TRS user after a call if the user desires to make additional calls. See 47 CFR 64.604(a)(1) and (3) of the Commission's rules. The report noted that these waivers expire August 1, 2006, and included a request that the Commission either make these waivers permanent for captioned telephone service provided with the aid of voice recognition technology, or clarify that the "standards for which these waivers have been granted do not apply to captioned telephone relay services that use voice recognition technologies to convey messages." *Captioned Telephone Waiver Petition* at 2.

Discussion

The Commission clarifies that these three requirements do not apply to captioned telephone services where the user does not type the outbound message, the CA generates text for the user principally using voice recognition technologies (instead of typing), and the communications assistant does not play a role in setting up a call. First, the Commission recognizes that if a captioned telephone user does not type in making a call, there is never the opportunity for the CA to have to interpret typewritten ASL. Similarly, the Commission recognizes that oral-to-type tests are not relevant to captioned telephone service involving voice recognition technologies, and therefore that oral-to-text tests may appropriately be used as a substitute to assess the proficiency of captioned telephone CAs. Finally, the Commission recognizes that if the captioned telephone user initiates a call by directly dialing the called party, so that the CA does not play a role in setting up the call, the sequential call rule has no application. To the extent these mandatory minimum standards do not apply to the provision of captioned telephone service, as clarified herein, providers need not file

annual reports addressing these requirements.

Congressional Review Act

The Commission will not send a copy of the Order pursuant to the Congressional Review Act, see 5 U.S.C. 801(a)(1)(A), because the adopted rules are rules of particular applicability.

Ordering Clauses

Accordingly, *It is ordered* that, pursuant to the authority contained in section 225 of the Communications Act of 1934, as amended, 47 U.S.C. 225, and § 0.141 and 0.361 of the Commission's rules, 47 CFR 0.141 and 0.361, the Order is hereby *adopted*.

Federal Communications Commission.

Monica S. Desai,

Chief, Consumer and Governmental Affairs Bureau.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 06–1583; MB Docket No. 05–45; RM–11147; RM–11246]

Radio Broadcasting Service; Atwood, Kansas; Burlington and Flagler, Colorado; McCook and Ogallala, Nebraska

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Audio Division, at the request of KNAB, Inc., allots Channel 292C0 at Atwood, Kansas, as the community's first local aural transmission service (RM–11246). To accommodate the allotment, we also substitute Channel 294C1 for Channel 293C1 at Ogallala, Nebraska, and the modify Station KMCX–FM's license accordingly. We deny the petition filed by Border Alliance of Broadcasters proposing the allotment of Channel 280C0 at Atwood, Kansas, and the proposed changes required to accommodate the proposal (RM–11147). Channel 292C0 can be allotted to Atwood in compliance with the Commission's minimum distance separation requirement with a site restriction of 14.8 kilometers (9.2 miles) southeast to avoid a short-spacing to the licensed site of Station KQNK–FM, Channel 294A, Norton, Kansas. The reference coordinates for Channel 292C0 at Atwood are 39–43–51 North Latitude and 100–53–58 West Longitude. Additionally, Channel 294C1 can be

substituted at Ogallala at Station KMCX–FM's currently authorized site. The reference coordinates for Channel 294C1 at Ogallala are 41–08–02 North Latitude and 101–41–42 West Longitude.

DATES: Effective September 18, 2006. A filing window for Channel 292C0 at Atwood, Kansas, will not be opened at this time. Instead, the issue of opening this allotment for auction will be addressed by the Commission in a subsequent order. Because the allotment requires the substitution of Channel 294C1 for Channel 293C1 at Ogallala, Nebraska, any requisite conditions for the channel change will be stipulated in said order.

ADDRESSES: Secretary, Federal Communications Commission, 445 Twelfth Street, SW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT:

Sharon P. McDonald, Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Report and Order*, MB Docket No. 05–45, adopted August 2, 2006, and released August 4, 2006. The full text of this Commission decision is available for inspection and copying during regular business hours at the FCC's Reference Information Center, Portals II, 445 12th Street, SW, Room CY–A257, Washington, DC 20554. The complete text of this decision may also be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., 445 12th Street, SW, Room CY–B402, Washington, DC 20554, telephone 1–800–378–3160 or <http://www.BCPIWEB.com>. The Commission will send a copy of this *Report and Order* in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, see 5 U.S.C. 801(a)(1)(A).

List of Subjects in 47 CFR Part 73

Radio, Radio broadcasting.

■ As stated in the preamble, the Federal Communications Commission amends 47 CFR Part 73 as follows:

PART 73—RADIO BROADCAST SERVICES

■ 1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334, 336.

§ 73.202 [Amended]

■ 2. Section 73.202(b), the Table of FM Allotments under Kansas, is amended by adding Atwood, Channel 292C0.

■ 3. Section 73.202(b), the Table of FM Allotments under Nebraska, is amended by removing Channel 293C1 and by adding Channel 294C1 at Ogallala.

BILLING CODE 6712-01-P

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 40

[Docket OST-2006-24112]

RIN 2105-AD57

Procedures for Transportation Workplace Drug and Alcohol Testing Programs: Revision of Substance Abuse Professional Credential Requirement; Technical Amendments

AGENCY: Office of the Secretary, DOT.

ACTION: Final rule.

SUMMARY: The Department of Transportation is adding state-licensed or certified marriage and family therapists to the list of credentialed professionals eligible to serve as substance abuse professionals under subpart O of 49 CFR part 40. The Department is also making a series of technical amendments to its drug and alcohol testing procedural rule. The purpose of the technical amendments is to clarify certain provisions of the rule as well as address omissions and typographical errors which have been called to our attention since the publication of the final rule in December 2000.

DATES: This rule is effective September 22, 2006.

FOR FURTHER INFORMATION CONTACT: Bohdan Baczara, Office of Drug and Alcohol Policy and Compliance, 400 Seventh Street, SW., Washington, DC 20590; 202-366-3784 (voice), 202-366-3897 (fax), or bohdan.baczara@dot.gov (e-mail).

SUPPLEMENTARY INFORMATION:

Background and Purpose

The Omnibus Transportation Employee Testing Act of 1991 required that an opportunity for treatment be made available to employees required by the regulations to undergo workplace drug and alcohol testing (*i.e.*, covered employees). To implement this requirement in its alcohol and drug testing rules issued in February 1994,

the Department of Transportation (DOT) established the role of the “substance abuse professional” (SAP). The Department’s regulation, 49 CFR part 40, requires an employer to provide a covered employee, who engages in conduct prohibited by DOT agency drug and alcohol regulations, a listing of qualified SAPs. In addition, the regulation requires the employee to be evaluated by a SAP and to demonstrate successful compliance with the SAP’s evaluation recommendations for education and/or treatment prior to being considered for returning to any DOT safety-sensitive position.

The Department considers the SAP to be the “Gatekeeper” of safety for the return-to-duty process. The SAP represents the major decision point an employer may have in choosing whether to return an employee to safety-sensitive duties following a DOT regulation violation. The SAP is responsible for several duties important to the evaluation, referral and treatment of employees who have engaged in prohibited drug and alcohol related conduct. The job a SAP accomplishes provides vital help to the employee, the employer and to the traveling public. To be permitted to act as a SAP in the DOT drug and alcohol testing program, a SAP must meet basic knowledge, training and examination and continuing education requirements. In addition, a person must have one of the following credentials:

- (1) Licensed physician;
- (2) Licensed or certified social worker;
- (3) Licensed or certified psychologist;
- (4) Licensed or certified employee assistance professional; or
- (5) Drug and alcohol counselor certified by the National Association of Drug Abuse Counselors Certification Commission (NAADAC); or by the International Certification Reciprocity Consortium/Alcohol and Other Drug Abuse (ICRC); or by the National Board for Certified Counselors, Inc. and Affiliates/Master Addiction Counselor (NBCC).

On August 10, 2005, President Bush signed the Safe, Accountable, Flexible, and Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) [PL 109-59]. That law required, among many things, that the Secretary conduct a rulemaking that would make state-certified or licensed marriage and family therapists (MFTs) eligible to become SAPs. The Department has been in discussions with the American Association of Marriage and Family Therapists (AAMFT) and notes the significant strides MFTs have made in obtaining state licensure or certification recognition, as well as, their significant

education requirements. Based on the SAFETEA-LU Legislation and discussions with the AAMFT, the Department issued a notice of proposed rulemaking (NPRM) on March 10, 2006 [71 FR 12331], asking for comments and suggestions for adding state-licensed and certified MFTs as a credential eligible for becoming a SAP.

Over the years, the Department met several times with the AAMFT but had not considered MFTs to be an acceptable professional credential for SAPs for one reason—MFTs were not licensed or certified to practice in all 50 States. Currently, except Montana and West Virginia, all states provide licensure or certification for MFTs. Because of the SAFETEA-LU legislation, the Department proposed in the NPRM not to wait until MFTs are licensed or certified to practice in all 50 states as we have for other professions (*i.e.*, physicians, social workers, and psychologists). Therefore, MFTs in states that provide them licensure or certification will become eligible. As soon as Montana and West Virginia offer licensure or certification, MFTs in those states will also become eligible to become SAPs.

There were 14 commentors to the NPRM, which included individuals, labor organizations, third-party administrators and associations. This final rule responds to their comments.

In addition, this rule makes technical amendments to clarify a certain provision of the rule and addresses typographical errors and omissions which have been called to our attention since the publication of the Department’s final rule in 2000. There was no NPRM with respect to these amendments.

Discussion of Significant Comments to the Docket

Comment: Five commenters supported the Department’s decision to include being a state-licensed or certified MFT as an acceptable credential to become a SAP, citing the general need for more SAPs. One commenter, however, found it unfair that the licensed or certified MFTs were not required to meet the licensing requirements for all 50 States before being included in the list of acceptable credentials. This commenter suggested that the DOT maintain a consistent standard for all licensing boards and not take shortcuts.

DOT Response: Because of the legislative requirement to conduct this rulemaking, the expectation that MFTs will meet the licensing requirements for all 50 States in the near future, and the value of including another profession

eligible to become SAPs, the Department believes there is no need to delay including state-licensed or certified MFTs to the list of credentials available to become SAPs. With the appropriate knowledge, training and qualifications, these therapists have the potential—as do all credentialed groups—to increase the number of qualified SAPs available to the transportation industry.

Comment: Five commenters were opposed to adding MFTs to the list of eligible credentials to act as SAPs because they believed MFTs did not have the necessary qualifications to diagnose substance-related disorders. Two commenters agreed with the NPRM but only if MFTs met a requirement for education or expertise in substance abuse issues—competencies which the commenters believe MFTs lacked.

DOT Response: Current regulations require those with the appropriate credentials to be SAPs to have knowledge about and clinical experience in the diagnosis and treatment of alcohol and controlled substances-related disorders before they can become qualified to act as SAPs. Degrees and certificates alone do not confer this knowledge. This is why the Department had made it a requirement in its regulation, specifically 40.281(b)(1), that an individual *must* meet this requirement regardless of his or her credential before becoming a SAP. This has been a longstanding requirement of part 40 [FR 61 37222, July 17, 1996], and an essential component of the SAP qualifications that should not be taken lightly.

Discussion of Technical Amendments

Nomenclature Change

To reflect the February 2005 reorganization of the Research and Special Programs Administration (RSPA), the DOT Agency name will be changed from RSPA to Pipeline and Hazardous Materials Safety Administration (PHMSA). The change will be made throughout part 40, including the MIS Data Collection Form and its accompanying instruction sheet.

Section 40.23 What actions do employers take after receiving verified results?

The Department is amending paragraph (c) of this section to correct the typographical error of “.39” printed in the final rule of December 2000 to read “.039.”

Section 40.73 How is the collection process completed?

While completing the CCF, the collector is to complete Step 4 and not

Step 5 as indicated in paragraph (a)(2) of this section. The change will correct this typographical error.

Section 40.83 How do laboratories process incoming specimens?

Paragraphs (b)(2) and (4) of this section, which deal with re-designating the primary and split specimens, should refer the reader to paragraph (h) of this section and not (g). The changes will correct these typographical errors.

Section 40.191 What is a refusal to take a DOT drug test, and what are the consequences?

When a MRO is looking to establish whether there is clinical evidence of unauthorized use of opiates, section 40.139 states that the MRO may require a face-to-face examination of the employee as part of the verification process for opiates. In a pre-employment testing situation, if the employee fails to undergo the examination and there was a contingent offer of employment, the employee is deemed to have refused to test (see 40.191(a)(7)). If no contingent offer of employment was made and the employee refused to undergo the examination, the MRO cannot verify the test as a refusal. Therefore under the current regulation, in a pre-employment situation where a MRO cannot verify the test as a positive or a refusal, the MRO is left with one choice—to call it negative. For a MRO to verify an opiate test result as negative because the MRO was unable to conduct a medical examination is inappropriate. Safety goals are not served nor does the finding factually represent the events. Therefore, in this limited situation, the Department is adding language permitting the MRO to report the test as “cancelled.”

Section 40.267 What problems always cause an alcohol test to be cancelled?

Paragraph (c)(5) of this section should reference 40.233(a)(1) and (c)(3) and not 40.233(a)(1) and (d). There is no paragraph (d) in the section to reference. Correcting the reference will keep the intent of the section consistent with the 1999 NPRM [FR 69076]. The change will correct this typographical error.

Section 40.269 What problems cause an alcohol test to be cancelled unless they are corrected?

Paragraph (b) of this section should reference 40.255(a)(3) and not 40.255(a)(2). The change will correct this typographical error.

Section 40.281 Who is qualified to act as a SAP?

When the Department published its rule in 2000, the word “alcohol” was inadvertently omitted when identifying that the SAP is permitted to act in the Department’s drug and alcohol testing program. The change will correct this omission.

Regulatory Analyses and Notices

The statutory authority for this rule derives from the Omnibus Transportation Employee Testing Act of 1991 (49 U.S.C. 102, 301, 322, 5331, 20140, 31306, and 45101 *et seq.*) and the Department of Transportation Act (49 U.S.C. 322).

This rule is not significant for purposes of Executive Order 12866 or the DOT’s regulatory policies and procedures. It makes minor modifications to our procedures to increase the number of qualified SAPs available to employees and employers, and corrects or clarifies existing regulatory provisions. Except for providing some additional potential sources of income to some MFTs, it should not have an economic impact, let alone a significant one, on anyone. Consequently, under the Regulatory Flexibility Act, the Department certifies that this rule will not have a significant economic impact on a substantial number of small entities.

This rule imposes no information collection requirements for which Paperwork Reduction Act approval is needed. It has no Federalism impact that would warrant a Federalism assessment. With respect to the technical amendments that were not part of the NPRM, the Department has determined that under Section 553 of the Administrative Procedure Act that prior notice and opportunity for public comment would be unnecessary, impracticable or contrary to the public interest. The amendments do not make substantive changes to part 40, and the Department does not anticipate the receipt of meaningful comments on them. The amendments make largely ministerial changes such as a change of address for an agency office, the change of the name of an agency and corrections of citations.

49 CFR subtitle A

Authority and Issuance

Dated: August 14, 2006.
Maria Cino,
Acting Secretary of Transportation.

■ For reasons discussed in the preamble, the Department of Transportation amends part 40 of Title 49, Code of Federal Regulations, as follows:

PART 40—PROCEDURES FOR
TRANSPORTATION WORKPLACE
DRUG AND ALCOHOL TESTING
PROGRAMS

- 1. The authority citation for 49 CFR part 40 is revised to read as follows:
- Authority: 49 U.S.C. 102, 301, 322, 5331, 20140, 31306, and 45101 *et seq.*; 49 U.S.C. 322.
- 2. PART 40—[Nomenclature change]
In part 40, revise all references to “RSPA” to read “PHMSA”.

§ 40.3 [Amended]

- 3. Amend § 40.3 as follows:
- a. In the definition of “Laboratory”, remove the words “5600 Fishers Lane, Rockwall II Building, Suite 815, Rockville, MD 20857”, and add, in their place, the words “1 Choke Cherry Road, Room 2–1035, Rockville MD 20587”.
- b. In the definition of “DOT, The Department, DOT agency”, remove the words “Research and Special Projects Administration (RSPA)” and add, in

their place, the words “Pipeline and Hazardous Material Safety Administration (PHMSA)”.

§ 40.23 [Amended]

- 4. § 40.23 (c) is amended by revising “0.39” to read “0.039”.

§ 40.73 [Amended]

- 5. § 40.73 (a)(2) is amended by revising “Step 5” to read “Step 4”.

§ 40.83 [Amended]

- 6. § 40.83 (c)(2) and (4) are amended by revising “(g)” to read “(h)”.
- 7. § 40.191 is amended by revising paragraph (a)(7) to read as follows:

§ 40.191 What is a refusal to take a DOT
drug test, and what are the consequences?

- (a) * * *
- (7) Fail to undergo a medical examination or evaluation, as directed by the MRO as part of the verification process, or as directed by the DER under § 40.193(d). In the case of a pre-employment drug test, the employee is deemed to have refused to test on this basis only if the pre-employment test is conducted following a contingent offer of employment. If there was no contingent offer of employment, the MRO will cancel the test; or
- * * * * *

§ 40.267 [Amended]

- 8. § 40.267 (c)(5) is amended by revising the words “(see § 40.233(a)(1)

and (d))” to read “(see § 40.233(a)(1) and (c)(3))”.

§ 40.269 [Amended]

- 9. § 40.269 (b) is amended by revising the words “(see § 40.255(a)(2))” to read “(see § 40.255(a)(3))”.
- 10. § 40.281 is amended by re-designating paragraph (a) (5) as (a) (6), by removing the word “or” at the end of (a) (4) and by adding a new (a) (5) to read as follows:

§ 40.281 Who is qualified to act as a SAP?

- * * * * *
- (a) * * *
- (5) You are a state-licensed or certified marriage and family therapist; or
- * * * * *

- 11. § 40.283 (a) is revised to read as follows:

§ 40.283 How does a certification
organization obtain recognition for its
members as SAPs?

- (a) If you represent a certification organization that wants DOT to authorize its certified drug and alcohol counselors to be added to § 40.281(a)(6), you may submit a written petition to DOT requesting a review of your petition for inclusion.
- * * * * *

Proposed Rules

Federal Register

Vol. 71, No. 163

Wednesday, August 23, 2006

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2006-25670; Directorate Identifier 2006-NM-027-AD]

RIN 2120-AA64

Airworthiness Directives; Airbus Model A300 B2 and B4 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain Airbus Model A300 B2 and B4 series airplanes. This proposed AD would require revising the airplane flight manual (AFM) to include procedures for resetting the trim and pitch trim levers after each landing, determining which servomotor moves the pitch trim control wheel, and doing applicable other specified actions. This proposed AD also provides for optional terminating actions for those requirements. This proposed AD results from a report of a sudden nose-up movement after disengagement of the autopilot in cruise. We are proposing this AD to ensure that the flightcrew is aware of the procedures for resetting the trim and pitch trim levers after each landing and to prevent failure of the servomotors of the pitch trim systems during flight. Failure of the servomotors of the pitch trim systems could result in uncommanded nose-up movement of the control surface of the pitch trim systems after disengagement of the autopilot in cruise.

DATES: We must receive comments on this proposed AD by September 22, 2006.

ADDRESSES: Use one of the following addresses to submit comments on this proposed AD.

- **DOT Docket Web site:** Go to <http://dms.dot.gov> and follow the instructions

for sending your comments electronically.

- **Government-wide rulemaking Web site:** Go to <http://www.regulations.gov> and follow the instructions for sending your comments electronically.

- **Mail:** Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street, SW., Nassif Building, room PL-401, Washington, DC 20590.

- **Fax:** (202) 493-2251.

- **Hand Delivery:** Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Contact Airbus, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France, for service information identified in this proposed AD.

FOR FURTHER INFORMATION CONTACT:

Thomas Stafford, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (425) 227-1622; fax (425) 227-1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to submit any relevant written data, views, or arguments regarding this proposed AD. Send your comments to an address listed in the **ADDRESSES** section. Include the docket number "FAA-2006-25670; Directorate Identifier 2006-NM-027-AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of the proposed AD. We will consider all comments received by the closing date and may amend the proposed AD in light of those comments.

We will post all comments we receive, without change, to <http://dms.dot.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact with FAA personnel concerning this proposed AD. Using the search function of that Web site, anyone can find and read the comments in any of our dockets, including the name of the individual who sent the comment (or signed the comment on behalf of an association, business, labor union, etc.). You may review the DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR

19477-78), or you may visit <http://dms.dot.gov>.

Examining the Docket

You may examine the AD docket on the Internet at <http://dms.dot.gov>, or in person at the Docket Management Facility office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Management Facility office (telephone (800) 647-5227) is located on the plaza level of the Nassif Building at the DOT street address stated in the **ADDRESSES** section. Comments will be available in the AD docket shortly after the Docket Management System receives them.

Discussion

The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, notified us that an unsafe condition may exist on certain Airbus Model A300 B2 and B4 series airplanes. The DGAC advises that a sudden nose-up movement after disengagement of the autopilot in cruise occurred on a Model A300 airplane. At the time of the incident, the first pitch trim system (pitch trim 1) was inoperative before the flight and the second pitch trim system (pitch trim 2) had tripped. During the resulting investigation, the manufacturer identified a failure mode of the servomotors of the pitch trim systems as the cause of the incident. This condition, if not corrected, could result in uncommanded nose-up movement of the control surface of the pitch trim systems after disengagement of the autopilot in cruise.

Relevant Service Information

Airbus has issued Temporary Revision (TR) 4.03.00/04, Issue 02, dated November 18, 2003, to the A300 Airplane Flight Manual (AFM). The TR describes a procedure for the flightcrew to follow after each landing of the airplane. The procedure involves resetting the trim and pitch trim. This procedure is to be inserted into the Normal Procedures section of the AFM.

Airbus also has issued TR No. 22-001, dated April 11, 2003, of Chapter 22-23-00 of Airbus A300 Fault Isolation Manual. The TR describes procedures for determining which servomotor moves the pitch trim control wheel and doing applicable other specified actions. The applicable other specified actions involve replacing one or both

servomotors of the pitch trim systems with new servomotors or dispatching the airplane with both servomotors deactivated in accordance with the Master Minimum Equipment List (MMEL).

In addition, Airbus issued Service Bulletin A300–22–0119, dated May 13, 2005. The service bulletin describes optional procedures for replacing the pitch trim servomotors in the attachment area of the horizontal and vertical stabilizers with new servomotors. The service bulletin refers to Thales Service Bulletin V1AM–22–005, Revision 01, dated July 27, 2005, as an additional source of service information for doing the replacement.

Further, Airbus issued Service Bulletin A300–22–0120, dated May 13, 2005. The service bulletin describes procedures for repetitive preventative maintenance tasks of any pitch trim servomotor replaced in accordance with Service Bulletin A300–22–0119. The service bulletin refers to Thales Service Bulletin V1AM–22–006, Revision 01, dated July 26, 2005, as an additional source of service information for doing the preventative maintenance task.

Accomplishing the actions specified in the service information is intended to

adequately address the unsafe condition. The DGAC mandated Airbus TR 4.03.00/04, Airbus TR No. 22–001, and Airbus Service Bulletin A300–22–0120 for any pitch trim servomotor replaced in accordance with Airbus Service Bulletin A300–22–0119. In addition, the DGAC mandated incorporation of Airbus TR No. 1.22/01Z, Revision 2, into the MMEL. The DGAC also issued French airworthiness directives F–2003–291 R1, dated July 6, 2005, and F–2005–109, dated July 6, 2005, to ensure the continued airworthiness of these airplanes in France.

FAA’s Determination and Requirements of the Proposed AD

These airplane models are manufactured in France and are type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. We have examined the DGAC’s findings, evaluated all pertinent information, and determined that we

need to issue an AD for airplanes of this type design that are certificated for operation in the United States.

Therefore, we are proposing this AD, which would require accomplishing the actions specified in Airbus TR 4.03.00/04, Airbus TR No. 22–001, and Airbus Service Bulletin A300–22–0120 for any pitch trim servomotor replaced in accordance with Airbus Service Bulletin A300–22–0119, as described previously.

Clarification Between the Proposed AD and French Airworthiness Directive F–2003–291 R1

Although the French airworthiness directive F–2003–291 R1 mandates incorporation of Airbus TR No. 1.22/01Z, Revision 2, into the MMEL, this proposed AD does not include that requirement. The procedures specified in Airbus TR No. 1.22/01Z have already been incorporated into the MMEL for the U.S. fleet.

Costs of Compliance

The following table provides the estimated costs for U.S. operators to comply with this proposed AD. The average labor rate per hour is \$80.

ESTIMATED COSTS

Action	Work hours	Parts	Cost per airplane	Number of U.S.-registered airplanes	Fleet cost
AFM revision	1	None	\$80	23	\$1,840.
Determination if pitch trim control wheel moves.	1	None	\$80	23	\$1,840.
Optional replacement	3	\$264	\$504	23	\$11,592.
Optional repetitive preventative maintenance tasks.	3	None	\$240, per task cycle	23	\$5,520, per task cycle.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, “General requirements.” Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on

products identified in this rulemaking action.

Regulatory Findings

We have determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

1. Is not a “significant regulatory action” under Executive Order 12866;
2. Is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and
3. Will not have a significant economic impact, positive or negative,

on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket. See the **ADDRESSES** section for a location to examine the regulatory evaluation.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The Federal Aviation Administration (FAA) amends § 39.13 by adding the following new airworthiness directive (AD):

Airbus: Docket No. FAA–2006–25670; Directorate Identifier 2006–NM–027–AD.

Comments Due Date

(a) The FAA must receive comments on this AD action by September 22, 2006.

Affected ADs

(b) None.

Applicability

(c) This AD applies to all Airbus Model A300 airplanes; certificated in any category; except the following airplanes:

(1) Model A300 B4–220, A300 B4–203, and A300 B2–203 airplanes in a forward facing crew cockpit certified configuration;

(2) Model A300 B4–601, B4–603, B4–620, and B4–622 airplanes;

(3) Model A300 B4–605R and B4–622R airplanes;

(4) Model A300 F4–605R and F4–622R airplanes; and

(5) Airbus Model A300 C4–605R Variant F airplanes.

Unsafe Condition

(d) This AD results from a report of a sudden nose-up movement after disengagement of the autopilot in cruise. We are issuing this AD to ensure that the flightcrew is aware of the procedures for resetting the trim and pitch trim levers after each landing and to prevent failure of the servomotors of the pitch trim systems during flight. Failure of the servomotors of the pitch trim systems could result in uncommanded nose up movement of the control surface of the pitch trim systems after disengagement of the autopilot in cruise.

Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Revision of Airplane Flight Manual (AFM)

(f) Within 14 days after the effective date of this AD, revise the Normal Procedures section of the Airbus A300 AFM to include the information in Airbus A300 Temporary Revision (TR) 4.03.00/04, Issue 02, dated November 18, 2003, as specified in the TR.

Note 1: This may be done by inserting a copy of TR 4.03.00/04, Issue 02, in the AFM. When the TR has been included in the general revisions of the AFM, the general revisions may be inserted in the AFM, provided the relevant information in the general revision is identical to that in the TR.

Determination if Pitch Trim Control Wheel Moves

(g) Following accomplishment of the AFM revision required by paragraph (f) of this AD: After each landing and before shutting down the engines, do the AFM procedures specified in Airbus A300 TR 4.03.00/04, Issue 02, dated November 18, 2003.

Determination if Servomotor Moves

(h) Before further flight after any movement reported in accordance with paragraph (g) of this AD, determine which servomotor moves the pitch trim control wheel, and do applicable other specified actions in accordance with Airbus TR No. 22–001, dated April 11, 2003, of Chapter 22–23–00 of Airbus A300 Fault Isolation Manual.

Note 2: Airbus TR No. 22–001 contains a typographical error. The TR incorrectly refers to “MM 22–23–39” as the appropriate source of service information for replacing the pitch trim actuator; the correct reference is “MM 22–23–29.”

Optional Replacement of the Pitch Trim Servomotors

(i) Replace the pitch trim servomotors in the attachment area of the horizontal and vertical stabilizers with new servomotors, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300–22–0119, dated May 13, 2005.

Note 3: Airbus Service Bulletin A300–22–0119, dated May 13, 2005, refers to Thales Service Bulletin V1AM–22–005, Revision 01, dated July 27, 2005, as an additional source of service information for doing the replacement.

Repetitive Preventative Maintenance Tasks

(j) Within 12,000 flight hours after replacing one or both servomotors in accordance with paragraph (h) or (i) of this AD, or within 6 months after the effective date of this AD, whichever occurs later, do the preventative maintenance task of the pitch trim servomotor(s), in accordance with the Accomplishment Instructions of Airbus Service Bulletin A300–22–0120, dated May 13, 2005. Repeat the preventative maintenance task thereafter at intervals not to exceed 12,000 flight hours.

Note 4: Airbus Service Bulletin A300–22–0120, dated May 13, 2005, refers to Thales Service Bulletin V1AM–22–006, Revision 01, dated July 26, 2005, as an additional source of service information for doing the preventative maintenance task.

Removal of AFM Revision

(k) After accomplishing the actions specified in paragraph (i) and the initial task in paragraph (j) of this AD, the AFM revision required by paragraph (f) of this AD may be removed, and the requirements of paragraphs (g) and (h) of this AD are no longer required.

No Reporting

(l) Although Airbus Service Bulletin A300–22–0120 specifies to submit certain information to the manufacturer, this AD does not include that a requirement.

Alternative Methods of Compliance (AMOCs)

(m)(1) The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested in accordance with the procedures found in 14 CFR 39.19.

(2) Before using any AMOC approved in accordance with § 39.19 on any airplane to which the AMOC applies, notify the appropriate principal inspector in the FAA Flight Standards Certificate Holding District Office.

Related Information

(n) French airworthiness directives F–2003–291 R1, issued July 6, 2005, and F–2005–109, issued July 6, 2005, also addresses the subject of this AD.

Issued in Renton, Washington, on August 15, 2006.

Kalene C. Yanamura,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 4

RIN 3038–AC35

Advertising by Commodity Pool Operators, Commodity Trading Advisors, and the Principals Thereof

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rules.

SUMMARY: The Commodity Futures Trading Commission (Commission or CFTC) is proposing to amend Regulation 4.41, which governs advertising by commodity pool operators (CPOs), commodity trading advisors (CTAs) and the principals thereof, (1) To restrict the use of testimonials, (2) to clarify the required placement of the prescribed simulated or hypothetical performance disclaimer, and (3) to include within the regulation's coverage advertisement through electronic media (Proposal). This action is in furtherance of the Commission's longstanding position that CPOs, CTAs, and their principals may not advertise in a false, deceptive or misleading manner.

DATES: Comments must be received on or before September 22, 2006.

ADDRESSES: Comments on the Proposal should be sent to Eileen Donovan, Acting Secretary, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, NW., Washington, DC 20581. Comments may be sent by facsimile transmission to (202) 418–5528, or by e-mail to

secretary@cftc.gov. Reference should be made to "Advertising by Commodity Pool Operators, Commodity Trading Advisors, and the Principals Thereof." Comments may also be submitted by connecting to the Federal eRulemaking Portal at <http://www.regulations.gov> and following the comment submission instructions.

FOR FURTHER INFORMATION CONTACT:

Barbara S. Gold, Associate Director, or Peter B. Sanchez, Staff Attorney, Division of Clearing and Intermediary Oversight, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, NW., Washington, DC 20581, telephone number: (202) 418-5450 or (202) 418-5237, respectively; facsimile number: (202) 418-5528; and electronic mail: bgold@cftc.gov or psanchez@cftc.gov, respectively.

SUPPLEMENTARY INFORMATION:

I. Background

Part 4 of the Commission's regulations governs the operations and activities of CPOs and CTAs.¹ In particular, Regulation 4.41 pertains to advertising by CPOs, CTAs, and the principals² thereof, an issue first addressed by the Commission over 25 years ago. The Commission originally proposed that CPOs, CTAs, and their principals could not advertise their actual past performance results in a format other than that which the CPO or CTA was required to use in its Disclosure Document,³ and that the presentation of simulated or hypothetical performance of a CPO, CTA, or the principals thereof would be prohibited.⁴ In response to the comments received and its further deliberations on these proposals, the Commission adopted less restrictive advertising regulations.⁵

With respect to the presentation of actual past performance, the Commission explained that it had adopted in Regulation 4.41(a) "a rule that leaves to the discretion of the [CPO, CTA, or principal] advertising performance results—whether actual, simulated or hypothetical—the format

of that presentation, so long as that format is not false, misleading or deceptive."⁶ As for the presentation of simulated or hypothetical performance results, the Commission explained that it had adopted in Regulation 4.41(b) "a rule that allows the presentation of those results, provided that the presentation is accompanied by the statement prescribed in the rule (emphasis supplied)," whose purpose was "to alert prospective customers to the limitations inherent in simulated and hypothetical past performance results."⁷ The Commission also noted the scope of new Regulation 4.41—that it applied to both oral and written communications and regardless of whether a CPO or a CTA was exempt from registration under the Act.⁸

Based on its experience with the operation of Regulation 4.41 over the course of the past 25 years, the Commission today is proposing certain amendments as described below.

II. The Proposal

A. Presentation of Actual Past Performance: Proposed Addition of Regulation 4.41(a)(3)

The Commission is proposing to add a new paragraph (a)(3) to Regulation 4.41, which would address the use of testimonials by a CPO, CTA, or a principal thereof. Proposed Regulation 4.41(a)(3) would require advertisements that refer to a testimonial to prominently disclose that the testimonial may not be representative of the experience of other clients; that the testimonial is no guarantee of future performance or success; and, if more than a nominal sum is paid, the fact that

it is a paid testimonial.⁹ The

⁹ The Commission has modeled this proposal upon NASD Rule 2210(d)(2), which sets similar limits on the use of testimonials in advertisements and other marketing materials applicable to NASD members, as follows:

(2) Standards Applicable to Advertisements and Sales Literature

(A) Advertisements or sales literature providing any testimonial concerning the investment advice or investment performance of a member or its products must prominently disclose the following:

(i) The fact that the testimonial may not be representative of the experience of other clients.

(ii) The fact that the testimonial is no guarantee of future performance or success.

(iii) If more than a nominal sum is paid, the fact that it is a paid testimonial.

The potential of testimonials to mislead customers has been recognized by other Federal regulatory agencies. The Securities and Exchange Commission (SEC) has promulgated a rule that declares any use of testimonials in advertising by investment advisers to be "a fraudulent, deceptive or manipulative act, practice or course of business within the meaning of the [Investment Advisers] Act [of 1940] (15 U.S.C. 80b-6(4))." 17 CFR 275.206(4)-1(a)(1). In its release promulgating the rule, the SEC found that "such advertisements are misleading; by their very nature they emphasize the comments and activities favorable to the investment adviser and ignore those which are unfavorable." 26 FR 10548, 10549 (November 9, 1961).

Testimonials also are subject to the Federal Trade Commission's (FTC) *Guides Concerning Use of Endorsements and Testimonials in Advertising*, which are not limited to a specific industry. 16 CFR 255, <http://www.ftc.gov/bcp/guides/endorse.htm>. The FTC Guides provide, for example, that:

An advertisement employing an endorsement reflecting the experience of an individual or a group of consumers on a central or key attribute of the product or service will be interpreted as representing that the endorser's experience is representative of what consumers will generally achieve with the advertised product in actual, albeit variable, conditions of use. Therefore, unless the advertiser possesses and relies upon adequate substantiation for this representation, the advertisement should either clearly and conspicuously disclose what the generally expected performance would be in the depicted circumstances or clearly and conspicuously disclose the limited applicability of the endorser's experience to what consumers may generally expect to achieve. See 16 CFR 255.2(a).

The FTC Guides are an administrative interpretation of section 5 of the Federal Trade Commission Act, 15 U.S.C. 45(a), which prohibits "unfair or deceptive acts or practices in or affecting commerce." See *Porter & Dietsch, Inc. v. Federal Trade Comm'n*, 605 F.2d 294, 303 (7th Cir. 1979) (sustaining FTC's finding that advertisements were deceptive where the typical experiences of consumers did not parallel the experiences reported in testimonials); *Federal Trade Comm'n v. Ken Roberts Company*, 276 F.3d 583 (DC Cir. 2001) (FTC's authority to investigate deceptive advertising extended to, among other things, testimonials used by seller of courses in commodities and securities investing and was not clearly preempted by overlapping authority of CFTC or SEC). Standards for establishing unlawful deception under the Federal Trade Commission Act are broadly similar to those for establishing unlawful deception by commodity trading advisors and commodity pool operators under the Commodity Exchange Act. Compare *Federal Trade Comm'n v. Tashman*, 318 F.3d 1273, 1275-77 (11th Cir. 2003) (unsupported earnings claims by business opportunity firm were material misleading representations that violated Federal Trade Commission Act) with *CFTC v. Heffernan*, 245 F.

¹ 17 CFR Part 4 (2006). The Commodity Exchange Act (Act) and the Commission's regulations issued thereunder may be accessed through the Commission's Web site, at <http://www.cftc.gov/cftc.cftclawreg.htm>.

² The definition of the term "principal" is set forth in Regulation 4.10(e)(1), which cross-references the definition of the term in Regulation 3.1(a). An example of a principal of a CPO organized as a corporation would be the corporation's chief executive officer.

³ Regulations 4.21-4.26 and 4.31-4.26 respectively concern the Disclosure Document that registered CPOs and CTAs must prepare, deliver, and file.

⁴ 45 FR 51600 (Aug. 4, 1980).

⁵ 46 FR 26004 (May 8, 1981).

⁶ While acknowledging that it was not possible to identify every advertisement that was prohibited by new Regulation 4.41, the Commission nonetheless gave notice in the **Federal Register** release announcing the adoption of the rule that it would consider the following, non-exclusive list of advertisements, to be prohibited:

(1) References only to successful trades, if during the same time period, trades which were unsuccessful were also recommended or executed; (2) references to the results during a specific time period, if the results claimed were not fairly representative of results achieved for comparable periods; (3) suggestions, assurances or claims of profit potential that do not also fairly present the possibility of loss; (4) statements of opinions or predictions which are not clearly labeled as such or which have no reasonable basis in fact; and (5) failure to disclose whether, and to what extent, fees, commissions and other expenses are reflected in the past performance results. *Id.* at 26012.

⁷ *Id.*

⁸ Section 4m(1) of the Act, 7 U.S.C. 6m(1) (2000), generally requires the registration of CPOs and CTAs. Regulation 4.13 provides an exemption from CPO registration for certain persons, and Sections 4m(1) and 4m(3) and Regulation 4.14 provide an exemption from CTA registration for certain other persons.

Commission believes that advertisements that do not contain this information may provide potential CPO and CTA customers with a misleading assessment about the quality of services being offered or the motivation of the person providing the testimonial—and, thus, violate the Commission's intent that these advertisements not be "false, misleading or deceptive."

B. Simulated or Hypothetical Performance Presentation: Proposed Amendments to Regulation 4.41(b)

Regulation 4.41(b)(1) requires that simulated or hypothetical performance results "be accompanied by" a prescribed statement,¹⁰ and Regulation 4.41(b)(2) requires that this statement be "prominently disclosed" if that performance is presented other than orally. Nonetheless, the Commission has encountered numerous instances where persons were not adequately identifying their trading results as simulated or hypothetical,¹¹ or were not appropriately locating the disclaimer,¹² and thus were not providing those results as the Commission had contemplated—*i.e.*, in a manner intended "to alert prospective customers to the limitations inherent in simulated and hypothetical past performance results." The Commission therefore is proposing to amend Regulation 4.41(b)(1) to clarify the meaning of the term "accompanied by," especially in light of the popularity of electronic means of communication that were not in existence 25 years ago when

the Commission adopted Regulation 4.41.

Specifically, the Commission is proposing to amend Regulation 4.41(b)(1)(i) by including in the prescribed disclaimer references to "these results" when discussing the simulated or hypothetical performance results being presented.¹³ Additionally, the Commission is proposing to amend Regulation 4.41(b)(2) by adding to the existing requirement that the prescribed disclaimer must be prominently disclosed, the requirement that the prescribed disclaimer also must be "in immediate proximity to the simulated or hypothetical performance being presented."¹⁴

C. The Scope of Regulation 4.41: Proposed Amendment to Regulation 4.41(c)(1)

As originally adopted by Congress in 1974, the term "commodity trading advisor" included any person who provided commodity interest trading advice "either directly or through publications or writings."¹⁵ With the subsequent advent of electronic media and the increasing use of such media by CTAs, in 1982 Congress amended the CTA definition to include any person providing commodity interest trading advice "either directly or through publications, writings or *electronic media*" (emphasis supplied).¹⁶ In turn, the Commission amended the definition of the term "commodity trading advisor" in Regulation 1.3(bb) to conform to the statutory amendment.¹⁷ CPOs, like CTAs, typically solicit customers based on their performance results. The Commission accordingly is proposing to amend Regulation 4.41(c)(1) in order to clarify that advertisements by "electronic media, or

otherwise, including information provided via internet or e-mail" are within the scope of Regulation 4.41.

In this regard, the Commission emphasizes that it interprets Regulation 4.41 in its current form as applying to the presentation of past performance results by CPOs, CTAs, and their principals made through electronic media. The Proposal is intended to make this interpretation explicit.

The Commission believes that the Proposal is fully consistent with the First Amendment. False, deceptive or misleading commercial speech—even of, for example, those CTAs that provide advice on a non-personalized basis—is not protected by the First Amendment.¹⁸ Moreover, even where commercial speech is only potentially misleading, the government can use disclosure requirements to make sure that the public is not, in fact, misled.¹⁹

III. Related Matters

A. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA)²⁰ requires that agencies, in proposing rules, consider the impact of those rules on small businesses. The Commission has previously established certain definitions of "small entities" to be used by the Commission in evaluating the impact of its rules on such entities in accordance with the RFA.²¹

With respect to CTAs, the Commission has previously stated that it would evaluate within the context of a particular rule proposal whether all or some affected CTAs would be considered to be small entities and, if so, the economic impact on them of the proposal.²² Moreover, the Commission stated that CPOs would be considered small entities if they are exempt from registration by virtue of Regulation 4.13(a).²³ The Commission does not believe that the proposed amendments to Regulation 4.41 would have a significant impact on affected CTAs, CPOs, and their principals. This is because the only burden that would be imposed by the Proposal would be the obligation to comply with the antifraud provisions of Section 40 of the Act

Supp. 2d 1276, 1290–91, 1294–96 (S.D.Ga. 2003)(unsupported earnings claims by commodity trading advisor were material misleading representations that violated Commodity Exchange Act if they were made with scienter or had an impact on prospective customers).

¹⁰ This statement may be the text contained in Regulation 4.41(b)(1)(i) or it may be a statement prescribed by a registered futures association pursuant to Section 17(j) of the Act, 7 U.S.C. 21(j). In this regard, the National Futures Association (NFA) has adopted a Risk Disclosure Statement, the text of which is contained in NFA Compliance Rule 2–29(c) and may be accessed at <http://www.nfa.futures.org/nfaManual/manualCompliance.asp#2-29>.

¹¹ See, e.g., *CFTC v. R&W Technical Servs. Ltd.*, 205 F.3d 165 (5th Cir. 2000) (hypothetical trading results presented as real trading results); *CFTC v. Skorupskas*, 605 F. Supp. 923, 933 (E.D. Mich. 1985) (performance tables not based on real or actual trading).

¹² See, e.g., *CFTC v. Vartuli*, 228 F.3d 94 (2d Cir. 2000) (disclaimer appears on a separate page from the hypothetical trading results); *Heffernan* at 1286, 1296–1297, 1299 (disclaimer on a webpage, but not included in the original advertisement containing the hypothetical performance); *In re Martin*, [1999–2000 Transfer Binder] Comm. Fut. L. Rep. (CCH) ¶ 28,239 (CFTC Sept. 6, 2000) (hypothetical performance results on a Web page, but disclaimer on a separate page accessible by hyperlink).

¹³ The Commission also is proposing a few non-substantive changes to the prescribed disclaimer. The text of Regulation 4.41(b)(1)(i) would thus read as follows:

"These results are based on hypothetical or simulated performance results that have certain inherent limitations. Unlike the results shown in an actual performance record, these results do not represent actual trading. Also, because these trades have not actually been executed, these results may have under- or over-compensated for the impact, if any, of certain market factors, such as lack of liquidity. Hypothetical or simulated trading programs in general are also subject to the fact that they are designed with the benefit of hindsight. No representation is being made that any account will or is likely to achieve profits or losses similar to these being shown."

¹⁴ See, e.g. *supra* note 12 for situations in which the required disclaimer was not in immediate proximity to the hypothetical performance.

¹⁵ Pub. L. 93–463, 88 Stat. 1389, Sec. 202 (Oct. 23, 1974).

¹⁶ Pub. L. 97–444, 96 Stat. 2294, Sec. 201 (Jan. 11, 1983).

¹⁷ 48 FR 35248 (Aug. 3, 1983).

¹⁸ Indeed, the Commission may constitutionally prohibit the dissemination of commercial speech that is "false, deceptive, or misleading." *Zauderer v. Office of Disciplinary Counsel*, 471 U.S. 626, 638 (1985).

¹⁹ See, e.g. *Pearson v. Shalala*, 164 F.3d 650 (D.C. Cir. 1999) (disclosure can be required to cure possibility of misleading public that would not just justify prohibition).

²⁰ 5 U.S.C. 601 *et seq.*

²¹ 47 FR 18618 (April 30, 1982).

²² *Id.* at 18620.

²³ *Id.*

when presenting the past performance of CTAs, CPOs, and their principal—whether by way of actual or hypothetical performance or through the use of testimonials. Assuming *arguendo*, however, that compliance with Section 4o would constitute a significant burden, the burden is neither new nor additional, because the proposed revisions to Regulation 4.41 are consistent with the Commission's longstanding interpretation of Section 4o as applicable to all advertisements by CTAs, CPOs, and their principals, including advertisements that are viewed electronically, and that such advertisements must not be false or misleading.

Accordingly, the Chairman, on behalf of the Commission, certifies pursuant to Section 605(b) of the RFA²⁴ that the Proposal will not have a significant economic impact on a substantial number of small entities. However, the Commission invites the public to comment on this finding.

B. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (PRA) imposes certain requirements on Federal agencies (including the Commission) in connection with their conducting or sponsoring any collection of information as defined by the PRA. The Proposal does not require a new collection of information on the part of any entities. Accordingly, for purposes of the PRA, the Commission certifies that the proposed rule amendments, if promulgated in final form, would not impose any new reporting or recordkeeping requirements.

C. Cost-Benefit Analysis

Section 15(a) of the Act²⁵ requires the Commission to consider the costs and benefits of its action before issuing a new regulation under the Act. By its terms, Section 15(a) does not require the Commission to quantify the costs and benefits of a new regulation or to determine whether the benefits of the proposed regulation outweigh its costs. Rather, Section 15(a) simply requires the Commission to "consider the costs and benefits" of its action.

Section 15(a) further specifies that costs and benefits must be evaluated in light of five broad areas of market and public concern: protection of market participants and the public; efficiency, competitiveness, and financial integrity of futures markets; price discovery; sound risk management practices; and other public interest considerations. Accordingly, the Commission could in

its discretion give greater weight to any one of the five enumerated areas and could in its discretion determine that, notwithstanding its costs, a particular rule was necessary or appropriate to protect the public interest or to effectuate any of the provisions or to accomplish any of the purposes of the Act.

The Commission is considering the costs and benefits of this rule in light of the specific provisions of Section 15(a) of the Act as follows:

1. Protection of Market Participants and the Public

Because the Proposal discusses the use of testimonials and the placement of the prescribed hypothetical disclaimer, and specifically includes advertisement via electronic media by CPOs, CTAs, and their principals, the Proposal should enhance the Commission's ability to protect market participants and the public.

2. Efficiency and Competition

The Proposal should have no effect, from the standpoint of imposing costs or creating benefits, on efficiency or competition.

3. Financial Integrity of Futures Markets and Price Discovery

The Proposal should have no effect, from the standpoint of imposing costs or creating benefits, on the financial integrity or price discovery function of the commodity futures and option markets.

4. Sound Risk Management Practices

The Proposal should have no effect, from the standpoint of imposing costs or creating benefits, on the available range of sound risk management alternatives.

5. Other Public Interest Considerations

The Proposal should have no effect, from the standpoint of imposing costs on, and may create public interest benefits to, consumers as a result of their having more honest information.

After considering these factors, the Commission has determined to propose the amendments to Regulation 4.41 discussed above. The Commission invites public comment on its application of the cost-benefit provision. Commenters also are invited to submit any data that they may have quantifying the costs and benefits of the Proposal with their comment letters.

List of Subjects in 17 CFR Part 1

Advertising, Brokers, Commodity futures, Commodity pool operators, Commodity trading advisors, Consumer protection, Reporting and recordkeeping requirements.

For the reasons presented above, the Commission proposes to amend 17 CFR part 1 as follows:

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

1. The authority citation for part 1 continues to read as follows:

Authority: 7 U.S.C. 1a, 2, 5, 6, 6a, 6b, 6c, 6d, 6e, 6f, 6g, 6h, 6i, 6j, 6k, 6l, 6m, 6n, 6o, 6p, 7, 7a, 7b, 8, 9, 12, 12a, 12c, 13a, 13a-1, 16, 16a, 19, 21, 23 and 24, as amended by the Commodity Futures Modernization Act of 2000, Appendix E of Pub. L. 106-554, 114 Stat. 2763 (2000).

2. Section 4.41 is amended by removing "or" at the end of paragraph (a)(1), removing the period and adding a semi-colon and "or" at the end of paragraph (a)(2), adding new paragraph (a)(3), and revising paragraphs (b)(1)(i), (b)(2) and (c)(1) to read as follows:

§ 4.41 Advertising by commodity pool operators, commodity trading advisors, and the principals thereof.

(a) * * *

(3) Refers to any testimonial, unless the advertisement or sales literature providing the testimonial prominently discloses:

(i) That the testimonial may not be representative of the experience of other clients;

(ii) That the testimonial is no guarantee of future performance or success; and

(iii) If, more than a nominal sum is paid, the fact that it is a paid testimonial.

(b) * * *

(1) * * *

(i) The following statement: "These results are based on hypothetical or simulated performance results that have certain inherent limitations. Unlike the results shown in an actual performance record, these results do not represent actual trading. Also, because these trades have not actually been executed, these results may have under- or over-compensated for the impact, if any, of certain market factors, such as lack of liquidity. Hypothetical or simulated trading programs in general are also subject to the fact that they are designed with the benefit of hindsight. No representation is being made that any account will or is likely to achieve profits or losses similar to these being shown"; or

* * * * *

(2) If the presentation of such simulated or hypothetical performance is other than oral, the prescribed statement must be prominently disclosed and in immediate proximity

²⁴ 5 U.S.C. 605(b).

²⁵ 7 U.S.C. 19(a).

to the simulated or hypothetical performance being presented.

(c) * * *

(1) To any publication, distribution or broadcast of any report, letter, circular, memorandum, publication, writing, advertisement or other literature or advice, whether by electronic media or otherwise, including information provided via internet or e-mail, the texts of standardized oral presentations and of radio, television, seminar or similar mass media presentations, and

BILLING CODE 6351-01-P

DEPARTMENT OF HOMELAND SECURITY

DEPARTMENT OF THE TREASURY

Bureau of Customs and Border Protection

19 CFR Parts 103, 178, and 181

[USCBP-2006-0090]

RIN 1505-AB58

NAFTA: Merchandise Processing Fee Exemption and Technical Corrections

AGENCY: Customs and Border Protection, Department of Homeland Security; Department of the Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The current regulations in title 19 of the Code of Federal Regulations allow CBP to collect a merchandise processing fee (MPF) on imported shipments to recoup administrative expenses. However, “originating merchandise” that qualifies to be marked as goods of Canada or of Mexico under the NAFTA are exempted from this fee. CBP is proposing to amend the regulations to clarify that an importer is subject to the same declaration requirement that is established for claiming NAFTA duty preference in order to claim the exemption of the MPF for goods that meet a NAFTA rule of origin even when the goods are unconditionally free.

In addition, CBP is proposing to make several technical corrections. CBP is proposing to amend the regulations to clarify that a Certificate of Origin is not required for a commercial importation for which the total value of originating goods does not exceed \$2,500. CBP is

also proposing to remedy two incorrect addresses and an incorrect Code of Federal Regulations citation.

DATES: Comments must be received on or before October 23, 2006.

ADDRESSES: You may submit comments, identified by docket number, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments via docket number USCBP-2006-0090.

- *Mail:* Trade and Commercial Regulations Branch, Office of Regulations and Rulings, Bureau of Customs and Border Protection, 1300 Pennsylvania Avenue, NW., (Mint Annex), Washington, DC 20229.

Instructions: All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided. For detailed instructions on submitting comments and additional information on the rulemaking process, see the “Public Participation” heading of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Submitted comments may also be inspected during regular business days between the hours of 9 a.m. and 4:30 p.m. at the Office of Regulations and Rulings, Bureau of Customs and Border Protection, 799 9th Street, NW., 5th Floor, Washington, DC. Arrangements to inspect submitted comments should be made in advance by calling Joseph Clark at (202) 572-8768.

FOR FURTHER INFORMATION CONTACT: Seth Mazze, Trade Agreements Branch, Office of Field Operations, (202) 344-2634.

SUPPLEMENTARY INFORMATION:

Public Participation

Interested persons are invited to participate in this rulemaking by submitting written data, views, or arguments on all aspects of the proposed rule. CBP also invites comments that relate to the economic, environmental, or federalism effects that might result from this proposed rule. Comments that will provide the most assistance to CBP in developing these procedures will reference a specific portion of the proposed rule, explain the reason for any recommended change, and include data, information, or authority that support such recommended change.

Background

On December 17, 1992, the United States, Canada, and Mexico entered into the North American Free Trade Agreement (NAFTA). Among the stated objectives of the NAFTA is the elimination of barriers to trade in, and the facilitation of the cross-border movement of, goods and services between the territories of the countries. The provisions of the NAFTA were adopted by the United States with the enactment of the North American Free Trade Agreement Implementation Act (“the Act,” 19 U.S.C. 3301–3473). On September 6, 1995, Customs published Treasury Decision (T.D.) 95-68 (North American Free Trade Agreement) in the **Federal Register** (60 FR 46334), adopting amendments to the regulations in title 19 of the Code of Federal Regulations (CFR) to implement Customs-related aspects of the NAFTA. The final rule went into effect on October 1, 1995. Sections 403(1) and 411 of the Homeland Security Act of 2002 (Pub. L. 107-296) transferred the United States Customs Service and certain of its functions from the Department of the Treasury to the Department of Homeland Security; pursuant to section 1502 of the Act, the President renamed the “Customs Service” as the “Bureau of Customs and Border Protection,” also referred to as the “CBP.”

Merchandise Processing Fee (MPF) Exemption

As a means of recouping administrative expenses for the processing of imported shipments, CBP charges a merchandise processing fee (MPF), as provided for in 19 U.S.C. 58c. However, under 19 U.S.C. 58c(b)(10)(B), for goods qualifying under the rules of origin set out in 19 U.S.C. 3332, the fee may not be charged with respect to goods that qualify to be marked as goods of Canada or of Mexico (pursuant to Annex 311 of the NAFTA). In order to claim a NAFTA duty preference, an importer must make a declaration. The same declaration is used to claim the MPF exemption. That is, the importer must place the appropriate special program indicator (e.g., “CA” for goods of Canada and “MX” for goods of Mexico) opposite the good on the entry form. The proposal in this document addresses the situation in which an importer of an originating good has no duty preference incentive to make the required NAFTA declarations on the entry because the Normal Trade Relations rate of duty on the good is free (i.e., the good is unconditionally duty free). Accordingly, CBP is proposing to

amend 19 CFR 181.21(a) to clarify, consistent with existing law and CBP practice, that in order to claim the MPF exemption for unconditionally free goods from a NAFTA country, an importer of an originating good must place the appropriate special program indicator opposite the good on the entry form even though the importer is not claiming a NAFTA duty preference.

Technical Corrections

Exemption From Providing Certificate of Origin

Section 181.22(b) of title 19, CFR (19 CFR 181.22(b)), requires an importer who claims preferential tariff treatment on a good under 19 CFR 181.21 to provide, at the request of the port director, a copy of each Certificate of Origin pertaining to the good which is in the possession of the importer. Certain importations are exempted from this requirement under 19 CFR 181.22(d). One of these exemptions, set forth in section 181.22(d)(1)(iii) is for a commercial importation of a good whose value does not exceed \$2,500 if a signed statement is attached to the invoice or other documents accompanying the shipment.

CBP has determined that 19 CFR 181.22(d)(1)(iii) should be amended to clarify that the \$2,500 value refers to the total value of a shipment and not to the value of the individual goods in a shipment. Accordingly, CBP is proposing to amend 19 CFR 181.22(d)(1)(iii) to clarify that a Certificate of Origin is not required for a commercial importation consisting of originating goods, the total value of which does not exceed \$2,500, if the required statement is attached.

Other Technical Corrections

CBP is also proposing to make several other technical corrections to the regulations. In CBP Dec. 05–32, an Interim Rule published in the **Federal Register** (70 FR 58009) on October 5, 2005, CBP redesignated 19 CFR 12.132 as 102.25. However, there is a reference to § 12.132 in § 181.21(a). Accordingly, CBP is proposing to make a minor conforming amendment to update this reference. In addition, because CBP Dec. 05–32 removed the declaration requirement referenced in §§ 12.130(c) and 12.132, CBP is proposing to remove the entries for these sections in the list of OMB control numbers in § 178.2. CBP is also proposing to amend an incorrect citation to 19 CFR 181.72(a)(2)(iii) in 19 CFR 181.74(a). The correct citation is to § 181.72(a)(3)(iii). In addition, CBP is proposing to amend the address in 19 CFR 181.74(e) for providing notification

when the Canadian or Mexican customs administration intends to conduct a NAFTA verification visit in the U.S. in order to determine whether a good imported into the U.S. qualifies as an originating good. The correct address is: “Bureau of Customs and Border Protection, Office of Field Operations, Special Enforcement Division, 1300 Pennsylvania Ave., NW., Washington, DC 20229.” CBP is also proposing to amend the National Commodity Specialist Division (NCSD) address in 19 CFR 181.93(a) for the submission of advance ruling requests under the NAFTA. The correct NCSD address is: “National Commodity Specialist Division, Bureau of Customs and Border Protection, One Penn Plaza, 10th Floor, New York, NY 10119.” This address is also corrected in the list of public reading rooms in 19 CFR 103.1.

Signing Authority

The signing authority for this document falls under 19 CFR 0.1(a)(1).

Paperwork Reduction Act

Because those changes with possible paperwork implications proposed in this document are merely clarifications of existing requirements, there is no need to amend the paperwork burden for the number previously approved by OMB for part 181 of title 19, CFR. The clearance number for part 181 is 1651–0098.

Regulatory Flexibility Act and Executive Order 12866

Pursuant to the provisions of the Regulatory Flexibility Act (6 U.S.C. 601 *et seq.*), it is certified that the proposed amendments will not have a significant economic impact on a substantial number of small entities. CBP is proposing to merely clarify, consistent with existing law and CBP practice, that an importer is subject to the same declaration requirement that is established for claiming NAFTA duty preference in order to claim the exemption of the MPF for goods that meet a NAFTA rule of origin even when the goods are unconditionally free. CBP is also proposing to merely clarify, consistent with current CBP practice, that a Certificate of Origin is not required for a commercial importation consisting of originating goods, the total value of which does not exceed \$2,500, if the required statement is attached. Lastly, CBP is proposing to make other technical corrections to correct two incorrect addresses and an incorrect Code of Federal Regulations citation. For the same reasons, this document does not meet the criteria for a

significant regulatory action under Executive Order 12866.

List of Subjects

19 CFR Part 103

Administrative practice and procedure, Freedom of information.

19 CFR Part 178

Collections of information, Paperwork requirements, Reporting and recordkeeping requirements.

19 CFR Part 181

Canada, Customs duties and inspection, Imports, Mexico, Trade agreements (North American Free Trade Agreement).

Proposed Amendments to the Regulations

It is proposed to amend 19 CFR parts 103, 178, and 181 as set forth below.

PART 103—AVAILABILITY OF INFORMATION

1. The authority citation for part 103 continues to read as follows:

Authority: 5 U.S.C. 301, 552, 552a; 19 U.S.C. 66, 1624; 31 U.S.C. 9701.

2. Amend § 103.1 by removing the address citation “New York, 6 World Trade Center, New York, New York 10048” and adding in its place the address citation “New York, One Penn Plaza, 10th Floor, New York, NY 10119”.

PART 178—APPROVAL OF INFORMATION COLLECTION REQUIREMENTS

3. The authority citation for part 178 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 1624; 44 U.S.C. 3501 *et seq.*

4. Amend § 178.2 by removing the entries for 12.130(c) and 12.132.

PART 181—NORTH AMERICAN FREE TRADE AGREEMENT

5. The authority citation for part 181 continues to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 3(i), Harmonized Tariff Schedule of the United States), 1624, 3314.

6. Revise § 181.21(a) to read as follows:

§ 181.21 Filing of claim for preferential tariff treatment upon importation.

(a) *Declaration.* In connection with a claim for preferential tariff treatment, or for the exemption from the merchandise processing fee, for a good under the NAFTA, the U.S. importer shall make a written declaration that the good

qualifies for such treatment. The written declaration may be made by including on the entry summary, or equivalent documentation, the symbol "CA" for a good of Canada, or the symbol "MX" for a good of Mexico, as a prefix to the subheading of the HTSUS under which each qualifying good is classified. Except as otherwise provided in 19 CFR 181.22 and except in the case of a good to which Appendix 6.B to Annex 300-B of the NAFTA applies (see also 19 CFR 102.25), the declaration shall be based on a complete and properly executed original Certificate of Origin, or copy thereof, which is in the possession of the importer and which covers the good being imported.

* * * * *

7. Amend § 181.22(d)(1)(iii) by removing the phrase "of a good whose value", and adding in its place the phrase "for which the total value of originating goods".

8. Amend § 181.74 by:

a. In paragraph (a), removing the citation "181.72(a)(2)(iii)" and adding in its place the citation "181.72(a)(3)(iii)"; and

b. In paragraph (e), removing the address citation "Project North Star Coordination Center, P.O. Box 400, Buffalo, New York 14225-0400" and adding in its place the address citation "Bureau of Customs and Border Protection, Office of Field Operations, Special Enforcement Division, 1300 Pennsylvania Ave., NW., Washington, DC 20229".

9. Amend § 181.93(a) by removing the address citation "National Commodity Specialist Division, United States Customs Service, 6 World Trade Center, New York, NY 10048" and adding in its place the address citation "National Commodity Specialist Division, Bureau of Customs and Border Protection, One Penn Plaza, 10th Floor, New York, NY 10119".

Dated: August 17, 2006.

Deborah J. Spero,

Acting Commissioner, Customs and Border Protection.

Timothy E. Skud,

Deputy Assistant Secretary of the Treasury.

[EPA-R03-OAR-2006-0607; FRL-8212-6]

Approval and Promulgation of Air Quality Implementation Plans; Maryland; State Implementation Plan Revision for American Cyanamid Company, Havre de Grace, MD

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a State Implementation Plan (SIP) revision submitted by the State of Maryland. This revision pertains to the removal of an August 2, 1984 Secretarial Order (Order) from the Maryland SIP. The Order constituted a Plan for Compliance (PFC) and an alternative method of assessing compliance at an American Cyanamid Company (Company) facility located in Havre de Grace, Harford County, Maryland (the Facility). The Order allowed for certain volatile organic compound (VOC) emissions sources at the Facility to achieve compliance with emissions limits through averaging (or "bubbling") of emissions over a 24-hour period. Removal of the Order from the SIP will remove the "bubbling" compliance option for these sources at the Facility. In lieu of "bubbling," the sources must comply with the approved and more stringent Maryland SIP provisions for the control of VOC emissions, which do not allow averaging or "bubbling." This action is being taken under the Clean Air Act (CAA or the Act).

DATES: Written comments must be received on or before September 22, 2006.

ADDRESSES: Submit your comments, identified by Docket ID Number EPA-R03-OAR-2006-0607 by one of the following methods:

A. *http://www.regulations.gov.* Follow the on-line instructions for submitting comments.

B. *E-mail:* morris.makeba@epa.gov.

C. *Mail:* EPA-R03-OAR-2006-0607, Makeba Morris, Chief, Air Quality Planning and Analysis Branch, Mailcode 3AP21, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103.

D. *Hand Delivery:* At the previously-listed EPA Region III address. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA-R03-OAR-2006-0607. EPA's policy is that all comments received will be included in the public docket without change, and may be made available online at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through <http://www.regulations.gov> or e-mail. The <http://www.regulations.gov> Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through <http://www.regulations.gov>, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the electronic docket are listed in the <http://www.regulations.gov> index. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in <http://www.regulations.gov> or in hard copy during normal business hours at the Air Protection Division, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. Copies of the State submittal are available at the Maryland Department of the Environment, 1800 Washington Boulevard, Suite 705, Baltimore, Maryland 21230.

FOR FURTHER INFORMATION CONTACT: Neil Bigioni, (215) 814-2781, or by e-mail at bigioni.neil@epa.gov.

SUPPLEMENTARY INFORMATION: On May 17, 2006, the Maryland Department of the Environment submitted a revision to its SIP entitled "Removal of the 1984 American Cyanamid Company Secretarial Order from Maryland's State Implementation Plan." The request was for the removal of a Secretarial Order (by Consent) currently incorporated into the Maryland SIP. EPA is proposing to approve Maryland's requested SIP revision removing the Order from the SIP.

I. Background

EPA published a final rule on May 16, 1990 (55 FR 20269), approving the Order issued to the Company's adhesive manufacturing facility in Havre de Grace, Maryland (the Facility), as a revision to the Maryland SIP. The Order provided the Company with a PFC and an alternative method of assessing compliance for certain installations located at the Facility by allowing the averaging or "bubbling" of the emissions of VOC over a 24-hour period. By allowing "bubbling" of VOC emissions the Company could over-control emissions at some units and under control at other units such that the overall emissions from the sources collectively would be the same as those that would be achieved utilizing traditional control strategies at each source. The VOC sources where "bubbling" was allowed at the Facility were components of the Facility's paper and fabric adhesive coating operation, and included Towers 2, 3, and 5 and the FM-1000 coater/dryer.

Since EPA's May 16, 1990 approval of the Order as a SIP revision the Facility has been acquired by Cytec Engineered Materials, Inc. (Cytec).

II. Summary of SIP Revision

EPA is proposing to approve this SIP revision submitted by the State of Maryland. The revision will remove the Order from the Maryland SIP. Removal of the Order from the SIP will subject the VOC emissions sources at the Facility that formerly subject to the "bubbling" provisions of the Order to the Maryland VOC regulations and limits codified at Code of Maryland Regulations (COMAR) 26.11.19.07. Those COMAR regulations are part of the Maryland SIP. (65 FR 2334, January 14, 2000). The materials submitted by Maryland in support of the SIP revision indicate that the Facility currently intends to comply with the SIP-approved VOC limits by reducing VOC emissions through use of a regenerative thermal oxidizer, as allowed by COMAR 26.11.19.02B(2)(b)(ii) and the Maryland SIP (68 FR 9012, February 27, 2003).

This proposed SIP revision will remove the current ability for Cytec to comply with VOC emissions limits for the sources subject to the Order through averaging or "bubbling" of VOC emissions. The SIP-approved limits codified at COMAR 26.11.19.07C do not allow for compliance through averaging/"bubbling." The applicable COMAR 26.11.19.07C limits of 2.9 pounds of VOC per gallon of coating as applied (minus water), are also more stringent than the emissions limit of 3.2 pounds of VOC per gallon of coating as applied (minus water) imposed by the Order.

III. Proposed Action

EPA is proposing to approve Maryland's SIP revision submitted May 27, 2006 to remove the August 2, 1984 Secretarial Order issued to American Cyanamid Company from the SIP. EPA is soliciting public comments on the issues discussed in this document. These comments will be considered before taking final action.

IV. Statutory and Executive Order Reviews

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this proposed action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001)). This action merely proposes to approve state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this proposed rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule proposes to approve pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4). This proposed rule also does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it have substantial direct effects on the

States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely proposes to approve a state rule implementing a Federal requirement, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This proposed rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. As required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), in issuing this proposed rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct. EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the executive order. This proposed rule to remove the Secretarial Order for American Cyanamid from the Maryland SIP does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Protection of Stratospheric Ozone: Adjusting Allowances for Class I Substances for Export to Article 5 Countries**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Notice of proposed rulemaking.

SUMMARY: This proposed action amends previous action by the Agency regarding the allocation of Article 5 allowances that permit production of ozone-depleting substances (ODS) that are Class I, Group I controlled substances solely for export to developing countries to meet those countries' basic domestic needs. Specifically, this action will remove the 2007-2009 phasedown step for companies that manufacture CFCs-11, -12, or -114 for export to meet the basic domestic needs of developing countries. The Agency is taking this action in response to notification that there would otherwise be a shortfall in the availability of pharmaceutical-grade CFCs for use in metered dose inhalers in developing countries. In a final rule published December 29, 2005, EPA established initial baselines for each company that are far more stringent than required under the Beijing Adjustments to the Montreal Protocol on Substances that Deplete the Ozone Layer (the Montreal Protocol), which set out restrictions for production to meet basic domestic needs. Therefore, even without the 2007-2009 step-down reduction, the U.S. will be at production levels to meet basic domestic needs that are far below those allowed under the Beijing Adjustments. This action is taken in accordance with the Montreal Protocol and the Clean Air Act (CAA).

DATES: Written comments on the rule must be received on or before September 22, 2006. Any party requesting a public hearing must notify the contact person listed below by 5 p.m. eastern standard time on August 28, 2006. If a hearing is requested it will be held on September 7, 2006 and comments will be due to the Agency October 10, 2006. EPA will post information regarding a hearing, if one is requested, on the Ozone Protection Web site <http://www.epa.gov/ozone>. Persons interested in attending a public hearing should consult with the contact person below regarding the location and time of the hearing.

ADDRESSES: Submit your comments, identified by Docket ID No. OAR-2005-0151, by one of the following methods:

- <http://www.regulations.gov>: follow the on-line instructions for submitting comments.

- E-mail: A-and-R-docket@epa.gov.
- Fax: 202-566-1741.
- Mail: Air Docket, Environmental Protection Agency, Mailcode: 6102T, 1200 Pennsylvania Ave., NW., Washington, DC 20460.
- Hand Delivery or Courier. Deliver your comments to: EPA Air Docket, EPA West, 1301 Constitution Avenue, NW., Room B108, Mail Code 6102T, Washington, DC 20004. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No EPA-HQ-OAR-2005-0151 EPA's policy is that all comments received will be included in the public docket without change and may be made available online at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through www.regulations.gov or e-mail. The <http://www.regulations.gov> Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through www.regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at <http://www.epa.gov/epahome/dockets.htm>.

Docket: All documents in the docket are listed in the www.regulations.gov index. Although listed in the index, some information is not publicly

available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in www.regulations.gov or in hard copy at the Air Docket, EPA/DC, EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC. This Docket Facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. I. What Is the Legislative and Regulatory Background of the Phaseout Regulations for Ozone-Depleting Substances?

The current regulatory requirements of the Stratospheric Ozone Protection Program that limit production and consumption of ozone-depleting substances (ODSs) can be found at 40 CFR part 82, subpart A. The regulatory program was originally published in the **Federal Register** on August 12, 1988 (53 FR 30566), in response to the 1987 signing and subsequent ratification of the Montreal Protocol on Substances that Deplete the Ozone Layer (Montreal Protocol). The U.S. was one of the original signatories to the 1987 Montreal Protocol and the U.S. ratified the Protocol on April 21, 1988. Congress

then enacted, and President Bush signed into law, the Clean Air Act Amendments of 1990 (CAAA of 1990), which included Title VI on Stratospheric Ozone Protection, codified as 42 U.S.C. Chapter 85, Subchapter VI, to ensure that the United States could satisfy its obligations under the Montreal Protocol. EPA issued new regulations to implement this legislation and has made several amendments to the regulations since.

The requirements contained in the final rules published in the **Federal Register** on December 20, 1994 (59 FR 65478) and May 10, 1995 (60 FR 24970) establish an Allowance Program. The Allowance Program and its history are described in the notice of proposed rulemaking published in the **Federal Register** on November 10, 1994 (59 FR 56276). The control and the phaseout of the production and consumption of Class I ODSs as required under the Protocol and the CAA are accomplished through the Allowance Program.

In developing the Allowance Program, we collected information on the amounts of ODSs produced, imported, exported, transformed and destroyed within the U.S. for specific baseline years for specific chemicals. This information was used to establish the U.S. production and consumption ceilings for these chemicals. The data were also used to assign company-specific production and import rights to companies that were in most cases producing or importing during the specific year of data collection. These production or import rights are called "allowances." Due to the complete phaseout of many ODSs, the quantities of allowances granted to companies for those chemicals were gradually reduced and eventually eliminated. Production allowances and consumption allowances no longer exist for any ODSs that are Class I controlled substances. All production or consumption of Class I controlled substances is prohibited under the Montreal Protocol and the CAA, except for a few narrow exemptions.

In the context of the regulatory program, the use of the term "consumption" may be misleading. Consumption does not mean the "use" of a controlled substance, but rather is defined as the formula: production + imports – exports, of controlled substances (Article 1 of the Protocol and Section 601 of the CAA). Class I controlled substances that were produced or imported through the expenditure of allowances prior to their phaseout date may continue to be used by industry and the public after their phaseout date except where the

regulations include explicit use restrictions. Use of such substances may be subject to other regulatory limitations.

The specific names and chemical formulas for the Class I controlled substances are in Appendix A and Appendix F in Subpart A of 40 CFR Part 82. The specific names and chemical formulas for the Class II controlled substances are in Appendix B and Appendix F in Subpart A.

Although the regulations phased out the production and consumption of Class I controlled substances, a very limited number of exemptions exist, consistent with U.S. obligations under the Montreal Protocol. The regulations allow for the manufacture of phased-out Class I controlled substances provided the substances are either transformed or destroyed. They also allow limited manufacture if the substances are (1) exported to meet the basic domestic needs of countries operating under Article 5 of the Montreal Protocol or (2) produced for essential or critical uses as authorized by the Montreal Protocol and the regulations. Limited exceptions to the ban on the import of phased-out Class I controlled substances also exist if the substances are: (1) Previously used, (2) imported for essential or critical uses as authorized by the Montreal Protocol and the regulations, (3) imported for destruction or transformation only, or (4) a transshipment or (5) a heel (a small amount of controlled substance remaining in a container after it is discharged or off-loaded) (40 CFR 82.4).

On December 29, 2005, EPA published a final rule in the **Federal Register** (70 FR 77042) concerning production of specific Class I controlled substances for export to meet the basic domestic needs of developing countries ("Article 5" countries). It established a new Article 5 allowance baseline for Class I controlled substances, established a schedule for phased reductions in such allowances, and extended the time allowed for Article 5 production for methyl bromide. Article 5 allowances are solely for production to meet the basic domestic needs of developing countries referred to in the Protocol as "Article 5" parties. This action amends the schedule for phased reductions in Article 5 allowances for companies that produce and export Class I, Group I substances to meet the basic domestic needs of Article 5 countries.

II. Today's Action

Under the Montreal Protocol, industrialized countries and developing countries have different schedules for

phasing out the production and import of ODSs. Developing countries operating under Article 5, paragraph 1 of the Montreal Protocol in most cases have additional time in which to phase out ODSs. The Parties to the Montreal Protocol recognized that it would be inadvisable for developing countries to spend their scarce resources to build new ODS manufacturing facilities to meet their basic domestic needs as industrialized countries phase out. The Parties therefore decided to permit a small amount of production in industrialized countries, in addition to the amounts permitted under those countries' phaseout schedules, for export to meet the basic domestic needs of developing countries.

The adjustments to the Montreal Protocol adopted by the Parties at their 11th meeting in Beijing required Parties that manufacture ODSs for basic domestic needs to establish baselines for such production, calculated based on the average quantity of the ODS exported to Article 5 countries over a specified range of years. The adjustments also instituted a reduction schedule for Article 5 manufacture which reflects the reduction schedule in place for developing country ODS consumption. The Beijing Adjustments underscore the Parties' concern that global oversupply of certain Class I ODSs is interfering with the transition to alternatives. The oversupply of these ODSs results in low prices that make it difficult for non-ozone-depleting alternatives to compete in the marketplace. Businesses and individuals thus lack an economic incentive to transition to alternatives. The Beijing baseline calculation was designed to overcome this problem with respect to Article 5 countries by reducing supply to those countries. The price of these ODSs should rise to reflect the decrease in supply.

In response to the Beijing Adjustments, EPA published a final rule in the **Federal Register** on December 29, 2005 (70 FR 77042). The Beijing Adjustments to the Protocol, Article 2A, paragraphs 4–7 state that an industrialized Party's allowable production of CFCs–11, –12, –113, –114, and –115, referred to under the Clean Air Act as Class I, Group I substances, to meet the basic domestic needs of Article 5 Parties shall be measured against "the annual average of its production of [these substances] for basic domestic needs for the period 1995 to 1997 inclusive." EPA's December 29, 2005 action was far more stringent than the requirements set forth in Beijing. The Agency established a baseline for Class I, Group I substances

using the more recent export data from the years 2000–2003, years in which there were far fewer exports. Therefore, instead of establishing an aggregate baseline for Class I, Group I substances of 9,951 metric tons—reflecting the 1995–1997 average called for by the Beijing Adjustments—EPA’s December 29, 2005 final rule established a more stringent baseline of 345 metric tons, reflecting export data from 2000–2003, believing that more recent export data represented a truer picture of the actual basic domestic needs for these chemicals in developing countries and would thereby address the concerns regarding global oversupply of CFCs.

After publication of the December 29, 2005 final rule, EPA was informed that although there is a global oversupply of CFCs in general, there are not sufficient supplies of pharmaceutical-grade CFCs available for use in metered dose inhalers in developing countries. Pharmaceutical-grade CFCs are more pure than a typical batch of CFCs and have to meet stringent specifications set out by regulatory authorities if they are to be used in medical devices. Developed countries like the United States have already reached their phaseout date for the production and consumption of CFCs. Under the Montreal Protocol, once a Party has reached the phaseout date for CFCs it is allowed to apply for an essential use exemption, which permits the Party to consume limited amounts of CFCs for essential uses such as certain metered dose inhalers. Developing countries do not phase out their CFC consumption until 2010 and do not have access to an essential use exemption until that time. Therefore, the Agency’s previous conclusion that there is an oversupply of CFCs was not correct with regard to pharmaceutical-grade CFCs. Because the essential use exemption will not be available to developing countries until 2010, there is a need for developed countries to supply CFCs to meet this demand between 2007 and 2009 under the provisions for basic domestic needs identified in the Montreal Protocol and EPA regulations.

The number of facilities that are rated for pharmaceutical-grade CFC production is limited. One company that owns such a facility in the U.S. had previously sourced the developing country demand for pharmaceutical-grade CFCs from a facility in Europe which, as of 2006, is no longer in operation. Since EPA’s December 29, 2005 final rule set baselines for CFC production for basic domestic needs that are far below the requirements of the Beijing Adjustments, the Agency could allow for a moderate increase in

the amount of CFC production to meet domestic needs in order to make up the potential shortfall in pharmaceutical-grade CFC production for developing countries, while still exceeding compliance with the U.S.’s Montreal Protocol obligations.

The Montreal Protocol encourages industrial rationalization to minimize the number of sources that produce ozone-depleting substances. The closure of plants in Europe and in developing countries as part of their phase out plans is consistent with this environmental goal. However, EPA recognizes the compelling public health rationale for continued manufacture of certain CFC-containing metered dose inhalers (MDIs). In fact, on April 11, 2006, EPA published a proposed rule in the **Federal Register** to allow for the manufacture of CFCs for use in metered dose inhalers in the United States for the year 2006, nearly ten years after our phaseout of CFCs (71 FR 18262).

Therefore, the Agency is proposing to remove the next phasedown step for companies that manufacture Class I, Group I substances from the phaseout schedule for Article 5 allowances effective January 1, 2007. Since the Agency’s December 29, 2005 final rule established very low baselines for these substances, the U.S. will still exceed compliance with the Beijing Adjustments even without a step-down to 15% of baseline. A step-down to 15% of the baseline established by the Beijing Adjustments (which is based on 1995–1997 export data) would result in an allowable production level of 1,493 metric tons. By comparison, EPA’s proposed approach, which uses the more stringent regulatory baseline based on 2000–2003 export data but maintains the 50% step-down level through 2009, results in an allowable production level of only 173 metric tons.

As a result of the action described in this proposed rulemaking, companies that manufacture Class I, Group I substances will have their Article 5 production frozen at the 2006 reduction level of 50% of baseline for the remaining years of the Article 5 reduction schedule, specifically years 2007–2009. EPA reviewed data provided on the volume of pharmaceutical-grade CFCs produced to meet basic domestic needs over the years 2000–2005 and consulted with other governments to confirm whether they did project a need for pharmaceutical-grade CFCs between 2007 and 2009. In removing the next step-down requirement from our domestic regulation, EPA will allow companies to manufacture at their 2006 level, which will be sufficient to meet

the need for pharmaceutical-grade CFCs based on the data reviewed by the Agency.

III. Statutory and Executive Order Reviews

A. Executive Order No. 12866: Regulatory Planning and Review

This action is not a “significant regulatory action” under the terms of Executive Order (EO) 12866 (58 FR 51735, October 4, 1993) and is therefore not subject to review under the EO.

B. Paperwork Reduction Act

This proposed action does not impose any new information collection burden. However, the Office of Management and Budget (OMB) has previously approved the information collection requirements contained in the existing regulations, 40 CFR Part 82, under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* and has assigned OMB control number 2060–0170, EPA ICR number 1432. A copy of the OMB-approved Information Collection Request (ICR) may be obtained from Susan Auby, Collection Strategies Division; U.S. Environmental Protection Agency (2822T); 1200 Pennsylvania Ave., NW., Washington, DC 20460 or by calling (202) 566–1672.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA’s regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15.

C. Regulatory Flexibility Act

EPA has determined that it is not necessary to prepare a regulatory flexibility analysis in connection with this proposed rule. For purposes of assessing the impacts of today’s rule on

small entities, small entity is defined as: (1) A small business that is identified by the North American Industry Classification System (NAICS) Code in the Table below; (2) a small

governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-

profit enterprise which is independently owned and operated and is not dominant in its field.

Category	NAICS code	SIC code	SIC small business size standard (in number of employees or millions of dollars)
1. Chemical and Allied Products, NEC	422690	5169	100

After considering the economic impacts of this proposed rule on small entities, EPA has concluded that this action will not have a significant economic impact on a substantial number of small entities. This proposed rule will not impose any requirements on small entities, as it regulates large corporations that produce, import, or export Class I controlled substances. There are no small entities in this regulated industry.

D. Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104-4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures to State, local, and tribal governments, in the aggregate, or to the private sector, of \$100 million or more in any one year. Before promulgating an EPA rule for which a written statement is needed, section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective, or least burdensome alternative if the Administrator publishes with the final rule an explanation why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMRA a small government agency plan. The plan must

provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

EPA has determined that this proposed rule does not contain a Federal mandate that may result in expenditures of \$100 million or more for State, local, and tribal governments, in the aggregate, or the private sector in any one year. Thus, today's rule is not subject to the requirements of sections 202 and 205 of the UMRA. Further, EPA has determined that this proposed rule contains no regulatory requirements that might significantly or uniquely affect small governments because it does not impose any requirements on any State, local, or tribal government.

E. Executive Order No. 13132: Federalism

Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government."

This proposed rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. This proposed rule is expected to primarily affect

producers and exporters of Class I, Group I controlled substances. Thus, Executive Order 13132 does not apply to this proposed rule.

F. Executive Order No. 13175: Consultation and Coordination With Indian Tribal Governments

Executive Order No. 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 9, 2000), requires EPA to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." This proposed rule does not have tribal implications, as specified in Executive Order No. 13175, because it does not significantly or uniquely affect the communities of Indian tribal governments. The proposed rule does not impose any enforceable duties on communities of Indian tribal governments. Thus, Executive Order No. 13175 does not apply to this proposed rule.

G. Executive Order No. 13045: Protection of Children From Environmental Health & Safety Risks

Executive Order 13045: "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997) applies to any rule that: (1) Is determined to be "economically significant" under E.O. 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

While this proposed rule is not subject to the Executive Order because it is not economically significant as defined in E.O. 12866, we nonetheless have reason to believe that the

environmental health or safety risk addressed by this action may have a disproportionate effect on children. Depletion of stratospheric ozone results in greater transmission of the sun's ultraviolet (UV) radiation to the earth's surface. The following studies describe the effects on children of excessive exposure to UV radiation: (1) Westerdahl J, Olsson H, Ingvar C. "At what age do sunburn episodes play a crucial role for the development of malignant melanoma," *Eur J Cancer* 1994; 30A:1647-54; (2) Elwood JM, Jopson J. "Melanoma and sun exposure: an overview of published studies," *Int J Cancer* 1997; 73:198-203; (3) Armstrong BK. "Melanoma: childhood or lifelong sun exposure," In: Grobb JJ, Stern RS, Mackie RM, Weinstock WA, eds. "Epidemiology, causes and prevention of skin diseases," 1st ed. London, England: Blackwell Science, 1997:63-6; (4) Whitman D., Green A. "Melanoma and Sunburn," *Cancer Causes Control*, 1994; 5:564-72; (5) Krickler A, Armstrong, BK, English, DR, Heenan, PJ. "Does intermittent sun exposure cause basal cell carcinoma? A case control study in Western Australia," *Int J Cancer* 1995; 60:489-94; (6) Gallagher, RP, Hill, GB, Bajdik, CD, et al. "Sunlight exposure, pigmentary factors, and risk of nonmelanocytic skin cancer I, Basal cell carcinoma," *Arch Dermatol* 1995; 131:157-63; (7) Armstrong, BK. "How sun exposure causes skin cancer: an epidemiological perspective," *Prevention of Skin Cancer*. 2004; 89-116.

Allowing continuing U.S. production to meet developing countries' basic domestic needs, including their need for pharmaceutical-grade CFCs, avoids the need for those countries to install new ODS manufacturing facilities. The amount of CFCs that will be released to the atmosphere should remain the same regardless of the manufacturing location. In addition, avoiding the installation of new capacity is one means of ensuring that production levels continue to decline. Thus, this proposed rule is not expected to increase the impacts on children's health from stratospheric ozone depletion.

H. Executive Order No. 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This proposed rule is not a "significant energy action" as defined in Executive Order No. 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001)) because it is not a significant

regulatory action under Executive Order 12866.

I. National Technology Transfer Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 ("NTTAA"), Public Law. 104-113, Section 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards. This proposed rule does not involve technical standards. Therefore, EPA did not consider the use of any voluntary consensus standards.

List of Subjects in 40 CFR Part 82

Environmental protection.

Dated: August 17, 2006.

Stephen L. Johnson,
Administrator.

40 CFR part 82 is amended as follows:

PART 82—PROTECTION OF STRATOSPHERIC OZONE

1. The authority citation for part 82 continues to read as follows:

Authority: 42 U.S.C. 7414, 7601, 7671-7671q.

2. Section 82.11 is amended by revising paragraph (a)(3) to read as follows:

§ 82.11 Exports of Class I controlled substances to Article 5 Parties.

(a) * * *

(3) Phased Reduction Schedule for Article 5 Allowances allocated in § 82.11. For each control period specified in the following table, each person is granted the specified percentage of the baseline Article 5 allowances apportioned under § 82.11.

Control period	Class I substances in group I (in percent)	Class I substances in group VI (in percent)
2006	50	80
2007	50	80
2008	50	80
2009	50	80
2010	0	80
2011	0	80
2012	0	80

Control period	Class I substances in group I (in percent)	Class I substances in group VI (in percent)
2013	0	80
2014	0	80
2015	0	0

BILLING CODE 6560-50-P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

46 CFR Part 296

[Docket No. MARAD-2006-23804]

RIN 2133-AB68

Maintenance and Repair Reimbursement Pilot Program

AGENCY: Maritime Administration, DOT.

ACTION: Notice of opening of reply comment period.

SUMMARY: The Maritime Administration (MARAD) is amending its regulations governing its pilot program for the reimbursement of costs of qualified maintenance and repair (M&R) of Maritime Security Program (MSP) vessels performed in United States shipyards. Under Public Law 109-163, the Secretary of Transportation, acting through the Maritime Administrator, is directed to implement regulations that, among other things, replace MARAD's voluntary M&R reimbursement program with a mandatory system.

The notice of proposed rulemaking for this action was published in the **Federal Register** on February 8, 2006 (71 FR 6438). Several of the comments received argued that MARAD lacks authority to unilaterally add to existing MSP agreements the added obligation on the part of the MSP contractor to enter into an M&R Pilot Program agreement. In order to have a full airing of this fundamental issue, MARAD is hereby giving notice that we have decided to open a reply comment period for this rulemaking. Reply comments may address the issue highlighted above or any other issue raised in the original set of comments received in this docket.

DATES: Reply comments are due September 22, 2006.

ADDRESSES: You may submit reply comments [identified by DOT DMS Docket Number MARAD 2006-23804] by any of the following methods:

- Web site: <http://dms.dot.gov>.

Follow the instructions for submitting

comments on the DOT electronic docket site.

- Mail: Docket Management Facility; U.S. Department of Transportation, 400 7th St., SW., Nassif Building, Room PL-401, Washington, DC 20590-001.

- Hand Delivery: Room PL-401 on the plaza level of the Nassif Building, 400 7th St., SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

- Federal eRulemaking Portal: Go to <http://www.regulations.gov>. Follow the online instructions for submitting comments.

Instructions: All submissions must include the agency name and docket number or Regulatory Identification Number (RIN) for this rulemaking. Note that all comments received will be posted without change to <http://dms.dot.gov> including any personal information provided. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments received, go to <http://dms.dot.gov> at any time or to Room PL-401 on the plaza level of the Nassif Building, 400 7th St., SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

Privacy Act

Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477-78) or you may visit <http://dms.dot.gov>.

Dated: August 17, 2006.

By order of the Maritime Administrator.

Murray A. Bloom,

Acting Secretary, Maritime Administration.

2006 Biennial Review of Telecommunications Regulations

AGENCY: Federal Communications Commission.

ACTION: Notice of regulatory review.

SUMMARY: The Federal Communications Commission is conducting its comprehensive 2006 biennial review of telecommunications regulations pursuant to Section 11 of the Communications Act of 1934, as amended. Section 11 requires the Commission to review biennially its regulations "that apply to the operations or activities of any provider of telecommunications service," and to "determine whether any such regulation is no longer necessary in the public interest as the result of meaningful economic competition between the providers of such service." The Commission is directed to repeal or modify any such regulations that it finds are no longer in the public interest.

DATES: Submit comments by September 1, 2006 and reply comments by September 15, 2006.

ADDRESSES: Comments may be filed using the Commission's Electronic Comment Filing System ("ECFS") or by filing paper copies. Comments filed through ECFS may be sent as an electronic file via the Internet to <http://www.fcc.gov/cgb/ecfs/>. For detailed instructions for submitting comments, see the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT:

Michael Jacobs, Consumer and Governmental Affairs Bureau, 202-418-2859, Michael Carowitz, Enforcement Bureau, 202-418-0026, Narda Jones, International Bureau, 202-418-2489, Bruce Romano, Office of Engineering and Technology, 202-418-2124, Peter Corea, Wireless Telecommunications Bureau, 202-418-7931, Carrie-Lee Early, Wireline Competition Bureau, 202-418-2776.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Public Notice, CG Docket No. 06-152, EB Docket No. 06-153, IB Docket No. 06-154, ET Docket No. 06-155, WT Docket No. 06-156, WC Docket No. 06-157; FCC 06-115, adopted August 3, 2006 and released August 10, 2006. The full

text of this document, including the parts of the Commission's rules under review, is available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portals II, 445 12th Street, SW., Room Y-A257, Washington, DC 20554. They may also be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., 445 12th Street, SW., Room CY-B402, Washington, DC 20554, telephone 202-488-5300 or 800-378-3160, facsimile 202-488-5563, or via e-mail at fcc@bcpweb.com. To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an e-mail to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202-418-0530 (voice), 202-418-0432 (TTY).

The Commission is in the process of conducting its comprehensive 2006 biennial review of telecommunications regulations pursuant to Section 11 of the Communications Act of 1934, as amended. This section requires the Commission (1) To review biennially its regulations "that apply to the operations or activities of any provider of telecommunications service," and (2) to "determine whether any such regulation is no longer necessary in the public interest as the result of meaningful economic competition between the providers of such service." The Commission is directed to repeal or modify any such regulations that it finds are no longer in the public interest.

Pursuant to § 1.430 of the Commission's rules, we seek suggestions from the public as to what rules should be modified or repealed as part of the 2006 biennial review. Submissions should identify with as much specificity as possible the rule or rules that should be modified or repealed, and explain why and how the rule or rules should be modified or repealed. Parties should discuss how their suggested rule changes satisfy the standard of Section 11 as interpreted by the DC Circuit Court in *Cellco Partnership*. As with previous biennial reviews, we expect that FCC staff will prepare reports recommending which sections of the rules should be modified or repealed.

In order to facilitate review of all comments, the cover page should (1) Denote that the comments pertain to the Biennial Review 2006, (2) indicate the Bureau or Office with jurisdiction over the rules addressed in the comments, and (3) include the appropriate docket number for that Bureau or Office. Parties wishing to comment on rules within the jurisdiction of more than one Bureau or

Office should file a separate pleading with each applicable Bureau or Office.

Comments may be filed using the Commission's Electronic Comment Filing System ("ECFS") or by filing paper copies. See Electronic Filing of Documents in Rulemaking Proceedings, 63 FR 24121 (1998). Comments filed through the ECFS may be sent as an electronic file via the Internet to <http://www.fcc.gov/cgb/ecfs/>. Generally, only one copy of an electronic submission must be filed. In completing the transmittal screen, commenters should include their full name, U.S. Postal Service mailing address, and the applicable docket or rulemaking number.

Parties may also submit an electronic comment by Internet e-mail. To obtain filing instructions for e-mail comments, commenters should send an e-mail to ecfs@fcc.gov, and should include the following words in the body of the message, "get form." A sample form and directions will be sent in reply. Parties who choose to file by paper must file an original and four copies of each filing. If more than one docket or rulemaking number appears in the caption of this proceeding, commenters must submit two additional copies for each additional docket or rulemaking number.

Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail (although we continue to experience delays in receiving U.S. Postal Service mail). The Commission's contractor, Natek, Inc., will receive hand-delivered or messenger-delivered paper filings for the Commission's Secretary at 236 Massachusetts Avenue, NE., Suite 110, Washington, DC 20002.

Comments in this proceeding will be available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portals II, 445 12th Street, SW., Room Y-A257, Washington, DC 20554. They may also be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., 445 12th Street, SW., Room CY-B402, Washington, DC 20554, telephone 202-488-5300 or 800-378-3160, facsimile 202-488-5563, or via e-mail at fcc@bcpiweb.com. To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an e-mail to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202-418-0530 (voice), 202-418-0432 (TTY).

This is an exempt proceeding pursuant to § 1.1204(b) of the

Commission's rules. *Ex parte* presentations are permitted.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

BILLING CODE 6712-01-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 90

[WT Docket No. 06-142; FCC 06-107]

Private Land Mobile Services; Stolen Vehicle Recovery Systems

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document addresses a petition for rulemaking filed by LoJack Corporation (LoJack) on October 25, 2004. We initiate this rulemaking proceeding to seek comment on potential rule changes that could enhance Stolen Vehicle Recovery Systems (SVRS) operations. Specifically, we seek comment on proposed rules to permit increased mobile output power, the use of digital emissions, and to relax the limitations on duty cycles. We also seek comment on authorizing mobile transceivers by rule and the merits of broadening the scope to permit the use of frequency 173.075 MHz for operations other than SVRS. The purpose of this document is to develop a record in the rulemaking proceeding that will be utilized to determine what, if any, rule changes would serve the public interest.

DATES: Submit comments on or before September 22, 2006 and reply comments are due October 10, 2006.

ADDRESSES: You may submit comments, identified by WT Docket No. 06-142; FCC 06-107, by any of the following methods:

- Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.

- Federal Communications Commission's Web site: <http://www.fcc.gov/cgb/ecfs/>. Follow the instructions for submitting comments.

- People with Disabilities: Contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by e-mail: FCC504@fcc.gov or phone 202-418-0530 or TTY: 202-418-0432.

For detailed instructions for submitting comments and additional information on the rulemaking process,

see the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT:

Rodney Conway,

Rodney.Conway@FCC.gov, Public Safety and Critical Infrastructure Division, Wireless Telecommunications Bureau, (202) 418-2904, TTY (202) 418-7233.

SUPPLEMENTARY INFORMATION: This is a summary of the Federal Communications Commission's *Notice of Proposed Rulemaking* (NPRM), WT Docket No. 06-142, FCC 06-107, adopted July 19, 2006, and released July 24, 2006. The full text of this document is available for inspection and copying during normal business hours in the FCC Reference Center, 445 12th Street, SW., Room CY-A257, Washington, DC 20554. The complete text may be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., Portals II, 445 12th Street, Suite CY-B402, Washington, DC 20554. Alternative formats are available for people with disabilities (Braille, large print, electronic files, audio format), by sending an e-mail to FCC504@fcc.gov or calling the Consumer and Government Affairs Bureau at (202) 418-0530 (voice), (202) 418-0432 (TTY).

1. LoJack seeks amendment of section 90.20(e)(6) of the rules in order to modify the technical requirements of SVRS operations and broaden the scope of services offered on frequency 173.075 MHz. LoJack submits that many of its requested rule changes are necessary due to the transition of the SVRS frequency (173.075 MHz) from wideband to narrowband operations.

2. *Maximum Base Station ERP and VLU Output Power.* LoJack is seeking increases in the permissible base station ERP from 300 watts to 500 watts, and output power for mobile transceivers from 2.5 watts to 5 watts. It indicates that the increases are needed because the required reduction in the bandwidth of the 173.075 MHz frequency will reduce the range of both the base station and the mobile transceiver (*i.e.*, VLU).

3. Accordingly, we request comments that offer definitive technical justification for the requested increase in base station ERP. Such technical justification must show the degree, if any, that narrowband operation would degrade the performance of LoJack's system and the calculations underlying the degradation assessment. In addition, commenting parties supporting an increase in base station power will need to explain how such an increase would not unreasonably increase the potential for the base stations to interfere with television Channel 7 analog and digital reception. However, given the lower

potential for VLUs to cause interference to TV Channel 7 reception, we seek comment on increasing the maximum VLU power limit from 2.5 watts to 5 watts.

4. *Use of Digitally Modulated Emissions.* LoJack seeks to eliminate the limitation on emissions allowed on the SVRS frequency, so that it can use either analog or digital emissions, as appropriate, in order to take advantage of technological developments that have occurred since the LoJack system was first implemented.

5. We encourage parties to express their views on the use of additional emission designators on the SVRS frequency in their comments in response to this *NPRM*. In particular, commenters should address whether it would be more appropriate to add specific emission designators to the rule, or to simply eliminate any restriction on permissible emission designators.

6. *Limitations on Duty Cycles.* LoJack seeks to eliminate all limitations on SVRS duty cycles currently contained in the Commission's rules. LoJack acknowledges, the Commission decided in 2002 not to grant a similar request to eliminate the duty cycle restrictions, based primarily on a concern over potential interference to TV Channel 7 reception and a perceived need to keep the band accessible to Federal Government users. Therefore, we seek comment on whether the complete elimination of the duty cycle restrictions contained in the Commission's Rules is appropriate under the circumstances presented.

7. We nonetheless believe that some form of relief from the duty cycle restrictions for base station and VLUs is needed in order to help offset system performance difficulties when LoJack operates in a dual wideband and narrowband mode pending its complete transition to a narrowband operation. A potential bottleneck for operation of LoJack's SVRS systems during the transition period appears to be in the operation of the base stations. During that transition period, both narrowband and wideband SVRS systems will be operated from the same base stations. Accordingly, the base stations will be expected to handle twice the volume of transmissions of a single system. Hence, there is a need to increase the amount of time that the base stations may operate. In lieu of eliminating the duty cycle restrictions entirely, we propose to increase the duty cycle for SVRS base stations from one second for every minute, to five seconds for every minute. This would represent a 500 percent increase in the amount of time

during which the SVRS base stations may operate. This five-fold increase in the duty cycle for base stations would provide significantly more time during which those stations may operate and, thus, should provide ample flexibility to accommodate operation of both narrowband and wideband SVRS systems without degrading the existing SVRS operations. We also propose to retain the five-second restriction for base stations after the transition period to narrowband operation is complete. We seek comment on our proposal to increase the base station duty cycle. We particularly seek comment with respect to the effect of an increased duty cycle on TV Channel 7 reception.

8. In addition, we propose to increase the duty cycle for narrowband VLUs from 200 milliseconds for every ten seconds to 400 milliseconds for every ten seconds. Correspondingly, we propose to increase the duty cycle for narrowbanded mobile transceivers that are being tracked actively from 200 milliseconds for every second to 400 milliseconds for every second. We believe this supplementary duty cycle for the mobile transceivers will improve the reliability of the SVRS system consistent with avoidance of interference to TV Channel 7 reception. We seek comment on the appropriateness of relaxing the duty cycle limits for mobile units.

9. *Channel 7 Interference Studies.* LoJack also requests that we eliminate the requirement for TV Channel 7 interference studies. LoJack argues that the studies are technically and financially onerous, with no demonstrable benefit. To support this request, LoJack asserts that during the twenty years that it has been required to conduct the studies, there have been no complaints of interference and no findings of perceptible interference to viewers of TV Channel 7. LoJack believes that, given the absence of predicted or reported interference, the requirement for TV Channel 7 interference studies should be eliminated.

10. The Commission adopted the TV Channel 7 study requirement to minimize the potential for SVRS operations to cause interference to the reception of over-the-air TV Channel 7 transmissions. Careful planning is required for the location of SVRS base stations in order to avoid their placement in locations where interference problems are likely to occur. This study requirement provides a means to identify specific locations where interference to over-the-air TV Channel 7 broadcasts is likely to occur from the operation of SVRS base

stations. Given that the Commission has repeatedly said that the TV Channel 7 interference study requirement is an important part of "our overall strategy to avoid the occurrence of harmful interference," it does not appear that LoJack has submitted sufficient information that would justify the removal of the requirement. We invite comment on whether the TV Channel 7 study requirement should be eliminated, and on alternative measures that could be adopted to accomplish the same purpose.

11. *Licensing Mobile Transceivers by Rule.* SVRS operations have been of significant, but necessarily limited, benefit to the public because economic factors have precluded installation of a network of base stations that would provide ubiquitous SVRS coverage nationwide. LoJack proposes to leverage cellular technology to activate VLUs in an effort to overcome this limitation. Employing existing cellular infrastructure could make it possible for law enforcement authorities equipped with vehicle tracking units (VTUs) to activate, track, and deactivate VLUs in stolen vehicles in areas where there are no police base station licensees. Thus, LoJack requests that SVRS VLUs be "licensed by rule" in order to permit nationwide activation by mobile telephony transmissions. While we believe it is possible that SVRS operations could eventually be provided on a nationwide basis without modification of our current licensing approach, it may be more expeditious and efficient to permit hybrid licensing of SVRS systems by rule.

12. SVRS mobile units are currently authorized under the base station license. In other words, the base station licensee must obtain all required authorizations, including those necessary to operate mobiles on the system. However, we recognize that there is precedent for authorizing radio operation by rule instead of by individual licensing.

13. We invite comment on whether the public interest would be served by licensing SVRS VLUs by rule. Here, licensing SVRS mobile transceivers by rule seems practicable because it would permit rapid deployment of a system that could offer truly nationwide coverage by allowing the activation and deactivation of the units via the existing cellular telephone infrastructure. This would appear to greatly lessen the need to construct additional base stations to increase the coverage area of existing SVRS systems. We also note that the Commission previously adopted licensing by rule in the context of Radio Control Service, the operation of which

is similar SVRS, in that both involve transmitting non-voice communications over short distances. Would licensing mobile units by rule minimize regulatory burdens on both licensees and the Commission and, thus, facilitate deployment of SVRS operations? What need, if any, would be served by continuing to license SVRS mobiles under base station authorizations? Interested parties also should address whether a VLU notification or registration procedure would serve a useful administrative purpose. Is such a procedure needed to provide a reliable indication of channel occupancy, or should the Commission utilize other regulatory approaches for spectrum management purposes (e.g., equipment certification and/or operating rules)? Would some other method be preferable over notifying the Commission directly of VLU usage?

14. We also believe that compliance and related issues should be considered. Under our current rules, the base station licensee, normally the police department, ultimately is responsible for the proper operation of the SVRS system: the base stations, VTUs, and VLUs. Under an authorization-by-rule scheme, who will be responsible for ensuring compliant conduct of the mobile operations? Where there is no individual licensing, how will the Commission enforce its rules if a user of an SVRS mobile unit violates our regulations, as in the case of a malfunctioning mobile unit that causes interference? As noted above, SVRS licensees operate on a co-primary basis with Federal Government operations. Consequently, base stations must be coordinated with the Federal Government prior to licensing. Because the Federal Government is thus aware of what geographic areas will have SVRS operations on frequency 173.075 MHz, Federal Government users can plan their operations so as not to cause interference to, or incur interference from, SVRS transmissions. We do not propose to change our processes regarding coordination of base stations. If, however, VLUs can operate in areas without base stations under a licensing-by-rule scheme, such coordination is impracticable, and it is not clear how Federal Government users could avoid causing or incurring interference on this shared frequency. It therefore may be appropriate for licensed-by-rule operations to be authorized on a secondary basis to Federal Government operations. It also may be appropriate to license by rule only narrowband VLUs, in order to reduce the potential for such

interference. We invite comment on all of these issues.

15. *The Scope of Section 90.20(e)(6) Operations.* Part 90 use of frequency 173.075 MHz is limited to the recovery of stolen vehicles; “general tracking and monitoring” has always been prohibited. LoJack seeks to permit additional services related to public safety, health and welfare, and national security, such as: (1) Tracking stolen articles, such as cargo containers, automated teller machines, or hazardous material; (2) addressing user emergencies by providing automatic collision notification, medical emergency or vehicle fire notification, and carjacking alerts; (3) tracking missing or wanted persons; (4) locating people at risk (such as Alzheimer’s patients or autistic children), or of interest to law enforcement officials (such as sex offenders, parolees, and individuals under house detention if established boundaries are violated); and (5) location on demand services authorized by public safety agencies.

16. We note LoJack’s argument that expanding the permissible use of frequency 173.075 MHz beyond the recovery of stolen vehicles could serve the public interest. A principal purpose of § 90.20(e)(6) of the Commission’s rules is to aid law enforcement, and it appears that SVRS operations can be put to additional uses in furtherance of that goal. We are concerned, however, by the breadth and vagueness of LoJack’s proposed expansion of uses, as overuse of the frequency could result in spectrum congestion and interference to Federal Government operations sharing the frequency, as well as to television Channel 7 analog and digital reception. We seek comment on what particular additional uses of frequency 173.075 MHz should be authorized. Commenters should explain how such purposes aid law enforcement, and why such purposes cannot or should not be served via other means.

I. Procedural Matters

A. Ex Parte Rules—Permit-but-Disclose Proceeding

17. This is a permit-but-disclose notice and comment rulemaking proceeding. *Ex parte* presentations are permitted, except during the Sunshine Agenda period, provided they are disclosed as provided in the Commission’s Rules.

B. Comment Dates

18. Pursuant to §§ 1.415 and 1.419 of the Commission’s rules, interested parties may file comments on or before

September 22, 2006, and reply comments are due October 10, 2006.

19. Commenters may file comments electronically using the Commission’s Electronic Comment Filing System (ECFS), the Federal Government’s eRulemaking Portal, or by filing paper copies. Commenters filing through the ECFS can be sent an electronic file via the Internet to <http://www.fcc.gov/e-file/ecfs.html>. If multiple docket or rulemaking numbers appear in the caption of this proceeding, filers must transmit one electronic copy for each docket or rulemaking number referenced in the caption. In completing the transmittal screen, commenters should include their full name, U.S. Postal Service mailing address, and the applicable docket or rulemaking number. Commenters may also submit an electronic comment by Internet e-mail. To get filing instructions for e-mail comments, commenters should send an e-mail to ecfs@fcc.gov, and should include the following words in the body of the message, “get form.” Commenters will receive a sample form and directions in reply. Commenters filing through the Federal eRulemaking Portal <http://www.regulations.gov>, should follow the instructions provided on the Web site for submitting comments.

20. Commenters who chose to file paper comments must file an original and four copies of each comment. If more than one docket or rulemaking number appears in the caption of this proceeding, filers must submit two additional copies for each additional docket or rulemaking number. All filings must be sent to the Commission’s Secretary, Office of the Secretary, Federal Communications Commission, 445 12th Street, SW., Room TW-A325, Washington, DC 20554.

21. Commenters may send filings by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. The Commission’s contractor will receive hand-delivered or messenger-delivered paper filings for the Commission’s Secretary at 236 Massachusetts Avenue, NE., Suite 110, Washington, DC 20002. The filing hours at this location are 8 a.m. to 7 p.m. Commenters must bind all hand deliveries together with rubber bands or fasteners and must dispose of any envelopes before entering the building. This facility is the only location where the Commission’s Secretary will accept hand-delivered or messenger-delivered paper filings. Commenters must send commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) to 9300 East Hampton Drive, Capitol Heights, MD 20743.

Commenters should address U.S. Postal Service first-class mail, Express Mail, and Priority Mail to 445 12th Street, SW., Washington, DC 20554.

22. Interested parties may view documents filed in this proceeding on the Commission's Electronic Comment Filing System (ECFS) using the following steps: (1) Access ECFS at <http://www.fcc.gov/cgb/ecfs>. (2) In the introductory screen, click on "Search for Filed Comments." (3) In the "Proceeding" box, enter the *numerals* in the docket number. (4) Click on the box marked "Retrieve Document List". A link to each document is provided in the document list. Filings and comments are also available for public inspection and copying during regular business hours at the FCC Reference Information Center, 445 12th Street, SW., Room CY-A257, Washington, DC 20554. Filings and comments also may be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., Portals II, 445 12th Street, SW., Room CY-B402, Washington, DC 20554, telephone 1-800-378-3160, or via e-mail <http://www.bcpweb.com>.

C. Paperwork Reduction Act

23. This document does not contain proposed information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104-13. In addition, therefore, it does not contain any proposed information collection burden "for small business concerns with fewer than 25 employees," pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, *see* 44 U.S.C. 3506(c)(4).

II. Initial Regulatory Flexibility Analysis

24. As required by the Regulatory Flexibility Act (RFA), the Commission has prepared this present Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on small entities by the policies and rules proposed in the *Notice of Proposed Rulemaking*. Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments on the Notice of Proposed Rulemaking provided in the item. The Commission will send a copy of the *Notice of Proposed Rulemaking*, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration. In addition, the *Notice of Proposed Rulemaking* and IRFA (or summaries thereof) will be published in the **Federal Register**.

Need for, and Objectives of, the Proposed Rules

25. The purpose of the *NPRM* is to determine whether it would be in the public interest, convenience and necessity to amend our rules governing the use of frequency 173.075 MHz for stolen vehicle recovery systems (SVRS). In the *NPRM*, we propose revising § 90.20(e)(6) of the Commission's rules to permit increased mobile power, analog and digital emissions, in addition to the F1D and F2D modulation schemes already permitted by the Commission, and relaxing the limitations on duty cycles. We also propose authorizing mobile transceivers by rule rather than by the current practice of licensing mobiles with individual base station authorizations. Finally, we inquire into the merits of broadening the scope of § 90.20(e)(6) to permit the use of frequency 173.075 MHz for other than SVRS operations. These rule changes could enhance SVRS operations, assist SVRS facilities in their migration to narrowband technology, and aid in the expeditious and efficient implementation of SVRS operations, thus serving the public interest.

Legal Basis

26. Authority for issuance of this *NPRM* is contained in sections 4(i), 303(r), and 332(a)(2) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 303(r), 332(a)(2).

Description and Estimate of the Number of Small Entities to Which the Proposed Rules Will Apply

27. The RFA directs agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the proposed rules, if adopted. Under the RFA, small entities may include small organizations, small businesses, and small governmental jurisdictions. The RFA generally defines "small business" as having the same meaning as "small business concern" under the Small Business Act. A small business concern is one that: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA). A small organization is generally "any not-for-profit enterprise which is independently owned and operated and is not dominant in its field."

28. Nationwide, as of 1992, there were approximately 275,801 small organizations. "Small governmental jurisdiction" generally means

"governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than 50,000." As of 1992, there were approximately 85,006 such jurisdictions in the United States. This number includes 38,978 counties, cities, and towns; of these, 37,566, or ninety-six percent, have populations of fewer than 50,000. The Census Bureau estimates that this ratio is approximately accurate for all governmental entities. Thus, of the 85,006 governmental entities, we estimate that 81,600 (ninety-one percent) are small entities.

29. The proposed rule amendments may affect users of Public Safety Radio Pool services and private radio licensees that are regulated under part 90 of the Commission's rules, and Federal Governmental entities. The proposals may also provide marketing opportunities for radio manufacturers, some of which may be small businesses. Beyond this we are unable to quantify the potential effects on small entities. We, therefore, invite specific comments on this point by interested parties.

Public Safety Radio Services and Governmental entities

30. As a general matter, Public Safety Radio Services include police, fire, local government, forestry conservation, highway maintenance, and emergency medical services. Neither the Commission nor the SBA has developed a definition of small businesses directed specifically toward public service licensees. Therefore, the applicable definition of small business is the definition under the SBA rules applicable to Cellular and other Wireless Telecommunications. This provides that a small business is a radiotelephone company employing no more than 1,500 persons. According to the Bureau of the Census, only twelve radiotelephone firms from a total of 1,178 such firms that operated during 1992 had 1,000 or more employees. Therefore, even if all twelve of these firms were public safety licensees, nearly all would be small businesses under the SBA's definition, if independently owned and operated.

Equipment Manufacturers

31. We anticipate that at least six radio equipment manufacturers could be affected by our decision in this proceeding. According to the SBA's regulations, a radio and television broadcasting and wireless communications equipment manufacturing businesses must have 750 or fewer employees in order to qualify as a small business concern.

Census Bureau data indicate that there are 858 U.S. firms that manufacture radio and television broadcasting and communications equipment, and that 778 of these firms have fewer than 750 employees and would therefore be classified as small entities. We do not have information that indicates how many of the six radio equipment manufacturers associated with this proceeding are among these 778 firms. Motorola, however, is a major, nationwide radio equipment manufacturer, and thus, we conclude that it would not qualify as a small business.

Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

32. The *NPRM* neither proposes nor anticipates any additional reporting, recordkeeping or other compliance measures.

Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

33. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.

34. The *NPRM* solicits comment on various proposals set forth herein. For example, the Commission seeks comment on its proposal to authorize use of frequency 173.075 MHz by rule rather than by individual licensing. These proposals are made to reduce the regulatory burden for SVRS licensees, most of whom are small police entities.

Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

35. None.

III. Ordering Clauses

36. Pursuant to sections 4(i), 303(f) and (r), and 332 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 303(f), 303(r), 332, this *Notice of Proposed Rulemaking* is adopted.

37. It is further ordered that the Commission's Consumer and Government Affairs Bureau, Reference

Information Center, shall send a copy of the *Notice of Proposed Rulemaking* including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

List of Subjects in 47 CFR Part 90

Communications equipment, Radio.

Federal Communications Commission.

William F. Caton,

Deputy Secretary.

Proposed Rules

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 90 as follows:

PART 90—PRIVATE LAND MOBILE RADIO SERVICES

1. The authority citation for part 90 continues to read as follows:

Authority: Sections 4(i), 11, 303(g), 303(r) and 332(c)(7) of the Communications Act of 1934 as amended, 47 U.S.C. 154(i), 161, 303(g), 303(r), 332(c)(7).

2. Section 90.20 is amended by revising paragraph (e)(6) to read as follows:

§ 90.20 Public Safety Pool.

* * * * *

(e) * * *

(6) The frequency 173.075 MHz is available for stolen vehicle recovery systems on a shared basis with the Federal Government.

(i) Base station transmitters are limited to 300 watts ERP, regardless of the maximum authorized bandwidth.

(ii) Mobile transmitters operating on this frequency with emissions authorized in a maximum bandwidth of 12.5 kHz are limited to 5.0 watts power output. Mobile transmitters operating on this frequency with emissions authorized in a maximum bandwidth of 20 kHz are limited to 2.5 watts power output.

(iii) Any modulation scheme may be used.

(iv) Transmissions from mobiles authorized to operate with a maximum bandwidth of 20 kHz shall be limited to 200 milliseconds for every 10 seconds, except when a vehicle is being tracked actively transmissions are limited to 200 milliseconds for every second; transmissions for mobiles authorized to operate with a maximum bandwidth of 12.5 kHz shall be limited to 400 milliseconds for every 10 seconds, except when a vehicle is being tracked actively transmissions are limited to 400 milliseconds for every second.

Alternatively, transmissions from mobiles regardless of their maximum

emission bandwidth shall be limited to 1800 milliseconds for every 300 seconds with a maximum of six such messages in any 30 minute period.

(v) Transmissions from base stations shall be limited to a total rate of five seconds every minute regardless of the maximum authorized bandwidth.

(vi) Applications for base stations operating on this frequency shall require coordination with the Federal Government. Applicants shall perform an analysis for each base station that is located within 169 km (105 miles) of a TV Channel 7 transmitter of potential interference to TV Channel 7 viewers. Such base stations will be authorized if the applicant has limited the interference contour to include fewer than 100 residences or if the applicant:

(A) Shows that the proposed site is the only suitable location (which, at the application stage, requires a showing that the proposed site is especially well-suited to provide the proposed service);

(B) Develops a plan to control any interference caused to TV reception from operations; and

(C) Agrees to make such adjustments in the TV receivers affected as may be necessary to eliminate interference caused by its operations. The licensee must eliminate any interference caused by its operation to TV Channel 7 reception within 30 days after notification in writing by the Commission. If this interference is not removed within this 30-day period, operation of the base station must be discontinued. The licensee is expected to help resolve all complaints of interference.

[FAR Case 2005-017; Docket 2006-0020; Sequence 6]

RIN 9000-AK53

Federal Acquisition Regulation; FAR Case 2005-017, Requirement to Purchase Approved Authentication Products and Services

AGENCIES: Department of Defense (DoD), General Services Administration (GSA),

and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) are proposing to amend the Federal Acquisition Regulation (FAR) to address the acquisition of products and services for personal identity verification that comply with requirements in Homeland Security Presidential Directive (HSPD) 12, "Policy for a Common Identification Standard for Federal Employees and Contractors," and Federal Information Processing Standards Publication (FIPS PUB) 201, "Personal Identity Verification of Federal Employees and Contractors".

DATES: Interested parties should submit written comments to the FAR Secretariat on or before October 23, 2006 to be considered in the formulation of a final rule.

ADDRESSES: Submit comments identified by FAR case 2005-017 by any of the following methods:

- Federal eRulemaking Portal: <http://www.regulations.gov>. Search for this document at the "Federal Acquisition Regulation" agency and review the "Document Title" column; click on the Document ID number. Click on "comments".

You may also search for any document using the "Advanced search/document search" tab, selecting from the agency field "Federal Acquisition Regulation", and typing the FAR case number in the keyword field.

- Fax: 202-501-4067.
- Mail: General Services Administration, Regulatory Secretariat (VIR), 1800 F Street, NW, Room 4035, ATTN: Laurieann Duarte, Washington, DC 20405.

Instructions: Please submit comments only and cite FAR case 2005-017 in all correspondence related to this case. All comments received will be posted without change to <http://www.regulations.gov>, including any personal and/or business confidential information provided.

FOR FURTHER INFORMATION CONTACT: For clarification of content, contact Mr. Michael Jackson, Procurement Analyst, at (202) 208-4949. For information pertaining to status or publication schedules, contact the FAR Secretariat at (202) 501-4755. Please cite FAR case 2005-017.

SUPPLEMENTARY INFORMATION:

A. Background

Increasingly, contractors are required to have physical access to federally controlled facilities and information systems in the performance of Government contracts. On August 27, 2004, in response to the general threat of unauthorized access to physical facilities and information systems, the President issued Homeland Security Presidential Directive (HSPD) 12. The primary objectives of HSPD-12 are to establish a process to enhance security, increase Government efficiency, reduce identity fraud, and protect personal privacy by establishing a mandatory, Governmentwide standard for secure and reliable forms of identification issued by the Federal Government to its employees and contractors. In accordance with HSPD-12, the Secretary of Commerce issued on February 25, 2005, Federal Information Processing Standards Publication (FIPS PUB) 201, Personal Identity Verification of Federal Employees and Contractors, to establish a Governmentwide standard for secure and reliable forms of identification for Federal and contractor employees. FIPS PUB 201 is available at http://www.smartcardalliance.org/pdf/industry_info/FIPS_201_022505.pdf. The associated Office of Management and Budget (OMB) guidance, M-05-24, dated August 5, 2005, can be found at <http://www.whitehouse.gov/omb/memoranda/fy2005/m05-24.pdf>.

In accordance with requirements in HSPD-12 and OMB Memorandum M-05-24, agencies must—

(a) Issue and require the use of identity credentials that are compliant with the technical requirements of FIPS PUB 201 and associated guidance issued by the National Institute for Standards and Technology in the areas of personal authentication, access controls and card management; and

(b) Agencies may acquire authentication products and services that are approved to be compliant with the FIPS PUB 201 through Special Item Number (SIN) 132-62, HSPD-12 Product and Service Components, made available by GSA under Federal Supply Schedule 70. GSA is developing an informational Web site (idmanagement.gov) that will provide a one-stop shop for citizens, businesses, and government entities interested in identity management activities. The site will provide information on HSPD-12 and eAuthentication acquisition vehicles and processes.

This proposed rule revises Subpart 4.13 by adding two new sections on the scope of the subpart, and the acquisition of approved products and services; the

existing sections are revised and renumbered. This is not a significant regulatory action and, therefore, was not subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

The changes may have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* HSPD-12 requires agencies to procure PIV products and services that comply with the FIPS PUB 201 standard. NIST has established the NIST Personal Identity Verification Program (NPIVP) (<http://csrc.nist.gov/npivp>) to validate Personal Identity Verification (PIV) components and sub-systems required by Federal Information Processing Standards Publication (FIPS PUB) 201 that meet the NPIVP requirements. The validation tests are performed by third party laboratories that are accredited through NIST's National Voluntary Laboratory Accreditation Program.

Vendors are required to obtain validation testing and certification from an accredited laboratory. The testing is performed on a fee basis. The number and extent of testing will depend on the nature of the product or service being tested. The test protocols are still under development. The impact on small entities will, therefore, be variable depending on the nature of the product/service being validated. These standards and testing policies may affect small business concerns in terms of their ability to compete and win Federal contracts. The extent of the effect and impact on small business concerns is unknown and will vary by product and service due to the wide variances among product and service functionality and design. An Initial Regulatory Flexibility Analysis (IRFA) has been prepared. The analysis is summarized as follows:

1. *Description of the reasons why the action is being taken.*

This proposed rule amends the Federal Acquisition Regulation to implement the provisions of Homeland Security Presidential Directive 12 (HSPD-12) and Federal Information Processing Standards Publication Number 201 (FIPS PUB 201).

2. *Succinct statement of the objectives of, and legal basis for, the rule.*

The rule implements the provisions of HSPD-12 that require agencies to purchase PIV products and services that are approved to comply with the FIPS PUB 201 standard and that are interoperable among agencies.

3. *Description of and, where feasible, estimate of the number of small entities to which the rule will apply.*

The FAR rule requires that agencies acquire PIV products and services that comply with the FIPS PUB 201 standard. The impact on small entities will, therefore, vary depending on the approval process for vendor products and services.

4. *Description of projected reporting, recordkeeping, and other compliance requirements of the rule, including an estimate of the classes of small entities which will be subject to the requirement and the type of professional skills necessary for preparation of the report or record.*

The rule does not impose any new reporting, recordkeeping, or compliance requirements.

5. *Identification, to the extent practicable, of all relevant Federal rules which may duplicate, overlap, or conflict with the rule.*

The rule does not duplicate, overlap, or conflict with any other Federal rules.

6. *Description of any significant alternatives to the rule which accomplish the stated objectives of applicable statutes and which minimize any significant economic impact of the rule on small entities.*

There are no practical alternatives that will accomplish the objectives of HSPD-12.

The FAR Secretariat has submitted a copy of the IRFA to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the IRFA may be obtained from the FAR Secretariat. The Councils will consider comments from small entities concerning the affected FAR Part 4 in accordance with 5 U.S.C. 610. Comments must be submitted separately and should cite 5 U.S.C 601, *et seq.* (FAR case 2005-017), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the proposed changes to the FAR do not impose information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 4

Government procurement.

Dated: August 17, 2006.

Ralph De Stefano,

Director, Contract Policy Division.

Therefore, DoD, GSA, and NASA propose amending 48 CFR part 4 as set forth below:

PART 4—ADMINISTRATIVE MATTERS

1. The authority citation for 48 CFR part 4 continues to read as follows:

Authority: 40 U.S.C. 121(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Revise Subpart 4.13 to read as follows:

Subpart 4.13—Personal Identity Verification

Sec.

4.1300 Scope of subpart.

4.1301 Contractual implementation of personal identity verification requirement.

4.1302 Acquisition of approved products and services for personal identity verification.

4.1303 Contract clause.

4.1300 Scope of subpart.

This subpart provides policy and procedures associated with Personal Identity Verification as required by—

(a) Federal Information Processing Standards Publication (FIPS PUB) Number 201, “Personal Identity Verification of Federal Employees and Contractors”; and

(b) Office of Management and Budget (OMB) guidance M-05-24, dated August 5, 2005, “Implementation of Homeland Security Presidential Directive (HSPD) 12—Policy for a Common Identification Standard for Federal Employees and Contractors”.

4.1301 Contractual implementation of personal identity verification requirement.

(a) Agencies must follow FIPS PUB 201 and the associated OMB implementation guidance for personal identity verification for all affected contractor and subcontractor personnel when contract performance requires contractors to have physical access to a federally-controlled facility or access to a Federal information system.

(b) Agencies must include their implementation of FIPS PUB 201 and OMB guidance M-05-24, in solicitations and contracts that require the contractor to have physical access to a federally-controlled facility or access to a Federal information system.

(c) Agencies must designate an official responsible for verifying contractor employee personal identity.

4.1302 Acquisition of approved products and services for personal identity verification.

(a) In order to comply with FIPS PUB 201, agencies must only purchase approved personal identity verification products and services. Agencies may acquire the approved products and services from the GSA, Federal Supply Schedule 70, Special Item Number (SIN) 132-62, HSPD-12 Product and Service Components.

(b) When acquiring personal identity verification products and services not using the process in paragraph (a) of this section, agencies must ensure that the applicable products and services are approved as compliant with FIPS PUB 201 including—

(1) Certifying the products and services procured meet all applicable Federal standards and requirements;

(2) Ensuring interoperability and conformance to applicable Federal standards for the lifecycle of the components; and

(3) Maintaining a written plan for ensuring ongoing conformance to applicable Federal standards for the lifecycle of the components.

4.1303 Contract clause.

The Contracting Officer shall insert the clause at 52.204-9, Personal Identity Verification of Contractor Personnel, in solicitations and contracts when contract performance requires contractors to have physical access to a federally-controlled facility or access to a federally-controlled information system.

BILLING CODE 6820-EP-S

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 531

[Docket No. NHTSA-2006-25593]

Exemptions From Average Fuel Economy Standards; Passenger Automobile Average Fuel Economy Standards

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Proposed Decision to Grant Exemption.

SUMMARY: This proposed decision responds to a petition filed by Spyker Automobielen B.V. (Spyker) requesting that it be exempted from the generally applicable average fuel economy standard of 27.5 miles per gallon (mpg) for model years 2006 and 2007, and that, for Spyker, lower alternative standards be established. In this document, NHTSA proposes that the requested exemption be granted to Spyker and that alternative standards of 18.9 mpg be established for MY's 2006 and 2007.

DATES: Comments on this proposed decision must be received on or before September 22, 2006.

ADDRESSES: You may submit comments by any of the following methods:

- Web site: <http://dms.dot.gov>. Follow the instructions for submitting comments on the DOT electronic docket site.
- Fax: 1-202-493-2251.
- Mail: Docket Management Facility; U.S. Department of Transportation, 400

Seventh Street, SW., Nassif Building, Room PL-401, Washington, DC 20590-001.

- Hand Delivery: Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

- Federal eRulemaking Portal: Go to <http://www.regulations.gov>. Follow the online instructions for submitting comments.

Instructions: All submissions must include the agency name and docket number or Regulatory Identification Number (RIN) for this rulemaking. For detailed instructions on submitting comments and additional information on the rulemaking process, see the Request for Comments heading of the **SUPPLEMENTARY INFORMATION** section of this document. Note that all comments received will be posted without change to <http://dms.dot.gov>, including any personal information provided. Please see the Privacy Act heading under Rulemaking Analyses and Notices.

Docket: For access to the docket to read background documents or comments received, go to <http://dms.dot.gov> at any time or to Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: For technical issues, contact Ken Katz, Lead Engineer, Fuel Economy Division, Office of International Policy, Fuel Economy, and Consumer Programs, at (202) 366-0846, facsimile (202) 493-2290, electronic mail kkatz@nhtsa.dot.gov. For legal issues, contact Stephen Wood of the Office of the Chief Counsel, at (202) 366-2992.

SUPPLEMENTARY INFORMATION:

Statutory Background

Pursuant to 49 U.S.C. section 32902(d), NHTSA may exempt a low volume manufacturer of passenger automobiles from the generally applicable average fuel economy standards if NHTSA concludes that those standards are more stringent than the maximum feasible average fuel economy for that manufacturer and if NHTSA establishes an alternative standard for that manufacturer at its maximum feasible level. Under the statute, a low volume manufacturer is one that manufactured (worldwide) fewer than 10,000 passenger automobiles in the second model year before the model year for which the exemption is sought (the affected model year) and that will manufacture fewer

than 10,000 passenger automobiles in the affected model year. In determining the maximum feasible average fuel economy, the agency is required under 49 U.S.C. 32902(f) to consider:

- (1) Technological feasibility
- (2) Economic practicability
- (3) The effect of other Federal motor vehicle standards on fuel economy, and
- (4) The need of the United States to conserve energy.

The statute permits NHTSA to establish alternative average fuel economy standards applicable to exempted low volume manufacturers in one of three ways: (1) A separate standard for each exempted manufacturer; (2) a separate average fuel economy standard applicable to each class of exempted automobiles (classes would be based on design, size, price, or other factors); or (3) a single standard for all exempted manufacturers.

Background Information on Spyker

Spyker is a Dutch company, which manufacturers limited-production sports cars, built to individual order. Spyker debuted its first in vehicle 2000. The company operations are located in Zeewolde, The Netherlands. The petitioner stated that in 2003, Spyker of North America LLC was incorporated in Delaware as a subsidiary of Spyker in order to address U.S. distribution. The petitioner also stated that in 2004, Spyker took the company public by means of an initial public offering. It is listed on the Amsterdam Stock Exchange.

As stated by petitioner, Spyker has teamed up with Cosworth Technologies, a 100 percent-owned subsidiary of Audi, to integrate the LEV V8 powertrain of the Audi A8 into the Spyker chassis.

The petitioner stated that it manufactured a total of 51 vehicles between 2002 and 2004, and projects that it will manufacture no more than 160 vehicles per year between 2005 and 2007. In 2006 and 2007, the years for which an alternative standard is requested, Spyker projects that 77 and 112 vehicles, respectively, will be exported to the U.S.

The Spyker Petition

NHTSA's regulations on low volume exemptions from CAFE standards state that petitions for exemption are submitted "not later than 24 months before the beginning of the affected model year, unless good cause for later submission is shown" (49 CFR 525.6(b)).

NHTSA received a petition from Spyker on May 11, 2005, seeking exemption from the passenger

automobile fuel economy standards for MYs 2006 and 2007. This petition was filed less than 24 months before the beginning of MYs 2006 and 2007 and was therefore untimely under 49 CFR 525.6(b). Spyker indicated that its decision to enter the U.S. market for MY 2006 was not made until late 2004 after it reached an agreement with Audi that allowed Spyker to use a U.S. certified powerplant.

Under the circumstances, NHTSA concludes that Spyker took reasonable measures to submit a petition in as timely a manner as possible. The agency notes that Spyker's ability to enter the U.S. market apparently hinged on obtaining a U.S.-certified powerplant. This, according to Spyker, was not possible or feasible until it reached an agreement with Audi to provide the required engine. Therefore, the agency has determined that good cause exists for the late submission of the petition. This is consistent with a previous determination made by the agency with regard to the timeliness of a petition submitted by DeTomaso Automobiles, Ltd. (see, 64 FR 73476; December 30, 1999; Docket No. NHTSA-99-6676).

Methodology Used To Project Maximum Feasible Average Fuel Economy Level for Spyker

Baseline Fuel Economy

To project the level of fuel economy which could be achieved by Spyker in the 2006 and 2007 model years, NHTSA considered whether there were technical or other improvements that would be feasible for these vehicles, and whether the company currently plans to incorporate such improvements in the vehicles. The agency reviewed the technological feasibility of any changes and their economic practicability.

NHTSA interprets "technological feasibility" as meaning that technology which would be available to Spyker for use on its 2006 and 2007 model year automobiles, and which would improve the fuel economy of those automobiles. The areas examined for technologically feasible improvements were weight reduction, aerodynamic improvements, engine improvements, drive line improvements, and reduced rolling resistance.

The agency interprets "economic practicability" for the purpose of petitions filed under 49 CFR part 525 as meaning the financial capability of the manufacturer to improve its average fuel economy by incorporating technologically feasible changes to its 2006 and 2007 model year automobiles. In assuming that capability, the agency has always considered market demand

as an implicit part of the concept of economic practicability. Consumers need not purchase what they do not want.

In accordance with the concerns of economic practicability, NHTSA has considered only those improvements that would be compatible with the basic design concepts of Spyker's automobile. Since NHTSA assumes that Spyker will continue to build high performance cars, design changes that would remove items traditionally offered on these types of vehicles were not considered. Such changes to the basic design would be economically impracticable since they might well significantly reduce the demand for these automobiles, thereby reducing sales and causing significant economic injury to the low volume manufacturer.

Technology for Fuel Economy Improvement

The nature of Spyker's vehicles generally do not result in high fuel economy values. Also, Spyker lags in having the latest developments in fuel efficiency technology because suppliers generally provide components and technology to small manufacturers only after supplying large manufacturers.

Spyker states that the requested alternative fuel economy values represent the best possible CAFE that Spyker can achieve for the 2006 and 2007 model years. For MYs 2006 and 2007, Spyker stated that the fuel economy value of 18.9 mpg¹ represents the best possible CAFE that it can achieve.

Spyker produces a small lightweight innovative sports vehicle. Performance is achieved through obtaining maximum output per unit of engine displacement and the use of lightweight aerodynamic body designs. The vehicle's compact dimensions provide efficient performance coupled with a strong and relatively lightweight aerodynamic body construction. Since the chassis/body configuration is small, aerodynamic and lightweight, further fuel economy improvements through changes to the chassis and body appear to be limited.

Spyker has stated that it is unable to change the supplier of the vehicle's engine and that the engine is the most advanced engine available to a small

vehicle manufacturer from an outside source. As such, the ability to obtain further fuel economy improvements from engine and drive train modifications is limited. The petitioner also stated that the fuel economy label values of the vehicle are similar to those of similar vehicles, e.g., Cadillac XLR, Dodge Viper, Porsche 911.

Model Mix

Spyker has no opportunity to improve its fuel economy by changing its fleet mix since it has stated that it will only export one model to the U.S. during the years for which this petition was filed.

Effect of Other Federal Motor Vehicle Standards

Federal motor vehicle safety standards (FMVSS) and regulations are anticipated to have an adverse effect on the fuel economy of Spyker's vehicles. These standards include 49 CFR part 581, Bumper Standard and FMVSS 208, *Occupant crash protection*. These standards may reduce achievable fuel economy values, since they result in increased vehicle weight. Spyker's projection reflected the impact of these standards. Spyker is a small company and engineering resources are limited, limiting the amount of resources Spyker can apply to comply with both the mandatory standards and the fuel economy requirements.

Additionally, as a small volume manufacturer, the more stringent California evaporative emission standards will apply to Spyker beginning in MY 2006, and the U.S. EPA Tier 2-LEV II exhaust standards will be applicable in MY 2007. A portion of Spyker's limited engineering resources will have to be expended to comply with these more stringent emissions standards including, but not limited to, evaporative emission standards.

The Need of the United States To Conserve Energy

The agency recognizes there is a need to conserve energy, to promote energy security, and to improve balance of payments. However, as stated above, NHTSA has tentatively determined that it is not technologically feasible or economically practicable for Spyker to achieve an average fuel economy in MYs 2006 and 2007 above the levels set forth in this proposed decision. Granting an exemption to Spyker and setting an alternative standard at that level would result in only a negligible increase in fuel consumption and would not affect the need of the United States to conserve energy. In fact, there would not be any increase since Spyker cannot

attain those generally applicable standards. Nevertheless, the agency estimates that the additional fuel consumed by operating the MYs 2006 and 2007 fleets of Spyker vehicles at the CAFE of 18.9 mpg (compared to a hypothetical 27.5 mpg fleet) is 13,138 barrels of fuel. Obviously, this is insignificant compared to the fuel used daily by the entire motor vehicle fleet, which amounts to 8.4 million barrels per day for passenger cars in the United States in 2003 (USDOE/EIA, Monthly Energy Review, April 2005, Table 11.2).

Maximum Feasible Average Fuel Economy for Spyker

The agency has tentatively concluded that it would not be technologically feasible and economically practicable for Spyker to improve the fuel economy of its MY 2006 and 2007 fleet above an average of 18.9 mpg for those years, that Federal automobile standards would not adversely affect achievable fuel economy beyond the amount already factored into Spyker's projections, and that the national effort to conserve energy would not be affected by granting the requested exemption and establishing an alternative standard.

Consequently, the agency tentatively concludes that the maximum feasible average fuel economy for Spyker is 18.9 mpg for MYs 2006 and 2007.

Chapter 329 permits NHTSA to establish an alternative average fuel economy standard applicable to exempted manufacturers in one of three ways: (1) A separate standard may be established for each exempted manufacturer; (2) classes, based on design, size, price or other factors, may be established for the automobiles of exempted manufacturers, with a separate fuel economy standard applicable to each class; or (3) a single standard may be established for all exempted manufacturers. The agency tentatively concludes that it would be appropriate to establish a separate standard for Spyker.

While the agency has the option of establishing a single standard for all exempted manufacturers, we note that previous exemptions have been granted to manufacturers of high-performance cars, luxury cars and specialized vehicles for the transportation of persons with physical impairments. The agency's experience in establishing exemptions indicates that selection of a single standard would be inappropriate. Such a standard would have little impact on energy conservation while doing little to ease the burdens faced by small manufacturers which cannot meet the fuel economy standards applicable to larger manufacturers. Similarly, the

¹ Spyker based this fuel economy on the combined fuel economy of 19.1 obtained at the U.S. EPA, reduced by 0.15 mpg in order to allow for potential production variation. As opposed to reducing 19.1 mpg value by 0.15 mpg, Spyker added 0.15 mpg to the value in the petition. Given that fuel economy compliance is determined in tenths of mpg, the agency confirmed with a representative of Spyker that the petition is requesting an alternative fuel economy requirement of 18.9 mpg.

agency is not proposing to establish alternative standards based on different classes of vehicles. Again, the agency's experience has been that vehicles manufactured by low volume manufacturers may differ widely in size, price, design or other factors. Based on the information available at this time, we do not believe it would be appropriate to establish class-based alternative standards.

Regulatory Impact Analyses

NHTSA has analyzed this proposal and determined that neither Executive Order 12866 nor the Department of Transportation's regulatory policies and procedures apply. Under Executive Order 12866, the proposal would not establish a "rule," which is defined in the Executive Order as "an agency statement of general applicability and future effect." The proposed exemption is not generally applicable, since it would apply only to Spyker, as discussed in this notice. Under DOT regulatory policies and procedures, the proposed exemption would not be a "significant regulation." If Departmental policies and procedures were applicable, the agency would have determined that this proposed action is not significant. The principal impact of this proposal is that the exempted company would not be required to pay civil penalties if its maximum feasible average fuel economy were achieved, and purchasers of those vehicles would not have to bear the indirect burden of those civil penalties in the form of higher prices. Since this proposal is for an alternative standard at the level tentatively determined to be the maximum feasible levels for Spyker for MYs 2006 and 2007, no fuel would be saved by establishing a higher alternative standard. NHTSA finds in the Section on "The Need of the United States to Conserve Energy" that because of the small size of the Spyker fleet, that incremental usage of gasoline by Spyker's customers would not affect the United States' need to conserve gasoline. There would not be any impacts for the public at large.

The agency has also considered the environmental implications of this proposed exemption in accordance with the Environmental Policy Act and

determined that this proposed exemption if adopted, would not significantly affect the human environment. Regardless of the fuel economy of the exempted vehicles, they must pass the emissions standards which measure the amount of emissions per mile traveled. Thus, the quality of the air is not affected by the proposed exemptions and alternative standards. Further, since the exempted passenger automobiles cannot achieve better fuel economy than is proposed herein, granting these proposed exemptions would not affect the amount of fuel used.

How You May Comment on the Spyker Application

We invite you to submit comments on the application described above. You may submit comments [identified by the DOT Docket number in the heading of this document] by any of the following methods:

- Web site: <http://dms.dot.gov>. Follow the instructions for submitting comments on the DOT electronic docket site by clicking on "Help and Information" or "Help/Info."
- Fax: 1-202-493-2251.
- Mail: Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street, SW., Nassif Building, Room PL-401, Washington, DC 20590.
- Hand Delivery: Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- Federal eRulemaking Portal: Go to <http://www.regulations.gov>. Follow the online instructions for submitting comments.

Instructions: All submissions must include the agency name and docket number or Regulatory Identification Number (RIN) for this rulemaking. Note that all comments received will be posted without change to <http://dms.dot.gov>, including any personal information provided.

Docket: For access to the docket in order to read background documents or comments received, go to <http://dms.dot.gov> at any time or to Room PL-401 on the plaza level of the Nassif Building, 400 Seventh Street, SW., Washington, DC, between 9 a.m. and 5

p.m., Monday through Friday, except Federal holidays.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477-78) or you may visit <http://dms.dot.gov>.

We will consider all comments received before the close of business on the comment closing date indicated below. To the extent possible, we shall also consider comments filed after the closing date. We will publish a notice of final action on the application in the **Federal Register** pursuant to the authority indicated below.

List of Subjects in 49 CFR Part 531

Energy conservation, Gasoline, Imports, Motor Vehicles.

In consideration of the foregoing, 49 CFR part 531 would be amended to read as follows:

PART 531—[AMENDED]

1. The authority citation for part 531 continues to read as follows:

Authority: 49 U.S.C. 32902, delegation of authority at 49 CFR 1.50.

2. Section 531.5 would be amended by adding paragraph (b)(15) to read as follows:

§ 531.5 Fuel economy standards.

* * * * *

(b) * * *

(15) Spyker Automobielen B.V.

AVERAGE FUEL ECONOMY STANDARD

Model year	(Miles per gallon)
2006	18.9
2007	18.9

Issued on: August 17, 2006.

Notices

Federal Register

Vol. 71, No. 163

Wednesday, August 23, 2006

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. FSIS 2006–0015C]

Nominations for Membership on the National Advisory Committee on Microbiological Criteria for Foods; Correction

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice; correction.

SUMMARY: The Food Safety and Inspection Service (FSIS) published a document in the **Federal Register** on June 23, 2006, concerning Nominations for Membership on the National Advisory Committee on Microbiological Criteria for Foods (NACMCF). Correction: In the **Federal Register** of June 23, 2006, Volume 71, Number 121, on page 36056, the last paragraph of the **SUPPLEMENTARY INFORMATION** section states that “Members (of the committee) are required to attend all meetings in-person as this is necessary for the functioning of the advisory committee.” As a point of clarification, the physical presence of members at subcommittee working groups and at plenary sessions is critical to the continued success of the work of NACMCF. However, we realize that unexpected events or extenuating circumstances (e.g., a personal or family emergency) may result in a member’s inability to attend a meeting in-person, and that attendance through teleconferencing may be necessary. Since this has been a less than optimal means to contribute to the work of the committee, members should make efforts to attend all meetings to the extent that it is possible to do so. In-person attendance is expected but is not a requirement. The Agency is publishing this corrected notice and is accepting nominations 30 calendar days from the date of the publication of this corrected notice.

FSIS is republishing in this notice the entire contents from the prior **Federal Register** notice published on June 23, 2006—Nominations for Membership on the National Advisory Committee on Microbiological Criteria for Foods. The only changes in this correction notice are about the in-person attendance of NACMCF members at NACMCF meetings and the date for accepting nominations.

This corrected notice announces that the U.S. Department of Agriculture (USDA) is soliciting nominations for membership on the NACMCF. Nominations for membership are being sought from individuals with scientific expertise in the fields of epidemiology, food technology, microbiology (food, clinical, and predictive), risk assessment, infectious disease, biostatistics, and other related sciences. Persons from State and Federal governments, industry, consumer groups, and academia, as well as all other interested persons, are invited to submit nominations. Members who are not federal government employees will be appointed to serve as non-compensated special government employees (SGEs). SGEs will be subject to appropriate conflict of interest statutes and standards of ethical conduct.

The nominee’s typed resume or curriculum vitae must be limited to five one-sided pages and should include educational background, expertise, and a select list of publications. For submissions received that are more than five one-sided pages in length, only the first five pages will be considered.

DATES: The nominee’s typed resume or curriculum vitae must now be received by September 22, 2006.

ADDRESSES: Nominations should be sent to Ms. Karen Thomas, Advisory Committee Specialist, USDA, FSIS, Room 333 Aerospace Center, 1400 Independence Avenue, SW., Washington, DC 20250–3700, or by e-mail at karen.thomas@fsis.usda.gov.

FOR FURTHER INFORMATION CONTACT: Ms. Karen Thomas, Advisory Committee Specialist, at the above address or by telephone at 202–690–6620 or by fax at 202–690–6634.

SUPPLEMENTARY INFORMATION:

Background

The NACMCF was established in March 1988, in response to a

recommendation in a 1985 report of the National Academy of Sciences Committee on Food Protection, Subcommittee on Microbiological Criteria, “An Evaluation of the Role of Microbiological Criteria for Foods.” The current charter for the NACMCF and other information about the Committee are available for viewing on the NACMCF homepage at http://www.fsis.usda.gov/About_FSIS/NACMCF/index.asp.

The Committee provides scientific advice and recommendations to the Secretary of Agriculture and the Secretary of Health and Human Services concerning the development of microbiological criteria by which the safety and wholesomeness of food can be assessed. For example, the Committee assists in the development of criteria for microorganisms that indicate whether food has been processed using good manufacturing practices.

Appointments to the Committee will be made by the Secretary of Agriculture after consultation with the Secretary of Health and Human Services to ensure that recommendations made by the Committee take into account the needs of the diverse groups served by the Department. Membership shall include, to the extent practicable, individuals with demonstrated ability to represent minorities, women, and persons with disabilities.

Given the complexity of issues, the full Committee expects to meet at least twice yearly, and the meetings will be announced in the **Federal Register**. The subcommittees will meet as deemed necessary by the chairperson and will be held as working group meetings in an open public forum. The subcommittee meetings will not be announced in the **Federal Register**. FSIS will announce the agenda and subcommittee working group meetings through the Constituent Update, available on-line at http://www.fsis.usda.gov/News_&_Events/2006_Constituent_Update/index.asp. NACMCF holds subcommittee working group meetings in order to accomplish the work of the NACMCF; all work accomplished by the subcommittees is reviewed and approved by the full Committee during a public meeting of the full Committee, as announced in the **Federal Register**. The subcommittee may invite technical experts to present information for consideration by the subcommittee. All data and records

available to the full Committee are expected to be available to the public at the time the full Committee reviews and approves the work of the subcommittee.

Appointment to the Advisory Committee is for a two-year term, renewable for a total of three consecutive terms. Members are expected to attend all meetings in-person as this is necessary for the functioning of this advisory committee. However, we realize that unexpected events or extenuating circumstances (e.g., a personal or family emergency) may result in a member's inability to attend a meeting in-person, and that attendance through teleconferencing may be necessary. Since this has been a less than optimal means to contribute to the work of the committee, members should make efforts to attend all meetings to the extent that this is possible. In-person attendance is expected but is not a requirement.

Members must be prepared to work outside of scheduled Committee and subcommittee meetings, and may be required to assist in document preparation. Committee members serve on a voluntary basis; however, travel reimbursement and per diem are available.

Regarding Nominees Who Are Selected

All nominees who are selected must submit a USDA Advisory Committee Membership Background Information form AD-755, available on-line at: <http://www.fsis.usda.gov/FSISForms/AD-755.pdf>.

As new appointees, SGEs must complete the Office of Government Ethics (OGE) 450 Confidential Financial Disclosure Report, before rendering any advice, or prior to their first meeting. All members will be reviewed for conflict of interest pursuant to 18 U.S.C. 208 in relation to specific NACMCF work charges. Financial disclosure updates will be required annually. Members must report any changes in financial holdings requiring additional disclosure. OGE 450 forms are available on-line at: http://www.usoge.gov/pages/forms_pubs_otherdocs/fpo_files/forms/fr450fill_04.pdf.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, in an effort to ensure that minorities, women, and persons with disabilities are aware of this notice, FSIS will announce it on-line through the FSIS Web page located at http://www.fsis.usda.gov/regulations/2006_Notices_Index/. FSIS also will make copies of this **Federal Register** publication available through the FSIS

Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, recalls and other types of information that could affect or would be of interest to constituents and stakeholders. The update is communicated via Listserv, a free electronic mail subscription service for industry, trade and farm groups, consumer interest groups, allied health professionals and other individuals who have asked to be included. The update is available on the FSIS Web page. Through the Listserv and Web page, FSIS is able to provide information to a much broader and more diverse audience. In addition, FSIS offers an e-mail subscription service which provides automatic and customized access to selected food safety news and information. This service is available at http://www.fsis.usda.gov/news_and_events/email_subscription/. Options range from recalls to export information to regulations, directives and notices. Customers can add or delete subscriptions themselves and have the option to password protect their account.

Done at Washington, DC on: August 17, 2006.

BILLING CODE 3410-DM-P

DEPARTMENT OF AGRICULTURE

Forest Service

Availability of Appealable Decisions

AGENCY: Forest Service, USDA.

ACTION: Notice—Availability of appealable decisions; legal notice for availability for comment of decisions that may be appealable under 36 CFR part 215.

SUMMARY: Responsible Officials in the Rocky Mountain Region will publish notices of availability for comment and notices of decisions that may be subject to administrative appeal under 36 CFR part 215. These notices will be published in the legal notice section of the newspapers listed in the Supplementary Information section of this notice. As provided in 36 CFR 215.5, 215.6, and 215.7, such notice shall constitute legal evidence that the agency has given timely and constructive notice for comment and notice of decisions that may be subject to administrative appeal. Newspaper publication of notices of decisions is in

addition to direct notice to those who have requested notice in writing and to those known to be interested in or affected by a specific decision.

DATES: Use of these newspapers for the purpose of publishing legal notices for comment and decisions that may be subject to appeal under 36 CFR part 215 shall begin August 23, 2006 and continue until further notice.

ADDRESSES: Rocky Mountain Region, Attn: Regional Appeals Manager, P.O. Box 25127, Lakewood, CO 80225-0127.

FOR FURTHER INFORMATION CONTACT:
Diana Menapace, 303 275-5156.

SUPPLEMENTARY INFORMATION:

Responsible Officials in the Rocky Mountain Region will give legal notice of decisions that may be subject to appeal under 36 CFR part 215 in the following newspapers which are listed by Forest Service administrative unit. Where more than one newspaper is listed for any unit, the first newspaper listed is the primary newspaper which shall be used to constitute legal evidence that the agency has given timely and constructive notice for comment and for decisions that may be subject to administrative appeal. As provided in 36 CFR 215.15, the time frame for appeal shall be based on the date of publication of a notice for decision in the primary newspaper.

Notice by Regional Forester of Availability for Comment and Decisions:
The Denver Post, published daily in Denver, Denver County, Colorado, for decisions affecting National Forest System lands in the States of Colorado, Nebraska, Kansas, South Dakota, and eastern Wyoming and for any decision of Region-wide impact. In addition, notice of decisions made by the Regional Forester will also be published the day after in the *Rocky Mountain News*, published daily in Denver, Denver County, Colorado. For those Regional Forester decisions affecting a particular unit, the day after notice will also be published in the newspaper specific to that unit.

Arapaho and Roosevelt National Forests and Pawnee National Grassland, Colorado Notice by Forest Supervisor of Availability for Comment and Decisions:
The Denver Post, published daily in Denver, Denver County, Colorado.

Notice by District Rangers of Availability for Comment and Decisions:
Canyon Lakes District: Coloradoan, published daily in Fort Collins, Larimer County, Colorado.

Pawnee District: Greeley Tribune, published daily in Greeley, Weld County, Colorado.

BILLING CODE 3410-11-P

DEPARTMENT OF AGRICULTURE

Forest Service

Black Hills National Forest, Northern Hills Ranger District, South Dakota and Bearlodge Ranger District, Wyoming—North Zone Range 05 Proposal and Analysis

AGENCY: Forest Service, USDA.

ACTION: Revised notice of intent to prepare an environmental impact statement.

SUMMARY: This project will revise Rangeland Allotment Management Plans (RAMP) for eight allotments comprising about 79,634 acres within two Ranger Districts of the Black Hills National Forest, and analyze continued grazing within the constraints of the Revised Black Hills National Forest Land and Resource Management Plan, as amended (BHNF LRMP). A Notice of Intent to prepare an environmental impact statement for this project was published August 17, 2005 (70 FR 48369). More than six months have elapsed since the projected FEIS date in

that original NOI. This revised NOI is being issued to update the project schedule.

DATES: The Notice of Availability of the draft environmental impact statement was published in the **Federal Register** on July 7, 2006 (71 FR 38641). The final environmental impact statement is expected in September, 2006. No further formal public comment opportunities will be offered on this project.

FOR FURTHER INFORMATION CONTACT: Alice Allen, Project Coordinator, Black Hills National Forest, Hell Canyon Ranger District, at 330 Mt. Rushmore Rd., phone (605) 673-4853.

SUPPLEMENTARY INFORMATION:

Purpose and Need for Action: The purpose of the project is to authorize livestock grazing in an environmentally acceptable manner. The EIS will determine current conditions, analyze environmental consequences of grazing management actions on those conditions, and assist the decision maker in selecting management/monitoring strategies consistent with meeting desired conditions in the BHNF LRMP, including Goals 1, 2 and 3. The need for the action is to revise allotment management plans, reverse any existing undesirable conditions, and ensure that authorized uses and associated management activities move them towards desired BHNF LRMP conditions. There is also a need to respond to requests for grazing permits on lands not currently being grazed.

Proposed Action: The Northern Hills and Bearlodge Ranger Districts propose to implement best management practices and activities with adaptive management and monitoring strategies to allow livestock grazing consistent with Forest Plan desired conditions, standards and guidelines. The Proposed Action is Alternative A in the EIS.

Issues: Key issues include impacts of the proposal to soil and water quality; vegetative diversity; wildlife and wildlife habitat; economic efficiency of the proposal; timeframe for achieving desired conditions; and management of the recently acquired Besant Park, Tilson and Gonzales parcels.

Alternatives: Alternative B is similar to Alternative A, but would authorize livestock grazing on three additional recently acquired parcels and add these to adjacent existing allotments. Alternative D, the No Action Alternative, is the No Grazing Alternative and would eliminate any livestock grazing on the project area. Alternative E proposes the use of rest periods to achieve faster recovery of riparian areas. Alternative F would move the area toward desired

conditions by means of reduced stocking rates, mandatory use of range riders, or other non-structural adaptive management actions. No new range improvements are proposed. Alternative C, current management, was dismissed from detailed consideration.

Responsible Official

The Responsible Official for the allotments on the Bearlodge Ranger District is Steve Kozel, District Ranger, Black Hills National Forest, Bearlodge Ranger District, 121 S. 21st Street, Sundance, Wyoming 82729. The Responsible Official for the allotments on the Northern Hills Ranger District is the District Ranger, Black Hills National Forest, Northern Hills Ranger District, 2014 N. Main St., Spearfish, South Dakota 57783.

Nature of Decision To Be Made

The decision to be made is whether to continue to permit livestock grazing on all, part, or none of these allotments and, if so, under what terms and conditions to ensure that desired condition objectives are met, or that movement occurs toward those objectives. The Northern Hills District Ranger will also decide whether or not to allow livestock grazing on three recently acquired parcels and one vacant grazing unit, and if so, under what conditions.

Public Comment

Comments and input regarding the proposal were requested from the public, other groups and agencies via direct mailing on March 21, 2005. Additional comments were solicited during August and September 2005 via public notices and an additional direct mailing. The Draft EIS was issued for a 45-day public comment in July, 2006. No further formal public comment opportunities will be offered on this project.

Early Notice of Importance of Public Participation in Subsequent

Environmental Review: The following was published as part of the original Notice of Intent. A draft environmental impact statement will be prepared for comment. The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency published the notice of availability in the **Federal Register**. The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the

environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Comments received, including the names and addresses of those who comment, will be considered part of the public record on this proposal and will be available for public inspection.

(Authority: 40 CFR 1501.7 and 1508.22; Forest Service Handbook 1900.15, Section 21)

Dated: August 17, 2006.

Craig Bobzien,

Forest Supervisor, Black Hills National Forest.

BILLING CODE 3410-11-M

DEPARTMENT OF AGRICULTURE

Forest Service

Notice of Public Meeting, Davy Crockett National Forest Resource Advisory Committee

AGENCY: Forest Service, Agriculture.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Secure Rural Schools and Community Self Determination Act of 2000 (Pub. L. No. 106-393) and the Federal Advisory Committee Act of 1972 (FACA), the U.S. Department of Agriculture, Forest Service, Davy Crockett National Forest Resource Advisory Committee (RAC) meeting will meet on September 21, 2006.

DATES: The Davy Crockett National Forest RAC meeting will be held on September 21, 2006.

ADDRESSES: The Davy Crockett National Forest RAC meeting will be held at the Davy Crockett Ranger Station located on State Highway 7, approximately one-quarter mile west of FM 227 in Houston County, Texas. The meeting will begin at 6 p.m. and adjourn at approximately 9 p.m. There will be a public comment period.

FOR FURTHER INFORMATION CONTACT: Raoul Gagne, District Ranger, Davy Crockett National Forest, Rt. 1, Box 55 FS, Kennard, Texas 75847; Telephone 936-655-2299 or e-mail at rgagne@fs.fed.us.

SUPPLEMENTARY INFORMATION: The Davy Crockett National Forest RAC proposes projects and funding to the Secretary of Agriculture under section 203 of the Secure Rural Schools and Community Self Determination Act of 2000. The purpose of the September 21, 2006 meeting is to review the status of approved projects and discuss and approve additional project proposals to submit to the Forest Supervisor for the National Forests and Grasslands in Texas. These meetings are open to the public. The public may present written comments to the RAC. Each formal RAC meeting will also have time allocated for hearing public comments. Depending on the number of persons wishing to comment and time available, the time for individual oral comments may be limited.

Dated: August 17, 2006.

Raoul W. Gagne,

Designated Federal Officer, Davy Crockett National Forest RAC.

BILLING CODE 3410-11-M

DEPARTMENT OF AGRICULTURE

Natural Resources Conservation Service

Notice of Proposed Change to Section IV of the Virginia State Technical Guide

AGENCY: Natural Resources Conservation Service (NRCS), U.S. Department of Agriculture.

ACTION: Notice of Availability of proposed changes in the Virginia NRCS State Technical Guide for review and comment.

SUMMARY: It has been determined by the NRCS State Conservationist for Virginia that changes must be made in the NRCS State Technical Guide specifically in practice standards: #328, Conservation Crop Rotation, #329, Residue and Tillage Management No Till/Strip Till/Direct Seed, #345, Residue and Tillage Management Mulch Till, #528, Prescribed Grazing and #612, Tree/Shrub Establishment. These practices will be used to plan and install conservation practices on cropland, pastureland, woodland, and wildlife land.

DATES: Comments will be received for a 30-day period commencing with the date of this publication.

FOR FURTHER INFORMATION CONTACT: Inquire in writing to M. Denise Doetzer, State Conservationist, Natural Resources Conservation Service (NRCS), 1606 Santa Rosa Road, Suite 209, Richmond, Virginia 23229-5014; Telephone number (804) 287-1665; Fax number (804) 287-1736. Copies of the practice standards will be made available upon written request to the address shown above or on the Virginia NRCS Web site: <http://www.va.nrcs.usda.gov/technical/draftstandards.html>.

SUPPLEMENTARY INFORMATION: Section 343 of the Federal Agriculture Improvement and Reform Act of 1996 states that revisions made after enactment of the law to NRCS State technical guides used to carry out highly erodible land and wetland provisions of the law shall be made available for public review and comment. For the next 30 days, the NRCS in Virginia will receive comments relative to the proposed changes. Following that period, a determination will be made by the NRCS in Virginia regarding disposition of those comments and a final determination of change will be made to the subject standards.

W. Ray Dorsett,

Assistant State Conservationist (Operations), Natural Resources Conservation Service, Richmond, Virginia.

BILLING CODE 3510-BS-M

DEPARTMENT OF COMMERCE**Bureau of Industry and Security**

[05-BIS-09]

Action Affecting Export Privileges; Lawrence Scibetta, In the Matter of: Lawrence Scibetta, 137 Southwest Carter Avenue, Port St. Lucie, FL 34983; Respondent

Order

The Bureau of Industry and Security, United States Department of Commerce ("BIS") has initiated an administrative proceeding against Lawrence Scibetta ("Scibetta") pursuant to Section 766.3 of the Export Administration Regulations

("Regulations"),¹ and Section 13(c) of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2401-2420 (2000)) ("Act"),² through issuance of a charging letter to Scibetta that alleged that Scibetta committed five violations of the Regulations. Specifically, the charges are:

Charge 1. One Violation of 15 C.F.R. § 764.2(c)—Attempted Violation of the Regulations:

On or about June 9, 2004, Scibetta committed a violation of the Regulations by attempting to export two thermal imaging cameras, items classified under Export Control Classification Number ("ECCN") 6A003.b.4, from the United States to an entity in the United Arab Emirates (the "UAE") without the Department of Commerce license required by Sections 742.4 and 742.6 of the Regulations.

Charge 2. One Violation of 15 C.F.R. 764.2(e)—Acting with Knowledge of a Violation: In connection with the attempted export detailed in Charge 1, on or about June 1, 2004, Scibetta bought two thermal imaging cameras, items classified under ECCN 6A003.b.4, with the knowledge that a violation of the Regulations was about to occur. Specifically, Scibetta had knowledge that a Department of Commerce export license was required to export the cameras, and Scibetta bought the cameras with knowledge that the required export license would not be obtained prior to an attempt to export the cameras.

Charge 3. One Violation of 15 C.F.R. 764.2(f)—Possession With Intent to Export Illegally: Charges 1-2 are incorporated herein by reference. On or around June 8 and June 9, 2004, Scibetta possessed two thermal imaging cameras, items controlled for national security reasons under the Act, with the intent to export such items in violation of the Regulations. On or around May 16, 2004, Scibetta was told by the U.S. supplier of the thermal imaging cameras that the cameras required a license for export. On or around June 8, 2004, Scibetta took possession of the cameras.

¹ The Regulations are currently codified in the Code of Federal Regulations at 15 CFR Parts 730-774 (2006). The alleged violations occurred in 2004. The Regulations governing the violations at issue are found in the 2004 version of the Code of Federal Regulations (15 CFR Parts 730-774 (2004)). The 2006 Regulations establish the procedures that apply to this matter.

² 50 U.S.C. app. 2401-2430 (2000). Since August 21, 2001, the Act has been in lapse and the President, through Executive Order 13222 of August 17, 2001 (3 CFR, 2001 Comp. 783 (2002)), as extended most recently by the Notice of August 3, 2006 (71 FR 44551 (August 7, 2006)), has continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C. 1701-1706 (2000)) ("IEEPA").

From that moment until the moment when Scibetta consigned the cameras for shipment, Scibetta held the items with the intent to export them to the UAE without a license.

Charge 4. One Violation of 15 C.F.R. 764.2(g)—Misrepresentation and Concealment of Facts: Charges 1-3 are incorporated herein by reference. On or about July 23, 2004, in the course of an investigation subject to the Regulations, Scibetta made a false statement directly to BIS. Specifically, he wrote in an affidavit, "I was never told that if [the camera] needed an export license. Up until today no one has ever told me that I need a license to ship this [the camera]." This statement is false because Scibetta was told on a number of occasions prior to the day of the affidavit, including a warning by the U.S. company from whom Scibetta purchased the cameras, that the cameras needed an export license.

Charge 5. One Violation of 15 C.F.R. 764.2(h)—Evasion: Charges 1-4 are incorporated herein by reference. Between June 22 and June 25, 2004, Scibetta acted to arrange for the export of two thermal imaging cameras with intent to evade the provisions of the Regulations. Specifically, Scibetta continued to arrange for the unlicensed export of the cameras even after the cameras required a license to export.

Whereas Bis and Scibetta have entered into a Settlement Agreement pursuant to Section 766.18(b) of the Regulations whereby they agreed to settle this matter in accordance with the terms and conditions set forth therein, and

Whereas, I have approved such Settlement Agreement; *It is Therefore Ordered:*

First, that a civil penalty is assessed against Scibetta in the amount of \$30,000.00, of which \$5,000.00 shall be paid to the U.S. Department of Commerce not later than September 15, 2006; \$5,000.00 shall be paid to the U.S. Department of Commerce not later than November 15, 2006; \$5,000.00 shall be paid to the U.S. Department of Commerce not later than January 15, 2007; \$5,000.00 shall be paid to the U.S. Department of Commerce not later than March 15, 2007; \$5,000.00 shall be paid to the U.S. Department of Commerce not later than May 15, 2007; and \$5,000.00 shall be paid to the U.S. Department of Commerce not later than July 15, 2007.

Second, that, pursuant to the Debt Collection Act of 1982, as amended (31 U.S.C. 3701-3720E (2000)), the civil penalty owed under this Order accrues interest as more fully described in the attached Notice, and, if payment is not made by the due date specified herein,

Scibetta will be assessed, in addition to the full amount of the civil penalty and interest, a penalty charge and an administrative charge, as more fully described in the attached Notice.

Third, that the timely payment of the civil penalty set forth above is hereby made a condition to the granting, restoration, or continuing validity of any export license, license exception, permission, or privilege granted, or to be granted, to Scibetta. Accordingly, if Scibetta should fail to pay the civil penalty in a timely manner, the undersigned may enter an Order denying Scibetta's export privileges for a period of one year from the date of entry of this Order.

Fourth, that for a period of 20 years from the date of entry of the Order, Mr. Lawrence Scibetta, 137 Southwest Carter Avenue, Port St. Lucie, Florida 34983, and when acting for or on his behalf, his representatives, agents, assigns or employees ("Denied Person") may not participate, directly or indirectly, in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as "item") exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, License Exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations; or

C. Benefiting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations.

Fifth, that no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the Denied Person any item that is subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the Denied Person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby the Denied Person

acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the Denied Person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the Denied Person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by the Denied Person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Sixth, that this Order does not prohibit any export, reexport, or other transaction subject to the Regulations where the only items involved that are subject to the Regulations are the foreign-produced direct product of U.S.-origin technology.

Seventh, that, after notice and opportunity for comment as provided in Section 766.23 of the Regulations, any person, firm, corporation, or business organization related to Scibetta by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be made subject to the provisions of the Order.

Eighth, that the charging letter, the Settlement Agreement, this Order, and the record of this case as defined by Section 766.20 of the Regulations shall be made available to the public.

Ninth, that the administrative law judge shall be notified that this case is withdrawn from adjudication.

Tenth, that this Order shall be served on the Denied Person and on BIS, and shall be published in the **Federal Register**.

This Order, which constitutes the final agency action in this matter, is effective immediately.

Entered this 14th day of August 2006.

Wendy L. Wysong,

Acting Assistant Secretary of Commerce for Export Enforcement.

DEPARTMENT OF COMMERCE

International Trade Administration

A-570-886

Polyethylene Retail Carrier Bags from the People's Republic of China: Extension of Time Limit for the Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: August 23, 2006.

FOR FURTHER INFORMATION CONTACT: Laurel LaCivita or Matthew Quigley, AD/CVD Operations, Office 8, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone (202) 482-4243 or (202) 482-4551, respectively.

SUPPLEMENTARY INFORMATION:

Background

On September 28, 2005, the Department of Commerce ("the Department") published in the **Federal Register** a notice of initiation of the antidumping duty administrative review of Polyethylene Retail Carrier Bags ("PRCBs") from the People's Republic of China ("PRC") for the period January 26, 2004, through July 31, 2005. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part*, 70 FR 56631 (September 28, 2005).

Extension of Time Limit for Preliminary Results

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended ("the Act"), requires the Department to make a preliminary determination within 245 days after the last day of the anniversary month of an order for which a review is requested. Section 751(a)(3)(A) of the Act further states that, if it is not practicable to complete the review within the time specified, the administering authority may extend the 245-day period to issue its preliminary results by up to 120 days. On April 27, 2006, the Department published in the **Federal Register** a notice extending the deadline by 110 days. *See Polyethylene Retail Carrier Bags from the People's Republic of China: Extension of Time Limit for the Preliminary Results of Antidumping Duty Administrative Review*, 71 FR 24840 (April 27, 2006). The preliminary results of review are currently due no later than August 21, 2006. Because the Department needs additional time to analyze a significant

amount of information pertaining to each company's sales practices, factors of production, corporate relationships, and to review responses to supplemental questionnaires, we are extending the time period for issuing the preliminary results of review by an additional 10 days until August 31, 2006, in accordance with section 751(a)(3)(A) of the Act. The final results continue to be due 120 days after the publication in the **Federal Register** of the preliminary results of review.

Dated: August 17, 2006.

Gary Taverman,

Acting Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 081606B]

Endangered and Threatened Species; Recovery Plans

AGENCY: National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of Availability; request for comments.

SUMMARY: The National Marine Fisheries Service (NMFS) announces the availability for public review of the draft updated Recovery Plan (Plan) for the U.S. Distinct Population Segment (DPS) of smalltooth sawfish (*Pristis pectinata*). NMFS is soliciting review and comments from the public and all interested parties on the draft Plan, and will consider all substantive comments received during the review period before submitting the Plan for final approval.

DATES: Comments on the draft Plan must be received by close of business on October 23, 2006.

ADDRESSES: Send written comments to Smalltooth Sawfish Coordinator. Comments may be submitted by:

- E-mail: smalltoothsawfish.recoveryplan@noaa.gov, include in the subject line the following document identifier: Smalltooth Sawfish Recovery Plan. E-mail comments, with or without attachments, are limited to 5 megabytes;

- Smalltooth Sawfish Coordinator, NMFS, Southeast Regional Office, Protected Resources Division, 263 13th Avenue South, St. Petersburg, Florida 33071; or

- Fax: (727) 824-5309. Interested persons may obtain the Plan for review from the above address or on-line from <http://www.nmfs.noaa.gov/pr/recovery/plans.htm>.

FOR FURTHER INFORMATION CONTACT:

Shelley Norton, (727) 824-5312, or by e-mail Shelley.Norton@noaa.gov.

SUPPLEMENTARY INFORMATION: The Endangered Species Act of 1973 (15 U.S.C. 1531 *et seq.*; ESA) requires that NMFS develop and implement recovery plans for the conservation and survival of threatened and endangered species under its jurisdiction, unless it is determined that such plans would not promote the conservation of the species. Section 4(f) of the ESA, as amended in 1988, requires that public notice and opportunity to review and comment be provided during recovery plan development.

The U.S. DPS of smalltooth sawfish (*Pristis pectinata*) was listed as endangered under the ESA on April 1, 2003 (68 FR 15680) subsequent to a 1999 listing petition from The Ocean Conservancy (formerly the Center for Marine Conservation). Smalltooth sawfish were once prevalent throughout Florida and were commonly encountered from Texas to North Carolina. Currently, smalltooth sawfish can only be found with any regularity in south Florida between the Caloosahatchee River and the Florida Keys.

The draft recovery plan for the U.S. DPS of smalltooth sawfish was prepared for NMFS by the smalltooth sawfish recovery team. The team is composed of nine members from Federal, State, non-governmental, and non-profit organizations. The goal of the recovery plan is to rebuild and assure the long-term viability of the U.S. DPS of smalltooth sawfish in the wild, allowing initially for reclassification from endangered to threatened status (downlisting) and ultimately to recovery and subsequent removal from the List of Endangered and Threatened Wildlife (delisting). NMFS will consider all substantive comments and information presented during the public comment period in the course of finalizing this Plan.

Dated: August 17, 2006.

Maria Boroja,

Acting Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

[I.D. 071406A]

Small Takes of Marine Mammals Incidental to Specified Activities; Seismic Surveys in the Chukchi Sea off Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of Issuance of an Incidental Harassment Authorization.

SUMMARY: In accordance with regulations implementing the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that an Incidental Harassment Authorization (IHA) to take marine mammals, by harassment, incidental to conducting marine geophysical seismic surveys, on oil and gas lease blocks located on Outer Continental Shelf (OCS) waters in the Chukchi Sea, has been issued to GX Technology of Houston, Texas (GXT).

DATES: Effective from August 15, 2006, through December 31, 2006.

ADDRESSES: The application, a list of references used in this document, and/or the IHA are available by writing to P. Michael Payne, Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910-3225, or by telephoning one of the contacts listed here. A copy of the application, the IHA and/or the research monitoring plan is also available at: <http://www.nmfs.noaa.gov/pr/permits/incidental.htm#iha>.

A copy of the Minerals Management Service's (MMS) Programmatic Environmental Assessment (PEA) is available on-line at: http://www.mms.gov/alaska/ref/pea_be.htm

Documents cited in this document, that are not available through standard public (inter-library loan) access, may be viewed, by appointment, during regular business hours at this address.

FOR FURTHER INFORMATION CONTACT:

Kenneth Hollingshead, Office of Protected Resources, NMFS, (301) 713-2289, ext 128.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce to allow, upon request, the incidental, but not

intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses and the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth. NMFS has defined "negligible impact" in 50 CFR 216.103 as "...an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival."

Section 101(a)(5)(D) of the MMPA established an expedited process by which citizens of the United States can apply for an authorization to incidentally take small numbers of marine mammals by harassment. Except with respect to certain activities not pertinent here, the MMPA defines "harassment" as: any act of pursuit, torment, or annoyance which

(i) has the potential to injure a marine mammal or marine mammal stock in the wild [Level A harassment]; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [Level B harassment].

Section 101(a)(5)(D) establishes a 45-day time limit for NMFS review of an application followed by a 30-day public notice and comment period on any proposed authorizations for the incidental harassment of marine mammals. Within 45 days of the close of the comment period, NMFS must either issue or deny issuance of the authorization.

Summary of Request

On March 28, 2006, NMFS received an IHA application from GXT to take several species of marine mammals incidental to conducting a marine seismic survey in the Chukchi and Beaufort Seas. On March 31, 2006, GXT notified NMFS that it would not be conducting surveys in the U.S. Beaufort Sea, but would instead conduct seismic surveys in the Canadian Exclusive

Economic Zone (EEZ) in the Beaufort Sea.

GXT plans to collect seismic reflection data that reveal the sub-bottom profile for assessments of petroleum reserves in the area. Ultra-deep 2D lines such as those to be collected are used to better evaluate the evolution of the petroleum system at the basin level, including identifying source rocks, migration pathways, and play types. All planned geophysical data acquisition activities will be conducted by GXT. The geophysical survey will be performed from the *M/V Discoverer* (the original proposed action was for the *M/V Discoverer II* to conduct the seismic survey, see Comments and Responses).

The *M/V Discoverer* will arrive in Dutch Harbor about June 1st where it will be resupplied and the crew will change in preparation for the beginning of seismic surveys in the Chukchi Sea. Depending on ice conditions, the vessel will mobilize to arrive off Cape Lisburne and begin survey data acquisition as soon as possible; the expected date is July 30, 2006, depending upon ice conditions. Two alternative schedule scenarios are planned depending on the seasonal ice conditions encountered in 2006.

The first (and most likely) scenario entails operations beginning in the Chukchi Sea about July 30, 2006. Collection of seismic data will continue there until there is sufficient open water near Point Barrow and in the Alaskan Beaufort Sea to allow passage east into the Canadian Beaufort Sea. The *M/V Discoverer* will then leave the Chukchi Sea, traverse the Alaskan Beaufort Sea, and conduct surveys in the Canadian Beaufort Sea under GX Technology Canada Ltd. of Calgary, Alberta., a company incorporated in Canada. Seismic operations will continue in the Canadian Beaufort Sea until all planned seismic lines have been completed, or new ice begins forming in the fall. The vessel will then return to the Chukchi Sea to complete any lines not previously surveyed, or until weather and sea ice force an end to the survey season, which is not expected to continue past November 30, 2006.

The second scenario will occur only if sea ice in the Beaufort Sea does not move far enough offshore to allow the *M/V Discoverer* to travel to the Canadian Beaufort. In that case, the vessel will continue operations in the Chukchi Sea until all survey lines there are completed. The *M/V Discoverer* will then exit the area and transit to Dutch Harbor to de-mobilize. Helicopter operations are not planned as a part of the seismic survey and would occur only in the case of an emergency.

The total seismic survey program, if it can be completed, will consist of a total of about 5302 km (3294.5 mi) of surveys, not including transits when the airguns are not operating. Water depths within the study area are 30–3800 m (98–12467 ft). Approximately 14 percent of the survey (about 742 km (461 mi)) will occur in water depths greater than 500 m (1640 ft), 5 percent of the survey (about 265 km (165 mi)) will be conducted in water 200–500 m (656–1640 ft) deep, and most (81 percent) of the survey (about 4295 km (2669 mi)) will occur in water less than 200 m (656 ft). None of the survey will take place in nearshore waters within 25 km (15.5 mi) of the coast (the Chukchi polynya zone).

The *M/V Discoverer* will tow an airgun array directly astern and a single hydrophone streamer up to 9 km long. The array will consist of 36 sleeve airguns (8 40 in³, 4 70 in³, 4 80 in³, 12 100 in³, and 8 150 in³) that produce a total discharge of 3320 in³. The vessel will travel along pre-determined lines at about 4–5 knots while the airgun array discharges about every 20 seconds (shot interval about 46 m (151 ft)). The towed hydrophone streamer will receive the reflected signals and transfer the data to an on-board processing system. The proposed survey lines cover a large portion of the Chukchi Sea, and tie together known wells, core locations, fault lines and other geophysical points of interest. Specifications of the *M/V Discoverer* and the 36-airgun array that will be used can be found in GXT's application (Appendices A and B; see ADDRESSES).

The survey consists of a large grid of 14 lines oriented to connect previous well locations and core sample locations as well as geological structures in the sub-surface. The extent of the lines allows flexibility to mitigate any interaction with seasonal subsistence hunting as well as species migration patterns. GXT has restricted its survey lines along the shore to the area of the MMS lease sales (greater than 25 km (15.5 mi) offshore) to exclude the nearshore Chukchi polynya, through which marine mammals migrate in the spring. Lines will be chosen based on marine mammal migration and subsistence hunting, as well as ice movement and geophysical importance. If heavy ice conditions are encountered in the northern portions of the survey area, some trackline planned for that region may be shifted to ice-free waters within the central or southern portions of the survey area. There will be additional seismic operations associated with airgun testing, start up, and repeat coverage of any areas where initial data

quality is sub-standard. In addition to the airgun array, a pinger system will be used to position the 36-airgun array and streamer relative to the vessel.

The *M/V Discoverer* will serve as the platform from which vessel-based marine mammal observers will watch for marine mammals before and during airgun operations (see Mitigation and Monitoring later in this document). A "chase boat" will be used to protect the streamer from damage and otherwise lend support to the *M/V Discoverer*. It will not be introducing sounds into the water beyond those associated with normal vessel operations.

Characteristics of Airgun Pulses

Discussion of the characteristics of airgun pulses was provided in several previous **Federal Register** documents (see 69 FR 31792 (June 7, 2004) or 69 FR 34996 (June 23, 2004)) and is not repeated here. Additional information can be found in the MMS PEA and Appendix C in GXT's application. Reviewers are encouraged to read these documents for additional information.

Safety Radii

The rms (root mean square) received sound pressure levels (SPLs) that are used to estimate marine mammal takes and establish safety zones for mitigation are not directly comparable to the peak or peak-to-peak values normally used by

geophysicists to characterize source levels of airguns (GXT IHA Application, Appendix C). The measurement units used to describe airgun sources, peak or peak-to-peak dB, are always higher than the rms dB referred to in much of the biological literature and by NMFS. A measured broadband received level of 160 dB re 1 microPa (rms) in the far field would typically correspond to a peak measurement of about 170 to 172 dB, and to a peak-to-peak measurement of about 176 to 178 decibels, as measured for the same pulse received at the same location (Greene, 1997; McCauley *et al.*, 1998, 2000a). The precise difference between rms and peak or peak-to-peak values for a given pulse depends on the frequency content and duration of the pulse, among other factors. However, the rms level is always lower than the peak or peak-to-peak level for an airgun-type source.

Received sound fields have been modeled by GXT using the Gundalf software suite (Gundalf, 2002) for the 36-airgun array that will be used during this survey (GXT IHA Application Appendix B). GXT used an advanced version of the Gundalf modeling program to estimate the rms received sound levels (in dB re 1 microPa) at different distances from the seismic source on a broadband basis (0–256 Hz). These estimates are believed by GXT to be conservative (*i.e.*, likely to

overestimate the distance at which received levels will be ≥ 160 dB) and most applicable to the 36-airgun array discharging 3320 in³ in water depths between 200 and 500 m (656–1640 ft), or "intermediate depths." The safety radii are expected by GXT to be smaller in "deep" (greater than 500 m) and "shallow" (less than 200 m) water. Empirical data do not exist for this airgun array's sound propagation, so those data will be collected at the beginning of seismic operations. During this initial period, a 1.5X precautionary factor will be applied to the 190 dB and 180 dB radii listed here in Table 1, for use as shutdown radii for marine mammals in the water. Once empirical measurements of the sound produced by GXT's airgun array have been collected and analyzed, the safety radii presented in Table 1 may be adjusted to reflect those results.

As discussed in detail later in this document (see Mitigation), the airguns will be powered down immediately (or shut down if necessary) when cetaceans or pinnipeds are detected within or about to enter the ≥ 180 dB or ≥ 190 dB radii, respectively. A single 40 in³ sleeve airgun will be used as the power down source. The 160–190 dB re 1 microPa (rms) radii for this source will be measured during acoustic verification measurements at the beginning of seismic shooting.

TABLE 1. Estimated distances to which sound levels ≥ 190 , 180, and 160 dB re 1 μ Pa (rms) might be received from a 40 G. gun array (10 x 40 in³, 8 x 60 in³, 10 x 90 in³, 8 x 150 in³, 4 x 250 in³) that will be used during the seismic survey. Distances are based on Gundalf model computations provided by GXT.

Seismic Source Volume	Water depth	190 dB (shut-down criterion for pinnipeds) (m)	180 dB (shut-down criterion for cetaceans) (m)	160 dB (assumed onset of behavioral harassment) (m)
3980 in ³ (40 G. gun array)	<200 m	46	195	5684
	200–500 m	46	195	5684
	>500 m	46	195	5684

Comments and Responses

A notice of receipt of GXT's MMPA application and NMFS' proposal to issue an IHA to GXT was published in the **Federal Register** on June 6, 2006 (71 FR 32045). That notice described, in detail, GXT's proposed activity, the marine mammal species that may be affected by the activity, and the anticipated effects on marine mammals. During the 30-day public comment period on GXT's application, substantive comments were received from the Marine Mammal Commission (Commission), the Alaska Eskimo Whaling Commission (AEWC), the Center for Biological Diversity (CBD) and GXT. The comments of the Commission are identical to its comments on NMFS' proposed IHA to Shell. NMFS has addressed these comments in its **Federal Register** notice of issuance of that IHA and they are not repeated here. That notice will publish shortly. The CBD suggested that the comments submitted by the Natural Resources Defense Council on the PEA also be considered for the issuance of the IHA. These comments have been considered in the Final PEA and in NMFS' and MMS' Finding of No Significant Impact (FONSI) determinations. Many of those comments are specific to the PEA. However, where either of these sets of comments raise issues germane to the IHA issue that have not been addressed already, NMFS has addressed them either in this section or in notices of issuance of IHAs to Shell and ConocoPhillips (71 FR 43112, July 31, 2006).

Activity Concerns

Comment 1: GXT notes that the source vessel for the planned seismic survey in the Chukchi Sea will be the *M/V Discoverer*, not the *M/V Discoverer II*. Because the *M/V Discoverer* is the sister-ship of the *M/V Discoverer II*, the two vessels are almost identical. The *M/V Discoverer* is 2 m (6.6 ft) longer, 2 m (6.6 ft) narrower, and its draft is 0.7 m (2.3 ft) less than the *M/V Discoverer II*. Because of the great similarities between the two vessels, the noise generated by the operations of each of the two sister-ships is expected to be approximately the same. The airgun array described in the notice is accurate for the *M/V Discoverer*.

Response: NMFS has made the appropriate modifications to this document.

MMPA Concerns

Comment 2: The CBD states that waters in the Canadian Beaufort EEZ are

"high seas" and therefore GXT's activities there are subject to the take prohibition in section 102(a)(1) of the MMPA, 16 U.S.C. 1372(a)(1). They cite the *Center for Biological Diversity v. National Science Foundation*, (2002 WL 31548073 (N.D. Cal., Oct 30, 2002)).

Response: MMPA section 102(a)(1) applies only to persons and vessels subject to the jurisdiction of the United States (16 U.S.C. 1372(a)(1)). The vessel is Chinese-owned and flagged in the Bahamas, and there will be no person subject to the jurisdiction of the United States owning or operating the vessel while it is in the Canadian EEZ. Further, the persons responsible for the conduct of the seismic survey in the Canadian EEZ are not U.S. citizens (and the seismic work in the Canadian EEZ will be conducted under permits issued by the Canadian government to GX Technology Ltd of Calgary, Canada). Therefore, section 102(a)(1) of the MMPA is irrelevant.

Comment 3: The CBD also states that "the MMPA prohibits any person to use 'any port, harbor, or other place' under U.S. jurisdiction to take marine mammals. 16 U.S.C. 1372(a)(2)(B). Because GXT will start operations from Dutch Harbor, which is under U.S. jurisdiction, CBD believes this brings GXT's surveys in the Canadian Beaufort Sea within the jurisdictional reach of the MMPA.

Response: We do not interpret the use of Dutch Harbor in this manner as falling within the meaning of 16 U.S.C. 1372(a)(2)(B). We also point out that the surveys in the Chukchi and Beaufort Seas are not one continuous survey. See also NMFS' response to Comment MMPAC1.

Comment 4: The CBD believes that the proposed IHA does not adequately specify the specific geographic region where the activity will occur.

Response: NMFS defines "specified geographical region" as "an area within which a specified activity is conducted and which has certain biogeographic characteristics" (50 CFR 216.103). NMFS believes that GXT's description of the activity and the locations for conducting seismic surveys meet the requirements of the MMPA. GXT intends to conduct seismic surveys within the area of the Chukchi Sea indicated in its application.

Marine Mammal Impact Concerns

Comment 5: The CBD states that NMFS' failure to address the scientific literature linking seismic surveys with marine mammal stranding events, and the threat of serious injury or mortality renders NMFS' conclusionary determination that serious injury or

mortality will not occur from GXT's activities arbitrary and capricious.

Response: The evidence linking marine mammal strandings and seismic surveys remains tenuous at best. Two papers, Taylor *et al.* (2004) and Engel *et al.*, (2004) reference seismic signals as a possible cause for a marine mammal stranding. Taylor *et al.* (2004) noted two beaked whale stranding incidents related to seismic surveys. The statement in Taylor *et al.* (2004) was that the seismic vessel was firing its airguns at 1300 hrs on September 24, 2004 and that between 1400 and 1600 hrs, local fishermen found live-stranded beaked whales some 22 km (12 nm) from the ship's location. A review of the vessel's trackline indicated that the closest approach of the seismic vessel and the beaked whales stranding location was 18 nm (33 km) at 1430 hrs. At 1300 hrs, the seismic vessel was located 25 nm (46 km) from the stranding location. What is unknown is the location of the beaked whales prior to the stranding in relation to the seismic vessel, but the close timing of events indicates that the distance was not less than 18 nm (33 km). No physical evidence for a link between the seismic survey and the stranding was obtained. In addition, Taylor *et al.* (2004) indicates that the same seismic vessel was operating 500 km (270 nm) from the site of the Galapagos Island stranding in 2000. Whether the 2004 seismic survey caused to beaked whales to strand is a matter of considerable debate (see Cox *et al.*, 2004). NMFS believes that scientifically, these events do not constitute evidence that seismic surveys have an effect similar to that of mid-frequency tactical sonar. However, these incidents do point to the need to look for such effects during future seismic surveys. To date, follow-up observations on several scientific seismic survey cruises have not indicated any beaked whale stranding incidents.

Engel *et al.* (2004), in a paper presented to the International Whaling Commission (IWC) in 2004 (SC/56/E28), mentioned a possible link between oil and gas seismic activities and the stranding of eight humpback whales (seven off the Bahia or Espirito Santo States and one off Rio de Janeiro, Brazil). Concerns about the relationship between this stranding event and seismic activity were raised by the International Association of Geophysical Contractors (IAGC). The IAGC (2004) argues that not enough evidence is presented in Engel *et al.* (2004) to assess whether or not the relatively high proportion of adult strandings in 2002 is anomalous. The

IAGC contends that the data do not establish a clear record of what might be a “natural” adult stranding rate, nor is any attempt made to characterize other natural factors that may influence strandings. As stated previously, NMFS remains concerned that the Engel *et al.* (2004) article appears to compare stranding rates made by opportunistic sightings in the past with organized aerial surveys beginning in 2001. If so, then the data are suspect.

Second, strandings have not been recorded for those marine mammal species expected to be harassed by seismic in the Arctic Ocean. Beaked whales and humpback whales, the two species linked in the literature with stranding events with a seismic component are not located in the Chukchi Sea seismic areas. Finally, if bowhead and gray whales react to sounds at very low levels by making minor course corrections to avoid seismic noise and mitigation measures require GXT to ramp-up the seismic array to avoid a startle effect, strandings are highly unlikely to occur in the Arctic Ocean. In conclusion, NMFS does not expect any marine mammals will incur serious injury or mortality as a result of Arctic Ocean seismic surveys in 2006.

Comment 6: The CBD states that the IHA notice provide no support for NMFS’ “conclusion” on small numbers and negligible impact. For GXT’s proposed seismic surveys in the Chukchi, the number of bowheads likely to be harassed is 337. In absolute terms these numbers cannot be considered “small.” Even relative to population size, the higher estimate represents a third of the estimated population of bowheads. For beluga whales, the number harassed is estimated to be 650; for gray whales the number is 481. None of these numbers can be considered “small.” Given the MMPA is designed to protect not just populations, but individual marine mammals, any number in the hundreds or thousands simply cannot be considered “small.”

Response: As discussed elsewhere in this document, NMFS believes that the small numbers requirement has been satisfied (see *Estimates of Marine Mammal Exposures* later in this document). The maximum number of bowhead whales that may be exposed to seismic sounds is estimated to be 337 (Table 2). With a population size estimated to be 10,545 bowheads, NMFS estimates that the maximum percentage of the population that will be exposed would be approximately 3 percent, not 33 percent. For beluga whales and gray whales these numbers represent less

than 5 percent of each population stock size.

Also, NMFS must clarify that the numbers provided in Table 2 estimate the numbers indicate the number of animals that would be exposed to seismic noise at the SPLs indicated, not the numbers of animals that will be taken by Level B (behavioral) harassment. Not all individuals of a marine mammal species would be expected to react at the same level or even react at all as indicated in GXT’s application.

Comment 7: The CBD notes that as many as 12,223 ringed seals and over 7000 bearded seals may be harassed in the Chukchi Sea. Bearded seals with over seven thousand to be harassed. The total numbers of marine mammals potentially harassed in the Chukchi from GXT’s seismic surveys is almost twenty thousand individuals. These numbers cannot rationally be considered “small.” The proposed seismic surveys simply are not designed to avoid impacting more than small numbers of marine mammals and, therefore, the IHA must be denied.

Response: NMFS is not required to consider the total estimated take across all species in making its small numbers determination. The species most likely to be harassed during seismic surveys in the Arctic Ocean area is the ringed seal, with a “best estimate” of animals being exposed to sound levels of 160 dB or greater of 3056 in the Chukchi Sea. As stated previously, this does not mean that this number of ringed seals will be taken by Level B harassment, it is only the best estimate of the number of animals that could be exposed to an SPL of 160 dB or greater and, theoretically could be harassed due to the noise. However, Moulton and Lawson (2002) indicate that most pinnipeds exposed to seismic sounds in the Beaufort Sea lower than 170 dB do not visibly react to that sound; pinnipeds are not likely to react to seismic sounds unless they are greater than 170 dB re 1 microPa (rms)). In addition, these estimates are calculated based upon line miles of survey effort, animal density and the calculated zone of influence (ZOI). While this methodology is valid for seismic surveys that transect long distances (as part of GXT’s survey will be), those surveys that “mow the lawn,” that is, remain within a relatively small area, transiting back and forth while shooting seismic, numbers tend to be highly inflated. As a result, NMFS believes that these exposure estimates are conservative and may actually affect very few animals.

Although it might be argued that the absolute number of ringed seal

behavioral harassment numbers may not be small, the number of “exposures” is relatively small, representing less than 4 percent of the regional population of that species (245,000) if each “exposure” represented an individual ringed seal and maximum ringed seal density was used. Bearded (and spotted) seals take estimates ignore the likelihood that these two species frequent polar ice areas where seismic vessels cannot operate and, therefore, likely overestimate take levels.

Comment 8: The CBD believes that NMFS’ assumption that sounds below 160 dB do not constitute harassment is incorrect and, therefore, underestimates the possible true impact. The CBD notes that their NEPA comments pointed out numerous studies showing significant behavioral impacts from received sounds well below 160 dB and even the PEA acknowledges that impacts to bowheads occur at levels of 120 dB and below. This clearly meets the statutory definition of harassment and demonstrates that the numbers of marine mammals estimated to be taken by GXT’s activity likely constitute a significant underestimate. NMFS’ “small numbers” conclusion is therefore arbitrary and capricious.

Response: The best information available to date for reactions by bowhead whales to impulse noise, such as seismic, is based on the results from the 1998 aerial survey (as supplemented by data from earlier years) as reported in Miller *et al.* (1999). In 1998, bowhead whales below the water surface at a distance of 20 km (12.4 mi) from an airgun array received pulses of about 117–135 dB re 1 $\mu\text{Pa}_{\text{rms}}$, depending upon propagation. Corresponding levels at 30 km (18.6 mi) were about 107–126 dB re 1 $\mu\text{Pa}_{\text{rms}}$. Miller *et al.* (1999) surmise that deflection may have begun about 35 km (21.7 mi) to the east of the seismic operations, but did not provide SPL measurements to that distance, and noted that sound propagation has not been studied as extensively eastward in the alongshore direction, as it has northward, in the offshore direction. Therefore, while this *single year* of data analysis indicates that bowhead whales may make minor deflections in swimming direction at a distance of 30–35 km (18.6–21.7 mi), there is no indication that the SPL where deflection first begins is at 120 dB, it could be at another SPL lower or higher than 120 dB. Miller *et al.* (1999) also note that the received levels at 20–30 km (12.4–18.6 mi) were considerably lower in 1998 than have previously been shown to elicit avoidance in bowheads exposed to seismic pulses. However, the seismic airgun array used in 1998 was larger

than the ones used in 1996 and 1997 (1500 in³ vs 1320 in³). It should also be pointed out that these minor course changes are during migration and, as indicated in the Final PEA, have not been seen at other times of the year and during other activities. Therefore, until additional data is obtained to indicate at what SPL bowhead whales begin to deflect away from a seismic airgun array, NMFS will not adopt any single SPL value below 160 dB and apply it across the board for all species and in all circumstances. NMFS therefore continues to estimate "takings" under the MMPA from impulse noises, such as seismic, as being at a distance of 160 dB (re 1 μ Pa).

Comment 9: The CBD states that NMFS has no idea of the actual population status of several of the species subject to the proposed IHA. NMFS acknowledges (in its Status of Stock's Reports (SARS)) it has no accurate information on the status of spotted seals, bearded seals, and ringed seals. Without this data, NMFS cannot make a rational "negligible impact" finding. This is particularly so given there is real reason to be concerned about the status of these populations. Such concerns were raised recently in a letter to NMFS from the Commission that cautioned against assuming a stable population given apparent changes in the Bering, Chukchi, and Beaufort Seas and the declines of many other Alaska marine mammals.

Response: NMFS uses the best information available when making a determination that the impacts from an activity will have a negligible impact on the affected species and stocks of marine mammals. This information comes from many sources, including NMFS' SARS reports. As noted in GXT's application for the pinniped species mentioned by CBD:

(1) *Bearded seals:* While no reliable estimate of bearded seal abundance is available for the Beaufort Sea (Angliss and Lodge, 2002), results from aerial surveys of the eastern Chukchi Sea indicated densities of up to 0.149 bearded seals/km² and a population of 4862 animals, although actual abundance may be much higher (Angliss and Lodge, 2004).

(2) *Spotted seals:* While the total number of spotted seals in Alaskan waters is not known (Angliss and Lodge, 2002), the estimate is most likely between several thousand and several tens of thousands (Rugh *et al.*, 1997).

(3) *Ringed seals:* While no estimate for the size of the Alaska ringed seal stock is currently available (Angliss and Lodge, 2002), past ringed seal population estimates in the Bering-

Chukchi-Beaufort area ranged from 1–1.5 million (Frost, 1985) to 3.3–3.6 million (Frost *et al.*, 1988). Frost and Lowry (1981) estimated 80,000 ringed seals in the Beaufort Sea during summer and 40,000 during winter.

At present, there is no scientific information that population declines are occurring or have occurred. Moreover, long-term monitoring studies of Alaskan marine mammals being conducted by NMFS and others would note significant population declines.

Cumulative Effects Concerns

Comment 10: In its comments on NMFS' negligible impact determination, CBD states that NMFS must look at the immediate effects of GXT's seismic surveys together with the cumulative effects over multiple years of other oil and gas activities and anthropogenic risk factors such as climate change, both onshore and offshore Alaska. CBD contends that these cumulative effects should be analyzed with respect to their potential population consequences at the species level, stock level, and at the local population level, citing *Anderson v. Evans*, 371 F.3d 475 (9th Cir. 2004).

Response: Under section 101(a)(5)(D) of the MMPA, NMFS is required to determine whether the taking by the IHA applicant's specified activity will have a negligible impact on the affected marine mammal species or population stocks. Cumulative impact assessments are NMFS' responsibility under NEPA, not the MMPA. In that regard, the MMS' Final PEA addresses cumulative impacts, as did its Draft PEA. The PEA's cumulative activities scenario and cumulative impact analysis focused on oil and gas-related and non-oil and gas-related noise-generating events/activities in both Federal and State of Alaska waters that were likely and foreseeable. Other appropriate factors, such as Arctic warming, military activities and noise contributions from community and commercial activities were also considered. Appendix D of that PEA addresses similar comments on cumulative impacts, including global warming. That information is incorporated in this document by citation. NMFS has adopted the MMS Final PEA and it is part of NMFS' Administrative Record. Finally, the proposition for which CBD cites *Anderson* was in the context of the court's analysis under NEPA, not MMPA section 101(a)(5)(D), which was not at issue in *Anderson*.

Mitigation Concerns

Comment 11: GXT suggests (as noted in section XI of GXT's IHA application) that the 190-dB radius, not the 180-dB

radius, is the appropriate zone that should be fully visible to observers and clear of all marine mammal sightings for 30 minutes prior to ramp-up from a full shutdown of all airguns. This includes during night-time or other times of reduced visibility. The rationale for this is as follows:

(1) Pinnipeds, to which the 190-dB safety zone applies, have not shown much avoidance of operating seismic arrays in the Beaufort Sea (Harris *et al.*, 2001; Moulton and Lawson, 2002; Miller *et al.*, 2005). Therefore, it is appropriate to assume that some pinnipeds will not move out of the safety zone during a ramp-up. Accordingly, the 190-dB zone should be visible before a ramp-up begins.

(2) The types of cetaceans likely to be encountered (bowheads, belugas, and gray whales) have shown avoidance of active seismic surveys and it is expected that they will move beyond the full 180-dB radius for the airgun array during the ramp-up (Malme and Miles, 1985; Malme *et al.*, 1986, 1988; Richardson *et al.*, 1986, 1999; Miller *et al.* 2005). Thus, it is not critical that the full 180-dB radius applicable to cetaceans be visible prior to commencing a ramp-up.

Response: While NMFS fully expects that bowhead and beluga whales will avoid seismic activity by large distances, scientific information is less clear that the gray whales will do so. Documentation of avoidance in either the Beaufort or Chukchi seas is lacking and, although Malme *et al.* (1985) indicate that gray whales will avoid seismic activity, later research by Clark and Tyack (1999) duplicating the work of Malme *et al.* (1985) indicates that gray whale avoidance response is context dependent. Essentially, gray whales did not react (avoid) the sound source when the source was not directly in its migratory path. Also, because GXT will be conducting seismic operations in the Chukchi Sea where additional cetaceans may be affected (killer whales and harbor porpoise (although these species are more sensitive to higher frequencies than seismic)), NMFS has determined that the scientific evidence to support using only 190-dB isopleth as a safety zone for all species of marine mammals is not supportable at this time.

Comment 12: The CBD believes that the proposed IHA notice ignores the MMPA statutory requirement that all methods and means of ensuring the least practicable impact have been adopted.

Response: NMFS believes that the mitigation measures required under GXT's IHA will result in the least

practicable adverse impact. Inherent in implementing these mitigation measures is some level of uncertainty on the distribution and abundance of cetaceans in the Chukchi Sea and on whether the acoustic impacts observed in the Beaufort Sea also occur in the Chukchi Sea. Additional information on this concern can be found later in this document and in previous responses to this concern by CBD (see for example, comment MiC2 and MiC3 in Shell's IHA notice).

Monitoring Concerns

Comment 13: The AEWC incorporates by reference into its comments on the GXT application, the comments submitted by the North Slope Borough's Department of Wildlife Management regarding the most recent version of the "Marine Mammal Monitoring, Mitigation, and Investigatory Plan for Seismic Exploration in the Alaskan Chukchi Sea, 2006" (Monitoring Plan) prepared on behalf of Shell, ConocoPhillips and GXT.

Response: Please see the discussion on marine mammal monitoring later in this document.

Subsistence Concerns

Comment 14: The AEWC notes that GXT's proposed data acquisition in the Chukchi Sea includes work near shore, the AEWC is concerned about the potential effects on the fall bowhead whale subsistence hunt at Barrow and possibly Wainwright and Pt. Hope. The village of Barrow traditionally has hunted during both the spring and fall bowhead whale migrations; however, unfavorable ice conditions in the Chukchi Sea this year resulted in a very poor spring bowhead whale hunt for all of the spring (hunt) villages. As a result, the villages of Wainwright and Point Hope have announced that they may attempt to hunt bowheads this fall.

To protect the fall bowhead hunt at Barrow, the Conflict Avoidance Agreement (CAA) (see description later in this document) includes a prohibition on all seismic operations beginning on September 10th through October 25th, from Pitt Point on the east side of Smith Bay to the east to a location about half way between Barrow and Peard Bay to the west. However, given the outcome of the spring bowhead hunt in the Chukchi villages (which had not been completed at the time the CAA was negotiated), the AEWC requests NMFS' assistance in providing further protections for the near-shore areas of the Chukchi during the fall bowhead migration in this region. In particular, the AEWC requests NMFS include in GXT's IHA, provisions designed to protect the nearshore area

from the effects of seismic operations, either directly or through sound propagation. The AEWC suggests that GXT refrain from conducting seismic operations within 50 miles of the Chukchi coast beginning September 15 through October 25th, from the halfway point between Barrow and Peard Bay to 50 miles due west of Cape Lisburne.

Response: The IHA requires GXT to comply with the conditions of the CAA. This requirement ensures that, to the greatest extent practicable, GXT's activities will not have an unmitigable adverse impact on subsistence uses of marine mammals, particularly bowhead whales.

Comment 15: The CBD disagrees with NMFS' "no unmitigable adverse impact" determination for the same reasons it disagrees with NMFS' "negligible impact" and "small numbers" determinations.

Response: This comment is not specific enough for a response, but we disagree with the conclusion.

Endangered Species Act (ESA) Concerns

Comment 16: The CBD states that previous Biological Opinions for the bowhead whale have been inadequate. The CBD hopes NMFS will perform a full analysis required by law.

Response: NMFS has issued a biological opinion regarding the effects of this action on ESA-listed species and critical habitat under the jurisdiction of NMFS. That biological opinion concluded that this action is not likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat. A copy of the Biological Opinion is available upon request (see ADDRESSES).

Comment 17: The CBD states that NMFS may authorize incidental take of bowhead whales under the ESA pursuant to section 7(b)(4), but only where such take occurs while "carrying out an otherwise lawful activity." CBD believes GXT's proposed activities violate the MMPA and NEPA and therefore are not "otherwise lawful." Any take authorization for the bowhead whale would therefore violate the ESA as well as other statutes.

Response: NMFS believes it has complied with the requirements of the MMPA, the ESA and NEPA in connection with the incidental harassment of marine mammals by GXT while conducting activities permitted under MMS' jurisdiction.

NEPA Concerns

Comment 18: The CBD notes that they submitted comments on the MMS PEA along with comments on GXT's IHA

application. Subsequent to CBD's May 10, 2006 letter on the PEA, they believe additional information has come to light that requires the preparation of an EIS in accordance with 40 CFR

1508.27(b)(4). The CBD notes that the Native Village of Kaktovik passed a resolution opposing Shell's seismic survey plans and the Native Village of Point Hope also officially expressed its opposition to this summer's various seismic surveys. The CBD believes that NMFS cannot rationally adopt the PEA and make a FONSI on this action. Instead, it must prepare a full EIS analyzing the effects of Shell's proposed activities in the context of cumulative effects of all other natural and anthropogenic impacts on marine mammals, habitats and communities of the Chukchi and Beaufort seas.

Response: While the Villages of Point Hope and Kaktovik expressed opposition to seismic activities (specifically by Shell) in the Chukchi and Beaufort seas this year (as coastal native Alaskan communities have done for many years), the Whaling Captains' Associations of Point Hope, Kaktovik, Nuiqsut, and Wainwright signed a CAA with Shell, ConocoPhillips and GXT. This CAA indicates to NMFS that seismic exploration activities by these companies will not have an unmitigable adverse impact on the availability of marine mammals for subsistence uses, including bowheads and belugas. This, along with the required mitigation and monitoring measures, informed NMFS' FONSI.

Description of Habitat and Marine Mammals Affected by the Activity

A detailed description of the Chukchi Sea ecosystem and its associated marine mammals can be found in several documents, including the MMS PEA and does not need to be repeated here. The Chukchi Seas support a diverse assemblage of marine mammals, including bowhead whales (*Balaena mysticetus*), gray whales (*Eschrichtius robustus*), beluga whales (*Delphinapterus leucas*), killer whales (*Orcinus orca*), harbor porpoise (*Phocoena phocoena*), ringed seals (*Phoca hispida*), spotted seals (*Phoca largha*), bearded seals (*Erignathus barbatus*), walrus (*Odobenus rosmarus*) and polar bears (*Ursus maritimus*). These latter two species are under the jurisdiction of the U.S. Fish and Wildlife Service (USFWS) and are not discussed further in this document. Abundance estimates of these species can be found in Table 2 in GXT's application. Descriptions of the biology and distribution of the marine mammal species under NMFS' jurisdiction can be

found in GXT's application, MMS' PEA, and several other documents (Corps of Engineers, 1999; Lentfer, 1988; MMS, 1992, 1996; Hill *et al.*, 1999). Information on marine mammal hearing capabilities can be found in GXT's application.

Information on these species can also be found in NMFS Stock Assessment Reports. The Alaska stock assessment document is available at: <http://www.nmfs.noaa.gov/pr/readingrm/MMSARS/sar2003akfinal.pdf>. Updated species reports are available at: <http://www.nmfs.noaa.gov/pr/readingrm/MMSARS/2005alaskasummarySARs.pdf>. Please refer to these documents for information on these species.

Potential Impacts of Seismic Surveys on Marine Mammals

Disturbance by seismic noise is the principal means of taking by this activity. Support vessels and marine mammal survey aircraft (if required) may provide a potential secondary source of noise. The physical presence of vessels and aircraft could also lead to non-acoustic effects on marine mammals involving visual or other cues.

As outlined in several previous NMFS documents, the effects of noise on marine mammals are highly variable, and can be categorized as follows (based on Richardson *et al.*, 1995):

(1) The noise may be too weak to be heard at the location of the animal (i.e., lower than the prevailing ambient noise level, the hearing threshold of the animal at relevant frequencies, or both);

(2) The noise may be audible but not strong enough to elicit any overt behavioral response;

(3) The noise may elicit reactions of variable conspicuousness and variable relevance to the well being of the marine mammal; these can range from temporary alert responses to active avoidance reactions such as vacating an area at least until the noise event ceases;

(4) Upon repeated exposure, a marine mammal may exhibit diminishing responsiveness (habituation), or disturbance effects may persist; the latter is most likely with sounds that are highly variable in characteristics, infrequent and unpredictable in occurrence, and associated with situations that a marine mammal perceives as a threat;

(5) Any anthropogenic noise that is strong enough to be heard has the potential to reduce (mask) the ability of a marine mammal to hear natural sounds at similar frequencies, including calls from conspecifics, and underwater environmental sounds such as surf noise;

(6) If mammals remain in an area because it is important for feeding, breeding or some other biologically important purpose even though there is chronic exposure to noise, it is possible that there could be noise-induced physiological stress; this might in turn have negative effects on the well-being or reproduction of the animals involved; and

(7) Very strong sounds have the potential to cause temporary or permanent reduction in hearing sensitivity. In terrestrial mammals, and presumably marine mammals, received sound levels must far exceed the animal's hearing threshold for there to be any temporary threshold shift (TTS) in its hearing ability. For transient sounds, the sound level necessary to cause TTS is inversely related to the duration of the sound. Received sound levels must be even higher for there to be risk of permanent hearing impairment. In addition, intense acoustic or explosive events may cause trauma to tissues associated with organs vital for hearing, sound production, respiration and other functions. This trauma may include minor to severe hemorrhage.

Potential Effects of Seismic Airgun Arrays on Marine Mammals

GXT believes that the effects of sounds from airguns might include one or more of the following: (1) Tolerance; (2) masking of natural sounds; (2) behavioral disturbance; and (3) at least in theory, hearing impairment and other non-auditory physical effects (Richardson *et al.*, 1995). Discussion on marine mammal tolerance to noise, masking effects of noise, temporary or permanent hearing impairment, and non-auditory effects can be found in GXT's IHA application, and previous **Federal Register** notices for seismic activities (e.g., see 69 FR 74906, December 14, 2004). In summary, NMFS and GXT believe that it is unlikely that there would be any cases of temporary or permanent hearing impairment, non-auditory physical effects, or strandings. NMFS has also provided information previously on the potential effects of noise on marine mammal species expected to be in the Chukchi Sea region (see 71 FR 26055 (May 3, 2006), 71 FR 27685 (May 12, 2006) and 71 FR 32045 (June 6, 2006)). Readers are encouraged to review those documents for additional information.

Potential Effects of Pinger Signals on Marine Mammals

A description of the pinger system (DigiRANGE I and II, Input/Output, Inc) that will be used during seismic

operations to position the airgun array and hydrophone streamer relative to the vessel was described in the proposed IHA notice for GXT June 6, 2006 (71 FR 32045) and is not repeated here.

Estimates of Marine Mammal Exposures to SPLs of 160 dB or Higher (Level B Harassment)

Table 2 of this **Federal Register** notice provides the estimates of the number of potential sound exposure to levels 160 dB re 1 microPa (rms) or greater. The methodology used and the assumptions made to estimate incidental take by Level B harassment, at sound pressure levels at 160 dB or above, by seismic and the numbers of marine mammals that might be affected during the proposed seismic survey area in the Chukchi Sea are presented in the GXT application. While GXT believes, based on the evidence summarized in the application, that the 170-dB criterion is appropriate for estimating Level B harassment for delphinids and pinnipeds, which tend to be less responsive (whereas the 160-dB criterion is considered relevant for other cetaceans), there is no empirical evidence to indicate that some delphinid species do not respond at the lower level (i.e., 160 dB). Also, since delphinids are not expected to be affected by this action, this suggested new criterion is not relevant for this action. While the application cites recent empirical information regarding responses of pinnipeds to low-frequency seismic sounds, the information cited in the application is less than convincing. As a result, NMFS will continue to use the 160-dB isopleth to estimate the numbers of pinnipeds that may be taken by Level B harassment. However, while some autumn migrating bowheads in the Beaufort Sea have been found to react to a noise threshold closer to 130 dB re 1 microPa_{rms}; (Miller *et al.*, 1999; Richardson *et al.*, 1999), evidence in Richardson *et al.* (1986) and Miller *et al.* (2005) indicate that the 160-dB criterion is suitable for summering bowhead whales.

The following estimates are based on a consideration of the number of marine mammals that might be exposed to SPLs of 160 dB or more along about 5302 line-km (3294 line mi) of seismic surveys across the Chukchi Sea. An assumed total of 6628 km (4118 mi) of trackline in the Chukchi Sea includes a 25 percent allowance over and above the planned trackline to allow for turns and lines that might have to be repeated because of poor data quality, or for minor changes to the survey design.

The anticipated radii of influence of the *M/V Discoverer's* pinger system are

much less than those for the airgun array (for those species that can hear it). It is assumed that, during simultaneous operations of the airgun array and pinger system, any marine mammals close enough to be affected by the pingers will already be affected by the airguns. However, whether or not the airguns are operating simultaneously with the pinger system, odontocetes and seals are expected to exhibit no more than momentary and inconsequential responses to the pingers, based on evidence of their reactions from pingers on maritime private and commercial vessels using similar instrumentation for obtaining bathymetric information. Therefore, no additional take numbers are provided for animals exposed to pingers.

The estimates of marine mammals that might be exposed to SPLs that could result in Level B harassment are based on available data about mammal distribution and densities at different locations and times of the year. The proposed survey covers a large area in the Chukchi Sea in two different seasons. The estimates of marine mammal densities have therefore been separated both spatially and temporally in an attempt to represent the distribution of animals expected to be encountered over the duration of the survey. Density estimates in the

Chukchi Sea have been derived for two time periods, the early summer period covering the months of June and July (Table 3 in GXT's IHA application), and the late fall period including most of October and November (Table 4 in GXT's IHA application). For the Chukchi Sea, cetacean densities during the summer were estimated from effort and sighting data in Moore *et al.* (2000) and Richardson and Thomson (eds., 2002), while pinniped densities were estimated from Bengtson (2005) and Moulton and Lawson (2002).

The potential number of events when members of each species might be exposed to received levels 160 dB re 1 microPa (rms) or greater was calculated by summing the results for each season and habitat zone by multiplying:

(1) The expected species density, either "average" (*i.e.*, best estimate) or "maximum" (see Tables 3 and 4 in GXT's IHA application),

(2) The anticipated total line-kilometers of operations with the 36-airgun array in the time period, and habitat zone to which that density applies after applying a 25 percent allowance for possible additional line kilometers (see GXT IHA application) and

(3) The cross-track distances within which received sound levels are

predicted to be ≥ 160 dB (Table 1 in this document).

Some marine mammals that are estimated to be exposed, particularly migrating bowhead whales, might show avoidance reactions before being exposed to 160 dB re 1 microPa (rms). Thus, these calculations actually estimate the number of exposures to ≤ 160 dB that would occur if there were no earlier avoidance of the area ensonified to that level.

For the 36-airgun array, the cross track distance is 2X the predicted 160-dB radius predicted by the Gundalf model or 6000 m (19685 ft). Applying the approach described above, 55,560 km² of open-water habitat in the Chukchi Sea would be within the 160-dB isopleth over the course of the seismic project (though not at any given moment). After adding the 25-percent contingency to the expected number of line kilometers of seismic run, the number of exposures is calculated based on 69,450 km².

The numbers of exposures in the two habitat categories (open water and ice margin) were then summed for each species. GXT's estimate of marine mammal exposures to SPL of 160 dB (and greater) is provided in Tables 5, 6, and 7 in the IHA application. Table 2 in this document is a summary of that information.

TABLE 2. SUMMARY OF THE NUMBER OF POTENTIAL EXPOSURES OF MARINE MAMMALS TO RECEIVED SOUND LEVELS IN THE WATER OF ≥ 160 dB DURING GXT'S PROPOSED SEISMIC PROGRAM IN THE CHUKCHI SEA, ALASKA, -15 JUNE -25 JULY AND -1 OCTOBER - 30 NOVEMBER, 2006. NOT ALL MARINE MAMMALS WILL CHANGE THEIR BEHAVIOR WHEN EXPOSED TO THESE SOUND LEVELS, ALTHOUGH SOME MIGHT ALTER THEIR BEHAVIOR SOMEWHAT WHEN LEVELS ARE LOWER.

Number of Exposure to Sound Levels ≥ 160 dB						
Species	Summer		Fall		Total	
	Average	Maximum	Average	Maximum	Average	Maximum
Odontocetes						
Monodontidae						
Beluga	3	11	160	639	163	650
Delphinidae						
Killer whale	3	11	5	22	8	33
Phocoenidae						
Harbor porpoise	0	0	0	0	0	0
Mysticetes						
Bowhead whale	1	8	57	328	59	337
Gray whale	1	4	83	333	84	337
Minke whale	3	11	5	22	8	33
Fin whale	1	2	1	4	2	7
Total Cetaceans	11	47	313	1349	324	1396
Pinnipeds						
Bearded seal	586	2344	1190	4760	1776	7104
Spotted seal	6	23	12	47	17	70
Ringed seal	1008	4033	2047	8189	3056	12223
Harbor seal	0	0	0	0	0	0
Total Pinnipeds	1600	6401	3249	12996	4849	19397

GXT and NMFS believe that bowhead, beluga, and gray whales are the only cetaceans expected to be exposed to noise levels ≥ 160 -dB levels. The estimates show that one endangered cetacean species, the bowhead whale, is expected to be exposed to such noise levels, unless bowheads avoid the approaching survey vessel before the received levels reach 160 dB. Migrating bowheads are likely to do so, though summering bowheads, if encountered may not. For convenience, GXT refers to either eventuality as an "exposure". As a result, GXT's average and maximum estimates for bowhead whale exposures are 59 and 337, respectively (Table 2). The average and maximum estimates of the number of exposures of cetaceans are beluga (163 and 650) and gray whale (84 and 337). The seasonal breakdown of these numbers is shown in Tables 5 and 6 and totaled in Table 7 in the application and Table 2 in this document. Other cetacean species may occasionally occur near the seismic areas, but given their low estimated densities in the area, they are not likely to be exposed to SPLs of 160 dB or greater. With a population size estimated to be 10,545 bowheads, NMFS estimates that the maximum percentage of the population that will be exposed would be approximately 3 percent. For beluga whales and gray whales these numbers represent less than 5 percent of each population stock size. NMFS believes that this number of potential Level B harassment takes is small.

The ringed seal is the most widespread and abundant pinniped in ice-covered arctic waters, but there is a great deal of annual variation in population size and distribution of these marine mammals. Ringed seals account for the vast majority of marine mammals expected to be encountered, and, therefore, exposed to airgun sounds with received levels ≥ 160 dB re 1 microPa (rms) during the proposed seismic survey. Haley and Ireland (2006) reported that 20 percent of ringed seals remained on the ice when a seismic vessel passed. Because the SPL radii for this project are assumed to be larger than those found in the Haley and Ireland (2006) project, NMFS and GXT believe a larger percent of ringed seals within the 160-dB radii are likely to remain on the ice while the *M/V Discoverer* passes, and not subject to potential harassment. Therefore, GXT's estimates of numbers of ringed seals that might be exposed to sound levels 160 dB re 1 microPa (rms) were reduced by 50 percent to account for animals that are expected to be out of the water, and hence exposed to much lower levels of

seismic sounds. The average (and maximum) estimate is that 3056 (max. 12,223) ringed seals out of a Beaufort/Chukchi Sea population of 245,048 seals might be exposed to seismic sounds with received levels ≤ 160 dB. NMFS believes that this number of potential Level B harassment takes (less than 4 percent of the population size of ringed seals is small).

Two other species of pinnipeds are expected to be encountered during the proposed seismic survey. With Alaskan stock estimates of 300–450,000 and 1000 respectively, the bearded seal has average and maximum exposure estimates of 1776 and 7104, and the spotted seal has average and maximum exposure estimates of 17 and 70, respectively. These exposure estimates are small numbers relative to their population sizes. Finally, the harbor seal is unlikely to be encountered so no exposure estimates have been made.

Effects of Seismic Survey Noise on Subsistence Uses

GXT (2006) reports that marine mammals are legally hunted in Alaskan waters by coastal Alaska Natives; species hunted include bowhead and beluga whales; ringed, spotted, and bearded seals; walrus, and polar bears. The importance of each of the various species varies among the communities based largely on availability. Bowhead whales, belugas, and walrus are the marine mammal species primarily harvested during the time of the proposed seismic survey. There is little or no bowhead hunting by the community of Point Lay, so beluga and walrus hunting are of more importance there. Members of the Wainwright community do hunt bowhead whales in the spring, although bowhead whale hunting conditions there are often more difficult than elsewhere, and traditionally they do not hunt bowheads during seasons when GXT's seismic operation would occur. Depending on the level of success during the spring bowhead hunt, Wainwright residents may be very dependent on the presence of belugas in a nearby lagoon system during July and August. Barrow residents focus hunting efforts on bowhead whales during the spring and generally do not hunt beluga then. Barrow residents also hunt in the fall.

Bowhead whale hunting is the key activity in the subsistence economies of Barrow and Wainwright. The whale harvests have a great influence on social relations by strengthening the sense of Inupiat culture and heritage in addition to reinforcing family and community ties.

An overall quota system for the hunting of bowhead whales was established by the International Whaling Commission in 1977. The quota is now regulated through an agreement between NMFS and the Alaska Eskimo Whaling Commission (AEWC). The AEWC allots the number of bowhead whales that each whaling community may harvest annually (USDI/BLM, 2005).

Bowhead whales migrate around northern Alaska twice each year, during the spring and autumn, and are hunted in both seasons. Bowhead whales are hunted from Wainwright only during the spring migration and animals are not successfully harvested every year. The spring hunt there and at Barrow occurs after leads open due to the deterioration of pack ice; the spring hunt typically occurs from early April until the first week of June. The fall migration of bowhead whales that summer in the eastern Beaufort Sea typically begins in late August or September. Fall migration into Alaskan waters is primarily during September and October. However, in recent years a small number of bowheads have been seen or heard offshore from the Prudhoe Bay region during the last week of August (Treacy, 1993; LGL and Greeneridge, 1996; Greene, 1997; Greene *et al.*, 1999; Blackwell *et al.*, 2004).

The location of the fall subsistence hunt near Barrow depends on ice conditions and (in some years) industrial activities that influence the bowheads movements as they move west (Brower, 1996). In the fall, subsistence hunters use aluminum or fiberglass boats with outboards. Hunters prefer to take bowheads close to shore to avoid a long tow during which the meat can spoil, but Braund and Moorehead (1995) report that crews may (rarely) pursue whales as far as 80 km (50 mi). The autumn hunt usually begins in Barrow in mid-September, and mainly occurs in waters east and northeast of Point Barrow. The whales have usually left the Beaufort Sea by late October (Treacy, 2002a,b).

The scheduling of this seismic survey has been discussed with representatives of those concerned with the subsistence bowhead hunt, most notably the AEWC, the Barrow Whaling Captains' Association, and the North Slope Borough (NSB) Department of Wildlife Management.

The starting date for seismic surveys in the Chukchi Sea is well after the end of the spring bowhead migration and hunt at Wainwright and Barrow. Similarly, the resumption of seismic activities in the Chukchi Sea in October will occur after most subsistence whaling from Barrow has been

completed and if the hunt is still active, seismic operations will be conducted far from Barrow to avoid conflicting with subsistence hunting activities.

Beluga whales are available to subsistence hunters along the coast of Alaska in the spring when pack-ice conditions deteriorate and leads open up. Belugas may remain in coastal areas or lagoons through June and sometimes into July and August. The community of Point Lay is heavily dependent on the hunting of belugas in Kasegaluk Lagoon for subsistence meat. From 1983–1992 the average annual harvest was about 40 whales (Fuller and George, 1997). In Wainwright and Barrow, hunters usually wait until after the spring bowhead whale hunt is finished before turning their attention to hunting belugas. The average annual harvest of beluga whales taken by Barrow for 1962–1982 was five (MMS, 1996). The Alaska Beluga Whale Committee recorded that 23 beluga whales were harvested by Barrow hunters from 1987 to 2002, ranging from 0 in 1987, 1988 and 1995 to the high of 8 in 1997 (Fuller and George, 1997; Alaska Beluga Whale Committee, 2002 in USDI/BLM, 2005). GXT states that it is possible, but unlikely, that accessibility to belugas during the subsistence hunt could be impaired during the survey. However, very little of the proposed survey is within 25 km (15.5 mi) of the Chukchi coast. That means the vessel will usually be well offshore away from areas where seismic surveys would influence beluga hunting by these communities.

Because seals (ringed, spotted, bearded) are hunted in nearshore waters and the seismic survey will remain offshore of the coastal and nearshore areas of these seals, seismic surveys should not conflict with seal harvest activities.

Impact on Habitat

The proposed seismic survey will not result in any long-term impact on habitats used by marine mammals, or to the food sources they utilize. Although feeding cetaceans and pinnipeds may occur in the area, the proposed activities will be of short duration in any particular area at any given time; thus any effects would be localized and short-term.

One of the reasons for the adoption of airguns as the standard energy source for marine surveys was that, unlike explosives, they do not result in any appreciable fish kill. However, the existing body of information relating to the impacts of seismic on marine fish and invertebrate species, the primary

food sources of pinnipeds and belugas, is very limited.

In water, acute injury and death of organisms exposed to seismic energy depends primarily on two features of the sound source: (1) the received peak pressure, and (2) the time required for the pressure to rise and decay (Hubbs and Rehnitz, 1952; Wardle *et al.*, 2001). Generally, the higher the received pressure and the less time it takes for the pressure to rise and decay, the greater the chance of acute pathological effects. Considering the peak pressure and rise/decay time characteristics of seismic airgun arrays used today, the pathological zone for fish and invertebrates would be expected to be within a few meters of the seismic source (Buchanan *et al.*, 2004).

Therefore, NMFS has determined that the proposed Chukchi Sea seismic program for 2006 will have negligible physical effects on the various life stages of fish and invertebrates or have any habitat-related effects that could cause significant or long-term consequences for individual marine mammals or their populations, since operations at any specific location will be limited in duration.

Mitigation Measures

For the proposed seismic survey in the Chukchi Sea, GXT will deploy an airgun source composed of 36 sleeve airguns. The airguns comprising the array will be spread out horizontally, so that most the energy will be directed downward. GXT and NMFS believe that the directional nature of this array is an important factor for mitigating high energy sounds on marine mammals that are on or in near-surface waters. This directionality will result in reduced sound levels at any given horizontal distance compared to levels expected at that distance if the source were omnidirectional with the stated nominal source.

Important mitigation factors built into the design of the survey include the fact that the spring migration and hunt for bowhead whales in Chukchi waters will be completed prior to the start of GXT's survey. Also, it is likely that many bowhead whales have already reached Russian waters north of the Chukotsk Peninsula when surveying is expected to resume in the autumn. Thus, the density of bowhead whales encountered during the fall in the Chukchi Sea, where the migration corridor becomes broad across the Chukchi, is expected to be much lower than that of the Beaufort Sea during the fall, where the migration corridor is narrow (Richardson and Thomson, 2002).

Received sound fields were modeled by GXT for the 36-airgun configuration, in relation to distance and direction from the array. The distance from the array by which received levels would have diminished to 190, 180, 160 and other levels (in dB re 1 microPa rms) are likely to depend on water depth and location. Table 1 presents the predicted sound radii for the 36-airgun array in intermediate (200–500 m (656–1640 ft)) water depths. The radii for deeper or shallower water are predicted by GXT to be smaller than those for intermediate depths.

Empirical data concerning these radii are not yet available, but will be acquired prior to commencing the 2006 seismic field season. In addition to performing an acoustic characterization/verification of the full 36-airgun array at different depths, the output from a single 40 in3 sleeve gun source will also be measured in order to determine the appropriate safety radius for use during power downs. A summary report on the acoustic measurements and proposed refinements to the safety radii will be made available for review shortly after the data have been collected. Until these empirical data are available, the 180- and 190-dB radii predicted to be applicable to intermediate water depths (with a precautionary 1.5X adjustment) will also be applied for deep and shallow water operations when estimating the required safety radii. More detailed modeling of the airgun array may be completed prior to the beginning of the field season and the resulting 120-, 160-, 180- and 190-dB (rms) safety radii (with 1.5X factor) will be applied at the start of the season if that occurs.

The following mitigation measures, as well as marine mammal visual monitoring (discussed later in this document), will be implemented for the subject seismic survey: (1) Speed and course alteration (provided that they do not compromise operational safety requirements); (2) power-down/shut-down procedures; and (3) ramp-up procedures.

Speed and Course Alteration

If a marine mammal is detected outside its respective safety zone (180 dB for cetaceans, 190 dB for pinnipeds) and, based on its position and the relative motion, is likely to enter the safety zone, the vessel's speed and/or direct course may, when practical and safe, be changed to avoid the mammal in a manner that also minimizes the effect to the planned science objectives. The marine mammal activities and movements relative to the seismic vessel will be closely monitored to ensure that

the marine mammal does not enter the safety zone. If the mammal appears likely to enter the safety zone, further mitigative actions will be taken (i.e., either further course alterations or shut down of the airguns).

Power-down and Shut-down Procedures

A power-down involves decreasing the number of airguns in use such that the radii of the 190-dB and 180-dB zones are decreased to the extent that observed marine mammals are not in the applicable safety zone. A power-down may also occur when the vessel is moving from one seismic line to another. During a power-down, one airgun (or some other number of airguns less than the full airgun array) is operated. The continued operation of one airgun is intended to (a) alert marine mammals to the presence of the seismic vessel in the area, and (b) retain the option of initiating a ramp up to full operations under poor visibility conditions. In contrast, a shut down occurs when all airgun activity is suspended.

If a marine mammal is detected outside the safety radius but appears likely to enter the safety radius, and if the vessel's speed and/or course cannot be changed to avoid having the mammal enter the safety radius, the airguns may (as an alternative to a complete shut down) be powered down before the mammal is within the safety radius. Likewise, if a mammal is already within the safety zone when first detected, the airguns will be powered down immediately if this is a reasonable alternative to a complete shut down. During a power-down of the 36-airgun array, the number of guns operating will be reduced to a single 40 in³ sleeve airgun. The 190-dB (rms) safety radius around the 40 in³ airgun had not been modeled previously, but will empirically measured during acoustic verification measurements made at the start of seismic operations. If a marine mammal is detected within or near the smaller safety radius around the single 40 in³ sleeve airgun, all airguns will be shut down.

Following a power-down, operation of the full airgun array will not resume until the marine mammal has cleared the safety zone. The animal will be considered to have cleared the safety zone if it is visually observed to have left the safety zone, or has not been seen within the zone for 15 minutes in the case of small odontocetes and pinnipeds, and for 30 minutes in the case of mysticetes (large odontocetes do not occur within the activity area).

Shut-down Procedures

The operating airgun(s) will be shut down completely if a marine mammal approaches or enters the applicable safety radius and a power down is not practical or adequate to reduce exposure to less than 190 or 180 dB (rms), as appropriate. The operating airgun(s) will also be shut down completely if a marine mammal approaches or enters the estimated safety radius around the reduced source (one 40 in³ sleeve gun) that will be used during a power down.

Airgun activity will not resume until the marine mammal has cleared the safety radius. The animal will be considered to have cleared the safety radius as described previously. Ramp-up procedures will be followed during resumption of full seismic operations.

Ramp-up Procedure

A "ramp up" or "soft start" procedure will be followed when the airgun array begins operating after a specified-duration period with no or reduced airgun operations. The specified period depends on the speed of the source vessel, the size of the airgun array that is being used, and the size of the safety radii, but is typically about 10 minutes or the time the vessel would reach the location of the 180-dB radius at the time of shut-down or power-down, whichever is greater.

Ramp-up will likely begin with a single airgun (the smallest, or 40 in³). The precise ramp-up procedure will be determined prior to start-up (based upon array configuration), but will proceed at a ramp-up rate of no more than 6 dB per 5 min period. The standard industry procedure is to double the number of operating airguns at 5-minute intervals which is equal to about a 6 dB increase. During the ramp-up, the safety zone for the full 36-airgun array (or whatever smaller source might then be in use) will be maintained. If the complete 180-dB safety radius has not been visible for at least 30 minutes prior to the planned start of a ramp-up in either daylight or nighttime, ramp-up will not commence unless at least one airgun has been operating during that period. This means that it will not be permissible to ramp up the 36-airguns from a complete shut down in thick fog, when the entire 180-dB safety zone is not visible. If the entire safety radius is visible using vessel lights and/or night-vision devices (NVDs), then start up of the airguns from a complete shut down may occur at night. If one airgun has operated during a power-down period, ramp-up to full power will be permissible at night or in poor visibility, on the assumption that marine

mammals will either be alerted by the sounds from the single airgun and could move away, or may be detected by visual observations. Given the responsiveness of bowhead and beluga whales to airgun sounds, it can be assumed that those species, in particular, will move away during a ramp-up.

Ramp-up of the airguns will not be initiated during the day or at night if a marine mammal has been sighted within or near the applicable safety radius during the previous 15 minutes.

Mitigation for Subsistence Needs

GXT has signed a Conflict Avoidance Agreement (CAA) for the proposed 2006 seismic survey in the Chukchi Sea, in consultation with representatives of communities along the Alaska coast including Pt. Hope, Pt. Lay, Wainwright, and Barrow. The signed CAA provides NMFS with information to make a determination that the activity will not have an unmitigable adverse impact on the subsistence use of marine mammals. GXT worked with representatives of these communities to identify and avoid areas of potential conflict, and provided a presentation at the AEWC mini-convention in Anchorage, Alaska, on 15 March 2006. Meetings with AEWC and NSB representatives also occurred at the time of the convention. Also, GXT participated in the open water peer/stakeholder review meeting that was convened by NMFS in Anchorage on April 18–21, 2006, along with representatives of the AEWC and NSB.

The signed CAA covers GXT's seismic survey planned to occur in the Chukchi Sea between July 1 and November 30, 2006. The purpose is to identify measures that will be taken to minimize any adverse effects on the availability of marine mammals for subsistence uses, and to ensure good communication between GXT (including the project leaders and the *M/V Discoverer*), native communities along the coast, and subsistence hunters at sea.

The CAA also addresses the following: (1) operational agreement and communications procedures; (2) where/when agreement becomes effective; (3) general communications scheme; (4) on-board Inupiat observer; identification of seasonally sensitive areas; (5) vessel navigation; (6) air navigation; (7) marine mammal monitoring activities; (7) measures to avoid impacts to marine mammals; (8) measures to avoid conflicts in areas of active whaling; (9) emergency assistance; and (10) dispute resolution process.

In the unlikely event that subsistence hunting or fishing is occurring within 5 km (3 mi) of the *M/V Discoverer's*

trackline, or in other situations inconsistent with the CAA, the airgun operations will be suspended until the vessel is greater than 5 km (3 mi) away and otherwise in compliance with the CAA.

Monitoring

GXT will implement a marine mammal monitoring program during the present project, in order to implement the mitigation measures that require real-time monitoring, to satisfy the anticipated monitoring requirements of the NMFS and USFWS IHAs, and to meet any monitoring requirements agreed to as part of the CAA. The monitoring work described here has been planned as a self-contained project independent of any other related monitoring projects that may be occurring simultaneously in the same regions.

Vessel-based Visual Monitoring

Vessel-based observers will monitor marine mammals near the seismic source vessel during all daytime hours and during any power ups of the airgun(s) at night. Airgun operations will be powered down or (if necessary) shut down when marine mammals are observed within, or about to enter, designated safety radii. Vessel-based marine mammal observers (MMOs) will also watch for marine mammals near the seismic vessel for at least 30 minutes prior to the planned start of airgun operations and after any shut downs of the airgun array that do not have at least 30 minutes of continuous marine mammal observations prior to start-up. When feasible, observations will also be made during daytime periods without seismic operations (e.g., during transits).

During seismic operations when there is 24 hrs of daylight, four observers will be based aboard the vessel. As the number of hours of daylight decreases in the fall, the number of MMOs on the vessel will be reduced to three MMOs. MMOs will be appointed by GXT with NMFS and USFWS concurrence. An Alaska native resident knowledgeable about the mammals and fish of the area is expected to be included as one of the team of MMOs aboard the *M/V Discoverer*. At least one observer, and when practical two observers, will monitor marine mammals near the seismic vessel during ongoing daytime operations and any nighttime start ups of the airguns. (There will be no periods of total darkness until mid-August.) Use of two simultaneous observers will increase the proportion of the animals present near the source vessel that are detected. MMOs will be on duty in shifts of duration no longer than 4

hours. The *M/V Discoverer* crew will be instructed by the MMOs onboard to assist in detecting marine mammals and implementing mitigation requirements (if practical). Before the start of the seismic survey the crew will be given additional instruction by the MMOs regarding implementation of mitigation measures.

The *M/V Discoverer* is a suitable platform for marine mammal observations. Observations will be made from either the bridge or the flying bridge, which are greater than 12 m (40 ft) above sea level. From the bridge, about 45° of the view will be obstructed directly to the stern. During daytime, the MMO(s) will scan the area around the vessel systematically with reticle binoculars (e.g., 7 50 Fujinon), and with the naked eye. During any periods of darkness, NVDs will be available (ITT F500 Series Generation 3 binocular-image intensifier or equivalent), if and when required. Laser rangefinding binoculars (Leica LRF 1200 laser rangefinder or equivalent) will be available to assist with distance estimation; these are useful in training observers to estimate distances visually, but are generally not useful in measuring distances to animals directly.

When marine mammals in the water are detected within or about to enter the designated safety radius, the airgun(s) will be powered down or shut down immediately. To assure prompt implementation of shut downs, multiple channels of communication between the MMOs and the airgun technicians will be established. During power downs and shut downs, the MMO(s) will continue to maintain watch to determine when the animal(s) are outside the safety radius. Airgun operations will not resume until the animal is outside the safety radius. Marine mammals will be considered to have cleared the safety radius if they are visually observed to have left the safety radius, or if they have not been seen within the radius for 15 minutes (pinnipeds and small cetaceans) or for 30 minutes (large cetaceans).

All observations and airgun power downs or shut downs will be recorded in a standardized format. Data will be entered into a custom database using a notebook computer. The accuracy of the data entry will be verified by computerized validity data checks as the data are entered and by subsequent manual checking of the database. These procedures will allow initial summaries of data to be prepared during and shortly after the field program, and will facilitate transfer of the data to statistical, graphical, or other programs for further processing and archiving.

Results from the vessel-based observations will provide: (1) the basis for real-time mitigation (airgun power or shut down), (2) information needed to estimate the number of marine mammals potentially taken by harassment, (3) data on the occurrence, distribution, and activities of marine mammals in the area where the seismic study is conducted, (4) information to compare the distance and distribution of marine mammals relative to the source vessel at times with and without seismic activity, and (5) data on the behavior and movement patterns of marine mammals seen at times with and without seismic activity.

Acoustic Verification and Modeling

Measurements of received sound levels as a function of distance and direction from the proposed airgun arrays will be made prior to beginning the seismic survey. Results of this acoustic characterization/verification will be used to refine the pre-season estimates of safety and disturbance radii applicable to the sources during the remainder of seismic operations. A preliminary report of the measurement results concerning the 190-dB and 180-dB (rms) safety radii will be submitted shortly after data collection.

Additionally, more extensive modeling of the sounds that will be produced by the airgun array may be completed prior to the field season. The results of this modeling, if done, will be made available before the field season and the safety radii adjusted accordingly.

Additional Mitigation and Monitoring Measures

As part of NMFS' week-long open-water meeting in Anchorage, on April 19–20, 2006, participants had a discussion on appropriate mitigation and monitoring measures for Arctic Ocean seismic activities in 2006. In addition to the standard mitigation and monitoring measures, additional measures, such as expanded monitoring-safety zones for bowhead and gray whales, and having those zones monitored effectively, have been implemented in order for NMFS to meet its requirements under NEPA. The additional mitigation measures reviewed here are specific for this project. They do not establish NMFS policy applicable to other projects or other locations under NMFS' jurisdiction, as each application for an IHA is context dependent, that is, judged independently as to which measures are practicable and necessary to reduce impacts to the lowest level and to ensure that takings do not have

an unmitigable adverse impact on subsistence uses. These measures have been developed based upon available data specific to the project areas. NMFS and MMS intend to collect additional information from all sources, including industry, non-governmental organizations, Alaska Natives and other federal and state agencies regarding measures necessary for effectively monitoring marine mammal populations, assessing impacts from seismic on marine mammals, and determining practicable measures for mitigating those impacts. MMS and NMFS anticipate that mitigation measures applicable to future seismic and other activities may change and evolve based on newly-acquired data.

Research

GXT, Shell and ConocoPhillips have developed, and will implement, a joint-research component to their individual marine mammal monitoring programs that will further improve the understanding of impacts of seismic exploration on marine mammals, particularly bowhead whales. A preliminary description of this research was outlined in NMFS' proposed notice (71 FR 32045, June 6, 2006). Following NMFS' open water meeting in Anchorage, AK on April 19–24, 2006, a more detailed research plan was developed for the seismic industry. The latest version of this report is available for downloading (see **ADDRESSES**). This plan includes:

Vessel-based Surveys: MMOs will conduct observations onboard a dedicated vessel conducting at least three individual surveys early in the seismic season, in the middle of the season and late in the season, as well as opportunistic surveys while the vessel is being used for crew changes/supply runs. The survey will systematically cover broad areas of the Chukchi planning area in order to obtain adequate coverage across multiple habitat types (subject to vessel operational limitations near ice pack). The surveys will provide: (1) quantitative data on distribution and densities for each marine mammal species by habitat (depth and ice); (2) sighting data to compute densities during seismic and non seismic periods; (3) density information during non-seismic periods to be used to estimate numbers of marine mammals that would have been exposed to various sound levels (160, 180, 190 dB re 1 microPa), if they had not moved away from the seismic vessel; and (4) sighting and density information from operating seismic vessel will provide data on numbers that did not avoid the vessel

and were exposed to the same sound levels.

Passive Acoustic Monitoring (PAM): A towed hydrophone array will be used to monitor for vocalizing marine mammals during the dedicated marine mammal surveys. The array will contain two hydrophone elements designed to receive sounds in approximately the 100 Hz to 45 kHz range. This range covers the frequency of calls known to be produced by cetaceans and pinnipeds likely to be encountered in the Chukchi Sea during the open-water season (gray and bowhead whales ranging from 100 Hz–4 kHz; beluga whales ranging up to approximately 10 kHz; pinnipeds ranging up to 5 kHz). The hydrophone array will be monitored during daylight hours by at least one bioacoustician. Sightings rates, and depending on the amount of data collected, the densities of marine mammals in the survey area will be estimated during the three surveys. Most likely the *R/V Torsvik*, the dedicated marine mammal monitoring vessel will tow the PAM.

Chukchi Sea Coastal Aerial Survey: An aerial survey program will be conducted in support of the seismic programs in the Chukchi Sea during summer and fall of 2006. The objectives of the aerial survey will be: (1) to address data deficiencies in the distribution and abundance of marine mammals in coastal areas of the eastern Chukchi Sea; and (2) to collect and report data on the distribution, numbers, orientation and behavior of marine mammals, particularly beluga whales, near traditional hunting areas in the eastern Chukchi Sea.

Acoustic "Net" Array: A suite of autonomous seafloor recorders (pop-ups) will be deployed to collect acoustic data from strategically situated sites in the Chukchi Sea. The basic plan is to deploy horizontal line arrays (HLA) of pop-ups in four areas from approximately Pt. Hope to the western Beaufort Sea east of Barrow, Alaska. Each of the four HLAs will contain four pop-ups separated by approximately 6–8 nm (11–15 km) so as to have an end-to-end length of approximately 18–24 nm (33–44 km) thus forming an inshore-to-offshore "net." An additional four pop-ups will be deployed at sites about 50–75 nm (93–139 km) offshore. The acoustic "net" array has been designed to accomplish two main objectives: (1) to collect information on the occurrence and distribution of beluga whales that may be available to subsistence hunters near villages located on the Chukchi Sea coast, and (2) to measure the ambient noise levels near these villages and record received levels of sounds from

seismic survey activities should they be detectable.

Reporting

During the field season, brief bi-weekly progress reports on the status of the activity and level of marine mammal interactions will be submitted. A report on the preliminary results of the acoustic verification measurements, including as a minimum the measured 180- and 190-dB (rms) radii of the airgun sources, will be submitted shortly after collection and analysis of those measurements at the start of the field season. This report will specify the refinements to the safety radii that are proposed for adoption.

A report on GXT's seismic activities and on the relevant monitoring and mitigation results will be submitted to NMFS within 90 days after the end of the Chukchi sea seismic work. The report will provide full documentation of methods, results, and interpretation pertaining to all acoustic characterization work and vessel-based monitoring. The 90-day report will summarize the dates and locations of seismic operations, and all cetacean and seal sightings (dates, times, locations, activities, associated seismic survey activities). The number and circumstances of ramp-ups, power-downs, shutdowns, and other mitigation actions will be reported. The report will also include estimates of the numbers of mammals affected and the nature of observed impacts on cetaceans and seals.

Following the 2006 open water season, a single comprehensive report describing the acoustic, vessel-based, and aerial monitoring programs for all industrial seismic programs will be prepared. This comprehensive report will describe the methods, results, conclusions and limitations of each of the individual data sets in detail. The report will also integrate (to the extent possible) the studies into a broad based assessment of industry activities and their impacts on marine mammals in the Chukchi Sea during 2006. The report will help to establish long-term data sets that can assist with the evaluation of changes in the Chukchi Sea ecosystem. The report will also incorporate studies being conducted in the Beaufort Sea and will attempt to provide a regional synthesis of available data on industry activity in offshore areas of northern Alaska that may influence marine mammal density, distribution and behavior.

This comprehensive report will consider data from many different sources including two relatively different types of aerial surveys, several

types of acoustic systems for data collection, and vessel based observations. Collection of comparable data across the wide array of programs will help with the synthesis of information. However, interpretation of broad patterns in data from a single year is inherently limited. Many of the 2006 data will be used to assess the efficacy of the various data collection methods and to help establish protocols that will provide a basis for integration of the data sets over a period of years. Because of the complexity of this comprehensive report, NMFS is requiring that this report be submitted in draft to NMFS by April 1, 2007 in order for consideration, review and comment at the 2007 open water meeting.

ESA

NMFS has issued a biological opinion regarding the effects of this action on ESA-listed species and critical habitat under the jurisdiction of NMFS. That biological opinion concluded that this action is not likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat. A copy of the Biological Opinion is available upon request (see **ADDRESSES**).

NEPA

The MMS prepared a Draft PEA for the 2006 Arctic Outer Continental Shelf (OCS) Seismic Surveys. NMFS was a cooperating agency in the preparation of the MMS Draft and Final PEAs and made this Draft PEA available upon request (71 FR 26055, May 3, 2006). In accordance with NOAA Administrative Order 216-6 (Environmental Review Procedures for Implementing the National Environmental Policy Act, May 20, 1999), NMFS has determined that the MMS Final PEA contains an in-depth and detailed description of the seismic survey activities, reasonable alternatives to the proposed action, the affected environment, mitigation and monitoring measures identified to reduce impacts on the human environment to non-significant levels, and the potential effects of the action on the human environment. In view of the information presented in this document and the analysis contained in the supporting PEA, NMFS has determined that issuance by NMFS of an IHA to GXT and other companies for conducting seismic surveys this year in the Arctic Ocean will not significantly impact the quality of the human environment as described above and in the supporting Final PEA.

This determination is predicated on full implementation of standard mitigation measures for preventing

injury or mortality to marine mammals, in addition to area-specific mitigation measures, such as implementation of (1) a 120-dB rms monitoring-safety zone for cow/calf pairs of bowhead whales in the Beaufort and Chukchi seas; (2) a 160-dB rms monitoring-safety zone for aggregations of feeding bowheads and gray whales in the Beaufort and Chukchi seas; (3) seismic shut-down criteria to protect bowhead and gray whales when inside the 120-dB or 160-dB monitoring-safety zones; and (4) a joint industry cooperative program on marine mammal research in the Chukchi Sea. These mitigation measures were incorporated into NMFS' Selected Alternative and IHA conditions for this year's seismic survey operations. Accordingly, NMFS adopts MMS' Final PEA and has determined that the preparation of an Environmental Impact Statement for this action is not necessary. A copy of the MMS Final PEA for this activity is available upon request and is available online (see **ADDRESSES**).

Essential Fish Habitat (EFH)

The action area has been identified and described as EFH for 5 species of Pacific salmon (pink (humpback), chum (dog), sockeye (red), chinook (king), and coho (silver)) occurring in Alaska. The issuance of this proposed incidental harassment authorization is not anticipated to have any adverse effects on EFH, and therefore no consultation is required.

Determinations

Summary

Based on the information provided in GXT's application and the MMS Final PEA, NMFS has determined that GXT's seismic surveys in the northern Chukchi Sea in 2006 will have a negligible impact on the affected species or stocks of marine mammals, result in the taking of small numbers of marine mammals, and will not have an unmitigable adverse impacts on their availability for taking for subsistence uses, provided the mitigation and monitoring measures required under the IHA are implemented and the POC/CAA is implemented.

Potential Impacts on Marine Mammals

NMFS has determined that the impact of conducting relatively short-term seismic surveys in the U.S. Chukchi Sea may result, at worst, in a temporary modification in behavior by certain species of marine mammals. While behavioral and avoidance reactions may occur in response to the resultant seismic noise and vessel appearance,

this behavioral change is expected to have a negligible impact on the affected species and stocks of marine mammals.

While the number of potential incidental harassment takes will depend on the distribution and abundance of marine mammals in the area of seismic operations, which will vary annually due to variable ice conditions and other factors, the number of potential harassment takings is estimated to be small relative to the population estimates (see Table 2 in this document).

In addition, no take by death or serious injury is anticipated, and the potential for temporary or permanent hearing impairment will be avoided through the incorporation of the mitigation measures proposed for GXT's IHA. This determination is supported by: (1) the likelihood that, given sufficient notice through slow ship speed and ramp-up of the seismic array, marine mammals (especially bowhead, gray, and beluga whales in Arctic waters) are expected to move away from seismic noise that is annoying prior to its becoming potentially injurious; (2) recent research that indicates that TTS is unlikely at SPLs as low as 180 dB re 1 microPa; (3) the fact that injurious levels would be very close to the vessel; and (4) the likelihood that marine mammal detection ability by trained observers is close to 100 percent during daytime and remains high at night close to the seismic vessel. Finally, no known rookeries, mating grounds, areas of concentrated feeding, or other areas of special significance for marine mammals are known to occur within or near the planned areas of operations during the season of operations.

Potential Impacts on Subsistence Uses of Marine Mammals

NMFS believes that the proposed seismic activity by GXT in the northern Chukchi Sea in 2006, in combination with other seismic and oil and gas programs in this area, will not have an unmitigable adverse impact on the subsistence uses of bowhead whales and other marine mammals. This determination is supported by the following: (1) seismic activities in the Chukchi Sea will not begin until after the spring bowhead hunt is expected to have ended; (2) the CAA conditions should significantly reduce impacts on subsistence hunters; (3) while it is possible that accessibility to belugas during the spring subsistence beluga hunt could be impaired by the survey, it is unlikely because little to none of GXT's proposed survey is within 25 km (15.5 mi) of the Chukchi coast, meaning the vessel will usually be well offshore

and away from areas where seismic surveys would influence beluga hunting by communities; and (4) because seals (ringed, spotted, bearded) are hunted in nearshore waters and the seismic survey will remain offshore of the coastal and nearshore areas of these seals where natives would harvest these seals, it should not conflict with harvest activities.

Authorization

As a result of these determinations, NMFS has issued an IHA to GXT to take small numbers of marine mammals, by harassment, incidental to conducting a seismic survey in the northern Chukchi Sea in 2006, provided the mitigation, monitoring, and reporting requirements described in this document are undertaken.

Dated: August 15, 2006.

BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 080806A]

Taking Marine Mammals Incidental to Specified Activities; Construction of the Knik Arm Bridge

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of application for an incidental take authorization; request for comments.

SUMMARY: NMFS has received a request from the Knik Arm Bridge and Toll Authority (KABATA) for an authorization to take small numbers of marine mammals, by harassment, incidental to construction of the Knik Arm Bridge at the Knik Arm Crossing in Alaska during the period 2007 through 2012. In order to promulgate regulations and issue annual Letters of Authorization (LOAs) to KABATA, NMFS must determine that these takings will have a negligible impact on the affected species and stocks of marine mammals and not have an unmitigable impact on subsistence uses of marine mammals. NMFS invites comment on the application and suggestions on the content of the regulations.

DATES: Comments and information must be received no later than September 22, 2006.

ADDRESSES: Comments on the application should be addressed to Michael Payne, Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910-3225. The mailbox address for providing email comments is PR1.080806A@noaa.gov. Comments sent via e-mail, including all attachments, must not exceed a 10-megabyte file size. A copy of the application (which includes the reference citations found in this **Federal Register** document) may be obtained by writing to this address or by telephoning the contact listed here and are also available at: <http://www.nmfs.noaa.gov/pr/permits/incidental.htm#iha>.

FOR FURTHER INFORMATION CONTACT:

Kenneth Hollingshead, Office of Protected Resources, NMFS, (301) 713-2289, ext 128.

SUPPLEMENTARY INFORMATION:

Background

Section 101(a)(5)(A) of the Marine Mammal Protection Act (16 U.S.C. 1361 *et seq.*) (MMPA) directs the Secretary of Commerce (Secretary) to allow, upon request, the incidental, but not intentional taking of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and regulations are issued.

Permission may be granted for periods of 5 years or less if the Secretary finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses, and if regulations are prescribed setting forth the permissible methods of taking and the requirements pertaining to the mitigation, monitoring and reporting of such taking.

NMFS has defined "negligible impact" in 50 CFR 216.103 as "an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival." An authorization may be granted for periods of 5 years or less if the Secretary finds that the total taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses,

and regulations are prescribed setting forth the permissible methods of taking and the requirements pertaining to the monitoring and reporting of such taking.

Except for certain categories of activities not pertinent here, the MMPA defines "harassment" as any act of pursuit, torment, or annoyance which

(i) has the potential to injure a marine mammal or marine mammal stock in the wild [Level A harassment]; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [Level B harassment].

Summary of Request

On May 6, 2006, NMFS received an application, under section 101(a)(5)(A) of the MMPA, from KABATA to take marine mammals, by harassment, incidental to construction of the Knik Arm Bridge in Alaska. KABATA proposes to construct an 8,180 ft (2,493 m) pile-supported steel bridge spanning Knik Arm in Upper Cook Inlet, in Alaska. The project area is located north of Anchorage and west of Elmendorf Air Force Base in the southern portion of Knik Arm. The crossing would traverse Knik Arm over waters between zero and 70 ft (0-20 m) in depth.

According to KABATA, the bridge would be used for vehicular traffic in order to: (1) Move freight and goods between the Port of Anchorage/Ship Creek industrial areas and the Port MacKenzie district; (2) provide safety and redundant overland routes connecting area airports, military bases, ports and hospitals for emergency response; (3) provide transportation infrastructure to meet projected local population and economic growth forecasts; and (4) support economic advancement in the region.

Three alternatives for the crossing alignment have been proposed. A complete description of these alternatives are discussed in the Draft Environmental Impact Statement (Draft EIS) for the Knik Arm Crossing that will be released to the public shortly. A bridge across lower Knik Arm in the southern alignment is KABATA's preferred alternative identified in that document. For the southern alignment, causeways approximately 3,600 ft (1,100 m) and 2,100 ft (640 m) in length would be constructed from the east and west shores, respectively. During year one for construction (presently scheduled for 2007), the east and west bridge causeway foundations and abutments would be constructed in April-May following the establishment of access roads.

Pile driving may begin as early as the first year, but is expected to occur primarily during years 2 and 3 of the proposed 3-year construction program. The bridge design requires approximately 132 pilings at 33 locations with an abutment at each end where the bridge meets the east and west causeways. Water depths at the piling sites range from 60 to 80 feet (18 to 24 m) MLLW. Piles will be constructed of pre-stressed steel, approximately 150 ft (46 m) in length, 4 ft (1.2 m) in diameter, and of 1–2 inches (2.54–5.08 cm) wall thickness. Initially, a vibratory hammer will be used to drive each pile approximately 40 percent or more of the way to its final position. Impact hammering will be used to drive the pile the remainder of the way or to refusal (i.e., when further impact pile driving is unproductive). Pilings will be driven one or possibly two at a time and are expected to require 1–2 hours of actual impact hammering per pile to install. On any given day approximately 2–4 hours of impact hammering would be expected. Pile driving will require up to 220 days. A hydraulic impact hammer, or similar equipment, would be used to drive piles during the Knik Arm crossing construction. The proposed impact hammer delivers 30 blows per minute at maximum stroke with a ram weight of 80,000 lb (36,287 kg). Pile driving is planned to take place primarily during the ice-free months from April to November of each year. No piling emplacement is currently planned for months when ice is present due to increased cost and personnel safety limitations. However, KABATA has requested that its incidental take authorization include incidental harassment takings that might occur during pile driving at any time of year.

Construction and installation of the superstructure roadbed is proposed to occur over a 2-year period following placement of piles and installation of support framework. Superstructure installation would occur immediately after completion of construction of support structures for a given section of superstructure, and prior to installation of pilings for subsequent sections. Superstructure construction will involve the use of tug and barge combinations fitted with cranes for lifting and placement of roadbed components.

Because pile driving, support vessel activities, and general construction noise have the potential to result in behavioral harassment of marine mammals located in Knik Arm, an authorization under section 101(a)(5)(A) of the MMPA is warranted. KABATA

believes that the potential taking of marine mammals associated with the construction of the Knik Arm crossing are unlikely to be lethal or have any long-term negative consequences for the affected marine mammal populations, and any short-term impact on the marine mammals would be negligible. In addition, there would be no adverse impact on the availability of marine mammals for subsistence uses. KABATA is requesting a multi-year LOA for incidental harassment takings issued commencing on 1 April 2007. KABATA plans to construct the crossing during a 2–3 year construction program; however, potential delays associated with a project of this size and scope may require a longer construction period. Therefore, KABATA has requested that the multi-year LOAs cover the period 2007 through 2012, should an additional year or more be required to complete construction of the crossing.

Marine Mammals Affected by the Activity

Knik Arm, including the area of bridge construction, is used by several species of marine mammals. The Cook Inlet beluga whale is the most abundant marine mammal in the area and harbor seals are occasionally present. Harbor porpoises and killer whales have also been sighted in Knik Arm, but are considered rare and are unlikely to be encountered during bridge construction. There have been no published sightings of Steller sea lions in Knik Arm, but a single adult male was documented in the Susitna Flats area. Detailed information on these species and the number of marine mammals within the project area can be found in KABATA's application (see **ADDRESSES**) and Draft EIS. Additional information on Alaskan marine mammals can be found in NMFS' Stock Assessment Reports. The Alaska Stock Assessment Report is available at: <http://www.nmfs.noaa.gov/pr/sars/region.htm>. Please refer to those documents for information on these species.

Sounds and non-acoustic stimuli will be generated by vehicle traffic, vessel operations, roadbed construction, and vibratory and impact pile driving. The sounds generated from construction operations and associated activities will be detectable underwater and/or in air some distance away from the area of activity. The distance will depend on the nature of the sound source, ambient noise conditions, and the sensitivity of the receptor to the sound (Richardson *et al.*, 1995). However, as explained in the application, animals that hear the sound will not necessarily react to it. At times, some of these sounds are likely to be

strong enough to cause localized avoidance or other disturbance reactions by small numbers of marine mammals. Harassment will potentially result when marine mammals near the activity have a significant behavioral response to the sounds generated. The type and significance of behavioral reaction is likely to depend on the activity of the animal at the time it receives the stimulus, as well as the distance from the sound source and the level of the sound relative to ambient conditions. Noise from pile driving, in particular, may result in marine mammals near the activity changing their behaviors or activities. In addition to disturbance, some limited masking of whale calls or other sounds potentially relevant to whales could occur. Vessel traffic is also known to cause avoidance reactions by beluga whales at certain times (Richardson *et al.*, 1995). However, Cook Inlet belugas are regularly sighted in and around the Port of Anchorage (NMFS, 2005a) passing near or under vessels (Blackwell and Greene, 2002), and they appear to have high tolerance to vessel traffic. It is possible that belugas exposed to repetitious construction sounds from the proposed construction activities will, after initial exposure to these sounds, tolerate them as they have learned to tolerate vessel traffic.

Harbor seals, beluga whales, and harbor porpoises could be exposed to vessel or construction noise and to other stimuli associated with the planned construction. Construction activities are expected to occur seasonally and incidental harassment of marine mammals could potentially occur intermittently when construction occurs. To some extent, beluga whales and harbor seals will likely be in the area throughout the proposed authorization period (2007–2012). Based on sighting rates and telemetry studies, few beluga whales are likely to be in the project area between December and late May, they will be present infrequently from May through July, and highest numbers will occur in August through November (Rugh *et al.*, 2004; NMFS 2005a, Funk *et al.* 2005a). Only a few harbor seals have been reported near the planned construction site (LGL, unpublished data). With the mitigation and monitoring measures that are planned (see next section), it is very unlikely that any marine mammal will be injured or killed.

KABATA believes that the construction activities outlined in its application and described in detail in the Draft EIS have the potential to disturb or displace small numbers of marine mammals. These potential takes

would be by Level B harassment (behavioral disturbance) as defined in the 1994 amendments to the MMPA. No take by serious injury or death is likely, given the planned monitoring and mitigation procedures described in the application and summarized in this document. These measures are designed to minimize the possibility of injury to marine mammals and to reduce disturbance caused by construction activities. However, KABATA has requested that the LOA authorize a very small number (1–2 animals) of incidental, non-intentional Level A harassment (injury) takings be authorized in the unlikely event that they might occur. Should a Level A harassment take occur that involves serious injury (or mortality) of a marine mammal occurs, construction activities would be suspended, NMFS would be notified, and a review of the conditions under which construction activity could resume would be immediately undertaken.

Mitigation

KABATA proposes the following mitigation and monitoring measures to reduce impacts on marine mammals:

Scheduling of construction activities to avoid periods of high whale use of Knik Arm

Construction activities are planned to occur when beluga whale use of Knik Arm is low. Specifically, construction will occur to the greatest extent practicable during the December through mid-August time period when beluga whale abundance in Knik Arm are generally low. During the fall period when beluga whales are present in the Arm in greater numbers (15 August to 15 November), impact pile driving activities will not occur during the three hour period around low tide when whales are most likely to be in or near the construction area. These measures will greatly reduce the number of beluga whales potentially affected by construction and will assure that impacts on beluga whales are negligible.

Soft start to pile driving activities

A “soft start” technique will be used at the beginning of each pile installation to allow any marine mammal that may be in the immediate area to leave before impact piling reaches full energy. The soft start requires an initial set of 3 strikes from the impact hammer at 40 percent energy with a one minute waiting period between subsequent 3–strike sets (NMFS, 2003). If marine mammals are sighted within the safety zone prior to pile-driving, or during the soft start, the Resident Engineer (or

other authorized individual) will delay pile-driving until the animal has moved outside the safety zone. The safety zone will be defined by the 190 dB re 1 microPa (rms) radius in the case of pinnipeds and 180 dB rms in the case of odontocetes. Piling will resume only after the marine mammal is determined to have moved outside the safety zone by a qualified observer or after 15 minutes have elapsed since the last sighting of the marine mammal within the safety zone.

Acoustic monitoring to determine appropriate safety zones

Sound generated by the pile driver will be measured and used to refine the radii of the safety zones for marine mammals. Initially the safety zones will be defined based on measurements made by Blackwell (2005) at the nearby Port MacKenzie dock reconstruction with allowances for differences in pile size and pile driver energy. Initial safety radii will be 1.5 times the size of those estimated by Blackwell (2005) until actual safety radii can be determined. Safety zones appropriate to the conditions and equipment used for the Knik Arm Bridge will be empirically determined and implemented as soon as practicable.

Observer Monitoring and shut down procedures

The safety zone around the pile driving activity will be monitored for the presence of marine mammals before, during, and after any pile driving activity. The safety zone will be monitored for 30 minutes prior to initiating the soft start for pile driving. If the safety radius is obscured by fog or poor lighting conditions, pile driving will not be initiated until the entire safety radius is visible for the 30 minute period. If marine mammals are present within the safety zone, the start of pile driving will be delayed until the animals leave the area. The safety zone will also be monitored throughout the time required to drive a pile. If a marine mammal is observed entering the safety zone, pile driving operations will be discontinued until the animal is clear of the safety zone. Monitoring of the safety zone will continue for 30 minutes following pile driving.

Monitoring

Land-based Visual Monitoring

Two experienced marine mammal observers will be positioned at sites appropriate for monitoring whales and seals within and approaching the safety zone and the larger area where marine mammals might be disturbed by pile-

driving operations. Established observation sites near Cairn Point and Sixmile Creek will be used initially. Based on measurements by Blackwell (2005), observers at those sites will be able to see the area within the 180 dB safety radius and the area within which behavioral disturbance may potentially occur (160 dB). These observers will monitor the safety radius and the surrounding areas commencing 30 minutes prior to the beginning of pile-driving operations, during pile driving, and for 30 minutes after pile driving is completed. If whales or other marine mammals are sighted within the safety zone, pile driving operations will be halted until the animals are outside of the area.

Boat-based Monitoring

Two trained boat-based observers will survey Knik Arm and adjacent areas once per week during pile driving operations. The primary purpose of these observers will be to inform construction and shore-based observation personnel of whale group locations and the potential of these groups to approach and/or enter the safety zone. The boat based observers will also obtain information on the distribution and movements of belugas, noting especially any apparent blockage or delay of normal whale movement within Knik Arm over tidal cycles.

Reporting

During the period of bridge construction, KABATA proposes to submit brief progress reports concerning recent construction activities, marine mammal and acoustic monitoring work, and any other information required under an LOA will be provided to NMFS on a weekly, monthly or such other schedule as may be specified in the LOA. Any significant observations concerning impacts on marine mammals will be transmitted to NMFS within 48 hours. Any Level A takes observed will be required to be immediately reported to NMFS.

Preliminary results of the acoustical measurements, as necessary to refine and validate the safety radii, will be reported to NMFS as soon as the relevant data can be obtained and analyzed. These data will be available no later than 1 month after the onset of pile driving.

During construction, KABATA proposes to submit a preliminary report on activities and results (acoustical and mammal) to NMFS within 90 days after the termination of the fall construction season—the season when most belugas are likely to be present in the area. This report will provide summaries of the

dates and locations of construction operations, details of marine mammal sightings (dates, times, locations, activities, associated construction activities), estimates of the amount and nature of marine mammal takings, and any apparent effects on accessibility of marine mammals to subsistence hunters. It will also provide a fuller account of the levels, durations, and spectral characteristics of the impact and vibratory pile driving sounds. For the impact pile driving, the peak, rms, and energy levels of the sound pulses and their durations will be reported as a function of distance, water depth, and tidal cycle.

In addition to the 90-day reports, KABATA proposes to submit a draft technical summary report to NMFS 60–120 days before the LOA expires. All technical reports will provide full documentation of methods, results and interpretation of all monitoring tasks. The draft final report may be subject to a review process determined by NMFS, and will then be finalized if comments are received from NMFS. The final comprehensive report will be submitted within 90 days following expiration of the final LOA.

Request for Information

As this document is being published in conformance with NMFS regulations implementing the incidental take program (50 CFR Part 216 Subpart I), NMFS requests interested persons to submit comments, information, and suggestions concerning the request and the possible structure and content of the regulations to allow the taking. As provided by 50 CFR 216.105, NMFS will consider this information in developing any proposed regulations to authorize the taking. Comments regarding activities that do not relate to the incidental taking of marine mammals will not be considered by NMFS in its decision-making process. Prior to submitting comments, NMFS recommends reviewers of this document read KABATA's MMPA application as that document contains information necessary to respond appropriately to this action. If NMFS proposes regulations to allow this take, interested parties will be provided with a 30-day comment period within which to submit comments on the proposed rule.

Dated: August 16, 2006.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 081706A]

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce

ACTION: Notice; public meetings.

SUMMARY: The New England Fishery Management Council (Council) is scheduling public meetings of its Standardized Bycatch Reporting Methodology (SBRM) Committee in September, 2006 to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: These meetings will be held on Wednesday, September 6, 2006, at 10 a.m. and Monday, September 25, 2006, at 10 a.m.

ADDRESSES: The September 6 meeting will be held at the Hilton Garden Inn, One Thurber Street, Warwick, RI 02886; telephone: (401) 734–9600; fax: (401) 734–9700. The September 25 meeting will be held at the Homeward Suites Hotel, 57 Newbury Street, Peabody, MA 01960; telephone: (978) 536–5050; fax: (978) 535–6840.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Paul J. Howard, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION: The schedules and agendas for the meetings are as follows:

1. *Wednesday, September 6, 2006; SBRM Committee meeting.*

The Committee will review the New England and Mid-Atlantic Council's Science and Statistical Committees (SSCs) meeting results. The SSCs conducted a peer-review of the analytical framework and analyses supporting the development of the Omnibus SBRM amendment to the Council's FMPs. In addition, the Committee will review progress of the Fishery Management Action Team (FMAT) on the development of the SBRM amendment.

2. *Monday, September 25, 2006; SBRM Committee meeting.*

The Committee will review the public hearing draft of the Omnibus SBRM amendment to the Council's FMPs and develop a recommendation for both Councils as to approving the draft amendment. The Committee will report its recommendations to the New England Council at its meeting on September 26–28, 2006 and to the Mid-Atlantic Council at its meeting on October 10–12, 2006.

Although non-emergency issues not contained in these agendas may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Paul J. Howard, Executive Director, at 978–465–0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 17, 2006.

James P. Burgess,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 081706B]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The Pacific Fishery Management Council's (Council) Coastal Pelagic Species Advisory Subpanel (CPSAS) and Coastal Pelagic Species Management Team (CPSMT) will hold a joint work session via conference call, which is open to the public.

DATES: The CPSMT and the CPSAS will meet via conference call in a joint

session on Wednesday, September 6, 2006 from 9 a.m. until business for the day is completed.

ADDRESSES: Public listening stations will be available in Portland OR and Long Beach, CA. See **SUPPLEMENTARY INFORMATION** for the specific locations.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220-1384.

FOR FURTHER INFORMATION CONTACT: Mr. Mike Burner, Pacific Fishery Management Council, (503) 820-2280.

SUPPLEMENTARY INFORMATION: Public listening stations will be available at the following locations:

Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220-1384, telephone: (503) 820-2280; and

National Marine Fisheries Service, 501 W Ocean Boulevard, Suite 4200, Long Beach, CA 90802, telephone: (562) 980-4000.

The primary purpose of the meeting is to review items on the Council's September 2006 agenda including research and data needs and marine protected areas within the Channel Islands National Marine Sanctuary. The CPSMT and CPSAS will develop recommendations for Council consideration at its September meeting in Foster City, CA. The status of 2006 CPS fisheries will also be discussed.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Ms. Carolyn Porter at (503) 820-2280 at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 17, 2006.

DEPARTMENT OF ENERGY

Office of Energy Efficiency and Renewable Energy

[Case No. CD-002]

Energy Conservation Program for Consumer Products: Publication of the Petition for Waiver and Denial of the Application for Interim Waiver of LG Electronics From the Department of Energy Clothes Dryer Test Procedures

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of Petition for Waiver, Denial of Application for Interim Waiver, and request for comments.

SUMMARY: Today's notice publishes a Petition for Waiver from LG Electronics Inc. (LG). This Petition (hereafter "LG Petition") requests a waiver from the Department of Energy (hereafter "Department" or "DOE") test procedures for residential clothes dryers. In addition, today's notice denies LG an Interim Waiver from the DOE test procedures applicable to residential clothes dryers. Today's notice also includes an alternate test procedure the Department may include in the Decision and Order, should the Department grant LG a waiver. The Department is soliciting comments, data, and information with respect to the LG Petition, LG's Application for Interim Waiver, and the proposed alternate test procedure.

DATES: The Department will accept comments, data, and information regarding this Petition for Waiver until, but no later than September 22, 2006.

ADDRESSES: Please submit comments, identified by case number CD-002, by any of the following methods:

- *Mail:* Ms. Brenda Edwards-Jones, U.S. Department of Energy, Building Technologies Program, Mailstop EE-2J, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585-0121. Telephone: (202) 586-2945. Please submit one signed original paper copy.
- *Hand Delivery/Courier:* Ms. Brenda Edwards-Jones, U.S. Department of Energy, Building Technologies Program, Room 1J-018, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585.
- *E-mail:*

Michael.raymond@ee.doe.gov. Include either the case number CD-002, and/or "LG Petition" in the subject line of the message.

• *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name and case number for this proceeding. Submit electronic comments in WordPerfect, Microsoft Word, PDF, or text (ASCII) file format and avoid the use of special characters or any form of encryption. Wherever possible, include the electronic signature of the author. Absent an electronic signature, comments submitted electronically must be followed and authenticated by submitting the signed original paper document. The Department does not accept telefacsimiles (faxes). Any person submitting written comments must also send a copy of such comments to the petitioner. (10 CFR 430.27(b)(1)(iv)) The contact information for the petitioner of today's notice is: Mr. John I. Taylor, Vice President, Government Relations, LG Electronics USA, Inc., 1750 K St., NW., Washington, DC 20006.

According to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit two copies: one copy of the document including all the information believed to be confidential, and one copy of the document with the information believed to be confidential deleted. The Department will make its own determination about the confidential status of the information and treat it according to its determination.

Docket: For access to the docket to read the background documents relevant to this matter, go to the U.S. Department of Energy, Forrestal Building, Room 1J-018 (Resource Room of the Building Technologies Program), 1000 Independence Avenue, SW., Washington, DC 20585-0121, (202) 586-2945, between 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays. Available Documents include the following items: this notice, public comments received, the LG Petition and Application for Interim Waiver, and prior Department rulemakings regarding residential clothes dryers. Please call Ms. Brenda Edwards-Jones at the above telephone number for additional information regarding visiting the Resource Room. Please note: The Department's Freedom of Information Reading Room (formerly Room 1E-190 at the Forrestal Building) is no longer housing rulemaking materials.

FOR FURTHER INFORMATION CONTACT: Dr. Michael G. Raymond, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Program, Mail Stop EE-2J, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585-

0121, (202) 586-9611; e-mail: Michael.Raymond.ee.doe.gov; or Francine Pinto, Esq., U.S. Department of Energy, Office of General Counsel, Mail Stop GC-72, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585-0121, (202) 586-9507; e-mail:

SUPPLEMENTARY INFORMATION:

- I. Background and Authority
- II. Petition for Waiver
- III. Application for Interim Waiver
- IV. Alternate Test Procedure
- V. Summary and Request for Comments

I. Background and Authority

Title III of the Energy Policy and Conservation Act (EPCA) sets forth a variety of provisions concerning energy efficiency. Part B of Title III (42 U.S.C. 6291-6309) provides for the "Energy Conservation Program for Consumer Products other than Automobiles." Part B specifically provides for definitions, test procedures, labeling provisions, energy conservation standards, and the authority to require information and reports from manufacturers. With respect to test procedures, it generally authorizes the Secretary of Energy to prescribe test procedures that are reasonably designed to produce results which reflect energy efficiency, energy use and estimated operating costs, and that are not unduly burdensome to conduct. (42 U.S.C. 6293(b)(3)) EPCA provides that the Secretary of Energy may amend test procedures for consumer products if the Secretary determines that amended test procedures would more accurately reflect energy efficiency, energy use and estimated operating costs, and would not be unduly burdensome to conduct. (42 U.S.C. 6293(b))

Today's notice involves residential products covered under Part B. The LG Petition requests a waiver from the residential test procedures for LG's DLEC733W model of condenser clothes dryer. The test procedures for clothes dryers appear at 10 CFR Part 430, Subpart B, Appendix D.

The Department's regulations contain provisions allowing a person to seek a waiver from the test procedure requirements for covered consumer products (10 CFR 430.27). The waiver provisions allow the Assistant Secretary for Energy Efficiency and Renewable Energy (hereafter "Assistant Secretary") to temporarily waive test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics that prevent testing according to the prescribed test

procedures, or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption as to provide materially inaccurate comparative data. (10 CFR 430.27(a)(1)) The Assistant Secretary may grant the waiver subject to conditions, including adherence to alternate test procedures. Petitioners are to include in their petition any alternate test procedures known to evaluate the basic model in a manner representative of its energy consumption. (10 CFR 430.27(b)(1)(iii)) Waivers generally remain in effect until final test procedure amendments become effective, thereby resolving the problem that is the subject of the waiver.

The waiver process also allows the Assistant Secretary to grant an Interim Waiver from test procedure requirements to manufacturers that have petitioned the Department for a waiver of such prescribed test procedures. (10 CFR 430.27(a)(2)) An Interim Waiver remains in effect for a period of 180 days or until the Department issues its determination on the Petition for Waiver, whichever is sooner, and may be extended for an additionally 180 days, if necessary. (10 CFR 430.27(h))

II. Petition for Waiver

On November 14, 2005, LG filed a Petition for Waiver and an Application for Interim Waiver from the test procedures applicable to its residential clothes dryers. LG seeks a waiver from the applicable test procedures for its DLEC733W basic product model because, LG asserts, design characteristics prevent testing according to the currently prescribed test procedures. In 1995, the Department granted Miele Appliance, Inc. (Miele), a waiver from test procedures for a different model of condenser clothes dryer. (60 FR 9330, February 17, 1995) LG claims that its condenser clothes dryers cannot be tested pursuant to the existing test procedures and requests that the same waiver granted to Miele for its T1565CA and T15701C models in 1995 be granted for LG's DLEC733W model.

In particular, LG claims that the current clothes dryer test procedures apply only to vented clothes dryers because the test procedures require the use of an exhaust restrictor to simulate the backpressure effects of a vent tube in an installed condition. LG's condenser dryers do not have exhaust vents as they do not exhaust air as conventional, vented dryers. Furthermore, LG states that DOE's test procedures for clothes dryers provide no

definition or mention of condenser clothes dryers.

In addition, LG asserts that the condenser clothes dryer inherently consumes more energy to dry a load of clothes than a conventional, vented dryer. However, LG claims, condenser dryers offer additional utility to consumers over conventional dryers. LG also claims that the condensing dryer could save substantially more household energy than a conventional dryer if the effects on space heating and cooling requirements are considered.

The LG Petition requests that DOE grant a waiver from existing test procedures until DOE prescribes final test procedures and minimum energy conservation standards that are, according to LG, "appropriate to LG's condenser clothes dryers." (LG Petition for Waiver, page 4) LG did not include an alternate test procedure in its petition, and noted that it is not aware of any alternative test procedure that could appropriately evaluate its products.

III. Application for Interim Waiver

The LG Petition also requests an Interim Waiver for immediate relief. An Interim Waiver may be granted if it is determined that the applicant will experience economic hardship if the Application for Interim Waiver is denied, if it appears likely that the Petition for Waiver will be granted, and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination of the Petition for Waiver. (10 CFR 430.27(g))

LG's Application for Interim Waiver does not provide sufficient information to permit DOE to evaluate the economic hardship LG claims it will experience absent a favorable determination on its Application for Interim Waiver. LG's discussion of anticipated economic hardship is entirely qualitative: "significant investment," "significant losses in goodwill and brand acceptance."

Furthermore, public policy would not tend to favor granting LG an Interim Waiver, pending determination of the Petition for Waiver. DOE believes that where it grants a waiver from applicable test procedures, an alternate test procedure should be in place, where possible, because testing is necessary to verify compliance with the applicable energy standards. Maintaining proper compliance ensures the public that marketed products meet published energy standards. However, in this case, it appears to DOE that industry has made no effort to develop an alternate test procedure, even though it is

possible to develop one. LG did not propose an alternate test procedure in its Petition. To help provide a means to evaluate compliance of condenser dryers, DOE has developed an alternate test procedure on which it is seeking comment in this notice. However, because DOE is still seeking such comment, DOE is not yet prepared to require LG to follow this alternate test procedure and grant this interim waiver.

Furthermore, pending public comment, it is not clear to DOE what, if any, type of waiver it would grant LG in the Decision and Order. In 1995, DOE granted Miele Appliances, Inc. a waiver from test procedures because it determined that the clothes dryer test procedure was not applicable to Miele condenser clothes dryers. (60 FR 9330, February 17, 1995) In addition, DOE provided that Miele's condenser dryers would not have to meet the applicable energy efficiency standards because their added utility justified their higher energy consumption compared to traditional clothes dryers, and because the test procedures were not applicable. Though DOE determined in 1995 that Miele's condenser dryers should not be subject to the energy standards, it is not evident that the same conditions exist today to warrant a similar waiver for LG's products.

In particular, it appears that the clothes dryer market has developed since 1995 and that it may be possible to manufacture condenser clothes dryers that are as, or more, efficient than traditional vented clothes dryers. Advanced Engineering from Germany (AEG), for example, currently makes a highly efficient heat pump condenser dryer which it offers in Europe. Waiving the applicable clothes dryer energy standard for LG might permit LG to manufacture and sell clothes dryers that are less efficient than existing standards, though the technology to meet or exceed these efficiencies may be available. However, because the potential of current condenser clothes dryer technology is not fully known and it is not clear whether condenser clothes dryers may meet current minimum energy standards, more information is needed to assess what, if any, sort of waiver is appropriate. Furthermore, more information about the LG condensing dryer is needed for DOE to assess the impact of the alternate test procedure that is proposed and published in this notice.

In sum, because: (a) It is not clear that DOE would ultimately exempt LG's products from the applicable energy standards as it did in the case of Miele; (b) it is desirable for public policy reasons to develop an alternate test

procedure, where possible, when energy standards are in effect; and (c) the proposed alternate test procedure is still undergoing evaluation, DOE is denying LG's Application for an Interim Waiver. This denial of Interim Waiver is based upon the presumed validity of statements submitted by stakeholders. This denial of Interim Waiver may be modified at any time upon a determination that the factual basis underlying the application is incorrect.

IV. Alternate Test Procedure

The Department will make a judgment on the LG Petition after the period for public comment. However, should DOE grant LG a waiver for its DLEC733W condenser clothes dryer model, DOE would likely prescribe an alternate test procedure. Manufacturers face restrictions with respect to making representations about the energy consumption and energy consumption costs of products covered by EPCA. (42 U.S.C. 6293(c)) Consistent representations are important for manufacturers who make claims about the energy efficiency of their products. For example, they are necessary to determine compliance with Federal, state or local energy codes and regulatory requirements, and can provide valuable consumer purchasing information.

Therefore, DOE is considering issuing an alternate test procedure for LG in the upcoming Decision and Order. The Department is publishing the proposed alternate test procedure in this notice, though it has not yet made a determination on the petition, to account for the potential need for an alternate test procedure and to allow the public to comment on a proposed alternate test procedure. LG did not include an alternate test procedure in its petition. However, LG noted that it knows of no other test procedure that would rate its condenser dryer products. DOE is considering including in the Decision and Order an alternate test procedure that is based on existing test procedures for clothes dryers, but removes the requirement to use an exhaust restrictor.

The Department proposes the following language: 10 CFR Parts 430 Subpart B, Appendix D—"Uniform Test Method for Measuring the Energy Consumption of Clothes Dryers," as amended:

(A) Section 1 is amended by adding the two following definitions at the end of the section:

1.14 "Conventional clothes dryer" means a clothes dryer that exhausts the evaporated moisture from the cabinet.

1.15 "Condensing clothes dryer" means a clothes dryer that uses a closed loop system with an internal condenser to remove the evaporated moisture from the heated air. The moist air is not discharged from the cabinet.

(B) Section 2.1 is amended by striking the second and third sentences, "The dryer exhaust shall be restricted by adding the AHAM exhaust simulator described in 3.3.5 of HLD-1" and "All external joints should be taped to avoid air leakage," and by adding the following sentences at the end of the paragraph: "For conventional clothes dryers, the dryer exhaust shall be restricted by adding the AHAM exhaust simulator described in 3.3.5 of HLD-1. All external joints should be taped to avoid air leakage."

V. Summary and Request for Comments

Today's notice announces LG's Petition for Waiver and denies LG an Interim Waiver from the test procedures applicable to LG's DLEC733W model condensing clothes dryers. The Department is publishing the LG Petition for Waiver in its entirety. The Petition contains no confidential information. Furthermore, today's notice includes an alternate test procedure that the Department is considering for testing of condensing clothes dryers. In this alternate test procedure, the Department proposes eliminating the requirement to use an exhaust restrictor for condenser clothes dryers.

The Department is interested in receiving comments on all aspects of this notice. The Department is particularly interested in receiving comments and views of interested parties concerning whether to grant the LG Petition and regarding the proposed alternate test procedure. Specifically, the Department would like to receive comment on the following questions:

- The LG Petition states that the condensing clothes dryer inherently uses more energy to dry a load of clothes than a conventional dryer. However, it appears that full-size condenser dryers may be able to meet existing minimum energy standards. The Department is interested in comment on what, if any, technologies could allow condenser clothes dryers to meet existing minimum energy standards. Furthermore, the Department is interested in comments on whether any condenser clothes dryers available in the U.S. or other consumer markets currently meet the U.S. minimum energy standard.

- If other condenser clothes dryers are able to meet the existing minimum energy standards, is it appropriate for

DOE to require LG to meet existing energy standards despite their potential added utility? What is appropriate for DOE to require of LG should no other condenser dryers meet current energy standards?

- Is it appropriate for LG to use the proposed alternate test procedure for ratings, representations and compliance with energy codes and regulatory requirements?

- Are the alternate test procedure's additional definitions for conventional and condenser clothes dryers robust, and do they fully apply to LG's condensing clothes dryers?

- Current test procedures for clothes dryers require that the ambient temperature for testing conditions be maintained within a range of 3F, and that the humidity be maintained within a range of 10 percent relative humidity. Is it reasonable to require similar ranges for the testing of condensing clothes dryers?

In addition, the Department is interested in receiving general comments on possible modifications to any test procedures or alternative rating methods which the Department could use to fairly represent the energy efficiency LG's condensing clothes dryer products.

Any person submitting written comments must also send a copy of such comments to the petitioner, whose contact information is cited above. (10 CFR 430.27(b)(1)(iv))

Issued in Washington, DC, on August 11, 2006.

Forrestal Building,
1000 Independence Avenue, SW.,
Washington, DC 20585.

Re: Petition for Waiver and Application for Interim Waiver, LG Electronics Condensing Clothes Dryers

Dear Assistant Secretary:

LG Electronics, Inc (LG) hereby submits this Petition for Waiver and Application for Interim Waiver, pursuant to 10 CFR 430.27, for its condenser clothes dryers. A waiver was granted to Miele Appliance, Inc for the same type of product. 60 FR 9330 (Feb. 17, 1995).

LG is a manufacturer of digital appliances, as well as mobile communications, digital displays, and digital media products. Its appliances include washing machines, clothes

dryers, refrigerator-freezers, air-conditioners, air cleaners, ovens, microwave ovens, dishwashers, and vacuum cleaners and are sold worldwide, including in the United States. LG's U.S. operations are LG Electronics USA, Inc, with headquarters at 1000 Sylvan Avenue, Englewood Cliffs, NJ 07632 (tel. 202-816-2000). Its worldwide headquarters are located at LG Twin Towers 20, Yoido-dong, Youngdungpo-gu Seoul, Korea 150-721 (tel. 011-82-2-3777-1114) URL: <http://www.LGE.com>. LG's principal brands include LG®, and OEM brands including GE® and Kenmore®. LG's appliances are produced in Korea and Mexico.

LG plans to market highly efficient, advanced-design condenser (non-vented) clothes dryers. (The current LG model number of these products is DLEC733W.) This product does not vent exhaust air to the outside as a conventional dryer does, but rather uses ambient air to cool the hot, humid inside the appliance thereby condensing out the moisture. Thus, there is no exhaust air, only a wastewater stream that can be drained into a water container. This type of product is suited for installation conditions where exhaust venting is not practical or is cost prohibitive. It thus benefits those dwellers of high-rise apartments and others who in many cases have no way to vent to the outside or at least not without considerable remodeling/construction expense. The advantageous no-exhaust design characteristic produces a more complex drying process than the regular vented dryer.

Condenser clothes dryers offer additional utility to the consumer that affects energy consumption, and the characteristics of the product are not reflected by the test procedure. The condenser clothes dryer does not have an outside vent exhaust, and extracting the moisture from the warm moist air in the drum requires more energy to dry clothes than simply exhausting the warm moist air to the outdoors.¹

DOE's existing test procedure for clothes dryers requires the use of an exhaust restrictor to simulate the backpressure effects of a vent tube in an installed condition. And the test procedure does not provide any definition or mention of condenser

¹ However, while the condensing dryer inherently uses more energy to dry a load of clothes than a conventional dryer, the condensing dryer could save substantially more household energy than a conventional dryer if the effects on space heating and cooling requirements are considered. The air lost from dryer exhaust vent can impose a significant load on the space-conditioning unit as cool or hot outdoor air is drawn inside the room or home to replace the exhausted air.

clothes dryers. Since LG's condenser clothes dryers do not have an exhaust vent and the DOE test procedure does not provide any definition or mention of condenser clothes dryers, the products cannot be tested in accordance with the test procedure. Thus, the test procedure does not apply to them. Consequently, the DOE energy conservation standard for clothes dryers does not apply to LG condenser dryers since the DOE standard must be "determined in accordance with test procedures prescribed under section 6293 of this title." 42 U.S.C. 6291(6).

These circumstances clearly warrant a waiver. 10 CFR 430.27 provides for waiver of DOE test procedures on the grounds that a basic model contains design characteristics that either prevent testing according to the prescribed test procedure or produce data so unrepresentative of a covered product's true energy consumption characteristics as to provide materially inaccurate comparative data. As discussed above, the LG condenser clothes dryer contains a design characteristic—lack of an exhaust—that prevents testing according to the DOE test procedure. Further, the test procedure does not provide any definition or mention of condenser clothes dryers. A waiver should therefore be granted that provides that LG is not required to test its condenser clothes dryers. The existing minimum energy conservation standard for clothes dryers also should not apply to these LG condenser clothes dryers. The waiver should remain in effect until DOE prescribes final test procedures and minimum energy conservation standards appropriate to LG's condenser clothes dryers.

That a waiver is warranted is borne out by the fact that DOE has granted a waiver to Miele for the same type of product. 60 FR 9330 (Feb. 17, 1995). DOE stated:

"The Department agrees with Miele and AHAM that the condenser clothes dryer offers the consumer additional utility, and is justified to consum[e] more energy (lower energy factor) versus non-condenser clothes dryers. Furthermore, the Department believes that the existing clothes dryer test procedure is not applicable to the Miele condenser clothes dryers. This assertion is based on the fact that the existing test procedure requires the use of an exhaust restrictor and does not provide any definition or mention of condenser clothes dryers. The Department agrees with Miele that the current clothes dryer minimum energy conservation standard does not apply to Miele's condenser clothes dryers. Today's Decision and Order exempts Miele from testing its condenser clothes dryer and determining an Energy Factor.

The Department is not publishing an amended test procedure for Miele at this time

because there is not any reason to. The existing minimum energy conservation standard for clothes dryers is not applicable to the Miele condenser clothes dryer. Furthermore, the FTC does not have a labeling program for clothes dryers, therefore, Miele is not required to test its condenser clothes dryers."

LG urges that the same waiver be granted to LG as was granted to Miele for its comparable product.

Manufacturers of all other basic models marketed in the United States and known to LG to incorporate similar design characteristics as the LG condenser clothes dryer include Miele and Bosch (model number WTL5410).

LG is not aware of any alternative test procedure to evaluate in a manner representative of the energy consumption characteristics of the LG condenser clothes dryers. LG notes that DOE's February 17, 1995 decision on Miele's application indicated that Miele proposed that DOE consider adding a class for condenser clothes dryers in the then current clothes dryer rulemaking for minimum efficiency standards, along with an appropriate test procedure. DOE's decision indicated that DOE would consider adding a new product class for condenser clothes dryers in that rulemaking and would initiate a clothes dryers test procedure rulemaking to add the capability of testing condenser clothes dryers to the existing test procedure for any potential future use. To the best of LG's knowledge, DOE has not done so.

LG also requests immediate relief by grant of an interim waiver. Grant of an interim waiver is fully justified:

The petition for waiver is likely to be granted, as evidenced not only by its merits but also because DOE has already granted a similar waiver to Miele.

Lack of relief will impose economic hardship on LG. LG would be placed in an untenable situation: The product would be subject to a set of regulations that DOE already acknowledges is not applicable to such a product and cannot be complied with, while at the same time another manufacturer is allowed to operate under a waiver from such regulations.

Significant investment has already been made in LG condensing clothes dryers. Lack of relief would not allow LG to recoup this investment and would deny LG anticipated sales revenue. This does not take into account significant losses in goodwill and brand acceptance.

Beyond that, since the LG condensing clothes dryer is intended to be sold as a pair with LG washing machines an inability to sell the clothes dryer will

harm sales of the washing machine as well.

The basic purpose of the Energy Policy and Conservation Act, as amended by the National Appliance Energy Conservation Act, is to foster purchase of energy-efficient appliances, not hinder such purchases. The LG condenser clothes dryer makes a dryer available to households where for physical, structural reasons a vented dryer could otherwise not be installed. LG condenser clothes dryers thus offer benefits in the public interest. To encourage and foster the availability of these products is in the public interest. Standards programs should not be used as a means to block innovative, improved designs.² DOE's rules thus should accommodate and encourage—not act to block—such a product.

Granting the interim waiver and waiver would also eliminate a non-tariff trade barrier.

In addition, grant of relief would help enhance economic development and employment, including not only LG Electronics USA's operations in New Jersey, Illinois and Alabama, but also at major national retailers and regional dealers that carry LG products. Furthermore, continued employment creation and ongoing investments in its marketing, sales and servicing activities will be fostered by approval of the interim waiver. Conversely, denial of the requested relief would harm the company and would be anticompetitive.

* * * * *

We would be pleased to discuss this request with DOE and provide further information as needed.

We hereby certify that all clothes dryer manufacturers of domestically marketed units known to LG have been notified by letter of this petition and application, copies of which letters are attached.

Sincerely,

Richard Donner, Product Planning Manager, North America Product Planning Group, LG Electronics USA, Inc, 2000 Millbrook Drive, Lincolnshire, IL 60069, Phone: 201-906-9878, Fax: 847-941-8340, E-mail: rdonner@lge.com.

BILLING CODE 6450-01-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-8212-7]

National Advisory Council for Environmental Policy and Technology Environmental Technology Subcommittee

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of meeting.

SUMMARY: Under the Federal Advisory Committee Act, P.L. 92463, EPA gives notice of a meeting of the Environmental Technology Subcommittee of the National Advisory Council for Environmental Policy and Technology (NACEPT). NACEPT provides advice and recommendations to the Administrator of EPA on a broad range of environmental policy, technology, and management issues. The Environmental Technology Subcommittee was formed to assist EPA in evaluating its current and potential role in the development and commercialization of environmental technologies by suggesting how to optimize existing EPA programs to facilitate the development of sustainable private sector technologies, and by suggesting alternative approaches to achieving these goals. The purpose of the meeting is to continue the Subcommittee's consideration of these issues. A copy of the agenda for the meeting will be posted at <http://www.epa.gov/ocem/nacept/cal-nacept.htm>.

DATES: The NACEPT Environmental Technology Subcommittee will hold a two day open meeting on Thursday, September 14, 2006 from 9 a.m. to 5:30 p.m. and Friday, September 15, 2006 from 8:30 a.m. to 1:30 p.m.

ADDRESSES: The meeting will be held at the Marriott Crystal City Hotel, 1999 Jefferson Davis Highway, Arlington, Virginia 22202. The meeting is open to the public, with limited seating on a first-come, first-served basis.

FOR FURTHER INFORMATION CONTACT: Mark Joyce, Designated Federal Officer, joyce.mark@epa.gov, 202-233-0068, U.S. EPA, Office of Cooperative Environmental Management (1601E), 1200 Pennsylvania Avenue, NW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION: Requests to make oral comments or provide written comments to the Subcommittee should be sent to Mark Joyce, Designated Federal Officer, at the contact information above. The public is welcome to attend all portions of the meeting.

Meeting Access: For information on access or services for individuals with disabilities, please contact Mark Joyce at 202-233-0068 or joyce.mark@epa.gov. To request accommodation of a disability, please contact Mark Joyce, preferably at least 10 days prior to the meeting, to give EPA as much time as possible to process your request.

Dated: August 16, 2006.

Mark Joyce,

Designated Federal Officer.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPP-2004-0048; FRL-8087-5]

Amitraz; Tolerance Reassessment Decision; Notice of Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of EPA's Tolerance Reassessment Decision (TRED) for the pesticide amitraz, and opens a public comment period on this document. The Agency's risk assessments and other related documents also are available in the amitraz Docket. Through the tolerance reassessment program, EPA is ensuring that all pesticides meet current health and food safety standards.

DATES: Comments must be received on or before October 23, 2006.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPP-2004-0048, by one of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.
- **Mail:** Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001.
- **Delivery:** OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. Deliveries are only accepted during the Docket's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday,

excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket telephone number is (703) 305-5805.

Instructions: Direct your comments to docket ID number EPA-HQ-OPP-2004-0048. EPA's policy is that all comments received will be included in the docket without change and may be made available on-line at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through www.regulations.gov or e-mail. The Federal www.regulations.gov Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through www.regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the docket index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either in the electronic docket at <http://www.regulations.gov>, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket telephone number is (703) 305-5805.

FOR FURTHER INFORMATION CONTACT: Amaris Johnson, Special Review and Reregistration Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; telephone number: (703) 305-9542; fax number: (703) 308-7070; e-mail address: johnson.amaris@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What Should I Consider as I Prepare My Comments for EPA?

1. **Submitting CBI.** Do not submit this information to EPA through www.regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for preparing your comments.** When submitting comments, remember to:

- i. Identify the document by docket (ID) number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

iv. Describe any assumptions and provide any technical information and/or data that you used.

v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

vi. Provide specific examples to illustrate your concerns and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

II. Background

A. What Action is the Agency Taking?

EPA has reassessed dietary and residential risks associated with use of the pesticide amitraz, reassessed 27 existing tolerances or legal residue limits, and on July 31, 2006, reached a tolerance reassessment and risk management decision. Eleven of the existing tolerances are proposed for revocation, and the technical registrant has requested to retain an import tolerance for cottonseed. Amitraz is an insecticide used to treat mites, lice, and ticks on cattle and swine. It can also be applied to the walls and surfaces of swine houses. In addition, amitraz is registered to treat ticks via amitraz-impregnated dog collars. The Agency is now issuing for comment a Report on the Food Quality Protection Act (FQPA) Tolerance Reassessment Progress and Risk Management Decision for amitraz, known as a TRED.

EPA must review tolerances and tolerance exemptions that were in effect when FQPA was enacted in August 1996, to ensure that these existing pesticide residue limits for food and feed commodities meet the safety standard established by the new law. Tolerances are considered reassessed once the safety finding has been made or a revocation occurs. EPA has reviewed and made the requisite safety finding for the amitraz tolerances.

EPA is applying the principles of public participation to all pesticides undergoing reregistration and tolerance reassessment. The Agency's Pesticide Tolerance Reassessment and Reregistration; Public Participation Process, published in the **Federal Register** on May 14, 2004, (69 FR 26819) (FRL-7357-9) explains that in conducting these programs, EPA is tailoring its public participation process to be commensurate with the level of risk, extent of use, complexity of issues, and degree of public concern associated with each pesticide. Due to its limited

uses, risks, and other factors, amitraz was reviewed through the modified 4-Phase public participation process. Through this process, EPA worked extensively with stakeholders and the public to reach the regulatory decisions for amitraz.

The tolerance reassessment program is being conducted under Congressionally mandated time frames, and EPA recognizes the need both to make timely decisions and to involve the public. The Agency is issuing the amitraz TRED for public comment. This comment period is intended to provide an additional opportunity for public input and a mechanism for initiating any necessary amendments to the TRED. All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. These comments will become part of the Agency Docket for amitraz. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

The Agency will carefully consider all comments received by the closing date and will provide a Response to Comments Memorandum in the Docket and regulations.gov. If any comment significantly affects the document, EPA also will publish an amendment to the TRED in the **Federal Register**. In the absence of substantive comments requiring changes, the tolerance reassessment decisions reflected in this TRED will be implemented as presented.

B. What is the Agency's Authority for Taking this Action?

Section 408(q) of the FFDCA, 21 U.S.C. 346a(q), required EPA to review tolerances and exemptions for pesticide residues in effect as of August 2, 1996, to determine whether the tolerance or exemption meets the requirements of section 408(b)(2) or (c)(2) of FFDCA.

List of Subjects

Environmental protection, Pesticides and pests.

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPP-2006-0284; FRL-8085-6]

Aliphatic Solvents; Reregistration Eligibility Decision for Low Risk Pesticide; Notice of Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of EPA's Reregistration Eligibility Decision (RED) for the pesticide aliphatic solvents, and opens a public comment period on this document, related risk assessments, and other support documents. EPA has reviewed the low risk pesticide aliphatic solvents through a modified, streamlined version of the public participation process that the Agency uses to involve the public in developing pesticide reregistration and tolerance reassessment decisions. Through these programs, EPA is ensuring that all pesticides meet current health and safety standards.

DATES: Comments must be received on or before October 23, 2006.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPP-2006-0284, by one of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.
- **Mail:** Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001.
- **Delivery:** OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S-4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Drive, Arlington, VA. Deliveries are only accepted during the Docket's normal hours of operation 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. Special arrangements should be made for deliveries of boxed information. The Docket telephone number is (703) 305-5805.

Instructions: Direct your comments to docket ID number EPA-HQ-OPP-2006-0284. EPA's policy is that all comments received will be included in the docket without change and may be made available on-line at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information

whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through regulations.gov or e-mail. The Federal regulations.gov Web site is an $\geq$ anonymous access $\geq$ system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the docket index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either in the electronic docket at <http://www.regulations.gov>, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Drive, Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket telephone number is (703) 305-5805.

FOR FURTHER INFORMATION CONTACT: Bentley Gregg, Special Review and Reregistration Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; telephone number: (703) 308-8178; fax number: (703) 308-8005; e-mail address: gregg.bentley@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, and

agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What Should I Consider as I Prepare My Comments for EPA?

1. **Submitting CBI.** Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for preparing your comments.** When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/or data that you used.
- v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- vi. Provide specific examples to illustrate your concerns and suggest alternatives.
- vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- viii. Make sure to submit your comments by the comment period deadline identified.

II. Background

A. What Action is the Agency Taking?

Under section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA is reevaluating existing pesticides to ensure that they meet current scientific and regulatory standards. Using a modified, streamlined version of its public participation process, EPA has completed a RED for the low risk pesticide, aliphatic solvents under section 4(g)(2)(A) of FIFRA. Aliphatic solvents are the product of petroleum distillations processes, and thus, they are complex mixtures of long-chain aliphatic (paraffinic) compounds. They are formulated for use as insecticides and/or larvicides on crops, animal premises, commercial/industrial premises, medical premises, aquatic areas, and residential premises, as well as occupational and residential uses as acaricides, fungicides, herbicides, and virucides (for plant pathogen). The aquatic area applications are for usage as a mosquito larvicide/pupacide. EPA has determined that the data base to support reregistration is substantially complete and that products containing aliphatic solvents will be eligible for reregistration. Upon submission of any required product specific data under section 4(g)(2)(B) and any necessary changes to the registration and labeling (either to address any concerns identified in the RED or as a result of product specific data), EPA will make a final reregistration decision under section 4(g)(2)(C) for products containing aliphatic solvents.

EPA must review tolerances and tolerance exemptions that were in effect when the Food Quality Protection Act (FQPA) was enacted in August 1996, to ensure that these existing pesticide residue limits for food and feed commodities meet the safety standard established by the new law. Tolerances are considered reassessed once the safety finding has been made or a revocation occurs. EPA has reviewed and made the requisite safety finding for the aliphatic solvents tolerances.

Although, the aliphatic solvents RED was signed on July 12, 2006, certain components of the document, which did not affect the final regulatory decision, were undergoing final editing at that time. These components, including the list of additional generic data requirements, summary of labeling changes, appendices, and other relevant information, have been added to the aliphatic solvents RED document. In addition, subsequent to signature, EPA identified several minor errors and ambiguities in the document. Therefore,

for the sake of accuracy, the Agency also has included the appropriate error corrections, amendments, and clarifications. None of these additions or changes alter the conclusions documented in the July 12, 2006 aliphatic solvents RED. All of these changes are described in detail in an errata memorandum which is included in the public docket for aliphatic solvents.

EPA is applying the principles of public participation to all pesticides undergoing reregistration and tolerance reassessment. The Agency's Pesticide Tolerance Reassessment and Reregistration; Public Participation Process, published in the **Federal Register** on May 14, 2004, (69 FR 26819)(FRL-7357-9) explains that in conducting these programs, the Agency is tailoring its public participation process to be commensurate with the level of risk, extent of use, complexity of issues, and degree of public concern associated with each pesticide. EPA can expeditiously reach decisions for pesticides like aliphatic solvents, which pose few risk concerns, and require little risk mitigation. Once EPA assesses uses and risks for such low risk pesticides, the Agency may go directly to a decision and prepare a document summarizing its findings, such as the aliphatic solvents RED.

The reregistration program is being conducted under Congressionally mandated time frames, and EPA recognizes the need both to make timely decisions and to involve the public in finding ways to effectively mitigate pesticide risks. Aliphatic solvents, however, poses few risks that require mitigation. The Agency therefore is issuing the aliphatic solvents RED, its risk assessments, and related support materials simultaneously for public comment. The comment period is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the RED. All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. These comments will become part of the Agency Docket for aliphatic solvents. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

EPA will carefully consider all comments received by the closing date and will provide a response to Comments Memorandum in the Docket and regulations.gov. If any comment significantly affects the document, EPA also will publish an amendment to the RED in the **Federal Register**. In the

absence of substantive comments requiring changes, the aliphatic solvents RED will be implemented as it is now presented.

B. What is the Agency's Authority for Taking this Action?

Section 4(g)(2) of FIFRA as amended directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product specific data on individual end-use products and either reregistering products or taking other "appropriate regulatory action."

Section 408(q) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(q), requires EPA to review tolerances and exemptions for pesticide residues in effect as of August 2, 1996, to determine whether the tolerance or exemption meets the requirements of section 408(b)(2) or (c)(2) of FFDCA.

List of Subjects

Environmental protection, Pesticides and pests.

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPP-2002-0202; FRL-8089-1]

Lindane; Notice of Receipt of Requests to Voluntarily Cancel Lindane Pesticide Registrations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, EPA is issuing a notice of receipt of requests by registrants to voluntarily cancel products containing the pesticide lindane. The requests would terminate the last lindane products registered for use in the U.S. EPA intends to grant these requests at the close of the comment period for this announcement unless the Agency receives substantive comments within the comment period that would merit its further review of the requests, or unless the registrants withdraw their requests within this period. Upon acceptance of these requests, any sale, distribution, or use of

products listed in this notice will be permitted only if such sale, distribution, or use is consistent with the terms as described in the final order.

DATES: Comments must be received on or before September 22, 2006.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPP-2002-0202, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.

- *Mail:* Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001.

- *Delivery:* OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. Deliveries are only accepted during the Docket's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket telephone number is (703) 305-5805.

Instructions: Direct your comments to docket ID number EPA-HQ-OPP-2002-0202. EPA's policy is that all comments received will be included in the docket without change and may be made available on-line at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through [regulations.gov](http://www.regulations.gov) or e-mail. The [regulations.gov](http://www.regulations.gov) Web site is an $\geq$ anonymous access $\geq$ system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through [regulations.gov](http://www.regulations.gov), your e-mail address will be automatically captured and included as part of the comment that is placed in the docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of

special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the docket index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either in the electronic docket at <http://www.regulations.gov>, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket telephone number is (703) 305-5805.

FOR FURTHER INFORMATION CONTACT:

Mark T. Howard, Special Review and Reregistration Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; telephone number: (703) 308-8172; fax number: (703) 308-7070; e-mail address: howard.markt@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What Should I Consider as I Prepare My Comments for EPA?

1. **Submitting CBI.** Do not submit this information to EPA through [regulations.gov](http://www.regulations.gov) or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one

complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for preparing your comments.** When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/or data that you used.
- v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- vi. Provide specific examples to illustrate your concerns and suggest alternatives.
- vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- viii. Make sure to submit your comments by the comment period deadline identified.

II. Background on the Receipt of Requests to Cancel and/or Amend Registrations to Delete Uses

This notice announces receipt by EPA of requests from registrants AGSCO Inc., Chemtura USA Corporation, Drexel Chemical Company, and JLM International Inc. to cancel 12 lindane product registrations. Lindane, a broad spectrum, organochlorine insecticide, is used as a pre-plant seed treatment on six crops. In letters dated July 20, 2006 (Chemtura); July 25, 2006 (AGSCO); July 26, 2006 (Drexel); and July 27, 2006 (JLM), the registrants requested EPA to cancel the product registrations identified in this notice (Table 1). This action will terminate the last lindane products registered under FIFRA in the United States.

III. What Action is the Agency Taking?

This notice announces receipt by EPA of requests from registrants to cancel lindane product registrations. The specific products and the registrants making the requests are identified in Tables 1 and 2 of this unit.

Under section 6(f)(1)(A) of FIFRA, registrants may request, at any time, that their pesticide registrations be canceled or amended to terminate one or more pesticide uses. Section 6(f)(1)(B) of FIFRA requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation or use termination. In addition, section 6(f)(1)(C) of FIFRA requires that EPA provide a 180-day comment period on a request for voluntary cancellation or termination of any minor agricultural use before granting the request, unless:

1. The registrants request a waiver of the comment period, or

2. The Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

The lindane registrants have requested that EPA waive the 180-day comment period. EPA will provide a 30-day comment period on the proposed requests.

Unless a request is withdrawn by the registrant within 30 days of publication of this notice, or if the Agency determines that there are substantive comments that warrant further review of this request, an order will be issued canceling the affected registrations.

TABLE 1.—LINDANE PRODUCT REGISTRATIONS WITH PENDING REQUESTS FOR CANCELLATION

Registration No.	Product name	Company
400-490	Gustafson Flowable Lindane 40%	Chemtura USA Corporation
400-532	Sorghum Guard	Chemtura USA Corporation
400-538	Gustafson Lindane 30C Flowable	Chemtura USA Corporation

Table 2 of this unit includes the names and addresses of record for the registrants of the products listed in Table 1 of this unit.

TABLE 2.—REGISTRANTS REQUESTING VOLUNTARY CANCELLATION

EPA Company No.	Company name and address
400	Chemtura USA Corporation 199 Benson Road Middlebury, Connecticut 06749
554	AGSCO Inc. PO Box 13458 Grand Forks North Dakota 58208-3458
19713	Drexel Chemical Co. 1700 Channel Avenue, PO Box 13327 Memphis, Tennessee 38113-0327
82378	JLM International Inc. 8675 Hidden River Parkway Tampa, Florida 33637

IV. What is the Agency's Authority for Taking this Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, following the public comment period,

the Administrator may approve such a request.

V. Procedures for Withdrawal of Request and Considerations for Reregistration of Lindane

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**, postmarked before September 22, 2006. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the products have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

VI. Provisions for Disposition of Existing Stocks

If the request for voluntary cancellation is granted as discussed above, the effective date of cancellation will be the date of the cancellation order. EPA intends to issue a cancellation order that will allow continued sale and/or use of existing stocks until such stocks are exhausted, provided that such further sale and use is consistent with the terms of the previously approved labeling on, or that accompany, the applicable product. It is EPA's intent that the order will specifically prohibit any use of existing stocks that is not consistent with such previously approved labeling.

List of Subjects

Environmental protection, Pesticides and pests.

Propiconazole Reregistration Eligibility Decision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of EPA's Reregistration

Eligibility Decision (RED) for the pesticide propiconazole. The Agency's risk assessments and other related documents also are available in the propiconazole docket. Propiconazole is used as a conventional fungicide on agricultural crops, ornamentals, and turf and is used as an antimicrobial material preservative and wood preservative. EPA has reviewed propiconazole through the public participation process that the Agency uses to involve the public in developing pesticide reregistration and tolerance reassessment decisions. Through these programs, EPA is ensuring that all pesticides meet current health and safety standards.

FOR FURTHER INFORMATION CONTACT:

Christina Scheltema, Special Review and Reregistration Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; telephone number: (703) 308-2201; fax number: (703) 308-8005; e-mail address: scheltema.christina@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

1. *Docket.* EPA has established a docket for this action under docket identification (ID) number EPA-HQ-OPP-2005-0497. Publicly available docket materials are available either in the electronic docket at <http://www.regulations.gov>, or, if only available in hard copy, at the Office of Pesticide Programs (OPP) Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal

holidays. The Docket Facility telephone number is (703) 305-5805.

2. *Electronic access.* You may access this **Federal Register** document electronically through the EPA Internet under the **Federal Register** listings at <http://www.epa.gov/fedrgstr>.

II. Background

A. What Action is the Agency Taking?

Under section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA is reevaluating existing pesticides to ensure that they meet current scientific and regulatory standards. EPA has completed a Reregistration Eligibility Decision (RED) for the pesticide propiconazole under section 4(g)(2)(A) of FIFRA. Propiconazole is used as a conventional fungicide on agricultural crops, ornamentals, and turf and is used as an antimicrobial material preservative and wood preservative. EPA has determined that the database to support reregistration is substantially complete and that currently registered products containing propiconazole are eligible for reregistration, provided the risks are mitigated either in the manner described in the RED or by another means that achieves equivalent risk reduction. Upon submission of any required product-specific data under section 4(g)(2)(B) and any necessary changes to the registration and labeling (either to address concerns identified in the RED or as a result of product-specific data), EPA will make a final reregistration decision under section 4(g)(2)(C) for products containing propiconazole.

EPA must review tolerances and tolerance exemptions that were in effect when the Food Quality Protection Act (FQPA) was enacted in August 1996, to ensure that these existing pesticide residue limits for food and feed commodities meet the safety standard established by the new law. Tolerances are considered reassessed once the safety finding has been made or a revocation occurs. EPA has reviewed and made the requisite safety finding for the propiconazole tolerances.

Although the Propiconazole RED was signed on July 18, 2006, certain components of the document, which did not affect the final regulatory decision, were undergoing final editing at that time. These components, including the list of additional generic data requirements, summary of labeling changes, appendices, and other relevant information, have been added to the Propiconazole RED document.

EPA is applying the principles of public participation to all pesticides

undergoing reregistration and tolerance reassessment. The Agency's Pesticide Tolerance Reassessment and Reregistration; Public Participation Process, published in the **Federal Register** on May 14, 2004 (69 FR 26819) (FRL-7357-9), explains that in conducting these programs, EPA is tailoring its public participation process to be commensurate with the level of risk, extent of use, complexity of issues, and degree of public concern associated with each pesticide. Due to its uses, risks, and other factors, propiconazole was reviewed through the modified 4-Phase public participation process. Through this process, EPA worked extensively with stakeholders and the public to reach the regulatory decisions for propiconazole.

The reregistration program is being conducted under Congressionally mandated time frames, and EPA recognizes the need both to make timely decisions and to involve the public. Because few substantive comments were received during the earlier comment period for this pesticide, and all issues related to this pesticide were resolved through consultations with stakeholders, no comment period is needed on this regulatory decision. The Agency therefore is issuing the Propiconazole RED without a comment period.

B. What is the Agency's Authority for Taking this Action?

Section 4(g)(2) of FIFRA as amended, directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product-specific data on individual end-use products and either reregistering products or taking other "appropriate regulatory action."

Section 408(q) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(q), requires EPA to review tolerances and exemptions for pesticide residues in effect as of August 2, 1996, to determine whether the tolerance or exemption meets the requirements of section 408(b)(2) or (c)(2) of FFDCA. This review is to be completed by August 3, 2006.

List of Subjects

Environmental protection, Material preservatives, Pesticides and pests, Propiconazole, Triazole fungicides, Wood preservatives.

Dated: August 14, 2006.

Peter Caulkins,

Acting Director, Special Review and Reregistration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-S

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPP-2006-0505; FRL-8073-2]

Notice of Filing of a Pesticide Petition for Establishment of Regulations for Residues of Myclobutanil in or on Soybean Commodities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the initial filing of a pesticide petition proposing the establishment of regulations for residues of myclobutanil in or on soybean commodities.

DATES: Comments must be received on or before September 22, 2006.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPP-2006-0505 and pesticide petition number (PP) 5F6997, by one of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.

- **Mail:** Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001.

- **Delivery:** OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. Deliveries are only accepted during the Docket's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket telephone number is (703) 305-5805.

Instructions: Direct your comments to docket ID number EPA-HQ-OPP-2006-0505. EPA's policy is that all comments received will be included in the docket without change and may be made available on-line at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you

consider to be CBI or otherwise protected through regulations.gov or e-mail. The Federal regulations.gov Web site is an anonymous access system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the docket index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either in the electronic docket at <http://www.regulations.gov>, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket telephone number is (703) 305-5805.

FOR FURTHER INFORMATION CONTACT: Lisa Jones, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; telephone number: (703) 308-9424, e-mail address: jones.lisa@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

- Crop production (NAICS code 111).

- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What Should I Consider as I Prepare My Comments for EPA?

1. **Submitting CBI.** Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for preparing your comments.** When submitting comments, remember to:

- Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

II. What Action is the Agency Taking?

EPA is printing a summary of a pesticide petition received under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, proposing the establishment or amendment of regulations in 40 CFR part 180 for residues of pesticide chemicals in or on various food commodities. EPA has determined that this pesticide petition contains data or information regarding the elements set forth in FFDCA section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the pesticide petition. Additional data may be needed before EPA rules on this pesticide petition.

Pursuant to 40 CFR 180.7(f), a summary of the petition included in this notice, prepared by the petitioner along with a description of the analytical method available for the detection and measurement of the pesticide chemical residues is available on EPA's Electronic Docket at <http://www.regulations.gov>. To locate this information on the home page of EPA's Electronic Docket, select "Quick Search" and type the OPP docket ID number. Once the search has located the docket, clicking on the "Docket ID" will bring up a list of all documents in the docket for the pesticide including the petition summary.

New Tolerance

PP 5F6997. Dow AgroSciences, 9330 Zionsville Road, Indianapolis, IN 46268, proposes to establish a tolerance for residues of the fungicide myclobutanil in or on food and feed commodities soybean, aspirated grain fractions at 1.1 parts per million (ppm); soybean, forage at 5.0 ppm; soybean, hay at 13.0 ppm; soybean, hulls at 0.06 ppm; soybean, meal at 0.03 ppm; soybean, oil at 0.1 ppm; and soybean, seed at 0.05 ppm. The validated analytical method limit of quantitation (LOQ) and the limit of detection (LOD) were 0.01 ppm and 0.003 ppm, respectively, for all soybean matrices. Final samples were filtered and the final solutions were analyzed using on-line solid phase extraction coupled to high performance liquid chromatography with positive-ion atmospheric pressure chemical ionization (APCI) tandem mass spectrometry (LC/MS/MS).

List of Subjects

Environmental protection, Agricultural commodities, Feed additives, Food additives, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: August 9, 2006.

Donald R. Stubbs,

Acting Director, Registration Division, Office of Pesticide Programs.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-8212-8]

Proposed CERCLA Section 122(g) Administrative Agreement for De Minimis Settlement for the Mercury Refining Superfund Site, Towns of Guilderland and Colonie, Albany County, NY

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; request for public comment.

SUMMARY: In accordance with section 122(i) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended ("CERCLA"), 42 U.S.C. 9622(i), notice is hereby given by the U.S. Environmental Protection Agency ("EPA"), Region II, of a proposed *de minimis* administrative agreement pursuant to section 122(g) of CERCLA, 42 U.S.C. 9622(g), between EPA and two hundred ninety two (292) settling parties pertaining to the Mercury Refining Superfund Site ("Site") located in the Towns of Guilderland and Colonie, Albany County, New York. The settlement requires specified individual payments by each settling party to the EPA Hazardous Substance Superfund Mercury Refining Superfund Site Special Account, which combined total \$2,160,742.74. Each settling party's individual settlement amount is considered to be that party's fair share of cleanup costs incurred and anticipated to be incurred in the future, plus a "premium" that accounts for, among other things, uncertainties associated with the costs of that future work at the Site. The settlement includes a covenant not to sue pursuant to sections 106 and 107 of CERCLA, 42 U.S.C. 9606 and 9607, relating to the Site, subject to limited reservations, and protection from contribution actions or claims as provided by sections 113(f)(2) and 122(g)(5) of CERCLA, 42 U.S.C.

9613(f)(2) and 9622(g)(5). For thirty (30) days following the date of publication of this notice, EPA will receive written comments relating to the settlement. EPA will consider all comments received and may modify or withdraw its consent to the settlement if comments received disclose facts or considerations that indicate that the proposed settlement is inappropriate, improper, or inadequate. EPA's response to any comments received will be available for public inspection at EPA Region II, 290 Broadway, New York, New York 10007-1866.

DATES: Comments must be submitted on or before September 22, 2006.

ADDRESSES: The proposed settlement is available for public inspection at EPA Region II offices at 290 Broadway, New York, New York 10007-1866. Comments should reference the Mercury Refining Superfund Site, Index No. CERCLA-02-2006-2003. To request a copy of the proposed settlement agreement, please contact the individual identified below.

FOR FURTHER INFORMATION CONTACT:

Sharon E. Kivowitz, Assistant Regional Counsel, New York/Caribbean Superfund Branch, Office of Regional Counsel, U.S. Environmental Protection Agency, 17th Floor, 290 Broadway, New York, New York 10007-1866. Telephone: 212-637-3183.

Dated: August 8, 2006.

Raymond J. Basso,

Acting Director, Emergency and Remedial Response Division, Region 2.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collections Approved by Office of Management and Budget

August 8, 2006.

SUMMARY: The Federal Communications Commission (FCC) has received Office of Management and Budget (OMB) approval for the following public information collections pursuant to the Paperwork Reduction Act of 1995, Public Law 104-13. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid control number.

FOR FURTHER INFORMATION CONTACT:

Cheryl B. Williams, Federal Communications Commission, 445 12th Street, SW., Washington, DC 20554, (202) 418-0497 or via the Internet at CherylB.Williams@fcc.gov.

SUPPLEMENTARY INFORMATION: OMB Control No.: 3060-0751.

OMB Approval Date: 1/05/2006.

Expiration Date: 1/31/2009.

Title: Reports Concerning International Private Lines Interconnected to the U.S. Public Switched Network.

Form No.: N/A.

Estimated Annual Burden: 10 responses; 80 total annual burden hours; 8 hours average per respondent.

Needs and Uses: The purpose of this information collection is to review the impact, if any, that end-user private line interconnections have on the U.S. international settlements policy. Without the collection of this information, the Commission would not be able to monitor the impact that end-user private line interconnections have on the U.S. international public switched network.

OMB Control No.: 3060-0768.

OMB Approval Date: 1/18/2006.

Expiration Date: 1/31/2009.

Title: 28 GHz Band Segmentation Plan Amending the Commission's Rules to Redesignate the 27.5-29.5 GHz Frequency Band, to Reallocate the 29.5-30.0 GHz Frequency Band, and to Establish Rules and Policies for Local Multipoint Distribution Services (LMDS) and for the Fixed Satellite Service.

Form No.: N/A.

Estimated Annual Burden: 60 responses; 90 total annual burden hours; 1.5 hours average per respondent.

Needs and Uses: The Federal Communications Commission ("Commission") and other applicants and/or licensees in the 28 GHz band use the information to determine the technical coordination of systems that are designed to share the same band segment in the 28 GHz frequency band. If this information is compiled less frequently or not filed in conjunction with the Commission's rules, applicants and licensees will not obtain the authorization necessary to provide telecommunications services; the Commission will not be able to carry out its mandate as required by statute; and applicants and licensees will not be able to provide service effectively.

OMB Control No.: 3060-0901.

OMB Approval Date: 4/26/2006.

Expiration Date: 4/30/2009.

Title: Reports of Common Carriers and Affiliates.

Form No.: N/A.

Estimated Annual Burden: 1,200 responses; 6,000 total annual burden hours; 5 hours average per respondent.

Needs and Uses: Common carriers must file copies of all contracts entered

into with a communications entity in a foreign point for the provision of common carrier service between the United States and that foreign point. Carriers are exempt from this requirement if the carrier enters into such a contract with a carrier that lacks market power in the relevant foreign market. The information is used by Commission staff to monitor the operating agreements of the U.S. carriers and their foreign correspondents that possess market power, specifically to monitor the international accounting rates of such carriers to ensure consistency with Commission policies and the public interest. Without the collection of information, the Commission could not preclude one-way bypass and safeguard its international settlements policy.

OMB Control No.: 3060–0962.

OMB Approval Date: 11/17/2005.

Expiration Date: 11/30/2008.

Title: Redesignation of the 18 GHz Frequency Band, Blanket Licensing of Satellite Earth Stations in the Ka-Band and the Allocation of Additional Spectrum for Broadcast Satellite Service Use.

Form No.: N/A.

Estimated Annual Burden: 590 responses; 590 total annual burden hours; 1–4 hours average per respondent.

Needs and Uses: This information collection is necessary for the Commission to determine whether licensees complied with the rules applicable to satellite earth stations and to deploy new satellite systems. Without this information, the Commission would not be able to verify whether Geostationary Satellite Orbit (GSO) Fixed Satellite Service (FSS) earth stations in the Ka-Band were operating in accordance with the Commission's rules.

OMB Control No.: 3060–1014.

OMB Approval Date: 4/05/2006.

Expiration Date: 4/30/2009.

Title: Ku-band NGSO FSS.

Form No.: N/A.

Estimated Annual Burden: 1 response; 1 total annual burden hour; 1 hour average per respondent.

Needs and Uses: The information collection requirements accounted for in this collection are necessary to ensure that prospective licensees in the Non-geostationary (NGSO) Fixed Satellite Service (FSS) follow their service rules. Without such information collection requirements, many existing radio services, both satellite and terrestrial could potentially be interrupted by interference caused by NGSO FSS systems on the same frequencies.

OMB Control No.: 3060–1035.

OMB Approval Date: 1/06/2006.

Expiration Date: 1/31/2009.

Title: Part 73, Subpart F—

International Broadcast Stations.

Form No.: FCC Forms 309, 310 and 311.

Estimated Annual Burden: 79 responses; 334 total annual burden hours; 0.5–10 hours average per respondent.

Needs and Uses: This information collection is used by the Commission to assign frequencies for use by international broadcast stations, to grant authority to operate such stations and to determine if interference or adverse propagation conditions exist that may impact the operation of such stations. The Commission collects this information pursuant to 47 CFR part 73, subpart F. If the Commission did not collect this information, it would not be in a position to effectively coordinate spectrum for international broadcasters or to act for entities in times of frequency interference or adverse propagation conditions.

Federal Communications Commission.

William F. Caton,

Deputy Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission for Extension Under Delegated Authority

August 8, 2006.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's

burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Persons wishing to comment on this information collection should submit comments October 23, 2006. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: You may submit your Paperwork Reduction Act (PRA) comments by e-mail or U.S. postal mail. To submit your comments by e-mail send them to: PRA@fcc.gov. To submit your comments by U.S. mail, mark it to the attention of Judith B. Herman, Federal Communications Commission, 445 12th Street, SW., Room 1–B441, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection(s) send an e-mail to PRA@fcc.gov or contact Judith B. Herman at 202–418–0214. If you would like to obtain or view a copy of this information collection after this 60 day comment period, you may do so by visiting the FCC PRA Web page at: <http://www.fcc.gov/omd/pr>.

SUPPLEMENTARY INFORMATION: *OMB Control No.:* 3060–0799.

Title: FCC Ownership Disclosure Information for the Wireless Telecommunications Services.

Form No.: FCC Form 602.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions, state, local or tribal government.

Number of Respondents: 500 respondents; 5,065 responses.

Estimated Time per Response: .50–3 hours.

Frequency of Response: On occasion reporting requirement and third party disclosure requirement.

Total Annual Burden: 3,565 hours.

Annual Cost Burden: \$478,200.

Privacy Act Impact Assessment: N/A.

Needs and Uses: On June 19, 2006, the Commission submitted this collection to the Office of Management and Budget (OMB) as a revision under the emergency processing procedures. We obtained OMB approval for the emergency request on July 17, 2006. OMB approval of the emergency request expires on December 31, 2006. This collection will be submitted to the OMB

after this 60 day comment period as an extension (no change in requirements) in order to obtain the full three year clearance from them.

The information collected on the FCC Form 602 include the FCC Registration Numbers (FRNs) for the filer, any related FCC regulated businesses of the filer, disclosable interest holders and any related FCC regulated businesses of disclosable interest holders. These data elements will not be displayed to the public. FCC Form 602 consists of a main form and associated schedule(s) for technical information.

There is no change to the estimated average burden or the number of respondents.

Federal Communications Commission.

William F. Caton,

Deputy Secretary.

[FR Doc. E6-13739 Filed 8-22-06; 8:45 am]

BILLING CODE 6712-01-P

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission for Extension Under Delegated Authority.

August 15, 2006.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, Public Law 104-13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Persons wishing to comment on this information collection should submit comments October 23, 2006. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: You may submit your Paperwork Reduction Act (PRA) comments by e-mail or U.S. postal mail. To submit your comments by e-mail send them to: PRA@fcc.gov. To submit your comments by U.S. mail, mark it to the attention of Leslie F. Smith, Federal Communications Commission, 445 12th Street, SW., Room 1-A804, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection(s) send an email to PRA@fcc.gov or contact Leslie F. Smith at (202) 418-0217.

SUPPLEMENTARY INFORMATION: OMB Control Number: 3060-0773.

Title: Section 2.803, Marketing of RF Devices Prior to Equipment Authorization.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Businesses or other for-profit entities.

Number of Respondents: 6,000.

Estimated Time per Response: 0.5 hours.

Frequency of Response: One time and occasion reporting requirements; Third party disclosure.

Total Annual Burden: 3,000 hours.

Total Annual Costs: N/A

Privacy Act Impact Assessment: No impact(s).

Needs and Uses: FCC rules permit the display and advertising of radio frequency (RF) devices prior to equipment authorization or a determination of compliance, providing that the advertising or display contains a conspicuous notice as specified at 47 CFR Section 2.803(c). A notice must also accompany RF prototype equipment devices offered for sale, as stated in 47 CFR Section 2.803(c)(1), prior to equipment authorization or a showing of compliance, that the equipment is a prototype and is not for sale. This information informs third parties of the FCC's requirement for the responsible party to comply with its rules.

OMB Control Number: 3060-0758.

Title: Amendment of Part 5 of the Commission's Rules to Revise the Experimental Radio Service Regulations, ET Docket No. 96-256.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; and Not-for-profit institutions.

Number of Respondents: 428.

Estimated Time per Response: 0.10 to 0.25 hours.

Frequency of Response: On occasion reporting requirement; Third party disclosure.

Total Annual Burden: 681 hours.

Total Annual Cost: None.

Privacy Act Impact Assessment: No impact(s).

Needs and Uses: Under 47 CFR Part 5 of the FCC's Rules governing the Experimental Radio Service: (1) Pursuant to Section 5.75, if a blanket license is granted, licensees are required to notify the Commission of the specific details of each individual experiment, including location, number of base and mobile units, power, emission designator, and any other pertinent technical information not specified by the blanket license; (2) pursuant to Section 5.85(d), when applicants are using public safety frequencies to perform experiments of a public safety nature, the license may be conditioned to require coordination between the experimental licensee and appropriate frequency coordinator and/or all public safety licensees in its area of operation; (3) pursuant to Section 5.85(e), the Commission may, at its discretion, condition any experimental license or special temporary authority (STA) on the requirement that before commencing operation, the new licensee coordinate its proposed facility with other licensees that may receive interference as a result of the new licensee's operations; and (4) pursuant to Section 5.93(b), unless otherwise stated in the instrument of authorization, a license granted for the purpose of limited market studies requires the licensee to inform anyone participating in the experiment that the service or device is granted under an experimental authorization and is strictly temporary. In all cases, it is the responsibility of the licensee to coordinate with other users.

Federal Communications Commission.

William F. Caton,

Deputy Secretary.

BILLING CODE 6712-01-P

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission, Comments Requested

August 15, 2006.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden, invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, Public Law No. 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information, subject to the Paperwork Reduction Act that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before October 23, 2006. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: You may submit your Paperwork Reduction Act (PRA) comments by e-mail or U.S. postal mail. To submit your comments by e-mail send them to: PRA@fcc.gov. To submit your comments by U.S. mail, mark it to the attention of Leslie F. Smith, Federal Communications Commission, 445 12th Street, SW., Room 1–A804, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection(s) send an e-mail to PRA@fcc.gov or contact Leslie F. Smith at 202–418–0217.

SUPPLEMENTARY INFORMATION: OMB Control Number: 3060–0059.

Title: Statement Regarding the Importation of Radio Frequency Devices Capable of Harmful Interference.

Form Number: FCC 740.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; Not for profit institutions; Individuals or households; and State, Local, or Tribal Governments.

Number of Respondents: 5,077.

Estimated Time per Response: 1–5 minutes.

Frequency of Response: On occasion reporting requirement; Third party disclosure.

Total Annual Burden: 28,030 hours.

Total Annual Costs: None.

Privacy Act Impact Assessment: No impact(s).

Needs and Uses: The FCC, working in conjunction with the U.S. Customs Service, is responsible for the regulation of both authorized radio services and devices that can cause interference. FCC Form 740 must be completed for each radio frequency device, which is imported into the United States, and is used to keep non-compliant devices from being distributed to the general public, thereby reducing the potential for harmful interference being caused to authorized communications. FCC Form 740 may be filed on paper or electronically via the FCC's Internet portal.

Federal Communications Commission.

William F. Caton,

Deputy Secretary.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission, Comments Requested

August 15, 2006.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, Public Law No. 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a valid control

number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before October 23, 2006. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: You may submit your all Paperwork Reduction Act (PRA) comments by e-mail or U.S. postal mail. To submit your comments by e-mail send them to PRA@fcc.gov. To submit your comments by U.S. mail, mark them to the attention of Cathy Williams, Federal Communications Commission, Room 1–C823, 445 12th Street, SW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection(s) send an e-mail to PRA@fcc.gov or contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0912.

Title: Sections 76.501, 76.503 and 76.504, Cable Ownership and Attribution Rules.

Form Number: Not applicable.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 40.

Estimated Time per Response: 1 to 4 hours.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 100 hours.

Total Annual Cost: None.

Privacy Impact Assessment: No impact(s).

Needs and Uses: 47 CFR 76.501 Note 2(f)(1) requires limited partners, Registered Limited Liability Partnerships (“RLLPs”), and Limited Liability Companies (“LLCs”) attempting to insulate themselves from attribution to file a certification of “non-involvement” with the Commission. LLCs who submit the non-involvement certification also are required to submit

a statement certifying that the relevant state statute authorizing LLCs permits an LLC member to insulate itself in the manner required by our criteria. 47 CFR 76.501 Note 2, 76.503 Note 2, and 76.504 Note 2, also provide that officers and directors of an entity are considered to have a cognizable interest in the entity with which they are associated. If any such entity engages in businesses other than video programming-related activities, it may request the Commission to waive attribution for any officer or director whose duties and responsibilities are wholly unrelated to the entity's video-programming activities. The officers and directors of a parent company of a video-programming business, with an attributable interest in any such subsidiary entity, shall be deemed to have a cognizable interest in the subsidiary unless the duties and responsibilities of the officer or director involved are wholly unrelated to the video-programming subsidiary and a statement properly documenting this fact is submitted to the Commission. This statement may be included on the Licensee Qualification Report.

47 CFR Section 76.503 Note 2 includes a requirement for limited partners who are not materially involved, directly or indirectly, in the management or operation of the video programming-related activities of the partnership to certify that fact or be attributed to a limited partnership interest.

47 CFR Section 76.503(g) of the Commission's rules states: "Prior to acquiring additional multichannel video-programming providers, any cable operator that serves 20% or more of multichannel video-programming subscribers nationwide shall certify to the Commission, concurrent with its applications to the Commission for transfer of licenses at issue in the acquisition, that no violation of the national subscriber limits prescribed in this section will occur as a result of such acquisition."

The filings required by these rules will be used by the Commission to determine the nature of the corporate, financial, partnership, ownership and other business relationships that confer on their holders a degree of ownership or other economic interest, or influence or control over an entity engaged in the provision of communications services such that the holders are subject to the Commission's regulations.

Federal Communications Commission.

Marlene H. Dortch,
Secretary.

BILLING CODE 6712-10-P

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Submitted to OMB for Review and Approval

August 17, 2006.

SUMMARY: The Federal Communications Commissions, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection, as required by the Paperwork Reduction Act of 1995, Public Law 104-13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written comments should be submitted on or before September 22, 2006. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: You may submit your comments by e-mail or U.S. mail. To submit your comments by e-mail send them to PRA@fcc.gov. To submit your comments by U.S. mail send them to Cathy Williams, Federal Communications Commission, Room 1-C823, 445 12th Street, SW., Washington, DC 20554 and Kristy L. LaLonde, Office of Management and Budget (OMB), Room 10236 NEOB, Washington, DC 20503, (202) 395-3087 or via the Internet at Kristy.L.LaLonde@omb.eop.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection(s) send an e-mail to PRA@fcc.gov or contact Cathy Williams at (202) 418-2918. If you would like to obtain a copy of this revised information collection, you may do so by visiting the FCC PRA Web page at: <http://www.fcc.gov/omd/pra>.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0568.

Title: Sections 76.970, 76.971 and 76.975, Commercial Leased Access Rates, Terms and Conditions.

Form Number: Not applicable.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; State, local or tribal government.

Number of Respondents: 4,031.

Estimated Time per Response: 2 minutes-10 hours.

Frequency of Response:

Recordkeeping requirement; Third party disclosure requirement.

Total Annual Burden: 59,686 hours.

Total Annual Cost: \$74,000.

Privacy Impact Assessment: No impact(s).

Needs and Uses: The FCC and prospective leased access programmers use this information to verify rate calculations for leased access channels and to eliminate uncertainty negotiations for leased commercial access. The Commission's leased access requirements are designed to promote diversity of programming diversity and competition in programming delivery as required by Section 612 of the Cable Television Consumer Protection and Competition Act of 1992.

Federal Communications Commission.

Marlene H. Dortch,
Secretary.

BILLING CODE 6712-01-P

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission for Extension Under Delegated Authority

August 15, 2006.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction

Act of 1995, Public Law 104-13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Persons wishing to comment on this information collection should submit comments October 23, 2006. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: You may submit your Paperwork Reduction Act (PRA) comments by e-mail or U.S. postal mail. To submit your comments by e-mail send them to: PRA@fcc.gov. To submit your comments by U.S. mail, mark it to the attention of Judith B. Herman, Federal Communications Commission, 445 12th Street, SW., Room 1-B441, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection(s) send an e-mail to PRA@fcc.gov or contact Judith B. Herman at 202-418-0214. If you would like to obtain or view a copy of this information collection after this 60 day comment period, you may do so by visiting the FCC PRA Web page at: <http://www.fcc.gov/omd/pra>.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060-0132.
Title: Supplemental Information, 72-76 MHz Operational Fixed Stations.
Form No.: FCC Form 1068A.
Type of Review: Extension of a currently approved collection.
Respondents: Individuals or households; business or other for-profit, not-for-profit institutions, state, local or tribal government.
Number of Respondents: 300.
Estimated Time Per Response: .50 hours.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 150 hours.

Annual Cost Burden: \$4,500.

Privacy Act Impact Assessment: N/A.

Needs and Uses: FCC rules require that the applicant agrees to eliminate any harmful interference caused by the operation to TV reception on either channel 4 or 5 that might develop. The FCC Form 1068A is required by the Communications Act of 1934, as amended; the International Treaties and 47 CFR 90.257.

FCC staff will use the data to determine if the information submitted will meet the FCC rule requirements for the assignment of frequencies in the 72-76 MHz band.

There is no change in the estimated average burden or the number of respondents. The Commission is seeking an extension (no change in the reporting requirements) in order to obtain the full three year clearance from the Office of Management and Budget (OMB).

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

BILLING CODE 6712-01-P

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission for Extension Under Delegated Authority

August 15, 2006.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, Public Law No. 104-13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a valid control number. Comments are requested concerning (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the

Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before October 23, 2006. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: You may submit your all Paperwork Reduction Act (PRA) comments by email or U.S. postal mail. To submit your comments by e-mail send them to PRA@fcc.gov. To submit your comments by U.S. mail, mark them to the attention of Cathy Williams, Federal Communications Commission, Room 1-C823, 445 12th Street, SW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection(s) send an e-mail to PRA@fcc.gov or contact Cathy Williams at (202) 418-2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0310.
Title: Cable Community Registration.
Form Number: FCC Form 322.
Type of Review: Extension of a currently approved collection.
Respondents: Business or other for-profit entities; Not-for-profit institutions.

Number of Respondents: 316.
Estimated Time per Response: 30 minutes (0.5 hours).

Frequency of Response: One time reporting requirement.

Total Annual Burden: 158 hours.

Total Annual Cost: \$15,800.

Privacy Impact Assessment: No impact(s).

Needs and Uses: On March 13, 2003, the Commission adopted a Report and Order (R&O), Amendment of the Commission's Rules for Implementation of its Cable Operations and Licensing System (COALS) to Allow for Electronic Filing of Licensing Applications, Forms, Registrations and Notifications in the Multichannel Video and Cable Television Service and the Cable Television Relay Service, FCC 03-55. This R&O provided for electronic filing and standardized information collections. Under 47 CFR Section 76.1801, cable operators are required to file FCC Form 322 with the Commission prior to commencing operation of a community unit. FCC Form 322

identifies biographical information about the operator and system as well as a list of broadcast channels carried on the system. This form replaces the requirement that cable operators send a letter containing the same information.

OMB Control Number: 3060-0331.

Title: Aeronautical Frequency Notification.

Form Number: FCC Form 321.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; Not-for-profit institutions.

Number of Respondents: 900.

Estimated Time per Response: 40 minutes.

Frequency of Response: Recordkeeping requirement; On occasion reporting requirement; One time reporting requirement.

Total Annual Burden: 603 hours.

Total Annual Cost: \$49,500.

Privacy Impact Assessment: No impact(s).

Needs and Uses: The FCC Form 321 is used by multichannel video programming distributors to obtain authority to commence operation of a system on frequencies used by aeronautical services. The information is used to protect aeronautical radio communications from interference.

OMB Control Number: 3060-0341.

Title: Section 73.1680, Emergency Antennas.

Form Number: Not applicable.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; Not-for-profit institutions.

Number of Respondents: 142.

Estimated Time per Response: 0.5 hours.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 71 hours.

Total Annual Cost: \$28,400.

Privacy Impact Assessment: No impact(s).

Needs and Uses: 47 CFR Section 73.1680 requires that licensees of AM, FM or TV stations submit an informal request to the FCC within 24 hours of commencement of use to continue operation with an emergency antenna. An emergency antenna is one that is erected for temporary use after the authorized main and auxiliary antennas are damaged and cannot be used. FCC staff uses the data to ensure that interference is not caused to other existing stations.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

BILLING CODE 6712-01-P

FEDERAL DEPOSIT INSURANCE CORPORATION

Industrial Loan Companies and Industrial Banks

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice and Request for Comment.

SUMMARY: The FDIC is seeking comment on specific issues related to industrial

loan companies and industrial banks (collectively, ILCs), including issues regarding the current legal and business framework of ILCs and the possible benefits, detrimental effects, risks, and supervisory issues associated with the ILC industry. The FDIC believes that public input will assist the FDIC in identifying any potential risks to the Deposit Insurance Fund, any emerging safety and soundness issues, or other policy issues raised by ILCs and, further, will assist the FDIC in determining whether statutory, regulatory, or policy changes should be made in the FDIC's supervision of ILCs in order to protect the Deposit Insurance Fund or other important Congressional objectives.

DATES: Written comments must be received on or before October 10, 2006.

ADDRESSES: You may submit comments by any of the following methods:

- *Agency Web Site:* <http://www.fdic.gov/regulations/laws/federal/notices.html>. Follow instructions for submitting comments on the Agency Web site.

- *E-mail:* Comments@FDIC.gov.
- *Mail:* Robert E. Feldman, Executive Secretary, Attention: Comments, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, DC 20429.

- *Hand Delivery/Courier:* Guard station at rear of the 550 17th Street Building (located on F Street) on business days between 7 a.m. and 5 p.m.

Internet Posting: All comments received will be posted without change to <http://www.fdic.gov/regulations/laws/federal/notices.html> including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Thomas Bolt, Counsel, telephone (202) 898-6750, Federal Deposit Insurance Corporation, Washington, DC 20429.

SUPPLEMENTARY INFORMATION:

I. Background

Recently, the growth of the ILC industry, the trend toward commercial company ownership of ILCs and the nature of some ILC business models have raised questions about the risks posed by ILCs to the Deposit Insurance Fund, including whether their commercial relationships pose any safety and soundness risks. On July 28, 2006 the FDIC imposed a six-month moratorium on FDIC action to (i) accept, approve, or deny any application for deposit insurance submitted to the FDIC by, or on behalf of, an ILC, or (ii) accept, disapprove, or issue a letter of intent not to disapprove, any change in bank control notice submitted to the FDIC with respect to an ILC. The purpose of the moratorium is to preserve the status

quo while the FDIC evaluates (i) industry developments, (ii) the various issues, facts, and arguments raised with respect to the ILC industry, (iii) whether ILCs pose any increased risk to the Deposit Insurance Fund, or whether there are emerging safety and soundness issues or policy issues involving ILCs, and (iv) whether statutory, regulatory, or policy changes should be made in the FDIC's oversight of ILCs in order to protect the Deposit Insurance Fund or important Congressional objectives. A notice of the imposition of the moratorium was published in the **Federal Register** on August 1, 2006 (71 FR 43482, August 1, 2006). The notice expressed the FDIC's intent to seek public input on the issues and concerns raised with regard to the ILC industry.

ILCs were first chartered in the early 1900's as small loan companies for industrial workers. ILCs are state-chartered banks supervised by their chartering states and the FDIC, which is their primary Federal regulator. ILCs were first insured on January 1, 1934. As of March 31, 2006, 61 insured ILCs operating from California, Colorado, Hawaii, Indiana, Minnesota, Nevada, and Utah reported total assets approximating \$155 billion.

Under current law, certain ILCs may affiliate with, or be owned by, a company whose activities are generally considered to be commercial in nature. This ability of certain ILCs to be owned by or affiliated with commercial entities results from the Competitive Equality Banking Act of 1987 (CEBA). The CEBA generally exempts from the definition of "bank" in the Bank Holding Company Act (BHCA) any ILC that meets certain requirements. As a result, the parent companies of ILCs that qualify for the exemption from the BHCA, unlike companies that are subject to the BHCA, are not prohibited from engaging in commercial activities, and are not required to be supervised by the Federal Reserve Board (FRB) and may not be subject to any other form of consolidated supervision. Nevertheless, the majority of companies that own ILCs are financial entities. Eleven are under some form of consolidated supervision by either the FRB or the Office of Thrift Supervision (OTS). OTS-supervised holding companies currently control approximately 65% of the total ILC assets nationwide. Many other companies that own ILCs are subject to primary supervision by state or Federal regulators.

Since ILCs are insured state nonmember banks, they are subject to FDIC Rules and Regulations, restrictions under the Federal Reserve Act governing transactions with affiliates

and anti-tying provisions of the BHCA, various consumer protection laws and regulations, and the Community Reinvestment Act. ILCs are also subject to regular examinations, including examinations focusing on safety and soundness, consumer protection, community reinvestment, information technology and trust activities.

FDIC supervisory policies regarding an institution, including an ILC owned by a parent company, consider the organizational relationships of the institution. The FDIC has the authority to examine an ILC's relationships with its parent company and any other affiliate. Also, the FDIC's enforcement authority extends beyond the ILC itself and includes institution-affiliated parties. This includes the authority to require such action as the agency determines to be appropriate, which may include divestiture of the ILC. However, since the FDIC is not a consolidated supervisor, it does not have the authority to examine affiliates that do not have a relationship with the ILC or to impose capital requirements on the parent company of an ILC.

The FDIC generally follows the same review process for ILC applications and notices as it does for such filings from other applicants. In the case of applications for deposit insurance, the FDIC has the authority to impose reasonable conditions through its order approving the application. In the case of a change in bank control filed with the FDIC, the FDIC can impose requirements and restrictions through a formal agreement among the FDIC, the institution and the parent company. Decisions regarding specific conditions or provisions are based upon the totality of the filing and investigation, and may consider the complexity and perceived risk of the proposal, adequacy of capital and management, relationships with affiliated entities, and sufficiency of risk management programs, among other considerations. Conditions or provisions may be time-specific or may impose continuing requirements or restrictions that must be satisfied on an ongoing basis. Conditions may be modified or discarded at the request of the institution or at the FDIC's own initiative if circumstances change in the future.

Concerns Expressed Regarding ILCs

A variety of concerns have been raised regarding ILCs. These primarily focus on whether ILCs in a holding company structure that is not subject to some form of consolidated supervision pose greater safety and soundness issues or risks to the Deposit Insurance Fund than do insured depository institutions

in a holding company structure which is subject to consolidated Federal supervision. These concerns include the absence of consolidated supervisory requirements for the parent companies of ILCs; the absence of an obligation by the ILC parent company to keep the ILC well capitalized; and differences in authority to examine affiliate relationships. General concerns have also been raised about the potential mixing of banking and commerce that might be presented by an ILC.

II. Questions Posed by the FDIC

In imposing the six-month moratorium on actions relative to applications for deposit insurance and notices of change in bank control, the FDIC indicated its intent to evaluate (i) industry developments; (ii) the various facts, issues, and arguments raised with respect to the ILC industry; (iii) whether there are emerging safety and soundness issues or other risks to the Deposit Insurance Fund or other policy issues involving ILCs; and (iv) whether statutory, regulatory, or policy changes should be made in the FDIC's oversight of ILCs in order to protect the Deposit Insurance Fund or other important Congressional objectives. The FDIC believes that public participation will provide valuable insight into the issues presented by recent trends and changes in the ILC industry, and will assist the FDIC in deciding how to respond to those issues. In order to obtain public input, the FDIC invites comments in response to the following questions. To aid our analysis, we encourage commenters to identify, by number, the question to which each section of their comment corresponds.

1. Have developments in the ILC industry in recent years altered the relative risk profile of ILCs compared to other insured depository institutions? What specific effects have there been on the ILC industry, safety and soundness, risks to the Deposit Insurance Fund, and other insured depository institutions? What modifications, if any, to its supervisory programs or regulations should the FDIC consider in light of the evolution of the ILC industry?

2. Do the risks posed by ILCs to safety and soundness or to the Deposit Insurance Fund differ based upon whether the owner is a financial entity or a commercial entity? If so, how and why? Should the FDIC apply its supervisory or regulatory authority differently based upon whether the owner is a financial entity or a commercial entity? If so, how should the FDIC determine when an entity is "financial" and in what way should it apply its authority differently?

3. Do the risks posed by ILCs to safety and soundness or to the Deposit Insurance Fund differ based on whether the owner is subject to some form of consolidated Federal supervision? If so, how and why? Should the FDIC assess differently the potential risks associated with ILCs owned by companies that (i) are subject to some form of consolidated Federal supervision, (ii) are financial in nature but not currently subject to some form of consolidated Federal supervision, or (iii) cannot qualify for some form of consolidated Federal supervision? How and why should the consideration of these factors be affected?

4. What features or aspects of a parent of an ILC (not already discussed in Questions 2 and 3) should affect the FDIC's evaluation of applications for deposit insurance or other notices or applications? What would be the basis for the FDIC to consider those features or aspects?

5. The FDIC must consider certain statutory factors when evaluating an application for deposit insurance (*see* 12 U.S.C. 1816), and certain largely similar statutory factors when evaluating a change in control notice (*see* 12 U.S.C. 1817(j)(7)). Are these the only factors FDIC may consider in making such evaluations? Should the consideration of these factors be affected based on the nature of the ILC's proposed owner? Where an ILC is to be owned by a company that is not subject to some form of consolidated Federal supervision, how would the consideration of these factors be affected?

6. Should the FDIC routinely place certain restrictions or requirements on all or certain categories of ILCs that would not necessarily be imposed on other institutions (for example, on the institution's growth, ability to establish branches and other offices, ability to implement changes in the business plan, or capital maintenance obligations)? If so, which restrictions or requirements should be imposed and why? Should the FDIC routinely place different restrictions or requirements on ILCs based on whether they are owned by commercial companies or companies not subject to some form of consolidated Federal supervision? If such conditions are believed appropriate, should the FDIC seek to establish the underlying requirements and restrictions through a regulation rather than relying upon conditions imposed in the order approving deposit insurance?

7. Can there be conditions or regulations imposed on deposit insurance applications or changes of control of ILCs that are adequate to

protect an ILC from any risks to safety and soundness or to the Deposit Insurance Fund that exist if an ILC is owned by a financial company or a commercial company? In the interest of safety and soundness, should the FDIC consider limiting ownership of ILCs to financial companies?

8. Is there a greater likelihood that conflicts of interest or tying between an ILC, its parent, and affiliates will occur if the ILC parent is a commercial company or a company not subject to some form of consolidated Federal supervision? If so, please describe those conflicts of interest or tying and indicate whether or to what extent such conflicts of interest or tying are controllable under current laws and regulations. What regulatory or supervisory steps can reduce or eliminate such risks? Does the FDIC have authority to address such risks in acting on applications and notices? What additional regulatory or supervisory authority would help reduce or eliminate such risks?

9. Do ILCs owned by commercial entities have a competitive advantage over other insured depository institutions? If so, what factors account for that advantage? To what extent can or should the FDIC consider this competitive environment in acting on applications and notices? Can those elements be addressed through supervisory processes or regulatory authority? If so, how?

10. Are there potential public benefits when a bank is affiliated with a commercial concern? Could those benefits include, for example, providing greater access to banking services for consumers? To what extent can or should the FDIC consider those benefits if they exist?

11. In addition to the information requested by the above questions, are there other issues or facts that the FDIC should consider that might assist the FDIC in determining whether statutory, regulatory, or policy changes should be made in the FDIC's oversight of ILCs?

12. Given that Congress has expressly excepted owners of ILCs from consolidated bank holding company regulation under the Bank Holding Company Act, what are the limits on the FDIC's authority to impose such regulation absent further Congressional action?

By order of the Board of Directors.

* * * * *

Dated at Washington, DC, this 17th day of August, 2006.

Federal Deposit Insurance Corporation.

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of the filing of the following agreements under the Shipping Act of 1984. Interested parties may submit comments on an agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within ten days of the date this notice appears in the **Federal Register**. Copies of agreements are available through the Commission's Office of Agreements (202-523-5793 or tradeanalysis@fmc.gov).

Agreement No.: 011602-009.

Title: Grand Alliance Agreement II.

Parties: Hapag-Lloyd AG; CP Ships (UK) Limited; CP Ships USA LLC; Nippon Yusen Kaisha; and Orient Overseas Container Line, Inc.; Orient Overseas Container Line Limited; and Orient Overseas Container Line (Europe) Limited.

Filing Party: Wayne R. Rohde, Esq.; Sher & Blackwell LLP; 1850 M Street, NW., Suite 900; Washington, DC 20036.

Synopsis: The amendment adds a provision dealing with the employment of U.S. flag vessels under the agreement and updates Hapag-Lloyd's corporate name.

Agreement No.: 011971.

Title: USL/ANL Space Charter Agreement.

Parties: U.S. Lines Limited and ANL Singapore Pte Ltd.

Filing Party: Robert B. Yoshitomi, Esq.; Nixon Peabody LLP; 2040 Main Street, Suite 850; Irvine, CA 92614.

Synopsis: The agreement would authorize USL to charter space to ANL in the trade between Asia, Australia, and New Zealand and the U.S. Pacific Coast.

By order of the Federal Maritime Commission.

Dated: August 18, 2006.

Bryant L. VanBrakle,
Secretary.

BILLING CODE 6730-01-P

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Board of Governors of the Federal Reserve System ("Board")

ACTION: Notice of information collection to be submitted to OMB for review and approval under the Paperwork Reduction Act of 1995.

SUMMARY: In accordance with the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the Board, the Federal Deposit Insurance Corporation ("FDIC"), and the Office of the Comptroller of the Currency ("OCC") (collectively, the "agencies"), may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget ("OMB") control number.

On May 2, 2006, the Board, under the auspices of the Federal Financial Institutions Examination Council ("FFIEC") and on behalf of the agencies, published a notice in the Federal Register (71 FR 25842) requesting public comment for 60 days on the extension, without revision, of the Country Exposure Report for U.S. Branches and Agencies of Foreign Banks ("FFIEC 019"), which is a currently approved information collection. The comment period for this notice expired on July 3, 2006. No comments were received. The Board hereby gives notice that it plans to submit to OMB on behalf of the agencies a request for approval of the FFIEC 019.

DATES: Comments must be submitted on or before September 22, 2006.

ADDRESSES: Interested parties are invited to submit written comments to the agency listed below. All comments, which should refer to the OMB control number, will be shared among the agencies.

You may submit comments, identified by FFIEC 019 (7100-0213), by any of the following methods:

- Agency Web Site: <http://www.federalreserve.gov>. Follow the instructions for submitting comments on the <http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm>.

- Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.

- E-mail: regs.comments@federalreserve.gov. Include the OMB control number in the subject line of the message.

- FAX: 202-452-3819 or 202-452-3102.

• Mail: Jennifer J. Johnson, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, N.W., Washington, DC 20551.

All public comments are available from the Board's web site at www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm as submitted, unless modified for technical reasons. Accordingly, your comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper in Room MP-500 of the Board's Martin Building (20th and C Streets, N.W.) between 9:00 a.m. and 5:00 p.m. on weekdays.

Additionally, commenters should send a copy of their comments to the Desk Officer for the agencies by mail to U.S. Office of Management and Budget, 725 17th Street N.W., #10235, Washington, DC 20503 or by fax to 202-395-6974.

FOR FURTHER INFORMATION CONTACT:

Additional information or a copy of the collection may be requested from Michelle Long, Federal Reserve Board Clearance Officer, 202-452-3829, Division of Research and Statistics, Board of Governors of the Federal Reserve System, 20th and C Streets, N.W., Washington, DC 20551. Telecommunications Device for the Deaf (TDD) users may call 202-263-4869, Board of Governors of the Federal Reserve System, 20th and C Streets, N.W., Washington, DC 20551.

Proposal to request approval from OMB of the extension for three years, without revision, of the following currently approved collection of information:

Report Title: Country Exposure Report for U.S. Branches and Agencies of Foreign Banks

Form Number: FFIEC 019

OMB Number: 7100-0213

Frequency of Response: Quarterly

Affected Public: U.S. branches and agencies of foreign banks

Estimated Number of Respondents: 162

Estimated Average Time per Response: 10 hours

Estimated Total Annual Burden: 6,480 hours

General Description of Reports: This information collection is mandatory: 12 U.S.C. 3906 for all agencies; 12 U.S.C. 3105 and 3108 for the Board; sections 7 and 10 of the Federal Deposit Insurance Act (12 U.S.C. 1817, 1820) for the FDIC; and the National Bank Act (12 U.S.C. 161) for the OCC. The FFIEC 019 information collection is given confidential treatment under the

Freedom of Information Act (5 U.S.C. 552(b)(8)).

Abstract: All individual U.S. branches and agencies of foreign banks that have more than \$30 million in direct claims on residents of foreign countries must file the FFIEC 019 report quarterly. Currently, all respondents report adjusted exposure amounts to residents of their home country, regardless of amount, and to residents of the five other countries for which their adjusted exposure amounts are largest, provided these amounts are at least \$20 million. The agencies collect these data to monitor the extent to which such branches and agencies are pursuing prudent country risk diversification policies and limiting potential liquidity pressures. No changes are proposed to the FFIEC 019 reporting form or instructions.

Request for Comment

Comments are invited on:

a. Whether the information collection is necessary for the proper performance of the agencies' functions, including whether the information has practical utility;

b. The accuracy of the agencies' estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or start up costs and costs of operation, maintenance, and purchase of services to provide information.

Comments submitted in response to this notice will be shared among the agencies. All comments will become a matter of public record. Written comments should address the accuracy of the burden estimate and ways to minimize burden including the use of automated collection techniques or the use of other forms of information technology as well as other relevant aspects of the information collection request.

Board of Governors of the Federal Reserve System, August 18, 2006.

Robert deV. Frierson,

Deputy Secretary of the Board.

BILLING CODE 6210-01-S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS-5035-N]

Medicare Program; Senior Risk Reduction Demonstration

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This notice informs interested parties of an opportunity to apply to participate in a risk reduction/health management demonstration project. This notice also contains information on how to obtain the complete solicitation and supporting information.

DATES: Applications will be considered timely if we receive them on or before November 21, 2006.

ADDRESSES: Mail applications for the Senior Risk Reduction Demonstration to—Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

Medicare Demonstrations Program Group, Mail stop S3–02–01, Attention: Pauline Lapin.

FOR FURTHER INFORMATION CONTACT: Pauline Lapin, (410) 786–6883 or Sidney Trieger, (410) 786–6613.

SUPPLEMENTARY INFORMATION:

I. Background

The aging of the population, the prevalence of chronic disease, and the rapidly rising cost of health care in the United States provides a sense of urgency and immediacy for finding innovative solutions that would improve the health and well-being of seniors and prevent or delay debilitating and costly disease onset.

Recent research suggests that well-structured risk reduction programs can achieve significant improvements in a population's health risk profile. Successful programs are founded on solid behavior change theory, use tailored interventions, are personalized and sufficiently intensive, and are delivered with adequate social supports. In 2001, CMS commissioned RAND, and RAND prepared, a report on risk reduction programs entitled, "The Evidence Report and Evidence Based Recommendations: Health Risk Appraisals and Medicare." This report concluded that effective risk reduction programs, beginning with the administration of a Health Risk Appraisal (HRA) and including evidence-based and tailored behavior change through follow-up interventions, exert a beneficial effect on behavioral, physiological, and general health status outcomes. Other supportive studies have shown that multicomponent health promotion programs that engage participants in self-care activities and increase their involvement in health care decision-making can achieve long-term behavior changes and health risk reductions in large populations.

Also, evidence is mounting that successful risk reduction programs may produce a positive return on investment. Based on this evidence, the RAND report concluded that health promotion and disease prevention programs using HRAs and ongoing tailored interventions may be cost beneficial. Experts agree that the approach used in risk reduction programs is promising for Medicare beneficiaries and should be tested in a demonstration project.

II. Provisions of the Notice

The purpose of the notice is to inform interested parties of an opportunity to implement a risk reduction/health management program as part of the Medicare Senior Risk Reduction Demonstration. The goal of this demonstration project is to determine whether risk reduction programs (also referred to as health promotion, health management, demand management, and disease prevention programs) that have been developed and tested in the private sector can also be tailored to, and work well with, Medicare beneficiaries to improve their health and reduce avoidable health care utilization. The specific aims are to—

- Determine whether a senior risk reduction service provided by Medicare will—
 - Be viewed positively by beneficiaries.
 - Be accepted by beneficiaries.
 - Achieve high participation rates.
 - Reduce health risk factors, improve health behaviors, improve functioning, and prevent disability.
- Produce cost savings for the Medicare program.

Applicants must be willing to accept a 10 percent withhold of their fee each year, and as much as a 15 percent withhold over the course of the demonstration should Medicare expenditures for the intervention group exceed those of the control group by more than 5 percent after the first 18 months of the demonstration.

We intend to use a competitive application process to select up to five existing health promotion, disease prevention, health management, or risk reduction organizations to participate in the demonstration project. Interested parties can obtain complete solicitation and supporting information on the CMS Web site at http://www.cms.hhs.gov/DemoProjectsEvalRpts/downloads/Senior_Risk_Reduction_Solicitation.pdf.

We anticipate that we will make final award decisions by April 1, 2007, and that project implementation activities would begin July 1, 2007.

III. Collection of Information Requirements

The document does impose information collection and recordkeeping requirements. However, since we believe there are less than 10 potential respondents, of which CMS will be selecting 5 applicants to participate in the demonstration, this collection is exempt from the PRA as stipulated under 5 CFR 1320.3(c)(4).

Fogarty International Center; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of a meeting of the Fogarty International Center Advisory Board.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in section 552b(c)(9)(B), Title 5 U.S.C., as amended. The grant applications and/or contract proposals and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications and/or contract proposals, the disclosure of which could constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Fogarty International Center Advisory Board.

Date: September 11–12, 2006.

Closed: September 11, 2006, 1 p.m. to 5 p.m.

Agenda: To review and evaluate grant applications and/or proposals.

Place: National Institutes of Health, Lawton Chiles International House, Bethesda, MD 20892.

Open: September 12, 2006, 8:30 a.m. to 5 p.m.

Agenda: Preliminary Discussions of the Strategic Planning for the Fogarty International Center.

Place: National Institutes of Health, Lawton Chiles International House, Bethesda, MD 20892.

Jean L. Flagg-Newton, PhD, Special Assistant to the Director, FIC, Fogarty International Center, National Institutes of Health, 9000 Rockville Pike, Building 31, Room B2C29, Bethesda, MD 20892, (301) 496-2968; flaggnej@mail.nih.gov.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of the visitor.

Information is also available on the Institute's/Center's home page: <http://www.nih.gov/fic/about/advisory.html>, where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4140-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Arthritis and Musculoskeletal and Skin Diseases; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of a meeting of the National Arthritis and Musculoskeletal and Skin Diseases Advisory Council.

The meeting will be open to the public as indicated below, with

attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Arthritis and Musculoskeletal and Skin Diseases Advisory Council.

Date: September 26, 2006.

Open: 8:30 a.m. to 12 p.m.

Agenda: This meeting will be open to the public to discuss administrative details relating to Council business and special reports.

Place: National Institutes of Health, Building 31, 31 Center Drive, Conference Room 6, Bethesda, MD 20892.

Closed: 1 p.m. to 5 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Building 31, 31 Center Drive, Conference Room 6, Bethesda, MD 20892.

Contact Person: Madeline K. Turkeltaub, PhD, Deputy Director, Extramural Program, NIH/NIAMS, One Democracy Plaza, 6701 Democracy Blvd., Suite 800, MSC 4872, Bethesda, MD 20892-4872, 301-451-5888, turkeltm@mail.nih.gov.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

(Catalogue of Federal Domestic Assistance Program Nos. 93.846, Arthritis, Musculoskeletal and Skin Diseases Research, National Institutes of Health, HHS).

Dated: August 15, 2006.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute on Aging; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of a meeting of the National Council on Aging.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and/or contract proposals and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications and/or contract proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Council on Aging.

Date: September 26–27, 2006.

Closed: September 26, 2006, 3 p.m. to 5 p.m.

Agenda: To review and evaluate grant applications and or proposals.

Place: National Institutes of Health, Building 31, Conference Room 10, 9000 Rockville Pike, Bethesda, MD 20892.

Open: September 27, 2006, 8 a.m. to 1:30 p.m.

Agenda: Call to Order, Task Force on Minority Aging Report; Working Group on Program Report; Geriatrics and Clinical Gerontology Program Review Report; and Program Highlights.

Place: National Institutes of Health, Building 31, Conference Room 10, 9000 Rockville Pike, Bethesda, MD 20892.

Contact Person: Robin Barr, PhD, Acting Director, Office of Extramural Affairs, National Institute on Aging, 7201 Wisconsin Avenue, Gateway Bldg., Suite 2C218, Bethesda, MD 20814, 301–496–9322.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles,

including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the Institute's/Center's home page: <http://www.nih.gov/nia/naca/>, where agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4140-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospective Grant of Co-Exclusive License: Method for Diagnosis of Atherosclerosis

AGENCY: National Institutes of Health, Public Health Service, HHS.

ACTION: Notice.

SUMMARY: This is notice, in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i), that the National Institutes of Health (NIH), Department of Health and Human Services, is contemplating the grant of a worldwide co-exclusive license to practice the invention embodied in: PCT Application No. US2005/031469 filed 9/2/2005, titled "Method for Diagnosis of Atherosclerosis" referenced at DHHS as

E-276-2004/2-PCT-01 to Ortho-Clinical Diagnostics, Inc., having a place of business in the state of New Jersey. The field of use may be limited to an FDA approved clinical diagnostic product for atherosclerosis. The United States of America is the assignee of the patent rights in this invention. The territory may be worldwide. This announcement is the second Notice to grant a license to this technology. The initial Notice was published in 70 FR 39525, July 8, 2005.

DATES: Only written comments and/or application for a license, which are received by the NIH Office of Technology Transfer on or before October 23, 2006 will be considered.

ADDRESSES: Requests for a copy of the patent applications, inquiries, comments and other materials relating to the contemplated license should be directed to: Fatima Sayyid, Technology Licensing Specialist, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852-3804; telephone: (301) 435-4521; facsimile: (301) 402-0220; e-mail: sayyidf@mail.nih.gov.

SUPPLEMENTARY INFORMATION: The subject PCT application is related to the field of vascular disease and biomarkers FOS and DUSP1 as expressed in peripheral blood or secreted into serum.

The prospective co-exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective co-exclusive license may be granted unless, within 60 days from the date of this published Notice, NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Properly filed competing applications for a license filed in response to this notice will be treated as objections to the contemplated license. Comments and objections submitted in response to this notice will not be made available for public inspection, and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Dated: August 15, 2006.

Steven M. Ferguson,

Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.

[FR Doc. E6-13935 Filed 8-22-06; 8:45 am]

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospective Grant of Exclusive License: Treatment of Proliferative Disorders Using an Unexpected mTOR Kinase Inhibitor

AGENCY: National Institutes of Health, Public Health Service, HHS.

ACTION: Notice.

SUMMARY: This is notice, in accordance with 35 U.S.C. 209(c)(1) and 37 CFR (a)(1)(i), that the National Institutes of Health (NIH), Department of Health and Human Services (HHS), is contemplating the grant of an exclusive license to practice the invention embodied in: PCT patent application PCT/US2004/041256 filed December 9, 2004, entitled: "Methods for Suppressing an Immune Response or Treating a Proliferative Disorder" [HHS Reference Number: E-259-2003/0-PCT-02], to Sahajanand Medical Technologies Pvt. Ltd., registered as a private limited company in accordance with the Companies Act of India, having a principle place of business in Surat, India and U.S. headquarters in Gaithersburg, Maryland. The field of use may be limited to the use of 2-(4-piperazinyl)-8-phenyl-4H-1-benzopyran-4-one (LY303511), for the treatment and prevention of stenosis and restenosis and/or other proliferative disorders. The United States of America is an assignee of the patent rights in these inventions.

This notice replaces a notice published in 71 FR 46496, August 14, 2006, to correct the heading "Prospective Grant of Exclusive License: Treatment of Cardiovascular Conditions with Nitrite Therapy" to read "Prospective Grant of Exclusive License: Treatment of Proliferative Disorders Using an Unexpected mTOR Kinase Inhibitor".

DATES: Only written comments and/or application for a license, which are received by the NIH Office of Technology Transfer on or before October 13, 2006 will be considered.

ADDRESSES: Requests for a copy of the patent application, inquiries, comments and other materials relating to the contemplated license should be directed to: Susan Carson, D.Phil., Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852-3804; e-mail: carsonsu@od.nih.gov; telephone: (301) 435-5020; facsimile: (301) 402-0220.

SUPPLEMENTARY INFORMATION: The search for specific kinase inhibitors is

an active area of drug development as there is a continued need for effective anti-proliferative therapeutics with acceptable toxicities. The core invention is a novel method of use of one of the 4H-1-benzopyran-4-one derivatives (LY303511) which has been shown to target mTOR and casein kinase 2 (CK2) without affecting P13K activity (JPET, May 26, 2005, doi: 10.1124/jpet.105.083550). Proof of concept data is available in an in vivo human xenograft PC-3 prostate tumor model, without observed toxicity. In vitro data suggests that 2-(4-piperazinyl)-8-phenyl-4H-1-benzopyran-4-one and derivatives may be effective in treating inflammatory, autoimmune and other proliferative disorders including restenosis and a variety of cancers. Method of use claims are directed to derivatives of 2-(4-piperazinyl)-substituted 4H-1-benzopyran-4-one compounds as anti-proliferative, immunosuppressive, anti-inflammatory, anti-restenosis and anti-neoplastic agents.

The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, by the date referenced above, NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Properly filed competing applications for a license filed in response to this notice will be treated as objections to the contemplated license. Comments and objections submitted in response to this notice will not be made available for public inspection, and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Dated: August 15, 2006.

Steven M. Ferguson,

Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.

BILLING CODE 4140-01-P

DEPARTMENT OF HOMELAND SECURITY

United States Secret Service

Submission For Review; Extension Of Currently Approved Information Collection Requests

AGENCY: United States Secret Service (USSS), Department of Homeland Security.

ACTION: 30-day Notice and request for comments.

SUMMARY: The Department of Homeland Security (DHS) has submitted the following information collection requests (ICR) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995: 1620-0002. The information collections were previously published in the **Federal Register** on June 15, 2006, at Vol. 71, No. 115, pages 34635 and 34636, allowing for OMB review and a 60-day public comment period. Comments received by DHS are being reviewed as applicable. This notice allows for an additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until September 22, 2006. This process is conducted in accordance with 5 CFR 1320.10.

Written comments and/or suggestions regarding the items contained in this notice should be directed to the Office of Management and Budget, Attn: Desk Officer for Homeland Security, Office of Management and Budget Room 10235, Washington, DC 20503; telephone 202-395-7316.

The Office of Management and Budget is particularly interested in comments which:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the form(s) and instructions should be directed to: United States Secret Service, Security Clearance Division, Attn: ATSAIC Lawrence Tucker, Clearance and Access Branch, 950 H Street, NW., Washington, DC 20373-5824. Telephone number: (202) 406-5979.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires each Federal agency to provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The notice for this proposed information collection contains the following: (1) The name of the component of the U.S. Department of Homeland Security; (2) Type of review requested, e.g. new, revision, extension, existing or reinstatement; (3) OMB Control Number, if applicable; (4) Title; (5) Summary of the collection; (6) Description of the need for, and proposed use of, the information; (7) Respondents and frequency of collection; and (8) Reporting and/or Recordkeeping burden. The Department of Homeland Security invites public comment.

The Department of Homeland Security is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department, including whether the information will have practical utility; (2) is the estimate of burden for this information collection accurate; (3) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (4) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. All comments will become a matter of public record. In this document the U.S. Secretary Service is soliciting comments concerning the following information collection:

Title: Contractor Personnel Access Application.

OMB No.: 1620-0002.

Form Number: SSF 3237.

Abstract: Respondents are all Secret Service contractor personnel requiring access to Secret Service controlled facilities in performance of their contractual duties. These contractors, if approved for access, will require escorted, unescorted, and staff-like access to Secret Service controlled facilities. Responses to questions on the SSF 3237 yield information necessary for the adjudication of eligibility for facility access.

Agency: Department of Homeland Security, United States Secret Service.

Frequency: On occasion.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals.

Estimated Number of Respondents: 5,000 respondents.

Estimated Time Per Respondent: 15 minutes.

Total Burden Hours: 1,250.

Total Burden Cost: (Capital/startup): None.

Total Burden Cost: (Operating/maintaining): None.

Dated: August 17, 2006.

Sandy Bigley,

Forms Management Officer.

[FR Doc. 06-7101 Filed 8-22-06; 8:45 am]

DEPARTMENT OF HOMELAND SECURITY

United States Secret Service

Submission for Review; Extension of Currently Approved Information Collection Requests

AGENCY: United States Secret Service (USSS), Department of Homeland Security.

ACTION: 30-day Notice and request for comments.

SUMMARY: The Department of Homeland Security (DHS) has submitted the following information collection requests (ICR) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995: 1620-0001. The information collections were previously published in the **Federal Register** on June 15, 2006, at Vol. 71, No. 115, pages 34635 and 34636, allowing for OMB review and a 60-day public comment period. Comments received by DHS are being reviewed as applicable. This notice allows for an additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until September 22, 2006. This process is conducted in accordance with 5 CFR 1320.10.

Written comments and/or suggestions regarding the items contained in this notice should be directed to the Office of Management and Budget, Attn: Desk Office for Homeland Security, Office of Management and Budget, Room 10235, Washington, DC 20503; telephone (202) 395-7316.

The Office of Management and Budget is particularly interested in comments which:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the

proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the form(s) and instructions should be directed to: United States Secret Service, Security Clearance Division, Attn: Robin DeProspero-Philpot, Security Clearance Division, 950 H Street, NW., Washington, DC 20373-5824. Telephone number: (202) 406-5830.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires each Federal agency to provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The notice for this proposed information collection contains the following: (1) The name of the component of the U.S. Department of Homeland Security; (2) Type of review requested, e.g. new, revision, extension, existing or reinstatement; (3) OMB Control Number, if applicable; (4) Title; (5) Summary of the collection; (6) Description of the need for, and proposed use of, the information; (7) Respondents and frequency of collection; and (8) Reporting and/or Recordkeeping burden. The Department of Homeland Security invites public comment.

The Department of Homeland Security is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department, including whether the information will have practical utility; (2) is the estimate of burden for this information collection accurate; (3) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (4) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. All comments will become a matter of public record. In this document the U.S. Secret Service is soliciting comments

concerning the following information collection:

Title: Supplemental Investigative Data.

OMB No.: 1620-0001.

Form Number: SSF 86A.

Abstract: Respondents are all Secret Service applicants. These applicants, if approved for hire, will require a Top Secret Clearance, and possible SCI Access. Responses to questions on the SSF 86A yields information necessary for the adjudication for eligibility of the clearance, as well as ensuring that the applicant meets all internal agency requirements.

Agency: Department of Homeland Security, United States Secret Service.

Frequency: On occasion.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals.

Estimated Number of Respondents: 10,000 respondents.

Estimated Time Per Respondent: 3 hour per response.

Total Burden Hours: 30,000.

Total Burden Cost: (Capital/startup): None.

Total Burden Cost: (Operating/maintaining): None.

Dated: August 17, 2006.

227-3719, e-mail
richard.swigart@dhs.gov.

SUPPLEMENTARY INFORMATION: This meeting is announced pursuant to section 10(a)(2) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.). This meeting is a rescheduling of a meeting that was to be held August 16, 2006 at 2:30 p.m. TSA postponed the meeting to allow ASAC committee members more time to review the Baggage Screening Investment Study (BSIS) report. The agenda for the meeting will remain the same and include a presentation of the report and recommendations of the BSIS working group.

This meeting, from 2:30 p.m. to 3:30 p.m., is open to the public but telephonic conferencing capacity is limited. Members of the public who wish to monitor the discussion may dial into this telephonic meeting by dialing (800) 988-9352. At the prompt, provide the conference code "ASAC" (pronounced "A-sack"). Parties calling from locations outside the United States must contact the person listed under the heading **FOR FURTHER INFORMATION CONTACT**, for international calling instructions.

Persons desiring a copy of the working group's report may request it by contacting the person listed under the heading **FOR FURTHER INFORMATION CONTACT**.

Members of the public must make advance arrangements to present oral statements at this ASAC meeting. Written statements may be presented to the committee by providing copies of them to the Chair prior to the meeting. Comments may be sent to the person listed under the heading **FOR FURTHER INFORMATION CONTACT**. Anyone in need of assistance or a reasonable accommodation for the meeting should contact the person listed under the heading **FOR FURTHER INFORMATION CONTACT**.

Issued in Arlington, Virginia, on August 17, 2006.

John Sammon,

Assistant Administrator for Transportation Sector Network Management.

[FR Doc. E6-13942 Filed 8-22-06; 8:45 am]

BILLING CODE 9110-05-P

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Request for Comments on the Revised Department Strategic Plan for FY 2007-2012

AGENCY: Office of the Secretary, Interior.

ACTION: Request for comments on a revised Departmental Strategic Plan for FY 2007-2012 in fulfillment of certain provisions of the Government Performance and Results Act (GPRA) of 1993.

SUMMARY: The Department of the Interior (DOI) is seeking public comment on its draft GPRA strategic plan for fiscal year 2007-2012.

DATES: Comments should be provided no later than 60 days following the publication of this notice.

ADDRESSES: Written comments can be provided by:

E-mail:

GPRAplancomments@ios.doi.gov.

Fax: (202) 208-2619.

Mail: U.S. Department of the Interior, Office of the Secretary—Planning and Performance Management, Attention: DOI Strategic Planning Coordinator, 1849 C Street, NW., Mail Stop 5258, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT:

LeRon E. Bielak, DOI Strategic Planning Coordinator at (202) 208-1818.

SUPPLEMENTARY INFORMATION: The Government Performance and Results Act of 1993 requires periodic updating of agency performance plans. The first Interior GPRA Strategic Plan was published in 1997. Subsequent revisions were published in 2000 and 2003.

In producing the revision plan in 2003, DOI took a major departure from its past approaches to GPRA planning. Previously, DOI produced a set of ten GPRA planning documents—an overview document and nine bureau and office plans. While the overview attempted to highlight areas of commonality among bureaus, Interior was still perceived as a "holding company" and concern remained about the effectiveness of a agency functioning in a holding company fashion. Consequently, the last revision successfully integrated major bureau functions into a single unified GPRA plan.

The 2003 plan accentuated common goals and performance measures among bureaus and placed a much greater emphasis on results to be achieved. In creating this integrated plan, Interior employed a "logic model" approach in which two tiers of goals (outcome goals and intermediate outcome goals) were developed and performance measures were applied to both tiers to measure achievement. The integrated plan included performance measures with quantitative long-term targets (for 2008) while annual targets for the measures were established in the Department's yearly Performance Budgets. Bureau

operational plans also link and align directly with the Departmental GPRA plan in order to reinforce functional responsibilities, help confirm the relevance and cost of work conducted, and guide budget preparation.

The major restructuring of the prior plan required 22 months and involved extensive use of internal teams, external public work sessions and written public comment. Revision of the FY 2003-2008 plan began late last summer with an internal assessment of the strengths and weaknesses of the plan. We are soliciting written public comments on the modifications to our first unified plan. This revision will become our DOI strategic plan for FY 2007-2012.

In particular, Interior would be interested in viewpoints on effective quantitative, outcome-oriented performance measures that are proposed for the following areas: (a) *Law enforcement* (as it applies to resource protection and public safety on public lands), (b) *science* (both in terms of the applications of science and of advancing knowledge in natural resource areas), (c) *energy access* (specifically if a more readily understandable context for measurement is possible for example, see Resource Use measures #2 and 8), and (d) *recreation capacity* (whether recreation mission measures #4-5 are satisfactory indicators of increased capacity). However, this request for comments is not intended to be limited to these topics.

Interior is also organizing opportunities to discuss the draft revised FY 2007-2012 GPRA plan at several meetings across the country during the next several months. Public and tribal meetings are currently set for the week of August 27 in Anchorage, Alaska. Additional meetings are expected to be set in most or all of the following locations in September or early October: Sacramento, Phoenix, Albuquerque area, Denver, Minneapolis, and Washington, DC. Please consult the Interior Web site for further details.

Interior looks forward to receiving your comments on our revised plan. We are asking that comments be postmarked within 60 days of publication of this notice. The text of the draft revised plan is available in a "pdf" downloadable format through the DOI Internet Web site: <http://www.doi.gov/>. Links to the plan and related information will be posted on the opening page of the Web site. For those without Internet access, an electronic or paper copy can be requested through the contact points listed in the **ADDRESSES** section of this notice.

Dated: August 16, 2006.

R. Thomas Weimer,

*Assistant Secretary—Policy, Management
and Budget.*

BILLING CODE 4310–RK–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Draft Candidate Conservation Agreement With Assurances and Application for an Enhancement of Survival Permit for the Lesser Prairie- Chicken in Texas

AGENCY: U.S. Fish and Wildlife Service, Interior.

ACTION: Notice of availability; receipt of application; request for comment.

SUMMARY: The Texas Parks and Wildlife Department (TPWD) (Applicant) has applied to the U.S. Fish and Wildlife Service (Service) for an enhancement of survival permit pursuant to Section 10(a)(1)(A) of the Endangered Species Act (Act) of 1973, as amended. The permit application includes a draft 20-year Candidate Conservation Agreement with Assurances (CCAA) between the Service and TPWD for the Lesser Prairie-Chicken in 50 Texas counties. We request public comment.

DATES: To ensure consideration, written comments must be received on or before October 23, 2006.

ADDRESSES: Persons wishing to review the application, draft CCAA, or other related documents may obtain copies by written or telephone request to the Field Supervisor, U.S. Fish and Wildlife Service, 711 Stadium Drive, Suite 252, Arlington, Texas 76011, or U.S. Fish and Wildlife Service, Southwest Regional Office, P.O. Box 1306, Room 4012, Albuquerque, New Mexico 87103 (*Attn:* Luella Roberts, Endangered Species Permits). The application and related documents will be available for public inspection, by appointment only, during normal business hours (8 a.m. to 4:30 p.m.) at the Service's Arlington Office. Comments concerning the application, draft CCAA, or other related documents should be submitted in writing to the Field Supervisor (address above). Please refer to permit number TE–132658–0 when submitting comments. All comments received, including names and addresses, will become a part of the official administrative record and may be made available to the public.

FOR FURTHER INFORMATION CONTACT: Tom Cloud at the U.S. Fish and Wildlife Service Arlington office, 711 Stadium

Drive, Suite 252, Arlington, Texas 76011 (817/277–1100), facsimile 817/277–1129, or by e-mail at

Tom_Cloud@fws.gov; or Luella Roberts at the U.S. Fish and Wildlife Service Regional office, P.O. Box 1306, Room 4012, Albuquerque, New Mexico 87103 (505/248–6654), facsimile 505/248–6788, or by e-mail at *Luella_Roberts@fws.gov*.

SUPPLEMENTARY INFORMATION: With the assistance of the Service, TPWD proposes to encourage the implementation of conservation measures on private lands to increase lesser prairie-chicken (*Tympanuchus pallidicinctus*) (LPC) occupied habitat and improve LPC population performance. The proposed CCAA would be in effect for 20 years in the following Texas counties: Dallam, Sherman, Hansford, Ochiltree, Lipscomb, Hartley, Moore, Hutchinson, Roberts, Hemphill, Oldham, Potter, Carson, Gray, Wheeler, Deaf Smith, Randall, Armstrong, Donley, Collingsworth, Parmer, Castro, Swisher, Briscoe, Hall, Childress, Bailey, Lamb, Hale, Floyd, Motley, Cottle, Cochran, Hockley, Lubbock, Crosby, Dickens, King, Knox, Yoakum, Terry, Lynn, Garza, Kent, Stonewall, Gaines, Dawson, Borden, Scurry, and Andrews. These counties constitute the Agreement's Planning Area, with Covered Areas being private lands within this Planning Area that provide suitable habitat for LPC or have the potential to provide suitable LPC habitat with the implementation of conservation management practices. We invite the public to review and comment on the permit application and the associated draft CCAA.

Background

The LPC is a distinct species of North American prairie grouse that inhabits rangelands dominated primarily by shinnery oak (*Quercus havardii*)-bluestem and sand sagebrush (*Artemisia filifolia*)-bluestem vegetation types. From the early to mid 1940's to the early 1950's, it is estimated that the range of the LPC in Texas encompassed portions of 34 counties. Researchers considered the occupied range at the mid 20th century to be a reduction from the historical range (ca. 1900). In 1989, TPWD produced an occupied range map that indicated LPC inhabited portions of 12 counties. In 2005, TPWD reported that LPC were found in portions of a minimum of 16 counties. In 1995, the Service was petitioned to list the LPC under the Act. The Service ruled that listing of the LPC was warranted, but precluded because of limited funding

and higher priority species litigations. The LPC was designated as a candidate for listing in 1997.

The major factors affecting the status of the LPC are conversion, degradation, and fragmentation of habitat. The conversion of habitat from native sand sagebrush and shinnery oak rangeland to improved pastures and cropland has been documented as an important factor in the decline of the LPC. Although many acres of former cropland throughout its range have been enrolled in the U.S. Department of Agriculture's Conservation Reserve Program (CRP) in the northeastern and southwestern Texas panhandle, LPC populations have not exhibited a marked response to the available vegetation types and structure created by CRP. Many CRP acres have been planted using monocultures of introduced grasses, which do not meet food, brood-rearing, or thermal habitat requirements for the LPC. Mixtures of heavily, moderately, and lightly grazed, and ungrazed native rangelands are essential components of LPC habitat, and should occur in a mosaic pattern on a landscape scale. However, in most areas, an insufficient amount of lightly grazed or ungrazed habitat is available to support successful LPC nesting. Overutilization of rangeland by livestock, to a degree that leaves less than adequate residual cover remaining in the spring, is considered detrimental to LPC populations because grass height is reduced below that necessary for nesting cover, and desirable food plants are markedly reduced.

Since the petition to list the LPC under the Act was filed in 1995, a number of management and conservation efforts have been implemented by State, Federal, and private entities throughout Texas. TPWD has worked to implement conservation measures through its Private Lands and Habitat Program (PLHP). The PLHP includes programs and tools such as the development of written Wildlife Management Plans (WMP), the Technical Guidance Program, Landowner Incentive Program, Wildlife Management Tax Valuation assistance, information on private land trusts, and the Lone Star Land Steward Award Program. The PLHP focuses on a diverse array of programmatic responsibilities for wildlife habitat management and development, technical assistance, incentive programs, and conservation of private lands. PLHP biologists and other TPWD personnel provide technical assistance to land managers and landowners upon written request for assistance to develop plans and recommendations for voluntary conservation, enhancement,

and/or development of wildlife habitat. In particular, at the request of landowners, TPWD prepares written WMPs that incorporate recommendations for specific areas and address the conservation goals and objectives of each landowner. In conjunction with the development of landowner-specific WMPs, TPWD proposes to issue Certificates of Inclusion (CI) that provide coverage to individual landowners under the terms of its section 10(a)(1)(A) permit, should one be issued in the future. Each CI will be issued with Service oversight, and will be subject to revocation if the terms of the WMP are not fulfilled. TPWD and the Service feel that this process may preclude or remove any need to list the lesser prairie-chicken, if it is assumed that conservation measures were also to be implemented on other necessary properties, by encouraging private landowners to enroll in the WMP program and undertake the conservation practices prescribed in the CCAA. The proposed CCAA represents a significant milestone in the cooperative conservation efforts for the LPC and is consistent with section 2(a)(5) of the Act, which encourages creative partnerships among public, private, and government entities to conserve imperiled species and their habitats. Consistent with the Service CCAA policy, the proposed CCAA is intended to facilitate conservation actions for the LPC that will remove or reduce the threats to the species. The CCAA is also intended to provide TPWD and those private landowners receiving CIs, under the auspices of TPWD's permit, regulatory certainty related to normal agricultural practices should the LPC become federally listed as threatened or endangered in the future.

The conservation measures in the CCAA would be implemented by individual non-Federal landowners, under the auspices of a TPWD and Service-approved WMP. These measures will generally consist of prescribed grazing, prescribed burning, rangeland deferment, brush management, CRP and cropland management, range planting, other upland wildlife habitat management practices, and population management techniques. TPWD has committed to guide the implementation of these conservation measures and requests issuance of the permit in order to address the take prohibitions of Section 9 of the Act should the species become listed in the future.

We provide this notice under section 10(c) of the Act (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.22), and the National

Environmental Policy Act (42 U.S.C. 4371 *et seq.*) and its implementing regulations (40 CFR part 1506.6).

Larry G. Bell,

*Acting Regional Director, Region 2,
Albuquerque, New Mexico.*

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ID-400-1150-CB]

Notice of Public Meeting, Coeur d'Alene District Resource Advisory Council Meeting; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Public Meeting.

SUMMARY: In accordance with the Federal Land Policy and Management

Act (FLPMA) and the Federal Advisory Committee Act of 1972 (FACA), the U.S. Department of the Interior, Bureau of Land Management (BLM) Coeur d'Alene District Resource Advisory Council (RAC) will meet as indicated below.

DATES: September 21, 2006. The RAC will tour the Nez Perce Tribe's biological control center and fish hatchery near Lapwai, Idaho from 10 a.m. to 12:30. The tour will be followed by a meeting from 1:30 to about 4 p.m. in the Bureau of Indian Affairs, Northern Idaho Agency conference room located at 99 Agency Road, Lapwai, Idaho. The public comment period will be from 2:30 p.m. to 3 p.m. at the meeting location.

FOR FURTHER INFORMATION CONTACT:

Stephanie Snook, RAC Coordinator, BLM Coeur d'Alene District, 3815 Schreiber Way, Coeur d'Alene, Idaho 83815 or telephone (208) 769-5004.

SUPPLEMENTARY INFORMATION: The 15-member Council advises the Secretary of the Interior, through the Bureau of Land Management, on a variety of planning and management issues associated with public land management in Idaho. The agenda will include the following topics: Tour of the Nez Perce Tribe biological (weed) control center and fish hatchery; project updates including the Resource Management Plans for the Coeur d'Alene and Cottonwood Field Offices and the Idaho Recreation RAC Process. Additional topics may be added and will be included in local media announcements.

All meetings are open to the public. The public may present written comments to the Council in advance of or at the meeting. Each formal Council meeting will also have time allocated for receiving public comments. Depending on the number of persons wishing to comment and time available, the time for individual oral comments may be limited. Individuals who plan to attend the meeting and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact the BLM as provided above.

Dated: August 17, 2006.

Eric R. Thomson,

Acting District Manager.

Notice of Meeting, Front Range Resource Advisory Council (Colorado)

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Land Policy and Management Act (FLPMA) and the Federal Advisory Committee Act of 1972 (FACA), the U.S. Department of the Interior, Bureau of Land Management (BLM) Front Range Resource Advisory Council (RAC), will meet as indicated below.

DATES: The meeting will be held September 19, 2006 from 9:15 a.m. to 4 p.m.

ADDRESSES: Holy Cross Abbey Community Center, 2951 E. Highway 50, Canon City, Colorado 81212.

FOR FURTHER INFORMATION CONTACT: Ken Smith, (719) 269-8500.

SUPPLEMENTARY INFORMATION: The 15 member Council advises the Secretary of the Interior, through the Bureau of Land Management, on a variety of planning and management issues associated with public land management in the Royal Gorge Field Office and San Luis Valley, Colorado. Planned agenda topics include: Manager updates on current land management issues; update on the Arkansas River Travel Management Plan; and a presentation on the oil shale recovery process. All meetings are open to the public. The public is encouraged to make oral comments to the Council at 9:30 a.m. or written statements may be submitted for the Councils consideration. Depending on the number of persons wishing to comment and time available, the time for individual oral comments may be limited. Summary minutes for the Council Meeting will be maintained in the Royal Gorge Field Office and will be available for public inspection and reproduction during regular business hours within thirty (30) days following the meeting. Meeting Minutes and agenda (10 days prior to each meeting) are also available at: http://www.blm.gov/rac/co/fr/rac/co_fr.htm

Dated: August 14, 2006.

National Petroleum Reserve—Alaska Oil and Gas Lease Sale 2006

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of National Petroleum Reserve—Alaska Oil and Gas Lease Sale 2006.

SUMMARY: National Petroleum Reserve—Alaska; Notice of Sale and Notice of Availability of the Detailed Statement of Sale for Oil and Gas Lease Sale 2006.

The Bureau of Land Management, Alaska State Office, will hold an oil and gas lease sale bid opening for the Northeast and Northwest Planning Areas of the National Petroleum Reserve—Alaska.

Tracts offered for competitive bid in the Northeast Planning Area cover land not previously offered for sale, as identified in the January 11, 2006, Record of Decision on the Amended Integrated Activity Plan/Environmental Impact Statement; land previously offered in Sale Numbers 991 (1999) and 2002, but for which no bid was received; and land from leases issued after the 2002 Sale that have been relinquished by lessees. All the tracts in the Northwest Planning Area cover land offered in the 2004 Sale but that did not receive any bid.

DATES: The oil and gas lease sale bid opening will be held at 8 a.m. on September 27, 2006, at the Wilda Marston Theatre in the Z. J. Loussac Public Library, 3600 Denali Street, Anchorage, Alaska.

FOR FURTHER INFORMATION CONTACT: Bob Fisk at (907) 271-4407.

SUPPLEMENTARY INFORMATION: All bids must be submitted by sealed bid in accordance with the provisions identified in the Detailed Statement of Sale and received at the Bureau of Land Management, Alaska State Office, 222 W. 7th Ave., #13, Anchorage, Alaska 99513-7599 no later than 3:45 p.m., September 22, 2006.

The Detailed Statement of Sale for Sale 2006 may be obtained by written request to the Public Information Center, Bureau of Land Management, Alaska State Office, 222 W. 7th Ave., #13, Anchorage, Alaska 99513-7599, or by telephone at (907) 271-5960. It will include, among other things, a description of the land to be offered for lease, the lease terms, conditions, special stipulations, required operating

procedures, and how and where to submit bids. It will be available to the public immediately after publication of this Notice.

Dated: June 1, 2006.

Bureau of Land Management

[WY-100-1430-ES; WYW-23933, WYW-163849, WYW-163855]

Notice of Realty Action; Recreation and Public Purposes Act Classification; WY

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action.

SUMMARY: The Bureau of Land Management (BLM) has examined and found suitable for classification for lease or conveyance under the provisions of the Recreation and Public Purposes Act three parcels of public lands located near Cora, Pinedale and Marbleton, all located in Sublette County, Wyoming. Sublette County intends to use the lands for the existing snowmobile track, a public golf course, and to expand the County road maintenance facilities.

DATES: Interested persons may submit written comments to the BLM at the address stated below. Comments must be received by not later than October 10, 2006.

ADDRESSES: Bureau of Land Management, Pinedale Field Office, 432 East Mill Street, P.O. Box 768, Pinedale, Wyoming 82941.

FOR FURTHER INFORMATION CONTACT: Bill Wadsworth, Realty Specialist, at the address above or at 307-367-5341.

SUPPLEMENTARY INFORMATION: The following described public land in Sublette County, Wyoming, has been examined and found suitable for classification for lease and/or conveyance under the provisions of the Recreation and Public Purposes (R&PP) Act, as amended (43 U.S.C. 869 et seq.) and is hereby classified accordingly:

WYW-23933—Cora, WY—Snowmobile Track currently under lease to Sublette County to be classified for conveyance:

Sixth Principal Meridian, Sublette County, Wyoming.

T. 35 N., R. 110 W.,
Sec. 33, E $\frac{1}{2}$ SW $\frac{1}{4}$.

The land described contains 80 acres.

WYW-163849—Pinedale, WY—Public Golf Course to be classified for lease/conveyance:

Sixth Principal Meridian, Sublette County, Wyoming.

T. 30 N., R. 109 W.,
Sec. 5, SW $\frac{1}{4}$, SW $\frac{1}{4}$ SE $\frac{1}{4}$;
Sec. 6, E $\frac{1}{2}$ SE $\frac{1}{4}$.

The land described contains 280 acres.

WYW-163855—Marbleton, WY—County Road Maintenance Facility Expansion to be classified for lease/conveyance:

Sixth Principal Meridian, Sublette County, Wyoming.

T. 30 N., R. 111 W.,
Sec. 17, NE $\frac{1}{4}$ SE $\frac{1}{4}$.

The land described contains 40 acres.

In accordance with the R&PP Act, Sublette County has filed R&PP petition(s)/application(s) and plans of development in which it proposes to use the above described public lands for a snowmobile track, a public golf course, and for the expansion of County road maintenance facilities. The lands are not needed for Federal purposes. Lease or conveyance pursuant to the R&PP Act is consistent with the Pinedale Resource Management Plan, dated December 12, 1988, and would be in the public interest.

The lease(s)/conveyance(s), when issued, will be subject to the following terms, conditions, and reservations:

1. Provisions of the R&PP Act and to all applicable regulations, including but not limited to the regulations stated in 43 CFR Part 2740, and policy and guidance of the Secretary of the Interior.

2. Reservation of a right-of-way to the United States for ditches and canals pursuant to the Act of August 30, 1890, 43 U.S.C. 945.

3. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove the minerals under applicable laws and regulations established by the Secretary of the Interior.

4. Provided, that the land conveyed shall revert to the United States upon a finding, and after notice and opportunity for a hearing, that the patentee has not substantially developed the lands in accordance with the approved plan of development on or before the date five years after the date of conveyance. No portion of the land shall under any circumstance revert to the United States if any such portion has been used for solid waste disposal or for any other purpose which may result in the disposal, placement, or release of any hazardous substance.

5. If, at any time, the patentee validly transfers to another party ownership of any portion of the land not used for the purpose(s) specified in the application and the plan of development, the

patentee shall pay the Bureau of Land Management the fair market value, as determined by the authorized officer, of the transferred portion as of the date of transfer, including the value of any improvements thereon.

6. All valid existing rights including but not limited to those documented on the official public land records at the time of lease/patent issuance. Detailed information concerning the proposed actions, including but not limited to documentation relating to compliance with applicable environmental and cultural resource laws, is available for review at the BLM, Pinedale Field Office, 432 East Mill Street, P.O. Box 768, Pinedale, WY 82941, telephone: 307-367-5341.

On August 23, 2006 the above described lands will be segregated from all other forms of appropriation under the public land laws, including the general mining laws, except for lease or conveyance under the R&PP Act and leasing under the mineral leasing laws. Interested parties may submit written comments regarding the proposed lease(s)/conveyance(s) or classification(s) of the lands to the Field Manager, Pinedale Field Office, at the address stated above in this notice for that purpose. Comments must be received by not later than October 10, 2006.

Classification Comments: Interested parties may submit comments involving the suitability of the lands for conveyance for the snowmobile track, and for lease/conveyance for a public golf course and expanded County road maintenance facilities. Comments on the classification(s) are restricted to whether the land is physically suited for the proposal(s), whether the use will maximize the future use or uses of the land, whether the use is consistent with local planning and zoning, and if the use is consistent with State and Federal programs.

Application Comments: Interested parties may submit comments regarding the specific use proposed in the application(s) and plan(s) of development, whether the BLM followed proper administrative procedures in reaching the decision; or any other factor not directly related to the suitability of the lands for a snowmobile track, a public golf course, and expanded County road maintenance facilities.

Comments, including names and street addresses of respondents, will be available for public review at the BLM Pinedale Field Office, (address above), during regular business hours, Monday through Friday, except holidays. Individual respondents may request

confidentiality. If you wish to withhold your name or address from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your comments. Such requests will be honored to the extent allowed by the law. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public inspection in their entirety.

Any adverse comments will be reviewed by the State Director, who may sustain, vacate, or modify this realty action. In the absence of any adverse comments, the classification will become effective 60 days after August 23, 2006.

(Authority: 43 CFR 2741.5)

Dated: May 17, 2006.

Dennis R. Stenger,
Field Manager.

BILLING CODE 4310-22-P

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Availability, Draft Environmental Impact Statement for Disposition of the Former Bureau of Mines Twin Cities Research Center Main Campus, Hennepin County, MN; and Request for Written Proposals

AGENCY: National Park Service, Interior.

SUMMARY: The purpose of this notice is to alert the public to two items. First, pursuant to section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, 42 U.S.C. 4332(2)(C), the National Park Service (NPS) announces the availability of the draft Environmental Impact Statement (EIS) for the disposition of the former Bureau of Mines Twin Cities Research Center (Center), located within the boundary of Mississippi National River and Recreation Area (MNRRA), a unit of the NPS, in Hennepin County, Minnesota. The draft EIS is now available for public review and comment, and everyone is invited to comment on the document.

Secondly, the notice is intended to alert any prospective Government or university entities that the NPS is soliciting proposals for use of the Center. In accordance with the legislation addressing the Center (Pub. L. 104-134), only Government and university entities qualify as possible recipients of the property. Additionally, Public Law 106-113 allows the Secretary to accept financial

remuneration for the Center and distribute the funds to MNRRA and the national wildlife refuge system for the benefit of their respective activities in Minnesota. The Center is Federal land located within the boundary of the MNRRA. Accordingly, through today's notice, the NPS invites written proposals from Government and university entities who may be interested in acquiring the former Bureau of Mines property. Verbal proposals will not be considered.

DATES: There will be a 60-day period for public review and submission of comments on the draft EIS following the publishing of the notice of availability in the **Federal Register** by the Environmental Protection Agency. Public meetings will be announced in the local media. Submission of written proposals from Government and university entities will be accepted during this 60-day period.

ADDRESSES: Copies of the draft EIS (compact disks and a limited number of paper copies) are available by request by writing to Superintendent, RE: Former Bureau of Mines Draft EIS, Mississippi National River and Recreation Area, 111 Kellogg Boulevard East, Suite no. 105, St. Paul, Minnesota 55101; by facsimile 651-290-3214; or by phone 651-290-4160. The document can be picked up in person at the address above. The document can also be found on the Web site in the NPS Planning, Environment, and Public Comment (PEPC) at: <http://parkplanning.nps.gov/>; select the MNRRA from the drop-down list.

FOR FURTHER INFORMATION CONTACT: Project Manager, Kim Berns National Park Service, Mississippi National River and Recreation Area, 111 Kellogg Boulevard East, Suite no. 105, St. Paul, Minnesota 55101, or by calling 651-290-4160.

Discussion: Each written proposal from a university or Government entity must address the following criteria:

1. How do you qualify as a Government or university entity?
2. What is your capacity to manage the Center property? Describe any relevant property management experience or current property holdings that are comparable to the Center property or that demonstrate your capacity to manage the Center.
3. What are your proposed plans for future use of the Center?
4. What resources do you have, including but not limited to personnel, financing, programs, etc., that would enable you to manage the Center property?
5. What plans do you have to protect the cultural, historic, and environmental

aspects of the Center, including Camp Coldwater and the spring?

6. Are you willing and able to offer land or other reimbursement in exchange for the Center and if so, what would you offer?

Solicitation by the NPS of written proposals does not reflect any decision on the future use of the Center. The NPS purpose in requesting such proposals is to assist the Secretary of the Interior in evaluating all reasonable alternatives for the disposition of the Center property.

SUPPLEMENTARY INFORMATION: The MNRRA has been designated by Congress to lead a public planning process pursuant to NEPA to address the disposition of the Center. Congress closed the Center in 1995 and provided the Secretary of the Interior specific legislation to convey the Center to a university or government entity (Pub. L. 104-134). The Center is Federal land and is located within the boundary of the MNRRA.

The purpose of the draft EIS is to consider alternatives for, and potential impacts of, future uses of this Federal property on natural, historic, and cultural resources. The Center is located within three historic designations: the Fort Snelling National Historic Landmark, the Fort Snelling National Register Historic District, and the buildings have been determined eligible for inclusion on the National Register of Historic Places. The site includes the Camp Coldwater Spring, the springhouse, and reservoir.

The draft EIS describes and analyses three action alternatives and a No-Action Alternative. The draft EIS does not identify a potential future owner but explores the impacts associated with three land-use scenarios that are likely to result from the transfer of the Center. The NPS does not have a preferred alternative at this time and intends to review any additional information, public comments, and written proposals received in response to this request to identify a preferred alternative in the final EIS.

Persons wishing to comment on the draft EIS may do so by any one of several methods. They may attend the public meeting that will be announced as noted above. Comments on the draft EIS can be made directly through the PEPC Web site listed above or provided directly to the NPS at the address above.

Written proposals from a university or Government entity relating to acquisition of the property must be submitted to the aforementioned address within the 60-day comment period.

It is the practice of the NPS to make all comments, including names and

addresses of respondents who provide information, available for public review following the conclusion of the NEPA process. Individuals may request that the NPS withhold their name and/or address from public disclosure. If you wish to do this, you must state this prominently at the beginning of your comment. Commentators using the Web site can make such a request by checking the box "keep my contact information private." The NPS will honor such requests to the extent allowable by law, however, please be aware that the NPS might still be required to disclose your name and address pursuant to the Freedom of Information Act. Also, any written proposals submitted to the NPS for acquisition of the Center property will be similarly made public.

Dated: May 25, 2006.

Ernest Quintana,

Regional Director, Midwest Region.

BILLING CODE 4310-70-M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act

Notice is hereby given that on August 14, 2006, a proposed Consent Decree in *United States et al. v. Macalloy Corp. et al.*, Civil Action Number 2:06-cv-02265-DCN, was lodged with the United States District Court for the District of South Carolina.

The consent decree resolves claims against two defendants, Macalloy Corporation and the BOC Group, brought by the United States under Section 107 of the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. 9607, for damages for injuries to natural resources resulting from release of hazardous substances at the Macalloy Site in Charleston, South Carolina. The Consent Decree also resolves potential counterclaims by the Defendants against the United States General Services Administration and the United States Defense Logistics Agency. Under the Consent Decree, the Defendants and two settling Federal agencies will pay \$575,000 for damages to the Department of the Interior, the National Oceanographic and Atmospheric Administration, and three State of South Carolina agencies, collectively acting as Trustees of the injured natural resources. The consent decree includes

a covenant not to sue by the United States and state trustee agencies under CERCLA for natural resource damages.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044-7611, and should refer to *United States et al. v. Macalloy Corp. et al.*, DOJ Ref. #90-11-2-07214/1.

The Consent Decree may be examined at the Office of the United States Attorney, District of South Carolina, 170 Meeting Street, 3rd Floor, Charleston, South Carolina 29401. During the public comment period, the Consent Decree may also be examined on the following Department of Justice Web site: <http://www.usdoj.gov/enrd/Consent-Decrees.html>. A copy of the Consent Decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044-7611, or by faxing or e-mailing a request to Tonia Fleetwood, tonia.fleetwood@usdoj.gov, Fax No. (202) 514-0097, phone confirmation number (202) 514-1547. In requesting a copy from the Consent Decree Library, please enclose a check in the amount of \$7.50 (25 cents per page reproduction cost) payable to the U.S. Treasury or, if by e-mail or fax, forward a check in that amount to the Consent Decree Library at the stated address.

Henry Friedman,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410-15-M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA")

Notice is hereby given that on August 9, 2006, a proposed consent decree in *United States v. NCH Corporation, et al.*, Civil Action No. 98-5268 (SDW) and *United States v. FMC Corporation, et al.*, Civil Action No. 01-0476 (JCL), was lodged with the United States District Court for the District of New Jersey.

In these actions the United States sought recovery of response costs pursuant to Section 107(a) of CERCLA, for costs incurred related to the Higgins

Farm Superfund Site in Franklin Township, New Jersey and the Higgins Disposal Superfund Site in Kingston, New Jersey. The consent decree requires FMC Corporation to pay \$14,500,000, plus interest from June 1, 2004 until date of payment, in reimbursement of the United States' response costs at the Higgins Farm Superfund Site; pay \$2 million, plus interest from June 1, 2004 until date of payment, in reimbursement of the United States' past response costs at the Higgins Disposal Superfund Site; and pay \$225,000.00 to reimburse the United States for the interim costs incurred at the Higgins Disposal Superfund Site while the settlement was being negotiated.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044-7611, and should refer to *United States v. NCH Corporation, et al.*, D.J. Ref. #90-11-3-1486/1 or *United States v. FMC Corporation, et al.*, D.J. Ref. #90-11-3-1486/2.

The consent decree may be examined at the Office of the United States Attorney, 970 Broad Street Suite 700, Newark, NJ 07102 (contact Susan Steele) and at U.S. EPA Region II, 290 Broadway, New York, New York 10007-1866 (contact Deborah Schwenk). During the public comment period, the consent decree, may also be examined on the following Department of Justice Web site, http://www.usdoj.gov/enrd/Consent_Decree.html. A copy of the consent decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044-7611 or by faxing or e-mailing a request to Tonia Fleetwood (tonia.fleetwood@usdoj.gov), fax no. (202) 514-0097, phone confirmation number (202) 514-1547. In requesting a copy from the Consent Decree Library, please enclose a check in the amount of \$10.00 (25 cents per page reproduction cost) payable to the U.S. Treasury or, if by e-mail or fax, forward a check in that amount to the Consent Decree Library at the stated address.

Ronald G. Gluck,

Assistant Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410-15-M

DEPARTMENT OF JUSTICE**Notice of Lodging of Consent Decree Under the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA")**

Notice is hereby given that on August 9, 2006, a proposed consent decree in *United States v. NCH Corporation, et al.*, Civil Action No. 98–5268 (SDW) and *United States v. FMC Corporation, et al.*, Civil Action No. 01–0476 (JCL), was lodged with the United States District Court for the District of New Jersey.

In these actions the United States sought recovery of response costs pursuant to Section 107(a) of CERCLA, for costs incurred related to the Higgins Farm Superfund Site in Franklin Township, New Jersey and the Higgins Disposal Superfund Site in Kingston, New Jersey. The consent decree requires NCH Corporation to (1) take over the operation and maintenance of the Higgins Farm Superfund Site groundwater treatment system; (2) conduct an investigation to determine if contaminated groundwater has migrated beyond the Higgins Farm property borders; (3) conduct additional studies and/or response actions EPA determines are necessary as a result of the groundwater investigation; (4) reimburse EPA's oversight costs relating to the groundwater investigation; (5) pay \$1,000,000.00 in reimbursement of the United States' past and future response costs at the Higgins Farm Superfund Site; (6) pay \$565,000.00 to reimburse the United States for the interim costs incurred by EPA at the Higgins Farm Superfund Site while the settlement was being negotiated; and (7) pay \$500,000.00 in reimbursement of the United States' past and future response costs at the Higgins Disposal Superfund Site.

The consent decree also requires the United States, on behalf of the Department of Energy, to (1) pay to the Superfund \$2,800,000.00 in past costs for the Higgins Farm Superfund Site; (2) pay \$2,000,000.00 in future costs for the Higgins Farm Superfund Site to NCH Corporation; and (3) pay to the Superfund \$4,500,000.00 in past and future costs for the Higgins Disposal Superfund Site.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, P.O. Box 7611, U.S. Department of Justice, Washington, DC

20044–7611, and should refer to *United States v. NCH Corporation, et al.*, D.J. Ref. # 90–11–3–1486/1 or *United States v. FMC Corporation, et al.*, D.J. Ref. # 90–11–3–1486/2.

The consent decree may be examined at the Office of the United States Attorney, 970 Broad Street, Suite 700, Newark, NJ 07102 (contact Susan Steele) and at U.S. EPA Region II, 290 Broadway, New York, New York 10007–1866 (contact Deborah Schwenk). BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE**Notice of Lodging of Settlement Under the Clean Air Act**

Notice is hereby given that on August 7, 2006, a proposed settlement in *U.S. v. New York City Transit Authority*, Civil Action No. 04–00732, was lodged with the United States District Court for the Southern District of New York.

In this action the United States sought civil penalties for violations by the New York City Authority of EPA's Stratospheric Ozone Protection regulations, 40 CFR part 82 subpart F, which govern the maintenance and repair of commercial air conditioning systems to prevent the leakage of ozone-destroying chlorofluorocarbons. The complaint alleges that the Transit Authority repeatedly violated the regulations by: (1) Failing to repair air conditioning systems on subway cars; and (2) failing to maintain records regarding the servicing of air conditioning systems. By stipulation of the parties, the United States' complaint

applies only to subway cars known as "Redbirds" which have been retired from service. The settlement provides for the Transit Authority to pay a civil penalty of \$165,000.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the settlement. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611, and should refer to *U.S. v. New York City Transit Authority*, D.J. Ref. 90–5–2–1–07681.

The settlement may be examined at the Office of the United States Attorney, 86 Chambers Street, 3rd Fl., New York, NY 10007, and at the Region II Office of the U.S. Environmental Protection Agency, Region II Records Center, 290 Broadway, 17th Floor, New York, NY 10007–1866. During the public comment period, the settlement may also be examined on the following Department of Justice Web site: http://www.usdoj.gov/enrd/Consent_Decrees.html. A copy of the settlement may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611 or by faxing or e-mailing a request to Tonia Fleetwood (tonia.fleetwood@usdoj.gov), fax no. (202) 514–0097, phone confirmation number (202) 514–1547. In requesting a copy from the Consent Decree Library, please enclose a check in the amount of \$2.25 (25 cents per page reproduction cost) payable to the U.S. Treasury or, if by e-mail or fax, forward a check in that amount to the Consent Decree Library at the stated address.

Ronald G. Gluck,

Assistant Chief, Environmental, Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE**Notice of Lodging of Consent Decree Under the Lead-Based Paint Hazard Act**

Notice is hereby given that on August 3, 2006, a proposed Consent Decree in *United States v. Steven J. Meldahl dba SJM Properties*, Civil Action 06–3202 JNE/JJG, was lodged with the United States District Court for the District of Minnesota.

The Consent Decree settles claims against the owner and management

company of approximately 31 residential properties containing approximately 34 units located in Minnesota, ("Subject Properties"). The claims were brought on behalf of the Department of Housing and Urban Development, ("HUD"), and the Environmental Protection Agency ("EPA") under the Residential Lead-Based Paint Hazard Reduction Act 42 U.S.C. 4851 *et seq.* ("Lead Hazard Reduction Act"). The United States alleged in the complaint that the Defendant failed to make one or more of the disclosures or to complete one or more of the disclosure activities required by the Lead Hazard Reduction Act.

Under the Consent Decree, Defendant will certify that he is complying with residential lead paint notification requirements. In addition, Defendant shall pay a civil penalty to the United States of \$5,000 within 30 days of entry of the Consent Decree and an additional \$5,000 civil penalty within seven months after entry of the Consent Decree. Defendant has agreed to develop a Hazard Reduction Plan for the Subject Properties and will replace all painted windows and abate all lead-based paint hazards within 2 years after approval of the Hazard Reduction Plan. Hazard abatement for at least one-half of the total inventory of Subject Properties is to be completed within each year. If the Defendant learns that a child with elevated blood lead levels lives or frequently visits a subject unit, the hazard abatement work on that unit is to be accomplished within 5 months. The Defendant is also required to submit annual reports on the progress of the hazard abatement work. In addition, on-going operations and maintenance shall be implemented at the completion of any window replacement or hazard reduction work. The Consent Decree provides for stipulated penalties for failure to meet obligations under the Consent Decree. Under the Consent Decree the United States provides the Defendant with a covenant not to sue or to take administrative action arising out of violations of Section 1018 at the Subject Properties.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the consent decree. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, P.O. Box 7611, Washington, DC 20044-7611, and should refer to *United States v. Steven J. Meldahl dba SJM Properties*, D.J. #90-5-2-1-08891.

The proposed consent decree may be examined at the Department of Housing and Urban Development, Office of General Counsel, 451 7th St. NW., Room 9262, Washington, DC 20410; at the office of the United States Attorney for the District of Minnesota, Assistant U.S. Attorney, 600 U.S. Courthouse, 300 South Fourth Street, Minneapolis, Minnesota, 55415; and at U.S. EPA Region 5, 77 W. Jackson Blvd., Chicago, IL 60604. During the public comment period, the consent decree may also be examined on the following Department of Justice Web site, http://www.usdoj.gov/enrd/Consent_Decrees.html. Copies of the consent decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044-7611 or by faxing or e-mailing a request to Tonia Fleetwood (tonia.fleetwood@usdoj.gov), fax no. (202) 514-0097, phone confirmation number (202) 514-1547. In requesting a copy please refer to the referenced case and enclose a check in the amount of \$7.75 (25 cents per page reproduction costs), payable to the U.S. Treasury for the consent decree in *United States v. Steven J. Meldahl dba SJM Properties*, D.J. # 90-5-2-1-08891.

W. Benjamin Fisherow,

Deputy Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410-01-M

DEPARTMENT OF JUSTICE

Bureau of Alcohol, Tobacco, Firearms and Explosives

[OMB Number 1140-0006]

Agency Information Collection Activities; Proposed Collection; Comments Requested

ACTION: 60-Day Notice of Information Collection Under Review: Application and Permit for Importation of Firearms, Ammunition and Implements of War.

The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for "sixty days" until October 23, 2006.

This process is conducted in accordance with 5 CFR 1320.10.

If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Kevin Boydston, Chief, Firearms and Explosives Imports Branch, 244 Needy Road, Martinsburg, WV 25401.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension of a currently approved collection.

(2) *Title of the Form/Collection:* Application and Permit For Importation of Firearms, Ammunition and Implements of War.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form Number: ATF F 6, Part II (5330.3B). Bureau of Alcohol, Tobacco, Firearms and Explosives.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or households. Other: Business or other for-profit, Federal Government, State, Local or Tribal Government. The information collection is needed to determine whether firearms, ammunition and implements of war are eligible for importation into the United States. The information is used to secure authorization to import such articles.

The form is used by persons who are members of the United States Armed Forces.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that 9,000 respondents will complete a 30 minute form.

(6) *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 4,500 annual total burden hours associated with this collection.

If additional information is required contact: Lynn Bryant, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, Department of Justice, Patrick Henry Building, Suite 1600, 601 D Street NW., Washington, DC 20530.

Dated: August 17, 2006.

Lynn Bryant,

Department Clearance Officer, Department of Justice.

Antitrust Division

United States of America v. Exelon Corporation and Public Service Enterprise Group Incorporated; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)-(h), that a proposed Final Judgment, Hold Separate Stipulation and Order, and Competitive Impact Statement have been filed with the United States District Court for the District of Columbia in *United States of America v. Exelon Corporation and Public Service Enterprise Group Incorporated*, Civil Action No. 1:06CV01138. On June 22, 2006, the United States filed a Complaint alleging that the proposed acquisition by Exelon Corporation ("Exelon") of Public Service Enterprise Group Incorporated ("PSEG") would violate Section 7 of the Clayton Act, 15 U.S.C. 18. The Complaint alleges that the acquisition would reduce competition substantially for wholesale electricity in the Mid-Atlantic United States. Specifically, the Complaint alleges that Exelon's acquisition of PSEG's electric generation assets would enhance Exelon's ability and incentive to raise wholesale electricity prices, resulting in increased retail electricity prices for millions of residential, commercial, and industrial customers. The proposed Final

Judgment requires Exelon and PSEG to divest six electric generation plants. The plants to be divested are Cromby Generating Station and Eddystone Generating Station in Pennsylvania and Hudson Generating Station, Linden Generating Station, Mercer Generating Station, and Sewaren Generating Station in New Jersey.

Copies of the Complaint, proposed Final Judgment, Hold Separate Stipulation and Order, and Competitive Impact Statement are available for inspection at the Department of Justice, Antitrust Division, Antitrust Documents Group, 325 7th Street, NW., Room 215, Washington, DC 20530 (telephone: 202-514-2481), on the Department of Justice's Web site at <http://www.usdoj.gov/atr>, and at the Office of the Clerk of the United States District Court for the District of Columbia. Copies of these materials may be obtained from the Antitrust Division upon request and payment of the copying fee set by Department of Justice regulations.

Public comment is invited within sixty (60) days of the date of this notice. Such comments, and responses thereto, will be published in the **Federal Register** and filed with the Court. Comments should be directed to Donna N. Kooperstein, Chief, Transportation, Energy & Agriculture Section, Antitrust Division, Department of Justice, 325 7th Street, NW., Suite 500, Washington, DC 20530 (telephone: 202-307-3278).

Patricia A. Brink,

Deputy Director of Operations, Antitrust Division.

United States District Court, District of Columbia

United States of America, U.S. Department of Justice, Antitrust Division, 325 7th Street, NW., Suite 500, Washington, DC 20530, Plaintiff, v. Exelon Corporation, 10 South Dearborn Street, Chicago, IL 60603, and Public Service Enterprise Group, Incorporated, 880 Park Plaza, P.O. Box 1171, Newark, NJ 07101-1171, Defendants

Case No. 1:06CV01138

Judge: John D. Bates

Deck Type: Antitrust

Date Stamp: 06/22/2006

Complaint

The United States of America, acting under the direction of the Attorney General of the United States, brings this civil action to enjoin the merger of Exelon Corporation ("Exelon") and Public Service Enterprise Group Incorporated ("PSEG") and alleges as follows:

1. On December 20, 2004, Exelon entered into an agreement to merge with PSEG. The transaction would create one of the largest electricity companies in the United States, with total assets of \$79 billion and annual revenues of \$27 billion.

2. Exelon and PSEG compete to sell wholesale electricity throughout the Mid-Atlantic and in Illinois, North Carolina, West Virginia, and Ohio.

3. Exelon and PSEG are the two largest electricity firms in the area encompassing central and eastern Pennsylvania, New Jersey, Delaware, the District of Columbia, and parts of Maryland and Virginia. Together, they would account for more than 35 percent of the electric generating capacity in this area and would have wholesale electricity revenues of approximately \$4 billion.

4. In the eastern portion of this area, which includes the densely populated northern New Jersey and Philadelphia areas, Exelon and PSEG together would account for more than 45 percent of the electric generating capacity in this area and would have wholesale electricity revenues of approximately \$3 billion.

5. Exelon's merger with PSEG would eliminate competition between them and give the merged firm the incentive and the ability to raise wholesale electricity prices, resulting in increased retail electricity prices for millions of residential, commercial, and industrial customers in these areas.

6. Accordingly, the merger would substantially lessen competition in violation of Section 7 of the Clayton Act, 15 U.S.C. 18.

I. Jurisdiction and Venue

7. This action is filed by the United States under Section 15 of the Clayton Act, as amended, 15 U.S.C. 25, to prevent and restrain Defendants from violating Section 7 of the Clayton Act, 15 U.S.C. 18.

8. Exelon and PSEG are engaged in interstate commerce and in activities substantially affecting interstate commerce. The Court has jurisdiction over this action and the parties pursuant to Sections 15 and 16 of the Clayton Act, 15 U.S.C. 25, 26; and 28 U.S.C. 1331, 1337.

9. Exelon and PSEG transact business and are found in the District of Columbia. Venue is proper under Section 12 of the Clayton Act, 15 U.S.C. 22; and 28 U.S.C. 1391(c).

II. The Defendants and the Transaction

10. Defendant Exelon is a Pennsylvania corporation, with its headquarters in Chicago, Illinois. Exelon

owns Exelon Generation Company, LLC, which owns electric generating plants located primarily in the Mid-Atlantic and the Midwest with a total generating capacity of more than 25,000 megawatts ("MW"). Exelon also owns two electricity retailers that buy wholesale electricity and resell it to consumers: PECO Energy Company, a gas and electric utility that serves customers in the Philadelphia area; and Commonwealth Edison Company, an electric utility that serves customers in northern Illinois.

11. Defendant PSEG is a New Jersey corporation, with its headquarters in Newark, New Jersey. PSEG owns PSEG Power LLC, which owns electric generating plants located primarily in New Jersey with a total generating capacity of more than 15,000 MW. PSEG also owns a gas and electric utility, Public Service Electric and Gas Company, that serves customers in New Jersey.

12. Following Exelon's merger with PSEG, the combined company would be known as Exelon Electric & Gas, with corporate headquarters in Chicago.

III. Trade and Commerce

A. Background

13. Electricity supplied to retail customers is generated at electric generating plants, which consist of one or more generating units. An individual generating unit uses any one of several types of generating technologies (including hydroelectric turbine, steam turbine, combustion turbine, or combined cycle) to transform the energy in fuels or the force of flowing water into electricity. The fuels used by a generating unit include uranium, coal, oil, or natural gas.

14. Generating units vary considerably in their operating costs, which are determined primarily by the cost of fuel and the efficiency of the technology in transforming the energy in fuel into electricity. "Baseload" units—which typically include nuclear and some coal-fired steam turbine units—have relatively low operating costs. "Peaking" units—which typically include oil- and gas-fired combustion turbine units—have relatively high operating costs. "Mid-merit" units—which typically include combined-cycle and some coal-fired steam turbine units—have costs lower than those of peaking units but higher than those of baseload units.

15. Once electricity is generated at a plant, an extensive set of interconnected high-voltage lines and equipment, known as the transmission grid, transports the electricity to lower

voltage distribution lines that relay the power to homes and businesses. Transmission grid operators must closely monitor the grid to prevent too little or too much electricity from flowing over the grid, either of which might damage lines or generating units connected to the grid. To prevent such damage and to prevent widespread blackouts from disrupting electricity service, a grid operator will manage the grid to prevent any more electricity from flowing over a transmission line as that line approaches its operating limit (a "transmission constraint").

16. In the Mid-Atlantic, the transmission grid is overseen by PJM Interconnection, LLC ("PJM"), a private, non-profit organization whose members include transmission line owners, generation owners, distribution companies, retail customers, and wholesale and retail electricity suppliers. The transmission grid administered by PJM is the largest in the United States, providing electricity to approximately 51 million people in an area encompassing New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, the District of Columbia, and parts of North Carolina, Kentucky, Ohio, Indiana, Michigan, Tennessee, and Illinois (the "PJM control area").

17. PJM oversees two auctions for the sale and purchase of wholesale electricity: a day-ahead auction that clears the day before the electricity is required, and a real-time auction that clears the day the electricity is required. Generation owners located in the PJM control area sell through these auctions to electricity retailers that provide retail electric service in the PJM control area. Buyers and sellers of wholesale electricity may also enter into contracts for the sale and purchase of electricity with each other, or third parties, outside of the PJM auction process; prices for these bilateral contracts generally reflect expected auction prices.

18. In the day-ahead auction, each buyer typically submits to PJM the amount of electricity the buyer expects to need each hour of the next day. Then PJM adds up the amount of electricity buyers will need to determine how much electricity will be demanded each hour. Each seller submits to PJM an offer to sell electricity indicating the amount of electricity it is willing to sell the next day and the price at which it is willing to sell. Then PJM sorts the offers to sell from lowest to highest offer price to determine how much electricity will be supplied at any given price.

19. Subject to the physical and engineering limitations of the transmission grid, PJM seeks to have

generating units operated in "merit" order, from lowest to highest offer. In the day-ahead auction, as long as transmission constraints are not expected, PJM takes the least expensive offer first and then continues to accept offers to sell at progressively higher prices until the needs for each hour the next day are covered. In this way, PJM minimizes the total cost of generating electricity required for the next day. The clearing price for any given hour essentially is determined by the generating unit with the highest offer price that is needed for that hour, and all sellers for that hour receive that price regardless of their offer price or their units' costs. In the real-time auction, which accounts for differences between anticipated and actual supply and demand, PJM accepts sellers' offers in merit order, subject to the physical and engineering limitations of the transmission grid, until there is a sufficient quantity of electricity to meet actual demand.

20. At times, transmission constraints prevent the generating units with the lowest offers from meeting demand in a particular area within the PJM control area. When that happens, PJM often calls on more expensive units located within the smaller area bounded by the transmission constraints (a "constrained area"), and the clearing price for the buyers in that area adjusts accordingly. Because more expensive units are required to meet demand, the clearing price in a constrained area will be higher than it would be absent the transmission constraints.

21. *PJM East.* One historically constrained area within the PJM control area includes the densely populated northern New Jersey and Philadelphia areas. This area ("PJM East") is defined by the "Eastern Interface," a set of five major transmission lines that divides New Jersey and the Philadelphia area from the rest of the PJM control area. When the Eastern Interface is constrained, PJM is limited in its ability to supply demand located east of the constraint with electricity from generating units located west of the constraint. PJM often responds to constraints on the Eastern Interface by calling on additional generating units east of the constraint to run, generally resulting in higher prices in PJM East because the cost of additional generation east of the constraint is higher than the cost of additional generation west of the constraint.

22. In PJM East during 2005, more than \$10 billion of wholesale electricity was sold for resale to nearly 6 million retail customers.

23. *PJM Central/East*. A second constrained area in PJM includes PJM East and central Pennsylvania. This area is defined by two major transmission lines known as "5004" and "5005" that run from western to central Pennsylvania and divide the area east of the lines ("PJM Central/East") from the rest of PJM. When the 5004 and 5005 transmission lines are constrained, PJM is limited in its ability to supply demand located east of the constraint with electricity from generating units located west of the constraint. PJM often responds to constraints on the 5004 and 5005 lines by calling on additional generating units east of the constraint to run, generally resulting in higher prices in PJM Central/East because the cost of additional generation east of the constraint is higher than the cost of additional generation west of the constraint.

24. In PJM Central/East during 2005, more than \$19 billion of wholesale electricity was sold for resale to nearly 9 million retail customers.

B. Relevant Product Market

25. Wholesale electricity is a relevant product market and a line of commerce within the meaning of Section 7 of the Clayton Act. In the event of a small but significant increase in the price of wholesale electricity, insufficient purchasers would switch away to make that increase unprofitable.

C. Relevant Geographic Markets

26. When the Eastern Interface is constrained, purchasers of wholesale electricity for use in PJM East have limited ability to turn to generation outside of PJM East. At such times, the amount of electricity that could be purchased outside PJM East is insufficient to make it unprofitable for generators located inside PJM East to seek a small but significant price increase.

27. PJM East is a relevant geographic market and a section of the country within the meaning of Section 7 of the Clayton Act.

28. When the 5004 and 5005 transmission lines are constrained, purchasers of wholesale electricity in PJM Central/East have limited ability to turn to generation outside of PJM Central/East. At such times, the amount of electricity that could be purchased outside PJM Central/East is insufficient to make it unprofitable for generators located inside PJM Central/East to seek a small but significant price increase.

29. PJM Central/East is a relevant geographic market and a section of the country within the meaning of Section 7 of the Clayton Act.

IV. Anticompetitive Effects

A. Market Shares and Concentration

30. Exelon owns approximately 20 percent of the generating capacity in PJM East. PSEG owns approximately 29 percent of the generating capacity in PJM East. After the merger, Exelon would own approximately 49 percent of the total generating capacity in PJM East.

31. Using a measure of market concentration called the Herfindahl-Hirschman Index ("HHI"), explained in Appendix A, Exelon's merger with PSEG would yield a post-merger HHI in PJM East of more than 2,700, representing an increase of more than 1,100.

32. Exelon owns approximately 19 percent of the generating capacity in PJM Central/East. PSEG owns approximately 21 percent of the generating capacity in PJM Central/East. After the merger, Exelon would own approximately 40 percent of the total generating capacity in PJM Central/East.

33. Exelon's merger with PSEG would yield a post-merger HHI in PJM Central/East of approximately 2,100, representing an increase of approximately 800.

B. Effect of Transaction

34. In addition to owning a significant share of overall generating capacity in PJM East and PJM Central/East, the merged firm will own generating units with a wide range of operating costs, including low-cost baseload units that provide the incentive to exercise market power, mid-merit units that provide the ability and incentive to exercise market power, and certain peaking units that provide additional ability to exercise market power in times of high demand. The combination of Exelon's and PSEG's generating units would significantly enhance Exelon's ability and incentive to reduce output and raise prices in PJM East and PJM Central/East.

35. The merger would enhance Exelon's ability to reduce output and raise prices in PJM East and PJM Central/East by increasing its share of mid-merit and peaking capacity in those markets. With a greater share of mid-merit and peaking capacity, Exelon would more often be able to reduce output and raise clearing prices at relatively low cost to it by withholding capacity. Exelon could withhold capacity in several ways. For example, it could submit high offers in the PJM auctions for some of the capacity from its mid-merit units such that they are not all called on to produce electricity. By reducing its output, Exelon could force PJM to turn to more expensive

units to meet demand, resulting in higher clearing prices in PJM East and PJM Central/East.

36. The merger would enhance Exelon's incentive to reduce output and raise price in PJM East and PJM Central/East by increasing the amount of baseload and mid-merit capacity it owns in these markets. With a greater amount of baseload and mid-merit capacity, Exelon would more often find it profitable to reduce output and raise market-clearing prices by withholding capacity. For example, as clearing prices increase due to its withholding certain of its mid-merit capacity, Exelon would earn those higher prices on its expanded post-merger baseload capacity, which almost always runs, making it more likely that the benefit of increased revenues on its baseload capacity would outweigh the cost of withholding mid-merit capacity.

37. Increasing Exelon's incentive and ability to profitably withhold output makes it likely that Exelon will exercise market power after its merger with PSEG, resulting in significant harm to competition and increased prices. Thus, the effect of the merger may be substantially to lessen competition in violation of Section 7 of the Clayton Act.

V. Entry

38. Entry into the wholesale electricity market through the addition of new generating capacity in PJM East or PJM Central/East or the addition of new transmission capacity that would relieve the constraints that limit the flow of electricity into PJM East or PJM Central/East would take many years, especially considering the necessary environmental, safety, and zoning approvals.

39. Entry into the PJM East or PJM Central/East wholesale electricity market would not be timely, likely, and sufficient in its magnitude, character, and scope to deter or counteract an anticompetitive price increase.

VI. Violation Alleged

40. The effect of Exelon's proposed merger with PSEG, if it were consummated, may be substantially to lessen competition for wholesale electricity in PJM East and PJM Central/East in violation of Section 7 of the Clayton Act, 15 U.S.C. 18. Unless restrained, the transaction would likely have the following effects, among others:

a. competition in the market for wholesale electricity in PJM East would be substantially lessened;

b. prices for wholesale electricity in PJM East would increase;

c. competition in the market for wholesale electricity in PJM Central/East would be substantially lessened; and

d. prices for wholesale electricity in PJM Central/East would increase.

VII. Request for Relief

The United States requests:

41. that Exelon's proposed merger with PSEG be adjudged a violation of Section 7 of the Clayton Act, 15 U.S.C. 18;

42. that Defendants be permanently enjoined and restrained from carrying out the Agreement and Plan of Merger dated December 20, 2004, or from entering into or carrying out any agreement, understanding, or plan by which Exelon would merge with or acquire PSEG, its capital stock or any of its assets;

43. that the United States be awarded the costs of this action; and

44. that the United States have such other relief as the Court may deem just and proper.

Dated: June 22, 2006.

Respectfully submitted.

For Plaintiff United States:

Thomas O. Barnett,
Assistant Attorney General.

J. Bruce McDonald,
Deputy Assistant Attorney General.

Dorothy B. Fountain,
Deputy Director of Operations.

Donna N. Kooperstein,

Appendix A—Definition of HHI

The term "HHI" means the Herfindahl-Hirschman Index, a commonly accepted measure of market concentration. The HHI is calculated by squaring the market share of each firm competing in the market and then summing the resulting numbers. For example, for a market consisting of four firms with shares of 30, 30, 20, and 20 percent, the HHI is $2,600 (30^2 + 30^2 + 20^2 + 20^2 = 2,600)$.

The HHI takes into account the relative size and distribution of the firms in a market. It approaches zero when a market is occupied by a large number of firms of relatively equal size and reaches its maximum of 10,000 when a market is controlled by a single firm. The HHI increases both as the number of firms in the market decreases and as the disparity in size between those firms increases.

Markets in which the HHI is between 1,000 and 1,800 are considered to be moderately concentrated, and markets in which the HHI is in excess of 1,800 points are considered to be highly concentrated. *See Horizontal Merger Guidelines* ¶ 1.51 (revised Apr. 8, 1997). Transactions that increase the HHI by more than 100 points in highly concentrated markets presumptively raise significant antitrust concerns under the Department of Justice and Federal Trade Commission. *See id.*

Certificate of Service

I hereby certify that on June 22, 2006, I caused a copy of the foregoing Complaint, proposed Final Judgment, Hold Separate Stipulation and Order, and Plaintiff United States' Explanation of Procedures for Entry of the Final Judgment to be served on counsel for defendants in this matter in the manner set forth below:

By electronic mail and hand delivery:

Counsel for Defendant Exelon Corporation, John M. Nannes (DC Bar #195966), John H. Lyons (DC Bar #453191), Skadden, Arps, Slate, Meagher & Flom LLP, 1440 New York Avenue, NW., Washington, DC 20005. Telephone: (202) 371-7500. Facsimile: (202) 661-9191.

Counsel for Defendant Public Service Enterprise Group Incorporated, Douglas G. Green (DC Bar #183343), Steptoe & Johnson LLP, 1330 Connecticut Avenue, NW., Washington, DC 20036. Telephone: (202) 429-3000. Facsimile: (202) 429-3902.

Mark J. Niefer (DC Bar #470370),
Department of Justice, Antitrust Division, 325
Seventh Street, NW., Suite 500,
Washington, DC 20530. Telephone: (202)
307-6318. Facsimile: (202) 307-2784.

United States District Court for the District of Columbia

United States of America, Plaintiff; v. Exelon Corporation and Public Service Enterprise Group Incorporated, Defendants

Case No.: 1:06CV01138
Judge: John D. Bates
Deck Type: Antitrust
Filed: 06/22/06

Proposed Final Judgment

And Whereas, Plaintiff, United States of America, filed its Complaint on June

22, 2006, relating to the proposed merger of Defendants Exelon Corporation ("Exelon") and Public Service Enterprise Group Incorporated ("PSEG");

And Whereas, Defendants, by their respective attorneys, have consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law, and without this Final Judgment constituting any evidence against or admission by any party regarding any issue of fact or law;

And Whereas, Defendants agree to be bound by the provisions of this Final Judgment pending its approval by the Court;

And Whereas, the essence of this Final Judgment is the prompt divestiture of certain assets by Defendants to assure that competition is not substantially lessened;

And Whereas, the United States requires Defendants to make certain divestitures for the purpose of remedying the loss of competition alleged in the Complaint;

And Whereas, Defendants have represented to the United States that the divestitures required below can and will be made, subject to receipt of necessary regulatory approvals, and that Defendants will later raise no claim of mistake, hardship, or difficulty of compliance as grounds for asking the Court to modify any of the provisions contained below;

Now Therefore, before any testimony is taken, without trial or adjudication of any issue of fact or law, and upon consent of the parties, it is *Ordered, Adjudged, and Decreed*:

I. Jurisdiction

The Court has jurisdiction over the subject matter of and each of the parties to this action. The Complaint states a claim upon which relief may be granted against Defendants under Section 7 of the Clayton Act, as amended, 15 U.S.C.

II. Definitions

As used in this Final Judgment:

A. "Acquire" means obtain any interest in any electricity generating facility, including real property, deeded development rights to real property, capital equipment, buildings, or fixtures.

B. "Acquirer" or "Acquirers" means the entity or entities to whom Defendants divest any of the Divestiture Assets or with whom Defendants have entered into definitive contracts to sell any of the Divestiture Assets.

C. "Control" means have the ability, directly or indirectly, to set the level of, dispatch, or offer the output of one or more units of an electricity generating

facility or to operate one or more units of an electricity generating facility.

D. "Designated Utility Zones" means the service territories in which the following companies on June 1, 2006, owned the wires through which electricity is distributed:

1. Atlantic City Electric Company,
2. Baltimore Gas and Electric Company,
3. Delmarva Power and Light Company,
4. Jersey Central Power and Light Company,
5. Metropolitan Edison Company,
6. Rockland Electric Company,
7. PECO Energy Company,
8. Potomac Electric Power Company,
9. PPL Electric Utilities Corporation, and
10. Public Service Electric and Gas Company.

E. "Divestiture Assets" means the following facilities: (1) Cromby Generating Station, 100 Cromby Rd. at Phoenixville, PA, 19460; (2) Eddystone Generating Station, Number 1 Industrial Hwy. at Eddystone, PA, 19022; (3) Hudson Generating Station, Duffield & Van Keuren Aves. at Jersey City, NJ, 07306; (4) Linden Generating Station, 4001 South Wood Ave. at Linden, NJ, 07036; (5) Mercer Generating Station, 2512 Lambertson Rd. at Hamilton, NJ, 08611; and (6) Sewaren Generating Station, 751 Cliff Rd. at Sewaren, NJ, 07077; and

a. For each of those facilities, all of Defendants' rights, titles, and interests in any tangible and intangible assets relating to the generation, dispatch, and offering of electricity at the facility; including the land; buildings; fixtures; equipment; fixed assets; supplies; personal property; non-consumable inventory on site as of June 1, 2006; furniture; licenses, permits, and authorizations issued by any governmental organization relating to the facility (including environmental permits and all permits from federal or state agencies and all work in progress on permits or studies undertaken in order to obtain permits); plans for design or redesign of the facility or any assets at the facility; agreements, leases, commitments, and understandings pertaining to the facility and its operation; records relating to the facility or its operation, wherever kept and in whatever form (excluding records of past offers submitted to PJM); all equipment associated with connecting the facility to PJM (including automatic generation control equipment); all remote start capability or equipment located on site; and all other interests, assets, or improvements at the facility customarily used in the generation,

dispatch, or offer of electricity from the facility; provided, however, that "Divestiture Assets" shall not include (i) electric and gas distribution or transmission assets located in, or appurtenant to, the boundaries of the facility, or (ii) any communications links between the facility and Defendants, which will be disconnected.

b. At the option of the Acquirer of the Linden Generating Station, the natural gas pipeline facilities connecting any assets at the Linden Generating Station (including the assets listed in Section ILE.a. for the Linden Generating Station), to an interconnection with the Texas Eastern Gas Transmission LP, and all of Defendants' rights, titles, and interests in any tangible and intangible assets relating to the delivery of natural gas from the Texas Eastern Gas Transmission LP interconnection with the Linden Generating Station, including the land; buildings; fixtures; equipment; fixed assets; supplies; personal property; non-consumable inventory on site as of June 1, 2006; furniture; licenses, permits, and authorizations issued by any governmental organization relating to the facility (including environmental permits and all permits from federal or state agencies and all work in progress on permits or studies undertaken in order to obtain permits); plans for design or redesign of the facility or any assets at the facility; agreements, leases, commitments, and understandings pertaining to the facility and its operation; records relating to the facility or its operation, wherever kept and in whatever form, and all other interests, assets, or improvements customarily used in the delivery of natural gas from the interconnection of the Texas Eastern Gas Transmission LP to the Linden Generating Station.

To the extent that any licenses, permits, or authorizations described in Section IIE.a. or Section IIE.b. are nontransferable, Defendants will use their best efforts to obtain the necessary consent for assignment to the Acquirer or Acquirers of the license, permit, or authorization.

F. "Exelon" means Exelon Corporation, a Pennsylvania corporation headquartered in Chicago, Illinois, its successors and assigns, and its subsidiaries, divisions, groups, affiliates, partnerships, joint ventures (not including Exelon's participation in the ownership, operation, dispatch, or offering of output of the Keystone Generating Station or the Conemaugh Generating Station), and their directors, officers, managers, agents, and employees.

G. "Exelon/PSEG Transaction" means the merger of Exelon and PSEG that is the subject of HSR Transaction Identification No. 2005-696, which was filed pursuant to the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, 15 U.S.C.A. 18a (West 1997) ("HSR Act"), including any changes in the terms of that merger that do not necessitate a new Hart-Scott-Rodino filing.

H. "Good Utility Practice" means any of the practices, methods, and acts engaged in or approved by a significant portion of the electric utility industry during the relevant time period, or any of the practices, methods, and acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision is made, could have been expected to accomplish the desired result at a reasonable cost consistent with good business practices, reliability, safety, and expedition. "Good Utility Practice" is not intended to be limited to the optimum practice, method, or act to the exclusion of all others, but rather is intended to include acceptable practices, methods, or acts generally accepted in the region.

I. "Including" means including but not limited to.

J. "Person" means any natural person, corporation, association, firm, partnership, or other business or legal entity.

K. "PJM" means PJM Interconnection, LLC.

L. "PSEG" means Public Service Enterprise Group Incorporated, a New Jersey corporation headquartered in Newark, New Jersey, its successors and assigns, and its subsidiaries, divisions, groups, affiliates, partnerships, joint ventures (not including PSEG's participation in the ownership, operation, dispatch, or offering of output of the Keystone Generating Station, the Conemaugh Generating Station, or the Yards Creek Generating Station), and their directors, officers, managers, agents, and employees.

III. Applicability

A. This Final Judgment applies to Defendants Exelon and PSEG, as defined above, and all other persons in active concert or participation with any of them who receive actual notice of this Final Judgment by personal service or otherwise.

B. Defendants shall require, as a condition of the sale or other disposition of all or substantially all of their electricity generating facilities in the Designated Utility Zones or of lesser business units that include the Divestiture Assets, that the purchaser agrees to be bound by the provisions of

this Final Judgment, provided, however, that Defendants need not obtain such an agreement from the Acquirers of the Divestiture Assets.

IV. Divestitures

A. Defendants are hereby ordered and directed, in accordance with the terms of this Final Judgment, to sell the Divestiture Assets to Acquirers acceptable to the United States in its sole discretion. Defendants shall enter into definitive contracts for sale of the Divestiture Assets within 150 days after consummation of the Exelon/PSEG Transaction. The United States, in its sole discretion, may extend the time period set forth in Section IV.A. for entering into definitive contracts for sale for an additional period not to exceed thirty (30) calendar days and shall notify the Court in such circumstances. Defendants shall use their best efforts as expeditiously and timely as possible (1) to enter into these contracts, and (2) after obtaining the United States' approval of the Acquirers, to seek the necessary approvals of the sale of Divestiture Assets from regulatory agencies with jurisdiction over the Exelon/PSEG Transaction. Defendants shall consummate the contracts for sale no later than twenty-one (21) calendar days after receiving, for each Divestiture Asset, the last necessary regulatory approval required for that Divestiture Asset.

B. In accomplishing the requirements imposed by Section IV.A., Defendants promptly shall make known, by usual and customary means, the availability for sale of the Divestiture Assets. Defendants shall inform any person making an inquiry regarding a possible purchase of the Divestiture Assets that the sales are being made pursuant to this Final Judgment and provide such person with a copy of this Final Judgment. Defendants shall also offer to furnish to prospective Acquirers who have been invited to submit binding bids, subject to reasonable protection for confidential commercial information, all information and documents relating to the Divestiture Assets customarily provided in a due diligence process, except such information subject to attorney-client privilege or the attorney work-product doctrine. Defendants shall make available such information to the United States at the same time that such information is made available to any other person.

C. Subject to reasonable protection for confidential commercial information, Defendants shall permit prospective Acquirers who have been invited to submit binding bids for the Divestiture Assets to have reasonable access to their

personnel and to make such inspection of the Divestiture Assets and any and all of their financial, operational, or other documents and information customarily provided as part of a due diligence process, as well as access to any and all environmental and other permit documents and information.

D. Defendants shall provide to each Acquirer of any of the Divestiture Assets, and to the United States, the name and most recent contact information (if known) for each individual who is currently, or who, to the best of Defendants' knowledge, has, at any time since January 1, 2006, been stationed at a specific Divestiture Asset and involved in the operation, dispatch, or offering of the output, of that Divestiture Asset to be purchased by the Acquirer. Defendants shall not impede or interfere with any negotiations by the Acquirer or Acquirers to employ such persons.

E. Defendants also agree to preserve the Divestiture Assets in a condition and state of repair at least equal to their condition and state of repair as of the date the Complaint was filed, ordinary wear and tear excepted, and consistent with Good Utility Practice.

F. Defendants shall warrant to the Acquirers of the Divestiture Assets that each asset (other than assets retired in place as of June 1, 2006) will be operational, consistent with Good Utility Practice, on the date of sale, subject to legal or regulatory restrictions on any of the Divestiture Assets in existence on the date of sale.

G. Defendants shall warrant to the Acquirers of the Divestiture Assets that there are no undisclosed material defects in the environmental, zoning, or other permits pertaining to the operation of each asset, and that following the sale of the Divestiture Assets, Defendants will not undertake, directly or indirectly, any challenges to any permits or certifications relating to the operation of the Divestiture Assets, or otherwise take any action to impede the divestiture or operation of the Divestiture Assets.

H. The divestitures, whether accomplished by Defendants pursuant to Section IV, or by the trustee appointed pursuant to Section V of this Final Judgment, shall be accomplished in such a way as to satisfy the United States, in its sole discretion, that the Divestiture Assets can and will be used by the Acquirers as part of viable, ongoing businesses engaged in the provision of electric generation services. The divestitures, whether pursuant to Sections IV or V of this Final Judgment, (1) shall be made to Acquirers that, in the United States' sole judgment, have

the intent and capability (including the necessary managerial, operational, technical, and financial capability) of competing effectively in the business of the provision of electric generation services; and (2) shall be accomplished so as to satisfy the United States, in its sole discretion, that none of the terms of any agreement between the Acquirers and Defendants give Defendants the ability unreasonably to raise the Acquirers' costs, to lower the Acquirers' efficiency, or otherwise to interfere in the ability of the Acquirers to compete effectively.

V. Appointment of Trustee

A. If Defendants have not entered into definitive contracts for sale of the Divestiture Assets within the time specified in Section IV.A. of this Final Judgment, Defendants shall notify the United States of that fact in writing. Upon application of the United States, the Court shall appoint a trustee selected by the United States and approved by the Court to effect the divestiture of the Divestiture Assets, including the application for necessary regulatory approvals. Until such time as a trustee is appointed, Defendants shall continue their efforts to effect the sale of the Divestiture Assets as specified in Section IV.

B. After the appointment of a trustee becomes effective, only the trustee shall have the right to sell the Divestiture Assets. The trustee shall have the power and authority to accomplish the divestitures at the earliest possible time to Acquirers acceptable to the United States, in its sole discretion, at such price and on such terms as are then obtainable upon reasonable effort by the trustee, subject to the provisions of Sections IV, V, and VI of this Final Judgment, and shall have such other powers as the Court deems appropriate. Subject to Section V.D. of this Final Judgment, the trustee shall have the power and authority to hire at the cost and expense of Defendants any investment bankers, attorneys, or other agents, who shall be solely accountable to the trustee, reasonably necessary in the judgment of the trustee to assist in the divestitures.

C. Defendants shall not object to a sale by the trustee on any ground other than the trustee's malfeasance. Any such objections by Defendants must be conveyed in writing to the United States and the trustee within ten (10) calendar days after the trustee has provided the notice required under Section VI of this Final Judgment.

D. The trustee shall serve at the cost and expense of Defendants, on such terms and conditions as the United

States approves, and shall account for all monies derived from the sale of the assets sold by the trustee and all costs and expenses so incurred. After approval by the Court of the trustee's accounting, including fees for its services and those of any professionals and agents retained by the trustee, all remaining money shall be paid to Defendants, and the trust shall then be terminated. The compensation of the trustee and of any professionals and agents retained by the trustee shall be reasonable in light of the value of the Divestiture Assets and based on a fee arrangement providing the trustee with an incentive based on the price and terms of the divestitures and the speed with which they are accomplished, but timeliness is paramount.

E. Defendants shall use their best efforts to assist the trustee in accomplishing the required divestiture, including their best efforts to effect all necessary regulatory approvals. The trustee and any consultants, accountants, attorneys, and other persons retained by the trustee shall have full and complete access to the personnel, books, records, and assets at the facilities to be divested, and Defendants shall develop financial or other information relevant to the assets to be divested customarily provided in a due diligence process as the trustee may reasonably request, subject to reasonable protection for confidential commercial information. Defendants shall permit prospective Acquirers who have been invited to submit binding bids for any of the Divestiture Assets to have reasonable access to their personnel and to make such inspection of the Divestiture Assets and any and all financial, operational, or other documents and other information as may be relevant to the divestitures required by this Final Judgment, subject to reasonable protection for confidential commercial information. Defendants shall take no action to interfere with or to impede the trustee's accomplishment of the divestitures.

F. After its appointment, the trustee shall file monthly reports with the United States and the Court setting forth the trustee's efforts to accomplish the divestitures ordered under this Final Judgment; provided however, that to the extent such reports contain information that the trustee deems confidential, such reports shall not be filed in the public docket of the Court. Such reports shall include the name, address, and telephone number of each person who, during the preceding month, made an offer to acquire, expressed an interest in acquiring, entered into negotiations to acquire, or was contacted or made an

inquiry about acquiring, any interest in the Divestiture Assets, and shall describe in detail each contact with any such person during that period. The trustee shall maintain full records of all efforts made to divest the Divestiture Assets.

G. If the trustee has not accomplished such divestitures within sixty (60) calendar days after its appointment, the trustee shall file promptly with the Court a report setting forth (1) the trustee's efforts to accomplish the required divestitures; (2) the reasons, in the trustee's judgment, why the required divestitures have not been accomplished; and (3) the trustee's recommendations. To the extent such reports contain information that the trustee deems confidential, such reports shall not be filed in the public docket of the Court. The trustee shall at the same time furnish such report to the United States, who shall have the right to make additional recommendations consistent with the purpose of the trust. The Court shall enter thereafter such orders as it shall deem appropriate to carry out the purpose of this Final Judgment which may, if necessary, include extending this Final Judgment and the term of the trustee's appointment by a period requested by the United States.

VI. Notice of Proposed Divestitures

A. Within two (2) business days after signing a definitive contract for sale of any of the Divestiture Assets, Defendants or the trustee, whichever is then responsible for effecting the divestiture required herein, shall notify the United States of any proposed divestiture required by Sections IV or V of this Final Judgment, and submit to the United States a copy of the proposed contract for sale and any other agreements with the Acquirer relating to the Divestiture Assets. If the trustee is responsible, it shall similarly notify Defendants. The notice shall set forth the details of the proposed divestiture (including the name, address, and telephone number of the proposed Acquirer), and list the name, address, and telephone number of each person not previously identified who offered or expressed an interest in or desire to acquire the Divestiture Assets, together with full details of the same.

B. Within fifteen (15) calendar days of receipt by the United States of such notice, the United States may request from Defendants, the proposed Acquirers, any other third party, or the trustee if applicable, additional information concerning the proposed divestiture, the proposed Acquirers, and any other potential Acquirers.

Defendants and the trustee shall furnish any additional information requested within fifteen (15) calendar days of the receipt of the request, unless the parties shall otherwise agree.

C. Within thirty (30) calendar days after receipt of the notice or within twenty (20) calendar days after the United States has been provided the additional information requested from Defendants, the proposed Acquirers, any third party, and the trustee, whichever is later, the United States shall provide written notice to Defendants and the trustee, if there is one, stating whether or not it objects to the proposed divestiture, provided, however, that the United States may extend the period for its review up to an additional thirty (30) calendar days. If the United States provides written notice that it does not object, the divestiture may be consummated, subject only to Defendants' limited right to object to the sale under Section V.C. of this Final Judgment. Absent written notice that the United States does not object to the proposed Acquirer, or upon objection by the United States, a divestiture proposed under Section IV or Section V shall not be consummated. Upon objection by Defendants under Section V.C., a divestiture proposed under Section V shall not be consummated unless approved by the Court.

VII. Affidavits

A. Within twenty (20) calendar days of the filing of the Complaint in this matter and every thirty (30) calendar days thereafter until the Divestiture Assets have been sold, whether pursuant to Sections IV or V of this Final Judgment, Defendants shall deliver to the United States an affidavit as to the fact and manner of compliance with Sections IV or V of this Final Judgment. Each such affidavit shall include the name, address, and telephone number of each person who, during the preceding thirty days, made an offer to acquire, expressed an interest in acquiring, entered into negotiations to acquire, or was contacted or made an inquiry about acquiring, any interest in the Divestiture Assets, and shall describe in detail each contact with any such person during that period. Each such affidavit shall also include a description of the efforts that Defendants have taken to solicit purchasers for the Divestiture Assets and to provide required information to prospective purchasers including the limitations, if any, on such information. Assuming the information set forth in the affidavit is true and complete, any objection by the United States to

information provided by Defendants, including limitation on information, shall be made within fourteen (14) calendar days of receipt of such affidavit.

B. Within twenty (20) calendar days of the filing of the Complaint in this matter, Defendants shall deliver to the United States an affidavit that describes in detail all actions Defendants have taken and all steps Defendants have implemented on an ongoing basis to comply with Section IX of this Final Judgment. The affidavit also shall include a description of Defendants' efforts to maintain the Divestiture Assets in operable condition at no less than current capacity configurations with current levels of staffing and management and to otherwise comply with the Hold Separate Stipulation and Order. Defendants shall deliver to the United States an affidavit describing any changes to the efforts and actions outlined in Defendants' earlier affidavit(s) filed pursuant to this Section within fifteen (15) calendar days after the change is implemented.

C. Defendants shall keep all records of all efforts made to preserve and divest the Divestiture Assets until one year after such divestitures have been completed.

VIII. Financing

Defendants shall not finance all or any part of any purchase made pursuant to Sections IV or V of this Final Judgment.

IX. Hold Separate

Until the divestitures required by this Final Judgment have been accomplished, Defendants shall take all steps necessary to comply with the Hold Separate Stipulation and Order entered by the Court. Defendants shall take no action that would jeopardize, delay, or impede the divestiture order by the Court.

X. No Reacquisition

Defendants may not acquire or control any of the Divestiture Assets during the term of this Final Judgment.

XI. Prior Approval

A. Without the prior approval of the United States, Defendants shall not acquire any electricity generating facility, or enter into any contract to obtain control of, an electricity generating facility or of one or more units of an electricity generating facility in the Designated Utility Zones, which facility or units are in existence as of June 1, 2006, or are listed in Attachment A. Such prior approval shall be within the sole discretion of the United States.

This prior approval requirement shall not apply to:

1. Upgrades, expansions, or upgrades of existing units up to the amount of such upgrades, expansions, or upgrades;

2. Units that are rebuilt, repowered, or activated out of inactive status after June 1, 2006, as long as such rebuild, repowering, or activation, if done by Defendants, begins within one year of purchase of the facility that includes the unit; and

3. Acquisitions of a facility of 25 megawatts or less of summer net capability, as defined by PJM, or contracts to control 25 megawatts or less of summer net capability, as defined by PJM, provided, however, that Defendants do not acquire, or enter into contracts to obtain control of, more than 100 megawatts of summer net capability from units at a single facility during a single calendar year. For the purpose of Section XI.A.3., the summer net capability of a unit that is an intermittent capacity resource, as defined by PJM, will be measured as of the date of acquisition of the unit, or of entry into the contract to control the unit, in accordance with the methodology used by PJM for calculating capacity values for intermittent capacity resources.

B. Unless a transaction subject to Section XI.A. is otherwise subject to the reporting and waiting period requirements of the HSR Act:

1. Defendants shall provide notification to the United States within five (5) calendar days of acceptance of any contract subject to Section XI.A. and shall submit copies of the contracts and any management or strategic plans discussing the proposed transaction, and the names of the principal representatives of the parties to the agreement who negotiated the agreement. Defendants shall send the required materials to Chief, Transportation, Energy, and Agriculture Section, Antitrust Division, United States Department of Justice, 325 Seventh Street, NW., Suite 500, Washington, DC 20530. Should oversight of this Final Judgment be the responsibility of another section of the Antitrust Division, the required materials shall be sent to the chief of the section responsible for oversight of this Final Judgment;

2. Within thirty (30) calendar days of the receipt of the required materials, if the transaction is not reportable under the HSR Act, the United States will determine whether it requires additional information from the parties to the contract. If the United States makes such a request for additional

information, the parties will provide the information requested.

C. Once the parties have provided all of the information requested under Section XIB. or under the HSR Act, the United States must notify Defendants within thirty (30) calendar days if the United States disapproves the proposed transaction.

D. Section XI.A. shall be broadly construed and any ambiguity or uncertainty shall be resolved in favor of requiring prior approval.

E. Nothing in this Section limits Defendants' responsibility to comply with the requirements of the HSR Act with respect to any acquisition.

XII. Compliance Inspection

For purposes of determining or securing compliance with this Final Judgment, or of determining whether this Final Judgment should be modified or vacated, and subject to any legally recognized privilege, from time to time duly authorized representatives of the United States Department of Justice, including consultants and other persons retained by the United States, shall, upon written request of a duly authorized representative of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to Defendants, be permitted:

1. Access during Defendants' office hours to inspect and copy, or at the United States' option, to require Defendants to provide copies of, all books, ledgers, accounts, records, and documents in the possession, custody, or control of Defendants, relating to any matters contained in this Final Judgment; and

2. To interview, either informally or on the record, Defendants' officers, employees, or agents, who may have their individual counsel present, regarding such matters. The interviews shall be subject to the reasonable convenience of the interviewee and without restraint or interference by Defendants.

B. Upon the written request of a duly authorized representative of the Assistant Attorney General in charge of the Antitrust Division, Defendants shall submit written reports, or responses to written interrogatories, under oath if requested, relating to any of the matters contained in this Final Judgment as may be requested.

C. No information or documents obtained by the means provided in this section shall be divulged by the United States to any person other than an authorized representative of the executive branch of the United States, except in the course of legal proceedings

to which the United States is a party (including grand jury proceedings), or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

If at the time information or documents are furnished by Defendants to the United States, Defendants represent and identify in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and Defendants mark each pertinent page of such material, "Subject to claim of protection under

Rule 26(c)(7) of the Federal Rules of Civil Procedure," then the United States shall give Defendants ten (10) calendar days notice prior to divulging such material in any legal proceeding (other than a grand jury proceeding).

XIII. Retention of Jurisdiction

The Court retains jurisdiction to enable any party to this Final Judgment to apply to the Court at any time for further orders and directions as may be necessary or appropriate to carry out or construe this Final Judgment, to modify any of its provisions, to enforce compliance, and to punish violations of its provisions.

XIV. Expiration of Final Judgment

Unless the Court grants an extension, this Final Judgment shall expire ten (10) years from the date of its entry.

XV. Public Interest Determination

Based on the record in this case, entry of this Final Judgment is in the public interest, and the parties have complied with the procedures of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16.

United States District Court for the District of Columbia

United States of America, Plaintiff; v. Exelon Corporation and Public Service Enterprise Group Incorporated, Defendants

Case No. 1:06CV01138

Judge: John D. Bates

Deck Type: Antitrust

Filed: August 10, 2006

Competitive Impact Statement

The United States, pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act ("APPA" or "Tunney Act"), 15 U.S.C. 16(b)–(h), files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

I. Nature and Purpose of the Proceeding

On December 20, 2004, Defendants entered into an Agreement and Plan of Merger under which Exelon Corporation ("Exelon") would merge with Public Service Enterprise Group Incorporated ("PSEG"). On June 22, 2006, the United States filed a civil antitrust Complaint seeking to enjoin the proposed merger. The Complaint alleges that the merger likely would lessen competition

substantially for wholesale electricity in sections of the United States in violation of Section 7 of the Clayton Act, 15 U.S.C. 18. This loss of competition would result in increased wholesale electricity prices, raising retail electricity prices for millions of residential, commercial, and industrial customers in parts of the Mid-Atlantic states.

At the same time the Complaint was filed, the United States filed a Hold Separate Stipulation and Order ("Stipulation") and proposed Final Judgment that are designed to eliminate the anti competitive effects of the merger. Under the proposed Final Judgment, as explained more fully below, Defendants are required to divest six electric generating plants (collectively the "Divestiture Assets"). The Stipulation and proposed Final Judgment require Defendants to take certain steps to ensure that these assets are preserved and maintained and that competition is maintained during the pendency of the ordered divestiture.

The United States and Defendants have stipulated that the proposed Final Judgment may be entered after compliance with the APPA. Entry of the proposed Final Judgment would

terminate this action, except that the Court would retain jurisdiction to construe, modify, or enforce the provisions of the proposed Final Judgment and to punish violations of it. Defendants have also stipulated that they will comply with the terms of the Stipulation and the proposed Final Judgment from the date of the signing of the Stipulation, pending entry of the proposed Final Judgment by the Court and the required divestiture. Should the Court decline to enter the proposed Final Judgment, Defendants have also committed to abide by its requirements and those of the Stipulation until the expiration of the time for appeal.

II. Description of the Events Giving Rise to the Alleged Violation

A. The Defendants and the Proposed Transaction

Defendant Exelon is a Pennsylvania corporation, with its headquarters in Chicago, Illinois; it owns Exelon Generation Company, LLC, which owns electric generating plants located primarily in the Mid-Atlantic and the Midwest with a total generating capacity of more than 25,000 megawatts ("MW"). Defendant PSEG is a New Jersey corporation, with its headquarters in

Newark, New Jersey; it owns PSEG Power LLC, which owns electric generating plants located primarily in New Jersey with a total generating capacity of more than 15,000 MW. By combining the generating plants owned by Exelon and PSEG, the proposed merger would enhance the ability and incentive of the merged firm to reduce output and raise prices for wholesale electricity in two areas of the Mid-Atlantic where Defendants are the largest generators of electricity. Thus, the transaction as originally proposed would lessen competition substantially in violation of Section 7 of the Clayton Act, 15 U.S.C. 18.

B. Wholesale Electricity in the Mid-Atlantic

Electricity supplied to retail customers is generated at electric generating plants, which consist of one or more generating units. An individual generating unit uses anyone of several types of generating technologies (including hydroelectric turbine, steam turbine, combustion turbine, or combined cycle) to transform the energy in fuels or the force of flowing water into electricity. The generating units typically are fueled by uranium, coal, oil, or natural gas.

Generating units vary considerably in their operating costs, which are determined primarily by the cost of fuel and the efficiency of the unit's technology in transforming the energy in fuel into electricity. "Baseload" units—which typically include nuclear and some coal-fired steam turbine units—have relatively low operating costs. "Peaking" units—which typically include oil- and gas-fired combustion turbine units—have relatively high operating costs. "Mid-merit" units which typically include combined cycle and some coal-fired steam turbine units—have costs lower than those of peaking units but higher than those of baseload units.

Once electricity is generated at a plant, an extensive set of interconnected high-voltage lines and equipment, known as the transmission grid, transports the electricity to lower voltage distribution lines that relay the power to homes and businesses. Transmission grid operators must closely monitor the grid to prevent too little or too much electricity from following over the grid, either of which might damage lines or generating units connected to the grid. To prevent such damage and to prevent widespread blackouts from disrupting electricity service, a grid operator will manage the grid to prevent any more electricity from flowing over a transmission line as that

line approaches its operating limit (a "transmission constraint").

In the Mid-Atlantic, the transmission grid is overseen by PJM Interconnection, LLC ("PJM"), a private, non-profit organization whose members include transmission line owners, generation owners, distribution companies, retail customers, and wholesale and retail electricity suppliers. The transmission grid administered by PJM is the largest in the United States, providing electricity to approximately 51 million people in an area encompassing all or parts of New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, the District of Columbia, North Carolina, Kentucky, Ohio, Indiana, Michigan, Tennessee, and Illinois (the PJM control area").

PJM oversees two auctions for the sale and purchase of wholesale electricity: A day-ahead auction that clears the day before electricity is to be generated and delivered, and a real-time auction that clears the day electricity is delivered. In these auctions, generation owners located in the PJM control area submit offers to sell electricity and electricity retailers submit bids to purchase electricity. Buyers submit bids that indicate the amount of electricity they are willing to buy at different prices. Sellers submit offers that indicate the amount of electricity they are willing to sell at different prices. PJM adds up the bids and offers to determine the total demand and supply for electricity. The amount of electricity that actually is generated and delivered is determined by the PJM auctions. Buyers and sellers of wholesale electricity may also enter into contracts with each other or with third parties, outside of the PJM auction process; the prices of these contracts generally reflect expected auction prices.

Subject to the physical and engineering limitations of the transmission grid, PJM seeks to have generating units operated in "merit" order, from lowest to highest offer. In the day-ahead auction, as long as transmission constraints are not expected, PJM takes the least expensive offer first and then continues to accept offers to sell at progressively higher prices until the needs for each hour of the next day are covered. In this way, PJM minimizes the total cost of generating electricity required for the next day. The clearing price for any given hour essentially is determined by the generating unit with the highest offer price that is needed for that hour, and all sellers for that hour receive that price regardless of their offer price or their units' costs. In the real-time auction, which accounts for differences

between anticipated and actual supply and demand, PJM also accepts sellers' offers in merit order until there is a sufficient quantity of electricity to meet actual demand, subject to the physical and engineering limitations of the transmission grid.

At times, transmission constraints prevent the generating units with the lowest offers from meeting demand in a particular area within the PJM control area. When that happens, PJM often calls on more expensive units located within the smaller area bounded by the transmission constraints (a "constrained area), and the clearing price for the buyers in that area adjusts accordingly. Because more expensive units are required to meet demand, the clearing price in a constrained area will be higher than it would be absent the transmission constraints.

PJM East. One historically constrained area within the PJM control area includes the densely populated northern New Jersey and Philadelphia areas. This area, referred to in the Complaint as "PJM East," is defined by the "Eastern Interface," a set of five major transmission lines that divides New Jersey and the Philadelphia area from the rest of the PJM control area. When the Eastern Interface is constrained, PJM is limited in its ability to meet demand located east of the constraint with electricity from generating units located west of the constraint. PJM often responds to constraints on the Eastern Interface by calling on additional generating units east of the constraint to run, generally resulting in higher prices in PJM East than otherwise would exist because the cost of additional generation east of the constraint is higher than the cost of additional generation west of the constraint.

PJM Central/East. A second constrained area in PJM includes PJM East, central Pennsylvania, and eastern Maryland. This area is defined by two major transmission lines known as "5004" and "5005" that run from western to central Pennsylvania and divide central Pennsylvania, eastern Maryland, and PJM East ("PJM Central/East") from the rest of PJM. When the 5004 and 5005 transmission lines are constrained, PJM is limited in its ability to supply demand located east of the constraint with electricity from generating units located west of the constraint. PJM often responds to constraints on the 5004 and 5005 lines by calling on additional generating units east of the constraint to run, generally resulting in higher prices in PJM Central/East than otherwise would exist because the cost of additional

generation east of the constraint is higher than the cost of additional generation west of the constraint.

C. Product Market

The Complaint alleges that wholesale electricity, electricity that is generated and sold for resale, is a relevant antitrust product market. Wholesale electricity demand is a function of retail electricity demand: Electricity retailers, who buy wholesale electricity to serve their customers, must provide exactly the amount of electricity their customers require. Retail electricity consumers' demand, however, is largely insensitive to changes in retail price; thus, an increase in retail prices due to an increase in wholesale prices will have little effect on the quantity of retail electricity demanded and little effect on the quantity of wholesale electricity demanded. As a result, a small but significant increase in the wholesale price of electricity would not cause a significant number of retail electricity consumers to substitute other energy sources for electricity or otherwise reduce their consumption of electricity.

D. Geographic Markets

The Complaint alleges that "PJM East" and "PJM Central/East" are relevant antitrust geographic markets defined by transmission lines in the PJM control area: PJM East is defined by the Eastern Interface, and PJM Central/East is defined by the 5004 and 5005 transmission lines. When these lines approach their operating limits, purchasers of electricity have limited ability to purchase electricity generated outside the relevant geographic market to meet their needs. At such times, the amount of electricity that could be purchased outside PJM East or PJM Central/East is insufficient to make it unprofitable for generators located inside those areas to make a small but significant price increase. Thus, PJM East and PJM Central/East are relevant antitrust geographic markets.

E. The Competitive Effects of the Transaction on Wholesale Electricity

The Complaint alleges that Exelon's proposed merger with PSEG would eliminate competition between them and give the merged firm the incentive and ability profitably to raise wholesale electricity prices, resulting in increased retail prices for millions of residential, commercial, and industrial customers in PJM East and PJM Central/East. In PJM East during 2005, more than \$10 billion of wholesale electricity was sold for resale to nearly 6 million retail customers; in PJM Central/East during 2005, more than \$19 billion of

wholesale electricity was sold for resale to nearly 9 million retail customers. In PJM East and PJM Central/East, the merged firm would own a substantial share of total generating capacity in highly concentrated markets. More importantly, in both geographic markets the merged firm would own low-cost baseload units that provide incentive to raise prices, mid-merit units that provide incentive and ability to raise prices, and certain peaking units that provide additional ability to raise prices in times of high demand.

Market shares in PJM East and PJM Central/East. In PJM East, Exelon currently owns approximately 20 percent of the generating capacity and PSEG currently owns approximately 29 percent of the generating capacity. After the merger, Exelon would own approximately 49 percent of the total generating capacity in PJM East. In PJM Central/East, Exelon currently owns approximately 19 percent of the generating capacity and PSEG currently owns approximately 21 percent of the generating capacity. After the merger, Exelon would own approximately 40 percent of the total generating capacity in PJM Central/East.

Concentration in PJM East and PJM Central/East. The U.S. Department of Justice and the Federal Trade Commission's 1992 Horizontal Merger Guidelines consider markets in which the post-merger Herfindahl-Hirschman Index ("HHI"), a measure of concentration explained in Appendix A of the Complaint, exceeds 1800 points to be highly concentrated. Transactions that increase the HHI by more than 100 points in highly concentrated markets presumptively raise significant antitrust concerns under the Horizontal Merger Guidelines.¹ Exelon's merger with PSEG would yield a post-merger HHI in PJM East of approximately 2750 points, representing an increase of more than 1100 points. Exelon's merger with PSEG would yield a post-merger HHI in PJM Central/East of approximately 2080 points, representing an increase of approximately 790 points. Thus, the proposed merger raises a presumption of significant antitrust concerns in PJM East and PJM Central/East.

Increased ability and incentive profitably to withhold output and raise prices. The Complaint alleges that the proposed merger would substantially lessen competition. The combination of PSEG and Exelon's generating units would increase the merged firm's ability

and incentive to withhold selected output, forcing PJM to turn to more expensive units to meet demand, resulting in higher clearing prices in PJM East and PJM Central/East.

Baseload units, such as nuclear steam and some hydroelectric units, typically generate electricity around the clock during most of the year; certain lower-cost mid-merit units, including some coal-fired steam units, generate electricity for a substantial number of hours during the year. When they are running, such baseload and mid-merit units are positioned to benefit from an increase in wholesale electricity prices. Because they run so frequently, these units provide a relatively significant incentive to withhold output and raise prices.

Mid-merit units also provide substantial ability to withhold output to increase the market clearing price. Mid-merit units have costs that are close to clearing prices for a substantial number of hours during the year. Because their costs are so close to clearing prices, the opportunity cost of withholding output from these units—the lost profit on the withheld output—is smaller than it would be for low-cost base load units. This fact is also true of certain peaking units during times of the year when demand is higher.

By giving the merged firm an increased amount of baseload and mid-merit capacity, combined with an increased share of mid-merit and peaking capacity, the merger substantially increases the likelihood that Exelon would find it profitable to withhold output and raise price. With its increased share of mid-merit and peaking capacity, the merged firm would more often be able to reduce output and raise market clearing prices at relatively low cost to it. And with its increased amount of baseload and mid-merit capacity, the merger would make it more likely that the increased revenue on the merged firm's baseload and mid-merit capacity would outweigh the cost of withholding its higher-cost mid-merit and peaking capacity. Thus the merger facilitates Exelon's incentive and ability to reduce output and raise market prices.

F. Entry

The Complaint alleges that entry through the construction of new generation or transmission capacity would not be timely, likely, and sufficient to deter or counteract an anti-competitive price increase. Given the necessary environmental, safety, and zoning approvals required, it would take many years for such new entry to take place. Thus, entry via new generation or

¹ See U.S. Department of Justice and Federal Trade Commission, Horizontal Merger Guidelines § 1.51 (April 2, 1992) available at <http://www.usdoj.gov/atr/public/guidelines/hmg.htm>.

transmission capacity would, at a minimum, not be timely.

III. Explanation of the Proposed Final Judgment

The proposed Final Judgment would preserve the competition that would have been lost in PJM East and PJM Central/East had Exelon's merger with PSEG gone forward as proposed. Within 150 days after consummation of their merger, Defendants must sell all of their rights, titles, and interests in the Divestiture Assets. The assets and interests will be sold to purchasers acceptable to the United States in its sole discretion. In addition, the Final Judgment prohibits the merged company from reacquiring or controlling any of the Divestiture Assets, as well as limits its ability to acquire, or enter into contracts to control, generating units in PJM East or PJM Central/East.

A. Divestiture

The Complaint alleges that the merger would significantly enhance the merged firm's ability and incentive profitably to reduce output and raise prices in PJM East and PJM Central/East. The divestiture requirements of the proposed Final Judgment will maintain competition for wholesale energy in these geographic markets by allowing independent competitors to acquire the Divestiture Assets. The Divestiture Assets are six generating plants located in PJM East and PJM Central/East that comprise mid-merit and peaking units:

- Cromby Generating Station, 100 Cromby Rd. at Phoenixville, PA 19460;
- Eddystone Generating Station, Number 1 Industrial Hwy. at Eddystone, PA 19022;
- Hudson Generating Station, Duffield & Van Keuren Aves. at Jersey City, NJ 07306;
- Linden Generating Station, 4001 South Wood Ave. at Linden, NJ 07036;
- Mercer Generating Station, 2512 Lamberton Rd. at Hamilton, NJ 08611; and
- Sewaren Generating Station, 751 Cliff Rd. at Sewaren, NJ 07077.

The Divestiture Assets include all of the merged firm's coal-fired steam units in PJM East and PJM Central/East (located at the Eddystone, Cromby, Hudson, and Mercer plants); one of the merged firm's two combined cycle units (located at the Linden plant); and several efficient peaking units (located at the Eddystone, Cromby, Linden, Hudson, and Sewaren plants).

Effect of divestiture on market shares and concentration. Divestiture of these plants will reduce market shares and concentration substantially relative to

what they would have been absent divestiture. Absent divestiture, the merged firm's share of capacity would be approximately 49 percent in PJM East and 40 percent in PJM Central/East. With divestiture, the merged firm's share of capacity will be approximately 32 percent in PJM East and 29 percent in PJM Central/East.

The pre-merger HHI concentration levels for PJM East and Central East are approximately 1590 points and 1290 points, respectively. Absent divestiture, the post-merger HHIs would increase to highly concentrated levels of approximately 2750 points and 2080 points, respectively. The divestiture, however, significantly reduces these levels.

Effect of divestiture on ability and incentive profitably to withhold output and raise prices. Although the divestiture will substantially reduce market shares and concentration levels compared to the levels that would have prevailed absent divestiture, the purpose of the divestiture is to preserve competition, not merely maintain HHIs or market shares at their premerger levels.² Accordingly, the proposed Final Judgment seeks to restore effective competition by depriving Exelon of key assets that would have made it profitable for it to withhold output and raise prices in PJM East and PJM Central/East. Divestiture of the six generating plants deprives the merged firm of key generating plants whose output it would otherwise have had the ability profitably to withhold. At the same time, the divestiture reduces the incentive the merged firm otherwise would have had to withhold output. In this way, the proposed Final Judgment assures that the merger is not likely to lead to consumer harm.

The proposed Final Judgment requires divestiture of generating units that would have significantly enhanced the merged firm's ability profitably to withhold output. These units include all of the merged firm's coal-fired steam units in PJM East and PJM Central/East (located at the Eddystone, Cromby, Hudson, and Sewaren plants); one of the merged firm's two combined cycle units (located at the Linden plant); and several efficient peaking units (located at the Eddystone, Cromby, Linden, Hudson, and Sewaren plants). Because their operating costs are relatively close

to clearing prices for a substantial number of hours during the year, the opportunity cost of withholding output from these units—the lost profit on withheld output from them—is relatively small. Without these units, Exelon will be left with few assets in PJM East and PJM Central/East that operate close to clearing prices for a substantial number of hours of the year. This will increase significantly the opportunity cost of withholding output and make it less likely to be profitable. Thus the divestiture will substantially limit the ability of the merged firm profitably to withhold output and thereby raise prices.

The divestiture will also reduce the merged firm's incentive to withhold output and raise prices.³ Certain of the divested assets—the coal-fired steam and combined cycle units—have operating costs that are below the market clearing price for a substantial portion of the year and which therefore are frequently in a position to benefit from an increase in the market clearing price. Divestiture of these units will reduce the potential gains to the merged firm of withholding output and thus reduce the incentive of the merged firm to withhold output in the first place.

Requirements regarding divestiture. Defendants must take all reasonable steps necessary to accomplish the divestiture quickly and shall cooperate with prospective purchasers. Defendants must also provide acquirers information relating to personnel that are or have been involved, at any time since January 1, 2006, in the operation of, or provision of generation services by, the Divestiture Assets. Defendants further must refrain from interfering with any negotiations by the acquirer or acquirers to employ any of the personnel that are or have been involved in the operation of any of the Divestiture Assets. Moreover, the proposed Final Judgment restricts Defendants from reacquiring any of the Divestiture Assets during the term of the proposed Final Judgment. Finally, the proposed Final Judgment requires that Defendants, with certain exceptions, obtain advance approval from the Department of Justice, for the entire duration of the Final Judgment, to acquire or enter into contracts to control any generating plants within the utility

² C.f. U.S. Department of Justice, Antitrust Division Policy Guide to Merger Remedies § II (October 2004), available at <http://www.usdoj.gov/atr/public/guidelines/205108.htm> ("Restoring competition requires replacing the competitive intensity lost as a result of the merger rather than focusing narrowly on returning to premerger HHI levels").

³ Post divestiture, Exelon will retain a significant amount of low-cost, baseload nuclear capacity. Although this capacity may provide Exelon with incentive to exercise market power by withholding output, the divestiture called for by the proposed Final Judgment substantially limits Exelon's ability to withhold output. Moreover, it is not likely that Exelon will withhold output from nuclear units given the large opportunity cost—the lost profit on withheld nuclear output—of withholding.

zones within PJM East or PJM Central/East.

B. Use of a Divestiture Trustee

In the event that Defendants do not accomplish the divestiture within the periods prescribed in the proposed Final Judgment, the proposed Final Judgment provides that the Court will appoint a trustee selected by the United States to effect the divestiture. If a trustee is appointed, the proposed Final Judgment provides that Defendants will pay all the costs and expenses of the trustee. The trustee's commission will be structured so as to provide an incentive for the trustee based on the price obtained and the speed with which the divestiture is accomplished. After his or her appointment becomes effective, the trustee will file monthly reports with the Court and the United States setting forth his or her efforts to accomplish the divestiture. At the end of sixty (60) days, if the divestiture has not been accomplished, the trustee and the United States will make recommendations to the Court, which shall enter such orders as appropriate to carry out the purpose of the trust, including extending the trust or the term of the trustee's appointment.

IV. Explanation of the Hold Separate Stipulation and Order

The Stipulation entered into by the United States and Defendants ensures that the Divestiture assets are preserved and maintained and that competition is maintained during the pendency of the ordered divestiture. First, the Stipulation includes terms requiring that Defendants maintain the Divestiture Assets as economically viable and competitive facilities. Second, the Stipulation includes terms ensuring that Defendants do not withhold output from the wholesale electricity market. In particular, the Stipulation requires that Defendants offer the output from certain generating units that they continue to own after consummation for sale into the PJM auctions at no more than specified price levels until the Divestiture Assets are sold. The Stipulation also calls for appointment of an auditor to ensure that Defendants offer their units at no more than the specified price levels and that they do not withhold the output of generating units to raise prices. These requirements seek to ensure that Defendants will not offer their units into the PJM auctions in a way that allows Defendants to raise the market clearing price.

Requiring Defendants to hold the Divestiture Assets separate and distinct, a typical requirement in Antitrust Division hold separate stipulation and

orders, would not have prevented competitive harm in the interim period from consummation to divestiture. The operator of the Divestiture Assets would have recognized that reducing their output would increase the clearing price and benefit Defendants' remaining generating units. Therefore, the Stipulation requires that Defendants maintain offers for output of the Divestiture Assets at the specified levels. Defendants are relieved of the requirement to offer their units at no more than specified levels if they transfer to a third party the rights to offer and receive the revenues from the sale of the complete output of the Divestiture Assets.

Remedies Available to Potential Private Litigants

Section 4 of the Clayton Act, 15 U.S.C. 15, provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages the person has suffered, as well as costs and reasonable attorneys' fees. Entry of the proposed Final Judgment will neither impair nor assist the bringing of any private antitrust damage action. Under the provisions of Section 5(a) of the Clayton Act, 15 U.S.C. 16(a), the proposed Final Judgment has no prima facie effect in any subsequent private lawsuit that may be brought against Defendants.

VI. Procedures Available for Modification of the Proposed Final Judgment

The United States and Defendants have stipulated that the proposed Final Judgment may be entered by the Court after compliance with the provisions of the APPA, provided that the United States has not withdrawn its consent. The APPA conditions entry upon the Court's determination that the proposed Final Judgment is in the public interest.

The APPA provides a period of at least sixty (60) days preceding the effective date of the proposed Final Judgment within which any person may submit to the United States written comments regarding the proposed Final Judgment. Any person who wishes to comment should do so within sixty (60) days of the date of publication of this Competitive Impact Statement in the **Federal Register**. All comments received during this period will be considered by the Department of Justice, which remains free to withdraw its consent to the proposed Final Judgment at any time prior to the Court's entry of judgment. The comments and the response of the United States will be

filed with the Court and published in the **Federal Register**.

Written comments should be submitted to: Donna N. Kooperstein, Chief, Transportation, Energy & Agriculture Section, Antitrust Division, United States Department of Justice, 325 Seventh Street, NW., Suite 500, Washington, DC 20530.

The proposed Final Judgment provides that the Court retains jurisdiction over this action, and the parties may apply to the Court for any order necessary or appropriate for the modification, interpretation, or enforcement of the Final Judgment.

VII. Alternatives to the Proposed Final Judgment

The United States considered, as an alternative to the proposed Final Judgment, a full trial on the merits against Defendants. The United States could have continued the litigation and sought preliminary and permanent injunctions against Exelon's acquisition of certain PSEG assets. The United States is satisfied, however, that the divestiture of assets described in the proposed Final Judgment will preserve competition in the market for wholesale electricity in PJM East and PJM Central/East.

VIII. Standard of Review Under the APPA for the Proposed Final Judgment

The APPA requires that proposed consent judgments in antitrust cases brought by the United States be subject to a sixty (60) day comment period, after which the Court shall determine whether entry of the proposed Final Judgment "is in the public interest." 15 U.S.C. 16(e)(1). In making that determination, the Court shall consider:

(A) The competitive impact of such judgment, including termination of alleged violations, provisions for enforcement and modification, duration of relief sought, anticipated effects of alternative remedies actually considered, whether its terms are ambiguous, and any other competitive considerations bearing upon the adequacy of such judgment that the court deems necessary to a determination of whether the consent judgment is in the public interest; and

(B) The impact of entry of such judgment upon competition in the relevant market or markets, upon the public generally and individuals alleging specific injury from the violations set forth in the complaint including consideration of the public benefit, if any, to be derived from a determination of the issues at trial.

15 U.S.C. 16(e)(1)(A) & (B).⁴ As the United States Court of Appeals for the

⁴In 2004, Congress amended the APPA to ensure that courts take into account the above-quoted list

District of Columbia Circuit has held, under the APPA a court considers, among other things, the relationship between the remedy secured and the specific allegations set forth in the government's complaint, whether the decree is sufficiently clear, whether enforcement mechanisms are sufficient, and whether the decree may positively harm third parties. See *United States v. Microsoft Corp.*, 56 F.3d 1448, 1458–62 (D.C. Cir. 1995).

With respect to the adequacy of the relief secured by the decree, a court may not “engage in an unrestricted evaluation of what relief would best serve the public.” *United States v. BNS, Inc.*, 858 F.2d 456, 462 (9th Cir. 1988) (citing *United States v. Bechtel Corp.*, 648 F.2d 660, 666 (9th Cir. 1981)); see also *Microsoft*, 56 F.3d at 1460–62. Courts have held that:

[t]he balancing of competing social and political interests affected by a proposed antitrust consent decree must be left, in the first instance, to the discretion of the Attorney General. The court's role in protecting the public interest is one of insuring that the government has not breached its duty to the public in consenting to the decree. The court is required to determine not whether a particular decree is the one that will best serve society, but whether the settlement is “within the reaches of the public interest.” More elaborate requirements might undermine the effectiveness of antitrust enforcement by consent decree.

Bechtel, 1648 F.2d at 666 (emphasis added) (citations omitted).⁵ In making its public interest determination, a district court must accord due respect to the government's prediction as to the effect of proposed remedies, its perception of the market structure, and its views of the nature of the case. *United States v. Archer-Daniels-Midland Co.*, 272 F.Supp.2d 1, 6 (D.D.C. 2003).

of relevant factors when making a public interest determination. Compare 15 U.S.C. 16(e) (2004) with 15 U.S.C. § 16(e)(1) (2006) (substituting “shall” for “may” in directing relevant factors for court to consider and amending list of factors to focus on competitive considerations and to address potentially ambiguous judgment terms). This amendment does not affect the substantial precedent in this and other Circuits analyzing the scope and standard of review for Tunney Act proceedings.

⁵ Cf. *BNS*, 858 F.2d at 464 (holding that the court's “ultimate authority under the [APPA] is limited to approving or disapproving the consent decree”); *United States v. Gillette Co.*, 406 F. Supp. 713, 716 (D. Mass. 1975) (noting that, in this way, the court is constrained to “look at the overall picture not hypercritically, nor with a microscope, but with an artist's reducing glass”); see generally *Microsoft*, 56 F.3d at 1461 (discussing whether “the remedies [obtained in the decree are] so inconsonant with the allegations charged as to fall outside of the ‘reaches of the public interest’”).

Court approval of a final judgment requires a standard more flexible and less strict than the standard required for a finding of liability. “[A] proposed decree must be approved even if it falls short of the remedy the court would impose on its own, as long as it falls within the range of acceptability or is ‘within the reaches of public interest.’” *United States v. Am. Tel. & Tel. Co.*, 552 F. Supp. 131, 151 (D.D.C. 1982) (citations omitted) (quoting *United States v. Gillette Co.*, 406 F. Supp. 713, 716 (D. Mass. 1975)), *aff'd sub nom. Maryland v. United States*, 460 U.S. 1001 (1983); see also *United States v. Alcan Aluminum Ltd.*, 605 F.Supp. 619, 622 (W.D. Ky. 1985) (approving the consent decree even though the court would have imposed a greater remedy).

Moreover, the Court's role under the APPA is limited to reviewing the remedy in relationship to the violations that the United States has alleged in its Complaint, and does not authorize the Court to “construct [its] own hypothetical case and then evaluate the decree against that case.” *Microsoft*, 56 F.3d at 1459. Because the “court's authority to review the decree depends entirely on the government's exercising its prosecutorial discretion by bringing a case in the first place,” it follows that “the court is only authorized to review the decree itself,” and not to “effectively redraft the complaint” to inquire into other matters that the United States did not pursue. *Id.* at 1459–60.

In its 2004 amendments to the Tunney Act, Congress made clear its intent to preserve the practical benefits of utilizing consent decrees in antitrust enforcement, adding the unambiguous instruction “[n]othing in this section shall be construed to require the court to conduct an evidentiary hearing or to require the court to permit anyone to intervene.” 15 U.S.C. 16(e)(2). This language codified the intent of the original 1974 statute, expressed by Senator Tunney in the legislative history: “[t]he court is nowhere compelled to go to trial or to engage in extended proceedings which might have the effect of vitiating the benefits of prompt and less costly settlement through the consent decree process.” 119 Cong. Rec. 24,598 (1973) (statement of Senator Tunney). Rather:

[a]bsent a showing of corrupt failure of the government to discharge its duty, the Court, in making its public interest finding, should * * * carefully consider the explanations of the government in the competitive impact statement and its responses to comments in order to determine whether those explanations a reasonable under the circumstances.

United States v. Mid-America Dairymen, Inc., 1977–1 Trade Cas. (CCH) ¶ 61,508, at 71,980 (W.D. Mo. 1977).

IX. Determinative Documents

There are no determinative materials or documents within the meaning of the APPA that were considered by the United States in formulating the proposed Final Judgment.

Dated: August 10, 2006.

Respectfully submitted,

Mark J. Niefer (DC Bar #470370),
Jade Alice Eaton (DC Bar #939629),
Tracy Lynn Fisher (MN Bar #315837).

Certificate of Service

I hereby certify that on August 10, 2006, I caused a copy of the foregoing Competitive Impact Statement to be served on counsel for Defendants in this matter in the manner set forth below:

By electronic mail and hand delivery:
Counsel for Defendant Exelon Corporation, John M. Nannes, Esq. (DC Bar #195966), Skadden, Arps, Slate, Meagher & Flom LLP and Affiliates, 1440 New York Ave., NW., Washington, DC 20005–2111. Tel: (202) 371–7090. Fax: (202) 661–9191.
Counsel for Defendant Public Service Enterprise Group, Inc., Douglas G. Green, Esq. (DC Bar #183343), Steptoe & Johnson, LLP, 1330 Connecticut Ave., NW., Washington, DC 20036–1795. Tel: (202) 429–6264. Fax: (202) 429–3902.

Mark J. Niefer (DC Bar #470370),
Department of Justice, Antitrust Division, 325
Seventh Street, NW., Suite 500,
Washington, DC 20530. Tel: (202) 307–
6318. Fax: (202) 307–2784.

BILLING CODE 4410–11–M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice.

SUMMARY: NARA is giving public notice that the agency proposes to request extension of an information collection currently in use. The information collection is NA Form 6045, Volunteer Service Application Form, used by individuals who wish to volunteer at the National Archives Building, the National Archives at College Park, regional records services facilities, and

Presidential Libraries. The public is invited to comment on the proposed information collection pursuant to the Paperwork Reduction Act of 1995.

DATES: Written comments must be received on or before October 23, 2006 to be assured of consideration.

ADDRESSES: Comments should be sent to: Paperwork Reduction Act Comments (NHP), Room 4400, National Archives and Records Administration, 8601 Adelphi Rd, College Park, MD 20740-6001; or faxed to 301-837-3213; or electronically mailed to tamee.fechhelm@nara.gov.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the proposed information collection and supporting statement should be directed to Tamee Fechhelm at telephone number 301-837-1694, or fax number 301-837-3213.

SUPPLEMENTARY INFORMATION: Pursuant to the Paperwork Reduction Act of 1995 (Public Law 104-13), NARA invites the general public and other Federal agencies to comment on proposed information collections. The comments and suggestions should address one or more of the following points: (a) Whether the proposed information collection is necessary for the proper performance of the functions of NARA; (b) the accuracy of NARA's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways, including the use of information technology, to minimize the burden of the collection of information on respondents; and (e) whether small businesses are affected by this collection. The comments that are submitted will be summarized and included in the NARA request for Office of Management and Budget (OMB) approval. All comments will become a matter of public record. In this notice, NARA is soliciting comments concerning the following information collection:

Title: Volunteer Service Application.
OMB number: 3095-0060.

Agency form number: NA Form 6045.

Type of review: Regular.

Affected public: Individuals or households.

Estimated number of respondents: 2,300.

Estimated time per response: 25 minutes.

Frequency of response: On occasion.

Estimated total annual burden hours: 958 hours.

Abstract: NARA uses volunteer resources to enhance its services to the public and to further its mission of

providing ready access to essential evidence. Volunteers assist in outreach and public programs and provide technical and research support for administrative, archival, library, and curatorial staff. NARA uses a standard way to recruit volunteers and assess the qualifications of potential volunteers. The NA Form 6045, Volunteer Service Application Form, is used by members of the public to signal their interest in being a NARA volunteer and to identify their qualifications for this work.

Dated: August 17, 2006.

Martha Morphy,

Assistant Archivist for Information Services.

BILLING CODE 7515-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-259]

Tennessee Valley Authority; Browns Ferry Nuclear Plant, Unit No. 1; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of the Tennessee Valley Authority (the licensee), to withdraw its application for proposed amendment to Facility Operating License No. 50-259 issued to the licensee for operation of the Browns Ferry Nuclear Plant, Unit No. 1, located in Limestone County, Alabama.

The proposed amendment would have revised the Technical Specifications to increase the emergency diesel generator allowed outage time.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on January 18, 2005 (70 FR 2898). However, by letter dated August 4, 2006, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated December 6, 2004, as supplemented October 28, 2005, and the licensee's letter dated August 4, 2006, which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the Internet

at the NRC Web site, <http://www.nrc.gov/reading-rm.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1-800-397-4209, or 301-415-4737 or by e-mail to pdr@nrc.gov.

Dated at Rockville, Maryland, this 17th day of August, 2006.

For the Nuclear Regulatory Commission.

Margaret H. Chernoff,

Project Manager, Plant Licensing Branch II-2, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. E6-13940 Filed 8-22-06; 8:45 am]

BILLING CODE 7590-01-P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Identification of Countries Under Section 182 of the Trade Act of 1974: Request for Public Comment

AGENCY: Office of the United States Trade Representative.

ACTION: Request for written submissions from the public.

SUMMARY: Section 182 of the Trade Act of 1974 (Trade Act) (19 U.S.C. 2242), requires the United States Trade Representative (USTR) to identify countries that deny adequate and effective protection of intellectual property rights or deny fair and equitable market access to U.S. persons who rely on intellectual property protection. Section 182 is commonly referred to as the "Special 301" provision of the Trade Act. In addition, USTR is required to determine which of those countries should be identified as Priority Foreign Countries. In its Special 301 Report issued on April 28, 2006, USTR announced the results of the 2006 Special 301 review and stated that Out-of-Cycle Reviews (OCRs) would be conducted for Indonesia, Canada, Chile, Latvia and Saudi Arabia. USTR requests written comments from the public concerning the acts, policies, and practices relevant for this review under Section 182 of the Trade Act.

DATES: Submissions for Indonesia and Chile must be received on or before 5 p.m. on Friday, September 15, 2006. Submissions for Canada, Latvia and Saudi Arabia must be received on or before 5 p.m. on Monday, October 2, 2006.

ADDRESSES: All comments should be addressed to Sybia Harrison, Special Assistant to the Section 301 Committee, and sent (i) Electronically, to the

following e-mail address:

FR0627@ustr.eop.gov, with "Special 301 Out-of-Cycle Review: Indonesia, Canada, Chile, Latvia and Saudi Arabia" in the subject line, or (ii) by fax, to (202) 395-9458, with a confirmation copy sent electronically to the e-mail address above.

FOR FURTHER INFORMATION CONTACT:

Rachel S. Bae, Director for Intellectual Property, Office of the United States Trade Representative, at (202) 395-4510.

SUPPLEMENTARY INFORMATION: Pursuant to Section 182 of the Trade Act, USTR must identify those countries that deny adequate and effective protection for intellectual property rights or deny fair and equitable market access to U.S. persons who rely on intellectual property protection. Those countries that have the most onerous or egregious acts, policies, or practices and whose acts, policies, or practices have the greatest adverse impact (actual or potential) on relevant U.S. products may be identified as Priority Foreign Countries. Acts, policies, or practices that are the basis of a country's designation as a Priority Foreign Country are normally the subject of an investigation under the Section 301 provisions of the Trade Act.

On April 28, 2006, USTR announced the results of the 2006 Special 301 review, including an announcement that Out-of-Cycle Reviews (OCRs) would be conducted for Indonesia, Canada, Chile, Latvia and Saudi Arabia. Additional countries may also be reviewed as a result of the comments received pursuant to this notice, or as warranted by events.

Requirements For Comments:

Comments should include a description of the problems experienced, and the effect of the acts, policies, and practices on U.S. industry. Comments should be as detailed as possible and should provide all necessary information for assessing the effect of the acts, policies, and practices. Any comments that include quantitative loss claims should be accompanied by the methodology used in calculating such estimated losses.

Comments must be in English. No submissions will be accepted via postal service mail. Documents should be submitted as either WordPerfect, MS Word, or text (.TXT) files. Supporting documentation submitted as spreadsheets is acceptable as Quattro Pro or Excel files. A submitter requesting that information contained in a comment be treated as confidential business information must certify that such information is business

confidential and would not customarily be released to the public by the submitter. A non-confidential version of the comment must also be provided. For any document containing business confidential information, the file name of the business confidential version should begin with the characters "BC-", and the file name of the public version should begin with the character "P-". The "P-" or "BC-" should be followed by the name of the submitter. Submissions should not include separate cover letters; information that might appear in a cover letter should be included in the submission itself. To the extent possible, any attachments to the submission should be included in the same file as the submission itself, and not as separate files.

All comments should be addressed to Sybia Harrison, Special Assistant to the Section 301 Committee, and sent (i) Electronically, to the following e-mail address: FR0627@ustr.eop.gov, with "Special 301 Out-of-Cycle Review: Indonesia, Canada, Chile, Latvia and Saudi Arabia" in the subject line, or (ii) by fax, to (202) 395-9458, with a confirmation copy sent electronically to the e-mail address above.

Public Inspection of Submissions: Within one business day of receipt, non-confidential submissions will be placed in a public file, open for inspection at the USTR reading room, Office of the United States Trade Representative, Annex Building, 1724 F Street, NW., Room 1, Washington, DC. An appointment to review the file must be scheduled at least 48 hours in advance and may be made by calling Jacqueline Caldwell at (202) 395-6186. The USTR reading room is open to the public from 10 a.m. to 12 noon and from 1 p.m. to 4 p.m., Monday through Friday.

Victoria Espinel,

Assistant USTR for Intellectual Property.

BILLING CODE 3190-W6-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-54327; File No. SR-Amex-2006-47]

Self-Regulatory Organizations; American Stock Exchange LLC; Order Approving Proposed Rule Change and Amendment No. 2 Thereto Relating to the Member Firm Guarantee for FLEX Equity Options

August 16, 2006.

On May 12, 2006, the American Stock Exchange LLC ("Amex" or "Exchange") filed with the Securities and Exchange

Commission ("Commission") a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² to amend Amex Rule 904G(e)(iii) to increase the member firm guarantee for FLEX equity options from 25% to 40%.³ The Amex filed Amendment No. 1 to the proposed rule change on June 5, 2006 and subsequently withdrew Amendment No. 1. The Amex filed Amendment No. 2 to the proposed rule change on June 12, 2006. The proposed rule change, as amended, was published for comment in the **Federal Register** on July 12, 2006.⁴ The Commission received no comments on the proposal. This order approves the proposed rule change.

After careful consideration, the Commission finds that the proposed rule change is consistent with the requirements of Section 6(b) of the Act⁵ and the rules and regulations thereunder applicable to a national securities exchange,⁶ and in particular with Section 6(b)(5) of the Act.⁷ The Commission notes that under the proposal the member firm guarantee for FLEX equity options could not exceed 40% of an order. The Commission has found with respect to participation guarantees in other contexts that a maximum guarantee of 40% is not inconsistent with statutory standards of competition and free and open markets.⁸

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,⁹ that the proposed rule change (SR-Amex-2006-47), as amended, is hereby approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.¹⁰

Nancy M. Morris,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-54328; File No. SR-BSE-2006-10]

Self-Regulatory Organizations; Boston Stock Exchange, Inc.; Notice of Filing and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 2 Thereto, To Establish a Fee Per Contract Traded for Improvement Orders Submitted Into a Price Improvement Period by a Public Customer That Are Not Submitted as Customer PIP Orders

August 16, 2006.

On March 6, 2006, the Boston Stock Exchange, Inc. ("BSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² a proposed rule change to amend the Fee Schedule of the Boston Options Exchange ("BOX") in the manner described below. The proposed rule change was published for comment in the **Federal Register** on May 15, 2006.³ The Commission received one comment letter concerning the proposal.⁴ On June 29, 2006, the Exchange filed Amendment No. 1 to the proposed rule change.⁵ On August 14, 2006, the Exchange filed Amendment No. 2 to the proposed rule change.⁶ This order publishes notice of and grants accelerated approval of the proposed rule change, as modified by Amendment No. 2, on an accelerated basis.

I. Description of the Proposal

Currently, there are two ways Public Customer Orders⁷ can be submitted into a Price Improvement Period ("PIP")

auction as an Improvement Order.⁸ The first method is the Customer PIP Order ("CPO"), which is an order provided by a Public Customer to her/his BOX Order Flow Provider ("OFP") that contains a standard limit order price in the standard minimum trading increment—the Book Reference Price⁹—and a limit order placed in a penny increment, the CPO PIP Reference Price.¹⁰ Through a CPO, a Public Customer may participate passively in a PIP auction (should one occur while her/his limit order is at the top of the BOX book) by virtue of the previously submitted instructions given to the OFP, *i.e.*, the CPO PIP Reference Price.

Alternatively, a Public Customer may submit an Improvement Order into a PIP auction through an OFP with any instructions that the OFP is willing to accept.¹¹ These non-CPO Improvement Orders do not have a Book Reference Price and are not exposed on the BOX Book; OFPs submit them on behalf of Public Customers in response to a PIP Broadcast¹² and PIP auction updates.

Originally, the Exchange proposed to amend the BOX Fee Schedule to establish a fee of \$.20 per contract traded for Improvement Orders submitted into a PIP by a Public Customer that are not submitted as CPOs.

In its letter, which was submitted in response to the original proposed rule change, Citadel urges the Commission to disapprove the proposed rule change because the proposed \$.20 per contract traded fee is inconsistent with three provisions of the Act. Citadel argues that the original proposed rule change was inconsistent with Section 6(b)(4) of the Act¹³ because it would effect an inequitable allocation of reasonable fees among members and persons using the BOX facilities. Specifically, Citadel stated that the proposed \$.20 per contract fee was inequitable because Public Customers would not be afforded a volume discount similar to the one offered to BOX Market Makers¹⁴ who,

according to Citadel, enjoy other benefits and privileges that are unavailable to Public Customers.

Citadel also argues that the proposed rule change is inconsistent with Section 6(b)(5) of the Act¹⁵ in that it would discriminate unfairly between Public Customers with access to sophisticated technology and trading techniques ("Options Professionals") and all other Public Customers ("Investors") by imposing a fee upon Options Professionals and not Investors.

Further, Citadel argues that the fee, as originally proposed, would be inconsistent with Section 6(b)(8) of the Act¹⁶ in that it would harm competition. Specifically, Citadel asserts that the proposed rule change would discourage Public Customers from sending non-CPO Improvement Orders to the BOX, which would result in fewer Improvement Orders competing to improve orders submitted to the PIP. Additionally, Citadel predicts that this diminished competition would make it easier for Market Makers to step ahead of Public Customer limit orders posted on the book, which would encourage BOX Participants to internalize more of their order flow, and thereby diminish price discovery and transparency and increase the costs of options investors.

In response to the Citadel Letter, the Exchange proposes to modify its proposal in Amendment No. 2. In Amendment No. 2, the Exchange proposes to reduce the trading fee applicable to each Improvement Order for a Public Customer not submitted as CPOs from \$.20 to \$.15. Further, the Exchange proposes to clarify that, under the proposed Fee Schedule as amended, no trading fee would be charged for Public Customer Improvement Orders submitted as CPOs or for Public Customer Orders traded on BOX including marketable orders, which interact with a PIP already underway.

II. Discussion

After careful consideration of the Citadel Letter and the proposed rule change, as amended in response to the Citadel Letter, the Commission finds that the proposal, as amended, is consistent with the requirements of Section 6(b) of the Act¹⁷ in general and Section 6(b)(4) of the Act¹⁸ in particular, in that it is designed to provide for the equitable allocation of

volume traded across all assigned classes. See Section 3.c. of the Fee Schedule.

¹⁸ 15 U.S.C. 78f(b)(4).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ See Securities Exchange Act Release No. 53774 (May 9, 2006), 71 FR 28058 ("Notice").

⁴ Letter to Nancy Morris, Secretary, Commission, from Adam C. Cooper, Senior Managing Director & General Counsel, Citadel Investment Group, LLC ("Citadel"), dated June 9, 2006 ("Citadel Letter").

⁵ In Amendment No. 1, which superseded and replaced the original filing, the Exchange modified its proposal by lowering the proposed BOX fee from \$.20 per contract traded to \$.15 per contract traded. The Exchange also clarified its reasons for imposing the new fee.

⁶ In Amendment No. 2, which supersedes and replaces Amendment No. 1 (and the original filing), the Exchange proposes to modify the proposed rule text and clarifies its reasons for imposing the new fee.

⁷ The term "Public Customer Order" is defined as "an order for the account of a Public Customer. See BOX Rules, Chapter I, Section 1(a)(51). "Public Customer" is defined as "a person that is not a broker or dealer in securities." See BOX Rules Chapter I, Section 1(a)(50).

⁸ The term "Improvement Orders" is defined in the BOX Rules Chapter V, Section 18(e)(i).

⁹ The term "Book Reference Price" is defined in BOX Rules Chapter V, Section 18(g)(i).

¹⁰ The term "CPO PIP Reference Price" is defined in BOX Rules Chapter V, Section 18(g)(i).

¹¹ See BOX Rules Chapter V, Section 18(e)(i).

¹² The PIP broadcast is disseminated once a PIP is initiated and is distributed solely to BOX Options Participants. The broadcasting of this message advises the Options Participants: (1) That a Primary Improvement Order, as that term is defined in the BOX Rules Chapter V, Section 18(e), has been processed; (2) of information concerning series, size, price and side of market; and (3) when the PIP will conclude ("PIP Broadcast").

¹³ 15 U.S.C. 78(b)(4).

¹⁴ BOX Market Makers may receive a volume discount of up to \$.05 per contract based upon total

reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities.

To justify this new trading fee on non-CPO Improvement Orders by Public Customers, the Exchange states that these types of orders, like the Improvement Orders of Market Makers and OFPs, are closely monitored for manipulative activity because they are submitted by sophisticated parties, with advanced technology, directly in response to PIP data updates. In contrast, the Exchange characterizes CPOs as more "passive" orders, because they contain preset PIP auction instructions, which pose less of a manipulation risk and therefore draw less regulatory scrutiny. The Exchange states, therefore, that CPOs are less costly to surveil than non-CPO Improvement Orders.

In addition, the Exchange states that the high volume of non-CPO Improvement Orders justifies the imposition of the proposed fee. The Exchange states that CPOs, as a result of their passive nature, generate fewer new Improvement Orders than non-CPO Improvement Orders, which are generated by sophisticated trading systems capable of generating many new Improvement Orders during a PIP. Increased Improvement Order traffic requires additional capacity on the BOX trading host, and investment in this additional capacity taxes the Exchange's resources. In light of the increased costs associated with non-CPO Improvement Orders,¹⁹ the proposed fee provides for an equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities.

As mentioned above, in Amendment No. 2, the Exchange proposes to decrease the amount of the proposed fee. Currently, Market Maker and broker-dealer accounts are charged \$0.20 per executed contract for Improvement Orders traded in a PIP. As Citadel points out, however, some Market Makers receive volume discounts of up to \$0.05 per contract. In response to the Citadel Letter, the Exchange modified its proposal to reduce the proposed trading fee applicable to non-CPO Improvement Orders for Public Customer accounts from \$.20 to \$.15 per executed contract.²⁰ As a result, under the amended proposal, the BOX will impose upon Public Customers participating in the PIP through the use of non-CPO

Improvement Orders the same transaction fee as a Market Maker receiving the highest volume discount.

The Commission also finds that the proposed rule change is consistent with Section 6(b)(5) of the Act.²¹ Section 6(b)(5) of the Act prohibits only "unfair discrimination," not discrimination *simpliciter*.²² On its face, the proposed fee discriminates between different means of participating in the PIP auction.²³ However, a CPO and non-CPO Improvement Order impact the BOX differently. A non-CPO Improvement Order, which interacts in the PIP on a dynamic basis, taxes the Exchange's systems capacity and regulatory personnel to a greater degree than do passive CPO participants. In addition, the Book Reference Price associated with a CPO adds liquidity to the displayed BOX Book, which provides value to the BOX because it attracts additional orders. A non-CPO Improvement Order does not provide such liquidity. The Commission believes these differences are a reasonable basis for the Exchange to charge different fees. Discrimination on the basis of the disparate costs to the Exchange of administering the PIP auction is not unfair, particularly given the benefit (*i.e.*, liquidity) provided to the Exchange by CPOs.

Finally, the Commission finds that the proposed rule change is consistent with Section 6(b)(8) of the Act,²⁴ which requires that the rules of the Exchange not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. A \$0.15 fee per executed contract, or \$0.0015 for each share underlying an option contract, will increase costs to Public Customers submitting non-CPO Improvement Orders by only a *de minimus* amount. Market Makers are charged comparable fees for participating in PIPs. Accordingly, the Commission does not believe this fee will discourage the submission of non-CPO Improvement Orders or impose a burden on competition.

The Commission finds good cause for approving Amendment No. 2 to the proposed rule change prior to the 30th day after the amendment is published for comment in the **Federal Register** pursuant to Section 19(b)(2) of the Act.²⁵ The proposed rule change, in its original form, was published for

comment²⁶ and, as mentioned above, the Commission received only one comment letter. Amendment No. 2 modifies the substance of the original proposal only by decreasing the amount of the proposed transaction fee from \$.20 per contract traded to \$.15 per executed contract.²⁷ This reduction to the proposed fee, which the Exchange offered in response to the Citadel Letter, does not raise any additional regulatory issues.

III. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning whether Amendment No. 2 to the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an e-mail to rule-comments@sec.gov. Please include File No. SR-BSE-2006-10 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-BSE-2006-10. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commissions Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be

²⁶ See Notice, *supra* at note 3.

²⁷ In Amendment No. 2, the Exchange also revised the proposed rule text to make explicit that "[t]here are no trading fees for any other Public Customer Orders which may be executed including CPOs and Public Customer orders on the Book." This new language is consistent with the Exchange's description of the proposed rule change in the original filing: "All other Public Customer Orders traded on BOX, including marketable orders, which interact with a PIP already underway, will continue to be free."

²¹ 15 U.S.C. 78s(b)(5).

²² See *Timpinaro v. SEC*, 2 F.3d 453, 456 (DC Cir. 1993).

²³ The proposed fee would not apply to CPOs submitted by sophisticated Public Customers.

²⁴ 15 U.S.C. 78s(b)(8).

²⁵ 15 U.S.C. 78s(b)(2).

¹⁹ As discussed below, broker-dealers and Market Makers pay comparable trading fees. See Sections 2 and 3 of the Fee Schedule.

²⁰ See Amendment No. 2.

available for inspection and copying in the Commission's Public Reference Room. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-BSE-2006-10 and should be submitted on or before September 13, 2006.

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,²⁸ that the proposed rule change (SR-BSE-2006-10), as amended, is hereby approved on an accelerated basis.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.²⁹

Nancy M. Morris,
Secretary.

BILLING CODE 8010-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-54323; File No. SR-CHX-2006-27]

Self-Regulatory Organization; Chicago Stock Exchange, Inc.; Notice of Filing of Proposed Rule Change Relating to Retroactive Application of Participant Fees and Credits

August 16, 2006.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that on August 10, 2006, the Chicago Stock Exchange, Inc. ("CHX" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the CHX. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CHX proposes to make effective, retroactive to February 9, 2005, the trading permit fee due to the Exchange

if a CHX participant's trading permit is cancelled intra-year.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CHX included statements concerning the purpose of, and basis for, the proposed rule changes and discussed any comments it received regarding the proposal. The text of these statements may be examined at the places specified in Item IV below. The CHX has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Changes

1. Purpose

The Exchange proposes to make effective, retroactive to February 9, 2005, a change to the Fee Schedule relating to the trading permit fee due to the Exchange if a CHX participant's trading permit is cancelled intra-year. This change to the Fee Schedule originally became effective on October 24, 2005,³ and provided that for trading permits cancelled intra-year, the CHX participant shall pay the Exchange the lesser of \$2,000 or the remaining balance of the annual trading permit fee. The Exchange believed that it was appropriate to amend the Fee Schedule to provide for some fee relief for CHX participants whose trading permits are cancelled intra-year. However, the Exchange also believed that it was necessary for the Exchange to have an adequate basis on which to budget and project annual revenues. Accordingly, the Exchange instituted the Fee Schedule change that it now seeks to make retroactive.

The Exchange believed that it had requested retroactive application of the Fee Schedule change at the same time that the change was originally filed with the Commission.⁴ It now appears that retroactive application was not requested at that juncture. The Exchange has, however, been reserving funds to be refunded to CHX participants once retroactive application of the Fee Schedule change is approved. The Exchange believes that its participants are entitled to such refunds on account of intra-year trading permit termination. Accordingly, the Exchange

proposes retroactive application of the Fee Schedule change, dating back to February 9, 2005.⁵

2. Statutory Basis

The CHX believes the proposal is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange and with the requirements of Section 6(b) of the Act.⁶ The CHX believes the proposal is consistent with Section 6(b)(4) of the Act⁷ in particular in that it provides for an equitable allocation of reasonable fees and other charges among the Exchange's participants.

B. Self-Regulatory Organization's Statement of Burden on Competition

The Exchange does not believe that the proposed rule changes will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments Regarding the Proposed Rule Changes Received From Members, Participants or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposal is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or

⁵ February 9, 2005 was the date of the Exchange's demutualization, and, correspondingly, the date upon which the Fee Schedule provision relating to trading permit fees first became effective.

BILLING CODE 8010-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-54321; File No. SR-ISE-2006-46]

Self-Regulatory Organizations; International Securities Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Cancellation Fee Changes

August 15, 2006.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on August 1, 2006, the International Securities Exchange, Inc. ("ISE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change concerning the Exchange's cancellation fee as described in Items I, II, and III below, which Items have been prepared by the ISE. The ISE has filed the proposed rule change as one establishing or changing a due, fee, or other charge imposed by the ISE under Section 19(b)(3)(A)(ii) of the Act³ and Rule 19b-4(f)(2) thereunder,⁴ which renders the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The ISE proposes to amend its Schedule of Fees regarding its cancellation fee. The text of the proposed rule change is available on the Exchange's Internet Web site (http://www.iseoptions.com/legal/proposed_rule_changes.asp), at the principal office of the ISE, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the ISE included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The ISE has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this proposed rule change is to amend the ISE's cancellation fee. The Exchange recently amended its cancellation fee such that the fee is charged to a clearing Electronic Access Member based on the cancellation activity of each of its customers (including itself when it self-clears).⁵ Additionally, for purposes of calculating the number of trades, the Exchange now considers all orders executed by the same firm in the same series on the same side of the market at the same price within 30 seconds as only one execution.⁶ Despite the adoption of the May Filing, the level of activity in the cancellation of orders remains quite large. The fee currently charged by the Exchange to discourage this activity is insufficient to offset the cost of administering and processing the large number of cancellations on a monthly basis. The Exchange, therefore, proposes to increase its cancellation fee from \$1.00 to \$1.25. According to the Exchange, this fee increase will enable the ISE to recoup some of the costs of administering and processing cancelled orders.

2. Statutory Basis

The basis for the proposed rule change is the requirement under Section 6(b)(4) of the Act⁷ that an exchange have an equitable allocation of reasonable dues, fees, and other charges among its members and other persons using its facilities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

⁵ See Securities Exchange Act Release No. 52177 (July 29, 2005), 70 FR 45457 (August 5, 2005).

⁸ 17 CFR 200.30-3(a)(12).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change, as amended, establishes or changes a due, fee, or other charged imposed by the Exchange, it has become effective pursuant to Section 19(b)(3)(A) of the Act⁸ and Rule 19b-4(f)(2)⁹ thereunder. At any time within 60 days of the filing of the proposed rule change the Commission may summarily abrogate such proposed rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an e-mail to rule-comments@sec.gov. Please include File No. SR-ISE-2006-46 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, Station Place, 100 F Street, NE, Washington, DC 20549-1090.
- All submissions should refer to File No. SR-ISE-2006-46. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference

Room. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR-ISE-2006-46 and should be submitted on or before September 13, 2006.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.¹⁰

Nancy M. Morris,

Secretary.

BILLING CODE 8010-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-54325; No. SR-SCCP-2006-01]

Self-Regulatory Organizations; Stock Clearing Corporation of Philadelphia; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Value Fees for RIO Accounts and To Remove Reference to Electronic Communications Networks From Its Fee Schedule

August 16, 2006.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ notice is hereby given that on July 26, 2006, the Stock Clearing Corporation of Philadelphia ("SCCP") filed with the Securities and Exchange Commission ("Commission") the proposed rule change described in Items I, II, and III below, which items have been prepared primarily by SCCP. SCCP filed the proposed rule change pursuant to Section 19(b)(3)(A)(ii) of the Act² and Rule 19b-4(f)(2)³ thereunder so that the proposal was effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The purpose of the rule change is to amend the current "Value Fees-Regional Interface Organization ("RIO")

Accounts"⁴ from of \$0.05 per \$1,000 of contract value to \$0.0012 per share.⁵ SCCP also proposes to update its fee schedule by removing references to Electronic Communications Networks ("ECNs").

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, SCCP included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. SCCP has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.⁶

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

First, SCCP believes changing the calculation of Value Fees for RIO Accounts from a value-based system to a share-based system should make it easier for a participant organization or a participant to calculate current costs and to estimate future costs associated with these transactions.

Second, SCCP is removing reference to ECNs throughout its fee schedule in order to update its fees to more accurately reflect the fees it is currently imposing. Pursuant to previous rule filings, SCCP waived certain fees and charges for SCCP participants for trades executed on the Philadelphia Stock Exchange, Inc. for ECNs. Because SCCP did not renew its pilot program of waiving these fees, the waivers are no longer in effect.⁷

SCCP believes the proposed rule change is consistent with Section 17A of the Act,⁸ as amended, because it clarifies and updates SCCP's fee schedule. As such, it provides for the equitable allocation of fees among its participants and aligns fees for services with the associated cost to deliver the service.

⁴ See SCCP Rules 1 and 10.

⁵ The text of the proposed rule change is available at http://www.phlx.com/sccp/sccp_rules/sr-sccp-2006-01.pdf.

⁶ The Commission has modified the text of the summaries prepared by SCCP.

⁷ Securities Exchange Act Release No. 51153 (February 8, 2005), 70 FR 7786 (February 15, 2005) (SR-SCCP-2005-01). The Commission's temporary approval of SCCP's waiving certain fees associated with ECN trades expired on January 23, 2006.

⁸ 15 U.S.C. 78q-1.

⁸ 15 U.S.C. 78s(b)(3)(A).

⁹ 17 CFR 19b-4(f)(2).

¹⁰ 17 CFR 200.30-3(a)(12).

¹¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78s(b)(3)(A)(ii).

³ 17 CFR 240.19b-4(f)(2).

(B) Self-Regulatory Organization's Statement on Burden on Competition

SCCP does not believe that the proposed rule change would impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Written comments were not and are not intended to be solicited with respect to the proposed rule change, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing proposed rule change has become effective upon filing pursuant to Section 19(b)(3)(A)(ii) of the Act⁹ and Rule 19b-4(f)(2)¹⁰ thereunder because the rule establishes a due, fee, or other charge. At any time within sixty days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>) or
- Send an e-mail to rule-comments@sec.gov. Please include File Number SR-SCCP-2006-01 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-SCCP-2006-01. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will

post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 100 F Street, NE., Washington, DC 20549. Copies of such filings also will be available for inspection and copying at the principal office of SCCP and on SCCP's Web site at http://www.phlx.com/SCCP/memindex_sccpproposals.html. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-SCCP-2006-01 and should be submitted on or before September 13, 2006.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.¹¹

Nancy M. Morris,
Secretary.

BILLING CODE 8010-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-54326; File No. SR-CHX-2006-24]

Self-Regulatory Organizations; Chicago Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change, and Amendment Nos. 1 and 2 Thereto, Regarding Two-Sided Quote Providers

August 16, 2006.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on June 27, 2006, the Chicago Stock Exchange, Inc. ("CHX" or the "Exchange") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I and II below, which Items have

been prepared by the Exchange. On July 21, 2006, the Exchange filed Amendment No. 1 to the proposed rule change.³ On August 10, 2006, the Exchange filed Amendment No. 2 to the proposed rule change.⁴ The CHX filed the proposal as a "non-controversial" proposed rule change pursuant to Section 19(b)(3)(A) of the Act⁵ and Rule 19b-4(f)(6) thereunder,⁶ which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its rules and Schedule of Participant Fees and Credits ("Fee Schedule") to establish a new role and a new fee credit for participants on the Exchange that qualify as "Two-Sided Quote Providers." The text of the proposed rule change is set forth below. Proposed new language is *italicized*.

ARTICLE IX

Trading Rules

* * * * *

Two-Sided Quote Providers

RULE 19. a. A Participant may seek to register with the Exchange as a Two-Sided Quote Provider. A "Two-Sided Quote Provider" is required to use its own automated systems to maintain, throughout the Exchange's primary and post-primary trading sessions, a continuous two-sided quote (i.e., a bid and an offer) in all securities that are not traded by an Exchange specialist, but are traded in an automated Exchange system.

b. The Exchange will provide a credit, as described in the Fee Schedule, to the first three Participants that demonstrate their ability and willingness to serve in this role.

c. If a Two-Sided Quote Provider does not provide a continuous two-sided quote as required above, the Exchange shall not pay the Two-Sided Quote Provider for the day in which the quotes were not maintained and shall end the Participant's role as a Two-Sided Quote Provider as of the end of the month in

³ In Amendment No. 1 the CHX removed language from its Fee Schedule to reflect that the proposal was effective upon filing, not an earlier date.

⁴ In Amendment No. 2 the CHX made two non-substantive corrections to the numbering used in the proposed rule text.

M. Credits

1.–3. No change to text.

4. *Through October 31, 2006, total monthly fees owed by a Two-Sided Quote Provider will be reduced (and these participants will be paid each month for any unused credits) by a credit of \$3,000 per month.*

* * * * *

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CHX included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received regarding the proposal. The text of these statements may be examined at the places specified in Item IV below. The CHX has prepared summaries, set forth in Sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Changes

1. Purpose

The purpose of the proposed rule change is to allow participant firms to register as "Two-Sided Quote Providers" and to provide a credit of \$3,000 per month for firms that fulfill that role.⁷ The credit would be available through October 31, 2006.

Under the proposed rule, a Two-Sided Quote Provider would be an Exchange participant that uses its own automated systems to maintain, throughout the Exchange's primary and post-primary trading sessions, a continuous two-sided quote (*i.e.*, a bid and an offer) in all securities that are not traded by an Exchange specialist, but are traded in an automated Exchange system.⁸ If the

Two-Sided Quote Provider does not provide a continuous two-sided quote as required above, the Exchange would not pay the Two-Sided Quote Provider for the day in which the quotes were not maintained and would end the participant's role as a Two-Sided Quote Provider as of the end of the month in which the failure occurred.⁹ A Two-Sided Quote Provider would continue to be subject to all the CHX rules that apply to its trading on the Exchange, including, but not limited to the firm quote rule, the electronic book's clearly erroneous rule, the rules prohibiting trading ahead of customer orders and the Intermarket Trading System ("ITS") rules.¹⁰

According to the Exchange, its proposal is designed to provide an appropriate incentive to up to three participant firms to ensure that a two-sided quote is continuously displayed on the Exchange in securities that are traded on the Exchange.¹¹

2. Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b) of the Act.¹² In particular, the Exchange believes that the proposal is consistent with Section 6(b)(5) of the Act,¹³ because it would promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public

some listed securities have not yet been transitioned to trading in the electronic book), because the Exchange does not seek to impose any requirement that these firms maintain fair and orderly markets.

⁹ The Exchange also would consider a failure to provide these quotes as a violation of the Exchange's rules. The Exchange could exercise its discretion in determining whether or not to pursue a further fine or penalty from a participant for a violation of this rule based on applicable facts and circumstances.

¹⁰ Registration as a Two-Sided Quote Provider does not allow a participant to avoid the application of any CHX trading rule that would otherwise apply to its activities as a CHX floor broker, market maker, specialist or order-sending firm.

¹¹ Under the current Intermarket Trading System Plan ("ITS Plan"), a member in any market that is an ITS Plan participant may use the ITS System to trade a particular security only if the market maintains continuous two-sided quotations in that security. See ITS Plan, Section 6(a)(i). This proposed credit would help ensure, among other things, that a continuous two-sided quote is displayed on the Exchange in all securities that qualify for trading under the ITS Plan.

¹² 15 U.S.C. 78f(b).

¹³ 15 U.S.C. 78f(b)(5).

interest by permitting the Exchange to allow its participants to register as Two-Sided Quote Providers to help ensure, among other things, that a continuous two-sided quote is displayed on the Exchange in all securities that qualify for trading under the ITS Plan.

B. Self-Regulatory Organization's Statement of Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments Regarding the Proposed Rule Changes Received From Members, Participants or Others

The CHX has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Changes and Timing for Commission Action

Because the foregoing proposed rule change: (1) Does not significantly affect the protection of investors or the public interest; (2) does not impose any significant burden on competition; and (3) by its terms does not become operative for 30-days after the date on which it was filed, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁴ and Rule 19b-4(f)(6) thereunder.¹⁵

As required under Rule 19b-4(f)(6)(iii), the CHX provided the Commission with written notice of its intention to file the proposed rule change at least 5 business days prior to filing the proposal with the Commission. A proposed rule change filed under Rule 19b-4(f)(6)¹⁶ normally does not become operative prior to 30-days after the date of filing. However, Rule 19b-4(f)(6)(iii) permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The CHX has asked the Commission to waive the 30-day operative delay.

The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest, because it may ensure that a continuous two-sided quote is displayed on the

¹⁴ 15 U.S.C. 78s(b)(3)(A).

¹⁵ 17 CFR 240.19b-4(f)(6).

¹⁶ *Id.*

⁷ The Exchange originally filed this proposal simply as an addition to its Fee Schedule. See SR-CHX-2006-15. The Exchange withdrew that filing concurrently with the submission of the original version of this proposal, which would establish a new rule and a change to the Exchange's Fee Schedule.

⁸ The Exchange plans to provide the \$3,000 credit, on a first-come, first-served basis, to the first three participants that demonstrate their ability and willingness to serve in this role. The Exchange does not believe that these firms would need to register as market makers in the Exchange's electronic book (where many securities that are not traded by a specialist are traded) or on the Exchange (where

Exchange in securities that are traded on the Exchange.¹⁷ Furthermore, the Commission notes that the proposed rule change, as amended, is similar to Pacific Exchange Rule 7.58, Compliance with Two-Sided Quote Requirement in ITS Plan, which provides that the Archipelago Securities, LLC is responsible for entering two-sided orders in all stocks eligible for trading on the NYSE Arca Marketplace for purposes of fulfilling the two-sided quote requirement found in Section 6(a)(i)(B) of the ITS Plan. Accordingly, the Commission designates the proposed rule change, as amended, as effective and operative immediately upon filing with the Commission.

At any time within 60-days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.¹⁸

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposal, as amended, is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an e-mail to rule-comments@sec.gov. Please include File No. SR-CHX-2006-24 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549-1090.

All submissions should refer to File No. SR-CHX-2006-24. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use

only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the CHX. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR-CHX-2006-24 and should be submitted on or before September 13, 2006.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.¹⁹

Office of the Secretary

[Order 2006-7-3; Docket OST-2006-25307]

Notice of Order Extending Comment Period for Show-Cause; International Air Transport Association Tariff Conference Proceeding

AGENCY: Office of the Secretary, Department of Transportation.

SUMMARY: The Department has directed all interested persons to show cause why it should not issue an order withdrawing its approval under 49 U.S.C. 41309 for an International Air Transport Association ("IATA") agreement, the Provisions for the Conduct of the IATA Traffic Conferences, insofar as that agreement establishes tariff conferences whereby IATA's member carriers discuss and agree upon passenger fares and cargo rates for U.S.-Australia/Europe markets. The Department is extending the due date for comments on that order from

August 21 to October 20, 2006. Replies will be due November 20, 2006.

DATES: Objections must be submitted on or before October 20. Answers to objections must be filed by November 20, 2006.

ADDRESSES: Objections and answers to objections must be filed in Docket number OST-2006-25307 by one of the following means:

(1) By mail to the Docket Management Facility, U.S. Department of Transportation, room PL-401, 400 Seventh Street SW., Washington, DC 20590-0001.

(2) By hand delivery to room PL-401 on the Plaza level of the Nassif Building, 400 Seventh Street SW., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202-366-9329.

(3) Electronically through the Webs site for the Docket Management System at <http://www.dms.dot.gov>. Comments must be filed in Docket OST-2006-25307.

FOR FURTHER INFORMATION CONTACT: John Kiser, Pricing & Multilateral Affairs Division (X-43, Room 6424), U.S. Department of Transportation, 400 Seventh St. SW., Washington, DC 20590, (202) 366-2435; or Thomas Ray, Office of the General Counsel (C-30, Room 4102), U.S. Department of Transportation, 400 Seventh St. SW., Washington, DC 20590, (202) 366-4731.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket Number 2006 25655]

Requested Administrative Waiver of the Coastwise Trade Laws

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Invitation for public comments on a requested administrative waiver of the Coastwise Trade Laws for the vessel OCEAN BELLE.

SUMMARY: As authorized by Pub. L. 105–383 and Pub. L. 107–295, the Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below. The complete application is given in DOT docket 2006–25655 at <http://dms.dot.gov>. Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with Pub. L. 105–383 and MARAD's regulations at 46 CFR Part 388 (68 FR 23084; April 30, 2003), that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the

commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR Part 388.

DATES: Submit comments on or before September 22, 2006.

ADDRESSES: Comments should refer to docket number MARAD–2006 25655. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. DOT Dockets, Room PL–401, Department of Transportation, 400 7th St., SW., Washington, DC 20590–0001. You may also send comments electronically via the Internet at <http://dmses.dot.gov/submit/>. All comments will become part of this docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except Federal holidays. An electronic version of this document and all documents entered into this docket is available on the World Wide Web at <http://dms.dot.gov>.

SUMMARY: As authorized by Pub. L. 105–383 and Pub. L. 107–295, the Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request

for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below. The complete application is given in DOT docket 2006–25656 at <http://dms.dot.gov>. Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with Pub. L. 105–383 and MARAD's regulations at 46 CFR part 388 (68 FR 23084; April 30, 2003), that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.

DATES: Submit comments on or before September 22, 2006.

ADDRESSES: Comments should refer to docket number MARAD–2006 25656. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. DOT Dockets, Room PL–401, Department of Transportation, 400 7th St., SW., Washington, DC 20590–0001. You may also send comments electronically via the Internet at <http://dmses.dot.gov/submit/>. All comments will become part of this docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except Federal holidays. An electronic version of this document and all documents entered into this docket is available on the World Wide Web at <http://dms.dot.gov>.

FOR FURTHER INFORMATION CONTACT:

Joann Spittle, U.S. Department of Transportation, Maritime Administration, MAR–830 Room 7201, 400 Seventh Street, SW., Washington, DC 20590. Telephone 202–366–5979.

SUPPLEMENTARY INFORMATION: As described by the applicant the intended service of the vessel TUBBY is:

Intended Use: “chartered touring cruises.”

Geographic Region: Long Island, New York and the State of Florida.

Dated: August 16, 2006.

By order of the Maritime Administrator.

Joel C. Richard,

Secretary, Maritime Administration.

BILLING CODE 4910–81–P

DEPARTMENT OF THE TREASURY**Comptroller of the Currency****Agency Information Collection
Activities: Submission for OMB
Review; Comment Request**

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995. An agency may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid OMB control number. The OCC is soliciting comment concerning its information collection titled, "Bank Activities and Operations—12 CFR 7." The OCC also gives notice that it has sent the information collection to the Office of Management and Budget (OMB) for review.

DATES: You should submit written comments by September 22, 2006.

ADDRESSES: Communications Division, Office of the Comptroller of the Currency, Public Information Room, Mailstop 1–5, Attention: 1557–0204, 250 E Street, SW., Washington, DC 20219. In addition, comments may be sent by fax to (202) 874–4448, or by electronic mail to regs.comments@occ.treas.gov. You can inspect and photocopy the comments at the OCC's Public Information Room, 250 E Street, SW., Washington, DC 20219. You can make an appointment to inspect the comments by calling (202) 874–5043. Additionally, you should send a copy of your comments to OCC Desk Officer, 1557–0204, by mail to U.S. Office of Management and Budget, 725 17th Street, NW., #10235, Washington, DC 20503, or by fax to (202) 395–6974.

FOR FURTHER INFORMATION CONTACT: You can request additional information or a copy of the collection from Mary Gottlieb, OCC Clearance Officer, or Camille Dickerson, (202) 874–5090, Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 250 E Street, SW., Washington, DC 20219.

SUPPLEMENTARY INFORMATION: The OCC is proposing to extend OMB approval of the following information collection:

Title: Bank Activities and Operations—12 CFR 7.
OMB Number: 1557–0204.

Description: This submission covers an existing regulation and involves no change to the regulation or to the information collection requirements. The OCC requests only that OMB approve its revised estimates.

The information collection requirements ensure that national banks conduct their operations in a safe and sound manner and in accordance with applicable Federal banking statutes and regulations. The information is necessary for regulatory and examination purposes.

The information collection requirements in part 7 are as follows: 12 CFR 7.1000(d)(1) (National bank ownership of property—Lease financing of public facilities): National bank lease agreements must provide that the lessee will become the owner of the building or facility upon the expiration of the lease. 12 CFR 7.1014 (Sale of money orders at nonbanking outlets): A national bank may designate bonded agents to sell the bank's money orders at nonbanking outlets. The responsibility of both the bank and its agent should be defined in a written agreement setting forth the duties of both parties and providing for remuneration of the agent.

12 CFR 7.2000(b) (*Corporate governance procedures—Other sources of guidance*): A national bank shall designate in its bylaws the body of law selected for its corporate governance procedures.

12 CFR 7.2004 (*Honorary directors or advisory boards*): Any listing of a national bank's honorary or advisory directors must distinguish between them and the bank's board of directors or indicate their advisory status.

12 CFR 7.2014(b) (*Indemnification of institution-affiliated parties—Administrative proceeding or civil actions not initiated by a Federal agency*): A national bank shall designate in its bylaws the body of law selected for making indemnification payments.

12 CFR 7.2024(a) (*Staggered terms for national bank directors*): Any national bank may adopt bylaws that provide for the staggering the terms of its directors. National banks shall provide the OCC with copies of any bylaws so amended.

12 CFR 7.2024(c) (*Size of bank board*): A national bank seeking to increase the number of its directors must notify the OCC any time the proposed size would exceed 25 directors.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profit.

Estimated Number of Respondents: 1,300.

Estimated Total Annual Responses: 1,300.

Estimated Total Annual Burden: 418 hours.

Frequency of Response: On occasion.

The OCC issued a 60-day notice for comment on June 16, 2006. 71 FR 35001. No comments were received. Comments continued to be invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;

(b) The accuracy of the agency's estimate of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: August 16, 2006.

Stuart Feldstein,

Assistant Director, Legislative and Regulatory Activities Division.

[FR Doc. E6–13922 Filed 8–22–06; 8:45 am]

BILLING CODE 4810–33–P

DEPARTMENT OF THE TREASURY**Comptroller of the Currency****Agency Information Collection
Activities: Submission for OMB
Review; Comment Request**

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995. An agency may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid OMB control number. The OCC is soliciting comment concerning its information collection titled, "Investment Securities (12 CFR part 1)." The OCC also gives notice that it has sent the information collection to the Office of Management and Budget (OMB) for review.

DATES: You should submit written comments by September 22, 2006.

ADDRESSES: You should direct your comments to: Communications Division, Office of the Comptroller of the Currency, Public Information Room, Mailstop 1-5, Attention: 1557-0205, 250 E Street, SW., Washington, DC 20219. In addition, comments may be sent by fax to (202) 874-4448, or by electronic mail to regs.comments@occ.treas.gov. You can inspect and photocopy the comments at the OCC's Public Information Room, 250 E Street, SW., Washington, DC 20219. You can make an appointment to inspect the comments by calling (202) 874-5043.

Additionally, you should send a copy of your comments to OCC Desk Officer, 1557-0205, by mail to U.S. Office of Management and Budget, 725 17th Street, NW., #10235, Washington, DC 20503, or by fax to (202) 395-6974.

FOR FURTHER INFORMATION CONTACT: You can request additional information or a copy of the collection from Mary Gottlieb, OCC Clearance Officer, or Camille Dickerson, (202) 874-5090, Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 250 E Street, SW., Washington, DC 20219.

SUPPLEMENTARY INFORMATION: The OCC is proposing to extend OMB approval, without change, of the following information collection:

Title: Investment Securities (12 CFR part 1).

OMB Number: 1557-0205.

Description: This submission covers an existing regulation and involves no

change to the regulation or to the information collection requirements. The OCC requests only that OMB extend its approval of the information collection. The information collection requirements in 12 CFR part 1 are as follows: Under 12 CFR 1.4(h)(2), a national bank may request an OCC determination that it may invest in an entity that is exempt from registration under section 3(c)(1) of the Investment Company Act of 1940 if the portfolio of the entity consists exclusively of assets that a national bank may purchase and sell for its own account. The OCC uses the information contained in the request as a basis for determining that the bank's investment is consistent with its investment authority under applicable law and does not pose unacceptable risk.

Under 12 CFR 1.7(b), a national bank may request OCC approval to extend the five-year holding period of securities held in satisfaction of debts previously contracted (DPC) for up to an additional five years. The bank must provide a clearly convincing demonstration of why any additional holding period is needed. The OCC uses the information in the request to ensure, on a case-by-case basis, that the bank's purpose in retaining the securities is not speculative and that the bank's reasons for requesting the extension are adequate, and to evaluate the risks to the bank of extending the holding period, including potential effects on bank safety and soundness.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profit.

Estimated Number of Respondents: 25.

Estimated Total Annual Responses: 25.

Estimated Total Annual Burden: 460 hours.

Frequency of Response: On occasion.

The OCC issued a 60-day notice for comment on May 24, 2006. 71 FR 30021. No comments were received. Comments continued to be invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;

(b) The accuracy of the agency's estimate of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

Part II

Department of Health and Human Services

Centers for Medicare & Medicaid Services

**42 CFR Parts 410, 414, et al. Medicare:
Hospital Outpatient Prospective Payment
System and CY 2007 Payment Rates;
Proposed Rule**

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

42 CFR Parts 410, 414, 416, 419, 421, 485, and 488

[CMS-1506-P; CMS-4125-P]

RIN 0938-AO15

Medicare Program; Hospital Outpatient Prospective Payment System and CY 2007 Payment Rates; CY 2007 Update to the Ambulatory Surgical Center Covered Procedures List; Ambulatory Surgical Center Payment System and CY 2008 Payment Rates; Medicare Administrative Contractors; and Reporting Hospital Quality Data for FY 2008 Inpatient Prospective Payment System Annual Payment Update Program—HCAHPS® Survey, SCIP, and Mortality

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise the Medicare hospital outpatient prospective payment system to implement applicable statutory requirements and changes arising from our continuing experience with this system, and to implement certain related provisions of the Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003, and the Deficit Reduction Act (DRA) of 2005. The proposed rule describes proposed changes to the amounts and factors used to determine the payment rates for Medicare hospital outpatient services paid under the prospective payment system. These changes would be applicable to services furnished on or after January 1, 2007.

In addition, this proposed rule would revise the current list of procedures that are approved when furnished in a Medicare-approved ambulatory surgical center (ASC), which would be applicable to services furnished on or after January 1, 2007. Further, this proposed rule would revise the ASC facility payment system to implement provisions of the MMA and other applicable statutory requirements, and update the ASC payment rates. Changes to the ASC facility payment system and the payment rates would be applicable to services furnished on or after January 1, 2008.

This proposed rule would revise the emergency medical screening requirements for critical access hospitals (CAHs).

In addition, this proposed rule would support implementation of a restructuring of the contracting entities responsibilities and functions that support the adjudication of Medicare fee-for-service (FFS) claims. This restructuring is directed by section 1874A of the Act, as added by section 911 of the MMA. The prior separate Medicare intermediary and Medicare carrier contracting authorities under Title XVIII of the Act have been replaced with the Medicare Administrative Contractor (MAC) authority.

This proposed rule would also continue to implement the requirements of the DRA that require that we expand the “starter set” of 10 quality measures that we used in FY 2005 and FY 2006 for the hospital Inpatient Prospective Payment System (IPPS) Reporting Hospital Quality Data for the Annual Payment Update (RHQDAPU) program. We began to adopt expanded measures effective for payments beginning in FY 2007. We are proposing to add additional quality measures to the expanded set of measures for FY 2008 payment purposes. These measures include the HCAHPS® survey, as well as Surgical Care Improvement Project (SCIP, formerly Surgical Infection Prevention (SIP)), and Mortality quality measures.

DATES: To be assured consideration, comments on all sections of the preamble of this proposed rule, except section XVIII. and section XXIII., must be received at one of the addresses provided in the **ADDRESSES** section, no later than 5 p.m. October 10, 2006.

To be assured consideration, comments on section XVIII. of this preamble relating to the proposed revised ASC payment system and the related regulation changes for implementation January 1, 2008, must be received at one of the addresses provided in the **ADDRESSES** section, no later than 5 p.m. on November 6, 2006.

ADDRESSES: In commenting on all provisions except those found in section XXIII. of the preamble, please refer to file code CMS-1506-P. In commenting on the provisions found in section XXIII. of the preamble for the FY 2008 IPPS RHQDAPU program, please refer to file code CMS-4125-P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (no duplicates, please):

1. *Electronically.* You may submit electronic comments on specific issues in this regulation to <http://www.cms.hhs.gov/eRulemaking>. Click

on the link “Submit electronic comments on CMS regulations with an open comment period.” (Attachments should be in Microsoft Word, WordPerfect, or Excel; however, we prefer Microsoft Word.)

2. *By regular mail.* You may mail written comments (one original and two copies) to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-1506-P, or CMS-4125-P, P.O. Box 8011, Baltimore, MD 21244-1850.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments (one original and two copies) to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-1506-P, or CMS-4125-P, Mail Stop C4-26-05, 7500 Security Boulevard, Baltimore, MD 21244-1850.

4. *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments (one original and two copies) before the close of the comment period to one of the following addresses: Room 445-G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201; or 7500 Security Boulevard, Baltimore, MD 21244-1850.

If you intend to deliver your comments to the Baltimore address, please call telephone number (410) 786-7195 in advance to schedule your arrival with one of our staff members.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal Government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain proof of filing by stamping in and retaining an extra copy of the comments being filed.)

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

Submission of Comments on Paperwork Requirements. You may submit comments on this document’s paperwork requirements by mailing your comments to the addresses provided at the end of the “Collection of Information Requirements” section in this document.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

comments from the public on all issues set forth in this proposed rule to assist us in fully considering issues and developing policies. You can assist us by referencing the file code CMS-1506-P or file code CMS-4125-P for FY 2008 RHQDAPU program issues, and the specific "issue identifier" that precedes the section on which you choose to comment.

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following Web site as soon as possible after they have been received: <http://www.cms.hhs.gov/eRulemaking>. Click on the link "Electronic Comments on CMS Regulations" on that Web site to view public comments.

Comments received timely will also be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244, on Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, phone 1-800-743-3951.

Electronic Access

This **Federal Register** document is also available from the **Federal Register** online database through *GPO Access*, a service of the U.S. Government Printing

Office. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents' home page address is <http://www.gpoaccess.gov/index.html>, by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest (no password required). Dial-in users should use communications software and modem to call (202) 512-1661; type swais, then login as guest (no password required).

In this document, we address three payment systems under the Medicare program: the hospital outpatient prospective payment system (OPPS), the hospital inpatient prospective payment system (IPPS), and the ambulatory surgical center (ASC) payment system. The provisions relating to the OPPS are included in sections I. through XIII., XV., XVI., XX., XXIV., XXVI., and XXVII. of the preamble and in Addenda A, B, C (available on the Internet only; see section XXIV. of the preamble of this proposed rule), D1, D2, and E of this proposed rule. The provisions related to IPPS are included in sections XXIII., XXV. through XXVII. of the preamble. The provisions related to ASCs are

included in sections XVII., XVIII., and XXIV. through XXVII. of the preamble and in Addenda AA, BB, and CC of the proposed rule.

In addition, in this document, we address our proposed implementation of the Medicare contracting reform provisions of the MMA that replace the prior Medicare intermediary and carrier authorities formerly found in sections 1816 and 1842 of the Act with Medicare administrative contractor (MAC) authority under a new section 1874A of the Act. The provisions relating to MACs are included in sections XIX., XXVI., and XXVII.E. of this preamble. To assist readers in referencing sections contained in this document, we are providing the following table of contents:

Table of Contents

- I. Background for the OPPS
 - A. Legislative and Regulatory Authority for the Hospital Outpatient Prospective Payment System
 - B. Excluded OPPS Services and Hospitals
 - C. Prior Rulemaking
 - D. APC Advisory Panel
 1. Authority of the APC Panel
 2. Establishment of the APC Panel
 3. APC Panel Meetings and Organizational Structure
 - E. Provisions of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003
 1. Reduction in Threshold for Separate APCs for Drugs
 2. Special Payment for Brachytherapy
 - F. Provisions of the Deficit Reduction Act of 2005
 1. 3-Year Transition of Hold Harmless Payments
 2. Medicare Coverage of Ultrasound Screening for Abdominal Aortic Aneurysms
 - G. Summary of the Major Contents of This Proposed Rule
 1. Proposed Updates Affecting Payment for CY 2007
 2. Proposed Ambulatory Payment Classification (APC) Group Policies
 3. Proposed Payment Changes for Devices
 4. Proposed Payment Changes for Drugs, Biologicals, and Radiopharmaceuticals
 5. Estimate of Transitional Pass-Through Spending in CY 2007 for Drugs, Biologicals, and Radiopharmaceuticals
 6. Proposed Brachytherapy Payment Changes
 7. Proposed Coding and Payment for Drug and Vaccine Administration
 8. Proposed Hospital Coding for Evaluation and Management (E/M) Services
 9. Proposed Payment for Blood and Blood Products
 10. Proposed Payment for Observation Services
 11. Procedures That Will Be Paid Only as Inpatient Services
 12. Proposed Nonrecurring Policy Changes
 13. Emergency Medical Screening in Critical Access Hospitals (CAHs)
 14. Proposed OPPS Payment Status and Comment Indicator
- II. Proposed Updates Affecting OPPS Payments for CY 2007
 - A. Proposed Recalibration of APC Relative Weights for CY 2007
 1. Database Construction
 - a. Database Source and Methodology
 - b. Proposed Use of Single and Multiple Procedure Claims
 - c. Proposed Revision to the Overall Cost-to-Charge Ratio (CCR) Calculation
 2. Proposed Calculation of Median Costs for CY 2007
 3. Proposed Calculation of Scaled OPPS Payment Weights
 4. Proposed Changes to Packaged Services
 - B. Proposed Payment for Partial Hospitalization
 1. Background
 2. Proposed PHP APC Update for CY 2007
 3. Proposed Separate Threshold for Outlier Payments to CMHCs
 - C. Proposed Conversion Factor Update for CY 2007
 - D. Proposed Wage Index Changes for CY 2007
 - E. Proposed Statewide Average Default CCRs
 - F. OPPS Payments to Certain Rural Hospitals
 1. Hold Harmless Transitional Payment Changes Made by Pub. L. 109–171 (DRA)
 2. Proposed Adjustment for Rural SCHs Implemented in CY 2006 Related to Pub. L. 108–173 (MMA)
 - G. Proposed CY 2007 Hospital Outpatient Outlier Payments
 - H. Calculation of the Proposed OPPS National Unadjusted Medicare Payment
 - I. Proposed Beneficiary Copayments for CY 2007
 1. Background
 2. Proposed Copayment for CY 2007
 3. Calculation of a Proposed Adjusted Copayment Amount for an APC Group for CY 2007
- III. Proposed OPPS Ambulatory Payment Classification (APC) Group Policies
 - A. Proposed Treatment of New HCPCS and CPT Codes
 1. Proposed Treatment of New HCPCS Codes Included in the Second and Third Quarterly OPPS Updates for CY 2006
 2. Proposed Treatment of New CY 2007 Category I and III CPT Codes and Level II HCPCS Codes
 3. Proposed Treatment of New Mid-Year CPT Codes
 - B. Proposed Changes—Variations Within APCs
 1. Background
 2. Application of the 2 Times Rule
 3. Exceptions to the 2 Times Rule
 - C. New Technology APCs
 1. Introduction
 2. Proposed Movement of Procedures from New Technology APCs to Clinical APCs
 - a. Nonmyocardial Positron Emission Tomography (PET) Scans
 - b. PET/Computed Tomography (CT) Scans
 - c. Stereotactic Radiosurgery (SRS) Treatment Delivery Services
 - d. Magnetoencephalography (MEG) Services
 - e. Other Services in New Technology APCs
 - D. Proposed APC-Specific Policies
 1. Skin Replacement Surgery and Skin Substitutes (APCs 0024, 0025 and 0027)
 2. Treatment of Fracture/Dislocation (APC 0046)
 3. Electrophysiologic Recording/Mapping (APC 0087)
 4. Insertion of Mesh or Other Prosthesis (APC 0154)
 5. Percutaneous Renal Cryoablation (APC 0163)

- Addendum E—Proposed CPT Codes That Are Paid Only as Inpatient Procedures

I. Background for the OPSS

A. Legislative and Regulatory Authority for the Hospital Outpatient Prospective Payment System

When the Medicare statute was originally enacted, Medicare payment for hospital outpatient services was based on hospital-specific costs. In an effort to ensure that Medicare and its beneficiaries pay appropriately for services and to encourage more efficient delivery of care, the Congress mandated replacement of the reasonable cost-based payment methodology with a prospective payment system (PPS). The Balanced Budget Act (BBA) of 1997 (Pub. L. 105–33), added section 1833(t) to the Social Security Act (the Act) authorizing implementation of a PPS for hospital outpatient services (OPSS).

The Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act (BBRA) of 1999 (Pub. L. 106–113), made major changes in the hospital OPSS. The Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act (BIPA) of 2000 (Pub. L. 106–554), made further changes in the OPSS. Section 1833(t) of the Act was also amended by the Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003 (Pub. L. 108–173). The Deficit Reduction Act (DRA) of 2005 (Pub. L. 109–171), enacted on February 8, 2006, made additional changes in the OPSS. A discussion of the provisions contained in Pub. L. 109–171 that are specific to the calendar year (CY) 2007 OPSS is included in section II.F. of this preamble.

The OPSS was first implemented for services furnished on or after August 1, 2000. Implementing regulations for the OPSS are located at 42 CFR Part 419.

Under the OPSS, we pay for hospital outpatient services on a rate-per-service

basis that varies according to the ambulatory payment classification (APC) group to which the service is assigned. We use Healthcare Common Procedure Coding System (HCPCS) codes (which include certain Current Procedural Terminology (CPT) codes) and descriptors to identify and group the services within each APC group. The OPSS includes payment for most hospital outpatient services, except those identified in section I.B. of this preamble. Section 1833(t)(1)(B)(ii) of the Act provides for Medicare payment under the OPSS for hospital outpatient services designated by the Secretary (which includes partial hospitalization services furnished by community mental health centers (CMHCs)) and hospital outpatient services that are furnished to inpatients who have exhausted their Part A benefits or who are otherwise not in a covered Part A stay. Section 611 of Pub. L. 108–173 added provisions for Medicare coverage of an initial preventive physical examination, subject to the applicable deductible and coinsurance, as an outpatient department service, payable under the OPSS.

The OPSS rate is an unadjusted national payment amount that includes the Medicare payment and the beneficiary copayment. This rate is divided into a labor-related amount and a nonlabor-related amount. The labor-related amount is adjusted for area wage differences using the inpatient hospital wage index value for the locality in which the hospital or CMHC is located.

All services and items within an APC group are comparable clinically and with respect to resource use (section 1833(t)(2)(B) of the Act). In accordance with section 1833(t)(2) of the Act, subject to certain exceptions, services and items within an APC group cannot be considered comparable with respect to the use of resources if the highest median (or mean cost, if elected by the Secretary) for an item or service in the APC group is more than 2 times greater than the lowest median cost for an item or service within the same APC group (referred to as the “2 times rule”). In implementing this provision, we use the median cost of the item or service assigned to an APC group.

Special payments under the OPSS may be made for new technology items and services in one of two ways. Section 1833(t)(6) of the Act provides for temporary additional payments which we refer to as “transitional pass-through payments” for at least 2 but not more than 3 years for certain drugs, biological agents, brachytherapy devices used for the treatment of cancer, and categories of other medical devices. For new

technology services that are not eligible for transitional pass-through payments and for which we lack sufficient data to appropriately assign them to a clinical APC group, we have established special APC groups based on costs, which we refer to as new technology APCs. These new technology APCs are designated by cost bands which allow us to provide appropriate and consistent payment for designated new procedures that are not yet reflected in our claims data. Similar to pass-through payments, an assignment to a new technology APC is temporary; that is, we retain a service within a new technology APC until we acquire sufficient data to assign it to a clinically appropriate APC group.

B. Excluded OPSS Services and Hospitals

Section 1833(t)(1)(B)(i) of the Act authorizes the Secretary to designate the hospital outpatient services that are paid under the OPSS. While most hospital outpatient services are payable under the OPSS, section 1833(t)(1)(B)(iv) of the Act excludes payment for ambulance, physical and occupational therapy, and speech-language pathology services, for which payment is made under a fee schedule. Section 614 of Pub. L. 108–173 amended section 1833(t)(1)(B)(iv) of the Act to exclude OPSS payment for screening and diagnostic mammography services. The Secretary exercised the authority granted under the statute to exclude from the OPSS those services that are paid under fee schedules or other payment systems. Such excluded services include, for example, the professional services of physicians and nonphysician practitioners paid under the Medicare Physician Fee Schedule (MPFS); laboratory services paid under the clinical diagnostic laboratory fee schedule; services for beneficiaries with end-stage renal disease (ESRD) that are paid under the ESRD composite rate; and, services and procedures that require an inpatient stay that are paid under the hospital inpatient prospective payment system (IPPS). We set forth the services that are excluded from payment under the OPSS in § 419.22 of the regulations.

Under § 419.20(b) of the regulations, we specify the types of hospitals and entities that are excluded from payment under the OPSS. These excluded entities include Maryland hospitals, but only for services that are paid under a cost containment waiver in accordance with section 1814(b)(3) of the Act; critical access hospitals (CAHs); hospitals located outside of the 50 States, the District of Columbia, and

Puerto Rico; and Indian Health Service hospitals.

C. Prior Rulemaking

On April 7, 2000, we published in the **Federal Register** a final rule with comment period (65 FR 18434) to implement a prospective payment system for hospital outpatient services. The hospital OPSS was first implemented for services furnished on or after August 1, 2000. Section 1833(t)(9) of the Act requires the Secretary to review certain components of the OPSS not less often than annually and to revise the groups, relative payment weights, and other adjustments to take into account changes in medical practice, changes in technology, and the addition of new services, new cost data, and other relevant information and factors.

Since initially implementing the OPSS, we have published final rules in the **Federal Register** annually to implement statutory requirements and changes arising from our experience with this system. We last published such a document on November 10, 2005 (70 FR 68516). In that final rule with comment period, we revised the OPSS to update the payment weights and conversion factor for services payable under the CY 2006 OPSS on the basis of claims data from January 1, 2004, through December 31, 2004, and to implement certain provisions of Pub. L. 108–173. In addition, we responded to public comments received on the provisions of November 15, 2004 final rule with comment period pertaining to the APC assignment of HCPCS codes identified in Addendum B of that rule with the new interim (NI) comment indicators; and public comments received on the July 25, 2005 OPSS proposed rule for CY 2006 (70 FR 42674).

We published a correction of the November 10, 2005 final rule with comment period on December 23, 2005 (70 FR 76176). This correction document corrected a number of technical errors that appeared in the November 10, 2005 final rule with comment period.

D. APC Advisory Panel

1. Authority of the APC Panel

Section 1833(t)(9)(A) of the Act, as amended by section 201(h) of the BBRA, requires that we consult with an outside panel of experts to review the clinical integrity of the payment groups and their weights under the OPSS. The Act further specifies that the panel will act in an advisory capacity. The Advisory Panel on Ambulatory Payment

Classification (APC) Groups (the APC Panel), discussed under section I.D.2. of this preamble, fulfills these requirements. The APC Panel is not restricted to using data compiled by CMS and may use data collected or developed by organizations outside the Department in conducting its review.

2. Establishment of the APC Panel

On November 21, 2000, the Secretary signed the initial charter establishing the APC Panel. This expert panel, which may be composed of up to 15 representatives of providers subject to the OPPTS (currently employed full-time, not as consultants, in their respective areas of expertise), reviews and advises CMS about the clinical integrity of the APC groups and their weights. For purposes of this Panel, consultants or independent contractors are not considered to be full-time employees. The APC Panel is technical in nature and is governed by the provisions of the Federal Advisory Committee Act (FACA). Since its initial chartering, the Secretary has twice renewed the APC Panel's charter: on November 1, 2002, and on November 1, 2004. The current charter indicates, among other requirements, that the APC Panel continues to be technical in nature; is governed by the provisions of the FACA; may convene up to three meetings per year; has a Designated Federal Officer (DFO); and is chaired by a Federal official who also serves as a CMS medical officer.

The current APC Panel membership and other information pertaining to the Panel, including its charter, **Federal Register** notices, meeting dates, agenda topics, and meeting reports can be viewed on the CMS Web site at http://new.cms.hhs.gov/FACA/05_AdvisoryPanelonAmbulatoryPaymentClassificationGroups.asp.

3. APC Panel Meetings and Organizational Structure

The APC Panel first met on February 27, February 28, and March 1, 2001. Since that initial meeting, the APC Panel has held nine subsequent meetings, with the last meeting taking place on March 1 and 2, 2006. (The APC Panel did not meet on March 3, 2006, as announced in the meeting notice published on December 23, 2005 (70 FR 76313).) Prior to each meeting, we publish a notice in the **Federal Register** to announce the meeting and, when necessary, to solicit and announce nominations for APC Panel membership.

The APC Panel has established an operational structure that, in part, includes the use of three subcommittees

to facilitate its required APC review process. The three current subcommittees are the Data Subcommittee, the Observation Subcommittee, and the Packaging Subcommittee. The Data Subcommittee is responsible for studying the data issues confronting the APC Panel and for recommending options for resolving them. The Observation Subcommittee reviews and makes recommendations to the APC Panel on all issues pertaining to observation services paid under the OPPTS, such as coding and operational issues. The Packaging Subcommittee studies and makes recommendations on issues pertaining to services that are not separately payable under the OPPTS, but are bundled or packaged APC payments. Each of these subcommittees was established by a majority vote of the APC Panel during a scheduled APC Panel meeting. All subcommittee recommendations are discussed and voted upon by the full APC Panel.

Discussions of the recommendations resulting from the APC Panel's March 2006 meeting are included in the sections of this preamble that are specific to each recommendation. For discussions of earlier APC Panel meetings and recommendations, we reference previous hospital OPPTS final rules or the Web site mentioned earlier in this section.

E. Provisions of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003

The Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003, Pub. L. 108–173, made changes to the Act relating to the Medicare OPPTS. In the January 6, 2004 interim final rule with comment period and the November 15, 2004 final rule with comment period, we implemented provisions of Pub. L. 108–173 relating to the OPPTS that were effective for services provided in CY 2004 and CY 2005, respectively. In the November 10, 2005 final rule with comment period, we implemented provisions of Pub. L. 108–173 relating to the OPPTS that went into effect for services provided in CY 2006 (70 FR 68521). We note below those provisions of Pub. L. 108–173 that will expire at the end of CY 2006.

1. Reduction in Threshold for Separate APCs for Drugs

Section 621(a)(2) of Pub. L. 108–173 amended section 1833(t)(16) of the Act to set a \$50 per administration threshold for the establishment of separate APCs for drugs and biologicals furnished from January 1, 2005, through December 31, 2006. Because this statutory provision will no longer be in effect for CY 2007,

we have included a discussion of the proposed methodology that we would use for the drug administration threshold for CY 2007 in section V. of this preamble.

2. Special Payment for Brachytherapy

Section 621(b)(1) of Pub. L. 108–173 amended section 1833(t)(16) of the Act to require that payment for brachytherapy devices consisting of a seed or seeds (or radioactive source) furnished on or after January 1, 2004, and before January 1, 2007, be paid based on the hospital's charge for each device furnished, adjusted to cost. Because this statutory provision will no longer be in effect for CY 2007, we discuss our proposed methodology for payment for brachytherapy devices for CY 2007 in section VII.B. of this preamble.

F. Provisions of the Deficit Reduction Act of 2005

The Deficit Reduction Act (DRA) of 2005, Pub. L. 109–171, enacted on February 8, 2006, included three provisions affecting the OPPTS, as discussed below.

1. 3-Year Transition of Hold Harmless Payments

Section 5105 of Pub. L. 109–171 provides a 3-year transition of hold harmless OPPTS payments for hospitals located in a rural area with not more than 100 beds that are not defined as sole community hospitals (SCHs). This provision provides an increased payment for such hospitals for covered OPD services furnished on or after January 1, 2006, and before January 1, 2009, if the OPPTS payment they receive is less than the pre-BBA payment amount that they would have received for the same covered OPD services. This provision specifies that, in such cases, the amount of payment to the specified hospitals shall be increased by the applicable percentage of such difference. Section 5105 specifies the applicable percentage as 95 percent for CY 2006, 90 percent for CY 2007, and 85 percent for CY 2008.

2. Medicare Coverage of Ultrasound Screening for Abdominal Aortic Aneurysms

Section 5112 of Pub. L. 109–171 amended section 1861 of the Act to include coverage of ultrasound screening for abdominal aortic aneurysms for certain individuals on or after January 1, 2007. The provision will apply to individuals (a) Who receive a referral for such an ultrasound screening as a result of an initial preventive physical examination; (b) who have not

been previously furnished with an ultrasound screening under Medicare; and (c) who have a family history of abdominal aortic aneurysm or manifest risk factors included in a beneficiary category recommended for screening (as determined by the United States Preventive Services Task Force). Ultrasound screening for abdominal aortic aneurysm will be included in the initial preventive physical examination. Section 5112 also added ultrasound screening for abdominal aortic aneurysm to the list of services for which the beneficiary deductible does not apply. These amendments apply to services furnished on or after January 1, 2007.

G. Summary of the Major Content of This Proposed Rule

In this proposed rule, we are setting forth proposed changes to the Medicare hospital OPPS for CY 2007. These changes would be effective for services furnished on or after January 1, 2007. We are setting forth proposed changes to the Medicare ASC program for CY 2007 and CY 2008. We are setting forth proposed changes to the way we process FFS claims under Medicare Part A and Part B. Some of these changes were effective on October 1, 2005 and all of the changes are to be fully implemented by October 1, 2011. Finally, we are setting forth a notice seeking comments on the RHQDAPU program under the Medicare hospital IPPS for FY 2008. These changes would be effective for payments beginning with FY 2008. The following is a summary of the major changes that we are proposing to make:

1. Proposed Updates Affecting Payments for CY 2007

In section II. of this preamble, we set forth—

- The methodology used to recalibrate the proposed APC relative payment weights and the proposed recalibration of the relative payment weights for CY 2007.
- The proposed payment for partial hospitalization, including the proposed separate threshold for outlier payments for CMHCs.
- The proposed update to the conversion factor used to determine payment rates under the OPPS for CY 2007.
- The proposed retention of our current policy to apply the IPPS wage indices to wage adjust the APC median costs in determining the OPPS payment rate and the copayment standardized amount for CY 2007.
- The proposed update of statewide average default cost-to-charge ratios.

- Proposed changes relating to the expiring hold harmless payment provision.
- Proposed changes to payment for rural sole community hospitals for CY 2007.
- Proposed changes in the way we calculate hospital outpatient outlier payments for CY 2007.
- Calculation of the proposed national unadjusted Medicare OPPS payment.
- The proposed beneficiary copayment for OPSS services for CY 2007.

2. Proposed Ambulatory Payment Classification (APC) Group Policies

In section III. of this preamble, we discuss the proposed additions of new procedure codes to the APCs; our proposal to establish a number of new APCs; and our proposal to make changes to the assignment of HCPCS codes under a number of existing APCs based on our analyses of Medicare claims data and recommendations of the APC Panel. We also discuss the application of the 2 times rule and proposed exceptions to it; proposed changes for specific APCs; the proposed refinement of the New Technology cost bands; and the proposed movement of procedures from the New Technology APCs.

3. Proposed Payment Changes for Devices

In section IV. of this preamble, we discuss proposed changes to the device-dependent APCs, and to the pass-through payment for categories of devices.

4. Proposed Payment Changes for Drugs, Biologicals, and Radiopharmaceuticals

In section V. of this preamble, we discuss proposed changes for drugs, biologicals, and radiopharmaceuticals.

5. Estimate of Transitional Pass-Through Spending in CY 2007 for Drugs, Biologicals, and Devices

In section VI. of this preamble, we discuss the proposed methodology for estimating total pass-through spending and whether there should be a pro rata reduction for transitional pass-through drugs, biologicals, radiopharmaceuticals, and categories of devices for CY 2007.

6. Proposed Brachytherapy Payment Changes

In section VII. of this preamble, we discuss our proposal concerning coding and payment for the sources of brachytherapy.

7. Proposed Coding and Payment for Drug and Vaccine Administration

In section VIII. of this preamble, we discuss our proposed coding and payment changes for drug and vaccine administration services.

8. Proposed Hospital Coding for Evaluation and Management (E/M) Services

In section IX. of this preamble, we discuss our proposal for developing the coding guidelines for evaluation and management services.

9. Proposed Payment for Blood and Blood Products

In section X. of this preamble, we discuss our proposed payment changes for blood and blood products.

10. Proposed Payment for Observation Services

In section XI. of this preamble, we discuss our proposed criteria and coding changes for separately payable observation services.

11. Procedures That Will Be Paid Only as Inpatient Services

In section XII. of this preamble, we discuss the procedures that we propose to remove from the inpatient list and assign to APCs.

12. Proposed Nonrecurring Policy Changes

In section XIII. of this preamble, we discuss proposed changes to certain comprehensive outpatient rehabilitation facility (CORF) services paid under the OPSS. In this section, we also discuss proposed payment for ultrasound screening for abdominal aortic aneurysms (AAAs).

13. Emergency Medical Screening in Critical Access Hospitals (CAHs)

In section XIV. of this preamble, we discuss proposed changes to a regulation governing emergency medical screening in critical access hospitals (CAHs).

14. Proposed OPSS Payment Status and Comment Indicator

In section XV. of this preamble, we discuss proposed changes to the list of status indicators assigned to APCs and present our proposed comment indicators for the CY 2007 OPSS final rule.

15. OPSS Policy and Payment Recommendations

In section XVI. of this preamble, we address recommendations made by MedPAC and the APC Panel regarding the OPSS for CY 2007.

16. Proposed Policies Affecting Ambulatory Surgical Centers (ASCs) for CY 2007

In section XVII. of this preamble we discuss proposed payment changes affecting ASCs in CY 2007, the proposed list of updated ASC procedures, and proposed modification of the ASC payment adjustment process for new technology intraocular lenses (NTIOLs).

17. Proposed Revised Ambulatory Surgical Center (ASC) Payment System for Implementation January 1, 2008

In section XVIII. of this preamble, we discuss our proposal to implement a new ASC payment system for services furnished on or after January 1, 2008, and the regulatory changes related to the proposed new system.

18. Medicare Provider Contractor Reform Mandate

In section XIX. of this preamble, we discuss proposed changes to the regulations under 42 CFR Part 421, Subpart B to conform them to the statutory changes required by section 911 of Public Law 108–173 related to Medicare contracting reform.

19. Reporting Quality Data for Improved Quality and Costs Under the OPPTS

In section XX. of this preamble, we discuss the expenditure growth in outpatient hospital services, invite comment on value-based purchasing specifically related to hospital outpatient departments, and discuss a value-based purchasing program proposal for the CY 2007 OPPTS.

20. Promoting Effective Use of Health Information Technology

In section XXI. of this preamble, we invite comments on promoting hospitals' effective use of health information technology.

21. Health Care Information Transparency Initiative

In section XXII. of this preamble, we discuss HHS' major health information transparency initiative which we are launching in 2006.

22. Reporting Hospital Quality Data for Annual Payment Update Under the IPPS

In section XXIII. of this preamble, we invite comment on our proposal for the FY 2008 IPPS annual payment update to add the HCAHPS® survey, measures from the Surgical Care Improvement Project (SCIP), and Mortality measures to the quality of care measures to be used in FY 2007 for purposes of the IPPS annual payment update.

23. Impact Analysis

In section XXVII. of this preamble, we set forth an analysis of the impact that the proposed changes will have on affected entities and beneficiaries.

II. Proposed Updates Affecting OPPTS Payments for CY 2007

A. Proposed Recalibration of APC Relative Weights for CY 2007

(If you choose to comment on the issues in this section, please include the caption "APC Relative Weights" at the beginning of your comment.)

1. Database Construction

a. Database Source and Methodology

Section 1833(t)(9)(A) of the Act requires that the Secretary review and revise the relative payment weights for APCs at least annually. In the April 7, 2000 OPPTS final rule with comment period (65 FR 18482), we explained in detail how we calculated the relative payment weights that were implemented on August 1, 2000, for each APC group. Except for some reweighting due to a small number of APC changes, these relative payment weights continued to be in effect for CY 2001. This policy is discussed in the November 13, 2000 interim final rule (65 FR 67824 through 67827).

We are proposing to use the same basic methodology that we described in the April 7, 2000 final rule with comment period to recalibrate the APC relative payment weights for services furnished on or after January 1, 2007, and before January 1, 2008. That is, we would recalibrate the relative payment weights for each APC based on claims and cost report data for outpatient services. We are proposing to use the most recent available data to construct the database for calculating APC group weights. For the purpose of recalibrating APC relative payment weights in this proposed rule for CY 2007, we used approximately 131.9 million final action claims for hospital OPD services furnished on or after January 1, 2005, and before January 1, 2006. Of the 131.9 million final action claims for services provided in hospital outpatient settings, 102.9 million claims were of the type of bill potentially appropriate for use in setting rates for OPPTS services (but did not necessarily contain services payable under the OPPTS). Of the 102.9 million claims, approximately 48.5 million were not for services paid under the OPPTS or were excluded as not appropriate for use (for example, erroneous cost-to-charge ratios or no HCPCS codes reported on the claim). We were able to use 50.7 million whole claims of the remaining 54.4 million claims to set the

proposed OPPTS APC relative weights for CY 2007 OPPTS. From the 50.7 million whole claims, we created 91.4 million single records, of which 62.8 million were "pseudo" single claims (created from multiple procedure claims using the process we discuss in this section).

The proposed APC relative weights and payments for CY 2007 in Addenda A and B to this proposed rule were calculated using claims from this period that had been processed before January 1, 2006. We selected claims for services paid under the OPPTS and matched these claims to the most recent cost report filed by the individual hospitals represented in our claims data. We are proposing that the APC relative weights for CY 2007 continue to be based on the median hospital costs for services in the APC groups. For the CY 2007 OPPTS final rule, we are proposing to base APC median costs on claims for services furnished in CY 2005 and processed before June 30, 2006.

b. Proposed Use of Single and Multiple Procedure Claims

For CY 2007, we are proposing to continue to use single procedure claims to set the medians on which the APC relative payment weights would be based. We have received many requests asking that we ensure that the data from claims that contain charges for multiple procedures are included in the data from which we calculate the relative payment weights. Requesters believe that relying solely on single procedure claims to recalibrate APC relative payment weights fails to take into account data for many frequently performed procedures, particularly those commonly performed in combination with other procedures. They believe that, by depending upon single procedure claims, we base relative payment weights on the least costly services, thereby introducing downward bias to the medians on which the weights are based.

We agree that, optimally, it is desirable to use the data from as many claims as possible to recalibrate the APC relative payment weights, including those with multiple procedures. We generally use single procedure claims to set the median costs for APCs because we are, so far, unable to ensure that packaged costs can be appropriately allocated across multiple procedures performed on the same date of service. However, by bypassing specified codes that we believe do not have significant packaged costs, we are able to use more data from multiple procedure claims. In many cases, this enables us to create multiple "pseudo" single claims from claims that, as submitted, contained

multiple separately paid procedures on the same claim. For the CY 2007 OPPS, we are proposing to use the date of service on the claims and a list of codes to be bypassed to create “pseudo” single claims from multiple procedure claims, as we did in recalibrating the CY 2006 APC relative payment weights. We refer to these newly created single procedure claims as “pseudo” single claims because they were submitted by providers as multiple procedure claims.

For CY 2003, we created “pseudo” single claims by bypassing HCPCS codes 93005 (Electrocardiogram, tracing), 71010 (Chest x-ray), and 71020 (Chest x-ray) on a submitted claim. However, we did not use claims data for the bypassed codes in the creation of the median costs for the APCs to which these three codes were assigned because the level of packaging that would have remained on the claim after we selected the bypass code was not apparent and, therefore, it was difficult to determine if the medians for these codes would be correct.

For CY 2004, we created “pseudo” single claims by bypassing these three codes and also by bypassing an additional 269 HCPCS codes in APCs. We selected these codes based on a clinical review of the services and because it was presumed that these codes had only very limited packaging and could appropriately be bypassed for the purpose of creating “pseudo” single claims. The APCs to which these codes were assigned were varied and included mammography, cardiac rehabilitation, and Level I plain film x-rays. To derive more “pseudo” single claims, we also split the claims where there were dates of service for revenue code charges on that claim that could be matched to a single procedure code on the claim on the same date.

For the CY 2004 OPPS, as in CY 2003, we did not include the claims data for the bypassed codes in the creation of the APCs to which the 269 codes were assigned because, again, we had not established that such an approach was appropriate and would aid in accurately estimating the median costs for those APCs. For CY 2004, from approximately 16.3 million otherwise unusable claims, we used approximately 9.5 million multiple procedure claims to create approximately 27 million “pseudo” single claims. For CY 2005, we identified 383 bypass codes and from approximately 24 million otherwise unusable claims, we used approximately 18 million multiple procedure claims to create approximately 52 million “pseudo” single claims. For CY 2005, we used the claims data for the bypass codes

combined with the single procedure claims to set the median costs for the bypass codes.

For CY 2006, we continued using the codes on the CY 2005 OPPS bypass list and expanded it to include 404 bypass codes, including 3 bladder catheterization codes (CPT codes 51701, 51702, and 51703), which did not meet the empirical criteria discussed below for the selection of bypass codes. We added these three codes to the CY 2006 bypass list because a decision to change their payment status from packaged to separately paid would have resulted in a reduction of the number of single bills on which we could base median costs for other major separately paid procedures that were billed on the same claim with these three procedure codes. That is, single bills which contained other procedures would have become multiple procedure claims when these bladder catheterization codes were converted to separately paid status. We believed and continue to believe that bypassing these three codes does not adversely affect the medians for other procedures because we believe that when these services are performed on the same day as another separately paid service, any packaging that appears on the claim would be appropriately associated with the other procedure and not with these codes.

Consequently, for CY 2006, we identified 404 bypass codes for use in creating “pseudo” single claims and used some part of 90 percent of the total claims that were eligible for use in OPPS ratesetting and modeling in developing the final rule with comment period. This process enabled us to use, for CY 2006 OPPS, 88 million single bills for ratesetting: 55 million “pseudo” singles and 34 million “natural” single bills (bills that were submitted containing only one separately payable major HCPCS code). (These numbers do not sum to 88 million because more than 800,000 single bills were removed when we trimmed at the HCPCS level at ± 3 standard deviations from the geometric mean.)

For CY 2007, we are proposing to continue using date-of-service matching as a tool for creation of “pseudo” single claims and to continue the use of a bypass list to create “pseudo” single claims. The process we are proposing for CY 2007 OPPS results in our being able to use some part of 94.8 percent of the total claims that are eligible for use in the OPPS ratesetting and modeling in developing this proposed rule. This process enabled us to use, for CY 2007, 62.8 million “pseudo” singles and 29.6 million “natural” single bills.

We are proposing to bypass the 454 codes identified in Table 1 to create new single claims and to use the line-item costs associated with the bypass codes on these claims, together with the single procedure claims, in the creation of the median costs for the APCs into which they are assigned. Of the codes on this list, 404 codes were used for bypass in CY 2006. We are proposing to continue the use of the codes on the CY 2006 OPPS bypass list and to expand it by adding codes that, using data presented to the APC Panel at its March 2006 meeting, meet the same empirical criteria as those used in CY 2006 to create the bypass list, or which our clinicians believe would contain minimal packaging if the services were correctly coded (for example, ultrasound guidance). Our examination of the data against the criteria for inclusion on the bypass list, as discussed below for the addition of new codes, shows that the empirically selected codes used for bypass for the CY 2006 OPPS generally continue to meet the criteria or come very close to meeting the criteria, and we have received no comments against bypassing them.

To facilitate comment, Table 1 indicates the list of codes we are proposing to bypass for creation of “pseudo” singles for CY 2007 OPPS. Bypass codes shown in Table 1 with an asterisk indicate the HCPCS codes we are proposing to add to the CY 2006 OPPS listed codes for bypass in CY 2007. The criteria we are proposing to use to determine the additional codes to add to the CY 2006 OPPS bypass list in order to create the bypass list for CY 2007 OPPS are discussed below.

The following empirical criteria were developed by reviewing the frequency and magnitude of packaging in the single claims for payable codes other than drugs and biologicals. We assumed that the representation of packaging on the single claims for any given code is comparable to packaging for that code in the multiple claims:

- There were 100 or more single claims for the code. This number of single claims ensured that observed outcomes were sufficiently representative of packaging that might occur in the multiple claims.
- Five percent or fewer of the single claims for the code had packaged costs on that single claim for the code. This criterion results in limiting the amount of packaging being redistributed to the payable procedure remaining on the claim after the bypass code is removed and ensures that the costs associated with the bypass code represent the cost of the bypassed service.

- The median cost of packaging observed in the single claim was equal to or less than \$50. This limits the amount of error in redistributed costs.

- The code is not a code for an unlisted service.

In addition, we are proposing to add to the bypass list codes that our clinicians believe contain minimal

packaging and codes for specified drug administration for which hospitals have requested separate payment but for which it is not possible to acquire median costs unless we add these codes to the bypass list. A more complete discussion of the effects of adding these drug administration codes to the bypass

list is contained in the discussion of drug administration in section VIII.C. of this preamble.

We specifically invite public comment on the “pseudo” single process, including the bypass list and the criteria.

c. Proposed Revision to the Overall Cost-to-Charge Ratio (CCR) Calculation

We calculate both an overall CCR and cost center-specific cost-to-charge ratios (CCRs) for each hospital. For CY 2007 OPPS, we are proposing to change the methodology for calculating the overall CCR. The overall CCR is used in many components of the OPPS. We use the overall CCR to estimate costs from charges on a claim when we do not have an accurate cost center CCR. This does not happen very often. For the vast majority of services, we are able to use a cost center CCR to estimate costs from charges. However, we also use the overall CCR to identify the outlier threshold, to model payments for services that are paid at charges reduced to cost, and, during implementation, to determine outlier payments and payments for other services.

We have discovered that the calculation of the overall CCR that the fiscal intermediaries are using to determine outlier payment and payment for services paid at charges reduced to cost differs from the overall CCR that we use to model the OPPS. In Program Transmittal A-03-04 on "Calculating Provider-Specific Outpatient Cost-to-Charge Ratios (CCRs) and Instructions on Cost Report Treatment of Hospital Outpatient Services Paid on a Reasonable Cost Basis" (January 17, 2003), we revised the overall CCR calculation that the fiscal intermediaries use in determining outlier and other cost payments. Until this point, each fiscal intermediary had used an overall CCR provided by CMS, or calculated an updated CCR at the provider's request using the same calculation. The calculation in Program Transmittal A-03-04, that is, the fiscal intermediary calculation, diverged from the "traditional" overall CCR that we used for modeling. It should be noted that the fiscal intermediary overall CCR calculation noted in Program Transmittal A-03-04 was created with feedback and input from the fiscal intermediaries.

CMS' "traditional" calculation consists of summing the total costs from Worksheet B, Part I (Column 27), after removing the costs for nursing and paramedical education (Columns 21 and 24), for those ancillary cost centers that we believe contain most OPPS services, summing the total charges from Worksheet C, Part I (Columns 6 and 7) for the same set of ancillary cost centers, and dividing the former by the latter. We exclude selected ancillary cost centers from our overall CCR calculation, such as 5700 Renal Dialysis, because we believe that the costs and charges in

these cost centers are largely paid for under other payment systems. The specific list of ancillary cost centers, both standard and nonstandard, included in our overall CCR calculation is available on our Web site in the revenue center-to-cost center crosswalk workbook: <http://www.cms.hhs.gov/HospitalOutpatientPPS>.

The overall CCR calculation provided in Program Transmittal A-03-04, on the other hand, takes the CCRs from Worksheet C, Part I, Column 9, for each specified ancillary cost center; multiplies them by the Medicare Part B outpatient specific charges in each corresponding ancillary cost center from Worksheet D, Parts V and VI (Columns 2, 3, 4, and 5 and subscripts thereof); and then divides the sum of these costs by the sum of charges for the specified ancillary cost centers from Worksheet D, Parts V and VI (Columns 2, 3, 4, and 5 and subscripts thereof). Compared with our "traditional" overall CCR calculation that has been used for modeling OPPS and to calculate the median costs, this fiscal intermediary calculation of overall CCR fails to remove allied health costs and adds weighting by Medicare Part B charges.

In comparing these two calculations, we discovered that, on average, the overall CCR calculation being used by the fiscal intermediary resulted in higher overall CCRs than under our "traditional" calculation. Using the most recent cost report data available for every provider with valid claims for CY 2004 as of November 2005, we estimated the median overall CCR using the traditional calculation to be 0.3040 (mean 0.3223) and the median overall CCR using the fiscal intermediary calculation to be 0.3309 (mean 0.3742). There also was much greater variability in the fiscal intermediary calculation of the overall CCR. The standard deviation under the "traditional" calculation was 0.1318, while the standard deviation using the fiscal intermediary's calculation was 0.2143. In part, the higher median estimate for the fiscal intermediary calculation is attributable to the inclusion of allied health costs for the over 700 hospitals with allied health programs. It is inappropriate to include these costs in the overall CCR calculation, because CMS already reimburses hospitals for the costs of these programs through cost report settlement. The higher median estimate and greater variability also is a function of the weighting by Medicare Part B charges. Because the fiscal intermediary overall CCR calculation is higher, on average, CMS has underestimated the outlier payment thresholds and, therefore, overpaid outlier payments.

We also have underestimated spending for services paid at charges reduced to cost in our budget neutrality estimates.

In examining the two different calculations, we decided that elements of each methodology had merit. Clearly, as noted above, allied health costs should not be included in an overall CCR calculation. However, weighting by Medicare Part B charges from Worksheet D, Parts V and VI, makes the overall CCR calculation more specific to OPPS. Therefore, we are proposing to adopt a single overall CCR calculation that incorporates weighting by Medicare Part B charges but excludes allied health costs for modeling and payment. Specifically, the proposed calculation removes allied health costs from cost center CCR calculations for specified ancillary cost centers, as discussed above, multiplies them by the Medicare Part B charges on Worksheet D, Parts V and VI, and sums these estimated Medicare costs. This sum is then divided by the sum of the same Medicare Part B charges for the same specified set of ancillary cost centers.

Using the same cost report data, we estimated a median overall CCR for the proposed calculation of 0.3081 (mean 0.3389) with a standard deviation of 0.1583. The similarity to the median and standard deviation of the "traditional" overall CCR calculation noted above (median 0.3040 and standard deviation of 0.1318) masks some sizeable changes in overall CCR calculations for specific hospitals due largely to the inclusion of Medicare Part B weighting.

In order to isolate the overall impact of adopting this methodology on APC medians, we used the first 9 months of CY 2005 claims data to estimate APC median costs varying only the two methods of determining overall CCR. We expected the impact to be limited because the majority of costs are estimated using a cost center-specific CCR and not the overall. As predicted, we observed minor changes in APC median costs from the adoption of the proposed overall CCR calculation. We largely observed differences of no more than 5 percent in either direction. The median overall percent change in APC cost estimates was -0.3 percent. We typically observe comparable changes in APC medians when we update our cost report data. The impact of the proposed CCR calculation on the outlier threshold is discussed further in section II. G. of this preamble. Using updated cost report data for the calculations in this proposed rule, we estimate a median overall CCR across all hospitals of 0.2999 using the proposed overall CCR calculation.

We believe that a single overall CCR calculation should be used for all components of the OPPS for both modeling and payment. Therefore, we are proposing to use the modified overall CCR calculation as discussed above when the hospital-specific overall CCR is used for any of the following calculations—in the CMS calculation of median costs for OPPS ratesetting, in the CMS calculation of the outlier threshold, in the fiscal intermediary calculation of outlier payments, in the CMS calculation of statewide CCRs, in the fiscal intermediary calculation of pass-through payments for devices, and for any other fiscal intermediary payment calculation in which the current hospital-specific overall CCR may be used now or in the future. If this proposal is finalized, we would issue a Medicare program instruction to fiscal intermediaries that would instruct them to recalculate and use the hospital-specific overall CCR as we are proposing for these purposes.

2. Proposed Calculation of Median Costs for CY 2007

In this section of the preamble, we discuss the use of claims to calculate the proposed OPPS payment rates for CY 2007. The hospital outpatient prospective payment page on the CMS Web site on which this proposed rule is posted provides an accounting of claims used in the development of the proposed rates: <http://www.cms.hhs.gov/HospitalOutpatientPPS>. The accounting of claims used in the development of this proposed rule is included on the Web site under supplemental materials for the CY 2007 proposed rule. That accounting provides additional detail regarding the number of claims derived at each stage of the process. In addition, below we discuss the files of claims that comprise the data sets that are available for purchase under a CMS data user contract. Our CMS Web site, <http://www.cms.hhs.gov/HospitalOutpatientPPS>, includes information about purchasing the following two OPPS data files: “OPPS Limited Data Set” and “OPPS Identifiable Data Set.”

We are proposing to use the following methodology to establish the relative weights to be used in calculating the proposed OPPS payment rates for CY 2007 shown in Addenda A and B to this proposed rule. This methodology is as follows:

We used outpatient claims for the full CY 2005, processed before January 1, 2006, to set the relative weights for this proposed rule for CY 2007. To begin the calculation of the relative weights for

CY 2007, we pulled all claims for outpatient services furnished in CY 2005 from the national claims history file. This is not the population of claims paid under the OPPS, but all outpatient claims (including, for example, CAH claims, and hospital claims for clinical laboratory services for persons who are neither inpatients nor outpatients of the hospital).

We then excluded claims with condition codes 04, 20, 21, and 77. These are claims that providers submitted to Medicare knowing that no payment will be made. For example, providers submit claims with a condition code 21 to elicit an official denial notice from Medicare and document that a service is not covered. We then excluded claims for services furnished in Maryland, Guam, and the U.S. Virgin Islands because hospitals in those geographic areas are not paid under the OPPS.

We divided the remaining claims into the three groups shown below. Groups 2 and 3 comprise the 103 million claims that contain hospital bill types paid under the OPPS.

1. Claims that were not bill types 12X, 13X, 14X (hospital bill types), or 76X (CMHC bill types). Other bill types are not paid under the OPPS and, therefore, these claims were not used to set OPPS payment.

2. Claims that were bill types 12X, 13X, or 14X (hospital bill types). These claims are hospital outpatient claims.

3. Claims that were bill type 76X (CMHC). (These claims are later combined with any claims in item 2 above with a condition code 41 to set the per diem partial hospitalization rate determined through a separate process.)

For the CCR calculation process, we used the same general approach as we used in developing the final APC rates for CY 2006 (70 FR 68537), with a change to the development of the overall CCR as discussed above. That is, we first limited the population of cost reports to only those for hospitals that filed outpatient claims in CY 2005 before determining whether the CCRs for such hospitals were valid.

We then calculated the CCRs at a cost center level and overall for each hospital for which we had claims data. We did this using hospital-specific data from the Healthcare Cost Report Information System (HCRIS). We used the most recent available cost report data, in most cases, cost reports for CY 2004. For this proposed rule, we used the most recent cost report available, whether submitted or settled. If the most recent available cost report was submitted but not settled, we looked at the last settled cost report to determine

the ratio of submitted to settled cost using the overall CCR, and we then adjusted the most recent available submitted but not settled cost report using that ratio. We are proposing to use the most recently submitted cost reports to calculate the CCRs to be used to calculate median costs for the OPPS CY 2007 final rule. We calculated both an overall CCR and cost center-specific CCRs for each hospital. We used the proposed overall CCR calculation discussed in II.A.1.c. of this preamble for all purposes.

We then flagged CAH claims, which are not paid under the OPPS, and claims from hospitals with invalid CCRs. The latter included claims from hospitals without a CCR; those from hospitals paid an all-inclusive rate; those from hospitals with obviously erroneous CCRs (greater than 90 or less than .0001); and those from hospitals with CCRs that were identified as outliers (3 standard deviations from the geometric mean after removing error CCRs). In addition, we trimmed the CCRs at the cost center level by removing the CCRs for each cost center as outliers if they exceeded ± 3 standard deviations from the geometric mean. This is the same methodology that we used in developing the final CY 2006 CCRs. For CY 2007, we are proposing to trim at the departmental CCR level to eliminate aberrant CCRs that, if found in high volume hospitals, could skew the medians. We used a four-tiered hierarchy of cost center CCRs to match a cost center to every possible revenue code appearing in the outpatient claims, with the top tier being the most common cost center and the last tier being the default CCR. If a hospital's cost center CCR was deleted by trimming, we set the CCR for that cost center to “missing,” so that another cost center CCR in the revenue center hierarchy could apply. If no other departmental CCR could apply to the revenue code on the claim, we used the hospital's overall CCR for the revenue code in question. For example, a visit reported under the clinic revenue code, but the hospital did not have a clinic cost center, we mapped the hospital-specific overall CCR to the clinic revenue code. The hierarchy of CCRs is available for inspection and comment at the CMS Web site: <http://www.cms.hhs.gov/HospitalOutpatientPPS>.

We then converted the charges to costs on each claim by applying the CCR that we believed was best suited to the revenue code indicated on the line with the charge. Table 2 below contains a list of the allowed revenue codes. Revenue codes not included in Table 2 are those

not allowed under the OPPS because their services cannot be paid under the OPPS (for example, inpatient room and board charges) and, thus charges with those revenue codes were not packaged for creation of the OPPS median costs. One exception is the calculation of median blood costs, as discussed in section X. of this preamble.

Thus, we applied CCRs as described above to claims with bill types 12X, 13X, or 14X, excluding all claims from CAHs and hospitals in Maryland, Guam, and the U.S. Virgin Islands, and claims from all hospitals for which CCRs were flagged as invalid.

We identified claims with condition code 41 as partial hospitalization services of hospitals and moved them to another file. These claims were combined with the 76X claims identified previously to calculate the partial hospitalization per diem rate.

We then excluded claims without a HCPCS code. We also moved claims for observation services to another file. We moved to another file claims that contained nothing but flu and pneumococcal pneumonia ("PPV") vaccine. Influenza and PPV vaccines are paid at reasonable cost and, therefore, these claims are not used to set OPPS rates. We note that the two above mentioned separate files containing partial hospitalization claims and the observation services claims are included in the files that are available for purchase as discussed above.

We next copied line-item costs for drugs, blood, and devices (the lines stay on the claim, but are copied off onto another file) to a separate file. No claims were deleted when we copied these lines onto another file. These line-items are used to calculate a per unit mean and median and a per administration mean and median for drugs, radiopharmaceutical agents, blood and blood products, and devices, including but not limited to brachytherapy sources, as well as other information used to set payment rates, including a unit to day ratio for drugs.

We then divided the remaining claims into the following five groups:

1. *Single Major Claims:* Claims with a single separately payable procedure (that is, status indicator S, T, V, or X), all of which would be used in median setting.

2. *Multiple Major Claims:* Claims with more than one separately payable procedure (that is, status indicator S, T, V, or X), or multiple units for one payable procedure. As discussed below, some of these can be used in median setting.

3. *Single Minor Claims:* Claims with a single HCPCS code that is packaged

(that is, status indicator N) and not separately payable.

4. *Multiple Minor Claims:* Claims with multiple HCPCS codes that are packaged (that is, status indicator N) and not separately payable.

5. *Non-OPPS Claims:* Claims that contain no services payable under the OPPS (that is, all status indicators other than S, T, V, X, or N). These claims are excluded from the files used for the OPPS. Non-OPPS claims have codes paid under other fee schedules, for example, durable medical equipment or clinical laboratory, and do not contain either a code for a separately paid service or a code for a packaged service.

In previous years, we made a determination of whether each HCPCS code was a major code, or a minor code, or a code other than a major or minor code. We used those code specific determinations to sort claims into these five identified groups. For CY 2007 OPPS, we are proposing to use status indicators, as described above, to sort the claims into these groups. We believe that using status indicators is an appropriate way to sort the claims into these groups and also to make our process more transparent to the public. We further believe that this proposed method of sorting claims will enhance the public's ability to derive useful information and become a more informed commenter on this proposed rule.

We note that the claims listed in numbers 1, 2, 3, and 4 above are included in the data files that can be purchased as described above.

We set aside the single minor, multiple minor claims and the non-OPPS claims (numbers 3, 4, and 5 above) because we did not use these claims in calculating median cost. We then examined the multiple major claims for date of service to determine if we could break them into single procedure claims using the dates of service on all lines on the claim. If we could create claims with single major procedures by using date of service, we created a single procedure claim record for each separately paid procedure on a different date of service (that is, a "pseudo" single).

We then used the "bypass codes" listed in Table 1 of this preamble and discussed in section II.A.1.b. to remove separately payable procedures that we determined contain limited costs or no packaged costs, or were otherwise suitable for inclusion on the bypass list, from a multiple procedure bill. When one of the two separately payable procedures on a multiple procedure claim was on the bypass code list, we split the claim into two single procedure

claims records. The single procedure claim record that contained the bypass code did not retain packaged services. The single procedure claim record that contained the other separately payable procedure (but no bypass code) retained the packaged revenue code charges and the packaged HCPCS charges.

We also removed lines that contained multiple units of codes on the bypass list and treated them as "pseudo" single claims by dividing the cost for the multiple units by the number of units on the line. Where one unit of a single separately paid procedure code remained on the claim after removal of the multiple units of the bypass code, we created a "pseudo" single claim from that residual claim record, which retained the costs of packaged revenue codes and packaged HCPCS codes. This enables us to use claims that would otherwise be multiple procedure claims and could not be used. We excluded those claims that we were not able to convert to singles even after applying all of the techniques for creation of "pseudo" singles.

We then packaged the costs of packaged HCPCS codes (codes with status indicator "N" listed in Addendum B to this proposed rule) and packaged revenue codes into the cost of the single major procedure remaining on the claim. The list of packaged revenue codes is shown below in Table 2.

After removing claims for hospitals with error CCRs, claims without HCPCS codes, claims for immunizations not covered under the OPPS, and claims for services not paid under the OPPS, 97.5 million claims were left. Of these 97.5 million claims, we were able to use some portion of 50.7 million whole claims (93.2 percent of the 54.4 million potentially usable claims) to create the 91.4 million single and "pseudo" single claims for use in the CY 2007 median payment ratesetting. Approximately 43 million claims were for services not paid under the OPPS.

We also excluded (1) Claims that had zero costs after summing all costs on the claim and (2) claims containing payment flag 3. Effective for services furnished on or after July 1, 2004, the Outpatient Code Editor (OCE) assigns payment flag number 3 to claims on which hospitals submitted token charges for a service with status indicator "S" or "T" (a major separately paid service under OPPS) for which the fiscal intermediary is required to allocate the sum of charges for services with a status indicator equaling "S" or "T" based on the weight for the APC to which each code is assigned. We do not believe that these charges, which were token charges as submitted by the

hospital, are valid reflections of hospital resources. Therefore, we are proposing to delete these claims. We also deleted claims for which the charges equal the revenue center payment (that is, the Medicare payment) on the assumption that where the charge equals the payment, to apply a CCR to the charge would not yield a valid estimate of relative provider cost.

For the remaining claims, we then standardized 60 percent of the costs of the claim (which we have previously determined to be the labor-related portion) for geographic differences in labor input costs. We made this adjustment by determining the wage index that applied to the hospital that furnished the service and dividing the cost for the separately paid HCPCS code furnished by the hospital by that wage index. As has been our policy since the inception of the OPSS, we are proposing to use the pre-reclassified wage indices for standardization because we believe that they better reflect the true costs of items and services in the area in which the hospital is located than the post-reclassification wage indices, and would result in the most accurate adjusted median costs.

We also excluded claims that were outside 3 standard deviations from the geometric mean of units for each HCPCS code on the bypass list (because, as discussed above, we used claims that contain multiple units of the bypass

codes). We then deleted 299,022 single bills reported with modifier 50 that were assigned to APCs that contained HCPCS codes that are considered to be conditional or independent bilateral procedures under the OPSS and that are subject to special payment provisions implemented through the OCE. Modifier 50 signifies that the procedure was performed bilaterally. Although these are apparently single claims for a separately payable service and although there is only one unit of the code reported on the claim, the presence of modifier 50 signifies that two services were furnished. Therefore, costs reported on these claims are for two procedures and not for a single procedure. Hence, we deleted these multiple procedure records, which we would have treated as single procedure claims in prior OPSS updates. We are seeking comments on the relative benefits of deleting these claims versus dividing the costs for the two procedures by two to create two "pseudo" single claims.

We used the remaining claims to calculate median costs for each separately payable HCPCS code and each APC. The comparison of HCPCS and APC medians determines the applicability of the "2 times" rule. As stated previously, section 1833(t)(2) of the Act provides that, subject to certain exceptions, the items and services within an APC group cannot be

considered comparable with respect to the use of resources if the highest median (or mean cost, if elected by the Secretary) for an item or service in the group is more than 2 times greater than the lowest median cost for an item or service within the same group ("the 2 times rule"). Finally, we reviewed the medians and reassigned HCPCS codes to different APCs as deemed appropriate. Section III.B. of this preamble includes a discussion of the HCPCS code assignment changes that resulted from examination of the medians and for other reasons. The APC medians were recalculated after we reassigned the affected HCPCS codes. Both the HCPCS medians and the APC medians were weighted to account for the inclusion of multiple units of the bypass codes in the creation of pseudo single bills.

A detailed discussion of the proposed medians for blood and blood products is included in section X. of this preamble. A discussion of the proposed medians for APCs that require one or more devices when the service is performed is included in section IV.A. of this preamble. A discussion of the proposed median for observation services is included in section XI. of this preamble and a discussion of the proposed median for partial hospitalization is included below in section II.B. of this preamble.

3. Proposed Calculation of Scaled OPPS Payment Weights

Using the median APC costs discussed previously, we calculated the proposed relative payment weights for each APC for CY 2007 shown in Addenda A and B of this proposed rule. In prior years, we scaled all the relative payment weights to APC 0601 (Mid Level Clinic Visit) because it is one of the most frequently performed services in the hospital outpatient setting. We assigned APC 0601 a relative payment weight of 1.00 and divided the median cost for each APC by the median cost for APC 0601 to derive the relative payment weight for each APC.

For CY 2007 OPPS, we are proposing to scale all of the relative payment weights to APC 0606 (Level III Clinic Visits) because we are proposing to delete APC 0601 as part of the reconfiguration of the visit APCs. We chose APC 0606 as the scaling base because under our proposal to reconfigure the APCs where clinic visits are assigned for CY 2007, APC 0606 is the middle level clinic visit APC (that is, Level III of five levels). We have historically used the median cost of the middle level clinic visit APC (that is APC 0601 through CY 2006) to calculate unscaled weights because mid-level clinic visits are among the most frequently performed services in the hospital outpatient setting. Therefore, to maintain consistency in using as a median the most frequently used services, we are proposing to continue to use the median cost of the middle clinic level, proposed ASC 0606, to calculate unscaled weights. Following our standard methodology, but using the proposed CY 2007 median for APC 0606, we assigned APC 0606 a relative payment weight of 1.00 and divided the median cost of each APC by the median cost for APC 0606 to derive the unscaled relative payment weight for each APC. The choice of the APC on which to base the relative weights for all other APCs does not affect the payments made under the OPPS because we scale the weights for budget neutrality.

Section 1833(t)(9)(B) of the Act requires that APC reclassification and recalibration changes, wage index changes, and other adjustments be made in a manner that assures that aggregate payments under the OPPS for CY 2007 are neither greater than nor less than the aggregate payments that would have been made without the changes. To comply with this requirement concerning the APC changes, we compared aggregate payments using the CY 2006 relative weights to aggregate payments using the CY 2007 proposed

relative payment weights. Based on this comparison, we adjusted the relative weights for purposes of budget neutrality. The unscaled relative payment weights were adjusted by 1.354626473 for budget neutrality. We recognize the scaler, or weight scaling factor, for budget neutrality that we are proposing for CY 2007 is higher than any previous OPPS weight scaler as a result of our proposal to use APC 0606 as the base for calculation of relative weights. Our proposed use of the median cost for APC 0606 of \$83.67 causes the unscaled weights to be lower than they would have been if we had chosen APC 0605 (Level 2 Clinic Visits; median \$62.12) as the scaling base. The CY 2007 median cost of APC 0606 is significantly higher than the CY 2006 median cost of APC 0601 for mid-level clinic visits, which was used in CY 2006 and earlier years to calculate unscaled weights. Historically, the median cost for APC 0601 has been similar to the CY 2007 proposed median cost for APC 0605. In order to appropriately scale the total weight estimated for OPPS in CY 2007 to be similar to the total weight in OPPS for CY 2006, we calculated a scaler of 1.354626473, which is higher using APC 0606 as the base than it would be if we used APC 0605 as the base. In addition to adjusting for increases and decreases in weight due to the recalibration of APC medians, the scaler also accounts for any change in the base.

The proposed relative payment weights listed in Addenda A and B of this proposed rule incorporate the recalibration adjustments discussed in sections II.A.1. and 2. of this preamble.

Section 1833(t)(14)(H) of the Act, as added by section 621(a)(1) of Pub. L. 108–173, states that “Additional expenditures resulting from this paragraph shall not be taken into account in establishing the conversion factor, weighting and other adjustment factors for 2004 and 2005 under paragraph (9) but shall be taken into account for subsequent years.” Section 1833(t)(14) of the Act provides the payment rates for certain “specified covered outpatient drugs.” Therefore, the cost of those specified covered outpatient drugs (as discussed in section V. of this preamble) is now included in the budget neutrality calculations for CY 2007 OPPS.

Under section 1833(t)(16)(C) of the Act, as added by section 621(b)(1) of Pub. L. 108–173, payment for devices of brachytherapy consisting of a seed or seeds (or radioactive source) is to be made at charges adjusted to cost for services furnished on or after January 1, 2004, and before January 1, 2007. As we

stated in our January 6, 2004 interim final rule, charges for the brachytherapy sources were not used in determining outlier payments, and payments for these items were excluded from budget neutrality calculations for the CY 2006 OPPS. We excluded these payments from budget neutrality calculations, in part, because of the challenge posed by estimating hospital-specific cost payment. For CY 2007, we are proposing a specific payment rate for brachytherapy sources, which will be subject to scaling for budget neutrality. (We provide a discussion of brachytherapy payment issues, including their continued exclusion from outlier payments, under section VII. of this preamble.) Therefore, the costs of brachytherapy sources are accounted for in the scaler of 1.354626473.

4. Proposed Changes to Packaged Services

(If you choose to comment on the issues in this section, please include the caption “Packaged Services” at the beginning of your comment.)

Payments for packaged services under the OPPS are bundled into the payments providers receive for separately payable services provided on the same day. Packaged services are identified by the status indicator “N.” Hospitals include charges for packaged services on their claims, and the costs associated with these packaged services are then bundled into the costs for separately payable procedures on those same claims in establishing payment rates for the separately payable services. This is consistent with the principles of a prospective payment system based upon groupings of services and in contrast to a fee schedule that provides individual payment for each service billed. Hospitals may use CPT codes to report any packaged services that were performed, consistent with CPT coding guidelines.

As a result of requests from the public, a Packaging Subcommittee to the APC Panel was established to review all the procedural CPT codes with a status indicator of “N.” Providers have often suggested that many packaged services could be provided alone, without any other separately payable services on the claim, and requested that these codes not be assigned status indicator “N.” In deciding whether to package a service or pay for a code separately, we consider a variety of factors, including whether the service is normally provided separately or in conjunction with other services; how likely it is for the costs of the packaged code to be appropriately mapped to the separately payable codes

with which it was performed; and whether the expected cost of the service is relatively low.

The Packaging Subcommittee identified areas for change for some packaged CPT codes that it believed could frequently be provided to patients as the sole service on a given date and that required significant hospital resources as determined from hospital claims data.

Based on the comments received, additional issues, and new data that we shared with the Packaging Subcommittee concerning the packaging status of codes for CY 2007, the Packaging Subcommittee reviewed the packaging status of numerous HCPCS codes and reported its findings to the APC Panel at its March 2006 meeting. The APC Panel accepted the report of the Packaging Subcommittee, heard several presentations on certain packaged services, discussed the deliberations of the Packaging Subcommittee, and recommended that—

- CMS pay separately for HCPCS code 0069T (Acoustic heart sound recording and computer analysis only).
- CMS maintain the packaged status of HCPCS code 0152T (Computer aided detection with further physician review for interpretation, with or without digitization of films radiographic images; chest radiograph(s)).
- CMS maintain the packaged status of CPT code 36500 (venous catheterization for selective blood organ sampling).
- CMS pay separately for CPT code 36540 (Collect blood, venous access device) if there are no separately payable OPPS services on the claim.
- CMS pay separately for CPT code 36600 (Arterial puncture; withdrawal of blood for diagnosis) if there are no separately payable OPPS services on the claim.
- CMS pay separately for CPT code 38792 (Sentinel node identification) if there are no separately payable OPPS services on the claim.
- CMS maintain the packaged status of CPT codes 74328 (Endoscopic catheterization of the biliary ductal system, radiological supervision and interpretation), 74329 (Endoscopic catheterization of the pancreatic ductal system, radiological supervision and interpretation), and 74330 (Combined endoscopic catheterization of the biliary and pancreatic ductal systems, radiological supervision and interpretation).
- CMS pay separately for CPT code 75893 (Venous sampling through catheter, with or without angiography, radiological supervision and

interpretation) if there are no separately payable OPPS services on the claim.

- CMS continue to separately pay for CPT code 76000 (Fluoroscopy, up to one hour physician time).

- CMS maintain the packaged status of CPT codes 76001 (Fluoroscopy, physician time more than one hour), 76003 ((Fluoroscopic guidance for needle placement), and 76005 (Fluoroscopic guidance and localization of needle or catheter tip).

- CMS maintain the packaged status of CPT codes 76937 (Ultrasound guidance for vascular access) and 75998 (Fluoroscopic guidance for central venous access device placement, replacement, or removal).

- CMS provide separate payment for CPT codes 94760 (Noninvasive ear or pulse oximetry for oxygen saturation; single determination), 94761 (Noninvasive ear or pulse oximetry for oxygen saturation; multiple determinations), and 94762 (Noninvasive ear or pulse oximetry for oxygen saturation by continuous overnight monitoring) if there are no separately payable OPPS services on the claim.

- CMS pay separately for CPT code 96523 (Irrigation of implanted venous access device) if there are no separately payable OPPS services on the claim.

- CMS maintain the packaged status of HCPCS code G0269 (Placement of occlusive device into either a venous or arterial access site).

- CMS pay separately for HCPCS code P9612 (Catheterization for collection of specimen, single patient) if there are no separately payable OPPS services on the claim.

- CMS bring data to the next APC Panel meeting that show the following: (a) how the costs of packaged items and services are incorporated into the median costs of APCs and (b) how the costs of these packaged items and services influence payments for associated procedures.

- The Packaging Subcommittee continue until the next APC Panel meeting.

For CY 2007, we are proposing to maintain CPT code 0069T as a packaged service and not adopt the APC Panel's recommendation to pay separately for this code. The service uses signal processing technology to detect, interpret, and document acoustical activities of the heart through special sensors applied to a patient's chest. This code was a new Category III CPT code implemented in the CY 2005 OPPS and assigned a new interim status indicator of "N" in the CY 2005 OPPS final rule. The APC Panel recommended packaging CPT code 0069T for CY 2006, and we

accepted that recommendation when we finalized the status indicator "N" assignment to 0069T for CY 2006. This code is indicated as an add-on code to an electrocardiography service, according to the AMA's CY 2006 CPT book. In its presentation to the APC Panel, the manufacturer requested that we pay separately for CPT code 0069T and assign it to APC 0099 (Electrocardiograms), based on its estimated cost and clinical characteristics.

At the APC Panel meeting, the manufacturer stated that the acoustic heart sounds recording and analysis service may be provided with or without a separately reportable electrocardiogram. Members of the APC Panel engaged in extensive discussion of clinical scenarios as they considered whether CPT code 0069T could or could not be appropriately reported alone or in conjunction with several different procedure codes. We note that the parenthetical information following the AMA's code descriptor indicates that CPT code 0069T is to be reported in conjunction with CPT code 93005 (Electrocardiogram, routine ECG with at least 12 leads; tracing only, without interpretation and report). In addition, we do not believe that, based on its expected clinical uses as described by the manufacturer, CPT code 0069T would ever be performed as a sole service without other separately payable OPPS services and payment for CPT code 0069T could always be packaged into payments for those other services. Therefore, we believe that CPT code 0069T is appropriately packaged because it is closely linked to the performance of an ECG, should never be reported alone, and is estimated to require only modest hospital resources. Using CY 2005 claims, we had only 9 single claims for CPT code 0069T, with a median line-item cost of \$1.93, consistent with its low expected cost. Packaging payment for CPT code 0069T is consistent with the principles of a prospective payment system that provides payments for groups of services. To the extent that the acoustic heart sounding recording service may be more frequently provided in the future in association with ECGs or other OPPS services as its clinical indications evolve, we expect that its cost would also be increasingly reflected in the median costs for those other services, particularly ECG procedures.

For CY 2007, we are proposing to accept the APC Panel's recommendation to maintain the packaged status of CPT code 0152T. The service involves the application of computer algorithms and classification technologies to chest x-ray

images to acquire and display information regarding chest x-ray regions that may contain indications of cancer. This code was a new Category III CPT code implemented in the CY 2006 OPPS and assigned a new interim status indicator of "N" in the CY 2006 OPPS final rule with comment period. The code is indicated as an add-on code to chest x-ray CPT codes, according to the AMA's CY 2006 CPT book. In its presentation to the APC Panel, the manufacturer requested that we pay separately for this service and assign it to a New Technology APC with a payment rate of \$15, based on its estimated cost, clinical considerations, and similarity to other image post-processing services that are paid separately.

Under the OPPS we make payment for medically necessary services either separately or packaged into our payments for other services. We agree with the APC Panel that packaged payment for diagnostic chest x-ray computer-aided detection (CAD) under a prospective payment methodology for outpatient hospital services is appropriate because of the close relationship of chest x-ray CAD to chest x-ray services and its projected modest cost. Because 0152T is a new CPT code for CY 2006, we have no CY 2005 hospital claims data available for analysis. To the extent that CAD may be more frequently provided in the future to aid in the review of diagnostic chest x-rays as its clinical indications evolve, we expect that its cost would also be increasingly reflected in the median costs for chest x-ray procedures.

For CY 2007, we are proposing to accept the recommendation of the APC Panel and maintain the packaged status of CPT code 36500. We note that several providers have commented that CPT code 36500 is sometimes billed only with its corresponding radiological supervision and interpretation code, 75893, but with no other separately payable OPPS services. In those cases, the provider would not receive any payment. For CY 2006, we accepted the APC Panel's recommendation to package both CPT codes 36500 and 75893 and to examine claims data. Our initial review of several clinical scenarios submitted by the public seemed to suggest that other separately payable procedures, such as venography, would likely be billed on the same claim. Our claims data indicate that there are usually separately payable codes that are billed on claims

with CPT codes 36500 and 75893. However, we acknowledge that these two codes may occasionally be provided without any separately payable procedures. In these uncommon instances, the provider historically has not received any payment under the OPPS. We also understand that there is a cost associated with registering a patient and providing these services. For CY 2006, we have approximately 160 single claims for CPT code 75893, with a median cost of \$269. Based on the proposal described below for "special" packaged codes, for CY 2007, when CPT codes 36500 and 75893 are billed on a claim with no separately payable OPPS services, CPT code 75893 would become separately payable and would receive payment for APC 0668. In this circumstance, payment for CPT code 36500 would be packaged into the separate payment for CPT code 75893.

For CY 2007, we are proposing to accept the APC Panel's recommendation and pay separately for CPT codes 36540, 36600, 38792, 75893, 94762, and 96523 when any of these codes appear on a claim with no separately payable OPPS services also reported for the same date of service. We will refer to this subset of codes as "special" packaged codes. We acknowledge that there is a cost to the hospital associated with registering and treating a patient, regardless of whether the specific service provided requires minimal or significant hospital resources. While we continue to believe that these "special" packaged codes are almost always provided along with a separately payable service, our claims analyses indicate that there are rare instances when one of these services is provided without another separately payable OPPS service on the claim for the same date of service. In these instances, providers do not currently receive any payment. Therefore, we are proposing to provide payment for the "special" packaged codes listed above when they are billed on a claim without another separately payable OPPS service on the same date. When any of the "special" packaged codes are billed with other codes that are separately payable under the OPPS on the same date of service, the "special" packaged code would be treated as a packaged code, and the cost of the packaged code would be bundled into the costs of the other separately payable services on the claim. The payments that the provider receives for the separately payable services would include the bundled payment for the packaged code(s).

We have heard concerns from the public stating that they are unable to submit claims to CMS that report only packaged codes. We note that although these claims are processed by the OCE and are ultimately rejected for payment, they are received by CMS, and we have cost data for packaged services based upon these claims. However, we recognize that the data used in our analyses to assess the frequencies with which packaged services are provided alone and their median costs are somewhat limited. It is possible that an unknown number of hospitals chose not to submit claims to CMS when a packaged code(s) was provided without other separately payable services on their claims, realizing that they would not receive payment for those claims. While we have been told that some hospitals may bill for a low-level visit if a packaged service only is provided so that they receive some payment for the encounter, we note that providers should bill a low-level visit code in such circumstances only if the hospital provides a significant, separately identifiable low-level visit in association with the packaged service.

Through OCE logic, the PRICER would automatically assign payment for a "special" packaged service reported on a claim if there are no other services separately payable under the OPPS on the claim for the same date of service. In all other circumstances, the "special" packaged codes would be treated as packaged services. We are proposing to assign status indicator "Q" to these "special" packaged codes to indicate that they are usually packaged, except for special circumstances when they are separately payable. Through OCE logic, the status indicator of a "special" packaged code would be changed either to "N" or to the status indicator of the APC to which the code is assigned for separate payment, depending upon the presence or absence of other OPPS services also reported on the claim for the same date. Table 3 below lists the proposed status indicators and APC assignments for these "special" packaged codes when they are separately payable. We note that the payment for these "special" packaged codes is intended to make payment for all of the hospital costs, which may include patient registration and establishment of a medical record, in an outpatient hospital setting even when no separately payable services are provided to the patient on that day.

TABLE 3.—PROPOSED STATUS INDICATORS AND APC ASSIGNMENTS FOR “SPECIAL” PACKAGED CPT CODES

CPT code	Descriptor	Proposed CY 2007 APC	Proposed status indicator	Proposed CY 2007 APC median
36540	Collect blood, venous access device	0624	S	\$32.96
36600	Arterial puncture; withdrawal of blood for diagnosis	0035	T	12.45
38792	Sentinel node identification	0389	S	86.92
75893	Venous sampling through catheter, with or without angiography, radiological supervision and interpretation.	0668	S	393.35
94762	Noninvasive ear or pulse oximetry for oxygen saturation by continuous overnight monitoring.	0443	X	61.39
96523	Irrigation of implanted venous access device	0624	S	32.96

In the case of a claim with two or more “special” packaged codes only reported on a single date of service, the PRICER would assign separate payment only to the “special” packaged code that would receive the highest payment. The other “special” codes would remain packaged and would not receive separate payment.

We will monitor and analyze the claims frequency and claims detail for situations in which these codes are billed alone and then separately paid. This will allow us to determine both which providers are billing these codes most often and under what circumstances these codes are billed. We expect that hospitals scheduling and providing services efficiently to Medicare beneficiaries will continue to generally provide these minor services in conjunction with other medically necessary services.

For CY 2007, we are proposing to accept the APC Panel’s recommendation and maintain the packaged status of CPT codes 74328, 74329, and 74330. The AMA notes that these radiological supervision and interpretation codes should be reported with procedure codes 43260–43272. In fact, our data indicate that these supervision and interpretation codes are billed with 43260–43272 more than 90 percent of the time, indicating their routine use. We believe that some providers may be concerned that although the payment for the endoscopic procedure includes the bundled payment for the supervision and interpretation performed by the radiology department, the payment for the comprehensive service may be directed to the hospital department that performed the endoscopic procedure, rather than to the radiology department. While we understand this concern, the OPPS pays hospital for services provided, and we believe that hospitals are responsible for attributing payments to hospital departments as they believe appropriate. We do not believe that packaging these radiological supervision and

interpretation codes leads to inaccurate payments for the full hospital resources associated with endoscopic retrograde cholangiopancreatography procedures.

For CY 2007, we are proposing to accept the APC Panel’s recommendation to continue to package CPT codes 76001, 76003, and 76005 and to continue to pay separately for CPT code 76000. We received a comment which stated that it was inconsistent to pay separately for CPT code 76000 (Fluoroscopy (separate procedure), up to one hour physician time) but to package CPT code 76001 (Fluoroscopy, physician time more than one hour) when CPT code 76001 appears to be a similar code, except that it is for a longer period of physician time. The Packaging Subcommittee believed that many of the claims that listed CPT code 76001 were erroneously billed, as many of the procedure codes that were billed with CPT code 76001 included fluoroscopy as an integral part of the procedure. In other cases, the Packaging Subcommittee noted that a procedure-specific fluoroscopy code should probably have been billed, instead of CPT code 76001. The Packaging Subcommittee believed that CPT code 76000 could often be provided as a sole service, with no other separately payable procedures. The Packaging Subcommittee recommended that CMS continue to pay separately for CPT code 76000, consistent with the AMA’s definition of this code, which specifies that it is a separate procedure, and to continue to package CPT codes 76001, 76003, and 76005.

For CY 2007, we are proposing to accept the APC Panel’s recommendation to continue to package CPT codes 76937 and 75998. In the CY 2006 OPPS final rule with comment period (70 FR 68544 and 68545), we reviewed in detail the data related to these two codes and promised to share CY 2004 and early CY 2005 data with the Packaging Subcommittee. We reviewed current data with the Packaging Subcommittee, and it recommended that we continue to

package these codes. In summary, we believe that these services would always be provided with another separately payable procedure, so their costs would be appropriately bundled with the definitive vascular access device procedures. The costs for these guidance procedures are relatively low compared to the CY 2007 proposed payment rates for the separately payable services they most frequently accompany. If we were to unpackage CPT codes 76937 and 75998, the single bills available to develop median costs for vascular access device insertion services would be significantly reduced. Therefore, we are proposing to continue to package both CPT codes 76937 and 75998 for CY 2007.

For CY 2007, we are proposing to accept the APC Panel’s recommendation to continue to package HCPCS code G0269. This code should never be billed without another separately payable procedure. Recent data indicate that 94 percent of the time HCPCS code G0269 was billed with either CPT code 93510 or 93526. In addition, the median cost of G0269 is low compared to the costs of the procedures with which it is typically associated.

For CY 2007, we are proposing to continue packaging CPT codes 94760 (Noninvasive ear or pulse oximetry for oxygen saturation; single determination) and 94761 (Noninvasive ear or pulse oximetry for oxygen saturation; multiple determinations) and not adopt the APC Panel’s recommendation to provide separate payment for these services if there are no other separately payable OPPS services on the claim for the same date of service. Our data review revealed that these services are very frequently provided in the OPPS, with over 1 million claims in CY 2005 for the single pulse oximetry determination service and over 400,000 claims for the multiple determinations service. These high frequencies may actually be understated as both of these services are packaged codes, and we have been told that some hospitals may not report the

HCPCS codes for services for which they receive no separate payments. Single and multiple pulse oximetry determinations are almost always provided in association with other services that are separately payable under the OPPS, into which their costs may be appropriately packaged. Specifically, OPPS hospital claims data revealed that out of the total instances of CPT code 94760 appearing on claims used for setting payment rates for this CY 2007 OPPS proposed rule, CPT code 94760 was billed only 4 percent of the time in association with no other separately payable OPPS services, with a median cost of \$14. Using the same data, CPT code 94761 was billed only 7 percent of the time in association with no other separately payable OPPS services, with a median cost of \$36. These pulse oximetry services have a relatively low cost compared with the OPPS services they frequently accompany. If we were to provide separate payment for these pulse oximetry determinations when performed as stand alone procedures by hospitals, we are concerned that hospitals would lose their incentive to provide these basic, low cost, and brief services as efficiently as possible, generally during the same encounters where they are providing other services to the same patients. We believe their appropriate provision as single services should be very rare. Therefore, for CY 2007 we are proposing not to include these codes on the list of "special" packaged codes, so their payment would remain packaged in all circumstances.

For CY 2007, we are proposing to assign status indicator "A" to HCPCS code P9612 and reject the APC Panel's recommendation to pay separately under the OPPS for this code when it is billed without any separately payable OPPS services. This code is currently payable on the clinical lab fee schedule. Its status indicator of "A" would provide payment for the service whenever it is billed, regardless of the presence or absence of other reported services. In addition, for consistency we are proposing to assign status indicator "A" to HCPCS code P9615 as it is also payable on the clinical lab fee schedule. In general, when a code is payable on the clinical lab fee schedule, we defer to that fee schedule and do not assign payment under the OPPS.

The APC Panel Packaging Subcommittee remains active, and additional issues and new data concerning the packaging status of codes will be shared for its consideration as information becomes available. We continue to encourage submission of common clinical

scenarios involving currently packaged HCPCS codes to the Packaging Subcommittee for its ongoing review. Additional detailed suggestions for the Packaging Subcommittee should be submitted to APCPanel@cms.hhs.gov, with "Packaging Subcommittee" in the subject line.

B. Proposed Payment for Partial Hospitalization

(If you choose to comment on issues in this section, please include the caption "Partial Hospitalization" at the beginning of your comment.)

1. Background

Partial hospitalization is an intensive outpatient program of psychiatric services provided to patients as an alternative to inpatient psychiatric care for beneficiaries who have an acute mental illness. A partial hospitalization program (PHP) may be provided by a hospital to its outpatients or by a Medicare-certified community mental health center (CMHC). Section 1833(t)(1)(B)(i) of the Act provides the Secretary with the authority to designate the hospital outpatient services to be covered under the OPPS. The Medicare regulations at 42 CFR 419.21(c) that implement this provision specify that payments under the OPPS will be made for partial hospitalization services furnished by CMHCs. Section 1883(t)(2)(C) of the Act requires that we establish relative payment weights based on median (or mean, at the election of the Secretary) hospital costs determined by 1996 claims data and data from the most recent available cost reports. Payment to providers under the OPPS for PHPs represents the provider's overhead costs associated with the program. Because a day of care is the unit that defines the structure and scheduling of partial hospitalization services, we established a per diem payment methodology for the PHP APC, effective for services furnished on or after August 1, 2000. For a detailed discussion, we refer readers to the April 7, 2000 OPPS final rule with comment period (65 FR 18452).

Historically, the median per diem cost for CMHCs has greatly exceeded the median per diem cost for hospital-based PHPs and has fluctuated significantly from year to year while the median per diem cost for hospital-based PHPs has remained relatively constant (\$200–\$225). We believe that CMHCs may have increased and decreased their charges in response to Medicare payment policies. As discussed in more detail in section II.B.2. of the preamble of this proposed rule and in the CY 2004 OPPS final rule with comment period (68 FR 63470), we

believe that some CMHCs manipulated their charges in order to inappropriately receive outlier payments.

In the CY 2003 OPPS update, the difference in median per diem cost for CMHCs and hospital-based PHPs was so great, \$685 for CMHCs and \$225 for hospital-based PHPs, that we applied an adjustment factor of .583 to CMHC costs to account for the difference between "as submitted" and "final settled" cost reports. By doing so, the CMHC median per diem cost was reduced to \$384, resulting in a combined hospital-based and CMHC PHP median per diem cost of \$273. As with all APCs in the OPPS, the median cost for each APC was scaled relative to the cost of a mid-level office visit and the conversion factor was applied. The resulting per diem rate for PHP for CY 2003 was \$240.03.

In the CY 2004 OPPS update, the median per diem cost for CMHCs grew to \$1,038, while the median per diem cost for hospital-based PHPs was again \$225. After applying the .583 adjustment factor in the CY 2004 proposed rule to the median CMHC per diem cost, the median CMHC per diem cost was \$605. Because the CMHC median per diem cost exceeded the average per diem cost of inpatient psychiatric care, we proposed a per diem rate for CY 2004 based solely on hospital-based PHP data. The proposed PHP per diem for CY 2004, after scaling, was \$208.95. However, by the time we published the OPPS final rule with comment period for CY 2004, we had received updated CCRs for CMHCs. Using the updated CCRs significantly lowered the CMHC median per diem cost to \$440. As a result, we determined that the higher per diem cost for CMHCs was not due to the difference between "as submitted" and "final settled" cost reports, but was the result of excessive increases in charges which may have been done in order to receive higher outlier payments. Therefore, in calculating the PHP median per diem cost for CY 2004, we did not apply the .583 adjustment factor to CMHC costs to compute the PHP APC. Using the updated CCRs for CMHCs, the combined hospital-based and CMHC median per diem cost for PHP was \$303. After scaling, we established the CY 2004 PHP APC of \$286.82.

For CY 2005, the PHP per diem amount was based on 12 months of hospital and CMHC PHP claims data (for services furnished from January 1, 2003, through December 31, 2003). We used data from all hospital bills reporting condition code 41, which identifies the claim as partial hospitalization, and all bills from CMHCs because CMHCs are Medicare

providers only for the purpose of providing partial hospitalization services. We used CCRs from the most recently available hospital and CMHC cost reports to convert each provider's line-item charges as reported on bills, to estimate the provider's cost for a day of PHP services. Per diem costs were then computed by summing the line-item costs on each bill and dividing by the number of days on the bill.

In a Program Memorandum issued on January 17, 2003 (Transmittal A-03-004), we directed fiscal intermediaries to recalculate hospital and CMHC CCRs by April 30, 2003, using the most recently settled cost reports. Following the initial update of CCRs, fiscal intermediaries were further instructed to continue to update a provider's CCR and enter revised CCRs into the outpatient provider specific file. Therefore, for CMHCs, we used CCRs from the outpatient provider specific file.

In the CY 2005 OPPS update, the CMHC median per diem cost was \$310 and the hospital-based PHP median per diem cost was \$215. No adjustments were determined to be necessary and, after scaling, the combined median per diem cost of \$289 was reduced to \$281.33. We believed that the reduction in the CMHC median per diem cost indicated that the use of updated CCRs had accounted for the previous increase in CMHC charges, and represented a more accurate estimate of CMHC per diem costs for PHP.

For the CY 2006 OPPS final rule with comment period, we analyzed 12 months of the most current claims data available for hospital and CMHC PHP services furnished between January 1, 2004, and December 31, 2004. We also used the most currently available CCRs to estimate costs. The median per diem cost for CMHCs was \$154, while the median per diem cost for hospital-based PHPs was \$201. Based on the CY 2004 claims data, the average charge per day for CMHCs was \$760, considerably greater than hospital-based per day costs but significantly lower than what it was in CY 2003 (\$1,184). We believed that a combination of reduced charges and slightly lower CCRs for CMHCs resulted in a significant decline in the CMHC median per diem cost between CY 2003 and CY 2004.

Following the methodology used for the CY 2005 OPPS update, the CY 2006 OPPS update combined hospital-based and CMHC median per diem cost was \$161, a decrease of 44 percent compared to the CY 2005 combined median per diem amount. We believed that this amount was too low to cover the cost for all PHPs.

Therefore, as stated in the CY 2006 OPPS final rule with comment period (70 FR 68548 and 68549), we considered the following three alternatives to our update methodology for the PHP APC for CY 2006 to mitigate this drastic reduction in payment for PHP services: (1) Base the PHP APC on hospital-based PHP data alone; (2) apply a different trimming methodology to CMHC costs in an effort to eliminate the effect of data for those CMHCs that appeared to have excessively increased their charges in order to receive outlier payments; and (3) apply a 15 percent reduction to the combined hospital-based and CMHC median per diem cost that was used to establish the CY 2005 PHP APC. (We refer readers to the CY 2006 OPPS final rule with comment period for a full discussion of the three alternatives (70 FR 68548).) After carefully considering these three alternatives and all comments received on them, we adopted the third alternative for CY 2006. We adopted this alternative because we believed and continue to believe that a reduction in the CY 2005 median per diem cost would strike an appropriate balance between using the best available data and providing adequate payment for a program that often spans 5–6 hours a day. We believe that 15 percent is an appropriate reduction because it recognizes decreases in median per diem costs in both the hospital data and the CMHC data, and also reduces the risk of any adverse impact on access to these services that might result from a large single-year rate reduction. However, we adopted this policy as a transitional measure, and stated in the CY 2006 OPPS final rule with comment period that we would continue to monitor CMHC costs and charges for these services and work with CMHCs to improve their reporting so that payments can be calculated based on better empirical data, consistent with the approach we have used to calculate payments in other areas of the OPPS (70 FR 68548).

To apply this methodology for CY 2006, we reduced \$289 (the CY 2005 combined unscaled hospital-based and CMHC median per diem cost) by 15 percent, resulting in a combined median per diem cost of \$245.65 for CY 2006.

2. Proposed PHP APC Update for CY 2007

For CY 2007, we are proposing to calculate the CY 2007 PHP per diem payment rate using the same update methodology that we adopted in CY 2006. That is, we are proposing to apply an additional 15-percent reduction to the combined hospital-based and CMHC

median per diem cost that was used to establish the CY 2006 per diem PHP payment.

For CY 2007, we analyzed 12 months of data for hospital and CMHC PHP claims for services furnished between January 1, 2005 and December 31, 2005. We also used the most currently available CCRs to estimate costs. Using these CY 2005 claims data, the median per diem cost for CMHCs was \$165 and the median per diem cost for hospital-based PHPs was \$209. Following the methodology used for the CY 2005 update, the CY 2007 combined hospital-based and CMHC median per diem cost is \$172.

While the combined hospital-based and CMHC median per diem cost is about \$10 higher using the CY 2005 data compared to the CY 2004 data (\$172 compared to \$161), we believe this amount is still too low to cover the cost for PHPs. We continue to believe that the policy we adopted for CY 2006—a 15-percent reduction applied to the current median cost—provides an appropriate decrease in median per diem costs for both the hospital and CMHC data. Therefore, for CY 2007, we are proposing an additional 15 percent reduction to the combined hospital-based and CMHC median per diem cost. We will continue to monitor and work with CMHCs to improve their reporting. If CMHC data continues to be a problem, we would consider using data from hospital-based PHPs only.

To calculate the CY 2007 APC PHP per diem cost, we reduced \$245.65 (the CY 2005 combined hospital-based and CMHC median per diem cost of \$289 reduced by 15 percent) by 15 percent, which resulted in a combined median per diem cost of \$208.80.

3. Proposed Separate Threshold for Outlier Payments to CMHCs

In the November 7, 2003 final rule with comment period (68 FR 63469), we indicated that, given the difference in PHP charges between hospitals and CMHCs, we did not believe it was appropriate to make outlier payments to CMHCs using the outlier percentage target amount and threshold established for hospitals. There was a significant difference in the amount of outlier payments made to hospitals and CMHCs for PHP. In addition, further analysis indicated that using the same OPPS outlier threshold for both hospitals and CMHCs did not limit outlier payments to high cost cases and resulted in excessive outlier payments to CMHCs. Therefore, for CYs 2004, 2005, and 2006, we established a separate outlier threshold for CMHCs. For CYs 2004 and 2005, we designated a portion of the

estimated 2.0 percent outlier target amount specifically for CMHCs, consistent with the percentage of projected payments to CMHCs under the OPPS in each of those years, excluding outlier payments. For CY 2006, we set the estimated outlier target at 1.0 percent and allocated a portion of that 1.0 percent, 0.6 percent (or 0.006 percent of total OPPS payments), to CMHCs for PHP services. The CY 2006 CMHC outlier threshold is met when the cost of furnishing services by a CMHC exceeds 3.40 times the PHP APC payment amount. The CY 2006 OPPS outlier payment percentage is 50 percent of the amount of costs in excess of the threshold.

The separate outlier threshold for CMHCs became effective January 1, 2004, and has resulted in more commensurate outlier payments. In CY 2004, the separate outlier threshold for CMHCs resulted in \$1.8 million in outlier payments to CMHCs. In CY 2005, the separate outlier threshold for CMHCs resulted in \$0.5 million in outlier payments to CMHCs. In contrast, in CY 2003, more than \$30 million was paid to CMHCs in outlier payments. We believe this difference in outlier payments indicates that the separate outlier threshold for CMHCs has been successful in keeping outlier payments to CMHCs in line with the percentage of OPPS payments made to CMHCs.

As discussed in section II.B.2. of this preamble, the CY 2005 CMHC data produce median per diem costs too low to use for the CY 2007 partial hospitalization payment rate. Due to the continued volatility of the CMHC charge data, we are proposing to maintain the existing outlier threshold for CMHCs for CY 2007 at 3.40 times the APC payment amount and the CY 2007 outlier payment percentage applicable to costs in excess of the threshold at 50 percent.

As noted in section II.G. of this preamble, for CY 2007, we are proposing to continue our policy of setting aside 1.0 percent of the aggregate total payments under the OPPS for outlier payments. We are proposing that a portion of that 1.0 percent, an amount equal to 0.25 percent of outlier payments and 0.0025 percent of total OPPS payments would be allocated to CMHCs for PHP service outliers. As discussed in section II.G. of this preamble, we again are proposing to set a dollar threshold in addition to an APC multiplier threshold for OPPS outlier payments. However, because the PHP is the only APC for which CMHCs may receive payment under the OPPS, we would not expect to redirect outlier payments by imposing a dollar threshold. Therefore, we are not

proposing to set a dollar threshold for CMHC outliers. As noted above, we are proposing to set the outlier threshold for CMHCs for CY 2007 at 3.40 percent times the APC payment amount and the CY 2007 outlier payment percentage applicable to costs in excess of the threshold at 50 percent.

CMS and the Office of the Inspector General are continuing to monitor the excessive outlier payments to CMHCs.

C. Proposed Conversion Factor Update for CY 2007

(If you choose to comment on issues in this section, please include the caption "Conversion Factor" at the beginning of your comment.)

Section 1833(t)(3)(C)(ii) of the Act requires us to update the conversion factor used to determine payment rates under the OPPS on an annual basis. Section 1833(t)(3)(C)(iv) of the Act provides that, for CY 2007, the update is equal to the hospital inpatient market basket percentage increase applicable to hospital discharges under section 1886(b)(3)(B)(iii) of the Act.

The forecast of the hospital market basket increase for FY 2007 published in the IPPS proposed rule on April 25, 2006 is 3.4 percent (71 FR 24148). To set the OPPS proposed conversion factor for CY 2007, we increased the CY 2006 conversion factor of \$59,511, as specified in the November 10, 2005 final rule with comment period (70 FR 68551), by 3.4 percent.

In accordance with section 1833(t)(9)(B) of the Act, we further adjusted the conversion factor for CY 2006 to ensure that the revisions we are making to our updates for a revised wage index and expanded rural adjustment are made on a budget neutral basis. We calculated a budget neutrality factor of 0.999908021 for wage index changes by comparing total payments from our simulation model using the FY 2007 IPPS proposed wage index values to those payments using the current (FY 2006) IPPS wage index values. To reflect the inclusion of essential access community hospitals (EACHs) as rural SCHs (discussed in section II.F. of this preamble), we calculated an additional budget neutrality factor of 0.999883468 for the rural adjustment, including EACHs. For CY 2007, we estimate that allowed pass-through spending would equal approximately \$43.2 million, which represents 0.13 percent of total OPPS projected spending for CY 2007. The proposed conversion factor also is adjusted by the difference between the 0.17 percent pass-through dollars set-aside in CY 2006 and the 0.13 percent estimate for CY 2007 pass-through

spending. Finally, proposed payments for outliers remain at 1.0 percent of total payments for CY 2007.

The proposed market basket increase update factor of 3.4 percent for CY 2007, the required wage index budget neutrality adjustment of approximately 0.999908021, the return of 0.04 percent for the difference in the pass-through set-aside, and the proposed adjustment for the rural payment adjustment for rural SCHs, including rural EACHs, of 0.999883468 result in a proposed conversion factor for CY 2007 of \$61,551.

D. Proposed Wage Index Changes for CY 2007

(If you choose to comment on issues in this section, please include the caption "OPPS: Wage Indices" at the beginning of your comment.)

Section 1833(t)(2)(D) of the Act requires the Secretary to determine a wage adjustment factor to adjust, for geographic wage differences, the portion of the OPPS payment rate and the copayment standardized amount attributable to labor and labor-related cost. This adjustment must be made in a budget neutral manner. As we have done in prior years, we are proposing to adopt the IPPS wage indices and extend these wage indices to hospitals that participate in the OPPS but not the IPPS (referred to in this section as "non-IPPS" hospitals).

As discussed in section II.A. of this preamble, we standardize 60 percent of estimated costs (labor-related costs) for geographic area wage variation using the IPPS wage indices that are calculated prior to adjustments for reclassification to remove the effects of differences in area wage levels in determining the OPPS payment rate and the copayment standardized amount.

As published in the original OPPS April 7, 2000 final rule with comment period (65 FR 18545), OPPS has consistently adopted the final IPPS wage indices as the wage indices for adjusting the OPPS standard payment amounts for labor market differences. Thus, the wage index that applies to a particular hospital under the IPPS will also apply to that hospital under the OPPS. As initially explained in the September 8, 1998 OPPS proposed rule, we believed and continue to believe that using the IPPS wage index as the source of an adjustment factor for OPPS is reasonable and logical, given the inseparable, subordinate status of the hospital outpatient within the hospital overall. In accordance with section 1886(d)(3)(E) of the Act, the IPPS wage index is updated annually. In this proposed rule, we are using the

proposed FY 2007 hospital IPPS wage indices published in the **Federal Register** on April 25, 2006, which include the wage indices proposed to be in effect through March 31, 2007, and those proposed to be in effect on or after April 1, 2007, to accommodate the expiring reclassification provisions under section 508 of Pub. L. 108–173, to determine the wage adjustments for the OPPS payment rate and the copayment standardized amount for CY 2007. However, in accordance with our established policy, we are proposing to use the FY 2007 final version of these wage indices to determine the wage adjustments for the OPPS payment rate and copayment standardized amount that we will publish in our final rule for CY 2007.

On May 17, 2006 (71 FR 28644), in response to a court order in *Bellevue Hosp. Ctr. v. Leavitt*, we published a second IPPS proposed rule that would revise the methodology for calculating the occupational mix adjustment for FY 2007. We proposed to replace in full the descriptions of the data and methodology that would be used in calculating the occupational mix adjustment discussed in the first FY 2007 IPPS proposed rule. The second proposed rule also states that, because of the collection of new occupational mix data, we would publish the FY 2007 occupational mix adjusted wage index tables and related impacts on the CMS Web site shortly after we publish the FY 2007 IPPS final rule, and in advance of October 1, 2006. The weights and factors would also be published on the CMS Web site after the FY 2007 IPPS final rule, but in advance of October 1, 2006. (71 FR 28650). Thus, for purposes of determining OPPS wage indices, readers are also directed to refer to the wage index tables that are published after the FY 2007 IPPS final rule.

We note that the FY 2007 IPPS wage indices continue to reflect a number of changes implemented in FY 2005 as a result of the revised Office of Management and Budget (OMB) standards for defining geographic statistical areas, the implementation of an occupational mix adjustment as part of the wage index, and new wage adjustments provided for under Pub. L. 108–173. The following is a brief summary of the proposed changes in the FY 2005 IPPS wage indices, continued for FY 2007, and any adjustments that we are applying to the OPPS for CY 2007. We refer the reader to the FY 2007 IPPS proposed rule (71 FR 24074 through 24091) for a detailed discussion of the proposed changes to the wage indices. Readers should refer to our

proposed rule published May 17, 2006, for proposed changes to the occupational mix adjustment and related issues (71 FR 28644–28653). In this proposed rule, we are not reprinting the proposed FY 2007 IPPS wage indices. We also refer readers to the CMS Web site for the OPPS at <http://www.cms.hhs.gov/providers/hopps>. At this Web site, the reader will find a link to the proposed FY 2007 IPPS wage indices tables. (However, as noted above, these tables may change as a result of the May 17, 2006 occupational mix proposed rule discussed above.)

1. *The proposed continued use of the Core Based Statistical Areas (CBSAs) issued by the OMB as revised standards for designating geographical statistical areas based on the 2000 Census data, to define labor market areas for hospitals for purposes of the IPPS wage index.* The OMB revised standards were published in the **Federal Register** on December 27, 2000 (65 FR 82235), and OMB announced the new CBSAs on June 6, 2003, through an OMB bulletin. In the FY 2005 IPPS final rule, CMS adopted the new OMB definitions for wage index purposes. In the FY 2007 IPPS proposed rule, we again stated that hospitals located in MSAs will be urban and hospitals that are located in Micropolitan Areas or outside CBSAs will be rural. To help alleviate the decreased payments for previously urban hospitals that became rural under the new geographical definitions, we allowed these hospitals to maintain for the 3-year period from FY 2005 through FY 2007, the wage index of the MSA where they previously had been located. To be consistent with the IPPS, we will continue the policy we began in CY 2005 of applying the same urban-to-rural transition to non-IPPS hospitals paid under the OPPS. That is, we would maintain the wage index of the MSA where the hospital was previously located for purposes of determining a wage index for CY 2007. Beginning in FY 2008, the 3-year transition will end and these hospitals will receive their statewide rural wage index. However, hospitals paid under the IPPS will be eligible to apply for reclassification.

For the occupational mix adjustment, we refer readers to CMS's May 17, 2006 occupational mix proposed rule discussed above. Under this proposed rule, wage indices would be adjusted 100 percent for occupational mix. In addition, as stated above, CMS plans that wage index tables and other adjustment factors would be published after publication of the FY 2007 IPPS final rule, but prior to October 1, 2006.

As noted above, for purposes of estimating an adjustment for the OPPS

payment rates to accommodate geographic differences in labor costs in this proposed rule, we have used the wage indices identified in the FY 2007 IPPS proposed rule. For the CY 2007 OPPS final rule, we plan to use the revised FY 2007 IPPS wage indices that will be fully adjusted for differences in occupational mix using the new survey data and available after October 1, 2006. In all cases, we will use the final FY 2007 IPPS wage indices, which include the wage indices to be in effect through March 31, 2007, and those to be in effect on or after April 1, 2007, with any subsequent corrections, for calculating OPPS payment in CY 2007.

2. *The reclassifications of hospitals to geographic areas for purposes of the wage index.* For purposes of the OPPS wage index, we are proposing to adopt all of the IPPS reclassifications for FY 2007, including reclassifications that the Medicare Geographic Classification Review Board (MGCRRB) approved under the one-time appeal process for hospitals under section 508 of Pub. L. 108–173. We note that section 508 reclassifications will terminate March 31, 2007, and that this expiration, along with the calendar year operating period of OPPS, impacts the calculation of the OPPS payment and the budget neutrality adjustment for the wage index. In the FY 2007 IPPS proposed rule (71 FR 24085 through 24087), we proposed procedural rules for hospitals that wished to reclassify for the second half of FY 2007 (April 1, 2007, through September 30, 2007) under section 1886(d)(10) of the Act. These rules essentially provided procedures for some hospitals to retain section 508 reclassifications for the first half of FY 2007 and also be eligible to maintain an approved reclassification under section 1886(d)(10) for the second half of FY 2007. Rather than calculating one wage index that reflected all final reclassification adjustments, we proposed two separate wage indices for FY 2007, one to be in effect October 1 through March 31, 2007, and one to be in effect April 1 through September 30, 2007.

These procedural rules also impact a hospital's eligibility to receive the out-migration wage adjustment, discussed in greater detail in section III.I. of the FY 2007 IPPS proposed rule (71 FR 24087) and under section II.D.4. of this preamble. A hospital cannot receive an out-migration wage adjustment if it is reclassified under section 1886(d)(10) of the Act. Hospitals declining reclassification status for any part of the year become eligible to receive the out-migration wage adjustment if they are located in an adjustment county.

Because the OPSS operates on a calendar year (January 1 through December 31) and not a fiscal year, the expiring reclassification status under section 508 of Pub. L. 108–173 results in different wage indices for OPSS for the first quarter of CY 2007 (January 1, 2007, through March 31, 2007) and the last three quarters of CY 2007 (April 1, 2007, through December 31, 2007).

3. *The out-migration wage adjustment to the wage index.* In FY 2007 IPPS proposed rule (71 FR 24087), we discussed the out-migration adjustment under section 505 of Pub. L. 109–173 for counties under this adjustment. Hospitals paid under the IPPS located in the qualifying section 505 “out-migration” counties receive a wage index increase unless they have already been otherwise reclassified. (See the IPPS FY 2007 proposed rule for further information on out-migration.) For OPSS purposes, we propose to continue our policy from CY 2006 to allow non-IPPS hospitals paid under the OPSS to qualify for out-migration adjustment if they are located in a section 505 out-migration county. Because non-IPPS hospitals cannot reclassify, they are eligible for the out-migration wage adjustment. Tables identifying counties eligible for the out-migration adjustment will be published after the FY 2007 IPPS final rule and CMS plans to publish them in advance of October 1, 2006. These tables will reflect updated county listing to reflect changes to the occupation mix adjustment made in response to *Bellevue* court case discussed above. Because we are proposing to adopt the final FY 2007 IPPS wage index, we will adopt any changes in a hospital’s classification status that would make them either eligible or ineligible for the out-migration wage adjustment both through March 31, 2007, and on or after April 1, 2007.

With the exception of reclassifications resulting from the implementation of the one-time appeal process under section 508 of Pub. L. 108–173, all changes to the wage index resulting from geographic labor market area reclassifications or other adjustments must be incorporated in a budget neutral manner. Accordingly, in calculating the OPSS budget neutrality estimates for CY 2007, in this proposed rule, we have included the wage index changes that would result from MGCRB reclassifications, implementation of section 505 of Pub. L. 108–173, and other refinements made in the FY 2007 IPPS proposed rule, such as the hold

harmless provision for hospitals changing status from urban to rural under the new CBSA geographic statistical area definitions. However, section 508 sets aside \$900 million to implement the section 508 reclassifications. We considered the increased Medicare payments that the section 508 reclassifications would create in both the IPPS and OPSS when we determined the impact of the one-time appeal process. Because the increased OPSS payments already count against the \$900 million limit, we did not consider these reclassifications when we calculated the proposed OPSS budget neutrality adjustment.

Under the procedural rules described under section II.D.3. of this proposed rule above and in section III.H.5. of the FY 2007 IPPS proposed rule (71 FR 24085) regarding expiring section 508 reclassifications, different wage indices may be in effect for the first quarter of the calendar year and the last three quarters of the calendar year. These rules have implications for budget neutrality adjustments. Any additional payment attributable to reclassifications due to section 508 between January 1 and April 1, 2007, must be excluded from a budget neutrality adjustment, and all other adjustments to the wage index are subject to budget neutrality. Rather than calculating two different conversion factors, with different budget neutrality adjustments, we are proposing to calculate one budget neutrality adjustment that reflects the combined adjustments required for the first quarter and last three quarters of the calendar year, respectively. We followed the same approach in the FY 2007 IPPS proposed rule (71 FR 24087).

E. Proposed Statewide Average Default CCRs

(If you choose to comment on issues in this section, please include the caption “OPSS: Cost-to-Charge Ratios” at the beginning of your comment.)

CMS uses CCRs to determine outlier payments, payments for pass-through devices, and monthly interim transitional corridor payments under the OPSS. Some hospitals do not have a valid CCR. These hospitals include, but are not limited to, hospitals that are new and have not yet submitted a cost report, hospitals that have a CCR that falls outside predetermined floor and ceiling thresholds for a valid CCR, or hospitals that have recently given up their all-inclusive rate status. Last year, we updated the default urban and rural CCRs for CY 2006 in our final rule, published on November 10, 2005 (70 FR

68553 through 68555). In this proposed rule, we are proposing to update the default ratios for CY 2007 using the most recent cost report data.

We calculated the statewide default CCRs using the same overall CCRs that we use to adjust charges to costs on claims data. Please refer to section II.A.1.c. of this preamble for a discussion of our proposed revision to the overall CCR calculation. Table 4 lists the proposed CY 2007 default urban and rural CCRs by State and compares them to last year’s default CCRs. These CCRs are the ratio of total costs to total charges from each provider’s most recently submitted cost report, for those cost centers relevant to outpatient services weighted by Medicare Part B charges. We also adjusted these ratios to reflect final settled status by applying the differential between settled to submitted costs and charges from the most recent pair of settled to submitted cost reports.

For this proposed rule, 81.79 percent of the submitted cost reports represented data for CY 2004. We only used valid CCRs to calculate these default ratios. That is, we removed the CCRs for all-inclusive hospitals, CAHs, and hospitals in Guam and the U.S. Virgin Islands because these entities are not paid under the OPSS, or in the case of all-inclusive hospitals, because their CCRs are suspect. We further identified and removed any obvious error CCRs and trimmed any outliers. We limited the hospitals used in the calculation of the default CCRs to those hospitals that billed for services under the OPSS during CY 2004.

Finally, we calculated an overall average CCR, weighted by a measure of volume for CY 2004, for each State except Maryland. This measure of volume is the total lines on claims and is the same one that we use in our impact tables. For Maryland, we used an overall weighted average CCR for all hospitals in the Nation as a substitute for Maryland CCRs, which appear in Table 4. Very few providers in Maryland are eligible to receive payment under the OPSS, which limits the data available to calculate an accurate and representative CCR. The observed differences between last year’s default statewide CCRs and the proposed CCRs are a combination of the general decline in the ratio between costs and charges widely observed in the cost report data and the change in the proposed overall CCR calculation.

BILLING CODE 4120-01-C

As stated above, CMS uses default statewide CCRs for several groups of hospitals, including, but not limited to, hospitals that are new and have not yet submitted a cost report, hospitals that have a CCR that falls outside predetermined floor and ceiling thresholds for a valid CCR, and hospitals that have recently given up their all-inclusive rate status. Current OPPS policy also requires hospitals that experience a change of ownership, but that do not accept assignment of the previous hospital's provider agreement, to use the previous provider's CCR.

For CY 2007, we are proposing to apply this treatment of using the default statewide CCR to include an entity that has not accepted assignment of an existing hospital's provider agreement in accordance with 42 CFR 489.18, and that has not yet submitted its first Medicare cost report. We are proposing that this policy be effective for hospitals experiencing a change of ownership on or after January 1, 2007. We believe that a hospital that has not accepted assignment of an existing hospital's provider agreement is similar to a new hospital that will establish its own costs and charges. We believe that the hospital that has chosen not to accept assignment may have different costs and charges than the existing hospital. Furthermore, we believe that the hospital should be provided time to establish its own costs and charges. Therefore, we are proposing to use the default statewide CCR to determine cost-based payments until the hospital has submitted its first Medicare cost report.

F. OPPS Payments to Certain Rural Hospitals

(If you choose to comment on issues in this section, please include the caption "OPPS: Rural Hospitals Hold Harmless Transitional Payments" at the beginning of your comment.)

1. Hold Harmless Transitional Payment Changes Made by Pub. L. 109-171 (DRA)

When the OPPS was implemented, every provider was eligible to receive an additional payment adjustment (transitional corridor payment) if the payments it received for covered OPD services under the OPPS were less than the payments it would have received for the same services under the prior reasonable cost-based system. Section 1833(t)(7) of the Act provides that the transitional corridor payments are temporary payments for most providers, with two exceptions, to ease their transition from the prior reasonable cost-based payment system to the OPPS system. Cancer hospitals and children's hospitals receive the transitional corridor payments on a permanent basis. Section 1833(t)(7)(D)(i) of the Act originally provided for transitional corridor payments to rural hospitals with 100 or fewer beds for covered OPD services furnished before January 1, 2004. However, section 411 of Pub. L. 108-173 amended section 1833(t)(7)(D)(i) of the Act to extend these payments through December 31, 2005, for rural hospitals with 100 or fewer beds. Section 411 also extended the transitional corridor payments to sole community hospitals (SCHs) located in rural areas for services

furnished during the period that begins with the provider's first cost reporting period beginning on or after January 1, 2004, and ends on December 31, 2005. Accordingly, the authority for making transitional corridor payments under section 1833(t)(7)(D)(i) of the Act, as amended by section 411 of Pub. L. 108-173, expired for rural hospitals having 100 or fewer beds and SCHs located in rural areas on December 31, 2005.

Section 5105 of Pub. L. 109-171 reinstituted the hold harmless transitional outpatient payments (TOPs) for covered OPD services furnished on or after January 1, 2006, and before January 1, 2009, for rural hospitals having 100 or fewer beds that are not SCHs. When the OPPS payment is less than the payment the provider would have received under the previous reasonable cost-based system, the amount of payment is increased by 95 percent of the amount of the difference between those two payment systems for CY 2006, by 90 percent of the amount of that difference for CY 2007, and by 85 percent of the amount of that difference for CY 2008.

For CY 2006, we have implemented section 5106 of Pub. L. 109-171 through Transmittal 877, issued on February 24, 2006. We did not specifically address whether TOPs payments apply to EACHs, which are considered to be SCHs under section 1886(d)(5)(D)(iii)(III) of the Act. Accordingly, under the statute, EACHs are treated as SCHs. Therefore, we believe that EACHs are not eligible for TOPs payment under Pub. L. 109-171. We are proposing to update § 419.70(d)

to reflect the requirements of Pub. L. 109-171.

2. Proposed Adjustment for Rural SCHs Implemented in CY 2006 Related to Pub. L. 108-173 (MMA)

(If you choose to comment on issues in this section, please include the caption "OPPS: Rural SCH Payments" at the beginning of your comment.)

In the CY 2006 OPPS final rule with comment period (70 FR 68556), we finalized a payment increase for rural SCHs of 7.1 percent for all services and procedures paid under the OPPS, excluding drugs, biologicals, brachytherapy seeds, and services paid under pass-through payment policy in accordance with section 1833(t)(13)(B) of the Act, as added by section 411 of Pub. L. 108-173. Section 411 gave the Secretary the authority to make an adjustment to OPPS payments for rural hospitals effective January 1, 2006 if justified by a study of the difference in costs by APC between hospitals in rural and urban areas. Our analysis showed a difference in costs only for rural SCHs and we implemented a payment adjustment for those hospitals beginning January 1, 2006.

We recently became aware that we did not specifically address whether the adjustment applies to EACHs, which are considered to be SCHs pursuant to section 1886(d)(5)(D)(iii)(III) of the Act. Thus, under the statute, EACHs are treated as SCHs. Currently, fewer than 10 hospitals are classified as EACHs. As of CY 1998, under section 4201(c) of Pub. L. 105-33, a hospital can no longer become newly classified as an EACH. Therefore, for purposes of receiving this rural adjustment, we are clarifying that EACHs are treated as SCHs for purposes of receiving this adjustment, assuming these entities otherwise meet the rural adjustment criteria.

This adjustment is budget neutral and applied before calculating outliers and coinsurance. We also stated that we would not reestablish the adjustment amount on an annual basis, but that we might review the adjustment in the future and, if appropriate, would revise the adjustment. For CY 2007, we are proposing to continue our current policy of a budget neutral 7.1 percent payment increase for rural SCHs for specified services.

G. Proposed CY 2007 Hospital Outpatient Outlier Payments

(If you choose to comment on issues in this section, please include the caption "Outlier Payments" at the beginning of your comment.)

Currently, the OPPS pays outlier payments on a service-by-service basis.

For CY 2006, the outlier threshold is met when the cost of furnishing a service or procedure by a hospital exceeds 1.75 times the APC payment amount and exceeds the APC payment rate plus a \$1,250 fixed-dollar threshold. We introduced a fixed-dollar threshold in CY 2005 in addition to the traditional multiple threshold in order to better target outliers to those high cost and complex procedures where a very costly service could present a hospital with significant financial loss. If a provider meets both of these conditions, the multiple threshold and the fixed-dollar threshold, the outlier payment is calculated as 50 percent of the amount by which the cost of furnishing the service exceeds 1.75 times the APC payment rate. For a discussion on CMHC outliers, see section II.B.3. of the preamble to this proposed rule.

As explained in our CY 2006 OPPS final rule with comment period (70 FR 68561), we set our projected target for aggregate outlier payments at 1.0 percent of aggregate total payments under the OPPS. Our outlier thresholds were set so that estimated CY 2006 aggregate outlier payments would equal 1.0 percent of aggregate total payments under the OPPS. In our CY 2006 OPPS final rule with comment period (70 FR 68563), we also published total outlier payments as a percent of total expenditures for past years. At this time, we do not have a complete set of CY 2005 claims in order to produce this number for CY 2005. We will report on CY 2005 outlier payments in our CY 2007 OPPS final rule.

For CY 2007, we are proposing to continue our policy of setting aside 1.0 percent of aggregate total payments under the OPPS for outlier payments. A portion of that 1.0, an amount equal to 0.25 percent of outlier payments and 0.0025 percent of total OPPS payments would be allocated to CMHCs for partial hospitalization program service outliers.

In order to ensure that estimated CY 2007 aggregate outlier payments would equal 1.0 percent of estimated aggregate total payments under the OPPS, we are proposing that the outlier threshold be set so that outlier payments are triggered when the cost of furnishing a service or procedure by a hospital exceeds 1.75 times the APC payment amount and exceeds the APC payment rate plus a \$1,825 fixed-dollar threshold.

We calculated the fixed-dollar threshold for this proposed rule using the same methodology as we did in CY 2006 except we used the revised overall CCR calculation discussed in section II.A.1.c. of this preamble. As discussed in section II.A.1.c. of this preamble, we

discovered that the calculation of the overall CCR that the fiscal intermediaries are using to determine outlier payment and payment for services paid at charges reduced to cost differs from the overall CCR that we traditionally use to model the outlier thresholds. We discovered this during our calculations of the outlier threshold for our CY 2006 final rule with comment period, and we indicated in our preamble discussion for that rule, that we may revisit the threshold estimate in light of identified differences in the overall CCR calculation. Because, on average, the overall CCR calculation used by the fiscal intermediaries results in higher CCRs than those estimated using our "traditional" CCR sets, the outlier threshold is too low. The OPPS impact table in section XXVII. of this preamble demonstrates an estimated payment differential of 0.25 percent of total spending for hospital outlier payments in CY 2006 because of the differences in overall CCR calculations. The revised overall CCR calculation that we are proposing for CY 2007 aligns the two CCR calculations by removing allied and nursing health costs for those hospitals with paramedical education programs from the fiscal intermediary's CCR calculation and weighting our "traditional" calculation by total Medicare Part B charges. We expected this proposed change in the overall CCR calculation to raise the outlier threshold.

The claims that we use to model each OPPS lag by 2 years. For this proposed rule, we used CY 2005 claims to model the CY 2007 OPPS. In order to estimate CY 2007 outlier payments for this proposed rule, we inflated the charges on the CY 2005 claims using the same inflation factor of 1.1515 that we used to estimate the IPPS fixed-dollar outlier threshold for the IPPS FY 2007 proposed rule. For 1 year, the inflation factor is 1.0757. The methodology for determining this charge inflation factor was discussed in the FY 2007 IPPS proposed rule (71 FR 24150). As we stated in our CY 2005 final rule with comment period, we believe that the use of this charge inflation factor is appropriate for OPPS because, with the exception of the routine service cost centers, hospitals use the same cost centers to capture costs and charges across inpatient and outpatient services (69 FR 65845, November 15, 2004). As also noted in the FY 2006 IPPS final rule, we believe that a charge inflation factor is more appropriate than an adjustment to costs because this methodology closely captures how

actual outlier payments are made and calculated (70 FR 47495, August 12, 2005). We then applied the revised overall CCR that we calculated from each hospital's most recent cost report (CMS-2552-96) and, if the cost report was not settled, we adjusted it by a settled-to-submitted ratio. We simulated aggregated outlier payments using these costs for several different fixed-dollar thresholds holding the 1.75 multiple constant until the total outlier payments equaled 1.0 percent of aggregated total OPPS payments. We estimate that a threshold of \$1,825 combined with the multiple threshold of 1.75 times the APC payment rate would allocate 1.0 percent of aggregated total OPPS payments to outlier payments.

For CMHCs, in CY 2007 we project the outlier threshold is met when the cost of furnishing a service or procedure by a CMHC exceeds 3.40 times the APC payment rate. If a CMHC provider meets this condition, the outlier payment is calculated as 50 percent of the amount by which the cost exceeds 3.40 times the APC payment rate. We are proposing to continue the same threshold policy for CY 2007 as we have established for CY 2006. An explanation for this proposed policy is discussed in section II.B.3. the preamble of this proposed rule.

The following is an example of an outlier calculation for CY 2007 under our proposed policy. A hospital charges \$20,000 for a procedure. The wage adjusted, and rural adjusted, if applicable, APC payment for the procedure is \$3,500. Using the provider's CCR of 0.35, the estimated cost to the hospital is \$7,000 ($0.35 \times \$20,000$). To determine whether this provider is eligible for outlier payments for this procedure, the provider must determine whether the cost for the service exceeds both the APC outlier cost threshold ($1.75 \times \text{APC payment}$) and the fixed-dollar threshold (\$1,825 + APC payment). In this example, the provider meets both criteria:

(1) \$7,000 exceeds \$6,125 ($1.75 \times \$3,500$)

(2) \$7,000 exceeds \$5,325 ($\$3,500 + \$1,825$)

To calculate the outlier payment, which is 50 percent of the amount by which the cost of furnishing the service exceeds 1.75 times the APC rate, subtract \$6,125 ($1.75 \times \$3,500$) from \$7,000 (resulting in \$825). The provider is eligible for 50 percent of the difference, in this case \$437.50 ($\$825/2$). The formula is $(\text{cost} - (1.75 \times \text{APC payment rate}))/2$.

H. Calculation of the Proposed OPPS National Unadjusted Medicare Payment

(If you choose to comment on issues in this section, please include the caption "OPPS: National Unadjusted Medicare Payment" at the beginning of your comment.)

The basic methodology for determining prospective payment rates for OPD services under the OPPS is set forth in existing regulations at § 419.31 and § 419.32. The payment rate for services and procedures for which payment is made under the OPPS is the product of the conversion factor calculated in accordance with section II.C. of this proposed rule and the relative weight determined under section II.A. of this proposed rule. Therefore, the national unadjusted payment rate for APCs contained in Addendum A to this proposed rule and for HCPCS codes to which payment under the OPPS has been assigned in Addendum B to this proposed rule (Addendum B is provided as a convenience for readers) was calculated by multiplying the proposed CY 2007 scaled weight for the APC by the proposed CY 2007 conversion factor.

However, to determine the payment that will be made in a calendar year under the OPPS to a specific hospital for an APC for a service other than a drug, in a circumstance in which the multiple procedure discount does not apply, we take the following steps:

Step 1. Calculate 60 percent (the labor-related portion) of the national unadjusted payment rate. Since the initial implementation of the OPSS, we have used 60 percent to represent our estimate of that portion of costs attributable, on average, to labor. (Refer to the April 7, 2000 final rule with comment period (65 FR 18496 through 18497) for a detailed discussion of how we derived this percentage.)

Step 2. Determine the wage index area in which the hospital is located and identify the wage index level that applies to the specific hospital. The wage index values assigned to each area reflect the new geographic statistical areas as a result of revised OMB standards (urban and rural) to which hospitals are assigned for FY 2007 under the IPPS, reclassifications through the Medicare Classification Geographic Review Board, section 1866(d)(8)(B) "Lugar" hospitals, and section 401 of Pub. L. 108-173, and the reclassifications of hospitals under the one-time appeals process under section 508 of Pub. L. 108-173. The wage index values include the occupational mix adjustment described in section II.D. of this proposed rule that was developed

for the proposed FY 2007 IPPS payment rates. We note that the original proposal for calculating the FY 2007 IPPS wage index has been recently changed. (Refer to the May 17, 2006 FY 2007 IPPS proposed rule, 71 FR 28644.) Final FY 2007 IPPS wage indices will be adjusted 100 percent for differences in occupational mix. Although we have not incorporated those changes in this proposed rule due to the availability of new survey data, as is our practice, we propose to adopt changes made to the FY 2007 IPPS wage index values after they have been finalized.

Step 3. Adjust the wage index of hospitals located in certain qualifying counties that have a relatively high percentage of hospital employees who reside in the county, but who work in a different county with a higher wage index, in accordance with section 505 of Pub. L. 108-173. Addendum L contains the qualifying counties and the proposed wage index increase developed for the FY 2007 IPPS. This step is to be followed only if the hospital has chosen not to accept reclassification under Step 2 above.

Step 4. Multiply the applicable wage index determined under Steps 2 and 3 by the amount determined under Step 1 that represents the labor-related portion of the national unadjusted payment rate.

Step 5. Calculate 40 percent (the nonlabor-related portion) of the national unadjusted payment rate and add that amount to the resulting product of Step 4. The result is the wage index adjusted payment rate for the relevant wage index area.

Step 6. If a provider is a SCH, as defined in § 419.92, and located in a rural area, as defined in § 412.63(b), or is treated as being located in a rural area under § 412.103 of the Act, multiply the wage index adjusted payment rate by 1.071 to calculate the total payment.

I. Proposed Beneficiary Copayments for CY 2007

(If you choose to comment on issues in this section, please include the caption "OPPS: Beneficiary Copayments" at the beginning of your comment.)

1. Background

Section 1833(t)(3)(B) of the Act requires the Secretary to set rules for determining copayment amounts to be paid by beneficiaries for covered OPD services. Section 1833(t)(8)(C)(ii) of the Act specifies that the Secretary must reduce the national unadjusted copayment amount for a covered OPD service (or group of such services) furnished in a year in a manner so that the effective copayment rate

(determined on a national unadjusted basis) for that service in the year does not exceed specified percentages. For all services paid under the OPSS in CY 2007, and in calendar years thereafter, the specified percentage is 40 percent of the APC payment rate (section 1833(t)(8)(C)(ii)(V) of the Act). Section 1833(t)(3)(B)(ii) of the Act provides that, for a covered OPD service (or group of such services) furnished in a year, the national unadjusted coinsurance amount cannot be less than 20 percent of the OPD fee schedule amount.

2. Proposed Copayment for CY 2007

For CY 2007, we are proposing to determine copayment amounts for new and revised APCs using the same methodology that we implemented for CY 2004 (Refer to the November 7, 2003 OPSS final rule with comment period, 68 FR 63458.) The proposed unadjusted copayment amounts for services payable under the OPSS that would be effective January 1, 2007, are shown in Addendum A and Addendum B of this proposed rule.

3. Calculation of a Proposed Adjusted Copayment Amount for an APC Group for CY 2007

To calculate the OPSS adjusted copayment amount for an APC group, take the following steps:

Step 1. Calculate the beneficiary payment percentage for the APC by dividing the APC's national unadjusted copayment by its payment rate. For example, using APC 0001, \$7.00 is 23 percent of \$30.14.

Step 2. Calculate the wage adjusted payment rate for the APC, for the provider in question, as indicated in section II.H. of this preamble. Calculate the rural adjustment for eligible providers as indicated in section II.H. of this preamble.

Step 3. Multiply the percentage calculated in Step 1 by the payment rate calculated in Step 2. The result is the wage-adjusted copayment amount for the APC.

III. Proposed OPSS Ambulatory Payment Classification (APC) Group Policies

A. Proposed Treatment of New HCPCS and CPT Codes

(If you choose to comment on issues in this section, please include the

caption "OPSS: New HCPCS and CPT Codes" at the beginning of your comment.)

1. Proposed Treatment of New HCPCS Codes Included in the Second and Third Quarterly OPSS Updates for CY 2006

During the second and third quarters of CY 2006, we created a total of four new Level II HCPCS codes that were not addressed in the November 10, 2005 final rule with comment period that updated the CY 2006 OPSS. We have designated the payment status of those codes and added them either through the April update (Transmittal 896, dated March 24, 2006) or the July update of the CY 2006 OPSS (Transmittal 970, dated May 30, 2006). In this proposed rule, we are soliciting public comments on the status indicators and APC assignments of these services, which are listed in Table 5. Because of the timing of this proposed rule, those codes implemented through the July 2006 OPSS update are not included in Addendum B of this proposed rule, while those codes based upon the April 2006 OPSS update are included in Addendum B. We intend to finalize the assignments for all of these services in the OPSS CY 2007 final rule.

TABLE 5.—NEW HCPCS CODES IMPLEMENTED IN APRIL OR JULY 2006

HCPCS code	Description	Assigned status indicator	Assigned APC	Implementation date
C9227	Injection, micafungin sodium, per 1 mg	G	9227	April 1, 2006.
C9228	Injection, tigecycline, per 1 mg	G	9228	April 1, 2006.
C9229	Injection ibandronate sodium	G	9229	July 1, 2006.
C9230	Injection, abatacept	G	9230	July 1, 2006.

2. Proposed Treatment of New CY 2007 Category I and III CPT Codes and Level II HCPCS Codes

As has been our practice in the past, we implement new Category I and III CPT codes and new Level II HCPCS codes, which are released in the fall of each year for annual updating, effective January 1 in the final rule updating the OPSS for the following calendar year. These codes are flagged with Comment Indicator "NI" in Addendum B of the OPSS final rule to indicate that we are assigning them an interim payment status which is subject to public comment following publication of the final rule that implements the annual OPSS update. (See the discussion immediately below concerning our modified policy for implementing new Category I and III mid-year CPT codes.) We are proposing to continue this recognition and process for CY 2007.

New Category I and III CPT codes and new Level II HCPCS codes, effective January 1, 2007, will be designated in Addendum B of the CY 2007 OPSS final rule with Comment Indicator "NI." The status indicator, the APC assignment, or both for all such codes flagged with Comment Indicator "NI," will be open to public comment. We will respond to all comments received in a subsequent final rule.

3. Proposed Treatment of New Mid-Year CPT Codes

Twice each year, the AMA issues Category III CPT codes, which the AMA defines as temporary codes for emerging technology, services, and procedures. (In addition, AMA issues mid-year Category I CPT codes for vaccines for which FDA approval is imminent, to ensure timely availability of a code.) The AMA establishes these codes to allow collection of data specific to the

service described by the code, as these services could otherwise only be reported using a Category I CPT unlisted code. The AMA releases Category III CPT codes in January, for implementation beginning the following July, and in July, for implementation beginning the following January. Prior to CY 2006, we treated new Category III CPT codes implemented in July of the previous year or January of the OPSS update year in the same manner that new Category I CPT codes and new Level II HCPCS codes implemented in January of the OPSS update year are treated; that is, we provided APC and status indicator assignments or both in the final rule updating the OPSS for the following calendar year. New Category I and Category III CPT codes, as well as new Level II HCPCS codes, were flagged with Comment Indicator "NI" in Addendum B of the final rule to indicate that we were assigning them an

interim payment status which was subject to public comment following publication of the final rule that implemented the annual OPPS update.

As stated in the CY 2006 OPPS final rule with comment period (70 FR 68567), we modified our process for implementing the Category III codes that the AMA releases each January for implementation in July to ensure timely collection of data pertinent to the services described by the codes; to

ensure patient access to the services the codes describe; and to eliminate potential redundancy between Category III CPT codes and some of the C-codes, which are payable under the OPPS and created by us in response to applications for new technology services. Therefore, beginning on July 1, 2006, we implemented in the OPPS seven Category III CPT codes that the AMA released in January 2006 for implementation in July 2006. The codes

are shown in Table 6. These codes are not included in Addendum B of this proposed rule, which is based upon the April 2006 OPPS update. In this proposed rule, we are soliciting public comments on the status indicators and, if applicable, the APC assignments of these services. We intend to finalize the assignments of these Category III CPT codes implemented in July 2006 in the CY 2007 OPPS final rule.

TABLE 6.—CATEGORY III CPT CODES IMPLEMENTED IN JULY 2006

HCCPS code	Long descriptor	Status indicator	APC
0155T	Laparoscopy, surgical, implantation or replacement of gastric stimulation electrodes, lesser curvature (i.e., morbid obesity).	T	0130
0156T	Laparoscopy, surgical, revision or removal of gastric stimulation electrodes, lesser curvature (i.e., morbid obesity).	T	0130
0157T	Laparotomy, implantation or replacement of gastric stimulation electrodes, lesser curvature (i.e., morbid obesity).	C	
0158T	Laparotomy, revision or removal of gastric stimulation electrodes, lesser curvature (i.e., morbid obesity).	C	
0159T	Computer aided detection, including computer algorithm analysis of MRI image data for lesion detection/characterization, pharmacokinetic analysis, with further physician review for interpretation, breast MRI.	N	
0160T	Therapeutic repetitive transcranial magnetic stimulation treatment planning	X	0340
0161T	Therapeutic repetitive transcranial magnetic stimulation treatment delivery and management, per session.	X	0340

Some of the new Category III CPT codes describe services that we have determined to be similar in clinical characteristics and resource use to HCPCS codes in an existing APC. In these instances, we may assign the Category III CPT code to the appropriate clinical APC. Other Category III CPT codes describe services that we have determined are not compatible with an existing clinical APC, yet are appropriately provided in the hospital outpatient setting. In these cases, we may assign the Category III CPT code to what we estimate is an appropriately priced New Technology APC. In other cases, we may assign a Category III CPT code one of several nonseparately payable status indicators, including N, C, B, or E, which we believe is appropriate for the specific code. We expect that we will have received applications for new technology status for some of the services described by new Category III CPT codes, which may assist us in determining appropriate APC assignments. If the AMA establishes a Category III CPT code for a service for which an application has been submitted to CMS for new technology status, CMS may not have to issue a temporary Level II HCPCS code to describe the service, as has often been the case in the past when Category III CPT codes were only recognized by the OPPS on an annual basis.

Therefore, for CY 2007, we are proposing to include in Addendum B of the OPPS CY 2007 final rule the new Category III CPT codes and the new Category I CPT codes for vaccines released in January 2006 for implementation on July 1, 2006 (through the OPPS quarterly update process) and the Category III and vaccine Category I CPT codes released in July 2006 for implementation on January 1, 2007. However, only those new Category III codes and the new vaccine codes implemented effective January 1, 2007, will be flagged with Comment Indicator “NI” in Addendum B of the CY 2007 final rule to indicate that we are assigning them an interim payment status which is subject to public comment. As discussed earlier, Category III codes and Category I vaccine codes implemented in July 2006, which are listed in Table 6, are subject to comment through this proposed rule and their status will be made final in the CY 2007 OPPS final rule.

B. Proposed Changes—Variations Within APCs

(If you choose to comment on issues in this section, please include the caption “OPPS: 2 Times Rule” at the beginning of your comment.)

1. Background

Section 1833(t)(2)(A) of the Act requires the Secretary to develop a classification system for covered hospital outpatient services. Section 1833(t)(2)(B) of the Act provides that this classification system may be composed of groups of services, so that services within each group are comparable clinically and with respect to the use of resources. In accordance with these provisions, we developed a grouping classification system, referred to as the Ambulatory Payment Classification Groups (or APCs), as set forth in § 419.31 of the regulations. We use Level I and Level II HCPCS codes and descriptors to identify and group the services within each APC. The APCs are organized such that each group is homogeneous both clinically and in terms of resource use. Using this classification system, we have established distinct groups of surgical, diagnostic, and partial hospitalization services, as well as medical visits. We also have developed separate APC groups for certain medical devices, drugs, biologicals, radiopharmaceuticals, and brachytherapy devices.

We have packaged into each procedure or service within an APC group the costs associated with those items or services that are directly related and integral to performing a procedure

or furnishing a service. Therefore, we do not make separate payment for packaged items or services. For example, packaged items and services include: (1) Use of an operating, treatment, or procedure room; (2) use of a recovery room; (3) most observation services; (4) anesthesia; (5) medical/surgical supplies; (6) pharmaceuticals (other than those for which separate payment may be allowed under the provisions discussed in section V of this preamble); and (7) incidental services such as venipuncture. Our packaging methodology is discussed in section II.A. of this proposed rule.

Under the OPPS, we pay for hospital outpatient services on a rate-per-service basis that varies according to the APC group to which the service is assigned. Each APC weight represents the hospital median cost of the services included in that APC relative to the hospital median cost of the services included in APC 0606. The APC weights are scaled to APC 0606 because we are proposing it to be the middle level clinic visit APC (that is, where the Level III Clinic Visit HCPCS code of five proposed levels of clinic visits is assigned), and because middle level clinic visits are among the most frequently furnished services in the outpatient hospital setting. See section II.A.3. of this preamble for a complete discussion of the reasons for choosing APC 0606 as the basis for scaling the APC relative weights.

Section 1833(t)(9)(A) of the Act requires the Secretary to review the components of the OPPS not less than annually and to revise the groups and relative payment weights and make other adjustments to take into account changes in medical practice, changes in technology, and the addition of new services, new cost data, and other relevant information and factors. Section 1833(t)(9)(A) of the Act, as amended by section 201(h) of the BBRA of 1999, also requires the Secretary, beginning in CY 2001, to consult with an outside panel of experts to review the APC groups and the relative payment weights (the APC Panel recommendations for specific services for CY 2007 OPPS and our responses to them are discussed in section III.D. of this preamble).

Finally, as discussed earlier, section 1833(t)(2) of the Act provides that, subject to certain exceptions, the items and services within an APC group cannot be considered comparable with respect to the use of resources if the highest median (or mean cost, if elected

by the Secretary) for an item or service in the group is more than 2 times greater than the lowest median cost for an item or service within the same group (referred to as the "2 times rule"). We use the median cost of the item or service in implementing this provision. The statute authorizes the Secretary to make exceptions to the 2 times rule in unusual cases, such as low-volume items and services.

2. Application of the 2 Times Rule

In accordance with section 1833(t)(2) of the Act and § 419.31 of the regulations, we annually review the items and services within an APC group to determine, with respect to comparability of the use of resources, if the median of the highest cost item or service within an APC group is more than 2 times greater than the median of the lowest cost item or service within that same group ("2 times rule"). We make exceptions to this limit on the variation of costs within each APC group in unusual cases such as low-volume items and services.

During the APC Panel's March 1–2, 2006 meeting, we presented median cost and utilization data for services furnished during the period of January 1, 2005, through September 30, 2005, about which we had concerns or about which the public had raised concerns regarding their APC assignments, status indicator assignments, or payment rates. The discussions of service-specific issues, the APC Panel recommendations if any, and our proposals for CY 2007 are contained in section III.D. of this preamble.

In addition to the assignment of specific services to APCs which we discussed with the APC Panel, we also identified APCs with 2 times violations that were not specifically discussed with the APC Panel but for which we are proposing changes to their HCPCS codes' APC assignments in Addendum B of this proposed rule. In these cases, to eliminate a 2 times violation, we reassigned the codes to APCs that contained services that were similar with regard to both resource use and clinical homogeneity. We also are proposing changes to the status indicators for some codes that are not specifically and separately discussed in this proposed rule. In these cases, we changed the status indicators for some codes because we thought that another status indicator more accurately describes their payment status from an

OPPS perspective based on our CY 2007 proposed policies.

Addendum B of this proposed rule identifies with a comment indicator "CH" those HCPCS codes for which we are proposing a change to the APC assignment or status indicator as assigned in the January 2006 Addendum B. These proposed reassignments of APC or status indicator are subject to public comment under this proposed rule.

3. Exceptions to the 2 Times Rule

As discussed earlier, we may make exceptions to the 2 times limit on the variation of costs within each APC group in unusual cases such as low-volume items and services. Taking into account the APC changes that we are proposing for CY 2007 based on the APC Panel recommendations discussed in section III.D. of this preamble, the proposed changes to status indicators and APC assignments as identified in Addendum B, and the use of CY 2005 claims data to calculate the median costs of procedures classified in the APCs, we reviewed all the APCs to determine which APCs would not satisfy the 2 times rule. We used the following criteria to decide whether to propose exceptions to the 2 times rule for affected APCs:

- Resource homogeneity
- Clinical homogeneity
- Hospital concentration
- Frequency of service (volume)
- Opportunity for upcoding and code fragments.

For a detailed discussion of these criteria, refer to the April 7, 2000 OPPS final rule with comment period (65 FR 18457).

Table 7 lists the APCs that we are proposing to exempt from the 2 times rule based on the criteria cited above. For cases in which a recommendation by the APC Panel appeared to result in or allow a violation of the 2 times rule, we generally accepted the APC Panel's recommendation because those recommendations were based on explicit consideration of resource use, clinical homogeneity, hospital specialization, and the quality of the data used to determine the APC payment rates that we are proposing for CY 2007. The median costs for hospital outpatient services for these and all other APCs which were used in development of this proposed rule can be found on the CMS Web site: <http://www.cms.hhs.gov>.

TABLE 7.—PROPOSED APC EXCEPTIONS TO THE 2 TIMES RULE FOR CY 2007

APC	APC description
0007	Level II Incision & Drainage.
0010	Level I Destruction of Lesion.
0019	Level I Excision/Biopsy.
0024	Level I Skin Repair.
0031	Smoking Cessation Services.
0040	Percutaneous Implantation of Neurostimulator Electrodes, Excluding Cranial Nerve.
0043	Closed Treatment Fracture Finger/Toe/Trunk.
0058	Level I Strapping and Cast Application.
0060	Manipulation Therapy.
0081	Non-Coronary Angioplasty or Atherectomy.
0085	Level II Electrophysiologic Evaluation.
0093	Vascular Reconstruction/Fistula Repair without Device.
0105	Revision/Removal of Pacemakers, AICD, or Vascular.
0111	Blood Product Exchange.
0112	Apheresis, Photopheresis, and Plasmapheresis.
0204	Level I Nerve Injections.
0235	Level I Posterior Segment Eye Procedures.
0245	Level I Cataract Procedures without IOL Insert.
0251	Level I ENT Procedures.
0252	Level II ENT Procedures.
0274	Myelography.
0303	Treatment Device Construction.
0307	Myocardial Positron Emission Tomography (PET) Imaging.
0312	Radioelement Applications.
0323	Extended Individual Psychotherapy.
0330	Dental Procedures.
0409	Red Blood Cell Tests.
0418	Insertion of Left Ventricular Pacing Elect.
0432	Health and Behavior Services.
0437	Level II Drug Administration.
0604	Level I Clinic Visits.
0664	Level I Proton Beam Radiation Therapy.

C. New Technology APCs

(If you choose to comment on issues in this section, please include the caption “New Technology APCs” at the beginning of your comment.)

1. Introduction

In the November 30, 2001 final rule (66 FR 59903), we finalized changes to the time period a service was eligible for payment under a New Technology APC. Beginning in CY 2002, we retain services within New Technology APC groups until we gather sufficient claims data to enable us to assign the service to a clinically appropriate APC. This policy allows us to move a service from a New Technology APC in less than 2 years if sufficient data are available. It also allows us to retain a service in a New Technology APC for more than 3 years if sufficient data upon which to base a decision for reassignment have not been collected. We note that the cost bands for new technology APCs range from \$0 to \$50 in increments of \$10, from \$50 to \$100 in an increment of \$50, from \$100 through \$2,000 in intervals of \$100, and from \$2,000 through \$6,000 in intervals of \$500. These intervals, which are in two parallel sets of New Technology APCs, one with status indicator “S” and the

other with status indicator “T,” allow us to price new technology services more appropriately and consistently.

Every year we receive many requests for higher payment amounts for specific procedures under the OPPTS because they require the use of expensive equipment. We are taking this opportunity to reiterate our response in general to the issue of hospitals’ capital expenditures as they relate to the OPPTS and Medicare.

Under the OPPTS, one of our goals is to make payments that are appropriate for the services that are necessary for treatment of Medicare beneficiaries. The OPPTS like other Medicare payment systems is budget neutral and so, although we do not pay full hospital costs for procedures, we believe that our payment rates generally reflect the costs that are associated with providing care to Medicare beneficiaries in cost-efficient settings. Further, we believe that our rates are adequate to assure access to services for most beneficiaries.

For many emerging technologies there is a transitional period during which utilization may be low, often because providers are first learning about the techniques and their clinical utility. Quite often, the requests for higher payment amounts are for new

procedures in that transitional phase. These requests, and their accompanying estimates for expected Medicare beneficiary or total patient utilization, often reflect very low rates of patient use, resulting in high per use costs for which requesters believe Medicare should make full payment. Medicare does not, and we believe should not, assume responsibility for more than its share of the costs of procedures based on Medicare beneficiary projected utilization and does not set its payment rates based on initial projections of low utilization for services that require expensive capital equipment. For the OPPTS, we rely on hospitals to make their business decisions regarding acquisition of high cost capital equipment taking into consideration their knowledge about their entire patient base (Medicare beneficiaries included) and an understanding of Medicare’s and other payers’ payment policies.

We note that in a budget neutral environment, payments may not fully cover hospitals’ costs, including those for the purchase and maintenance of capital equipment. We rely on providers to make their decisions regarding the acquisition of high cost equipment with the understanding that the Medicare

program must be careful to establish its initial payment rates for new services that lack hospital claims data based on realistic utilization projections for all such services delivered in cost-efficient hospital outpatient settings. As the OPSS acquires claims data regarding hospital costs associated with new procedures, we will regularly examine the claims data and any available new information regarding the clinical aspects of new procedures to confirm that our OPSS payments remain appropriate for procedures as they transition into mainstream medical practice.

2. Proposed Movement of Procedures From New Technology APCs to Clinical APCs

As we explained in the November 30, 2001 final rule (66 FR 59897), we generally keep a procedure in the New Technology APC to which it is initially assigned until we have collected data sufficient to enable us to move the procedure to a clinically appropriate APC. However, in cases where we find that our original New Technology APC assignment was based on inaccurate or inadequate information, or where the New Technology APCs are restructured, we may, based on more recent resource utilization information (including claims data) or the availability of refined New Technology APC bands, reassign the procedure or service to a different New Technology APC that most appropriately reflects its cost.

The procedures presented below represent services assigned to New Technology APCs for CY 2006 for which we believe we have sufficient data to reassign them to clinically appropriate APCs for CY 2007. Therefore, we are proposing to reassign them to clinically appropriate APCs as indicated specifically in our discussion and in Table 10.

a. Nonmyocardial Positron Emission Tomography (PET) Scans

Positron emission tomography (PET) is a noninvasive diagnostic imaging procedure that assesses the level of metabolic activity and perfusion in various organ systems of the human body. PET serves an important role in the clinical care of many Medicare beneficiaries. We recognize that PET is a useful technology in many instances and want to ensure that the technology remains available to Medicare beneficiaries when medically necessary. Since August 2000, nonmyocardial PET procedures have been assigned to a New Technology APC in the OPSS. As a result of our collection of 5 full years worth of hospital claims data, we

believe that we have sufficient data to assign nonmyocardial PET scans to a clinically appropriate APC for CY 2007. Note that we assign a service to a New Technology APC only when we do not have adequate claims data upon which to determine the median cost of performing the procedure, and we expect that the service's clinical or resource characteristics will differ from all other procedures already assigned to clinical APCs. Each New Technology APC represents a particular cost band (for example, \$1,400–1,500), and we assign procedures to these APCs based on our analysis of the procedures' costs. Payment for items assigned to a New Technology APC is the midpoint of the band (for example, \$1,450). We move a service from a New Technology APC to a clinical APC when we have adequate claims data upon which to base its future payment rate. In the case of nonmyocardial PET services, we believe that we now have sufficient data to assign them to a clinically appropriate APC.

We last proposed changes in payments for nonmyocardial PET procedures for CY 2005. At that time, while we had large numbers of single claims reflecting that the median cost of PET procedures was substantially lower than their CY 2004 payment rate of \$1,450, we had some concerns that abruptly lowering the payment rate for nonmyocardial PET scans could hinder access to this technology. Therefore, we proposed three options to develop the CY 2005 payment rate for these procedures in the August 16, 2004 proposed rule (69 FR 50468). Specifically, we proposed the following options and invited comments on each of the options.

- Option 1: Continue in CY 2005 the CY 2004 assignment of the scans to New Technology APC 1516 prior to assigning to a clinical APC.
- Option 2: Assign the PET scans to a clinically appropriate APC priced according to the median cost of the scans based on CY 2003 claims data. Under this option, we would assign PET scans to APC 0420, PET imaging.
- Option 3: Transition assignment to a clinical APC in CY 2006 by setting payment in CY 2005 based on a 50/50 blend of the median cost of PET scans and their CY 2004 New Technology payment rate. We would assign the scans to New Technology APC 1513 for a blended transition payment.

Based on comments received, we decided to set the CY 2005 payment rate for nonmyocardial PET scans based on option 3 at \$1,150. We further stated in the November 15, 2004 final rule with comment period (69 FR 65716) that we

believed there were sufficient claims data to assign nonmyocardial PET scans to a single clinical APC. However, to minimize any potential impact that a payment reduction resulting from this move might have had on beneficiary access to this technology, we set the CY 2005 OPSS payment rate for nonmyocardial PET scans based on a 50/50 blend of their median cost based on CY 2003 claims data and the payment rate of the CY 2004 New Technology APC to which they were assigned. Therefore, nonmyocardial PET scans were assigned to New Technology APC 1513 (New Technology—Level XIV (\$1,000–\$1,200) for a blended payment rate of \$1,150 in CY 2005. In CY 2005, in the context of an expansion in Medicare coverage for PET procedures, we also simplified coding for PET services by instructing hospitals to bill several more general CPT codes in place of numerous disease-specific G-codes. We continued with these coding and payment methodologies in CY 2006.

For CY 2007, we are proposing the assignment of nonmyocardial PET procedures to a clinically appropriate APC as we have several years of robust and stable claims data upon which to determine the median cost of performing these procedures. Based on analysis of our claims data, the median costs for nonmyocardial PET scans have ranged between approximately \$852 and \$924 for claims submitted from CY 2002 through CY 2005, yet our payment rates have been significantly higher than the median costs throughout this same time period. We have observed significant growth in the number of nonmyocardial PET scans performed on Medicare beneficiaries, from about 48,000 in CY 2002, to 68,000 in CY 2003, and once again to 121,000 in CY 2004, the year when we first reduced the OPSS nonmyocardial PET scan payment rates from \$1,450 to \$1,150. For the CY 2007 proposed rule, we have about 45,000 single PET claims from CY 2005, yielding a stable median cost for PET procedures of about \$867. Although the CY 2005 claims data are not yet complete, the apparent decline in numbers of claims for nonmyocardial PET scans alone in the CY 2005 claims data is likely related to the large number of claims for PET/CT scans now observed in CY 2005, when codes for that combined service were first available for billing. In fact, the total number of PET scans provided to Medicare beneficiaries in CY 2005, defined as PET scans and PET/CT scans, continued to climb to almost 128,000 based upon the CY 2005 claims data available for this proposed rule, in

comparison to final claims for CY 2004 of approximately 121,000 for PET scans.

Therefore, we are proposing to assign nonmyocardial PET scans, in particular, CPT codes 78608, 78811, 78812, and 78813, to new APC 0308 (Nonmyocardial PET Imaging) with a median cost of \$865.30 for CY 2007. We are confident, in the face of our stable median costs for nonmyocardial PET scans over the past 4 years, that their additional 2-year period of receiving New Technology APC payments at the blended rate of \$1,150 for CY 2005 and CY 2006 as we transitioned the services to a clinical APC should ensure continued availability of this technology now that its services will be paid through a clinical APC for CY 2007, like most other OPPS services.

b. PET/Computed Tomography (CT) Scans

Since August 2000, we have paid separately for PET and CT scans. In CY 2004, the payment rate for nonmyocardial PET scans was \$1,450, while it was \$193 for typical diagnostic CT scans. Prior to CY 2005, nonmyocardial PET and the PET portion of PET/CT scans were described by G-codes for billing to Medicare. Several commenters to the November 15, 2004 final rule with comment period (69 FR 65682) urged that we replace the G-codes for nonmyocardial PET and PET/CT scan procedures with the established CPT codes. These commenters stated that movement to the established CPT codes would greatly reduce the burden on hospitals of tracking and billing the G-codes which are not recognized by other payers and would allow for more uniform hospital billing of these scans. We agreed with the commenters that movement from the G-codes to the established CPT codes for nonmyocardial PET and PET/CT scans would allow for more uniform billing of these scans. As a result of a Medicare national coverage determination (Publication 100-3, Medicare Claims Processing Manual section 220.6) that was made effective January 28, 2005, we discontinued numerous G-codes that described myocardial PET and nonmyocardial PET procedures and replaced them with the established CPT codes. The CY 2005 payment rate for concurrent PET/CT scans using the CPT codes 78814, 78815, and 78816 was \$1,250, which was \$100 higher than the payment rate for PET scans alone. These PET/CT CPT codes were placed in New Technology APC 1514 (New Technology—Level XIV, \$1,200–\$1,300) for CY 2005. We continued with these coding and payment methodologies in CY 2006.

For CY 2007, we are proposing the assignment of concurrent PET/CT scans, specifically CPT codes 78814, 78815, and 78816, to a clinically appropriate APC because we believe we have adequate claims data from CY 2005 upon which to determine the median cost of performing these procedures. Based on our analysis of CY 2005 single claims, the median cost of PET/CT scans is \$865 from over almost 64,000 single claims. Comparison of the median cost of nonmyocardial PET procedures of \$867 with the median cost of concurrent PET/CT scans demonstrates that the median costs of PET scans with or without concurrent CT scans for attenuation correction and anatomical localization are about the same. This result is not unexpected because many newer PET scanners also have the capability of rapidly acquiring CT images for attenuation correction and anatomical localization, sometimes with simultaneous image acquisition.

To explore the possibility that the similarity in median costs for PET and PET/CT procedures could be related to different groups of hospitals billing the two types of PET services based on their available equipment, rather than the true comparability of hospital resources required for the two types of services, we analyzed claims from a subset of hospitals billing both PET and PET/CT scans in CY 2005. This analysis looked at 362 providers who billed a PET HCPCS code and a PET/CT CPT code at least one time each during CY 2005. The median cost from this subset of claims for nonmyocardial PET scans was \$890, in comparison with \$863 for the PET/CT scans. Thus, we observed the same close relationship between median costs of PET and PET/CT procedures from hospitals billing both sets of services as we did for all OPPS CY 2005 claims available for this proposed rule for these scans. We believe that our claims data accurately reflect the comparable hospital resources required to provide PET and PET/CT procedures, and the scans have obvious clinical similarity as well. Therefore, for CY 2007 we are proposing to assign the CPT codes for PET/CT scans, along with the CPT codes for PET scans, to the same new APC 0308 (Nonmyocardial PET Imaging) with a median cost of \$865.30.

We note that we have been paying separately for fluorodeoxyglucose (FDG), the radiopharmaceutical described by HCPCS code A9552 (F18 fdg), that is commonly administered during nonmyocardial PET and PET/CT procedures. For CY 2007, we are proposing to continue paying separately for FDG, according to the methodology described in section V. (Proposed OPPS

Payment Changes for Drugs, Biologicals, and Radiopharmaceuticals) of the preamble of this proposed rule.

c. Stereotactic Radiosurgery (SRS) Treatment Delivery Services

For the past several years, we have collected hospital costs associated with the planning and delivery of stereotactic radiosurgery services (hereafter referred to as SRS). As new technology emerged in the field of SRS, public commenters urged us to recognize cost differences associated with the various methods of SRS planning and delivery. Beginning in CY 2001, we established G-codes to capture any such cost variations associated with the various methods of planning and delivery of SRS. For CY 2004, based on comments received regarding the G-codes used for SRS, we made some modifications to the coding (68 FR 63431 and 63432). First, we received comments regarding the descriptors for HCPCS codes G0173 and G0251, indicating that these codes did not distinguish image-guided robotic SRS systems from other forms of linear accelerator-based SRS systems to account for the cost variation in delivering these services. In response, for CY 2004 we created two new G-codes (G0339 and G0340) to describe complete and fractionated image-guided robotic linear accelerator-based SRS treatment. We placed HCPCS code G0339 in APC 1528 at a payment rate of \$5,250, and HCPCS code G0340 in APC 1525 at a payment rate of \$3,750. Second, we received comments on HCPCS code G0242 which requested that we modify the code descriptor to avoid confusion and misuse of the code, and also to appropriately describe treatment planning for both linear accelerator-based and Cobalt 60-based SRS treatments. In response, for CY 2004, we created HCPCS code G0338 to distinguish linear accelerator-based SRS treatment planning from Cobalt 60-based SRS treatment planning. We placed HCPCS code G0338 in APC 1516 at a payment rate of \$1,450.

In CY 2005, there were no changes to the coding or New Technology APC payment rates for the SRS planning or treatment delivery codes from CY 2004. We stated in the CY 2005 OPPS final rule with comment period (69 FR 65711) that any SRS code changes would be premature without cost data to support a code restructuring. Therefore, we maintained HCPCS codes G0173, G0242, G0243, G0251, G0338, G0339, and G0340 in their respective New Technology APCs for CY 2005. We further stated that until we had completed an analysis of claims for these procedure codes, we would

continue to maintain HCPCS codes G0173, G0242, G0243, G0251, G0338, G0339, and G0340 in their respective New Technology APCs for CY 2005 as we considered the adoption of CPT codes to describe all SRS procedures for CY 2006.

At its February 2005 meeting, the APC Panel discussed the clinical and resource cost similarities between planning for Cobalt 60-based and linear accelerator-based SRS. The APC Panel also discussed the use of CPT codes instead of specific G-codes to describe the services involved in SRS planning, noting the clinical similarities in radiation treatment planning regardless of the mode of treatment delivery. Given the APC Panel's thoughts about the possible need for CMS to separately track planning for SRS, the APC Panel eventually recommended that we create a single HCPCS code to encompass both Cobalt 60-based and linear accelerator-based SRS planning. Because we had no programmatic need to separately track SRS planning services, in the CY 2006 OPPTS final rule with comment period (70 FR 68585) we discontinued HCPCS codes G0242 and G0338 for the reporting of charges for SRS planning and instructed hospitals to bill charges for SRS planning, regardless of the mode of treatment delivery, using all of the available CPT codes that most accurately reflect the services provided.

Furthermore, the APC Panel recommended that we make no changes to the coding or APC placement of SRS treatment delivery HCPCS codes G0173, G0243, G0251, G0339, and G0340 for CY 2006. In addition, presenters to the APC Panel described ongoing deliberations among interested professional societies around the descriptions and coding for SRS. The APC Panel and presenters suggested that we wait for the outcome of these deliberations before making any significant changes to SRS delivery coding or payment rates. To date, we have received no report from participating professional societies as to the outcome of such deliberations.

In response to comments for CY 2006 regarding the mature technology and stable median costs associated with

Cobalt 60-based SRS treatment delivery described by G0243, we reassigned G0243 from a New Technology APC to new clinical APC 0127 (Stereotactic Radiosurgery) with a payment rate of \$7,305 established based on the CY 2004 median cost of G0243. We made no changes for CY 2006 to the New Technology APC assignments of the other four SRS treatment codes, specifically, G0173, G0251, G0339, and G0340.

Since we first established the full group of SRS treatment delivery codes in CY 2004, we now have 2 years of hospital claims data reflecting the costs of each of these services. Based on analysis of our claims data from CY 2004 and CY 2005, the median costs for linear accelerator-based SRS treatment delivery procedures as described by HCPCS codes G0173, G0251, G0339, and G0340 have been stable and generally lower than our New Technology APC payment rates in effect from CY 2004 through CY 2006. Specifically, the payment rate for HCPCS code G0173, a complete course of non-image guided, non-robotic linear accelerator-based SRS treatment, has been set at \$5,250, yet our claims data indicate a median cost of \$2,802 from CY 2004 claims and \$3,665 from CY 2005 claims, based upon hundreds of single claims from each year. For HCPCS code G0251, fractionated non-image guided, non-robotic linear accelerator-based SRS treatment, the corresponding median costs have been \$1,028 and \$1,386 based upon over 1,000 single claims from each year, and relatively consistent with the procedure's New Technology APC payment of \$1,150. With respect to the complete course of therapy in one session or first fraction of image-guided, robotic linear accelerator-based SRS, described by HCPCS code G0339, its median costs have been \$4,917 and \$4,809 for CY 2004 and CY 2005 respectively, based upon over 500 single bills in each year, in comparison with the procedure's payment rate of \$5,250 for those years. Lastly, the median costs of HCPCS code G0340, the second

through fifth sessions of image-guided, robotic linear accelerator-based SRS treatment, have been \$2,502 for CY 2004 and \$2,917 for CY 2005 as determined by over 1,000 single bills during each year, significantly lower than its payment rate of \$3,750. Unquestionably, the claims data from CY 2004 and CY 2005 for linear accelerator-based SRS treatment delivery services reveal highly stable median costs from year to year based on significant claims volume.

Based on the above findings, we believe that we have adequate claims data to assign the SRS treatment delivery procedures to clinically appropriate APCs, and we believe that such movement is appropriate. For CY 2007, we are proposing to create several new SRS clinical APCs of different levels to assign the HCPCS codes describing linear accelerator-based SRS treatment, G0173, G0251, G0339, and G0340, based on their clinical and hospital resource similarities and differences. In particular, we are proposing to assign HCPCS codes G0339 and G0173 to the same Level III SRS APC, because we believe these codes that describe the complete or first fraction of all types of linear accelerator-based SRS treatments have substantial hospital resource and clinical similarity, as observed in their median costs and recognized previously in their equivalent New Technology APC payments. The codes describing subsequent fractions of image-guided, robotic and non-image guided, non-robotic linear accelerator-based SRS treatments will each be assigned to their own clinical APCs, as they demonstrate significant differences in resource utilization as reflected in their median costs. Their previous assignments to different New Technology APCs anticipated these resource distinctions. We are proposing to continue our assignment of HCPCS code G0243 for Cobalt 60-based SRS treatment delivery to clinical APC 0127, renamed Level IV Stereotactic Radiosurgery. Our proposed reassignments of SRS services from New Technology APCs to clinical APCs are listed in Table 8 below.

TABLE 8.—PROPOSED APC REASSIGNMENT FOR SRS TREATMENT DELIVERY SERVICES FOR CY 2007

HCPCS code	Short descriptor	CY 2006 SI	CY 2006 APC	CY 2006 payment rate	Proposed CY 2007 SI	Proposed CY 2007 APC	Proposed CY 2007 APC median cost
G0173	Linear acc stereo radsur com	S	1528	\$5,250.00	S	0067	\$4,059.61
G0251	Linear acc based stereo radio	S	1513	1,150.00	S	0065	1,386.20
G0339	Robot lin-radsurg com, first	S	1528	5,250.00	S	0067	4,059.61
G0340	Robot lin-radsurg fractx 2-5	S	1525	3,750.00	S	0066	2,916.68

d. Magnetoencephalography (MEG) Services

Magnetoencephalography (MEG) is a non-invasive diagnostic tool that assists surgeons presurgery by measuring and mapping brain activity. It may be used for epilepsy and brain tumor patients. Since CY 2002, the MEG procedures described by CPT codes 95965 (Meg, spontaneous), 95966 (Meg, evoked, single), and 95967 (Meg, evoked, each additional) have been assigned to New Technology APCs. In the July 25, 2005 proposed rule (70 FR 42709), we proposed to reassign MEG procedures to clinical APC 0430 using CY 2004 claims data to establish median costs on which the CY 2006 payment rates would be based. This proposal involved the reassignment of the three MEG procedures, specifically CPT codes 95965, 95966, and 95967, from three separate New Technology APCs into one new clinical APC with a status indicator of "T." Commenters to this proposal believed that their assignment to clinical APC 0430 would be inappropriate because the proposed payment level of \$674 was inadequate to cover the costs of the procedures, and because the procedures should not be assigned to only one level as their required hospital resources differ significantly. They further stated that our data did not represent the true costs of the procedures because MEG procedures are performed on very few Medicare patients.

Analysis of our hospital data for claims submitted from CY 2002 through CY 2005 indicates that these procedures are rarely performed on Medicare beneficiaries. For claims submitted from CY 2002 through CY 2005, our single claims data show that there were annually only between 2 and 23 claims submitted for CPT code 95965, 3 and 7 claims for CPT code 95966, and only 1 for CPT code 95967. Additionally, the hospital claims median costs for these codes have varied widely, perhaps due to our small volume of claims. The median cost for CPT code 95965 has ranged from \$332 using CY 2002 claims to \$3,166 based upon CY 2005 claims. The median cost for CPT code 95966 has varied widely from CY 2002 to CY 2005. For single claims submitted during CY 2002, the median cost was \$1,949, while it was \$507 for CY 2003, \$1,435 for CY 2004, and \$701 from 3 single claims for CY 2005. The median

cost for CPT code 95967 based upon 1 single claim from CY 2005 claims is \$217. We have no hospital median cost data for CPT code 95967 prior to CY 2005.

In the November 10, 2005 final rule with comment period (70 FR 68579), we stated that we carefully considered our claims data, information provided by the commenters, and the APC Panel recommendation for CY 2006 that we retain the MEG procedures in New Technology APCs. As a result of this analysis, we determined that using a 50/50 blend of the code specific median costs from our most recent CY 2004 hospital claims data and the CY 2005 New Technology APC code-specific payments amounts as the basis for assignment of the procedures for CY 2006 would be an appropriate way to recognize both the current payment rates for the procedures, which were originally based on the theoretical costs to hospitals of providing MEG services, and the median costs based upon our hospital claims data regarding actual MEG services provided to Medicare beneficiaries by hospitals. Therefore, CPT codes 95965, 95966, and 95967 were assigned to different New Technology APCs for CY 2006 based on this blended methodology, with payment rates of \$2,750, \$1,250, and \$850 respectively.

At the March 2006 APC Panel meeting, the Panel recommended that CMS move CPT codes 95965 (MEG, spontaneous), 95966 (MEG, evoked, single), and 95967 (MEG, evoked, each additional) from their CY 2006 New Technology APCs which were assigned based on the blended methodology described above to clinical APC(s) for CY 2007. Following that meeting, interested parties have provided us with CY 2005 charge and cost information from six hospitals that provided MEG services. These external data show wide variation in hospitals' costs and charges for MEG procedures, with generally higher values for CPT code 95965 and lower values for CPT codes 95966 and 95967 but no consistent proportionate relationship among those costs and charges. In some cases, the charges and costs for CPT codes 95966 and 95967 are quite similar for the two related services, one of which describes MEG for a single modality of evoked magnetic fields and the other that describes MEG for each additional modality of evoked

magnetic fields. The individual hospital cost and charge data for specific services demonstrate significant variations of up to six fold across the hospitals, with an apparent inverse relationship between the numbers of services provided and the costs of the procedures. This finding is not unexpected, given the dependence of MEG procedures on the use of expensive capital equipment. As we have previously stated, our OPPS payment rates generally reflect the costs that are associated with providing care to Medicare beneficiaries in cost-efficient settings. For emerging technologies, we establish payment rates for new services that lack hospital claims data based on realistic utilization projections for all such services delivered in cost-efficient hospital outpatient settings. Given that we now have 4 years of hospital claims data for MEG procedures, because MEG is no longer a new technology, we do not believe these external data from 6 hospitals that performed MEG services in CY 2005 provide a better estimate of the hospital resources used in MEG procedures during the care of Medicare beneficiaries than our standard OPPS historical claims methodology.

We agree with the APC Panel and are proposing to accept their recommendation to move the MEG CPT codes into clinical APCs for CY 2007. While the volumes for the MEG procedures are low, almost all procedures, including those with very low Medicare volume, are assigned to clinical APCs under the OPPS, with their payment rates based on the median costs of their assigned APCs. Therefore, we are proposing to assign CPT code 95965 to new clinical APC 0038 (Spontaneous MEG) with a proposed median cost of \$3,166.30 and to assign both CPT codes 95966 and 95967 to APC 0209 (Level II MEG, Extended EEG Studies, and Sleep Studies) with a proposed median cost of \$709.36. We believe that the assignment of CPT codes 95966 and 95967 to APC 0209 is appropriate because MEG studies are similar to EEGs and sleep studies in measuring activity of the brain over a significant time period, and our hospital claims data show that their hospital resources are also relatively comparable. MEG procedures and their CY 2007 proposed APC assignments are displayed in Table 9.

TABLE 9.—PROPOSED CY 2007 APC ASSIGNMENT FOR MEG

HCPSC Code	Short descriptor	CY 2006 SI	CY 2006 APC	CY 2006 payment rate	Proposed CY 2007 SI	Proposed CY 2007 APC	Proposed CY 2007 APC median cost
95965	Meg, spontaneous	S	1523	\$2,750.00	S	0038	\$3,166.30
95966	Meg, evoked, single	S	1514	1,250.00	S	0209	709.36
95967	Meg, evoked, each additional	S	1510	850.00	S	0209	709.36

As these procedures are performed on very few Medicare patients, we expect to continue to have small Medicare claims volumes for MEG services each year. However, we are confident that over time our claims data for these procedures will become more consistent and reflective of the full hospital resources used in MEG services, especially because only a small subset of hospitals provide MEG services. We have been told that hospitals performing MEG procedure recently have been paying increased attention to accurately reporting charges for all necessary hospital resources on their claims. We

are optimistic that both increased public awareness of Medicare coding for these procedures and improved understanding of the standard OPPS methodology for establishing APC payment rates should result in improved claims data in the future that more accurately reflect the required hospital resources.

e. Other Services in New Technology APCs

(If you choose to comment on issues in this section, please include the caption “Other New Technology

Services” at the beginning of your comment.)

Other than the PET, PET/CT, and SRS new technology services discussed above, there are 23 procedures currently assigned to New Technology APCs for which we believe we also have data adequate to support their assignment to clinical APCs. For CY 2007, we are proposing to reassign these procedures to clinically appropriate APCs, applying their CY 2005 claims data to develop their clinical APC median costs on which payments would be based. These procedures and their proposed APC assignments are displayed in Table 10.

D. Proposed APC-Specific Policies

1. Skin Replacement Surgery and Skin Substitutes (APCs 0024, 0025, 0027)

(If you choose to comment on issues in this section, please include the caption “Skin Replacement Surgery and Skin Substitutes” at the beginning of your comment.)

For CY 2006, the American Medical Association (AMA) made comprehensive changes, including code

additions, deletions, and revisions, accompanied by new and revised introductory language, parenthetical notes, subheadings and cross-references, to the Integumentary, Repair (Closure) subsection of surgery in the CPT book to facilitate more accurate reporting of skin grafts, skin replacements, skin substitutes, and local wound care. In particular, the section of the CPT book previously titled “Free Skin Grafts” and

containing codes for skin replacement and skin substitute procedures was renamed, reorganized, and expanded. New and existing CPT codes related to skin replacement surgery and skin substitutes were organized into five subsections: Surgical Preparation, Autograft/Tissue Cultured Autograft, Acellular Dermal Replacement, Allograft/Tissue Cultured Allogeneic Skin Substitute, and Xenograft.

As part of the CY 2006 CPT code update in the newly named "Skin Replacement Surgery and Skin Substitutes" section, certain codes were deleted that previously described skin allograft and tissue cultured and acellular skin substitute procedures, including CPT 15342 (Application of bilaminate skin substitute/neodermis; 25 sq cm); CPT 15343 (Application of bilaminate skin substitute/neodermis; each additional 25 sq cm); CPT 15350 (Application of allograft, skin; 100 sq cm or less), and CPT 15351 (Application of allograft, skin; each additional 100 sq cm). Thirty-seven new CPT codes were created in the "Skin Replacement Surgery and Skin Substitutes" section, and these codes received interim final status indicators and APC assignments in the CY 2006 final rule with comment period and were subject to comment.

At its March 2006 meeting, the APC Panel heard several presentations on some of the new CY 2006 CPT codes for skin replacement and skin substitute procedures, and CMS has received additional information from the public regarding a number of these services. In particular, 18 new CPT codes that were created to more specifically describe skin allograft, skin replacement, and skin substitute procedures were the subject of the APC Panel discussion and recommendations. These codes are as follows:

- CPT 15170 (Acellular dermal replacement, trunk, arms, legs; first 100 sq cm or less, or one percent of body area of infants and children)
- CPT 15171 (Acellular dermal replacement, trunk, arms, legs; each additional 100 sq cm, or each additional one percent of body area of infants and children, or part thereof)
- CPT 15175 (Acellular dermal replacement, face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet and/or multiple digits; first 100 sq cm or less, or one percent of body area of infants and children)

- CPT 15176 (Acellular dermal replacement, face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet and/or multiple digits; each additional 100 sq cm, or each additional one percent of body area of infants and children, or part thereof)

- CPT 15300 (Allograft skin for temporary wound closure, trunk, arms, legs; first 100 sq cm or less, or one percent of body area of infants and children)

- CPT 15301 (Allograft skin for temporary wound closure; trunk, arms, legs; each additional 100 sq cm, or each additional one percent of body area of infants and children, or part thereof)

- CPT 15320 (Allograft skin for temporary wound closure, face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet and/or multiple digits; first 100 sq cm or less, or one percent of body area of infants and children)

- CPT 15321 (Allograft skin for temporary wound closure, face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet and/or multiple digits; each additional 100 sq cm, or each additional one percent of body area of infants and children, or part thereof)

- CPT 15340 (Tissue cultured allogeneic skin substitute; first 25 sq cm or less)

- CPT 15341 (Tissue cultured allogeneic skin substitute; each additional 25 sq cm)

- CPT 15360 (Tissue cultured allogeneic dermal substitute; trunk, arms, legs; first 100 sq cm or less, or one percent of body area of infants and children)

- CPT 15361 (Tissue cultured allogeneic dermal substitute; trunk, arms, legs; each additional 100 sq cm, or each additional one percent of body area of infants and children, or part thereof)

- CPT 15365 (Tissue cultured allogeneic dermal substitute, face, scalp, eyelids, mouth, neck, ears, orbits,

genitalia, hands, feet and/or multiple digits; first 100 sq cm or less, or one percent of body area of infants and children)

- CPT 15366 (Tissue cultured allogeneic dermal substitute, face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet and/or multiple digits; first 100 sq cm or less, or one percent of body area of infants and children)

- CPT 15420 (Xenograft skin (dermal), for temporary wound closure, face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet and/or multiple digits; first 100 sq cm or less, or one percent of body area of infants and children)

- CPT 15421 (Xenograft skin (dermal), for temporary wound closure, face, scalp, eyelids, mouth, neck, ears, orbits, genitalia, hands, feet and/or multiple digits; each additional 100 sq cm, or each additional one percent of body area of infants and children, or part thereof)

- CPT 15430 (Acellular xenograft implant; first 100 sq cm or less, or one percent of body area of infants and children)

- CPT 15431 (Acellular xenograft implant; each additional 100 sq cm, or each additional one percent of body area of infants and children, or part thereof).

The CY 2006 interim final APC assignments of these codes, the recommendations made by the APC Panel at its March 2006 meeting, and our proposed placement of the codes for CY 2007 are listed in Table 11 below. Note that in general, biological skin substitutes and replacements used in procedures described by these CPT codes are proposed for separate payment under the OPPS for CY 2007, according to the methodology outlined in section V. of the preamble of this proposed rule.

TABLE 11.—CY 2007 PROPOSED ASSIGNMENTS OF SKIN SUBSTITUTE AND SKIN REPLACEMENT PROCEDURES

We reviewed the presentations to the APC Panel; the APC Panel's recommendations; the CPT code descriptors, introductory explanations, cross-references, and parenthetical notes; the clinical characteristic of the procedures; and the code-specific median costs for all related CPT codes available from our CY 2005 claims data. While we agree with the APC Panel that the codes currently placed in APC 0024 (Level I Skin Repair) should be assigned to an APC with a higher median cost for CY 2007, we disagree that these procedures should be placed in APC 0027 (Level IV Skin Repair). APC Panel presenters reasoned that some of the codes (CPTs 15170, 15175, 15320, 15340, 15360, 15365, 15420, and 15430) for the first increment of body surface area treated should be placed in APC 0027 because they are similar to CPT code 15300 (Allograft skin for temporary wound closure, trunk, arms, legs; first 100 sq cm or less, or one percent of body area of infants and children). Upon further review of the clinical and expected hospital resource characteristics of CPT code 15300, we believe that this procedure is not appropriately placed in APC 0027. Split-thickness and full thickness skin autograft procedures currently assigned to APC 0027 are likely to require greater hospital resources, including additional operating room time and special equipment, in comparison to application of a separately paid allograft skin product. Instead, for CY 2007 we are proposing to reassign CPT code 15300 to APC 0025 (Level II Skin Repair), with an APC median cost of \$314.58. We agree, in principle, that other CPT codes for the first increment of body surface area treated with a skin replacement or skin substitute are similar clinically and from a hospital resource perspective to CPT code 15300 and are, therefore, proposing to assign these procedures to APC 0025 as well for CY 2007.

Similarly, presenters reasoned that the related add-on codes (CPTs 15171, 15176, 15321, 15342, 15361, 15366, 15421, and 15431) for procedures to treat additional body surface areas are similar to CPT code 15301 (Allograft skin for temporary wound closure, trunk, arms, legs; each additional 100 sq cm, or each additional one percent of body area of infants and children, or part thereof) in terms of required hospital resources. CPT code 15301 is assigned to APC 0025 for CY 2006. We are proposing to maintain the assignment of CPT code 15301 to APC 0025 for CY 2007 and to reassign the other add-on codes to this APC. Note that APC 0025 has a status indicator of "T," so that the add-on codes will experience the standard OPPS multiple surgical procedure reduction when properly billed with the first body surface area treatment codes that are assigned to the same clinical APC. We believe that this reduction in payment for the procedural resources associated with the add-on services is appropriate.

2. Treatment of Fracture/Dislocation (APC 0046)

(If you choose to comment on issues in this section, please include the caption "Treatment of Fracture/Dislocation" at the beginning of your comment.)

APC 0046 is a large clinical APC to which many procedures related to the percutaneous or open treatment of fractures and dislocations are assigned for CY 2006. Most of the approximately 100 procedures in the APC are relatively low volume, with even fewer single bills available for ratesetting. The median costs of the significant procedures in this APC as configured for CY 2006 range from a low of about \$1,415 to a high of about \$3,893. We received comments to the CY 2006 proposed rule (70 FR 42674) requesting that we distinguish procedures containing "with or without external fixation" in their descriptors to provide greater payments

when external fixation is used to treat fractures. The commenters explained that when external fixation devices are used, the costs of the procedures increase, and, therefore, the current APC placement significantly underpays those procedures in those instances. In the CY 2006 final rule with comment period (70 FR 68607), we declined to reassign procedures that could include external fixation at that time but we acknowledged that we had treated APC 0046 as an exception to the 2 times rule for several years. For CY 2006, we again treated APC 0046 as an exception to the 2 times rule, but noted we would ask the APC Panel to consider whether this APC could be reconfigured to improve its clinical and resource homogeneity.

At the March 2006 meeting of the APC Panel, we asked the Panel to consider a possible reconfiguration of APC 0046 based on partial year CY 2005 claims data. The reconfiguration would create three new APCs and would divide the codes in APC 0046 among them. The APC Panel recommended that CMS continue to evaluate the refinement of APC 0046 (Open/Percutaneous Treatment Fracture or Dislocation) into at least three APC levels, with consideration of a fourth level should data support this additional level. We are accepting the APC Panel's recommendation and are proposing for CY 2007 to split APC 0046 into three new APCs: APC 0062 (Level I Treatment Fracture/Dislocation); APC 0063 (Level II Treatment Fracture/Dislocation); and APC 0064 (Level III Treatment Fracture/Dislocation). To ensure clinical and resource homogeneity in the new APCs, their proposed configurations are based on the procedure code descriptors, clinical considerations specific to each procedure, and service-specific hospital resource utilization as shown in the claims data from CY 2005. Restructuring APC 0046 into these three new APCs eliminates 2 times rule violations in the Fracture/Dislocation series.

We are not currently proposing a fourth APC level in the Fracture/Dislocation series because we do not believe our claims data are sufficiently robust and consistent from year to year to support differential payment for

another service level. One code, CPT 27615 (Radical resection of tumor (e.g., malignant neoplasm), soft tissue of leg or ankle area), is not clinically coherent with the other procedures in APC 0046, and we are proposing to reassign this

procedure outside of the Fracture/Dislocation series to APC 0050 (Level II Musculoskeletal Procedures Except Hand and Foot) for CY 2007.

BILLING CODE 4120-01-C

3. Electrophysiologic Recording/Mapping (APC 0087)

(If you choose to comment on issues in this section, please include the caption "Electrophysiologic Recording/Mapping" at the beginning of your comment.)

At its March 2006 meeting, the APC Panel heard testimony from a presenter who asked that the Panel recommend that CPT codes 93609 (intraventricular and/or intra-atrial mapping of tachycardia, add-on), 93613 (intracardiac electrophysiologic 3-D mapping), and 93631 (intra-operative epicardial & endocardial pacing and mapping to localize zone of slow conduction for surgical correction) be removed from APC 0087. The presenter asked the APC Panel to recommend that these codes be placed in APC 0086 for improved clinical and resource

alignment. The presenter indicated that the median costs for these CPT codes were more than two times the median cost of the least costly HCPCS code in APC 0087 and, therefore, constituted a 2 times violation. The presenter also indicated that the median cost of APC 0087 had declined in recent years, and argued that the payment rate for APC 0087 was too low to adequately compensate providers for these services.

The APC Panel did not recommend that CMS move these codes from APC 0087 to APC 0086, but instead recommended that CMS maintain the three codes in APC 0087 for CY 2007. The APC Panel noted that, due to the low volume of these and other services assigned to APC 0087, under the CMS' rules there was no 2 times violation in APC 0087. Moreover, the APC Panel found that the services under discussion were cardiac electrophysiologic mapping services, like other procedures

also assigned to APC 0087, and were, therefore, clinically coherent with other services in APC 0087. The APC Panel did not believe that these three cardiac electrophysiologic mapping procedures were similar clinically or from a resource perspective to the intracardiac catheter ablation procedures residing in APC 0086. We agree with the APC Panel's assessment and are accepting this APC Panel recommendation. Therefore, we are proposing that CPT codes 93609, 93613, and 93631 remain assigned to APC 0087 for CY 2007.

4. Insertion of Mesh or Other Prosthesis (APC 0154)

(If you choose to comment on issues in this section, please include the caption "Insertion of Mesh or Other Prosthesis" at the beginning of your comment.)

During the March 2006 APC Panel meeting, a presenter requested that we

reassign CPT code 57267 (Insertion of mesh or other prosthesis for repair of pelvic floor defect, each site (anterior, posterior compartment), vaginal approach) to a more clinically and resource-appropriate APC than its CY 2006 assignment to APC 0154 (Hernia/Hydrocele Procedures). The presenter expressed concern that the procedure is currently assigned to an APC with a "T" status indicator and stated that payment would be more accurate if it were assigned to an APC that has an "S" status indicator. The mesh insertion procedure is a CPT add-on code and is, by definition, performed at the same time as certain other procedures and will, therefore, be discounted every time it is performed. The presenter objected to our assignment of CPT code 57267 to an APC that is subject to the multiple procedure discount because it is always a secondary procedure, and the discounted payment amount is not adequate to pay even for the cost of the implantable mesh. The presenter also believed that its assignment to an APC where hernia and hydrocele procedures were also assigned was clinically inappropriate.

The APC Panel recommended that CMS reassign CPT code 57267 to a more clinically and resource-appropriate APC.

In the CY 2005 claims data, the median cost for CPT code 57267 is \$529.14, the lowest by far for procedures in APC 0154, which has an

APC median cost of \$1,821 for CY 2007. However, the median cost of CPT code 57267 is based on only 6 single claims of the total 1,038 submitted for the service. Because the procedure always is performed in addition to other related procedures, we expect that claims for this service will be multiple claims. Therefore, we are not confident that the procedure's median cost based upon the six single claims is accurate.

Therefore, in order to obtain more information about the cost of the procedure, we performed additional analyses of CY 2005 claims data in an attempt to specifically explore the cost of the mesh implant packaged into the payment for CPT code 57267. We believe that a significant portion of the procedural cost should be related to the cost of the mesh, based on information presented at the March 2006 APC Panel meeting. We looked at all claims that included charges for the HCPCS code for implantable mesh (C1781) and either CPT code 57267 or 49568 (Implantation of mesh or other prosthesis for incisional or ventral hernia repair). We examined the bills for CPT code 49568 in addition to those for CPT code 57267 because it is a high volume procedure that also uses implantable mesh, and we expected that the extra volume would improve our chances of identifying meaningful charge data.

We found 210 claims with charges reported for both CPT code 57267 and HCPCS code C1781 on the same day and

6,345 claims with reported charges for both CPT code 49568 and HCPCS code C1781 on the same day. Costs developed from these two claims subsets included the cost of the implanted mesh device that was used in performing the procedure. Table 13 below displays the median costs from those claims. The costs shown in the column titled "Line-item Median Cost" are those we obtained by looking at all CY 2005 OPPS claims on which charges for both the procedure code (either CPT code 57267 or 49568) and the code for the implantable mesh (HCPCS code C1781) were reported. The costs shown in the column titled "Single Claims Median Cost" are the median costs calculated using only single procedure claims for the specific procedure that also included the C-code for the mesh.

Our additional data analysis supports the APC Panel presenter's assertion that the cost of the mesh is greater than 50 percent of the total cost of CPT code 57267, but it also indicates that the mesh cost is far less than 50 percent of the payment amount for APC 0154. In CY 2006 the payment rate for APC 0154 is \$1,704.59, and the payment when the multiple procedure discount is taken is \$852.30, which is much greater than both the line-item median cost of the mesh and the median single claims cost of CPT code 57267 (which explicitly includes the implantable mesh) reflected in our claims data.

TABLE 13.—MEDIAN COSTS OF HCPCS CODE C1781 AND ASSOCIATED PROCEDURES

HCPCS code	Short descriptor	Line-item median cost	Single claims median cost	CY 2006 APC 0154 payment amount (T status)
57267	Insert mesh/pelvic flr add-on	\$423.28	\$529.14	\$1,704.59
C1781 (billed with 57267)	Mesh (implantable)	383.35	N/A	N/A
49568	Hernia repair w/mesh	363.41	1,323.29	1,704.59
C1781 (billed with 49568)	Mesh (implantable)	242.20	N/A	N/A

We agree with the APC Panel that the procedure should be assigned to a more clinically appropriate APC, and therefore, we are proposing to accept its recommendation and reassign CPT code 57267 to APC 0195 (Level IX Female Reproductive Procedures), with status indicator "T" for CY 2007. The proposed median cost of APC 0195 is \$1,777 for CY 2007, very comparable to the CY 2006 median cost of APC 0154, where CPT code 57267 is currently assigned. The median cost for the procedure remains very low in comparison with other procedures assigned to APC 0195, so that payment for the service when the multiple

procedure reduction is applied should be appropriate. While not affecting the procedure's payment significantly, this reassignment improves the clinical homogeneity of APCs 0154 and 0195.

5. Percutaneous Renal Cryoablation (APC 0163)

(If you choose to comment on issues in this section, please include the caption "Percutaneous Renal Cryoablation" at the beginning of your comment.)

During the March 2006 APC Panel meeting, a presenter requested that we reassign CPT code 0135T (Ablation renal tumor(s), unilateral, percutaneous, cryotherapy) to APC 0423 (Level II

Percutaneous Abdominal and Biliary Procedures). The presenter provided information about the costs of performing these procedures and compared the resource requirements for the procedures to those for CPT code 47382 (Ablation, one or more liver tumor(s), percutaneous, radiofrequency), which is currently assigned to APC 0423. The presenter proposed reassignment of CPT code 0135T to APC 0423 because that is where CPT code 47382 is assigned, and stated that the costs of the two procedures are very similar.

The APC Panel recommended that we assign CPT code 0135T to APC 0423 for CY 2007.

CPT code 0135T is new for CY 2006 and therefore, we have no claims data on which to base our APC assignment decision. The procedure currently has an interim assignment to APC 0163 (Level IV Cystourethroscopy and Other Genitourinary Procedures), with a CY 2006 payment amount of \$1,999.35.

We are proposing to accept the APC Panel's recommendation to reassign CPT code 0135T to APC 0423 for CY 2007. We believe that assignment of CPT code 0135T to APC 0423 is clinically appropriate, and that the CY 2007 median cost of APC 0423 of \$2,410 is reasonably close to our expectations regarding the resource requirements for the renal cryoablation procedure.

6. Keratoprosthesis (APC 0244)

(If you choose to comment on issues in this section, please include the caption "Keratoprosthesis" at the beginning of your comment.)

CPT code 65770 is a surgical procedure for implantation of a keratoprosthesis, an artificial cornea. The keratoprosthesis device that is required for the implantation is described by HCPCS code C1818 (Integrated keratoprosthesis), a device category that received transitional pass-through payment under the OPSS from July 2003 through December 2005. When the device came off pass-through status for CY 2006 and its costs were packaged into the implantation procedure, CPT code 65770 continued to be assigned to APC 0244 (Corneal Transplant), with a payment rate of about \$2,275, despite an increase in the median cost of the implantation procedure of about \$1,200 associated with the packaging of the device. There is no 2 times violation in APC 0244 for CY 2006.

At the March 2006 meeting of the APC Panel, following a presentation regarding the procedure to implant a keratoprosthesis that described the clinical and hospital resource characteristics of CPT code 65770, the Panel recommended moving CPT code 65770 to a more appropriate APC in order to make appropriate payment. We agree with the recommendation of the APC Panel. Claims data from CY 2005 demonstrate that the median cost for implantation of a keratoprosthesis of \$3,127.51 remains significantly higher than the median costs of other procedures assigned to APC 0244, although there is no 2 times violation. In addition, CPT code 65770 contributes less than 1 percent of the single claims in the APC available for ratesetting, and

it is likely to continue to be an uncommon procedure among Medicare beneficiaries, resulting in its persistent small contribution to the median cost of APC 0244. Therefore, for CY 2007 we are proposing to create a new APC 0293 (Level V Anterior Segment Eye Procedures) with a median cost of \$3,127.51 and to move CPT code 65770 into that APC in order to more appropriately pay for the procedure and the related device.

7. Medication Therapy Management Services

(If you choose to comment on issues in this section, please include the caption "Medication Therapy Management Services" at the beginning of your comment.)

Following a presentation at its March 2006 meeting, the APC Panel made two recommendations regarding Category III CPT codes for pharmacist medication therapy management services that were new for CY 2006. These services include CPT codes 0115T (medication therapy management services provided by a pharmacist, individual, face-to-face with patient, initial 15 min., w/assessment and intervention if provided; initial encounter), 0116T (medication therapy management; subsequent encounter), and 0117T (medication therapy management; additional 15 min.). These codes were assigned status indicator "B" in the CY 2006 OPSS final rule with comment period, indicating that they are not recognized by the OPSS when submitted on an outpatient hospital Part B bill type, with comment indicator "NI" to identify them as subject to comment. The APC Panel recommended that we create a new APC, with a nominal payment, to which we would assign these codes; implement the assignment in July 2006, if possible, or otherwise in CY 2007; and provide guidance to hospitals on how and when these codes should be reported. We are not accepting the APC Panel's recommendations. Rather, we are proposing to continue to assign status indicator "B" to CPT codes 0115T, 0116T, and 0117T for CY 2007.

According to the AMA, the purpose of Category III CPT codes is to facilitate data collection on and assessment of new services and procedures. Medication therapy management services are not new services in the OPSS, as they have been provided to patients by hospitals in the past as components of a wide variety of services provided by hospitals, including clinic and emergency room visits, procedures, and diagnostic tests. As such, we believe their associated hospital resource costs are already incorporated

into the OPSS payments for these other services that are based on historical hospital claims data. The three Category III CPT codes specifically describe medication therapy management services provided by a pharmacist. We have no need to distinguish medication therapy management services provided by a pharmacist in a hospital from medication therapy management services provided by other hospital staff, as the OPSS only makes payments for services provided incident to physicians' services. Hospitals providing medication therapy management services incident to physicians' services may choose a variety of staffing configurations to provide those services, taking into account other relevant factors such as State and local laws and hospital policies.

In general, we do not establish new clinical APCs for new codes and set payment rates for those APCs when we have no cost data for any services populating the APCs. New codes where we believe that there are no existing clinical APCs compatible with their expected clinical and hospital resource characteristics are often assigned to New Technology APCs until we have sufficient cost data to determine appropriate clinical APC assignments. However, these medication therapy management codes would not be eligible to map to New Technology APCs because they are not new services which are unrepresented in historical hospital claims data. As stated earlier, because we believe the costs of medication therapy management services are imbedded as a component within our claims data, we are confident that our claims data reflect the costs of pharmacist medication management services provided to hospital outpatients who are receiving hospital services.

8. Complex Interstitial Radiation Source Application (APC 0651)

(If you choose to comment on issues in this section, please include the caption "Complex Interstitial Radiation Source Application" at the beginning of your comment.)

APC 0651 (Complex Interstitial Radiation Source Application), contains only one code, CPT code 77778 (Complex interstitial application of brachytherapy sources). The coding, APC assignment, median cost, and resulting payment rate for CPT code 77778 have not been stable since the inception of the OPSS, and that instability has been a source of concern to hospitals that furnish the service and to specialty societies. The vast majority

of claims for interstitial brachytherapy are for the treatment of patients with a diagnosis of prostate cancer. The historical coding, APC assignments, and

payment rates for CPT code 77778 and the related service CPT code 55859 (Transperitoneal placement of needles or catheters into the prostate for

application of brachytherapy sources), are shown in Table 14.

TABLE 14.—HISTORICAL PAYMENT RATES FOR COMPLEX INTERSTITIAL APPLICATION OF BRACHYTHERAPY SOURCES

OPPS CY	Combination APC	CPT code 77778	APC for 77778	CPT code 55859	APC for 55859	Source
2000	N/A	\$198.31	APC 312 ..	\$848.04	APC 162 ..	Pass-through.
2001	N/A	205.495	APC 312 ..	878.72	APC 162 ..	Pass-through.
2002	N/A	6344.67	APC 312 ..	2068.23	APC 163 ..	Pass-through with pro rata reduction.
2003 (if prostate brachytherapy with iodine sources).	G0261, APC 648, \$5154.34.	N/A	N/A	N/A	N/A	Packaged.
2003 (if prostate brachytherapy with palladium sources).	G0256, APC 649, \$5998.24.	N/A	N/A	N/A	N/A	Packaged.
2003 (if not prostate brachytherapy, not including sources).	N/A	2853.58	APC 651 ..	1479.60	APC 163 ..	Separate payment based on scaled median cost per source.
2004	N/A	558.24	APC 651 ..	1848.55	APC 163 ..	Cost.
2005	N/A	1248.93	APC 651 ..	2055.63	APC 163 ..	Cost.
2006	N/A	666.21	APC 651 ..	1993.35	APC 163 ..	Cost.

We have frequently been told by the public that the instability in our payment rates for APC 0651 creates difficulty in planning and budgeting for hospitals. Moreover, we have been told that in this case reliance on single procedure claims results in use of only incorrectly coded claims for prostate brachytherapy because, for application to the prostate, which is estimated to be 85 percent of all occurrences of CPT code 77778, a correctly coded claim is a multiple procedure claim. Specifically, we are told that a correctly coded claim for prostate brachytherapy should include, for the same date of service, both CPT codes 55859 and 77778, brachytherapy sources reported with C-codes, and typically separately coded imaging and radiation therapy planning services. We are further advised that in the cases of complex interstitial brachytherapy where sources are placed in sites other than the prostate, the charges for both placing the needles or catheters and for applying the sources may be reported by CPT code 77778 alone because there are no other specific CPT codes for placement of needles or catheters in those sites. In other cases, the placement of needles or catheters may be reported with not otherwise classified codes specific to the treated body area.

At the March 2006 APC Panel meeting, presenters urged the Panel to recommend that CMS use only single procedure claims that contain charges for brachytherapy sources on the same claim with CPT code 77778 to set the median cost for APC 0651. Presenters also urged that CMS adopt a process for using multiple procedure claims to set the median for APC 0651 that would

sum the costs on multiple procedure claims containing CPT codes 77778 and 55859 (and no other separately payable services not on the bypass list) and, excluding the costs of sources, split the resulting aggregate median cost on the multiple procedure claim according to a preestablished attribution ratio between CPT codes 77778 and 55859. Presenters also urged that we provide hospital education on correct coding of brachytherapy services and devices of brachytherapy required to perform brachytherapy procedures. They indicated that any claim for a brachytherapy service that did not also report a brachytherapy source should be considered to be incorrectly coded and thus not reflective of the hospital resources required for the interstitial source application procedure. They believed that these claims should be excluded from use in establishing the median cost for APC 0651. They believed that hospitals which report the brachytherapy sources on their claims are more likely to report complete charges for the associated brachytherapy procedure than hospitals that do not report the separately payable brachytherapy sources.

The APC Panel recommended that CMS reevaluate the proposed payment for brachytherapy services in APC 0651 for CY 2007. The APC Panel also recommended that CMS formally work with the Coalition for the Advancement of Brachytherapy, American Brachytherapy Society, and the American Society for Therapeutic Radiology and Oncology to evaluate the methodology for setting brachytherapy service payment rates in APC 0651.

In response to the APC Panel recommendations, we are explicitly analyzing the standard OPPS methodology that we used in determining our proposed payment rate for APC 0651 in this proposed rule in the context of alternative multiple bill methodologies. In addition, we note that we routinely accept requests from interested organizations to discuss their views about OPPS payment policy issues.

The organizations that the APC Panel asked us to work with have frequently brought their concerns to our attention through the rulemaking process and otherwise. We will consider the input of any individual or organization to the extent allowed by Federal law including the Administrative Procedure Act (APA) and the Federal Advisory Committee Act (FACA). We establish the OPPS rates through regulations. We are required to consider the timely comments of interested organizations, establish the payment policies for the forthcoming year, and respond to the timely comments of all public commenters in the final rule in which we establish the payments for the forthcoming year.

For this proposed rule, we developed a median cost for APC 0651 using single procedure claims using the general OPPS process, but we also looked at multiple procedure claims that contain the most common combinations of codes used with APC 0651. Our single procedure claims process results in using 1,123 claims to calculate a median cost of \$1028.93 for APC 0651. We have added CPT code 76965, a CPT code for ultrasound guidance that commonly appears on claims for complex

interstitial brachytherapy, to the bypass list for CY 2007 after close clinical review because we believe that it would typically have little associated packaging. We believe that this change, along with maintenance of CPT code 77290 for complex therapeutic radiology simulation-aided field setting on the bypass list, is responsible for the growth in single procedure claims from the 381 single bills on which the APC 0651 median cost was calculated for the CY 2006 OPPS final rule with comment period. However, only 6 of these 1,123 single and "pseudo" single claims also included brachytherapy sources used in complex interstitial brachytherapy source application, and the median cost for these 6 claims at \$600.68 is significantly less than the median cost for all single claims. It is unclear why so many of these claims do not contain brachytherapy sources, which were separately paid at cost in CY 2005. Because we are proposing to pay

separately for brachytherapy sources again for CY 2007, we see no reason to believe that these few claims for brachytherapy services that included sources, which also do not report CPT code 55859 for placement of needles or catheters into the prostate, are more correctly coded than those claims which do not separately report brachytherapy sources. We believe it is possible that hospitals billing CPT code 77778 and not the associated brachytherapy sources may have bundled their charges for the brachytherapy sources into their charge for CPT code 77778.

We also identified multiple procedure claims that contained both CPT codes 77778 and 55859 and also included any one or more of the following procedure codes, which have repeatedly appeared as common procedures that are reported on the same claim with CPT codes 55859 and 77778: 76000, 76965, or 77290. We then calculated median costs for interstitial prostate brachytherapy in

two different ways: (1) Bypassing the line item charges for these three ancillary codes; and (2) packaging the costs of these three ancillary codes. We applied this methodology both (1) to all claims that met these criteria with and without sources and (2) to claims that met the criteria and also separately reported brachytherapy sources that would be expected to be reported with CPT code 77778. See Tables 15 and 16 below for the results of this investigation.

We found 10,571 multiple procedure claims with CPT codes 55859 and 77778 reported on the claim, including those both with and without separately reported sources. We found that 7,181 of the 10,571 claims contained any combination of the 3 ancillary codes (76000, 76965, or 77290). Table 15 shows the results of bypassing and packaging the line-item costs of the 3 ancillary procedures.

TABLE 15.—MULTIPLE PROCEDURE CLAIMS INCLUDING CPT CODES 55859 AND 77778

	Frequency	Minimum cost	Maximum cost	Mean cost	Median cost
Ancillary Codes Packaged	* 7180	\$828.46	\$11,202.81	\$3,326.50	\$3,062.99
Ancillary Codes Bypassed	7181	811.95	11,203.81	3,300.16	3,030.01

* 1 lost to trimming.

We found 9,791 multiple procedure claims with CPT codes 55859 and 77778 reported on the claim that also included brachytherapy sources that would be

used with CPT code 77778. We found that 6,748 of the 9,791 claims contained any combination of the 3 ancillary codes. Table 16 shows the results of

bypassing and packaging the line-item costs of the 3 ancillary procedures.

TABLE 16.—MULTIPLE PROCEDURE CLAIMS INCLUDING CPT CODES 55859 AND 77778 AND ONE OR MORE BRACHYTHERAPY SOURCES

	Frequency	Minimum cost	Maximum cost	Mean cost	Median cost
Ancillary Codes Packaged	6748	\$890.56	\$10,224.17	\$3,240.13	\$3,026.62
Ancillary Codes Bypassed	6748	912.81	10,307.37	3,215.75	2,992.60

The claims containing CPT codes 55859 and 77778 and any combination of the three identified ancillary codes have mean and median costs that are very close to one another, regardless of whether the hospital billed separately for the brachytherapy sources on the claim with the procedure codes. Moreover, most of the multiple procedure claims we identified contained sources. This leads us to conclude that the presence of sources on the claim does not make a significant difference in the median cost of the combined service.

Moreover, when we calculate the total median cost from single bills for the APCs for the two major procedures

codes without regard to the separate payments that would be made for CPT codes 76000, 76965, and 77290, the sum of the CY 2007 proposed medians for APC 0651 and APC 0163 is \$3,197.07, which is greater than the combination medians, even when the three ancillary services are packaged into the combination median. Under our proposed policies for CY 2007, hospitals would also be paid separately for brachytherapy sources, guidance services, and radiation therapy planning services that may be provided in support of services reported with CPT codes 55859 and 77778.

Therefore, we believe that the summed median cost for APC 0651 and

APC 0163 results in an appropriate level of full payment for the dominant type of service provided under APC 0651, interstitial prostate brachytherapy. We are proposing to use the median cost of \$1,028.93, as derived from all single bills for APC 0651 according to our standard OPPS methodology, to establish the median for that APC.

We recognize that prostate brachytherapy is not the sole use of CPT code 77778, although it is the predominant use. Costs attributable to the placement of needles and catheters and to the interstitial application of brachytherapy sources to sites other than the prostate may also be reported on claims whose data map to APC 0651.

This clinically driven variability in the claims data is difficult to assess without adding additional levels of complexity to the issue by considering diagnoses in establishing payments rates. However, recognizing that a PPS is a system based on averages and, to the extent that claims for all types of complex interstitial brachytherapy source application are included in the body of claims used to set the median cost for APC 0651, we believe that the payment for these services is appropriate.

9. Single Allergy Tests (APC 0381)

(If you choose to comment on issues in this section, please include the caption "Allergy Testing" at the beginning of your comment.)

We are proposing to continue with our methodology of differentiating single allergy tests ("per test") from multiple allergy tests ("per visit") by assigning these services to two different APCs to provide accurate payments for these tests in CY 2007. Multiple allergy tests are assigned to APC 0370, with a median cost calculated based on the standard OPPS methodology. We provided billing guidance in CY 2006 in Transmittal 804 (issued on January 3, 2006) specifically clarifying that hospitals should report charges for the CPT codes that describe single allergy tests to reflect charges "per test" rather than "per visit" and should bill the appropriate number of units of these CPT codes to describe all of the tests provided. However, our CY 2005 claims data available for the CY 2007 proposed rule do not yet reflect the improved and more consistent hospital billing practices of "per test" "for single allergy tests. Some claims for single allergy tests still appear to provide charges that represent a "per visit" charge, rather than a "per test" charge. Therefore, consistent with our payment policy for CY 2006, we are proposing to calculate a "per unit" median cost for APC 0381, based upon 349 claims containing multiple units or multiple occurrences of a single CPT code, where packaging on the claims is allocated equally to each unit of the CPT code. Using this methodology, we are proposing a median cost of \$13.29 for APC 0381 for CY 2007. We are hopeful that the better and more accurate hospital reporting and charging practices for these single allergy test CPT codes beginning in CY 2006 will allow us to calculate the median cost of APC 0381 using the standard OPPS process in future OPPS updates.

10. Hyperbaric Oxygen Therapy (APC 0659)

(If you choose to comment on issues in this section, please include the caption "Hyperbaric Oxygen Therapy" at the beginning of your comment.)

When hyperbaric oxygen therapy (HBOT) is prescribed for promoting the healing of chronic wounds, it typically is prescribed for 90 minutes and billed using multiple units of HBOT on a single line or multiple occurrences of HBOT on a claim. In addition to the therapeutic time spent at full hyperbaric oxygen pressure, treatment involves additional time for achieving full pressure (descent), providing air breaks to prevent neurological and other complications from occurring during the course of treatment, and returning the patient to atmospheric pressure (ascent). The OPPS recognizes HCPCS code C1300 (Hyperbaric oxygen under pressure, full body chamber, per 30 minute interval) for HBOT provided in the hospital outpatient setting.

In the CY 2005 final rule with comment period (69 FR 65758 through 65759), we finalized a "per unit" median cost calculation for HBOT using only claims with multiple units or multiple occurrences of HCPCS code C1300 because delivery of a typical HBOT service requires more than 30 minutes. We observed that claims with only a single occurrence of the code were anomalies, either because they reflected terminated sessions or because they were incorrectly coded with a single unit. In the same rule, we also established that HBOT would not generally be furnished with additional services that might be packaged under the standard OPPS APC median cost methodology. This enabled us to use claims with multiple units or multiple occurrences. Finally, we also used each hospital's overall cost-to-charge ratio (CCR) to estimate costs for HCPCS code C1300 from billed charges rather than the CCR for the respiratory therapy cost center. Comments on the CY 2005 proposed rule effectively demonstrated that hospitals report the costs and charges for HBOT in a wide variety of cost centers. We used this methodology to estimate payment for HBOT in CYs 2005 and 2006. For CY 2007, we are proposing to continue using the same methodology to estimate a "per unit" median cost for HCPCS code C1300. Using 50,311 claims with multiple units or multiple occurrences, we estimate a median cost of \$98.36.

11. Myocardial Positron Emission Tomography (PET) Scans (APCs 0306, 0307)

(If you choose to comment on issues in this section, please include the caption "Myocardial PET Scans" at the beginning of your comment.)

From August 2000 to December 31, 2005, under the OPPS we assigned to one clinical APC all myocardial positron emission tomography (PET) scan procedures, which were reported with multiple G-codes through March 31, 2005. Effective April 1, 2005, myocardial PET scans were reported with three CPT codes, specifically CPT codes 78459, 78491, and 78492, under the OPPS. Public comments to the CY 2006 OPPS proposed rule suggested that the HCPCS codes describing multiple myocardial PET scans should be assigned to a separate APC from single study codes because their hospital resource costs are significantly higher than single scans. Review of the CY 2004 claims data for myocardial PET scans revealed a median cost of \$2,482 for the 9 G-codes that describe multiple myocardial PET scans, based upon 978 single claims of 2,001 total claims for multiple scan procedures. The CY 2004 claims data showed a median cost of \$800 for the 6 G-codes describing single PET studies, based on 391 single claims of 575 total claims. A review of CY 2003 claims data showed a similar pattern of significantly higher hospital costs for multiple myocardial PET studies in comparison with single studies, although there were fewer claims for the procedures in CY 2003 in comparison with CY 2004. In response to the comments received and based on this claims information, myocardial PET services were assigned to two clinical APCs for the CY 2006 OPPS. HCPCS codes for single scans were assigned to APC 0306 with a payment rate of \$800.55, and HCPCS codes for the multiple scan procedures were assigned to APC 0307 with a payment rate of \$2,484.88.

Analysis of the latest CY 2005 claims data for myocardial PET scans reveals that the APC median costs for the single and multiple myocardial PET codes are \$836 and \$680 respectively, based on 296 single claims for single studies and 1,150 single claims for multiple scan procedures. Despite more CY 2005 single claims for multiple scan procedures, the median cost of these procedures declined significantly from CY 2004 to CY 2005, dropping below the median cost of single studies. As indicated earlier, there was a significant coding change for myocardial PET services in CY 2005, with the reporting

of a single CPT code for multiple studies (CPT code 78492) for most of CY 2005, in comparison with nine G-codes in CY 2004. We examined the single bills for multiple scan procedures from CY 2004 and noted 17 hospitals were represented, with the majority of those claims from a single hospital. In contrast, in the CY 2005 claims, 25 hospitals were represented in the single bills for multiple scan procedures, and no single hospital contributed a majority of claims to the median cost calculation. We also examined differences in charges associated with G-codes versus the CPT code to determine if hospitals had adjusted the charge for the CPT code to reflect the termination of the multiple study G-codes. However, the individual charging practices of hospitals did not appear to vary with the use of a G-code versus the CPT code in either the CY 2004 or the CY 2005 claims. Greater volume of claims and consistent charging for both the G-codes and CPT code by hospitals suggest that the median appropriately captures the greater variability in relative hospital costs for multiple myocardial PET studies in the CY 2005 claims data.

Based on our claims data, the use of myocardial PET scan technology has become more widely prevalent in hospitals, and as a result, we now have more data to support our proposed payment rates. We believe that the

median costs from our CY 2005 claims data for myocardial PET scan services, calculated based upon our standard OPPS methodology and based on almost 1,500 single claims, for both the single and multiple scans, should be reflective of the hospital resources required to provide the services to Medicare beneficiaries in the outpatient hospital setting. Based on these data, the differential median costs of the single and multiple study procedures do not support the present two-level APC payment structure. Although we acknowledge that some people may believe that multiple scan procedures should require increased resources at some hospitals in comparison with single scans, particularly because of the longer scan times required for multiple studies, our data do not support a resource differential that would necessitate the placement of these single and multiple scan procedures into two separate APCs. As myocardial PET scans are being provided more frequently at a greater number of hospitals than in the past, it is possible that most hospitals performing multiple PET scans are particularly efficient in their delivery of higher volumes of these services and, therefore, incur hospital costs that are similar to those of single scans, which are provided less commonly.

When all myocardial PET scan procedure codes are combined into a single clinical APC, as they were prior to CY 2006, the APC median cost for myocardial PET services is about \$721, very similar to the \$703 median cost of their single CY 2005 clinical APC. Therefore, for CY 2007, we are proposing to assign CPT codes 78459, 78491, and 78492 to a single APC, specifically, APC 0307 titled Myocardial Positron Emission Tomography (PET) Imaging, with a proposed median cost of \$721. We believe that the assignment of these three CPT codes to APC 0307 is appropriate as the CY 2005 claims data reveal that more hospitals are providing multiple myocardial PET scan services, most myocardial PET scans are multiple studies, and the hospital resource costs of single and multiple studies are similar. We believe that the proposed median cost appropriately reflects the hospital resources associated with providing myocardial PET scans to Medicare beneficiaries in cost-efficient settings. Further, we believe that the proposed rates are adequate to ensure appropriate access to these services for Medicare beneficiaries. We are seeking comments on our proposal to provide a single payment rate for all myocardial PET scans in CY 2007. The myocardial PET scan CPT codes and their CY 2007 proposed APC assignments are displayed in Table 17.

TABLE 17.—PROPOSED CY 2007 APC ASSIGNMENT FOR MYOCARDIAL PET

HCPSC code	Short descriptor	CY 2006 SI	CY 2006 APC	CY 2006 payment rate	Proposed CY 2007 SI	Proposed CY 2007 APC	Proposed CY 2007 APC median cost
78459	Heart muscle imaging (PET)	S	0306	\$800.55	S	0307	\$721.26
78491	Heart image (PET), single	S	0306	800.55	S	0307	721.26
78492	Heart image (PET), multiple	S	0307	2,484.88	S	0307	721.26

12. Radiology Procedures (APCs 0333, 0662, and Other Imaging APCs)

(If you choose to comment on issues in this section, please include the caption “Radiology Procedures” at the beginning of your comment.)

At its March 2006 meeting, the APC Panel made three recommendations regarding radiology services. These include the following:

- Reaffirming the CY 2005 recommendation that CMS postpone implementation of the multiple procedure reduction policy for imaging services as included in the CY 2006 OPPS proposed rule for CY 2007, to allow CMS to gather more data on the efficiencies associated with multiple imaging procedures that may already be reflected in OPPS payment rates for imaging services.

- Recommending that CMS review payment rates for computed tomography (CT) and computed tomographic angiography (CTA) procedures to ensure that their payment rates are comparatively consistent and that they accurately reflect resource use.

- Recommending that CMS invite comments on ways that hospitals can uniformly and consistently report charges and costs related to radiology services.

In the CY 2006 OPPS final rule with comment period (70 FR 68707), we indicated that based on the APC Panel’s recommendations and public comments received, we decided not to finalize our CY 2006 proposal to reduce OPPS payments for some second and subsequent diagnostic imaging procedures performed in the same

session. Our analyses did not disprove the commenters’ contentions that there are efficiencies already reflected in their hospital costs, and, therefore, their CCRs and the median costs for the procedures. Over the past 7 months, we have conducted additional studies of our hospital claims data for single and multiple diagnostic imaging procedures, and our analyses to date support continued deferral for CY 2007 of implementation of a multiple imaging procedure payment reduction policy in the OPPS. Therefore, we are accepting the APC Panel’s recommendation to not adopt such a policy for CY 2007 pending the results of further analyses. Depending upon the findings from such studies, in a future rulemaking we may propose revisions to the structure of our

rates to further refine these rates in the context of additional study findings.

We also are accepting the APC Panel's recommendation to review the CY 2007 proposed payment rates for CT and CTA procedures to ensure that their rates are comparatively consistent and accurately reflective of hospitals' resource costs. Presenters at the March 2006 APC Panel meeting indicated to the Panel that hospital resources for CTA procedures are similar to those for CT procedures that include scans without contrast followed by scans with contrast, but additional resources are required for the 3-dimensional reconstruction that is part of the CTA procedures. As a result of this image postprocessing, CTA scans display the vasculature in a 3-dimensional format rather than in the 2-dimensional cross-sectional images of conventional CT scans. Based upon CY 2005 claims data, the CY 2007 proposed median cost for APC 0333 for CT procedures that include scans without contrast material, followed by contrast scans to complete the studies is \$309, and the CY 2007 proposed median cost for APC 0662 for CTA procedures is \$304. As has been the case for the past several years, the median costs associated with these two APCs are virtually identical to one another and are also quite consistent with their historical costs from prior years of claims data. The CY 2007 proposed median costs for APCs 0333 and 0662 are based on about 500,000 and 150,000 single claims, respectively. The stability of these APC median costs, based on large numbers of single claims, is consistent with our belief that the median costs of these APCs accurately reflect hospitals' resource use. From CY 2004 to CY 2005 the number of CTA procedures performed in the outpatient department increased by 50 percent, whereas the number of CT procedures that included a scan without contrast followed by a scan with contrast to complete each full study increased by only about 1 percent. The large annual increases in the OPSS frequencies of CTA procedures through CY 2005 provide no evidence that Medicare beneficiaries are experiencing difficulty accessing these services in the hospital outpatient setting. CTA procedures are being more commonly performed for various clinical indications, likely resulting in more consistent and efficient use of the associated image postprocessing technology. Accordingly, it is not surprising that the hospital costs of typical CTA procedures in contemporary medical practice are very similar to the hospital costs of the more involved and resource-intensive

complex CT services that, like CTA procedures, include scans without contrast material, followed by scans with contrast. Thus, we believe that our CY 2007 proposed payment rates for CT and CTA procedures are generally consistent with one another and accurately reflective of hospitals' resource costs.

With respect to the APC Panel's recommendation regarding the reporting of costs and charges for radiology services, CMS requires hospitals to report their costs and charges through the cost report with sufficient specificity to support CMS' use of cost report data for monitoring and payment. Within generally accepted principles of cost accounting, we allow providers flexibility to accommodate the unique attributes of each institution's accounting systems. For example, providers must match the generally intended meaning of the line-item cost centers, both standard and nonstandard, to the unique configuration of department and service categories used by each hospital's accounting system. Also, while the cost report provides recommended bases of allocation for the general services cost centers, a provider is permitted, within specified guidelines, to use an alternative basis for a general service cost if it can justify to its fiscal intermediary that the alternative is more accurate than the recommended basis. This approach creates internal consistency between a hospital's accounting system and the cost report, but cannot guarantee the precise comparability of costs and charges for individual cost centers across institutions.

However, we believe that achieving greater uniformity by, for example, specifying the exact components of individual cost centers, would be very burdensome for hospitals and auditors. Hospitals would need to tailor their internal accounting systems to reflect a national definition of a cost center. It is not clear that the marginal improvement in precision created by such a requirement would justify the additional administrative burden. The current hospital practice of matching costs to the general intended meaning of a cost center ensures that most services in the cost center will be comparable across providers, even if the precise composition of a cost center among hospitals differs. Further, every hospital provides a different mix of services. Even if CMS specified the components of each cost center, costs and charges on the cost report would continue to reflect each individual hospital's mix of services. At the same time, internal consistency is very important to the

OPPS. Costs are estimated on claims by matching cost-to-charge ratios for a given hospital to their own claims data through a cost center-to-revenue code crosswalk. OPSS relative weights are based on the median cost for all services in an APC. The components resulting in CCRs for a given revenue code would have to be dramatically different for the providers contributing the majority of claims used to calculate an APC's median cost in order to impact relative weights.

We are accepting the APC Panel's recommendation and specifically inviting comments on ways that hospitals can uniformly and consistently report charges and costs related to all cost centers, not just radiology, that also acknowledge the ubiquitous tradeoff between greater precision in developing CCRs and administrative burden associated with reduced flexibility in hospital accounting practices.

IV. Proposed OPSS Payment Changes for Devices

A. Proposed Treatment of Device-Dependent APCs

(If you choose to comment on issues in this section, please include the caption "Device-Dependent APCs" at the beginning of your comment.)

1. Background

Device-dependent APCs are populated by HCPCS codes that usually, but not always, require that a device be implanted or used to perform the procedure. For the CY 2002 OPSS, we used external data, in part, to establish the device-dependent APC medians used for weight setting. At that time, many devices were eligible for pass-through payment. For the CY 2002 OPSS, we estimated that the total amount of pass-through payments would far exceed the limit imposed by statute. To reduce the amount of a pro rata adjustment to all pass-through items, we packaged 75 percent of the cost of the devices, using external data furnished by commenters on the August 24, 2001 proposed rule and information furnished on applications for pass-through payment, into the median costs for the device-dependent APCs associated with these pass-through devices. The remaining 25 percent of the cost was considered to be pass-through payment.

In the CY 2003 OPSS, we determined APC medians for device-dependent APCs using a three-pronged approach. First, we used only claims with device codes on the claim to set the medians for these APCs. Second, we used

external data, in part, to set the medians for selected device-dependent APCs by blending that external data with claims data to establish the APC medians. Finally, we also adjusted the median for any APC (whether device-dependent or not) that declined more than 15 percent. In addition, in the CY 2003 OPPS we deleted the device codes ("C" codes) from the HCPCS file in the belief that hospitals would include the charges for the devices on their claims, notwithstanding the absence of specific codes for devices used.

In the CY 2004 OPPS, we used only claims containing device codes to set the medians for device-dependent APCs and again used external data in a 50/50 blend with claims data to adjust medians for a few device-dependent codes when it appeared that the adjustments were important to ensure access to care. However, hospital device code reporting was optional.

In the CY 2005 OPPS, which was based on CY 2003 claims data, there were no device codes on the claims and, therefore, we could not use device-coded claims in median calculations as a proxy for completeness of the coding and charges on the claims. For the CY 2005 OPPS, we adjusted device-dependent APC medians for those device-dependent APCs for which the CY 2005 OPPS payment median was less than 95 percent of the CY 2004 OPPS payment median. In these cases, the CY 2005 OPPS payment median was adjusted to 95 percent of the CY 2004 OPPS payment median. We also reinstated the device codes and made the use of the device codes mandatory where an appropriate code exists to describe a device utilized in a procedure. We also implemented HCPCS code edits to facilitate complete reporting of the charges for the devices used in the procedures assigned to the device-dependent APCs.

In the CY 2006 OPPS, which was based on CY 2004 claims data, we set the median costs for device-dependent APCs for CY 2006 at the highest of: (1) The median cost of all single bills; (2) the median cost calculated using only claims that contained pertinent device codes and for which the device cost is greater than \$1; or (3) 90 percent of the payment median that was used to set the CY 2005 payment rates. We set 90 percent of the CY 2005 payment median as a floor rather than 85 percent as proposed, in consideration of public comments that stated that a 15-percent reduction from the CY 2005 payment median was too large of a transitional step. We noted in our CY 2006 proposed rule that we viewed our proposed 85-percent payment adjustment as a

transitional step from the adjusted medians of past years to the use of unadjusted medians based solely on hospital claims data with device codes in future years (70 FR 42714). We also incorporated, as part of our CY 2006 methodology, the recommendation to base payment on medians that were calculated using only claims that passed the device edits. As stated in the CY 2006 OPPS final rule with comment period (70 FR 68620), we believed that this policy provided a reasonable transition to full use of claims data in CY 2007, which would include device coding and device editing, while better moderating the amount of decline from the CY 2005 OPPS payment rates.

2. Proposed CY 2007 Payment Policy

For CY 2007, we are proposing to base the device-dependent APC medians on CY 2005 claims, the most current data available. As stated earlier, in CY 2005 we reinstated the use of device codes and made the reporting of device codes mandatory where an appropriate code exists to describe a device utilized. In CY 2005, we also implemented HCPCS code edits to facilitate complete reporting of the charges for the devices used in the procedures assigned to the device-dependent APCs. We implemented the first set of device edits on April 1, 2005, for those APCs for which the CY 2005 payment rate was based on an adjusted median cost. We continued to take public comment on the remaining device edits after April 1, 2005, and implemented device edits for the remaining device-dependent APCs on October 1, 2005. Subsequent to the implementation of the device edits, we received public comments that caused us to remove the requirement for edits for several APCs on the basis that the services in them do not always require the use of a device or there may be no suitable device codes available for reporting all devices that may be used to perform the procedures.

For example, we removed the requirement for device codes for APC 0080 (Diagnostic Cardiac Catheterization) based on the information provided by hospitals that the codes assigned to this APC do not always require a device for which there is an appropriate HCPCS code. Therefore, we no longer consider this APC to be device dependent and have removed it from the list of device-dependent APCs. In the case of some procedures assigned to other device-dependent APCs, where we determined that no device was required to provide a particular service or where there were no HCPCS codes that described all devices that could be used to furnish the

service, we removed the requirement for a device code for the individual procedure code but retained the device requirement for other procedure codes assigned to that device-dependent APC.

In its February 2005 meeting, the APC Panel recommended that we consider calculating the median costs for APCs 0107 (Insertion of Cardioverter Defibrillator) and 0108 (Insertion/Replacement/Repair of Cardioverter-Defibrillator Leads) by bypassing the line-item costs of CPT code 33241 (Subcutaneous removal of single or dual chamber pacing cardioverter-defibrillator pulse generator) and packaging the line item-costs of CPT codes 93640 (Electrophysiological evaluation of single or dual chamber pacing cardioverter-defibrillator leads including defibrillation threshold evaluation (induction of arrhythmia, evaluation of sensing and pacing for arrhythmia termination) at time of initial implantation or replacement) and 93641 (Electrophysiological evaluation of single or dual chamber pacing cardioverter-defibrillator leads including defibrillation threshold evaluation (induction of arrhythmia, evaluation of sensing and pacing for arrhythmia termination) at time of initial implantation or replacement; with testing of single or dual chamber pacing cardioverter-defibrillator) when these codes, separately or in combination, are reported on the same claim with HCPCS codes G0297 (Insertion of single chamber pacing cardioverter defibrillator pulse generator), G0298 (Insertion of dual chamber pacing cardioverter defibrillator pulse generator), G0299 (Insertion or repositioning of electrode lead for single chamber pacing cardioverter defibrillator and insertion of pulse generator) and G0300 (Insertion or repositioning of electrode lead(s) for dual chamber pacing cardioverter defibrillator and insertion of pulse generator), which are assigned to APCs 0107 and 0108. The APC Panel recommended bypassing the line-item costs for CPT code 33241 because members believed that when a pacing cardioverter-defibrillator (ICD) pulse generator removal is performed in the same operative session as the insertion of a new pulse generator described by a procedure code assigned to APC 0107 or 0108, the packaging on the claim is appropriately assigned to the procedure code in APC 0107 or 0108. Moreover, CPT codes 93640 and 93641 may only be correctly coded when the electrophysiologic evaluation of ICD leads is performed at the time of initial implantation or replacement of an ICD

pulse generator and/or leads, with or without testing of the pulse generator. Thus, the APC Panel expected that the costs of the evaluations of the ICD leads (CPT codes 93640 and 93641) could be appropriately packaged with the procedure codes that describe the insertion of ICD generators, which are assigned to APCs 0107 and 0108, or the insertion of ICD leads assigned to APCs 0106 (Insertion/Replacement/Repair of Pacemaker and/or Electrodes), 0108, and 0418 (Insertion of Left Ventricular Pacing Elect). Because APCs 0107 and 0108 have typically had very few single bills on which the medians have been based, and because the APC Panel indicated that it believed that we could use many more claims if we bypassed CPT code 33241 and packaged CPT codes 93640 and 93641, we calculated median costs for APCs 0107 and 0108 using these rules. We excluded claims that did not meet the device edits, and we also excluded token claims.

The effect of packaging CPT codes 93640 and 93641 into claims that both pass the device edits and also contain no token charges for devices are shown in Table 19 below. This affected APCs 0106, 0107, 0108, and 0418. Bypassing the line-item cost of CPT code 33241 could not be done for all claims on which this CPT code was reported because there are clinical circumstances in which the ICD pulse generator is removed and no new device is implanted. Therefore, the APC assignment for CPT code 33241 and the payment for that code need to reflect the packaging associated with the procedure when it is performed alone. Because of this problem with assigning packaging in all the circumstances in which the procedure may be reported, we decided against proposing to bypass CPT code 33241, either in general for all procedures or selectively, when it is reported with the procedures in APCs 0107 and 0108.

However, CPT codes 93640 and 93641 are always performed during an operative procedure for ICD initial implantation or replacement or with implantation, revision or replacement of leads, and, therefore, it would be appropriate to package them into the surgical procedure with which they are performed. Moreover, as a result of the descriptors of the lead evaluation CPT codes, they should never be billed as single procedure claims and packaging them would also resolve the problem of setting their payment rates in part on the basis of claims that reflect erroneous coding. Packaging the costs of the intraoperative electrophysiologic testing of the ICD leads yields many more

single bills on which to set median costs and also increases the median costs for APCs 0106, 0107, 0108, and 0418. Therefore, we are proposing to package CPT codes 93640 and 93641 for CY 2007.

We calculated the median cost for device-dependent APCs using two different sets of claims. We first calculated a median cost using all single procedure claims for the procedure codes in those APCs. We also calculated a second median cost using only claims that contain allowed device codes and also for which charges for all device codes were in excess of \$1.00 (nontoken charge device claims). We excluded claims for which the charge for a device was less than \$1.01, in part, to recognize hospital charging practices due to a recall of cardioverter defibrillator and pacemaker pulse generators in CY 2005 for which the manufacturers provided replacement devices without cost to the beneficiary or hospital. We also found that there are other devices for which the charge was less than \$1.01, and we removed those claims also.

As expected, the median costs calculated using all single procedure bills, including both bills that lack appropriate device codes (where there are edits) and bills with token charges for devices, are, in many cases, less than the medians calculated using only claims that contain appropriate device codes and that have no token charges for devices. In some cases the medians are significantly different when claims either without device codes or which have only token device charges are removed. We believe that the claims that reflect the best estimated costs for these APCs, including the costs of the devices, are those claims that contain appropriate devices and which also have no token charges for devices. (See section IV.A.4. below for our discussion of payments when the hospital incurs no cost for the principal device required for the service.)

When we compare the proposed median costs calculated using only CY 2005 claims that contain correct device codes and which do not contain token charges for devices to the unadjusted median costs that were derived from CY 2004 claims data, we find that the medians for only 2 APCs decline (6.3 percent for APC 0061 (Laminectomy or Incision for Implantation of Neurostimulator Electrodes, Excluding Cranial Nerve) and 2.78 percent for APC 0115 (Cannula/Access Device Procedures)). When we compared the proposed CY 2007 medians to the adjusted medians used to set the payment rates for CY 2006, only 6 APCs

would decline more than 10 percent in median cost. This compares favorably to the data for the CY 2006 OPPS final rule with comment period in which 12 APCs declined more than 10 percent when the unadjusted median cost from the data for the CY 2006 OPPS final rule with comment period were compared to the adjusted median cost on which the CY 2005 OPPS payments were based. Some APC cost variation from year to year, whether increasing or decreasing, is to be expected.

Therefore, we are proposing to base the payment rates for CY 2007 for these device-dependent APCs on median costs calculated using claims with appropriate device codes and which have no token charges for devices reported on the claim. We do not believe that adjustment of these median costs is necessary to provide adequate payment for these services, and, therefore, we are not proposing to adjust the median costs for these APCs to moderate any decreases in medians from CY 2006 to CY 2007. We recognize that, notwithstanding the device edits, it may continue to be necessary for purposes of median cost calculations to remove claims that do not contain devices because it is likely that there would be incidental occurrences of interrupted procedures in which a device is not used and does not appear on the claim. (The interrupted procedure modifier nullifies the device edit.) Moreover, there are likely to continue to be incidental occurrences of token charges for devices as a result of devices that are replaced without cost by the manufacturer. However, each of these circumstances could cause the procedure code median cost to underrepresent the cost of the complete procedure, including the device cost, where the hospital purchases the device.

Hence, we believe that use of claims that meet the device edits and which do not contain token charges for devices are the appropriate claims to use to set the median costs for the device-dependent APCs, ensuring that the costs of the principal devices are included in the APC medians. In addition, we believe that, with our proposed changes to the OPPS packaging status of two codes for electrophysiologic evaluation of ICD leads, no special payment policies are needed to establish payment rates that correctly reflect the relative costs of these procedures to other procedures paid under the OPPS.

BILLING CODE 4120-01-P

Table 18. -- CY 2007 Proposed Median Costs for Device-Dependent APCs

APC	SI	APC Group Title	Hospitals Billing the APC in CY 2005 (Based on CY 2005 Data)	CY 2005 Total Frequency	CY 2005 All Single Bill Frequency	CY 2005 All Single Bill Median	Proposed CY 2007 Nontoken Pass Edit Frequency	Proposed CY 2007 Nontoken Pass Edit Median Cost
0039	S	Level I Implantation of Neurostimulator	192	1692	704	\$10,828.96	610	\$10,866.68
0040	S	Percutaneous Implantation of Neurostimulator Electrodes, Excluding Cranial Nerve	699	11468	2568	\$3,309.88	1112	\$3,482.71

3. Devices Billed in the Absence of an Appropriate Procedure Code

In the course of examining claims data for creation of the payment rates for this proposed rule, we identified circumstances in which hospitals billed a device code but failed to also bill any procedure code with which the device could be used correctly. These errors in billing lead to the costs of the device being packaged with an incorrect procedure code and also cause the hospital to be paid incorrectly for the service furnished if the device was appropriately reported. We discussed the billing of devices with incorrect procedure codes with the APC Panel at its March 2006 meeting, and the APC Panel recommended that we explore the extent to which it would be appropriate to establish edits for HCPCS device codes to ensure that hospitals also bill procedures in which the devices would be used on the same claim.

We examined our CY 2005 claims data and found that incorrect billing occurs more often with some devices than with others. We are taking this opportunity to inform the public that we expect to implement device to procedure code edits for the specified devices and their associated procedures, which we believe must be reported on a claim with the specified device for the claim to be correctly coded and the device costs properly attributed to procedures with which they are used. The devices for which we expect to implement edits are shown below in Table 20 and are posted on the CMS outpatient hospital Web site, along with our initial draft of all the procedures with which they could be appropriately used and thus reported. We believe the establishment of claims edits reflects merely operational and administrative practice. However, as the public may assist in establishing appropriate edits, we, therefore, are asking that comments

regarding the specific associations of device codes and procedure codes be provided to the following e-mail address: OutpatientPPS@cms.hhs.gov. This is the same e-mail address to which comments on the existing procedure to device edits should be directed.

Comments submitted on this issue to this mail box are not comments on this proposed rule and we will not respond to them in the CY 2007 OPPS final rule.

C2621	Pmkr, other than sing/ dual.

4. Proposed Payment Policy When Devices are Replaced Without Cost or Where Credit for a Replaced Device Is Furnished to the Hospital

As we discuss above in the context of the calculation of median costs for ICDs and pacemakers, in recent years there have been several field actions and recalls with regard to failure of these devices. In many of these cases, the manufacturers have offered replacement devices without cost to the hospital or credit for the device being replaced if the patient required a more expensive device. In some circumstances manufacturers have also offered, through a warranty package, to pay specified amounts for unreimbursed expenses to persons who had replacement devices implanted. In addition, we believe that incidental device failures that are covered by manufacturer warranties occur routinely. While we understand that some device malfunctions may be inevitable as medical technology grows increasingly sophisticated, we believe that early recognition of problems would reduce the number of people with the potential to be adversely affected by these device problems. The medical community needs heightened and early awareness of patterns of device failures, voluntary field actions, and recalls so that they can take appropriate action to care for our beneficiaries. Systematic efforts must be undertaken by all interested and involved parties, including

manufacturers, insurers, and the medical community, to ensure that device problems are recognized and addressed as early as possible so that people's health is protected and high quality medical care is provided. We are taking several steps to assist in the early recognition and analysis of patterns of device problems to minimize the potential for harmful device-related effects on the health of Medicare beneficiaries and the public in general.

In recent years, CMS has recognized the importance of data collection as a condition of Medicare coverage for selected services. In 2005, CMS issued a National Coverage Determination (NCD) that expanded coverage of ICDs and required registry participation when the devices were implanted for certain clinical indications. The NCD included this requirement in order to ensure that the care received by Medicare beneficiaries was reasonable and necessary and, therefore, appropriately reimbursed. Presently, the American College of Cardiology—National Cardiovascular Data Registry (ACC—NCDR) collects these data and maintains the registry.

In addition to ensuring appropriate payment of claims, collection, and ongoing analysis of ICD implantation, data can speed public health action in the event of future device recalls. The systematic recording of device manufacturer and model number can enhance patient and provider notification. Analysis of registry data may uncover patterns in complication rates (for example, device malfunction, device-related infection, and early battery depletion) associated with particular devices that signify the need for a more specific investigation. Patterns found in registry data may identify problems earlier than the currently available mechanisms, which do not systematically collect such detailed information surrounding procedures.

We encourage the medical community to work to develop additional registries for implantable devices, so that timely and comprehensive information is available regarding devices, recipients of those devices, and their health status and outcomes. While participation in an ICD registry is required as a condition of coverage for ICD implantation for certain clinical conditions, we believe that the potential benefits of registries extend well beyond their application in Medicare's specific national coverage determinations. As medical technology continues to swiftly advance, data collection regarding the short and long term outcomes of new technologies, and especially concerning implanted

devices that may remain in the bodies of patients for their lifetimes, will be essential to the timely recognition of specific problems and patterns of complications. This information will facilitate early interventions to mitigate harm and improve the quality and efficiency of health care services.

Moreover, data from registries may help further the development of high quality, evidence-based clinical practice guidelines for the care of patients who may receive device-intensive procedures. In turn, widespread use of evidence-based guidelines may reduce variation in medical practice, leading to improved personal and public health. Registry information may also contribute to the development of more comprehensive and refined quality metrics that may be used to systematically assess and then improve the safety and quality of health care. Such improvements in the quality of care that result in better personal health will require the sustained commitment of industry, payers, health care providers, and others towards that goal, along with excellent and open communication and rapid system-wide responses in a comprehensive effort to protect and enhance the health of the public. We look forward to further discussions with the public about new strategies to recognize device problems early and how to definitively address them, in order to minimize both the harmful health effects and increased health care costs that may result.

In addition, we believe that the routine identification of Medicare claims where hospitals identify and then appropriately report selected services performed under the OPSS when devices are replaced without cost to the hospital or with full credit to the hospital for the cost of the replaced device, should provide comprehensive information regarding the outpatient hospital experiences of Medicare beneficiaries with certain devices that are being replaced. Because Medicare beneficiaries are common recipients of implanted devices, this claims information may be particularly helpful in identifying patterns of device problems early in their natural history so that appropriate strategies to reduce future problems may be developed.

In addition to our concern for the public health, we also have a fiduciary responsibility to the Medicare trust fund to ensure that Medicare pays only for covered services. Therefore, we are proposing, effective for services furnished on or after January 1, 2007, to reduce the APC payment and beneficiary copayment for selected APCs in cases in which an implanted

device is replaced without cost to the hospital or with full credit for the removed device. Specifically, we are proposing to revise the existing regulations by adding new § 419.45, Payment and copayment reduction for replaced devices. This regulation is intended to cover certain devices for which credit for the replaced device is given or which are replaced as a result of or pursuant to a warranty, field action, voluntary recall, involuntary recall, and certain devices which are provided free of charge. It would provide for a reduction in the APC payment rate when we determine that the device is replaced without cost to the provider or beneficiary or when the provider receives full credit for the cost of a replaced device. The amount of the reduction to the APC payment rate would be calculated in the same manner as the offset amount that would be applied if the implanted device assigned to the APC had pass-through status as defined under § 419.66. The beneficiary's copayment amount would be calculated based on the reduced APC payment rate.

We believe that this is appropriate because in these cases the full cost of the replaced device is not incurred and, therefore, we believe that an adjustment to the APC payment is necessary to remove the cost of the device. We believe that the averaging nature of the calculation of the amount of the adjustment causes it to be appropriately applied to cases of credit for the replaced device, regardless of whether there is a residual cost due to the implantation of a more expensive device.

We also believe that the proposed adjustment is consistent with section 1862(a)(2) of the Act, which excludes from Medicare coverage an item or service for which neither the beneficiary nor anyone on his or her behalf has an obligation to pay. Payment of the full APC payment rate in these cases in which the device was replaced under warranty or in which there was a full credit for the price of the recalled or failed device effectively results in Medicare payment for a noncovered item. Moreover, it results in creation of a beneficiary liability for the copayment associated with the device for which the beneficiary has no liability. Therefore, we are proposing to adjust the APC payment rate in these circumstances under the authority of section 1833(t)(2)(E) of the Act, which permits us to make equitable adjustments to the OPPS payment rates.

We recognize that in many cases, the packaged cost of the device is a relatively modest part of the APC

payment for the procedure into which the device cost is packaged. In the case of devices of modest cost, we believe that the averaging nature of payments under the OPPS based on the conversion of charges to costs with CCRs would incorporate any significant savings from a warranty replacement, field action, or recall into the payment rate for the associated procedural APC and that no specific adjustment would be necessary or appropriate. However, in other cases, such as implantation of an ICD, the cost of the device is the majority of the cost of the APC and payment at the full payment rate for the procedural APC would pay the hospital much in excess of its incurred cost of the service.

As we discuss above, we are proposing to set the APC payment rates for device-dependent APCs for the CY 2007 OPPS using only claims that contain appropriate devices to ensure that we make appropriate full payment when the hospital initially incurs the full cost of the device. Beginning in CY 2005, we required that device codes be billed for devices used and specifically required that hospitals bill certain device codes for some services. We are using the CY 2005 claims to set the payment rates for the CY 2007 OPPS. Currently, where the device is furnished without cost to the hospital, we have authorized hospitals to charge less than \$1.01, although Medicare's longstanding policy has been that, in these cases, providers may not charge for the device furnished to them without cost. (See the Medicare Internet Only Manual, Medicare Benefit Policy Manual, Publication 100–02 Chapter 16, section 40.4.)

We authorized this charge because the CMS device edits require that the hospital must report an appropriate device if they bill for certain codes that cannot be performed without a device or the claim will be returned. Moreover, the Fiscal Intermediary Standard System will not accept the claim unless there is a charge for each HCPCS code billed. In addition, we were seeking a means of identifying these recall cases in the data. Therefore, by authorizing hospitals to charge less than \$1.01 for the device we enabled the claim to be paid and also provided a mechanism for identifying devices for which the hospital incurred no expense.

Where we set the payment rates for these device-dependent APCs using only claims that contain the full costs of devices when they are purchased by hospitals and exclude claims for which there is no appropriate device code or a charge for the device of less than \$1.01, the proposed APC payments into

which the full costs of the devices have been packaged would result in excessive program payments and beneficiary copayments for the services being furnished if the devices were provided without cost to hospitals. To avoid excessive payments in these circumstances, as noted previously we are proposing to adjust the APC payment rates when implanted devices have been replaced without cost to the hospital or beneficiary or where full credit for such a device has been given because the replacement device is of greater cost than the originally implanted device.

We are proposing that the adjustment would be limited to the APCs listed in Table 21, but only when the purpose of the procedure is to replace a device that is reported by a HCPCS code in Table 22 which was furnished without cost or at full credit by the manufacturer. We are proposing that the following three criteria must each be met for an APC to be subject to the adjustment. We selected the APCs in Table 21 on the basis of these three criteria.

The first criterion is that all procedures assigned to the selected APCs must require implantable devices that would be reported if device replacement procedures were performed. Therefore, the device being replaced must be necessary for the service to be furnished and without the devices, the services assigned to the APCs could not be performed. For services, and, therefore, their assigned APCs, where a device is not needed or where it may or may not be needed to perform a procedure, we do not believe that reducing the payment for the APCs would be appropriate because the charges for the devices are unlikely to be a significant factor in establishing the rates for the APCs.

The second criterion is that the required devices must be surgically inserted or implanted devices that remain in the patient's body after the conclusion of the procedures, at least temporarily. We believe this is necessary to establish that the replacement device is a direct replacement for the device being removed. In cases of failures of devices that are surgically inserted or implanted but do not remain in the patient's body after the conclusion of procedures, we believe that it is highly likely that the replacement device is not specifically used to care for the patient on whom the original defective device was used and that, where a defective device of this type is used, there is no savings to the hospital. For example, if a vascular catheter fails during a procedure, we believe that the physician will probably

use another similar catheter to finish the procedure. In these cases the hospital would correctly charge for the catheter that was used, and there would be no savings to the hospital from that procedure. The hospital would likely charge for both the defective device and the device used to complete the procedure because both catheters were used to provide the full service. We believe that if a replacement catheter is furnished to the hospital under warranty from the manufacturer, it would be used at a much later date on a different patient, it would most likely be charged to that patient account, and it would be unlikely to be specifically identified as being furnished without cost to the hospital. In these cases, we expect that any cost savings from the replacement devices such as these (for example, catheters) that are furnished without cost would be incorporated into the median costs for the procedures in the normal course of the data process through application of the CCRs generated from the cost reports.

The third criterion is that the offset percent for the APC (that is, the median cost of the APC without device costs divided by the median cost of the APC with devices) must be significant. For this purpose, we are defining a significant offset percent as exceeding 40 percent. We believe that this percent is appropriate because our studies have shown that approximately 60 percent of the cost of OPPS services is wage-related, and that approximately 40 percent of the cost of OPPS services is not wage related. This is why we adjust 60 percent of the APC payment rates for all APCs, including APCs for which a greater percentage of the APC payment is for the cost of a device.

We believe that once the device share of an APC exceeds the 40 percent we attribute to costs other than wage costs (for example, device costs, capital costs, plant costs, and supplies other than devices), the device cost is a significant part of the APC cost. Therefore, where the device costs in an APC exceed 40 percent, which is the average of all types of nonwage-related costs across all APCs, we are proposing to define the device costs as "significant" for purposes of this proposed policy.

We recognize that it may be appropriate to define "significant" for this purpose at a different percentage of the APC cost because there are costs other than device costs (for example, capital costs and other supply costs) in the 40 percent of service costs to which the wage adjustment does not apply. We would reassess for future years whether it is appropriate to define "significant"

for this purpose at a level other than 40 percent.

For purposes of making the proposed adjustment, we would adapt the methodology that we have employed to establish an offset for the device costs incorporated into APCs in cases where a pass-through device is also being billed. We currently calculate the offset amount by first calculating a median including the device costs and then calculating a median excluding device costs using single bills that contain devices. We then divide the "without device" median by the "with device" median and subtract the percent from 100 to acquire the percent of cost attributable to devices in the APC. We apply this percent to the payment rate of the APC to determine the offset amount. For example, this is the methodology we used to calculate the offset amount for APC 0222 when current pass-through device C1820 (Generator, neuro rechg bat sys) is billed on the same claim. We believe that it is appropriate to apply this same methodology in circumstances when we need to remove the cost of the device from the APC payment, not because the device is being paid under pass-through but because the hospital is either not incurring the cost for the replaced device or has been given full credit for the replaced device. In both cases, the intent is to remove the cost of the device from the APC payment rate.

Using this methodology, we calculated the proposed offset amounts in Table 21 by first calculating an APC median cost including device costs and then calculating a median cost excluding device costs, using only single bills that meet our device edits and do not have token charges for devices. We then divided the "without device" median cost by the "with device" median cost and subtracted the percent from 100 to acquire the percent of cost attributable to devices in the APC. We next applied this percent to the payment rate for the APC to determine the offset amount.

The following is an example of the payment reduction in the case of replacement of an ICD under warranty. Where the cardioverter defibrillator pulse generator described by HCPCS code C1721 (AICD, dual chamber) is replaced under warranty during a procedure described by HCPCS code G0298 (Insertion of dual chamber pacing cardioverter defibrillator pulse generator), the hospital would report HCPCS code G0298 with a specified modifier and would also report HCPCS code C1721 with a token charge for the device. Assuming the hospital had a wage index of 1, the payment rate for

APC 0107 after adjustment would be \$1862.27. That is, the adjusted payment rate would equal the unadjusted payment rate for APC 0107 (\$17,185.34) less the warranty reduction percentage in Table 21 of 89.13 percent (\$15,317.29). Because the adjustment amount is set for the APC, the same adjustment amount would be removed if devices reported under HCPCS code C1722 or C1882 were reported with HCPCS code G0297. This is identical to the amount of adjustment that would apply to the payment for a pass-through device if there were, hypothetically, a new ICD to which we had given pass-through status (no ICD currently has pass-through status).

We are proposing to both adjust the APC payment to remove payment for the device furnished without cost to the hospital or beneficiary and also to decrease the beneficiary copayment in proportion to the reduced APC payment so that the beneficiary would, in many but not all cases, share in the cost savings attributable to the provision of the device without cost by the manufacturer. We are proposing that when a device is replaced without cost to the hospital under warranty or recall or a credit is provided for the cost of a failed or recalled device (unlike cases of offset for a pass-through device), the beneficiary's copayment would be calculated based on the reduced APC payment rate, maintaining the same percentage copayment as applies to the unadjusted APC payment if the inpatient deductible is not exceeded. We believe that it is appropriate to reduce the beneficiary copayment in these cases because the device is being furnished or credited by the manufacturer without obligation on the part of the beneficiary. We note, however, that in the case of some high cost APCs, making the payment adjustment in a recall or warranty situation may not result in reduction of the copayment because the copayment, although based on the reduced payment rate, may continue to exceed the inpatient deductible and, therefore, would continue to be set at the inpatient deductible.

In contrast, in the case of pass-through devices, the beneficiary is liable for the copayment on the full APC amount (which, in the case of high cost APCs, is limited to the Medicare inpatient deductible) but pays no copayment for the incremental cost of the pass-through device. This is appropriate in the case of payment for pass-through devices because the hospital incurs costs for both the service and the device, and Medicare pays for both the service through the full APC

payment and for the incremental cost of the pass-through device above the costs of associated devices already reflected in the APC payment at charges reduced to cost by a CCR. The pass-through payment amount is reduced only to prevent the program from making duplicate payment for a portion of the device, once as part of the APC payment and once through the pass-through payment.

We are proposing to implement the adjustment through the use of an appropriate modifier specific to a device replacement without cost or crediting of the cost of a device by the manufacturer. Hospitals would be required to report the modifier appended to a specific procedure on claims for services when two conditions are met. The first condition is that the procedure is assigned to one of the APCs in Table 21. We have discussed above the criteria that we employed for selecting the APCs in Table 21. The second condition is that the device for which the manufacturer furnished a replacement device (or provided credit for the device being replaced) is one of the devices included in Table 22. We are restricting the devices to which the adjustment would apply to those included in Table 22 in order to ensure that the adjustment is not triggered by the replacement of an inexpensive device whose cost does not constitute a significant proportion of the total payment rate for an APC.

The presence of the modifier would trigger the adjustment in payment for the APCs in Table 21. While we recognize that this creates a reporting burden for hospitals, we believe the reporting requirement is unavoidable. Only hospitals can report whether the circumstances for reduced payment as described above are met and, therefore, we see no option other than to have hospitals report this information to us. We recognize that the current FB modifier ("Item furnished without cost to provider, supplier or practitioner") may not be appropriate in cases in which the replacement device is a more expensive device than the device being removed and may need to be changed to expand its use for all potential APC payment adjustment scenarios.

Our proposed policy would accomplish three important goals. First and foremost, it would advise us of the extent to which devices are being replaced due to device failures so that, if patterns are identified, we can explore them to see if there are systemic problems with certain devices. The reporting of a specific modifier with certain procedure codes would allow us to examine patterns of delivery of specific hospital services when implanted devices are replaced without cost or with full credit for the cost of a device by the manufacturer, in comparison with publicly available information about problematic devices. Analysis of outpatient hospital claims

would serve as an additional source of information to the medical community about patterns of device failures, voluntary field actions, and recalls, contributing to improved awareness and understanding of problems.

Secondly, it would ensure equitable adjustment to the payments for surgical procedures to replace problematic devices by providing payments to hospitals only for the nondevice related procedural costs when a device is replaced without cost to the hospital for the device or with full credit for the removed device. Thirdly, it would also identify those claims that contain reduced device charges due to the full credit provided by the manufacturer for a replaced device so that in the future we can assess the impact of these claims on median costs for the services into which the device costs are packaged.

This proposed policy would be effective for services furnished on or after January 1, 2007. We believe that this proposed policy is necessary to enable us to secure claims data that may be used to identify trends in device problems that lead to device replacements. It is also necessary to fulfill our fiduciary responsibility to the Medicare program by not providing payments for items that are excluded from coverage under Medicare law because neither the beneficiary nor any party on his or her behalf has an obligation to pay.

TABLE 21.—PROPOSED ADJUSTMENT TO APCs IN CASES OF REPLACEMENT OF OR FULL CREDIT FOR FAILED OR RECALLED DEVICE

APC	SI	APC group title	CY 2007 proposed offset percent
0039	S	Level I Implantation of Neurostimulator	78.51%
0040	S	Percutaneous Implantation of Neurostimulator Electrodes, Excluding Cranial Nerve	54.66%
0061	S	Laminectomy or Incision for Implantation of Neurostimulator Electrodes, Excludin	60.59%
0089	T	Insertion/Replacement of Permanent Pacemaker and Electrodes	77.14%
0090	T	Insertion/Replacement of Pacemaker Pulse Generator	74.56%
0106	T	Insertion/Replacement/Repair of Pacemaker and/or Electrodes	41.04%
0107	T	Insertion of Cardioverter-Defibrillator	89.13%
0108	T	Insertion/Replacement/Repair of Cardioverter-Defibrillator Leads	89.15%
0222	T	Implantation of Neurological Device	78.10%
0225	S	Implantation of Neurostimulator Electrodes, Cranial Nerve	80.62%
0226	T	Implantation of Drug Infusion Reservoir	62.21%
0227	T	Implantation of Drug Infusion Device	81.50%
0229	T	Transcatheter Placement of Intravascular Shunts	42.32%
0259	T	Level VI ENT Procedures	84.03%
0315	T	Level II Implantation of Neurostimulator	83.52%
0385	S	Level I Prosthetic Urological Procedures	46.88%
0386	S	Level II Prosthetic Urological Procedures	61.32%
0418	T	Insertion of Left Ventricular Pacing Elect	86.11%
0654	T	Insertion/Replacement of a permanent dual chamber pacemaker	76.73%
0655	T	Insertion/Replacement/Conversion of a permanent dual chamber pacemaker	76.89%
0680	S	Insertion of Patient Activated Event Recorders	77.03%
0681	T	Knee Arthroplasty	73.26%

TABLE 22.—DEVICES FOR WHICH THE PROPOSED MODIFIER MUST BE REPORTED WITH THE PROCEDURE CODE WHEN FURNISHED WITHOUT COST OR AT FULL CREDIT FOR A REPLACED DEVICE

Device	Description
C1721	AICD, dual chamber.
C1722	AICD, single chamber.
C1764	Event recorder, cardiac.
C1767	Generator, neurostim, imp.
C1771	Rep dev, urinary, w/sling.
C1772	Infusion pump, programmable.
C1776	Joint device (implantable).
C1777	Lead, AICD, endo single coil.
C1778	Lead, neurostimulator.
C1779	Lead, pmkr, transvenous VDD.
C1785	Pmkr, dual, rate-resp.
C1786	Pmkr, single, rate-resp.
C1813	Prosthesis, penile, inflatab.
C1815	Pros, urinary sph, imp.
C1820	Generator, neuro rechg bat sys.
C1882	AICD, other than sing/dual.
C1891	Infusion pump, non-prog, perm.
C1895	Lead, AICD, endo dual coil.
C1896	Lead, AICD, non sing/dual.
C1897	Lead, neurostim, test kit.
C1898	Lead, pmkr, other than trans.
C1899	Lead, pmkr/AICD combination.
C1900	Lead coronary venous.
C2619	Pmkr, dual, non rate-resp.
C2620	Pmkr, single, non rate-resp.
C2621	Pmkr, other than sing/dual.
C2622	Prosthesis, penile, non-inf.
C2626	Infusion pump, non-prog, temp.
C2631	Rep dev, urinary, w/o sling.
L8614	Cochlear device/system.

B. Proposed Pass-Through Payments for Devices

(If you choose to comment on issues in this section, please include the caption "Pass-Through Devices" at the beginning of your comment.)

1. Expiration of Transitional Pass-Through Payments for Certain Devices

a. Background

Section 1833(t)(6)(B)(iii) of the Act requires that, under the OPSS, a category of devices be eligible for transitional pass-through payments for at least 2, but not more than 3, years. This period begins with the first date on which a transitional pass-through payment is made for any medical device that is described by the category. The device category codes became effective April 1, 2001, under the provisions of the BIPA. Prior to pass-through device categories, Medicare payments for pass-through devices under the OPSS were made on a brand-specific basis. All of the initial 97 category codes that were established as of April 1, 2001, have expired; 95 categories expired after CY 2002, and 2 categories expired after CY 2003. In addition, nine new categories have expired since their creation. We

currently have no category codes for pass-through devices that will expire January 1, 2007. We created one new category effective January 1, 2006, for C1820 (Generator, neurostimulator (implantable), with rechargeable battery and charging system), which we are proposing to continue to pay under the pass-through provision in CY 2007 under the OPSS. This category was created after we published modifications to our criteria in the CY 2006 OPSS final rule with comment period on November 10, 2005 (70 FR 68628 through 68631) allowing CMS to refine previous pass-through category descriptions that would have prevented us from making pass-through payments for a new technology that otherwise met our criteria. These modifications amended the original criteria and process for creating additional device categories for pass-through payment that we published on November 2, 2001 (66 FR 55850 through 55857). Under our established policy, we base the expiration dates for the category codes on the date on which a category was first eligible for pass-through payment.

In the November 1, 2002 OPSS final rule, we established a policy for payment of devices included in pass-through categories that are due to expire (67 FR 66763). For CY 2003 through CY 2006, we packaged the costs of the devices no longer eligible for pass-through payments into the costs of the procedures with which the devices were billed in the claims data used to set the payment rates for those years. Brachytherapy sources, which are now separately paid in accordance with section 1833(t)(2)(H) of the Act, are an exception to this established policy (with the exception of brachytherapy sources for prostate brachytherapy, which were packaged in the CY 2003 OPSS only).

b. Proposed Policy for CY 2007

As we stated earlier, currently we have one effective device category for pass-through payment, C1820, which we created for pass-through payment effective January 1, 2006. We are proposing to continue to make payment under the pass-through provisions for category C1820 for CY 2007. We are proposing that this category would expire from pass-through payment after December 31, 2007. This would provide the category transitional pass-through payment status for a 2-year period, in accordance with the statutory requirement that no category be paid as a pass-through device for less than 2 years, nor more than 3 years.

2. Provisions for Reducing Transitional Pass-Through Payments To Offset Costs Packaged Into APC Groups

a. Background

In the November 30, 2001 OPSS final rule, we explained the methodology we used to estimate the portion of each APC payment rate that could reasonably be attributed to the cost of the associated devices that are eligible for pass-through payments (66 FR 59904). Beginning with the implementation of the CY 2002 OPSS quarterly update (April 1, 2002), we deducted from the pass-through payments for the identified devices an amount that reflected the portion of the APC payment amount that we determined was associated with the cost of the device, as required by section 1833(t)(6)(D)(ii) of the Act. In the November 1, 2002 interim final rule with comment period, we published the applicable offset amounts for CY 2003 (67 FR 66801).

For the CY 2002 and CY 2003 OPSS updates, to estimate the portion of each APC payment rate that could reasonably be attributed to the cost of an associated device eligible for pass-through payment, we used claims data from the period used for recalibration of the APC rates. That is, for CY 2002 OPSS updating, we used CY 2000 claims data, and for CY 2003 OPSS updating, we used CY 2001 claims data. For CY 2002, we used median cost claims data based on specific revenue centers used for device-related costs because C-code cost data were not available until CY 2003. For CY 2003, we calculated a median cost for every APC without packaging the costs of associated C-codes for device categories that were billed with the APC. We then calculated a median cost for every APC with the costs of the associated device category C-codes that were billed with the APC packaged into the median. Comparing the median APC cost without device packaging to the median APC cost, including device packaging, enabled us to determine the percentage of the median APC cost that is attributable to the associated pass-through devices. By applying those percentages to the APC payment rates, we determined the applicable amount to be deducted from the pass-through payment, the "offset" amount. We created an offset list comprised of any APC for which the device cost was at least 1 percent of the APC's cost.

The offset list that we published for CY 2002 through CY 2004 was a list of offset amounts associated with those APCs with identified offset amounts developed using the methodology described above. As a rule, we do not

know in advance which procedures residing in certain APCs may be billed with new device categories. Therefore, an offset amount is applied only when a new device category is billed with a HCPCS procedure code that is assigned to an APC appearing on the offset list.

For CY 2004, we modified our policy for applying offsets to device pass-through payments. Specifically, we indicated that we would apply an offset to a new device category only when we could determine that an APC contains costs associated with the device. We continued our existing methodology for determining the offset amount, described earlier. We were able to use this methodology to establish the device offset amounts for CY 2004 because providers reported device codes (C-codes) on the CY 2002 claims used for the CY 2004 OPPTS update. For the CY 2005 update to the OPPTS, our data consisted of CY 2003 claims that did not contain device codes and, therefore, for CY 2005, we utilized the device percentages as developed for CY 2004. In the CY 2004 OPPTS update, we reviewed the device categories eligible for continuing pass-through payment in CY 2004 to determine whether the costs associated with the device categories are packaged into the existing APCs. Based on our review of the data for the device categories existing in CY 2004, we determined that there were no close or identifiable costs associated with the devices relating to the respective APCs that are normally billed with them. Therefore, for those device categories, we set the offset amount to \$0 for CY 2004. We continued this policy of setting the offset amount to \$0 for the device categories that continued to receive pass-through payment in CY 2005.

For the CY 2006 OPPTS update, CY 2004 hospital claims were available for analysis. Hospitals billed device C-codes in CY 2004 on a voluntary basis. We reviewed our CY 2004 data and found that the numbers of claims for services in many of the APCs for which we calculated device percentages using CY 2004 data were quite small. We also found that many of these APCs already had relatively few single claims available for median calculations compared with the total bill frequencies because of our inability to use many multiple bills in establishing median costs for all APCs. In addition, we found that our claims demonstrated that relatively few hospitals specifically coded for devices utilized in CY 2004. Thus, we were not confident that CY 2004 claims reporting C-codes represented the typical costs of all hospitals providing the services.

Therefore, we did not use CY 2004 claims with device coding to calculate CY 2006 device offset amounts. In addition, we did not use the CY 2005 methodology, for which we utilized the device percentages as developed for CY 2004. Two years had passed since we developed the device offsets for CY 2004, and the device offsets originally calculated from CY 2002 hospitals' claims data may either have overestimated or underestimated the contributions of device costs to total procedural costs in the outpatient hospital environment of CY 2004. In addition, a number of the APCs on the CY 2004 and CY 2005 device offset percentage lists were either no longer in existence or were so significantly reconfigured that the past device offsets likely did not apply.

For CY 2006, we reviewed the single new device category established thus far, C1820, to determine whether device costs associated with the new category are packaged into the existing APC structure. Under our established policy, if we determine that the device costs associated with the new category are closely identifiable to device costs packaged into existing APCs, we set the offset amount for the new category to an amount greater than \$0. Our review of the service indicated that the median costs for the applicable APC 0222 (Implantation of Neurological Device) contained costs for neurostimulators similar to the costs of the new device category C1820. Therefore, we determined that a device offset would be appropriate. We announced an offset amount for that category in Program Transmittal No. 804, dated January 3, 2006.

For CY 2006, we are using available partial year CY 2005 hospital claims data to calculate device percentages and potential offsets for CY 2006 applications for new device categories. Effective January 1, 2005, we require hospitals to report device C-codes and their costs when hospitals bill for services that utilize devices described by the existing C-codes. In addition, during CY 2005, we implemented device edits for many services that require devices and for which appropriate device C-codes exist. Therefore, we expected that the number of claims that include device codes and their respective costs to be much more robust and representative for CY 2005 than for CY 2004. We believe that use of the most current claims data to establish offset amounts when they are needed to ensure appropriate payment is consistent with our stated policy; therefore, we are proposing to continue to do so for the CY 2007 OPPTS.

Specifically, if we create a new device category for payment in CY 2007, to calculate potential offsets we are proposing to examine the most current available claims data, including device costs, to determine whether device costs associated with the new category are already packaged into the existing APC structure, as indicated earlier. If we conclude that some related device costs are packaged into existing APCs, we are proposing to use the methodology described earlier and first used for the CY 2003 OPPTS to determine an appropriate device offset percentage for those APCs with which the new category would be reported.

We did not publish a list of APCs with device percentages as a transitional policy for CY 2006 because of the previously discussed limitations of the CY 2004 OPPTS data with respect to device costs associated with procedures. We stated in the CY 2006 final rule with comment period (70 FR 68628) that we expected to reexamine our previous methodology for calculating the device percentages and offset amounts for the CY 2007 OPPTS update, which would be based on CY 2005 hospital claims data where device C-code reporting is required.

b. Proposed Policy for CY 2007

For CY 2007, we are proposing to continue to review each new device category on a case-by-case basis as we have done in CY 2004, CY 2005, and CY 2006, to determine whether device costs associated with the new category are packaged into the existing APC structure. If we determine that, for any new device category, no device costs associated with the new category are packaged into existing APCs, we are proposing to continue our current policy of setting the offset amount for the new category to \$0 for CY 2007. There is currently one new device category that would continue for pass-through payment in CY 2007. This category, described by HCPCS code C1820, currently has an offset amount of \$8,647.81, which is applied to APC 0222. We are proposing to update this offset for CY 2007 based on the full year of claims data for CY 2005, the claims data year for our CY 2007 rate update. We are proposing an offset amount for C1820 of 78.1 percent of the proposed CY 2007 payment rate for APC 0222 based on the CY 2005 data used to calculate the proposed payment amount in this proposed rule. (See Addendum A of this proposed rule for a listing of the proposed CY 2007 APC payment rates.)

We are proposing to continue our existing policy to establish new

categories in any quarter when we determine that the criteria for granting pass-through status for a device category are met. If we create a new device category and determine that our data contain a sufficient number of claims with identifiable costs associated with the new category of devices in any APC, we are proposing to adjust the APC payment if the offset amount is greater than \$0. If we determine that a device offset greater than \$0 is appropriate for any new category that we create, we are proposing to announce the offset amount in the program transmittal that announces the new category.

In summary, for CY 2007, we are proposing to use CY 2005 hospital claims data to calculate device percentages and potential offsets for CY 2007 applications for new device categories. We are proposing to publish, through program transmittals, any new or updated offsets that we calculate for CY 2007, corresponding to newly created categories or existing categories, respectively.

V. Proposed OPPS Payment Changes for Drugs, Biologicals, and Radiopharmaceuticals

A. Proposed Transitional Pass-Through Payment for Additional Costs of Drugs and Biologicals

(If you choose to comment on issues in this section, please include the caption "Pass-Through Drugs" at the beginning of your comment.)

1. Background

Section 1833(t)(6) of the Act provides for temporary additional payments or "transitional pass-through payments" for certain drugs and biological agents. As originally enacted by the Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act (BBRA) of 1999 (Pub. L. 106–113), this provision requires the Secretary to make additional payments to hospitals for current orphan drugs, as designated under section 526 of the Federal Food, Drug, and Cosmetic Act (Pub. L. 107–186); current drugs and biological agents and brachytherapy sources used for the treatment of cancer; and current radiopharmaceutical drugs and biological products. For those drugs and biological agents referred to as "current," the transitional pass-through payment began on the first date the hospital OPPS was implemented (before enactment of the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act BIPA of 2000 (Pub. L. 106–554), on December 21, 2000).

Transitional pass-through payments are also required for certain "new" drugs and biological agents that were

not being paid for as a hospital outpatient department service as of December 31, 1996, and whose cost is "not insignificant" in relation to the OPPS payments for the procedures or services associated with the new drug or biological. Under the statute, transitional pass-through payments can be made for at least 2 years but not more than 3 years. In Addenda A and B of this proposed rule, proposed CY 2007 pass-through drugs and biological agents are identified by status indicator "G."

The process to apply for transitional pass-through payment for eligible drugs and biological agents can be found on our CMS Web site: <http://www.cms.hhs.gov>. If we revise the application instructions in any way, we will post the revisions on our Web site and submit the changes to the Office of Management and Budget (OMB) for approval, as required under the Paperwork Reduction Act (PRA). Notification of new drugs and biologicals application processes is generally posted on the OPPS Web site at: <http://www.cms.hhs.gov/providers/hopps>.

2. Expiration in CY 2006 of Pass-Through Status for Drugs and Biologicals

Section 1833(t)(6)(C)(i) of the Act specifies that the duration of transitional pass-through payments for drugs and biologicals must be no less than 2 years and no longer than 3 years. The 12 drugs and biologicals listed in Table 23, whose pass-through status will expire on December 31, 2006, meet that criterion. For all drugs and biologicals with pass-through status expiring on December 31, 2006, that are currently assigned temporary C-codes, if there is a permanent HCPCS code available for CY 2007 that describes the product, then we are proposing to delete the C-code and use the permanent HCPCS code for purposes of OPPS billing and payment for the product in CY 2007. Based on our review of the existing permanent HCPCS codes available at the time of this proposed rule, we have determined that HCPCS code J7344 (Nonmetabolic active tissue) appropriately describes the product reported under HCPCS code C9221 in the CY 2006 OPPS; therefore, we propose to delete C9221 and pay for this product using J7344 in CY 2007. The coding changes for the other products will depend on what the final HCPCS codes are for CY 2007, which will be included in the CY 2007 OPPS final rule. We specifically request comments on this proposed policy for CY 2007.

TABLE 23.—PROPOSED LIST OF DRUGS AND BIOLOGICALS FOR WHICH PASS-THROUGH STATUS EXPIRES DECEMBER 31, 2006

HCPCS	APC	Short descriptor
C9220 ..	9220	Sodium hyaluronate.
C9221 ..	9221	Graftjacket Reg Matrix.
C9222 ..	9222	Graftjacket Sft Tis.
J0128 ..	9216	Abarelix injection.
J0878 ..	9124	Daptomycin injection.
J2357 ..	9300	Omalizumab injection.
J2783 ..	0738	Rasburicase.
J2794 ..	9125	Risperidone, long acting.
J7518 ..	9219	Mycophenolic acid.
J9035 ..	9214	Bevacizumab injection.
J9055 ..	9215	Cetuximab injection.
J9305 ..	9213	Pemetrexed injection.

3. Drugs and Biologicals With Proposed Pass-Through Status in CY 2007

We are proposing to continue pass-through status in CY 2007 for nine drugs and biologicals. These items, which are listed in Table 24 below, were given pass-through status as of April 1, 2006. The APCs and HCPCS codes for drugs and biologicals that we are proposing to continue with pass-through status in CY 2007 are assigned status indicator "G" in Addenda A and B of this proposed rule.

Section 1833(t)(6)(D)(i) of the Act sets the payment rate for pass-through eligible drugs (assuming that no pro rata reduction in pass-through payment is necessary) as the amount determined under section 1842(o) of the Act. We note that this section of the Act also states that if a drug or biological is covered under a competitive acquisition contract under section 1847B of the Act, the payment rate is equal to the average price for the drug or biological for all competitive acquisition areas and the year established as calculated and adjusted by the Secretary.

Section 1847A of the Act, as added by section 303(c) of Pub. L. 108–173, establishes the use of the average sales price (ASP) methodology as the basis for payment of drugs and biologicals described in section 1842(o)(1)(C) of the Act and furnished on or after January 1, 2005. This payment methodology is set forth in § 419.64 of the regulations. Section 1847B of the Act, as added by section 303(d) of Pub. L. 108–173, establishes the payment methodology for drugs and biologicals under the competitive acquisition program. The competitive acquisition program was implemented as of July 1, 2006. The list of drugs and biologicals covered under this program can be found on <http://www.cms.hhs.gov/CompetitiveAcquisforBios>, along with

their payment rates and information on the program's methodology.

Section 1833(t)(6)(D)(i) of the Act sets the payment rate for pass-through eligible drugs as the amount determined under section 1842(o) of the Act, or if a drug or biological is covered under a competitive acquisition contract under section 1847B of the Act, the payment rate is equal to the average price for the drug or biological for all competitive acquisition areas and the year established as calculated and adjusted by the Secretary. For CY 2007, under the OPPI we are proposing payment for drugs and biologicals with pass-through status that will also be covered under the competitive acquisition program to be based on the competitive acquisition program methodology. Similar to the payment policy established for pass-through drugs and biologicals in CY 2006, we are proposing to pay under the OPPI for all other drugs and biologicals with pass-through status in CY 2007 consistent with the provisions of section 1842(o) of the Act, as amended by section 621 of Pub. L. 108–173, at a rate that is equivalent to the payment these drugs and biologicals would receive in the physician office setting.

Table 24 lists the drugs and biologicals for which we are proposing that pass-through status continue in CY 2007. Of these nine drugs and biologicals, only HCPCS codes J2503 (Pegaptanib sodium injection) and J9264 (Paclitaxel injection) are covered under the competitive acquisition program at the time of the development of this proposed rule. Therefore, in CY 2007, we are proposing to set payment for HCPCS codes J2503 and J9264 at the amounts determined under the competitive acquisition program, which will be a rate slightly different than the rate determined under the ASP methodology. Payment for all other drugs and biologicals would be equivalent to the payment these drugs and biologicals would receive in the physician office setting in CY 2007, where payment will be determined by the methodology described in § 419.904 and generally be equal to ASP+6 percent. In accordance with the ASP methodology, in the absence of ASP data, we are continuing the policy we implemented during CYs 2005 and 2006 of using the wholesale acquisition cost (WAC) for the product to establish the initial payment rate. We note, however, that if the WAC is also unavailable, then we would make payment at 95 percent of the product's most recent AWP. We adopted this interim payment methodology in order to be consistent with how we pay for new drugs, biologicals, and radiopharmaceuticals

without HCPCS codes, as discussed in the CY 2006 OPPI final rule with comment period (70 FR 68669). We further note that with respect to items for which we currently do not have ASP data, once their ASP data become available in later quarter submissions, their payment rates under OPPI will be adjusted so that the rates are based on the ASP methodology and set to ASP+6 percent.

Currently, there are no radiopharmaceuticals that would have pass-through status in CY 2007. In the event that a new radiopharmaceutical agent receives pass-through status in CY 2007, we propose to base its payment on the WAC for the product as ASP data for radiopharmaceuticals are not available. We note, however, that if the WAC is also unavailable, then we would calculate payment for the radiopharmaceutical at 95 percent of its most recent AWP. We are proposing to adopt this interim payment methodology in order to be consistent with how we pay for new drugs, biologicals, and radiopharmaceuticals without HCPCS codes, as discussed in the CY 2006 OPPI final rule with comment period (70 FR 68669).

Section 1833(t)(6)(D)(i) of the Act also sets the amount of additional payment for pass-through eligible drugs and biologicals (the pass-through payment amount). The pass-through payment amount is the difference between the amount authorized under section 1842(o) of the Act (or under section 1847B of the Act, if the drug or biological is covered under a competitive acquisition contract), and the portion of the otherwise applicable fee schedule amount (that is, the APC payment rate) that the Secretary determines is associated with the drug or biological.

We discuss in section V.B.3.b. of the preamble that we are proposing to make separate payment in CY 2007 for new drugs and biologicals with a HCPCS code, consistent with the provisions of section 1842(o) of the Act at a rate that is equivalent to the payment they would receive in a physician office setting (or under section 1847B of the Act, if the drug or biological is covered under a competitive acquisition contract), whether or not we have received a pass-through application for the item. Accordingly, in CY 2007 the pass-through payment amount would equal zero for those new drugs and biologicals that we determine have pass-through status. That is, when we subtract the amount to be paid for pass-through drugs and biologicals under section 1842(o) of the Act (or section 1847B of the Act, if the drug or biological is

covered under a competitive acquisition contract), from the portion of the otherwise applicable fee schedule amount or the APC payment rate associated with the drug or biological that would be the amount paid for drugs and biologicals under section 1842(o) of the Act (or section 1847B of the Act, if the drug or biological is covered under a competitive acquisition contract), the resulting difference is equal to zero.

We are proposing to use payment rates based on the ASP data from the fourth quarter of CY 2005 for budget neutrality estimates, impact analyses, and to complete Addenda A and B of this proposed rule because these are the most recent data available to us at this time. These payment rates are also the basis for drug payments in the physician office setting effective April 1, 2006. To be consistent with the ASP-based payments that would be made when these drugs and biologicals are furnished in physician offices, we are proposing to make any appropriate adjustments to the amounts shown in Addenda A and B of this proposed rule when we publish our CY 2007 OPPI final rule and also on a quarterly basis on our Web site during CY 2007 if later quarter ASP submissions (or more recent WACs or AWPs) indicate that adjustments to the payment rates for these pass-through drugs and biologicals are necessary. The payment rate for a radiopharmaceutical with pass-through status would also be adjusted accordingly. We also are proposing to make appropriate adjustments to the payment rates for these drugs and biologicals in the event that they become covered under the competitive acquisition program in the future. For drugs and biologicals that are currently covered under the competitive acquisition program, we are proposing to use the payment rates calculated under this program that are in effect as of July 1, 2006. We are proposing to update these payment rates if the rates change in the future.

Table 24 lists the drugs and biologicals for which we are proposing that pass-through status continue in CY 2007. We assigned pass-through status to these drugs and biologicals as of April 1, 2006. We also have included in Addenda A and B of this proposed rule, the proposed CY 2007 APC payment rates for all pass-through drugs and biologicals, based on ASP data from the fourth quarter of CY 2005 (or if applicable, payment rates calculated under the competitive acquisition program) as described above.

TABLE 24.—PROPOSED LIST OF DRUGS AND BIOLOGICALS WITH PASS-THROUGH STATUS IN CY 2007

HCPDS	APC	Short descriptor
C9225 ..	9225	Fluocinolone acetonide.
C9227 ..	9227	Injection, micafungin sodium.
C9228 ..	9228	Injection, tigecycline.
J2278 ..	1694	Ziconotide injection.
J2503 ..	1697	Pegaptanib sodium injection.
J8501 ..	0868	Oral aprepitant.
J9027 ..	1710	Clofarabine injection.
J9264 ..	1712	Paclitaxel injection.
Q4079	9126	Natalizumab injection.

B. Proposed Payment for Drugs, Biologicals, and Radiopharmaceuticals Without Pass-Through Status

(If you choose to comment on issues in this section, please include the caption “OPPS: Nonpass-Through Drugs, Biologicals, and Radiopharmaceuticals” at the beginning of your comment.)

1. Background

Under the CY 2006 OPPS, we currently pay for drugs, biologicals, and radiopharmaceuticals that do not have pass-through status in one of two ways: packaged payment within the payment for the associated service or separate payment (individual APCs). We explained in the April 7, 2000 OPPS final rule with comment period (65 FR 18450) that we generally package the cost of drugs and radiopharmaceuticals into the APC payment rate for the procedure or treatment with which the products are usually furnished. Hospitals do not receive separate payment from Medicare for packaged items and supplies, and hospitals may not bill beneficiaries separately for any packaged items and supplies whose costs are recognized and paid within the national OPPS payment rate for the associated procedure or service. (Program Memorandum Transmittal A–01–133, issued on November 20, 2001, explains in greater detail the rules regarding separate payment for packaged services.)

Packaging costs into a single aggregate payment for a service, procedure, or episode of care is a fundamental principle that distinguishes a prospective payment system from a fee schedule. In general, packaging the costs of items and services into the payment for the primary procedure or service with which they are associated encourages hospital efficiencies and also enables hospitals to manage their resources with maximum flexibility. Notwithstanding our commitment to

package as many costs as possible, we are aware that packaging payments for certain drugs, biologicals, and radiopharmaceuticals, especially those that are particularly expensive or rarely used, might result in insufficient payments to hospitals, which could adversely affect beneficiary access to medically necessary services.

Section 1833(t)(16)(B) of the Act, as added by section 621(a)(2) of Pub. L. 108–173, requires that the threshold for establishing separate APCs for drugs and biologicals be set at \$50 per administration for CYs 2005 and 2006. However, this requirement for establishing the packaging threshold will expire at the end of CY 2006. For CY 2006, we finalized our policy to continue paying separately for drugs, biologicals, and radiopharmaceuticals whose per day cost exceeds \$50 and packaging the costs of drugs, biologicals, and radiopharmaceuticals whose per day cost is less than \$50 into the procedures with which they are billed. For CY 2006, we also continued an exception policy to our packaging rule for one particular class of drugs, the oral and injectable 5HT3 forms of anti-emetic treatments (70 FR 68635 through 68638).

2. Proposed Criteria for Packaging Payment for Drugs, Biologicals, and Radiopharmaceuticals

During the March 2006 meeting of the APC Panel, the Panel recommended that CMS maintain the \$50 packaging threshold or if the threshold is reevaluated, that CMS provide the Panel with data that indicate the costs of packaged drugs that are incorporated into drug administration payment rates.

As indicated above, in accordance with section 1833(t)(16)(B) of the Act, the threshold for establishing separate APCs for drugs and biologicals was set to \$50 per administration during CYs 2005 and 2006. Because this packaging threshold will expire at the end of CY 2006, we evaluated four options for packaging levels so that we could determine what the appropriate packaging threshold proposal for drugs, biologicals, and radiopharmaceuticals would be for the CY 2007 OPPS update.

One of the packaging options we considered for the CY 2007 OPPS update was to pay separately for all drugs, biologicals, and radiopharmaceuticals with a HCPCS code. This would be a straightforward policy that would speed the creation of procedural APC medians. However, this policy would be inconsistent with OPPS packaging principles, reduce hospitals' incentives for economy and efficiency, and increase hospitals' administrative

burden related to separate billing for more drugs, biologicals, and radiopharmaceuticals.

The second option we considered for CY 2007 was to increase the packaging threshold to a level much higher than the current \$50 threshold. This option would result in the packaging of more drugs, biologicals, and radiopharmaceuticals and would be more consistent with OPPS packaging principles. This option would also provide greater administrative simplicity for hospitals. However, implementation of this option might result, in some cases, in the drug administration payments being less than the cost of the packaged drugs. Relatively expensive drugs, biologicals, and radiopharmaceuticals could also be packaged under this option.

The third packaging threshold option we evaluated was to maintain the packaging threshold at \$50. We believe that this is a reasonable policy option that would provide stability to the payment system, as the packaging threshold has been set at \$50 since CY 2004. This policy option would also be consistent with the APC Panel recommendation to maintain the packaging threshold at \$50 in CY 2007; however, this policy would not take into account price inflation in determining the drug packaging threshold since the \$50 threshold was initially established.

Consequently, the fourth option we considered and are proposing for CY 2007 and subsequent years is to update the packaging threshold for inflation using an inflation adjustment factor based on the Producer Price Index (PPI) for prescription preparations. In order to update the packaging threshold for CY 2007 under this proposal, we used the four quarter moving average PPI levels for prescription preparations to trend the \$50 threshold forward from the third quarter of CY 2005 (when the Pub. L. 108–173-mandated threshold became effective) to the third quarter of CY 2007. We are proposing that for each year beginning with CY 2007, we would adjust the packaging threshold by the PPI for prescription drugs, and the adjusted dollar amount would be rounded to the nearest \$5 increment in order to determine the new threshold. The adjusted amount for CY 2007 was calculated to be \$55.99, which we are rounding to \$55. Therefore, for CY 2007, we are proposing to pay separately for drugs, biologicals, and radiopharmaceuticals whose per day cost exceeds \$55 and packaging the costs of drugs, biologicals, and radiopharmaceuticals whose per day cost is less than or equal to \$55 into the procedures with which they are billed.

This proposed policy is consistent with the principle employed in many health care payment policy areas (and many other areas of government policy) of acknowledging the real costs by using an inflation adjustment instead of static dollar values. We believe that our proposed policy is consistent with the APC Panel's recommendation because we would be maintaining the \$50 threshold in terms of its real value during the calendar year in which it would be in effect. Also, in the absence of a mechanism to update the threshold, we believe that current relatively inexpensive drugs would begin to receive separate payment over time. The PPI for prescription preparations reflects price changes at the wholesale or manufacturer stage. Because OPSS payment rates for drugs and biologicals are generally based on average sales price (ASP) data that are reported by their manufacturers, we believe that the PPI for prescription preparations would be an appropriate price index to use to update the packaging threshold for CY 2007 and beyond.

For CY 2007, we are also proposing to continue our policy of exempting the oral and injectable 5HT₃ anti-emetic products from our packaging rule (Table 25), thereby making separate payment for all of the 5HT₃ anti-emetic products. As stated in the CY 2005 OPSS final rule with comment period (69 FR 65779 through 65780), chemotherapy is very difficult for many patients to tolerate, as the side effects are often debilitating. In order for Medicare beneficiaries to achieve the maximum therapeutic benefit from chemotherapy and other therapies with side effects of nausea and vomiting, anti-emetic use is often an integral part of the treatment regimen. We believe that we should continue to ensure that Medicare payment rules do not impede a beneficiary's access to the particular anti-emetic that is most effective for him or her as determined by the beneficiary and his or her physician. We solicit comments on these packaging proposals.

TABLE 25.—PROPOSED ANTI-EMETICS TO EXEMPT FROM PROPOSED \$55 PACKAGING REQUIREMENT

HCPSC code	Short description
J1260	Dolasetron mesylate.
J1626	Granisetron HCl injection.
J2405	Ondansetron HCl injection.
J2469	Palonosetron HCl.
Q0166	Granisetron HCl 1 mg oral.
Q0179	Ondansetron HCl 8 mg oral.
Q0180	Dolasetron mesylate oral.

To determine their CY 2007 proposed packaging status, we calculated the per day cost of all drugs, biologicals, and radiopharmaceuticals that had a HCPCS code in CY 2005 and were paid (via packaged or separate payment) under the OPSS using claims data from January 1, 2005, to December 31, 2005. In CY 2005, multisource drugs and radiopharmaceuticals had two HCPCS codes that distinguished the innovator multisource (brand) drug or radiopharmaceutical from the noninnovator multisource (generic) drug or radiopharmaceutical. We aggregated claims for both the brand and generic HCPCS codes in our packaging analysis of these multisource products. In order to calculate the per day cost for drugs, biologicals, and radiopharmaceuticals to determine their packaging status in CY 2007, we are proposing to use the methodology that was described in detail in the CY 2006 OPSS proposed rule (70 FR 42723 through 42724) and finalized in the CY 2006 OPSS final rule with comment period (70 FR 68636 through 68638). However, in our calculation of per day costs for this proposed rule for the CY 2007 OPSS update, we used the payment rate for each drug and biological at its ASP+5 percent which was based on manufacturer-submitted ASP data from the fourth quarter of CY 2005. The ASP data from this period were also the basis for determining payments for drugs and biologicals in the physician office setting, effective April 1, 2006. The rationale for using ASP+5 percent as the payment for drugs and biologicals is described in section V.B.3.a.2. of this preamble. For items that did not have an ASP-based payment rate, we used their mean unit cost derived from the CY 2005 hospital claims data to determine their per day cost. We packaged the items with per day cost less than or equal to \$55 and made items with per day cost greater than \$55 separately payable. We are requesting comments on the methodology we are proposing to use to determine the per day cost of drugs, biologicals, and radiopharmaceuticals under the CY 2007 OPSS update.

Our policy during previous cycles of the OPSS has been to use updated data for the final rules. For the CY 2007 OPSS final rule, we are proposing to use the ASP data from the first quarter of CY 2006, which would be the basis for calculating payment rates for drugs and biologicals in the physician office setting using the ASP methodology effective July 1, 2006, along with updated hospital claims data from CY 2005 to determine the final per day

costs of drugs, biologicals, and radiopharmaceuticals and their packaging status in CY 2007. Subsequently, payment rates for CY 2007 separately payable drugs and biologicals will be updated to reflect applicable ASP-based rates effective in the physician office setting for services effective January 1, 2007.

Because, for the CY 2007 OPSS final rule, we are proposing to use ASP data from the first quarter of CY 2006, which would be the basis for calculating payment rates for drugs and biologicals in the physician office setting using the ASP methodology, effective July 1, 2006, along with updated hospital claims data from CY 2005 to determine the final per day costs of drugs, biologicals, and radiopharmaceuticals, the packaging status of these items using the updated data may be different from their packaging status determined based on the data we are using for this proposed rule. Under such circumstances, we are proposing to apply the following policies to these drugs, biologicals, and radiopharmaceuticals whose relationship to the \$55 threshold changes based on the final updated data:

- Drugs, biologicals, and radiopharmaceuticals that were paid separately in CY 2006 (which are proposed for separate payment in CY 2007), and then have per day costs less than \$55 based on the updated ASPs and hospital claims data that would be used for the CY 2007 final rule with comment period, would continue to receive separate payment in CY 2007.

- Drugs, biologicals, and radiopharmaceuticals that were packaged in CY 2006, (which are proposed for separate payment in CY 2007), and then have per day costs less than \$55 based on the updated ASPs and hospital claims data that would be used for the CY 2007 final rule with comment period, would remain packaged in CY 2007.

- Drugs, biologicals, and radiopharmaceuticals for which we propose packaged payment in CY 2007 but then have per day costs greater than \$55 based on the updated ASPs and hospital claims data that would be used for the CY 2007 final rule with comment period, would receive separate payment in CY 2007.

We are requesting specific comments on these proposed policies for CY 2007.

3. Proposed Payment for Drugs, Biologicals, and Radiopharmaceuticals Without Pass-Through Status That Are Not Packaged

a. Proposed Payment for Specified Covered Outpatient Drugs

(1) Background

Section 1833(t)(14) of the Act, as added by section 621(a)(1) of Public Law 108-173, requires special classification of certain separately paid radiopharmaceuticals, drugs, and biologicals and mandates specific payments for these items. Under section 1833(t)(14)(B)(i) of the Act, a "specified covered outpatient drug" is a covered outpatient drug, as defined in section 1927(k)(2) of the Act, for which a separate APC exists and that either is a radiopharmaceutical agent or is a drug or biological for which payment was made on a pass-through basis on or before December 31, 2002.

Under section 1833(t)(14)(B)(ii) of the Act, certain drugs and biologicals are designated as exceptions and are not included in the definition of "specified covered outpatient drugs." These exceptions are—

- A drug or biological for which payment is first made on or after January 1, 2003, under the transitional pass-through payment provision in section 1833(t)(6) of the Act.
- A drug or biological for which a temporary HCPCS code has not been assigned.
- During CYs 2004 and 2005, an orphan drug (as designated by the Secretary).

Section 1833(t)(14)(A)(iii) of the Act, as added by section 621(a)(1) of Pub. L. 108-173, requires that payment for specified covered outpatient drugs in CY 2006 and subsequent years be equal to the average acquisition cost for the drug for that year as determined by the Secretary subject to any adjustment for overhead costs and taking into account the hospital acquisition cost survey data collected by the Government Accountability Office (GAO) in CYs 2004 and 2005. If hospital acquisition cost data are not available, the law requires that payment be equal to payment rates established under the methodology described in section 1842(o), section 1847A, or section 1847B of the Act as calculated and adjusted by the Secretary as necessary.

For CY 2006, we adopted a policy of paying for the acquisition and overhead costs of separately paid drugs and biologicals at a combined rate of ASP+6 percent. To calculate the ASP+6 percent payment rate, we evaluated the three data sources that were available to us for

setting the CY 2006 payment rates for drugs and biologicals. As described in the CY 2006 OPPS final rule with comment period (70 FR 68639 through 68644), these data sources were the GAO reported average purchase prices for 55 specified covered outpatient drug categories for the period July 1, 2003 to June 30, 2004 collected via a survey of 1,400 acute care Medicare-certified hospitals; ASP data; and mean costs derived from CY 2004 hospital claims data used in developing the CY 2006 final rule with comment period. For the CY 2006 final rule with comment period, we used ASP data from the second quarter of CY 2005, which were used to set payment rates for drugs and biologicals in the physician office setting effective October 1, 2005. We also used updated claims data, reflecting all of the hospital claims data from CY 2004 and updated CCRs.

In our data analysis for the CY 2006 OPPS final rule with comment period, we compared the payment rates for drugs and biologicals using data from all three sources described above. We estimated aggregate expenditures for all drugs and biologicals (excluding radiopharmaceuticals) that would be separately payable in CY 2006 and for the 55 drugs and biologicals reported by the GAO using mean costs from the claims data, the GAO mean purchase prices, and the ASP-based payment amounts (ASP+6 percent in most cases), and then calculated the equivalent average ASP-based payment rate under each of the three payment methodologies. The results based on updated ASP and claims data were published in Table 24 of the CY 2006 OPPS final rule with comment period. For a full discussion of our reasons for using these data, refer to section V.B.3.a. of the CY 2006 OPPS final rule with comment period (70 FR 68639 through 68644).

As noted in the CY 2006 OPPS final rule with comment period, findings from a MedPAC survey of hospital charging practices indicated that hospitals set charges for drugs, biologicals, and radiopharmaceuticals high enough to reflect their pharmacy handling costs as well as their acquisition costs. Therefore, we believe the MedPAC survey indicated that payment for drugs and biologicals and pharmacy overhead at a combined ASP+6 percent rate would serve as the best proxy for the combined acquisition and overhead costs of each of these products.

(2) Proposed Payment Policy for CY 2007

The provision in section 1833(t)(14)(A)(iii) of the Act, as described above, continues to be applicable to determining payments for specified covered outpatient drugs for CY 2007. Similar to CY 2006, this provision requires that in CY 2007 payment for specified covered outpatient drugs be equal to the average acquisition cost for the drug for that year as determined by the Secretary subject to any adjustment for overhead costs and taking into account the hospital acquisition cost survey data collected by the Government Accountability Office (GAO) in CYs 2004 and 2005. If hospital acquisition cost data are not available, the law requires that payment be equal to payment rates established under the methodology described in section 1842(o), section 1847A, or section 1847B of the Act as calculated and adjusted by the Secretary as necessary. Additionally, section 1833(t)(14)(E)(ii) authorizes the Secretary to adjust APC weights for specified covered outpatient drugs to take into account the MedPAC report relating to overhead and related expenses, such as pharmacy services and handling costs.

For the CY 2007 proposed rule, we evaluated two data sources that we have available to us for setting the CY 2007 payment rates for drugs and biologicals. The first source of drug pricing information that we have is the ASP data from the fourth quarter of CY 2005, which were used to set payment rates for drugs and biologicals in the physician office setting effective April 1, 2006. We have ASP-based prices for approximately 500 drugs and biologicals (including contrast agents) payable under the OPPS; however, we currently do not have any ASP data on radiopharmaceuticals. Payments for most of the drugs and biologicals paid in the physician office setting are based on ASP+6 percent, and payments for items with no reported ASP are based on wholesale acquisition cost (WAC).

The second source of cost data that we have for drugs, biologicals, and radiopharmaceuticals are the mean and median costs derived from the CY 2005 hospital claims data. As section 1833(t)(14)(A)(iii) of the Act clearly specifies that payment for specified covered outpatient drugs in CY 2007 be equal to the "average" acquisition cost for the drug, we limited our analysis to the mean costs of drugs determined using the hospital claims data, instead of using median costs.

In our data analysis, we compared the payment rates for drugs and biologicals using data from both sources described above. We estimated aggregate expenditures for all drugs and biologicals (excluding radiopharmaceuticals) that would be separately payable in CY 2007 using mean costs from the hospital claims data and the ASP-based payment amounts (ASP+6 percent in most cases), and calculated the equivalent average ASP-based payment rate under both payment methodologies.

The results of our data analysis indicate that using mean unit cost to set the payment rates for the drugs and biologicals that would be separately payable in CY 2007 would be equivalent to basing their payment rates, on average, at ASP+5 percent. As noted in the CY 2006 proposed and final rules, findings from a MedPAC survey of hospital charging practices indicated that hospitals set charges for drugs, biologicals, and radiopharmaceuticals high enough to reflect their pharmacy handling costs as well as their acquisition costs. Therefore, the mean costs calculated using charges from hospital claims data converted to costs are representative of hospital acquisition costs for these products, as well as their related pharmacy overhead costs. Our calculations indicate that using mean unit costs to set the payment rates for all separately payable drugs and biologicals would be equivalent to basing their payment rates on the ASP+5 percent, on average. Because pharmacy overhead costs are already built into the charges for drugs, biologicals, and radiopharmaceuticals, our current data therefore indicate that payment for drugs and biologicals and pharmacy overhead at a combined ASP+5 percent rate would serve as the best proxy for the combined acquisition and overhead costs of each of these products. Therefore, for CY 2007, we are proposing a policy of paying for the acquisition and overhead costs of separately paid drugs and biologicals at a combined rate of ASP+5 percent.

In its final report on the hospital acquisition cost survey of specified covered outpatient drugs titled "Medicare Hospital Pharmaceuticals: Survey Shows Price Variation and Highlights Data Collection Lessons and Outpatient Rate-setting Challenges for CMS", the GAO recommended that Secretary validate, on an occasional basis, manufacturers' reported drug ASPs as a measure of hospitals' acquisition costs using a survey of hospitals or other method that CMS determines to be similarly accurate and efficient. As we indicated in our written

comments to the GAO on its draft report, we will continue to consider the best approach for setting payment rates for drugs and biologicals in light of this recommendation. We also indicated that we will continue to analyze the adequacy of ASP-based pricing in light of our hospital claims data, which for this CY 2007 OPPS proposed rule indicates that ASP+5 percent would be the best available proxy for hospitals' average acquisition and handling costs of drugs and biologicals in CY 2007.

We note that ASP data are unavailable for some drugs and biologicals. For these few drugs and biologicals, we are proposing to use the mean costs from the CY 2005 hospital claims data to determine their packaging status for ratesetting. Until we receive ASP data for these items, payment will be based on their mean cost calculated from CY 2005 hospital claims data. The payment rates for separately payable drugs and biologicals shown in Addenda A and B to this proposed rule represent payments for their acquisition and overhead costs.

Our proposal uses payment rates based on ASP data from the fourth quarter of 2005 because these are the most recent numbers available to us at this time. To be consistent with the ASP data that would be used to determine payments for these drugs and biologicals when furnished in physician offices, we propose to make any appropriate adjustments to the amounts shown in Addenda A and B to this proposed rule for those items on a quarterly basis as more recent ASP data become available and post the payment rate changes on our Web site during each quarter of CY 2007. We note that we would determine the packaging status of each drug or biological only once during the year during the update process; however, for the separately payable drugs and biologicals, we would update their ASP-based payment rates on a quarterly basis.

During the March 2006 meeting of the APC Panel, the Panel recommended that CMS examine pharmacy overhead costs issues and work with appropriate associations to study how to measure pharmacy overhead costs. The Panel also recommended that CMS solicit feedback on how pharmacy overhead costs should be reimbursed in the future.

In response to the APC Panel recommendations, we will continue to work on issues related to pharmacy overhead costs and request comments on other proposals that we can consider when establishing a future pharmacy overhead cost methodology. In addition, we note that we routinely accept

requests from interested organizations to discuss their views about OPPS payment policy issues. We will consider the input of any individual or organization to the extent allowed by Federal law, including the Administrative Procedure Act (APA) and the Federal Advisory Committee Act (FACA). We establish the OPPS rates through regulations. We are required to consider the timely comments of interested organizations, establish the payment policies for the forthcoming year, and respond to the timely comments of all public commenters in the final rule in which we establish the payments for the forthcoming year.

We are specifically requesting public comments on our proposal to pay for acquisition and overhead costs of drugs and biologicals under the OPPS at ASP+5 percent and the adequacy of the payment rates to account for actual acquisition and overhead costs incurred by hospitals for these items.

In its October 31, 2005 letter of comment on proposed 2006 SCOD rates titled "Comments on Proposed 2006 SCOD Rates," the GAO recommended that to better approximate hospitals' acquisition costs of SCODs the Secretary reconsider the level of proposed payment rates for drug SCODs, in relation to survey data on average purchase price, the role of rebates in determining acquisition costs, and the desirability of setting payment rates for SCODs at average acquisition costs. In the CY 2006 OPPS proposed rule (70 FR 42726), we noted that the comparison between the GAO purchase price data and the ASP data indicated that the GAO data on average were equivalent to ASP+3 percent. However, we also indicated that using mean unit cost from the CY 2004 hospital claims data to set the payment rates for the drugs and biologicals that would be separately payable in CY 2006 would be equivalent to basing their payment rates, on average, at ASP+8 percent. Therefore, we had proposed to establish payment for drugs and biologicals and their overhead costs at a combined rate of ASP+8 percent, where ASP+6 percent represented the acquisition cost of these items and 2 percent of ASP was for their overhead costs. For the CY 2006 OPPS final rule with comment period, where more recent ASP data, updated CCRs, and updated CY 2004 hospital claims data were available, we found that the comparison between the GAO purchase price data and the ASP data indicated that the GAO data on average were equivalent to ASP+4 percent, and using mean unit cost from hospital claims to set the payment rates for the drugs and

biologicals that would be separately payable in CY 2006 would be equivalent to basing their payment rates, on average, at ASP+6 percent. Because pharmacy overhead costs are already built into the charges for drugs, biologicals, and radiopharmaceuticals, we noted in the CY 2006 OPPS final rule with comment period that our claims data indicated that payment for drugs and biologicals and their pharmacy overhead at a combined ASP+6 percent rate served as the best proxy for the combined acquisition and overhead costs of each of these products. For the CY 2007 proposed rule, as indicated earlier in the preamble, we compared the CY 2005 hospital claims data with more recent ASP data and determined that using mean unit cost to set payment rates for separately payable drugs and biologicals in CY 2007 would be equivalent to basing their payment rates, on average, at ASP+5 percent. This is the policy we are proposing for CY 2007, and we believe that this payment level would serve as the best proxy for the combined acquisition and overhead costs of separately payable drugs and biologicals in CY 2007.

In the CY 2006 OPPS final rule with comment period (70 FR 68661), we indicated that we will be paying for blood clotting factors at ASP+6 percent during CY 2006 under the OPPS and providing payment for the furnishing fee that is also a part of the payment for blood clotting factors furnished in physician offices under Medicare Part B. This furnishing fee will be updated each calendar year based on the consumer price index, and we will update the amount appropriately each year under the OPPS based upon the final amount noted in the Medicare Physician Fee Schedule final rule. In CY 2006, the furnishing fee is \$0.146 per unit. For the CY 2007 OPPS, we are proposing to make payment for blood clotting factors at ASP+5 percent along with continuing payment for the furnishing fee using the updated amount for CY 2007. The proposed CY 2007 regulations establishing the ASP methodology and the furnishing fee for blood clotting factors under Medicare Part B can be found in the CY 2007 Medicare Physician Fee Schedule proposed rule. The updated furnishing fee amount for CY 2007 under the OPPS will be announced in the CY 2007 OPPS final rule.

(3) CY 2007 Proposed Payment Policy for Radiopharmaceuticals

Section 303(h) of Pub. L. 108–173 exempted radiopharmaceuticals from ASP pricing in the physician office

setting where the fewer numbers (relative to the hospital outpatient setting) of radiopharmaceuticals are priced locally by Medicare contractors. Consequently, we do not have ASP data for radiopharmaceuticals. However, the law also requires us to make payments for specified covered outpatient drugs, including radiopharmaceuticals, equal to the average acquisition cost for the drug as determined by the Secretary and subject to any adjustment for overhead costs. We expect hospitals' different purchasing and preparation and handling practices for radiopharmaceuticals to be reflected in their charges. Therefore, for CY 2006, we calculated per day costs of radiopharmaceuticals using mean unit costs from the CY 2004 hospital claims data to determine the items' packaging status similar to the drugs and biologicals with no ASP data. For CY 2006, we implemented a 1-year temporary policy to pay for separately payable radiopharmaceuticals based on the hospital's charge for each radiopharmaceutical adjusted to cost. We clearly stated in our CY 2006 OPPS final rule with comment period that we did not intend to maintain the CY 2006 methodology permanently (70 FR 68656) and that we would actively seek other methodologies for setting payments for radiopharmaceuticals in CY 2007.

During the March 2006 meeting of the APC Panel, the Panel recommended that CMS work with stakeholders to continue to develop a methodology to pay for radiopharmaceuticals. We note that we routinely accept requests from interested organizations to discuss their views about OPPS payment policy issues. We will consider the input of any individual or organization to the extent allowed by Federal law, including the Administrative Procedure Act (APA) and the Federal Advisory Committee Act (FACA). We establish OPPS rates through regulations. We are required to consider the timely comments of interested organizations, establish the payment policies for the forthcoming year, and respond to the timely comments of all public commenters in the final rule in which we establish the payments for the forthcoming year. We have considered comments and information from interested organizations in developing these policy options for CY 2007.

Over this past year, despite reviews of the literature and numerous discussions with interested individuals and organizations from the radiopharmaceutical industry, we have received no specific suggestions from hospitals or industry regarding

alternative prospective payment methodologies for radiopharmaceuticals that could be used in place of our CY 2006 cost-based payment methodology. However, in its final report on the hospital acquisition cost survey of specified covered outpatient drugs, titled "Medicare Hospital Pharmaceuticals: Survey Shows Price Variations and Highlights Data Collection Lesson and Outpatient Rate-setting Challenges for CMS," the GAO acknowledged that the distinctive nature of radiopharmaceuticals as compared with other drugs poses special challenges for collecting and interpreting hospital cost data. They discussed the challenges of balancing accuracy and efficiency in obtaining price data on radiopharmaceutical specified covered outpatient drugs. They concluded that the best option available to CMS, in terms of accuracy and efficiency, is for the Secretary to collect and use ready-to-use unit-dose prices paid by hospitals when available as the data source for setting and updating Medicare payment rates for radiopharmaceutical specified covered outpatient drugs. As we indicated in our written comments to the GAO on its draft report, we remain uncertain about whether a survey to collect unit-dose acquisition costs would be conducted as a survey of hospitals or manufacturers. We are also concerned about the level of expense and administrative burden that would be placed on the party reporting such information, based on the GAO's experience in surveying hospitals regarding radiopharmaceutical acquisition costs. The survey approach could lead to a very inefficient methodology for establishing payment rates. We also note that in conducting a survey to obtain ready-to-use unit-dose prices for radiopharmaceuticals, we would be able to collect this information for only a small number of radiopharmaceuticals that are purchased in unit-dose forms by hospitals; however, we believe that it is important to apply a consistent payment methodology to determine payments for all separately payable radiopharmaceuticals. Even though we are not proposing to adopt the GAO's recommendation for CY 2007, we will continue to explore this recommendation for future updates of the OPPS.

In developing the payment policy proposal for separately payable radiopharmaceuticals for the CY 2007 proposed rule, we considered several additional policy options. The first option we considered proposing was to package additional

radiopharmaceuticals, either through packaging payments for all radiopharmaceuticals with payments for the services with which they are billed or increasing the packaging threshold for radiopharmaceuticals from a cost of \$55 per day to a higher amount. In contrast to other separately payable drugs where the administration of many drugs is reported with only a few drug administration HCPCS codes, only a small number of specific radiopharmaceuticals may be appropriately provided in the performance of each particular nuclear medicine procedure. Because the provision of nuclear medicine procedures always requires one or more radiopharmaceuticals, packaging more radiopharmaceuticals effectively results in some increases in the costs of the associated nuclear medicine procedures to reflect the greater packaging of the radiopharmaceuticals. The specific increased procedural costs observed are dependent upon the volumes and costs of various radiopharmaceuticals used in the procedures and thus reflect an average cost across clinical scenarios where providers may choose among several radiopharmaceuticals for the procedures. A policy to package additional radiopharmaceuticals would be very consistent with OPPS packaging principles and payment policies which generally provide appropriate payment for the average service and would provide greater administrative simplicity for hospitals. Because we believe that radiopharmaceutical handling costs are included in hospitals charges for the radiopharmaceuticals themselves, payments for the nuclear medicine procedures would include payments for the handling costs of the radiopharmaceuticals used under this option.

In examining our claims data for CY 2005, we noted that significant numbers of claims for nuclear medicine procedures included no HCPCS codes for radiopharmaceuticals. While it is possible that hospitals used packaged radiopharmaceuticals in some studies and therefore chose not to report them separately, it is also possible that some hospitals may have included charges for the required radiopharmaceuticals in their charges for the nuclear medicine procedures themselves. Packaging additional radiopharmaceuticals would be consistent with the charging practices of some hospitals that already may not be separately reporting radiopharmaceuticals, even when those radiopharmaceuticals would receive separate payment under the OPPS. Were we to package additional

radiopharmaceuticals under the OPPS, consistent with our packaging policies for implantable devices, we might need to establish edits to ensure that radiopharmaceutical charges were always included on claims for nuclear medicine procedures, as has been suggested to us by interested organizations.

However, under a policy of increased packaging of radiopharmaceuticals, payments for certain nuclear medicine procedures could potentially be less than the costs of some of the packaged radiopharmaceuticals and relatively expensive and high volume radiopharmaceuticals could become packaged. In addition, our payment policy could discourage selection of the most clinically appropriate radiopharmaceutical for a particular nuclear medicine procedure, especially if that radiopharmaceutical were expensive and not commonly used so that its costs were not fully reflected in the payment for the nuclear medicine procedure. In addition, the statutory definition of a "specified covered outpatient drug" for OPPS purposes that includes radiopharmaceutical agents appears more consistent with the treatment of radiopharmaceuticals like other drugs under the OPPS, at least when this is feasible. We solicit public comment on the merits of establishing a higher packaging threshold for radiopharmaceuticals, given their unique characteristics.

The second option that we considered proposing was to continue the temporary CY 2006 methodology of paying for separately payable radiopharmaceuticals at charges reduced to cost, where payment would be determined using each hospital's overall CCR, and establishing our radiopharmaceutical packaging threshold at \$55, as we are proposing for other drugs under the CY 2007 OPPS. This policy would provide stability to the payment methodology for radiopharmaceuticals from CY 2006 to CY 2007. As we indicated for CY 2007, this payment methodology provides an acceptable proxy for the average acquisition of the radiopharmaceutical along with its handling cost.

However, as also indicated previously, we stated in the CY 2006 OPPS final rule with comment period that this payment policy was intended to be only a temporary policy, and that we would consider alternative methodologies to base radiopharmaceutical payments on for the CY 2007 OPPS update. We generally do not make payments under the OPPS for items and services at cost, particularly if we do not expect the

costs of services to vary substantially and unpredictably over time and if we have hospital claims data available. Paying for radiopharmaceuticals at cost provides hospitals with no incentive to supply radiopharmaceuticals in the most efficient manner. In its comments on the CY 2006 OPPS proposed rule, the GAO expressed concern that this methodology would be likely to result in payments that exceed hospitals' acquisition costs for certain radiopharmaceuticals. Estimates of our CY 2006 payments for radiopharmaceuticals reveal variation from the 25th to 75th payment percentile of 2 to 9 fold, depending on the specific radiopharmaceutical. We do not believe that the radiopharmaceutical acquisition and handling costs for different hospitals to provide most radiopharmaceuticals should vary that greatly. In addition, using hospitals' overall CCRs to determine payments likely results in an overstatement of radiopharmaceutical costs, which are likely reported in several cost centers such as diagnostic radiology that have lower CCRs than hospitals' overall CCRs.

The third option that we considered and are proposing for CY 2007 is to establish prospective payment rates for separately payable radiopharmaceuticals using mean costs derived from the CY 2005 claims data, where the costs are determined using our standard methodology of applying hospital-specific departmental CCRs to radiopharmaceutical charges, defaulting to hospital-specific overall CCRs only if appropriate departmental CCRs are unavailable. This proposal establishes our packaging threshold for radiopharmaceuticals at \$55, as for other drugs under the CY 2007 OPPS. We believe this option provides us with the most consistent, accurate, and efficient methodology for prospectively establishing payment rates for separately payable radiopharmaceuticals. This is our preferred payment proposal for radiopharmaceuticals because this methodology is consistent with how payment rates for other services are determined under the OPPS and provides for prospective payments that serve as appropriate proxies for the average acquisition costs of the radiopharmaceuticals along with their handling costs. The MedPAC has indicated that hospitals currently include the charge for radiopharmaceutical handling in their charge for the radiopharmaceutical. In addition, this approach provides an average payment to hospitals, consistent

with the statutory requirement that we pay the average acquisition cost, in comparison with our CY 2006 cost-based policy which paid each hospital differently for each claim based on the claim's charges and the hospital's overall CCR.

We believe that this methodology would likely pay more accurately for radiopharmaceuticals, and provide incentives for their efficient acquisition and preparation. Also, as discussed earlier, MedPAC indicated that hospitals include charges for handling costs in their charge for radiopharmaceuticals; therefore, mean costs based on our claims data would represent both the acquisition and overhead costs of the separately payable radiopharmaceuticals. We believe that this payment policy could also be an appropriate long-term radiopharmaceutical payment policy that would allow us to consistently establish prospective OPPS payment rates for the acquisition and overhead costs of separately payable radiopharmaceuticals. Because we will be paying separately for radiopharmaceuticals with mean costs per day greater than \$55, without additional radiopharmaceutical packaging for CY 2007, we see no reason to establish edits for the presence of radiopharmaceutical codes on claims for nuclear medicine procedures as, in many cases, payments for the procedures do not include payments for the radiopharmaceuticals used.

Under each of the payment options for radiopharmaceuticals, we considered that beginning with CY 2007 and going forward we would update the packaging threshold for inflation using an inflation adjustment factor based on the Producer Price Index (PPI) for prescription preparations. As discussed elsewhere in the preamble, the adjusted amount for CY 2007 was determined to be \$55.

In its October 31, 2005 letter of comment on proposed 2006 SCOD rates titled "Comments on Proposed 2006 SCOD Rates", the GAO recommended that to better approximate hospitals' acquisition costs of SCODs that the Secretary reconsider the decision to base payment rates for radiopharmaceutical SCODs exclusively on estimated costs in light of the availability of data on actual prices paid for key radiopharmaceuticals. As we did not have ASPs for radiopharmaceuticals that best represent market prices, in the

CY 2006 OPPS final rule with comment period, we finalized a temporary 1-year policy for CY 2006 to pay for radiopharmaceuticals that were separately payable in CY 2006 based on the hospital's charge for each radiopharmaceutical agent adjusted to cost. We noted that MedPAC has indicated that hospitals currently include the charge for pharmacy overhead costs in their charge for the radiopharmaceutical. Therefore, we believed that paying for these items on the basis of charges converted to cost would be the best available proxy for the average acquisition cost of the radiopharmaceutical along with its handling cost in CY 2006. We did not use the GAO hospital purchase prices as the basis for setting payments because when we examined differences between the CY 2005 payment rates for these nine radiopharmaceuticals and their GAO mean purchase prices, we found that the GAO purchase prices were substantially lower for several of these agents. We indicated that our intent was to maintain consistency, whenever possible, between the payment rates for these agents from CY 2005 to CY 2006. For CY 2007, however, we considered several payment options for radiopharmaceuticals that we discussed above and are proposing to establish prospective payment rates for separately payable radiopharmaceuticals using mean costs derived from the CY 2005 claims data.

We note that the National HCPCS Panel changed the codes and the descriptors of many of the radiopharmaceutical products effective January 1, 2006, in some cases moving from prior code descriptors based upon units of radioactivity to new descriptors based on study doses. The hospital claims data we used for our analysis are based on radiopharmaceutical HCPCS codes that were in effect during CY 2005. Because there were significant changes in HCPCS code descriptors for several radiopharmaceuticals from CY 2005 to CY 2006, implementation of the proposed payment methodology for radiopharmaceuticals requires us to crosswalk the cost data for these radiopharmaceuticals that are in terms of the CY 2005 codes to the updated CY 2006 codes that we expect to be in effect during CY 2007. The mean cost data per unit of many CY 2005 codes can be directly crosswalked to the new CY 2006 codes because the products and units included in the code descriptors

are essentially the same. However, there are several CY 2005 codes with descriptors specifying units of radioactivity that were changed to per study dose units in CY 2006. For these radiopharmaceuticals, we are proposing to calculate their per day costs based on the CY 2005 codes and use those per day costs as proxies for the per study dose costs of the CY 2006 codes. We believe that patients would generally receive one study dose of these radiopharmaceuticals each day, and our CY 2005 claims data show that they were most commonly billed with specific nuclear medicine procedures that normally include a single radiopharmaceutical dose on a given day. Therefore, the per day costs of these radiopharmaceuticals calculated based on claims reporting the CY 2005 codes should be an appropriate basis for determining the payment rates for the CY 2006 HCPCS codes.

Out of the 39 radiopharmaceutical HCPCS codes that we are proposing to pay separately for in CY 2007, we are able to directly crosswalk the CY 2005 cost data to 31 of these codes. The descriptors for the remaining eight codes changed from per unit of radioactivity in CY 2005 to new descriptors based on per study doses in CY 2006. Therefore, we are proposing to use the per day costs based on the CY 2005 claims data as proxies for the per study dose costs for this subset of radiopharmaceutical HCPCS codes to be reported in CY 2007.

There are three cases where two CY 2005 HCPCS codes were mapped to one new CY 2006 code that will be reported in CY 2007. These three CY 2006 HCPCS codes are A9550, A9553, and A9559. Because of the complicated nature of crosswalking the cost data for two predecessor HCPCS codes with different units in their descriptors to each of these new HCPCS codes, we are proposing to crosswalk the cost data only from the predecessor HCPCS codes with the most claims volume in CY 2005 to each of these three HCPCS codes to be reported for CY 2007.

Table 26 below lists all of the CY 2007 separately payable radiopharmaceuticals and the predecessor HCPCS codes whose claims data were used to set the CY 2007 proposed payment rates and notes the crosswalk methodology used for the proposed rates.

BILLING CODE 4120-01-C

We specifically request public comment on the radiopharmaceutical payment methodology that we are proposing for the CY 2007 OPPS update. We also seek public comment on the possibility of developing an alternative packaging threshold for

radiopharmaceuticals to provide greater administrative simplicity for hospitals. Additionally, we request public comment on the crosswalk that we are proposing to use to determine the CY 2007 payment rates for separately payable radiopharmaceuticals.

While payments for drugs, biologicals and radiopharmaceuticals are taken into account when calculating budget neutrality, we note that we are proposing to make payments for drugs, biologicals, and radiopharmaceuticals without scaling these payment amounts.

Section 1833(t)(14)(A)(iii)(I) requires that, beginning in CY 2006, we pay for a separately payable drug on the basis of “the average acquisition cost of the drug.” As we stated in the CY 2006 OPPS final rule with comment period (70 FR 42728), we believe that the best interpretation of the specific requirement that we pay for such drugs on the basis of average acquisition cost, is that these payments themselves should not be adjusted as part of meeting the statutory budget neutrality requirement. If we were to apply a budget neutrality scalar to these payments, we would no longer be paying the average acquisition cost, but rather an adjusted average acquisition cost, for separately payable drugs, biologicals, and radiopharmaceuticals. We believe that these amounts, without a budget neutrality scalar applied, are the best proxies we have for the aggregate average acquisition and pharmacy overhead and handling costs of drugs, biologicals, and radiopharmaceuticals.

b. Proposed CY 2007 Payment for Nonpass-Through Drugs, Biologicals, and Radiopharmaceuticals With HCPCS Codes, But Without OPPS Hospital Claims Data

Pub. L. 108–173 does not address the OPPS payment in CY 2005 and after for new drugs, biologicals, and radiopharmaceuticals that have assigned HCPCS codes, but that do not have a reference AWP or approval for payment as pass-through drugs or biologicals. Because there is no statutory provision that dictated payment for such drugs and biologicals in CY 2005, and because we had no hospital claims data to use in establishing a payment rate for them, we investigated several payment options for CY 2005 and discussed them in detail in the CY 2005 OPPS final rule with comment period (69 FR 65797 through 65799).

For CYs 2005 and 2006, we finalized the policy to pay separately for new drugs, biologicals, and radiopharmaceuticals with HCPCS codes, but which did not have pass-through status at a rate that was equivalent to the payment they received in the physician office setting, which was established in accordance with the ASP methodology. For CY 2007, we are proposing to continue payment for these new drugs and biologicals with HCPCS codes as of January 1, 2007, but which do not have pass-through status, at a rate that is equivalent to the payment they would receive in the physician office setting, which would be established in accordance with the ASP methodology described in the CY 2006

Medicare Physician Fee Schedule final rule, where payment would generally be equal to ASP+6 percent. In accordance with the ASP methodology, in the absence of ASP data, we are continuing the policy we implemented during CYs 2005 and 2006 of using the wholesale acquisition cost (WAC) for the product to establish the initial payment rate. We note, however, that if the WAC is also unavailable, we would make payment at 95 percent of the product's most recent AWP. We are proposing to adopt this interim payment methodology in order to be consistent with how we pay for new drugs, biologicals, and radiopharmaceuticals without HCPCS codes, as discussed in the CY 2006 OPPS final rule with comment period (70 FR 68669). We further note that with respect to items for which we do not have ASP data, once their ASP data become available in later quarter submissions, their payment rates under OPPS will be adjusted so that the rates are based on the ASP methodology and set to ASP+6 percent. In the event that the drug or biological is covered under the competitive acquisition program, then we propose to pay for it at the payment rate calculated under this program consistent with the provisions in section 1847B of the Act. We propose to base payment for new radiopharmaceuticals with HCPCS codes as of January 1, 2007, but which do not have pass-through status, on the WACs for these products as ASP data for radiopharmaceuticals are not available. In addition, we note that if the WACs are also unavailable, then we would make payment for the radiopharmaceuticals at 95 percent of their most recent AWP. We are proposing to adopt this interim payment methodology in order to be consistent with how we pay for new drugs, biologicals, and radiopharmaceuticals without HCPCS codes, as discussed in the CY 2006 OPPS final rule with comment period (70 FR 68669). To be consistent with the ASP-based payments that would be made when the new drugs and biologicals are furnished in physician offices, we are proposing to make any appropriate adjustments to their payment amounts in the CY 2007 OPPS final rule and also on a quarterly basis on our Web site during CY 2007 if later quarter ASP submissions (or more recent WACs or AWP) indicate that adjustments to the payment rates for these drugs and biologicals are necessary. The payment rates for new radiopharmaceuticals would also be adjusted accordingly. We are also proposing to make appropriate adjustments to the payment rates for

new drugs and biologicals in the event that they become covered under the competitive acquisition program in the future.

As discussed in the CY 2005 OPPS final rule with comment period (69 FR 65797), and the CY 2006 OPPS final rule with comment period (70 FR 68666), new drugs, biologicals, and radiopharmaceuticals may be expensive, and we are concerned that packaging these new items might jeopardize beneficiary access to them. In addition, we do not want to delay separate payment for these items solely because a pass-through application was not submitted. The payment methodologies described above are the same as the methodologies that would be used to calculate the OPPS payment amount that pass-through drugs, biologicals, and radiopharmaceuticals would be paid in CY 2007. We refer readers to section V.A. of this preamble for a discussion of payment policies of pass-through drugs, biologicals, and radiopharmaceuticals under OPPS. Consequently, we are proposing to continue to treat new drugs, biologicals, and radiopharmaceuticals with newly established HCPCS codes the same, irrespective of whether pass-through status has been determined. We also are proposing to assign status indicator “K” to HCPCS codes for new drugs, biologicals, and radiopharmaceuticals for which we have not received a pass-through application. We specifically request comments on our proposed payment policies for new drugs, biologicals, and radiopharmaceuticals with HCPCS codes but which do not have pass-through status as of January 1, 2007. The new CY 2007 HCPCS codes for drugs, biologicals, and radiopharmaceuticals are not available at the time of the development of this proposed rule; however, they will be included in the CY 2007 OPPS final rule.

There are several drugs, biologicals, and radiopharmaceuticals that were payable during CY 2005 or where HCPCS codes for products were created effective January 1, 2006, for which we do not have any CY 2005 hospital claims data. In order to determine the packaging status of these items for CY 2007, we calculated an estimate of the per day cost of each of these items by multiplying the payment rate for each product based on ASP+5 percent similar to other separately payable nonpass-through drugs and biologicals under the OPPS and, as determined using the ASP methodology as described in section V.B.3.a.2. of this preamble, by an estimated average number of units of each product that would typically be

furnished to a patient during one administration in the hospital outpatient setting. We are proposing to package items for which we estimate the per administration cost to be less than \$55, which is the packaging threshold that we are proposing for drugs, biologicals, and radiopharmaceuticals in CY 2007, and pay separately for items with an estimated per administration cost greater than \$55. We are proposing that the CY 2007 payment for separately payable items would be based on rates determined using the ASP methodology established in the physician office setting and set to ASP+5 percent, similar to other separately payable nonpass-through drugs and biologicals under the OPPS. In accordance with the ASP methodology used in the physician office setting, in the absence of ASP data, we would use the WAC for the

product to establish the initial payment rate. We note, however, that if the WAC is also unavailable, then we would make payment at 95 percent of the most recent AWP available. We note that for radiopharmaceutical agents that do not have any CY 2005 hospital claims data, we propose to determine their packaging status and, if the items are separately payable, then establish their payment rates using the WACs for the products because ASP data are not available for any radiopharmaceuticals. We also note that if the WACs are unavailable, then we would use payment at 95 percent of the most recent AWP to determine their packaging status and payment rates. In order to determine the packaging status and payment rates for these drugs, biologicals, and radiopharmaceuticals in this proposed rule, we used ASP data

from the fourth quarter of 2005 or the most recent WAC or AWP data available at this time, as appropriate.

Table 27 below lists all of the items without available CY 2005 claims data to which these policies would apply in CY 2007. There are three HCPCS codes for which we were not able to determine payment rates based on the ASP methodology. The HCPCS codes are 90393 (Vaccina ig, im), 90693 (Typhoid vaccine, akd, sc), and A9567 (Technitium TC-99m aerosol). Because we are unable to estimate the per administration cost of these items, we are proposing to package them in CY 2007. We are seeking comments on our proposed policies for determining the per administration cost of the drugs, biologicals, and radiopharmaceuticals that are payable under the OPPS, but do not have any CY 2005 claims data.

TABLE 27.—DRUGS, BIOLOGICALS, AND RADIOPHARMACEUTICALS WITHOUT CY 2005 CLAIMS DATA

HCPCS code	Description	ASP-based payment rate	Estimated average number of units per administration	CY 2007 proposed SI
90714	Td vaccine no prsrv >= 7 im	\$18.09	1	N

Q9962	HOCM 300–349mg/ml iodine, 1ml	0.14	100	N
Q9963	HOCM 350–399mg/ml iodine, 1ml	0.39	100	N
Q9964	HOCM ≥ 400mg/ml iodine, 1ml	0.19	100	N

VI. Proposed Estimate of OPPS Transitional Pass-Through Spending in CY 2007 for Drugs, Biologicals, Radiopharmaceuticals, and Devices

(If you choose to comment on issues in this section, please include the caption “OPPS: Estimated Transitional Pass-Through Spending” at the beginning of your comment.)

A. Total Allowed Pass-Through Spending

Section 1833(t)(6)(E) of the Act limits the total projected amount of transitional pass-through payments for drugs, biologicals, radiopharmaceuticals, and categories of devices for a given year to an “applicable percentage” of projected total Medicare and beneficiary payments under the hospital OPPS. For a year before CY 2004, the applicable percentage was 2.5 percent; for CY 2004

and subsequent years, we specify the applicable percentage up to 2.0 percent.

If we estimate before the beginning of the calendar year that the total amount of pass-through payments in that year would exceed the applicable percentage, section 1833(t)(6)(E)(iii) of the Act requires a uniform reduction in the amount of each of the transitional pass-through payments made in that year to ensure that the limit is not exceeded. We make an estimate of pass-through spending to determine not only whether

payments exceed the applicable percentage, but also to determine the appropriate reduction to the conversion factor for the projected level of pass-through spending in the following year.

For devices, making an estimate of pass-through spending in CY 2007 entails estimating spending for two groups of items. The first group consists of those items for which we have claims data for procedures that we believe used devices that were eligible for pass-through status in CY 2005 and CY 2006 and that would continue to be eligible for pass-through payment in CY 2007. The second group consists of those items for which we have no direct claims data, that is, items that became, or would become, eligible in CY 2006 and would retain pass-through status in CY 2007, as well as items that would be newly eligible for pass-through payment beginning in CY 2007.

B. Proposed Estimate of Pass-Through Spending for CY 2007

We are proposing to set the applicable percentage cap at 2.0 percent of the total OPPS projected payments for CY 2007. As we discuss in section IV.B. of this preamble, there is one device category receiving pass-through payment in CY 2006 that will continue for payment during CY 2007. Therefore, we estimate pass-through spending attributable to the first group of items described above to be \$36.8 million.

To estimate CY 2007 pass-through spending for device categories in the second group, that is, items for which we have no direct claims data, we used the following approach: For additional device categories that are approved for pass-through status after July 1, 2006, but before January 1, 2007, we are proposing to use price information from manufacturers and volume estimates based on claims for procedures that would most likely use the devices in

question because we do not have any CY 2005 claims data upon which to base a spending estimate. We are proposing to project these data forward to CY 2007 using inflation and utilization factors based on total growth in OPPS services as projected by CMS' Office of the Actuary (OACT) to estimate CY 2007 pass-through spending for this group of device categories. We may use an alternate growth factor for any specific new device category based on our claims data or the device's clinical characteristics, or both. For device categories that become eligible for pass-through status in CY 2007, we are proposing to use the same methodology. We anticipate that any new categories for January 1, 2007, would be announced after the publication of this proposed rule, but before publication of the final rule with comment period. Therefore, the estimate of pass-through spending in the CY 2007 OPPS final rule with comment period would incorporate any pass-through spending for device categories made effective January 1, 2007, and during subsequent quarters of CY 2007.

With respect to CY 2007 pass-through spending for drugs and biologicals, as we explain in section V.A.3. of this proposed rule, the pass-through payment amount for new drugs and biologicals that we determine have pass-through status will equal zero. Therefore, our estimate of pass-through spending for drugs and biologicals with pass-through status in CY 2007 equals zero.

In the CY 2005 OPPS final rule with comment period (69 FR 65810), we indicated that we are accepting pass-through applications for new radiopharmaceuticals that are assigned a HCPCS code on or after January 1, 2005. (Prior to this date, radiopharmaceuticals were not included in the category of

drugs paid under the OPPS, and therefore, were not eligible for pass-through status.) We have no new radiopharmaceuticals that were added for pass-through payment in CY 2005 or to this point in CY 2006, and we currently have no information identifying new radiopharmaceuticals to which a HCPCS code might be assigned on or after January 1, 2007, for which pass-through payment status would be sought. We also have no data regarding payment for new radiopharmaceuticals with pass-through status under the methodology that we specified in the CY 2005 OPPS final rule with comment period. However, we do not believe that pass-through spending for new radiopharmaceuticals in CY 2007 will be significant enough to materially affect our estimate of total pass-through spending in CY 2007. Therefore, we are not including radiopharmaceuticals in our estimate of pass-through spending for CY 2007. We discuss the methodology for determining the proposed CY 2007 payment amount for radiopharmaceuticals with pass-through status in section V.B.3.b. of this preamble.

In accordance with the methodology described above, we estimate that total pass-through spending for both device categories that are continuing into CY 2007 and that first become eligible for pass-through status during CY 2007 would equal approximately \$43.2 million, which represents 0.13 percent of total OPPS projected payments for CY 2007. This figure includes estimates for the current device category continuing into CY 2007, which equals \$36.8 million, in addition to projections for categories that may become eligible after publication of this proposed rule but before the end of CY 2006, and for projections for new categories that may become eligible during CY 2007.

TABLE 28.—ESTIMATES FOR CY 2007 TRANSITIONAL PASS-THROUGH SPENDING FOR CURRENT PASS-THROUGH CATEGORIES CONTINUING INTO CY 2007

HCPCS	APC	Existing pass-through device category	CY 2007 estimated utilization	CY 2007 estimated pass-through payments
C1820	1820	Generator, neurostimulator (implantable), with rechargeable battery and charging system	4,568	\$36,766,720

Because we estimate pass-through spending in CY 2007 will not amount to 2.0 percent of total projected OPPS CY 2007 spending, we are proposing to return 1.87 percent of the pass-through pool to adjust the conversion factor, as we discuss in section II.C. of this preamble.

VII. Proposed Brachytherapy Source Payment Changes

(If you choose to comment on issues in this section, please include the caption "OPPS: Brachytherapy" at the beginning of your comment.)

A. Background

Section 1833(t)(2)(H) of the Act, as added by section 621(b)(2)(C) of Pub. L. 108–173, mandated the creation of separate groups of covered OPD services that classify brachytherapy devices separately from other services or groups of services. The additional groups must

reflect the number, isotope, and radioactive intensity of the devices of brachytherapy furnished, including separate groups for Palladium-103 and Iodine-125 devices. In accordance with this provision, since CY 2004 we have established four new brachytherapy source codes and descriptors.

Section 1833(t)(16)(C) of the Act, as added by section 621(b)(1) of Pub. L. 108–173, established payment for devices of brachytherapy consisting of a seed or seeds (or radioactive source) based on a hospital's charges for the service, adjusted to cost. The period of payment under this provision is for brachytherapy sources furnished from January 1, 2004, through December 31, 2006. Under section 1833(t)(16)(C) of the Act, charges for the brachytherapy devices may not be used in determining any outlier payments under the OPSS for that period of payment. Consistent with our practice under the OPSS to exclude items paid at cost from budget neutrality consideration, these items have been excluded from budget neutrality for that time period as well.

In the OPSS interim final rule with comment period published on January 6, 2004 (69 FR 827), we implemented sections 621(b)(1) and (b)(2)(C) of Pub. L. 108–173. In that rule, we stated that we would pay for the brachytherapy sources listed in Table 4 of the interim final rule with comment period (69 FR 828) on a cost basis, as required by the statute. Since January 1, 2004, we have

used status indicator “H” to denote nonpass-through brachytherapy sources paid on a cost basis, a policy that we finalized in the CY 2005 final rule with comment period (69 FR 65838).

Furthermore, we adopted a standard policy for brachytherapy code descriptors, beginning January 1, 2005. We included “per source” in the HCPCS code descriptors for all those brachytherapy source descriptors for which units of payment were not already delineated.

Section 621(b)(3) of Pub. L. 108–173 requires the Government Accountability Office (GAO) to conduct a study to determine appropriate payment amounts for devices of brachytherapy, and to submit a report on its study to the Congress and the Secretary, including recommendations. The GAO's final report, published at the end of July 2006, was not available in time to review and discuss in this proposed rule. We plan to discuss the report's findings and recommendations in the CY 2007 OPSS final rule with comment period.

B. Proposed Payments for Brachytherapy Sources in CY 2007

As indicated above, the provision to pay for brachytherapy sources at charges reduced to cost expires after December 31, 2006, in accordance with section 1833(t)(16)(C) of the Act. However, under section 1833(t)(2)(H) of the Act, we are still required to create APC groupings that classify devices of

brachytherapy separately from other services or groups of services in a manner reflecting the number, isotope, and radioactive intensity of the devices of brachytherapy furnished.

We are proposing to pay separately for each of the sources listed in Table 29 below on a prospective basis for CY 2007, with payment rates to be determined using the CY 2005 claims-based median cost per source for each brachytherapy device. Consistent with our policy regarding APC payments made on a prospective basis, we are proposing that the cost of brachytherapy sources be subject to the outlier provisions of section 1833(t)(5) of the Act. As indicated in section II.A.2. of the preamble to this proposed rule, for CY 2007, we are proposing a specific payment rate for brachytherapy sources, which will be subject to scaling for budget neutrality.

Table 29 includes a complete listing of the HCPCS codes, long descriptors, APC assignments, APC titles, and status indicators that we currently use for brachytherapy sources paid under the OPSS in CY 2006 and that we are proposing to use for CY 2007. The brachytherapy sources and related information in Table 29 are the same sources and information as those listed in Table 28 of the OPSS CY 2006 final rule with comment period (70 FR 68676). No additional brachytherapy sources have been added since the CY 2006 final rule with comment period.

TABLE 29.—PROPOSED SEPARATELY PAYABLE BRACHYTHERAPY SOURCES FOR CY 2007

HCPCS code	Long descriptor	APC	APC title	New status indicator
C1716	Brachytherapy source, Gold 198, per source	1716	Brachytx source, Gold 198	K
C1717	Brachytherapy source, High Dose Rate Iridium 192, per source.	1717	Brachytx source, HDR Ir-192	K
C1718	Brachytherapy source, Iodine 125, per source	1718	Brachytx source, Iodine 125	K
C1719	Brachytherapy source, Non-High Dose Rate Iridium 192, per source.	1719	Brachytx source, Non-HDR Ir-192	K
C1720	Brachytherapy source, Palladium 103, per source	1720	Brachytx source, Palladium 103	K
C2616	Brachytherapy source, Yttrium-90, per source	2616	Brachytx source, Yttrium-90	K
C2632	Brachytherapy solution, Iodine 125, per mCi	2632	Brachytx sol, I-125, per mCi	K
C2633	Brachytherapy source, Cesium-131, per source	2633	Brachytx source, Cesium-131	K
C2634	Brachytherapy source, High Activity, Iodine-125, greater than 1.01 mCi (NIST), per source.	2634	Brachytx source, HA, I-125	K
C2635	Brachytherapy source, High Activity, Palladium-103, greater than 2.2 mCi (NIST), per source.	2635	Brachytx source, HA, P-103	K
C2636	Brachytherapy linear source, Palladium-103, per 1MM	2636	Brachytx linear source, P-103	K
C2637	Brachytherapy source, Ytterbium-169, per source	2637	Brachytx, Ytterbium-169	K

There are a number of advantages to this proposed payment method. The OPSS is a prospective payment system under which payment rates are generally established based on median costs from historical hospital claims. Therefore, under this payment method,

brachytherapy sources would be paid using the same basic median cost methodology as the overall OPSS. The payment of sources would thus be an integral part of the OPSS, rather than a separate cost-based payment methodology within the OPSS. In

addition, consistent and predictable prospectively established payment rates under the OPSS for brachytherapy sources are appropriate because we do not believe that the hospital resource costs associated with specific brachytherapy sources should vary

greatly across hospitals or across clinical conditions under treatment, other than through differences in the numbers of sources utilized, which are already accounted for in our per source payment methodology. This prospective payment methodology would promote efficiency in the provision of sources, while continuing to provide payments that reflect the wide clinical variation in the use of brachytherapy sources related to many factors, including tumor type and stage, patient anatomy, and planned brachytherapy dose. In addition, under this method, we would continue to pay for brachytherapy sources separately using the same C-codes and descriptors that hospitals have reported for the last several years.

We note that High Dose Rate (HDR) Iridium-192 (C1717) is a reusable source, across treatment sessions and across patients. It is unclear whether hospitals are reporting the number of units provided accurately. Thus, while we are currently proposing that HDR Iridium be paid separately on the basis of the median cost per source as we are proposing to pay for the other brachytherapy sources, we invite comments on alternatives to using this methodology for this source, such as on the basis of median costs per treatment day on hospital claims.

During the March 1–2, 2006 APC Panel meeting, we discussed median cost data for brachytherapy sources developed from the partial CY 2005 hospitals claims data available for analysis at the time of the meeting. While the APC Panel made no specific recommendations about a specific OPPS CY 2007 payment methodology for brachytherapy sources, the Panel reviewed the median costs for the sources of brachytherapy and generally commented that the median costs appeared reasonable for the commonly furnished brachytherapy sources.

Because brachytherapy sources would no longer be paid on the basis of their charges reduced to costs, we are proposing to discontinue our use of payment status indicator “H” for APCs assigned to brachytherapy sources. We are proposing to use status indicator “K” for all brachytherapy source APCs for CY 2007. We are also proposing for CY 2007 to change the definition of status indicator “K” to ensure that “K” appropriately describes brachytherapy source APCs. Payment status indicators are discussed in section XV.A. of this preamble.

There is one source for which we have no claims data or payment information. We added Ytterbium-169 (HCPCS code C2637) for payment effective October 1, 2005, because it met

the requirements of section 1833(t)(2)(H) of the Act as a separate brachytherapy source. It is our understanding that this source, which is for use in high dose rate (HDR) brachytherapy, is not yet marketed by the manufacturer, although it has been approved by the Food and Drug Administration (FDA). Therefore, we have no claims data for this brachytherapy source in order to develop a prospective payment rate, as we do for the other brachytherapy sources for CY 2007. In addition, it is our understanding that no price for the product exists, as it has not yet been marketed. Thus, we also have no external information regarding the cost of this source to hospitals. We are weighing our payment options for CY 2007 for brachytherapy sources for which we have no payment or claims information, such as the present case with Ytterbium-169. This includes considering our CY 2007 payment options for other new brachytherapy sources that come to our attention, which historically have been newly recognized under the OPPS on a quarterly basis.

One option for CY 2007 would be to pay for the currently existing HCPCS code C2637 at charges converted to costs. However, this would be inconsistent with our proposed policy with regard to payment for brachytherapy sources under prospectively established payment rates. We paid for all brachytherapy sources based upon charges converted to costs for CYs 2004 through 2006 because the law required us to do so. However, that provision will expire for the CY 2007 OPPS. In addition, this methodology would be inconsistent with the prospective payment methodologies we use to provide payments for other new items and services under the OPPS for which we do not yet have claims data.

A second option would be to assign the code to its own APC or to a New Technology APC with a payment rate set at or near the lowest proposed payment rate for any source of brachytherapy paid on a per source basis (as opposed, for example, per mCi), for CY 2007. However, we have no claims data or other information regarding the cost of HCPCS code C2637 to hospitals. This payment policy would resemble our policy regarding the APC assignment of not otherwise classified codes, which are assigned to the lowest level APC in their clinically compatible series. However, HCPCS code C2637 is a specifically defined brachytherapy source, and such a payment rate would not recognize the clinical distinctions among brachytherapy sources, including their differences in isotopes, activity

levels, and clinical uses in low dose rate (LDR) versus HDR brachytherapy. The solid brachytherapy source with the lowest proposed median cost for CY 2007 is HCPCS code C2634, for High Activity Iodine-125, with a median cost of \$25.77 per source, which is implanted in LDR brachytherapy.

A third option would be to assign HCPCS code C2637 to its own APC or to a New Technology APC with a payment rate established at or near the proposed payment rate for HCPCS code C1717, which describes HDR Iridium-192. Like HCPCS code C2637, HCPCS code C1717 is used for HDR brachytherapy, and HCPCS code C1717 is the most commonly used source for HDR brachytherapy under the OPPS. However, this approach would not take into consideration significant differences in the two sources, including their radioactive isotopes and energy levels.

The fourth option would be to assign HCPCS code C2637 to its own APC or to a New Technology APC with a prospective payment rate based on external data provided to us regarding the expected cost of the source to hospitals. If we were provided reliable and relevant cost information for the source, we could establish its payment rate based on that information and our review of other pertinent considerations, as we do for new technology services under the OPPS. Under this option, in the absence of external cost information, we would not recognize HCPCS code C2637 under the OPPS for CY 2007 until we received such information and could establish a payment rate in a quarterly OPPS update. CMS provided the brachytherapy source Ytterbium-169 a HCPCS code in CY 2005 at the manufacturer's request, based on the belief that the source would be marketed shortly. However, the product has not yet been marketed. Therefore, we currently have a recognized HCPCS code for an item that is not currently available to hospitals. We do not typically issue and maintain as payable a HCPCS code for an item that is not marketed. Under this option, if the source were marketed mid-quarter in CY 2007 and cost information was provided to us, there would be no payment available for the source until the next OPPS quarterly update, which would establish the payment rate for HCPCS code C2637 and its effective date.

After weighing the above options, we are proposing the second option discussed, that is, to assign C2637 to its own APC or a New Technology APC with a payment rate set at or near the lowest proposed payment rate for any

source of brachytherapy paid on a per source basis. This option resembles our policy regarding the APC assignment of not otherwise classified codes, in the absence of any data currently available. Once we have claims data, or obtain external data, we can consider movement to another APC, if warranted. However, as we indicate below, we are interested in the public's comments on the four options we have presented.

We are specifically inviting comments on how we should establish the CY 2007 payment amount for Ytterbium-169 (HCPCS code C2637), especially with consideration of the four options discussed above, and on how we should generally proceed on setting payment amounts for established or new brachytherapy sources eligible for separate payment under section 1833(t)(2)(H) of the Act, for which we have no claims-based cost data in the future. Note that under option 4, for a future new source we would need cost information regarding the source in order to establish a code for which we could set an appropriate OPSS payment rate. We intend to avoid routinely establishing HCPCS codes for brachytherapy sources which hospitals could not be using, and, therefore, for which payments would not be necessary.

As we have consistently done in the past, we are inviting the public to submit recommendations for new codes to describe new brachytherapy sources in a manner reflecting the number, isotope, and radioactive intensity of the sources. We are requesting that commenters provide a detailed rationale to support recommended new sources and send recommendations to us. We will continue our endeavor to add new brachytherapy source codes and descriptors to our systems for payment on a quarterly basis. Such recommendations should be directed to the Division of Outpatient Care, Mail Stop C4-05-17, Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244.

We have considered the definition of the term "brachytherapy source" in the context of current medical practice, and in light of the language in section 1833(t)(2)(H) of the Act. We are proposing to define a device of brachytherapy eligible for separate payment under the OPSS as a "seed or seeds (or radioactive source)" as indicated in section 1833(t)(2)(H) of the Act, which refers to sources that are themselves radioactive, meaning that the sources contain a radioactive isotope. Therefore, for example, we do not consider specific devices that do not utilize radioactive isotopes to deliver

radiation to be radioactive sources as envisioned by the statute. While the public may recommend any item that it wishes us to consider as a brachytherapy source, we remind the public of our interpretation of a device of brachytherapy eligible for separate payment under section 1833(t)(2)(H) of the Act.

VIII. Proposed Changes to OPSS Drug Administration Coding and Payment for CY 2007

(If you choose to comment on issues in this section, please include the caption "OPSS: Drug Administration" at the beginning of your comment.)

A. Background

From the start of the OPSS until the end of CY 2004, three HCPCS codes were used to bill drug administration services provided in the hospital outpatient department:

- Q0081 (Infusion therapy, using other than chemotherapeutic drugs, per visit)
- Q0083 (Chemotherapy administration by other than infusion technique only, per visit)
- Q0084 (Chemotherapy administration by infusion technique only, per visit).

A fourth OPSS drug administration HCPCS code, Q0085 (Administration of chemotherapy by both infusion and another route, per visit), was active from the beginning of the OPSS through the end of CY 2003.

Each of these four HCPCS codes mapped to an APC (that is, Q0081 mapped to APC 0120, Q0083 mapped to APC 0116, Q0084 mapped to APC 0117, and Q0085 mapped to APC 0118), and the APC payment rates for these codes were made on a per-visit basis. The per-visit payment included payment for all hospital resources (except separately payable drugs) associated with the drug administration procedures. For CY 2004, we discontinued using HCPCS code Q0085 to identify drug administration services and moved to a combination of HCPCS codes Q0083 and Q0084 that allowed more accurate calculations when determining OPSS payment rates.

In CY 2005, in response to the recommendations made by commenters and the hospital industry, OPSS transitioned to the use of CPT codes for drug administration services. These CPT codes allowed for more specific reporting of services, especially regarding the number of hours for an infusion, and provided consistency in coding between Medicare and other payers. However, we did not have any data to revise the CY 2005 per-visit APC

payment structure for infusion services. In order to collect data for future ratesetting purposes, we implemented claims processing logic that collapsed payments for drug administration services and paid a single APC amount for those services for each visit, unless a modifier was used to identify drug administration services provided in a separate encounter on the same day. Hospitals were instructed to bill all applicable CPT codes for drug administration services provided in a hospital outpatient department, without regard to whether or not the CPT code would receive a separate APC payment during OPSS claims processing.

While hospitals were just adopting CPT codes for outpatient drug administration services in CY 2005, physicians paid under the Medicare Physician Fee Schedule were using HCPCS G-codes in CY 2005 to report office-based drug administration services. These G-codes were developed in anticipation of substantial revisions to the drug administration CPT codes by the CPT Editorial Panel that were expected for CY 2006.

In CY 2006, as anticipated, the CPT Editorial Panel revised its coding structure for drug administration services, incorporating new concepts such as initial, sequential, and concurrent services into a structure that previously distinguished services based on type of administration (chemotherapy/nonchemotherapy), method of administration (injection/infusion/push), and for infusion services, first hour and additional hours. For CY 2006, we proposed a crosswalk that mapped the expected CY 2006 CPT codes (represented by CY 2005 G-codes used in the physician office setting, the closest proxy at the time) to the APC payment structure implemented in CY 2005. Our crosswalk was reviewed by the APC Panel at both the February and August 2005 meetings, and was included in the CY 2006 OPSS proposed rule. During the proposed rule comment period, we received a number of comments that prompted several revisions to our proposed crosswalk, including the development of complex claims processing logic to assign correct payment for certain drug administration services that would vary based on other drug administration services provided during the same patient visit. These revisions were a result of the growing understanding, facilitated by the preview of CPT drug administration coding guidelines developed by the CPT Editorial Panel, in the hospital community of the multiple implications associated with adopting the newly

introduced CPT concepts of initial, sequential, and concurrent services.

Upon review of the completed revisions to our proposed CY 2006 methodology, and following comprehensive assessment of all public comments, we implemented 20 of the 33 CY 2006 drug administration CPT codes that did not reflect the concepts of initial, sequential, and concurrent services, and we created 6 new HCPCS C-codes that generally paralleled the CY 2005 CPT codes for the same services. We chose not to implement the full set of CY 2006 CPT codes because of our concerns regarding the interface between the complex claims processing logic required for correct payments and hospitals' challenges in correctly coding their claims to receive accurate payments for these services. In addition, numerous commenters indicated that implementing certain CPT codes in a fashion consistent with the code descriptors would present hospitals with difficult operational and administrative challenges because concepts integral to the codes were inconsistent with the clinical patterns of drug administration services provided in hospital outpatient departments. In addition to coding changes, CY 2006 payment rates for drug administration services were updated based upon CY 2004 claims, and we continued the claims processing logic that required hospitals providing drug administration services to report all applicable drug administration HCPCS codes, despite some codes being collapsed into one APC for payment purposes.

B. Proposed CY 2007 Drug Administration Coding Changes

For the CY 2007 OPPS, we are proposing to continue the CY 2006 OPPS drug administration coding structure, which combines CPT codes with several C-codes. However, we welcome comments from hospitals regarding their experiences in implementing, for purposes of reporting to other payers, the CY 2006 CPT codes that incorporate the concepts of initial, sequential, and concurrent drug administration services. While we are not proposing to transition to the full set of CPT codes in CY 2007, we retain this as an option for the future.

In addition, because of the discrepancies between APC payments

(based on per-visit hospital claims data) and per-service CPT/HCPCS coding, we provided special instructions to hospitals in CY 2005 and CY 2006 regarding modifier 59 in order to ensure proper OPPS payments, consistent with our claims processing logic. As we do not expect any changes to our coding structure for CY 2007 and because we have updated service-specific claims data from CY 2005, we no longer have the need for specific drug administration instructions regarding modifier 59. Instead, for CY 2007 we are proposing that hospitals apply modifier 59 to drug administration services using the same correct coding principles that they generally use for other OPPS services.

C. Proposed CY 2007 Drug Administration Payment Changes

CY 2007 is the first year that we have more detailed claims data to inform our ratesetting process. Through CY 2006, payment for additional hours of drug infusion has always been packaged, although separate codes for reporting these hours have been used under the OPPS since CY 2005. Specifically, hospitals began reporting more precise CPT codes in CY 2005 that included separate coding for the first hour of infusion versus additional hours of infusion. In order to analyze these data, because we expected that additional hours of infusion codes would always be reported with codes for the first hour of infusion, thereby resulting in multiple bills for the additional hours of infusion CPT codes, we added the following three CY 2005 drug administration CPT codes to the bypass list utilized to create "pseudo" single claims: CPT codes 90781 (Intravenous infusion for therapy/diagnosis, administered by physician or under direct supervision of physician; each additional hour, up to eight (8) hours); 96412 (Chemotherapy administration, intravenous; infusion technique, one to 8 hours, each additional hour); and 96423 (Chemotherapy administration, intra-arterial; infusion technique, one to 8 hours, each additional hour). The standard OPPS methodology, as described in section II.A. of this proposed rule, was used to calculate HCPCS medians for these three drug administration codes. We then mapped all the data for the three additional

hours of infusion CPT codes from the single and "pseudo" single claims to the APCs to which we are proposing to assign the CY 2005 claims data for these codes for purposes of calculating APC median costs.

While bypassing these three CPT codes and developing additional "per unit" claims provide a methodology to calculate median costs for these previously packaged drug administration services and to attribute all of their cost data to their assigned APCs, we note that this methodology allocates all packaging on the claim related to drug administration to the associated first hour drug administration code. Because these additional hours of infusion codes are not reported alone in conjunction with other separately payable nondrug administration services, we would not expect that the packaging related to additional hours of infusion would be inappropriately assigned to nondrug administration services. While we realize that there are some packaged costs that truly are clinically related to the second and subsequent hours of infusion, especially for infusions of packaged drugs that span several hours, and would, therefore, be most appropriately allocated to the additional hours of infusion codes, we are not able at this time to accurately assign representative portions of packaging costs to multiple different services at this time due to the limitations of our claims data. We believe this proposed methodology takes into account all of the packaging on claims for drug administration services and provides a reasonable framework for developing median costs for drug administration services that are often provided in combination with one another.

Upon review of the HCPCS median costs for all drug administration services, including injections and antigen therapy services, we created a comprehensive set of new APC groupings of CY 2005 HCPCS codes for drug administration services, with our assignments based both upon hospital resources utilized as reflected in HCPCS median costs and clinical coherence. The result of this analysis was the development of six proposed drug administration APC levels for the proposed CY 2007 payment rates, as shown in Table 30–1.

Table 30-1.--Proposed 6-Level APC Structure of CY 2005 CPT Drug Administration Codes Used to Develop CY 2007 APC Payment Rates

Proposed CY 2007 Drug Administration APC Level	CY 2005 CPT/HCPCS Code	Description	Proposed CY 2007 APC Reflecting Claims Data
LEVEL I	90472	Immunization admin, each add	0436
	90473	Immune admin oral/nasal	
	90474	Immune admin oral/nasal addl	
	90799	Ther/prophylactic/dx inject	
	95115	Immunotherapy, one injection	
	96549	Chemotherapy, unspecified	
LEVEL II	90471	Immunization admin	0437
	90781	IV infusion, additional hour	
	90782	Injection, sc/im	
	90788	Injection of antibiotic	
	95117	Immunotherapy injections	
	95144	Antigen therapy services	
	95145	Antigen therapy services	
	95146	Antigen therapy services	
	95147	Antigen therapy services	
	95148	Antigen therapy services	
	95149	Antigen therapy services	
	95165	Antigen therapy services	
	95170	Antigen therapy services	
	G0008	Admin influenza virus vac	
	G0009	Admin pneumococcal vaccine	
	G0010	Admin hepatitis b vaccine	
LEVEL III	90783	Injection, ia	0438
	90784	Injection, iv	
	96400	Chemotherapy, sc/im	
	96405	Chemo intralesional, up to 7	
	96406	Chemo intralesional over 7	
	96412	Chemo, infuse method add-on	
	96423	Chemo ia infuse each addl hr	
	96542	Chemotherapy injection	
LEVEL IV	96408	Chemotherapy, push technique	0439
	96420	Chemo, ia, push technique	
	96440	Chemotherapy, intracavitary	
	96445	Chemotherapy, intracavitary	
LEVEL V	90780	IV infusion therapy, 1 hour	0440
	96520	Port pump refill & main	
	96530	Syst pump refill & main	
LEVEL VI	96410	Chemotherapy,infusion method	0441
	96414	Chemo, infuse method add-on	
	96422	Chemo ia infusion up to 1 hr	
	96425	Chemotherapy,infusion method	
	96450	Chemotherapy, into CNS	

As shown above, the placement of HCPCS codes into the proposed six

levels follows logical, clinically coherent principles and is consistent

with both expected and observed differences in hospital resource costs,

both across levels and within each level. For example, the first hour of chemotherapy infusion is assigned to proposed Level VI, while additional hours of chemotherapy infusion are assigned to proposed Level III. This proposed structure is mirrored by the nonchemotherapy codes that show the first hour of nonchemotherapy infusion assigned to proposed Level V, while

additional hours of nonchemotherapy infusion are assigned to proposed Level II.

Using this structure as a base, the CY 2006 OPPS drug administration codes were assigned to the proposed 6-level APC structure based on their clinical and expected hospital resource characteristics, as seen in Table 30–2.

This proposed structure was presented to the APC Panel during the March 2006 meeting. The Panel recommended using the bypass methodology as described above for the three additional hours of infusion codes to develop their median costs and supported separate payment for each additional hour of infusion for CY 2007, as shown in Table 30–2.

Table 30-2.--CY 2007 Proposed 6-Level Drug Administration APC Structure

Proposed CY 2007 APC	APC Status Indicator	Proposed CY 2007 APC Median	CPT/HCPCS Code	Description
0436	S	\$10.71	90472	Immunization admin, each add
			90473	Immune admin oral/nasal
			90474	Immune admin oral/nasal addl
			90779	Ther/prop/diag inj/inf proc
			95115	Immunotherapy, one injection
			96549	Chemotherapy, unspecified
0437	S	\$25.49	90772	Ther/proph/diag inj, sc/im
			90471	Immunization admin
			95117	Immunotherapy injections
			95144	Antigen therapy services
			95145	Antigen therapy services
			95146	Antigen therapy services
			95147	Antigen therapy services
			95148	Antigen therapy services
			95149	Antigen therapy services
			95165	Antigen therapy services
			95170	Antigen therapy services
			C8951	Intravenous infusion for therapy/diagnosis; each additional hour
			G0008	Admin influenza virus vac
			G0009	Admin pneumococcal vaccine
0438	S	\$48.99	90773	Ther/proph/diag inj, ia
			96401	Chemo, anti-neopl, sq/im
			96402	Chemo hormon antineopl sq/im
			96405	Chemo intralesional, up to 7
			96406	Chemo intralesional over 7
			96423	Chemo ia infuse each addl hr
			96542	Chemotherapy injection
			C8952	Therapeutic, prophylactic or diagnostic injection; intravenous push
			C8955	Chemotherapy administration, intravenous; infusion technique, each additional hour
0439	S	\$97.84	96420	Chemo, ia, push technique
			96440	Chemotherapy, intracavitary
			96445	Chemotherapy, intracavitary
			C8953	Chemotherapy administration, intravenous; push technique
0440	S	\$112.94	96521	Refill/maint, portable pump
			96522	Refill/maint pump/resvr syst
			C8950	Intravenous infusion for therapy/diagnosis; up to 1 hour
0441	S	\$154.86	96416	Chemo prolong infuse w/pump
			96422	Chemo ia infusion up to 1 hr
			96425	Chemotherapy, infusion method
			96450	Chemotherapy, into CNS
			C8954	Chemotherapy administration, intravenous; infusion technique, up to one hour
			C8957	Intravenous infusion for therapy/diagnosis; initiation of prolonged infusion (more than 8 hours), requiring use of portable or implantable pump

We are accepting the APC Panel's recommendation for CY 2007 to use the

bypass and "per unit" methodology as described in proposing a drug

administration payment structure that includes a methodology to pay for

infusion services by the hour. Therefore, we are proposing to assign HCPCS codes for CY 2007 to six new drug administration APCs, as listed in Table 30–2, with payment rates based on median costs for the APCs from CY 2005 claims data as assigned in Table 30–1.

For CY 2007, the APC Panel also recommended that CMS reevaluate payment for IVIG administration, especially considering the resource intensity of IVIG infusions. We are accepting this APC Panel recommendation and believe that our proposed CY 2007 drug administration payment policy that would provide specific payment for each hour of infusion would provide more accurate and appropriate payment for lengthy infusions, including the administration of IVIG. IVIG administration in the outpatient hospital setting typically occurs over 3–6 hours, and under our proposal hospitals would receive separate payment for the first hour of infusion, along with payments for each of the additional 2–5 hours generally required for the IVIG infusion. Considerable hospital resources are used throughout the infusion period, including significant clinical staff time to monitor and adjust infusions based on patients' evolving conditions, so we believe separate payment for each additional hour is appropriate. With respect to separate payment for IVIG preadministration-related services, the APC Panel recommended that CMS maintain separate payment as long as it remains appropriate. For CY 2006 only, we created the temporary G-code G0332 (Preadministration-related services for intravenous infusion of immunoglobulin, per infusion encounter). We are accepting this APC Panel recommendation and have considered whether separate payment for IVIG preadministration-related services remains appropriate. Based upon our ongoing review of the IVIG marketplace and our CY 2007 proposed payment policies for items and services under the OPPS, we believe that separate payment for preadministration-related services specific to IVIG infusions would not be necessary in CY 2007 to ensure Medicare beneficiary access to IVIG.

Hospitals' cooperation during CY 2005 in reporting all drug administration services, whether or not separate payments were made for all such services, has allowed us to develop robust median costs for individual services so that we have sufficient information to propose this more specific APC payment structure for drug administration services for CY 2007. We believe that this proposed structure

would make appropriate payments for the hospital resources required to provide drug administration services, as we have large numbers of claims for many specific drug administration services that reveal significant and differential costs. In particular, using this proposed APC structure should allow us to make more accurate payments to hospitals for complex and lengthy drug administration services furnished to Medicare beneficiaries for many medical conditions, while also providing accurate payments for individual services when they are provided alone.

IX. Proposed Hospital Coding and Payments for Visits

(If you choose to comment on issues in this section, please include the caption "Visits" at the beginning of your comment.)

A. Background

Currently, CMS instructs hospitals to use the CY 2006 CPT codes used by physicians and listed in Table 31 to report clinic and emergency department visits and critical care services on claims paid under the OPPS.

TABLE 31.—CY 2006 CPT CODES USED TO REPORT CLINIC AND EMERGENCY DEPARTMENT VISITS AND CRITICAL CARE SERVICES

CPT code	Descriptor
CPT Evaluation and Management Codes	
99201	Office or other outpatient visit for the evaluation and management of a new patient (Level 1).
99202	Office or other outpatient visit for the evaluation and management of a new patient (Level 2).
99203	Office or other outpatient visit for the evaluation and management of a new patient (Level 3).
99204	Office or other outpatient visit for the evaluation and management of a new patient (Level 4).
99205	Office or other outpatient visit for the evaluation and management of a new patient (Level 5).
99211	Office or other outpatient visit for the evaluation and management of an established patient (Level 1).
99212	Office or other outpatient visit for the evaluation and management of an established patient (Level 2).

TABLE 31.—CY 2006 CPT CODES USED TO REPORT CLINIC AND EMERGENCY DEPARTMENT VISITS AND CRITICAL CARE SERVICES—Continued

CPT code	Descriptor
99213	Office or other outpatient visit for the evaluation and management of an established patient (Level 3).
99214	Office or other outpatient visit for the evaluation and management of an established patient (Level 4).
99215	Office or other outpatient visit for the evaluation and management of an established patient (Level 5).
99241	Office consultation for a new or established patient (Level 1).
99242	Office consultation for a new or established patient (Level 2).
99243	Office consultation for a new or established patient (Level 3).
99244	Office consultation for a new or established patient (Level 4).
99245	Office consultation for a new or established patient (Level 5).

Emergency Department Visit CPT Codes

99281	Emergency department visit for the evaluation and management of a patient (Level 1).
99282	Emergency department visit for the evaluation and management of a patient (Level 2).
99283	Emergency department visit for the evaluation and management of a patient (Level 3).
99284	Emergency department visit for the evaluation and management of a patient (Level 4).
99285	Emergency department visit for the evaluation and management of a patient (Level 5).

Critical Care Services CPT Codes

99291	Critical care, evaluation and management of the critically ill or critically injured patient; first 30–74 minutes.
99292	Each additional 30 minutes.

The majority of CPT code descriptors are applicable to both physician and facility resources associated with specific services. However, we have acknowledged from the beginning of the OPPS that we believe that CPT Evaluation and Management (E/M)

codes were defined to reflect the activities of physicians and do not describe well the range and mix of services provided by hospitals during visits of clinic and emergency department patients and critical care encounters. Presently, CPT indicates that office or other outpatient visit codes are used to report E/M services provided in the physician's office or in an outpatient or other ambulatory facility. For OPPTS purposes, we refer to these as clinic visit codes. CPT also indicates that emergency department visit codes are used to report E/M services provided in the emergency department, defined as an "organized hospital-based facility for the provision of unscheduled episodic services to patients who present for immediate medical attention. The facility must be available 24 hours a day." For OPPTS purposes, we refer to these as emergency visit codes. CPT defines critical care services as the "direct delivery by a physician(s) of medical care for a critically ill or critically injured patient." It also states that "critical care is usually, but not always, given in a critical care area, such as * * * the emergency care facility."

In the April 7, 2000 OPPTS final rule (65 FR 18434), CMS instructed hospitals to report facility resources for clinic and emergency department visits using CPT E/M codes and to develop internal hospital guidelines to determine what level of visit to report for each patient. While awaiting the development of a national set of facility-specific codes and guidelines, we have advised that each hospital's internal guidelines should follow the intent of the CPT code descriptors, in that the guidelines should be designed to reasonably relate the intensity of hospital resources to the different levels of effort represented by the codes.

During the January 2002 APC Panel meeting, the APC Panel recommended that CMS adopt the American College of Emergency Physicians (ACEP) intervention-based guidelines for facility coding of emergency department visits and develop guidelines for clinic visits that are modeled on the ACEP guidelines.

In the August 9, 2002 OPPTS proposed rule, we proposed 10 new G-codes (Levels 1–5 Facility Emergency Services and Levels 1–5 Facility Clinic Services) for use in the OPPTS to report hospital visits. We also asked for public comments regarding national guidelines for hospital coding of emergency and clinic visits. We discussed various types of models, reflecting on the advantages and disadvantages of each. We reviewed in detail the considerations around

various discrete types of specific guidelines, including guidelines based on staff interventions, based upon staff time spent with the patient, based on resource intensity point scoring, and based on severity acuity point scoring related to patient complexity. We note below our analysis of the various models.

1. Guidelines Based on the Number or Type of Staff Interventions

Under this model, the level of service reported would be based on the number and/or type of interventions performed by nursing or ancillary staff. In the intervention model, baseline care (including registration, triage, initial nursing assessment, periodic vital signs as appropriate, simple discharge instructions, and exam room set up/clean up) and possibly a single minor intervention (for example, suture removal, rapid strep test, or visual acuity) would be reported by the lowest level of service. Higher levels of service would be reported as the number and/or complexity of staff interventions increased.

The most commonly recommended intervention-based guidelines were the facility-coding guidelines developed by the ACEP. The ACEP model uses examples of interventions to illustrate appropriate coding. Coders extrapolate from these examples to determine the correct level of service to report. The ACEP model uses the types of interventions rather than the number of interventions to determine the appropriate level of service. This means that the single most complex intervention determines the level of service, whether it was the only service provided (in addition to baseline care), whether other similarly complex interventions were also provided, or whether other interventions of less complexity were also provided. The intervention model is based on emergency department/clinic resource use, is simple, reflects the care given to the patient, and does not require additional facility documentation. However, we expressed concern that the intervention model may provide an incentive to provide unnecessary services and that it is susceptible to upcoding. In addition, it is not particularly focused on measuring and appropriately reporting a code reflecting total hospital resources used in a visit. Furthermore, the ACEP model requires extrapolation from a set of examples that could make it prone to variability across hospitals.

2. Guidelines Based on the Time Staff Spent With the Patient

Under this model, the level of service would be determined based on the amount of time hospital staff spent with a patient. The underlying assumption is that staff time spent with the patient is an appropriate proxy for total hospital resource consumption. In this model, if only baseline care (as described above) were provided, a Level 1 service would be reported. Higher levels of service would be reported based on increments of staff time beyond baseline care. For example, Level 2 could be reported for 11 to 20 minutes beyond baseline care, and Level 3 could be reported for 21 to 30 minutes beyond baseline care. This model is simple, correlates with total hospital resource use, and provides an objective standard for all hospitals to follow. However, we observed that this model would require additional, potentially burdensome documentation of staff time, could provide an incentive to work slowly or use less efficient personnel, and has the potential for upcoding and gaming.

3. Guidelines Based on a Point System Where a Certain Number of Points Are Assigned to Each Staff Intervention Based on the Time, Intensity, and Staff Type Required for the Intervention

In this model, points or weights are assigned to each facility service and/or intervention provided to a patient in the clinic or emergency department. The level of service is determined by the sum of the points for all services/interventions provided. Commenters to the August 9, 2002 proposed rule recommended various approaches to a point system, including point systems that assigned points based on the amount of staff time spent with the patient, the number of activities performed during the visit, and a combination of patient condition and activities performed. A point system would correlate with facility resource consumption and provide an objective standard. In addition, it is not as easily gamed because time-based interventions can be assigned a set number of points. However, we noted that a point system could present a significant burden for hospitals in terms of requiring additional, clinically unnecessary documentation. Point systems that are complex could require dedicated staff to monitor and maintain them.

4. Guidelines Based on Patient Complexity

Several variations were recommended in comments to the August 9, 2002 proposed rule, including assignment of

levels of service based on ICD-9-CM (International Classification of Diseases, Ninth Edition, Clinical Modification) diagnosis codes, based on complexity of medical decision making, or based on presenting complaint or medical problem. The premise for these guideline systems is that many emergency departments follow established protocols based on patients' presenting complaints and/or diagnoses. Therefore, assigning a level of service based on patient diagnosis should correlate with facility resource consumption. These systems may require the use of a coding "grid," which lists more than 100 examples of patient conditions and diagnoses and assigns a level of service to each example. When the patient presents with a condition that does not appear on the grid, the coder must extrapolate from the grid to the individual patient. We expressed concern that these systems are extremely complex, demand significant interpretive work on the part of the coder (who may not have clinical experience), and are subject to variability across hospitals. While no clinically unnecessary documentation would be required because the system is based on diagnoses that are already reported on claims, there is a significant potential for upcoding and gaming.

In the August 9, 2002 OPPTS proposed rule, we also stated that we were concerned about counting separately paid services (for example, intravenous infusions, x-rays, electrocardiograms, and lab tests) as "interventions" or including their associated "staff time" in determining the level of service. We believed that the level of service should be determined by resource consumption that is not otherwise captured in payments for other separately payable services. We are now reconsidering this perspective and will discuss this further in section IX.D. of the preamble of this proposed rule.

In the November 1, 2002 OPPTS final rule, we specified that we would not create new codes to replace existing CPT E/M codes for reporting hospital visits until national guidelines have been developed, in response to commenters who were concerned about implementing code definitions without national guidelines. We noted that an independent panel of experts would be an appropriate forum to develop codes and guidelines that are simple to understand and implement, and that are compliant with the HIPAA requirements. We explained that organizations such as the American Hospital Associations (AHA) and the American Health Information Management Association (AHIMA) had

such expertise and would be capable of creating hospital visit guidelines and providing ongoing education of providers. We also articulated a set of principles that any national guidelines for facility visit coding should satisfy, including that coding guidelines should be based on facility resources, should be clear to facilitate accurate payments and be usable for compliance purposes and audits, should meet the HIPAA requirements, should only require documentation that is clinically necessary for patient care, and should not facilitate upcoding or gaming. We stated that the distribution of codes should result in a normal curve. We concluded that we believed the most appropriate forum for development of code definitions and guidelines was an independent expert panel that would make recommendations to CMS.

The AHA and AHIMA originally supported the ACEP model for emergency visit coding, but we expressed concern that the ACEP guidelines allowed counting of separately payable services in determining a service level, which could result in the double counting of hospital resources in establishing visit payment rates and payment rates for those separately payable services. Subsequently, on their own initiative, the AHA and AHIMA formed an independent expert panel, the Hospital Evaluation and Management Coding Panel, comprised of members with coding, health information management, documentation, billing, nursing, finance, auditing, and medical experience. This panel included representatives from the AHA, AHIMA, ACEP, Emergency Nurses Association, and American Organization of Nurse Executives. CMS and AMA representatives observed the meetings. On June 24, 2003, the AHA and AHIMA submitted their recommended guidelines, hereafter referred to as the AHA/AHIMA guidelines, for reporting three levels of hospital clinic and emergency visits and a single level of critical care services to CMS, with the hope that CMS would publish the guidelines in the CY 2004 proposed rule. The AHA and AHIMA acknowledged that "continued refinement will be required as in all coding systems. The Panel * * * looks forward to working with CMS to incorporate any recommendations raised during the public comment period" (AHA/AHIMA guidelines report, page 9). The AHA and AHIMA indicated that the guidelines were field-tested several times by panel members at different stages of their development.

The guidelines are based on an intervention model, where the levels are determined by the numbers and types of interventions performed by nursing or ancillary hospital staff. Higher levels of services are reported as the number and/or complexity of staff interventions increase.

Although we did not publish the guidelines, the AHA and AHIMA released the guidelines through their Web sites. Consequently, we received numerous comments from providers and associations, some in favor and some opposed to the guidelines. We undertook a critical review of the recommendations from the AHA and AHIMA and made some modifications to the guidelines based on comments we received from outside hospitals and associations on the AHA/AHIMA guidelines, clinical review, and changing payment policies in the OPPTS regarding some separately payable services.

In an attempt to validate the modified AHA/AHIMA guidelines and examine the distribution of services that would result from their application to hospital clinic and emergency visits paid under the OPPTS, we contracted a study that began in September 2004 and concluded in September 2005 to retrospectively code, under the modified AHA/AHIMA guidelines, hospital visits by reviewing hospital visit medical chart documentation gathered through the Comprehensive Error Rate Testing (CERT) work. While a review of documentation and assignment of visit levels based on the modified AHA/AHIMA guidelines to 12,500 clinic and emergency visits was initially planned, the study was terminated after a pilot review of only 750 visits. The contractor identified a number of elements in the guidelines that were difficult for coders to interpret, poorly defined, nonspecific, or regularly unavailable in the medical records. The contractor's coders were unable to determine any level for about 25 percent of the clinic cases and about 20 percent of the emergency cases reviewed. The only agreement observed between the levels reported on the claims and levels according to the modified AHA/AHIMA guidelines was the classification of Level 1 services, where the review supported the level on the claims 54-70 percent of the time. In addition, the vast majority of the clinic and emergency visits reviewed were assigned to Level 1 during the review. Based on these findings, we believed that it was not necessary to review additional records after the initial sample. The contractor advised that multiple terms in the guidelines required clearer definition and believed

that more examples would be helpful. Although we believe that all of the visit documentation for each case was available for the contractor's review, we were unable to determine definitively that this was the case. Thus, there is some possibility that the contractor's assignments would have differed if additional documentation from the medical records was available for the visits. In summary, while testing of the modified AHA/AHIMA guidelines was helpful in illuminating areas of the guidelines that would benefit from refinement, we were unable to draw conclusions about the relationship between the distribution of current hospital reporting of visits using CPT E/M codes that are assigned according to each hospital's internal guidelines and the distribution of coding under the AHA/AHIMA guidelines, nor were we able to demonstrate a normal distribution of visit levels under the modified AHA/AHIMA guidelines.

B. CY 2007 Proposed Coding

As discussed above, the majority of all CPT code descriptors are applicable to both physician and facility resources associated with specific services. However, we believe that CPT E/M codes were defined to reflect the activities of physicians and do not describe well the range and mix of services provided by hospitals during visits of clinic and emergency department patients and critical care encounters. While awaiting the

development of a national set of facility-specific codes and guidelines, we have advised that each hospital's internal guidelines should follow the intent of the CPT code descriptors, in that the guidelines should be designed to reasonably relate the intensity of hospital resources to the different levels of effort represented by the codes.

In the November 1, 2002 OPPS final rule, we specified that we would not create new codes to replace existing CPT E/M codes for reporting hospital visits until national guidelines have been developed, in response to commenters who were concerned about implementing code definitions without national guidelines. While we do not yet have a formal set of guidelines that we believe may be appropriately applied nationally to report different levels of hospital clinic and emergency department visit and to report critical care services, we have made significant progress in developing potential guidelines and, therefore, are proposing for CY 2007 the establishment of HCPCS codes to describe hospital clinic and emergency department visits and critical care services. Prior to our implementation of national guidelines for the new hospital visit HCPCS codes, we are proposing that hospitals may continue to use their existing internal guidelines to determine the visit levels to be reported with these codes. We anticipate that many providers would choose to use their existing guidelines for reporting visits with CPT codes. We

do not expect a substantial workload for a provider that chooses to adjust its guidelines to reflect our proposed policies.

We acknowledge that it can be burdensome for providers to bill G-codes rather than CPT codes. In this case, because current CPT E/M codes do not describe hospital visit resources, we have no alternative other than to create new G-codes. CPT has not yet created clinic and emergency department visit and critical care services codes that describe hospital resource utilization. It is important to note that G-codes may be recognized by other payers.

1. Clinic Visits

For clinic visits, we are proposing five new codes, to replace hospitals' reporting of the CPT clinic visit E/M codes for new and established patients and consultations listed in Table 31. Providers have been reporting five levels of CPT codes through CY 2006, and we believe that it should be fairly easy to crosswalk current internal hospital guidelines to these five proposed new codes. Commenters to prior rules have stated that the hospital resources used for new and established patients to provide a specific level of service are very similar, and that it is unnecessary and burdensome from a coding perspective to distinguish between the two types of visits. The new codes are proposed in Table 32 below.

TABLE 32.—PROPOSED CY 2007 HCPCS CODES TO BE USED TO REPORT CLINIC VISITS

HCPCS code	Short descriptor	Long descriptor
Gxxx1	Level 1 hosp clinic visit	Level 1 hospital clinic visit.
Gxxx2	Level 2 hosp clinic visit	Level 2 hospital clinic visit.
Gxxx3	Level 3 hosp clinic visit	Level 3 hospital clinic visit.
Gxxx4	Level 4 hosp clinic visit	Level 4 hospital clinic visit.
Gxxx5	Level 5 hosp clinic visit	Level 5 hospital clinic visit.

2. Emergency Department Visits

As described above, CPT defines an emergency department as "an organized hospital-based facility for the provision of unscheduled episodic services to patients who present for immediate medical attention. The facility must be available 24 hours a day." Under the OPPS, we have restricted the billing of emergency department CPT codes to services furnished at facilities that meet this CPT definition. Facilities open less than 24 hours a day should not use the emergency department codes.

Sections 1866(a)(1)(I), 1866(a)(1)(N), and 1867 of the Act impose specific obligations on Medicare-participating hospitals and critical access hospitals

that offer emergency services. These obligations concern individuals who come to a hospital's dedicated emergency department (DED) and request examination or treatment for medical conditions, and apply to all of these individuals, regardless of whether or not they are beneficiaries of any program under the Act. Section 1867(h) of the Act specifically prohibits a delay in providing required screening or stabilization services in order to inquire about the individual's payment method or insurance status. Section 1867(d) of the Act provides for the imposition of civil monetary penalties on hospitals and physicians responsible for failing to meet the provisions listed above. These

provisions, taken together, are frequently referred to as the Emergency Medical Treatment and Labor Act (EMTALA). EMTALA was passed in 1986 as part of the Consolidated Omnibus Budget Reconciliation Act of 1985 Pub. L. 99–272 (COBRA).

Section 489.24 of the EMTALA regulations defines "dedicated emergency department" as any department or facility of the hospital, regardless of whether it is located on or off the main hospital campus, that meets at least one of the following requirements: (1) It is licensed by the State in which it is located under applicable State law as an emergency room or emergency department; (2) It is

held out to the public (by name, posted signs, advertising, or other means) as a place that provides care for emergency medical conditions on an urgent basis without requiring a previously scheduled appointment; or (3) During the calendar year immediately preceding the calendar year in which a determination under this section is being made, based on a representative sample of patient visits that occurred during that calendar year, it provides at least one-third of all of its outpatient visits for the treatment of emergency medical conditions on an urgent basis without requiring a previously scheduled appointment.

We believe that every emergency department that meets the CPT definition of emergency department also qualifies as a dedicated emergency department under EMTALA. However, we are aware that there are some departments or facilities of hospitals that meet the definition of a DED under the EMTALA regulations but that do not meet the more restrictive CPT definition of an emergency department. For example, a hospital department or facility that meets the definition of a DED may not be available 24 hours a day, 7 days a week. Nevertheless, hospitals with such departments or facilities incur EMTALA obligations with respect to an individual who presents to the department and requests, or has requested on his or her behalf,

examination or treatment for an emergency medical condition. However, because they do not meet the CPT requirements for reporting emergency visit E/M codes, these facilities must bill clinic visit codes for the services they furnish. We have no way to distinguish in our hospital claims data the costs of visits provided in DEDs that do not meet the CPT definition of emergency department from the costs of clinic visits.

Some hospitals have requested that they be permitted to bill emergency visit codes under the OPSS for services furnished in a facility that meets CPT's definition for reporting emergency visit E/M codes, except that they are not available 24 hours a day. These hospitals believe that their resource costs are more similar to those of emergency departments that meet the CPT definition than they are to the resource costs of clinics. Representatives of such facilities have argued that emergency department visit payments are more appropriate, on the grounds that their facilities treat patients with emergency conditions whose costs exceed the resources reflected in the clinic visit APC payments, even though these emergency departments are not available 24 hours per day. In addition, these hospital representatives indicated that their facilities have EMTALA obligations and should, therefore, be able to receive

emergency visit payments. While these emergency departments may provide a broader range and intensity of hospital services and require significant resources to assure their availability and capabilities in comparison with typical hospital outpatient clinics, the fact that they do not operate with all capabilities full-time suggests that hospital resources associated with visits to emergency departments or facilities available less than 24 hours a day may not be as great as the resources associated with emergency departments or facilities that are available 24 hours a day and that fully meet the CPT definition.

To determine whether visits to emergency departments or facilities (referred to as Type B emergency departments) that incur EMTALA obligations but do not meet more prescriptive expectations that are consistent with the CPT definition of an emergency department (referred to as Type A emergency departments) have different resource costs than visits to either clinics or Type A emergency departments, for CY 2007 we are proposing a set of five G-codes for use by all entities that meet the definition of a DED under the EMTALA regulations in § 489.24 but that are not Type A emergency departments, as described in Table 33 below. These codes will be called "Type B emergency visit codes."

TABLE 33.—PROPOSED CY 2007 HCPCS CODES TO BE USED TO REPORT EMERGENCY VISITS PROVIDED IN TYPE B EMERGENCY DEPARTMENTS

HCPCS code	Short descriptor	Long descriptor
Gzzz1	Lev 1 hosp type B ED visit.	Level 1 hospital emergency department visit provided in a Type B emergency department. (The ED must meet at least one of the following requirements: (1) It is licensed by the State in which it is located under applicable State law as an emergency room or emergency department; (2) It is held out to the public (by name, posted signs, advertising, or other means) as a place that provides care for emergency medical conditions on an urgent basis without requiring a previously scheduled appointment; or (3) During the calendar year immediately preceding the calendar year in which a determination under this section is being made, based on a representative sample of patient visits that occurred during that calendar year, it provides at least one-third of all of its outpatient visits for the treatment of emergency medical conditions on an urgent basis without requiring a previously scheduled appointment).
Gzzz2	Lev 2 hosp type B ED visit.	Level 2 hospital emergency department visit provided in a Type B emergency department. (The ED must meet at least one of the following requirements: (1) It is licensed by the State in which it is located under applicable State law as an emergency room or emergency department; (2) It is held out to the public (by name, posted signs, advertising, or other means) as a place that provides care for emergency medical conditions on an urgent basis without requiring a previously scheduled appointment; or (3) During the calendar year immediately preceding the calendar year in which a determination under this section is being made, based on a representative sample of patient visits that occurred during that calendar year, it provides at least one-third of all of its outpatient visits for the treatment of emergency medical conditions on an urgent basis without requiring a previously scheduled appointment).

TABLE 33.—PROPOSED CY 2007 HCPCS CODES TO BE USED TO REPORT EMERGENCY VISITS PROVIDED IN TYPE B EMERGENCY DEPARTMENTS—Continued

HCPCS code	Short descriptor	Long descriptor
Gzzz3	Lev 3 hosp type B ED visit.	Level 3 hospital emergency department visit provided in a Type B emergency department. (The ED must meet at least one of the following requirements: (1) It is licensed by the State in which it is located under applicable State law as an emergency room or emergency department; (2) It is held out to the public (by name, posted signs, advertising, or other means) as a place that provides care for emergency medical conditions on an urgent basis without requiring a previously scheduled appointment; or (3) During the calendar year immediately preceding the calendar year in which a determination under this section is being made, based on a representative sample of patient visits that occurred during that calendar year, it provides at least one-third of all of its outpatient visits for the treatment of emergency medical conditions on an urgent basis without requiring a previously scheduled appointment).
Gzzz4	Lev 4 hosp type B ED visit.	Level 4 hospital emergency department visit provided in a Type B emergency department. (The ED must meet at least one of the following requirements: (1) It is licensed by the State in which it is located under applicable State law as an emergency room or emergency department; (2) It is held out to the public (by name, posted signs, advertising, or other means) as a place that provides care for emergency medical conditions on an urgent basis without requiring a previously scheduled appointment; or (3) During the calendar year immediately preceding the calendar year in which a determination under this section is being made, based on a representative sample of patient visits that occurred during that calendar year, it provides at least one-third of all of its outpatient visits for the treatment of emergency medical conditions on an urgent basis without requiring a previously scheduled appointment).
Gzzz5	Lev 5 hosp type B ED visit.	Level 5 hospital emergency department visit provided in a Type B emergency department. (The ED must meet at least one of the following requirements: (1) It is licensed by the State in which it is located under applicable State law as an emergency room or emergency department; (2) It is held out to the public (by name, posted signs, advertising, or other means) as a place that provides care for emergency medical conditions on an urgent basis without requiring a previously scheduled appointment; or (3) During the calendar year immediately preceding the calendar year in which a determination under this section is being made, based on a representative sample of patient visits that occurred during that calendar year, it provides at least one-third of all of its outpatient visits for the treatment of emergency medical conditions on an urgent basis without requiring a previously scheduled appointment).

For CY 2007, we also are proposing to create five G-codes to be reported by the subset of provider-based emergency departments or facilities of the hospital, called Type A emergency departments, that are available to provide services 24 hours a day, 7 days per week and meet one or both of the following requirements related to the EMTALA definition of DED, specifically: (1) It is licensed by the State in which it is located under the applicable State law as an emergency room or emergency department; or (2) It is held out to the public (by name, posted signs, advertising, or other means) as a place that provides care for emergency medical conditions on an urgent basis without requiring a previously scheduled appointment. These codes will be called “Type A emergency visit codes” and would replace hospitals’ current reporting of the CPT emergency department visit E/M codes listed in

Table 33. Our intention is to allow hospital-based emergency departments or facilities that are currently appropriately reporting CPT emergency department visit E/M codes to bill these new Type A emergency visit codes. We believe that this proposed definition of Type A emergency departments will neither narrow nor broaden the group of emergency departments or facilities that may bill the Type A emergency visit codes in comparison with those that are currently correctly billing CPT emergency department visit E/M codes. Rather, we are refining and clarifying the definition for use in the hospital context. We believe that because the concepts employed in the definition of a DED for EMTALA purposes are already familiar to hospitals, it is appropriate to employ those concepts, rather than the concepts employed in the CPT definition of emergency department, for purposes of defining

these new G-codes. As we have previously noted, the CPT codes were defined to reflect the activities of physicians and do not always describe well the range and mix of services provided by hospitals during visits of emergency department patients. We believe that these new codes that we are proposing for reporting emergency visits to Type A emergency departments are more specific to the hospital context. For example, one feature that distinguishes Type A hospital emergency departments from other departments of the hospital is that Type A emergency departments do not generally provide scheduled care, but rather regularly operate to provide immediately available unscheduled services.

The new codes that we are proposing for CY 2007 are listed in Table 34 below.

TABLE 34.—PROPOSED CY 2007 HCPCS CODES TO BE USED TO REPORT EMERGENCY VISITS PROVIDED IN TYPE A EMERGENCY DEPARTMENTS

HCPCS code	Short descriptor	Long descriptor
Gyyy1	Lev 1 hosp type A ED visit.	Level 1 hospital emergency visit provided in a Type A hospital-based facility or department. (The facility or department must be open 24 hours a day, 7 days a week and meets at least one of the following requirements: (1) It is licensed by the State in which it is located under applicable State law as an emergency room or emergency department; or (2) It is held out to the public (by name, posted signs, advertising, or other means) as a place that provides care for emergency medical conditions on an urgent basis without requiring a previously scheduled appointment).
Gyyy2	Lev 2 hosp type A ED visit.	Level 2 hospital emergency visit provided in a Type A hospital-based facility or department. (The facility or department must be open 24 hours a day, 7 days a week and meets at least one of the following requirements: (1) It is licensed by the State in which it is located under applicable State law as an emergency room or emergency department; or (2) It is held out to the public (by name, posted signs, advertising, or other means) as a place that provides care for emergency medical conditions on an urgent basis without requiring a previously scheduled appointment).
Gyyy3	Lev 3 hosp type A ED visit.	Level 3 hospital emergency visit provided in a Type A hospital-based facility or department. (The facility or department must be open 24 hours a day, 7 days a week and meets at least one of the following requirements: (1) It is licensed by the State in which it is located under applicable State law as an emergency room or emergency department; or (2) It is held out to the public (by name, posted signs, advertising, or other means) as a place that provides care for emergency medical conditions on an urgent basis without requiring a previously scheduled appointment).
Gyyy4	Lev 4 hosp type A ED visit.	Level 4 hospital emergency visit provided in a Type A hospital-based facility or department. (The facility or department must be open 24 hours a day, 7 days a week and meets at least one of the following requirements: (1) It is licensed by the State in which it is located under applicable State law as an emergency room or emergency department; or (2) It is held out to the public (by name, posted signs, advertising, or other means) as a place that provides care for emergency medical conditions on an urgent basis without requiring a previously scheduled appointment).
Gyyy5	Lev 5 hosp type A ED visit.	Level 5 hospital emergency visit provided in a Type A hospital-based facility or department. (The facility or department must be open 24 hours a day, 7 days a week and meets at least one of the following requirements: (1) It is licensed by the State in which it is located under applicable State law as an emergency room or emergency department; or (2) It is held out to the public (by name, posted signs, advertising, or other means) as a place that provides care for emergency medical conditions on an urgent basis without requiring a previously scheduled appointment).

3. Critical Care Services

For critical care services, we are proposing two new codes, to replace hospitals' reporting of the CPT E/M

critical care codes listed in Table 31.

Providers have been reporting two CPT codes through CY 2006, and we believe that it should be fairly easy to crosswalk

current internal hospital guidelines to these two new proposed codes. The proposed new codes are listed in Table 35 below.

TABLE 35.—PROPOSED CY 2007 HCPCS CODES TO BE USED TO REPORT CRITICAL CARE SERVICES

HCPCS code	Short descriptor	Long descriptor
Gccc1	Hosp critical care, 30–74 min	Hospital critical care services, first 30–74 minutes.
Gccc2	Hosp critical care, add 30 min	Hospital critical care services, each additional 30 minutes.

C. CY 2007 Proposed Payment Policy

Since the implementation of the OPPS, outpatient visits provided by hospitals have been paid at three payment levels for both clinic and emergency department visits, even though hospitals have been reporting five resource-based coding levels of clinic and emergency department visits using CPT E/M codes. Critical care services have been paid at one level, with separate payment for the first 30 to 74 minutes of care and bundling of payment for all additional 30 minute

increments of critical care services into payment for the first 30–74 minutes. If the critical care service is less than 30 minutes in duration, then it is to be billed as either a clinic visit or an emergency visit CPT code. Because the three payment rates for clinic and emergency department visits are based on five levels of CPT codes as listed in Table 31, in general the two lowest levels of CPT codes (1 and 2) are assigned to the low-level visit APCs and the two highest levels of CPT codes (4 and 5) are assigned to the high-level visit APCs, with the single middle CPT

level CPT code (3) assigned to the mid-level visit APCs. Hospital claims data indicate that the cost of providing a visit of the same level is generally significantly higher for emergency visits in comparison with clinic visits, with the differential increasing at higher levels of services.

Based upon CY 2005 claims data processed through December 31, 2005, the median costs of clinic visit, emergency visit, and critical care APCs as configured for CY 2006 are listed below.

TABLE 36.—MEDIAN COSTS OF CLINIC AND EMERGENCY VISIT AND CRITICAL CARE APCs AS CONFIGURED FOR CY 2006

APC title	APC median	Levels of CPT codes assigned to APC
Clinic Visits		
Low Level Clinic Visits	\$53.94	Level 1 Clinic Visit, Level 2 Clinic Visit.
Mid Level Clinic Visits	63.73	Level 3 Clinic Visit.
High Level Clinic Visits	91.27	Level 4 Clinic Visit, Level 5 Clinic Visit.
Emergency Department Visits		
Low Level Emergency Visits	76.43	Level 1 ED Visit, Level 2 ED Visit.
Mid Level Emergency Visits	133.98	Level 3 ED Visit.
High Level Emergency Visits	237.17	Level 4 ED Visit, Level 5 ED Visit.
Critical Care Services		
Critical Care	495.16	Critical care, first hour.

Historical hospitals claims data, however, have generally reflected significantly different median costs for the two levels of services assigned to the low and high level visit APCs. While the median costs of these services do not violate the 2 times rule within their assigned APCs, this may not be the most accurate method of payment for these very common hospital levels of visits which clearly demonstrate differential hospital resources. In particular, because of the relatively low volume of

the highest levels of services in the clinic and emergency department, our payment rates may be especially low. Therefore, we are proposing five payment levels for clinic and emergency visits and one payment level for critical care services.

As discussed in the previous section, we are proposing to create 17 new G-codes to replace the CPT E/M codes that hospitals are currently billing to report visits and critical care services. To determine appropriate payment rates for

the new G-codes, we are proposing to map the data from the CY 2005 CPT E/M codes and other HCPCS codes currently assigned to the clinic visit APCs to 11 new APCs, 5 for clinic visits, 5 for emergency visits, and 1 for critical care services as shown in Table 37 to develop median costs for these APCs. We mapped the CPT E/M codes and other HCPCS codes to the new APCs based on median costs and clinical considerations.

Level 5 Type A Emergency Visits	0616	99285	Emergency department visit
Critical Care	0617	99291	Critical care, first hour

BILLING CODE 4120-01-C

In the case of the CPT E/M codes for emergency visits, the assignment of data from a single visit code to the new Type

A Emergency Visit APC of the same level was straightforward. Similarly, the assignment of data from the only separately payable critical care CPT

code to the new APC for critical care services was clear-cut. However, in some cases of the data for CPT clinic visit E/M codes, we assigned a code to

an appropriate clinic visit APC level based upon resource and clinical homogeneity considerations, and that APC assignment did not correspond to the visit level described by the code. For example, CPT 99213 is a level 3 clinic visit code for an established patient, which would seem to logically map to the Level 3 Clinic Visit APC. However, because CPT 99213 has a median cost of \$63.04, it maps more appropriately to the Level 2 Clinic Visit APC, which has an overall median cost of \$62.12. In general, CPT codes for established patient visits had lower median costs than new patient visit or consultation codes of the same E/M level, and that variability is reflected in their respective proposed APC data assignments for CY 2007. We believe that in CY 2007, when hospitals utilize their own internal

guidelines to report clinic visits, without codes that differentiate among new, established, or consultation visits, they will report G-code levels that reflect their resources used. We expect that payments provided for G-codes of each level, based upon the CY 2005 claims data assignments as listed in Table 38, would provide appropriate resource-based payments for visits reported at each level.

After the CY 2005 CPT E/M codes and other HCPCS codes were mapped to an appropriate new APC as shown in Table 38, the next step required was to assign an APC to each new G-code for which no data were available. We assigned these 16 new separately payable G-codes to an appropriate APC level based on the code level alone as shown in Table 38. For example, both the Level 1

Hospital Clinic Visit and Level 1 Hospital Type B ED visit codes are mapped to the Level 1 Hospital Clinic Visit APC, 0604. Similarly, the Level 1 Hospital Type A ED visit code is mapped to the Level 1 Type A Emergency Visit APC, 0609. We expect that this configuration would provide appropriate resource-based payments for visits reported at each level. We are proposing to assign status indicator "B" to the CPT E/M codes for CY 2007, with no APC assignment, because we are proposing new G-codes for the OPPIs for CY 2007, as delineated in Table 38. Table 38 also removes codes that were deleted by CPT for CY 2007, and only includes codes that would be effective under the OPPIs for CY 2007.

BILLING CODE 4120-01-C

We are proposing to map the five new clinic visit G-codes to the five new Clinic Visit APCs, 0604, 0605, 0606, 0607, and 0608. We are proposing to assign the five new Type A emergency visit codes for services provided in a Type A emergency department to the five new Type A Emergency Visit APCs, 0609, 0613, 0614, 0615, and 0616. For CY 2007, we are proposing to assign the five new Type B emergency visit codes for services provided in a Type B emergency department to the five new Clinic Visit APCs, 0604, 0605, 0606, 0607, and 0608.

This payment policy for Type B emergency visits is similar to our

current policy which requires services furnished in emergency departments that have an EMTALA obligation but do not meet the CPT definition of emergency department to be reported using CPT clinic visit E/M codes, resulting in payments based upon clinic visit APCs. As mentioned above, CPT requires an emergency department to be open 24 hours per day in order for it to be eligible to bill emergency department E/M codes. While maintaining the same payment policy for Type B emergency department visits in CY 2007, the reporting of specific G-codes for emergency visits provided in Type B emergency departments will permit us to specifically collect and analyze the

hospital resource costs of visits to these facilities in order to determine in the future whether a proposal of an alternative payment policy may be warranted. This approach to more refined data collection is similar to our approach to drug administration services under the OPPS over the past several years. We collected hospital claims data for specific detailed services using CPT and HCPCS codes for CYs 2005 and 2006, while making payments based on claims data available to us for the less specific HCPCS codes billed by hospitals prior to CY 2005. We recognize that reporting specific drug administration services for which hospitals received no separate or

additional payments created some additional administrative burden on hospitals for a period of time, but the resource information collected through the claims submissions has been critical to the development of our proposal of more refined drug administration payment policies. The hospital claims data based upon the CY 2005 drug administration coding structure now form the foundation of our CY 2007 proposal for drug administration services as described in section VIII.C. of the preamble to this proposed rule.

Although we believe that our proposed payment policy for CY 2007 for Type B emergency department visits is consistent with our past policy regarding visits to emergency departments that do not meet the CPT definition of an emergency department, we are interested in public comments regarding this policy. The OPSS rulemaking cycle for CY 2009 will be the first year that we will have cost data for these new Type B emergency department HCPCS codes available for analysis. In the interim, we are particularly concerned with ensuring that necessary emergency department services are available to rural Medicare beneficiaries. We recognize that rural emergency departments may be disproportionately likely to offer essential emergency department services less than 24 hours per day, 7 days a week because of the limited demand for those services and the high costs and inefficiencies associated with providing full emergency department availability during times when few patients are present for emergency care. We believe that our OPSS payment policies for Type A and Type B emergency visits should support the ability of hospitals to provide their communities with essential and appropriate emergency department services efficiently and effectively. We also believe that the payment policies should present no payment incentive for hospitals to provide necessary emergency services less than 24 hours per day, 7 days per week, which could result in limited access to emergency services for Medicare beneficiaries, thereby leading to adverse effects on their health.

We are proposing to map code Gccc1, the new proposed hospital critical care services code for the first 30–74 minutes of care, to the proposed new Critical Care APC 0617. We are proposing to assign status indicator “N” to proposed HCPCS code Gccc2, to indicate that the code is packaged, as the predecessor code to Gccc2 was also packaged.

D. CY 2007 Proposed Treatment of Guidelines

1. Background

As described in section IX.A. of the preamble of this proposed rule, since April 7, 2000 we have instructed hospitals to report facility resources for clinic and emergency department outpatient hospital visits using the CPT E/M codes and to develop internal hospital guidelines for reporting the appropriate visit level. In the CY 2003 OPSS final rule with comment period, we noted that an independent panel of experts would be an appropriate forum to develop codes and guidelines. In that final rule with comment period, we also articulated a set of principles that any national guidelines for facility visit coding should satisfy, including that coding guidelines should be based on facility resources, should be clear to facilitate accurate payments and be usable for compliance purposes and audits, should meet the HIPAA requirements, should only require documentation that is clinically necessary for patient care, and should not facilitate upcoding or gaming. We stated that the distribution of codes should result in a normal curve.

Subsequently, as described above, the AHA and AHIMA formed an independent expert panel, the Hospital Evaluation and Management Coding Panel, and submitted the AHA/AHIMA guidelines for reporting three levels of hospital clinic and emergency visits and a single level of critical care services to CMS. The guidelines are based on an intervention model, where the levels are determined by the numbers and types of interventions performed by nursing or ancillary hospital staff. We undertook a critical review of the recommendations and made some modifications to the guidelines based on comments we received from outside hospitals and associations, clinical review, and changing payment policies in the OPSS regarding some separately payable services. In addition, as previously stated, we contracted a study to retrospectively code, under the modified AHA/AHIMA guidelines, hospital visits by reviewing hospital visit medical chart documentation gathered through CERT work. In summary, while the testing of the modified AHA/AHIMA guidelines was helpful in illuminating areas of the guidelines that would benefit from refinement, we were unable to draw conclusions about the relationship between the distribution of current hospital reporting of visits using CPT E/M codes that are assigned according to each hospital's internal guidelines and

the distribution of code levels under the AHA/AHIMA guidelines, nor were we able to demonstrate a normal distribution of visit levels under the modified AHA/AHIMA guidelines.

Despite the inconclusive findings from the validation study, after reviewing the AHA/AHIMA guidelines, as well as approximately a dozen other guidelines for outpatient visits submitted by various hospitals and hospital associations, we believe that the AHA/AHIMA guidelines are the most appropriate and well-developed guidelines for use in the OPSS of which we are aware. Our particular interest in these guidelines is based upon the broad-based input into their development, the need for CMS to move definitively to promulgate national outpatient hospital visit coding guidelines in the near future, and full consideration of the characteristics of alternative types of guidelines. We also think that hospitals will react favorably to guidelines developed and supported by the AHA and AHIMA, national organizations that have great interest in hospital coding and payment issues and possess significant medical, technical and practical expertise due to their broad membership, which includes hospitals and health information management professionals. Anecdotally, we have been told that a number of hospitals are successfully utilizing the AHA/AHIMA guidelines to report levels of hospital visits. However, other organizations have expressed concern that the AHA/AHIMA guidelines may result in a significant redistribution of hospital visits to higher levels, reducing the ability of the OPSS to discriminate among the hospital resources required for various different levels of visits. We, too, remain concerned about the potential redistributive effect on OPSS payments for other services or among levels of hospital visits when national guidelines for outpatient visit coding are adopted. We recognize that there may be difficulty crosswalking historical hospital claims data from current CPT E/M codes reported based on individual internal hospital guidelines to payments for any new coding system developed, in order to provide appropriate payment levels for hospital visits reported based on national guidelines in the future.

There are several types of problems with the AHA/AHIMA guidelines that have been identified based upon extensive staff review and contractor use of the guidelines during the validation study. We believe the AHA/AHIMA guidelines require short-term refinement prior to their full adoption by the OPSS, as well as continued refinement over time after their

implementation. Our modified version of the AHA/AHIMA guidelines provides some possibilities for addressing certain issues. Our eight general areas of concern regarding the AHA/AHIMA model are listed below. In addition, we have posted to the CMS Web site both the original AHA/AHIMA guidelines and our modified draft version, and we are seeking public input before we adopt national guidelines. We continue to commit that we will provide a minimum of 6–12 months notice to hospitals prior to implementation of national guidelines to provide sufficient time for providers to make the necessary systems changes and educate their staff.

2. Outstanding Concerns With the AHA/AHIMA Guidelines

a. Three Versus Five Levels of Codes

The AHA/AHIMA guidelines describe three levels of codes for clinic and emergency visits, rather than the five levels of codes that we are proposing for clinic and Type A and Type B emergency visits. It would be impossible to pay at five levels using these guidelines, unless the guidelines were revised. As discussed above, our claims data indicate that five payment levels are justified for both clinic and Type A emergency visits, and, therefore, we are proposing five levels of G-codes so that providers may code at five visit levels and receive payments at five levels as well. In fact, the materials explaining the AHA/AHIMA guidelines state that one of the reasons that the model includes only three coding levels is because CMS only paid at three payment levels. We are now proposing to pay at five payment levels, and if our proposed CY 2007 payment policy is finalized, the AHA/AHIMA guidelines may need to be revised to reflect five visit levels.

b. Lack of Clarity for Some Interventions

Some interventions are vague, unclear, or nonspecific, without sufficient examples of documentation in the medical record that may support those interventions. For instance, it is unclear what documentation for the intervention stated as “Patient registration, room set up, patient use of room, room cleaning” and assigned in the AHA/AHIMA guidelines to a low-level clinic visit would be necessary to support all aspects of that intervention. In another case, the intervention “Frequent monitoring/assessment as evidenced by two sets of vital sign measurements or assessments” that is attributable to a mid-level emergency visit in the guidelines explains that this may include assessment of

cardiovascular, pulmonary, or neurological status. However, it is unclear exactly what coders should look for in the medical record to support this intervention and whether narrative hospital staff descriptions of patient status would be considered to be assessments. These examples, and others, were identified by the contractor engaged in medical chart reviews as part of the guidelines validation study. The AHA/AHIMA guidelines may benefit from revisions to clarify some interventions and/or provide additional examples based upon questions that arose during field testing of the guidelines or that are raised by hospitals reviewing the AHA/AHIMA guidelines and the modified version posted on our Web site.

c. Treatment of Separately Payable Services

CMS and the APC Panel stated that separately payable services should be excluded from the guidelines because of their concern over the potential for double payment for hospital resources attributed to visit services when those resources were actually used to provide the separately payable services. Consistent with this policy, at the time of their development the AHA/AHIMA guidelines excluded all services separately payable under the OPPI from the list of interventions. For policy consistency, in our modified draft version of the guidelines, we removed interventions that have now become separately payable under the OPPI through CY 2006, such as bladder catheterizations and some wound care services. However, upon further reflection as we move forward to implement national guidelines, we are open to reconsidering whether the inclusion of some separately payable services in guidelines to determine visit levels could serve as a proxy for the resources that the patient will consume and that should be attributable to the hospital visit, not the separately payable services. In such cases, consideration of separately payable services in reporting visit levels may not result in double payment for components of those separately payable services. There may be hospital resources used in visits that are not captured in the AHA/AHIMA guidelines’ limited number of interventions that are not separately payable. We believe that, in general, a patient with high medical acuity will consume more hospital resources in the visit than a patient with moderate acuity. However, when separately payable interventions are removed from the model, it may be difficult for the limited interventions remaining in the

guidelines for each visit level to capture the acuity level of the patient. In addition, the list of HCPCS codes that are packaged can change annually. For example, in the CY 2006 OPPI, bladder catheterization services, which had been packaged in prior years, were first made separately payable. If the guidelines strictly excluded all separately payable services, then the guidelines could also change from year to year, possibly requiring additional education of hospital staff on an annual basis. An extremely ill emergency department patient who may need a significant number of separately payable procedures, but only one or two minor interventions that are not separately payable, may require significant time and attention from hospital staff that is unrelated to the hospital resources generally required for the separately payable procedures. The guidelines may indicate that a low level emergency department visit code should be billed, while in fact the patient may require significantly more hospital resources than a mildly ill patient who received the same two minor interventions. We are open to further discussion and welcome public comments on the exclusion of separately payable services from the national visit guidelines and whether their inclusion could pose a risk of attributing the same hospital resources to both visits and separately payable services, potentially resulting in duplicate payments for those resources.

d. Some Interventions Appear Overvalued

Several interventions that we believe may be minor are valued at a high level in the guidelines. This could result in visits with relatively less resource intensive interventions being coded as high level visits, leading to an overall visit distribution that was skewed toward the high end. Claims data then would fail to reflect the differential hospital resources associated with hospital visits of five levels. For example, the AHA/AHIMA guidelines consider oxygen administration, described as initiation and/or adjustment from a baseline oxygen regimen, to be a mid level emergency department intervention, while we believe that the associated hospital resources could be more consistent with its characterization as a low level emergency department intervention. In another example, the AHA/AHIMA guidelines consider specimen collection(s), other than venipuncture and other separately payable services, to be a mid level clinic intervention, while we believe this may be more consistent with other low level clinic

interventions, depending upon the numbers and types of different specimens collected. We encourage specific comments on the levels assigned to various interventions in the guidelines, with the goal of differentiating five levels of services in a normal distribution, based on their respective hospital resources.

e. Concerns of Specialty Clinics

The AHA/AHIMA guidelines are unlikely to sufficiently address the concerns of various specialty clinics (for example, pain management clinics, oncology clinics, and wound care centers). Anecdotally, we have heard that the interventions listed in the AHA/AHIMA guidelines do not include many of the interventions commonly performed in specialty clinics and that some of the interventions in the guidelines would never be performed in certain types of clinics. Currently, each provider has its own set of guidelines, and we believe that some specialty clinics have customized guidelines to facilitate coding their visits at different levels based upon the specific hospital resources commonly used in visits to their clinics. While we prefer to have one model that can be applied nationally to each level of clinic visit code for which we make a specific OPPS payment, we are unsure as to whether one model can adequately characterize visit levels for all types of clinics. For example, we have been told that the most appropriate proxy for facility resource consumption in cancer care is staff time due to the intensive staff interactions required to care for patients with cancer, regardless of the reasons for their clinic visits. We are interested in comments regarding the feasibility of applying national guidelines to specialty clinic visits while ensuring appropriate OPPS payments for those services and suggestions for revisions to the guideline models posted that could improve their utility in reporting such visits.

f. Americans With Disabilities Act

We are concerned that the AHA/AHIMA guidelines' intervention related to the special needs of certain patients may be in violation of the Americans with Disabilities Act, as it may increase the visit level reported, thereby increasing a patient's copayment. Even if additional hospital resources are required to treat patients with disabilities, patients must not have additional financial liability for those services based on their disabilities.

g. Differentiation Between New and Established Patients, and Between Standard Visits and Consultations

The AHA/AHIMA guidelines do not differentiate between new versus established patients or consultations versus standard visits for clinic visits. During the summer 2002 APC Panel meeting, the APC Panel recommended that CMS not differentiate among visit types, specifically new, established, and consultation visits, for the purposes of clinic visit facility coding. Therefore, in the August 9, 2002 OPPS proposed rule, we proposed to accept the APC Panel's recommendation to create five new G-codes to replace the CPT new and established clinic visit and consultation E/M codes. We did not finalize the codes for CY 2003 because of concerns then about creating new G-codes without national guidelines.

During CY 2006 and earlier, there has not been a payment difference between new and established patient visits of the same level, as generally both were mapped to the same APC. The information describing the AHA/AHIMA guidelines indicates that only one set of guidelines was developed for five levels of codes for clinic visits, regardless of a patient's status as a new or established patient or the provision of a consultation visit. This approach may have been related to the lack of a payment differential for different types of clinic visits of the same level under the OPPS when those guidelines were developed. However, several years of hospital claims data regarding the median costs of the specific CPT clinic visit E/M codes consistently indicate that new patients generally are more resource intensive than existing patients across all visit levels, and that consultations are more resource intensive than standard visits. For example, based upon CY 2005 claims used by the OPPS for CY 2007 ratesetting, CPT code 99213, the level 3 clinic visit code for established patients, has a median cost of \$63.04. CPT code 99203, the level 3 clinic visit code for new patients, has a median cost of \$74.12. CPT code 99243, the level 3 consultation visit code, has a median cost of \$84.14. Finally, CPT code 99273, the level 3 confirmatory consultation visit code which was deleted for CY 2006, had a median cost of \$100.77. We encourage public comments that discuss the potential differences in hospital clinic resource consumption for new patient visits, established patient visits, and consultations. If there are significant additional hospital resources required to provide new patient visits or consultations, we are unsure whether

the interventions in the AHA/AHIMA guidelines would reliably capture these additional resources.

h. Distinction Between Type A and Type B Emergency Departments

There are no AHA/AHIMA guidelines for the reporting of visits to Type B emergency departments that meet the EMTALA definition of a DED, but do not meet the proposed definition of a Type A emergency department, as discussed above. When the AHA and AHIMA created these guidelines, emergency departments that did not meet the CPT definition of emergency department were instructed to bill CPT clinic visit E/M codes. There was no distinction in reporting between emergency departments that, as DEDs, had an EMTALA obligation but did not meet the CPT definition of emergency department and outpatient hospital clinics that did not provide emergency services. If we finalize our proposal to create new G-codes for CY 2007 for Type B emergency departments to use in reporting visits, in the short run hospitals will use internal guidelines to determine their visit levels for Type B emergency department visits, as they will for visits to both clinics and Type A emergency departments. However, with the implementation of national hospital visit guidelines we will need to specify those guidelines to be used for the purposes of Type B emergency visit reporting. The AHA and AHIMA have not yet had the opportunity to consider the issue of Type B emergency visit reporting in their guidelines, and we welcome public comments to provide additional perspectives on the appropriate guidelines for reporting visit levels in these Type B emergency departments.

The public comments that we receive on this guidelines section of this proposed rule will be publicly available to the AHA and AHIMA and their expert panel, along with comments that we receive on the two versions of the guidelines posted on our Web site. We hope to receive input from them over the upcoming months to address the eight areas of concern that are discussed above, as well as other issues brought to our attention by the public. We understand that some issues will not be able to be fully addressed by their expert panel until we finalize our CY 2007 payment policies for visits in the OPPS. We plan to communicate progress on the development of OPPS visit guidelines through updates to the OPPS Web site, and we may post other versions of draft guidelines in order to solicit additional public input during CY 2007. When we post additional

materials to the web for purposes of providing information or soliciting further comments regarding national guidelines, we will update the public through all means practically available to us, including communications with professional associations, list-serves, etc. While we understand the interest of some hospitals in our moving quickly to promulgate national guidelines that will assure standardized reporting of outpatient hospital visit levels, we believe that the issues we have identified and others that may arise are important and require serious consideration prior to the implementation of national guidelines. Because of our commitment to provide hospitals with 6–12 months notice prior to implementation of national guidelines, we expect that we will not implement national guidelines prior to CY 2008. We acknowledge that, once implemented, the guidelines will require periodic review and updating based on factors such as changing medical practices, hospital experiences in reporting the codes, new payment policies under the OPPS, and median costs for levels of services calculated from claims data. We are hopeful that the information received from the AHA, AHIMA and others on such reviews would permit us to effectively, and in a timely manner, address emerging guideline implementation issues, as well as develop desirable future modifications to the guidelines based on hospitals' experiences reporting commonly provided visits. We believe that this ongoing system should provide the most successful approach to ensuring that OPPS national visit guidelines continue to facilitate consistent and standardized reporting of outpatient hospital visits, in a manner that is resource-based and supportive of appropriate OPPS payments for the efficient and effective provision of visits in hospital outpatient settings.

X. Proposed Payment for Blood and Blood Products

A. Background

(If you choose to comment on issues in this section, please include the caption "Blood and Blood Products" at the beginning of your comment.)

Since the implementation of the OPPS in August 2000, separate payments have been made for blood and blood products through APCs rather than packaging them into payments for the procedures with which they were administered. Hospital payments for the costs of blood and blood products, as well as the costs of collecting, processing, and storing blood and blood products, are made

through the OPPS payments for specific blood product APCs. On April 12, 2001, CMS issued the original billing guidance for blood products to hospitals (Program Transmittal A–01–50). In response to requests for clarification of these instructions, CMS issued Program Transmittal 496 on March 4, 2005. The comprehensive billing guidelines in the Program Transmittal also addressed specific concerns and issues related to billing for blood-related services, which the public had brought to our attention.

In the CY 2000 OPPS, payments for blood and blood products were established based on external data provided by commenters due to limited Medicare claims data. From the CY 2000 OPPS to the CY 2002 OPPS, payment rates for blood and blood products were updated for inflation. For the CY 2003 OPPS, as described in the November 1, 2002 final rule with comment period (67 FR 66773), we applied a special adjustment methodology to blood and blood products that had significant reductions in payment rates from the CY 2002 OPPS to the CY 2003 OPPS, when median costs were first calculated from hospital claims. Using the adjustment methodology, we limited the decrease in payment rates for blood and blood products to approximately 15 percent. For the CY 2004 OPPS, as recommended by the APC Panel, we froze payment rates for blood and blood products at CY 2003 levels as we studied concerns raised by commenters and presenters at the August 2003 and February 2004 APC Panel meetings.

For the CY 2005 OPPS, we established new APCs that allowed each blood product to be assigned to its own separate APC, as several of the previous blood product APCs contained multiple blood products with no clinical homogeneity or whose product-specific median costs may not have been similar. Some of the blood product HCPCS codes were reassigned to the new APCs (Table 34 of the November 15, 2004 final rule with comment period (69 FR 65819)).

We also noted in the November 15, 2004 final rule with comment period, that public comments on previous OPPS rules had stated that the CCRs that were used to adjust charges to costs for blood products in past years were too low. Past commenters indicated that this approach resulted in an underestimation of the true hospital costs for blood and blood products. In response to these comments and APC Panel recommendations from its February 2004 and September 2004 meetings, we conducted a thorough analysis of the CY 2003 claims (used to calculate the CY 2005 APC payment

rates) to compare CCRs between those hospitals reporting a blood-specific cost center and those hospitals defaulting to the overall hospital CCR in the conversion of their blood product charges to costs. As a result of this analysis, we observed a significant difference in CCRs utilized for conversion of blood product charges to costs for those hospitals with and without blood-specific cost centers. The median hospital blood-specific CCR was almost two times the median overall hospital CCR. As discussed in the November 15, 2004 final rule with comment period, we applied a methodology for hospitals not reporting a blood-specific cost center, which simulated a blood-specific CCR for each hospital that we then used to convert charges to costs for blood products. Thus, we developed simulated medians for all blood and blood products based on CY 2003 hospital claims data (69 FR 65816).

For the CY 2005 OPPS, we also identified a subset of blood products that had less than 1,000 units billed in CY 2003. For these low-volume blood products, we based the CY 2005 OPPS payment rate on a 50/50 blend of the CY 2004 OPPS product-specific OPPS median costs and the CY 2005 OPPS simulated medians based on the application of blood-specific CCRs to all claims. We were concerned that, given the low frequency in which these products were billed, a few occurrences of coding or billing errors may have led to significant variability in the median calculation. The claims data may not have captured the complete costs of these products to hospitals as fully as possible. This low-volume adjustment methodology also allowed us to further study the issues raised by commenters and by presenters at the September 2004 APC Panel meeting, without putting beneficiary access to these low-volume blood products at risk.

Overall, median costs from CY 2003 (used for the 2005 OPPS) to CY 2004 (used for the 2006 OPPS) were relatively stable, with a few significant increases and decreases from the CY 2005 adjusted median costs for some specific blood products. For the CY 2006 OPPS, we adopted a payment adjustment policy that limited significant decreases in APC payment rates for blood and blood products from the CY 2005 OPPS to the CY 2006 OPPS to not more than 5 percent. We applied this adjustment to 11 blood and blood product APCs for the CY 2006 OPPS, which we identified in Table 33 of the CY 2006 OPPS final rule with comment period. For the CY 2006 OPPS we set the final median costs for blood and blood products at the

greater of: (1) The simulated median costs calculated from the CY 2004 claims data; or (2) 95 percent of the CY 2005 OPPS adjusted median costs for these products, as reflected in Table 33 published in the CY 2006 OPPS final rule with comment period.

B. Proposed Policy Changes for CY 2007

For the CY 2007 OPPS, we are proposing to establish payment rates for blood and blood products by using the same simulation methodology described in the November 15, 2004 final rule with comment period (69 FR 65816), which utilized hospital-specific actual or simulated CCRs for blood cost centers to convert hospital charges for blood and blood products to costs. We continue to believe that using blood-specific CCRs applied to hospital claims data will result in payments that more fully reflect hospitals' true costs of providing blood and blood products than our general methodology of defaulting to the overall hospital CCR when more specific CCRs are unavailable.

The median costs for blood and blood products in this proposed rule are derived from the CY 2005 claims data and have the benefit of reflecting, in part, the clarifications about reporting that were provided through CMS Program Transmittal 496, which we issued on March 4, 2005. This instruction articulated and clarified many questions that had been raised by hospitals and others about how hospitals should report charges for blood and blood products. These instructions went into effect for services furnished on or after July 1, 2005, and therefore were in effect for the last 6 months of CY 2005. Thus, we expect that the reporting of charges and units for blood and blood products in CY 2005 has improved over past years, especially with respect to hospitals' inclusion of all charges related to the acquisition, processing, and handling of

blood and blood products as specifically described in each of the relevant P-code descriptors. We believe that the median costs for blood and blood products from the CY 2005 claims data reflect this improved reporting of charges and units for these products, particularly with regard to the most commonly furnished blood and blood products.

Of the 34 blood products, median costs per unit (calculated using the simulated blood CCR methodology) rise for 23 of them compared to the CY 2006 final rule with comment period unadjusted median unit costs. These 23 products account for 92.4 percent of all units of blood products furnished in our CY 2005 claims data. As has been the case in the past, the low volume products (which we define as fewer than 1,000 units) show the most volatility. Of the 12 low volume products, 6 products have increases in their unit costs compared to their CY 2006 unadjusted median unit costs, and 6 products show decreases in their median unit costs compared to their CY 2006 unadjusted median unit costs. The low-volume products for which the medians decline compared to their unadjusted median costs in CY 2006 represent only 0.29 percent of the total units of blood products furnished in the CY 2005 OPPS claims data.

Fewer blood products increased in projected costs from CY 2006 to the proposed median costs for CY 2007 because we adjusted the CY 2006 median costs for blood and blood products. Of the 34 blood products, median costs rise for 19 of them compared to the CY 2006 OPPS adjusted median costs on which the CY 2006 payments were based (and which were adjusted to no less than 95 percent of the CY 2005 payment medians). These 19 products accounted for 91.6 percent of all units of blood products furnished in our CY 2005 claims data. Of the 12 low-volume products, 4 show increases in their median unit costs compared to

the CY 2006 OPPS adjusted median unit costs, and 8 show decreases compared to their CY 2006 OPPS adjusted median unit costs. The low-volume products that show a decline in medians compared to their CY 2006 adjusted median costs represent only 0.4 percent of the total units of blood products reflected in the CY 2005 claims data.

We are proposing to set the payment rates for blood and blood products for CY 2007 based on the unadjusted median costs for blood and blood products which are derived from the CY 2005 claims data as we have described. We believe that, in most cases, the unadjusted unit costs developed by this process are valid reflections of the estimated median costs of furnishing these specific blood products, and that no adjustment is required to result in appropriate payments for blood and blood products in CY 2007. Under this proposed policy, based on the CY 2005 claims data, the projected payments would rise for approximately 92 percent of the blood product units paid under OPPS if patterns of furnishing blood products in CY 2007 were similar to those in CY 2005. The low-volume products whose median costs decline compared to their CY 2006 unadjusted median costs are furnished very rarely and by very few providers because, in part, more commonly available products may be used for similar clinical indications. We have no reason to believe that the median costs for low-volume products are not valid reflections of the costs of furnishing these low-volume services, particularly given that so few providers furnish them and it is their claims data that is used to develop the medians. We note, as well, that the median costs of several low-volume blood products show a significant increase for CY 2007. We welcome public comments on this issue.

Displayed in Table 39 is the list of blood product HCPCS codes with their proposed CY 2007 payment medians.

TABLE 39.—PROPOSED CY 2007 PAYMENT MEDIANS FOR BLOOD AND BLOOD PRODUCTS

HCPCS code	SI	APC	Short description	Proposed CY 2007 units	Proposed CY 2007 OPPS median unit cost	CY 2006 unadjusted median cost	CY 2006 adjusted median cost

XI. Proposed OPPS Payment for Observation Services

(If you choose to comment on issues in this section, please include the caption “OPPS: Observation Services” at the beginning of your comment.)

Observation care is a well-defined set of specific, clinically appropriate services that include ongoing short-term treatment, assessment, and reassessment, before a decision can be made regarding whether patients will require further treatment as hospital inpatients or if they are able to be discharged from the hospital. Observation status is commonly assigned to patients with unexpectedly prolonged recovery after surgery and to patients who present to the emergency department and who then require a significant period of treatment or monitoring before a decision is made concerning their next placement.

For CY 2006, we adopted two coding changes that affect how observation services are reported, and we made changes in the OCE to shift from individual providers to the OPPS claims processing systems the determination of whether or not observation services are separately payable or packaged. Observation services reported using HCPSC code G0378 (Hospital observation services, per hour) that are eligible for separate payment map to APC 0339 (Observation). The CY 2006

payment rate for APC 0339 is \$425.08. The proposed CY 2007 median cost for APC 0339 is \$442.16, reflecting relative stability in hospital costs for separately payable observation care. Direct admission to observation (G0379), when separately payable, is currently assigned for payment to APC 0600 (Low Level Clinic Visit) with a CY 2006 payment rate of \$52.37. As discussed below, for CY 2007 we are proposing to assign direct admission to observation, when separately payable, to APC 0604 (Low Level Clinic Visit). The CY 2007 proposed median cost for APC 0604 is \$49.93.

As we stated in the November 10, 2005 OPPS final rule with comment period (70 FR 68688), the changes that we adopted for CY 2006 were intended to ensure more consistent hospital billing for observation services in order to guide our future analyses of payment for observation care and to simplify how observation services are reported and paid. We refer readers to the CY 2006 OPPS final rule with comment period for a detailed discussion of the G-codes for observation services and the OCE logic changes implemented for CY 2006 (70 FR 68688), and to Program Transmittal 787, issued on December 16, 2005, in which we updated Chapter 4, Section 290 of the Medicare Claims Processing Manual (Pub. 100–04) to reflect the CY 2006 changes and to

provide additional guidance to contractors and hospitals.

During the APC Panel’s March 2006 meeting, the Observation Subcommittee did not make any recommendations to the Panel other than to request its review of additional data on observation services at the Panel’s 2007 winter meeting. The APC Panel adopted the Observation Subcommittee’s report and recommended no changes to the criteria for separate payment for observation services or to the coding and payment methodology for observation services.

Therefore, for CY 2007, we are proposing to continue applying the criteria for separate payment for observation services and the coding and payment methodology for observation services that were implemented in CY 2006, with one exception. In section IX. of this preamble, we are proposing changes in coding and payment for clinic and emergency room visits. As part of these proposed changes, low level clinic visits would move from APC 0600 to APC 0604, with a CY 2007 proposed median cost of \$49.93. Under the circumstances where direct admission to observation is separately payable, we are proposing to assign HCPSC code G0379 to APC 0604 consistent with its CY 2006 placement in the APC for Low Level Clinic Visits.

As we stated in Program Transmittal A–02–129 released in January 2003, we

will continue to include in the October quarterly update of the OPPS any changes to the list of ICD-9-CM codes required for separate payment of HCPCS code G0378 resulting from the October 1 annual update of ICD-9-CM codes. The currently applicable ICD-9-CM codes are listed in Table 34 of the CY 2006 OPPS final rule with comment period (70 FR 68692), and any changes to that list will be included in the CY 2007 OPPS final rule with comment period.

XII. Proposed Procedures That Will Be Paid Only as Inpatient Procedures

A. Background

Section 1833(t)(1)(B)(i) of the Act gives the Secretary broad authority to determine the services to be covered and paid for under the OPPS. Before implementation of the OPPS in August 2000, Medicare paid reasonable costs for services provided in the outpatient department. The claims submitted were subject to medical review by the fiscal intermediaries to determine the appropriateness of providing certain services in the outpatient setting. We did not specify in regulations those services that were appropriate to provide only in the inpatient setting and that, therefore, should be payable only when provided in that setting.

In the April 7, 2000 final rule with comment period, we identified procedures that are typically provided only in an inpatient setting and, therefore, would not be paid by Medicare under the OPPS (65 FR 18455). These procedures comprise what is referred to as the "inpatient list." The inpatient list specifies those services that are only paid when provided in an inpatient setting because of the nature of the procedure, the need for at least 24 hours of postoperative recovery time or monitoring before the patient can be safely discharged, or the underlying physical condition of the patient. As we discussed in the April 7, 2000 final rule with comment period (65 FR 18455) and the November 30, 2001

final rule (66 FR 59856), we use the following criteria when reviewing procedures to determine whether or not they should be moved from the inpatient list and assigned to an APC group for payment under the OPPS:

- Most outpatient departments are equipped to provide the services to the Medicare population.
- The simplest procedure described by the code may be performed in most outpatient departments.
- The procedure is related to codes that we have already removed from the inpatient list.

In the November 1, 2002 final rule with comment period (67 FR 66741), we removed 43 procedures from the inpatient list for payment under OPPS. We also added the following criteria for use in reviewing procedures to determine whether they should be removed from the inpatient list and assigned to an APC group for payment under the OPPS:

- We have determined that the procedure is being performed in numerous hospitals on an outpatient basis; or
- We have determined that the procedure can be appropriately and safely performed in an ambulatory surgical center (ASC) and is on the list of approved ASC procedures or proposed by us for addition to the ASC list.

We believe that these additional criteria help us to identify procedures that are appropriate for removal from the inpatient list.

B. Proposed Changes to the Inpatient Only List

(If you choose to comment on issues in this section, please include the caption "Inpatient Only Procedures" at the beginning of your comment.)

For CY 2007 OPPS, we used the same methodology as described in the November 15, 2004 final rule with comment period (69 FR 65835) to identify a subset of procedures currently on the inpatient list that are being

widely performed on an outpatient basis. These procedures were then clinically reviewed for possible removal from the inpatient list. We solicited input from the APC Panel on the appropriateness of the removal of seven procedures from the inpatient list at the March 1, 2006 APC Panel meeting. During CY 2006, we have received no other candidate HCPCS codes for removal from the OPPS inpatient list based on recommendations from the public. The APC Panel recommended that one of the procedures (CPT code 21181, Reconstruction by contouring of benign tumor of cranial bones, extracranial) be removed from the list and that we solicit approval from the relevant physician specialty societies prior to proposing removal of the other procedures.

Consistent with our established policy for removing procedures from the inpatient list, we rely on our utilization data and clinical staff input in determining which procedures are candidates for removal. We believe that our policy of proposing the procedures for removal and soliciting comments from the public, which includes physician specialty societies, is the most appropriate process to receive input from the public on this issue. Rather than solicit approval from a select group (for example, specific physician specialty societies), we believe that solicitation of comments from all interested parties is more consistent with meeting our obligation to the public regarding outpatient services provided by hospitals. The utilization data and clinical review findings for the eight procedures support our proposal to remove them from the inpatient list, and therefore, we are proposing to remove these procedures from the inpatient list and to assign them to clinically appropriate APCs, as shown in Table 40. The changes to the inpatient list would be effective for services furnished on or after January 1, 2007.

TABLE 40.—PROPOSED PROCEDURE CODES TO REMOVE FROM INPATIENT LIST AND PROPOSED APC ASSIGNMENTS, EFFECTIVE JANUARY 1, 2007

HCPCS code	Long descriptor	Proposed new APC assignment	Current status indicator	Proposed new status indicator
16035	Escharotomy; initial incision	0016	C	T
21181	Reconstruction by contouring of benign tumor of cranial bones, extracranial	0254	C	T
22851	Apply spine prosth device	0049	C	T
57292	Construction of artificial vagina; with graft	0195	C	T
57335	Vaginoplasty for intersex state	0195	C	T
61720	Creation of lesion by stereotactic method, including burr holes and localizing and recording techniques, single of multiple stages; globus pallidus or thalamus.	0221	C	T
62000	Elevation of depressed skull fracture; simple extradural	0254	C	T

C. Proposed CY 2007 Payment for Ancillary Outpatient Services When Patient Expires (—CA Modifier)

(If you choose to comment on issues in this section, please include the caption “Ancillary Outpatient Services” at the beginning of your comment.)

1. Background

In the November 1, 2002 final rule with comment period (67 FR 66798), we discussed the creation of a new HCPCS modifier —CA to address situations where a procedure on the OPSS inpatient list must be performed to resuscitate or stabilize a patient (whose status is that of an outpatient) with an emergent, life-threatening condition, and the patient dies before being admitted as an inpatient. In Transmittal A-02-129, issued on January 3, 2003, we instructed hospitals on the use of this modifier when submitting a claim on bill type 13x for a procedure that is on the inpatient list and assigned the payment status indicator (SI) “C” (to indicate inpatient services that are not paid under the OPSS). Conditions to be met for hospital payment for a claim reporting a service billed with modifier —CA include a patient with an emergent, life-threatening condition on whom a procedure on the inpatient list is performed on an emergency basis to resuscitate or stabilize the patient. For CY 2003, a single payment for otherwise payable outpatient services billed on a claim with a procedure appended with this new —CA modifier was made under APC 0977 (New Technology Level VIII, \$1,000–\$1,250), due to the lack of available claims data to establish a payment rate based on historical hospital costs.

As discussed in the November 7, 2003 final rule with comment period, we created APC 0375 (Ancillary Outpatient Services When Patient Expires) to pay for services furnished on the same date as a procedure with SI “C” and billed with the modifier —CA (68 FR 63467) because we were concerned that payment under a New Technology APC would not result in an appropriate payment. Payment under a New Technology APC is a fixed amount that does not have a relative payment weight and, therefore, is not subject to

recalibration based on hospital costs. In the absence of hospital claims data to determine costs, the clinical APC 0375 payment rate for CY 2004 was set at \$1,150, which was the payment amount for the newly structured New Technology APC that replaced APC 0977.

For CYs 2005 and 2006, the payment rates for APC 0375 for services billed on the same date as a “C” status procedure appended with modifier —CA were established in accordance with the same methodology we followed to set payment rates for the other procedural APCs in those years, based on the relative payment weight calculated for APC 0375. For APC 0375 specifically, we calculated the relative payment weight from all claims reporting a “C” status procedure appended with modifier —CA, using charge data from the relevant calendar year claims for line items with a HCPCS code and status indicator “V,” “S,” “T,” “X,” “N,” “K,” “G,” and “H,” in addition to charges for revenue codes without a HCPCS code. We continued to make one payment in CYs 2005 and 2006 under APC 0375 for the services that met the specific conditions discussed in previous rules for using modifier —CA.

In the CY 2006 final rule with comment period (70 FR 68700) we discussed our concern about the large increase in the volume of hospital claims billed with modifier —CA from CY 2003 to CY 2004, growing from 18 to 300 claims over that 1-year time period. We acknowledged that because modifier —CA was first introduced for CY 2003, the use of the modifier in CYs 2003 and 2004 may have reflected such an increase due to hospitals’ learning curve with respect to the modifier’s appropriate use on claims for services payable under the OPSS. We also expressed some concern that numerous claims reflected unanticipated examples of “C” status procedures reported with modifier —CA that may not have been provided to patients with emergency life threatening conditions, where the inpatient procedure was performed on an emergency basis to resuscitate or stabilize the patient. We promised to monitor CY 2005 claims data for similar increases.

Our review of the CY 2005 claims data revealed a decrease in the use of modifier —CA in comparison with CY 2004 claims. In CY 2005 there were only 210 claims submitted reporting modifier —CA. Because of the diverse individual clinical scenarios where modifier —CA may be appropriately reported, we expect some variation from year to year in the number of OPSS claims reporting the modifier. It would appear that the hospital learning curve regarding use of modifier —CA may have been completed over the past 3 year period, and that we may expect relatively consistent reporting of this modifier in future years. We wish to particularly note that not only was there no increase in the number of claims reporting modifier —CA in CY 2005, but there were also far fewer apparently inappropriate instances of use. Our CY 2005 claims data show the majority of reporting of modifier —CA was in association with what were likely to have been urgent interventions, including the insertion of intra-aortic balloon assist devices and exploratory laparotomies. We believe that the data support our speculation that much of the increase in reporting of the modifier observed in CY 2004 data was a result of hospitals’ learning curve regarding the appropriate use of the modifier.

2. Proposed Policy for CY 2007

We do not propose any change to our policies regarding reporting of modifier —CA for CY 2007, or to our payment policy regarding APC 0375. Therefore, for CY 2007, we are proposing that hospitals continue reporting modifier —CA only under circumstances described in section VI. of Transmittal A-02-129, which provided specific billing guidance for the use of modifier —CA. In addition, we are proposing to continue to make one payment under APC 0375 for the services that meet the specific conditions discussed in previous rules for using modifier —CA, based on calculation of the relative payment weight for APC 0375 as described above. We applaud hospitals’ improved billing practices and as before, will continue to monitor use of modifier —CA. The CY 2007 proposed APC 0375 median cost is \$3,539, significantly increased from the \$2,527

median cost proposed in the CY 2006 proposed rule. This variation in median costs, however, is expected because the specific cases that populate the claims data for APC 0375 likely exhibit only limited clinical and resource homogeneity among all the claims attributable to that APC in a given year and across different years for the same APC. The cost variation of APC 0375 from year to year could be expected because APC 0375 is unique in the OPSS and, by its definition, should always be limited in its use.

XIII. Proposed Nonrecurring Policy Changes

A. Removal of Comprehensive Outpatient Rehabilitation Facility (CORF) Services From the List of Services Paid under the OPSS

(If you choose to comment on issues in this section, please include the caption "CORF Services" at the beginning of your comment.)

We are proposing to make a technical change to the regulations at 42 CFR 419.21(d) to remove from the list of services paid under the OPSS certain services furnished by a comprehensive outpatient rehabilitation facility (CORF) when they are provided outside the patient's plan of care (for example, hepatitis B vaccine). Section 1834(k) of the Act, as added by section 4541(a) of Pub. L. 105-33 (BBA), requires that CORF services be paid using the lesser of actual charges or a fee schedule amount. We instructed fiscal intermediaries to use the Medicare Physician Fee Schedule (MPFS) for payments to CORFs. We have not required CORF cost reports, or paid CORFs under the OPSS, since 2001. The proposed revision of the regulation to delete certain CORF services from the list of specified services paid under the OPSS is necessary to conform the regulations to the statutory requirement.

B. Addition of Ultrasound Screening for Abdominal Aortic Aneurysms (AAAs) (Section 5112 of Pub. 109-171 (DRA))

(If you choose to comment on the issues in this section, please include the caption "AAA Screening" at the beginning of your comment.)

1. Background

Section 5112 of the Deficit Reduction Act of 2005, Pub. L. 109-171 (DRA), amended section 1861 and related provisions of the Act to provide for coverage under Part B of ultrasound screening for abdominal aortic aneurysms (AAAs), effective for services furnished on or after January 1, 2007, subject to certain eligibility and other

limitations. The proposed rule governing this new Part B coverage will be established through a separate document, specifically the CY 2007 Medicare Physician Fee Schedule proposed rule. We refer readers to that document for a full and complete explanation of this coverage provision.

2. Proposed Assignment of New HCPCS Code for Payment of Ultrasound Screening for Abdominal Aortic Aneurysm (AAA) (Section 5112)

There is no current CPT code that specifically describes an ultrasound screening for AAA. Therefore, we are proposing to establish the following new HCPCS code, GXXXX (Ultrasound, B-scan and or real time with image documentation; for abdominal aortic aneurysm (AAA) screening) to be used to bill for the new service under both the Medicare Physician Fee Schedule and the OPSS. As required by the statute, Medicare will allow payment for a one-time only screening examination, and this screening test will be available even if the qualifying patient does not present signs or symptoms of disease or illness. In addition, this code does not include any other preventive services that are currently separately covered and paid under the Medicare Part B screening benefits. When these other preventive services are performed, they should be reported using the existing appropriate codes.

We are proposing to base the payment for GXXXX on equivalent hospital resources and intensity to those contained in CPT code 76775, which is assigned to APC 0266 (Level II Diagnostic and Screening Ultrasound) under the OPSS for CY 2007. We believe that the hospital costs associated with the screening study are very similar to those of the limited retroperitoneal ultrasound diagnostic examination and, therefore, that the screening and diagnostic studies should be assigned to the same clinical APC for reasons of clinical and resource homogeneity. Thus, we are proposing to assign GXXXX to APC 0266 with a median cost of \$98.59 for CY 2007.

3. Handling of Comments Received in Response to This Proposal

We noted previously that ultrasound screening for AAAs is also addressed in detail in our proposed rule to update the Medicare Physician Fee Schedule for CY 2007. We will respond to all comments regarding the proposed elements required for the ultrasound screening for AAA, whether the examination is performed in a physician's office or an outpatient hospital setting, and the exception from

the Part B annual deductible, in the final rule implementing the Medicare Physician Fee Schedule for CY 2007. We will respond to all comments regarding payment for GXXXX under the OPSS in the CY 2007 OPSS final rule.

XIV. Emergency Medical Screening in Critical Access Hospitals (CAHs)

(If you choose to comment on issues in this section, please include the caption "CAHs: Emergency Medical Screening" at the beginning of your comment.)

A. Background

Section 1820 of the Act, as amended by section 4201 of the Balanced Budget Act of 1997, provides for the establishment of Medicare Rural Hospital Flexibility Programs (MRHFPs), under which individual States may designate certain facilities as critical access hospitals (CAHs). Facilities that are so designated and meet the CAH conditions of participations (CoPs) under 42 CFR Part 485, Subpart F, will be certified as CAHs by CMS. The MRHFP replaced the Essential Access Community Hospital (EACH)/Rural Primary Care Hospital (RPCH) program.

B. Proposed Policy Change

Existing regulations governing CAHs at § 485.618(d) require on-call doctors and nonphysician practitioners who may be attending to urgent/acute medical problems in other areas of the CAH or outside the CAH to report to the CAH's emergency room within 30 minutes (60 minutes if the CAH is located in a frontier or remote area or permissible under the State's rural health care plan) to see a patient in the emergency room of a CAH. Often, these patients do not have emergency medical conditions. With changes to the regulations at § 489.24 that implement the Emergency Medical Treatment and Labor Act (EMTALA) over the past few years, some practitioners have noted to CMS that the requirements regarding who should respond to calls to see patients who present to the emergency department of a CAH are more stringent than for general hospitals.

The provider community recently requested that we change the emergency on-call personnel requirements for CAHs to conform to the regulatory changes published in the FY 2005 IPPS final rule (69 FR 49271). In response to this request, we are proposing to revise the current CAH CoPs to align the emergency medical screening requirements in CAHs with those applicable to acute care hospitals. The

proposed change would allow registered nurses, in addition to the personnel currently required at § 485.618(d), to serve as qualified medical personnel to screen individuals who present to the CAH emergency room if the nature of the patient's request is within the registered nurse's scope of practice under State law and such screening is permitted by the CAH's bylaws. This proposed change would effectively eliminate the need for a doctor or mid-level practitioner to report to the emergency department to attend to a nonemergent request for medical care if a registered nurse is on site at the CAH and has made a determination that the care needed is of a non-emergent nature.

The EMTALA statute at section 1867 of the Act states that a hospital in this context must provide an appropriate (suitable for the symptoms presented) medical screening examination within the capability of the hospital's emergency department to determine whether or not an emergency medical condition exists (section 1866(a)(1)(I) of the Act imposes the section 1867 requirements on a CAH). The EMTALA regulations at § 489.24(a) state that the examination must be conducted by qualified medical personnel. These qualified medical personnel designated to perform medical screening examinations must be determined qualified by the hospital's bylaws or rules and regulations and must be practicing within the scope of practice under State law.

The regulations at § 489.24(c) relating to the use of dedicated emergency department for nonemergency services were added in September 2003 (68 FR 53262) to state that if an individual goes to a hospital's dedicated emergency department to request medical treatment, and the nature of the request makes it clear that the medical condition is not of an emergency nature, the hospital is required only to perform such screening as would be appropriate to determine that the individual does not have an emergency medical condition.

Although EMTALA also applies to CAHs, the CoP for CAH emergency services (§ 485.618(d)) states that a physician, a physician assistant, a nurse practitioner, or a clinical nurse specialist with training or experience in emergency care must be on call and

available onsite at a CAH within a specified timeframe. These are the CAH personnel who would be available to conduct an emergency medical screening under § 489.24(c). In contrast, the emergency services CoP for acute care hospitals at § 482.55 does not specify the type of personnel who must be available to provide emergency services and who would, therefore, perform assessments and screenings. The regulation states only that the services must be organized and supervised under the direction of a qualified member of the medical staff. Therefore, an acute care hospital may, if it chooses, have protocols that permit a registered nurse to conduct specific emergency medical screenings if the nature of the individual's request for examination and treatment is within the scope of practice of a registered nurse. For emergencies that are outside of a registered nurse's scope of practice, another qualified medical personnel (operating within his or her scope of practice under State law) would conduct the emergency medical screening.

We are proposing to revise the CAH standard at § 485.618(d) to allow a CAH, if applicable, the flexibility of including a registered nurse, with training and experience in emergency care and who is on site at the CAH, as one of the qualified medical personnel available for emergency services, particularly emergency medical screenings, if the nature of the individual's request makes clear that the medical condition is not of an emergency nature and the individual's request for examination and treatment is within the registered nurse's scope of practice under State law. If the registered nurse begins the emergency medical screening and determines that the nature of the individual's conditions is outside his or her scope of practice under State law, the physician, physician assistant, nurse practitioner or a clinical nurse specialist must be contacted to see the patient within 30 or 60 minutes to conduct the emergency medical screening and provide stabilizing treatment. If the registered nurse knows initially that the medical screening for the presenting complaint is outside the applicable scope of practice under State law, the physician or other nonphysician

practitioner must see the individual within the 30 or 60 minute timeframes (as currently specified in § 485.618(d)(1)).

We recognize that not all CAHs will be able to utilize this flexibility. Some State licensure boards have stated that it is not within the authorized scope of practice for a registered nurse to independently perform an appropriate emergency medical screening for the purpose of determining if an emergency medical condition exists. However, the licensure boards in these States further maintain that it is within the scope of practice for a registered nurse to assess the health status of an individual to determine a nonemergent condition and to provide nursing care or to refer the individual to appropriate medical resources. Therefore, based on State law, some CAHs will not be able to designate registered nurses as qualified medical personnel under our proposed revision to the regulations governing CAHs. However, as we wish to provide flexibility to CAHs and to be consistent with existing EMTALA policy, we are proposing the revision to the regulation at § 485.618(d).

XV. Proposed OPPS Payment Status and Comment Indicators

A. Proposed CY 2007 Status Indicator Definitions

(If you choose to comment on issues in this section, please include the caption "OPPS Status Indicator" at the beginning of your comment.)

The OPPS payment status indicators (SIs) that we assign to HCPCS codes and APCs play an important role in determining payment for services under the OPPS. They indicate whether a service represented by a HCPCS code is payable under the OPPS or another payment system and also whether particular OPPS policies apply to the code. Our proposed CY 2007 status indicator assignments for APCs and HCPCS codes are shown in Addendum A and Addendum B, respectively. We are proposing to use the status indicators and definitions that are listed in Addendum D1, which we discuss below in greater detail:

1. Proposed Payment Status Indicators To Designate Services That Are Paid Under the OPPS

Indicator	Item/code/service	OPPS payment status
G	Pass-Through Drugs and Biologicals	Paid under OPPS; Separate APC payment includes pass-through amount.
H	(1) Pass-Through Device Categories	(1) Separate cost-based pass-through payment; Not subject to coinsurance.
	(2) Radiopharmaceutical Agents	(2) Separate cost-based non-pass-through payment.

Indicator	Item/code/service	OPPS payment status
K	(1) Non-Pass-Through Drugs and Biologicals	(1) Paid under OPPS; Separate APC payment.
K	(2) Brachytherapy Sources	(2) Paid under OPPS; Separate APC payment.
N	(3) Blood and Blood Products	(3) Paid under OPPS; Separate APC payment.
N	Items and Services Packaged into APC Rates	Paid under OPPS; Payment is packaged into payment for other services, including outliers. Therefore, there is no separate APC payment.
P	Partial Hospitalization	Paid under OPPS; Per diem APC payment.
Q	Packaged Services Subject to Separate Payment Under OPPS Payment Criteria.	Paid under OPPS; Addendum B displays APC assignments when services are separately payable. (1) Separate APC payment based on OPPS payment criteria. (2) If criteria are not met, payment is packaged into payment for other services, including outliers. Therefore, there is no separate APC payment.
S	Significant Procedure, Not Discounted when Multiple	Paid under OPPS; Separate APC payment.
T	Significant Procedure, Multiple Reduction Applies	Paid under OPPS; Separate APC payment.
V	Clinic or Emergency Department Visit	Paid under OPPS; Separate APC payment.
X	Ancillary Services	Paid under OPPS; Separate APC payment.

2. Proposed Payment Status Indicators
To Designate Services That Are Paid
Under a Payment System Other Than
the OPPS

Indicator	Item/code/service	OPPS payment status
A	Services furnished to a hospital outpatient that are paid under a fee schedule or payment system other than OPPS, for example. • Ambulance Services. • Clinical Diagnostic Laboratory Services. • Non-Implantable Prosthetic and Orthotic Devices. • EPO for ESRD Patients. • Physical, Occupational, and Speech Therapy. • Routine Dialysis Services for ESRD Patients Provided in a Certified Dialysis Unit of a Hospital. • Diagnostic Mammography. • Screening Mammography.	Not paid under OPPS. Paid by fiscal intermediaries under a fee schedule or payment system other than OPPS.
C	Inpatient Procedures	Not paid under OPPS. Admit patient. Bill as inpatient.
F	Corneal Tissue Acquisition; Certain CRNA Services; and Hepatitis B Vaccines.	Not paid under OPPS. Paid at reasonable cost.
L	Influenza Vaccine; Pneumococcal Pneumonia Vaccine	Not paid under OPPS. Paid at reasonable cost; Not subject to deductible or coinsurance.
M	Items and Services Not Billable to the Fiscal Intermediary	Not paid under OPPS.
Y	Non-Implantable Durable Medical Equipment	Not paid under OPPS. All institutional providers other than home health agencies bill to DMERC.

3. Proposed Payment Status Indicators
To Designate Services That Are Not
Recognized Under the OPPS but That
May Be Recognized by Other
Institutional Providers

Indicator	Item/code/service	OPPS payment status
B	Codes that are not recognized by OPPS when submitted on an outpatient hospital Part B bill type (12x, 13x, and 14x).	Not paid under OPPS. • May be paid by intermediaries when submitted on a different bill type, for example, 75x (CORF), but not paid under OPPS. • An alternate code that is recognized by OPPS when submitted on an outpatient hospital Part B bill type (12x, 13x, and 14x) may be available.

4. Proposed Payment Status Indicators
to Designate Services That Are Not
Payable by Medicare

Indicator	Item/code/service	OPPS payment status
D	Discontinued Codes	Not paid under OPPS or any other Medicare payment system.
E	Items, Codes, and Services:	Not paid under OPPS or any other Medicare payment system.
	• That are not covered by Medicare based on statutory exclusion. • That are not covered by Medicare for reasons other than statutory exclusion. • That are not recognized by Medicare but for which an alternate code for the same item or service may be available. • For which separate payment is not provided by Medicare.	

To make it more relevant to the proposed update of the OPPS, we are displaying in Addendum B of this proposed rule those HCPCS codes that describe items or services that are payable under the OPPS as well as nonpayable codes for which we are proposing a change in status. Status indicators for items and services that are payable under the OPPS are listed in section XV.A.1 of this preamble.

A complete listing of HCPCS codes with OPPS payment status indicators and APC assignments proposed for CY 2007 is available electronically on the CMS Web site.

B. Proposed CY 2007 Comment Indicator Definitions

(If you choose to comment on issues in this section, please include the caption “OPPS Comment Indicator” at the beginning of your comment.)

In the November 15, 2004 final rule with comment period (69 FR 65827 and 65828), we made final our policy to use three comment indicators to identify in an OPPS final rule the assignment status of a specific HCPCS code to an APC and the timeframe when comments on the HCPCS APC assignment will be accepted. These three comment indicators are listed below:

- “NF”—New code, final APC assignment; Comments were accepted on a proposed APC assignment in the Proposed Rule; APC assignment is no longer open to comment.
- “NI”—New code, interim APC assignment; Comments will be accepted on the interim APC assignment for the new code.

In the November 10, 2005 final rule with comment period (70 FR 68702 and 68703), we adopted a new comment indicator:

- “CH”—Active HCPCS codes in current and next calendar year; status indicator and/or APC assignment have changed.

We implemented comment indicator “CH” to designate a change in payment status indicator and/or APC assignment for HCPCS codes in Addendum B of the CY 2006 final rule with comment period. We also stated that codes flagged

with the “CH” indicator in that final rule would not be open to comment because the changes were previously subject to comment during the proposed rule comment period. We are proposing to continue that policy in the CY 2007 OPPS final rule. When used in an OPPS final rule, the “CH” indicator is only intended to facilitate the public’s review of changes made from one calendar year to another. We are proposing to use the “CH” indicator in the CY 2007 final rule to indicate HCPCS codes for which the status indicator and/or APC assignment will change in CY 2007. However, only HCPCS codes with comment indicator “NI” in the CY 2007 OPPS final rule would be subject to comment during the final rule comment period.

We also are proposing to use the “CH” indicator to call attention to changes in payment status indicator and/or APC assignment in this proposed rule to update the OPPS for CY 2007. We believe that using the “CH” indicator in this proposed rule will facilitate the public’s review of the changes that we are proposing to make final in CY 2007. Use of the “CH” indicator in the proposed rule is significant because it highlights changes that are subject to comment during the proposed rule comment period.

The three comment indicators that we are proposing to implement in CY 2007 and their definitions are listed in Addendum D2 of this proposed rule.

XVI. OPPS Policy and Payment Recommendations

(If you choose to comment on issues in this section, please include the caption “Policy and Payment Recommendations” at the beginning of your comment.)

A. MedPAC Recommendations

The Medicare Payment Advisory Commission (MedPAC) submits reports to Congress in March and June that summarize payment policy recommendations. The March 2006 MedPAC report included the following recommendation relating specifically to the hospital OPPS:

Recommendation 2A: The Congress should increase payment rates for the acute inpatient and outpatient prospective payment systems in 2007 by the projected increase in the hospital market basket index less half of the Commission’s expectation for productivity growth. A discussion regarding updates to the market basket is included in section II.C. (“Proposed OPPS Conversion Factor Update for 2007”) of this preamble.

B. APC Panel Recommendations

Recommendations made by the APC Panel are discussed in sections of this preamble that correspond to topics addressed by the APC Panel. Minutes of the APC Panel’s March 1–2, 2006 meeting are available online at http://www.cms.hhs.gov/FACA/05_AdvisoryPanelonAmbulatoryPaymentClassificationGroups.asp.

C. GAO Recommendations

A discussion of the October 31, 2005 GAO letter of comment on proposed 2006 specified covered outpatient drug (SCOD) rates (GAO–06–17R “Comments on Proposed 2006 SCOD Rates”) is contained in section V.3.B.a. of this preamble.

A discussion of the April 2006 GAO report entitled “Medicare Hospital Pharmaceuticals: Survey Shows Price Variation and Highlights Data Collection Lessons and Outpatient Rate-setting Challenges for CMS” (GAO–06–372) is contained in section V.3.B.a. of this preamble.

XVII. Proposed Policies Affecting Ambulatory Surgical Centers (ASCs) for CY 2007

A. ASC Background

1. Legislative History

Section 1832(a)(2)(F)(i) of the Act provides that benefits under the Medicare Supplementary Medical Insurance program (Part B) include payment for facility services furnished in connection with surgical procedures the Secretary specifies which are performed in an ASC. To participate in the Medicare program as an ASC, a

facility must meet the standards specified in section 1832(a)(2)(F)(i) of the Act; in 42 CFR 416, subpart B of our regulations, which sets forth general conditions and requirements for ASCs; and in 42 CFR 416, subpart C of our regulations, which provides specific conditions for coverage for ASCs.

The ASC services benefit was enacted by Congress through the Omnibus Reconciliation Act of 1980 (Pub. L. 96–499). For a detailed discussion of the legislative history related to ASCs, we refer readers to the June 12, 1998 proposed rule (63 FR 32291).

Section 626(b) of Pub. L. 108–173, repealed the requirement formerly found in section 1833(i)(2)(A) of the Act that the Secretary conduct a survey of ASC costs for purposes of updating ASC payment rates and, instead, requires the Secretary to implement a revised ASC payment system, to be effective not later than January 1, 2008. Section XVIII. of this proposed rule contains our proposal for a revised ASC payment system that would be implemented on January 1, 2008.

Section 5103 of Pub. L. 109–171, amended section 1833(i)(2) of the Act by adding a new subparagraph (E) to place a limitation on payments for surgical procedures in ASCs. If the standard overhead amount under section 1833(i)(2)(A) of the Act for a facility service for such procedure, without application of any geographic adjustment exceeds the Medicare OPPS payment amount for the service for that year, without application of any geographic adjustment, the Secretary shall substitute the OPPS payment amount for the ASC standard overhead amount. This provision applies to surgical procedures furnished in ASCs on or after January 1, 2007, and before the effective date of the revised ASC payment system.

We discuss in section XVII.C. of this preamble, the regulatory changes that we are proposing for our current ASC payment system. In section XVII.D. of this proposed rule, we are addressing the changes in payment to ASCs mandated by section 5103 of Pub. L. 109–171, as well as additions to and deletions from the list of Medicare-approved ASC procedures to be implemented January 1, 2007, prior to implementation of the revised ASC payment system. In addition, in section XVII.E. of this preamble, we are proposing changes in the process to review payment adjustments for insertion of new technology intraocular lenses (NTIOLs). The CY 2007 OPPS final rule that we issue in the fall of 2006 will implement changes to the ASC list that will go into effect

January 1, 2007. In section XVIII. of this preamble, we are proposing a revised payment system for ASCs to be implemented effective January 1, 2008, including revisions to the ASC list for CY 2008, the ratesetting method, and the applicable ASC regulations to incorporate the requirements and payments for ASC facility services under the proposed revised ASC system. We expect that a final rule implementing the revised ASC payment system will be published separately in the spring of 2007.

2. Current Payment Method

There are two primary elements in the total cost of performing a surgical procedure: (a) The cost of the physician's professional services to perform the procedure and (b) the cost of items and services furnished by the facility where the procedure is performed (for example, surgical supplies, equipment, and nursing services). Payment for the first element is made under the Medicare physician fee schedule. This proposed rule addresses the second element, the payment of facility fees for ASC services. This proposed rule also addresses coverage of ASC services.

Under the current ASC facility services payment system, the ASC payment rate is a standard overhead amount established on the basis of our estimate of a fee that takes into account the costs incurred by ASCs generally in providing facility services in connection with performing a specific procedure. The report of the Conference Committee accompanying section 934 of the Omnibus Reconciliation Act of 1980 (ORA), Pub. L. 96–499, which enacted the ASC benefit in December 1980, states that this overhead amount is expected to be calculated on a prospective basis using sample survey data and similar techniques to establish reasonable estimated overhead allowances, which take into account volume (within reasonable limits), for each of the listed procedures. (H.R. Rep. No. 96–1479, at 134–35 (1980)).

To establish those reasonable estimated allowances for services furnished prior to implementation of the revised ASC payment system, section 626(b)(1) of Pub. L. 108–173 amended section 1833(i)(2)(A)(i) of the Act to require us to take into account the audited costs incurred by ASCs to perform a procedure, in accordance with a survey. Payment for ASC facility services is subject to the usual Medicare Part B deductible and coinsurance requirements and the amounts paid by Medicare must be 80 percent of the standard fee.

Section 1833(i)(1) of the Act requires us to specify, in consultation with appropriate medical organizations, surgical procedures that are appropriately performed on an inpatient basis in a hospital but that can be safely performed in an ASC and to review and update the list of ASC procedures at least every 2 years.

Section 141(b) of the Social Security Act Amendments of 1994, Pub. L. 103–432, requires us to establish a process for reviewing the appropriateness of the payment amount provided under section 1833(i)(2)(A)(iii) of the Act for intraocular lenses (IOLs) for a class of NTIOLs. That process was the subject of a separate final rule entitled “Adjustment in Payment Amounts for New Technology Intraocular Lenses Furnished by Ambulatory Surgical Centers,” published in the June 16, 1999 **Federal Register** (64 FR 32198). As stated earlier, in section XVII.E. of this proposed rule, we discuss the changes that we are proposing to that process.

A summary of changes to ASC payment rates made prior to CY 1998 may be found in the June 12, 1998 proposed rule (63 FR 32292). The 1998 rule proposed to rebase the ASC payment rates using cost, charge, and utilization data collected by a 1994 survey of ASCs. In that proposed rule, we also proposed to refine the ratesetting methodology that was implemented in the February 8, 1990 **Federal Register** (55 FR 4577). However, the changes that were proposed for the ratesetting methodology were not implemented because of a combination of circumstances resulting in the delayed publication of a final rule. Those circumstances included several extensions to the comment period which ended July 30, 1999, Year 2000 (Y2K) Medicare systems compliance considerations, and legislative changes required by the Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act of 1999 (BBRA), Pub. L. 106–113 and the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA), Pub. L. 106–554. Readers may refer to the March 28, 2003 ASC List Update final rule (68 FR 15269) for a detailed discussion of these circumstances and the legislative changes.

3. Published Changes to the ASC List

Section 1833(i)(1)(A) of the Act requires the Secretary to specify surgical procedures that, although appropriately performed in an inpatient hospital setting, can also be performed safely on an ambulatory basis in an ASC, a CAH, or a hospital outpatient department. The report accompanying the legislation

explained that the Congress intended procedures currently performed on an ambulatory basis in a physician's office that do not generally require the more elaborate facilities of an ASC not be included in the list of ASC covered procedures (H.R. Rep. No. 96–1167, at 390–91, reprinted in 1980 U.S.C.C.A.N. 5526, 5753–54). In a final rule published August 5, 1982, in the **Federal Register** (47 FR 34082), we established regulations that included criteria for specifying which surgical procedures were to be included for purposes of implementing the ASC facility benefit.

Section 416.65(a) of the regulations specifies general standards for procedures on the ASC list. ASC procedures are those surgical and other medial procedures that are—

- Commonly performed on an inpatient basis but may be safely performed in an ASC;
- Not of a type that are commonly performed or that may be safely performed in physicians' offices;
- Limited to procedures requiring a dedicated operating room or suite and generally requiring a post-operative recovery room or short term (not overnight) convalescent room; and
- Not otherwise excluded from Medicare coverage.

Specific standards in § 416.65(b) limit covered ASC procedures to those that do not generally exceed 90 minutes operating time and a total of 4 hours recovery or convalescent time. If anesthesia is required, the anesthesia must be local or regional anesthesia, or general anesthesia of not more than 90 minutes duration.

Section 416.65(b)(3) of the regulations excludes from the ASC list procedures that generally result in extensive blood loss, that require major or prolonged invasion of body cavities, that directly involve major blood vessels, or that are generally emergency or life-threatening in nature.

A detailed history of published changes to the ASC list and ASC payment rates may be found in the June 12, 1998 proposed rule (63 FR 32292). Subsequently, in accordance with § 416.65(c), we published updates of the ASC list in the **Federal Register** on March 28, 2003 (68 FR 15268) and May 4, 2005 (70 FR 23690).

During years when we have not updated the ASC list in the **Federal Register**, we have revised the list to be consistent with annual calendar year changes to HCPCS and CPT codes. These annual coding updates have been implemented through program instructions to the carriers that process ASC claims. The most recent update to the list to conform with CPT and HCPCS

coding changes was published in Transmittal R–720–CP, Change Request 4082, on October 21, 2005. It may be found on our Web site at: <http://www.cms.hhs.gov/Transmittals/>.

B. Proposed ASC List Update Effective for Services Furnished On or After January 1, 2007

1. Criteria for Additions to or Deletions From the ASC List

In April 1987, we adopted quantitative criteria for identifying procedures that were commonly performed either in a hospital inpatient setting or in a physician's office. Collectively, commenters responding to a notice published on February 16, 1984 in the **Federal Register** (49 FR 6023) had recommended that virtually every surgical CPT code be included on the ASC list. Consulting with other specialist physicians and medical organizations as appropriate, our medical staff reviewed the recommended additions to the list to determine which code or series of codes were appropriately performed on an ambulatory basis within the framework of the regulatory criteria in § 416.65. However, when we arrayed the proposed procedures by the site where they were most frequently performed according to our claims payment data files (1984 Part B Medicare Data (BMAD)), we found that many procedures were not commonly performed on an inpatient basis or were performed in a physician's office the majority of the time, and, thus, would not meet the standards in our regulations. Therefore, we decided that if a procedure was performed on an inpatient basis 20 percent of the time or less, or in a physician's office 50 percent of the time or more, it would be excluded from the ASC list. (April 21, 1987 (52 FR 13176)).

At the time, we believed that these utilization thresholds best reflected the legislative objectives of moving procedures from the more expensive hospital inpatient setting to the less expensive ASC setting without encouraging the migration of procedures from the generally less expensive physician's office setting to the ASC. We applied these quantitative standards not only to codes proposed for addition to the ASC list, but also to the codes that were currently on the list, to delete codes that did not meet the thresholds.

The trend towards performing surgery on an ambulatory or outpatient basis grew steadily and, by 1995, we discovered that a number of procedures that were on the ASC list at the time fell short of the 20 percent and 50 percent

thresholds even though the procedures were obviously appropriate in the ASC setting. The most notable of these was cataract extraction with intraocular lens insertion that were already being performed predominately in outpatient settings by the early 1990s, although more than 20 percent were also performed as inpatient procedures. The thresholds would also have excluded from the ASC list certain newer procedures, such as CPT code 66825 (Repositioning of intraocular lens prosthesis, requiring an incision (separate procedure)), that were rarely performed on a hospital inpatient basis but that were appropriate for the ASC setting. Strict adherence to the same 20 percent and 50 percent thresholds both to add and remove procedures did not provide latitude for minor fluctuations in utilization across settings or errors that could occur in the site-of-service data drawn from the National Claims History File that we were then using for analysis.

In an effort to avoid these anomalies but still retain a relatively objective standard for determining which procedures should comprise the ASC list, we adopted in the **Federal Register** notice with comment period published on January 26, 1995 (60 FR 5185), a modified standard for deleting procedures already on the list. We deleted from the list only those procedures whose combined inpatient, hospital outpatient, and ASC site-of-service volume was less than 46 percent of the procedure's total volume and that were either performed 50 percent of the time or more in the physician's office or 10 percent of the time or less in an inpatient hospital setting. We retained the 20 percent and 50 percent standard to determine which procedures would be appropriate additions to the ASC list.

We are not proposing changes to the criteria for adding or deleting items from the ASC list effective January 1, 2007. However, please see section XVIII.B. of this proposed rule for a discussion of proposed changes in the context of developing a revised ASC payment system to be effective January 1, 2008. The proposed changes to the criteria result in the addition for CY 2008 of many procedures that do not meet the current criteria for addition to the list.

2. Response to Comments to May 4, 2005 Interim Final Rule for the ASC Update

In accordance with section 1833(i)(1) of the Act, in this proposed rule, we are proposing to update the list of procedures that are covered when furnished in an ASC, effective January

1, 2007. In the process of determining which procedures to add to the list, we focused on requests we received from the public in their comments on our May 4, 2005 interim final rule (70 FR 23690). We evaluated codes for which we received requests from the public. The public comments include requests

for addition and deletion of specific procedures and for assignment to higher payment groups for specific procedures.

3. Procedures Proposed for Addition to the ASC List

Using the current criteria as described in section XVII.B.1. of this preamble, we

identified 14 procedures that we are proposing to add to the ASC list effective January 1, 2007. The procedures would be assigned to one of the nine existing ASC payment groups as indicated in Table 41.

TABLE 41.—PROCEDURES PROPOSED FOR ADDITION TO THE ASC LIST EFFECTIVE JANUARY 1, 2007

CPT	Short descriptor	ASC payment group
13102	Repair wound/lesion add-on	1
13122	Repair wound/lesion add-on	1
13133	Repair wound/lesion add-on	1
19297	Place breast cath for rad	9
21356	Treat cheek bone fracture	3
22520	Percutaneous vertebroplasty, thor	9
22521	Percutaneous vertebroplasty, lumb	9
22522	Percutaneous vertebroplasty, add'l	1
35476	Repair venous blockage	9
36818	AV fuse, upper arm, cephalic	3
37205	Transcath IV stent, percutaneous	9
37206	Transcath IV stent/perc, add'l	1
43761	Reposition gastrostomy tube	1
46946	Ligation of hemorrhoids	1

4. Suggested Additions Not Accepted

There are a number of procedures for which we received requests for additions to the ASC list that we are not proposing to add to the ASC list because they do not meet the criteria set forth in section 416.65 of the CFR. Those procedures are listed in Tables 42 and 43 below. Our medical advisors believe that the procedures listed in Tables 42 and 43 may be of a type that:

- Are performed predominantly in the hospital inpatient or physician office setting;
- Require an overnight or inpatient stay;
- Require a total of 90 minutes of operating time or 4 hours or more of recovery time;
- Require major or prolonged invasion of body cavities or involve major blood vessels;
- Are generally emergent or life-threatening; or
- Are of a type that result in extensive blood loss.

We are not proposing to add 19 procedures for which we received requests for addition to the ASC list because they are procedures that are furnished predominantly in the physician office setting and according to the current criteria are not eligible for inclusion on the list. Those procedures are displayed in Table 42.

One request was made that we add CPT code 66990 (Use of ophthalmic endoscope) to the list. As we stated in our May 5, 2005 interim final rule (70

FR 23704), this code is used to recognize the use of equipment that is integral to a surgical procedure and is not a surgical procedure. For this reason, we do not believe that it is an appropriate addition to the list.

TABLE 42.—PROCEDURES NOT PROPOSED FOR ADDITION TO 2007 ASC LIST BECAUSE THEY ARE PREDOMINANTLY PERFORMED IN THE PHYSICIAN'S OFFICE

CPT	Short descriptor
31040	Exploration behind upper jaw.
45300	Proctosigmoidoscopy dx.
45303	Proctosigmoidoscopy dilate.
45330	Diagnostic sigmoidoscopy.
46221	Ligation of hemorrhoid(s).
46604	Anoscopy and dilation.
46614	Anoscopy, control bleeding.
46900	Destruction, anal lesion(s).
46910	Destruction, anal lesion(s).
46916	Destruction, anal lesion(s).
62367	Analyze spine infusion pump.
62368	Analyze spine infusion pump.
67028	Injection eye drug.
67105	Repair detached retina.
67110	Repair detached retina.
67145	Treatment of retina.
67210	Treatment of retinal lesion.
67221	Ocular photodynamic ther.
67228	Treatment of retinal lesion.

We are proposing not to add to the ASC list 14 procedures for which we received requests because our medical advisors determined that those procedures do not meet the clinical criteria (§ 416.65) for addition. That is,

the procedures either require more than 4 hours of recovery time, or may result in excessive blood loss, etc., making them ineligible for addition to the list of ASC procedures. Those procedures are displayed in Table 43.

TABLE 43.—PROCEDURES NOT ADDED TO THE ASC LIST BECAUSE THEY DO NOT MEET CURRENT CLINICAL CRITERIA FOR ADDITION TO THE ASC LIST

CPT	Short descriptor
27412	Autochondrocyte implant knee.
27415	Osteochondral knee allograft.
29866	Autgrft implnt, knee w/scope.
29867	Allgrft implnt, knee w/scope.
29868	Meniscal trnspl, knee w/scope.
35470	Repair arterial blockage.
35475	Repair arterial blockage.
47562	Laparoscopic cholecystectomy.
47563	Laparo cholecystectomy/graph.
47564	Laparo cholecystectomy/explr.
63030	Low back disk surgery.
63035	Spinal disk surgery add-on.
63042	Laminotomy, single lumbar.
63047	Removal of spinal lamina.

5. Rationale for Payment Assignment

Currently, procedures on the ASC list are assigned to one of nine payment groups based on our estimate of the costs incurred by the facility to perform the procedure. We are proposing no changes to those nine payment groups and are proposing to assign the additional procedures to one of those existing payment groups. The payment

group to which we propose each addition to the ASC list be classified is based on the payment group, which our medical advisors judged to be similar in terms of time and resource inputs to procedures currently on the list. The proposed list of procedures eligible for Medicare payment of a facility fee and the proposed rates are displayed in Addendum AA of this proposed rule. The procedures that are effected by the payment limit required by section 5103 of Pub. L. 109–171 are identified in that addendum along with their proposed rates.

6. Other Comments on the May 4, 2005 Interim Final Rule

In the May 4, 2005 interim final rule (70 FR 23690), we also invited public comments on the payment assignments for specific procedure codes that we added to the ASC list in that rule that had not been proposed for addition to the ASC list in the November 26, 2004 proposed rule (69 FR 69178). We received comments on 14 of those newly-added procedures. A summary of those comments and our proposed treatment of them for CY 2007 is discussed below.

Several comments requested that we delay adding to the ASC list CPT codes 33212 (Insertion or replacement of pacemaker pulse generator only; single chamber, atrial or ventricular), 33213 (Insertion or replacement of pacemaker pulse generator only; dual chamber), and 33233 (Removal of permanent pacemaker pulse generator) until we implement the new ASC payment system.

We added these procedures to the ASC list in response to a request from a commenter. Our medical advisors evaluated the request and determined that these were appropriate procedures for performance in the ASC setting. We continue to believe that the procedures are appropriate for performance in the ASC and see no reason to remove them from the list at this time. Therefore, we are proposing to make no change in the ASC assignments for these three procedures.

Two commenters requested that we reassign CPT codes 57155 (Insertion of uterine tandems and/or vaginal ovoids for clinical brachytherapy) and 58346 (Insertion of Heyman capsules for clinical brachytherapy) to the highest ASC payment group. The commenters believe that payment at a higher level is necessary in order to cover the costs of the equipment and supplies used in performing the procedures.

We reviewed the OPPS cost data for these procedures and found that the median cost for CPT code 57155 is \$506

and that for CPT code 58346 is \$364. We do not have median cost data for the procedures performed in the ASC but the ASC payment amount for both services is \$446, which is within the range of the median costs for those procedures in the generally more costly hospital outpatient setting. This leads us to believe that the \$446 payment in the ASC is quite adequate. We are not proposing to assign the procedures to higher ASC payment groups.

Several commenters wrote regarding CPT codes 36475 (Endovenous ablation therapy of incompetent vein, extremity, inclusive of all imaging guidance and monitoring, percutaneous, radiofrequency; first vein); 36476 (Endovenous ablation therapy of incompetent vein, extremity, inclusive of all imaging guidance and monitoring, percutaneous, radiofrequency; second and subsequent veins in single extremity, each through separate access sites); 36478 (Endovenous ablation therapy of incompetent vein, extremity, inclusive of all imaging guidance and monitoring, percutaneous, laser; first vein); and 36479 (Endovenous ablation therapy of incompetent vein, extremity, inclusive of all imaging guidance and monitoring, percutaneous, laser; second and subsequent veins treated in a single extremity, each through separate access sites). The commenters requested that we remove these procedures from the ASC list, and suggested that if we were unwilling to remove them from the list, that we assign the procedures to a higher payment group. They believe that these procedures require significantly more facility resources than other procedures with which they are currently grouped in payment level 3. The commenters explained that if the procedures were excluded from the list, more adequate payments would be made to physicians under the Medicare physician fee schedule for the required resources.

We added these procedures to the list in response to public comments. We initially assigned the codes to ASC payment group 3, consistent with other procedures with similar clinical indications. We continue to believe that these procedures are appropriate for performance in the ASC setting and will not remove them from the list. However, we agree with the commenters' point that these procedures require significantly more facility resources than traditional vein removal procedures, and, therefore, we are proposing to reassign them to ASC payment group 9. We believe that this is an appropriate payment level that takes into consideration the costs of the required equipment and supplies.

Two comments requested that we assign CPT code 46947 (Hemorrhoidopexy by stapling) to a higher ASC payment group. The commenters stated that due to the cost of the stapler used in the procedure, the resources required for this procedure are not similar to the other surgical procedures for the treatment of hemorrhoids that are also assigned to ASC payment group 3. The commenters suggested that it would be more appropriate to assign this procedure to ASC payment group 7.

We agree with the commenters and are proposing to reassign this procedure to ASC payment group 7 for CY 2007.

One commenter raised concern about payment for CPT code 49419 (Insertion of intraperitoneal cannula or catheter, with subcutaneous reservoir, permanent). The commenter reported that the catheter that is used in performing this procedure is billed separately under the DMEPOS fee schedule, and that Medicare carriers have discretion over whether or not to allow that payment. According to the commenter, in some areas, separate payment is not made for the catheter that is integral to the procedure.

We believe that the commenter may be misinformed, because cannulas and catheters are not considered durable medical equipment, and they are not paid under the DMEPOS fee schedule. Rather, they are considered to be supplies. Payment for supplies furnished by an ASC in connection with a surgical procedure is bundled into the payment for the surgical procedure for which the supplies are required.

One commenter requested that we allow separate payment for the material used as the sling in the procedure described by CPT code 51992 (Laparoscopy, surgical; sling operation for stress incontinence (e.g., fascia or synthetic)). The commenter stated that without separate payment for the sling material, the Medicare payment for performing the procedure is inadequate to cover the service. The commenter also stated that there is no specific HCPCS code to use for billing the synthetic sling material.

We added CPT code 51992 to the ASC list in the last update in response to comments. We assigned CPT code 51992 to ASC payment group 5, the same ASC payment group to which other procedures to treat stress incontinence are assigned. We realize that the synthetic material for the sling may be costly, but there is no identifiable HCPCS code available for use in ASCs to report the material, and such material is not eligible for separate payment from Medicare in the ASC or

in any other setting. Further, CPT code 51992 describes a procedure that may be performed using synthetic material or fascia. As such, we cannot know whether the more costly synthetic material is used in any specific procedure and do not believe it is appropriate to fully incorporate the synthetic supply costs into the payment for all of the procedures performed. We continue to believe that ASC payment group 5 is an appropriate assignment for the procedure, and we are not proposing to change that assignment.

One commenter requested that we make separate payment for the microinserts that are used in performing CPT code 58565 (Hysteroscopy, surgical; with bilateral fallopian tube cannulation to induce occlusion by placement of permanent implants) even though there is no specific HCPCS code to describe the microinserts for billing, making separate payment impossible.

We added CPT code 58565 to the ASC list in the last update in response to public comment. We assigned the procedure to ASC payment group 4 with other procedures with similar clinical indications. After further review, we are convinced that the procedure described by CPT code 58565 is significantly more resource-intensive than the other procedures in ASC payment group 4 and, therefore, we are proposing to reassign it to ASC payment group 9 for CY 2007.

Several comments requested that CMS issue instructions to permit separate payment for the catheters that are inserted during the procedures described by CPT codes 19296 (Placement of radiotherapy afterloading balloon catheter into the breast for interstitial radioelement application following partial mastectomy, includes imaging guidance; on date separate from partial mastectomy) and 19298 (Placement of radiotherapy afterloading brachytherapy catheters into the breast for interstitial radioelement application following partial mastectomy, includes imaging guidance).

One commenter supported adding CPT code 19296 to the ASC list and assigning it to ASC payment group 9, but asserted that separate payment should also be provided for the balloon catheter inserted during the procedure. With regard to CPT code 19298, other commenters also stated that the payment level is inadequate and that separate payment should be allowed for the catheters inserted during the procedure. One of the commenters explained that the catheters used to perform the procedure described by CPT code 19298 are not high cost items (about \$18.50 each) but these

procedures typically use 30 catheters which makes the catheters a significant cost factor in performing the procedure.

The catheters used in these procedures are classified as surgical supplies and as such, are not included on the DMEPOS fee schedule and are, therefore, not eligible for separate payment in the ASC. Payments for the costs of the catheters are packaged into the payments for performing the procedures. Currently CPT code 19298 is assigned to ASC payment group 1. Based on the information provided by the commenters we are persuaded that reassignment to a higher ASC payment group is warranted. Therefore, we are proposing to reassign CPT code 19298 to ASC payment group 9 for CY 2007.

C. Proposed Regulatory Changes for CY 2007

As stated earlier, we are proposing a revised payment system for ASCs to be implemented effective January 1, 2008, including revisions to the ASC list for CY 2008, the ratesetting method, and the applicable ASC regulations to incorporate the requirements and payments for ASC facility services under the proposed revised ASC system. We expect that a final rule implementing the revised ASC payment system will be published separately in the spring of 2007. The revised ASC payment system will not take effect until January 1, 2008. However, we need to revise our current regulations at part 416, subparts D and E to ensure that the rules governing our current system are clearly distinguishable from those that would apply to the revised system beginning January 1, 2008. Therefore, we are proposing to revise subparts D and E to part 416 to reflect that these are the rules governing the APC payment system prior to January 1, 2008, and to redesignate the existing subpart F as subpart G under part 416 to codify the rules governing the ASC payment adjustment for NTIOLs. In addition, we are proposing to revise existing—

- § 416.1 (Basis and scope) to remove the obsolete reference to “a hospital outpatient department,” to add provisions of section 5103 of Pub. L. 109–171, and applicable provisions of Pub. L. 108–173.

- § 416.65 (Covered surgical procedures) to modify the introductory text to clearly denote the section’s application to covered surgical procedures furnished before January 1, 2008. In addition, we are proposing to remove the obsolete cross-reference in paragraph (a)(4) to § 405.310 and replace it with the correct cross-reference to § 411.15.

- § 416.125 (ASC facility services payment rate) to incorporate the limitation on payment imposed by section 5103 of Pub. L. 109–171.

- § 488.1 (Definitions) to correct a longstanding error by adding ambulatory surgical centers to the definition of a supplier in conformance with section 1861(d) of the Act.

We also are proposing to add a new § 416.76 and § 416.121 to subparts D and E, respectively, to clearly state that the provisions of subparts D and E apply to services furnished before January 1, 2008.

D. Implementation of Section 5103 of Pub. L. 109–171 (DRA)

(If you choose to comment on issues in this section, please include the caption “Section 5103” at the beginning of your comments.)

As noted in section XVII.A.1. of this preamble, section 5103 of Pub. L. 109–171 requires us to substitute the OPPS payment amount for the ASC standard overhead amount for surgical procedures performed at an ASC on or after January 1, 2007, but prior to the revised payment system when the ASC standard overhead amount exceeds the OPPS payment amount for the procedure. In Addendum AA of this proposed rule, we identify the HCPCS codes that we believe would be subject to section 5103 based on a comparison of the CY 2007 proposed OPPS payment rates and the ASC standard overhead amounts that are effective in CY 2007. We are proposing to add paragraph (c) to § 416.125 to reflect this change.

E. Proposal To Modify the Current ASC Process for Adjusting Payment for New Technology Intraocular Lenses (NTIOLs)

1. Background

(If you choose to comment on issues in this section, please include the caption “NTIOL” at the beginning of your comments.)

At the inception of the ASC benefit on September 7, 1982, Medicare paid 80 percent of the reasonable charge for IOLs supplied for insertion concurrent with or following cataract surgery performed in an ASC (see 47 FR 34082, August 5, 1982). Section 4063(b) of OBRA 1987, Pub. L. 100–203, amended the Act to mandate that we include payment for an IOL furnished by an ASC for insertion during or following cataract surgery as part of the ASC facility fee for insertion of the IOL, and that the facility fee include payment that is reasonable and related to the cost of acquiring the class of lens involved in the procedure.

Section 4151(c)(3) of the Omnibus Budget Reconciliation Act of 1990

(OBRA 1990), Pub. L. 101–508, froze the IOL payment amount at \$200 for IOLs furnished by ASCs in conjunction with surgery performed during the period beginning November 5, 1990, and ending December 31, 1992. We continued paying an IOL allowance of \$200 from January 1, 1993, through December 31, 1993.

Section 13533 of the Omnibus Budget Reconciliation Act of 1993 (OBRA 1993), Pub. L. 103–66, mandated that payment for an IOL furnished by an ASC be equal to \$150 beginning January 1, 1994, through December 31, 1998.

Section 141(b)(1) of the Social Security Act Amendments of 1994 (SSAA 1994), Pub. L. 103–432, required us to develop and implement a process under which interested parties may request a review of the appropriateness of the payment amount for insertion of an IOL, to ensure that the facility fee for the procedure includes payment that is reasonable and related to the cost of acquiring a lens that belongs to a class of NTIOLs.

In the February 8, 1990 **Federal Register** (55 FR 4526), we published a final notice entitled “Revision of Ambulatory Surgery Center Payment Rate Methodology,” which implemented Medicare payment for an IOL furnished at an ASC as part of the ASC facility fee for insertion of the IOL.

In the June 16, 1999 **Federal Register** (64 FR 32198), we published a final rule entitled “Adjustment in Payment Amounts for New Technology Intraocular Lenses Furnished by Ambulatory Surgical Centers” to add a subpart F (§§ 416.180 through 416.200) to 42 CFR Part 416, which established a process for adjusting payment

amounts for insertion of a class of NTIOLs furnished by ASCs.

Our current regulations §§ 416.180 through 416.200 define the terms relevant to the process, establish the payment review process, and establish \$50 as the payment adjustment amount that is added to the ASC facility fee for insertion of a lens that CMS determines is an NTIOL. Section 416.200 provides that the payment adjustment applies for a 5-year period that begins when we recognize the first lens that establishes a class of NTIOLs. In accordance with § 416.200(b), insertion of a lens that we subsequently recognize as belonging to an existing NTIOL class would receive the payment adjustment for the remainder of the 5-year period established for the class. Section 416.185(f)(2) provides that after July 16, 2002, we have the option of changing the \$50 adjustment amount through proposed and final rulemaking in connection with ASC services.

Since June 16, 1999, we have issued a series of **Federal Register** notices to list lenses for which we received requests for a NTIOL payment adjustment and to solicit comments on those requests, or to announce the lenses that we have determined meet the criteria and definition of NTIOLs. We last published a **Federal Register** notice pertaining to NTIOLs on April 28, 2006 (71 FR 25176).

a. Current ASC Payment for Insertion of IOLs

The current ASC payment groups, payment rates and procedural HCPCS codes for cataract extraction with IOL insertion are as follows:

Payment Group 6—\$826 (\$676 + \$150 IOL Allowance)

- CPT code 66985, Insertion of intraocular lens prosthesis (secondary implant), not associated with concurrent cataract removal

Payment Group 8—\$973 (\$823 + \$150 IOL allowance)

- CPT code 66982 Extracapsular cataract removal with insertion of intraocular lens prosthesis (one stage procedure), manual or mechanical technique (for example, irrigation and aspiration or phacoemulsification), complex, requiring devices or techniques not generally used in routine cataract surgery (for example, iris expansion device, suture support for intraocular lens, or primary posterior capsulorrhexis) or performed on patients in the amblyogenic developmental stage

- CPT code 66983 Intracapsular cataract extraction with insertion of intraocular lens prosthesis (one stage procedure)

- CPT code 66984 Extracapsular cataract removal with insertion of intraocular lens prosthesis (one stage procedure), manual or mechanical technique (for example, irrigation and aspiration or phacoemulsification)

b. Classes of NTIOLs Approved for Payment Adjustment

Since implementation of the process for adjustment of payment amounts for NTIOLs, that was established in the June 16, 1999 **Federal Register**, we have approved three classes of NTIOLs, as shown in the following table:

NTIOL category	HCPCS code	\$50 approved for services furnished on or after	NTIOL characteristic	IOLs eligible for adjustment
1	Q1001	May 18, 2000, through May 18, 2005.	Multifocal	Allergan AMO Array Multifocal lens, model SA40N.
2	Q1002	May 18, 2000, through May 18, 2005.	Reduction in Preexisting Astigmatism.	STAAR Surgical Elastic Ultraviolet-Absorbing Silicone Posterior Chamber IOL with Toric Optic, models AA4203T, AA4203TF, and AA4203TL.
3	Q1003	February 27, 2006, through February 26, 2011.	Reduced Spherical Aberration.	Advanced Medical Optics (AMO) Tecnis [®] IOL models Z9000, Z9001, and ZA9003; Alcon Acrysof IQ Model SN60WF.

2. Proposed Changes

a. Process for Recognizing IOLs as Belonging to an Active NTIOL Class

Currently, we accept and review applications for inclusion in an active NTIOL class on a continuous basis throughout the year in accordance with §§ 416.180 through 416.200 of the regulations. We are proposing to continue this established process and to update and streamline it, as discussed

below, to specify the request and comment review process, the information that a request must include to be accepted for review, the specific factors to be considered in evaluating requests, and the process to provide notification of determinations. As stated in section XVII.D. of this preamble, we are proposing to redesignate existing subpart F of part 416 as subpart G, which would include the regulations

pertaining to the ASC payment adjustment for NTIOLs. In addition, we are proposing to revise redesignated subpart G to add new § 416.180, § 416.185, § 416.190, § 416.195, and § 416.200 to the regulations to reflect the changes that we are proposing to this process.

One of the regulatory changes that we are proposing is to revise existing § 416.180 to establish the basis and

scope for this ASC payment adjustment. This proposal would eliminate the definitions currently included in that section for "Class of new technology intraocular lenses (IOLs)," "Interested party," "New technology IOL," and "New technology subset." We do not believe that we need to retain these definitions because additional revisions that we are proposing to the regulations at part 416 would eliminate the term "interested party" from §§ 416.185(c) and 416.190 and the term "new technology subset" from §§ 416.185(g), 416.200(a), (b), and (c) and further clarify the terms "new technology IOL" and "class of new technology intraocular lenses (IOLs)."

The other changes that we are proposing to part 416, pertaining to the ASC payment adjustment for NTIOLs, are discussed in this section.

b. Public Notice and Comment Regarding Adjustments of NTIOL Payment Amounts

We are proposing to update and streamline the process for determining whether an IOL that is to be inserted during or subsequent to cataract extraction qualifies for payment adjustment as a NTIOL, as set forth in existing § 416.185 of our regulations. The basis for the current NTIOL payment review process was enacted in 1994 and has been implemented through a series of separate **Federal Register** notices specific to NTIOLs. We are proposing to modify the current process of using separate **Federal Register** notices to notify the public of requests to review lenses for membership in new NTIOL classes, to solicit public comment on requests, and to notify the public of CMS determinations concerning new classes of NTIOLs for which an ASC payment adjustment would be made. We are proposing that these NTIOL-related notifications would be fully integrated into the annual notice and comment rulemaking for updating the ASC payment rates, the specific payment system in which NTIOL payment adjustments are made. Given that the NTIOL payment adjustments are applicable to ASC services and that the proposal for updating the new ASC payment system to be implemented in January 2008 anticipates an annual update process in coordination with notice and comment rulemaking on the OPPS, aligning the NTIOL process with this annual update would promote coordination and efficiency, thereby streamlining and expediting the NTIOL notification, comment, and review process.

Specifically, we are proposing the following process:

- We would announce annually in the **Federal Register** document that proposes the update of ASC payment rates for the following calendar year, a list of all requests to establish new NTIOL classes accepted for review during the calendar year in which the proposal is published and the deadline for submission of public comments regarding those requests. The deadline would be 30 days following publication of the list of requests.
- In the **Federal Register** document that finalizes the update of ASC payment rates for the following calendar year we would—
 - + Provide a list of determinations made as a result of our review of all requests and public comments; and
 - + Publish the deadline for submitting requests for review in the following calendar year.

We believe that the coordination of public notice and comment regarding requests to establish new NTIOL classes with the update of ASC payment rates would facilitate judicious and comprehensive review and comment by interested parties, thereby resulting in more timely access to improved health technologies for Medicare beneficiaries. Accordingly, we are proposing to revise § 416.185 to reflect these proposed changes to the current process for publishing separate **Federal Register** notices specific to NTIOLs.

We note that we did not receive any review requests in response to the specific NTIOL April 28, 2006 notice (71 FR 25176) soliciting CY 2006 requests for review of the appropriateness of the payment amount for particular NTIOLs furnished in ASCs.

c. Factors CMS Considers in Determining Whether an Adjustment of Payment for Insertion of a New Class of NTIOL Is Appropriate

In determining whether a lens belongs to a new class of NTIOLs for which the ASC payment amount for insertion in conjunction with cataract surgery is appropriate, we expect that the insertion of the candidate IOL would result in significantly improved clinical outcomes compared to currently available IOLs. In addition, to establish a new NTIOL class, the candidate lens must be distinguishable from lenses already approved as members of active or expired classes of NTIOLs that share a predominant characteristic associated with improved clinical outcomes that was identified for each class. We are proposing to base our determinations on consideration of the following factors:

- The IOL must have been approved by the FDA and claims of specific clinical benefits and/or lens characteristics with established clinical relevance in comparison with currently available IOLs must have been approved by the FDA for use in labeling and advertising.

- The IOL is not described by an active or expired NTIOL class; that is, it does not share the predominant, class-defining characteristic associated with improved clinical outcomes with designated members of an active or expired NTIOL class.

- Evidence demonstrating that use of the IOL results in measurable, clinically meaningful, improved outcomes in comparison with use of currently available IOLs. According to the statute, and consistent with previous examples provided by CMS, superior outcomes that would be considered include the following:

- + Reduced risk of intraoperative or postoperative complication or trauma;
- + Accelerated postoperative recovery;
- + Reduced induced astigmatism;
- + Improved postoperative visual acuity;
- + More stable postoperative vision;
- + Other comparable clinical advantages, such as—
 - ++ Reduced dependence on other eyewear (for example, spectacles, contact lenses, and reading glasses)
 - ++ Decreased rate of subsequent diagnostic or therapeutic interventions, such as the need for YAG laser treatment.

- ++ Decreased incidence of subsequent IOL exchange.

- ++ Decreased blurred vision, glare, other quantifiable symptom or vision deficiency.

In order to assess the clinical performance of a candidate IOL to establish a new NTIOL class, outcomes from use of the candidate lens would be compared with outcomes of use of currently available IOLs. Due to the rapid evolution of medical technology, we expect that the baseline of currently available IOLs for comparison would change from year to year. It is our expectation that the current ASC payment adjustment for active NTIOL classes should support the development and dissemination of new IOL technologies that would continue to improve the clinical outcomes of Medicare beneficiaries furnished IOLs after cataract extraction.

Accordingly, we are proposing to revise our process for determining whether a lens belongs to a new class of NTIOLs for which an ASC payment adjustment is appropriate by setting forth the factors that we propose to

consider in making this determination. In addition, we are proposing to revise § 416.195 of the regulations to incorporate these proposed factors.

Further, we are seeking public comments on the desirability of further interpreting the phrase “currently available lenses” for purposes of comparison and specific approaches to providing such clarifications. We believe that further interpretation could be helpful to requestors seeking to provide the most relevant, authoritative evidence concerning the clinical benefits of their lenses in comparison with those currently available lenses and to us as we review the information provided in requests to establish new NTIOL classes. However, we also believe that any clarifications should incorporate our expectations for technological progression of the baseline comparison lenses over time as we make future annual determinations regarding the establishment of new NTIOL classes. Therefore, we believe that the public’s comments regarding practical and meaningful approaches to elaborating on the phrase “currently available lenses” would facilitate both requestors’ submission of complete requests for review and appropriate determinations by CMS regarding new NTIOL classes to receive the ASC payment adjustment.

d. Proposal To Revise Content of a Request To Review

To enable us to make a determination that the criteria for a payment adjustment for a new NTIOL class are met, we are proposing to require that a request include the information listed below. We are proposing to revise the content of a request (as currently set forth in § 416.195(a)) based on our experience in evaluating applications for OPFS pass-through status for new device categories over the past 6 years. We have found that the additional information allows our medical advisors to complete a more comprehensive evaluation, which would ensure that a payment adjustment is appropriate. We also have found that such information must be updated in a timely manner to ensure its relevancy to advancing technologies. Therefore, we also are proposing to post the information listed below on the CMS Web site at: <http://www.cms.hhs.gov/center/asc/asp> to provide easy access for updating rather than incorporating it in § 416.195(a) of the regulations.

In addition, we are proposing to continue to require that a separate request would be required for each NTIOL for which a payment review as member of a new class is sought. We are

proposing that a request that does not include all of the following information would be considered incomplete and could not be accepted for review until all information is furnished:

- Proposed name or description of a new class of NTIOLs.
- Trade/brand name, manufacturer, and model number of the IOL for which the request to establish a new NTIOL class is being made. (Applications must include the name and description of at least one marketed IOL that would be placed in the proposed new NTIOL class.)
- A list of all active or expired NTIOL classes that describe similar IOLs. For each active or expired class, provide a detailed explanation as to why that class would not describe the candidate IOL.
- Detailed description of the FDA approved clinical indications for the candidate IOL.
 - Description of the IOL—
 - + What is it? Provide a complete physical description of the IOL, including its components, for example, its composition; coating or covering; haptics; material; and construction.
 - + What does it do?
 - + How is it used?
 - + What makes it different from other currently available IOLs?
 - + What makes it superior to other currently available IOLs used for similar indications?
 - + What are its clinical characteristics, for example, is it used for treatment of specific pathology; what is its life span; what are the complications associated with its use; and for what patient populations is it intended?
 - + Submit relevant booklets, pamphlets, brochures, product catalogues, price lists, and/or package inserts that further describe and illuminate the nature of the IOL.
 - If the candidate IOL replaces or improves upon an existing IOL, identify the trade/brand name and model of the existing IOL(s).
 - Full discussion of the clinically meaningful, improved outcomes that result from use of the candidate IOL compared to use of other currently available IOLs. This discussion must include evidence to demonstrate that use of the IOL results in measurable, clinically significant improvement over currently available IOLs in one or more of the following areas:
 - + Reduced risk of intraoperative or postoperative complication or trauma.
 - + Accelerated postoperative recovery.
 - + Reduced induced astigmatism.
 - + Improved postoperative visual acuity;
 - + More stable postoperative vision.
 - + Other comparable clinical advantages, such as—

++ Reduced dependence on other eyewear (for example, spectacles, contact lenses, and reading glasses);

- Decreased rate of subsequent diagnostic or therapeutic interventions, such as the need for YAG laser treatment;
 - ++ Decreased incidence of subsequent IOL exchange; and
 - ++ Decreased blurred vision, glare or other quantifiable symptom or vision deficiency.
 - Provide the following information for the IOL(s) for which a new class is proposed:
 - + Dates the candidate IOL was first marketed, reporting inside the United States and outside the United States separately.
 - + Dates of sale of the first unit of the IOL, reporting inside the United States and outside the United States separately.
 - + Number of IOLs that have been sold up to the date of the application.
 - + A copy of the FDA’s original approval notification.
 - A copy of the labeling claims approved by the FDA for the IOL, indicating its clinical advantages and/or the lens characteristics with clinical relevance.
 - A copy of the FDA’s summary of the IOL’s safety and effectiveness.
 - Reports of modifications made after the original FDA approval.
- We strongly encourage and may give greater consideration for the submission of published, peer-reviewed literature and other materials that demonstrate substantial clinical improvement with use of the candidate IOL over use of currently available IOLs.
- Proposed § 416.190(d) provides that, in order for CMS to invoke the protection allowed under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552(b)(4)) and, with respect to trade secrets, the Trade Secrets Act (18 U.S.C. 1905), the requestor must clearly identify all information that is to be characterized as confidential.
- For the stated reasons, we are proposing to revise § 416.190 to reflect these proposed changes to the content of a request for payment review of an IOL, to clarify when a request can be submitted and who may submit, and to also clarify the process for maintaining confidentiality of information included in a request. As stated earlier, we are not proposing to incorporate the list of proposed information required with each request in the regulations, but are proposing to post it on the CMS Web site to ensure that such information is updated in a timely manner and relevant to advancing IOL technologies. We are proposing to revise § 416.190 to

require that the content of each request for an IOL review must include all information as specified on the CMS Web for the request to be considered complete.

e. Notice of CMS Determination

We are proposing three possible outcomes from review of a request for determination of a new NTIOL class. As appropriate, for each completed request for a candidate IOL that is received by the established deadline, one of the following determinations would be announced annually in the final rule updating the ASC payment rates for the next calendar year:

- The request for a payment adjustment is approved for the IOL for 5 full years as a member of a new NTIOL class described by a new code.

- The request for a payment adjustment is approved for the IOL for the balance of time remaining as a member of an active NTIOL class.

- The request for a payment adjustment is not approved.

We also are proposing to summarize briefly in the ASC final rule the evidence that was reviewed, the public comments, and the basis for our determination. When a new NTIOL class is established, we are proposing to identify the predominant characteristic of NTIOLs in that class that sets them apart from other IOLs (including those previously approved as members of other expired or active NTIOL classes) and is associated with improved clinical outcomes. The date of implementation of a payment adjustment in the case of approval of an IOL as a member of a new NTIOL class would be set prospectively as of 30 days after publication of the ASC payment update final rule, consistent with the statutory requirement. The date of implementation of a payment adjustment in the case of approval of a lens as a member of an active NTIOL class would be set prospectively as of the publication date of the ASC payment update final rule.

f. Proposed Payment Adjustment

The current payment adjustment for a 5-year period from the implementation date of a new NTIOL class is \$50. We are not proposing to revise this payment adjustment for CY 2007.

For CY 2007, we are proposing to revise § 416.200(a) through (c) to clarify how the IOL payment adjustment would be made and how an NTIOL would be paid after expiration of the payment adjustment. We also are proposing minor editorial changes to § 416.200(d).

XVIII. Proposed Revised Ambulatory Surgical Center (ASC) Payment System for Implementation January 1, 2008

A. Background

Generally, there are two primary elements in the total cost of performing a surgical procedure: the cost of the physician's professional services for performing the procedure and the cost of services furnished by the facility where the procedure is performed (for example, surgical supplies, equipment, nursing services, and overhead). The former is covered by the Medicare physician fee schedule. In 1980, a new Medicare benefit was enacted, authorizing payment of a fee to ASCs for facility services furnished in connection with performing certain surgical procedures.

The statute requires us to specify surgical procedures that are appropriately and safely performed on an ambulatory basis in an ASC. Moreover, we are to review and update the list of these procedures not less often than every 2 years, in consultation with appropriate trade and professional associations. The ASC list was limited in 1982 to approximately 100 procedures. Currently, the list consists of more than 2,500 CPT codes encompassing a cross-section of surgical services, although 150 of these codes account for more than 90 percent of the approximately 4.5 million procedures paid for each year under the ASC Part B benefit. Eye, pain management, and gastrointestinal endoscopic procedures are the highest volume ASC surgeries under the present payment system.

Medicare only allows payment to ASCs for procedures on the ASC list. Medicare pays 80 percent of the prospectively determined fee; the coinsurance rate is 20 percent for all procedures on the ASC list. In Pub. L. 108–173, the Congress mandated implementation of a revised payment system for ASC surgical services by no later than January 1, 2008. Pub. L. 108–173 sets forth several requirements for the revised payment system, but does not amend those provisions of the statute pertaining to the ASC list.

In section XVIII. of this preamble, we describe the provisions of the revised ASC payment system that we are proposing to implement, as required by Pub. L. 108–173, not later than January 1, 2008. Our proposal encompasses two components: first, our proposal for establishing and maintaining the ASC list of Medicare approved procedures under the revised payment system, and second, the method we are proposing to use to set payment rates for ASC facility services furnished in association with

procedures on the ASC list. We also discuss in this section regulatory changes that we are proposing to 42 CFR parts 416 and 488 to incorporate the rules governing ASC facility payments under the revised payment system that would be applicable beginning in CY 2008.

1. Provisions of Pub. L. 108–173

Section 626(a) of Pub. L. 108–173 amended section 1833(i)(2)(C) of the Act, which requires the Secretary to update ASC payment rates using the Consumer Price Index for all urban consumers (U.S. City average) (CPI-U) if the Secretary has not otherwise updated the amounts under the revised ASC payment system. As amended by Pub. L. 108–173, this section requires that if the Secretary is required to apply the CPI-U increase, the CPI-U percentage increase is to be applied on a fiscal year basis beginning with FY 1986 through FY 2005 and on a calendar year basis beginning with 2006.

Pub. L. 108–173 further amended section 1833(i)(2)(C) of the Act to require us in FY 2004, beginning April 1, 2004, to increase the ASC payment rates using the CPI-U as estimated for the 12-month period ending March 31, 2003, minus 3.0 percentage points. Pub. L. 108–173 also requires that the CPI adjustment factor equal zero percent in FY 2005, the last quarter of CY 2005, and each CY from 2006 through 2009.

Section 626(b) of Pub. L. 108–173 repeals the requirement that CMS conduct a survey of ASC costs upon which to base a standard overhead payment amount for surgical services performed in ASCs, and adds section 1833(i)(2)(D)(iii) to the Act, which requires us to implement by no earlier than January 1, 2006, and not later than January 1, 2008, a revised ASC payment system. The revised payment system under section 1833(i)(2)(D)(i) of the Act is to take into account the recommendations contained in a Report to Congress that the GAO was required to submit by January 1, 2005. Section 1833(i)(2)(D)(ii) of the Act requires that the revised ASC payment system be designed to result in the same aggregate amount of expenditures for surgical services furnished in ASCs the year the system is implemented as would be made if the new system did not apply as estimated by the Secretary. This requirement is to take into account the limitation in ASC expenditures resulting from implementation of section 5103 of Pub. L. 109–171 beginning January 1, 2007, as we describe in section XVII.A.1 of this preamble.

Section 1833(i)(2)(D)(iv) of the Act exempts the classification system, relative weights, payment amounts, and geographic adjustment factor (if any) under the revised ASC payment system from administrative and judicial review.

Section 626(c) of Pub. L. 108–173 adds a conforming amendment to section 1833(a)(1) of the Act providing that the amounts paid under the revised ASC payment system shall equal 80 percent of the lesser of the actual charge for the services or the payment amount that we determine.

2. Other Factors Considered

On August 2, 2005, we convened a listening session teleconference on revising the Medicare ASC payment system. Over 450 callers participated, including ASC staff, physicians, and representatives of industry trade associations. The listening session provided an opportunity for participants to identify the issues and concerns that they wanted us to address as we developed the revised ASC payment system.

Callers encouraged us to foster beneficiary access to ASCs by creating incentives for physicians to use ASCs. The issues raised by participants included suggestions to expand or eliminate altogether the ASC list, recommendations to model payment on the hospital OPPIs, and concerns about how we would propose to treat the geographic wage index adjustment and the annual ASC payment rate update. Several callers also raised concerns about ensuring adequate payment for supplies, ancillary services, and implantable devices under the new payment system, as well as developing a process to allow special payment for new technology.

We have also met with representatives of the ASC industry over the past several years to discuss options for ratesetting other than conducting a survey, to discuss timely updates to the ASC list, and to listen to industry concerns related to the implementation of a new payment system. We appreciate the thoughtful suggestions that have been presented. We have carefully considered the concerns and issues brought to our attention, and a number of the proposals in this section for revising the ASC list and the method by which we set ASC payment rates take these concerns and issues into account. We look forward to receiving comments on the proposed changes set forth in this proposed rule and to continued input from representatives of industry associations and professional societies as we develop the final rule.

B. Procedures Proposed for Medicare Payment in ASCs Effective for Services Furnished On or After January 1, 2008

1. Proposed Payable Procedures

(If you choose to comment on issues in this section, please include the caption “ASC Payable Procedures” at the beginning of your comments.)

In its March 2004 Report to the Congress, MedPAC recommended replacing the current “inclusive” list of procedures, which are the only procedures for which Medicare allows payment of an ASC facility fee, with an “exclusionary” list. That is, rather than limiting payment of an ASC facility fee to a list of procedures that CMS specifies, Medicare would allow payment to an ASC facility for any surgical procedure except those that CMS explicitly excludes from payment. MedPAC further recommended that clinical safety standards and the need for an overnight stay be the only criteria for excluding a procedure from payment of an ASC facility fee. MedPAC suggested that some of the criteria, such as site-of-service volume and time limits, which we have used in the past to identify procedures for the ASC list, are probably no longer clinically relevant.

We have given careful consideration to MedPAC’s recommendations and participated in considerable discussion and consultation with members of ASC trade associations and physicians who represent a variety of surgical specialties regarding the criteria that we would use to identify procedures that we would propose for payment under the new ASC payment system. We agree that adoption of a policy like that recommended by MedPAC would serve both to protect beneficiary safety and increase beneficiary access to procedures in appropriate clinical settings, recognizing the ASC industry’s interest in obtaining Medicare payment for a much wider spectrum of services than is now allowed. Therefore, we are proposing that, under the revised ASC payment system for services furnished on or after January 1, 2008, Medicare would allow payment of an ASC facility fee for any surgical procedure performed at an ASC, except those surgical procedures that we determine are not payable under the ASC benefit.

Further, we are proposing to establish beneficiary safety and the need for an overnight stay as the principal clinical considerations and factors in determining whether payment of an ASC facility fee would be allowed for a particular surgical procedure. As discussed in section XVIII.B.2 below, we also are proposing to exclude from

payment under the ASC revised payment system those surgical procedures that are not eligible for separate payment under the OPPIs and CPT surgical unlisted procedure codes.

We discuss below the criteria that we are proposing as the basis for identifying procedures that would pose a significant safety risk to a Medicare beneficiary when performed in an ASC, or procedures following which we would expect a Medicare beneficiary to require overnight care.

a. Proposed Definition of Surgical Procedure

In order to delineate the scope of procedures that constitute “outpatient surgical procedures,” we must first clarify what we consider to be a “surgical” procedure. Under the current ASC payment system, we define as a surgical procedure any procedure described within the range of CPT Category I codes that the AMA defines as “surgery” (CPT codes 10000–69999) for purposes of the ASC payment system. Under the revised payment system, we are proposing to continue that standard. However, we seek comment on whether all services contained in this range are appropriately defined as “surgery.” For example, should procedures that are primarily office-based (see Addendum CC) or procedures that require relatively inexpensive resources to perform be excluded from the list? Within the CPT surgical code range, such procedures that either require very limited facility resources or are primarily performed in procedure rooms in physician offices could be considered not to be surgical procedures, in that they may not require typical surgical resources, such as a fully equipped operating room or significant postoperative recovery area, that are generally associated with surgical procedures that are predominantly performed in facility settings or have significant associated resource costs. Procedures that require relatively inexpensive resources to perform could be defined based on an ASC payment threshold, for example \$100 or \$200, such that procedures below this threshold would be excluded from the ASC list of procedures. We seek comment on what an appropriate payment threshold would be for defining procedures that require relatively inexpensive resources.

In addition, we are proposing to include within the scope of surgical procedures payable in an ASC certain services that are described by HCPCS alphanumeric codes (Level II HCPCS codes) or by CPT Category III codes which directly crosswalk to or are

clinically similar to procedures in the CPT surgical range. We are proposing to include these three types of codes in our definition of surgical procedures because they all are eligible for payment under the OPps and, to the extent it is reasonable to do so, we are proposing that the new ASC payment system parallel the OPps in its policies.

An example of a Level II HCPCS code that we believe represents a procedure that could be safely and appropriately performed in an ASC is HCPCS code G0297 (Insertion of single chamber pacing cardioverter defibrillator pulse generator). We developed this alphanumeric code for use in the OPps because CPT code 33240, which describes the surgical insertion of cardioverter defibrillator pulse generators, does not distinguish insertion of a single chamber cardioverter defibrillator generator from insertion of a dual chamber cardioverter defibrillator generator. We were concerned that different facility resources could be required for the insertion of these two types of cardioverter defibrillator pulse generators, so we developed alternate codes to permit hospitals to more accurately report the resources required when these surgical procedures are performed for payment under the OPps. In instances such as this, when an alphanumeric Level II HCPCS code is established as a substitute for a CPT surgical procedure code which does not adequately describe, from a facility perspective, the nature of a surgical service, we are proposing to allow payment for the alphanumeric code under the proposed new ASC payment system. We are proposing not to allow payment of an ASC facility fee for Level II HCPCS codes or Category III CPT codes that describe services which fall outside the scope of surgical procedures described by CPT codes 10000–69999.

We recognize that continuing to use this definition of surgery would exclude from payment of an ASC facility fee certain invasive, “surgery-like” procedures, such as cardiac catheterization or certain radiation treatment services which are assigned codes outside the CPT surgical range. However, we believe that continuing to rely on the CPT definition of surgery would be administratively straightforward, uncontroversial, and consistent with our proposal to allow ASC payment for all outpatient surgical procedures. Since 1987, the ASC list has consisted of CPT codes that are defined as surgery by CPT. Given the number of other changes that we expect to be implemented as part of the proposed new payment system, along with the

significant expansion of the ASC list that we are proposing, we believe that it would be prudent at the outset to continue to define surgery as it is defined by the CPT code set, which is used to report services for payment under both the Medicare Physician Fee Schedule (MPFS) and the OPps.

However, we are interested in commenters’ opinions regarding the appropriateness of including primarily office-based procedures or including procedures that require relatively inexpensive resources to perform on the approved list of ASC procedures and we seek comment on this issue. That said, we have reviewed thousands of CPT codes in the surgical range (CPT codes 10000 through 69999), and we are proposing to not exclude payment for more than 750 additional surgical procedures, as well as continuing to not exclude payment for the more than 2,500 CPT codes on the current ASC list. If we were to consider CPT codes in the surgical range that were predominantly office-based to not be surgical procedures for purposes of the ASC payment system, the additions to the ASC list for CY 2008 would be limited to no more than about 300 other procedures. Similarly, if we were to define procedures requiring relatively inexpensive resources to not be surgical procedures, then additions to the ASC list for ASC payment would be more limited than under our current proposal.

However, we are cognizant of the dynamic nature of ambulatory surgery, which has resulted in a dramatic shift of services from inpatient to outpatient settings over the past two decades. Therefore, we are soliciting comments regarding other services which are invasive and “surgery-like,” which could safely and appropriately be performed at an ASC, and which require the resources typical of an ASC, even though the procedures are described by codes that fall outside the range of CPT surgical codes. In particular, we would be interested in considering commenters’ views of what constitutes a “surgical” procedure.

b. Procedures Proposed for Exclusion From Payment Under the Revised ASC System

As stated above, we are proposing to allow payment of an ASC facility fee for all procedures within the surgical range of CPT codes that do not pose a safety risk to Medicare beneficiaries or require an overnight stay. Having established what we would propose as constituting a “surgical procedure,” we next considered criteria that would enable us to identify procedures that could pose a significant safety risk when performed

in an ASC or that would require an overnight stay within the bounds of prevailing medical practice. We discuss in this section how we propose to identify procedures that could pose a significant safety risk.

(1) Significant Safety Risk

First, we are proposing to exclude from payment of an ASC facility fee any procedure that is included on the current OPps inpatient list. (See Addendum E to this proposed rule and section XII. of this preamble for a discussion of the OPps inpatient list.) The procedures included on that list are typically performed in the inpatient hospital setting due to the nature of the procedure, the need for at least 24 hours of postoperative recovery time or monitoring before the patient can be safely discharged, or the underlying physical condition of the patient. We believe that any procedure for which we do not allow payment in the hospital outpatient setting due to safety concerns would not be safe to perform in an ASC.

Second, we are proposing to exclude from payment of an ASC facility fee procedures that the CY 2005 Part B Extract Summary System (BESS) data indicate are performed 80 percent or more of the time in the hospital inpatient setting, even if those procedures are not included on the OPps inpatient list. (See Table 4.) We selected an 80 percent threshold because we believe that an 80 percent level of inpatient performance is a fair indicator that a procedure is most appropriately performed on an inpatient basis and as such, would pose significant safety risks for Medicare beneficiaries if performed in an ASC. We find that procedures with inpatient utilization frequencies above this proposed threshold are complex and are likely to require a longer and more intensive level of care postoperatively than what is provided in a typical ASC. We believe that performing these procedures in an ASC, where immediate access to the full resources of an acute care hospital is not the norm, would pose a significant safety risk for beneficiaries.

Third, we are proposing to retain the specific criteria for evaluating safety risks that are listed in § 416.65(b)(3). Procedures that involve major blood vessels; prolonged or extensive invasion of body cavities; extensive blood loss; or are emergent or life-threatening in nature could, by definition, pose a significant safety risk. Therefore, we are proposing to exclude from payment of an ASC facility fee, procedures that may be expected to involve any of these characteristics based on evaluation by

our medical advisors. We note that most of the procedures that our medical advisors identified as involving any of the characteristics listed currently in § 416.65(b)(3), also require overnight or inpatient stays, reinforcing their exclusion from being paid when performed in an ASC.

Finally, we are proposing not to continue applying under our proposed revised system the current time-based prescriptive criteria at § 416.65(b)(1) and (2), which exclude from the ASC list procedures that exceed 90 minutes of operating time or 4 hours of recovery time or 90 minutes of anesthesia. We believe these criteria are no longer clinically appropriate for purposes of defining a significant safety risk for surgical procedures.

In light of these proposed changes for evaluating procedures that pose a significant safety risk for beneficiaries under our proposed revised system, we believe that it would not be appropriate to apply the existing standard at § 416.65(a)(1), which states that covered surgical procedures are those that are commonly performed on an inpatient basis but may be safely performed in an ASC, because this standard is no longer relevant to prevailing medical practice in the realm of ambulatory or outpatient surgery. Similarly, we believe that it would not be appropriate to continue applying the existing standard at § 416.65(a)(2), which states that procedures performed in an ASC are not of a type that are commonly performed, or that may be performed in a physician's office. This standard is no longer relevant within the context of our proposal only to exclude from payment of an ASC facility fee under the revised payment system those surgical procedures that pose a safety risk or require an overnight stay. We would expect the types of procedures that are commonly performed or that may be performed in a physician's office to pose no significant safety risk and to require no overnight care.

Therefore, we are proposing to add new subpart F to reflect coverage, scope and payment for ASC services under the revised payment system. Included in these changes will be new § 416.166 that will reflect these changes that we are proposing to our current policy for evaluating and identifying those procedures that would pose a significant safety risk for beneficiaries and would be excluded from our list of ASC covered procedures beginning January 1, 2008. To set apart the provisions that are applicable to our current ASC payment system from those that would apply to our proposed revised system, we are proposing to revise the section

headings of subparts D and E to clearly denote the provisions that would govern covered surgical procedures furnished before January 1, 2008. We also will add new §§ 416.76 and 416.121 to clearly denote the effective dates of subparts D and E.

(2) Overnight Stay

A longstanding criterion for determining which procedures are appropriate for inclusion on the ASC list has been that the procedures on the list do not require an extended recovery time. Section 416.65(a)(3) of the regulations provides that ASC procedures "[a]re limited to those requiring a dedicated operating room (or suite), and generally requiring a post-operative recovery room or short-term (not overnight) convalescent room." Under § 416.65(b)(1)(ii), we have considered procedures that require more than 4 hours recovery or convalescent time to be inappropriately performed in the ASC.

We have heard many differing opinions as to what constitutes an "overnight" stay, ranging from "more than 24 hours" to time spent in recovery after sunset. After careful deliberation and consideration of several options, we are proposing to exclude from payment of an ASC facility fee any procedure for which prevailing medical practice dictates that the beneficiary will typically be expected to require active medical monitoring and care at midnight following the procedure. Our clinical staff evaluated each procedure using available claims and physician pricing data, as well as clinical judgment, to determine which procedures would be expected to require monitoring at midnight of the day on which the surgical procedure was performed.

We are proposing to use midnight as the defining measure of an overnight stay for several reasons. First, a patient's location at midnight is a generally accepted standard for determining his or her status as a hospital inpatient or skilled nursing facility patient and as such, it seems reasonable to apply the same standard in the ASC setting. Second, overnight care is not within the scope of ASC facility services for which Medicare makes payment. The expectation is that procedures performed at an ASC are ambulatory in nature; that is, patients undergoing a procedure in an ASC will recover from anesthesia and return home on the same day that they report to the ASC for a scheduled procedure. Finally, the expected need for monitoring at midnight is a straightforward and easily understood definition of "overnight

stay." We are proposing to add the requirement that procedures not require an overnight stay to proposed new § 416.166.

2. Proposed Treatment of Unlisted Procedure Codes and Procedures That Are Not Paid Separately under the OPPS

(If you choose to comment on issues in this section, please include the caption "ASC Unlisted Procedures" at the beginning of your comment.)

Unlisted procedure CPT codes are used to report services and procedures that are not accurately described by any other, more specific CPT codes. An example of an unlisted CPT code is 33999 (Unlisted procedure, cardiac surgery). Within the surgical range of CPT codes, there are 91 such codes. None of the unlisted CPT codes in the surgical range is on the current ASC list of approved procedures. Under the OPPS, we assign unlisted CPT codes to the lowest weighted APC in the relevant clinical group regardless of the median cost for the unlisted procedure code, and we do not include the highly variable claims-based cost information for unlisted services in calculating APC median costs for purposes of establishing APC relative payment weights. Payment for unlisted CPT codes is made only at the discretion of the carrier under the MPFS.

Because of concerns about the potential for safety risks when procedures that may only be reported with CPT unlisted procedure codes are performed, we are proposing to continue excluding unlisted procedure codes from payment of an ASC facility fee. For example, when CPT code 33999 is reported on a claim, we know only that some kind of cardiac surgery was performed. We have no other information about the procedure, and we have no way of knowing whether the procedure involved major blood vessels, prolonged or extensive invasion of body cavities, extensive blood loss, or was emergent or life-threatening in nature. Therefore, because of potential safety concerns, we are proposing to continue to exclude the unlisted surgical codes from payment of an ASC facility fee under the revised payment system.

Prior to our evaluation of surgical procedure codes for their safety risk, we decided to propose that we would not make separate payment under the revised ASC payment system for CPT codes in the surgical range that are "packaged" under the OPPS. Packaged CPT codes under the OPPS are identified by status indicator 'N' in Addendum B of this proposed rule. We are making this proposal for three reasons. First, we would not be able to

establish an ASC payment rate for packaged surgical procedures using the same method we are proposing for all other ASC procedures because packaged surgical codes have no relative payment weights under the OPPI upon which to base an ASC payment rate. Second, because we want an ASC system that is as similar to the OPPI as possible, we believe that surgical procedures whose costs we package under the OPPI should also be packaged in the ASC system. Finally, ASCs, just like hospitals, would receive payment for these surgical procedures because their costs are already packaged into the APC relative payment weights for associated separately payable procedures, for which we are proposing to pay a derivative ASC facility fee.

3. Proposed Treatment of Office-Based Procedures

(If you choose to comment on issues in this section, please include the caption "ASC Office-Based Procedures" at the beginning of your comment.)

According to the general standard in § 416.65(a)(2) of the regulations, procedures that "are commonly performed, or that may be safely performed, in physicians' offices" are excluded from the ASC list. We are not proposing to continue to apply this provision under our revised system. Rather we are proposing to allow payment of an ASC facility fee for surgical procedures that are commonly and safely performed in the office setting. We reason that the types of procedures performed in physician offices would neither pose a significant safety risk nor require an overnight stay when performed in an ASC. However, we have concerns that allowing payment for office-based procedures

under the ASC benefit may create an incentive for physicians inappropriately to convert their offices into ASCs or to move all their office surgery to an ASC. In section XVIII.C.5 below, to address this concern, we propose to limit payment for office-based procedures to help neutralize any such incentive. We also propose in new § 416.171(e) to set forth rules governing office-based procedures. We specifically invite comment regarding the effect on the Medicare program and on practice patterns for ambulatory surgery generally of our proposal to allow payment of an ASC facility fee for office-based procedures that historically have been excluded from the ASC list.

As discussed elsewhere in this proposed rule, we are proposing to limit payment for office-based procedures in an attempt to mitigate potentially inappropriate migration of services from the physician office setting to the ASC. Alternatively, we could entirely exclude office-based procedures or procedures that require relatively inexpensive resources to perform from the approved ASC list of procedures.

4. Listing of Surgical Procedures Proposed for Exclusion From Payment of an ASC Facility Fee Under the Revised Payment System

Tables 44 and 45 below, list the codes and short descriptors for surgical procedures that, in addition to the codes that comprise the inpatient list in Addendum E of this proposed rule, we are proposing to exclude from payment of an ASC facility fee for services furnished on or after January 1, 2008 because they pose a significant safety risk or require an overnight stay. We discuss in section XVIII.B.1.b.(1) above, our rationale for excluding the

procedures in Table 44 from payment of an ASC facility fee.

For many of the procedures listed in Table 45, several disqualifying criteria could be applicable, such as "requires inpatient stay" or "could potentially cause extensive blood loss" or "is emergent in nature." Rather than list multiple disqualifying criteria for individual codes in Table 45, we have defaulted to the one characteristic that is common to all the codes listed. That is, we believe that, at a minimum, prevailing medical practice would dictate the provision of overnight care following each of the procedures listed in Table 45. We acknowledge that we had to exercise a degree of clinical judgment in identifying procedures for which we are proposing to exclude payment of an ASC facility fee. Therefore, we are soliciting comments on the appropriateness of excluding these procedures from payment of an ASC facility fee under the revised payment system. We request that commenters who disagree with a proposed exclusion from payment of an ASC facility fee submit clinical evidence that demonstrates that the criteria we are proposing in proposed new § 416.166 of the regulations are not factors when the procedure is performed in the majority of cases, including data to support that the preponderance of Medicare beneficiaries upon whom the procedure is performed do not require overnight care or monitoring following the surgery. Simply asserting that the procedure can be safely performed in an ASC without providing corroborative evidence and data does not furnish us with sufficient information upon which to make an informed decision.

C. Proposed Ratesetting Method

1. Overview of Current ASC Payment System

(If you choose to comment on issues in this section, please include the caption "ASC Ratesetting" at the beginning of your comment.)

The current ASC payment system consists of 9 standard overhead amounts ranging from \$333 to \$1339, based on data collected in a 1986 survey of ASC costs. An ASC payment "group" currently consists of all the procedures assigned to a particular standard overhead amount. ASC payment groups are heterogeneous in terms of clinical characteristics, cutting across all body systems and types of surgery. Medicare pays a \$150 allowance for IOLs that are inserted during or subsequent to cataract surgery and an additional \$50 for IOLs that we approved as NTIOLs. Medicare also makes separate payment for implantable prosthetic devices and implantable durable medical equipment surgically inserted at an ASC. Payment for all other facility services that are directly related to performing a surgical procedure is packaged into the prospectively determined ASC facility fee.

The statute requires that ASC facility services amount be increased by the CPI-U in years when the amounts are not updated. However, since 1990, the Congress has frozen or reduced the update adjustment for periods of varying duration. ASC payment rates are currently frozen at their FY 2003 level.

Carriers account for geographic wage variations when calculating individual ASC payments by applying the hospital IPPS wage index value established for the county in which the ASC is located to 34.45 percent of the national ASC standard overhead amount. The 1986 survey data are the basis for attributing 34.45 percent of ASC overhead costs to labor-related expenses. Medicare pays 80 percent of the standard overhead amount; the beneficiary coinsurance rate is 20 percent for all procedures on the list of Medicare approved ASC procedures.

The standard overhead amounts for procedures on the ASC list were last rebased in 1990 using data collected in a 1986 survey of ASC costs. The process and methodology that we used to establish the current payment system are explained in the February 8, 1990 **Federal Register** (55 FR 4526). In the June 12, 1998 **Federal Register**, we issued a proposed rule to revise the ASC payment rates and ratesetting methodology based on data collected in a 1994 survey of ASC costs (63 FR 32290). In that proposed rule, we also proposed to expand the ASC list and establish payment groups similar to those being considered for the hospital OPPI, which was under development at the time, but which was not implemented until August 2000. Although we never implemented the revised ASC payment rates and ratesetting methodology proposed in 1998, we did make final some of the 1998 proposed additions to the ASC list in the March 28, 2003 final rule with comment period (68 FR 15268). In that

rule, we explained in detail why we did not implement the ratesetting methodology and payment amounts proposed in the June 12, 1998 proposed rule.

The ASC payment system that we are proposing in this proposed rule would implement requirements set forth in section 626 of Pub. L. 108-173. The revised payment system mandated by section 626(d) of Pub. L. 108-173 requires us to take into account recommendations in a report to Congress prepared by the GAO. The GAO recommendations are to be based on its study of the comparative relative costs of procedures furnished in ASCs and procedures furnished in hospital outpatient departments paid under the OPPI, and the extent to which the APCs reflect procedures performed in ASCs. Although the statutory due date for this report is January 1, 2005, CMS has not yet received the report or recommendations from the GAO. We are moving forward with our proposal for a revised ASC payment system without the benefit of GAO's recommendations because we are concerned that further delay would not give the public sufficient opportunity to review and comment on our proposed methodology, and the ASC industry and CMS would not have adequate time to prepare for changes scheduled for implementation January 1, 2008.

2. Proposal to Base ASC Relative Payment Weights on APC Groups and Relative Payment Weights Established Under the OPPTS

We considered several strategies and methodologies for setting ASC payment rates under a revised payment system. We could require ASCs to submit modified cost reports as a basis for establishing ASC costs. We could simply expand the number and payment range of the current ASC payment groups. We could base payments to ASCs on the relative weights for surgical services established under the MPFS. We could base payments to ASCs on the relative weights for surgical services established under the Medicare OPPTS, as suggested in Pub. L. 108–173. We could base payments to ASCs on a flat percentage of the payment for the same services established under the OPPTS, as advocated by representatives of several ASC associations.

After carefully reviewing the advantages and disadvantages of each of these approaches, we are proposing, within the parameters of section 626 of Pub. L. 108–173, to use the APC groups and the relative payment weights for surgical procedures established under the OPPTS as the basis of the payment groups and the relative payment weights for surgical procedures performed at ASCs. These payment weights would be multiplied by an ASC conversion factor in order to calculate the ASC payment rates. Several factors persuaded us to advance this proposal over the other approaches that we considered.

First, in section 626(d) of Pub. L. 108–173, the Congress explicitly targets the OPPTS for consideration by the GAO in its study of ASC payments. We believe it is reasonable to assume that Congress, by so doing, was highlighting the relative payment weights under the OPPTS as a theoretical model for ASC relative payment weights under the revised payment system. Second, the ASC benefit provides payment for facility services associated with performing surgical procedures. The OPPTS has equipped us with nearly a decade of experience in developing and refining a relative payment system for facility services furnished in connection with outpatient surgical procedures.

Third, Pub. L. 108–173 applies for the first time a budget neutrality requirement to the ASC benefit. That is, in the year the revised system is implemented, the system is to be designed to result in the same aggregate amount of expenditures that would be made if the revised payment system were not implemented. Because the OPPTS is also a prospective payment

system for facility services that is subject to budget neutrality requirements, it provides useful parallels for a ratesetting methodology based on relative facility payment weights for surgical services under the revised ASC payment system.

Fourth, in our analysis of the APC groups to which surgical procedures are assigned for payment under the OPPTS, we found a significant overlap between surgical procedures furnished in the hospital outpatient setting and those performed in ASCs. Currently, of the 150 highest volume surgical procedures furnished in hospital outpatient departments, more than half (80) are also among the 150 highest volume procedures performed in ASCs.

Finally, the ASC industry in numerous meetings with us over the past several years has frequently voiced its preference for a payment system that parallels the OPPTS for the sake of promoting transparency across sites of service in the arena of outpatient surgery and to streamline and modernize how Medicare sets payments and determines what is payable under the ASC benefit.

As we explain in sections I through XVI of this proposed rule, the OPPTS payment rates are based on relative payment weights which are updated annually. APCs to which surgical procedures are assigned are generally homogeneous both in terms of clinical characteristics and resource requirements. The APCs have been continually refined over the past 6 years through the work of the APC Panel and as a result of comments received during the OPPTS annual rulemaking cycles.

Moreover, we believe that the APC groups and the relativity in resource utilization among APCs containing surgical procedures have matured so that they are reasonable and appropriate models for grouping outpatient surgical procedures and determining the relativity in the ASC payment weights in terms of clinical and resource homogeneity. For example, whether performed in a hospital outpatient department or in an ASC, we believe the time and facility resources required to perform a routine laparoscopic hernia repair (CY 2006 OPPTS relative payment weight of 43.0498) are approximately 4 times higher than those required to perform a diagnostic colonoscopy (CY 2006 OPPTS relative payment weight of 8.5588). Thus, we believe that the relative payment weights established under the OPPTS for procedures performed in the outpatient hospital setting reasonably reflect the relative resources required for such procedures and do so with sufficient coherence to

be applicable to other ambulatory sites of service. Taking all these factors into account, we are proposing to use the APCs as a “grouper” and the APC relative payment weights as the basis for ASC relative payment weights and for calculating ASC payment rates under the revised payment system.

Accordingly, we are proposing to establish provisions in proposed new subpart F §§ 416.167, 416.169, and 416.171 to reflect these proposed changes for calculating the ASC payment rates beginning January 1, 2008.

In the following sections, we focus on several additional basic assumptions that affect how we are proposing to calculate the ASC payment rates for implementation in January 2008.

3. Proposed Packaging Policy

(If you choose to comment on issues in this section, please include the caption “ASC Packaging” at the beginning of your comment.)

Payment for a surgical procedure under both the current OPPTS and ASC payment systems represents payment for a package of various items and services, all of which are directly related and required in order to perform the procedure. In both systems, we package into a single facility fee the payment for a bundle of direct and indirect costs incurred by the facility to perform the procedure. These costs include, but are not limited to, use of the facility, including an operating suite or procedure room and recovery room; nursing, technician, and related services; administrative, recordkeeping and housekeeping items and services; medical and surgical supplies and equipment; surgical dressings; and materials for anesthesia.

Medicare currently applies different rules under the ASC payment system and the OPPTS system for determining whether payment for other items and services directly related to a surgical procedure is packaged into the facility payment for the associated surgical procedure or paid for separately. These other items and services include drugs, biologicals, contrast agents, implantable devices, and diagnostic services such as imaging. Currently, Medicare packages payment for the costs for all drugs, biologicals, and diagnostic services, including imaging, into the ASC standard overhead amount for the surgical procedure with which these items and services are associated. Under the OPPTS, Medicare pays separately for some of these items and services, in addition to paying for the surgical procedure.

ASCs currently receive separate payment for prosthetic implants and implantable durable medical equipment (DME). Conversely, under the OPPS, payment for prosthetic implants and implantable DME is packaged into the facility fee for the surgical procedure performed to insert the implants. Payment for IOLs and implantable surgical supplies, such as stents, mesh, guide wires, pins, and catheters is packaged into the associated surgical facility fee under both the OPPS and the ASC payment systems. We considered several packaging options for the revised ASC payment system. First, we considered making no change to the current policy regarding items and services for which payment is packaged into the ASC facility fee. That is, we would continue under the revised ASC payment system to package into the facility fee payment for overhead, payment for all drugs, biologicals, surgical dressings, supplies, splints, casts, and appliances and equipment directly related to the provision of surgical procedures; diagnostic or therapeutic services or items directly related to the provision of a surgical procedure; materials for anesthesia; and IOLs. In addition, we would continue to pay separately under other fee schedules for items and services such as NTIOLs, prosthetic implants and implantable DME surgically inserted at an ASC (DMEPOS fee schedule); laboratory services (clinical lab fee schedule); physician services (MPFS); and X-ray or diagnostic procedures other than those directly related to performance of the surgical procedure (MPFS). Section 416.164(a) addresses the services for which payment is included in the ASC facility fee, and § 416.164(b) addresses those services that are not included in the ASC facility fee.

We also considered proposing to apply the OPPS packaging rules to the ASC payment system and to pay under the new ASC system the same way we pay under the OPPS for items and services directly related to a surgical procedure. If we adopted this option, payment for certain imaging procedures, drugs, biologicals, and contrast agents directly related to performing a surgical procedure would not be packaged into the facility fee for the procedure but would, instead, be paid separately. Conversely, payment for most surgically implanted devices and implantable DME would be packaged.

Each of the preceding two options have characteristics that are inconsistent with a fundamental principle of a prospective payment system, which is to base payment on large bundles of

items and services so as to promote the efficient provision of services. To preserve as much as possible the elements of a prospective payment system within the revised ASC payment system, we are proposing a third option. That is, we are proposing to continue the current policy of packaging into the ASC facility fee payment all direct and indirect costs incurred by the facility to perform a surgical procedure. This would include payment for all drugs, biologicals, contrast agents, anesthesia materials, and imaging services, as well as the other items and services that are currently packaged into the ASC facility fee as listed in § 416.164(a).

In addition, we are proposing to cease making separate payment for implantable prosthetic devices and implantable DME inserted surgically at an ASC. Instead, under the revised payment system, we are proposing to package into the ASC facility fee payment for implantable prosthetic devices and implantable DME when they are surgically inserted, as we do under the OPPS.

However, we are proposing to continue excluding from payment as part of the ASC facility fee the other services addressed in § 416.164(b). That is, payment for items and services for which payment is made under other Part B fee schedules, with the exception of implantable prosthetic devices and implantable DME, would not be included in the ASC facility fee. Payment for items and services, such as physicians' professional services, for laboratory, X-ray or diagnostic procedures (other than those directly related to performance of the surgical procedure), nonimplantable prosthetic devices, ambulance services, leg, arm, back and neck braces, artificial limbs, and durable medical equipment for use in the patients' home would not be included in the ASC facility fee.

We are proposing this option for a number of reasons. First, this approach to packaging is most consistent with the principles of a prospective payment system. Second, we believe that ASCs generally treat a less complex and severely ill patient case mix and, as a result, we believe that ASCs are less likely to provide on a regular basis many of the separately paid items and services that patients might receive more consistently in a hospital outpatient setting. Thus, we do not believe there is a need to pay for these services separately in ASCs, because that would unbundle some items and services that are currently packaged into the ASC facility fee, reduce incentives for cost-efficient delivery of services at ASCs, and increase the complexity of

the revised ASC payment system. In addition, we believe it is critical to continue to focus the ASC payment system on appropriate payment for surgical services provided in ASCs.

Moreover, after careful analysis of OPPS claims for surgical procedures, we were unable to identify ancillary items and services that are repeatedly and consistently reported separately in association with specific ambulatory surgical procedures. Rather, the OPPS claims for surgical procedures were of two types: one group showed a broad range of items and services that were provided on the same day that a surgical procedure was performed in the hospital outpatient department, only some of which were likely to be directly related to the surgical procedure; the second group of claims revealed that many surgical procedures are only infrequently associated with ancillary items and services paid separately under the OPPS. Therefore, we are proposing to reflect this proposed packaging policy in proposed new § 416.164.

We are seeking comments from ASC clinical and administrative staff and from physicians who perform surgery at ASCs regarding nonsurgical ancillary services or items that are directly related to a surgical procedure that would be paid separately under the OPPS but that would be packaged under our proposal for the revised ASC payment system. We are specifically requesting that commenters provide data to indicate the frequency with which specific items and services are typically furnished in association with given procedures, the reasons why one patient might require the additional items and services whereas another patient would not, and the costs of those items and services relative to the other costs incurred to perform the associated surgery.

4. Payment for Corneal Tissue Under the Revised ASC Payment System

(If you choose to comment on issues in this section, please include the caption "ASC Payment for Corneal Tissue" at the beginning of your comment.)

In a memorandum dated May 21, 1992, CMS (known at the time as the Health Care Financing Administration or "HCFA") notified Regional Administrators that carriers could pay corneal tissue acquisition costs when HCPCS code V2785 (Processing, preserving and transporting corneal tissue), is reported with corneal transplant procedures performed in an ASC. The memorandum indicated that payment for corneal tissue acquisition costs is subject to the usual copayment

and deductible requirements, and could be paid as an add-on to either the ASC facility fee or the physician's fee for corneal transplant surgery performed at an ASC. In the June 12, 1998 proposed rule to revise the ASC ratesetting methodology and payment rates, we proposed to package the costs incurred by an ASC to procure corneal tissue into the payment for the associated cornea transplant procedure rather than continue making separate payment for those costs (63 FR 32312 and 32313). We also proposed to package corneal tissue acquisition costs into the APC payment for corneal transplant procedures in the September 8, 1998 proposed rule to implement the OPPS (63 FR 47760).

We received numerous comments from physicians, eye banks, and health care associations opposing both proposals. In the April 7, 2000 final rule with comment period, which implemented the OPPS, we summarize the comments that we received in response to the September 8, 1998 proposal, and we determined that we would not implement our proposal to package payment under the OPPS for corneal tissue costs but would, instead, make separate payment based on hospitals' reasonable costs to procure corneal tissue (65 FR 18448 and 18449). Because we never made final the changes in the ASC payment rates and ratesetting methodology that we proposed in the June 12, 1998 **Federal Register**, the policy issued in the June 1992 memorandum remains in effect, which allows carriers to make separate payment for the costs incurred to procure corneal tissue for transplant at an ASC.

We are proposing under the revised ASC payment system to continue to pay ASCs separately, based on their invoiced costs, for the procurement of corneal tissue. We have no evidence to suggest that costs incurred to procure corneal tissue are any less variable now than they were in 1992, in 1998 or in 2000. If we were to package payment for the procurement of corneal tissue into the APC for corneal transplant procedures, we believe the resulting payment rate would continue to overpay those facilities that are able to acquire corneal tissue at little or no cost through philanthropic organizations and underpay those facilities that must pay for corneal tissue processing, testing, preservation, and transportation costs. Therefore, we are proposing to include in proposed new § 416.164, our proposal to exclude payment for corneal tissue furnished in an ASC on or after January 1, 2008, from the ASC facility payment rate.

We invite comment and data that support or challenge this proposal to continue paying ASCs for corneal tissue on an acquisition cost basis.

5. Proposed Payment for Office-Based Procedures

(If you choose to comment on issues in this section, please include the caption "ASC Payment for Office-Based Procedures" at the beginning of your comment.)

Since the inception of the ASC benefit, procedures that are commonly performed or that can be safely performed in a physician's office have generally been excluded from the ASC list. For the sake of convenience, we refer to these procedures as "office-based" in this preamble discussion. Over the past 15 years, physicians and ASC associations have urged CMS to add office-based procedures to the ASC list or to retain on the ASC list procedures that were originally performed most commonly in an institutional setting, but that have subsequently moved to an office setting as surgical techniques and technology have advanced. Representatives of the ASC industry argue that although, for most patients, the office is an appropriate setting for most high volume office procedures, there are some patients for whom an ASC or another more resource-intensive setting is required. The physician may decide that a facility setting is necessary for individual patients for various clinical reasons, such as the need for more nursing staff, a sterile operating room, or a piece of equipment not typically available in the office setting. CPT code 52000 (Cystourethroscopy (separate procedure)) is a prime example of a high volume procedure that is performed more than 80 percent of the time in an office setting, but for which a small number of patients require resources usually available only at an ASC or hospital. Unless we make an exception to the criteria that currently govern which procedures comprise the ASC list and allow an office-based procedure to remain on the ASC list, as we have done with CPT code 52000, the hospital would be the only facility setting available as an alternative to the office setting. ASC industry commenters assert that this limitation is burdensome both to physicians and to beneficiaries and could, in some cases, limit beneficiary access to needed surgery.

We generally interpret "office-based" or "commonly performed in a physician's office" to mean a surgical procedure that the most recent BESS data available indicate is performed more than 50 percent of the time in the

physician's office setting. In section XVIII.B.1 of this preamble, we are proposing to expand the ASC list to allow payment for *all* surgical procedures, except those procedures that pose a significant safety risk or require an overnight stay. Because office-based surgical procedures typically do not pose a significant safety risk and do not require an overnight stay, we are proposing not to exclude them from payment of an ASC facility fee under the revised ASC payment system. However, we are seeking comment on the appropriateness of excluding office-based procedures or procedures that require relatively inexpensive resources to perform from the approved ASC list of procedures. We recognize that paying an ASC facility fee for office-based procedures based on OPPS relative payment weights could have a significant impact on Medicare program costs. Approximately two-thirds of the additional procedures for which we propose to not exclude for payment beginning in CY 2008 are office-based, that is, they are performed in the physician office more than 50 percent of the time. The Medicare payment for many of these procedures under the MPFS would be lower than the payment for the same procedures when they are performed in an ASC where the facility fee is based on OPPS relative weights. The separate physician payment and facility payment when the procedures are performed in an ASC would exceed the combined payment when they are performed in the physician office. Therefore, ASC payment rates based on the OPPS relative payment weights could result in a significant program cost were these high volume procedures to shift from the office to the ASC setting.

One reason why we are concerned if there were to be a sizable shift of office-based procedures to ASCs is the impact that would have on ASC payments in light of the statutory requirements that the revised ASC payment system be designed to result in the same aggregate amount of expenditures as would be made if the revised payment system were not implemented. (See section XVIII.A.1. of this preamble for a discussion of this requirement). An influx of high-volume, relatively low cost office-based procedures into the ASC setting under the revised payment system could lower the payment amounts for other procedures paid for in the ASC due to the constraints of budget neutrality. In other words, we would have to scale the ASC conversion factor downward in order for estimated

aggregate expenditures under the revised system to not exceed what they would have been if the new payment system were not implemented. Payment for procedures with relatively high payments would have to be reduced in order to offset increased aggregate costs resulting from an influx of relatively low cost, high volume office procedures shifting to ASCs. (See section XVIII.C.10. of this preamble for a detailed discussion of our proposal for calculating an ASC conversion factor.)

We are committed to refining Medicare payment systems wherever possible to prevent payment incentives from inappropriately driving decisions about where to perform a surgical procedure when those decisions should be based on clinical considerations. We strive to promote value-based purchasing in all Medicare payment systems that leads to significant positive effects on the health of Medicare beneficiaries by improving quality and efficiency in the delivery of health services. We are also committed to ensuring Medicare payments that are efficient and reasonable. To mitigate the impact of office-based procedures migrating to the more expensive ASC setting if we were to implement our proposal not to exclude them from payment of an ASC facility fee under the revised ASC payment system, we are proposing to cap payment for office-based surgical procedures for which payment of an ASC facility fee would be allowed under the revised payment system as of January 1, 2008, at the lesser of the MPFS nonfacility practice expense payment or the ASC rate under the revised ASC payment system. We also are proposing to exempt procedures that are on the ASC list as of January 1, 2007, that meet our criterion for designation as office-based, from the payment limitation proposed for office-based procedures for which payment of an ASC facility fee would be allowed for the first time beginning January 1, 2008. Accordingly, we are proposing to incorporate in proposed new § 416.171(e) the limitation on payment for these procedures beginning January 1, 2008.

As discussed elsewhere in this proposed rule, we are proposing to limit payment for office-based procedures in an attempt to mitigate potentially inappropriate migration of services from the physician office setting to the ASC. Alternatively, we could entirely exclude office-based procedures or procedures that require relatively inexpensive resources to perform from the approved ASC list of procedures, although this is not the approach we are advancing. In considering value-based purchasing, we

seek comment concerning whether procedures that are currently primarily office-based or that require relatively inexpensive resources are most efficiently and effectively provided in the ASC facility setting, which typically possesses greater surgical capacity than such procedures would generally require.

When we started to identify the codes that we would propose to classify as office-based beginning in CY 2008, we encountered some anomalous cases that required further refinement of our office-based criterion beyond strict application of a 50-percent utilization threshold. For example, we identified some CPT codes that meet the 50-percent office utilization threshold for which a nonfacility practice expense amount has not been developed under the MPFS. We are proposing to classify as office-based any surgical codes that our physician claims data indicate are performed more than 50 percent in an office setting, even if the codes lack a nonfacility practice expense RVU under the MPFS. We further propose to cap payment for these procedures, as appropriate, once a nonfacility practice expense RVU is established. Until that time, we are proposing to calculate payment for these office-based surgical CPT codes using the methodology we propose in sections XVIII.C.11.c. and d. below, for other surgical procedures. Similarly, until a national nonfacility practice expense RVU is established for office-based surgical CPT codes that are "carrier priced" under the MPFS, we are proposing to calculate the ASC facility payment using the same methodology that we are proposing for surgical procedures that are not office-based. Application of the cap to codes designated as office-based would be updated through rulemaking as part of the annual ASC payment update.

In applying the data-based 50-percent threshold, we discovered some contradictions in the data that required us to further refine our definition of office-based. For example, we noted instances in which seemingly very similar procedures had inconsistent site of service utilization. The BESS data showed high levels of office utilization for some complex procedures which we expected to be performed infrequently in an office setting whereas simpler but related procedures showed lower levels of office utilization.

We therefore undertook another, more detailed level of review and identified groups of CPT surgical codes related to procedures that are performed 50 percent or more of the time in the office setting to determine if there was a logical correlation between procedure

complexity within a group of related procedures and the frequency with which those procedures were performed in the office setting. For example, according to CPT coding, the following three codes are related:

13120, Repair, complex, scalp arms and/or legs; 1.1cm to 2.5 cm

13121, Repair, complex, scalp arms and/or legs; 2.6 cm to 7.5 cm

13122, Repair, complex, scalp arms and/or legs; each additional 5 cm or less

As is often the case for groups of related codes in the CPT coding system, the first of these codes is the least complex clinically and, in this example, the complexity of the procedure increases in proportion to the increase in the size of the area to be repaired. If utilization data indicated that CPT code 13122 was performed in the office 67 percent of the time in CY 2005, we would expect to find that both CPT codes 13120 and 13121 were also performed in the physician office more than 50 percent of the time during that year. Because the most complex procedure was provided in the office most of the time, logically, the less complex procedures would also have been performed in that site of service. However, the BESS data showed that this was not always the case.

So, although our expectation was that, the less complex procedures within a group of related procedure codes would typically be performed most often in the office and the more complex procedures less often in the office, there are instances in which the less complex procedures with the code group were billed more often in an ASC or hospital outpatient department and the more complex procedures within the code billed in the office setting.

In our analysis of the BESS site of service data, we also took into consideration the volume of cases represented in the data. There were a few instances in which we initially identified a procedure as office-based because the data indicated that 100 percent of the cases were performed in the physician office. However, closer inspection revealed that there was only one case reported for the procedure with physician's office as the site of service. We were concerned about using such low volume as the basis for identifying a procedure as office-based. Because of the unevenness of the data associated with some of the codes we initially classified as office-based, we conducted a code-by-code analysis to buttress inconclusive data with the clinical judgment of our medical advisors. As a result, on the basis of clinical judgement overriding inadequate or insufficient

claims data, there are some procedures that we deem meet the 50-percent threshold when taken in isolation from other closely related codes that we have designated as office-based.

We are proposing to assess each year based on the most recent available BESS and other data available to us whether there are additional procedures that we would propose to classify as office-based. We would solicit comment on proposed classification of additional codes as office-based as part of the annual OPPS/ASC rulemaking cycle. In addition, we are proposing that once we identify a procedure as office-based, that classification would not change in future updates of the ASC payment system. We reason that once a procedure becomes safe enough to be performed in more than 50 percent of cases in the office setting, it would be improbable for it to revert to an institutional setting.

To summarize, the list of codes that we propose as office-based in this rule takes into account the most recent available volume and utilization data for each individual procedure code and, if appropriate, the utilization and volume of related codes. While we are proposing to apply the office-based designation only to procedures that would no longer be excluded from payment of an ASC facility fee beginning in CY 2008, were we to exclude office-based services from ASC payments, we expect that the same approach to developing and updating the set of procedures in the CPT surgical code range that we consider to be office-based would be applicable. Finally, we are concerned that our proposal to allow payment of an ASC facility fee for office-based procedures, even if the ASC payment amount were capped at the lesser of the MPFS nonfacility practice expense payment or the revised ASC rate, would result in a downward adjustment to ASC payments overall, and would increase Medicare spending.

We propose to exempt all procedures on the CY 2007 ASC list from

application of the office-based classification. The procedures that we are proposing to designate as subject to the office-based payment limit are identified in new Addendum CC of this proposed rule. Those procedures for which the proposed CY 2008 payment would be based on the MPFS nonfacility practice expense RVU are flagged in Addendum BB. The ASC relative payment weight shown for procedures in Addendum BB that would be capped by the MPFS nonfacility practice expense RVU has been adjusted to reflect the capped payment amount. We remind readers that the ASC payment rates in Addendum BB of this proposed rule are based on proposed CY 2007 OPPS relative payment weights and proposed MPFS nonfacility practice expense RVUs. The final ASC relative weights and payment amounts for CY 2008 would be different from the rates published in this proposed rule because they would take into account the CY 2008 updates of both the OPPS and the MPFS. The proposed and final ASC relative weights and payment amounts for CY 2008 would be published in the **Federal Register** during the proposed and final rulemaking cycles for the CY 2008 OPPS.

6. Payment Policy for Multiple Procedure Discounting

We are proposing to mirror the OPPS policy for discounting when a beneficiary has more than one surgical procedure performed on the same day at an ASC. The current policy for multiple procedure discounting in the ASC, as specified in § 416.120(c)(2)(ii), is based on a simple count of procedures performed on the same day. The most costly procedure is paid the full amount and all other procedures are discounted by half.

Under the OPPS, certain surgical procedures are not subject to the discounting policy. Generally, the procedures that are exempted are those performed to implant costly devices. They are not discounted even when

performed in association with other surgical procedures because the cost of the implantable device does not change, so resource savings due to efficiencies would be minimal.

Until now, there has been no reason to exempt any procedure from the multiple procedure discounting policy in ASCs because separate payments have been made for implantable devices. Thus, although the facility payment for the procedure may have been discounted, the cost of the device was paid outside of that rate and was unaffected by the multiple procedure discount.

Under the revised ASC payment system, we are proposing to package into the payment for the procedure payment for implantable devices in the ASC, as in the OPPS. Because we are trying wherever possible to implement parallel payment policy across both systems, we are proposing to adopt the OPPS discounting policy that is applied more specifically to surgical procedures so that the costs of performing multiple procedures that require implantation of costly devices are taken into account. Thus, payment for the same set of multiple procedures in the OPPS and the ASC would be made using similar packaging and payment rules.

Table 46 below lists the procedures that would be exempt from multiple procedure discounting. These exempt procedures are those surgical procedures proposed for payment of an ASC facility fee that are assigned a status indicator other than "T" under the OPPS, to indicate that a multiple surgical procedure reduction does not apply. We are proposing to update this list annually in the OPPS/ASC proposed rule, soliciting comment on the list.

We are proposing to incorporate our proposed policy on multiple procedure discounts in proposed new § 416.172(e).

7. Proposed Geographic Adjustment

(If you choose to comment on issues in this section, please include the caption "ASC Wage Index" at the beginning of your comment.)

Currently, Medicare adjusts 34.45 percent of the national ASC payment rates using wage index values and localities that were established under the IPPS prior to implementation of the new Core Based Statistical Areas (CBSAs) issued by OMB in June 2003. Medicare currently adjusts 60 percent of national OPPS payment rates by the IPPS wage index value assigned to hospitals using the June 2003 OMB definitions for geographical statistical areas and wage adjustments required under Pub. L. 108–173.

Since 1990, ASC payments have been adjusted for regional wage variations using the hospital IPPS wage index values. We believe that standardization continues to be appropriate in recognition of widely varying labor market costs tied to geographic localities. We also believe that it is advisable to maintain the consistency in locality designations between ASCs and hospitals and acknowledge parity of labor costs between ASCs and HOPDs that are competing for staff in the same locality. Therefore, we are proposing to apply to ASCs the IPPS pre-reclassification wage index values associated with the June 2003 OMB geographic localities, as recognized under the IPPS and OPPS, to adjust national ASC payment rates for geographic wage differences under the revised payment system.

Although we have not collected new data to identify whether the current labor-related share is correct, the results of a 1994 survey of ASC costs supported the current 34.45 percent labor adjustment factor, and we have received no complaints from the ASC community about our continued use of the 34.45/65.55 ratio of labor to nonlabor costs for purposes of adjusting payments for regional wage differences. Moreover, we believe it is reasonable to expect ASCs to have a lower labor adjustment factor than that of a hospital. For example, most OPPS hospital outpatient departments are staffed 24 hours per day to provide emergency department services and observation care. Therefore, we are proposing to continue using 34.45 percent as the labor adjustment factor for regional wage differences under the ASC revised payment system, beginning in CY 2008. We are proposing to establish rules governing this proposed new § 416.172(c).

8. Proposed Adjustment for Inflation

(If you choose to comment on issues in this section, please include the caption "ASC Inflation" at the beginning of your comment.)

As noted above, section 1833(i)(2)(C)(iv) of the Act, as amended by section 626(a) of Pub. L. 108–173, requires the adjustment of ASC facility services amounts for inflation for FY 2005, the last quarter of CY 2005, and each of CYs 2006 through 2009, to equal zero percent. Otherwise, section 1833(i)(2)(C)(i) of the Act provides that ASC facility services amounts are to be adjusted by the percentage increase in the CPI-U during years when the ASC amounts are not updated.

As explained in section II.C. of the preamble of this proposed rule, the OPPS conversion factor is updated annually using the hospital inpatient market basket percentage increase. Although section 626(d) of Pub. L. 108–173 suggests that the Congress found merit in linking the ASC payment system to the OPPS relative payment weights and APC groups, it did not require that the new ASC payment system be updated using the hospital market basket that is the basis for annual OPPS updates. However, we believe that an update of the ASC amount is performed through the annual relative ASC payment weight adjustments that we propose in section XVIII.C.11.d.(1) below, which obviates the requirement for the statutory CPI adjustment. Nonetheless, although we are not compelled to do so by the statute, we are proposing under the revised ASC payment system, beginning in CY 2008, to apply a CPI-U adjustment to update the ASC conversion factor for inflation on an annual basis, in accordance with the statutory formula. The CPI-U adjustment in CY 2008 and CY 2009 would equal zero. Beginning in CY 2010, we would update the ASC conversion factor by the percentage increase in the CPI-U (U.S. city average) as estimated for the 12-month period ending with the midpoint of the year involved. As we explain in section XVIII.C.11.d.(2) below, we are proposing to adjust the conversion factor for inflation annually to ensure that ASC payments keep up with cost increases attributable to inflation. Accordingly, we are proposing to establish rules in proposed new §§ 416.171 and 416.172 to reflect our proposed policies for standardizing labor-related costs, applying an inflationary adjustment, and calculating a conversion factor, respectively under the proposed new

payment system beginning January 1, 2008.

9. Proposed Beneficiary Coinsurance

(If you choose to comment on issues in this section, please include the caption "ASC Coinsurance" at the beginning of your comment.)

Payment for ASC facility services is subject to the Medicare Part B deductible and coinsurance requirements. Currently, Medicare pays participating ASCs 80 percent of a prospectively determined rate, adjusted for regional wage variations. The beneficiary deductible and coinsurance make up the other 20 percent.

Section 626(c) of Pub. L. 108–173 amended section 1833(a)(1) of the Act to provide that, beginning with the implementation date of the revised payment system, the Medicare program payment to ASCs shall equal 80 percent of the lesser of the actual charge for the services or the payment amount that we determine under the revised payment system for the services. We are proposing to make this change and to continue to maintain the beneficiary deductible and coinsurance at 20 percent. We are proposing to reflect this statutory requirement in proposed new § 416.172(b) and (d).

10. Proposal To Phase In Implementation of Payment Rates Calculated Under the CY 2008 Revised ASC Payment System

(If you choose to comment on issues in this section, please include the caption "ASC Phase In" at the beginning of your comment.)

We discuss in section XXVII.D. of this preamble our analysis of the impact the revised ASC payment system and estimated payment rates proposed for implementation in CY 2008 could have on certain ASCs that specialize in or perform high volumes of procedures for which payment under the new system would decrease. We want to ensure that the revised payment system does not cause a sudden, unwarranted migration of services from ASCs to other ambulatory settings, or the reverse; that ASCs would have an opportunity to balance their Medicare case mix between procedures whose rates decrease and procedures whose rates increase; and, that beneficiaries and their physicians would continue to have a robust choice of sites where important preventive and other surgical services are paid for by Medicare. Therefore, we propose to implement the revised ASC payment system in CY 2008 using transitional payment rates that would be based upon a 50/50 blend of the payment rate for procedures on the CY

2007 list of approved ASC procedures and the payment rate for that procedure calculated under the revised payment methodology described in the next section and reflected in proposed new § 416.171(c). (Procedures added for payment of an ASC facility fee beginning in CY 2008 would be paid the full amount calculated under the revised payment methodology for CY 2008 rather than a blended amount.) We further propose that, in CY 2009, we would fully implement the ASC payment rates calculated under the payment methodology proposed in the next section, discontinuing the blended transitional payment rate for services furnished beginning January 1, 2009. This is proposed in new § 416.171(d).

11. Proposed Calculation of ASC Conversion Factor and Payment Rates for CY 2008

(If you choose to comment on issues in this section, please include the caption "ASC Conversion Factor" at the beginning of your comment.)

a. Overview

In section XVIII.C.2 of this preamble, we are proposing to base ASC relative payment weights and rates under the revised system on APC groups and relative payment weights established under the OPPTS. In section XVIII.C.4 of this preamble, we are proposing to set the ASC relative payment weight for certain office-based surgical procedures so that the national ASC payment rate does not exceed the MPFS nonfacility practice expense payment. The proposed ASC payment weights are multiplied by an ASC conversion factor to calculate the proposed ASC payment rates. For CY 2008, our current estimate of the budget neutral ASC conversion factor is \$39,688. The final ASC conversion factor may be higher or lower than this figure for a number of reasons, including (1) The final OPPTS relative payment weights for CY 2008, (2) the final physician fee schedule practice expense payments for CY 2008 and (3) updated utilization data.

b. Budget Neutrality Requirement

Section 626(b) of the MMA amended section 1833(i)(2) of the Act by adding subparagraph (D) to require that in the year the new system is implemented:

* * * [S]uch system shall be designed to result in the same aggregate amount of expenditures for such services as would be made if this subparagraph did not apply, as estimated by the Secretary * * *.

The ASC conversion factor is calculated so that aggregate expenditures under the new system are

estimated to be the same as the aggregate expenditures for ASC facility services in CY 2008 that would have been paid had the ASC payment system not been revised, taking into consideration the cap on payments in CY 2007 as required under section 5103 of Pub. L. 109–171, which we discuss in section XVII.D., that is, the conversion factor is calculated so the new system is budget neutral.

Note that we consider expenditures in the context of section 626(b) of the Pub. L. 108–173 budget neutrality requirement to mean expenditures from the Medicare Part B Trust Fund. We do not consider expenditures to include beneficiary coinsurance and copayments. We note, however, that the exclusion of beneficiary coinsurance payments does not impact the calculation of the ASC conversion factor under our proposed methodology. (See section XXVI.D. of this preamble for impacts of the revised ASC system on beneficiary coinsurance.)

c. Proposed Calculation of the ASC Payment Rates for CY 2008

We are proposing to calculate the ASC payment rates for CY 2008 as follows:

Estimated payments under the current ASC system

Step 1: To estimate the aggregate amount of expenditures that would be made in CY 2008 under the current ASC payment system, we first multiplied the estimated CY 2008 ASC volume for each CPT code on the current ASC list by the estimated CY 2008 ASC payment rate for the CPT code under the current ASC system. The estimated CY 2008 ASC payment rates are based on the proposed CY 2007 ASC payment rates, which are found in Addendum BB to take into account the OPPTS cap on ASC services as required by section 5103 of Pub. L. 109–171 and to reflect the zero percent CY 2008 update for ASC services mandated by section 1833(i)(2)(C) of the Act. We then summed the results over all services on the current ASC list.

Estimated payments under the new ASC system

Step 2: To estimate the aggregate amount of expenditures that would be made in CY 2008, we used estimated CY 2008 OPPTS payment amounts instead of estimated CY 2008 ASC payment amounts under the current system, and we multiplied the estimated CY 2008 ASC volume for each CPT code on the current ASC list by the estimated CY 2008 OPPTS payment rate for the CPT code. We summed the results over all services on the current ASC list.

Calculate the CY 2008 budget neutrality adjustment

Step 3: To calculate the CY 2008 ASC budget neutrality adjustment, we divided the total expenditures calculated in Step 1 by the total expenditures calculated in Step 2. The result is 0.62.

Apply the CY 2008 budget neutrality adjustment to determine the CY 2008 ASC conversion factor

Step 4: To determine the CY 2008 ASC conversion factor, we multiplied the estimated CY 2008 OPPTS CF by the results in Step 3. Our current estimate of the CY 2008 OPPTS CF is \$64,013. Multiplying the estimated CY 2008 OPPTS conversion factor by the 0.62 budget neutrality adjustment yields our current estimate of the CY 2008 ASC conversion factor: \$39,688.

Calculate the CY 2008 ASC payment rate under the new ASC system

Step 5: To determine the national ASC payment rate under the new system (including the beneficiary 20 percent coinsurance), we multiplied the ASC conversion factor from Step 4 by the ASC relative payment rate.

The ASC relative payment weights are primarily based on the APC groups and relative payment weights established under the OPPTS as described in section XVIII.C.2 of this preamble. However, as described in section XVIII.C.4 of this preamble, the ASC relative payment weights for certain office-based surgical procedures are set so that the national ASC payment rate does not exceed the MPFS nonfacility practice expense payment.

As discussed elsewhere in this proposed rule, we are proposing to limit payment for office-based procedures in an attempt to mitigate potentially inappropriate migration of services from the physician office setting to the ASC. Alternatively, we could entirely exclude office-based procedures or procedures that require relatively inexpensive resources to perform from the approved ASC list of procedures, although this is not the approach we are advancing.

The ASC relative payment weights are listed in Addendum BB of this proposed rule.

Calculate the CY 2008 ASC payment rate under the transition

Step 6: As described in section XVIII.C.10. of this preamble, we are proposing under the revised payment system a 2-year transition to 100 percent implementation of the new ASC payment rates for procedures on the CY 2007 list of approved ASC procedures. In the first year of this transition, the payment rate would be based on 50

percent of the final CY 2007 ASC standard overhead amount and 50 percent of the final payment rate calculated under the revised payment methodology proposed in this section of the preamble.

d. Proposed Calculation of the ASC Payment Rates for CY 2009 and Future Years

(1) Updating the ASC Relative Payment Weights

We are proposing to update the ASC relative payment weights each year using the national OPPS relative payment weights for that calendar year and, for the office-based procedures, the practice expense payments under the physician fee schedule for that calendar year. We further propose to uniformly scale the ASC relative payment weights each year so that estimated aggregate expenditures using updated ASC relative payment weights are the same as estimated aggregate expenditures using the current year ASC relative payment weights. That is, we propose to make the relative payment weights budget neutral to ensure that changes in the relative payment weights from year to year do not cause the estimated amount of expenditures to ASCs to increase or decrease as a function of those changes. For example, we propose to uniformly scale the ASC relative payment weights for CY 2009 so that estimated expenditures for CY 2009 using the updated CY 2009 ASC relative payment weights are the same as they would be using the CY 2008 ASC relative payment weights. We propose to uniformly scale the ASC relative payment weights for CY 2010 so that estimated expenditures for CY 2010 using the updated CY 2010 ASC relative payment weights are the same as they would be using the CY 2009 ASC relative payment weights.

We are proposing to scale the relative payment weights annually because we believe that the purpose of using relative payment weights as part of the rate setting methodology under the revised ASC system is to establish appropriate relativity among surgical procedures paid for in an ASC. Scaling the relative payment weights each year would also serve as a buffer to protect ASCs from sudden changes that could occur under the OPPS. For example, by making the relative payment weights budget neutral under the revised ASC payment system, the ASC relative weights would not drop were there to be a sudden upsurge in costs associated with hospital outpatient emergency or clinic visits relative to outpatient surgical costs. Moreover, making the

ASC relative weights budget neutral would shield the ASC payment system against the inadvertent impact of unrelated aggregate changes in OPPS expenditures. We propose to continue this methodology to update the ASC payment system in future years.

(2) Updating the ASC Conversion Factor

In section XVIII.11.d.1, above, we propose to scale the relativity among surgical procedures each year so that aggregate expenditures under the ASC are budget neutral notwithstanding changes in the relative payment weights. In section XVIII.11.c, above, we propose to calculate the ASC payment rates each year as the product of the ASC relative payment weight and the ASC conversion factor which have been adjusted for budget neutrality. Section 1833(i)(2)(C) of the Act requires that if the Secretary has not updated the ASC facility services amounts in a calendar year after CY 2009, the payment amounts shall be increased by the percentage increase in the CPI-U as estimated by the Secretary for the 12-month period ending with the midpoint of the year involved.

Although we are only required to increase ASC payment rates by the percentage increase in the CPI-U in years when we do not update the ASC payment amounts, beginning with the CY 2008 revised ASC payment system, we propose to update the ASC conversion factor annually using the CPI-U. For example, for CY 2009, the statute requires a zero percent CPI-U increase for ASC services. Therefore, the CY 2009 conversion factor would be equal to the CY 2008 conversion factor. For CY 2010, we would increase the CY 2009 conversion factor by the estimated percent increase in the CPI-U for the 12-month period ending June 30, 2010; in CY 2011, we would increase the CY 2010 conversion factor by the estimated percent increase in the CPI-U for the 12-month period ending June 30, 2011, and so forth, each year thereafter. We propose to apply this adjustment annually to ensure that ASC payments keep up with cost increases attributable to inflation. Moreover, we propose to use the CPI-U to adjust the conversion factor for inflation because we have used the CPI-U to adjust payments to ASCs for inflation since July 1987, when we first updated the ASC payment rates in effect at the time by the projected increase in the CPI-U (52 FR 20467). This proposal is reflected in § 416.167 and § 416.171.

e. Alternative Option for Calculating the Budget Neutrality Adjustment Considered

We considered an alternative approach to calculating the budget neutrality adjustment under the new payment system, which would take into account the effects of the migration of procedures between ASCs, physicians' offices, and hospital outpatient departments that might be attributable to the new ASC payment system. In the following discussion the phrase "new ASC procedure" refers to a procedure not currently on the ASC list of approved procedures that we are proposing for inclusion on the ASC list of approved procedures beginning in CY 2008.

Under this alternative, we assumed that 25 percent of the hospital outpatient department utilization for new ASC procedures would migrate to the ASC and we assumed that 15 percent of the physician office utilization for new ASC procedures would migrate to the ASC. We believe that our assumptions of a 25 percent and 15 percent migration from hospital outpatient departments and physician offices to ASCs, respectively, are reasonable given the general utilization relationships between these settings for services currently on the ASC list. For services on the current ASC list that are predominately performed in ASC and outpatient hospital department settings, they are on average performed 30 percent of the time in the ASC setting. For services on the current ASC list that are predominately performed in the ASC and physician office settings, they are on average performed 17 percent of the time in the physician office setting. We assumed that new ASC services would migrate at slightly lower rates in the first year of the revised ASC system, yielding our migration assumptions of 25 percent for the hospital outpatient department setting and 15 percent for the physician office setting.

We also assumed that the net impact of migration on services currently on the ASC list is negligible. We note that payment rates for the current highest volume ASC procedures would generally decrease under the proposed new ASC system, and the lower volume ASC procedures would experience significant payment increases. We believe it is reasonable to assume that some of the higher volume services will migrate from ASCs to other settings, and some of the current lower volume procedures will migrate to the ASC setting as a result of the payment changes.

In order to calculate the budget neutrality adjustment, first, we estimated expenditures that would occur if we did not revise the ASC payment system. We estimated CY 2008 expenditures if the ASC payment weights were not revised and the ASC list of approved procedures was not expanded. As described below (see Step 1).

Estimated payments under the current system

Step 1: Hospital outpatient department migration valued using estimated CY 2008 OPPS payment rates

(a) Assuming 25 percent of the outpatient hospital department utilization for new ASC procedures will migrate to the ASC, multiple 0.25 times the hospital outpatient department utilization for each new ASC procedure.

(b) For each new ASC procedure, multiple the results of Step 1(a) by the estimated CY 2008 OPPS payment rate for the procedure.

(c) Sum the results of Step 1(b) across all new ASC procedures.

Step 2: Physician office migration valued using estimated CY 2008 physician payment rates

(a) Assuming 15 percent of the physician office utilization for new ASC procedures will migrate to the ASC, multiple 0.15 times the physician office utilization for each new ASC procedure.

(b) For each new ASC procedure, multiple the results of Step 2(a) by the estimated CY 2008 physician office payment rate for the procedure.

(c) Sum the results of Step 2(b) across all new ASC procedures.

Step 3: Current ASC services valued using the estimated CY 2008 ASC payment rates under the current ASC system

(a) This is described under Step 1 in the Proposed Calculation of the ASC Conversion Factor section above.

Step 4: Sum the results of Steps 1–3.

Estimated payments under the new system

Step 5: Hospital outpatient department migration valued using estimated CY 2008 OPPS payment rates

(a) Same as Step 1 in this section.

Step 6: Identify new ASC procedures currently considered to be office-based (for example, insert examples and see Addendum BB)

Step 7: Physician office migration for new ASC procedures currently considered to be office based valued using the estimated CY 2008 OPPS payment rates capped at the estimated CY 2008 physician office payment rates

(a) For each new ASC procedure considered to be office based, multiply the results of Step 2(a) by the lesser of:

(1) The estimated CY 2008 OPPS rate for the procedure; and

(2) The estimated CY 2008 physician fee schedule office rate for the procedure.

(b) Sum the results of Step 7(a) across all new ASC procedures considered to be office-based.

Step 8: Physician office migration for new ASC procedures not currently considered office based valued using the estimated CY 2008 OPPS rates

(a) For each new ASC procedure not considered to be office based, multiply the results of Step 2(a) by the estimated CY 2008 OPPS rate for the procedure.

(b) Sum the results of Step 8(a) across all new ASC procedures not considered to be office based.

Step 9: Physician office migration valued using the estimated CY 2008 physician fee schedule out-of-office payment rate.

(a) For each new ASC procedure, multiple the results of Step 2(a) by the estimated CY 2008 out of office physician rate for the procedure.

(b) Sum the results of Step 9(a) across all new ASC procedures.

Step 10: Current ASC services valued using the estimated CY 2008 OPPS payment rates

(a) This is described under Step 2 in this section.

Step 11: Sum the results of Steps 5, 7–10.

Calculate the budget neutrality adjustment

Step 12: Divide the result of Step 4 by the result of Step 11.

Step 13: The application of the cap at the estimated CY 2008 physician office payment rates that occurs in Step 7 is dependent on the ASC conversion factor. The ASC budget neutrality adjustment resulting from Step 12 is calibrated to take into account the interactive nature of the ASC conversion factor and the physician office payment cap.

The resulting budget neutrality adjustment is 0.62, indicating that under the migration assumptions described above the difference between our proposed budget neutrality adjustment without migration (0.62) and this alternative budget neutrality adjustment with migration (0.62) is equal rounded to the nearest hundredth.

Discussion of the alternative calculation of the budget neutrality adjustment:

We have chosen to propose calculation of the budget neutrality adjustment based on the CY 2007 final ASC list of approved services and current ASC utilization because we believe this is the most appropriate

approach to estimating expenditures so as to result in a budget neutral payment system in CY 2008. We have no data which would enable us to precisely estimate the net potential migration of services between the ASC setting, the outpatient hospital setting, and the physician office setting that might result from implementation of the new ASC payment system. Moreover, basing our estimate of expenditures on current ASC utilization without including migration from other sites of service is consistent with how we estimate expenditures for purposes of maintaining budget neutrality in other Medicare payment systems.

We expect that some commenters may believe it is more appropriate to estimate the ASC budget neutrality adjustment taking into account the potential migration of services between the ASC setting, the outpatient hospital setting, and the physician office setting. We welcome data supporting the use of specific migration assumptions in the calculation of the ASC budget neutrality adjustment. We describe above the budget neutrality calculation under the alternative approach based on our current best estimate of the potential migration of services between the different settings so as to facilitate and stimulate comment and to encourage the submission of pertinent quantitative evidence of surgical migration resulting from changes in payment rates. We welcome data on all of the migration assumptions under this alternative approach. We note again that under the reasonable migration assumptions described above, our proposed budget neutrality calculation without migration (0.62) and the alternative budget neutrality adjustment with migration (0.62) is equal rounded to the nearest hundredth. However, if we exclude office-based procedures from the approved list of procedures, under the alternative budget neutrality adjustment that takes into account migration across different practice settings, payment rates for the ASC services remaining on the list (those procedures that are not office-based) would be slightly higher due to the statutory budget neutrality requirement.

12. Proposed Annual Updates

(If you choose to comment on issues in this section, please include the caption “ASC Updates” at the beginning of your comment.)

Currently, we update the ASC list every 2 years through the notice and comment regulation process. We make additions to and deletions from the ASC list based on clinical judgment and data that are available regarding utilization of

care settings. The last update was published in the May 4, 2005 **Federal Register** (70 FR 23690) and the update for CY 2007 is proposed in section XVII of this preamble. The process we follow currently to update the ASC list is explained in section XVII of this preamble.

Under the revised ASC payment system, which would be implemented effective January 1, 2008, we are proposing to update on an annual calendar year basis the ASC conversion factor, the relative payment weights and APC assignments, the ASC payment rates, and the list of procedures for which Medicare would not make payment of an ASC facility fee. To the extent possible under the rules and policies of the revised ASC payment system, we are proposing to maintain consistency between the OPPS and the ASC payment systems in the way we treat new and revised HCPCS and CPT codes for payment under the ASC payment system. We also are proposing to invite comment as part of the annual update cycle to determine if there are procedures that we exclude from payment in the ASC setting that merit reconsideration as a result of changes in clinical practice or innovations in technology.

We are proposing to update the ASC list and payment system as part of the annual proposed and final rulemaking cycle updating the hospital OPPS. We believe that including the ASC update as part of the OPPS rulemaking cycle would ensure that updates of the ASC payment rates and the list of surgical procedures for which Medicare pays an ASC facility fee would be issued in a regular, predictable, and timely manner. Moreover, the ASC payment system would be updated concurrent with changes in the APC groups and the OPPS inpatient list, making it easier to predict changes in payment for particular services from year to year.

In the first part of CY 2007, we are proposing to issue a final rule in which we would respond to comments submitted timely regarding the proposals set forth in this proposed rule and make final the policy and regulations for the revised ASC payment system for implementation effective January 1, 2008. We are proposing to include the CY 2008 ASC payment rates as part of the proposed and final rules for the CY 2008 OPPS update.

We are proposing to evaluate each year all new CPT and alphanumeric HCPCS codes that describe surgical procedures to make preliminary determinations regarding whether or not they should be payable in the ASC setting and, if so, whether they are

office-based procedures. In the absence of claims data that would indicate where procedures described by new codes are being performed, and resources required to perform them, we are proposing to use other available information, including our clinical advisors' judgment, predecessor CPT and HCPCS codes, information submitted by representatives of specialty societies and professional associations, and information submitted by commenters during the public comment period following publication of the final rule with comment period in the **Federal Register**. We would publish in the annual OPPS/ASC payment update final rule those interim determinations for the new codes to be active January 1 of the update year. Those procedures would be open to comment on that final rule, and we would respond to comments about our determinations in the final rule for the following year, just as we currently respond to comments about our APC assignments for new codes in the OPPS final rule for the following year. After our review of public comments and in the absence of physicians' claims data, if our determination regarding the new codes is that they should reside on the ASC list as office-based procedures subject to the payment limitation, this determination would remain preliminary until there are adequate physicians' claims data available for these procedures to assess their predominant sites of service. Using those data, if we confirm our determination that the new codes are office-based because they were performed in the physician office setting more than 50 percent of the time, the codes would then be permanently assigned to the list of office-based procedures subject to the payment limitation.

Accordingly, we are proposing to reflect this annual rulemaking and publication of revised payment methodologies and payment rates in new § 416.173 in proposed new subpart F.

D. Information in Addenda Related to the Revised CY 2008 ASC Payment System

(If you choose to comment on issues in this section, please include the caption "ASC Addenda" at the beginning of your comment.)

The ASC payment rates, copayment amounts, and relative payment weights displayed in Addendum BB of this proposed rule are presented to model the ratesetting methodology that we are proposing for the revised ASC payment system required by Pub. L. 108–173.

Actual payment rates proposed and made final for CY 2008 are dependent upon the final policies and regulations affecting the revised payment system that we would publish in a final rule in CY 2007; the proposed and final APC groups, APC relative payment weights, and MPFS nonfacility practice expense RVUs for CY 2008; and, the ASC conversion factor updated to reflect CY 2006 utilization data and CY 2007 ASC standard overhead payment amounts.

E. Technical Changes to 42 CFR Parts 414 and 416

We are proposing to make the following technical change to 42 CFR 414:

- § 414.22 (Non-facility practice expense RVUs) is revised to conform to changes occurring under the ASC revised payment system. The change will be effective January 1, 2008.

We are proposing to make the following technical changes to 42 CFR 416:

- § 416.65(a)(4) is revised to replace the obsolete cross-reference to § 405.310 with § 411.15.
- § 416.120 is revised by replacing the incorrect cross-reference to "Part 413" with "Part 419."
- § 416.150 (Beneficiary appeals) is deleted because it does not conform with the appeals process provisions of 42 CFR Part 405, subparts H and I.

XIX. Medicare Contracting Reform Mandate

A. Background

Section 911 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA), Pub. L. 108–173, amended Title XVIII of the Act to add section 1874A, Contracts with Medicare Administrative Contractors (MACs). Section 1874A of the Act replaces the prior Medicare intermediary and carrier contracting authorities formerly found in sections 1816 and 1842 of the Act, respectively. This reform (commonly referred to as "Medicare contracting reform" for Medicare fee-for-service) is intended to improve Medicare's administrative services to beneficiaries and health care providers and to bring standard contracting principles to Medicare, such as competition and performance incentives, which the government has long applied to other Federal programs under the Federal Acquisition Regulation (FAR). For Department of Health and Human Services acquisitions, the FAR is supplemented by the Department of Health and Human Services Acquisition Regulation (HHSAR) (48 CFR chapter 3). Using

competitive procedures, CMS will replace its current claims payment contractors (intermediaries and carriers) with new contract entities, MACs. Section 911(d)(1)(C) of Pub. L. 108–173 requires that CMS compete and transition all Medicare claims processing workloads to MACs by October 1, 2011.

In accordance with section 911(e) of Pub. L. 108–173, on or after October 1, 2005, any reference to an “intermediary” or “carrier” in a regulation shall be deemed a reference to a MAC. The process of transition from intermediaries and carriers to MACs is not a single point-in-time occurrence, but rather necessarily happens over a multiyear period due to the size and nature of the claims workloads involved. Therefore, for the purposes of clarity, the term “intermediary” is used throughout this proposed rule to describe a Medicare contractor, pursuant to the authority of section 1816 of the Act, that has not yet transitioned to a MAC. In addition, for the purpose of clarity, the term “carrier” is used throughout this proposed rule to describe a Medicare contractor, pursuant to the authority of section 1842 of the Act, that has not yet transitioned to a MAC.

B. CMS’ Vision for Medicare Fee-for-Service and MACs

CMS’ vision for the Medicare fee-for-service (FFS) program is that of a premier health plan that allows for comprehensive, quality care and world-class beneficiary and provider service. Achieving this vision requires substantial improvement of CMS’ current FFS administrative structure. Further information on CMS’ plans to improve Medicare FFS may be obtained through the Medicare Contracting Reform Web site: <http://www.cms.hhs.gov/medicarereform/contractingreform/>.

In 2006, there are 24 intermediaries and 17 carriers that process FFS claims. Intermediaries process claims for Medicare Parts A and B relating to services furnished by health care facilities, including hospitals and SNFs. Carriers process claims for Medicare Part B, in particular, for physician, laboratory, and other nonfacility services. In addition, 4 intermediaries serve as regional home health intermediaries (RHHIs) and process Medicare claims for home health services and hospice services. (Section 1816 of the Act was amended in 1977 to allow the Secretary to designate regional or national intermediaries, which we refer to as RHHIs, to process claims for home health services. We

have designated these RHHIs to serve both the home health agency (HHA) and the hospice provider communities.) For a complete listing of the current Medicare intermediaries and carriers, refer to the CMS Web site: <http://www.cms.hhs.gov/contacts/incardir.asp>.

Although health care delivery in the United States has evolved with advances in modern technology, the contracting authorities relating to the Medicare FFS administrative structure did not substantially evolve between the enactment of the Medicare statute in 1965 and the enactment of Pub. L. 108–173.

Prior to passage of Pub. L. 108–173, intermediary and carrier acquisition authorities did not permit full and open competition or unified processing of Medicare Part A and Part B claims. Medicare contracting was significantly hampered by the absence of performance-based incentives and cumbersome termination procedures.

In an effort to achieve Congress’ goal of a more efficient and effective Medicare operation, CMS developed a plan for most current Medicare Part A and Part B intermediary and carrier responsibilities to be integrated into a single contract entity to be administered by a single contractor in each area of the country. These new MACs will handle claims processing and related activities traditionally performed by intermediaries and carriers.

Under Medicare contracting reform, the MACs will perform all the core claims processing operations for both Medicare Part A and Part B. CMS will ensure that MACs focus on providing a high level of customer service to providers and beneficiaries. MACs will be the providers’ primary contact with Medicare, and CMS will hold the MACs accountable for overall provider and beneficiary satisfaction and correct claims payment.

With respect to financial management, as was required of intermediaries and carriers, MACs will promote the fiscal integrity of the program and be accountable stewards of the Medicare Trust Fund dollars. The MACs will be required to pay claims timely, accurately, and in a reliable manner while promoting cost efficiency and the delivery of maximum value to the program.

We recognize the potential for improving the efficiency and effectiveness of services to Medicare beneficiaries and providers through the Medicare contracting reform provisions contained in section 1874A of the Act. Through our implementation of these provisions, we expect to realize significant performance improvements.

The future environment is designed to generate substantial savings both from an administrative and programmatic standpoint and will safeguard CMS’ mission.

C. Provider Nomination and the Former Medicare Acquisition Authorities

As originally enacted in 1965 and until the enactment of Pub. L. 108–173, section 1816 of the Act afforded groups or associations and individual providers of services (as defined at section 1861(a) of the Act) the right to nominate (appoint) their intermediary. The intermediary agreements were governed by Medicare laws that diverge from the FAR in a number of important respects. Prior to Public Law 108–173, section 1816 of the Act precluded the Medicare program from competing intermediary functions on a full and open basis. Rather, institutional providers of services, such as hospitals and nursing facilities, nominated a particular intermediary to process and pay their Medicare Part A claims.

In a significant historical development that took place shortly after Medicare’s enactment in 1965, the American Hospital Association and other provider trade associations nominated the Blue Cross Association (BCA) to serve as the intermediary for their membership. The BCA merged with the Blue Shield Association in the 1970s to form today’s Blue Cross and Blue Shield Association (BCBSA.) CMS and the BCBSA then entered into a prime contract, which continues to currently exist through the annual renewal process. In turn, the BCBSA subcontracted most operational intermediary functions to its member plans. The BCBSA assigned the majority of the nation’s hospitals to its local Blue Cross plans. Some providers of services nominated commercial insurers to serve as their intermediaries.

Most recently, section 911(b) of Pub. L. 108–173 amended section 1816 of the Act to remove the provider nomination authority. The section has been renamed: “Provisions Relating to the Administration of Part A.” Section 1816(a) of the Act, which authorized providers to select a contractor to perform claims payment and audit functions, has been amended. It now contains one sentence mandating the use of contracts with MACs to administer section 1816 of the Act. Sections 1816(e), (f), and (g), which authorized the Secretary to develop standards, criteria, and procedures for the assignment of providers to intermediaries and to reassign providers periodically, have been repealed.

Section 911(d) of Pub. L. 108–173 permits the Secretary to transition the current intermediary and carrier functions to the MACs. More information about CMS' plans to implement Medicare contracting reform, including the Report to the Congress on this subject, can be obtained at the CMS Web site: <http://www.cms.hhs.gov/medicarereform/contractingreform/>. MACs will perform all core claims processing operations for both Medicare Part A and Part B. The Part A and Part B MACs will operate in distinct, nonoverlapping geographic jurisdictions, which will form the basis of the Medicare claims processing operations. A transitional period runs between October 1, 2005, and October 1, 2011. During this period, any existing intermediary and carrier contracts could be maintained until replaced by a MAC contract. The statute requires that all intermediary and carrier contract functions are to be competed and awarded as MAC contracts by October 1, 2011.

D. Summary of Changes Made to Section 1816 of the Act

Substantial changes to section 1816 of the Act that were required by sections 911(b) and 911(c) of Pub. L. 108–173 took effect on October 1, 2005. The changes that we are proposing in this proposed rule to the regulations under 42 CFR part 421, subpart B (discussed under section XIX.E. of this preamble) are intended to conform the regulations to these statutory changes.

Prior to the statutory developments directed by Pub. L. 108–173, section 1816 of the Act provided the foundation acquisition authority for agreements between CMS, acting for the Secretary, and intermediaries, for the purpose of administering benefits under Medicare Part A and making payments to providers of services.

In particular, section 1816(a) of the Act formerly gave groups and associations of providers of services (which, under section 1861(u) of the Act, includes hospitals, critical access hospitals (CAHs), skilled nursing facilities (SNFs), comprehensive outpatient rehabilitation facilities (CORFs), HHAs, hospices, and, for the purposes of sections 1814(g) and 1835(e) of the Act, funds) the power to nominate their servicing intermediary to determine and make Medicare payments to their members. Under this provision, an intermediary could be a “national, state, or other public or private agency or organization.” As previously stated, under this provision, the American Hospital Association nominated the national Blue Cross Association to serve

as the prime Medicare intermediary for its membership in 1965, an arrangement that continues to exist.

Moreover, prior to the enactment of Pub. L. 108–173, section 1816(d) of the Act allowed individual providers and groups of providers to—

- Part with their group or association and nominate another entity to serve as their intermediary; and
- Withdraw its/their nomination from an intermediary, and obtain services from another intermediary that had an agreement with the Secretary.

Finally, section 1816(e) of the Act, as it formerly read, specified the substantial procedural requirements to be followed by the Secretary in the event that the Secretary desired to assign or reassign individual providers of services to any intermediary other than the nominated entity. This provision also gave limited authority to the Secretary to designate a regional or national intermediary for a particular “class” of providers of services. However, this authority was subject to substantial procedural requirements. Among these procedural requirements were:

- The Secretary had to promulgate standards, criteria and procedures for evaluating the performance of intermediaries under section 1816(f) of the Act;
- The Secretary had to make a finding, after applying such standards, criteria, and procedures, that the reassignment of the individual provider and/or the designation of the regional or national intermediary would result in more efficient and effective administration of the Medicare program;
- The Secretary had to provide a full explanation of his reasons for determining that the intermediary change would result in more efficient and effective administration; and
- Affected agencies and organizations were given the right to a hearing, and any determinations of the Secretary on nominations and provider assignments were subject to judicial review.

In the former sections 1816(e)(4) and 1816(e)(5) of the Act, the Secretary was given authority to establish regional intermediaries with respect to HHAs and hospice providers, although certain procedural requirements still had to be met.

In summary, while under section 1816 of the Act, the Secretary was not required to accept all Medicare intermediary nominations, the Secretary had no independent authority to contract with any entity for Medicare intermediary services outside the nomination process. Moreover, while providers of services were given the

opportunity to seek a reassignment to a new intermediary, the Secretary could not assign or reassign individual providers or classes of providers unless substantial procedural requirements were followed.

The existing Medicare regulations under 42 CFR Part 421, particularly those within Subparts A and B, were substantially shaped by this statutory framework relating to provider nominations and the assignment or reassignment of providers of services to intermediaries. In particular, the following regulatory provisions have their basis in the statutory provisions of sections 1816(a), (d), and (e) of the Act (all are located within 42 CFR Part 421):

- § 421.1(c), which discusses criteria to be used in assigning and reassigning providers;
- § 421.3, which provides exceptions to definitions to accommodate the designation of regional intermediaries for HHAs and intermediaries for hospices;
- § 421.103, which identifies options available to providers for receiving Medicare payments;
- § 421.104, which provides the procedural framework governing the administration of provider nominations for intermediaries;
- § 421.105, which obligates CMS to provide notice as to its action on nominations;
- § 421.106, which specifies the process to be used by a provider desiring a change of intermediary;
- § 421.112, which provides the considerations to be taken into account by CMS when, among other things, it desires to assign or reassign a provider to an intermediary or designate a regional or national intermediary for a class of providers;
- § 421.114, which governs the assignment or reassignment of individual providers;
- § 421.116, which specifies the requirements for designating national or regional intermediaries consistent with sections 1816(e)(1) through (e)(3) of the Act; and
- § 421.117, which specifies the parameters for assigning HHAs and hospice providers to regional intermediaries consistent with sections 1816(e)(4) and (e)(5) of the Act.

In addition to the provisions discussed above that relate to provider nominations, prior to the enactment of Pub. L. 108–173, section 1816 of the Act also contained other provisions governing agreements with Medicare intermediaries that were not consistent with the mainstream of Federal acquisition and procurement

authorities, as this mainstream is reflected in the FAR. For instance—

- Section 1816(b) of the Act contains provisions that limited payment under all intermediary agreements to a cost-reimbursement basis only;

- Section 1816(f) of the Act required the Secretary to publish his performance criteria and standards for intermediary agreements in the **Federal Register**, and specified requirements relating to the application of such criteria and standards; and

- Section 1816(g) afforded intermediaries the right to terminate their agreements with CMS, but limited the right of the Secretary to terminate the agreement; in particular, no provision was made for the normal right of the government to terminate for convenience.

In section 911(b) of Pub. L. 108–173, Congress reiterated the requirement that CMS begin to move beyond the legacy nomination-based intermediary agreements during FY 2006. This was done by repealing outright or substantially modifying many of the provisions of section 1816 of the Act, effective October 1, 2005. In particular, section 911(b) of Pub. L. 108–173—

- Repealed the prior language of section 1816(a) of the Act, including the basic provider nomination provision, and replaced it with a statement indicating that Medicare Part A administrative functions would be contracted through section 1874A of the Act;

- Repealed section 1816(b) of the Act in full, including its provisions limiting payment to cost reimbursement;

- Repealed the contract-related provisions of section 1816(c) of the Act;

- Repealed sections 1816(d), (e), (f), (g), (h), (i), and (l) of the Act; and

- Made conforming changes to sections 1816(c), (j), and (k) of the Act.

With these changes, section 1816 of the Act is no longer an acquisition authority, and there is no vestige of the former provider nomination provisions or the partial exceptions to those provisions relating to home health and hospice providers.

While section 911(d)(1)(B) of Pub. L. 108–173 allows the Secretary to continue intermediary and carrier contracts in effect prior to October 1, 2005, under their terms and conditions until October 1, 2011, there was no similar extension for existing nomination arrangements. Section 911(d)(2)(A) of Pub. L. 108–173 provides the Secretary with authority to enter into intermediary agreements outside of the provider nomination process starting with the date of enactment of Pub. L. 108–173

(December 8, 2003). Therefore, while Congress specified that the Secretary should submit his plan for implementing section 911 at the start of FY 2005, the Secretary was authorized to contract outside of the section 1816 nomination provisions immediately and in advance of delivery of his report. This analysis requires that similar, conforming changes be made in our regulations as set forth in this proposed rule.

E. Provisions of the Proposed Regulations

As discussed under section XIX.A. of this preamble, based on the authority provided in sections 1874A(a) through (d) of the Act, as established by section 911(a)(1) of Pub. L. 108–173, we are proposing to establish regulations pertaining to MACs in a new Subpart E of 42 CFR Part 421. Moreover, based on the substantial changes to section 1816 of the Act, including the repeal of all of the section 1816 provisions relating to the ability of providers to nominate their servicing intermediary, as enacted by section 911(b) of Pub. L. 108–173, we also are proposing a number of changes to Subparts A and B of 42 CFR Part 421. In addition, we are proposing to change the title of Part 421 from “Intermediaries and Carriers” to “Medicare Contracting” and make conforming revisions to Subpart B of Part 421.

As discussed earlier, section 911(b) of Pub. L. 108–173 either repealed outright or substantially modified sections 1816(a), (b), (c), (d), (e), (f), (g), (h), (i), and (l) of the Act, and made clear that the acquisition authority for Part A claims processing would, after October 1, 2005, be found in section 1874A of the Act. Among all these changes, each of the former “provider nomination” provisions within section 1816 of the Act was repealed. In addition, section 911(d)(2)(A) of Pub. L. 108–173 gave the Secretary authority to disregard the provider nomination provisions in his contracting, even prior to October 1, 2005. In accordance with these statutory changes, we are proposing to substantially modify or delete §§ 421.1(c), 421.3, 421.103, 421.104, 421.105, 421.106, 421.112, 421.114, 421.116, and 421.117 of the regulations.

As discussed earlier, the amendment to title XVIII of the Act (to allow for the new section 1874A: “Contracts with Medicare Administrative Contractors”) requires CMS to contract with eligible entities to perform Medicare functions using the FAR. We are proposing to add regulations pertaining to MAC contracts in a new subpart E (Medicare

Administrative Contractors) under Part 421 as follows:

Subpart E—Medicare Administrative Contractors

Sec.

421.400 Basis and scope.

421.401 Definitions.

421.404 Assignment of providers and suppliers to MACs.

1. Definitions

Under proposed § 421.401, we define a “Medicare administrative contractor (MAC)” as an agency, organization, or other person with a contract to perform any or all of the functions set forth under section 1874A of the Act. With respect to the performance of a particular function in relation to an individual entitled to benefits under Medicare Part A or enrolled under Medicare Part B, or both, a specific provider of services or supplier (or class of such providers of services or suppliers), we are proposing to define an “appropriate MAC” as a MAC that has a contract to perform a Medicare administrative function in relation to a particular individual, provider of services, or supplier or class of providers.

2. Assignment of Providers and Suppliers to MACs

We are proposing to establish a new § 421.404 to incorporate the rules governing the processing of claims submitted by providers and suppliers that enroll with and receive Medicare payment and other Medicare services. As a general rule, Medicare providers and suppliers will be assigned to the MAC that is contracted to administer the types of services (benefits) billed by the provider or supplier within the geographic locale in which the provider or supplier is physically located or furnishes health care services, respectively. One significant exception to this general rule pertains to suppliers of durable medical equipment, prosthetics, orthotics, and supplies. CMS would continue to allow these suppliers to bill to the contractor assigned to the locale in which the beneficiary receiving the items or supplies resides.

In the past, under the provider nomination provisions that were repealed by section 911 of Pub. L. 108–173, CMS had considered (and occasionally approved) requests from certain classes of institutional providers covered by these section 1816 provisions, primarily, hospitals, SNFs, and CAHs, to bill an intermediary other than the one servicing providers in the geographic locale of the provider. The

process and criteria for making these determinations are set forth in detail in the existing regulations under 42 CFR part 421, subpart B (which we are proposing to remove in accordance with the changes effectuated by section 911(b) of Pub. L. 108–173.

In particular, not automatically but on a fairly frequent basis, CMS approved requests from large multi-State groups of such providers under common ownership and control, called “chain providers,” to bill a single intermediary on behalf of all the individual providers in the chain through the headquarters office, or “home office,” of the chain provider. These chain providers were granted “single intermediary” status.

The premise behind granting privileges to bill a single intermediary to such large multi-State chain providers was that this might reduce administrative billing expenses for the chain and reduce the administrative expenses of the Medicare program. In particular, assigning a large multi-State chain provider to a single intermediary facilitated the Medicare cost report audit and reimbursement functions, because findings with respect to the cost report of the chain’s home office could affect the individual provider’s cost report. Otherwise, these audit and reimbursement issues would need to be coordinated among multiple intermediaries.

In addition to applying the relevant regulatory requirements in 42 CFR part 421, subpart B in our review of chain provider requests for single intermediary status, we applied additional criteria to focus our analysis and to ensure that the exception to our normal practice of assigning providers to their “local” intermediary was warranted. We advised the chain provider that it would have to demonstrate that having a single intermediary would be consistent with efficient and effective administration of the Medicare program, and that the intermediary would need to have sufficient capacity to effectively serve the chain (these elements were restatements of the regulatory criteria). In addition, we required the chain to meet the following requirements:

- **Size**—The provider chain had to be comprised of 10 participating facilities or 500 certified beds, or 5 facilities or 300 certified beds spread across 3 or more contiguous States.

- **Central Controls**—The provider chain had to demonstrate that it exercised central controls, assuring substantial uniformity in operating procedures, utilization controls, personnel administration, and fiscal

operations among the individual providers.

The administrative efficiencies gained by both the large multi-State chain providers and the Medicare program by allowing single intermediary relationships to exist may not be as significant as they were formerly. Prior to the implementation of the Administration Simplification provisions of Part C of Title XI of the Act, the various intermediaries required providers to use somewhat divergent transaction and formatting standards in their electronic claims processing systems. A provider chain with centralized billing processes could make a good business case that it should be permitted to bill only one intermediary. Moreover, prior to the implementation of the many prospective payment systems required by the Balanced Budget Act of 1997 and subsequent public laws, a greater percentage of Medicare program payments hinged on the Medicare cost report audit and reimbursement process. In such an environment, there was potential benefit to both a chain provider and the government to minimize coordination issues. Finally, the former Medicare environment involved many intermediaries, so there were naturally more geographic boundaries among contractors that a multi-State chain could cross.

We understand the provisions of section 1874A of the Act and, more particularly, the revisions to section 1816 of the Act made by section 911(b) of Pub. L. 108–173 to authorize the Secretary to assign all providers and suppliers, even the members of multi-State entities, to the geographically-based MACs based on their physical location. This action is consistent with CMS’ vision, as articulated in the Secretary’s Report to Congress on Medicare Contracting, of establishing a claims processing environment where most Medicare Part A and Part B claims involving a particular beneficiary are administered by the same contractor.

However, as indicated in that Report (page V–4), we recognize that there may still be some legitimate business value to allowing large multi-State chains of providers that formerly were able to nominate their intermediary to bill on a consolidated basis to one MAC. While Congress has clearly mandated that the former provider nomination framework be abolished, we believe that allowing the practice of consolidated billing by large chains is within the discretion of the Secretary under section 911 of Pub. L. 108–173. Accordingly, in this proposed rule, we are proposing under § 421.404 that—

- Providers (as defined in 42 CFR 400.202) will generally be assigned to the MAC with claims processing jurisdiction over the geographic locale in which the provider is physically located.

- Large chain providers comprised of individual providers that were formerly permitted by CMS to “nominate” an intermediary, which we refer to as “qualified chain providers,” will be permitted to request opportunity to consolidate their Medicare billing activities to the MAC with jurisdiction over the geographic locale in which the chain’s home office is located.

- Qualified chain providers that were formerly granted single intermediary status do not need to re-request such privileges on behalf of the entire chain at this time.

- CMS may grant other exceptions to the general rule for assigning providers to MACs, but only based on a finding that such an exception will support the implementation of the MACs or if CMS deems the exception to be in the compelling interest of the Medicare program.

We are proposing to incorporate a definition of “qualified chain provider.” The criteria that constitute the proposed definition of a “qualified chain provider” mirror the elements that were historically applied. We believe these are appropriate criteria to employ in reviewing whether a chain provider should even be considered for consolidated billing. Less stringent criteria would clearly cut against the statutory mandate to establish MACs and end the provider nomination process. More stringent criteria might disrupt the operations of many entities that formerly were approved for single intermediary handling under the old criteria.

Smaller chains of otherwise eligible providers (for example, hospitals, SNFs, and CAHs) might also desire consolidated billing, as well as other types of providers (for example, HHAs and hospices). In the latter case, the other types of providers (termed “ineligible providers” in this proposed rule) did not have the opportunity to request assignment to (nominate) a particular intermediary prior to October 1, 2005. In some cases, these other types of providers were assigned to regional intermediaries based on a nexus of statutory and administrative actions. In other cases, assignments were made through administrative action. In the case of smaller chains of otherwise eligible providers, we note that Pub. L. 108–173 clearly mandates the end of the provider nomination process and

appears to us to anticipate the use of regional contractors.

We believe that our establishment of MACs that, in most cases, will administer claims from multiple States will largely resolve the concerns these other providers may have. Under our proposed approach, for instance, we believe that few chain providers will have to bill more than two MACs even if they fail to meet the tests for being a "qualified chain provider."

Finally, with respect to suppliers (as also defined in 42 CFR 400.202 of our regulations), we are proposing to assign suppliers (including physicians and other practitioners) to MACs based on the geographic jurisdiction in which they operate and furnish services. These requirements mirror the various Part B claims jurisdiction rules that have been in place. CMS may grant an exception to this policy only if CMS finds the exception will support the implementation of MACs or will serve some compelling interest of the Medicare program. However, we do incorporate the current special billing requirements relating to suppliers of durable medical equipment, prosthetics, orthotics, and supplies under § 421.210 and § 421.212.

As we move forward to implement MAC contracting in keeping with the statutory mandate of section 911 of Pub. L. 108–173 and the Secretary's Report to Congress, we invite public comments on the above issues, including our proposed definitions and criteria. (Once the MACs are initially implemented, we may propose more stringent criteria for consolidated billing status, in keeping with the overall thrust of section 911 of Pub. L. 108–173.)

3. Other Proposed Technical and Conforming Changes

a. Definition of "Intermediary" (§ 421.3)

We are proposing to revise the definition of the term "intermediary" under existing § 421.3 to delete reference to "alternative regional intermediaries." CMS no longer allows HHAs and hospice care providers to select an alternative regional intermediary. Over the years, as the number of intermediaries in the program has decreased, the availability of alternative intermediaries for HHAs and hospices has declined. We have implemented the policy that all HHAs and hospice care facilities are to be assigned to the designated regional intermediary that serves their geographic jurisdiction. This is required for the efficient and effective administration of the Medicare program

as the agency moves forward to implement the MACs.

b. Intermediary Functions (§ 421.100)

Section 1816(a) of the Act, which allowed providers to nominate an intermediary, required that only nominated intermediaries perform the functions of determining payment amounts and making payments to providers. Section 1874A of the Act, as added by section 911 of Pub. L. 108–173, eliminates the intermediary nomination process. All activities carried out under intermediary agreements will be transitioned to MAC contracts by September 30, 2011.

During the transition period, CMS will still require regulations to support its intermediary agreements. We are proposing to amend § 421.100, concerning functions to be included in intermediary agreements, to address the dual intermediary responsibilities.

We are proposing to revise existing § 421.100(i), Dual intermediary responsibilities, to delete the reference to § 421.117 from this section, as the statutory provision that made this necessary was repealed by Pub. L. 108–173.

c. Options Available to Providers and CMS (§ 421.103)

We are proposing to change the title of § 421.103 to "Payment to Providers" and to revise the contents of § 421.103 to clarify that, all providers must receive payments for covered services furnished to Medicare beneficiaries through an intermediary (under § 421.404) and eventually through a MAC (under § 421.404). We are proposing that this function must remain with the intermediaries. We would no longer allow providers to receive payments directly from CMS, nor would we allow providers to receive payments from alternative regional intermediaries. We believe the inclusion of this function is consistent with the effective and efficient administration of the Medicare program.

d. Nomination for Intermediary (§ 421.104)

We are proposing to change the title of § 421.104 to "Assignment of Providers of Services to Intermediaries During Transition to Medicare Administrative Contractors (MACs)" and to revise the contents of the section to provide that new providers that enter the Medicare program during the transition period will be assigned to the local designated intermediary that serves the jurisdiction in which the provider is located. We believe this change is necessary as we prepare to

transition from intermediary agreements and carrier contracts to contracts with the MACs. In the MAC environment, providers will be assigned based on their geographic location to the MAC that has jurisdiction for their provider type.

e. Notification of Actions on Nominations, Changes to Another Intermediary or to Direct Payment, and Requirements for Approval of an Agreement (§ 421.105 and § 421.106)

We are proposing to remove § 421.105 and § 421.106 from the regulations, as the sections would no longer be applicable with implementation of the new Subpart E.

f. Considerations Relating to the Effective and Efficient Administration of the Medicare Program (§ 421.112)

We are proposing to revise § 421.112(a). As stated previously in this proposed rule, provider requests to be assigned or reassigned to a particular intermediary will no longer be considered. However, we may deem it necessary to reassign providers if we find it is necessary for the efficient and effective administration of the program. In addition, there will no longer be a national intermediary to serve a class of providers.

g. Assignment and Reassignment of Providers by CMS (§ 421.114)

We are proposing to revise § 421.114 to specify that we may consider it necessary to assign and reassign providers if the assignment or reassignment is in the best interest of the program. Before making these determinations, we will no longer review provider requests to be reassigned to another intermediary. This is consistent with the proposed policy to eliminate a provider request to change to another intermediary or to direct payment. Under Medicare contracting reform, we require increased flexibility to realign providers to geographical jurisdictions for effective implementation of the MACs. We reserve the right to reassign providers to other jurisdictions if we deem it to be in the best interest of the program.

h. Designation of National or Regional Intermediaries (§ 421.116) and Designation of Regional and Alternative Designated Regional Intermediaries for Home Health Agencies and Hospices (§ 421.117)

We are proposing to delete § 421.116, Designation of national or regional intermediaries, and § 421.117, Designation of regional and alternative designated regional intermediaries for

HHAs and hospices. The statutory provisions that made these regulations necessary were repealed by Pub. L. 108–173. Therefore, we no longer need these regulations. All providers will receive payment for covered services as described in § 421.103.

i. Awarding of Experimental Contracts (§ 421.118)

We are proposing to delete § 421.118, which specifies the provisions under which CMS may award a fixed price or performance incentive contract under the experimental authority contained in 42 U.S.C. 1395b–1 for performance of

intermediary functions under § 421.100. The provisions of this section became obsolete with the enactment of section 911 of Pub. L. 108–173.

XX. Reporting Quality Data for Improved Quality and Costs Under the OPPTS

(If you choose to comment on issues in this section, please include the caption “Hospital Quality Data” at the beginning of your comment.)

As noted previously, CMS’ Office of the Actuary currently projects that Medicare Part B expenditures will continue to grow at a significant rate, as a result of rapid growth in the use of

both physician-related services and hospital outpatient services in the original Medicare fee-for-service program. Specifically, the actuaries project that the expenditures under the OPPTS in CY 2007 will be approximately \$32.540 billion. This represents approximately a 9.2 percent increase over our estimated expenditure of \$29.809 billion for the OPPTS in CY 2006, and reflects even more rapid spending growth in recent years. As the following table shows, implementation of the OPPTS has not slowed outpatient spending growth; in fact, double-digit spending growth has been occurring.

TABLE 47.—GROWTH IN EXPENDITURES UNDER OPPTS FROM CY 2001 THROUGH CY 2007 (PROJECTED EXPENDITURES FOR CY 2006 AND CY 2007)
[in millions]

OPPTS growth	CY 2001	CY 2002	CY 2003	CY 2004	CY 2005	CY 2006	CY 2007
Incurred Cost	19,172	19,561	21,146	23,912	26,643	29,809	32,540
Percent Increase		2.0	8.1	13.1	11.4	11.9	9.2

Source: FY 2007 Mid-Session Review, Budget of the U.S. Government.

The current rate of growth in expenditures for hospital outpatient services is of great concern to us. As with the other Medicare fee-for-service payment systems that are experiencing

rapid spending growth, brisk growth in the intensity and utilization of services is the primary reason for the current rate of growth in the OPPTS, rather than general price or enrollment changes.

The table below illustrates the increases in the volume and intensity of outpatient hospital services over the last several years.

TABLE 48.—PERCENT INCREASE IN VOLUME/INTENSITY OF HOSPITAL OUTPATIENT SERVICES

	CY 2002	CY 2003	CY 2004	CY 2005 (Est.)	CY 2006 (Est.)
Percent Increase	3.0	2.0	8.0	8.0	10.0

Source: FY 2007 Mid-Session Review, Budget of the U.S. Government.

For outpatient hospital services, the volume and intensity for CY 2005 are estimated to continue to increase significantly at a rate of 8 percent, in excess of the long-term trend. This increase follows the 8 percent increase in CY 2004, and the growth is projected to be 10 percent in CY 2006.

As we have stated repeatedly, this rapid growth in utilization of services in the OPPTS shows that Medicare is paying mainly for more services each year, regardless of their quality or impact on beneficiary health. The program should promote higher quality services, so that Medicare spending is directed in the most efficient manner toward higher quality services. Medicare payments should encourage doctors and other providers in their efforts to achieve better health outcomes for Medicare beneficiaries at a lower cost. Therefore, we have been examining the concept of “value-based purchasing” in a number of payment systems. “Value-based

purchasing” may use a range of incentives to achieve identified quality and efficiency goals, as a means of promoting better quality of care and more effective resource use in the Medicare payment systems. In developing the concept of value-based purchasing, we have been working closely with stakeholder partners, including health professionals and providers.

In this proposed rule, we are seeking public comment on value-based purchasing as related specifically to hospital outpatient departments. As part of our overall goal of promoting value-based purchasing in outpatient payment, we also make one specific proposal in the OPPTS for CY 2007.

Section 1833(t)(2)(E) of the statute permits the Secretary to “establish, in a budget neutral manner, * * * adjustments as determined to be necessary to ensure equitable payments” under the OPPTS. The

absence of OPPTS measures to promote high quality in the provision of services to Medicare beneficiaries creates an issue of payment equity. In general, payments to providers in Medicare’s payment systems do not vary on the basis of quality or efficiency differences among the providers of services. As a result, Medicare’s payment systems direct additional resources to hospitals that deliver care that is not of the highest quality. For that reason, each Medicare dollar spent does not result in the same quality and efficiency of care for Medicare beneficiaries.

We believe that the collection and submission of performance data and the public reporting of comparative information about hospital performance can provide a strong incentive to encourage hospital accountability in general and quality improvement in particular. Measurement and reporting can focus the attention of hospitals and consumers on specific goals and on

hospitals' performance relative to those goals. Development and implementation of performance measurement and reporting by hospitals can thus produce quality improvement in actual health care delivery. Hospital performance measures may also provide a foundation for performance-based rather than volume-based payments, which are used in the OPPS today.

We have obtained some evidence of the potential for improving quality of care in hospitals by means of the collection and submission of performance data from the Premier Hospital Quality Incentive Demonstration.¹ This demonstration was designed to test whether the quality of inpatient care for Medicare beneficiaries can improve when financial incentives are provided. Under the demonstration, about 270 hospitals of Premier, Inc., a nationwide alliance of not-for-profit hospitals, have been voluntarily providing data on 34 quality measures related to 5 clinical conditions: Heart attack, heart failure, pneumonia, coronary artery bypass graft, and hip and knee replacements. Using the quality measures, CMS identifies hospitals with the highest quality performance in each of the five clinical areas. Hospitals scoring in the top 10 percent in each clinical area receive a 2-percent bonus payment in addition to the regular Medicare DRG payment for the measured condition. Hospitals in the second highest 10 percent receive a 1-percent bonus payment. In the third year of the demonstration, if some hospitals do not achieve absolute improvements above the demonstration's first year composite score baseline (the lowest 20 percent) for that condition, then they will have their DRG payments reduced by one or two percent, depending on how far their performance is below the baseline.

Following the first year of the demonstration (FY 2004), CMS awarded a total of \$8.85 million to participating hospitals in the top two deciles for each clinical area. In the aggregate, quality of care improved in all five clinical areas that were measured. Preliminary information from the second year of the demonstration indicates that quality is continuing to improve, particularly for the hospitals that were initially poorest performing.² We believe that these

results indicate that reporting of quality data may in and of itself lead to improved outcomes for Medicare beneficiaries.

Since 2003, we have operated the Hospital Quality Initiative,³ which is designed to stimulate improvements in inpatient hospital care by standardizing hospital performance measures and data transmission to ensure that all payers, hospitals, and oversight and accrediting entities use the same measures when publicly reporting on hospital performance. Section 501(b) of Pub. L. 108–173 authorized us to link the collection of data for an initial starter set of 10 quality measures to the hospital IPPS annual payment update. In order to implement this provision, we created the Reporting Hospital Quality Data for Annual Payment Update (RHQDAPU) program. For FYs 2005 and 2006, hospitals that met the RHQDAPU program's requirements received the full IPPS annual payment update, while hospitals that did not comply received an update that was reduced by 0.4 percentage points. For FY 2005, virtually every hospital in the country that was eligible to participate submitted data (98.3 percent), and approximately 96 percent of all participating hospitals met the requirements to receive the full update. The data regarding the starter set of 10 quality measures, as well as additional, voluntarily-reported data on other quality measures, are available to the public through the Hospital Compare Web site at: <http://www.hospitalcompare.hhs.gov>.

The starter set of 10 quality measures that was established for the IPPS RHQDAPU as of November 1, 2003, are:

Heart Attack (Acute Myocardial Infarction/AMI)

- Was aspirin given to the patient upon arrival to the hospital?
- Was aspirin prescribed when the patient was discharged?
- Was a beta-blocker given to the patient upon arrival to the hospital?
- Was a beta-blocker prescribed when the patient was discharged?
- Was an ACE inhibitor given for the patient with heart failure?

Heart Failure (HF)

- Did the patient get an assessment of his or her heart function?
- Was an ACE inhibitor given to the patient?

CMS Web site at: http://www.cms.hhs.gov/HospitalQualityInits/35_HospitalPremier.asp.

³ Additional information on CMS' Hospital Quality Initiative is available on the CMS Web site at: <http://www.cms.hhs.gov/HospitalQualityInits/>.

Pneumonia (PNE)

- Was an antibiotic given to the patient in a timely way?
- Had the patient received a pneumococcal vaccination?
- Was the patient's oxygen level assessed?

For FY 2007 and each subsequent year, section 5001(a) of Pub. L. 109–171 amended section 1886(b)(3)(B) of the Act and made changes to the program established under section 501(b) of Pub. L. 108–173. These changes require us to expand the number of measures for which data must be submitted, and to change the percentage point reduction in the annual payment update from 0.4 percentage points to 2.0 percentage points for IPPS hospitals that do not report the required quality measures in a form and manner, and at a time, specified by the Secretary.

Effective for payments beginning with FY 2007, new section 1886(b)(3)(B)(viii)(IV) of the Act requires the Secretary to begin to adopt the expanded set of performance measures set forth in the IOM's 2005 report entitled, "Performance Measurement: Accelerating Improvement."⁴ Those measures include the HQA measures and the HCAHPS® patient perspective survey. Effective for payments beginning with FY 2008, the Secretary must add other measures that reflect consensus among affected parties and may replace existing measures as appropriate. New section 1886(b)(3)(B)(viii)(VII) of the Act requires the Secretary to post hospital quality data on these measures on the CMS Web site. A proposed list of expanded quality measures to be used for the FY 2007 update was included in the FY 2007 IPPS proposed rule (71 FR 24093). The final expanded set of 21 quality measures for the FY 2007 update, as listed in the FY 2007 IPPS final rule, is outlined below:

Heart Failure (Acute Myocardial Infarction/AMI)

- Aspirin at arrival
- Aspirin prescribed at discharge
- ACE inhibitor (ACE-I) or Angiotensin Receptor Blocker (ARBs) for left ventricular systolic dysfunction
- Beta blocker at arrival
- Beta blocker prescribed at discharge
- Thrombolytic agent received within 30 minutes of hospital arrival
- Percutaneous Coronary Intervention (PCI) received within 120 minutes of hospital arrival

⁴ Institute of Medicine, "Performance Measurement: Accelerating Improvement," December 1, 2005, available at <http://www.iom.edu/CMS/3809/19805/31310.aspx>.

¹ The Premier Hospital Quality Incentive Demonstration was authorized under section 402 of Pub. L. 90–248, Social Security Amendments of 1967 (42 U.S.C. 1395b–1). This section authorizes certain types of demonstration projects that waive compliance with the regular payment methods used in the Medicare program.

² Additional information on the Premier Hospital Quality Incentive Demonstration is available on the

- Adult smoking cessation advice/counseling

Heart Failure (HF)

- Left ventricular function assessment
- ACE inhibitor (ACE-1) or Angiotensin Receptor Blocker (ARBs) for left ventricular systolic dysfunction
- Discharge instructions
- Adult smoking cessation advice/counseling

Pneumonia (PNE)

- Initial antibiotic received within 4 hours of hospital arrival
- Oxygenation assessment
- Pneumococcal vaccination status
- Blood culture performed before first antibiotic received in hospital
- Adult smoking cessation advice/counseling
- Appropriate initial antibiotic selection
- Influenza vaccination status

Surgical Care Improvement Project (SCIP)

- Prophylactic antibiotic received within 1 hour prior to surgical incision
- Prophylactic antibiotics discontinued within 24 hours after surgery end time

In order to receive the full FY 2007 IPPS update, hospitals are required to continue to collect data for all 10 starter set quality measures (or begin collecting such data, if newly participating in the program) and are required to provide a written pledge to submit data on the set of 21 expanded quality measures, in addition to completing several administrative tasks regarding quality reporting. All of the measures for the IPPS RHQDAPU program are to be reported on inpatient hospital discharges.

We are proposing to employ our equitable adjustment authority under section 1833(t)(2)(E) of the Act to adapt the quality improvement mechanism provided by the IPPS RHQDAPU program for use in the OPSS. As we have discussed above, failure to account at all for quality in payment systems raises a fundamental issue of payment equity. In the absence of mechanisms that provide incentives for higher quality care, Medicare's payment systems can direct more resources to hospitals that do not deliver high quality care to Medicare beneficiaries.

In this rule, we are proposing to initiate a Reporting Hospital Quality Data for Annual Payment Update under the OPSS, (OPSS RHQDAPU program) effective for payments beginning January 1, 2007. We propose to add a new § 419.43(h) to our regulations to implement this proposal. Under

proposed new § 419.43(h)(1), we would initially implement an OPSS RHQDAPU program by reducing the OPSS conversion factor update in CY 2007 for those hospitals that are required to report quality data under the IPPS RHQDAPU program in order to receive the FY 2007 update, and fail to meet the requirements for receiving the full FY 2007 IPPS payment update. These hospitals would receive an update to the CY 2007 OPSS conversion factor that is reduced by 2.0 percentage points. Under proposed § 419.43(h)(2), any reduction would not affect a hospital's OPSS update in a subsequent calendar year. Hospitals that meet the IPPS RHQDAPU program's requirements for FY 2007 and receive the full IPPS annual payment update would also receive the full update to the conversion factor used to determine payments for CY 2007 under the OPSS.

For this initial phase of implementing an OPSS RHQDAPU program in CY 2007, it will be necessary to provide an exception for certain hospital outpatient departments to the requirement that quality data be submitted under the IPPS RHQDAPU program in order to receive the full OPSS update. The quality data submission requirements of the IPPS RHQDAPU program apply only to "subsection (d)" hospitals. "Subsection (d)" hospitals are defined under section 1886(d)(1)(B) of the Act as hospitals that are located in the fifty states or the District of Columbia other than those categories of hospitals or hospital units that are specifically excluded from the IPPS, including psychiatric, rehabilitation, long-term care, children's, and cancer hospitals or hospital units. In other words, the provision does not apply to hospitals and hospital units excluded from the IPPS, or to hospitals located in Puerto Rico or the U.S. territories. For the initial stage of implementing the OPSS RHQDAPU program in CY 2007, hospitals that are paid under the OPSS but that do not qualify as "subsection (d)" hospitals will continue to receive the full update to the OPSS conversion factor. However, as we discuss below, our intention is to expand the OPSS RHQDAPU in the future program by requiring all hospitals that receive payment under the OPSS to participate in the program in order to receive a full update, by appropriate expansion, adaptation, and/or extension of quality performance measures and quality reporting mechanisms.

We believe that it is fair and appropriate, for purposes of the initial phase of implementing an OPSS RHQDAPU program, to take timely and accurate reporting of IPPS RHQDAPU

program quality measures into account under our equitable adjustment authority. We think that the 10 original quality measures and the expanded set of 21 process measures as reported for inpatient discharges for heart attack, heart failure, pneumonia, and surgical care reflect the quality of care in the outpatient department as well as the inpatient hospital, so they are appropriate for initial use in the OPSS as specific measures are being developed to reflect the quality of care for hospital outpatients. We believe that hospitals generally function as integrated systems that provide health care services to patients in both inpatient and outpatient settings for many of the same clinical conditions, while recognizing the different typical levels of acuity in the two settings. Hospital quality measures for multiple conditions reflect, in part, the systems of care established by hospitals in the outpatient setting such as the emergency department. Therefore, the well-developed quality measures reported for the FY 2007 IPPS regarding inpatient hospital discharges should reasonably represent the quality of care provided to hospital outpatients, so we are proposing their interim use for the CY 2007 OPSS while quality measures specific to hospital outpatients are being developed and refined. This use of multiple measures for several clinical conditions serves as a proxy for the quality of the systems of care established by hospitals. As we expand quality measurement for the hospital outpatient setting, we intend to move from measures that serve as proxies for the quality of care to actual performance measures for the outpatient setting. The discussion below focuses on the expanded list of 21 quality of care measures, as the 10 original measures continue to be included in the quality measurement expansion.

There are 7 quality measures assessing the processes of care for patients presenting to the hospital with an acute myocardial infarction, focused on the care on arrival, the promptness of interventions, and discharge care. For the common urgent condition of a patient presenting to the hospital with chest pain that results in a clinical suspicion of acute myocardial infarction, in their effort to provide consistent, high quality care that is founded on evidence-based guidelines, hospitals often utilize clinical care pathways that are standardized for such patients presenting to the emergency room of the hospital. Such care pathways generally apply to patients with specific medical conditions who

present to the hospital initially as outpatients, regardless of their eventual discharge home from the outpatient department or inpatient admission. Thus, we believe that all 7 of these measures likely serve as reasonable proxies for the quality of care for patients presenting to the hospital outpatient department with chest pain related to a myocardial infarction, who commonly receive care along the continuum from outpatient to inpatient services in a hospital that provides such care in an integrated system.

Similarly, there are 7 process measures related to the care of patients with pneumonia, who often present urgently to the hospital's emergency room with symptoms suggestive of the diagnosis of pneumonia. Because of the established clinical evidence regarding assessment and treatment activities that improve the quality of care for patients with pneumonia, most of the interventions that are measured, including oxygenation assessment, drawing of blood cultures, assessment of the patient's pneumococcal and influenza vaccine status, and selection and provision of an initial antibiotic in a timely manner, would generally be performed in the outpatient department, sometimes prior to a clinical decision about the patient's ultimate need for inpatient admission. In particular, the measures of vaccine status are quality measures that may be especially appropriate as hospital outpatient prevention measures. Their use in the hospital setting provides an opportunity for quality improvement in the hospital by encouraging assessment of immunization status and appropriate provision of immunizations, so we see no reason why their reporting on hospital inpatients is not also reflective of the quality of hospital outpatient care. While we acknowledge that in general the clinical picture of patients who are admitted to the hospital with pneumonia differs from that of patients who are not hospitalized, we expect there to be many common elements in their assessment, treatment, and counseling regarding the significance of smoking as the hospital provides their initial and subsequent care in the outpatient and/or inpatient settings. Therefore, we believe that all 7 of the measures related to the treatment of pneumonia are likely appropriately reflective of the quality of the care systems established by hospitals for outpatients with a diagnosis of pneumonia.

There are 4 quality measures related to the treatment of patients with heart failure, including assessment of their cardiac function, use of certain

medications in their treatment, counseling regarding smoking cessation, and provision of discharge instructions. Patients with heart failure, a common chronic medical condition, are seen frequently in hospital clinics and emergency departments with exacerbations of their symptoms. Once again, their initial treatment is often standardized and provided in the outpatient setting without consideration of their eventual discharge from the outpatient department or inpatient admission, a decision which ultimately depends on clinical considerations, including their response to treatment. Thus, we believe that all 4 of the inpatient quality measures regarding the treatment of patients with heart failure are reasonable surrogates for the quality of hospital systems of care for outpatients with heart failure.

Likewise, under the expanded list of quality measures for the FY 2007 IPPS the surgical infection prevention quality measures indicating the provision of a prophylactic antibiotic within 1 hour prior to surgical incision and prophylactic antibiotics discontinued within 24 hours after surgery end time likely serve as a reasonable representation of the quality of surgical care for hospital outpatients. Many of the same surgical procedures are commonly performed on both hospital outpatients and inpatients, sometimes in the same operating room suites with attendance by the same clinical staff. Hospitals often have standardized protocols for providing antibiotics prior to surgery and postoperatively based on the types of procedures performed, rather than on the inpatient or outpatient status of the patient, and a decision to admit a patient may not even be made until after the completion of a procedure. Thus, we have no reason to believe that the preoperative and postoperative antibiotic experiences of a patient undergoing outpatient surgery would systemically vary from that of a hospital inpatient.

In summary, we believe that quality improvement is usually a function of the entire institution as an integrated system that provides both inpatient and outpatient services to patients with an overlapping range of medical conditions. Quality improvement in a hospital inpatient department is likely to correlate with, and indeed to promote, similar quality improvement in the hospital's outpatient department and other sectors of the institution. Conversely, hospitals that fail to promote quality improvement in key sectors such as inpatient care are also unlikely to improve quality in the hospital outpatient department. We

believe that the FY 2007 IPPS quality measures for multiple clinical conditions reflect the quality of hospitals' systems of care that customarily include key outpatient settings such as the emergency department. Therefore, as an interim measure while specific quality measures are being developed and refined for reporting on the quality of care to hospital outpatients, we are proposing that the initial CY 2007 OPDS RHQDAPU incorporate all of the quality measures that are applicable to the IPPS during FY 2007.

We welcome public comments on the applicability to the OPDS of the various FY 2007 IPPS quality measures as proxies for the quality of care in hospital systems that include outpatient departments, with consideration of both the 10 starter set measures and the 11 new measures in the expanded set for FY 2007.

Elsewhere in this proposed rule (section XXIII.), proposed additional quality measures for hospital reporting of quality data for the FY 2008 IPPS are discussed in detail. The proposed areas of expansion for the FY 2008 IPPS include the HCAHPS® survey, which incorporates questions measuring patients' perspectives on their hospital experiences; 3 additional measures related to the processes of surgical care to supplement the 2 initial Surgical Care Improvement Project (SCIP) measures to be implemented in FY 2007; and 3 risk-adjusted assessments of mortality within 30 days of hospital admission for acute myocardial infarction, heart failure, and pneumonia. For the same reasons detailed above for the FY 2007 IPPS SCIP measures, we believe that the additional surgical process of care measures are a reasonable interim proxy for the quality of surgical care for hospital outpatients.

In addition, the questions on the hospital HCAHPS® survey assess aspects of the patient's hospital experience, including communication with doctors and nurses, responsiveness of the staff, pain management, and discharge information. These areas of questioning are all relevant to a hospital's care for its outpatients, who may be treated in the hospital outpatient department for an extended period of time, particularly if they are in observation status or recovering from a significant surgical procedure. As described above, because hospitals generally function as integrated systems, with both inpatients and outpatients with related medical conditions passing through the same departments and interacting with similar staff, we believe that this survey of patients who have

been admitted to the hospital may reasonably reflect hospital outpatients' perspectives on their care experiences as well.

Finally, with respect to the 30-day mortality measures, these measures are linked to the same 3 medical conditions for which quality process measures have already been implemented in the IPPS RHQDAPU program, in order to expand the quality data to more fully reflect the true outcomes of care. These mortality measures are risk-adjusted based on historical medical care use, including inpatient and outpatient hospital care and physician offices visits, and reflect outcomes of care specifically for Medicare patients. Since we are proposing that the full set of FY 2007 IPPS process of care quality measures are acceptable proxies for the quality of care to hospital outpatients as previously discussed, and we believe that some of the value of health care process measures is their relative ease of measurement and their ultimate relationship to health outcomes, we believe that the 30-day mortality measures for inpatients may also reflect the quality of care to hospital outpatients with the same medical conditions. In addition, in view of the common clinical courses of acute myocardial infarction, heart failure, and pneumonia in Medicare beneficiaries, it is highly likely that hospital outpatient services may be provided to previously hospitalized patients within the measures' timeframe of 30 days after hospital discharge, thereby contributing to their care and health outcomes.

Therefore, our intention is to adopt the full set of FY 2008 IPPS quality measures as proposed for the CY 2008 OPPS RHQDAPU program, while we continue to develop a set of specific quality measures for hospital outpatient care.

We welcome public comments on the applicability of the FY 2008 IPPS additional quality measures that are proposed in this rule to the care of hospital outpatients. We also welcome public comments on alternative measures of quality of care, including measures of the cost or efficiency of care, that are suitable for adoption to reduce the incidence of lower-quality and high-cost outpatient hospital care for Medicare beneficiaries. We will formalize our proposal regarding the CY 2008 OPPS RHQDAPU program in the CY 2008 OPPS proposed rule, which may include proposing to adopt none, some, or all of the FY 2008 IPPS RHQDAPU measures, and may also reflect quality measures that are discussed in comments on this proposed rule.

For purposes of computing the update to the conversion factor under the OPPS in CY 2007, therefore, we are proposing to reduce the update to the OPPS conversion factor by 2.0 percentage points for any hospital that is eligible to participate in the IPPS RHQDAPU program, but that has had its IPPS payment update reduced because it failed to comply with that program's requirements. Under this proposal, hospitals that fail to qualify for the full CY 2007 OPPS update would receive payments based on a conversion factor of \$60.36, reflecting an update of 1.4 percent, in place of the conversion factor of \$61.551 reflecting the full update of 3.4 percent.

Under proposed § 419.43(h)(1), in order to avoid reduction to the CY 2007 OPPS update, hospitals that are eligible to participate in the IPPS RHQDAPU program must meet the requirements for receiving the full IPPS update for FY 2007. Updated procedures and requirements for the IPPS RHQDAPU program are included in the FY 2007 IPPS final rule. In addition to publication in the final rule, all revised procedures will be added to the "Reporting Hospital Quality Data for Annual Payment Update Reference Checklist" section of the QualityNet Exchange Web site (www.qnetexchange.org). For purposes of determining which hospitals have not qualified to receive the full update under the OPPS for CY 2007, we will follow the determination for FY 2007 full IPPS payment update eligibility under the IPPS RHQDAPU program. These determinations will be released on or about September 1, 2006.

As we noted above, we are undertaking this initiative under the authority granted by section 1833(t)(2)(E) of the Act, which authorizes the Secretary to "establish, in a budget neutral manner, * * * adjustments as determined to be necessary to ensure equitable payments" under the OPPS. Proposed § 419.43(h)(3) provides that the reduction to the CY 2007 update that we will implement for hospitals that fail to meet the requirements described above will be implemented in a budget neutral manner. Therefore, if we determine that some hospitals will receive a reduced update for CY 2007 as a result of failure to meet the requirements established under this initial phase of the OPPS RHQDAPU program, we will also make an adjustment to the OPPS conversion factor, so that estimated aggregate payments under the OPPS for CY 2007, taking into account the reduced update for some hospitals, equal the aggregate payments that we estimate would have

been made in CY 2007 if all hospitals received the full update to the conversion factor. As we noted above, determinations concerning which hospitals fail to meet the requirements for receiving the full update to the OPPS conversion factor in CY 2007 will be available on or about September 1, 2006. We are therefore unable at this time to determine how many hospitals will receive a reduced update in CY 2007, or to determine the budget neutrality adjustment factor that will be necessary to ensure that estimated aggregate payments under the OPPS for CY 2007 do not change as a result of implementing the proposed OPPS RHQDAPU program. However, very few hospitals have failed to qualify for the full annual updates under the IPPS RHQDAPU program. We therefore anticipate that any further adjustment to the CY 2007 conversion factor to satisfy the budget neutrality requirement under section 1833(t)(2)(E) of the Act will be negligible.

It is not our intention to maintain the specific requirements described above beyond a short initial phase of implementing an OPPS RHQDAPU program. Rather our intention is to develop this program beyond its initial stage in at least two ways. As we have stated previously, we believe that it is appropriate and fair during this initial phase of the OPPS RHQDAPU program, to take quality data reporting under the IPPS RHQDAPU program into consideration for purposes of determining the update for hospitals under the OPPS. However, it will be important for a fully developed OPPS RHQDAPU program to be based on reporting measures that are defined in terms of the quality considerations that are most appropriate and applicable in the hospital outpatient setting. In collaboration with health care stakeholders, we intend to begin work on a set of quality and cost of care measures specific to hospital outpatient departments for implementation in a later phase of the OPPS RHQDAPU program. We intend to implement a hospital outpatient-specific set of such quality and cost of care measures at the earliest possible date. Reporting of a more fully developed, outpatient-specific set of quality and cost of care measures may be effective for purposes of determining the update as early as CY 2009. However, in implementing the system we will allow adequate time for development of the appropriate measures; announcement of the quality and cost of care measures we have selected; consideration of comments from the hospital community, patient

advocates, and other stakeholders; establishment of the requisite mechanisms for reporting the measure; and initiation of actual reporting of the measures by hospitals. As we begin to develop such a set of hospital outpatient-specific quality and cost of care measures, we welcome comments on this issue.

Specifically, we invite comments on the following (and related) questions: Which current quality and cost of care measures, such as IPPS quality measures (especially the measure set as expanded under the DRA), physician practice measures, HCAHPS®/ACAHPS®, etc., are most applicable in the hospital outpatient setting? What would be the characteristics of an ideal measure set of quality and cost of care measures for the outpatient setting? What quality and cost of care measures are currently available for the outpatient setting? What privately-led organizations or alliances are best suited to conduct needed development and consensus endorsement of outpatient quality measures?

As we discussed above, for the initial stage of implementing the OPSS RHQDAPU program in CY 2007, hospitals that are paid under the OPSS but that do not qualify as “subsection (d)” hospitals will receive the full update to the OPSS conversion factor. However, we believe that it is essential to expand the requirements of the OPSS RHQDAPU program that we are proposing to all hospital outpatient departments paid under the OPSS. We will therefore also undertake to study, for CYs 2008 and beyond, approaches to adapting and expanding the current quality and cost of care measures under the IPPS RHQDAPU program for use in reporting on the quality of outpatient care in hospitals that are paid under the OPSS but that do not qualify as “subsection (d)” hospitals. We will also begin development of mechanisms by which these hospitals can report the requisite quality data in a timely and effective manner. We welcome comments on ways in which we can expand the proposed OPSS RHQDAPU program to all hospital outpatient departments that are paid under the OPSS, and on quality and cost of care measures that are specifically appropriate for reporting by hospital outpatient departments paid under the OPSS but that do not qualify as “subsection (d)” hospitals.

Our ultimate goal is implementation of an OPSS RHQDAPU program that extends to all hospital outpatient departments that are paid under the OPSS, that is based on a set of quality and cost of care reporting measures that

are specific to the hospital outpatient setting, and that is appropriately aligned with developments in quality reporting and value-based purchasing in other payment systems such as the IPPS. We will take into consideration issues related to the appropriate alignment of quality and cost of care reporting and value-based purchasing under the IPPS and OPSS during the planning process mandated by section 5001(b) of the DRA for implementation of inpatient value-based purchasing by FY 2009. We plan to include all hospital services, whether inpatient or outpatient, in the report on implementation of value-based purchasing. We have often heard from stakeholders that a more comprehensive, systematic approach to quality should be our focus. Quality reporting of inpatient and outpatient services is consistent with such comments, and will provide more comprehensive information about the quality of services provided by hospitals. We specifically request comments on the alignment of scope and other issues that should be considered during this planning process, including quality and cost of care reporting measures, data and program infrastructure, incentives, and public reporting of quality and cost of care measures under value-based purchasing.

Finally, we request comments on the most effective use of our authority under section 1833(t)(2)(E) of the Act, in light of the concerning evidence of rapid and uneven payment growth in the OPSS with limited evidence of patient benefit. In particular, commenters who believe that the proposed quality reporting initiative is not the most effective use of this authority should consider submitting comments on alternative, more effective approaches to using this and related authorities available to CMS under the Act to promote higher quality, more equitable care. We do not believe that the status quo, with rapid and uneven growth in spending and limited evidence of its value, is consistent with a sustainable hospital outpatient payment program and affordable health care for Medicare beneficiaries, and we expect to take further steps to address this important concern. As we have noted elsewhere, continuing rapid growth in Medicare spending that is not addressed by effective payment reforms often results in across-the-board reductions in payment rates. In addition, we seek comment on whether section 1833(t)(2)(F) of the Act also supports the proposed use of quality reporting to

determine a hospital's update under the OPSS.

XXI. Promoting Effective Use of Health Information Technology

(If you choose to comment on issues in this section, please include the caption “Health Information Technology” at the beginning of your comment.)

We recognize the potential for health information technology (HIT) to facilitate improvements in the quality and efficiency of health care services. One recent RAND study found that broad adoption of electronic health records could save more than \$81 billion annually and, at the same time, improve quality of care.⁵ The largest potential savings that the study identified was in the hospital setting because of shorter hospital stays promoted by better coordinated care; less nursing time spent on administrative tasks; better use of medications in hospitals; and better utilization of drugs, laboratory services, and radiology services in hospital outpatient settings. The study also identified potential quality gains through enhanced patient safety, decision support tools for evidence-based medicine, and reminder mechanisms for screening and preventive care. Despite such large potential benefits, the study found that only about 20 to 25 percent of hospitals have adopted HIT systems.

It is important to note the caveats to the RAND study. The projected savings are across the health care sector, and any Federal savings would be a reduced percentage. In addition, there are significant assumptions made in the RAND study. National savings are projected in some cases based on one or two small studies. Also, the study assumes patient compliance, in the form of participation in disease management programs and following medical advice. For these reasons, extreme caution should be used in interpreting these results.

In summary, there are mixed signals about the potential of HIT to reduce costs. Some studies have indicated that HIT adoption does not necessarily lead to lower costs and improved quality. In addition, some industry experts have stated that factors such as an aging population, medical advances, and increasing provider expenses would make any projected savings impossible.

⁵ RAND News Release: RAND Study Says Computerizing Medical Records Could Save \$81 Billion Annually and Improve the Quality of Medical Care, September 14, 2005, available at: <http://rand.org/news/press.05/09.14.html>.

In his 2004 State of the Union Address, President Bush announced a plan to ensure that most Americans have electronic health records within 10 years.⁶ One part of this plan involves developing voluntary standards and promoting the adoption of interoperable HIT systems that use these standards. The 2007 Budget states that “The Administration supports the adoption of health information technology (IT) as a normal cost of doing business to ensure patients receive high quality care.”

Over the past several years, CMS has undertaken several activities to promote the adoption and effective use of HIT in coordination with other Federal agencies and with the Office of the National Coordinator for Health Information Technology. One of those activities is promotion of data standards for clinical information, as well as for claims and administrative data. In addition, through our 8th Scope of Work contract with the QIOs, we are offering assistance to hospitals on how to adopt and redesign care processes to effectively use HIT to improve the quality of care for Medicare beneficiaries, including computerized physician order entry (CPOE) and bar coding systems. Finally, our Premier Hospital Quality Incentive Demonstration provides additional financial payments for hospitals that achieve improvements in quality, which effective HIT systems can facilitate.

We are considering the role of interoperable HIT systems in increasing the quality of hospital services while avoiding unnecessary costs. As noted above, the Administration supports the adoption of HIT as a normal cost of doing business. While payments under the OPPIs do not vary depending on the adoption and use of HIT, hospitals that leverage HIT to provide better quality services may more efficiently reap the reward of any resulting cost savings. In addition, the adoption and use of HIT may contribute to improved processes and outcomes of care, including shortened hospital stays and the avoidance of adverse drug reactions. We are seeking comments on our statutory authority to encourage the adoption and use of HIT. We also are seeking comments on the appropriate role of HIT in any value-based purchasing program, beyond the intrinsic incentives of the OPPIs, to provide efficient care, encourage the avoidance of unnecessary costs, and increase quality of care. In addition, we are seeking comments on

promotion of the use of effective HIT through hospital conditions of participation, perhaps by adding a requirement that hospitals use HIT that is compliant with and certified in its use of the HIT standards adopted by the Secretary. We anticipate that the American Health Information Community will provide advice to the Secretary on these issues.

XXII. Health Care Information Transparency Initiative

(If you choose to comment on issues in this section, please include the caption “Transparency of Health Care Information” at the beginning of your comment.)

The United States (U.S.) faces a dilemma in health care. Although the rate of increase in health care spending slowed last year, costs are still growing at an unsustainable rate. The U.S. spends \$1.9 trillion on health care, or 16 percent of the gross domestic product (GDP). By 2015, projections are that health care will consume 20 percent of GDP. The Medicare program alone consumes 3.4 percent of the GDP; by 2040, it will consume 8.1 percent of the GDP and by 2070, 14 percent of the GDP.

Part of the reason health care costs are rising so quickly is that most consumers of health care—the patients—are frequently not aware of the actual cost of their care. Health insurance shields them from the full cost of services, and they have only limited information about the quality and costs of their care. Consequently, consumers do not have the incentive or means to carefully shop for providers offering the best value. Thus, providers of care are not subject to the competitive pressures that exist in other markets for offering quality services at the best possible price. Reducing the rate of increase in health care prices and avoiding health services of little value could help to stem the growth in health care spending, and potentially reduce the number of individuals who are unable to afford health insurance. Part of the President’s health care agenda is to expand Health Savings Accounts (HSAs), which would provide consumers with greater financial incentives to compare providers in terms of price and quality, and choose those that offer the best value.

In order to exercise those choices, consumers must have accessible and useful information on the price and quality of health care items and services. Typically, health care providers do not publicly quote or publish their prices. Moreover, list prices, or charges, generally differ from

the actual prices negotiated and paid by different health plans. Thus, even if consumers were financially motivated to shop for the best price, it would be very difficult at the current time for them to access usable information.

For these reasons, DHHS is launching a major health care information transparency initiative in 2006. This effort builds on steps taken by CMS to make quality and price information available. For example, Medicare has provided unprecedented information about drug prices in the Medicare drug benefit, and is now adding to these efforts in other areas. We recently posted Medicare payment information for common elective procedures and other common admissions for all hospitals by county on our Web site at http://www.cms.hhs.gov/HealthCareConInit/01_Overview.asp#TopOfPage. We will post geographically-based Medicare payment information for common elective procedures for ambulatory surgery centers this summer and for common hospital outpatient and physician services this fall.

In addition, a number of tools providing usable health care information are already available to Medicare beneficiaries. Consumers can access “Compare” Web sites through <http://www.medicare.gov> where they can evaluate important aspects of their health care options for care at a hospital, nursing home, home health agency, and dialysis facility, as well as compare their costs and coverage when choosing a prescription drug plan.

CMS is developing a transparency initiative with the goals of providing more comprehensive information on quality and costs, including more complete measures of health outcomes, satisfaction, and volume of services that matter to consumers, and more comprehensive measures of costs for entire episodes of care, not just payments for particular services and admissions. We intend for the project to combine public and private health care data to provide cost and quality of care information at the physician and hospital levels. Quality, cost, pricing, and patient information will be reported to consumers and purchasers of health care in a meaningful and transparent way. In addition, we anticipate the project will provide a national template for performance measures and a payment structure that aligns payment and performance.

⁶ Transforming Health Care: The President’s Health Information Technology Plan, available at: http://www.whitehouse.gov/infocus/technology/economic_policy200404/chap3.html.

XXIII. Additional Quality Measures and Procedures for Hospital Reporting of Quality Data for the FY 2008 IPPS Annual Payment Update

(If you choose to comment on issues in this section, please include the caption "FY 2008 IPPS RHQDAPU" at the beginning of your comments.)

A. Background

Section 5001(a) of the Deficit Reduction Act of 2005 (DRA) (Pub. L. 109–171) sets out new requirements for the IPPS Reporting Hospital Quality Data for Annual Payment Update (RHQDAPU) program. The IPPS RHQDAPU program was established to implement section 501(b) of the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (MMA) (Pub. L. 108–173). It builds on our ongoing voluntary Hospital Quality Initiative which is intended to empower consumers with quality of care information to make more informed decisions about their health care while also encouraging hospitals and clinicians to improve the quality of care.

Section 5001(a) of Pub. L. 109–171 revises the mechanism used to update the standardized amount for payment for hospital inpatient operating costs. New sections 1886(b)(3)(B)(viii)(I) and (II) of the Act provide that the payment update for FY 2007 and each subsequent fiscal year will be reduced by 2.0 percentage points for any "subsection (d) hospital" that does not submit certain quality data in a form and manner, and at a time, specified by the Secretary. Under sections 1886(b)(3)(B)(viii)(III) and (IV) of the Act, we must expand the "starter set" of quality measures that we have used since FY 2005, and to begin to adopt the baseline set of performance measures as set forth in a 2005 report issued by the Institute of Medicine of the National Academy of Sciences (IOM) under section 238(b) of the MMA, effective for payments beginning with FY 2007. The 2005 IOM report's "baseline" quality measures include Hospital Quality Alliance (HQA)-approved clinical quality measures, the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS®) patient perspective survey, and three structural measures. The structural measures are: (1) Implementation of computerized provider order entry for prescriptions, (2) staffing of intensive care units with intensivists, and (3) evidence-based hospital referrals. These measures originate from the Leapfrog Group's original "three leaps," and are part of the NQF's 30 safe practices.

In 2002, the Secretary of HHS initiated a partnership with several collaborators intended to promote hospital quality improvement and public reporting of hospital quality information. This collaboration is known as the Hospital Quality Alliance (HQA). The collaborators include the American Hospital Association, the Federation of American Hospitals, the Association of American Medical Colleges, the Joint Commission on Accreditation of Healthcare Organizations (JCAHO), the National Quality Forum (NQF), the American Medical Association, the Consumer-Purchaser Disclosure Project, the American Association of Retired Persons, the American Federation of Labor Congress of Industrial Organizations, the Agency for Healthcare Research and Quality, as well as CMS, Quality Improvement Organizations (QIOs), and others.

In the FY 2007 IPPS proposed rule, we proposed to add to our 10-measure "starter set" of quality measures, 11 HQA-approved measures for purposes of the FY 2007 update (71 FR 24093). Under section 1886(b)(3)(B)(viii)(V) of the Act, for payments beginning with FY 2008, we are required to add other measures that reflect consensus among affected parties and, to the extent feasible and practicable, must include measures set forth by one or more national consensus building entities.

Commenters on the FY 2007 IPPS proposed rule requested that we notify the public as far in advance as possible of any proposed expansions of the measure set and program procedures to encourage broad collaboration and to give hospitals time to prepare for any anticipated changes. Other commenters requested that we adopt additional quality measures and that we do as soon as feasible. For example, several commenters urged that we adopt the HCAHPS® patient survey as a part of the IPPS RHQDAPU program, while others suggested that we adopt more of the IOM measures as well as more outcome measures, including mortality measures that were not included in the 2005 IOM report's "baseline" quality measures. In response to these comments and as part of our continuing efforts to strengthen the IPPS RHQDAPU program, we are seeking comments on this proposal to expand, for FY 2008, the measurement set beyond those measures we proposed to adopt for purposes of the FY 2007 update. This proposed expanded set would further broaden the scope of the IPPS RHQDAPU program by including the HCAHPS® patients' perspectives of care measures as well as surgical care and mortality outcome measures.

B. Proposed Additional Quality Measures for FY 2008

1. Introduction

For FY 2008, we propose to add the following categories to the measure set:

- **HCAHPS® Survey**
HCAHPS® is also known as Hospital CAHPS or the CAHPS Hospital Survey. The HCAHPS® survey is composed of the following 27 questions:
 - + 18 substantive questions that measure critical aspects of the hospital experience (communication with doctors; communication with nurses; responsiveness of hospital staff; cleanliness and quietness of hospital environment; pain management; communication about medicines; and discharge information).
 - + 4 questions that direct patients to complete only those survey questions that apply to them.
 - + 3 questions to be used to adjust the mix of patients across hospitals.
 - + 2 questions that support Congressionally-mandated reports, the "National Healthcare Disparities Report," and the "National Healthcare Quality Report."
 - **Surgical Care Improvement Project (SCIP)**
 - + SCIP-VTE 1: Venous thromboembolism prophylaxis ordered for surgery patient
 - + SCIP-VTE 2: VTE prophylaxis within 24 hours pre/post surgery
 - + SCIP Infection 2: Prophylactic antibiotic selection for surgical patients
 - **Mortality**
 - + AMI 30-day mortality—Medicare patients
 - + HF 30-day mortality—Medicare patients
 - + Pneumonia 30-day mortality—Medicare patients
- We discuss these proposed measures in detail below.

2. HCAHPS® Survey and the Hospital Quality Initiative

We have partnered with the Agency for Healthcare Research and Quality (AHRQ), another HHS agency, to develop HCAHPS®. The intent of the HCAHPS® initiative is to provide a standardized survey instrument and data collection methodology for measuring patients' perspectives of hospital care. While many hospitals currently collect information on patients' satisfaction with care, there is currently no national standard for collecting or publicly reporting this information that would enable valid comparisons to be made across hospitals. To make the appropriate comparisons to support consumer choice, we believe it is necessary to

introduce a standard measurement approach. HCAHPS® can be viewed as a core set of questions that can be combined with a broader, customized set of hospital-specific items. HCAHPS® is intended to complement the data hospitals currently collect to support improvements in internal customer services and quality related initiatives within the hospital.

Three broad goals have shaped HCAHPS®. The survey is designed to produce data on the patient's perspective on care that allows objective and meaningful comparisons between hospitals on issues that are important to consumers. In addition, public reporting of the survey results is designed to create incentives for hospitals to improve their quality of care. Also, public reporting will serve to enhance public accountability in health care by increasing the transparency of the quality of hospital care provided in return for the public investment. With these goals in mind, the HCAHPS® initiative has taken substantial steps to assure that the survey will be credible, useful, and practical.

Throughout the HCAHPS® development process, AHRQ and CMS have solicited and received a great deal of public input. AHRQ published a **Federal Register** notice that called for measures in July 2002 (67 FR 48477) and we solicited input on drafts of the HCAHPS® instrument and its implementation strategy (February 2003, June 2003, and December 2003—68 FR 5889, 68 FR 38346, 68 FR 68087). In addition to the public comments received, results from a 3-State Pilot Study were used to reduce the pool of 66 survey questions to 25 questions.

In addition to the development and review processes, we submitted the 25-item version of the HCAHPS® instrument to the NQF. The NQF is a voluntary consensus standard-setting organization established to standardize health care quality measurement and reporting for its review and endorsement through its consensus development process. NQF endorsement represents the consensus of numerous health care providers, consumer groups, professional associations, purchasers, Federal agencies, and research and quality organizations. Following a thorough, multi-stage review process, HCAHPS® was endorsed by the NQF board in May 2005. In the process, NQF recommended a few modifications to the instrument. As a result of the recommendations of the NQF Consensus Development Process, questions regarding courtesy and respect were added to the survey. The NQF review committee believes that

these questions are important to all patients, and may be particularly meaningful to patients who are members of racial and ethnic minority groups. Upon the recommendation of the NQF, we further examined the costs and benefits of the 27-item HCAHPS® survey. This cost-benefit analysis of HCAHPS® was conducted by Abt Associates, Inc. The report of this analysis can be found at <http://www.cms.hhs.gov/HospitalQualityInits/downloads/HCAHPSCostsBenefits200512.pdf>.

We published a **Federal Register** notice soliciting comments on the draft 27-item HCAHPS® Survey in November 2005 (70 FR 67476). The HCAHPS® survey received approval by the Office of Management and Budget (OMB) on December 22, 2005.

Shortly thereafter, we began final preparations for the voluntary national implementation (as a part of the Hospital Quality Initiative) with the support of the HQA. The HQA is a private/public partnership that includes the American Hospital Association, the Federation of American Hospitals, the Association of American Medical Colleges, JCHAO, NQF, American Association of Retired Persons (AARP), CMS, AHRQ, and other stakeholders who share a common interest in reporting on hospital quality. The HQA has been proactive in making performance data on hospitals accessible to the public, thereby improving patient care.

We also offered training sessions for hospitals self-administering the survey and survey vendors acting on behalf of hospitals in February and April 2006. Since HCAHPS® was a new initiative, we decided that it was critical to hospitals, survey vendors, and CMS to acquire first-hand experience with data collection, including sampling and data submission to the QualityNet Exchange, prior to collecting data for public reporting. For hospitals participating in the national implementation of HCAHPS® on October 1, 2006, we required participation in a short dry run period of at least one month. A hospital could choose to sample and survey discharges in April, May, and/or June 2006. Data from this "dry run" are not publicly reported.

National implementation begins October 2006 for this first set of hospitals and survey vendors that will be participating in the HCAHPS® voluntary initiative. The initial public reporting period will cover nine months of patient discharges (October 2006 through June 2007). In late 2007, hospital results will be publicly reported on the CMS Hospital Compare

Web site (<http://www.hospitalcompare.hhs.gov>). After the initial implementation, the Web site will contain 12 months of HCAHPS® data and will be updated quarterly.

The HCAHPS® survey is currently available in English and Spanish. During the HCAHPS® dry run and initial national implementation (discussed more fully below), we will be soliciting comments from participating hospitals and survey vendors regarding additional languages for HCAHPS®. This information can be submitted to our HCAHPS® mailbox, CMSHOSPITALCAHPS@cms.hhs.gov. From the information we receive, we will establish priorities for HCAHPS translation into additional languages.

In order for the remaining hospitals to participate in HCAHPS®, future training sessions for hospital personnel and survey vendors will take place in early 2007. Hospitals may choose to self-administer HCAHPS®, or may choose to hire a vendor who has completed the training. A brief dry run of March 2007 discharges will allow newly participating hospitals and vendors to get "first-hand" experience with all phases of the data collection and submission process. Details about the HCAHPS® requirements, and the additional requirements proposed for HCAHPS® under the IPPS RHQDAPU program, are included in section XXIII.C. and XXIII.D. of this preamble.

3. Surgical Care Improvement Project (SCIP) Quality Measures

The Surgical Care Improvement Project (SCIP) is a national quality partnership of organizations committed to improving the safety of surgical care through the reduction of post-operative complications. The primary goal of the partnership is to save lives by reducing the incidence of surgical complications by 25 percent by the year 2010. Partners in SCIP believe that a meaningful reduction in complications requires a systems approach to our challenges, which means that surgeons, anesthesiologists, primary care physicians and internal medicine specialists, perioperative nurses, pharmacists, infection control professionals, and hospital executives must work together to make surgical care improvement a priority. SCIP partners coordinate their efforts through a steering committee that includes representatives of the American Hospital Association, the American College of Surgeons, the American Society of Anesthesiologists, the Association of Perioperative Registered Nurses, the JCAHO, the Institute of Healthcare Improvement, the

Department of Veterans Affairs (VA), the Agency for Healthcare Research and Quality (AHRQ), CMS and the Centers for Disease Control and Prevention (CDC).

SCIP is a comprehensive program, integrated into the quality improvement agenda of the CMS, JCAHO, the CDC, the American College of Surgeons, the Veterans Health Administration, as well as the other organizations that comprise the SCIP Steering Committee. There are a number of activities underway from these and other partnering organizations.

4. Mortality Outcome Measures

CMS recognizes that the current set of hospital performance measures should be expanded to more fully reflect outcomes of care. The 30-day mortality measures for patients with acute myocardial infarction (AMI), heart failure (HF) and pneumonia are three separate claims-based, risk-adjusted assessments of mortality within 30 days of admission for each of the three conditions. The measures reflect outcomes of care for Medicare patients only, and rely on Medicare patients' historical medical care use, including inpatient and physician office visits and outpatient care 1 year before their hospitalizations, for the risk adjustment calculation.

The 30-day mortality rate measures for AMI and HF were endorsed by the NQF in 2005 (see <http://www.qualityforum.org/news/tb3HospSpecsforweb02-10-06.pdf>). We anticipate that the 30-day mortality rate measure for pneumonia will also be endorsed by the NQF since it reflects the same underlying methodology as the other 30-day mortality measures.

In contrast to the HCAHPS® and SCIP quality measures added to the measure set for FY 2008, no additional data collection from hospitals will be required to calculate the 30-day mortality measures. All three measures can be calculated based on Medicare inpatient and outpatient claims data that are already reported to the Medicare program for payment purposes. We anticipate that we will conduct a national dry run for the AMI and HF measures in late 2006 to test implementation and educate hospitals on the methodology. During this dry run, hospitals will be given the opportunity to examine their rates and other data associated with the measures, and to provide feedback to CMS on questions related to the calculation of the rates. The rates that will be developed for the dry run will be used for quality improvement purposes and will not be publicly reported to the

Hospital Compare. More information about the dry run will be provided to hospitals through QualityNet Exchange Web site (<http://www.qnetexchange.org>).

We expect to calculate and publicly report 30-day mortality rates for the AMI and HF conditions in the June 2007 update of the Hospital Compare Web site. Rates for the 30-day pneumonia mortality measure will be posted as soon as possible after we receive NQF endorsement. As is currently the case for the other measures, hospitals will be provided a 30-day period in which they will be permitted to preview their rates before publication. As is currently the case for the "starter set" measures, hospitals that have pledged to submit data for full annual payment update for FY 2008 will not be permitted to suppress or withhold publication of the rates on the Hospital Compare Web site, except under highly limited circumstances.

C. General Procedures and Participation Requirements for the FY 2008 IPPS RHQDAPU Program

All revised procedures for FY 2008 also will be added to the "Reporting Hospital Quality Data for Annual Payment Update Reference Checklist" section of the QualityNet Exchange Web site. This checklist also links to all of the forms to be completed by hospitals participating in the program.

To participate in the RHQDAPU program, we are proposing that hospitals must follow these steps:

- Complete all registration steps; this information can be found on "Reporting Hospital Quality Data for Annual Payment Update Reference Checklist" located on the QualityNet Exchange Web site.

- Continue to collect data for all clinical quality measures that are currently part of the RHQDAPU program, and submit the data to the QIO Clinical Warehouse either using the CMS Abstraction & Reporting Tool (CART), the JCAHO ORYX® Core Measures Performance Measurement System, or another third-party vendor tool that has met specification requirements for data transmission to QualityNet Exchange. The submission must be done through QualityNet Exchange. Because the information in the QIO Clinical Warehouse is considered QIO information, it is subject to the stringent QIO confidentiality regulations in 42 CFR Part 480.

In addition, for purposes of the annual payment update, we will continue to require hospitals to pass our validation requirements. We originally

set forth these requirements in the FY 2006 IPPS final rule (70 FR 47421), and we will continue to require that hospitals achieve an 80-percent reliability. We will also continue to post information related to validation requirements on the QualityNet Exchange Web site.

In addition to these general procedures, the specific procedures below apply to these proposed additional measures.

D. HCAHPS® Procedures and Participation Requirements for the FY 2008 IPPS RHQDAPU Program

1. Introduction

Under sections 1886(b)(3)(B)(viii)(III) and (IV) of the Act, CMS must begin to adopt the baseline set of performance measurements as set forth in a 2005 report issued by the Institute of Medicine (IOM) of the National Academy of Sciences under section 238(b) of Pub. L. 108–173, effective for payments beginning with FY 2007. The 2005 IOM report recommends that we expand the "starter" measures by including the HCAHPS® patient perspective survey. We began to adopt the IOM measures in the FY 2007 IPPS final rule, in which we adopted 11 additional HQA-approved quality measures. In this proposed rule, we are proposing to expand the set of IOM measures hospitals will be required to report to receive the full IPPS market basket update for FY 2008. In addition, section 1886(b)(3)(B)(viii)(V) of the Act states that effective for payments beginning with FY 2008, we must add "other measures that reflect consensus among affected parties and, to the extent feasible and practicable," include "measures set forth by one or more national consensus building entities." Accordingly, we are proposing to add additional SCIP quality and measures and three 30-day mortality measures.

2. HCAHPS® Hospital Pledge and Beginning Date for Data Collection

Under the FY 2008 RHQDAPU program, we are proposing that hospitals will need to submit HCAHPS® data to the QIO Clinical Warehouse beginning with discharges that occur in the third calendar quarter of 2007 (July through September discharges). In order to meet HCAHPS® requirements for the RHQDAPU program, we are proposing that all hospitals, including hospitals new to HCAHPS® and hospitals that have been collecting data since October 1, 2006, must submit a formal pledge to CMS by July 1, 2007 stating that they will collect and submit HCAHPS® data to the QIO Clinical Warehouse starting

with July 2007 discharges. We are proposing that to meet HCAHPS® requirements for the RHQDAPU program for FY 2008, all hospitals must submit this pledge to CMS.

3. HCAHPS® Dry Run

We are proposing to require that hospitals that have not had experience collecting and submitting HCAHPS® data to the QIO Clinical Warehouse as a result of participating in the 2006 voluntary initiative must participate in a dry run of the survey in March 2007. We are proposing to require the submission of March 2007 dry run data to the QIO Clinical Warehouse by July 13, 2007 from those hospitals not yet collecting and submitting HCAHPS® data.

4. HCAHPS® Data Collection Requirements

To collect HCAHPS® data, we are proposing that a hospital can either contract with an approved HCAHPS® survey vendor that will conduct the survey and submit data on the hospital's behalf to the QIO Clinical Warehouse, or a hospital can self-administer the survey without using a survey vendor provided that the hospital meets Minimum Survey Requirements as specified at (<http://www.HCAHPSonline.org/programapplication.asp>). A current list of approved HCAHPS® survey vendors can be found at http://www.HCAHPSonline.org/app_vendor.asp.

5. HCAHPS® Registration Requirements

- We are proposing that HCAHPS® registration requirements for the RHQDAPU program will include:
 - + The hospital must be a registered user of QualityNet Exchange. Hospitals that are self-administering HCAHPS® or survey vendors hired by the hospitals must collect and submit HCAHPS® survey person-level data electronically to the QIO Clinical Warehouse via QualityNet Exchange, using prescribed file specifications that can be found at <http://www.HCAHPSonline.org/techspecs.asp>.

6. Additional Steps for HCAHPS® Participation

In order to participate in HCAHPS®, we are proposing that hospitals that self-administer the survey and survey vendors that collect and submit data on behalf of client hospitals must follow these steps:

- *Attend Hospital/Survey Vendor Training.* Hospitals and survey vendors that intend to actually administer the survey must attend HCAHPS® training. Hospitals contracting with a survey

vendor or another hospital to administer the survey on behalf of the hospital do not need to attend training. The next training session will be offered via Webinar in late January 2007. Please see <http://www.HCAHPSonline.org> for updated information on training opportunities and registration. At a minimum, the hospital's or survey vendor's project manager must attend the HCAHPS® training for administering the survey. Hospitals and survey vendors that attended training in February or April 2006 and are participating in the voluntary HCAHPS data submission beginning October 2006 do not need to participate in the January 2007 training sessions. In addition, we may hold short refresher training sessions for all hospitals self-administering the survey and survey vendors in the spring of 2007.

- *Review and follow the HCAHPS® Quality Assurance Guidelines and Updates.* HCAHPS Quality Assurance Guidelines have been developed to standardize the survey data collection process and to ensure comparability of data reported through HCAHPS®. They are located on <http://www.hcahpsonline.org> and will also be presented at the HCAHPS® hospital/survey vendor training.

The HCAHPS® Quality Assurance Guidelines (the Guidelines) provide detailed information regarding: technical support; sampling protocols; the four allowed modes of survey administration; data specifications and coding; data preparation and submission; data reporting and the exceptions process. The Guidelines describe technical support that is available to hospitals and survey vendors administering HCAHPS® by using a toll-free number or by e-mail. It provides details regarding the protocol for sampling involving drawing a simple random sample each month from the sampling frame of eligible discharges. Sampling can be done at one time after the end of the month, or continuously throughout the month, as long as a simple random sample is generated for the month. The Guidelines include very specific information about the four allowed modes of survey administration: mail only, telephone only, a mixed methodology of mail with telephone follow up, and active interactive voice response (IVR). All modes of administration require following a standardized protocol. The Guidelines describe a standardized approach for the coding of all data from assigning the unique tracking number, the decision rules for capturing data, the file specifications, the file layout, the procedure for assigning disposition

codes, the definition of a completed survey, and the procedure for calculating the total survey response rate. Data preparation and submission guidelines cover registration for data submission via the QualityNet Exchange, creation of data files, instructions for data submission via the QualityNet Exchange, and confirmation of accuracy of data. Data reporting covers internal and external reports; among them are the hospital preview reports and the public reports on CMS Hospital Compare. The Quality Assurance Guidelines describe the exceptions process to review requests for methodologies that vary from the standard HCAHPS® protocols and the appeals process if an exception is denied. For the initial implementation phase of the HCAHPS® survey, we are proposing that no exceptions to the four approved modes of survey administration will be allowed.

In addition, hospitals/survey vendors must follow any updates that are posted on <http://www.HCAHPSonline.org>.

- *Develop Hospital/Survey Vendor HCAHPS® Quality Assurance Plan.* Hospitals self-administering the survey and survey vendors must develop a Quality Assurance Plan for survey administration in accordance with the Quality Assurance Guidelines presented at the HCAHPS® hospital/survey vendor training and posted on <http://www.HCAHPSonline.org/programapplication.asp>. The HCAHPS® Quality Assurance Plan should include the following:

- + Organizational chart
- + Work plan for survey implementation
- + Description of survey procedures and quality controls
- + Plans for quality assurance oversight of on-site work and of all subcontractors' work (including survey vendor, if used)
- + Confidentiality/Privacy and Security procedures in accordance with the Health Insurance Portability and Accountability Act (HIPAA).

The hospital or survey vendor must make the HCAHPS® Quality Assurance Plan available to the HCAHPS® project team upon request. The project team includes CMS, the Health Services Advisory Group (HSAG) that is helping CMS implement HCAHPS, and HSAG's subcontractors for this project.

- *Attest to the Accuracy of the Organization's Data Collection.* Hospitals self-administering the survey and survey vendors must review and agree that the HCAHPS survey was administered in accordance with the HCAHPS® Quality Assurance Guidelines.

• *Participate in HCAHPS® oversight activities.* Hospitals and survey vendors must participate in a quality oversight process conducted by the HCAHPS® project team. Prior to July 2007, the purpose of the oversight activities will be to provide feedback to hospitals and survey vendors on data collection procedures. Starting in July 2007, CMS may ask hospitals/survey vendors to correct any problems that are found and provide follow-up documentation of corrections for review within a defined time period. If we find that the hospital has not made these corrections, CMS may determine that the hospital is not submitting appropriate HCAHPS® data for the RHQDAPU program.

As part of these activities, HCAHPS® project staff will review and discuss with survey vendors and hospitals self-administering the survey their specific Quality Assurance Plans; survey management procedures; sampling and data collection protocols; and data preparation and submission. This review may take place in-person or through other means of communication.

7. HCAHPS® Survey Completion Requirements

We are proposing that hospitals must submit complete HCAHPS® data in accordance with the HCAHPS® Quality Assurance Guidelines located at <http://www.HCAHPSOnline.org> and made available at the hospital/survey vendor training. These requirements specify that hospitals are required to survey a random sample of eligible discharges on a monthly basis. Hospitals should target to collect at least 300 completed surveys over the public reporting period. For the initial HCAHPS® national implementation, the public reporting period is 9 months, from October 2006 through June 2007. After this initial implementation, the public reporting period will be 12 months and hospitals should be targeting to collect at least 300 completed HCAHPS® surveys over a 12 month period. The initial public reporting period is 9 months, because of the broad interest of making HCAHPS results publicly available as quickly as possible. Smaller hospitals that cannot collect 300 completed HCAHPS® surveys during a public reporting period will only be required to collect as many completed surveys as possible. A small hospital is defined for the purposes of HCAHPS® as any hospital that cannot achieve 300 completed HCAHPS® surveys during a public reporting period, because of its dearth of eligible hospital discharges during that period. For those hospitals that cannot collect 300 completed HCAHPS® surveys, we plan to note this on <http://>

www.hospitalcompare.hhs.gov that the results for those hospitals are based on less than 100 completed HCAHPS® surveys or between 100 and 299 completed HCAHPS® surveys.

8. HCAHPS® Public Reporting

We propose to display HCAHPS® data on our Web site for public viewing in accordance with section 1886(b)(3)(B)(viii)(VII) of the Act, which states that the Secretary must report quality measures that relate to patients' perspectives on care on our Web site. Before we display this information, hospitals will be permitted to review their data to be made public as we have recorded it.

As we discussed above, there are 27 questions included in the HCAHPS® survey. The survey is comprised of substantive questions that directly pertain to seven domains of primary importance to the target audience: Doctor communication, nurse communication; cleanliness and quiet of the hospital environment; responsiveness of hospital staff; pain management; communication about medicines; and discharge information. It also includes two overall questions that measure the patient's overall satisfaction with the hospital and willingness to recommend the hospital.

Each of the seven domains is constructed from two or three questions from the survey and is reported as a composite score. For public reporting purposes, the seven composite scores and two overall ratings will be displayed. There will be both national and state comparisons for each of the nine reported results. We are currently conducting testing with consumers to ensure that the HCAHPS® displays on <http://www.hospitalcompare.hhs.gov> are consumer friendly. Generally, for CAHPS® measures in other settings we display bar graphs with the top response categories, such as the percent of people surveyed that gave the hospital a "10" for a 0 to 10 rating, or the percent that said their doctors "always" communicate well. Users of the site can "drill down" to get more detailed information regarding the distribution for the response categories underlying the survey questions.

9. Reporting HCAHPS® Results for Multi-Campus Hospitals

Currently, hospitals that share Medicare provider numbers combine their clinical data across campuses for submission and publication of their data. Our current plan for HCAHPS® is for these data to be combined across campuses. However, we are considering ways in which data could potentially be

displayed by campus rather than by hospital system in the future. As a starting point, we are trying to determine a way to identify those hospitals that share Medicare provider numbers, which will allow CMS to denote that the measures are made up of multiple campuses on <http://www.hospitalcompare.hhs.gov>. In the future, if feasible, we would like to move towards obtaining and reporting information at the campus level. We encourage comments regarding this issue.

E. SCIP & Mortality Measure Requirements for the FY 2008 RHQDAPU Program

• We are proposing that hospitals be required to complete and return a written form on which they agree to participate in the RHQDAPU program for FY 2008.

• For the SCIP measures, we are proposing to require hospitals to submit data starting with discharges that occur in CY 2007. Hospitals will be required to submit data on these measures to the QIO Clinical Warehouse beginning with discharges that occur in the first calendar year quarter of 2007 (January through March discharges). We are proposing that the deadline for hospitals to submit their data for first calendar quarter of 2007 will be August 15, 2007.

• For the Mortality measures, we are proposing to use claims data that is already being collected for index hospitalizations to calculate the mortality rates, therefore, no additional data will need to be submitted by hospitals for these measures. Index hospitalization is the initial hospitalization for an episode of care. Claims data submitted to CMS for index hospitalizations occurring from July 2005 through June 2006 (3rd quarter CY 2005 through 2nd quarter CY 2006) will be used to calculate the mortality rates that will be used for FY 2008 annual payment determination. These rates will be posted on Hospital Compare in June 2007.

• We are proposing to display on our Web site data collected on the SCIP and Mortality measures for public viewing in accordance with section 1886(b)(3)(B)(viii)(VII) of the Act. Before we display this information, hospitals will be permitted to review their data that are to be made public as we have recorded it.

F. Conclusion

We believe that our proposal to include HCAHPS®, SCIP and Mortality measures as part of the FY 2008 IPPS RHQDAPU program's reporting requirements meets the requirements of

section 1886(b)(3)(B)(viii)(III) of the Act. This provision states that we must expand for FY 2007 and each subsequent fiscal year, consistent with sections 1886(b)(3)(B)(viii)(IV) through 1886(b)(3)(viii)(VII) of the Act, the set of measures that the Secretary determines to be "appropriate" for the measurement of care furnished by hospitals in inpatient settings beyond the original 10-measure starter set of quality measures that applied in FY 2005 and FY 2006.

Section 1886(b)(3)(B)(viii)(IV) of the Act requires us to begin to adopt the baseline set of performance measures set forth in the 2005 IOM report effective for payment beginning with FY 2007. We began to adopt these measures for FY 2007 and are now proposing to adopt additional measures, including several measures that are from this report. HCAHPS® and the SCIP Infection 2 measures are measures set forth in the 2005 IOM report. Thus, we believe our proposal to expand the measure set to include HCAHPS® and SCIP Infection 2 measures for the FY 2008 IPPS RHQDAPU program meets this requirement of the Act.

Section 1886(b)(3)(B)(viii)(V) of the Act states that effective for payments beginning with fiscal year 2008, we must add "other measures that reflect consensus among affected parties and, to the extent feasible and practicable," include "measures set forth by one or more national consensus building entities." In addition to proposing to add additional measures from the baseline measures found in the 2005 IOM report, we are proposing to add additional SCIP quality measures and three 30-day mortality measures. In selecting these measures to adopt consistent with this section for the FY 2008 payment update and thereafter, CMS is proposing to add standardized quality measures that have been adopted or endorsed by a national consensus building entity that utilizes a national consensus building process that endorses measures based on (1) its consideration of issues such as the validity, reliability, impact and feasibility of the measures, and (2) input from a wide variety of stakeholders including, but not limited to, health care consumers and patients, clinicians and providers, purchasers, and researchers.

We believe that adopting measures that have been endorsed as a result of this process achieves the type of consensus that Congress envisioned in enacting section 5001(a) of Pub. L. 109–171. The NQF is one consensus building entity that administers this process and takes these factors into account when endorsing measures. NQF is a voluntary

consensus standard-setting organization established to standardize health care quality measurement and reporting, for its review and endorsement through its consensus development process. NQF endorsement, which occurs following a thorough, multi-stage review process, represents the consensus of numerous health care providers, consumer groups, professional associations, purchasers, Federal agencies, and research and quality organizations. We recognize that the 30-day Pneumonia mortality is not currently NQF-endorsed. We anticipate, however, that the NQF will endorse this measure soon. We do not plan to adopt the 30-day Pneumonia mortality measure unless it is endorsed by the NQF.

The HQA is another such consensus building entity. The HQA is a public-private collaboration of numerous stakeholder groups. One goal of HQA is to identify a robust set of standardized and easy-to-understand hospital quality measures that would be used by all stakeholders in the health care system in order to improve quality of care and the ability of consumers to make informed health care choices. We also note that HQA currently relies on the NQF process as part of its process.

CMS anticipates that other consensus building entities that take into account the issues of validity, reliability, impact and feasibility of the measures and involves a wide array of stakeholders may develop.

XXIV. Files Available to the Public Via the Internet

Addenda A and B to this proposed rule provide various data pertaining to the proposed CY 2007 payments for services under the OPPS. Addenda AA, BB, and CC to this proposed rule include various data pertaining the proposed ASC list of covered procedures and payment rates for procedures furnished in ASCs in CYs 2007 and 2008, respectively.

To conserve resources and to make Addendum B more relevant to the OPPS, we are including in Addendum B of this proposed rule HCPCS codes (including CPT codes) for services that are assigned a payable status indicator under the OPPS and HCPCS codes for which we are proposing a change in status indicator and/or APC assignment for CY 2007. A list of all active HCPCS codes, regardless of their assigned payable status, is available to the public on the CMS Web site at: <http://www.cms.hhs.gov/providers/hopps>.

For the convenience of the public, we are also including on this same CMS Web site a table that displays the HCPCS data in Addendum B sorted by

APC assignment, identified as Addendum C. In addition, we are including on the CMS Web site, in a format that can be easily downloaded and manipulated, Addendum A. Similarly, we are including Addenda AA, BB, and CC on the CMS Web site at: <http://www.cms.hhs.gov/center/asc.asp>.

We are not including as addenda in this proposed rule, reprints of wage index related tables from the FY 2007 IPPS proposed rule (71 FR 24235 through 24272) as they would be used for the OPPS for CY 2007. Rather, we are providing a link on the CMS Web site at: <http://www.cms.hhs.gov/providers/hopps> to all of the proposed FY 2007 IPPS wage index related tables. For additional assistance, contact Anita Heygster, (410) 786–4486.

XXV. Collection of Information Requirements

Under the Paperwork Reduction Act of 1995 (PRA), we are required to provide 60-day notice in the **Federal Register** and solicit public comment before a collection of information requirement is submitted to the Office of Management and Budget (OMB) for review and approval. In order to fairly evaluate whether an information collection should be approved by OMB, section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires that we solicit comment on the following issues:

- The need for the information collection and its usefulness in carrying out the proper functions of our agency.
- The accuracy of our estimate of the information collection burden.
- The quality, utility, and clarity of the information to be collected.
- Recommendations to minimize the information collection burden on the affected public, including automated collection techniques.

The following information collection requirements included in this proposed rule and their associated burdens are subject to the PRA.

We are soliciting public comment on each of the issues for the following section of this document that contain information collection requirements and are not currently approved by the OMB.

Proposed Additional Quality Measures for FY 2008: Surgical Care Improvement Project (SCIP)

Section 5001(a) of the Deficit Reduction Act of 2005 (DRA) (Pub. L. 109–171) sets out new requirements for the IPPS Reporting Hospital Quality Data for Annual Payment Update (RHQDAPU) program. Under section 1886(b)(3)(B)(viii)(V) of the Act, for payments beginning with FY 2008, we

are required to add other measures that reflect consensus among affected parties and, to the extent feasible and practicable, must include measures set forth by one or more national consensus building entities. In this proposed rule, we are setting out the additional measures that we propose to require for FY 2008.

The burden associated with this section is the time and effort associated with collecting, copying and submitting the data. As part of the *Surgical Care Improvement Project (SCIP)*, we estimate that there will be approximately 3,700 respondents per year. All of these hospitals must submit SCIP Infection 1 and 3 to receive the annual payment update covering FY 2007. Additional surgical procedures covering approximately 6,000,000 discharges annually will be sampled at a 10 percent rate per hospital, so an additional 600,000 discharges will be abstracted and submitted by hospitals for the additional SCIP measures (SCIP Infection 2 and VTE 1, 2). The 10 percent sampling rate is a minimum threshold specified in the most current version of the joint CMS/JCAHO Hospital Quality Measures Specifications Manual. We estimate that it will take 450,000 hours (3/4 hour per sampled discharge) to abstract and submit data for these additional sampled discharges.

In addition, hospitals must abstract and submit additional information needed for the additional SCIP measures covering the surgical procedures already covered in SCIP Infection 1 and 3. We estimate that about 275,000 discharges will be sampled and abstracted covering these surgical procedures. We estimate that it will take an additional 137,500 hours (1/2 hour per sampled discharge) for hospitals to abstract and submit this additional information. Both estimates include overhead.

In total, we estimate that an additional 587,500 hours will be used by hospitals to abstract and submit the additional SCIP measures. This estimate includes overhead.

Further, we note that there is no additional burden associated with the incorporation of mortality outcome measures, as this information is currently collected with claims data.

We have submitted a copy of this proposed rule to the OMB for its review of the aforementioned information collection requirements.

This proposed rule also includes associated information collections for which CMS has obtained the OMB's approval. The following is a discussion of these currently OMB approved collections.

As discussed in section XXIII of this preamble, the IPPS RHQDAPU program expands upon the Hospital Quality Initiative which is intended to empower consumers with quality of care information to make more informed decisions about their health care while also encouraging hospitals and clinicians to improve the quality of care. The information collection associated with the IPPS RHQDAPU is the Hospital Quality Alliance (formerly known as the National Voluntary Hospital Reporting Initiative)—Hospital Quality Measures. The OMB approved this information collection under OMB control number 0938–0918, with an expiration date of December 31, 2008. As a result of the increase from 10 to 21 quality measures, CMS created a revised information collection request to include the new quality measures. CMS announced the revised information collection in a 60-day **Federal Register** notice that published on June 9, 2006 (71 FR 33458). CMS will publish a 30-day **Federal Register** notice prior to the submission of the revised information collection being proposed in this rule to OMB.

Further, as discussed in section XXIII. of this preamble, for FY 2008, we are proposing to expand the IPPS RHQDAPU program to include the HCAHPS® Survey, also known as the Hospital CAHPS or the CAHPS Hospital Survey. The HCAHPS® Survey is composed of 27 questions: 18 substantive questions that encompass critical aspects of the hospital experience (communication with doctors, communication with nurses, responsiveness of hospital staff, cleanliness and quietness of hospital environment, pain management, communication about medicines, and discharge information); four questions to skip patients to appropriate questions; three questions to adjust for the mix of patients across hospitals; and two questions to support congressionally-mandated reports. As explained in section XXIII. of this preamble, CMS published a **Federal Register** notice soliciting comments on the draft 27-item HCAHPS® Survey in November 2005 (70 FR 67476). The OMB approved the HCAHPS® Survey under OMB control number 0938–0981, with an expiration date of December 31, 2007.

Proposed Revised § 416.190(c)—Request for Review of Payment Amount

The collection of information requirements at 5 CFR 1320 are applicable to requirements affecting 10 or more entities. Proposed revised § 416.190(c) would require that a

request for review of the ASC payment amount for insertion of an IOL must include all the information that CMS specifies on its Web site.

While this section of the proposed rule contains information collection requirements, we estimate that less than 10 ASCs will be affected; therefore, we believe these collection requirements are exempt from OMB for review and approval, as specified at 5 CFR 1320.3(c)(4). Consequently, this section of the proposed rule need not be reviewed by the OMB under the authority of the PRA.

If you comment on any of these information collection and record keeping requirements, please mail copies directly to the following:

Centers for Medicare & Medicaid Services, Office of Strategic Operations and Regulatory Affairs, Regulations Development Group, Attn: Melissa Musotto, CMS–1506–P, Room C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850; and

Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503, Attn: Carolyn Lovett, CMS Desk Officer, (CMS–1506–P), carolyn_lovett@omb.eop.gov. Fax (202) 395–6974.

XXVI. Response to Comments

Because of the large number of public comments we normally receive on **Federal Register** documents, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and time specified in the **DATES** section of this preamble, and, when we proceed with a subsequent document(s), we will respond to those comments in the preamble to that document(s).

XXVII. Regulatory Impact Analysis

(If you choose to comment on issues in this section, please include the caption “Impact” at the beginning of your comment.)

A. Overall Impact

We have examined the impacts of this proposed rule as required by Executive Order 12866 (September 1993, Regulatory Planning and Review), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), and Executive Order 13132.

1. Executive Order 12866

Executive Order 12866 (as amended by Executive Order 13258, which merely reassigns responsibility of duties) directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects (\$100 million or more in any 1 year).

We estimate that the effects of the OPPS provisions that would be implemented by this proposed rule would result in expenditures exceeding \$100 million in any 1 year. We estimate that adding 14 procedures to the ASC list and implementing section 5103 of Pub. L. 109–171 in CY 2007 would result in savings to the Medicare program of approximately \$150 million. We further estimate that the revised ASC payment system and expanded list of payable ASC services which we are proposing to implement in CY 2008 would have no effect on Medicare expenditures compared to CY 2007. A more detailed discussion of the effects of the proposed changes to the ASC list of procedures for CY 2007 and the effects of proposed revisions to the ASC payment system in CY 2008 is provided in sections XXVII. C. and D. below.

In addition, we estimate that the changes that we are proposing in section XIX. of this preamble to implement Medicare contracting reform mandated by section 911 of Pub. L. 108–173 have no economic effect on current Medicare payments in CY 2007. This aspect of our proposal would amend our current Medicare contractor regulations to conform them to the statutory changes mandated by Pub. L. 108–173 and in and of itself does not affect in any way Medicare's coverage or payment policies for hospital outpatient services or any other covered Medicare services. Accordingly, we believe that this provision has no immediate economic effect on Medicare payments in CY 2007.

Further, we estimate that the changes that we are proposing in section XXIII. of this preamble to implement an expanded set of quality measures for the IPPS Reporting Hospital Quality Data for the Annual Payment Update (RHQDAPU) program in accordance with sections 1886(b)(3)(B)(viii)(III) and (IV) of the Act will not have a significant economic effect on Medicare payments to hospitals in CY 2007. A

more detailed discussion of the effects of this proposal are included in section XXIII. of this preamble and section XXVII.F. below.

However, we estimate the total increase (from changes in this proposed rule as well as enrollment, utilization, and case-mix changes) in expenditures under the OPPS for CY 2007 compared to CY 2006 to be approximately \$2.98 billion. Therefore, this proposed rule is an economically significant rule under Executive Order 12866, and a major rule under 5 U.S.C. 804(2).

2. Regulatory Flexibility Act (RFA)

The RFA requires agencies to determine whether a rule would have a significant economic impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental agencies. Most hospitals and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of \$6 million to \$29 million in any 1 year (65 FR 69432).

For purposes of the RFA, we have determined that approximately 37 percent of hospitals and 73 percent of ambulatory surgery centers would be considered small entities according to the Small Business Administration (SBA) size standards. We do not have data available to calculate the percentages of entities in the pharmaceutical preparation manufacturing, biological products, or medical instrument industries that would be considered to be small entities according to the SBA size standards. For the pharmaceutical preparation manufacturing industry (NAICS 325412), the size standard is 750 or fewer employees and \$67.6 billion in annual sales (1997 business census). For biological products (except diagnostic) (NAICS 325414), with \$5.7 billion in annual sales, and medical instruments (NAICS 339112), with \$18.5 billion in annual sales, the standard is 50 or fewer employees (see the standards Web site at: <http://www.sba.gov/regulations/siccodes/>). Individuals and States are not included in the definition of a small entity.

Not for profit organizations are also considered to be small entities under the RFA. There are 2,163 voluntary hospitals that we consider to be not for profit organizations to which this proposed rule applies.

3. Small Rural Hospitals

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of

a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. With the exception of hospitals located in certain New England counties, for purposes of section 1102(b) of the Act, we previously defined a small rural hospital as a hospital with fewer than 100 beds that is located outside of a Metropolitan Statistical Area (MSA) (or New England County Metropolitan Area (NECMA)). However, under the new labor market definitions that we adopted in the November 15, 2004 final rule with comment period, for CY 2005 (consistent with the FY 2005 IPPS final rule), we no longer employ NECMAs to define urban areas in New England. Therefore, we now define a small rural hospital as a hospital with fewer than 100 beds that is located outside of an MSA. Section 601(g) of the Social Security Amendments of 1983 (Pub. L. 98–21) designated hospitals in certain New England counties as belonging to the adjacent NECMA. Thus, for purposes of the OPPS, we classify these hospitals as urban hospitals. We believe that the changes to the OPPS in this proposed rule would affect both a substantial number of rural hospitals as well as other classes of hospitals and that the effects on some may be significant although the proposed changes to the ASC payment system for CY 2007 and CY 2008 would have no effect on small rural hospitals. Therefore, we conclude that this proposed rule would have a significant impact on a substantial number of small entities.

4. Unfunded Mandates

Section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of \$100 million in 1995 dollars, updated annually for inflation. That threshold level is currently approximately \$120 million. The maximum nationwide cost to hospitals will be \$16.9 million for HCAHPS® (Abt Report), \$58.7 million in noncapital costs for SCIP, and no cost for mortality measure. This proposed rule will not mandate any requirements for State, local, or tribal government, nor will it affect private sector costs.

5. Federalism

Executive Order 13132 establishes certain requirements that an agency must meet when it publishes any rule (proposed or final) that imposes substantial direct costs on State and local governments, preempts State law,

or otherwise has Federalism implications.

We have examined this proposed rule in accordance with Executive Order 13132, Federalism, and have determined that it would not have an impact on the rights, roles, and responsibilities of State, local or tribal governments. As reflected in Table 49 we estimate that OPPS payments to governmental hospitals (including State, local, and tribal governmental hospitals) would increase by 3.0 percent under this proposed rule. The proposals related to payments to ASCs in CYs 2007 and 2008 would not affect payments to government hospitals. In addition, the proposals related to MACs and HCAHPS would not affect payments to government hospitals.

B. Effects of Proposed OPPS Changes in This Proposed Rule

(If you choose to comment on issues in this section, please include the caption "OPPS Impact" at the beginning of your comment.)

We are proposing several changes to the OPPS that are required by the statute. We are required under section 1833(t)(3)(C)(ii) of the Act to update annually the conversion factor used to determine the APC payment rates. We are also required under section 1833(t)(9)(A) of the Act to revise, not less often than annually, the wage index and other adjustments. In addition, we must review the clinical integrity of payment groups and weights at least annually. Accordingly, in this proposed rule, we are proposing to update the conversion factor and the wage index adjustment for hospital outpatient services furnished beginning January 1, 2007, as we discuss in sections II.C. and II.D., respectively, of this preamble. However, we are also proposing to reduce the update to the CY 2007 OPPS conversion factor by 2.0 percentage points for any hospital that is required to report quality data under the IPPS RHQDAPU for the FY 2007 update, and that fails to meet the requirements for receiving the full IPPS payment update in that payment year. We also are proposing to revise the relative APC payment weights using claims data from January 1, 2005, through December 31, 2005, and updated cost report information. In response to a provision in Pub. L. 108–173 that we analyze the cost of outpatient services in rural hospitals relative to urban hospitals, we are proposing to continue increased payments to rural SCHs, including EACHs. Section II.F. of this preamble provides greater detail on this rural adjustment. Finally, we are not proposing to remove any device

categories from pass-through payment status in CY 2007.

Under this proposed rule, the update change to the conversion factor as provided by statute would increase total OPPS payments by 3.4 percent in CY 2007. The update change to the OPPS conversion factor for any hospital that is required to report quality data under the IPPS RHQDAPU for the FY 2007 update, but fails to meet the requirements for receiving the full IPPS payment update in that payment year would increase OPPS payments by 1.4 percent in CY 2007. The expiration of the one-time wage reclassification under section 508 in April 2007 which is not budget neutral and an increase in the fixed-dollar outlier threshold to account for the under estimation of outlier payments in CY 2006 results in a net increase of 3.0 percent. The proposed changes to the APC weights, changes to the wage indices, the continuation of a payment adjustment for rural SCHs, and the proposed expansion of the rural adjustment to EACHs would not increase OPPS payments because these changes to the OPPS are budget neutral. However, these updates do change the distribution of payments within the budget neutral system as shown in Table 49 and described in more detail in this section.

1. Alternatives Considered

Alternatives to the changes we are proposing to make and the reasons that we have chosen these options are discussed throughout this proposed rule. Some of the major issues discussed in this proposed rule and the options considered are discussed below.

a. Alternatives Considered for CPT Coding and Payment Policy for Evaluation and Management Codes

In section IX. of this preamble, we are proposing to create five new G-codes to replace CPT clinic E/M codes, five new G-codes for emergency visits provided in Type B emergency departments, five new G-codes for emergency visits provided in Type A emergency departments to replace CPT emergency department E/M codes, and two new G-codes to replace CPT critical care codes. CMS instructed hospitals to report facility resources for clinic and emergency department visits using CPT E/M codes and to develop internal hospital guidelines to determine what level of visit to report for each patient. However, since the beginning of the OPPS, we have acknowledged that the CPT E/M codes do not adequately describe the facility resources required to perform the services. Therefore, we are proposing G-codes to be used by

hospitals to report clinic and emergency visits, and critical care services, which describe hospital resource use.

We acknowledge that it can be burdensome for providers to bill G-codes rather than CPT codes. CPT has not yet created clinic and emergency department visit and critical care services codes that describe hospital resource utilization. In this case, because the current CPT E/M codes do not describe hospital visit resources, we have no alternative other than to create new G-codes. It is important to note that G-codes may be recognized by other payers.

Some hospitals have requested that they be permitted to bill emergency visit codes under the OPPS for services furnished in a facility that meets CPT's definition for reporting emergency visit E/M codes, except that these hospitals are not available 24 hours a day. For CY 2007, we are proposing to establish a set of codes for visits provided in dedicated emergency departments that have an EMTALA obligation. These codes would be billed by Type B emergency departments, specifically those that do not meet the Type A requirements. We are also proposing to establish a separate set of codes for visits provided in a specific subset of dedicated emergency departments, called Type A emergency departments, that are open 24 hours per day, 7 days per week and/or that do not have an EMTALA obligation solely based on providing at least one-third of their outpatient visits for the treatment of emergency medical conditions on an urgent basis without requiring a previously scheduled appointment. An alternative to this policy is to continue to uphold past policy and allow only the Type A subset of dedicated emergency departments to bill emergency department codes. However, this would not allow us to determine whether visits to dedicated emergency departments or facilities that incur EMTALA obligations but do not meet more prescriptive expectations that are consistent with the CPT definition of an emergency department have different resource costs than visits to either clinics or the Type A subset of dedicated emergency departments that meet more prescriptive expectations, including 24 hours per day, 7 days per week availability.

We must also establish payment rates for these new G-codes. For CY 2007, we are proposing to pay at five payment levels for both clinic and emergency department visits and one payment level for critical care services. We see meaningful differences among the median costs of five levels of clinic and emergency department codes that

suggest that five payment levels are more appropriate than three levels. In addition, providers have indicated that it is administratively burdensome to code for five levels, but receive payment at only three levels, as has been the historical policy in the OPPTS. If future data indicate that three payment levels are more appropriate, we may revert back to three payment levels. An alternative to this policy is to continue paying at three payment levels for both clinic and emergency department visits and one payment level for critical care services. However, for the reasons described above, we are proposing to pay at five levels for clinic and emergency department visits for CY 2007 to ensure that payments more accurately reflect the median costs of the services provided.

For CY 2007, we are proposing to pay emergency visits to Type B dedicated emergency departments that are not part of the specific subset identified as Type A emergency departments at the same rate as clinic visits, consistent with current policy. This payment policy is similar to our current policy that requires services furnished in emergency departments that have an EMTALA obligation but do not meet the CPT definition of emergency department to be reported using CPT clinic visit E/M codes, resulting in payments based upon clinic visit APCs. While maintaining the same payment policy for CY 2007, the reporting of specific G-codes for emergency visits provided in Type B dedicated emergency departments would permit us to specifically collect and analyze the hospital resource costs of visits to these facilities in order to determine whether a future proposal of an alternative payment policy may be warranted. An alternative would be to provide payment for services billed by Type B emergency departments at payment rates other than the clinic visit rates. However, we do not know what the hospital facility costs of these visits would be because we are unable to identify these services in our historical claims data. In some respects, their costs may resemble the costs of visits to clinics because they may not be available 24 hours per day or may not require the same high state of readiness as Type A emergency departments. In other respects, their costs may resemble the costs of visits to Type A emergency departments because they both provide predominantly unscheduled visits. Therefore, we currently would have no accurate methodology for establishing payment rates that are appropriate for visits to Type B emergency departments.

Therefore, consistent with past payment policies for certain services, such as drug administration, in which we maintained current payment policies while gathering more detailed cost data, we are proposing to continue payment to Type B emergency departments at clinic visit rates while we gather hospital claims data specific to these visits to review their costs.

b. Options Considered for Brachytherapy Source Payments

Pursuant to sections 1833(t)(2)(H) and 1833(t)(16)(C) of the Act, we have paid for brachytherapy sources furnished on or after January 1, 2004, and before January 1, 2007, on a per source basis at an amount equal to the hospital's charge adjusted to cost by application of the hospital specific overall CCR. For CY 2007, we are proposing to pay for brachytherapy sources at a prospectively based rate for each source, which is assigned to a source-specific APC. We are proposing to convert the median cost to a relative weight by dividing it by the median for APC 0606, to scale the unscaled weight for budget neutrality, and to multiply the scaled weight by the conversion factor to calculate the payment rate per source. This is our standard OPPTS methodology for using median costs to calculate the payment for each APC.

We considered establishing a per day payment for brachytherapy sources based on our CY 2005 claims data. While this alternative would be consistent with the philosophy of a prospective payment system and would mitigate the effects on payment of inaccurate coding of the number of sources used, we believe that a per day payment may not provide source payment variation specifically addressed to the hospital resources used under the unique clinical circumstances of each individual treatment. There is considerable clinical variation in the number of sources used for brachytherapy services, and we believe a per day payment based on an average number of sources used may not as accurately reflect appropriate payment for an individual Medicare beneficiary's treatment as the per source payment methodology. Therefore, we are not proposing to set payments on a per day basis.

We also considered continuing to make separate payment for sources of brachytherapy under the current methodology of hospital charges reduced to costs. Although hospitals are familiar with this methodology and this alternative is consistent with the requirement that sources be paid separately, we believe that to continue

to pay on this basis would be inconsistent with the general methodology of a prospective payment system and would provide no incentive for a hospital to provide services efficiently and at the lowest cost. Therefore, for CY 2007, we are proposing to pay for each brachytherapy source on a per source rate that is calculated using our standard OPPTS methodology.

c. Options Considered for Payment of Radiopharmaceuticals

In developing the payment policy proposal for separately payable radiopharmaceuticals for this CY 2007 proposed rule, we considered three policy options.

The first option we considered was to propose packaging additional radiopharmaceuticals, either through packaging payments for all radiopharmaceuticals with payments for the services with which they are billed or increasing the packaging threshold for radiopharmaceuticals from a cost of \$55 per day to a higher amount. In contrast to other separately payable drugs where the administration of many drugs is reported with only a few drug administration HCPCS codes, only a small number of specific radiopharmaceuticals may be appropriately provided in the performance of each particular nuclear medicine procedure. Because the provision of nuclear medicine procedures always requires one or more radiopharmaceuticals, packaging more radiopharmaceuticals effectively results in some increases in the costs of the associated nuclear medicine procedures to reflect the greater packaging of the radiopharmaceuticals. A policy to package additional radiopharmaceuticals would be very consistent with the OPPTS packaging principles and payment policies which generally provide appropriate payment for the "average" service and would provide greater administrative simplicity for hospitals. However, under a policy of increased packaging of radiopharmaceuticals, payments for certain nuclear medicine procedures could potentially be less than the costs of some of the packaged radiopharmaceuticals and relatively expensive and high volume radiopharmaceuticals could become packaged. In addition, our payment policy could discourage selection of the most clinically appropriate radiopharmaceutical for a particular nuclear medicine procedure, especially if that radiopharmaceutical were expensive and not commonly used so that its costs were not fully reflected in

the payment for the nuclear medicine procedure.

The second option that we considered was to propose to continue the temporary CY 2006 methodology of paying for separately payable radiopharmaceuticals at charges reduced to cost, where payment would be determined using each hospital's overall CCR, and establishing our radiopharmaceutical packaging threshold at \$55, as we are proposing for other drugs for the CY 2007 OPPS. This policy would provide stability to the payment methodology for radiopharmaceuticals from CY 2006 to CY 2007. As we indicated for CY 2007, this payment methodology would provide an acceptable proxy for the average acquisition of the radiopharmaceutical along with its handling cost. However, as indicated previously, we stated in the CY 2006 final rule with comment period that this payment policy was intended to be only a temporary policy, and that we would consider alternative methodologies on which to base radiopharmaceutical payments for the CY 2007 OPPS update. Paying for radiopharmaceuticals at cost provides hospitals with no incentive to supply radiopharmaceuticals in the most efficient manner. In addition, using hospitals' overall CCRs to determine payments likely results in an overestimation of radiopharmaceutical cost, which are likely reported in several cost centers such as diagnostic radiology that have lower CCRs than hospitals' overall CCRs.

The third option that we considered and are proposing for CY 2007 is to establish prospective payment rates for separately payable radiopharmaceuticals using mean costs derived from the CY 2005 claims data, where the costs are determined using our standard methodology of applying hospital-specific departmental CCRs to radiopharmaceutical charges and defaulting to hospital-specific overall CCRs only if appropriate departmental CCRs are unavailable. This proposal establishes our packaging threshold for radiopharmaceuticals at \$55, as proposed for other drugs under the CY 2007 OPPS. We believe this option provides us with the most consistent, accurate, and efficient methodology for prospectively establishing payment rates for separately payable radiopharmaceuticals; in addition, this proposed methodology is consistent with how payment rates for other services are determined under the OPPS and provides for prospective payments that serve as appropriate proxies for the average acquisition costs of the

radiopharmaceuticals along with their handling costs.

2. Limitations of Our Analysis

The distributional impacts presented here are the projected effects of the policy changes, as well as the statutory changes that would be effective for CY 2007, on various hospital groups. We estimate the effects of individual policy changes by estimating payments per service while holding all other payment policies constant. We use the best data available but do not attempt to predict behavioral responses to our policy changes. In addition, we do not make adjustments for future changes in variables such as service volume, service-mix, or number of encounters. As we have done in previous proposed rules, we are soliciting comments and information about the anticipated effect of these proposed changes on hospitals and our methodology for estimating them.

One limitation of our analysis in this proposed rule is that we are unable at this time to estimate the impact of our proposal to reduce the update to the CY 2007 OPPS conversion factor by 2.0 percentage points for any hospital that is required to report quality data under the IPPS RHQDAPU for the FY 2007 update, and that fails to meet the requirements for receiving the full IPPS payment update in that payment year. As we discuss in section XXIII of the preamble of this proposed rule, we are unable at this time to determine how many hospitals will receive a reduced update in CY 2007. Determinations concerning which hospitals have failed to meet the requirements for receiving the full update to the OPPS conversion factor in CY 2007 will only become available on or about September 1, 2006.

Experience with mandatory reporting of quality data under the IPPS RHQDAPU indicates that only a small number of hospitals have failed to meet the requirements to receive the full update to their payments under the IPPS. However, the statute requires that the reduction to the update for those IPPS hospitals that fail to meet the quality reporting requirement will increase from 0.4 percentage point to 2.0 percentage points for purposes of payment in FY 2007. This increase in the size of the update reduction significantly increases the already strong incentive to submit quality data. We therefore believe that the already small number of hospitals that fail to meet the requirements for receiving the full update may actually decrease significantly. We expect that only very few, if any, hospitals will fail to receive the full update to the OPPS conversion

factor in CY 2007. However, due to the uncertainty concerning the degree to which the increased incentive to report quality data will affect hospital behavior, we are unable to predict with any confidence the number of hospitals that will receive the reduced update under the OPPS RHQDAPU, or to incorporate any specific data concerning the impact of this proposal into impact Table 49 below.

We are also unable to determine the budget neutrality adjustment factor that will be necessary to ensure that estimated aggregate payments under the OPPS for CY 2007 do not change as a result of implementing the proposed OPPS RHQDAPU. We also expect, however, that the distributional impact of the proposal will be quite minimal. We also expect that any budget neutrality adjustment that we determine to be necessary once the determinations concerning compliance with the quality data reporting requirements become available will be correspondingly negligible. At the same time, any hospital that has reason to believe that it will not meet the requirements for receiving a full update under our proposal should be able to assess the potential impact of receiving the reduced update, simply by estimating the payments that the hospital will receive using the reduced conversion factor of \$60.36, reflecting an update of 1.4 percent, in place of the conversion factor of \$61.551 reflecting the full proposed update of 3.4 percent. Over time, the proposed OPPS RHQDAPU may have a discernible, positive impact on the quality of care available to Medicare beneficiaries in hospital outpatient departments. Meanwhile, the impact analysis below assumes that there will be full compliance with the requirements of the proposed OPPS RHQDAPU for purposes of receiving the full update in CY 2007, that all OPPS outpatient departments will therefore receive payments reflecting the full update in CY 2007, and that no additional adjustment to the OPP conversion factor will be necessary to ensure budget neutrality in CY 2007.

3. Estimated Impacts of This Proposed Rule on Hospitals

The estimated increase in the total payments made under the OPPS is limited by the increase to the conversion factor set under the methodology in the statute. The distributional impacts presented do not include assumptions about changes in volume and service-mix. The enactment of Pub. L. 108–173 on December 8, 2003, provided for the additional payment outside of the budget

neutrality requirement for wage indices for specific hospitals reclassified under section 508 through CY 2007. Table 49 shows the estimated redistribution of hospital payments among providers as a result of a new APC structure, wage indices, and proposed adjustment for rural SCHs and EACHs, which are budget neutral; the estimated distribution of increased payments in CY 2007 resulting from the combined impact of the proposed APC recalibration, wage effects, the rural SCH and EACH adjustment, and the proposed market basket update to the conversion factor; and, finally, estimated payments considering all proposed payments for CY 2007 relative to all payments for CY 2006, including the impact of expiring wage provisions and changes in the outlier threshold. Because updates to the conversion factor, including the update of the market basket and the addition of money not dedicated to pass-through payments are applied uniformly, observed redistributions of payments in the impact table largely depends on the mix of services furnished by a hospital (for example, how the APCs for the hospital's most frequently furnished services would change), the impact of the wage index changes on the hospital, and the impact of the payment adjustment for rural SCHs, including EACHs. However, total payments made under this system and the extent to which this proposed rule would redistribute money during implementation also would depend on changes in volume, practice patterns, and the mix of services billed between CY 2006 and CY 2007, which CMS cannot forecast. Overall, the proposed OPPS rates for CY 2007 would have a positive effect for all hospitals paid under the OPPS. Proposed changes would result in a 3.0 percent increase in Medicare payments to all hospitals, exclusive of transitional pass-through payments. Removing cancer and children's hospitals because their payments are held harmless to the pre-BBA ratio between payment and cost suggests that proposed changes would result in a 3.1 percent increase in Medicare payments to all other hospitals.

To illustrate the impact of the proposed CY 2007 changes, our analysis begins with a baseline simulation model that uses the final CY 2006 weights, the FY 2006 final post-reclassification IPPS wage indices without additional increases resulting from section 508 reclassifications, and the final CY 2006 conversion factor. Column 2 in Table 49 reflects the independent effects of the

proposed APC reclassification and recalibration changes. Column 3 reflects the effects of updated wage indices, and the adjustment for rural SCHs and EACHs. The clarification that the rural adjustment applies to EACHs is not shown separately because there are so few EACHs that the overall impact cannot be observed when payments are aggregated by type of hospital. These effects are budget neutral, which is apparent in the overall zero impact in payment for all hospitals in the top row. Column 2 shows the independent effect of changes resulting from the proposed reclassification of services codes among APC groups and the proposed recalibration of APC weights based on a complete year of CY 2005 hospital OPPS claims data and more recent cost report data. We modeled the independent effect of APC recalibration by varying only the weights, the final CY 2006 weights versus the proposed CY 2007 weights, in our baseline model, and calculating the percent difference in payments.

Column 3 shows the impact of updating the wage index used to calculate payment by applying the proposed FY 2007 IPPS wage index, combined with the impact of the proposed 7.1 percent rural adjustment for SCHs and EACHs for services other than drugs, biologicals, brachytherapy sources, and those receiving pass-through payments. The OPPS wage index used in Column 3 does not include changes to the wage index for hospitals reclassified under section 508 of Pub. L. 108–173. We modeled the independent effect of updating the wage index and the rural adjustment by varying only the wage index and the inclusion of EACHs, using the proposed CY 2007 scaled weights, and a CY 2006 conversion factor that included a budget neutrality adjustment for changes in wage effects and the rural adjustment between CY 2006 and CY 2007.

Column 4 demonstrates the combined “budget neutral” impact of proposed APC recalibration, the wage index update, and the proposed rural adjustment for rural SCHs and EACHs on various classes of hospitals, as well as the impact of updating the conversion factor with the market basket update. We modeled the independent effect of proposed budget neutrality adjustments and the market basket update by using the weights and wage indices for each year, and using a CY 2006 conversion factor that included the proposed market basket update and budget neutrality adjustments for differences in wages and the adjustment for rural SCHs and EACHs.

Finally, Column 5 depicts the full impact of the proposed CY 2007 policy on each hospital group by including the effect of all the proposed changes for CY 2007 and comparing them to all estimated payments in CY 2006, including those required by Pub. L. 108–173. Column 5 shows the combined budget neutral effects of Columns 2 through 4, plus the impact of increasing the outlier threshold after realigning the overall CCR calculation used to model the outlier threshold with the one used by the fiscal intermediary for payment, the impact of changing the percentage of total payments dedicated to transitional pass-through payments to 0.13 percent, and the expiration of payment for wage index increases for hospitals reclassified under section 508 of Pub. L. 108–173 in April 2007. As noted in section II.D. of this preamble, because section 508 expires in April 2007 and OPPS operates on a calendar year basis, we used a blended wage index consisting of 25 percent of the IPPS wage index with section 508 and 75 percent of the IPPS wage index after section 508 expires.

We modeled the independent effect of all changes in Column 5 using the final weights for CY 2006 and the proposed weights for CY 2007. The wage indices in each year include wage index increases for hospitals eligible for reclassification under section 508 of Pub. L. 108–173, and in 2007, these provisions expire in April 2007. We used the final conversion factor for CY 2006 of \$59.511 and the proposed CY 2007 conversion factor of \$61.551. Column 5 also contains simulated outlier payments for each year. We used the charge inflation factor used in the proposed FY 2007 IPPS rule of 7.57 percent (1.0757) to increase individual costs on the CY 2005 claims to reflect CY 2006 dollars, and we used the most recent overall CCR for each hospital as calculated for the APC median setting process. Using the CY 2005 claims and a 7.57 percent charge inflation factor, we currently estimate that actual outlier payments for CY 2006, using a multiple threshold of 1.75 and a fixed-dollar threshold of \$1,250 would be 1.25 percent of total payments, which is 0.25 percent higher than the 1.0 percent that we projected in setting outlier policies for CY 2006, due to the differences in the calculation of the overall CCR, as discussed in section II.A.1.c. of this preamble. Outlier payments of 1.25 percent appear in the CY 2006 comparison in Column 5. We used the same set of claims and a charge inflation factor of 15.15 percent (1.1515) to model the CY 2007 outliers at 1.0 percent of total payments using a multiple

threshold of 1.75 and a proposed fixed-dollar threshold of \$1,825.

Column 1: Total Number of Hospitals

Column 1 in Table 49 shows the total number of hospital providers (3,922) for which we were able to use CY 2005 hospital outpatient claims to model CY 2006 and CY 2007 payments by classes of hospitals. We excluded all hospitals for which we could not accurately estimate CY 2006 or CY 2007 payment and entities that are not paid under the OPPS. The latter entities include CAHs, all-inclusive hospitals, and hospitals located in Guam, the U.S. Virgin Islands, Northern Marianas, American Samoa, and the State of Maryland. This process is discussed in greater detail in section II.A. of this preamble. At this time, we are unable to calculate a disproportionate share (DSH) variable for hospitals not participating in the IPPS. Hospitals for which we do not have a DSH variable are grouped separately and generally include psychiatric hospitals, rehabilitation hospitals, and LTCHs. Finally, section 1833(t)(7)(D) of the Act permanently holds harmless cancer hospitals and children's hospitals to the proportion of their pre-BBA payment relative to their costs. Because this proposed rule would not impact these hospitals negatively, we removed them from our impact analyses. We show the total number (3,864) of OPPS hospitals, excluding the hold-harmless cancer hospitals and children's hospitals, on the second line of the table.

Column 2: APC Recalibration

The combined effect of the proposed APC reclassification and recalibration, in Column 2 are typical for APC recalibration. Overall, these changes have no impact on all urban hospitals, which show no projected change in payments, although some classes of urban hospitals experience decreases in payments. However, changes to the APC structure for CY 2007 tend to favor, slightly, urban hospitals that are not located in large urban areas. We estimate that large urban hospitals would experience a decline of 0.1 percent, while "other" urban hospitals experience an increase of 0.1 percent. Urban hospitals with between 0 and 299 beds experience increases, while the largest urban hospitals, those with beds greater than 299 experience decreases of 0.1 to 0.2 percent. With regard to volume, all urban hospitals except those with volume less than 11,000 lines, experience increases in payments. The lowest volume hospitals experience the largest decrease of 7.1 percent, largely as a result of decreases in payment for

partial hospitalization and psychotherapy services. Urban hospitals providing the highest volume of services demonstrate no projected change as a result of APC recalibration. Estimated decreases in payment for urban hospitals are also concentrated in some regions, specifically, Middle Atlantic, West North Central, and Pacific, with decreases of 0.3, 0.4, and 0.2 percent respectively. On the other hand, most other regions experience moderate increases and urban hospitals in the East South Central and New England experience no change as a result of APC recalibration.

Overall, rural hospitals show a modest 0.1 percent increase as a result of changes to the APC structure, and this 0.1 percent increase appears to be concentrated in rural hospitals that are not rural SCHs, which experience a 0.2 percent increase. Notwithstanding a modest overall increase in payments, there is substantial variation among classes of rural hospitals. Specifically, rural hospitals with more than 199 beds experience a decrease of 0.1 percent and rural hospitals with 150–199 beds experience the largest increase of 0.3 percent. With regard to volume, all rural hospitals, except those with the lowest volume, experience increases in payments. The lowest volume hospitals experience the largest decrease of 3.5 percent. Rural hospitals with greater than 5,000 lines of volume demonstrate projected increases of 0.1 to 0.4 percent as a result of APC recalibration. Increases ranging from 0.2 to 0.5 percent occur for rural hospitals in every region except New England, the Middle Atlantic, and the West North Central. The largest decreases are observed in New England (–0.5 percent), Middle Atlantic (–0.5), West North Central (–0.2 percent) regions.

Among other classes of hospitals, the largest observed impacts resulting from APC recalibration include an increase of 0.1 percent for nonteaching hospitals and a decrease of 0.3 percent for major teaching hospitals. Urban hospitals that are treating DSH patients and are also teaching hospitals experience decreases of 0.1 percent. We project that hospitals for which a DSH percentage is not available, including psychiatric hospitals, rehabilitation hospitals, and long-term care hospitals would experience decreases in payments of 8.9 percent, and for the urban subset, 9.2 percent, largely as a result of proposed changes to partial hospitalization and psychotherapy payments.

Classifying hospitals by type of ownership suggests that proprietary hospitals would gain 0.4 percent, while governmental and voluntary hospitals

would experience neither gains nor losses (0.0 percent change).

Column 3: New Wage Indices and the Effect of the Rural Adjustment

Changes introduced by the proposed FY 2007 IPPS wage indices together with the effect of including EACHs in the rural adjustment would have a modest impact in CY 2007, decreasing payments to rural hospitals other than SCHs slightly and having no effect overall on urban hospitals. We estimate that rural SCHs would experience an increase in payments of 0.1 percent, while all other rural hospitals experience a decrease of 0.2 percent. With respect to volume, rural hospitals with moderate volume experience decreases of 0.2 percent. For both facility size and volume, no category of rural hospitals experiences an increase greater than 0.2 percent. Examining hospitals by region reveals slightly greater variability. We estimate that rural hospitals in several regions would experience decreases in payment up to 0.7 percent due to wage changes, including New England, East South Central, South Atlantic, Mountain, and West South Central regions. However, rural hospitals in the remaining regions experience increases. We estimate that the Pacific region would see the largest increase of 0.6 percent.

Overall, urban hospitals experience no change in payments as a result of the new wage indices and the rural adjustment. With respect to facility size, we estimate that urban hospitals with less than 100 and greater than 499 beds would experience a decrease in payments of 0.1 percent. Urban hospitals with 100–299 beds experience no change. Urban hospitals with between 300–499 beds have the largest increase of 0.1 percent. When categorized by volume, urban hospitals with the largest volume experience no change in payment as a result of changes to the wage index and the presence of the rural adjustment, and urban hospitals with the lowest volume experience a 0.2 percent increase in payment. We estimate that urban hospitals in the South Atlantic, East South Central, and West South Central regions would experience modest decreases due to wage changes and the effect of the rural adjustment of no more than 0.3 percent (except for urban hospitals in Puerto Rico, with a decrease of 1.8 percent). Urban hospitals in all other regions (except New England) would experience an increase of 0.1 to 0.7 percent. Urban hospitals in the New England region would experience no change in payments.

Looking across other categories of hospitals, we estimate that updating the wage index and continuing the rural adjustment would lead major teaching hospitals to gain 0.1 percent and hospitals without graduate medical education programs are estimated to lose 0.1 percent. Hospitals serving 23–35 percent low-income patients are estimated to gain 0.1 percent. Hospitals serving no low-income patients, for which the percent of low-income patients cannot be determined and those serving more than 35 percent low-income patients lose 0.1 percent, whereas hospitals serving other percentages of low-income patients experience no change. Voluntary hospitals as classes would experience no change in payment due to wage changes and the effect of the rural adjustment. Governmental and proprietary hospitals would lose 0.1 percent.

Column 4: All Budget Neutrality Changes and Market Basket Update

The addition of the market basket update alleviates any negative impacts on payments for CY 2007 created by the budget neutrality adjustments made in Columns 2, and 3, with the exception of urban hospitals with the lowest volume of services and hospitals not paid under IPPS, including psychiatric hospitals, rehabilitation hospitals, and LTCHs (DSH not available). In many instances, the redistribution of payments created by proposed APC recalibration offset those introduced by updating the wage indices. However, in a few instances, negative APC recalibration changes compound a reduction in payment from updating the wage index.

We estimate that the cumulative impact of the budget neutrality adjustments and the addition of the market basket update would result in an increase in payments for urban hospitals of 3.4 percent, which is equal to the market basket update of 3.4 percent. Large urban hospitals would experience an increase of 3.3 percent and other urban hospitals would experience an increase of 3.6 percent. Urban hospitals with the lowest volume experience a negative market basket update, which is largely a function of the 7.1 percent decrease in payments attributable to changes to the APC structure. Urban hospitals with moderate volume have an increase of 2.3 percent while urban hospitals with volumes greater than 10,999 lines have increases of 3.4 to 3.5 percent. When we examine the impact of the cumulative effect of APC changes, wage index and rural adjustment changes, and the market basket on urban hospitals by region, we see that urban

hospitals in five regions (New England, East North Central, West South Central, Mountain, and Pacific) would experience an increase that is equal to or higher than the market basket increase. Hospitals in the remaining five regions (Middle Atlantic, South Atlantic, East South Central, West North Central, and Puerto Rico) receive an increase that is less than the market basket.

We estimate that the cumulative impact of budget neutrality adjustments and the market basket update would result in an overall increase for rural hospitals of 3.4 percent, with rural SCHs experiencing an update of 3.4 percent and other rural hospitals also experiencing an update of 3.4 percent. In general, rural hospitals with less than 200 beds and rural hospitals with more than 5,000 lines of volume experience increases equal to or greater than the market basket update of 3.4 percent. We estimate that low-volume rural hospitals would experience no change (0.0 percent). Rural hospitals demonstrate variability by region. We estimate that four regions (East North Central, West North Central, West South Central, and Pacific) would experience increases larger than the market basket update. We also estimate that rural hospitals in the five remaining regions (New England, Middle Atlantic, South Atlantic, East South Central, and Mountain) would receive increases that would be less than the market basket increase.

The changes across columns for other classes of hospitals are fairly moderate and most show updates relatively close to the market basket update with the exception of hospitals not paid under the IPPS. These hospitals show negative payment updates as a result of changes to payment rates for partial hospitalization and psychotherapy services. Voluntary, proprietary and governmental hospitals also show an increase equal to or greater than the market basket.

Column 5: All Proposed Changes for CY 2007

Column 5 compares all proposed changes for CY 2007 to final payment for CY 2006 and includes any additional dollars resulting from provisions in Pub. L. 108–173 in both years, changes in outlier payment percentages and thresholds, and the difference in pass-through estimates. Overall, we estimate that hospitals would gain 3.0 percent under this proposed rule in CY 2007 relative to total spending in CY 2006. When we excluded cancer and children's hospitals, which are held harmless, the gain is 3.1 percent. While

hospitals would receive the 3.4 percent increase due to the market basket update appearing in Column 4 and the additional 0.04 percent for the reduction in the pass-through estimate between CY 2006 and CY 2007, we estimate that hospitals also experience a 0.25 percent loss due to outlier payments as a result of the increased threshold and the change to the overall CCR that is used to estimate outlier payments. In addition, there is a loss of 0.17 percent as a result of the expiration of the section 508 wage adjustment.

In general, urban hospitals appear to experience the largest negative impacts from the combined effects of these factors. We estimate that hospitals in large urban areas would gain 3.0 percent in CY 2007 and hospitals in other urban areas would gain 3.1 percent. We estimate that low-volume urban hospitals would experience a decrease in total payments of 3.2 percent between CY 2006 and CY 2007, largely as a result of changes to payment for partial hospitalization, psychotherapy and radiation therapy services. Hospitals reporting 5,000 to 10,999 lines of volume show an increase of 1.9 percent but all hospitals with volume larger than 10,999 lines have increases equal to or greater than 3.1 percent. Urban hospitals in all regions other than the Mountain region have overall increases that are less than the market basket increase and which range from 2.5 to 3.3 percent. Urban hospitals in the Mountain region are estimated to receive the largest increases for urban hospitals of 4.1 percent.

Overall, rural hospitals experience increases similar to those observed for urban hospitals. Overall, we estimate that rural hospitals would experience an increase in payments of 3.1 percent, which is identical to the 3.1 percent increase we project for all hospitals when we exclude the 58 hospitals that are held harmless under the law. However, we also estimate that rural SCHs would experience an increase of 2.8 percent, and that the other rural hospitals would only experience an increase of 3.3 percent. No category of rural hospitals experiences a decrease in payments between CY 2006 and CY 2007, and rural hospitals in a few regions show increases comparable to, or better than, the market basket. Rural hospitals with fewer than 150 beds and rural hospitals with volumes greater than 4,999 lines experience increases of at least 3.0 percent, the national average overall increase for all hospitals. Across the regions, rural hospitals in five regions (South Atlantic, East North Central, East South Central, West South Central, and Pacific) are projected to

receive increases equal to or greater than the projected 3.0 percent increase for all hospitals. Rural hospitals in four regions (New England, Middle Atlantic, West North Central, and Mountain) are projected to receive overall increases that are less than the projected increase for all hospitals. We project that low-

volume rural hospitals would experience the lowest increase in overall payment of 0.8 percent (due largely to changes in payment for partial hospitalization, psychotherapy, and radiation therapy services).

Among other classes of hospitals, we estimate that hospitals not paid under the IPPS (DSH Not Available) would

experience decreases in payments between CY 2006 and CY 2007 of 5.4 percent. We estimate that major teaching hospitals would experience an increase of 2.6 percent and that nonteaching hospitals would experience an increase of 3.2 percent.

Column (1) shows total hospitals.

Column (2) shows the impact of changes resulting from the reclassification of HCPCS codes among APC groups and the recalibration of APC weights based on CY 2005 hospital claims data.

Column (3) shows the budget neutral impact of updating the wage index and rural adjustment by applying the proposed FY 2007 hospital inpatient wage index and making EACs eligible for the rural adjustment.

Column (4) shows the impact of all budget neutrality adjustments and the addition of the market basket update.

Column (5) shows the additional adjustments to the conversion factor resulting from a change in the pass-through estimate, and adds outlier payments. The change in outlier payments reflects an increase in the fixed-dollar threshold to accommodate a change in the overall CCR calculation. This column also shows the impact of the expiring section 508 wage reclassification provision, which ends in April 2007.

¹These 3,922 hospitals include children and cancer hospitals, which are held harmless to pre-BBA payments.

²Complete DSH numbers are not available for providers that are not paid under the IPPS, including rehabilitation, psychiatric, and LTCHs.

BILLING CODE 4120-01-C

4. Estimated Effect of This Proposed Rule on Beneficiaries

For services for which the beneficiary pays a copayment of 20 percent of the payment rate, the beneficiary share of payment would increase for services for

which OPSS payments would rise and would decrease for services for which OPSS payments would fall. For example, for an electrocardiogram (APC 0099), the minimum unadjusted copayment in CY 2006 was \$4.49. In this proposed rule, the minimum unadjusted copayment for APC 0099 is

\$4.72 because the OPSS payment for the service would increase under this proposed rule. In another example, for a Level IV Needle Biopsy (APC 0037), in the CY 2006 OPSS, the national unadjusted copayment in CY 2006 was \$228.76, and the minimum unadjusted copayment was \$114.38. In this

proposed rule, the national unadjusted copayment for APC 0037 is \$228.76. The minimum unadjusted copayment for APC 0037 is \$126.32, or 20 percent of the proposed payment for APC 0037. In all cases, the statute limits beneficiary liability for copayment for a service to the inpatient hospital deductible for the applicable year. For 2006, the inpatient deductible is \$962.

In order to better understand the impact of changes in copayment on beneficiaries, we modeled the percent change in total copayment liability using CY 2005 claims. We estimate, using the claims of the 3,922 hospitals on which our modeling is based, that total beneficiary liability for copayments

would decline as an overall percentage of total payments from 27.5 percent in CY 2006 (revised from 29 percent that we estimated for CY 2006 in the November 1, 2005 final rule with comment period 70 FR 68727) to 26.3 percent in CY 2007. This estimated decline in beneficiary liability is a consequence of the APC recalibration and reconfiguration we are proposing for CY 2007. In particular, the proposed changes to the emergency department visit APCs would set the copayments for these high volume services to 20 percent of the proposed payment rates, resulting in a significant reduction in beneficiary copayments.

5. Accounting Statement

As required by OMB Circular A-4 (available at <http://www.whitehouse.gov/omb/circulars/a004/a-4.pdf>, in Table 50 below, we have prepared an accounting statement showing the classification of the expenditures associated with the OPSS provisions of this proposed rule. This table provides our best estimate of the increase in Medicare payments under the OPSS as a result of the changes presented in this proposed rule on the data for 3,922 hospitals. All expenditures are classified as transfers to Medicare providers (that is, OPSS).

TABLE 50.—ACCOUNTING STATEMENT: CLASSIFICATION OF ESTIMATED EXPENDITURES FROM CY 2006 TO CY 2007

Category	Transfers
Annualized Monetized Transfers	\$1.0 Billion.
From Whom to Whom	Federal Government to OPSS Medicare Providers.
Category	Transfers.
Annualized Monetized Transfer	\$250 Million.
From Whom to Whom	Increase in Premium Payments from Beneficiaries to Federal Government.
Total	\$750 Million.

6. Conclusion

The changes in this proposed rule would affect all classes of hospitals. Some hospitals experience significant gains and others less significant gains, but almost all hospitals would experience positive updates in OPSS payments in CY 2007. Table 49 demonstrates the estimated distributional impact of the OPSS budget neutrality requirements and an additional 3.0 percent increase in payments for CY 2007, after considering the proposed market basket increase, the cost of outliers, changes to the pass-through estimate and the elimination of the section 508 adjustment of Pub. L. 108-173. The accompanying discussion, in combination with the rest of this proposed rule,² constitutes a regulatory impact analysis.

C. Effects of Proposed Changes to the ASC Payment System for CY 2007

(If you choose to comment on issues in the section, please include the caption "CY 2007 ASC Impact" at the beginning of your comment.)

We are proposing to add 14 surgical procedures to the Medicare list of ASC payable services and to implement section 5103 of Pub. L. 109-171, which requires the Secretary to substitute the OPSS payment amount for the ASC standard overhead amount if the standard overhead amount for facility

services for surgical procedures performed in an ASC, without application of any geographic adjustment, exceeds the Medicare OPSS payment amount for the service for that year, without application of any geographic adjustment. This provision applies to surgical procedures furnished in ASCs on or after January 1, 2007, and before the effective date of the revised ASC payment system. Except for the payment changes required under section 5103 of Pub. L. 109-171, we are proposing no changes in CY 2007 to the ASC payment rates that are currently in effect.

The Office of the Actuary estimates that adding the 14 procedures we are proposing in section XVII. of this preamble and implementing the Pub. L. 109-171 mandate would result in a savings to the Medicare program of approximately \$150 million in CY 2007.

1. Alternatives Considered

We are issuing this proposed rule to meet a statutory requirement that we update the list of approved ASC procedures at least every two years. We implement the biennial update of the list through notice and comment in the **Federal Register** to give interested parties an opportunity to review and comment on proposed additions to and deletions from the ASC list. The last update of the ASC list through notice and comment was effective July 5, 2005.

However, the statute requires us to update the list at least every 2 years, which means we must update the list by July 2007.

2. Limitations of Our Analysis

Without datasets related to classes of ASCs which parallel the data maintained in the Medicare provider-specific files for hospitals, we cannot model distributional impacts of the proposed CY 2007 changes in the ASC list and ASC payments similar to those we prepare for our OPSS impact analysis (see Table 49). The actuarial estimate of Medicare program costs or savings resulting from the update of the ASC list and implementation of section 5103 of Pub. L. 109-171 in CY 2007 is based on estimated CY 2007 utilization. As we have done in previous proposed rules, we are soliciting comments and information about the anticipated effect of these changes that we are proposing for CY 2007 to gauge their impact on individual ASCs.

3. Estimated Effects of This Proposed Rule on ASCs

The CMS Office of the Actuary estimates that approximately 25 percent of the cases currently reported by hospitals using the 14 codes we are proposing to add to the ASC list would shift to the ASC setting in CY 2007. It estimates that the shift of these procedures to the less costly ASC setting

would result in modest savings for the Medicare program.

Savings would also be realized because section 5103 of the Pub. L. 109–171 would impose a payment limit for 81 procedures on the current ASC list. The Office of the Actuary estimates that adding 14 surgical procedures to the ASC list and capping payment for 81 procedures on the current ASC list would result in a combined savings to the Medicare program of approximately \$150 million in CY 2007. We have not estimated the impact of our proposed changes for CY 2007 on Medicare expenditures in subsequent years because we are proposing to implement an entirely revised payment system in CY 2008. Our analysis of the impact of that proposed payment system is discussed in section XXVII.D.

Currently, Medicare pays a facility fee to ASCs only for those procedures that have been approved for the ASC list. The addition of 14 surgical procedures to the ASC list would be beneficial to ASCs by making it possible for them to offer more surgical procedures to Medicare beneficiaries. We believe that approximately 25 percent of the annual hospital outpatient volume of the 14 procedures proposed for addition to the ASC list would move to the ASC setting in CY 2007. To the extent that hospital outpatient utilization decreases and ASC utilization increases in CY 2007, the Medicare program would realize a savings because the ASC standard overhead amount for all procedures, including the proposed additions to the ASC list, would be equal to or lower than the payment rate for the same procedures under the OPPS. Because hospitals perform a much higher volume of ambulatory surgeries overall

than are performed in ASCs, we do not expect significant hospital revenue losses to result from migration of procedures that we are proposing for addition to the ASC list to the ASC setting.

4. Estimated Effects of This Proposed Rule on Beneficiaries

The proposed changes for CY 2007 would be positive for beneficiaries in at least two respects. First, for the procedures we are proposing to add to the ASC list in CY 2007, the beneficiary copayment amount would be lower when these procedures are performed in an ASC than if they were performed in a hospital outpatient department. The difference in copayment amounts is attributable to the difference in the coinsurance rate between the ASC payment system and the OPPS. That is, the coinsurance rate for all surgical procedures payable under the ASC benefit is 20 percent of the standard overhead amount, whereas the coinsurance rate for the same surgical procedures performed in a hospital outpatient setting ranges from 20 percent to 40 percent under the OPPS. In addition, in accordance with section 5103 of Pub. L. 109–171, no ASC payment rate in CY 2007 may be greater than the OPPS rate for a given procedure. Thus, due to the limitations on the ASC facility rate required by Pub. L. 109–171, beneficiaries will be assured a lower ASC copayment amount for procedures in CY 2007 than in previous years. The only exceptions would be when the ASC copayment amount exceeds the inpatient deductible. The statute requires that copayment amounts under the OPPS not exceed the inpatient deductible.

Second, beneficiary access to services would be expanded by the proposed addition of 14 surgical procedures to the ASC list. Beneficiaries would have an additional setting from which to choose were it necessary for them to undergo one of the surgical procedures that we are proposing to add the ASC list in CY 2007.

5. Conclusion

The impact on ASCs of proposed changes to the ASC payment system for CY 2007 would depend on an individual ASC's mix of patients and its payers, specifically, the proportion of its patients who are Medicare beneficiaries, whether or not the ASC chooses to perform the procedures proposed for addition to the ASC list, and whether or not the ASC provides services that will be affected by the payment limits imposed by section 5103 of Pub. L. 109–171. Overall, the Office of the Actuary estimates that the Medicare program would realize a \$35 million savings as a result of implementing the changes proposed for CY 2007.

6. Accounting Statement

As required by OMB Circular A–4 (available at <http://www.whitehouse.gov/omb/circulars/a004/a-4.pdf>), in Table 51 below, we have prepared an accounting statement showing the classification of the expenditures associated with the CY 2007 ASC provisions of this proposed rule. This table provides our best estimate of the reduction in Medicare payments under the ASC payment system as a result of the changes presented in this proposed rule for CY 2007. All expenditures are classified as transfers to Medicare providers (that is, ASC).

TABLE 51.—ACCOUNTING STATEMENT: CLASSIFICATION OF ESTIMATED ASC EXPENDITURES FROM CY 2006 TO CY 2007

Category	Transfers
Annualized Monetized Transfers	\$150 million savings.
From Whom to Whom	Medicare ASC Suppliers to the Federal Government.
Annualized Monetized Transfer	\$50 Million Impact.
From Whom to Whom	Decrease in Premium from Beneficiaries to Federal Government.
Total	\$100 million savings.

D. Effects of Proposed Revisions to the ASC Payment System for CY 2008

(If you choose to comment on issues in this section, please include the caption “CY 2008 ASC Impact” at the beginning of your comment.)

In CY 2008, we are proposing to implement a completely revised Medicare ASC payment system that could have a far-reaching effect on the

provision of outpatient surgical services for a number of years to come. First, we are proposing to greatly expand the list of procedures that would be eligible for payment of an ASC facility fee. Second, we also are proposing to move from a limited fee schedule based on nine disparate payment groups to a payment system incorporating relative payment weights and APC groups, which are key elements of the hospital OPPS.

Implementation by January 1, 2008 of a revised ASC payment system designed to result in budget neutrality is mandated by section 626 of Pub. L. 108–173. To set ASC payment rates for CY 2008 under the revised system, we are proposing to multiply ASC relative payment weights for surgical procedures by an ASC conversion factor that we would calculate to result in the same aggregate expenditures for ASC services

in CY 2008 that we estimate would have been made if the revised payment system were not implemented.

The effects of the expanded ASC list combined with significant changes in payment rates for ASC facility services would vary across ASCs, depending on whether or not the ASC limits its services to those in a particular surgical specialty area, the volume of specific services provided by the ASC, and the percentage of its patients that are Medicare beneficiaries.

The Office of the Actuary estimates that the revised payment system proposed in section XVIII. of this preamble would result in neither savings nor costs for the Medicare program. That is, because it is designed to be budget neutral, the revised ASC payment system proposed for implementation in CY 2008 would neither increase nor decrease expenditures under Part B of Medicare. The Office of the Actuary further estimates that beneficiaries would save approximately \$30 million under the revised ASC payment system proposed for implementation in CY 2008 because ASC payment rates would in all cases be lower than OPPS payment rates for the same services, and because beneficiary coinsurance for ASC services is a strict 20 percent rather than the 20–40 percent coinsurance rates allowed under the OPPS. (The only exceptions would be when the copayment amount for a procedure under the revised ASC payment system exceeds the hospital inpatient deductible. Section 1833(t)(8)(C)(i) of the Act provides that the copayment amount for a procedure paid under the OPPS cannot exceed the inpatient deductible established for the year in which the procedure is performed.)

1. Alternatives Considered

We are issuing this proposal to meet a statutory requirement to implement, no later than January 1, 2008, a revised payment system for ASCs. We are proposing to implement the revised payment system and expanded list through rulemaking in the **Federal Register** to afford interested parties an opportunity to comment on revisions we are proposing to the policies and rules for identifying surgical procedures that would be approved for payment of an ASC facility fee and the revisions we are proposing to the ASC ratesetting methodology and payment policies and regulations under the revised ASC payment system.

Throughout section XVIII. of this preamble, we discuss the various options we considered as we developed proposals to redesign the ASC payment

system in broad terms, and specific policies, such as those affecting payment for ancillary services related to surgical procedures, the definition of a surgical procedure, criteria for identifying procedures that are not safely or appropriately performed in an ASC, and so forth.

Although we propose in section XVIII. of this preamble to phase in the new ASC payment rates under the revised payment system over a 2-year period, we initially considered fully implementing the new rates for ASC services furnished on or after January 1, 2008. However, as we discuss below, our analysis of the effect that the change in payments might have on ASCs led us to propose implementation of payment rates in CY 2008 that would be based upon a 50/50 blend of the estimated current payment rate with the new payment rate. We believe that allowing a blended rate in the first year is appropriate in light of the adverse financial impact that some ASCs could potentially experience if they perform a high volume of procedures whose rates would significantly decrease under the revised system. We want to emphasize that our proposed blended payment is but one of the numerous provisions we propose in section XVIII. of this preamble as comprising the revised ASC payment system. That is, our proposal to make payment for a surgical procedure in the first year we implement the revised payment system of only 50 percent of the payment rate determined in accordance with the current payment system, would be built into and considered integral to full implementation of the revised ASC payment system proposed for CY 2008.

2. Limitations of Our Analysis

Without datasets related to classes of ASCs which parallel the data maintained in the Medicare provider-specific files for hospitals, we cannot model distributional impacts of the proposed CY 2007 changes in the ASC list and ASC payments similar to those that we prepare in our impact analysis for the OPPS (see Table 49 in section XXVII.B. above). The impacts presented here are the projected effects of the policy and statutory changes that would be effective for CY 2008, on aggregate ASC utilization and Medicare payments. We can only infer the effects of the revised payment system on different types of ASCs, for example, single or multispecialty, high or low volume, urban or nonurban ASCs, based on an overall comparison of procedure volume and facility payments between the current and the proposed payment system. Moreover, because ASCs are not

required to file Medicare cost reports, we do not have those as a source of data to help evaluate whether or not the payments for ASC services are appropriate, taking into account the resources required by ASCs to perform different surgical procedures.

Because the aggregated impact tables below are based upon a methodology that assumes no changes in service mix or volumes with respect to the most recent CY 2005 ASC data, our estimates of the percent change in allowed charges based on the revised payment system for CY 2008 are necessarily limited. We believe it is likely that the volumes and service mix of procedures provided in ASCs would change significantly in CY 2008 under the revised payment system, although we are unable to accurately project these changes. At this point, our data do not enable us to confidently estimate the net potential for migration of services among ambulatory care settings that might result from implementation of the proposed revised ASC payment system. As we have done in previous proposed rules, we rely on comments and information from stakeholders to mitigate the limitations in the data available to us for analysis of the impact these proposed changes would have on individual ASCs, on classes of specialty ASCs, on hospitals, on physicians and on beneficiaries.

3. Estimated Effect of This Proposed Rule on ASCs

Some ASCs are multispecialty facilities that perform the gamut of surgical procedures from excision of lesions to hernia repair to cataract extraction; others focus on a single specialty and perform only a limited range of surgical procedures, such as eye procedures or gastrointestinal procedures or orthopedic surgery. The combined effect on an individual ASC of the proposed revised CY 2008 payment system and the proposed expanded list of procedures would depend on a number of factors including, but not limited to, the mix of services the ASC provides, the volume of specific services provided by the ASC, and the percentage of its patients who are Medicare beneficiaries. An individual ASC's revenues from non-Medicare sources might or might not be affected by the Medicare payment changes depending on the mix of services it provides to its non-Medicare patients and the extent to which revenues from other payors are influenced by the Medicare payment rates.

To estimate changes in Medicare payments for current ASC services, we

compared estimated payment rates for CY 2008 under the current system with the estimated proposed payment rates for CY 2008 under the revised system. In analyzing these comparisons, we became concerned about the significant negative effect the new payment rates might have on Medicare revenues for certain surgical procedures that are frequently performed in ASCs. We also became concerned about the impact of the revised payment rates on ASCs that specialize in a limited number of surgical procedures for which payment would decrease under the new system. We do not want the revised payment system to cause procedures currently performed in high volume in ASCs to migrate to hospital outpatient departments in response to sudden payment reductions. On the contrary, we want to encourage procedures that are being frequently performed in ASCs at the present time to continue being performed in ASCs because, in all likelihood, the ASC has become an extremely efficient setting for high volume procedures, such as cataract extraction and colonoscopies. Moreover, we believe one of the positive outcomes of the revised ASC payment system could be to expand beneficiary and

physician choice when it comes to selecting an appropriate site for ambulatory surgical services as a consequence of the expansion of surgical services available in the ASC setting and revised payment rates that pay more appropriately for ASC facility services. Therefore, to give ASCs additional time to reconfigure their case mix so that they can focus on achieving more efficient delivery of a broader range of services, we are proposing during the first year of the revised payment system (CY 2008) to pay ASCs using a blended rate, 50 percent of the CY 2007 ASC rate for surgical procedures on the CY 2007 ASC list added to 50 percent of the CY 2008 proposed ASC rate.

Table 52 shows the impact at the APC group level, sorted by APC group, of the revised payment system if we were to apply a 50/50 blend of the old ASC payment rate and the new ASC payment within the particular APC group. The APC groups shown in this table are those for which we estimate CY 2008 allowed charges under the revised payment system would exceed \$5 million. Procedures assigned to these APCs account for the highest aggregate allowed charges under the current payment system. The following is an

explanation of the information represented in Table 52:

- Column 1—*APC Group* indicates the APC classification of procedures to which the ASC expenditures are attributed. For a listing of the individual HCPCS codes assigned to the APC groups, see Addendum C of this proposed rule, which can be found on the CMS Web site.

- Column 2—*Allowed Charges* are the Medicare payment amounts for covered ASC surgical procedures. Allowed charges include both Medicare program payments and coinsurance and deductibles, which are the financial responsibility of the beneficiary. These amounts have been summed across all procedures provided within the particular APC by ASCs. The allowed charges are expressed in millions of dollars.

- Column 3—*CY 2008 Percent Change (under 50/50 Blend)*: The CY 2008 impact of the revised ASC payment system under the transition is the percentage increase or decrease in allowed charges attributable to changes in the ASC payment rates for CY 2008 under a 50/50 blend of the old ASC payment rate and the new ASC payment within the particular APC group.

TABLE 52.—ESTIMATED CY 2008 IMPACT OF THE PROPOSED REVISED ASC PAYMENT SYSTEM ON AGGREGATE ALLOWED CHARGES UNDER THE 50/50 BLEND, BY APC GROUP

29880	Knee arthroscopy/surgery	12	41
26055	Incise finger tendon sheath	11	22

Over time, we believe the current ASC payment system has served as an incentive to ASCs to focus on providing procedures for which they determine Medicare payments are adequate to support the ASC's continued operation. In our analyses of the effects of the new payment rates, we found that the ASC

payment rates for many of the procedures performed most frequently in ASCs are equal to or greater than the OPPS rates for the same procedures. Conversely, procedures for which the current ASC payment rates are lower than the OPPS rates for the same procedures tend to be performed less

frequently in ASCs. We believe the proposed revised payment system represents a major stride towards encouraging greater efficiency in ASCs and promoting a significant increase in the scope and breadth of surgical procedures performed in ASCs because it would more appropriately distribute

payments across the entire spectrum of surgical procedures, based on a coherent system of relative payment weights. As a consequence, we expect that there would be changes in the mix of procedures provided in ASCs under the proposed revised payment system because the revised payment system would encourage ASCs to expand their service mix beyond the handful of the most lucrative procedures which comprise the bulk of ASC utilization under the current Medicare payment system.

There are also some procedures for which the current ASC and OPPS rates are roughly equivalent. Under the proposed revised payment system, those services would be paid a significantly lower amount than they are currently. We believe that in some cases the payment under the current ASC system is generous relative to ASC costs, so ASCs would in all likelihood continue performing those procedures under the proposed revised payment system. To the extent that ASCs determine that the new rates for specific services or types of procedures are inadequate relative to the costs of those services, we would expect a change in the mix of services the ASC provides.

Table 53 identifies a number of high volume procedures for which ASC payments would decrease under the revised system, although payments would increase significantly for other high volume procedures. What Table 53 does not show are the hundreds of other procedures currently on the ASC list that have very low volume, which we believe correlates with the low payment rates currently set for those procedures. Under the revised system, payment rates

would increase significantly for numerous procedures that are currently underpaid when compared with payments for the same services under the OPPS. While an ASC may earn less from providing a service that has been its highest volume (and best paid) procedure under the current system because the payment rate for that procedure is lower under the revised payment system, that ASC may more than offset the reduction in revenues by beginning to perform other services for which the proposed rates under the revised system are significantly higher. The procedures displayed in Table 53 (current high volume procedures) are the highest volume procedures under the current system but we expect that other procedures will become high volume procedures under the revised system.

While Table 52 suggests that payment for some types of procedures would decrease and others would increase, considering multiple procedures as a clinically related group generally moderates some of the extreme increases and decreases in payments displayed in Table 53 for selected high volume procedures that are members of those groups. ASCs with particular capabilities for specializing in urological or gastrointestinal procedures could shift their focus to other related procedures in the same taxonomy whose payment rates were more favorable. Those specialty ASCs could potentially continue to draw upon their experiences and resources to perform other related services.

The tables above show how payment for high volume procedures currently on the ASC list would be affected by

changes in payment using the ASC relative payment weights and rate setting methodology proposed under the new payment system. We also propose to add in CY 2008 hundreds of surgical procedures to the already extensive list of services for which Medicare allows payment of an ASC facility fee, creating new opportunities for ASCs to expand their range of Medicare-approved surgical procedures. Table 54 suggests some of the potential for growth that ASCs could realize under the revised payment system. The codes in this table are selected high volume procedures currently performed predominantly in the office and/or hospital outpatient setting. We believe the payment rates for these procedures under the proposed revised system would make them attractive additions to the existing surgical choices that ASCs currently offer Medicare beneficiaries in the areas of gastroenterology, urology, and pain management. Note that we have included columns to show the MPFS nonfacility rate, office volume, and a column entitled "OPPS Rate Adjusted to CY 2008 ASC Rate" that shows the proposed blended CY 2008 payment rate for each procedures that is compared to the MPFS nonfacility rate to determine which is the proposed CY 2008 rate. The procedures that are on the office-based list and, are therefore, subject to payment limitation (the lesser of the ASC rate or the MPFS nonfacility rate) are denoted with an asterisk. We have also denoted with an asterisk, those proposed CY 2008 ASC payments that are limited by the nonfacility rate.

TABLE 54.—SELECTED HIGH VOLUME PROCEDURES PROPOSED FOR ASC PAYMENT FOR CY 2008

CPT code	Short descriptor	Proposed CY 2007 OPPS payment rate	Proposed CY 2008 MPFS nonfacility rate	Proposed CY 2008 ASC pay- ment rate	OPPS or physician office vol- ume	Payment for office- based procedure if no pay- ment cap
45300*	Proctosigmoidoscopy dx	\$295.48	\$60.03	\$60.03	39524	\$183.19
45330*	Diagnostic sigmoidoscopy	295.48	81.86	81.86	42684	183.19
46600*	Diagnostic anoscopy	38.23	51.50	23.70	80577	23.70
46934	Destruction of hemorrhoids	792.64	177.36	177.36	34423	491.43
47562	Laparoscopic cholecystectomy	2,678.23	N/A	1,660.48	30,029	1,660.48
47563	Laparo cholecystectomy/graph	2,678.23	N/A	1,660.48	13,979	1,660.48
50590	Fragmenting of kidney stone	2,734.57	N/A	1,683.45	26,549.00	1,683.45
53850*	Prostatic microwave thermotx	2,604.69	2,459.51	1,653.04	31796	1,653.04
53852*	Prostatic rf thermotx	2,604.69	2,320.01	1,653.04	8574	1,653.04
61795	Brain surgery using computer	338.56	N/A	209.90	1,067	209.90
62368*	Analyze spine infusion pump	173.90	21.83	21.83	122336	107.82
64450*	N block, other peripheral	138.43	42.29	42.29	132194	85.83
64612*	Destroy nerve, face muscle	138.43	68.90	68.90	35679	85.83
64640*	Injection treatment of nerve	341.23	189.09	189.09	79126	211.56

Unlike hospital outpatient departments, ASCs typically provide only a select set of procedures, and those procedures are generally performed on a scheduled, elective basis, affording ASCs much greater control over their case mix and costs than is possible for a typical hospital outpatient department. We expect that, as a result of implementation of the changes proposed under the revised ASC payment system, some procedures for which payment would decrease could migrate to other ambulatory settings. Conversely, we expect ASC volume to increase for those procedures for which payment rates go up under the revised payment system. These decisions will be made at the individual ASC level, depending on its physician staff, types of patients and its payors, and other considerations.

4. Estimated Effects of This Proposed Rule on Beneficiaries

We estimate that the proposed changes for CY 2008 would be positive for beneficiaries in at least two respects. The ASC coinsurance rate is set at 20 percent rather than between 20 percent and 40 percent as is the case under the OPPI. Because ASC payment rates under the revised payment system are lower than payment rates for the same procedures under the OPPI, the beneficiary copayment amount under the ASC payment system would generally be less than the OPPI copayment amount for like services. (The only exceptions would be when the ASC copayment amount exceeds the inpatient deductible. The statute requires that copayment amounts under the OPPI not exceed the inpatient deductible.)

In addition to the potential for reduced copayments, beneficiary access to services could be expanded as a result of the addition of the proposed 763 surgical procedures to the ASC list of services eligible for Medicare payment. We expect that ASCs would provide a broader range of surgical services under the revised system and that beneficiaries would benefit from having access to a greater variety of surgical procedures in ASCs.

5. Conclusion

The proposed changes to the ASC payment system for CY 2008 would affect each of the more than 4,000 ASCs currently approved for participation in the Medicare program. The effect on an individual ASC will depend on the ASC's mix of patients, the proportion of their patients that are Medicare beneficiaries, the degree to which the payments for the procedures offered by

the ASC are changed under the proposed revised system, and the degree to which the ASC chooses to provide a different set of procedures. The revised payment system is designed to result in the same aggregate amount of expenditures that would be made under the ASC benefit if the revised system were not implemented. The budget neutrality of the new payment system would not be affected by the proposed two year transition to full implementation of the new payment rates.

E. Effects of the Medicare Contracting Reform Mandate

(If you choose to comment on issues in this section, please include the caption "Medicare Contracting Reform Impact" at the beginning of your comment.)

In section XIX. of this preamble, we discuss our proposal to revise the regulations under 42 CFR Part 421, Subpart B for Medicare intermediaries and carriers to conform the regulations to the statutory changes mandated by section 1874A of the Act as added by section 911 of Pub. L. 108–173, which took effect on October 1, 2005. As discussed in section XIX. of this preamble, section 1874A of the Act is intended to improve Medicare's administrative services to beneficiaries and health care providers and to bring standard contracting principles to Medicare, such as competition and performance incentives, which the government has long applied to other Federal programs under the FAR. This provision requires that CMS replace its current claims payment contractors by October 1, 2011 with new contract entities referred to as MACs. We believe that this provision has no immediate economic effect on Medicare payments in CY 2007 because it is administrative in nature and does not change Medicare's coverage and reimbursement policies for hospital outpatient services or any other covered Medicare services.

F. Effects of Proposed Additional Quality Measures and Procedures for Hospital Reporting of Quality Data for IPPS FY 2008

We have tried to minimize the costs of HCAHPS®, including minimizing the impact on small/rural hospitals. While there are no capital or operational/maintenance costs associated with the implementation of HCAHPS®, there are costs for collecting the data. The nationwide cost of conducting the HCAHPS® survey are estimated to be between \$3.6 million and \$16.9 million per year assuming approximately 3,700 hospitals (see Abt Associates, Inc.

report, <http://www.cms.hhs.gov/HospitalQualityInits/downloads/HCAHPS®CostsBenefits200512.pdf>).

We have reduced the burden for small/rural hospitals by making it possible to conduct the HCAHPS® survey without hiring a survey vendor; we have provided a free online data entry tool to simplify submission for reporting; we have required significantly fewer completed surveys of small hospitals than of larger hospitals; and we have permitted four different modes of survey administration, which will allow hospitals to administer the survey in the manner most familiar to them.

In addition, hospitals that are self-administering the survey (or their survey vendor, if the hospital chooses to employ one) beginning in 2007 will participate in free HCAHPS® training offered via Webinar in January 2007. All hospitals that join in 2007 will be required to participate in a month-long dry run in March 2007. Hospitals that chose not to participate in HCAHPS® will not meet the HCAHPS® requirements necessary to receive the full market basket update for FY 2008.

The costs of collecting HCAHPS® patient survey data will vary across hospitals depending on the method used to collect patient survey data, the number of patients surveyed, and whether HCAHPS® is incorporated into their existing patient satisfaction surveys. While hospitals may choose to administer HCAHPS® as a stand-alone survey, there are significant cost savings associated with combining HCAHPS® with existing surveys. Hospitals will have a financial incentive to administer a single survey that includes both HCAHPS® and information necessary to support quality improvement activities.

We have cited a cost/benefit report showing that the costs of conducting HCAHPS® would be as follows. HCAHPS® collected as a separate survey is between \$11.00 and \$15.25 per complete survey (\$3,300 to \$4,575 per hospital), assuming that 80–85 percent of hospitals collect HCAHPS® by mail and the remainder by phone or active IVR. It would be considerably less expensive to combine HCAHPS® with existing surveys. In a combined survey, it is estimated that it would cost only \$3.26 per complete survey (or \$978 per hospital) to incorporate the 27-item HCAHPS® instrument into existing surveys. Depending on the proportion of hospitals that incorporate HCAHPS® into existing surveys, it is therefore estimated that the costs of HCAHPS® is between \$3.6 million and \$16.9 million per year (Abt Associates, Inc. report, <http://www.cms.hhs.gov/>

HospitalQualityInits/downloads/HCAHPS®CostsBenefits200512.pdf).

We have made provisions to reduce the burden of the HCAHPS® initiative for small/rural hospitals. As a cost savings provisions for all hospitals (but one that is particularly useful for small hospitals), a free on-line tool for data entry is available to hospitals choosing to conduct data entry themselves in lieu of contracting with a survey vendor for this service. The sample size requirements are reduced for small hospitals unable to achieve 300 completed surveys. For all hospitals, we are allowing four modes of survey administration (mail, telephone, combination of mail and telephone, and active interactive voice recognition), and we are allowing for hospitals to either use a vendor or conduct the survey on their own. Additionally, we are allowing hospitals to integrate the HCAHPS® survey with their own patient satisfaction surveys. This option provides significant cost savings to conduct HCAHPS® annually: for the mail mode, it is estimated to cost \$603 per hospital; and for the telephone mode, it is estimated to be \$2,478 per hospital. For hospitals collecting 100 completed surveys, it costs about \$326 annually per hospital. CMS is providing free HCAHPS® training and materials and the cost of reporting HCAHPS® results to CMS is minimal.

The benefits of public reporting for hospitals are great. There are multiple reports of hospitals being motivated by these data and using them for improvement. Not only is there more consistent evidence regarding hospital impact, but there are also several well-designed studies that have found at least some impact on hospital clinical performance (Abt report).

HCAHPS® provides many benefits to hospitals and also to society at-large. The HCAHPS® initiative has taken substantial steps to assure that the survey will be credible, useful, and practical. First, the survey is designed to produce comparable data on the patient's perspective on care that allows objective and meaningful comparisons between hospitals on domains that are important to consumers. Second, public reporting of the survey results is designed to create incentives for hospitals to improve their quality of care. Third, public reporting will serve to enhance public accountability in health care by increasing the transparency of the quality of hospital care provided in return for the public investment. For the public at-large, there is the potential benefit of improved health through improvements in hospital care.

The intent of having the HCAHPS® initiative that resulted in a unique hospital survey is to provide one standardized instrument and accompanying data collection methodology that is in the public domain for measuring patients' perspectives on hospital care. While many hospitals currently collect information on patients' satisfaction with care, there is no one national standard for collecting or publicly reporting this information that would enable valid comparisons to be made across all hospitals. In order to make "apples to apples" comparisons to support consumer choice, it is necessary to introduce a standard measurement approach. HCAHPS® can be viewed as a core set of questions that can be combined with a broader, customized set of hospital-specific items. HCAHPS® is meant to complement the data hospitals currently collect to support improvements in internal customer services and quality related activities.

• SCIP

While there are no capital or operational/maintenance costs associated with the implementation of SCIP, our pilot study concluded that there will be costs associated with the collection of the data. The data collection costs have been calculated as follows: SCIP collection as additional measures has been calculated to be \$75.00 and \$100.00 per additional hour of data abstraction (approximately \$16,000 per hospital). Depending on the proportion of hospitals that already collect these measures, it is estimated that the costs of collecting the additional measures is approximately \$58.7 million dollars per year. For a detailed discussion of the data collection burden (burden hours) associated with these costs, please refer to the information collection section of the preamble.

• Mortality

The 30-day mortality measures for AMI, HF and Pneumonia are each individually calculated solely on administrative data already submitted to CMS for other purposes, such as claims submitted for payment by the hospitals. As no new or additional data will be required from hospitals to calculate the rates for these measures, we believe that there will be no measurable impact on the hospitals as a result of the inclusion of any or all of these measures in the RHQDAPU set.

1. Alternatives Considered

The HCAHPS® survey and the SCIP and mortality measures are a subset of

CMS's larger Quality Initiative for both the Medicare and Medicaid programs. The Hospital Quality Initiative was established nationally in November 2002 for nursing homes, and was expanded in 2003 to the nation's home health care agencies and hospitals. The Hospital Quality Initiative supports significant improvement in the quality of hospital care that is integral to both the Medicare and Medicaid programs. This initiative aims to improve hospital's quality of care by distributing objective and easy to understand data on hospital performance. The public availability of this information will encourage consumers and their physicians to discuss and make better informed decisions on how to get the best hospital care, create incentives for hospitals to improve care, and support public accountability. In all, improved care equates to the improvement of health for Medicare and Medicaid beneficiaries.

HCAHPS®, SCIP and Mortality measures parallel the trend in both the federal and many state governments to make hospital performance information (generally clinical processes or outcomes of care) publicly available. The goals of HCAHPS® are to (1) Produce comparable data on the patient's perspective on care to allow objective and meaningful comparisons between hospitals on domains that are important to consumer decision-making, (2) to have these data publicly reported to create incentives for hospitals to improve their quality of care, and (3) to enhance public accountability by providers by increasing the transparency of the quality of hospital care provided in return for the public investment. HCAHPS®, SCIP and Mortality measures fit into a larger context of performance reporting developed by the Strategic Framework Board of the National Quality Forum. This is based on the assumption that consumers take value (both cost and quality) into account in any major purchasing decision. Public reporting of both the clinical measures and HCAHPS® is vital to the value-based healthcare purchasing approach. Patient perspectives of care encompasses an important CMS priority, as indicated by the Agency's support for programs related to the Institute of Medicine's (IOM) call for public reporting, the Hospital Quality Initiative (HQI) and the Hospital Quality Alliance (HQA), a public-private measurement and reporting collaborative.

The HCAHPS® survey has been endorsed by the Hospital Quality Alliance. Implementing this survey fulfills the requirements

1886(b)(3)(B)(viii)(III) and (IV) of the Act that require CMS to expand the starter set of 10 quality measures used since FY 2005. In expanding these measures, we must begin to adopt the baseline set of performance measures as set forth in a 2005 report issued by the Institute of Medicine (IOM) of the National Academy of Sciences under section 238(b) of Pub. L. 108-173, effective for payments beginning with FY 2007. The IOM measures include the Hospital Quality Alliance (HQA) measures, the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS®) patient perspective survey, and three structural measures.

No alternatives were discussed for the SCIP and mortality measures.

2. Estimated Effects of This Proposed Rule

a. Effects on Hospitals

Hospitals will benefit from the information that the HCAHPS® survey and the SCIP and Mortality measures data collection will provide. Hospitals are an essential part of the National Quality Forum's Strategic Framework Board. We have made provisions that reduce the burden of the HCAHPS® initiative, especially for small/rural hospitals. The public reporting of HCAHPS® results and additional quality measures may stimulate improvements in hospital quality of care in several ways. Hospitals can use the publicly reported data to benchmark their performance with other institutions. Consumers/patients would potentially seek care in hospitals that are publicly reported to perform well.

CMS does not plan to make major revisions to the HCAHPS® survey itself or to its implementation procedures soon after HCAHPS® national implementation. With the core set of HCAHPS® measures, hospitals will have the beginnings of a benchmark for trending of their hospital results over time.

To promote its wide and rapid adoption, HCAHPS® has been carefully designed to fit within the framework of patient satisfaction surveying that hospitals currently employ. Still, CMS fully understands that participation in the HCAHPS® initiative will require some effort and expense on the part of hospitals that volunteer to take part.

b. Effects on Other Providers

Physicians will benefit by learning what surveyed consumers/patients answered about their quality of care during their hospital stays, as well as become informed about surgical care improvement and mortality rates.

Studies indicate that providers are potentially affected by public reporting. They may be motivated to improve the quality of care they deliver with the availability of performance information. Primary care physicians are also users of this information during the referral process of patients to hospitals. Studies indicate that the public reporting of hospital quality indicators may spur internal hospital quality improvement and lead to changes in physician behavior within the hospital environment.

c. Effects on the Medicare and Medicaid Programs

Some potential benefits of publicly reporting quality information has been described in the literature as pertaining to consumers, providers and purchasers. Consumers (beneficiaries) could incorporate the quality information into their decision-making about hospital choices, and benefit from better care resulting from the additional measures as well as the questions asked by HCAHPS®, such as questions about communication with providers (fewer medical errors due to patient feedback about medication effect) and discharge planning (fewer readmissions due to better patient awareness about what to expect when discharged) and the reporting of clinical measures.

Providers could potentially be motivated to improve the quality of care they provide for results of more effective and efficient hospital operation. Providers could also use the information internally to improve communication and improve performance, use the information to justify the need to increase staff ratios, use the measures in choices about practitioner practice locales, use the information to improve their ratings on patient perspectives and potentially compete with one another in the area of improving accreditation results, and use the information to choose hospitals on the basis of quality of care for their patients.

Purchasers could potentially benefit from this information for supporting shorter lengths of stay, availability of benchmarks, and availability of information to support purchasing decisions.

G. Executive Order 12866

In accordance with the provisions of Executive Order 12866, this proposed rule was reviewed by the OMB.

List of Subjects

42 CFR Part 410

Health facilities, Health professions, Laboratories, Medicare, Rural areas, X-rays.

42 CFR Part 414

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 416

Health facilities, Kidney diseases, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 419

Hospitals, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 421

Administrative practice and procedure, Health facilities, Health professions, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 485

Grant program-health, Health facilities, Medicaid, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 488

Administrative practice and procedure, Health facilities, Medicare, Reporting and recordkeeping requirements.

For reasons stated in the preamble of this proposed rule, the Centers for Medicare & Medicaid Services is proposing to amend 42 CFR Chapter IV as set forth below:

PART 410—SUPPLEMENTARY MEDICAL INSURANCE (SMI) BENEFITS

1. The authority citation for part 410 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

2. Section 410.152 is amended by revising paragraph (i) to read as follows:

§ 410.152 Amounts of payment.

* * * * *

(i) *Amount of Payment: ASC facility services.* (1) For ASC facility services furnished on or after July 1, 1987 and before January 1, 2008, in connection with the surgical procedures specified in part 416 of this chapter, Medicare Part B pays 80 percent of a standard overhead amount as specified in § 416.120(c) of this chapter.

(2) For ASC facility services furnished on or after January 1, 2008, in connection with the surgical procedures specified in part 416 of this chapter, Medicare Part B pays the lesser of 80 percent of the actual charge, 80 percent of the prospective payment amount as

determined under Subpart F of Part 416 of this chapter, or, under the limitation described in § 416.167(b)(3), the amount determined under Subpart B of Part 414 of this chapter.

* * * * *

PART 414—PAYMENT FOR PART B MEDICAL AND OTHER HEALTH SERVICES

3. The authority citation for Part 414 continues to read as follows:

Authority: Secs. 1102, 1871, and 1834(l) of the Social Security Act (42 U.S.C. 1302, 1395hh, and 1395m(l)).

4. Section 414.22 is amended by revising paragraph (b)(5)(i)(B) to read as follows:

§ 414.22 Relative Value Units (RVUs).

* * * * *

(b) *Practice Expense RVUs.*

* * * * *

(5) * * *

(i) * * *

(B) *Non-facility practice expense RVUs.* The higher non-facility practice expense RVUs apply to services performed in a physician's office, a patient's home, an ASC if the physician is performing a procedure for which an ASC facility fee is not paid under Part 416, a nursing facility, or a facility or institution other than a hospital or skilled nursing facility, community mental health center, or ASC performing an ASC approved procedure.

* * * * *

PART 416—AMBULATORY SURGICAL SERVICES

5. The authority citation for part 416 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

6. Section 416.1 is amended by—

a. Revising paragraph (a)(2).

b. Revising paragraph (a)(3).

c. Adding new paragraphs (a)(4) and (a)(5).

The revisions and additions read as follows:

§ 416.1 Basis and scope.

(a) * * *

(2) Section 1833(i)(1)(A) of the Act requires the Secretary to specify the surgical procedures that can be performed safely on an ambulatory basis in an ambulatory surgical center.

(3) Sections 1833(i)(2)(A) and (D), and 1833(a)(1)(G) of the Act specify the amounts to be paid for facility services furnished in connection with the specified surgical procedures when they are performed in an ASC.

(4) Section 1833(i)(2)(C) of the Act provides that if the Secretary has not updated amounts for ASC facility services furnished during a fiscal year through 2005 or a calendar year beginning with 2006, the amounts shall be increased by the percentage increase in the Consumer Price Index for all urban consumers as estimated by the Secretary for the 12-month period ending with the midpoint of the year involved, except that, in fiscal year 2005, the last quarter of calendar year 2005, and each of the calendar years 2006 through 2009, the increase shall be zero percent.

(5) Section 1833(i)(2)(E) of the act provides that with respect to surgical procedures furnished on or after January 1, 2007, and before the effective date of the implementation of a revised payment system, the payment amount shall be the lesser of the ASC payment rate established under section 1833(i)(2)(A) of the act or the prospective payment rate for hospital outpatient department services established under section 1833(t)(3)(D). The lesser payment amount shall be determined prior to application of any geographic adjustment.

* * * * *

7. Section 416.2 is amended by—

a. Republishing the introductory text preceding the definitions

b. Revising the definitions of “Covered surgical procedures” and “Facility services.”

The republished introductory text preceding the definitions and revised definitions read as follows:

§ 416.2 Definitions.

As used in this part:

* * * * *

Covered surgical procedures means those surgical procedures that meet the criteria specified in §§ 416.65 or 416.166, as applicable, and are published in the **Federal Register**.

Facility services means services that are furnished in connection with covered surgical procedures performed in an ASC.

8. The heading for Subpart D is revised to read as follows:

Subpart D—Scope of Benefits for Services Furnished Before January 1, 2008

9. Section 416.65 is amended by—

a. Revising the introductory text.

b. Revising paragraph (a)(4).

The revisions read as follows:

§ 416.65 Covered surgical procedures.

Effective for services furnished before January 1, 2008, covered surgical

procedures are those procedures that meet the standards described in paragraphs (a) and (b) of this section and are included in the list published in accordance with paragraph (c) of this section.

(a) * * *

(4) Are not otherwise excluded under § 411.15 of this chapter.

* * * * *

10. A new § 416.76 is added to read as follows:

§ 416.76 Applicability.

The provisions of this subpart apply to facility services furnished before January 1, 2008.

11. The heading for Subpart E is revised to read as follows:

Subpart E—Prospective Payment System For Facility Services Furnished Before January 1, 2008

§ 416.120 [Amended]

12. In paragraph (a) of § 416.120, the cross-reference “Part 413” is removed and the cross-reference “Part 419” added in its place.

13. A new § 416.121 is added to read as follows:

§ 416.121 Applicability.

The provisions of this subpart apply to facility services furnished before January 1, 2008.

14. Section 416.125 is amended by adding a new paragraph (c) to read as follows:

§ 416.125 ASC facility services payment rate.

* * * * *

(c) For services furnished on or after January 1, 2007, and before the effective date of implementation of a revised payment system, the ASC payment rate for a surgical procedure shall be the lesser of the ASC payment rate established under paragraph (a) of this section or the prospective payment rate for the procedure established under section 419.32. The lesser payment amount shall be determined prior to application of any geographic adjustment.

§ 416.150 [Removed]

15. Section 416.150 is removed.

Subpart F—[Redesignated as Subpart G]

16. Existing Subpart F is redesignated Subpart G

17. A new Subpart F is added to read as follows:

Subpart F—Coverage, Scope of ASC Facility Services, and Prospective Payment System For Facility Services Furnished On Or After January 1, 2008

Sec.

- 416.160 Basis and scope.
- 416.161 Applicability.
- 416.163 General rules.
- 416.164 Scope of ASC facility services.
- 416.166 Covered surgical procedures.
- 416.167 Basis of payment.
- 416.171 Calculation of prospective payment rates for ASC services.
- 416.172 Adjustments to national payment rates.
- 416.173 Publication of revised payment methodologies and payment rates.
- 416.178 Limitations on administrative and judicial review.

§ 416.160 Basis and scope.

(a) *Statutory basis.* (1) Section 1833(a)(1)(G) of the Act provides that, beginning with the implementation date of a revised payment system for ASC facility services furnished in connection with a surgical procedure pursuant to section 1833(i)(1)(A) of the Act, the amount paid shall be 80 percent of the lesser of the actual charge for such services or the amount determined by the Secretary under the revised payment system.

(2) Section 1833(i)(1)(A) of the Act requires the Secretary to specify the surgical procedures that can be performed safely on an ambulatory basis in an ASC.

(3) Section 1833(i)(2)(D) of the Act requires the Secretary to implement a revised payment system for payment of surgical services furnished in ASCs. The statute requires that, in the year such system is implemented, the system shall be designed to result in the same amount of aggregate expenditures for such services as would be made if there were no requirement for a revised payment system. The revised payment system shall be implemented no earlier than January 1, 2006, and no later than January 1, 2008. There shall be no administrative or judicial review under section 1869 of the Act, section 1878 of the Act, or otherwise of the classification system, the relative weights, payment amounts, and the geographic adjustment factor, if any, of the revised payment system.

(b) *Scope.* This subpart sets forth—

(1) The scope of ASC facility services and the criteria for determining the procedures for which Medicare pays an ASC facility fee; and

(2) The methodologies by which Medicare determines payment amounts for ASC facility services.

§ 416.161 Applicability.

The provisions of this subpart apply to ASC facility services furnished on or after January 1, 2008.

§ 416.163 General rules.

(a) The services for which payment is made under this subpart are ASC facility services as specified in § 416.164(a) furnished to Medicare beneficiaries by a participating ASC in connection with covered surgical procedures as determined by the Secretary in accordance with § 416.166.

(b) Physician services, including surgical procedures and all preoperative and post-operative services that are performed by a physician, are paid in accordance with Part 414 of this chapter.

(c) Items and services as specified in § 416.164(b) for which payment may be made under other provisions of Part 410 of this chapter are not included in the payment amount for ASC facility services.

§ 416.164 Scope of ASC facility services.

(a) *Included services.* ASC facility services include, but are not limited to—

(1) Nursing, technician, and related services;

(2) Use of the facility where the surgical procedures are performed;

(3) Items and services directly related to the pre-operative preparation of patients upon their admission to the ASC for surgery, to the performance of a surgical procedure(s) and to the post-operative and post-anesthesia care of patients prior to their discharge from the ASC. This includes, but is not limited to: Any laboratory testing performed under a Clinical Laboratory Improvement Amendments of 1988 (CLIA) certificate of waiver; drugs and biologicals; medical and surgical supplies and equipment; surgical dressings; implanted prosthetic devices, accessories and supplies including intraocular lenses (IOLs); implanted DME, accessories and supplies; splints and casts and related devices; and imaging services or other diagnostic tests or interpretive services directly related to a surgical procedure;

(4) Administrative, recordkeeping and housekeeping items and services;

(5) Materials, including supplies and equipment for the administration and monitoring of anesthesia; and

(6) Supervision of the services of an anesthetist by the operating surgeon.

(b) *Excluded services.* Facility services do not include costs incurred to procure corneal tissue or items and services for which payment may be made under other provisions of Parts

410 and 414 of this chapter, such as physicians' services; X-ray or diagnostic procedures (other than those directly related to performance of the surgical procedure); ambulance services; leg, arm, back and neck braces other than those that serve the function of a cast or splint; artificial limbs; non-implantable prosthetic devices and durable medical equipment. In addition, they do not include anesthetist services furnished on or after January 1, 1989.

§ 416.166 Covered surgical procedures.

(a) *Covered surgical procedures.*

Effective for services furnished on or after January 1, 2008, covered surgical procedures are those procedures that meet the general standards described in paragraph (b) of this section (whether commonly furnished in an ASC or a physician's office) and are not excluded under paragraph (c) of this section.

(b) *General standards.* Subject to the exclusions in paragraph (c) of this section, covered surgical procedures are surgical procedures specified by the Secretary that would not be expected to pose a significant safety risk to a Medicare beneficiary when performed in an ASC.

(c) *General exclusions.*

Notwithstanding paragraph (b) of this section, covered surgical procedures do not include those surgical and other medical procedures that—

(1) Generally result in extensive blood loss;

(2) Require major or prolonged invasion of body cavities;

(3) Directly involve major blood vessels;

(4) Are generally emergent or life-threatening in nature;

(5) Standard medical practice dictates that the beneficiary will typically be expected to require active medical monitoring and care at midnight following the procedure; or,

(6) Are otherwise excluded under § 411.15 of this chapter.

§ 416.167 Basis of payment.

(a) *Unit of payment.* Under the ASC prospective payment system, prospectively determined amounts are paid for facility services furnished to Medicare beneficiaries in connection with designated surgical procedures. Surgical procedures are identified by codes established under the Centers for Medicare & Medicaid Services Common Procedure Coding System (HCPCS). The prospective payment rate for each procedure for which payment is allowed under the ASC payment system is determined according to the methodology described in § 416.171. The manner in which the Medicare

payment amount and the beneficiary copayment amount for each procedure are determined is described in § 416.172.

(b) *Ambulatory payment classification (APC) groups and payment weights*

(1) ASC covered surgical procedures are classified using the APC groups described in § 419.31 of this chapter. An APC group consists of outpatient services and procedures that are comparable clinically and in terms of resources.

(2) For purposes of calculating ASC national payment rates under the methodology described in § 416.171, except as specified in paragraph (b)(3), of this section, an ASC covered surgical procedure is assigned the applicable APC relative payment weight described in § 419.31 of this chapter.

(3) Notwithstanding paragraph (b)(2) of this section, the relative payment weights for procedures paid in accordance with § 416.171(e) are determined so that the national ASC payment rate does not exceed the MPFS nonfacility amount paid for such procedures under Subpart B of Part 414 of this chapter.

§ 416.171 Calculation of prospective payment rates for ASC services.

(a) *Conversion factor for calendar year 2008.* CMS calculates a conversion factor so that payment for ASC services furnished in 2008 would result in the same aggregate amount of expenditures as would be made if the provisions in Subpart F did not apply.

(b) *Conversion factor for calendar year 2009 and subsequent years.* The conversion factor for a calendar year is equal to the conversion factor calculated for the previous year adjusted as follows:

(1) For calendar year 2009, the increase shall equal zero percent.

(2) For calendar year 2010 and subsequent years, by the Consumer Price Index for all urban consumers (U.S. city average) as estimated by the Secretary for the 12-month period ending with the midpoint of the year involved.

(c) *Transitional payment rates for calendar year 2008.* ASC payment rates for 2008 are a transitional blend of 50 percent of the CY 2007 ASC payment rate for a surgical procedure on the CY 2007 ASC list of surgical procedures and 50 percent of the payment rate for the procedure calculated under the methodology described in paragraph (d) of this section.

(d) *Payment rates for calendar year 2009 and subsequent years.* The national ASC payment rate for a covered surgical procedure designated in

accordance with § 416.166 is the product of the conversion factor calculated under paragraph (a) or paragraph (b) of this section and the relative weight determined under § 416.167(b).

(e) *Limitation on payment for certain ASC procedures.* Notwithstanding the provisions of paragraph (c) and paragraph (d) of this section, if CMS determines that a covered procedure under § 416.166 of this part is commonly performed in physicians' offices, payment for ASC facility services for such procedure shall be the lesser of the amount determined under paragraph (c) or paragraph (d) of this section or the amount paid for such procedure under Subpart B of Part 414 of this chapter.

(f) *Budget neutrality.* (1) For calendar year 2008, CMS adjusts the conversion factor in accordance with paragraph (a) to result in budget neutrality as estimated by CMS.

(2) For calendar year 2009 and subsequent years, CMS adjusts the ASC relative payment weights under § 416.167(b)(2) as needed so that any updates and adjustments made under § 419.50(a) of this chapter are budget neutral as estimated by CMS.

§ 416.172 Adjustments to national payment rates.

(a) *General rule.* CMS establishes national prospective payment rates for ASC facility services to which certain adjustments are applied to determine Medicare program payment and beneficiary copayment amounts.

(b) *Lesser of actual charge or prospective rate.* Payments to ASCs shall equal the lesser of 80 percent of:

(1) the actual charge for the service; or,

(2) the prospective rate determined under this subpart.

(c) *Geographic adjustment.* National ASC payment rates established under § 416.171 for covered surgical procedures are adjusted for variations in ASC labor costs across geographic areas using wage index values, labor and non-labor percentages, and localities specified by the Secretary.

(d) *Deductibles and coinsurance.* Part B deductible and coinsurance amounts apply as specified in § 410.152(a) and (i) of this chapter.

(e) *Payment reductions for multiple surgical procedures.* (1) *General rule.* Except as provided in paragraph (e)(2) of this section, when more than one surgical procedure for which payment is made under the ASC prospective payment system is performed during an operative session, the Medicare program

payment amount and the beneficiary copayment amount are based on—

(i) The full amounts for the procedure with the highest APC payment rate; and

(ii) One-half of the full program and the beneficiary payment amounts for all other covered procedures.

(2) *Exception.* The Secretary may apply any policies or procedures used with respect to multiple procedures under the prospective payment system for hospital outpatient department services under part 419 of this chapter as may be consistent with the equitable and efficient administration of part 416.

§ 416.173 Publication of revised payment methodologies and payment rates.

CMS will publish annually through notice and comment rulemaking in the **Federal Register**, the payment methodologies, payment rates and surgical procedures for which CMS will make an ASC facility payment, and other revisions as appropriate.

§ 416.178 Limitations on administrative and judicial review.

There is no administrative or judicial review under sections 1869 of the Act, section 1878 of the Act or otherwise of the following:

- (a) The APC classification system;
- (b) Relative payment weights;
- (c) Payment amounts; or
- (d) Geographic adjustment factors.

18. Redesignated Subpart G is revised to read as follows:

Subpart G—Adjustment in Payment Amounts for New Technology Intraocular Lenses Furnished by Ambulatory Service Centers

Sec.

416.180 Basis and scope.

416.185 Process for establishing a new class of new technology IOLs.

416.190 Request for review of payment amount.

416.195 Determination of membership in new classes of new technology IOLs.

416.200 Payment adjustment.

§ 416.180 Basis and scope.

(a) *Basis.* This subpart implements section 141 of Public Law 103–432, which provides for adjustments to payment amounts for new technology intraocular lenses (IOLs) furnished at ambulatory surgical centers (ASCs).

(b) *Scope.* This subpart sets forth—

(1) The process for interested parties to request that CMS review the appropriateness of the ASC facility fee for insertion of an IOL. This process includes a review of whether that payment is reasonable and related to the cost of acquiring a lens determined by CMS as belonging to a class of new technology IOLs;

(2) Factors that CMS considers for determination of a new class of new technology IOLs; and

(3) Application of the payment adjustment.

§ 416.185 Process for establishing a new class of new technology IOLs.

(a) *Announcement of deadline for requests for review.* CMS announces the deadline for each year's requests for review of a new class of new technology IOLs in the final rule updating the ASC payment rates for that calendar year.

(b) *Announcement of new classes of new technology IOLs for which review requests have been made and solicitation of public comments.* CMS announces the requests for review received in a calendar year and the deadline for public comments regarding the requests in the proposed rule updating the ASC payment rates for the following calendar year. The deadline for submission of public comments is 30 days following the date of the publication of the proposed rule.

(c) *Announcement of determinations regarding requests for review.* CMS announces its determinations for a calendar year in the final rule updating the ASC payment rates for the following calendar year. CMS publishes the codes and effective dates allowed for those lenses recognized by CMS as belonging to a class of new technology IOLs. New classes of new technology IOLs are effective 30 days following the date of publication of the final rule.

§ 416.190 Request for review of payment amount.

(a) *When requests can be submitted.* A request for review of the appropriateness of ASC payment for insertion of an IOL that might qualify for a payment adjustment as belonging to a new class of new technology IOLs must be submitted to CMS in accordance with the annual published deadline.

(b) *Who may submit a request.* Any individual, partnership, corporation, association, society, scientific or academic establishment, or professional or trade organization able to furnish the information required in paragraph(c) of this section may request that CMS review the appropriateness of the payment amount provided under section 1833(i)(2)(A)(iii) of the Act with respect to an IOL that meets the criteria of a new technology IOL under § 416.195.

(c) *Content of a request.* In order to be accepted by CMS for review, a request for review of the ASC payment amount for insertion of an IOL must include all the information as specified by CMS.

(d) *Confidential information.* In order for CMS to invoke the protection allowed under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552(b)(4)) and, with respect to trade secrets, the Trade Secrets Act (18 U.S.C. 1905), the requestor must clearly identify all information that is to be characterized as confidential.

§ 416.195 Determination of membership in new classes of new technology IOLs.

(a) *Factors to be considered.* CMS uses the following criteria to determine whether an IOL qualifies for a payment adjustment as a member of a new class of new technology IOLs when inserted at an ASC.

(1) The IOL is approved by the FDA.

(2) Claims of specific clinical benefits and/or lens characteristics with established clinical relevance in comparison to currently available IOLs are approved by the FDA for use in labeling and advertising.

(3) The IOL is not described by an active or expired class of new technology IOLs; that is, it does not share a predominant, class-defining characteristic associated with improved clinical outcomes with members of an active or expired class.

(4) Evidence demonstrated that use of the IOL results in measurable, clinically meaningful, improved outcomes in comparison with use of currently available IOLs. Superior outcomes include:

- (i) Reduced risk of intraoperative or postoperative complication or trauma;
- (ii) Accelerated postoperative recovery;
- (iii) Reduced induced astigmatism;
- (iv) Improved postoperative visual acuity;
- (v) More stable postoperative vision;
- (vi) Other comparable clinical advantages.

(b) *CMS determination of eligibility for payment adjustment.* CMS reviews the information submitted with a completed request for review, public comments submitted timely, and other pertinent information and makes a determination as follows:

(1) The IOL is eligible for a payment adjustment as a member of a new class of new technology IOLs.

(2) The IOL is a member of an active class of new technology IOLs and is eligible for a payment adjustment for the remainder of the period established for that class.

(3) The IOL does not meet the criteria for designation as a new technology IOL and a payment adjustment is not appropriate.

§ 416.200 Payment adjustment.

(a) CMS establishes the amount of the payment adjustment for classes of new technology IOLs through proposed and final rulemaking in connection with ASC center services.

(b) CMS adjusts the payment for insertion of an IOL approved as belonging to a class of new technology IOLs for the 5-year period of time established for that class.

(c) Upon expiration of the 5-year period of the payment adjustment, payment reverts to the standard rate for IOL insertion procedures performed in ASCs.

(d) ASCs that furnish an IOL designated by CMS as belonging to a class of new technology IOLs must submit claims using billing codes specified by CMS to receive the new technology IOL payment adjustment.

PART 419—PROSPECTIVE PAYMENT SYSTEM FOR HOSPITAL OUTPATIENT DEPARTMENT SERVICES

19. The authority citation for part 419 continues to read as follows:

Authority: Secs. 1102, 1833(t), and 1871 of the Social Security Act (42 U.S.C. 1302, 1395l(t), and 1395hh).

20. Section 419.21 is amended by revising the introductory text of paragraph (d) to read as follows:

§ 419.21 Hospital outpatient services subject to the outpatient prospective payment system.

* * * * *

(d) The following medical and other health services furnished by a home health agency (HHA) to patients who are not under an HHA plan or treatment or by a hospice program furnishing services to patients outside the hospice benefit:

* * * * *

21. Section 419.43 is amended by adding a new paragraph (h) to read as follows:

§ 419.43 Adjustments to national program payment and beneficiary copayment amounts.

* * * * *

(h) *Applicable adjustments to conversion factor for CY 2007 and for subsequent calendar years.*

(1) *General rule.* For CY 2007, the applicable adjustment to the conversion factor specified in § 419.32(b)(iv) is reduced by 2.0 percentage points for any hospital that has its annual percentage change reduced under § 412.64(d)(2) of this chapter for the corresponding fiscal year. For subsequent years, the applicable adjustment to the conversion factor is reduced for any hospital that

fails to satisfy quality reporting requirements as designated by CMS.

(2) *Limitation.* Any reduction to a hospital's adjustment to its conversion factor specified in § 419.32(b)(iv) which occurs as a result of paragraph (h)(1) of this section will apply only to the calendar year involved and will not be taken into account in computing that hospital's applicable adjustment for a subsequent calendar year.

(3) *Budget neutrality.* For CY 2007 and for each subsequent calendar year, CMS makes an adjustment to the conversion factor, so that estimated aggregate payments under the OPPS for such calendar year are not affected by any reductions to hospital adjustments which occur as a result of paragraph (h)(1) of this section.

22. A new section 419.45 is added to read as follows:

§ 419.45 Payment and copayment reduction for devices replaced under warranty or as a result of recall.

(a) *General rule.* CMS reduces the amount of payment for an implanted device made under the hospital outpatient prospective payment system in accordance with § 419.66 for which CMS determines that a significant portion of the payment is attributable to the cost of an implanted device, when one of the following situations occur:

(1) The device is replaced without cost to the provider or the beneficiary; or

(2) The provider receives full credit for the cost of a replaced device.

(b) *Amount of reduction to the APC payment.* The amount of the reduction to the APC payment made under paragraph (a) of this section is calculated in the same manner as the offset amount that would be applied if the device implanted in a procedure assigned to the APC had transitional pass-through status under § 419.66.

(c) *Amount of beneficiary copayment.* The beneficiary copayment is calculated based on the APC payment after application of the reduction under paragraph (b) of this section.

23. Section 419.70 is amended by—

a. Revising paragraph (d)(1).

b. Redesignating paragraphs (d)(2) and (d)(3) as paragraphs (d)(3) and (d)(4), respectively.

c. Adding a new paragraph (d)(2).

The revisions and addition read as follows:

§ 419.70 Transitional adjustment to limit decline in payments.

* * * * *

(d) *Hold harmless provisions.*—(1) *Temporary treatment for small rural hospitals before January 1, 2006.* For

covered hospital outpatient services furnished in a calendar year before January 1, 2006, for which the prospective payment system amount is less than the pre-BBA amount, the amount of payment under this part is increased by the amount of that difference if the hospital—

(i) Is located in a rural area as defined in § 412.63(b) of this chapter or is treated as being located in a rural area under section 1886(d)(8)(E) of the Act; and

(ii) Has 100 or fewer beds as defined in § 412.105(b) of this chapter.

(2) *Temporary treatment for small rural hospitals on or after January 1, 2006.* For covered hospital outpatient services furnished in a calendar year from January 1, 2006, through December 31, 2008, for which the prospective payment system amount is less than the pre-BBA amount, the amount of payment under this paragraph is increased by 95 percent of that difference for services furnished during 2006, 90 percent of that difference for services furnished during 2007, and 85 percent of that difference for services furnished during 2008 if the hospital—

(i) Is located in a rural area as defined in § 412.63(b) of this chapter or is treated as being located in a rural area under section 1886(d)(8)(E) of the Act;

(ii) Has 100 or fewer beds as defined in § 412.105(b) of this chapter;

(iii) Is not a sole community hospital as defined in § 412.92 of this chapter; and

(iv) Is not an essential access community hospital under § 412.109 of this chapter.

* * * * *

PART 421—MEDICARE CONTRACTING

24. The heading of part 421 is revised to read as set out above.

25. The authority citation for part 421 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

26. Section 421.3 is revised to read as follows:

§ 421.3 Definitions.

As used in this part—

Intermediary means an entity that has a contract with CMS (under statutory provisions in effect prior to October 1, 2005) to determine and make Medicare payments for Part A or Part B benefits payable on a cost basis (or under the prospective payment system for hospitals) and to perform other related functions. For purposes of applying the performance criteria in § 421.120 and the performance standards in § 421.122

and any adverse action resulting from that application, the term “intermediary” also means a Blue Cross plan that has entered into a subcontract approved by CMS with the Blue Cross and Blue Shield Association to perform intermediary functions.

27. Section 421.100 is amended by revising paragraph (i) to read as follows:

§ 421.100 Intermediary functions.

* * * * *

(i) *Dual intermediary responsibilities.*

Regarding the responsibility for service to provider-based HHAs and provider-based hospices, where the HHA or the hospice and its parent provider will be served by different intermediaries, the designated regional intermediary will process bills, make coverage determinations, and make payments to the HHAs and the hospices. The intermediary serving the parent provider will perform all fiscal functions, including audits and settlement of the Medicare cost reports and the HHA and hospice supplement worksheets.

28. Section 421.103 is revised to read as follows:

§ 421.103 Payment to providers.

Providers are assigned to intermediaries in accordance with § 421.104. As the Medicare Administrative Contractors (MACs) are implemented, providers are reassigned from intermediaries to MACs in accordance with § 421.404.

29. Section 421.104 is revised to read as follows:

§ 421.104 Assignment of providers of services to intermediaries during transition to Medicare administrative contractors (MACs).

(a) Beginning October 1, 2005, CMS assigns providers of services and other entities that may bill Part A benefits to intermediaries in a manner that will best support the transition to Medicare administrative contractors (MACs) under section 1874A of the Act in accordance with Subpart E of this part.

(b) These providers of services and other entities must continue to bill the intermediary that they were billing prior to October 1, 2005, until one of the following events occurs:

(1) The intermediary's agreement with CMS ends, and the provider or entity is directed by CMS to bill another CMS contractor.

(2) The provider or entity is assigned to a MAC that has begun to administer claims within the geographic locale of the provider or entity.

(3) CMS directs the provider or entity to begin billing another CMS contractor in order to support the implementation

of MACs under section 1874A of the Act and Subpart E of this part.

(c) New providers of services and new entities will be assigned to the intermediary serving their geographic locale if no MAC has begun to administer Medicare claims in the locale. These providers or entities must continue to bill the intermediary until one of the events in paragraph (b) of this section occurs.

(d) Providers or entities will only be granted exceptions to the provisions of paragraphs (b) or (c) of this section if CMS deems the exception to be in the compelling interest of the Medicare program.

(e) CMS will notify the provider or entity, the outgoing intermediary, and the newly assigned intermediary of assignment or reassignment decisions.

§ 421.105 [Removed]

30. Section 421.105 is removed.

§ 421.106 [Removed]

31. Section 421.106 is removed.

32. Section 421.112 is amended by—
a. Revising paragraph (a).
b. Revising paragraph (b).
The revisions read as follows:

§ 421.112 Considerations relating to the effective and efficient administration of the program.

(a) In order to accomplish the most effective and efficient administration of the Medicare program, the Secretary may make determinations with respect to the termination of an intermediary agreement, and CMS may make determinations with respect to renewal of an intermediary agreement under § 421.110.

(b) When taking the actions specified in paragraph (a) of this section, the Secretary or CMS will consider the performance of the individual intermediary in its Medicare operations using the factors contained in the performance criteria specified in § 421.120 and the performance standards specified in section § 421.122.

* * * * *

33. Section 421.114 is revised to read as follows:

§ 421.114 Assignment and reassignment of providers by CMS.

CMS may assign or reassign any provider to any intermediary if it determines that the assignment or reassignment will be in the best interests of the Medicare program.

§ 421.116 [Removed]

34. Section 421.116 is removed.

§ 421.117 [Removed]

35. Section 421.117 is removed.

§ 421.118 [Removed]

36. Section 421.118 is removed.

37. Reserve Subpart D and add a new Subpart E to Part 421 to read as follows:

Subpart E—Medicare Administrative Contractors (MACs)

Sec.

421.400 Statutory basis and scope.

421.401 Definitions.

421.404 Assignment of providers and suppliers to MACs.

§ 421.400 Statutory basis and scope.

(a) *Statutory basis.* This subpart implements section 1874A of the Act, which provides for the transition of the claims processing functions and operations for both Medicare Part A and Part B intermediaries and carriers to Medicare administrative contractors (MACs). The transition will occur between October 1, 2005, and October 1, 2011. MACs will be fully operational in distinct, nonoverlapping geographic jurisdictions by October 1, 2011.

(b) *Scope.* This subpart specifies the requirements under which providers and suppliers will be assigned to MACs.

§ 421.401 Definitions.

For purposes of this subpart—

Appropriate MAC means a MAC that has a contract under section 1874A of the Act to perform a particular Medicare administrative function in relation to:

(1) A particular individual entitled to benefits under Part A or enrolled under Part B, or both;

(2) A specific provider of services or supplier; or

(3) A class of providers of services or suppliers.

Medicare administrative contractor (MAC) means an agency, organization, or other person with a contract under section 1874A of the Act.

§ 421.404 Assignment of providers and suppliers to MACs.

(a) *Definitions.* As used in this section—

Chain provider means a group of two or more providers under common ownership or control.

Common control exists when an individual, a group of individuals, or an organization has the power, directly or indirectly, to significantly influence or direct the actions or policies of the group of suppliers or eligible providers.

Common ownership exists when an individual, a group of individuals, or an organization possesses significant equity in the group of suppliers or eligible providers.

Durable medical equipment, prosthetics, orthotics, and supplies (DMEPOS) means the types of services specified in § 421.210(b).

Eligible provider means a hospital, skilled nursing facility, or critical access hospital that meets the definition of a provider under § 400.202 of this chapter.

Home office means the entity that provides centralized management and administrative services to the individual providers or suppliers under common ownership and common control, such as centralized accounting, purchasing, personnel services, management direction and control, and other similar services.

Ineligible provider means a provider under § 400.202 of this chapter that is not an eligible provider.

Medicare benefit category means a category of covered benefits under Part A or Part B of the Medicare program (for example, inpatient hospital services, post-hospital extended care services, and physicians' services).

Provider has the same meaning as specified under § 400.202 of this chapter.

Qualified chain provider means a chain provider comprised of—

(1) 10 or more eligible providers collectively totaling 500 or more certified beds; or

(2) 5 or more eligible providers collectively totaling 300 or more certified beds, with eligible providers in 3 or more continuous States.

Supplier has the same meaning as specified in § 400.202 of this chapter.

(b) *Assignment of providers to MACs.*

(1) Providers enroll with and receive Medicare payment and other Medicare services from the MAC contracted by CMS to administer claims for the Medicare benefit category applicable to the provider's covered services for the geographic locale in which the provider is physically located.

(2) Qualified chain providers may request and receive an exception from the requirement of paragraph (b)(1) of this section from CMS. Upon CMS' approval, a qualified chain provider may enroll with and bill on behalf of the eligible providers under its common ownership or common control to the MAC contracted by CMS to administer claims for the Medicare benefit category applicable to the eligible providers' covered services for the geographic locale in which the qualified chain provider's home office is physically located.

(3) As MAC contractors become available, qualified chain providers, granted approval by CMS to enroll with and bill a single intermediary on behalf of their eligible member providers prior to October 1, 2005, will be assigned at an appropriate time to the MAC contracted by CMS to administer claims

for the applicable Medicare benefit category for the geographic locale in which the chain provider's home office is physically located. The qualified chain provider will not need to request an exception to the requirement of paragraph (b)(1) of this section in order for this assignment to take effect.

(4) CMS may grant an exception to the requirement of paragraph (b)(1) of this section to eligible providers that are not under the common ownership or common control of a qualified chain provider, as well as ineligible providers, only if CMS finds the exception will support the implementation of MACs or will serve some other compelling interest of the Medicare program.

(c) *Assignment of suppliers to MACs.* (1) Suppliers, including physicians and other practitioners, but excluding suppliers of DMEPOS, enroll with and receive Medicare payment and other Medicare services from the MAC contracted by CMS to administer claims for the Medicare benefit category applicable to the supplier's covered services for the geographic locale in which the supplier furnished such services.

(2) Suppliers of DMEPOS receive Medicare payment and other Medicare services from the MAC assigned to administer claims for DMEPOS for the regional area in which the beneficiary receiving the DMEPOS resides. The terms of §§ 421.210 and 421.212 continue to apply to suppliers of DMEPOS.

(3) CMS may allow a group of ESRD suppliers under common ownership and common control to enroll with the MAC contracted by CMS to administer ESRD claims for the geographic locale in which the group's home office is located only if—

(i) The group of ESRD suppliers requests such privileges; and

(ii) CMS finds the exception will support the implementation of MACs or

will serve some other compelling interest of the Medicare program.

PART 485—CONDITIONS OF PARTICIPATION: SPECIALIZED PROVIDERS

38. The authority citation for Part 485 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

39. Section 485.618 is amended by—
a. Revising paragraph (d)(1) introductory text.

b. Redesignating paragraphs (d)(2) and (d)(3) as paragraphs (d)(3) and (d)(4), respectively.

c. Adding a new paragraph (d)(2).
d. In redesignated paragraph (d)(3)(iv), removing the cross-reference “paragraph (d)(2)(iii)” and adding the cross-reference “paragraph (d)(3)(iii)” in its place.

e. In redesignated paragraph (d)(4), removing the cross-reference “paragraph (d)(2)(iii)” and adding the cross-reference “paragraph (d)(3)(iii)” in its place.

The revisions and additions read as follows:

§ 485.618 Condition of participation: Emergency services.

* * * * *

(d) *Standard: Personnel.*

(1) Except as specified in paragraph (d)(3) of this section, there must be a doctor of medicine or osteopathy, a physician assistant, a nurse practitioner, or a clinical nurse specialist, with training or experience in emergency care, on call and immediately available by telephone or radio contact, and available onsite within the following timeframes:

* * * * *

(2) A registered nurse with training and experience in emergency care can

be utilized to conduct specific medical screening examinations only if—

(i) The registered nurse is on site and immediately available at the CAH when a patient requests medical care; and

(ii) The nature of the patient's request for medical care is within the scope of practice of a registered nurse and consistent with applicable State laws.

* * * * *

PART 488—SURVEY, CERTIFICATION, AND ENFORCEMENT PROCEDURES

40. The authority citation for part 488 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

41. In § 488.1, the definition of “supplier” is revised to read as follows:

§ 488.1 Definitions.

* * * * *

Supplier means any of the following: Independent laboratory; portable X-ray services; physical therapist in independent practice; ESRD facility; rural health clinic; Federally qualified health center; chiropractor; or ambulatory surgical center.

* * * * *

(Catalog of Federal Domestic Assistance Program No. 93.778, Medical Assistance Program)

(Catalog of Federal Domestic Assistance Program No. 93.773, Medicare—Hospital Insurance; and Program No. 93.774, Medicare—Supplementary Medical Insurance Program)

Dated: July 28, 2006.

Mark B. McClellan,

Administrator, Centers for Medicare & Medicaid Services.

Dated: August 7, 2006.

Michael O. Leavitt,

Secretary.

67028	Injection eye drug
67101	Repair detached retina
67105	Repair detached retina
67110	Repair detached retina
67145	Treatment of retina
67208	Treatment of retinal lesion
67210	Treatment of retinal lesion
67220	Treatment of choroid lesion
67221	Ocular photodynamic ther
67225	Eye photodynamic ther add-on
67228	Treatment of retinal lesion
67345	Destroy nerve of eye muscle
67515	Inject/treat eye socket
67700	Drainage of eyelid abscess
67710	Incision of eyelid
67800	Remove eyelid lesion
67801	Remove eyelid lesions
67805	Remove eyelid lesions
67810	Biopsy of eyelid
67820	Revise eyelashes
67825	Revise eyelashes
67840	Remove eyelid lesion
67850	Treat eyelid lesion
67915	Repair eyelid defect
67922	Repair eyelid defect
67930	Repair eyelid wound
67938	Remove eyelid foreign body
68020	Incise/drain eyelid lining
68040	Treatment of eyelid lesions

**ADDENDUM CC.—PROPOSED LIST
OF PROCEDURES FOR CY 2008
SUBJECT TO PAYMENT LIMITATION
AT THE MPFS NONFACILITY
AMOUNT—Continued**

HCPSCS	Short Description
68100	Biopsy of eyelid lining
68110	Remove eyelid lining lesion
68135	Remove eyelid lining lesion
68200	Treat eyelid by injection
68400	Incise/drain tear gland
68420	Incise/drain tear sac
68440	Incise tear duct opening
68530	Clearance of tear duct
68705	Revise tear duct opening
68760	Close tear duct opening
68761	Close tear duct opening
68801	Dilate tear duct opening
68840	Explore/irrigate tear ducts
69000	Drain external ear lesion
69005	Drain external ear lesion
69020	Drain outer ear canal lesion
69100	Biopsy of external ear
69105	Biopsy of external ear canal
69200	Clear outer ear canal
69210	Remove impacted ear wax
69220	Clean out mastoid cavity
69222	Clean out mastoid cavity
69399	Outer ear surgery procedure
69400	Inflate middle ear canal
69401	Inflate middle ear canal
69405	Catheterize middle ear canal
69410	Inset middle ear (baffle)
69420	Incision of eardrum
69424	Remove ventilating tube
69433	Create eardrum opening
69540	Remove ear lesion
69610	Repair of eardrum

ADDENDUM D1.—PROPOSED PAYMENT STATUS INDICATORS

Indicator	Item/code/service	OPPS payment status
A	Services furnished to a hospital outpatient that are paid under a fee schedule or payment system other than OPPS, for example: • Ambulance Services • Clinical Diagnostic Laboratory Services • Non-Implantable Prosthetic and Orthotic Devices • EPO for ESRD Patients • Physical, Occupational, and Speech Therapy • Routine Dialysis Services for ESRD Patients Provided in a Certified Dialysis Unit of a Hospital • Diagnostic Mammography • Screening Mammography	Not paid under OPPS. Paid by fiscal intermediaries under a fee schedule or payment system other than OPPS.
B	Codes that are not recognized by OPPS when submitted on an outpatient hospital Part B bill type (12x and 13x).	Not paid under OPPS. • May be paid by intermediaries when submitted on a different bill type, for example, 75x (CORF), but not paid under OPPS. • An alternate code that is recognized by OPPS when submitted on an outpatient hospital Part B bill type (12x and 13x) may be available.
C	Inpatient Procedures	Not paid under OPPS. Admit patient. Bill as inpatient.
D	Discontinued Codes	Not paid under OPPS or any other Medicare payment system.
E	Items, Codes, and Services: • That are not covered by Medicare based on statutory exclusion • That are not covered by Medicare for reasons other than statutory exclusion • That are not recognized by Medicare but for which an alternate code for the same item or service may be available • For which separate payment is not provided by Medicare.	Not paid under OPPS or any other Medicare payment system.

ADDENDUM D1.—PROPOSED PAYMENT STATUS INDICATORS—Continued

Indicator	Item/code/service	OPPS payment status
F	Corneal Tissue Acquisition; Certain CRNA Services; and Hepatitis B Vaccines.	Not paid under OPPS. Paid at reasonable cost.
G	Pass-Through Drugs and Biologicals	Paid under OPPS; Separate APC payment includes pass-through amount.
H	Pass-Through Device Categories	Separate cost-based pass-through payment; Not subject to co-insurance.
K	(1) Non-Pass-Through Drugs and Biologicals, and Radiopharmaceutical Agents.	(1) Paid under OPPS; Separate APC payment.
	(2) Brachytherapy Sources	(2) Paid under OPPS; Separate APC payment.
	(3) Blood and Blood Products	(3) Paid under OPPS; Separate APC payment.
L	Influenza Vaccine; Pneumococcal Pneumonia Vaccine	Not paid under OPPS. Paid at reasonable cost; Not subject to deductible or coinsurance.
M	Items and Services Not Billable to the Fiscal Intermediary	Not paid under OPPS.
N	Items and Services Packaged into APC Rates	Paid under OPPS; Payment is packaged into payment for other services, including outliers. Therefore, there is no separate APC payment.
P	Partial Hospitalization	Paid under OPPS; Per diem APC payment.
Q	Packaged Services Subject to Separate Payment Under OPPS Payment Criteria.	Paid under OPPS; Addendum B displays APC assignments when services are separately payable. (1) Separate APC payment based on OPPS payment criteria. (2) If criteria are not met, payment is packaged into payment for other services, including outliers. Therefore, there is no separate APC payment.
S	Significant Procedure, Not Discounted when Multiple	Paid under OPPS; Separate APC payment.
T	Significant Procedure, Multiple Reduction Applies	Paid under OPPS; Separate APC payment.
V	Clinic or Emergency Department Visit	Paid under OPPS; Separate APC payment.
Y	Non-Implantable Durable Medical Equipment	Not paid under OPPS. All institutional providers other than home health agencies bill to DMERC.
X	Ancillary Services	Paid under OPPS; Separate APC payment.

ADDENDUM D2.—PROPOSED COMMENT INDICATORS

Comment indicator	Descriptor
NF	New code, final APC assignment; Comments were accepted on a proposed APC assignment in the Proposed Rule; APC assignment is no longer open to comment.
NI	New code, interim APC assignment; Comments will be accepted on the interim APC assignment for the new code.
CH	Active HCPCS codes in current year and next calendar year; status indicator and/or APC assignment have changed.

ADDENDUM E.—CPT CODES THAT ARE PAID ONLY AS INPATIENT PROCEDURES

CPT/HCPCS	Description	CY 2007 Proposed Rule Status Indicator
00176	Anesth, pharyngeal surgery	C
00192	Anesth, facial bone surgery	C
00214	Anesth, skull drainage	C
00215	Anesth, skull repair/fract	C
00404	Anesth, surgery of breast	C
00406	Anesth, surgery of breast	C
00452	Anesth, surgery of shoulder	C
