Federal Register

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** *www.gpoaccess.gov/nara,* available through GPO Access, is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

For more information about GPO Access, contact the GPO Access User Support Team, call toll free 1-888-293-6498; DC area 202-512-1530; fax at 202-512-1262; or via e-mail at *gpoaccess@gpo.gov.* The Support Team is available between 7:00 a.m. and 9:00 p.m. Eastern Time, Monday–Friday, except official holidays.

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Printing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 74 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 74, No. 226
Wednesday, November 25, 2009

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2009–1072; Directorate Identifier 2009–NM–169–AD; Amendment 39–16099; AD 2008–09–25 R1]

RIN 2120–AA64

Airworthiness Directives; Bombardier Model DHC–8–102, DHC–8–103, DHC–8–106, DHC–8–201, DHC–8–202, DHC–8–301, DHC–8–311, and DHC–8–315 Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for the products listed above that would revise an existing AD. This AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

Bombardier Aerospace has completed a system safety review of the aircraft fuel system against fuel tank safety standards introduced in Chapter 525 of the Airworthiness Manual through Notice of Proposed Amendment (NPA) 2002–043. The identified non-compliances were then assessed using Transport Canada Policy Letter No. 525–001, to determine if mandatory corrective action is required.

The assessment showed that it is necessary to introduce Critical Design Configuration Control Limitations (CDCCL), in order to preserve critical fuel tank system ignition source prevention features during configuration changes such as modifications and repairs, or during maintenance actions. Failure to preserve critical fuel tank system ignition source prevention features could result in a fuel tank explosion. * * *

This AD requires actions that are intended to address the unsafe condition described in the MCAI.

DATES: This AD becomes effective December 10, 2009.

On June 6, 2008 (73 FR 24157, May 2, 2008), the Director of the Federal Register approved the incorporation by reference of certain publications listed in the AD.

We must receive comments on this AD by January 11, 2010.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–40, 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this AD, contact Bombardier, Inc., 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–5000; fax 514–855–7401; e-mail *thd.qseries@aero.bombardier.com;* Internet *http://www.bombardier.com.*

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov*; or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Mazdak Hobbi, Aerospace Engineer, Airframe and Mechanical Systems Branch, ANE–171, FAA, New York Aircraft Certification Office, 1600 Stewart Avenue, Suite 410, Westbury, New York 11590; telephone (516) 228–7330; fax (516) 794–5531.

SUPPLEMENTARY INFORMATION:

Discussion

On April 24, 2008, we issued AD 2008–09–25, Amendment 39–15506 (73 FR 24157, May 2, 2008). That AD applied to all Bombardier Model DHC–8–102, DHC–8–103, DHC–8–106, DHC–8–201, DHC–8–202, DHC–8–301, DHC–8–311, and DHC–8–315 airplanes. That AD required revising the Airworthiness Limitations section (ALS) of the Instructions for Continued Airworthiness to incorporate the critical design configuration control limitations (CDCCL) data specified in the applicable temporary revision (TR) to the applicable maintenance program manual (MPM).

CDCCLs are limitation requirements to preserve a critical ignition source prevention feature of the fuel tank system design that is necessary to prevent the occurrence of an unsafe condition. The purpose of a CDCCL is to provide instruction to retain the critical ignition source prevention feature during configuration change that may be caused by alterations, repairs, or maintenance actions. A CDCCL is not a periodic inspection.

Since we issued that AD, we have determined that it is necessary to clarify the AD's intended effect on spare and on-airplane fuel tank system components, regarding the use of maintenance manuals and instructions for continued airworthiness.

Section 91.403(c) of the Federal Aviation Regulations (14 CFR 91.403(c)) specifies the following:

> No person may operate an aircraft for which a manufacturer's maintenance manual or instructions for continued airworthiness has been issued that contains an airworthiness limitation section unless the mandatory * * * procedures * * * have been complied with.

Some operators have questioned whether existing components affected by the new CDCCLs must be reworked. We did not intend for the AD to retroactively require rework of components that had been maintained using acceptable methods before the effective date of the AD. Owners and operators of the affected airplanes therefore are not required to rework affected components identified as airworthy or installed on the affected airplanes before the required revisions of the ALS. But once the CDCCLs are incorporated into the ALS, future maintenance actions on components

must be done in accordance with those CDCCLs.

FAA's Determination

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. This new AD retains the requirements of the existing AD, and adds a new note to clarify the intended effect of the AD on spare and on-airplane fuel tank system components.

Explanation of Additional Change to AD

AD 2008–09–25 allowed the use of later revisions of the ALS. That provision has been removed from this AD. Allowing the use of ''a later revision'' of specific service documents violates Office of the Federal Register policies for approving materials that are incorporated by reference. Affected operators, however, may request approval to use a later revision of the referenced service documents as an alternative method of compliance, under the provisions of paragraph (g)(1) of this AD.

Differences Between the AD and the MCAI or Service Information

We have reviewed the MCAI and related service information and, in general, agree with their substance. But we might have found it necessary to use different words from those in the MCAI to ensure the AD is clear for U.S. operators and is enforceable. In making these changes, we do not intend to differ substantively from the information provided in the MCAI and related service information.

We might also have required different actions in this AD from those in the MCAI in order to follow FAA policies. Any such differences are highlighted in a Note within the AD.

Costs of Compliance

This revision imposes no additional economic burden. The current costs for this AD are repeated for the convenience of affected operators, as follows:

We estimate that this AD will affect about 118 products of U.S. registry. We also estimate that it will take about 1 work-hour per product to comply with the basic requirements of this AD. The average labor rate is $80 per work-hour. Based on these figures, we estimate the cost of this AD to the U.S. operators to be $9,440, or $80 per product.

FAA's Justification and Determination of the Effective Date

This revision merely clarifies the intended effect on spare and on-airplane fuel tank system components, and makes no substantive change to the AD's requirements. For this reason, it is found that notice and opportunity for prior public comment for this action are unnecessary, and good cause exists for making this amendment effective in less than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety, and we did not precede it by notice and opportunity for public comment. We invite you to send any written relevant data, views, or arguments about this AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2009–1072; Directorate Identifier 2009–NM–169–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this AD. We will consider all comments received by the closing date and may amend this AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov*, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing amendment 39–15506 (73 FR 24157, May 2, 2008) and adding the following new AD:

2008–09–25 R1 Bombardier, Inc. (Formerly de Havilland, Inc.): Amendment 39–16099. Docket No. FAA–2009–1072; Directorate Identifier 2009–NM–169–AD.

Effective Date

(a) This airworthiness directive (AD) becomes effective December 10, 2009.

Affected ADs

(b) This AD revises AD 2008–09–25, Amendment 39–15506.

Applicability

(c) This AD applies to all Bombardier Model DHC–8–102, DHC–8–103, DHC–8–106, DHC–8–201, DHC–8–202, DHC–8–301, DHC–8–311, and DHC–8–315 airplanes, certificated in any category, all serial numbers.

Subject

(d) Air Transport Association (ATA) of America Code 28: Fuel.

Reason

(e) The mandatory continuing airworthiness information (MCAI) states:

Bombardier Aerospace has completed a system safety review of the aircraft fuel system against fuel tank safety standards introduced in Chapter 525 of the Airworthiness Manual through Notice of Proposed Amendment (NPA) 2002–043. The identified non-compliances were then assessed using Transport Canada Policy Letter No. 525–001, to determine if mandatory corrective action is required.

The assessment showed that it is necessary to introduce Critical Design Configuration Control Limitations (CDCCL), in order to preserve critical fuel tank system ignition source prevention features during configuration changes such as modifications and repairs, or during maintenance actions. Failure to preserve critical fuel tank system ignition source prevention features could result in a fuel tank explosion. Revisions have been made to Part 2 ''Airworthiness Limitations List'' of the Maintenance Program Manuals of the affected aircraft models to introduce the required CDCCL. The corrective action is revising the Airworthiness Limitations section of the Instructions for Continued Airworthiness to include the CDCCL data.

Restatement of AD 2008–09–25, With Revised Compliance Method

Actions and Compliance

(f) Unless already done, do the following actions.

(1) For all airplanes: Within 60 days after June 6, 2008 (the effective date of AD 2008–09–25), revise the Airworthiness Limitations section of the Instructions for Continued Airworthiness to incorporate the CDCCL data specified in the applicable temporary revision (TR) to the applicable maintenance program manual (MPM). The TRs are listed in Table 1 of this AD.

TABLE 1—TEMPORARY REVISIONS

Model	de Havilland TR	Maintenance program manual
DHC–8–102, DHC–8–103, and DHC–8–106 airplanes.	AWL–98, dated April 12, 2006.	Part 2, ''Airworthiness Limitations List,'' of de Havilland Dash 8 Series 100 MPM, Product Support Manual (PSM) 1–8–7.
DHC–8–201, and DHC–8–202 airplanes	AWL 2–35, dated April 12, 2006.	Part 2, ''Airworthiness Limitations List,'' of de Havilland Dash 8 Series 200 MPM, PSM 1–82–7.
DHC–8–301, DHC–8-311, and DHC–8–315 airplanes.	AWL 3–103, dated April 12, 2006.	Part 2, ''Airworthiness Limitations List,'' of de Havilland Dash 8 Series 300 MPM, PSM 1–83–7.

Note 1: The revisions required by paragraph (f)(1) of this AD may be done by inserting a copy of the applicable TR into the applicable maintenance program manual. When the TR has been included in the general revision of the maintenance program, the general revision may be inserted into the maintenance program manual, provided the relevant information in the general revision is identical to that in the applicable TR, and the temporary revision may be removed.

(2) After accomplishing the actions specified in paragraph (f)(1) of this AD, no alternative CDCCLs may be used unless the CDCCLs are approved as an alternative method of compliance (AMOC) in accordance with the procedures specified in paragraph (g)(1) of this AD.

New Information

Explanation of CDCCL Requirements

Note 2: Notwithstanding any other maintenance or operational requirements, components that have been identified as airworthy or installed on the affected airplanes before the revision of the ALS, as required by paragraph (f)(1) of this AD, do not need to be reworked in accordance with the CDCCLs. However, once the ALS has been revised, future maintenance actions on these components must be done in accordance with the CDCCLs.

FAA AD Differences

Note 3: This AD differs from the MCAI and/or service information as follows: No differences.

Other FAA AD Provisions

(g) The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, New York Aircraft Certification Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Mazdak Hobbi, Aerospace Engineer, Airframe and Mechanical Systems Branch, ANE–171, FAA, New York Aircraft Certification Office, 1600 Stewart Avenue, Suite 410, Westbury, New York 11590; telephone (516) 228–7330; fax (516) 794–5531. Before using any approved AMOC on any airplane to which the AMOC applies, notify your principal maintenance inspector (PMI) or principal avionics inspector (PAI), as appropriate, or lacking a principal inspector, your local Flight Standards District Office. The AMOC approval letter must specifically reference this AD.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements:* For any reporting requirement in this AD, under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), the Office of Management and Budget (OMB) has approved the information collection requirements and has assigned OMB Control Number 2120–0056.

Related Information

(h) Refer to MCAI Canadian Airworthiness Directive CF–2008–03, dated January 3, 2008, and the TRs specified in Table 1 of this AD, for related information.

Material Incorporated by Reference

(i) You must use the service information contained in Table 2 of this AD to do the actions required by this AD, unless the AD specifies otherwise.

TABLE 2—MATERIAL INCORPORATED BY REFERENCE

de Havilland temporary revision—	Dated—	To—

14 CFR Part 39

[Docket No. FAA–2009–1071; Directorate Identifier 2009–NM–160–AD; Amendment 39–16100; AD 2008–06–21 R1]

RIN 2120–AA64

Airworthiness Directives; McDonnell Douglas Corporation Model DC–10–10 and DC–10–10F Airplanes, Model DC–10–15 Airplanes, Model DC–10–30 and DC–10–30F (KC–10A and KDC–10) Airplanes, Model DC–10–40 and DC–10–40F Airplanes, Model MD–10–10F and MD–10–30F Airplanes, and Model MD–11 and MD–11F Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule; request for comments.

SUMMARY: The FAA is revising an existing airworthiness directive (AD), which applies to all McDonnell Douglas Corporation airplane models identified above. That AD currently requires revising the FAA-approved maintenance program, or the Airworthiness Limitations (AWLs) section of the Instructions for Continued Airworthiness, as applicable, to incorporate new AWLs for fuel tank systems to satisfy Special Federal Aviation Regulation No. 88 requirements. For certain airplanes, this AD also requires the initial accomplishment of a certain repetitive AWL inspection to phase in that inspection, and repair if necessary. This AD clarifies the intended effect of the AD on spare and on-airplane fuel tank system components. This AD results from a design review of the fuel tank system. We are issuing this AD to prevent the potential for ignition sources inside fuel tanks caused by latent failures, alterations, repairs, or maintenance actions, which, in combination with flammable fuel vapors, could result in a fuel tank explosion and consequent loss of the airplane.

DATES: This AD is effective December 10, 2009.

On April 23, 2008 (73 FR 14673, March 19, 2008), the Director of the Federal Register approved the incorporation by reference of a certain publication listed in the AD.

We must receive any comments on this AD by January 25, 2010.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, 3855 Lakewood Boulevard, MC D800 0019, Long Beach, California 90846–0001; telephone 206–544–5000, extension 2; fax 206–766–5683; e-mail *dse.boecom@boeing.com*; Internet *https://www.myboeingfleet.com*.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov*; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Philip C. Kush, Aerospace Engineer, Propulsion Branch, ANM–140L, Los Angeles Aircraft Certification Office, FAA, 3960 Paramount Boulevard, Lakewood, California 90712–4137; telephone (562) 627–5263; fax (562) 627–5210.

SUPPLEMENTARY INFORMATION:

Discussion

On March 9, 2008, we issued AD 2008–06–21, Amendment 39–15433 (73 FR 14673, March 19, 2008). That AD applied to all McDonnell Douglas Model DC–10–10 and DC–10–10F airplanes, Model DC–10–15 airplanes, Model DC–10–30 and DC–10–30F (KC–10A and KDC–10) airplanes, Model DC–10–40 and DC–10–40F airplanes, Model MD–10–10F and MD–10–30F airplanes, and Model MD–11 and MD–11F airplanes. That AD required revising the FAA-approved maintenance program, or the Airworthiness Limitations (AWLs) section of the Instructions for Continued Airworthiness, as applicable, to incorporate new AWLs for fuel tank systems to satisfy Special Federal Aviation Regulation No. 88 requirements. For certain airplanes, that AD also required the initial accomplishment of a certain repetitive AWL inspection to phase in that inspection, and repair if necessary. That AD resulted from a design review of the fuel tank systems. The actions specified in that AD are intended to prevent the potential for ignition sources inside fuel tanks caused by latent failures, alterations, repairs, or maintenance actions, which, in combination with flammable fuel vapors, could result in a fuel tank explosion and consequent loss of the airplane.

Critical design configuration control limitations (CDCCLs) are limitation requirements to preserve a critical ignition source prevention feature of the fuel tank system design that is necessary to prevent the occurrence of an unsafe condition. The purpose of a CDCCL is to provide instruction to retain the critical ignition source prevention feature during configuration change that may be caused by alterations, repairs, or maintenance actions. A CDCCL is not a periodic inspection.

Actions Since AD Was Issued

Since we issued that AD, we have determined that it is necessary to clarify the AD's intended effect on spare and

on-airplane fuel tank system components, regarding the use of maintenance manuals and instructions for continued airworthiness.

Section 91.403(c) of the Federal Aviation Regulations (14 CFR 91.403(c)) specifies the following:

> No person may operate an aircraft for which a manufacturer's maintenance manual or instructions for continued airworthiness has been issued that contains an airworthiness limitation section unless the mandatory * * * procedures * * * have been complied with.

Some operators have questioned whether existing components affected by the new CDCCLs must be reworked. We did not intend for the AD to retroactively require rework of components that had been maintained using acceptable methods before the effective date of the AD. Owners and operators of the affected airplanes therefore are not required to rework affected components identified as airworthy or installed on the affected airplanes before the required revisions of the FAA-approved maintenance program, or the AWLs section, as applicable. But once the CDCCLs are incorporated into the FAA-approved maintenance program or the AWLs section, as applicable, future maintenance actions on components must be done in accordance with those CDCCLs.

FAA's Determination and Requirements of This AD

The unsafe condition described previously is likely to exist or develop on other airplanes of the same type design. For this reason, we are issuing this AD to revise AD 2008–06–21. This new AD retains the requirements of the existing AD, and adds a new note to clarify the intended effect of the AD on spare and on-airplane fuel tank system components.

Explanation of Additional Change to AD

AD 2008–06–21 allowed the use of later revisions of Appendixes B, C, and D of Report MDC–02K1003. That provision has been removed from this AD. Allowing the use of ''a later revision'' of specific service documents violates Office of the Federal Register policies for approving materials that are incorporated by reference. Affected operators, however, may request approval to use an alternative CDCCL that is part of a later revision of the referenced service documents as an alternative method of compliance, under the provisions of paragraph (l) of this AD.

Costs of Compliance

This revision imposes no additional economic burden. The current costs for this AD are repeated for the convenience of affected operators, as follows:

There are about 300 airplanes of the affected design in the worldwide fleet. This AD affects about 180 airplanes of U.S. registry. The required actions take about 1 work hour per airplane, at an average labor rate of $80 per work hour. Based on these figures, the estimated cost of the AD for U.S. operators is $14,400, or $80 per airplane.

FAA's Justification and Determination of the Effective Date

This revision merely clarifies the intended effect on spare and on-airplane fuel tank system components, and makes no substantive change to the AD's requirements. For this reason, it is found that notice and opportunity for prior public comment for this action are unnecessary, and good cause exists for making this amendment effective in less than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety, and we did not provide you with notice and an opportunity to provide your comments before it becomes effective. However, we invite you to send any written data, views, or arguments about this AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2009–1071; Directorate Identifier 2009–NM–160–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this AD. We will consider all comments received by the closing date and may amend this AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov*, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this AD and placed it in the AD docket. See the **ADDRESSES** section for a location to examine the regulatory evaluation.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

■ Accordingly, under the authority delegated to me by the Administrator, the FAA amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Amendment 39–15433 (73 FR 14673, March 19, 2008) and adding the following new AD:

2008–06–21 R1 McDonnell Douglas Corporation: Amendment 39–16100. Docket No. FAA–2009–1071; Directorate Identifier 2009–NM–160–AD.

Effective Date

(a) This airworthiness directive (AD) is effective December 10, 2009.

Affected ADs

(b) This AD revises AD 2008–06–21, Amendment 39–15433.

Applicability

(c) This AD applies to all McDonnell Douglas Corporation Model DC–10–10 and DC–10–10F airplanes, Model DC–10–15 airplanes, Model DC–10–30 and DC–10–30F (KC–10A and KDC–10) airplanes, Model DC–10–40 and DC–10–40F airplanes, Model MD–10–10F and MD–10–30F airplanes, and Model MD–11 and MD–11F airplanes; certificated in any category.

Note 1: This AD requires revisions to certain operator maintenance documents to include new inspections. Compliance with these inspections is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by these inspections, the operator may not be able to accomplish the inspections described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance (AMOC) in accordance with paragraph (l) of this AD. The request should include a description of changes to the required inspections that will ensure the continued operational safety of the airplane.

Unsafe Condition

(d) This AD results from a design review of the fuel tank systems. We are issuing this AD to prevent the potential for ignition sources inside fuel tanks caused by latent failures, alterations, repairs, or maintenance actions, which, in combination with flammable fuel vapors, could result in a fuel tank explosion and consequent loss of the airplane.

Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Service Information Reference

(f) The term ''Report MDC–02K1003'' as used in this AD, means the Boeing Trijet Special Compliance Item Report, MDC–02K1003, Revision C, dated July 24, 2007.

Restatement of Requirements of AD 2008–06–21, With Changes to Compliance Method

Revise the FAA-Approved Maintenance Program

(g) For Model DC–10–10 and DC–10–10F airplanes, Model DC–10–15 airplanes, Model DC–10–30 and DC–10–30F (KC–10A and KDC–10) airplanes, and Model DC–10–40 and DC–10–40F airplanes: Before December 16, 2008, revise the FAA-approved maintenance program to incorporate the information specified in Appendixes B, C, and D of Report MDC–02K1003.

Revise the Airworthiness Limitations (AWLs) Section

(h) For Model MD–10–10F and MD–10–30F airplanes, and Model MD–11 and MD–11F airplanes: Before December 16, 2008, revise the AWLs section of the Instructions for Continued Airworthiness to incorporate the information specified in Appendixes B, C, and D of Report MDC–02K1003, except that the initial inspection required by paragraph (i) of this AD must be done at the applicable compliance time specified in that paragraph.

Initial Inspection and Repair if Necessary

(i) For Model MD–11 and MD–11F airplanes: Within 60 months after April 23, 2008 (the effective date AD 2008–06–21), do a detailed inspection of the metallic overbraiding and red-wrap tape installed on the tail tank fuel quantity indication system (FQIS) wiring to verify if the metallic overbraiding or red-wrap tape is damaged or shows signs of deterioration, in accordance with ALI 20–2 of Appendix C of Report MDC–02K1003. If any discrepancy is found during the inspection, repair the discrepancy before further flight in accordance with ALI 20–2 of Appendix C of Report MDC–02K1003.

Note 2 : For the purposes of this AD, a detailed inspection is: ''An intensive examination of a specific item, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at an intensity deemed appropriate. Inspection aids such as mirror, magnifying lenses, etc., may be necessary. Surface cleaning and elaborate procedures may be required.''

No Reporting Requirement

(j) Although Report MDC–02K1003 specifies to submit certain information to the manufacturer, this AD does not require that action.

No Alternative Inspections, Inspection Intervals, or Critical Design Configuration Control Limitations (CDCCLs)

(k) After accomplishing the applicable actions specified in paragraphs (g), (h), and (i) of this AD, no alternative inspections, inspection intervals, or CDCCLs may be used unless the inspections, intervals, or CDCCLs are approved as an AMOC in accordance with the procedures specified in paragraph (l) of this AD.

New Information

Explanation of CDCCL Requirements

Note 3: Notwithstanding any other maintenance or operational requirements, components that have been identified as airworthy or installed on the affected airplanes before the revision of the FAA-approved maintenance program, or the AWLs section, as required by paragraphs (g) and (h) of this AD, do not need to be reworked in accordance with the CDCCLs. However, once the FAA-approved maintenance program, or the AWLs section, as applicable, has been revised, future maintenance actions on these components must be done in accordance with the CDCCLs.

Alternative Methods of Compliance (AMOCs)

(l)(1) The Manager, Los Angeles Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Philip C. Kush, Aerospace Engineer, Propulsion Branch, ANM–140L, FAA, Los Angeles ACO, 3960 Paramount Boulevard, Lakewood, California 90712–4137; telephone (562) 627–5263; fax (562) 627–5210.

(2) To request a different method of compliance or a different compliance time for this AD, follow the procedures in 14 CFR 39.19. Before using any approved AMOC on any airplane to which the AMOC applies, notify your principal maintenance inspector (PMI) or principal avionics inspector (PAI), as appropriate, or lacking a principal inspector, your local Flight Standards District Office. The AMOC approval letter must specifically reference this AD.

(3) AMOCs approved previously in accordance with AD 2008–06–21, Amendment 39–15433, are approved as AMOCs for the corresponding provisions of this AD.

Material Incorporated by Reference

(m) You must use Boeing Trijet Special Compliance Item Report, MDC–02K1003, Revision C, dated July 24, 2007, to do the actions required by this AD, unless the AD specifies otherwise.

(1) The Director of the Federal Register previously approved the incorporation by reference of Boeing Trijet Special Compliance Item Report, MDC–02K1003, Revision C, dated July 24, 2007, on April 23, 2008 (73 FR 14673, March 19, 2008).

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, 3855 Lakewood Boulevard, MC D800 0019, Long Beach, California 90846–0001; telephone 206–544–5000, extension 2; fax 206–766–5683; e-mail *dse.boecom@boeing.com;* Internet *https://www.myboeingfleet.com.*

(3) You may review copies of the service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington. For information on the availability of this material at the FAA, call 425–227–1221 or 425–227–1152.

(4) You may also review copies of the service information that is incorporated by reference at the National Archives and Records Administration (NARA). BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2009–0959; Airspace Docket No. 09–ASO–30]

Amendment of Class D and E Airspace; Fort Stewart (Hinesville), GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the Class D and E Airspace at Fort Stewart (Hinesville), GA, by changing the airport name from Fort Stewart, Wright AAF, to Wright AAF (Fort Stewart)/Midcoast Regional, Fort Stewart (Hinesville), GA. This is an administrative change and does not affect the boundaries or operating requirements of the airspace.

DATES: Effective 0901 UTC, February 11, 2010. The Director of the Federal Register approves this incorporation by reference action under title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

FOR FURTHER INFORMATION CONTACT: Melinda Giddens, Operations Support Group, Eastern Service Center, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 305–5610.

SUPPLEMENTARY INFORMATION:

History

The Liberty County Airport in Hinesville, GA has closed and the associated Class E5 airspace has been removed. As a result, Wright AAF (Fort Stewart)/MidCoast Regional has become a joint use facility and the name of the airport will be amended to reflect this change. This rule will become effective on the date specified in the **DATES** section. Since this is an administrative change and does not affect the boundaries, altitudes, or operating requirements of the airspace, notice and public comment under 5 U.S.C. 553(b) are unnecessary. Class D and Class E airspace designations are published in paragraphs 5000 and 6005 respectively of FAA Order 7400.9T, dated August 27, 2009, and effective September 15, 2009, which is incorporated by reference in 14 CFR 71.1. The Class D and E airspace designations listed in this document will be published subsequently in the Order.

The Rule

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 changes the airport name from Fort Stewart, Wright AAF, to Wright AAF (Fort Stewart)/Midcoast Regional, Fort Stewart, Hinesville, GA.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore, (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends controlled airspace at Wright AAF (Fort Stewart)/Midcoast Regional, Fort Stewart (Hinesville), GA.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (Air).

Adoption of the Amendment

■ In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR Part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9T, Airspace Designations and Reporting Points, signed August 27, 2009, effective September 15, 2009, is amended as follows:

Paragraph 5000 Class D Airspace

* * * * *

ASO GA D Fort Stewart (Hinesville), GA [Amended]

Wright AAF (Fort Stewart)/Midcoast Regional, GA
(Lat. 31°53′21″ N., long. 81°33′44″ W.)

That airspace extending upward from the surface up to and including 2,500 feet MSL within a 4.4-mile radius of Wright AAF (Fort Stewart)/Midcoast Regional. This Class D airspace area is effective during the specific dates and times established in advance by Notice to Airmen. The effective days and times will thereafter be continuously published in the Airport/Facility Directory.

* * * * *

Paragraph 6005 Class E Airspace Areas Extending Upward from 700 feet or More Above the Surface of the Earth.

* * * * *

ASO GA E5 Fort Stewart (Hinesville), GA [Amended]

Wright AAF (Fort Stewart)/Midcoast Regional, GA
(Lat. 31°53′21″ N., long. 81°33′44″ W.)

That airspace extending upward from 700 feet above the surface within a 6.6-mile radius of Wright AAF (Fort Stewart)/Midcoast Regional.

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2009–0960; Airspace Docket No. 09–ASO–29]

Revocation of Class E Airspace; Hinesville, GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action removes the Class E5 Airspace at Liberty County Airport, Hinesville, GA, as the airport has closed, eliminating the need for controlled airspace.

DATES: Effective 0901 UTC, February 22, 2010. The Director of the Federal Register approves this incorporation by reference action under title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

FOR FURTHER INFORMATION CONTACT: Melinda Giddens, Operations Support Group, Eastern Service Center, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 305–5610.

SUPPLEMENTARY INFORMATION:

History

The Liberty County Airport has closed and as a result, the associated Standard Instrument Approach Procedures (SIAPs) were withdrawn and cancelled removing the Class E5 airspace requirement at Liberty County Airport. This rule will become effective on the date specified in the **DATES** section. Since this action eliminates the impact of controlled airspace on users of the National Airspace System in the vicinity of the Liberty County Airport, notice and public procedure under 5 U.S.C. 553(b) are unnecessary. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9T, signed August 27, 2009, and effective September 15, 2009, which is incorporated by reference in 14 CFR 71.1. The Class E designation listed in this document will be removed from publication subsequently in the Order.

The Rule

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 removes Class E5 airspace at Liberty County Airport, Hinesville, GA. Controlled airspace is no longer needed as the airport has closed.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore, (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it removes controlled airspace at Liberty County Airport, Hinesville, GA.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 95

[Docket No. 30689; Amdt. No. 483]

IFR Altitudes; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts miscellaneous amendments to the required IFR (instrument flight rules) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en route authorized IFR altitude is prescribed. This regulatory action is needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

DATES: *Effective Date:* 0901 UTC, December 17, 2009.

FOR FURTHER INFORMATION CONTACT: Harry Hodges, Flight Procedure Standards Branch (AMCAFS–420), Flight Technologies and Programs Division, Flight Standards Service, Federal Aviation Administration, Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 (Mail Address: P.O. Box 25082, Oklahoma City, OK 73125) telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This amendment to part 95 of the Federal Aviation Regulations (14 CFR part 95) amends, suspends, or revokes IFR altitudes governing the operation of all aircraft in flight over a specified route or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as prescribed in part 95.

The Rule

The specified IFR altitudes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference. The reasons and circumstances that create the need for this amendment involve matters of flight safety and operational efficiency in the National Airspace System, are related to published aeronautical charts that are essential to the user, and provide for the safe and efficient use of the navigable airspace. In addition, those various reasons or

circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment are impracticable and contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

Conclusion

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

BILLING CODE 4910–13–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 37

[Docket Nos. RM05–17–005 and RM05–25–005; Order No. 890–D]

Preventing Undue Discrimination and Preference in Transmission Service

November 19, 2009.

AGENCY: Federal Energy Regulatory Commission, Energy.

ACTION: Order on Clarification.

SUMMARY: The Federal Energy Regulatory Commission affirms its basic determinations in Order Nos. 890, 890–A, 890–B, and 890–C, granting clarification regarding certain revisions to its regulations and the *pro forma* open-access transmission tariff, or OATT, adopted in Order Nos. 888 and 889 to ensure that transmission services are provided on a basis that is just, reasonable, and not unduly discriminatory. The Commission grants clarification regarding the requirement to undesignate network resources used to serve off-system sales.

DATES: *Effective Date:* This rule will become effective November 25, 2009.

FOR FURTHER INFORMATION CONTACT: Christina Hayes, Office of the General Counsel—Energy Markets, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. (202) 502–6194.

SUPPLEMENTARY INFORMATION:

Before Commissioners: Jon Wellinghoff, Chairman; Suedeen G. Kelly, Marc Spitzer, and Philip D. Moeller.

Order on Clarification

1. On February 16, 2007, the Commission issued Order No. 890,[1] addressing and remedying opportunities for undue discrimination under the *pro forma* Open Access Transmission Tariff (OATT) adopted in Order No. 888.[2] The *pro forma* OATT was intended to foster greater competition in wholesale power markets by reducing barriers to entry in the provision of transmission service. In the twelve years since Order No. 888, however, flaws in the *pro forma* OATT undermined, in part, its ability to realize the core objective of remedying undue discrimination. The Commission acted in Order No. 890 to correct these flaws by reforming the terms and conditions of the *pro forma* OATT in several critical areas, including the calculation of available transfer capability (ATC), the planning of transmission facilities, and the conditions of services offered by each transmission provider.

2. In Order Nos. 890–A, 890–B, and 890–C, the Commission largely affirmed the reforms adopted in Order No. 890. The Commission concluded that, taken together, these reforms will better enable the *pro forma* OATT to achieve the core objective of remedying undue discrimination in the provision of transmission service. In Order No. 890–C, the Commission granted clarification regarding the degree of consistency required in the calculation of ATC by transmission providers and denied rehearing regarding the requirement to undesignate network resources used to serve off-system sales. Duke Energy Corporation (Duke) has sought clarification of the latter determination.

I. Reforms of the OATT

A. Designation of Network Resources

3. In Order No. 890–C, the Commission affirmed the requirement that network resources used to supply sales of system power off-system must first be undesignated.[3] The Commission explained that transactions in which the buyer and seller are both located on the same transmission system are distinct from transactions involving sales of energy from a network customer to an off-system buyer. In the latter circumstance, the off-system buyer will not be using network service to take delivery from the host transmission provider but, instead, must identify the points of receipt and delivery for the transaction on the host transmission provider's system. The Commission stated that the point-to-point transmission reservation and the corresponding resource-specific undesignation provide the transmission provider with the information it needs regarding the location of particular resources being used by the seller to source the transaction in order to model the effect of the transaction on its transmission system and set aside ATC accordingly.

Request for Clarification

4. Duke argues that the Commission's determination in Order No. 890–C is inconsistent with the *pro forma* OATT and Order No. 888. Duke contends that Order No. 890–C indicates that network customers purchasing system power from an off-system seller cannot take network service from the off-system seller's transmission provider, but instead must procure point-to-point service from the transmission system on which the off-system seller is located. Duke asserts that this is inconsistent with section 31.3 of the *pro forma* OATT, which permits network loads of network customers to not be physically interconnected with the transmission provider from whom they take network service. Duke notes that the Commission has acknowledged in prior cases that, although not generally used for through-and-out service, network service can be used to serve loads on neighboring transmission systems.[4] Duke seeks confirmation that, where an off-system buyer is buying system power from a seller that is a network customer on an adjacent transmission system, the off-system buyer needs transmission service on both the system on which the seller is located and the system on which the buyer is located, but that it remains the choice of the buyer as to whether to procure network or point-to-point service.

5. If the Commission confirms that an off-system buyer is permitted to take network service from both transmission providers, Duke questions whether the seller needs to undesignate specific generating resources or whether it can undesignate a slice of its system. Duke contends that resource-specific undesignations are needed only if the buyer is using point-to-point service on the transmission system on which the seller is located for delivery, not if the off-system buyer takes network service on that system.[5] Duke suggests that, where the buyer is a network customer on both transmission systems, the reason for requiring resource-specific

undesignation by the seller is eliminated. Duke requests clarification that a slice of system undesignation by the seller would be appropriate in such circumstances.

Commission Determination

6. We confirm that, where an off-system buyer is buying system power from a seller that is a network customer on an adjacent transmission system, the buyer needs transmission service on both the system on which the seller is located and the system on which buyer is located, but that it remains the buyer's choice as to whether to procure network or point-to-point service. The Commission's reference in Order No. 890–C to the use of point-to-point service to take delivery of system power was not intended to restrict the buyer's choice to instead use network service. As Duke notes, there may be a situation in which a buyer and seller of capacity from a network resource both take network service on the same transmission system and the power is delivered under section 31.3 of the *pro forma* OATT to another transmission system on which the buyer's network load is located. In such a situation, both the buyer and seller of power are network customers of the transmission system on which the sale of power takes place. We clarify, to the extent necessary, that the seller in such a situation may support the transaction by undesignating its resources on a system basis.

7. In Order No. 890–C, the Commission noted that the Reliability Standards governing the calculation of ATC were pending Commission review. Concurrent with this order, the Commission in Docket No. RM08–19–000 is directing the North American Electric Reliability Corporation (NERC) to develop modifications to certain of these Reliability Standards to address the modeling of network resources and its impact on the calculation of ATC. To the extent Duke or other parties have concerns regarding the appropriate modeling of network resource designations on the calculation of ATC, the Commission encourages those parties to raise their concerns in NERC's standards development process.

II. Information Collection Statement

8. The Office of Management and Budget (OMB) regulations require that OMB approve certain information collection requirements imposed by an agency.[6] The revisions to the information collection requirements for transmission providers adopted in Order No. 890 were approved under OMB Control Nos. 1902–0233. This order does not substantively alter those requirements. OMB approval of this order is therefore unnecessary. However, the Commission will send a copy of this order to OMB for informational purposes only.

III. Document Availability

9. In addition to publishing the full text of this document in the **Federal Register,** the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the Internet through FERC's Home Page (*http://www.ferc.gov*) and in FERC's Public Reference Room during normal business hours (8:30 a.m. to 5 p.m. Eastern time) at 888 First Street, NE., Room 2A, Washington DC 20426.

10. From FERC's Home Page on the Internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. [Docket No. FDA–1977–N–0013] (formerly Docket No. 1977–N–0094L)

RIN 0910–AF36

Organ-Specific Warnings; Internal Analgesic, Antipyretic, and Antirheumatic Drug Products for Over-the-Counter Human Use; Final Monograph; Technical Amendment

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; technical amendment.

SUMMARY: The Food and Drug Administration (FDA) is amending a final rule that appeared in the **Federal Register** of April 29, 2009 (74 FR 19385) (as amended in the **Federal Register** of June 30, 2009 (74 FR 31177). The final rule requires important new organ-specific warnings and related labeling for over-the-counter (OTC) internal analgesic, antipyretic, and antirheumatic (IAAA) drug products. The new labeling informs consumers about the risk of liver injury when using acetaminophen and the risk of stomach bleeding when using nonsteroidal anti-inflammatory drugs (NSAIDs). This document is intended to clarify some provisions in the final rule which may be unclear. Specifically, this document addresses how blister cards can be labeled to comply with the new required labeling, clarifies the length of time that the ''See new warnings'' flag is required to appear in the labeling, and provides some optional wording to clarify the liver injury warning on OTC acetaminophen products containing multiple active ingredients.

DATES: *Effective Date*: This final rule is effective April 29, 2010.

Compliance Date: The compliance date for all products subject to this final rule, including products with annual sales less than $25,000, is April 29, 2010.

FOR FURTHER INFORMATION CONTACT: Arlene Solbeck, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, rm. 5411, Silver Spring, MD 20993–0002, 301–796–2090.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is amending the final rule that was published in the **Federal Register** of

April 29, 2009, (the April 29, 2009, final rule) which requires important new organ-specific warnings and related labeling for OTC IAAA drug products. The new labeling informs consumers about the risk of liver injury when using acetaminophen and the risk of stomach bleeding when using NSAIDs. After the April 29, 2009, final rule was published, we received feedback from manufacturers stating that some of the requirements in the final rule are unclear (Refs. 1 and 2). We are amending the final rule to address these issues raised by the submissions (see section II of this document). One issue involves the liver injury and stomach bleeding warnings that must appear on immediate container labeling. Another issue concerns the posting of a ''See new warnings'' flag on the principal display panel (PDP) of the retail packaging. The third issue concerns the wording of the first bulleted statement in the liver injury warning.

Publication of this document constitutes final action on the change under the Administrative Procedures Act (5 U.S.C. 553). This technical amendment merely clarifies the intent of the final rule with respect to the three minor issues raised in the submissions. FDA therefore, for good cause shown, has determined that notice and public comment are unnecessary under 5 U.S.C. 553(b)(3)(B).

II. April 29, 2009, Final Rule Requirements Being Addressed in This Document

A. Immediate Container Labeling

In the final rule, we require that the new liver injury and stomach bleeding warnings appear on the outer and the immediate container of the retail packaging, where applicable (§ 201.326(a)(1)(iii)(A), (a)(1)(iv)(A)(*1*), (a)(1)(v)(A), (a)(2)(iii)(A), (a)(2)(iv)(A)(*1*), and (a)(2)(v)(A) (21 CFR 201.326(a)(1)(iii)(A), (a)(1)(iv)(A)(*1*), (a)(1)(v)(A), (a)(2)(iii)(A), (a)(2)(iv)(A)(*1*), and (a)(2)(v)(A)). We received feedback from manufacturers seeking clarification of these final rule requirements for blister card packaging (Ref. 1). We did not intend for the final rule to require liver injury or stomach bleeding warnings to appear on each blister unit on a blister card. Rather, we believe it is acceptable that the appropriate warning appear on the blister card in one place, as long as the warning stays intact and readable when drug product is removed from the blister card. Therefore, in this document, we are stating explicitly that the liver injury and stomach bleeding warnings are not required to appear on each blister unit of a blister card, as long as the appropriate warning appears on the blister card and remains intact and readable when drug is removed from the blister card. These modifications appear in § 201.326(a)(1)(iii)(A), (a)(1)(iv)(A)(*1*), (a)(1)(v)(A), (a)(2)(iii)(A), (a)(2)(iv)(A)(*1*), and (a)(2)(v)(A) in the regulatory text of this document.

We also received feedback that certain immediate containers, such as stick packs and sachets, also present space limitations for labeling and that we should not require the liver injury and stomach bleeding warnings to appear on these immediate container packages (Ref 1). We do not agree that these types of immediate containers should be exempt from the requirements in the final rule. Although these packages have limited labeling space, we believe that there is adequate space to accommodate the required warnings on these types of packages. We are also concerned that consumers may routinely remove these packages from the outer carton and, therefore, fail to see the liver injury and stomach bleeding warnings if they are only printed on the carton. For these reasons, we are not exempting these types of immediate containers from the final rule requirements.

B. ''See New Warnings'' Flag

In the April 29, 2009, final rule, we require a ''See new warnings'' flag on the PDP of all OTC drug products containing acetaminophen or NSAIDs to advise consumers of the new required warnings. In the final rule, we state that ''we will require that the 'See New Warnings' flag appear on the PDP for one year after the final rule is published, rather than for the 6 or 9 months suggested by the submission'' (74 FR 19385 at 19388). We explained that ''we continue to believe that educating consumers about the risks associated with OTC IAAA drug products is very important and more likely to be successful if the flag remains on products for 1 year'' (74 FR 19385 at 19388 through 19389). In § 201.326(b) (21 CFR 201.326(b)), the final rule states: ''The labeling of any drug product subject to this section that is initially introduced or initially delivered for introduction into interstate commerce before the effective date and within 12 months after the effective date of the final rule must bear on its PDP, as defined in § 201.60, the statement 'See new warnings information.'''

We intended this provision to require that the ''See new warnings'' statement appear on the PDPs of all OTC drug products containing acetaminophen or NSAIDs that are introduced into interstate commerce by the effective date of the final rule (i.e., by April 29, 2010). We did not intend to require the ''See new warnings'' statement for those products that are introduced into interstate commerce after the final rule effective date. We also intended the provision to require that the statement remain on the label for at least 1 year from the time the product is introduced into interstate commerce. We did not intend to require that the statement remain on the label for any longer than the 1-year period from the time of introduction into interstate commerce. For example, if the ''See new warnings'' flag is included on the PDP of a product introduced into interstate commerce 6 months after publication of the final rule (i.e., October 29, 2009), then the flag must remain on the PDP for a full year (i.e., until October 29, 2010). To make this requirement clear, we are modifying § 201.326(b) in the regulatory text of this document.

C. Liver Injury Warning for OTC Acetaminophen Products Containing Multiple Active Ingredients

In the April 29, 2009, final rule, we require a liver injury warning for all OTC drug products containing acetaminophen. The introductory sentence and first bulleted statement of this warning state: ''This product contains acetaminophen. Severe liver damage may occur if you take [bullet] more than the [insert maximum number of daily dosage units] in 24 hours, which is the maximum daily amount * * *''. Our intention was that the warning would prevent consumers from taking more than 4 grams (g) of an OTC acetaminophen product daily, the proposed maximum safe daily dose for OTC acetaminophen. After the final rule was published, we received feedback from manufacturers of OTC acetaminophen products who were concerned that consumers may be confused about the warning on OTC acetaminophen containing multiple active ingredients (e.g., cold-cold/analgesic combination products) (Refs. 1 and 2). For some combination products, the maximum number of daily dosage units may be limited by an active ingredient other than acetaminophen in the products. In such cases, the maximum number of daily dosage units result in a maximum daily dose of acetaminophen which is significantly below 4 g. To clarify that the maximum number of daily dosage units may not be the maximal daily dose of acetaminophen, we are allowing the optional statement ''for this product'' at the end of the first bulleted statement: ''more than [insert maximum number of daily dosage units] in 24 hours, which

is the maximum daily amount'' [optional: ''for this product'']. We agree with manufacturers that this revision will clarify the warning for OTC acetaminophen products containing multiple active ingredients.

III. Request for Enforcement Discretion

We received feedback requesting that we exercise enforcement discretion for manufacturers of OTC combination acetaminophen products so that they could revise the first bulleted statement of the liver injury warning to clarify that the maximum number of daily dosage units may not be the maximal daily dose of acetaminophen for those products (Ref. 2). As discussed in section II.C of this document, we are allowing the optional statement ''for this product'' at the end of the first bulleted statement: ''more than [insert maximum number of daily dosage units] in 24 hours, which is the maximum daily amount.'' The request asked us to exercise enforcement discretion until we revise this bulleted statement in the final rule. Because we are amending this bulleted statement in this document, the request that we exercise enforcement discretion is no longer applicable.

IV. Analysis of Impacts

We have examined the impacts of this rule under Executive Order 12866 and the Regulatory Flexibility Act (5 U.S.C. 601–612), and the Unfunded Mandates Reform Act of 1995 (Public Law 104–4). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). We believe that this rule is not a significant regulatory action under the Executive order.

The Regulatory Flexibility Act requires agencies to analyze regulatory options that would minimize any significant impact of a rule on small entities. Our April 29, 2009, final rule requires important new organ-specific warnings (i.e., liver injury and stomach bleeding warnings) and related labeling for OTC drug products containing acetaminophen and NSAIDs to advise consumers of potential risks and when to consult a doctor (74 FR 19385). We are amending the final rule in this document to clarify some of the labeling requirements specified in the final rule. Three amendments are being made. One amendment specifies that manufacturers of OTC acetaminophen and NSAID drug products are not required to put the liver injury or stomach bleeding warning on each blister unit of a blister card as long as the appropriate warning appears on the blister card and remains intact and readable when drug is removed from the blister card (§ 201.326(a)(1)(iii)(A), (a)(1)(iv)(A)(*1*), (a)(1)(v)(A), (a)(2)(iii)(A), (a)(2)(iv)(A)(*1*), and (a)(2)(v)(A)). The second amendment specifies that the ''See new warnings'' flag (§ 201.326(b)) must remain on the label for at least 1 year from the time the manufacturer puts the statement on the PDP. The third amendment clarifies the liver injury warning on OTC acetaminophen products containing multiple active ingredients. We examined the impacts of the amended labeling requirements described in this document when we developed the April 29, 2009, final rule. We determined that the final rule would not have a significant impact on a substantial number of small entities. Because this amendment does not add any new requirements that were not considered in developing the final rule, we do not believe this rule will have a significant economic impact on a substantial number of small entities.

Section 202(a) of the Unfunded Mandates Reform Act of 1995 requires that agencies prepare a written statement, which includes an assessment of anticipated costs and benefits, before proposing ''any rule that includes any Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more (adjusted annually for inflation) in any one year.'' The current threshold after adjustment for inflation is $133 million, using the most current (2008) Implicit Price Deflator for the Gross Domestic Product. We do not expect the final rule as amended to result in any 1-year expenditure that would meet or exceed this amount.

V. Paperwork Reduction Act of 1995

We conclude that the labeling requirements in this document are not subject to review by the Office of Management and Budget because they do not constitute a ''collection of information'' under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). Rather, the labeling statements are a ''public disclosure of information originally supplied by the Federal government to the recipient for the purpose of disclosure to the public'' (5 CFR 1320.3(c)(2)).

VI. Environmental Impact

We have determined under 21 CFR 25.31(a) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VII. Federalism

FDA has analyzed this final rule in accordance with the principles set forth in Executive Order 13132. Section 4(a) of the Executive order requires agencies to ''construe * * * a Federal statute to preempt State law only where the statute contains an express preemption provision or there is some other clear evidence that the Congress intended preemption of State law, or where the exercise of State authority conflicts with the exercise of Federal authority under the Federal statute.'' The sole statutory provision giving preemptive effect to the final rule is section 751 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 379r).

We believe that we have complied with all of the applicable requirements under the Executive order and have determined that the preemptive effects of this rule are consistent with Executive Order 13132.

List of Subjects in 21 CFR Part 201

Drugs, Labeling, Reporting and recordkeeping requirements.

■ Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 201, (as added in the **Federal Registers** of April 29, 2009, and amended June 30, 2009), is amended as follows:

PART 201—LABELING

■ 1. The authority citation for 21 CFR part 201 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 353, 355, 358, 360, 360b, 360gg–360ss, 371, 374, 379e; 42 U.S.C. 216, 241, 262, 264.

■ 2. Section 201.326, (as added at 74 FR 19385, April 29, 2009, and amended at 74 FR 31177, June 30, 2009) is further amended by revising paragraphs (a)(1)(iii)(A), (a)(1)(iv)(A)(*1*), (a)(1)(v)(A), (a)(2)(iii)(A), (a)(2)(iv)(A)(*1*), (a)(2)(v)(A), and (b) to read as follows:

§ 201.326 Over-the-counter drug products containing internal analgesic/antipyretic active ingredients; required warnings and other labeling.

(a) * * *

(1) * * *

(iii) * * *

(A) The liver warning states ''Liver warning [heading in bold type]: This product contains acetaminophen. Severe liver damage may occur if you take [bullet] more than [insert maximum number of daily dosage units] in 24 hours, which is the maximum daily amount [optional: 'for this product'] [bullet] with other drugs containing acetaminophen [bullet] 3 or more alcoholic drinks every day while using this product''. This ''Liver'' warning must be the first warning under the ''Warnings'' heading. For products that contain both acetaminophen and aspirin, this ''Liver'' warning must appear after the ''Reye's syndrome'' and ''Allergy alert'' warnings in § 201.66(c)(5)(ii)(A) and (c)(5)(ii)(B) and before the ''Stomach bleeding'' warning in paragraph (a)(2)(iii)(A) of this section. If there is an outer and immediate container of a retail package, this warning must appear on both the outer and immediate containers. If the immediate container is a blister card, the warning must appear on the blister card and remain intact and readable when drug product is removed from the blister card. The warning does not need to be included on each blister unit.

* * * * *

(iv) * * *

(A) * * *

(*1*) The liver warning states ''Liver warning [heading in bold type]: This product contains acetaminophen. Severe liver damage may occur if your child takes [bullet] more than 5 doses in 24 hours, which is the maximum daily amount [optional: 'for this product'] [bullet] with other drugs containing acetaminophen''. This ''Liver'' warning must be the first warning under the ''Warnings'' heading. If there is an outer and immediate container of a retail package, this warning must appear on both the outer and immediate containers. If the immediate container is a blister card, the warning must appear on the blister card and remain intact and readable when drug product is removed from the blister card. The warning is not required to be included on each blister unit.

* * * * *

(v) * * *

(A) The liver warning states ''Liver warning [heading in bold type]: This product contains acetaminophen. Severe liver damage may occur if [bullet] adult takes more than [insert maximum number of daily dosage units] in 24 hours, which is the maximum daily amount [optional: 'for this product'] [bullet] child takes more than 5 doses in 24 hours [bullet] taken with other drugs containing acetaminophen [bullet] adult has 3 or more alcoholic drinks everyday while using this product.'' If there is an outer and immediate container of a retail package, this warning must appear on both the outer and immediate containers. If the immediate container is a blister card, the warning must appear on the blister card and remain intact and readable when drug product is removed from the blister card. The warning is not required to be included on each blister unit.

* * * * *

(2) * * *

* * * * *

(iii) * * *

(A) The stomach bleeding warning states ''Stomach bleeding warning [heading in bold type]: This product contains an NSAID, which may cause severe stomach bleeding. The chance is higher if you [bullet] are age 60 or older [bullet] have had stomach ulcers or bleeding problems [bullet] take a blood thinning (anticoagulant) or steroid drug [bullet] take other drugs containing prescription or nonprescription NSAIDs (aspirin, ibuprofen, naproxen, or others) [bullet] have 3 or more alcoholic drinks every day while using this product [bullet] take more or for a longer time than directed''. This ''Stomach bleeding'' warning must appear after the ''Reye's syndrome'' and ''Allergy alert'' warnings in § 201.66(c)(5)(ii)(A) and (c)(5)(ii)(B). For products that contain both acetaminophen and aspirin, the acetaminophen ''Liver'' warning in paragraph (a)(1)(iii) of this section must appear before the ''Stomach bleeding'' warning in this paragraph. If there is an outer and immediate container of a retail package, this warning must appear on both the outer and immediate containers. If the immediate container is a blister card, the warning must appear on the blister card and remain intact and readable when drug product is removed from the blister card. The warning is not required to be included on each blister unit.

* * * * *

(iv) * * *

(A) * * *

(*1*) The stomach bleeding warning states ''Stomach bleeding warning [heading in bold type]: This product contains an NSAID, which may cause severe stomach bleeding. The chance is higher if your child [bullet] has had stomach ulcers or bleeding problems [bullet] takes a blood thinning (anticoagulant) or steroid drug [bullet] takes other drugs containing prescription or nonprescription NSAIDs (aspirin, ibuprofen, naproxen, or others) [bullet] takes more or for a longer time than directed''. The ''Stomach bleeding'' warning must appear after the ''Reye's syndrome'' and ''Allergy alert'' warnings in § 201.66(c)(5)(ii)(A) and (c)(5)(ii)(B). If there is an outer and immediate container of a retail package, this warning must appear on both the outer and immediate containers. If the immediate container is a blister card, the warning must appear on the blister card and remain intact and readable when drug product is removed from the blister card. The warning is not required to be included on each blister unit.

* * * * *

(v) * * *

(A) The Stomach bleeding warning states ''Stomach bleeding warning [heading in bold type]: This product contains an NSAID, which may cause severe stomach bleeding. The chance is higher if the user [bullet] has had stomach ulcers or bleeding problems [bullet] takes a blood thinning (anticoagulant) or steroid drug [bullet] takes other drugs containing prescription or nonprescription NSAIDs (aspirin, ibuprofen, naproxen, or others) [bullet] takes more or for a longer time than directed [bullet] is age 60 or older [bullet] has 3 or more alcoholic drinks everyday while using this product''. The ''Stomach bleeding'' warning must appear after the ''Reye's syndrome'' and ''Allergy alert'' warnings in § 201.66(c)(5)(ii)(A) and (c)(5)(ii)(B). If there is an outer and immediate container of a retail package, this warning must appear on both the outer and immediate containers. If the immediate container is a blister card, the warning must appear on the blister card and remain intact and readable when drug product is removed from the blister card. The warning is not required to be included on each blister unit.

* * * * *

(b) *New warnings information statement.* The labeling of any drug product subject to this section that is initially introduced or initially delivered for introduction into interstate commerce before or on April 29, 2010, must bear on its PDP, as defined in § 201.60, the statement ''See new warnings information''. This statement must appear highlighted (e.g., fluorescent or color contrast) or in bold type, be in lines generally parallel to the base on which the package rests as it is designed to be displayed, and be in one

of the following sizes, whichever is greater:

(1) At least one-quarter as large as the size of the most prominent printed matter on the PDP, or

(2) At least as large as the size of the ''Drug Facts'' title, as required in § 201.66(d)(2). The new warnings information statement must remain on the PDP of the drug product for at least 1 year from the date the product is initially introduced into interstate commerce.

* * * * *

Dated: November 17, 2009.

David Horowitz,

Assistant Commissioner for Policy.

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 510, 520, 522, and 558

[Docket No. FDA–2009–N–0665]

New Animal Drugs; Change of Sponsor

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect a change of sponsor for 29 new animal drug applications (NADAs) and 2 abbreviated new animal drug applications (ANADAs) from Intervet, Inc., to Schering-Plough Animal Health Corp.

DATES: This rule is effective November 25, 2009.

FOR FURTHER INFORMATION CONTACT: David R. Newkirk, Center for Veterinary Medicine (HFV–100), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 240–276–8307, e-mail: *david.newkirk@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION: Intervet, Inc., P.O. Box 318, 29160 Intervet Lane, Millsboro, DE 19966, has informed FDA that it has transferred ownership of, and all rights and interest in, the following 29 approved NADAs and 2 approved ANADAs to Schering-Plough Animal Health Corp., 556 Morris Ave., Summit, NJ 07901: NADA 034–478, 034–621, 045–188, 102–380, 104–494, 111–278, 120–648, 121–473, 128–620, 131–310, 131–675, 132–872, 137–600, 138–612, 139–189, 140–856, 140–897, 140–927, 140–954, 140–992, 141–222, 141–236, 141–258, 141–269, 141–276, 141–278, 141–280, 141–282, 141–286; ANADA 200–134 and 200–239. Accordingly, the agency is amending the regulations in 21 CFR parts 520, 522 (21 CFR part 522), and 558 to reflect the transfer of ownership. In addition, § 522.1081 is being revised to reflect a current format.

Following these changes of sponsorship, Intervet, Inc., is no longer the sponsor of an approved application. Accordingly, 21 CFR 510.600(c) is being amended to remove the entries for Intervet, Inc.

This rule does not meet the definition of ''rule'' in 5 U.S.C. 804(3)(A) because it is a rule of ''particular applicability.'' Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808.

List of Subjects

21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Parts 520 and 522

Animal drugs.

21 CFR Part 558

Animal drugs, Animal feeds.

■ Therefore, under the Federal Food, Drug and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR parts 510, 520, 522, and 558 are amended as follows:

PART 510—NEW ANIMAL DRUGS

■ 1. The authority citation for 21 CFR part 510 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 353, 360b, 371, 379e.

§ 510.600 [Amended]

■ 2. In § 510.600, in the table in paragraph (c)(1), remove the entry for ''Intervet, Inc.''; and in the table in paragraph (c)(2), remove the entry for ''057926''.

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS

■ 3. The authority citation for 21 CFR part 520 continues to read as follows:

Authority: 21 U.S.C. 360b.

§ 520.48 [Amended]

■ 4. In paragraph (b) of § 520.48, remove ''057926'' and in its place add ''000061''.

§ 520.905a [Amended]

■ 5. In paragraph (b) of § 520.905a, remove ''057926'' and in its place add ''000061''.

§ 520.905b [Amended]

■ 6. In paragraph (b) of § 520.905b, remove ''057926'' and in its place add ''000061''.

§ 520.905c [Amended]

■ 7. In paragraph (b) of § 520.905c, remove ''057926'' and in its place add ''000061''.

§ 520.905d [Amended]

■ 8. In paragraph (b)(1) of § 520.905d, remove ''057926'' and in its place add ''000061''.

§ 520.905e [Amended]

■ 9. In paragraph (b) of § 520.905e, remove ''057926'' and in its place add ''No. 000061''.

§ 520.1010 [Amended]

■ 10. In paragraph (b)(2) of § 520.1010, remove ''057926'' and in its place add ''000061''.

§ 520.1200 [Amended]

■ 11. In paragraph (b) of § 520.1200, remove ''057926'' and in its place add ''000061''.

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS

■ 12. The authority citation for 21 CFR part 522 continues to read as follows:

Authority: 21 U.S.C. 360b.

§ 522.246 [Amended]

■ 13. In paragraph (b)(3) of § 522.246, remove ''057926'' and in its place add ''000061''.

§ 522.1010 [Amended]

■ 14. In paragraph (b)(4) of § 522.1010, remove ''057926'' and in its place add ''000061''.

§ 522.1078 [Amended]

■ 15. In paragraph (b) of § 522.1078, remove ''Nos. 050604, 057926, and 059130'' and in its place add ''Nos. 000061, 050604, and 059130''.

§ 522.1079 [Amended]

■ 16. In paragraph (b) of § 522.1079, remove ''057926'' and in its place add ''000061''.

■ 17. Revise § 522.1081 to read as follows:

§ 522.1081 Chorionic gonadotropin.

(a) *Specifications.* Each vial contains 5,000, 10,000 or 20,000 USP units of lyophilized powder for constitution with accompanying diluent to a 10-milliliter solution.

(b) *Sponsors.* See sponsors in § 510.600(c) of this chapter for use as in paragraph (d) of this section.

(1) Nos. 000402 and 053501 for use as in paragraphs (d)(1)(i)(A), (d)(1)(i)(B) and (d)(1)(i)(C) of this section.

(2) Nos. 058639 and 063323 for use as in paragraphs (d)(1)(i)(A) and (d)(1)(i)(B) of this section.

(3) No. 000061 for use as in paragraphs (d)(1)(i)(A) and (d)(2) of this section.

(c) *Related tolerances.* See § 556.304 of this chapter.

(d) *Conditions of use*—(1) *Cattle*—(i) *Amount.* As a single dose. Dosage may be repeated in 14 days if the animal's behavior or examination of the ovaries *per rectum* indicates retreatment.

(A) 10,000 USP units by intramuscular injection.

(B) 500 to 2,500 USP units by intrafollicular injection.

(C) 2,500 to 5,000 USP units by intravenous injection.

(ii) *Indications for use.* For parenteral use in cows for treatment of nymphomania (frequent or constant heat) due to cystic ovaries.

(iii) *Limitations.* Federal law restricts this drug to use by or on the order of a licensed veterinarian.

(2) *Finfish*—(i) *Amount.* 50 to 510 IU per pound of body weight for males, 67 to 1,816 IU per pound of body weight for females, by intramuscular injection. Up to three doses may be administered.

(ii) *Indications for use.* An aid in improving spawning function in male and female brood finfish.

(iii) *Limitations.* In fish intended for human consumption, the total dose administered per fish (all injections combined) should not exceed 25,000 IU chorionic gonadotropin. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§ 522.1160 [Amended]

■ 18. In paragraph (b) of § 522.1160, remove ''057926'' and in its place add ''000061''.

§ 522.2476 [Amended]

■ 19. In paragraph (a)(2) of § 522.2476, remove ''057926'' and in its place add ''000061''.

§ 522.2477 [Amended]

■ 20. In paragraph (b)(2) of § 522.2477, remove ''057926'' and in its place add ''000061''.

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

■ 21. The authority citation for 21 CFR part 558 continues to read as follows:

Authority: 21 U.S.C. 360b, 371.

§ 558.258 [Amended]

■ 22. In paragraph (b) of § 558.258, remove ''057926'' and in its place add ''000061''; and in the tables in paragraphs (e)(1) through (e)(5), in the ''Sponsor'' column, remove ''057926'' where it occurs and in its place add ''000061''.

§ 558.665 [Amended]

■ 23. In paragraph (b) of § 558.665, remove ''057926'' and in its place add ''000061''; and in the table in paragraph (e), in the ''Sponsor'' column, remove ''057926'' where it occurs and in its place add ''000061''.

Dated: November 19, 2009.

Steven D. Vaughn,

Director, Office of New Animal Drug Evaluation, Center for Veterinary Medicine.

BILLING CODE 4160–01–S

DEPARTMENT OF STATE

22 CFR Parts 41 and 42

[Public Notice 6798]

Visas: Documentation of Immigrants and Nonimmigrants—Visa Classification Symbols

AGENCY: State Department.

ACTION: Final rule.

SUMMARY: The Department is amending its regulations to add new classification symbols to the immigrant and nonimmigrant classification tables. This amendment is necessary to implement legislation that created additional immigrant and nonimmigrant classifications as described herein. Additionally, the Department is amending or removing existing classifications that have changed as a result of new legislation or the expiration of legislative provisions that had temporarily authorized them.

DATES: This rule is effective November 25, 2009.

FOR FURTHER INFORMATION CONTACT: Emily C. Cooperman, Legislation and Regulations Division, Visa Services, U.S. Department of State, Washington, DC 20520–0106, phone (202) 663–1203.

SUPPLEMENTARY INFORMATION:

Which new immigrant classification symbol is being added?

A new immigrant classification for qualifying family members of U1 Nonimmigrant Victim of Criminal Activity, adjustment of status cases for: Spouse, SU2; Child, SU3; and Parent, SU5.

What is the background for the new immigrant classifications (SU2, SU3, SU5) for qualifying family members of U1 Nonimmigrants?

Under INA 245(m)(3), upon approval of adjustment of the status of a U1 principal alien, the Secretary of Homeland Security may approve a petition for an immigrant visa for a spouse (SU2), a child (SU3), or in the case of an alien child, a parent (SU5) who did not receive a nonimmigrant visa under section 101(a)(15)(U)(ii) if the Secretary of Homeland Security considers such approval necessary to avoid extreme hardship. To request approval of immigrant visa status for such a relative, the principal alien must file with U.S. Citizenship and Immigration Services (USCIS) a Form I–929, Petition for Qualifying Family Member of a U1 Nonimmigrant. Upon approval of the petition, beneficiaries may apply for an immigrant visa at a visa processing post overseas.

Which immigrant classification is being amended due to new legislation?

Certain Iraqis (and Afghanis) employed by or on behalf of the United States Government in Iraq (and Afghanistan), SQ1; Spouse SQ2 and Child SQ3.

What is the background for the amended immigrant visa classifications SQ1, SQ2, SQ3?

In addition to Iraqis employed by or on behalf of the United States Government in Iraq, section 1244 of Public Law 110–181, section 602(b) of Division F, Title IV, of the Omnibus Appropriations Act, 2009, Public Law 111–8, authorizes SQ1 status for an Afghan national who has been employed by or on behalf of the United States Government in Afghanistan on or after October 7, 2001, for a period of not less than one year; has provided faithful and valuable service to the United States Government, which is documented in a positive recommendation or evaluation from the alien's senior supervisor; has been determined by the Chief of Mission (COM) or the COM's designee to have experienced, or be experiencing an ongoing serious threat as a consequence of the employment by or on behalf of the U.S. Government. Further, the alien must clear a background check and appropriate screening as determined by the Department of Homeland Security, be otherwise eligible to receive an immigrant visa, and be otherwise admissible to the United States for permanent residence, except that, in the determination of such admissibility, the

grounds for inadmissibility specified in INA 212(a)(4) (8 U.S.C. 1182(a)(4)) relating to ''public charge'' shall not apply.

Which nonimmigrant classification symbols are being added?

The new nonimmigrant classification symbols are for: Temporary Commonwealth of the Northern Mariana Islands (CNMI)-only transitional workers (CW1, CW2); and Long-Term Investors in the Commonwealth of the Northern Mariana Islands (E2C).

What is the background for the new nonimmigrant classification (CW1 & CW2) for a CNMI transitional worker?

The Department of Homeland Security (DHS) created a new, temporary, CNMI-only transitional worker classification (CW) in accordance with title VII of the Consolidated Natural Resources Act of 2008 (CNRA), Public Law 110–229, that will be implemented beginning November 28, 2009. The transitional worker program is intended to provide for an orderly transition from the CNMI permit system to the U.S. federal immigration system under the INA. A CW transitional worker is an alien worker who is ineligible for another classification under the INA and who performs services or labor for an employer in the CNMI. The CNRA imposes a five-year transition period before the INA requirements become fully applicable in the CNMI. The new CW classification (CW1 for principal transitional workers and CW2 for dependents) will be in effect for the duration of the transition period, unless extended by the Secretary of Labor.

What is the background for the new nonimmigrant classification (E2C CNMI) for a nonimmigrant investor?

The Department of Homeland Security is amending its regulations governing E2 nonimmigrant treaty investors to establish procedures for classifying long-term investors in the CNMI as E2C nonimmigrants. The DHS rule implements the CNMI nonimmigrant investor visa provisions of the CNRA extending the immigration laws of the United States to the CNMI. Among the CNMI-specific provisions applicable during the five-year transition period is a provision authorizing the Secretary of Homeland Security to classify an alien foreign investor in the CNMI as a CNMI-only E2C nonimmigrant investor under section 101(a)(15)(E)(ii) of the INA. This status is provided upon application of the alien and notwithstanding the treaty requirements otherwise applicable. Eligible investors are those who: were admitted to the CNMI in long-term investor status under CNMI immigration law before the transition program effective date; have continuously maintained residence in the CNMI under long-term investor status; are otherwise admissible to the United States under the INA; and maintain the investment(s) that formed the basis for the CNMI long-term investor status.

Why is the Department amending and removing the age restrictions for the T4 & T5 Nonimmigrant visa classes?

Section 201 of the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008, Public Law 110–457, amended section 101(a)(15)(T)(ii) of the INA to provide for T4 and T5 derivative status for any accompanying or following to join parent or unmarried sibling under the age of 18 of an alien who has been accorded T1 status as a victim of trafficking if the Secretary of Homeland Security determines that the parent or sibling faces a present danger of retaliation as a result of the victim's escape from the severe form of trafficking or cooperation with law enforcement. This provision applies without regard to the age of the T1 principal, and is in addition to existing authority in INA 101(a)(15)(T)(ii)(I) for T4 and T5 status for accompanying or following to join parents and unmarried siblings under age 18 of a principal alien who was under the age of 21 as of the date of the principal's application for T1 status. If the principal alien was under the age of 21 at the time of his or her application for T1 status, the parents and any unmarried sibling under 18 who are accompanying or following to join the principal would be entitled to T4 and T5 classification without a DHS determination that they face a present danger of retaliation.

What Classifications are being removed?

The Nonimmigrant Visa class ''Irish Peace Process Program Participant;'' Q2, and the Spouse or Child of the Q2, Q3.

Why are the Q2 and Q3 Classifications being removed?

Section 1(d) of Public Law 108–449 repealed the ''Irish Peace Process Cultural and Training Program Act of 1998, Public Law 105–319, effective October 1, 2008.

Regulatory Findings

Administrative Procedure Act

This regulation involves a foreign affairs function of the United States and, therefore, in accordance with 5 U.S.C. 553(a)(1), is not subject to the rule making procedures set forth at 5 U.S.C. 553.

Regulatory Flexibility Act/Executive Order 13273: Small Business

Because this final rule is exempt from notice and comment rulemaking under 5 U.S.C. 553, it is exempt from the regulatory flexibility analysis requirements set forth at sections 603 and 604 of the Regulatory Flexibility Act (5 U.S.C. 603 and 604). Nonetheless, consistent with section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), the Department certifies that this rule will not have a significant economic impact on a substantial number of small entities. This regulates individual aliens who seek consideration for immigrant and nonimmigrant visas and does not affect any small entities, as defined in 5 U.S.C. 601(6).

The Unfunded Mandates Reform Act of 1995

Section 202 of the Unfunded Mandates Reform Act of 1995, Public Law 104–4, 109 Stat. 48, 2 U.S.C. 1532, generally requires agencies to prepare a statement before proposing any rule that may result in an annual expenditure of $100 million or more by State, local, or tribal governments, or by the private sector. This rule will not result in any such expenditure, nor will it significantly or uniquely affect small governments.

The Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by 5 U.S.C. 804, for purposes of congressional review of agency rulemaking under the Small Business Regulatory Enforcement Fairness Act of 1996, Public Law 104–121. This rule will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and import markets.

Executive Order 12866

The Department of State has reviewed this rule to ensure its consistency with the regulatory philosophy and principles set forth in Executive Order 12866 and has determined that the benefits of the regulation justify its costs. The Department does not consider the rule to be an economically significant action within the scope of section 3(f)(1) of the Executive Order

since it is not likely to have an annual effect on the economy of $100 million or more or to adversely affect in a material way the economy, a sector of the economy, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities.

Executive Orders 12372 and 13132: Federalism

This regulation will not have substantial direct effects on the States, on the relationship between the national government and the States, or the distribution of power and responsibilities among the various levels of government. Nor will the rule have federalism implications warranting the application of Executive Orders No. 12372 and No. 13132.

Executive Order 12988: Civil Justice Reform

The Department has reviewed the regulations in light of sections 3(a) and 3(b)(2) of Executive Order No. 12988 to eliminate ambiguity, minimize litigation, establish clear legal standards, and reduce burden.

Paperwork Reduction Act

This rule does not impose information collection requirements under the provisions of the Paperwork Reduction Act, 44 U.S.C. Chapter 35.

List of Subjects

22 CFR Part 41

Aliens, Foreign Officials, Immigration, Nonimmigrants, Passports and Visas.

22 CFR Part 42

Immigration, Passports, Visas.

■ For the reasons stated in the preamble, the Department of State amends 22 CFR Parts 41 and 42 as follows:

PART 41—[AMENDED]

■ 1. The authority citation for Part 41 continues to read as follows:

Authority: 8 U.S.C. 1104; Pub. L. 105–277, 112 Stat. 2681–795 through 2681–801.

■ 2. Revise § 41.12 to read as follows:

§ 41.12 Classification symbols.

A visa issued to a nonimmigrant alien within one of the classes described in this section shall bear an appropriate visa symbol to show the classification of the alien. The symbol shall be inserted in the space provided on the visa. The following visa symbols shall be used:

NONIMMIGRANTS

Symbol	Class	Section of law
A1	Ambassador, Public Minister, Career Diplomat or Consular Officer, or Immediate Family.	101(a)(15)(A)(i).
A2	Other Foreign Government Official or Employee, or Immediate Family	101(a)(15)(A)(ii).
A3	Attendant, Servant, or Personal Employee of A1 or A2, or Immediate Family	101(a)(15)(A)(iii).
B1	Temporary Visitor for Business	101(a)(15)(B).
B2	Temporary Visitor for Pleasure	101(a)(15)(B).
B1/B2	Temporary Visitor for Business & Pleasure	101(a)(15)(B).
C1	Alien in Transit	101(a)(15)(C).
C1/D	Combined Transit and Crewmember Visa	101(a)(15)(C) and (D).
C2	Alien in Transit to United Nations Headquarters District Under Sec. 11.(3), (4), or (5) of the Headquarters Agreement.	101(a)(15)(C).
C3	Foreign Government Official, Immediate Family, Attendant, Servant or Personal Employee, in Transit.	212(d)(8).
CW1	Commonwealth of Northern Mariana Islands Transitional Worker	Section 6(d) of Pub. L. 94–241, as added by sec. 702(a) of Pub. L. 110–229.
CW2	Spouse or Child of CW1	Section 6(d) of Pub. L. 94–241, as added by sec. 702(a) of Pub. L. 110–229.
D	Crewmember (Sea or Air)	101(a)(15)(D).
E1	Treaty Trader, Spouse or Child	101(a)(15)(E)(i).
E2	Treaty Investor, Spouse or Child	101(a)(15)(E)(ii).
E2C	Commonwealth of Northern Mariana Islands Investor, Spouse or Child	Section 6(c) of Pub. L. 94–241, as added by sec. 702(a) of Pub. L. 110–229.
E3	Australian Treaty Alien coming to the United States Solely to Perform Services in a Specialty Occupation.	101(a)(15)(E)(iii).
E3D	Spouse or Child of E3	101(a)(15)(E)(iii).
E3R	Returning E3	101(a)(15)(E)(iii).
F1	Student in an academic or language training program	101(a)(15)(F)(i).
F2	Spouse or Child of F1	101(a)(15)(F)(ii).
F3	Canadian or Mexican national commuter student in an academic or language training program.	101(a)(15)(F)(iii).
G1	Principal Resident Representative of Recognized Foreign Government to International Organization, Staff, or Immediate Family.	101(a)(15)(G)(i).
G2	Other Representative of Recognized Foreign Member Government to International Organization, or Immediate Family.	101(a)(15)(G)(ii).
G3	Representative of Nonrecognized or Nonmember Foreign Government to International Organization, or Immediate Family.	101(a)(15)(G)(iii).
G4	International Organization Officer or Employee, or Immediate Family	101(a)(15)(G)(iv).
G5	Attendant, Servant, or Personal Employee of G1 through G4, or Immediate Family.	101(a)(15)(G)(v).
H1B	Alien in a Specialty Occupation (Profession)	101(a)(15)(H)(i)(b).
H1B1	Chilean or Singaporean National to Work in a Specialty Occupation	101(a)(15)(H)(i)(b1).
H1C	Nurse in health professional shortage area	101(a)(15)(H)(i)(c).

Guidance Under Section 2053 Regarding Post-Death Events; Correction

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Correcting amendment.

SUMMARY: This document contains corrections to final regulations (TD 9468) that were published in the **Federal Register** on Tuesday, October 20, 2009 (74 FR 53652) providing guidance relating to the amount deductible from a decedent's gross estate for claims against the estate under section 2053(a)(3) of the Internal Revenue Code.

DATES: This correction is effective on November 25, 2009 and is applicable in taxable years ending on or after October 20, 2009.

FOR FURTHER INFORMATION CONTACT: Karlene M. Lesho, (202) 622–3090 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final regulations that are the subject of this document are under sections 2051 and 2053 of the Internal Revenue Code.

Need for Correction

As published, the final regulations (TD 9468) contain errors that may prove to be misleading and are in need of clarification.

List of Subjects in 26 CFR Part 20

Estate taxes, Reporting and recordkeeping requirements.

Correction of Publication

■ Accordingly, 26 CFR part 20 is corrected by making the following correcting amendments:

PART 20—ESTATE TAX; ESTATES OF DECENDENTS DYING AFTER AUGUST 16, 1954

■ **Paragraph 1.** The authority citation for part 20 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 20.2053–1 is amended by revising the third sentence of paragraph (d)(7) *Example 3* to read as follows:

§ 20.2053–1 Deduction for expenses, indebtedness, and taxes; in general.

* * * * *

(d) * * *

(7) * * *

Example 3. * * * Instead, pursuant to the protective claim for refund filed by E, the marital deduction will be reduced by the claim once a final judgment is entered in the case. * * *

* * * * *

■ **Par. 3.** Section 20.2053–4 is amended by revising the last sentence of paragraph (d)(3) to read as follows.

§ 20.2053–4 Deduction for claims against the estate.

* * * * *

(d) * * *

(3) * * * See further § 20.2053–1(d)(3).

Agreements for Payment of Tax Liabilities in Installments

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the payment of tax liabilities in installments. The regulations reflect changes to the law made by the Taxpayer Bill of Rights II, the Internal Revenue Service Restructuring and Reform Act of 1998, and the American Jobs Creation Act of 2004. The regulations will affect taxpayers submitting installment agreements to the IRS.

DATES: *Effective Date:* These regulations are effective on November 25, 2009.

Applicability Date: For the date of applicability, *see* § 301.6159(k).

FOR FURTHER INFORMATION CONTACT: Walter Ryan, (202) 622–3620 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains amendments to the Procedure and Administration Regulations (26 CFR part 301) under section 6159 of the Internal Revenue Code (Code). Section 6159 allows the IRS to enter into agreements for the payment of any unpaid tax in installments. Taxpayers may request administrative review of IRS decisions to terminate installment agreements pursuant to section 6159(e), added to the Code by section 202 of the Taxpayer Bill of Rights II, Public Law 104–168 (110 Stat. 1452, 1457 (1996)). Taxpayers may appeal rejections of proposed installment agreements under section 7122(e), added to the Code by section 3462 of Internal Revenue Service Restructuring and Reform Act of 1998 (RRA 98), Public Law 105–206 (112 Stat. 685, 764 (1998)). Section 6159(c), added to the Code by section 3467 of RRA 1998, requires the IRS to accept a proposed installment agreement for income taxes under certain circumstances. Section 3506 of RRA 1998 requires the IRS to send each taxpayer with an installment agreement an annual statement showing the balance due at the beginning of the year, the payments made during the year, and the remaining balance due at the end of the year.

Section 843 of the American Jobs Creation Act of 2004 (AJCA), Public Law 108–357 (118 Stat. 1418, 1600 (2004)), amended section 6159(a) to allow the IRS to enter into installment agreements that provide for partial (as well as full) payment of a tax liability, but excludes partial payment installment agreements from the scope of installment agreements that must be accepted by the IRS. Section 843 of the AJCA also added new section 6159(d), requiring the IRS to review partial payment installment agreements every two years. The primary purpose of the review is to determine whether the financial condition of the taxpayer has significantly changed so as to warrant an increase in the value of the payments being made. *See* H. Rep. No. 108–755, 108th Cong., 2d Sess., 2005 U.S.C.C.A.N. 1341 (October 7, 2004).

On March 5, 2007, a notice of proposed rulemaking (REG–100841–97; 72 FR 9712) was published in the **Federal Register**. The proposed regulations reflected the changes made to section 6159 by the Taxpayer Bill of Rights II, the RRA 98, and the AJCA. The proposed regulations reflected current IRS administrative practice. The IRS received one set of written comments with numerous recommendations. No public hearing was requested or held. After consideration of the comments, the proposed regulations are adopted as revised by this Treasury decision.

Summary of Comments and Explanation of Revisions

The final regulations adopt certain recommendations contained in the comments by clarifying two provisions of the proposed regulations. As explained in this preamble, § 301.6159–1(e)(3) was amended to clarify that the taxpayer may submit a request to modify or terminate the installment agreement. Section 301.6159–1(e)(3) further clarifies that such a request will not suspend the statute of limitations on collection and the taxpayer must comply with the existing installment agreement while the request is being considered. As also explained in this preamble, § 301.6159–1(e)(1)(i) clarifies that the IRS may terminate an installment agreement if the taxpayer provides materially incomplete or inaccurate information in response to an IRS request for a financial update.

The following is a section-by-section analysis of the comments.

Section 301.6159–1(b): Procedures for Submission and Consideration of Proposed Installment Agreements

Section 301.6159–1(b) of the proposed regulations provided that an installment agreement request must be submitted according to procedures prescribed by the IRS. It did not require the IRS to accept or reject the request within a specific time frame. The commenter proposed to limit the IRS's time to consider an installment agreement to 90 days; if the IRS fails to act in that time, the agreement would be granted automatically. The commenter reasoned that the limited time frame would benefit the IRS because more installments agreements would be automatically allowed, thereby increasing revenues, and would benefit the taxpayer by allowing payments to begin quickly and efficiently. The recommendation was not adopted for two reasons. First, the IRS already grants installment agreements quickly and automatically in the vast majority of

cases. If the taxpayer owes less than $25,000 and offers to pay the liabilities in full within 5 years, the agreement can be granted automatically under the IRS's ''streamlined'' installment agreement procedures. *See* Internal Revenue Manual 5.14.5.2 at *http://www.irs.gov/irm/part5/irm_05-014-005.html.* The IRS granted over 2.62 million installment agreements in fiscal year 2008, of which over 2.51 million were granted through the IRS's streamlined procedures. In cases that do not meet the streamlined criteria, the IRS has determined that a more detailed review of the taxpayer's financial situation is warranted. Second, the IRS generally responds to non-streamlined installment agreement requests in a timely manner. During the filing season, however, inventory fluctuations may cause delays. The automatic allowance of installment agreements in such cases would not be appropriate.

Proposed § 301.6159–1(b)(2) provided that an installment agreement request becomes pending when it is accepted for processing. The commenter recommended that the IRS send an automatically-generated response acknowledging the date of acceptance for processing to the taxpayer and the taxpayer's representative. This recommendation was not adopted. The vast majority of installment agreements are streamlined agreements, which the IRS accepts very quickly. The IRS will, however, consider adopting an administrative procedure for the minority of cases where it anticipates a time lag between acceptance for processing and the acceptance or rejection of the installment agreement.

Proposed § 301.6159–1(b)(2) also provided that if an installment agreement request does not contain sufficient information to permit the IRS to evaluate whether the request should be accepted, the IRS will request the needed information. The commenter recommended that all requests for additional information should be reasonably necessary. The proposed regulations already address this recommendation by directing that requests be for ''needed'' information.

Proposed § 301.6159–1(b)(3) allowed a taxpayer to submit a good faith revision of a rejected installment agreement request within 30 days of rejection. The commenter recommended that the time for taxpayers to submit a good faith revision should be extended to 60 days because taxpayers often have difficulty obtaining the necessary documents within 30 days. This recommendation was not adopted. The recommendation would apply to a small number of installment agreement requests that are not accepted under the IRS's streamlined procedures. In these cases, the IRS requests the information necessary for a financial analysis before rejecting the installment agreement request. *See* Internal Revenue Manual 5.15.1.6 at *http://www.irs.gov/irm/part5/irm_05-015-001.html.* Allowing 60 days following the rejection would encourage untimely responses and delay case resolution.

Section 301.6159–1(c): Acceptance, Form, and Terms of Installment Agreements

Section 301.6159–1(c)(1) of the proposed regulations provided that an installment agreement request has not been accepted until the IRS notifies the taxpayer or the taxpayer's representative of the acceptance. Section 6159(a) requires that an installment agreement be in writing, and proposed § 301.6159–1(c)(2) provided that the writing may take the form of a document signed by the taxpayer and the IRS or the written confirmation of an agreement entered into by the taxpayer and the IRS that is mailed or personally delivered to the taxpayer. The commenter recommended that the IRS's notification of the acceptance or rejection of a proposed installment agreement also be directed to the taxpayer's representative and include the terms of the agreement and payment submission information. These recommendations were not adopted in the regulations because they are more appropriately addressed in the IRS's procedures. The IRS currently does, however, provide written notification to the taxpayer and the taxpayer's representative of the acceptance or rejection of an installment agreement and the suggested information.

The commenter was concerned that the IRS intended to change its streamlined procedures and recommended that the procedures be retained. The commenter was also concerned that proposed § 301.6159–1(c)(3)(iii)(A) may represent a departure from the IRS's current policy that limits the acceptance of extensions of the collection statute of limitations in connection with installment agreements to the narrow subset of partial payment installment agreements in which the liability will not be paid in full under the agreement before the collection statute expires. As stated in the preamble to the notice of proposed rulemaking, the regulations were intended to reflect existing practices. The regulations will have no effect on the IRS's streamlined procedures or its policy with regard to waivers of the collection statute.

The commenter stated that the proposed regulations did not explain the inclusion of § 301.6159–1(c)(3)(ii), which provided that an installment agreement may, by its terms, end upon the expiration of the period of limitations on collection, or at some prior date. As explained in the preamble to the proposed regulations, this provision clarifies that the IRS may enter into partial payment installment agreements that end upon the running of the collection statute, or that end prior to that time so that the IRS may collect the balance of the tax liability against any property belonging to the taxpayer before the collection period expires. The IRS does not currently enter into partial payment installment agreements that expire before the end of the collection statute and has no plans to do so routinely in the future.

Proposed § 301.6159–1(c)(3)(v) provided that while an installment agreement is in effect, the IRS may request a financial condition update from the taxpayer at any time. The commenter recommended that the IRS be permitted to request only one financial condition update per year. This recommendation was not adopted. The IRS very rarely requests updates more than once a year. In certain rare circumstances, more frequent updates may be appropriate, such as when the IRS has reason to believe that the taxpayer's financial condition has improved.

Section 301.6159–1(d): Rejection of a Proposed Installment Agreement

Section 301.6159–1(d)(2) of the proposed regulations provided that the IRS may not notify a taxpayer or the taxpayer's representative of the rejection of an installment agreement until an independent review of proposed rejection is completed. The commenter was concerned that the proposed regulations did not provide any guidance as to how the independent administrative review will be assured. The commenter recommended that the review be undertaken by an IRS office located in a different territory. The recommendation was not adopted. Managers in the IRS offices in San Jose, California, and Jacksonville, Florida, supervise employees throughout the United States who review rejected installment agreements. An independent review is assured by assigning these cases to an employee who has no prior involvement in the case and who reports to a supervisor in either of these two offices.

The commenter recommended that the determination that the taxpayer did not submit a good faith revision be

subject to independent administrative review. This recommendation was not adopted because it would delay case resolution and would, in effect, treat requests that were not made in good faith as valid requests. The commenter also recommended that the rejection of revisions that were made in good faith receive independent review. The proposed regulation already provided for this review. Proposed § 301.6159–1(b) stated that if the IRS determines that the taxpayer made a good faith revision within 30 days of the rejection, the provisions of § 301.6159–1 apply to the revised proposal.

Proposed § 301.6159–1(d)(3) provided that a taxpayer may appeal the rejection of an installment agreement request within 30 days of the rejection. The commenter recommended that the 30-day period be tolled while a revised proposal of a rejected request is being evaluated so that the taxpayer would not have to file an appeal while the revision is under consideration. This recommendation was not adopted. The IRS's procedures are designed to allow a quick resolution of the taxpayer's request; tolling the appeal period would add an unneeded layer of complexity to the process and delay case resolution. The commenter also recommended that the IRS provide more definitive guidance as to what qualifies as a good faith revision. This recommendation was not adopted because this guidance is more appropriately left to the IRS procedures.

Section 301.6159–1(e): Modification or Termination of Installment Agreements by the Internal Revenue Service

Proposed § 301.6159–1(e)(2)(i) provided that the IRS may modify or terminate an installment agreement if the IRS determines that the financial condition of the taxpayer has significantly changed. Proposed § 301.6159–1(c)(3)(vi) provided that the IRS and the taxpayer may agree to modify or terminate an installment agreement or may agree to a new installment agreement that supersedes the existing agreement. The commenter recommended that the regulations explicitly allow taxpayers to request a modification or termination of an existing installment agreement, as was stated in existing § 301.6159–1(c)(3). This clarification was adopted in § 301.6159–1(e)(3).

The commenter recommended that the regulations require the taxpayer to comply with the terms of an installment agreement while a request for modification is being considered and that a proposed modification will not result in a suspension of the statute of limitations on collection. These clarifications were also adopted in § 301.6159–1(e)(3).

The commenter recommended that a taxpayer's request to modify an existing installment agreement should be exempt from user fees under regulations §§ 300.1 and 300.2. This recommendation was not adopted because user fees are outside the scope of this regulation project.

Proposed § 301.6159–1(e)(2)(ii)(C) provided that the IRS may modify or terminate an installment agreement if the taxpayer fails to provide a financial condition update requested by the IRS. The commenter recommended that the regulations provide explicitly whether the IRS may terminate an installment agreement if the taxpayer provided materially inaccurate or incomplete information. This recommendation was adopted. Section 301.6159–1(e)(1)(i) was revised to clarify that the IRS may terminate an installment agreement if the taxpayer provided materially inaccurate or incomplete information in connection with a requested financial update.

Proposed § 301.6159–1(e)(3) provided that the IRS will generally notify the taxpayer in writing at least 30 days prior to terminating an installment agreement and describe the reason for the termination, after which the taxpayer may provide information showing that the IRS's reason is incorrect. Proposed § 301.6159–1(e)(4) provided for the administrative appeal of the modification or termination of an installment agreement to the Office of Appeals if the request is properly made within 30 days after the termination or modification is to take effect. The commenter recommended that the regulations clarify that an appeal should be made to the Office of Appeals within 30 days after the modification or termination will take effect, regardless of whether the taxpayer submits additional information under § 301.6159–1(e)(3), has filled out Form 9423, ''Collection Appeal Request,'' or has requested a meeting with a Collection Manager. This recommendation was not adopted in the regulations because it is more appropriately addressed in IRS forms and procedures.

Proposed § 301.6159–1(e)(4) provided, in part, that the taxpayer may administratively appeal the modification or termination of an installment agreement to the Office of Appeals. The commenter recommended that the taxpayer be allowed to appeal the IRS's determination not to modify an installment agreement. This recommendation was not adopted. The IRS routinely grants taxpayer modification requests that result in agreements within the streamlined criteria. *See* Internal Revenue Manual 5.19.1.5.4.24 at *http://www.irs.gov/irm/part5/irm_05-019-001.html.* Taxpayers do not have a statutory right to appeal rejected modification requests, and the IRS has not determined there is a need for additional administrative review of the denial of a modification request.

Section 301.6159–1(f): Effect of Installment Agreement or Pending Installment Agreement on Collection Activity

Section 301.6159–1(f)(1) of the proposed regulations stated that the IRS may not levy during the time an installment agreement is pending. Proposed § 301.6159–1(f)(2) stated that levy is not prohibited if an installment agreement request was made solely to delay collection. The commenter recommended that the solely to delay collection standard in the proposed regulations be replaced with language that references the ''frivolous submission'' standard in section 6702(b) of the Code. This recommendation was not adopted. Under existing IRS procedures, an installment agreement is returned as made solely to delay collection when there is no economic reality to the request, the request fails to address changes previously requested by the IRS in response to a prior request, the request ignores direction provided by revenue officers, the request is made by a taxpayer that has defaulted prior installment agreements, or the request is made at a time that causes it to be classified as a request made to delay enforcement action. *See* Internal Revenue Manual 5.14.3.2 at *http://www.irs.gov/irm/part5/irm_05-014-003.html.* Section 6702(b) imposes a $5,000 penalty for installment agreement requests that reflect a desire to delay or impede the administration of the Federal tax laws, and the IRS has not yet developed procedures defining the kinds of installment agreements that constitute frivolous submissions. The standard in section 6702(b) therefore may not be an appropriate standard for identifying those installment agreements that fail to qualify for the prohibition against levy.

In the alternative, the commenter recommended that the regulations state that a taxpayer may appeal the IRS's levy action when the IRS determines that an installment agreement request was made solely to delay collection, and that damages may be appropriate under section 7433 of the Code. These recommendations were not adopted. Taxpayers' rights to appeal proposed

levies and seek damages are provided for in the regulations under sections 6330 and 7433 of the Code, respectively.

Section 301.6159–1(g): Suspension of the Statute of Limitations on Collection

Section 301.6159–1(g) of the proposed regulations provided that the statute of limitations on collection under section 6502 of the Code is suspended for the period that a proposed installment agreement is pending, plus 30 days following a rejection, and during any appeal. The commenter recommended that the regulations clearly define when an installment agreement is pending. This recommendation is already addressed by proposed § 301.6159–1(b)(2), which provides a detailed explanation of when an installment agreement is pending.

Section 301.6159–1(h): Annual Statement

Section 301.6159–1(h) of the proposed regulations requires the IRS to provide taxpayers with an annual statement setting forth the balance owed at the beginning of the year, the payments made during the year, and the remaining balance at the end of the year. The commenter recommends that the annual statement be as clear as possible and that the IRS provide the taxpayer with a single annual statement describing all tax liabilities covered by the agreement. Currently, the IRS sends an annual statement for each separate liability covered by an installment agreement. No change was made to the final regulations because this recommendation is more appropriately addressed when the IRS updates the forms used for the annual statements.

Section 301.6159–1(i): Biennial Review of Partial Payment Installment Agreements

Section 301.6159–1(i) of the proposed regulations required the IRS to perform a review of the taxpayer's financial condition at least once every two years in cases of partial payment installment agreements. The proposed regulations also stated that the purpose of the review was to determine whether an increase in payments is warranted. The commenter recommended that § 301.6159–1(i) be rephrased to provide that the biennial review of a taxpayer's financial condition may result in a decrease, as well as an increase, in the amount of payments being made. This recommendation was not adopted. While taxpayers may request a decrease in the amount of payments due under an installment agreement, the IRS does not have the information to unilaterally make that determination. The automatic biennial review done by the IRS does not, in every case, result in a request for updated financial information. As explained above, taxpayers may request that their payments be lowered if their financial condition has worsened.

Section 301.6159–1(k): Effective/Applicability Date

Section 301.6159–1(k) of the proposed regulations provided that the effective date of the final regulations would be the date the final regulations are published in the **Federal Register**. The commenter was concerned about how previously proposed or accepted installment agreements will be affected by the regulations and recommended that the effective date of paragraphs (b), (c), and (d) apply prospectively. This recommendation was not adopted. As explained earlier and in the preamble to the proposed regulations, the regulations substantially reflect existing practices. The regulations will therefore have no effect on previously proposed or accepted installment agreements.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because the regulations do not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Code, the proposed regulations preceding these regulations were submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Drafting Information

The principal author of these regulations is Walter Ryan, Office of Associate Chief Counsel (Procedure and Administration).

Adoption of Amendments to the Regulations

■ Accordingly, 26 CFR part 301 is amended as follows:

PART 301—PROCEDURE AND ADMINISTRATION

■ **Paragraph 1.** The authority citation for part 301 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 301.6159–0 is added to read as follows:

§ 301.6159–0 Table of contents.

This section lists the major captions that appear in the regulations under § 301.6159–1.

§ 301.6159–1 Agreements for the payment of tax liabilities in installments.

(a) Authority.
(b) Procedures for submission and consideration of proposed installment agreements.
(c) Acceptance, form, and terms of installment agreements.
(d) Rejection of a proposed installment agreement.
(e) Modification or termination of installment agreements by the Internal Revenue Service.
(f) Effect of installment agreement or pending installment agreement on collection activity.
(g) Suspension of the statute of limitations on collection.
(h) Annual statement.
(i) Biennial review of partial payment installment agreements.
(j) Cross reference.
(k) Effective/applicability date.

■ **Par. 3.** Section 301.6159–1 is revised to read as follows:

§ 301.6159–1 Agreements for payment of tax liabilities in installments.

(a) *Authority.* The Commissioner may enter into a written agreement with a taxpayer that allows the taxpayer to make scheduled periodic payments of any tax liability if the Commissioner determines that such agreement will facilitate full or partial collection of the tax liability.

(b) *Procedures for submission and consideration of proposed installment agreements*—(1) *In general.* A proposed installment agreement must be submitted according to the procedures, and in the form and manner, prescribed by the Commissioner.

(2) *When a proposed installment agreement becomes pending.* A proposed installment agreement becomes pending when it is accepted for processing. The Internal Revenue Service (IRS) may not accept a proposed installment agreement for processing following reference of a case involving the liability that is the subject of the proposed installment agreement to the Department of Justice for prosecution or

defense. The proposed installment agreement remains pending until the IRS accepts the proposal, the IRS notifies the taxpayer that the proposal has been rejected, or the proposal is withdrawn by the taxpayer. If a proposed installment agreement that has been accepted for processing does not contain sufficient information to permit the IRS to evaluate whether the proposal should be accepted, the IRS will request the taxpayer to provide the needed additional information. If the taxpayer does not submit the additional information that the IRS has requested within a reasonable time period after such a request, the IRS may reject the proposed installment agreement.

(3) *Revised proposals of installment agreements submitted following rejection.* If, following the rejection of a proposed installment agreement, the IRS determines that the taxpayer made a good faith revision of the proposal and submitted the revision within 30 days of the date of rejection, the provisions of this section shall apply to that revised proposal. If, however, the IRS determines that a revision was not made in good faith, the provisions of this section do not apply to the revision and the appeal period in paragraph (d)(3) of this section continues to run from the date of the original rejection.

(c) *Acceptance, form, and terms of installment agreements*—(1) *Acceptance of an installment agreement*—(i) *In general.* A proposed installment agreement has not been accepted until the IRS notifies the taxpayer or the taxpayer's representative of the acceptance. Except as provided in paragraph (c)(1)(iii) of this section, the Commissioner has the discretion to accept or reject any proposed installment agreement.

(ii) *Acceptance does not reduce liabilities.* The acceptance of an installment agreement by the IRS does not reduce the amount of taxes, interest, or penalties owed. (However, penalties may continue to accrue at a reduced rate pursuant to section 6651(h).)

(iii) *Guaranteed installment agreements.* In the case of a liability of an individual for income tax, the Commissioner shall accept a proposed installment agreement if, as of the date the individual proposes the installment agreement—

(A) The aggregate amount of the liability (not including interest, penalties, additions to tax, and additional amounts) does not exceed $10,000;

(B) The taxpayer (and, if the liability relates to a joint return, the taxpayer's spouse) has not, during any of the preceding five taxable years—

(*1*) Failed to file any income tax return;

(*2*) Failed to pay any required income tax; or

(*3*) Entered into an installment agreement for the payment of any income tax;

(C) The Commissioner determines that the taxpayer is financially unable to pay the liability in full when due (and the taxpayer submits any information the Commissioner requires to make that determination);

(D) The installment agreement requires full payment of the liability within three years; and

(E) The taxpayer agrees to comply with the provisions of the Internal Revenue Code for the period the agreement is in effect.

(2) *Form of installment agreements.* An installment agreement must be in writing. A written installment agreement may take the form of a document signed by the taxpayer and the Commissioner or a written confirmation of an agreement entered into by the taxpayer and the Commissioner that is mailed or personally delivered to the taxpayer.

(3) *Terms of installment agreements.* (i) Except as otherwise provided in this section, an installment agreement is effective from the date the IRS notifies the taxpayer or the taxpayer's representative of its acceptance until the date the agreement ends by its terms or until it is superseded by a new installment agreement.

(ii) By its terms, an installment agreement may end upon the expiration of the period of limitations on collection in section 6502 and § 301.6502–1, or at some prior date.

(iii) As a condition to entering into an installment agreement with a taxpayer, the Commissioner may require that—

(A) The taxpayer agree to a reasonable extension of the period of limitations on collection; and

(B) The agreement contain terms that protect the interests of the Government.

(iv) Except as otherwise provided in an installment agreement, all payments made under the installment agreement will be applied in the best interests of the Government.

(v) While an installment agreement is in effect, the Commissioner may request, and the taxpayer must provide, a financial condition update at any time.

(vi) At any time after entering into an installment agreement, the Commissioner and the taxpayer may agree to modify or terminate an installment agreement or may agree to a new installment agreement that supersedes the existing agreement.

(d) *Rejection of a proposed installment agreement*—(1) *When a proposed installment agreement becomes rejected.* A proposed installment agreement has not been rejected until the IRS notifies the taxpayer or the taxpayer's representative of the rejection, the reason(s) for rejection, and the right to an appeal.

(2) *Independent administrative review.* The IRS may not notify a taxpayer or taxpayer's representative of the rejection of an installment agreement until an independent administrative review of the proposed rejection is completed.

(3) *Appeal of rejection of a proposed installment agreement.* The taxpayer may administratively appeal a rejection of a proposed installment agreement to the IRS Office of Appeals (Appeals) if, within the 30-day period commencing the day after the taxpayer is notified of the rejection, the taxpayer requests an appeal in the manner provided by the Commissioner.

(e) *Modification or termination of installment agreements by the Internal Revenue Service*—(1) *Inadequate information or jeopardy.* The Commissioner may terminate an installment agreement if the Commissioner determines that—

(i) Information which was provided to the IRS by the taxpayer or the taxpayer's representative in connection with either the granting of the installment agreement or a request for a financial update was inaccurate or incomplete in any material respect; or

(ii) Collection of any liability to which the installment agreement applies is in jeopardy.

(2) *Change in financial condition, failure to timely pay an installment or another Federal tax liability, or failure to provide requested financial information.* The Commissioner may modify or terminate an installment agreement if—

(i) The Commissioner determines that the financial condition of a taxpayer that is party to the agreement has significantly changed; or

(ii) A taxpayer that is party to the installment agreement fails to—

(A) Timely pay an installment in accordance with the terms of the installment agreement;

(B) Pay any other Federal tax liability when the liability becomes due; or

(C) Provide a financial condition update requested by the Commissioner.

(3) *Request by taxpayer.* Upon request by a taxpayer that is a party to the installment agreement, the Commissioner may terminate or modify the terms of an installment agreement if the Commissioner determines that the

financial condition of the taxpayer has significantly changed. The taxpayer's request will not suspend the statute of limitations under section 6502 for collection of any liability. While the Commissioner is considering the request, the taxpayer shall comply with the terms of the existing installment agreement.

(4) *Notice.* Unless the Commissioner determines that collection of the tax is in jeopardy, the Commissioner will notify the taxpayer in writing at least 30 days prior to modifying or terminating an installment agreement pursuant to paragraph (e)(1) or (2) of this section. The notice provided pursuant to this section must briefly describe the reason for the intended modification or termination. Upon receiving notice, the taxpayer may provide information showing that the reason for the proposed modification or termination is incorrect.

(5) *Appeal of modification or termination of an installment agreement.* The taxpayer may administratively appeal the modification or termination of an installment agreement to Appeals if, following issuance of the notice required by paragraph (e)(4) of this section and prior to the expiration of the 30-day period commencing the day after the modification or termination is to take effect, the taxpayer requests an appeal in the manner provided by the Commissioner.

(f) *Effect of installment agreement or pending installment agreement on collection activity*—(1) *In general.* No levy may be made to collect a tax liability that is the subject of an installment agreement during the period that a proposed installment agreement is pending with the IRS, for 30 days immediately following the rejection of a proposed installment agreement, during the period that an installment agreement is in effect, and for 30 days immediately following the termination of an installment agreement. If, prior to the expiration of the 30-day period following the rejection or termination of an installment agreement, the taxpayer appeals the rejection or termination decision, no levy may be made while the rejection or termination is being considered by Appeals. This section will not prohibit levy to collect the liability of any person other than the person or persons named in the installment agreement.

(2) *Exceptions.* Paragraph (f)(1) of this section shall not prohibit levy if the taxpayer files a written notice with the IRS that waives the restriction on levy imposed by this section, the IRS determines that the proposed installment agreement was submitted solely to delay collection, or the IRS determines that collection of the tax to which the installment agreement or proposed installment agreement relates is in jeopardy.

(3) *Other actions by the IRS while levy is prohibited*—(i) *In general.* The IRS may take actions other than levy to protect the interests of the Government with regard to the liability identified in an installment agreement or proposed installment agreement. Those actions include, for example—

(A) Crediting an overpayment against the liability pursuant to section 6402;

(B) Filing or refiling notices of Federal tax lien; and

(C) Taking action to collect from any person who is not named in the installment agreement or proposed installment agreement but who is liable for the tax to which the installment agreement relates.

(ii) *Proceedings in court.* Except as otherwise provided in this paragraph (f)(3)(ii), the IRS will not refer a case to the Department of Justice for the commencement of a proceeding in court, against a person named in an installment agreement or proposed installment agreement, if levy to collect the liability is prohibited by paragraph (f)(1) of this section. Without regard to whether a person is named in an installment agreement or proposed installment agreement, however, the IRS may authorize the Department of Justice to file a counterclaim or third-party complaint in a refund action or to join that person in any other proceeding in which liability for the tax that is the subject of the installment agreement or proposed installment agreement may be established or disputed, including a suit against the United States under 28 U.S.C. 2410. In addition, the United States may file a claim in any bankruptcy proceeding or insolvency action brought by or against such person. If a person named in an installment agreement is joined in a proceeding, the United States obtains a judgment against that person, and the case is referred back to the IRS for collection, collection will continue to occur pursuant to the terms of the installment agreement. Notwithstanding the installment agreement, any claim or suit permitted will be for the full amount of the liabilities owed.

(g) *Suspension of the statute of limitations on collection.* The statute of limitations under section 6502 for collection of any liability shall be suspended during the period that a proposed installment agreement relating to that liability is pending with the IRS, for 30 days immediately following the rejection of a proposed installment agreement, and for 30 days immediately following the termination of an installment agreement. If, within the 30 days following the rejection or termination of an installment agreement, the taxpayer files an appeal with Appeals, the statute of limitations for collection shall be suspended while the rejection or termination is being considered by Appeals. The statute of limitations for collection shall continue to run if an exception under paragraph (f)(2) of this section applies and levy is not prohibited with respect to the taxpayer.

(h) *Annual statement.* The Commissioner shall provide each taxpayer who is party to an installment agreement under this section with an annual statement setting forth the initial balance owed at the beginning of the year, the payments made during the year, and the remaining balance as of the end of the year.

(i) *Biennial review of partial payment installment agreements.* The Commissioner shall perform a review of the taxpayer's financial condition in the case of a partial payment installment agreement at least once every two years. The purpose of this review is to determine whether the taxpayer's financial condition has significantly changed so as to warrant an increase in the value of the payments being made or termination of the agreement.

(j) *Cross reference.* Pursuant to section 6601(b)(1), the last day prescribed for payment is determined without regard to any installment agreement, including for purposes of computing penalties and interest provided by the Internal Revenue Code. For special rules regarding the computation of the failure to pay penalty while certain installment agreements are in effect, *see* section 6651(h) and § 301.6651–1(a)(4).

(k) *Effective/applicability date.* This section is applicable on November 25, 2009.

■ **Par. 4.** Section 301.6331–4, paragraph (d) is revised and paragraph (e) is added to read as follows:

§ 301.6331–4 Restrictions on levy while installment agreements are pending or in effect.

* * * * *

(d) *Cross-reference.* For provisions relating to the making of levies while an installment agreement is pending or in effect, *see* § 301.6159–1.

(e) *Effective/applicability date.* Paragraphs (a), (b), and (c) are applicable beginning December 18, 2002. Paragraph (d) is applicable beginning November 25, 2009.

Approved: November 11, 2009.

Steven T. Miller,

Deputy Commissioner of Services and Enforcement.

Approved: November 11, 2009.

Michael F. Mundaca,

Acting Assistant Secretary of the Treasury (Tax Policy).

BILLING CODE 4830–01–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR Parts 7 and 75

RIN 1219–AB58

Refuge Alternatives for Underground Coal Mines

AGENCY: Mine Safety and Health Administration (MSHA), Labor.

ACTION: Final rule; correction.

SUMMARY: This rule informs the mining community that MSHA rescinds the Agency's intent stated in the preamble to the final rule on Refuge Alternatives for Underground Coal Mines, concerning preemption of private tort litigation with respect to the Agency's approval of specifications for a refuge alternative.

DATES: *Effective Date:* November 25, 2009.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances, MSHA, 1100 Wilson Boulevard, Room 2350, Arlington, Virginia 22209–3939. Ms. Silvey can be reached at 202–693–9440 (voice), 202–693–9441 (facsimile), or *silvey.patricia@dol.gov* (Internet e-mail).

SUPPLEMENTARY INFORMATION: On December 31, 2008, MSHA published a final rule on Refuge Alternatives for Underground Coal Mines. (73 FR 80656). The preamble includes a discussion on preemption, and states that ''it is MSHA's intent that its approval of specifications for a refuge alternative preempts private tort litigation questioning the propriety of those specifications.'' (73 FR 80658).

On May 20, 2009, the President issued a Memorandum for the Heads of Executive Departments and Agencies on Preemption. The purpose of the Memorandum is to state the general policy of the Administration that preemption of State law by executive departments and agencies should be undertaken only with full consideration of the legitimate prerogatives of the States and with a sufficient legal basis for preemption. The Memorandum directs executive departments and agencies to ''review regulations issued within the past 10 years that contain statements in regulatory preambles or codified provisions intended by the department or agency to preempt State law, in order to decide whether such statements or provisions are justified under applicable legal principles governing preemption.'' In addition, the memorandum states that ''where the head of a department or agency determines that a regulatory statement of preemption or codified regulatory provision cannot be so justified, the head of that department or agency should initiate appropriate action, which may include amendment of the relevant regulation.''

Section 506(b) of the Federal Mine Safety and Health Act of 1977 (Mine Act), concerning ''Effect on State Laws,'' specifically addresses preemption of state law as follows:

> The provisions of any State law or regulation in effect upon the operative date of this Act, or which may become effective thereafter, which provide for more stringent health and safety standards applicable to coal or other mines than do the provisions of this Act or any order issued or any mandatory health or safety standard shall not thereby be construed or held to be in conflict with this Act. 30 U.S.C. 955.

In addition, the House Report to the Mine Act, states that ''Federal law would supersede any State law in conflict with it,'' but that ''State laws providing more stringent standards than exist under the Federal law, however, would not be held in conflict with the [Mine] act.'' H. Rep. No. 95–312, 95th Cong., 1st Sess., at 55 (1977).

In accordance with the Presidential Memorandum on Preemption, MSHA has reviewed the Agency's standards and regulations issued within the past 10 years. MSHA's review found that a statement in the preamble to the Refuge Alternatives final rule is the only rule issued in the past 10 years to contain a preemption statement.

MSHA has determined that the Mine Act does not show any basis, or Congressional intent, for inferring any attempt to preempt state tort law regarding MSHA's approval specifications for refuge alternatives. As stated earlier, the Mine Act provides, for example, that State laws or regulations that provide more stringent requirements than those imposed under the Mine Act, are not construed or held to be in conflict with the Mine Act. MSHA's determination to rescind the preemption statement in the preamble to the Refuge Alternatives rule is consistent with the intent of the Mine Act and is consistent with the Presidential Memorandum. The preemption statement in the preamble was, at best, interpretive guidance purporting to interpret statutory language in the Mine Act, which was included in the preamble of the final rule without seeking prior public comment. It did not create any new law or substantive rule, but simply stated what the agency thought the statute meant. Further, this interpretation was published only recently, making it unlikely that any member of MSHA's regulated community has relied to their detriment on the interpretation. Under these circumstances, notice and comment also are not required in withdrawing this interpretation. *See Warshauer* v. *Solis,* 577 F.3d 1330 (11th Cir. 2009); *MetWest, Inc.* v. *Sec'y of Labor,* 560 F.3d 506, 509–511 (DC Cir. 2009).

Accordingly, MSHA rescinds the last paragraph of the section-by-section discussion of ''Section 7.501 Purpose and Scope,'' starting on line 51 of the center column and ending on line 24 of the third column, 73 FR 80658, for the reason that this statement is not justified under the Mine Act principles governing preemption, and there was no intent by Congress, under the Mine Act, to supersede state action in this regard.

Dated: November 19, 2009.

Joseph A. Main,

Assistant Secretary for Mine Safety and Health.

BILLING CODE 4510–43–P

POSTAL REGULATORY COMMISSION

39 CFR Part 3020

[Docket Nos. MC2010–2 and CP2010–2; Order No. 324]

New Postal Product

AGENCY: Postal Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Commission is adding the Priority Mail Contract 20 to the Competitive Product List. This action is consistent with changes in a recent law governing postal operations. Republication of the lists of market dominant and competitive products is also consistent with new requirements in the law.

DATES: Effective November 25, 2009 and is applicable beginning October 28, 2009.

FOR FURTHER INFORMATION CONTACT: Stephen L. Sharfman, General Counsel,

202–789–6820 or *stephen.sharfman@prc.gov.*

SUPPLEMENTARY INFORMATION: *Regulatory History,* 74 FR 54598 (October 22, 2009).

I. Introduction
II. Background
III. Comments
IV. Commission Analysis
V. Ordering Paragraphs

I. Introduction

The Postal Service seeks to add a new product identified as Priority Mail Contract 20 to the Competitive Product List. For the reasons discussed below, the Commission approves the Request.

II. Background

On October 14, 2009, the Postal Service filed a formal request pursuant to 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.* to add Priority Mail Contract 20 to the Competitive Product List.[1] The Postal Service asserts that the Priority Mail Contract 20 product is a competitive product ''not of general applicability'' within the meaning of 39 U.S.C. 3632(b)(3). This Request has been assigned Docket No. MC2010–2.

The Postal Service contemporaneously filed a contract related to the proposed new product pursuant to 39 U.S.C. 3632(b)(3) and 39 CFR 3015.5. The contract has been assigned Docket No. CP2010–2.

In support of its Request, the Postal Service filed the following materials: (1) A redacted version of the Governors' Decision, originally filed in Docket No. MC2009–25, authorizing the Priority Mail Contract Group; [2] (2) a redacted version of the contract; [3] (3) a requested change in the Mail Classification Schedule product list; [4] (4) a Statement of Supporting Justification as required by 39 CFR 3020.32; [5] (5) a certification of compliance with 39 U.S.C. 3633(a); [6] and (6) an application for non-public treatment of the materials filed under seal.[7] The redacted version of the contract provides that the contract is terminable on 30 days' notice by either party, but could continue for 3 years from the effective date subject to annual price adjustments. Request, Attachment B.

In the Statement of Supporting Justification, Mary Prince Anderson, Acting Manager, Sales and Communications, Expedited Shipping, asserts that the service to be provided under the contract will cover its attributable costs, make a positive contribution to coverage of institutional costs, and will increase contribution toward the requisite 5.5 percent of the Postal Service's total institutional costs. Request, Attachment D, at 1. W. Ashley Lyons, Manager, Regulatory Reporting and Cost Analysis, Finance Department, certifies that the contract complies with 39 U.S.C. 3633(a). *Id.,* Attachment E.

The Postal Service filed much of the supporting materials, including the supporting data and the unredacted contract, under seal. The Postal Service maintains that the contract and related financial information, including the customer's name and the accompanying analyses that provide prices, certain terms and conditions, and financial projections, should remain confidential. *Id.,* Attachment F, at 2–3.[8]

In Order No. 315, the Commission gave notice of the two dockets, appointed a public representative, and provided the public with an opportunity to comment.[9]

III. Comments

Comments were filed by the Public Representative.[10] No comments were submitted by other interested parties. The Public Representative states that the Postal Service's filing meets the pertinent provisions of title 39 and the relevant Commission rules. *Id.* at 1, 3. He further states that the agreement employs pricing terms favorable to the customer, the Postal Service, and thereby, the public. *Id.* at 3–4. The Public Representative also believes that the Postal Service has provided appropriate justification for maintaining confidentiality in this case. *Id.* at 3.

IV. Commission Analysis

The Commission has reviewed the Request, the contract, the financial analysis provided under seal that accompanies it, and the comments filed by the Public Representative.

Statutory requirements. The Commission's statutory responsibilities in this instance entail assigning Priority Mail Contract 20 to either the Market Dominant Product List or to the Competitive Product List. 39 U.S.C. 3642. As part of this responsibility, the Commission also reviews the proposal for compliance with the Postal Accountability and Enhancement Act (PAEA) requirements. This includes, for proposed competitive products, a review of the provisions applicable to rates for competitive products. 39 U.S.C. 3633.

Product list assignment. In determining whether to assign Priority Mail Contract 20 as a product to the Market Dominant Product List or the Competitive Product List, the Commission must consider whether

> the Postal Service exercises sufficient market power that it can effectively set the price of such product substantially above costs, raise prices significantly, decrease quality, or decrease output, without risk of losing a significant level of business to other firms offering similar products.

39 U.S.C. 3642(b)(1). If so, the product will be categorized as market dominant. The competitive category of products consists of all other products.

The Commission is further required to consider the availability and nature of enterprises in the private sector engaged in the delivery of the product, the views of those who use the product, and the likely impact on small business concerns. 39 U.S.C. 3642(b)(3).

The Postal Service asserts that its bargaining position is constrained by the existence of other shippers who can provide similar services, thus precluding it from taking unilateral action to increase prices without the risk of losing volume to private companies. Request, Attachment D, para. (d). The Postal Service also contends that it may not decrease quality or output without risking the loss of business to competitors that offer similar expedited delivery services. *Id.* It further states that the contract partner supports the addition of the contract to the Competitive Product List to effectuate the negotiated contractual terms. *Id.,* para. (g). Finally, the Postal Service states that the market for expedited delivery services is highly competitive and requires a substantial infrastructure to support a national network. It indicates that large carriers serve this market. Accordingly, the Postal Service states that it is unaware of any small business concerns that could offer comparable service for this customer. *Id.,* para. (h).

[1] Request of the United States Postal Service to Add Priority Mail Contract 20 to Competitive Product List and Notice of Filing (Under Seal) of Contract and Supporting Data, October 14, 2009 (Request).

[2] Attachment A to the Request, reflecting Governors' Decision No. 09–6, April 27, 2009.

[3] Attachment B to the Request.

[4] Attachment C to the Request.

[5] Attachment D to the Request.

[6] Attachment E to the Request.

[7] Attachment F to the Request.

[8] In its application for non-public treatment, the Postal Service requests an indefinite extension of non-public treatment of customer-identifying information. *Id.* at 7. For the reasons discussed in PRC Order No. 323, that request is denied. *See* Docket No. MC2010–1 and CP2010–1, Order Concerning Priority Mail Contract 19 Negotiated Service Agreement, October 26, 2009.

[9] PRC Order No. 315, Notice and Order Concerning Priority Mail Contract 20 Negotiated Service Agreement, October 16, 2009 (Order No. 315).

[10] Public Representative Comments in Response to United States Postal Service Request to Add Priority Mail Contract 20 Negotiated Service Agreement to the Competitive Products List, October 26, 2009 (Public Representative Comments).

No commenter opposes the proposed classification of Priority Mail Contract 20 as competitive. Having considered the statutory requirements and the support offered by the Postal Service, the Commission finds that Priority Mail Contract 20 is appropriately classified as a competitive product and should be added to the Competitive Product List.

Cost considerations. The Postal Service presents a financial analysis showing that Priority Mail Contract 20 results in cost savings while ensuring that the contract covers its attributable costs, does not result in subsidization of competitive products by market dominant products, and increases contribution from competitive products.

Based on the data submitted, the Commission finds that Priority Mail Contract 20 should cover its attributable costs (39 U.S.C. 3633(a)(2)), should not lead to the subsidization of competitive products by market dominant products (39 U.S.C. 3633(a)(1)), and should have a positive effect on competitive products' contribution to institutional costs (39 U.S.C. 3633(a)(3)). Thus, an initial review of proposed Priority Mail Contract 20 indicates that it comports with the provisions applicable to rates for competitive products.

Other considerations. The Postal Service shall notify the Commission if termination occurs prior to the scheduled termination date. Following the scheduled termination date of the agreement, the Commission will remove the product from the Competitive Product List.

In conclusion, the Commission approves Priority Mail Contract 20 as a new product. The revision to the Competitive Product List is shown below the signature of this order and is effective upon issuance of this order.

V. Ordering Paragraphs

It is ordered:

1. Priority Mail Contract 20 (MC2010–2 and CP2010–2) is added to the Competitive Product List as a new product under Negotiated Service Agreements, Domestic.

2. The Postal Service shall notify the Commission if termination occurs prior to the scheduled termination date.

3. The Secretary shall arrange for the publication of this order in the **Federal Register.**

List of Subjects in 39 CFR Part 3020

Administrative practice and procedure; Postal Service.

By the Commission.

Judith M. Grady,

Acting Secretary.

■ For the reasons discussed in the preamble, the Postal Regulatory Commission amends chapter III of title 39 of the Code of Federal Regulations as follows:

PART 3020—PRODUCT LISTS

■ 1. The authority citation for part 3020 continues to read as follows:

Authority: 39 U.S.C. 503; 3622; 3631; 3642; 3682.

■ 2. Revise Appendix A to Subpart A of Part 3020—Mail Classification Schedule to read as follows:

Appendix A to Subpart A of Part 3020—Mail Classification Schedule

Part A—Market Dominant Products

1000 Market Dominant Product List

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 52 and 97

[EPA–R04–OAR–2009–0765; FRL–8984–6]

Approval and Promulgation of Implementation Plans and Designation of Areas for Air Quality Implementation Plans; Tennessee; Clean Air Interstate Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to approve revisions to the Tennessee State Implementation Plan (SIP) submitted by the State of Tennessee through the Tennessee Department of Environment and Conservation (TDEC) on July 13, 2009. This revision incorporates provisions related to the implementation of EPA's Clean Air Interstate Rule (CAIR), promulgated on May 12, 2005, subsequently revised on April 28, 2006, and December 13, 2006, and the CAIR Federal Implementation Plan (FIP) concerning sulfur dioxides (SO_2), nitrogen oxides (NO_X) annual, and NO_X ozone season emissions for the State of Tennessee, promulgated on April 28, 2006, and subsequently revised December 13, 2006.

DATES: *Effective Date:* This final rule is effective November 25, 2009.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2009–0765. All documents in the docket are listed on the *http://www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, *i.e.,* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *http://www.regulations.gov* or in hard copy at the Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 to 4:30, excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Twunjala Bradley, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, Region 4, U.S. Environmental Protection Agency, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. Ms. Bradley can be reached by telephone at (404) 562–9352 and by electronic mail at *bradley.twunjala@epa.gov.*

III. Final Action
IV. Effective Date
V. Statutory and Executive Order Reviews

I. EPA's Action

EPA is taking final action to approve a revision to Tennessee's SIP, submitted by Tennessee on July 13, 2009, as clarified herein, that is modifying the application of certain provisions of the CAIR FIP concerning NO_X ozone season emissions. (As discussed in the notice of proposed rulemaking for this submission, this less comprehensive CAIR SIP is termed an abbreviated SIP.) Tennessee is subject to the CAIR FIPs that implement the CAIR requirements by requiring certain energy generating units (EGUs) to participate in the EPA administered CAIR cap-and-trade programs addressing SO_2, NO_X annual, and NO_X ozone season emissions. This SIP revision provides a methodology for allocating NO_X allowances for the NO_X ozone season trading program for NO_X SIP Call trading sources that are not EGUs as defined by CAIR, but are subject to the CAIR NO_X ozone season trading program. The CAIR FIPs provide that this methodology will be used to allocate NO_X Ozone Season allowances to sources in Tennessee. Consistent with the flexibility provided in the FIPs, these provisions will also be used to replace or supplement, as appropriate, the corresponding provisions in the CAIR FIP for Tennessee. EPA is also approving technical corrections to the CAIR NO_X Ozone Season Trading Program opt-in provisions, as noted in the August 20, 2007, approval. Since EPA will no longer administer the NO_X Budget Trading Program, Tennessee has chosen to terminate its Budget Trading program rules (TAPCR Rule 1200–03–27–.06). EPA is, therefore, approving provisions which terminate the State's NO_X Budget Trading Program because those requirements are now addressed by the CAIR NO_X Ozone Season FIP, as modified by the State's abbreviated SIP. Finally, EPA is not making any changes to the CAIR FIP, but is amending the appropriate appendices to note EPA's approval of Tennessee's SIP revision.

II. Background

On February 11, 2009, Tennessee adopted a revision to its CAIR NO_X Ozone Season Trading Program, and on July 13, 2009, submitted a request to EPA for approval of these revisions into the SIP. That request was revised on September 21, 2009, and supplemented by a letter to EPA dated September 24, 2009, clarifying portions of the submittal.

The CAIR FIPs established budgets for Tennessee as 50,973 (2009–2014) and 42,478 (2015–thereafter) tons for NO_X annual emissions, 22,842 (2009–2014) and 19,035 (2015-thereafter) tons for NO_X ozone season emissions and 137,216 (2010–2014) and 96,051 (2015-thereafter) tons for SO_2 emissions. In Tennessee's SIP revision, submitted on July 13, 2009, Tennessee has chosen to include all NO_X SIP Call trading sources that are not EGUs under CAIR in the CAIR NO_X ozone season trading program. As a result of this SIP revision, the CAIR NO_X ozone season budget will be increased annually by 5,666 tons to account for such NO_X SIP Call trading sources. The total Tennessee CAIR NO_X ozone season budgets are therefore, 28,508 (2009–2014) and 24,701 (2015-thereafter) tons. EPA is approving Tennessee State trading budgets under TAPCR 1200–3–27–.11(2)(c).

EPA published a notice of proposed rulemaking to approve Tennessee's revisions to the CAIR SIP on October 14, 2009, (74 FR 52717). EPA did not receive any comments during the public comment period for the proposed rulemaking.

EPA notes that, in *North Carolina* v. *EPA,* 531 F.3d 836 (DC Cir. Jul.11, 2008) at 916–21, the Court determined, among other things, that the state SO_2 and NO_X

budget established in CAIR were arbitrary and capricious[1]. However, the action approved today is consistent with the Court's decision to leave CAIR in place to ''temporarily preserve the environmental values covered by CAIR'' pending EPA's development and promulgation of a replacement rule that remedies CAIR's flaws. *North Carolina* v. *EPA,* 550 F.3d at 1178. Pursuant to the Court's ruling, EPA is developing a new rule that will undergo notice and comment which will result in a final replacement rule for CAIR. In the meantime, EPA is implementing CAIR by approving SIP revisions that are consistent with CAIR (such as the provisions setting state SO_2 and NO_X budgets for the CAIR trading programs) in order to ''temporarily preserve'' the environmental benefits achievable under the CAIR trading programs.

III. Final Action

EPA is taking final action to approve Tennessee's SIP revision that includes an abbreviated CAIR SIP submitted on July 13, 2009, as clarified herein. Tennessee is covered by the CAIR FIPs which require participation in the EPA administered CAIR FIP cap and trade programs for SO_2, NO_X annual, and NO_X ozone season emissions. Under this SIP revision and consistent with the flexibility given to the States in the FIPs, EPA is approving Tennessee's CAIR NO_X ozone season provisions expanding the current applicability provisions in the CAIR NO_X ozone season trading program to include units that are not otherwise subject to the trading program but are subject to Tennessee's NO_X Budget Trading Program; revisions to the allocation methodology provisions (interpreted as discussed above) in the CAIR NO_X ozone season trading program to cover these units; and corrections to the CAIR NO_X ozone season trading program opt-in provisions (as discussed above).

As provided for in the CAIR FIP, the provisions in the abbreviated SIP revision will replace or supplement the corresponding provisions of the CAIR FIPs in Tennessee. The abbreviated SIP revision meets the applicable requirements in 40 CFR 51.123(ee), with regard to NO_X ozone season emissions. EPA is not making any changes to the CAIR FIP, but is amending the appropriate appendices to note EPA's approval of Tennessee's SIP revision.

This action also approves the termination of the State's NO_X Budget Trading Program as discussed in Section 1.

IV. What Is the Effective Date

An expedited effective date for this action is authorized under both 5 U.S.C. 553(d)(1), which provides that rule actions may become effective less than 30 days after publication if the rule ''grants or recognizes an exemption or relieves a restriction'' and section 5 U.S.C. 553(d)(3), which allows an effective date less than 30 days after publication ''as otherwise provided by the agency for good cause found and published with the rule.'' EPA finds that there is good cause for this approval to become effective upon publication.

CAIR SIP approvals relieve States and CAIR sources within States from being subject to provisions in the CAIR FIPs that otherwise would apply to them, allowing States to implement CAIR based on their SIP-approved State rule. The relief from these obligations is sufficient reason to allow an expedited effective date of the rule under 5 U.S.C. 553(d)(1). In addition, Tennessee's relief from these obligations provides good cause to make this rule effective immediately upon publication, pursuant to 5 U.S.C. 553(d)(3). The purpose of the 30-day waiting period prescribed in 5 U.S.C. 553(d) is to give affected parties a reasonable time to adjust their behavior and prepare before the final rule takes effect. Where, as here, the final rule relieves obligations rather than imposes obligations, affected parties, such as the State of Tennessee and CAIR sources within the State, do not need time to adjust and prepare before the rule takes effect.

V. Statutory and Executive Order Reviews

Under the Clean Air Act (CAA), the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve State choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 1312 (64 FR 43255, August 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because applications of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have Tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the State, and EPA notes that it will not impose substantial direct costs on Tribal governments or preempt Tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

[1] The Court also determined that the CAIR trading programs were unlawful (*id.* at 906–8) and that the treatment of title IV allowances in CAIR was unlawful (*id.* at 921–23). For the same reasons that EPA is approving the provisions of Tennessee's SIP revision that use the SO_2 and NO_X budgets set in CAIR, EPA is also approving, as discussed below, Tennessee's SIP revision to the extent the SIP revision adopts the CAIR trading programs, including the provisions addressing applicability, allowance allocations, and use of title IV allowances.

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 25, 2010. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2) of the CAA.)

Fuel Economy Regulations for Automobiles: Technical Amendments and Corrections

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is taking direct final action amending and correcting portions of the Environmental Protection Agency's existing fuel economy and emission regulations. This action makes some minor corrections and amendments to EPA's December 27th 2006 final rule for fuel economy labeling requirements for cars and light trucks, including a slight revision to the minivan definition. This action also makes changes to EPA regulations to administer the Department of Transportation's (DOT's) 2008–2011 model year passenger automobile and light truck corporate average fuel economy (CAFE) standards. Changes include adding reporting requirements for manufacturers to report to EPA their applicable reformed CAFE fuel economy standards (also called ''required fuel economy levels'') and reporting the basis for determining such ''required fuel economy levels.''

This direct final rule also adds provisions to clarify that special test procedures, calculation methods and label formats may be used for advanced technology vehicles for fuel economy labeling and CAFE purposes. Advanced technology vehicles include, but are not limited to electric vehicles, fuel cell vehicles, plug-in hybrid vehicles and vehicles equipped with hydrogen-fueled internal combustion engines. In addition, today's action makes some minor changes to clarify the meaning of, and correct errata in EPA regulations. The above amendments and corrections will allow for the more effective administration of existing regulations.

DATES: This rule is effective on January 25, 2010 without further notice, unless EPA receives adverse comment by December 28, 2009. If EPA receives

adverse comment, we will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect. The incorporation by reference of certain publications listed in this rule is approved by the Director of the Federal Register as of January 25, 2010.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2005–0169, by one of the following methods:

- *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.
- *Fax:* (202) 566–1741.
- *Mail:* Environmental Protection Agency, EPA Docket Center (EPA/DC), Air and Radiation Docket, Mail Code 6102T, 1200 Pennsylvania Avenue, NW., Washington, DC 20460, Attention Docket ID No. EPA–HQ–OAR–2005–0169. In addition, please mail a copy of your comments on the information collection provisions to the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Attn: Desk Officer for EPA, 725 17th St., NW., Washington, DC 20503.''
- *Hand Delivery:* Docket Center, (EPA/DC) EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC., Attention Docket ID No. OAR–2005–0169. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA–HQ–OAR–2005–0169. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or e-mail. The *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.* For additional instructions on submitting comments, go to Section VII of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at the EPA Docket Center, EPA/DC, EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC. This Docket Facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The EPA Docket Center telephone number is (202) 566–1742. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744.

FOR FURTHER INFORMATION CONTACT: Christine Mikolajczyk, Environmental Protection Agency, Office of Transportation and Air Quality, Compliance and Innovative Strategies Division, 2000 Traverwood Drive, Ann Arbor, MI 48105, telephone number: (734) 214–4403; fax number: (734) 214–4503; e-mail address: *mikolajczyk.christine@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Why Is EPA Using a Direct Final Rule?

EPA is publishing this rule without a prior proposed rule because we view this as a non-controversial action and anticipate no adverse comment. However, in the ''Proposed Rules'' section of today's **Federal Register**, we are publishing a separate document that will serve as the proposed rule to amend EPA's fuel economy regulations if adverse comments are received on this direct final rule. We will not institute a second comment period on this action. Any parties interested in commenting must do so at this time. For further information about commenting on this rule, *see* the **ADDRESSES** section of this document.

If EPA receives adverse comment on a distinct provision of this rulemaking, we will publish a timely withdrawal in the **Federal Register** indicating which provisions we are withdrawing. The provisions that are not withdrawn will become effective on the date set out above, notwithstanding adverse comment on any other provision.

II. Does This Action Apply to Me?

This action applies to manufacturers of new passenger cars and light trucks, including medium-duty passenger vehicles.[1] Regulated categories and entities include:

Category	NAICS Codes[a]	Examples of potentially regulated entities
Industry	336111, 336112	Motor vehicle manufacturers.
Industry	811112, 811198, 541514.	Commercial Importers of Vehicles and Vehicle Components.

[a] North American Industry Classification System (NAICS).

[1] ''Passenger car,'' ''light truck,'' and ''medium-duty passenger vehicle'' are defined in 40 CFR 600.002–08. Generally, the term ''light truck'' means a pick-up truck, sport-utility vehicle, or minivan of up to 8,500 lbs gross vehicle weight rating, and ''medium-duty passenger vehicle'' means a sport-utility vehicle or passenger van from 8,500 to 10,000 lbs gross vehicle weight rating. Medium-duty passenger vehicles do not include pick-up trucks.

This list is not intended to be exhaustive, but rather provides a guide regarding entities likely to be regulated by this action. To determine whether particular activities may be regulated by this action, you should carefully examine the regulations. You may direct questions regarding the applicability of this action to the person listed in **FOR FURTHER INFORMATION CONTACT**.

III. What Amendments Are Being Made in This Action?

Today's direct final rule makes minor, non-controversial changes to EPA's fuel economy and emission regulations. Three separate actions have precipitated most of these changes. First, on December 27, 2006 (71 FR 77872), EPA finalized regulations specifying new methods to determine the fuel economy label estimates posted on the window stickers of new cars and trucks. Second, on April 6, 2006 (71 FR 17566), the Department of Transportation's National Highway Traffic Safety Administration (NHTSA), finalized new average fuel economy (CAFE) standards for 2008–2011 trucks. Third, on March 30, 2009 (74 FR 14196), NHTSA revised CAFE requirements for 2011 trucks and finalized new average fuel economy (CAFE) standards for 2011 passenger automobiles. The EPA regulations being amended for these three actions are contained in 40 CFR Parts 86 and 600.

Today's direct final rule clarifies that special test procedures, calculation methods and label formats may be used for fuel economy labels and CAFE calculations of advanced technology vehicles. Advanced technology vehicles include, but are not limited to electric vehicles, fuel cell vehicles, plug-in hybrid vehicles and vehicles equipped with hydrogen-fueled internal combustion engines. This rule also includes technical amendments to the fuel economy label regulations, including changes to the minivan definition, van definition, interior volume measurements of passenger vehicles, and special purpose class of vehicles. Today's action also corrects some typographical errors and makes other minor modifications to ensure accurate interpretation of the regulations. The changes to the EPA CAFE regulations are being made to conform to the NHTSA regulations, and include adding new reporting provisions that will enable EPA to provide NHTSA with the data it needs to determine compliance with the 2008–2011 CAFE standards for passenger automobiles and light trucks.

In addition, two changes are being made to align the EPA CAFE regulations with a 2007 Energy Independence and Security Act (EISA) amendment extending the alternative fuel vehicle CAFE credits to 2019, and to align the EPA CAFE regulations with a previous NHTSA rulemaking which eliminated the requirement to report separate CAFE values for domestic and imported trucks.

A. Fuel Economy Labeling and CAFE Changes for Advanced Technology Vehicles

According to 49 U.S.C. 32908, fuel economy labels are required for cars, light-duty trucks and other vehicles that meet the definition of automobile. For example, the provisions of 49 U.S.C. 32908 (b) read in part:

> ''(b) Labeling Requirements and Contents.—(1) Under regulations of the Administrator of the Environmental Protection Agency, a manufacturer of automobiles shall attach a label to a prominent place on each automobile manufactured in a model year. The dealer shall maintain the label on the automobile. The label shall contain the following information: * * *''

On December 27, 2006, EPA finalized a new fuel economy labeling rule.[2] Under this rulemaking, EPA regulations state that labeling requirements under Subpart D are applicable to 2008 and later model year cars and light-duty trucks and 2011 and later model year medium duty passenger vehicles (MDPVs).[3] Prior to the 2008 model year, labeling requirements in Subpart D were applicable to gasoline-fueled, diesel-fueled, alcohol-fueled, natural gas fueled, alcohol dual fuel and natural gas dual fuel light-duty vehicles.

Under the regulations in 40 CFR Part 600, advanced technology vehicles are required to meet the labeling requirements for conventional vehicles. Advanced technology vehicles include battery electric vehicles, fuel cell vehicles, plug-in hybrid electric vehicles and vehicles equipped with hydrogen internal combustion engines. While the labeling regulations as written apply the same requirements and options to advanced technology vehicles as are applied to conventional technology vehicles, this was an inadvertent error. EPA adopted the labeling regulations based on it's evaluation of what would be appropriate for conventional technology vehicles, and did not evaluate what changes might or might not be appropriate for advanced technology vehicles. EPA did not intend that these types of vehicles would be required to meet all of the requirements for conventional vehicles. For example, the specific labeling requirements of this subpart were not intended to apply to plug-in hybrids. In EPA's Response to Comments-Fuel Economy Labeling of Motor Vehicles, pages 53–54, EPA states:

> ''Bluewater Network commented that they believe plug-in hybrids will be commercially available in the future and EPA should consider how this emerging technology should be addressed with respect to fuel economy labeling and testing.''
>
> EPA's response:
>
> ''Commercial hybrids available today ultimately obtain all propulsion energy from liquid fuel stored in the fuel tank, while a plug-in hybrid uses a combination of liquid fuel and supplemental energy from the electric grid stored in the battery (*i.e.,* overnight charge). Properly accounting for this supplemental electric energy is the central issue in assessing the performance of plug-in hybrids. Therefore, plug-in hybrids will require a more comprehensive assessment in order to determine the proper test procedures for fuel economy and emissions. Since plug-in hybrid technology is rapidly advancing, we will work with key stakeholders in the next few years to assess the appropriateness of the 5-cycle methodology in capturing the fuel economy impact of the plug-in technology. We agree strongly with those commenters urging against technology-specific adjustment factors. We are especially concerned that such an approach would create an uneven playing field across vehicles. We are aware that technologies are rapidly developing, and we intend to ensure, as part of our ongoing evaluation of the fuel economy test methods, that new and developing technologies are represented appropriately.'' (Complete document available at *http://www.epa.gov/fueleconomy/regulations.htm*)

In this context, EPA is revising several regulatory provisions in 40 CFR Part 600 related to fuel economy testing, labeling and CAFE, to make appropriate modifications for use with advanced technology vehicles. EPA reviewed the various applicable regulations to determine where appropriate modifications were needed to address advanced technology vehicles. In large part this called for changes to regulations that address test procedures for test vehicles and calculation procedures to determine fuel economy for the test vehicle, as well as regulations that address what fuel economy value and other information the label is to include. The Agency's detailed analysis of the need for regulation changes to 40 CFR Part 600 regulations is outlined below.

---

[2] Fuel Economy Labeling of Motor Vehicles: Revisions To Improve Calculation of Fuel Economy Estimates; Final Rule; 71 FR 77872, December 27, 2006.

[3] *See* 40 CFR 600.301–08(a). Note that the term ''automobile'' contained in 40 CFR 600.301–08(a) is defined in 40 CFR 600.002–08 as follows: ''*Automobile* has the meaning given by the Department of Transportation at 49 CFR 523.3.''

1. Part 600 Subpart A

Subpart A contains general applicability, definitions, abbreviations, recordkeeping requirements, data and information requirements for fuel economy vehicles, vehicle acceptability requirements, review of fuel economy data, minimum data requirements and other largely administrative requirements. EPA's review of the requirements contained in this subpart indicated that regulation changes are not needed to this Subpart for purposes of advanced technology vehicles.

2. Part 600 Subpart B

Subpart B contains general applicability, definitions, abbreviations, recordkeeping requirements, equipment requirements, fuel specifications, analytical gas requirements, EPA driving cycles, equipment calibration, test procedures, exhaust sample analysis and fuel economy calculation requirements. EPA's review of the requirements contained in this subpart indicated that regulation changes are needed to 40 CFR 600.111–08 of Subpart B regarding fuel economy test procedures used for advanced technology vehicles. EPA reviewed 40 CFR 600.111–08, which provides that manufacturers shall use the emissions test procedures from 40 CFR Part 86 for conducting FTP, HFET, the US06, SC03 and Cold temperature FTP tests for fuel economy. Part 86 allows for the use of special test procedures for emissions testing under 40 CFR 86.1840 when the Administrator determines that a vehicle in Part 86 ''is not susceptible to satisfactory testing by the procedures set forth in this part.'' A similar provision is not explicitly included in Subpart B for fuel economy testing, nor is 40 CFR 86.1840 referred to as an option. Therefore, under this rulemaking, EPA is modifying 40 CFR 600.111–08 to allow special test procedures for advanced technology vehicles not susceptible to satisfactory testing or testing results under the current test provisions. This can be allowed upon written application by the manufacturer and approval by the Administrator, or at the Administrator's own initiative.

For example, the test procedures used for battery electric vehicles for the FTP (city), highway, US06, SC03, and cold temperature FTP tests contain many differences from those test procedures used for conventional vehicles outlined in 40 CFR 600.111–08. To illustrate this point, consider the FTP (city) test. While electric vehicles are driven over the same preconditioning cycle and test cycle as conventional vehicles, electric vehicles are not refueled (their battery is recharged) and electric vehicles are not required to undergo evaporative canister preconditioning prior to the test (they have no canisters). The test procedure for electric vehicles consists of operating the vehicle over many successive FTP (city) cycles until the battery becomes depleted to the point where the vehicle can no longer follow the driving cycle. The test procedure for conventional vehicles outlined in 40 CFR 600.111–08 consists of operating the vehicle over one FTP (city) cycle. While the test procedures for battery electric and conventional vehicles are similar in general (and comparable to 1975 test procedures), the detailed step-by-step test procedures have many differences due to the inherent differences in the vehicles.

Similarly for plug-in hybrid electric vehicles, EPA did not intend that plug-in hybrid electric vehicles would be required to meet all the specific fuel economy requirements contained in 40 CFR 600.111–08 for conventional vehicles. EPA is currently working on guidance for test procedures and fuel economy labeling requirements for plug-in hybrids. Plug-in hybrid vehicles typically have two operating modes: (1) Operation after the battery has been fully charged (called charge depleting mode) and (2) operation after the battery has been discharged and the vehicle is operating similar to conventional hybrid vehicles (called charge sustaining mode). The Agency anticipates that the fuel economy test procedures for plug-in hybrids will be similar to those for battery electric vehicles during the charge depleting mode and similar to conventional vehicles during the charge sustaining mode. While the test procedures for plug-in hybrid electric vehicles and conventional vehicles are expected to be similar in general (and comparable to 1975 test procedures), the detailed step-by-step test procedures for plug-in hybrid vehicles are expected to contain many differences from the step-by-step requirements described in 40 CFR 600.111–08 due to the inherent differences in the vehicles.

The data derived from Part 86 emissions tests and Part 600 fuel economy tests (using test procedures outlined in Part 600 Subpart B) are used to calculate the fuel economy values for each vehicle model. The methods to calculate the test vehicle's fuel economy for the specific test are provided in 40 CFR 600.113–08. For example, this section specifies how to calculate the fuel economy for the test vehicle for FTP, HFET, US06, SC03 and cold temperature FTP tests. These calculation procedures are specified for vehicles fueled with gasoline, diesel, alcohol-based or natural gas fuel. There are specific calculations for automobiles fueled with natural gas, methanol-fueled automobiles and automobiles designed to operate on mixtures of gasoline and methanol.[4] Fuel economy for vehicles operated on other fuels not listed above may use calculations with advance approval from the Administrator.[5]

Currently, tests of conventional hybrids use the calculation methodology for the gasoline, diesel, or other fuel that they use, as EPA considers that the electric energy used by the hybrid originates in the combustion of the gasoline, diesel, or other fuel. Advanced technology vehicles however may need different calculation procedures. For example, plug-in hybrids may not be treated the same as conventional hybrids, as the plug-in hybrid operates in part on fuel such as gasoline and diesel, and in part on electric power that originates from the electricity grid and not from the combustion of the gasoline or diesel fuel. In that case, EPA would use the current provision at 40 CFR 600.113–08(l) to approve appropriate calculation procedures for use with plug-in hybrids. This same provision could be used for other advanced technology vehicles as well. Electric vehicles could also be covered by this provision, at least for purposes of calculating fuel economy of the test vehicle for later use in labeling. For purposes of CAFE, fuel economy calculation procedures are provided by the Department of Energy to determine the electric vehicles urban and highway fuel economy value.[6] Based on the discretion already provided in 40 CFR 600.113–08(l), EPA does not believe that further modification is needed to this provision for purposes of calculating fuel economy for advanced technology test vehicles.

The use of special test procedures and appropriate fuel economy calculation methods for that test procedure, when determining the fuel economy of an advanced technology test vehicle, will affect both the fuel economy labeling and CAFE programs, as the fuel economy values from the test vehicles over the relevant test procedures are then used in both programs, under other provisions in Part 600.

Once EPA or the manufacturer tests the vehicle, using appropriate test procedures, and calculates the fuel economy for the test vehicle over the tests, then 40 CFR 600.114–08 specifies how to calculate the 5-cycle city and highway fuel economy values for that

[4] *See* 40 CFR 600.113–08 paragraphs (j) and (k).

[5] *See* 40 CFR 600.113–08 paragraph (l).

[6] *See* 10 CFR 474.3 and 49 U.S.C. 32904(a)(2).

test vehicle for purposes of labeling under Subpart D, including specific calculations for hybrid vehicles. 40 CFR 115–08 establishes criteria for determining the fuel economy label calculation method for 2011 and later model year vehicles, mpg-based or 5-cycle, for test groups. Assuming appropriate test and calculation procedures have been used under 40 CFR 600.113–08 and 600.114–08, then no changes are needed to these provisions for advanced technology vehicles.

3. Part 600 Subpart C

Subpart C contains general applicability, definitions, abbreviations, recordkeeping requirements, calculation of FTP-based and HFET-based fuel economy values, calculation of vehicle-specific 5-cycle based fuel economy values, calculation of fuel economy values for labeling requirements. EPA's review of the requirements contained in this subpart indicated that regulation changes are needed to 40 CFR 600.210–08 of Subpart C for purposes of determining the fuel economy label values for advanced technology vehicles.

Fuel economy values for vehicle configurations are calculated under the provisions of 40 CFR 600.206–08, for FTP-based and HFET-based fuel economy, and under 40 CFR 600.207–08, for vehicle-specific 5-cycle based fuel economy values for vehicle configurations. Fuel economy calculations to determine highway and city fuel economy for a model type are provided under 40 CFR 600.208–08, FTP-based and HFET-based fuel economy values for a model type, and section 40 CFR 600.209–08, vehicle-specific 5-cycle fuel economy values for a model type. These provisions apply to all 2008 and later model year light-duty automobiles.[7] No revisions are needed to these provisions for advanced technology vehicles, as these provisions do not specify whether and how to use these values, but only how to calculate them.

Section 600.210–08, however, specifies that manufacturers are to use either the 5 cycle value determined under 40 CFR 600.209–08, or the mpg derived value determined under 40 CFR 600.210–08, for fuel economy labeling for models. EPA is revising this section for advanced technology vehicles, so that the Administrator may prescribe an alternative method for determining the city and highway fuel economy values for general and specific labels for advanced technology vehicles. As discussed above, the 5-cycle and mpg-derived options were developed based on what was considered appropriate for conventional technology vehicles, and this will allow the Administrator to make changes, where appropriate, for use with advanced technology vehicles.

4. Part 600 Subpart D

Subpart D contains general applicability, definitions, abbreviations, recordkeeping requirements, fuel economy label format, labeling of high altitude vehicles, range of fuel economy for comparable automobiles, label reporting and recordkeeping, timetable for data submittal, updating label values, classes of comparable automobiles and multistage manufacturer requirements. EPA's review of the requirements contained in this subpart indicated that regulation changes are needed to 40 CFR 600.307–08 of Subpart D for fuel economy label format requirements for advanced technology vehicles.

Subpart D specifies the fuel economy value and other information to include on the label and the format of the label. The fuel economy values are those determined pursuant to Subpart C. As stated earlier, Subpart D includes advanced technology vehicles in its requirements. The format requirements of 40 CFR 600.307–08 may not be appropriate for some advanced technology vehicles. EPA is revising 40 CFR 600.307–08 so that alternative label formats may be approved for advanced technology vehicles.

5. Part 600 Subpart E

Subpart E contains general applicability, definitions, abbreviations, dealer requirements and requirements to display booklets (Fuel Economy Guides) by dealers. EPA's review of the requirements contained in this subpart indicated that regulation changes are not needed to this Subpart for advanced technology vehicles.

6. Part 600 Subpart F

Subpart F contains general applicability, definitions, abbreviations, recordkeeping requirements, running change data requirements, voluntary submission of additional data, calculation of average fuel economy (CAFE), determination of domestic production, model year report and gas guzzler tax requirements. EPA's review of the requirements contained in this subpart indicated that regulation changes are needed to 40 CFR 600.501–08 of this Subpart to clarify that this section is applicable to advanced technology vehicles.

Subpart F, Procedures for Determining Manufacturer's Average Fuel Economy, is currently applicable to gasoline-fueled, diesel-fueled, alcohol-fueled, natural gas-fueled, alcohol dual fuel and natural gas dual fuel automobiles. Manufacturers that produce only electric vehicles and electric vehicles produced by small volume manufacturers are exempt from the requirements of this subpart, but may optionally comply with the requirements of this Subpart. In today's action, EPA is revising 40 CFR 600.501–93 so that advanced technology vehicles are included in Subpart F.

Section 600.510–08 describes the requirements for calculating manufacturer's corporate average fuel economy (commonly called CAFE). Results of calculations from 40 CFR 600.208–08 and 40 CFR 600.206–08 are used to determine CAFE using test procedures outlined in Subpart B. Since EPA is modifying Subpart B (40 CFR 600.111–08) to allow special test procedures for advanced technology vehicles, further modifications to Subpart F for advanced technology vehicles are not necessary.

As discussed above, EPA's authority to approve special test procedures will be used, for example, to approve test procedure modifications used for testing battery electric vehicles, fuel cell vehicles, plug-in hybrid vehicles and hydrogen-fueled vehicles equipped with internal combustion engines. As in 1998 to 2003 model years, when battery electric vehicles were included in manufacturer's CAFE calculations, the Agency will take steps to assure that the test procedures for advanced technology vehicles will be comparable to 1975 test procedures. While the Agency believes additional CAFE adjustments will not be necessary, EPA will follow the procedures specified in 40 CFR 600.510–08(f) if any additional average fuel economy adjustments is appropriate for purposes of CAFE calculation based on a special test procedure change.

B. Fuel Economy Labeling

1. Minivan Definition

On December 27, 2006 (71 FR 77872) EPA finalized the following definition for ''minivan'', which was previously not defined as a separate comparable class, for the purpose of labeling:

''Minivan means a light truck which is designed primarily to carry no more than eight passengers having an integral enclosure fully enclosing the driver, passenger, and load-carrying compartments, with a total interior volume at or below 180 cubic feet, and rear seats readily removed or folded to floor level to facilitate cargo carrying. A

[7] *See* 40 CFR 600.201.

minivan typically includes one or more sliding doors and a rear liftgate.'' [40 CFR 600.002–08.]

The interior volume specification of no more than 180 cubic feet was included as a way to distinguish minvans from full-sized vans. However, after the labeling rule was finalized, we were informed by some manufacturers that their 2008 model year minivans exceeded the 180 cubic feet interior volume limit, and thus would not be considered a minivan for purposes of showing comparison fuel economy on the label. Our intention in creating the minivan class was to provide consumers with better comparison information, based on actual classes of vehicles that they may be shopping for. It was not our intention to exclude vehicles that have for years been marketed and advertised as ''minivans.'' Therefore, we are making two modifications to our regulations that will allow these vehicles to be considered as ''minivans'' for the purpose of presenting comparable fuel economy information on the label.

First, we are eliminating the total interior volume specification from the definition of ''minivan'' and updating the definition slightly to help avoid confusion with EPA's definition of full-sized vans. Absent the interior volume specification, the updated definition should be sufficient to distinguish the minivan class from full-size passenger and cargo vans, SUVs and other similar truck classes, in most cases. Second, in cases where the distinction between the different truck classes may be less clear, we are adding a provision to the truck classification regulations that parallels an existing provision for car classification which allows EPA to reclassify light trucks into a more appropriate classification, as appropriate. This added flexibility will allow EPA to better accommodate today's rapidly changing vehicle designs, not only for minivans, but for other designs that are gaining in popularity, such as the so-called ''crossover'' vehicles, which share attributes of minivans, SUVs and even station wagons.

2. Van Definition

The current EPA ''Van'' definition has been used for fuel economy labeling purposes since before 1980, as follows:

''*Van* means any light truck having an integral enclosure fully enclosing the driver compartment and load-carrying device, and having no body sections protruding more than 30 inches ahead of the leading edge of the windshield.'' [40 CFR 600.002–08.]

This definition was appropriate for vans which were marketed in the late 1970s and 1980s. However, over the past 20 years, the body styles of full sized vans have evolved to shapes with longer nose sections, where the nose of the van extends forward more than 30 inches from the leading edge of the windshield. This direct final rule makes a minor change in the ''Van'' definition to make it compatible with today's vehicles. The new definition will include vehicles that are considered to be full-sized vans, but have body sections which protrude more than 30 inches forward of the leading edge of the windshield.

3. Interior Volume Measurements

We did not propose any changes to the existing EPA regulations for determining the interior volumes of vehicles. The interior volume measurements have been used to determine the various passenger car classes since the early 1980's. We received no comments about the interior volume measurement methods during the new fuel economy label rulemaking. However, after the rule became final, some manufacturers pointed out that the basis for the measurements, an SAE procedure J1100, dated 1975, was outdated, and that the newly revised SAE J1100 contained updated dimension codes which are referenced in our regulations. Rather than incorporating by reference the new version of the SAE procedure, we have simply updated some of the calculation procedures to be consistent with the new SAE methods, thus maintaining alignment with standard industry practices. In particular, the cargo volume index for station wagons is now calculated based on the average width of the cargo area (calculated by averaging the width at shoulder height and the width at the wheel wells), whereas it used to be based simply on the shoulder width measurement.

4. Special Purpose Vehicle Class of Comparable Vehicles

We are also revising the regulations for the ''special purpose vehicle'' class of comparable vehicles to clarify that EPA has the discretion to classify advanced technology vehicles in separate comparable classes. For example, the Administrator may determine that advanced technology vehicles (such as battery electric vehicles, fuel cell vehicles, plug-in hybrid electric vehicles and vehicles equipped with hydrogen internal combustion engines) or other types of vehicles are best classified as a type of ''special purpose vehicle,'' separate from other classes of vehicles. EPA will work with manufacturers in determining the need for separate classes. EPA used a similar approach from the 1999 to 2007 model year to classify minivans and SUVs listed in the Fuel Economy Guide, however the label (window sticker) for these ''special purpose vehicles'' included both minivans and SUVs until the regulations were revised for 2008 model year vehicles. Today's action provides EPA with the additional flexibility to determine appropriate names for such classes of vehicles, different from the name ''special purpose vehicle.''

The provisions of 49 U.S.C. 32908(b) require fuel economy labels to contain ''the range of fuel economy of comparable automobiles of all manufacturers.'' Based on this authority, EPA regulations have traditionally required fuel economy labels to contain the highest and lowest fuel economy values for all vehicles in each comparable class. Separate city and highway ranges were required prior to model year 2008. Beginning with 2008 model year, fuel economy labels are required to contain the highest and lowest combined (city/highway) fuel economy values for all vehicles within each comparable class of vehicles. Vehicle classes currently include two seaters, minicompact cars, subcompact cars, compact cars, midsize cars, large cars, small station wagons, midsize station wagons, large station wagons, small pickup trucks, standard pickup trucks, vans, minivans, sport utility vehicles (SUVs) and a ''catch-all'' class of ''special purpose vehicles.''

EPA is concerned that advanced technology vehicles (which are beginning to be introduced into commerce is relative small numbers) [8] may have fuel economy values which are an order of magnitude greater than conventional vehicles. Classifying these vehicles in the same comparable class of vehicles as conventional gasoline-fueled vehicles will tend to undermine the usefulness of providing the range of the highest and lowest mpg values within each vehicle class. For example, comparing mid-sized gasoline vehicles (mid-sized 2009 vehicles ranged from 11 to 46 combined city/highway mpg) to a mid-sized electric vehicle which gets 100 miles per gallon-equivalent makes all gasoline vehicles in the class appear to have very poor fuel economy. Furthermore, since the new technology vehicles may be available in such small

[8] Some fuel cell vehicles are being sold or leased in very small volumes, *e.g.* 10 vehicles or less annually. Initially, electric vehicles, hydrogen-fueled vehicles and some plug-in hybrid vehicles are also expected to be sold or leased in limited numbers, perhaps 2–10 models per year with sales of less than 500 per model.

numbers initially (and for other reasons) manufacturers have commented that the new technology vehicles should not be compared to conventional vehicles.

In summary, today's action will provide EPA with the regulatory discretion to classify these advanced technology vehicles appropriately. For example, it may be appropriate to establish classes for electric-powered cars and electric-powered trucks. Again, we should emphasize that EPA will work with the affected manufacturers when determining the need for separate classes.

5. Other Certification and Fuel Economy Labeling Changes

Today's action also includes the following minor changes and corrections:

40 CFR Cite	Change	Reason for change
§ 86.132–00(n)	Clarify the preconditioning cycle used for EPA US06 tests.	To make EPA preconditioning consistent with Industry practice.
§ 86.135–90(c); § 86.159–08(b)(9); § 86.230–90(e)(3); § 600.111–08(a)(9(ii).	Revise extra cooling provisions to clarify that variable speed fan(s) may be used and/or the hood closed if approved in advance by the Administrator.	To provide flexibility in extra cooling provisions. EPA experienced several test vehicle problems in 2008 due to inherent undercooling of fixed speed fans.
§ 86.164–08 (c)(1)(i)(D)(2) and (c)(2)(i)(C)(2)	Clarify US06 ''highway'' portion is 0–130 seconds * * * instead of 1–130 seconds. Clarify that the sampling system should be turned off 5 seconds after the engine stops running (*e.g.* 602 or 603 seconds) instead of 596 seconds.	Corrects errors to ensure consistent test procedures and measurement methods.
§ 86.210–08(a)	The reference that reads ''86.109–4'' should read ''86.109–94''.	Corrects a typographical error.
§ 600.002–08	Revised definition of ''Fuel.''	Add hydrogen and LPG (propane) to the fuel definition.
§ 600.002–08	Revised definition of ''Fuel Economy'' for electric vehicles.	To be consistent with current EPA policy and ensure accurate interpretation of the regulations.
§ 600.008–08(b)(3)(i)	Correcting a regulatory reference. ''The manufacturer may * * * accept lower * * * fuel economy results for use in Subpart C or F * * *'' is changed to read: ''The manufacturer may * * * accept lower * * * fuel economy results for use in Subpart D or F * * *''.	Corrects an error.
§ 600.107–08(c)	Add test fuel requirements for fuels not specifically covered in § 86.113, *e.g.* ethanol, hydrogen, LPG (propane).	To ensure accurate interpretation of the regulations.
§ 600.111–08 Introductory paragraph	Clarify that the applicable test procedures for fuel economy data vehicles are in accordance with Part 86 test procedures, including the provisions of 86.1840 Special Test Procedures and other Part 86 subsections.	To ensure accurate interpretation of the regulations.
§ 600.113–08(h)(1)	Correct error by removing a meaningless term, (''x C'' term) from the mpg equation.	Corrects a typographical error.
§ 600.113–08(k)	In the definition for D_{NG} that follows the formula for mpg, the ''3'' in the term ''ft3'' should be superscripted, *i.e.,* ''ft^3''.	Corrects a typographical error.
§ 600.114–08(b)(2)(ii)(A)	Revise a term in the equation for StartFC from 0.0055155 to 0.005515.	Corrects a typographical error.
§ 600.114–08(c)(1)(i)(B)	Revise a term in the equation for Running FC from Bag 3_{20} 3 FE to Bag 3_{20} FE.	Corrects a typographical error.
§ 600.115–08 Introductory paragraph	Add text that clarifies that alternative fuel vehicles and MDPVs may continue to base FE Label values on mpg-based derived 5-cycle calculations in 2011 and later model year.	Requirements were outlined in preamble to the Final Rule at 71 FR 77897–98 and 71 FR 77907, Dec 27, 2006, but were not clarified in regulatory text.
§ 600.115–08(a)(1)(i)	Add ''(c)'' so the paragraph will read ''is determined according to the provisions of § 600.114–08(a) or (c) * * * '' Paragraph (c) is used to calculate HEV 5-cycle FE values.	To ensure accurate interpretation of the regulations.
§ 600.115–08(a)(1)(ii)	Replace ''(a)(i)'' with ''(a)(1)(i)'' in the sentence ''Using the same FTP data as used in paragraph (a)(i) * * *''.	Corrects a typographical error.
§ 600.210–08 (a)	Clarify that dedicated alternative fueled vehicles and dual fueled vehicles when operating on alternative fuel may use the derived 5-cycle method of determining FE labels. Allow alternative label methods in paragraph (e) of this section''.	To ensure accurate interpretation of the regulations.

40 CFR Cite	Change	Reason for change
§ 600.210–08 (a)(2)(i) and (a)(2)(ii)	Clarify rounding. Clarify that MT FTP FE and MT HFET FE should be rounded to 4 decimal places.	§ 600.210–08(a)(2)(i) and (ii) specify rounding ''to the nearest tenth;'' however referenced paragraph 600.208–08(b)(3) already rounds model type city & highway values to 4 decimal places. Change is needed for regulatory consistency.
§ 600.210–08 (a)(2)(i)	Insert a space in ''MTFTP'' to make it ''MT FTP.'' Correct reference from ''600.208–08(a)'' to ''600.208–08(b)''.	Corrects typographical errors.
§ 600.210–08 (a)(3)(i)	Correct a regulatory reference. Correct reference from ''paragraph (a)(1) or (b)(2)'' to ''paragraph (a)(1) or (a)(2)''.	Corrects a typographical error.
§ 600.315–08(b)(1)	In 600.315–08, paragraph (b)(1), delete the ''A'' in the word ''Atwo'', to read ''two seater'' not ''Atwo seater''.	Corrects a typographical error.

C. CAFE Amendments

1. New 2008–2011 Passenger Automobile and Truck CAFE Requirements

In April, 2006, the National Highway Traffic Safety Administration (NHTSA) promulgated final rules which established CAFE standards for 2008–2011 trucks.[9] In these rules, NHTSA included two sets of standards, the first called ''Unreformed,'' applicable for 2008 through 2010 model year trucks, and the second called ''Reformed,'' optional for 2008 through 2010 model year and required beginning with 2011 model year trucks. Then in March 2009, NHTSA promulgated a final rule which revised the 2011 truck ''reformed'' CAFE requirements and established new ''reformed'' CAFE standards for 2011 model year passenger automobiles.[10] NHTSA's 2008–2011 CAFE requirements include two requirements which are not covered by EPA's current regulations.

First, NHTSA is for the first time requiring trucks known as ''medium duty passenger vehicles'' (MDPVs) to be including in the manufacturers' fleet CAFE. NHTSA adopted the same criteria to define MDPVs as contained in EPA's Tier 2 emission regulations.[11] NHTSA regulations define MDPVs as follows:

''*Medium duty passenger vehicle* means a vehicle which would satisfy the criteria in Sec.523.5 (relating to light trucks) but for its gross vehicle weight rating or its curb weight, which is rated at more than 8,500 lbs GVWR or has a vehicle curb weight of more than 6,000 pounds or has a basic vehicle frontal area in excess of 45 square feet, and which is designed primarily to transport passengers, but does not include a vehicle that:

(1) Is an ''incomplete truck'' as defined in this subpart; or

(2) Has a seating capacity of more than 12 persons; or

(3) Is designed for more than 9 persons in seating rearward of the

driver's seat; or

(4) Is equipped with an open cargo area (for example, a pick-up truck box or bed) of 72.0 inches in interior length or more. A covered box not readily accessible from the passenger compartment will be considered an open cargo area for purposes of this definition.'' [49 CFR 523.2]

In EPA's recent fuel economy labeling rule, we also adopted this same definition and added labeling requirements for new MDPVs beginning in 2011, at the same time as the new ''reformed'' CAFE requirements take effect. However, we made no changes to our CAFE regulations at that time, saying that we would instead do so via today's separate regulatory action. We finalized the NHTSA definition of MDPV's in our regulations at 40 CFR 600.002–08 in the 2006 fuel economy labeling rule.[12] NHTSA requires MDPVs to be included in CAFE starting in 2011, but in order to correctly implement NHTSA's new requirements we must make minor revisions to EPA regulations to enable MDPVs to be included in the CAFE calculations for 2011 and later.

The second change needed to EPA CAFE regulations is to add manufacturer reporting requirements to the CAFE ''model year report'' submitted to EPA every year.[13] Today's action will require the model year report to contain the applicable CAFE fuel economy standard (also called ''required fuel economy level'') and the basis for determining that required fuel economy level. According to NHTSA requirements, the ''required fuel economy level'' for each manufacturer is based on the ''footprint'' of the vehicles which are introduced into commerce by that manufacturer. Thus, today's action adds NHTSA's footprint definition, and footprint reporting requirements, including the features used to determine footprint, such as wheelbase, front track width, and rear track width.

2. Technical Amendments to Conform to the Energy Independence and Security Act of 2007

The Energy Independence and Security Act of 2007 extended the provision allowing CAFE incentives for alternate fuel vehicles to 2019, codified at 42 U.S.C. 32905. In today's direct final rule, we have amended our fuel economy regulations to be consistent with the Energy Independence and Security Act of 2007.[14] The Energy Independence and Security Act of 2007 provides that the maximum increase in average fuel economy for a manufacturer attributable to dual fueled ethanol and duel-fueled natural gas vehicles is as follows:

(1) 1.2 miles a gallon for each of model years 1993 through 2014;

(2) 1.0 miles per gallon for model year 2015;

(3) 0.8 miles per gallon for model year 2016;

(4) 0.6 miles per gallon for model year 2017;

(5) 0.4 miles per gallon for model year 2018;

(6) 0.2 miles per gallon for model year 2019; and

(7) 0 miles per gallon for model years after 2019.

In addition, the Energy Independence and Security Act of 2007 modified 49 U.S.C. 32906(b), removing the ''offsets'' to the maximum increase in average fuel economy in the event that NHTSA were to reduce the CAFE standard for passenger automobiles below 27.5 mpg.

[10] Ref. 74 FR 14196, March 30, 2009.

[11] *See* 65 FR 6698, February 10, 2000.

[12] *See* 71 FR 77872, December 27, 2006.

[13] *See* 40 CFR 600.512–01.

[14] Public Law 110–140, December 19, 2007.

3. Harmonization With NHTSA Rule Combining Domestic and Foreign Trucks Into a Single CAFE Averaging Set

On April 4, 1994, NHTSA finalized regulations combining all domestic and imported trucks into a single truck class for CAFE purposes beginning with the 1996 model year.[15] Previously, NHTSA's regulations required the calculation and reporting of separate domestic and imported truck CAFE values and EPA's CAFE regulations likewise included separate calculations. However, EPA regulations were not modified at the time that NHTSA changed its regulations.[16] Thus, in today's action, we are removing the requirements for manufacturers to report separate import and domestic information and data for trucks. For consistency, today's action references NHTSA regulations for passenger car and light truck categories (although no change was needed to the domestic and import passenger car categories at this time).

4. Other CAFE Changes

Today's action also includes the following minor changes and corrections:

40 CFR Cite	Change	Reason for change
§ 600.002–08	Revise light truck definition	Clarify that MDPVs are included beginning in 2011.
§ 600.010–08(d)	Revised CAFE minimum test requirements	Clarify that city & highway tests are required for 2011 and later MDPVs.
§ 600.501–93	Revise Subpart F applicability	Consistency with DOT; clarify that MDPVs are included in 2011 and later CAFEs.
§ 600.510–08(e)	In section 600.510–08, paragraph (e), in the expression for ''IW'', an extraneous letter ''x'' that appears to the left of a multiplication sign should be deleted.	To ensure accurate interpretation of the regulations.
§ 600.511–80(a)	Added ''Except with advance approval of the Administrator,''.	To allow exceptions per 49 U.S.C. 32904(b)(5); and 49 CFR 526.3.
§ 600.511–80(b)(5)	Revise reference to U.S. Code per NHTSA request	Correct errata due to a revision in U.S. Code.

D. Miscellaneous Regulatory Corrections and Changes

This Direct Final Rule includes a technical amendment to the Durability regulations applicable to Light-Duty Vehicles, Light-Duty Trucks and complete Heavy-Duty Vehicles. Specifically, the equation used to calculate the equivalency factors under the Durability Program was incorrect in the final rulemaking despite the fact that the notice of proposed rulemaking (NPRM) had the correct equation format. The equivalency factors are used to equate aging on the manufacturer's durability cycles to aging on the EPA standard cycles if a manufacturer uses their own proprietary aging cycle as allowed under the Durability regulations. Therefore, this action revises the Durability Program regulatory language using the correct equivalency factor equation format stated in the NPRM. The correction essentially involves reversing the numerator and denominator of the equivalency factor definition as stated at 40 CFR 86.1823–08(e)(1)(iii)(B)(1), such that the equivalency factor is stated correctly as follows: ''The equivalency factor is the ratio described by dividing the aging time on the alternative cycle by the aging time on the SRC.''

Today's action also includes a minor revision to the preconditioning cycle used by EPA for the US06 test. Previously, the provisions of 40 CFR 86.132–00(n) require EPA to use a UDDS preconditioning cycle if the soak period since the last exhaust test is greater than two hours. Manufacturers may use a UDDS, a 505, 866, highway, US06 or an SC03 preconditioning cycle (if the soak period since the last exhaust test is greater than two hours) and it is common industry practice to use the US06 cycle. Today's action revises the provisions of 40 CFR 86.132–00(n) so that EPA preconditioning for the US06 is consistent with manufacturers. We believe that this revision will reduce EPA burden (because a UDDS cycle takes approximately 23 minutes to run while a US06 cycle takes 10 minutes to run).

IV. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review

Under Executive Order (EO) 12866 (58 FR 51735, October 4, 1993), this action is a ''significant regulatory action'' because it has the potential to raise novel legal or policy issues. Accordingly, EPA submitted this action to the Office of Management and Budget (OMB) for review under EO 12866 and any changes made in response to OMB recommendations have been documented in the docket for this action.

B. Paperwork Reduction Act

This action does not impose any substantive new information collection burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* for the changes to the minivan definition, the requirements to include medium-duty passenger vehicles (MDPVs) in CAFE calculations, the additional CAFE footprint reporting requirements, or any other certification, fuel economy labeling and CAFE changes contained in this direct final rule. Burden is defined at 5 CFR 1320.3(b). Note that the data submittal requirements to include MDPVs in 2011 and later CAFE data and to report footprint information for reformed CAFE have already been established by NHTSA in its final rules for new passenger automobile and truck CAFE standards,[17] and the accompanying NHTSA ICR (OMB 2127–00019).

The revision to the minivan definition in today's action has a de minimis impact; however, if anything, the revision is expected to reduce manufacturers' information collection burden. For example, manufacturers were previously required to calculate and report to EPA the total interior volume of each style of minivan and full-sized van to determine whether the van was at or below 180 cubic feet in interior volume. Today's action eliminates the 180 cubic feet interior volume specification from the minivan definition, thus slightly reducing manufacturers reporting and recordkeeping burden.

Regarding the MDPV requirements for 2011 and later CAFEs, the following

[15] *See* 59 FR 16312, April 4, 1994.

[16] Regardless of the fact that EPA regulations have not been in alignment with NHTSA's, we have been providing NHTSA with the correct combined import/domestic truck CAFE calculations since that time.

[17] *See* 49 CFR 537.7(c)(4), as amended by 71 FR 17678, April 6, 2006 and 74 FR 14196, March 30, 2009.

statement was made in EPA's Information Collection Request (ICR) for the 2008 Fuel Economy Labeling rule:

''Also beginning with model year 2011, medium-duty passenger vehicles (MDPVs) will be included in the labeling program. MDPVs essentially include SUVs and passenger vans that are between 8,500 and 10,000 lbs. ''GVWR'' (gross vehicle weight ratings). This change is congruent with the National Highway Traffic Safety Administration's (NHTSA's) expansion of the Corporate Average Fuel Economy (CAFE) program to include MDPVs beginning the same model year (71 FR 17565; April 6, 2006). Because more vehicle testing is required under CAFE than under labeling, the impacts of increased testing for MDPVs will be in the ICR for the rule to implement EPA's role in the CAFE program, which will be finalized in a separate action, in time for model year 2011, *or in the appropriate fuel economy program information collection renewal.''*[18] (Emphasis added.)

Thus, in the 2008 FE Label rulemaking EPA indicated we would either include the MDPV information collection requirements in an ICR for today's rulemaking or include it in the EPA's emission and fuel economy ICR renewal request to OMB (which occurs every three years). EPA elected the latter approach, and has included the additional MDPV testing, reporting and recordkeeping burden for fuel economy labeling and CAFE purposes in ICR 0783.54 (OMB 2060–0320), the renewal of the Motor Vehicle Emissions and Fuel Economy Compliance ICR which was submitted to OMB for review on October 23, 2008. Since EPA MDPV ICR requirements have been previously submitted to OMB and because they were also included in NHTSA's ICR (OMB 2127–00019), they are not included in today's action.

Regarding footprint information, the reporting requirements for footprint information and related data were not specifically addressed in the ICR for EPA's Fuel Economy Labeling Rule (ICR 0783.51, OMB 2060–0104) because any change in burden was considered to be negligible and within the margin of error for the information technology estimate in that ICR; and because the information collection burden was partially included in the NHTSA ICR (OMB 2127–00019). The information collection burden for footprint information is currently included in EPA's ICR 0783.54 (OMB 2060–0320), the renewal of the Motor Vehicle Emissions and Fuel Economy Compliance ICR, which was submitted to OMB for review on October 23, 2008.

Additionally, the footprint information reported to EPA for final CAFE reports (wheelbase, track width and sales information) is essentially the same information which will have been previously reported to NHTSA when manufacturers submitted their preliminary CAFE (PCAFE) and mid-model year CAFE reports to NHTSA. Reporting footprint information to EPA with final sales data is expected to be a minimal burden because manufacturers will have already established company business practices to track footprint and sales information for NHTSA and because manufacturers have been reporting CAFE final sales information to EPA since 1978.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

For purposes of assessing the impacts of this direct final rule on small entities, a small entity is defined as: (1) A small business as defined by the Small Business Administration (SBA) regulations at 13 CFR 121.201; (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of this final rule on small entities, I certify that this action will not have a significant economic impact on a substantial number of small entities. Based on Small Business Administration size standards, small businesses in the automobile manufacturing industry are defined as those having less than 1000 employees per firm. Additionally, they are identified using the North America Industrial Classification System (NAICS) by NAICS code 336111. Out of a total of approximately 80 automotive manufacturers subject to this direct final rule, EPA estimates that approximately 10 of these could be classified as small entities based on SBA size standards. No new burden for fuel economy labeling is being imposed by this direct final rule. The new reporting requirement for the reform CAFE footprint data has already been established by NHTSA in its final rule for new truck CAFE standards,[19] and thus this direct final rule imposes no additional burden.

D. Unfunded Mandates Reform Act

This rule does not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and Tribal governments, in the aggregate, or the private sector in any one year. This action simply makes minor amendments, clarifications, and corrections that will allow for the more effective administration of existing regulations. Thus, this rule is not subject to the requirements of sections 202 or 205 of the Unfunded Mandates Reform Act. This rule is also not subject to the requirements of section 203 of the Unfunded Mandates Reform Act because it contains no regulatory requirements that might significantly or uniquely affect small governments. This action imposes no enforceable duty on any State, local or Tribal governments.

E. Executive Order 13132: Federalism

Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' ''Policies that have federalism implications'' is defined in the Executive Order to include regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.''

This direct final rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. Thus, Executive Order 13132 does not apply to this rule.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have Tribal implications, as specified in Executive Order 13175 (65 FR 67249, November 9, 2000). The impacts of this direct final rule are limited to the regulated entities: the automotive manufacturing industry. Thus, Executive Order 13175 does not apply to this action.

[18] *See* 71 FR 77872, December 27, 2006.

[19] *See* 49 CFR 537.7(c)(4), as amended by 71 FR 17678, Apr. 6, 2006.

G. Executive Order 13045 ''Protection of Children From Environmental Health Risks and Safety Risks''

Executive Order 13045: ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997) applies to any rule that: (1) Is determined to be ''economically significant'' as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

EPA interprets EO 13045 (62 FR 19885, April 23, 1997) as applying only to those regulatory actions that concern health or safety risks, such that the analysis required under section 5–501 of the EO has the potential to influence the regulation. This action is not subject to EO 13045 because it does not establish an environmental standard intended to mitigate health or safety risks.

H. Executive Order 13211 (Energy Effects)

This rule is not a ''significant energy action'' as defined in Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001) because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Further, we have concluded that this rule is not likely to have any adverse energy effects.

I. National Technology Transfer Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (''NTTAA''), Public Law 104–113, 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.,* materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This action does not involved technical standards. Therefore, EPA did not consider the use of any voluntary consensus standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order (EO) 12898 (59 FR 7629, Feb. 16, 1994) establishes Federal executive policy on environmental justice. Its main provision directs Federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA has determined that this direct final rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it does not affect the level of protection provided to human health or the environment. This action simply makes minor amendments, clarifications, and corrections that will allow for the more effective administration of existing regulations without impacting the current fuel economy and emission control measures.

K. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A Major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2). This rule will be effective January 25, 2010.

L. Statutory Provisions and Legal Authority

Statutory authority for the fuel economy labeling program and for corporate average fuel economy can be found at 42 U.S.C. 7401–7671q, 49 U.S.C. 32901–32919, and Public Law 109–58. Statutory authority for vehicle emission control program is found in the Clean Air Act, as amended, 42 U.S.C. 7401 *et seq.,* in particular sections 202 and 206 of the Act, 42 U.S.C. 7521 and 7525.

List of Subjects

40 CFR Part 86

Administrative practice and procedure, Confidential business information, Incorporation by reference, Labeling, Motor vehicle pollution, Reporting and recordkeeping requirements.

40 CFR Part 600

Administrative practice and procedure, Electric power, Fuel economy, Incorporation by reference, Labeling, Reporting and recordkeeping requirements.

Dated: November 9, 2009.

Lisa P. Jackson,

Administrator.

■ For the reasons set forth in the preamble, parts 86 and 600 of title 40, chapter I of the Code of Federal Regulations, are amended as follows:

PART 86—CONTROL OF EMISSIONS FROM NEW AND IN-USE HIGHWAY VEHICLES AND ENGINES

■ 1. The authority citation for part 86 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart B—[Amended]

■ 2. Amend § 86.132–00 by revising paragraph (n)(1)(i) and removing and reserving paragraph (n)(1)(ii) to read as follows:

§ 86.132–00 Vehicle preconditioning.

* * * * *

(n) * * *

(1) * * *

(i) Preconditioning may consist of a 505, 866, highway, US06 or SC03 test cycles.

(ii) [Reserved]

* * * * *

■ 3. Amend § 86.135–90 by revising paragraph (b) to read as follows:

§ 86.135–90 Dynamometer procedure.

* * * * *

(b) During dynamometer operation, a fixed speed cooling fan shall be positioned so as to direct cooling air to the vehicle in an appropriate manner with the engine compartment cover open. In the case of vehicles with front engine compartments, the fan shall be squarely positioned within 12 inches (30.5 centimeters) of the vehicle. In the case of vehicles with rear engine compartments (or if special designs

make the above impractical), the cooling fan shall be placed in a position to provide sufficient air to maintain vehicle cooling. The fan capacity shall normally not exceed 5300 cfm (2.50 m3/sec). If however, the manufacturer can show that during field operation the vehicle receives additional cooling, and that such additional cooling is needed to provide a representative test, the fan capacity may be increased, additional fans used, variable speed fan(s) may be used, and/or the engine compartment cover may be closed if approved in advance by the Administrator. For example, the hood may be closed to provide adequate air flow to an intercooler through a factory installed hood scoop. Additionally, the Administrator may conduct certification, fuel economy and in-use testing using the additional cooling set-up approved for a specific vehicle.

* * * * *

■ 4. Amend § 86.159–08 by revising paragraph (b)(9) to read as follows:

§ 86.159–08 Exhaust emission test procedures for US06 emissions.

* * * * *

(b) * * *

(9) During dynamometer operation, a fixed speed cooling fan with a maximum discharge velocity of 15,000 cfm will be positioned so as to direct cooling air to the vehicle in an appropriate manner with the engine compartment cover open. In the case of vehicles with front engine compartments, the fan shall be positioned within 24 inches (61 centimeters) of the vehicle. In the case of vehicles with rear engine compartments (or if special designs make the above impractical), the cooling fan(s) shall be placed in a position to provide sufficient air to maintain vehicle cooling. The Administrator may approve modified cooling configurations, additional cooling, variable speed fan(s), and/or a closed engine compartment cover if necessary to satisfactorily perform the test. In approving requests for additional or modified cooling, the Administrator will consider such items as actual road cooling data and whether such additional cooling is needed to provide a representative test. For example, the hood may be closed to provide adequate air flow to an intercooler through a factory installed hood scoop. Additionally, the Administrator may conduct certification, fuel economy and in-use testing using the additional cooling set-up approved for a specific vehicle.

* * * * *

■ 5. Amend § 86.164–08 by revising paragraphs (c)(1)(i)(D)(*2*) and (c)(2)(i)(C)(*2*) to read as follows:

§ 86.164–08 Supplemental Federal Test Procedure calculations.

* * * * *

(c) * * *

(1) * * *

(i) * * *

(D) * * *

(*2*) In the case of a 2-phase US06 test run according to the provisions of § 86.159–08(f)(2) and part 600 of this chapter:

YUS06 = Calculated mass emissions per mile, using the summed mass emissions of the ''US06 City'' phase and the ''US06 Highway'' phase, based on the measured driving distance of the US06 test schedule. The ''US06 City'' phase shall be sampled during seconds 0–130 and from 495 seconds until five seconds after the engine stops running (*e.g.* 602 or 603 seconds) of the US06 driving schedule. The ''US06 Highway'' phase shall be sampled during seconds 130–495 of the US06 driving schedule),

* * * * *

(2) * * *

(i) * * *

(C) * * *

(*2*) In the case of a 2-phase US06 test run according to the provisions of § 86.159–08(f)(2) and part 600 of this chapter:

YUS06 = Calculated mass emissions per mile, using the summed mass emissions of the ''US06 City'' phase and the ''US06 Highway'' phase, based on the measured driving distance of the US06 test schedule. The ''US06 City'' phase shall be sampled during seconds 0–130 and from 495 seconds until five seconds after the engine stops running (*e.g.* 602 or 603 seconds) of the US06 driving schedule. The ''US06 Highway'' phase shall be sampled during seconds 130–495 of the US06 driving schedule),

* * * * *

■ 6. Section 86.210–08 is amended by revising paragraph (a) introductory text to read as follows:

§ 86.210–08 Exhaust gas sampling system; Diesel-cycle vehicles not requiring particulate emissions measurements.

(a) *General applicability.* The exhaust gas sampling system requirements of § 86.109–94 (which apply to Otto-cycle vehicles), also apply to diesel vehicles that are not required to undergo particulate measurement as allowed under § 600.111–08(e) of this chapter, except that heated flame ionization detector (HFID), probe, sample lines and filters are required as described as follows:

* * * * *

■ 7. Section 86.230–11 is amended by revising paragraph (e)(3) to read as follows:

§ 86.230–11 Test sequence: general requirements.

* * * * *

(e) * * *

(3) The manufacturer may use, for certification and fuel economy testing, alternative engine compartment cooling fans or systems, including those which provide a variable air flow, if the manufacturer has determined that comparable results are obtained. Manufacturers may perform the test with the engine compartment closed, *e.g.* to provide adequate air flow to air flow to an intercooler through a factory installed hood scoop, if needed to provide a representative test. Additionally, the Administrator may conduct certification, fuel economy and in-use testing using the additional cooling set-up approved for a specific vehicle.

* * * * *

■ 8. Section 86.230–94 is amended by revising paragraph (e)(3) to read as follows:

§ 86.230–94 Test sequence: general requirements.

* * * * *

(e) * * *

(3) The manufacturer may use, for certification and fuel economy testing, alternative engine compartment cooling fans or systems, including those which provide a variable air flow, if the manufacturer has determined that comparable results are obtained. For 2009 and later model year vehicles, manufacturers may perform the test with the engine compartment closed, *e.g.* to provide adequate air flow to air flow to an intercooler through a factory installed hood scoop, if needed to provide a representative test. For 2009 and later model year vehicles, the Administrator may conduct certification, fuel economy and in-use testing using the additional cooling set-up approved for a specific vehicle.

* * * * *

■ 9. Section 86.1823–08 is amended by revising paragraph (e)(1)(iii)(B)(*1*) to read as follows:

§ 86.1823–08 Durability demonstration procedures for exhaust emissions.

* * * * *

(e) * * *

(1) * * *

(iii) * * *

(B) * * *

(*1*) The equivalency factor may be determined by an evaluation of the SRC and the customized/alternative cycle

using catalyst time-at-temperature data from both cycles with the BAT equation to calculate the required bench aging time of each cycle. Once the bench aging time is calculated for each cycle, the equivalency factor is the ratio described by dividing the bench aging time on the customized/alternative cycle by the bench aging time on the SRC.

* * * * *

PART 600—FUEL ECONOMY OF VEHICLES

■ 10. The authority citation for part 600 continues to read as follows:

Authority: 49 U.S.C. 32901–23919q, Public Law 109–58.

Subpart A—[Amended]

■ 11. Section 600.002–08 is amended as follows:

■ a. In the definition of ''Fuel,'' paragraph (4) is amended by removing the period and adding in its place ''; or''.

■ b. By adding paragraphs (5) and (6) to the definition of ''Fuel.''

■ c. By revising paragraph (2) of the definition of ''Fuel economy.''

■ d. By revising the definition of ''Light truck.''

■ e. By revising the definition of ''Minivan.''

■ f. By revising the definition of ''Van.''

§ 600.002–08 Definitions.

* * * * *

Fuel means:

* * * * *

(5) Liquid Petroleum Gas (LPG), commonly referred to as ''propane,'' for LPG-powered automobiles; or

(6) Hydrogen for hydrogen fuel cell automobiles and for automobiles equipped with hydrogen internal combustion engines.

Fuel economy means:

* * * * *

(2) For the purpose of calculating average fuel economy pursuant to the provisions of Part 600, Subpart F, fuel economy for electrically powered automobiles means the equivalent petroleum-based fuel economy as determined by the Secretary of Energy in accordance with the provisions of 10 CFR 474.

* * * * *

Light truck means an automobile that is not a passenger automobile, as defined by the Secretary of Transportation at 49 CFR 523.5. This term is interchangeable with ''non-passenger automobile.'' The term the ''light truck'' includes medium-duty passenger vehicles which are manufactured during 2011 and later model years.

* * * * *

Minivan means a light truck which is designed primarily to carry no more than eight passengers, having an integral enclosure fully enclosing the driver, passenger, and load-carrying compartments, and rear seats readily removed, folded, stowed, or pivoted to facilitate cargo carrying. A minivan typically includes one or more sliding doors and a rear liftgate. Minivans typically have less total interior volume or overall height than full sized vans and are commonly advertised and marketed as ''minivans.''

* * * * *

Van means any light truck having an integral enclosure fully enclosing the driver compartment and load carrying compartment. The distance from the leading edge of the windshield to the foremost body section of vans is typically shorter than that of pickup trucks and SUVs.

* * * * *

■ 12. Section 600.010–08 is amended by revising paragraph (d) to read as follows:

§ 600.010–08 Vehicle test requirements and minimum data requirements.

* * * * *

(d) Minimum data requirements for the manufacturer's average fuel economy. For the purpose of calculating the manufacturer's average fuel economy under § 600.510, the manufacturer shall submit FTP (city) and HFET (highway) test data representing at least 90 percent of the manufacturer's actual model year production, by configuration, for each category identified for calculation under § 600.510–08(a).

■ 13. Section 600.011–93 is amended by revising paragraph (a) and by adding paragraph (b)(3) to read as follows:

§ 600.011–93 Reference materials.

(a) *Incorporation by reference.* The documents in paragraph (b) of this section have been incorporated by reference. The incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be inspected at the U.S. Environmental Protection Agency, Office of Air and Radiation, 1200 Pennsylvania Ave., NW., Washington, DC 20460, phone (202) 272–0167, or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.*

(b) * * *

(3) *SAE Material.* The following table sets forth material from the Society of Automotive Engineers that has been incorporated by reference. The first column lists the number and name of the material. The second column lists the section(s) of this part, other than § 600.011–93, in which the matter is referenced. The second column is presented for information only and may not be all inclusive. Copies of these materials may be obtained from Society of Automotive Engineers World Headquarters, 400 Commonwealth Dr., Warrendale, PA 15096–0001, phone (877) 606–7323 (U.S. and Canada) or (724) 776–4970 (outside the U.S. and Canada), or at *http://www.sae.org.*

Document No. and name	40 CFR part 600 reference
Motor Vehicle Dimensions—Recommended Practice SAE 1100a (Report of Human Factors Engineering Committee, Society of Automotive Engineers, approved September 1973 as revised September 1975).	600.315–08; 600.315–82.

Subpart B—[Amended]

■ 14. Section 600.107–08 is amended by adding paragraph (c) to read as follows:

§ 600.107–08 Fuel Specifications.

* * * * *

(c) Test fuels which do not have fuel specifications provided in the provisions of § 86.113 of this chapter may be used if approved in advance by the Administrator.

■ 15. Section 600.111–08 is amended as follows:

■ a. By adding introductory text to this § 600.111–08.

■ b. By revising paragraph (b)(9)(ii).

■ c. By adding paragraph (f).

§ 600.111–08 Test Procedures.

This section provides test procedures for the FTP, highway, US06, SC03, and the cold temperature FTP tests. Testing shall be performed according to test procedures and other requirements contained in Part 86 and Part 600 of this

chapter, including the provisions of Part 86, Subparts B, C, and S.

* * * * *

(b) * * *

(9) * * *

(ii) Open the vehicle engine compartment cover and position the cooling fan(s) required. Manufacturers may request the use of additional cooling fans or variable speed fan(s) for additional engine compartment or under-vehicle cooling and for controlling high tire or brake temperatures during dynamometer operation. With prior EPA approval, manufacturers may perform the test with the engine compartment closed, *e.g.* to provide adequate air flow to an intercooler (through a factory installed hood scoop). Additionally, the Administrator may conduct fuel economy testing using the additional cooling set-up approved for a specific vehicle.

* * * * *

(f) *Special Test Procedures.* The Administrator may prescribe test procedures, other than those set forth in this Subpart B, for any vehicle which is not susceptible to satisfactory testing and/or testing results by the procedures set forth in this part. For example, special test procedures may be used for advanced technology vehicles, including, but not limited to battery electric vehicles, fuel cell vehicles, plug-in hybrid electric vehicles and vehicles equipped with hydrogen internal combustion engines. Additionally, the Administrator may conduct fuel economy testing using the special test procedures approved for a specific vehicle.

■ 16. Section 600.113–08 is amended by revising paragraphs (h)(1) and (k) to read as follows:

§ 600.113–08 Fuel Economy Calculations for FTP, HFET, US06, and cold temperature FTP tests.

* * * * *

(h)(1) For gasoline-fueled automobiles tested on test fuel specified in § 86.113–04(a), the fuel economy in miles per gallon is to be calculated using the following equation:

$$mpg = (5174 \times 10^4 \times CWF \times SG)/[((CWF \times HC) + (0.429 \times CO) + (0.273 \times CO_2)) \times ((0.6 \times SG \times NHV) + 5471)]$$

Where:

HC = Grams/mile HC as obtained in paragraph (g) of this section.

CO = Grams/mile CO as obtained in paragraph (g) of this section.

CO_2 = Grams/mile CO_2 as obtained in paragraph (g) of this section.

CWF = Carbon weight fraction of test fuel as obtained in paragraph (g) of this section.

NHV = Net heating value by mass of test fuel as obtained in paragraph (g) of this section.

SG = Specific gravity of test fuel as obtained in paragraph (g) of this section.

* * * * *

(k) For automobiles fueled with natural gas, the fuel economy in miles per gallon of natural gas is to be calculated using the following equation:

$$mpg_e = \frac{CWF_{HC/NG} \times D_{NG} \times 121.5}{(0.749 \times CH_4) + CWF_{NMHC} + (0.429 \times CO) + (0.273 \times (CO_2 - CO_{2NG}))}$$

Where:

mpg_e = miles per equivalent gallon of natural gas.

$CWF_{HC/NG}$ = carbon weight fraction based on the hydrocarbon constituents in the natural gas fuel as obtained in paragraph (g) of this section.

D_{NG} = density of the natural gas fuel [grams/ft³ at 68 °F (20 °C) and 760 mm Hg (101.3 kPa)] pressure as obtained in paragraph (g) of this section.

CH_4, NMHC, CO, and CO_2 = weighted mass exhaust emissions [grams/mile] for methane, non-methane HC, carbon monoxide, and carbon dioxide as calculated in § 600.113.

CWF_{NMHC} = carbon weight fraction of the non-methane HC constituents in the fuel as determined from the speciated fuel composition per paragraph (f)(3) of this section.

CO_{2NG} = grams of carbon dioxide in the natural gas fuel consumed per mile of travel.

$$CO_{2NG} = FC_{NG} \times D_{NG} \times WF_{CO2}$$

Where:

$$FC_{NG} = \frac{(0.749 \times CH_4) + (CWF_{NMHC} \times NMHC) + (0.429 \times CO) + (0.273 \times CO_2)}{CWF_{NG} \times D_{NG}}$$

= cubic feet of natural gas fuel consumed per mile.

CWF_{NG} = the carbon weight fraction of the natural gas fuel as calculated in paragraph (f) of this section.

WF_{CO2} = weight fraction carbon dioxide of the natural gas fuel calculated using the mole fractions and molecular weights of the natural gas fuel constituents per ASTM D 1945–91 ''Standard Test Method for Analysis of Natural Gas by Gas Chromatography'' (incorporated by reference at § 600.011–93).

* * * * *

■ 17. Section 600.114–08 is amended by revising paragraphs (b)(2)(ii)(A) and (c)(1)(i)(B) to read as follows:

§ 600.114–08 Vehicle-specific 5-cycle fuel economy calculations.

(b) * * *

(2) * * *

(ii) * * *

$$\text{(A) } StartFC = 0.33 \times \frac{(0.005515 + 1.13637 \times StartFuel_{75})}{60.0}$$

Where:

$$StartFuel_{75} = 3.6 \times \left(\frac{1}{Bag\ 1\ FE_{75}} - \frac{1}{Bag\ 3\ FE_{75}} \right)$$

Where:

Bag y FE_{75} = the fuel economy in miles per gallon of fuel during the specified bag of the FTP test conducted at an ambient temperature of 75 °F.

* * * * *

(c) * * *

(1) * * *

(i) * * *

$$\text{(B) Running FC (gallons per mile)} = 0.82 \times \left[\frac{0.48}{Bag\ 4_{75}\ FE} + \frac{0.41}{Bag\ 3_{75}\ FE} + \frac{0.11}{US06\ City\ FE} \right]$$

$$+ 0.18 \times \left[\frac{0.5}{Bag\ 2_{20}\ FE} + \frac{0.5}{Bag\ 3_{20}\ FE} \right] + 0.133 \times 1.083 \times \left[\frac{1}{SC03\ FE} - \left(\frac{0.61}{Bag\ 3_{75}\ FE} + \frac{0.39}{Bag\ 4_{75}\ FE} \right) \right]$$

Where:

$Bag Y_X$ FE = the fuel economy in miles per gallon of fuel during the specified bag Y of the FTP test conducted at an ambient temperature X of 75 °F or 20 °F.

US06 City FE = fuel economy in miles per gallon over the city portion of the US06 test.

SC03 FE = fuel economy in miles per gallon over the SC03 test.

* * * * *

■ 18. Section 600.115–08 is amended as follows:

■ a. By revising the introductory text.

■ b. By revising paragraph (a)(1)(i).

■ c. By revising paragraph (a)(1)(ii).

§ 600.115–08 Criteria for determining the fuel economy label calculation method for 2011 and later model year vehicles.

This section provides the criteria to determine if the derived 5-cycle method for determining fuel economy label values, as specified in § 600.210–08 (a)(2) or (b)(2), as applicable, may be used to determine label values for 2011 and later model year vehicles. Separate criteria apply to city and highway fuel economy for each test group. The provisions of this section are optional. If this option is not chosen, or if the criteria provided in this section are not met, fuel economy label values for 2011 and later model year vehicles must be determined according to the vehicle-specific 5-cycle method specified in § 600.210–08(a)(1) or (b)(1), as applicable. However, dedicated alternative-fuel vehicles, dual fuel vehicles when operating on alternative fuel, and MDPVs may use the derived 5-cycle method for determining fuel economy labels for 2011 and later model years whether or not the criteria provided in this section are met.

(a) * * *

(1) * * *

(i) The vehicle-specific 5-cycle city fuel economy from the official FTP, HFET, US06, SC03 and Cold FTP tests for the test group is determined according to the provisions of § 600.114–08(a) or (c) and rounded to the nearest one tenth of a mile per gallon.

(ii) Using the same FTP data as used in paragraph (a)(1)(i) of this section, the corresponding derived 5-cycle city fuel economy is calculated according to the following equation:

$$\text{Derived 5-cycle city fuel economy} = \frac{1}{\left(\{City\ Intercept\} + \frac{\{City\ Slope\}}{FTP\ FE} \right)}$$

Where:

City Intercept = Intercept determined by the Administrator. *See* § 600.210–08(a)(2)(iii).

City Slope = Slope determined by the Administrator. *See* § 600.210–08(a)(2)(iii).

FTP FE = the FTP-based city fuel economy from the official test used for certification compliance, determined under § 600.113–08(a), rounded to the nearest tenth.

* * * * *

■ 19. Section 600.210–08 is amended as follows:

■ a. By revising paragraph (a) introductory text.

■ b. By revising paragraphs (a)(2)(i) and (a)(2)(ii).

■ c. By revising paragraph (a)(3)(i).

■ d. By adding paragraph (e).

§ 600.210–08 Calculation of fuel economy values for labeling.

(a) *General Labels.* Except as permitted in paragraph (e) of this section, fuel economy for general labels can be determined by two methods. The first is based on vehicle-specific model-type 5-cycle data as determined in § 600.209–08(b). This method is optional beginning in the 2008 model year for all vehicles, including medium-duty passenger vehicles, and required beginning in the 2011 model year (except for dedicated alternative-fuel vehicles, dual fuel vehicles when operating on alternative fuel, and medium duty passenger vehicles) unless otherwise indicated according to the provisions in § 600.115–08. The second method is the derived 5-cycle method, and is based on fuel economy that is derived from vehicle-specific 5-cycle model type data as determined in paragraph (a)(2) of this section. This method is required for 2008 through 2010 model years (except for medium-duty passenger vehicles, in which case it is optional), and is permitted beginning in 2011 model year under the provisions of § 600.115–08. If the manufacturer determines that the resulting label values from either of these methods are not representative of the fuel economy for that model type, they may voluntarily lower these values. All 2011 and later model year medium-

duty passenger vehicles, dedicated alternative-fueled vehicles, and dual fuel vehicles when operating on alternative fuel must be labeled for fuel economy, using the derived 5-cycle method or, at the manufacturer's option, the vehicle-specific 5-cycle method. Fuel economy label values for dual fuel vehicles operating on alcohol-based or natural gas fuel are calculated separately.

* * * * *

(2) * * *

(i) For each model type, determine the derived five-cycle city fuel economy using the following equation and coefficients determined by the Administrator:

$$\text{Derived 5-cycle City Fuel Economy} = \frac{1}{\left(\{\text{City Intercept}\} + \frac{\{\text{City Slope}\}}{\text{MT FTP FE}}\right)}$$

Where:

City Intercept = Intercept determined by the Administrator based on historic vehicle-specific 5-cycle city fuel economy data.

City Slope = Slope determined by the Administrator based on historic vehicle-specific 5-cycle city fuel economy data.

MT FTP FE = the model type FTP-based city fuel economy determined under § 600.208–08(b), rounded to the nearest 0.0001 mpg.

(ii) For each model type, determine the derived five-cycle highway fuel economy using the equation below and coefficients determined by the Administrator:

$$\text{Derived 5-cycle Highway Fuel Economy} = \frac{1}{\left(\{\text{Highway Intercept}\} + \frac{\{\text{Highway Slope}\}}{\text{MT HFET FE}}\right)}$$

Where:

Highway Intercept = Intercept determined by the Administrator based on historic vehicle-specific 5-cycle highway fuel economy data.

Highway Slope = Slope determined by the Administrator based on historic vehicle-specific 5-cycle highway fuel economy data.

MT HFET FE = the model type highway fuel economy determined under § 600.208–08(b), rounded to the nearest 0.0001 mpg.

* * * * *

(3) * * *

(i) City and Highway label values for dual fuel alcohol-based and natural gas vehicles when using the alternate fuel are separately determined by the following calculation:

$$\textit{Derived } FE_{alt} = FE_{alt} \times \frac{5cycle_{gas}}{FE_{gas}}$$

Where:

FE_{alt} = The unrounded FTP-based model-type city or HFET-based model-type highway fuel economy from the alternate fuel, as determined in § 600.208(b)(5)(ii).

5-cycle FE_{gas} = The unrounded vehicle-specific or derived 5-cycle model-type city or highway fuel economy, as determined in paragraph (a)(1) or (a)(2) of this section.

FE_{gas} = The unrounded FTP-based city or HFET-based model type highway fuel economy from gasoline (or diesel), as determined in § 600.208(b)(5)(i).

The result, rounded to the nearest whole number, is the alternate fuel label value for dual fuel vehicles.

* * * * *

(e) *Fuel economy values and other information for advanced technology vehicles.* (1) The Administrator may prescribe an alternative method of determining the city and highway model type fuel economy values for general, unique or specific fuel economy labels other than those set forth in this Subpart C for advanced technology vehicles including, but not limited to battery electric vehicles, fuel cell vehicles, plug-in hybrid electric vehicles and vehicles equipped with hydrogen internal combustion engines.

(2) For advanced technology vehicles, the Administrator may prescribe special methods for calculating and/or determining information other than fuel economy that is required to be displayed on fuel economy labels as specified in section 600.307–08(k) of this part. For example, the Administrator may prescribe methods to determine the city and highway electrical energy consumption values and the all electric driving range for battery electric vehicles and plug-in hybrid electric vehicles.

Subpart D—[Amended]

■ 20. Section 600.307–08 is amended by adding new paragraph (k) to read as follows:

§ 600.307–08 Fuel economy label format requirements.

* * * * *

(k) *Special label format requirements.* The Administrator may prescribe special label format and information requirements for vehicles which are not specifically described in this section and for which sample labels are not provided in Appendix IV of this Part 600. These types of vehicles may include, but are not limited to battery electric vehicles, fuel cell vehicles, plug-in hybrid electric vehicles and vehicles equipped with hydrogen internal combustion engines. The format and information requirements for the labels of such vehicles will be designed to provide simple, easy to understand, fuel economy values in accordance with the way the fuel is expected to be dispensed, sold or marketed in the field to the ultimate consumer. The Administrator may prescribe special label format and information requirements for other information required to be displayed on fuel economy labels pursuant to 49 U.S.C. 32908(b)(1)(F). For example, the Administrator may prescribe special label format and information requirements to display the city and highway electrical energy consumption values and the all electric driving range for battery electric vehicles and plug-in hybrid electric vehicles.

■ 21. Section 600.315–08 is amended as follows:

■ a. By revising paragraph (a)(2) introductory text.
■ b. By revising paragraph (a)(3)(i).
■ c. By revising paragraphs (b)(1), (b)(2), (b)(3).
■ d. By revising paragraph (c) introductory text and paragraph (c)(1).
■ e. By revising paragraph (e) introductory text.
■ f. By revising paragraph (e)(2)(ii).
■ g. By revising paragraph (g)(1) introductory text and paragraph (g)(1)(i).
■ h. By revising paragraph (g)(2) introductory text and paragraph (g)(2)(iii).
■ i. By revising paragraph (h)(2) introductory text, (h)(3), and (h)(4)(ii).

§ 600.315–08 Classes of comparable automobiles.

(a) * * *

(2) The Administrator will classify light trucks (nonpassenger automobiles) into the following classes: Small pickup trucks, standard pickup trucks, vans, minivans, and SUVs. Pickup trucks will be separated by car line on the basis of gross vehicle weight rating (GVWR). For pickup truck car lines with more than one GVWR, the GVWR of the pickup truck car line is the arithmetic average of all distinct GVWRs less than or equal to 8,500 pounds available for that car line. The Administrator may determine that specific light trucks should be most appropriately placed in a different class or in the special purpose vehicle class as provided in paragraph (a)(3)(i) and (a)(3)(ii) of this section, based on the features and characteristics of the specific vehicle, consumer information provided by the manufacturer, and other information available to consumers.

* * * * *

(3)(i) *Special purpose vehicles.* All automobiles with GVWR less than or equal to 8,500 pounds and all medium-duty passenger vehicles which possess special features and which the Administrator determines are more appropriately classified separately from typical automobiles or which do not meet the requirements of paragraphs (a)(1) and (2) of this section will be classified as special purpose vehicles. For example, the Administrator may determine that advanced technology vehicles (such as battery electric vehicles, fuel cell vehicles, plug-in hybrid electric vehicles and vehicles equipped with hydrogen internal combustion engines) should be appropriately classified as a type of ''special purpose vehicle.'' The Administrator may determine appropriate names for such types of special purpose vehicles, different from the name ''special purpose vehicle.''

* * * * *

(b) *Interior volume index—passenger automobiles.* (1) The interior volume index shall be calculated for each car line which is not a ''two seater'' car line, in cubic feet rounded to the nearest 0.1 cubic foot. For car lines with more than one body style, the interior volume index for the car line is the arithmetic average of the interior volume indexes of each body style in the car line.

(2) For all body styles except station wagons and hatchbacks with more than one seat (*e.g.,* with a second or third seat) equipped with seatbelts as required by DOT safety regulations, interior volume index is the sum, rounded to the nearest 0.1 cubic feet, of the front seat volume, the rear seat volume(s), if applicable, and the luggage capacity.

(3) For all station wagons and hatchbacks with more than one seat (*e.g.,* with a second or third seat) equipped with seatbelts as required by DOT safety regulations, interior volume index is the sum, rounded to the nearest 0.1 cubic feet, of the front seat volume, the rear seat volume, and the cargo volume index.

(c) All interior and cargo dimensions are measured in inches to the nearest 0.1 inch. All dimensions and volumes shall be determined from the base vehicles of each body style in each car line, and do not include optional equipment. The dimensions H61, W3, W5, L34, H63, W4, W6, L51, H201, L205, L210, L211, H198, W201, and volume V1 are to be determined in accordance with the procedures outlined in Motor Vehicle Dimensions SAE J1100a (Report of Human Factors Engineering Committee, Society of Automotive Engineers, approved September 1973 and last revised September 1975), as incorporated by reference as specified in § 600.011–93, except as noted herein:

(1) *SAE J1100a(2.3)*—Cargo dimensions. All dimensions are measured with the front seat positioned the same as for the interior dimensions and the second seat, for the station wagons and hatchbacks, in the upright position. All head restraints shall be in the stowed position and considered part of the seat.

* * * * *

(e) The rear seat volume is calculated in cubic feet, for vehicles with a rear seat equipped with rear seat belts (as required by DOT), by dividing 1,728 into the product of three terms listed below and rounding the quotient to the nearest 0.001 cubic feet:

* * * * *

(2) * * *

(ii) W4—Shoulder room-second, if hip room is not more than 5 inches less than shoulder room. (In inches, W4 is obtained according to paragraph (c) of this section), and

* * * * *

(g) * * *

(1) For station wagons the cargo volume index V10 is calculated, in cubic feet, by dividing 1,728 into the product of three terms and rounding the quotient to the nearest 0.001 cubic feet:

(i) Average cargo width, which is the arithmetic average of:

(A) W4—Shoulder room-second (in inches obtained according to paragraph (c) of this section); and

(B) W201—Cargo width-wheelhouse (in inches obtained according to paragraph (c) of this section).

* * * * *

(2) For hatchbacks, the cargo volume index V11 is calculated, in cubic feet, by dividing 1,728 into the product of three terms and rounding the quotient to the nearest 0.001 cubic foot:

* * * * *

(iii) H198—Second seatback to load floor height. (In inches obtained according to paragraph (c) of this section.)

(h) * * *

(2) For all passenger automobiles except station wagons and hatchbacks with more than one seat (*e.g.,* with a second or third seat) equipped with seat belts as required by DOT safety regulations:

* * * * *

(3) For station wagons with more than one seat (*e.g.,* with a second or third seat) equipped with seat belts as required by DOT safety regulations:

(i) The dimensions H201, L205, and W201 determined in accordance with paragraph (c) of this section, and

(ii) The cargo volume index V10 determined in accordance with paragraph (g)(1) of this section.

(4) * * *

(ii) The cargo volume index V11 determined in accordance with paragraph (g)(2) of this section.

* * * * *

Subpart E—[Amended]

■ 22. Section 600.501–93 is amended by revising paragraph (a) to read as follows:

§ 600.501–93 General applicability.

(a) The provisions of this subpart are applicable to 1993 and later model year passenger automobiles and light trucks, and to the manufacturers of passenger automobiles and light trucks as determined by the Secretary of Transportation in 49 CFR 531.3 and 49

CFR 533.3. The provisions of this subpart are applicable to medium-duty passenger vehicles manufactured in 2011 model year and later model years and to the manufacturers of such vehicles.

* * * * *

■ 23. Section 600.502–81 is amended by adding a new paragraph (a)(4) to read as follows:

§ 600.502–81 Definitions.

(a) * * *

(4) *Footprint* means the area between the wheels of an automobile as defined by the Secretary of Transportation at 49 CFR 523.2.

* * * * *

■ 24. Section 600.510–08 is amended as follows:

■ a. By revising paragraph (a)(1).

■ b. By removing and reserving paragraph (a)(2).

■ c. By revising paragraph (a)(3).

■ d. By removing and reserving paragraph (a)(4).

■ e. By revising paragraph (b)(2)(i) introductory text.

■ f. By removing and reserving paragraphs (b)(2)(i)(A) and (b)(2)(i)(B).

■ g. By revising paragraph (b)(3)(i) introductory text.

■ h. By removing and reserving paragraphs (b)(3)(i)(A) and (b)(3)(i)(B).

■ i. By revising paragraph (c)(2)(v) introductory text.

■ j. By revising paragraph (c)(2)(vi) introductory text.

■ k. By revising the equation for IW in paragraph (e).

■ l. By revising paragraph (g)(3).

■ m. By revising paragraph (h) introductory text.

■ n. By removing and reserving paragraph (i).

§ 600.510–08 Calculation of average fuel economy.

(a) * * *

(1) An average fuel economy calculation will be made for the category of passenger automobiles as determined by the Secretary of Transportation. For example, categories may include, but are not limited to domestically manufactured and/or non-domestically manufactured passenger automobiles as determined by the Secretary of Transportation.

(2) [Reserved]

(3) An average fuel economy calculation will be made for the category of trucks as determined by the Secretary of Transportation. For example, categories may include, but are not limited to domestically manufactured trucks, non-domestically manufactured trucks, light-duty trucks, medium-duty passenger vehicles, and/or heavy-duty trucks as determined by the Secretary of Transportation.

(4) [Reserved]

(b) * * *

(2) * * *

(i) Separate fuel economy values will be calculated for model types and base levels associated with car lines for each category of passenger automobiles and trucks as determined by the Secretary of Transportation pursuant to paragraphs (a)(1) and (a)(3) of this section.

(A) [Reserved]

(B) [Reserved]

* * * * *

(3) * * *

(i) Separate fuel economy values will be calculated for vehicle configurations associated with car lines for each category of passenger automobiles and trucks as determined by the Secretary of Transportation pursuant to paragraphs (a)(1) and (a)(3) of this section.

(A) [Reserved]

(B) [Reserved]

* * * * *

(c) * * *

(2) * * *

(v) For alcohol dual fuel model types, for model years 1993 through 2019, the harmonic average of the following two terms; the result rounded to the nearest 0.1 mpg:

* * * * *

(vi) For natural gas dual fuel model types, for model years 1993 through 2019, the harmonic average of the following two terms; the result rounded to the nearest 0.1 mpg:

* * * * *

(e) * * *

* * * * *

$$IW = (9.2917 \times 10^{-3} \times SF_{3IWC} \times FE_{3IWC}) - (3.5123 \times 10^{-3} \times SF_{4ETW} \times FE_{4IWC}).$$

* * * * *

(g) * * *

(3) Alcohol dual fuel passenger automobiles and natural gas dual fuel passenger automobiles manufactured during model years 1993 through 2019 must meet the minimum driving range requirements established by the Secretary of Transportation (49 CFR part 538) to obtain the CAFE credit determined in paragraphs (c)(2)(v) and (vi) of this section.

(h) For model years 1993 and later, and for each category of automobile identified in paragraph (a) of this section, the maximum increase in average fuel economy determined in paragraph (c) of this section attributable to alcohol dual fuel automobiles and natural gas dual fuel automobiles shall be as follows:

Model year	Maximum Increase (mpg)
1993–2014	1.2
2015	1.0
2016	0.8
2017	0.6
2018	0.4
2019	0.2
2020 and later	0

* * * * *

(i) [Reserved]

■ 25. Section 600.511–80 is amended as follows:

■ a. By revising paragraph (a) introductory text.

■ b. By revising paragraph (b)(5).

■ c. By removing and reserving paragraphs (d) and (e).

§ 600.511–80 Determination of domestic production.

(a) Except with advance approval of the Administrator, an automobile shall be considered domestically produced in any model year if it is included within a domestically produced car line (car line includes station wagons for purposes of this paragraph), unless the assembly of such automobile is completed in Canada or Mexico and such automobile is not imported into the United States prior to the expiration of 30 days following the end of the model year. For purposes of this paragraph a car line will be considered domestically produced if the following ratio is less than 0.25:

* * * * *

(b) * * *

(5) All elections under paragraph (b)(4) of this section shall be made in accordance with the procedures established by the Secretary of Transportation pursuant to 49 U.S.C. 32904(b)(3)(C).

* * * * *

■ 26. Section 600.512–08 is amended by adding new paragraphs (c)(8) and (c)(9) to read as follows:

§ 600.512–08 Model Year Report.

* * * * *

(c) * * *

(8) For 2008–2010 light truck model year reports, the average fuel economy standard or the ''required fuel economy level'' pursuant to 49 CFR Part 533, as applicable. Model year reports for light trucks meeting required fuel economy levels pursuant to 49 CFR 533.5(g) and (h) shall include information in sufficient detail to verify the accuracy of the calculated required fuel economy level. Such information is expected to include but is not limited to, production information for each unique footprint

within each model type contained in the model year report and the formula used to calculate the required fuel economy level. Model year reports for required fuel economy levels shall include a statement that the method of measuring vehicle track width, measuring vehicle wheelbase and calculating vehicle footprint is accurate and complies with applicable Department of Transportation requirements.

(9) For 2011 and later model year reports, the ''required fuel economy level'' pursuant to 49 CFR Parts 531 or 533, as applicable. Model year reports shall include information in sufficient detail to verify the accuracy of the calculated required fuel economy level, including but is not limited to, production information for each unique footprint within each model type contained in the model year report and the formula used to calculate the required fuel economy level. Model year reports shall include a statement that the method of measuring vehicle track width, measuring vehicle wheelbase and calculating vehicle footprint is accurate and complies with applicable Department of Transportation requirements.

[FR Doc. E9–27945 Filed 11–24–09; 8:45 am]
BILLING CODE 6560–50–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 64

[Docket ID FEMA–2008–0020; Internal Agency Docket No. FEMA–8103]

Suspension of Community Eligibility

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final rule.

SUMMARY: This rule identifies communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are scheduled for suspension on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If the Federal Emergency Management Agency (FEMA) receives documentation that the community has adopted the required floodplain management measures prior to the effective suspension date given in this rule, the suspension will not occur and a notice of this will be provided by publication in the **Federal Register** on a subsequent date.

DATES: *Effective Dates:* The effective date of each community's scheduled suspension is the third date (''Susp.'') listed in the third column of the following tables.

FOR FURTHER INFORMATION CONTACT: If you want to determine whether a particular community was suspended on the suspension date or for further information, contact David Stearrett, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–2953.

SUPPLEMENTARY INFORMATION: The NFIP enables property owners to purchase flood insurance which is generally not otherwise available. In return, communities agree to adopt and administer local floodplain management aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4022, prohibits flood insurance coverage as authorized under the NFIP, 42 U.S.C. 4001 *et seq.;* unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed in this document no longer meet that statutory requirement for compliance with program regulations, 44 CFR part 59. Accordingly, the communities will be suspended on the effective date in the third column. As of that date, flood insurance will no longer be available in the community. However, some of these communities may adopt and submit the required documentation of legally enforceable floodplain management measures after this rule is published but prior to the actual suspension date. These communities will not be suspended and will continue their eligibility for the sale of insurance. A notice withdrawing the suspension of the communities will be published in the **Federal Register.**

In addition, FEMA has identified the Special Flood Hazard Areas (SFHAs) in these communities by publishing a Flood Insurance Rate Map (FIRM). The date of the FIRM, if one has been published, is indicated in the fourth column of the table. No direct Federal financial assistance (except assistance pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act not in connection with a flood) may legally be provided for construction or acquisition of buildings in identified SFHAs for communities not participating in the NFIP and identified for more than a year, on FEMA's initial flood insurance map of the community as having flood-prone areas (section 202(a) of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4106(a), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column. The Administrator finds that notice and public comment under 5 U.S.C. 553(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified.

Each community receives 6-month, 90-day, and 30-day notification letters addressed to the Chief Executive Officer stating that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. Since these notifications were made, this final rule may take effect within less than 30 days.

National Environmental Policy Act. This rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Considerations. No environmental impact assessment has been prepared.

Regulatory Flexibility Act. The Administrator has determined that this rule is exempt from the requirements of the Regulatory Flexibility Act because the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4022, prohibits flood insurance coverage unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed no longer comply with the statutory requirements, and after the effective date, flood insurance will no longer be available in the communities unless remedial action takes place.

Regulatory Classification. This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 13132, Federalism. This rule involves no policies that have federalism implications under Executive Order 13132.

Executive Order 12988, Civil Justice Reform. This rule meets the applicable standards of Executive Order 12988.

Paperwork Reduction Act. This rule does not involve any collection of information for purposes of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

List of Subjects in 44 CFR Part 64

Flood insurance, Floodplains.

■ Accordingly, 44 CFR part 64 is amended as follows:

PART 64—[AMENDED]

■ 1. The authority citation for part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.;* Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp.; p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp.; p. 376.

§ 64.6 [Amended]

■ 2. The tables published under the authority of § 64.6 are amended as follows:

State and location	Community No.	Effective date authorization/cancellation of sale of flood insurance in community	Current effective map date	Date certain Federal assistance no longer available in SFHAs
Region III				
Pennsylvania:				
Aldan, Borough of, Delaware County	420401	August 26, 1974, Emerg; September 17, 1980, Reg; Date of this **Federal Register** publication, Susp.	Nov. 18, 2009 ...	Nov. 25, 2009.
Aston, Township of, Delaware County ..	421602	April 21, 1975, Emerg; July 16, 1981, Reg; Date of this **Federal Register** publication, Susp.	.....do	Do.
Bethel, Township of, Delaware County	421606	May 9, 1978, Emerg; August 10, 1979, Reg; Date of this **Federal Register** publication, Susp.	.....do	Do.

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 64

[Docket ID FEMA–2008–0020; Internal Agency Docket No. FEMA–8105]

Suspension of Community Eligibility

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final rule.

SUMMARY: This rule identifies communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are scheduled for suspension on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If the Federal Emergency Management Agency (FEMA) receives documentation that the community has adopted the required floodplain management measures prior to the effective suspension date given in this rule, the suspension will not occur and a notice of this will be provided by publication in the **Federal Register** on a subsequent date.

DATES: *Effective Dates:* The effective date of each community's scheduled suspension is the third date (''Susp.'') listed in the third column of the following tables.

FOR FURTHER INFORMATION CONTACT: If you want to determine whether a particular community was suspended on the suspension date or for further information, contact David Stearrett,

Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–2953.

SUPPLEMENTARY INFORMATION: The NFIP enables property owners to purchase flood insurance which is generally not otherwise available. In return, communities agree to adopt and administer local floodplain management aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4022, prohibits flood insurance coverage as authorized under the NFIP, 42 U.S.C. 4001 *et seq.;* unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed in this document no longer meet that statutory requirement for compliance with program regulations, 44 CFR part 59. Accordingly, the communities will be suspended on the effective date in the third column. As of that date, flood insurance will no longer be available in the community. However, some of these communities may adopt and submit the required documentation of legally enforceable floodplain management measures after this rule is published but prior to the actual suspension date. These communities will not be suspended and will continue their eligibility for the sale of insurance. A notice withdrawing the suspension of the communities will be published in the **Federal Register.**

In addition, FEMA has identified the Special Flood Hazard Areas (SFHAs) in these communities by publishing a Flood Insurance Rate Map (FIRM). The date of the FIRM, if one has been published, is indicated in the fourth column of the table. No direct Federal financial assistance (except assistance pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act not in connection with a flood) may legally be provided for construction or acquisition of buildings in identified SFHAs for communities not participating in the NFIP and identified for more than a year, on FEMA's initial flood insurance map of the community as having flood-prone areas (section 202(a) of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4106(a), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column. The Administrator finds that notice and public comment under 5 U.S.C. 553(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified.

Each community receives 6-month, 90-day, and 30-day notification letters addressed to the Chief Executive Officer stating that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. Since these notifications were made, this final rule may take effect within less than 30 days.

National Environmental Policy Act. This rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Considerations. No environmental impact assessment has been prepared.

Regulatory Flexibility Act. The Administrator has determined that this rule is exempt from the requirements of the Regulatory Flexibility Act because the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4022, prohibits flood insurance coverage unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed no longer comply with the statutory requirements, and after the effective date, flood insurance will no longer be available in the communities unless remedial action takes place.

Regulatory Classification. This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 13132, Federalism. This rule involves no policies that have federalism implications under Executive Order 13132.

Executive Order 12988, Civil Justice Reform. This rule meets the applicable standards of Executive Order 12988.

Paperwork Reduction Act. This rule does not involve any collection of information for purposes of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

List of Subjects in 44 CFR Part 64

Flood insurance, Floodplains.

■ Accordingly, 44 CFR part 64 is amended as follows:

PART 64—[AMENDED]

■ 1. The authority citation for part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.;* Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp.; p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp.; p. 376.

§ 64.6 [Amended]

■ 2. The tables published under the authority of § 64.6 are amended as follows:

State and location	Community No.	Effective date authorization/cancellation of sale of flood insurance in community	Current effective map date	Date certain Federal assistance no longer available in SFHAs

Deborah S. Ingram,

Acting Deputy Assistant Administrator for Mitigation, Mitigation Directorate.

[FR Doc. E9–28318 Filed 11–24–09; 8:45 am]

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 65

[Docket ID FEMA–2008–0020]

Changes in Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final rule.

SUMMARY: Modified Base (1% annual-chance) Flood Elevations (BFEs) are finalized for the communities listed below. These modified BFEs will be used to calculate flood insurance premium rates for new buildings and their contents.

DATES: The effective dates for these modified BFEs are indicated on the following table and revise the Flood Insurance Rate Maps (FIRMs) in effect for the listed communities prior to this date.

ADDRESSES: The modified BFEs for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

FOR FURTHER INFORMATION CONTACT: Kevin C. Long, Acting Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–2820.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the modified BFEs for each community listed. These modified BFEs have been published in newspapers of local circulation and ninety (90) days have elapsed since that publication. The Assistant Administrator for Mitigation has resolved any appeals resulting from this notification.

The modified BFEs are not listed for each community in this notice. However, this final rule includes the address of the Chief Executive Officer of the community where the modified BFEs determinations are available for inspection.

The modified BFEs are made pursuant to section 206 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.,* and with 44 CFR part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The modified BFEs are the basis for the floodplain management measures that the community is required to either adopt or to show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities.

These modified BFEs are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings. The changes in BFEs are in accordance with 44 CFR 65.4.

National Environmental Policy Act. This final rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

Regulatory Flexibility Act. As flood elevation determinations are not within the scope of the Regulatory Flexibility Act, 5 U.S.C. 601–612, a regulatory flexibility analysis is not required.

Regulatory Classification. This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 13132, Federalism. This final rule involves no policies that have federalism implications under Executive Order 13132, Federalism.

Executive Order 12988, Civil Justice Reform. This final rule meets the applicable standards of Executive Order 12988.

List of Subjects in 44 CFR Part 65

Flood insurance, Floodplains, Reporting and recordkeeping requirements.

■ Accordingly, 44 CFR part 65 is amended to read as follows:

PART 65—[AMENDED]

■ 1. The authority citation for part 65 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.;* Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 65.4 [Amended]

■ 2. The tables published under the authority of § 65.4 are amended as follows:

State and county	Location and case No.	Date and name of newspaper where notice was published	Chief executive officer of community	Effective date of modification	Community No.

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

[Docket ID FEMA–2008–0020]

Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final rule.

SUMMARY: Base (1% annual-chance) Flood Elevations (BFEs) and modified BFEs are made final for the communities listed below. The BFEs and modified BFEs are the basis for the floodplain management measures that each community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The date of issuance of the Flood Insurance Rate Map (FIRM) showing BFEs and modified BFEs for each

community. This date may be obtained by contacting the office where the maps are available for inspection as indicated on the table below.

ADDRESSES: The final BFEs for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

FOR FURTHER INFORMATION CONTACT: Kevin C. Long, Acting Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–2820.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the modified BFEs for each community listed. These modified elevations have been published in newspapers of local circulation and ninety (90) days have elapsed since that publication. The Assistant Administrator for Mitigation has resolved any appeals resulting from this notification.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and FIRM available at the address cited below for each community. The BFEs and modified BFEs are made final in the communities listed below. Elevations at selected locations in each community are shown.

National Environmental Policy Act. This final rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

Regulatory Flexibility Act. As flood elevation determinations are not within the scope of the Regulatory Flexibility Act, 5 U.S.C. 601–612, a regulatory flexibility analysis is not required.

Regulatory Classification. This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 13132, Federalism. This final rule involves no policies that have federalism implications under Executive Order 13132.

Executive Order 12988, Civil Justice Reform. This final rule meets the applicable standards of Executive Order 12988.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

■ Accordingly, 44 CFR part 67 is amended as follows:

PART 67—[AMENDED]

■ 1. The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.;* Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.11 [Amended]

■ 2. The tables published under the authority of § 67.11 are amended as follows:

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground Modified	Communities affected
Garland County, Arkansas, and Incorporated Areas Docket No.: FEMA–B–1021			
Molly Creek	Weston Road	+409	City of Hot Springs.
	Approximately 450 feet upstream of Albert Pike Road/US 270.	+544	
Molly Creek Tributary 1	Stover Road (Formerly Marie St.)	+484	City of Hot Springs.
	Molly Springs Road	+506	

* National Geodetic Vertical Datum.
+ North American Vertical Datum.
# Depth in feet above ground.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

■ Accordingly, 44 CFR part 67 is amended as follows:

PART 67—[AMENDED]

■ 1. The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.;* Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.11 [Amended]

■ 2. The tables published under the authority of § 67.11 are amended as follows:

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground modified	Communities affected
Merrick County, Nebraska, and Incorporated Areas Docket No.: FEMA–B–1010			
Platte River	Approximately 0.50 mile downstream of Union Pacific Railroad.	+1,685	Unincorporated Areas of Merrick County.
	Approximately 0.68 miles upstream of State Highway 14 ..	+1,711	

* National Geodetic Vertical Datum.
+ North American Vertical Datum.
# Depth in feet above ground.

ADDRESSES

Unincorporated Areas of Merrick County

Maps are available for inspection at 1510 18th Street, Central City, NE 68826.

Thurston County, Nebraska, and Incorporated Areas Docket No.: FEMA–B1012			
Logan Creek	Approximately 2.20 miles downstream of State Highway 94.	+1,318	Unincorporated Areas of Thurston County, Omaha Indian Tribe.
	Approximately 1.65 miles upstream of State Highway 94 ..	+1,332	
Middle Creek	Approximately 0.81 mile downstream of Avenue B	+1,405	Unincorporated Areas of Thurston County, Village of Emerson, Winnebago Indian Tribe.
	Approximately 0.27 mile upstream of County Road 15	+1,425	
Unnamed Tributary to Logan Creek.	Approximately 0.75 mile upstream of State Highway 9	+1,333	Unincorporated Areas of Thurston County, Omaha Indian Tribe.
	Approximately 0.30 mile upstream of State Highway 9	+1,347	
Unnamed Tributary to Middle Creek.	Approximately 530 feet downstream of Lagan Street	+1,419	Village of Emerson, Winnebago Indian Tribe.
	Approximately 750 feet upstream of 1st Street	+1,441	

* National Geodetic Vertical Datum.
+ North American Vertical Datum.
# Depth in feet above ground.

ADDRESSES

Omaha Indian Tribe

Maps are available for inspection at 100 Main Street, Macy, NE 68039.

Unincorporated Areas of Thurston County

Maps are available for inspection at 106 South 5th Street, Pender, NE 68047.

Village of Emerson

Maps are available for inspection at 211 West Front Street, Emerson, NE 68733.

Winnebago Indian Tribe

Maps are available for inspection at 100 Buff Street, Winnebago, NE 68071.

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground modified	Communities affected
Buncombe County, North Carolina and Incorporated Areas Docket No.: FEMA–D–7826 and FEMA–B–7795			
Avery Creek	Approximately 0.5 mile upstream of the confluence with the French Broad River.	+2,051	Unincorporated Areas of Buncombe County.
	Approximately 0.5 mile upstream of Misty Valley Parkway	+2,100	
Beaverdam Creek (into French Broad River) Tributary 1.	Approximately 900 feet upstream of Hillcrest Road	+2,107	Unincorporated Areas of Buncombe County, Town of Woodfin.
	Approximately 340 feet upstream of Baird Cove Road (State Road 2088).	+2,348	
Beaverdam Creek (into South Hominy Creek).	At the confluence with South Hominy Creek	+2,107	Unincorporated Areas of Buncombe County.
	Approximately 50 feet downstream of Wise Road (State Road 3467).	+2,270	
Beaverdam Creek (into South Hominy Creek) Tributary.	At the confluence with Beaverdam Creek (into South Hominy Creek).	+2,214	Unincorporated Areas of Buncombe County.
	Approximately 0.6 mile upstream of the confluence with Beaverdam Creek (into South Hominy Creek).	+2,250	
Bee Branch	At the confluence with Willow Creek	+2,281	Unincorporated Areas of Buncombe County.
	Approximately 50 feet upstream of Bee Branch Road	+2,418	
Beetree Creek	At the confluence with Swannanoa River	+2,148	Unincorporated Areas of Buncombe County.
	Approximately 0.9 mile upstream of Bee Tree Road (State Road 2428).	+2,682	
Bent Creek	Approximately 0.4 mile upstream of the confluence with French Broad River.	+2,019	Unincorporated Areas of Buncombe County.
	Approximately 0.6 mile upstream of Blue Ridge Parkway	+2,031	
Bill Moore Creek	Approximately 900 feet upstream of the confluence with Hominy Creek.	+2,069	Unincorporated Areas of Buncombe County, City of Asheville.
	Approximately 110 feet upstream of Reeves Cove Road (State Road 3439).	+2,160	
Broad River	The Buncombe/Henderson county boundary	+1,719	Unincorporated Areas of Buncombe County.
	Approximately 0.3 mile upstream of NC Highway 9	+2,592	
Brush Creek	At the confluence with Cane Creek	+2,164	Unincorporated Areas of Buncombe County.
	Approximately 220 feet upstream of Dotson Cove Road	+2,511	
Bull Creek	At the confluence with Swannanoa River	+2,109	Unincorporated Areas of Buncombe County.
	Approximately 1,260 feet upstream of the confluence with the Swannanoa River.	+2,109	
Camp Branch	At the confluence with Swannanoa River	+2,315	Town of Black Mountain.
	Approximately 660 feet upstream of Camp Branch Road	+2,526	
Cane Creek	Approximately 0.5 mile upstream of the confluence with the French Broad River.	+2,061	Unincorporated Areas of Buncombe County, City of Asheville.
	Approximately 1,510 feet upstream of the confluence with Garren Creek.	+2,309	
Cane Creek (into Hominy Creek).	Approximately 0.3 mile upstream of the confluence with Hominy Creek.	+2,009	City of Asheville.
	Approximately 1,490 feet upstream of Sand Hill Road	+2,011	
Curtis Creek	At the confluence with South Hominy Creek	+2,244	Unincorporated Areas of Buncombe County.
	Approximately 20 feet upstream of Curtis Creek Road (State Road 1113).	+2,383	
Dick Branch	At the confluence with Flat Creek (into French Broad River).	+1,940	Unincorporated Areas of Buncombe County.
	Approximately 240 feet upstream of Flat Creek Church Road (State Road 1764).	+1,962	
Dillingham Creek	Just upstream of Dillingham Road (State Road 2173)	+2,273	Unincorporated Areas of Buncombe County.
	Approximately 40 feet upstream of Dillingham Road (State Road 2173).	+2,545	

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground modified	Communities affected
Dingle Creek	Approximately 0.2 mile upstream of the confluence with French Broad River.	+2,008	Unincorporated Areas of Buncombe County, City of Asheville.
	Approximately 1,660 feet upstream of Ballantree Drive	+2,631	
Dix Creek	At the confluence with Newfound Creek	+1,929	Unincorporated Areas of Buncombe County.
	Approximately 900 feet upstream of Old Leicester Highway (State Road 1002).	+2,026	
Eller Cove	At the confluence with Reems Creek	+2,078	Town of Weaverville.
	Approximately 40 feet upstream of Eller Hollow Road (State Road 2104).	+2,172	
Emma Branch	Approximately 300 feet upstream of the confluence with Smith Mill Creek.	+1,977	Unincorporated Areas of Buncombe County, City of Asheville.
	Approximately 0.7 mile upstream of Eliada Home Road	+2,299	
Emma Branch Tributary 2	At the confluence with Emma Branch	+2,069	City of Asheville.
	Approximately 0.5 mile upstream of Brickyard Road	+2,309	
Flat Creek	At the confluence with Broad River	+1,946	Unincorporated Areas of Buncombe County.
	Approximately 1.1 miles upstream of the confluence with the Broad River.	+2,066	
Flat Creek (into French Broad River).	At NC Highway 251	+1,770	Unincorporated Areas of Buncombe County.
	Approximately 1,870 feet upstream of Chambers Road	+2,205	
Flat Creek (into Swannanoa River).	At the confluence with Swannanoa River	+2,360	Town of Black Mountain, Town of Montreat.
	Just downstream of Kentucky Road	+2,686	
Flat Creek (into Swannanoa River) Tributary 1.	At the confluence with Flat Creek (into Swannanoa River)	+2,379	Town of Black Mountain.
	Approximately 830 feet upstream of NC Highway 9	+2,458	
Fourmile Branch	Approximately 2,000 feet upstream of the confluence with French Broad River.	+2,002	Unincorporated Areas of Buncombe County, City of Asheville, Town of Biltmore Forest.
	Approximately 90 feet downstream of US Highway 25	+2,193	
French Broad River Tributary 149.	At the confluence with French Broad River	+2,046	Unincorporated Areas of Buncombe County.
	Approximately 1,420 feet upstream of River Glen Drive	+2,192	
Gap Creek	At the confluence with Cane Creek	+2,163	Unincorporated Areas of Buncombe County.
	Approximately 210 feet upstream of Windsong Drive	+2,359	
Garren Creek	At the confluence with Cane Creek	+2,294	Unincorporated Areas of Buncombe County.
	Approximately 250 feet upstream of Bleeker Lane	+2,382	
Gashes Creek	At the confluence with Swannanoa River	+2,023	Unincorporated Areas of Buncombe County, City of Asheville.
	Approximately 1,680 feet upstream of US Highway 74	+2,225	
George Branch	At the confluence with Hominy Creek	+2,178	Unincorporated Areas of Buncombe County.
	Approximately 400 feet upstream of Curtis Farm Road (State Road 1101).	+2,208	
Gill Branch	Approximately 50 feet upstream of the confluence with Reems Creek.	+1,966	Town of Weaverville.
	Approximately 100 feet upstream of Weaver Boulevard (State Road 1725).	+2,111	
Glady Fork	At the confluence with South Hominy Creek	+2,292	Unincorporated Areas of Buncombe County.
	Approximately 1,360 feet upstream of Black Oak Cove Road (State Road 3464).	+2,362	
Gouches Branch	Approximately 1,000 feet upstream of the confluence with Newfound Creek.	+1,977	Unincorporated Areas of Buncombe County.
	Approximately 480 feet upstream of Gouches Branch Road (State Road 1377).	+2,012	
Grassy Branch	At the confluence with Swannanoa River	+2,057	Unincorporated Areas of Buncombe County, City of Asheville.

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground modified	Communities affected
	Approximately 0.4 mile upstream of Upper Grassy Branch Road (State Road 2400).	+2,229	
Gregg Branch	Approximately 25 feet upstream of the confluence with Beetree Creek.	+2,243	Unincorporated Areas of Buncombe County.
	Approximately 1,080 feet upstream of Old Bee Tree Road (State Road 2418).	+2,304	
Haw Creek	At the confluence with Swannanoa River	+2,010	City of Asheville.
	Approximately 1,800 feet upstream of the confluence with the Swannanoa River.	+2,013	
Herron Cove Branch	Approximately 50 feet upstream of the confluence with Reems Creek.	+2,032	Town of Weaverville.
	Approximately 230 feet upstream of Fontana Drive	+2,086	
Hogeye Branch	At the confluence with Sandy Mush Creek	+2,184	Unincorporated Areas of Buncombe County.
	Approximately 0.6 mile upstream of Hogeye Road (State Road 1393).	+2,314	
Hominy Creek	Just upstream of Morgan Cove Road (State Road 1141) ..	+2,178	Unincorporated Areas of Buncombe County.
	Approximately 150 feet upstream of the Buncombe/Haywood County boundary.	+2,252	
Hominy Creek Tributary 21	Approximately 100 feet upstream of the confluence with Hominy Creek.	+2,099	Unincorporated Areas of Buncombe County.
	Approximately 1,520 feet upstream of Lindsey Road (State Road 1128).	+2,107	
Hominy Creek Tributary 25	Approximately 75 feet upstream of the confluence with Hominy Creek.	+2,152	Unincorporated Areas of Buncombe County.
	Approximately 780 feet upstream of North Morgan Branch Road (State Road 1140).	+2,191	
Ivy Creek	At the Buncombe/Madison County boundary	+1,908	Unincorporated Areas of Buncombe County.
	Approximately 550 feet upstream of NC Highway 197	+2,111	
Killian Branch	Approximately 250 feet upstream of the confluence with Beaverdam Creek (into French Broad River).	+2,120	City of Asheville.
	Approximately 1.0 mile upstream of Inglewood Road	+2,288	
Lee Creek	Approximately 320 feet upstream of the confluence with French Broad River.	+1,890	Unincorporated Areas of Buncombe County.
	Approximately 0.5 mile upstream of Roberts Road (State Road 1314).	+2,362	
Little Piney Branch	At the confluence with Flat Creek (into Swannanoa River)	+2,558	Town of Montreat.
	Approximately 1,810 feet upstream of Harmony Road Extension.	+3,351	
Long Branch (into Beetree Creek).	At the confluence with Beetree Creek	+2,299	Unincorporated Areas of Buncombe County.
	Approximately 0.5 mile upstream of Long Branch Road (State Road 2429).	+3,083	
Long Branch (into Sandy Mush Creek).	At the confluence with Sandy Mush Creek	+2,397	Unincorporated Areas of Buncombe County.
	Approximately 90 feet upstream of Boyd Cove Road (State Road 1398).	+2,530	
Maney Branch	At the confluence with Reems Creek	+2,395	Unincorporated Areas of Buncombe County.
	Approximately 220 feet upstream of Beech Spring Drive ..	+2,460	
Martin Branch	At the confluence with Turkey Creek	+1,976	Unincorporated Areas of Buncombe County.
	Approximately 1,250 feet upstream of Martin Branch Road (State Road 1610).	+2,018	
Martin Creek	At the confluence with North Fork Ivy Creek	+2,378	Unincorporated Areas of Buncombe County.
	Approximately 1,460 feet upstream of Martins Creek Road (State Road 2027).	+2,506	
McKinnish Branch	At the confluence with Smith Mill Creek	+2,105	Unincorporated Areas of Buncombe County, City of Asheville.
	Approximately 150 feet upstream of McKinnish Cove Road (State Road 1320).	+2,195	
Moore Creek	Just upstream of Monte Vista Road (State Road 1224)	+2,202	Unincorporated Areas of Buncombe County.

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground modified	Communities affected
	Approximately 0.5 mile upstream of Holcombe Cove Road (State Road 1236).	+2,380	
Morgan Branch (into Ivy Creek)	At the confluence with Ivy Creek	+2,059	Unincorporated Areas of Buncombe County.
	Approximately 770 feet upstream of Arrowood Road (State Road 2155).	+2,072	
Morgan Branch (into South Hominy Creek).	At the confluence with South Hominy Creek	+2,235	Unincorporated Areas of Buncombe County.
	Approximately 830 feet upstream of Blackfoot Trail	+2,276	
Newfound Creek	Approximately 75 feet upstream of the confluence with French Broad River.	+1,876	Unincorporated Areas of Buncombe County.
	Approximately 90 feet upstream of Newfound Road (State Road 1104).	+2,388	
Newfound Creek Tributary 17	At the confluence with Newfound Creek	+1,955	Unincorporated Areas of Buncombe County.
	Approximately 330 feet upstream of Sunview Drive	+1,958	
Newfound Creek Tributary 26	Approximately 400 feet upstream of the confluence with Newfound Creek.	+2,012	Unincorporated Areas of Buncombe County.
	Approximately 620 feet upstream of Old Newfound Road (State Road 1378).	+2,023	
North Fork Ivy Creek	Approximately 50 feet upstream of the confluence with Dillingham Creek and Ivy Creek.	+2,186	Unincorporated Areas of Buncombe County.
	Approximately 100 feet downstream of Burleson Branch Road (State Road 2079).	+2,533	
North Fork Swannanoa River	At the confluence with Swannanoa River	+2,231	Unincorporated Areas of Buncombe County, Town of Black Mountain.
	Approximately 3.0 miles upstream of North Fork Right Fork Road (State Road 2476).	+2,762	
North Turkey Creek	At the confluence with South Turkey Creek and Turkey Creek.	+2,027	Unincorporated Areas of Buncombe County.
	Approximately 0.7 mile upstream of Bryant Lane	+2,234	
Ox Creek	At the confluence with Reems Creek	+2,182	Unincorporated Areas of Buncombe County.
	Approximately 30 feet upstream of Ox Creek Road (State Road 2109).	+2,420	
Ox Creek Tributary 1	At the confluence with Ox Creek	+2,382	Unincorporated Areas of Buncombe County.
	Approximately 620 feet upstream of the confluence with Ox Creek.	+2,402	
Parker Branch	At the confluence with Newfound Creek	+1,939	Unincorporated Areas of Buncombe County.
	Approximately 1,150 feet upstream of the confluence with Newfound Creek.	+1,944	
Pole Creek	Just upstream of Dogwood Road (State Road 1220)	+2,100	Unincorporated Areas of Buncombe County, City of Asheville.
	Approximately 270 feet upstream of Milksick Cove Road (State Road 1215).	+2,301	
Potato Branch	At the confluence with South Turkey Creek	+2,318	Unincorporated Areas of Buncombe County.
	Approximately 940 feet upstream of the confluence with South Turkey Creek.	+2,335	
Poverty Branch	At the confluence with North Fork Ivy Creek	+2,210	Unincorporated Areas of Buncombe County.
	Approximately 0.9 mile upstream of the confluence with North Fork Ivy Creek.	+2,293	
Puncheon Branch	At the confluence with Flat Creek (into Swannanoa River)	+2,617	Town of Montreat.
	Approximately 1,350 feet upstream of Oklahoma Road	+3,296	
Ragsdale Creek	Approximately 0.8 mile upstream of Sand Hill Road (State Road 3412).	+2,064	Unincorporated Areas of Buncombe County, City of Asheville.
	Approximately 40 feet upstream of Willow Pond Lane	+2,397	
Reed Creek	At Murdock Avenue	+2,087	City of Asheville.
	Approximately 360 feet downstream of Grovewood Road	+2,219	
Reed Creek Tributary 2	Approximately 320 feet upstream of the confluence with Reed Creek.	+2,010	City of Asheville.
	Approximately 280 feet upstream of Broadway Street	+2,017	

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground modified	Communities affected
Reed Creek Tributary 6	Approximately 225 feet upstream of the confluence with Reed Creek.	+2,088	City of Asheville.
	Approximately 140 feet upstream of Hillside Street	+2,141	
Reems Creek	At NC Highway 251	+1,799	Unincorporated Areas of Buncombe County, Town of Weaverville.
	Approximately 90 feet downstream of Blackberry Inn Road (State Road 2115).	+2,526	
Reeves Creek	At the confluence with Reems Creek	+2,262	Unincorporated Areas of Buncombe County.
	Approximately 0.4 mile upstream of Lula Cove Road	+2,392	
Robinson Creek	At the confluence with Cane Creek	+2,094	Unincorporated Areas of Buncombe County.
	Approximately 170 feet upstream of Concord Road (State Road 3150).	+2,264	
Rock Creek	At the confluence with Broad River	+2,089	Unincorporated Areas of Buncombe County.
	Approximately 1,230 feet upstream of Press Owenby Drive.	+2,582	
Ross Creek	At the confluence with Swannanoa River	+2,004	City of Asheville.
	Approximately 20 feet downstream of Vance Gap Road	+2,347	
Round Hill Branch	Approximately 500 feet upstream of the confluence with Newfound Creek.	+2,046	Unincorporated Areas of Buncombe County.
	Approximately 860 feet upstream of Green Valley Road (State Road 1383).	+2,138	
Sams Branch	At the confluence with South Hominy Creek	+2,375	Unincorporated Areas of Buncombe County.
	Approximately 1,220 feet upstream of Falling Brook Drive	+2,549	
Sandymush Creek	Approximately 400 feet upstream of the confluence with French Broad River.	+1,728	Unincorporated Areas of Buncombe County.
	Approximately 840 feet upstream of Garrett Cove Road (State Road 1392).	+2,635	
Saw Branch	At the confluence with South Hominy Creek	+2,412	Unincorporated Areas of Buncombe County.
	Approximately 1,350 feet upstream of the confluence with South Hominy Creek.	+2,476	
Sluder Branch	At the confluence with Newfound Creek	+1,964	Unincorporated Areas of Buncombe County.
	Approximately 1,580 feet upstream of Branchview Drive	+2,002	
Smith Mill Creek	Approximately 950 feet upstream of the confluence with French Broad River.	+1,977	Unincorporated Areas of Buncombe County, City of Asheville.
	Approximately 0.4 mile upstream of Johnston School Road (State Road 1319).	+2,201	
South Hominy Creek	Approximately 220 feet upstream of the confluence with Hominy Creek.	+2,102	Unincorporated Areas of Buncombe County.
	Approximately 400 feet upstream of Davis Creek Road (State Road 1103).	+2,560	
South Hominy Creek Tributary 2.	At the confluence with South Hominy Creek	+2,150	Unincorporated Areas of Buncombe County.
	Approximately 40 feet upstream of Bailey Road (State Road 3452).	+2,181	
South Turkey Creek	At the confluence with North Turkey Creek and Turkey Creek.	+2,027	Unincorporated Areas of Buncombe County.
	Approximately 10 feet downstream of South Turkey Creek Road (State Road 1384).	+2,346	
Stanfield Branch	At the confluence with Dick Branch	+1,952	Unincorporated Areas of Buncombe County.
	Approximately 50 feet upstream of the confluence of Stanfield Branch Tributary 2.	+2,083	
Stanfield Branch Tributary 2	At the confluence with Stanfield Branch	+2,081	Unincorporated Areas of Buncombe County.
	Approximately 1,620 feet upstream of the confluence with Stanfield Branch.	+2,127	
Stony Fork	At the confluence with South Hominy Creek	+2,312	Unincorporated Areas of Buncombe County.
	Approximately 50 feet upstream of NC Highway 151	+2,613	

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground modified	Communities affected
Sugar Cove	At the confluence with Reems Creek	+2,299	Unincorporated Areas of Buncombe County.
	Approximately 540 feet upstream of Sugar Cove Road (State Road 2114).	+2,435	
Sugar Creek	At the confluence with Sandy Mush Creek	+2,162	Unincorporated Areas of Buncombe County.
	Approximately 140 feet upstream of the confluence of Andys Branch.	+2,247	
Swannanoa River	Approximately 1,000 feet upstream of the confluence with French Broad River.	+1,991	Unincorporated Areas of Buncombe County, City of Asheville, Town of Biltmore Forest, Town of Black Mountain.
	Approximately 1,680 feet upstream of Dunsmore Avenue (State Road 2531).	+2,518	
Swannanoa River Tributary 24	At the confluence with Swannanoa River	+2,182	Unincorporated Areas of Buncombe County.
	Approximately 0.8 mile upstream of Patton Hill Road	+2,403	
Swannanoa River Tributary 26	At the confluence with Swannanoa River	+2,198	Unincorporated Areas of Buncombe County.
	Approximately 110 feet upstream of Druid Hill Road (State Road 2445).	+2,456	
Swannanoa River Tributary 28	At the confluence with Swannanoa River	+2,206	Unincorporated Areas of Buncombe County.
	Approximately 0.8 mile upstream of the confluence of Swannanoa River Tributary of Tributary 28.	+2,447	
Swannanoa River Tributary 33	At the confluence with Swannanoa River	+2,242	Unincorporated Areas of Buncombe County, Town of Black Mountain.
	Approximately 40 feet downstream of Wagon Trail	+2,331	
Swannanoa River Tributary 35	At the confluence with Swannanoa River	+2,365	Town of Black Mountain.
	Approximately 710 feet upstream of Avena Road	+2,432	
Swannanoa River Tributary of Tributary 26.	At the confluence with Swannanoa River Tributary 26	+2,270	Unincorporated Areas of Buncombe County.
	Approximately 110 feet upstream of Druid Hill Road (State Road 2445).	+2,387	
Swannanoa River Tributary of Tributary 28.	At the confluence with Swannanoa River Tributary 28	+2,273	Unincorporated Areas of Buncombe County.
	Approximately 190 feet upstream of Woodland Drive (State Road 2460).	+2,642	
Swannanoa River Tributary of Tributary 33.	At the confluence with Swannanoa River Tributary 33	+2,285	Unincorporated Areas of Buncombe County, Town of Black Mountain.
	Approximately 0.4 mile upstream of the confluence with Swannanoa River Tributary 33.	+2,329	
Sweeten Creek	At the confluence with Swannanoa River	+1,997	City of Asheville.
	Approximately 1,800 feet upstream of US Highway 25	+2,299	
Sweeten Creek Tributary 2	At the confluence with Sweeten Creek	+2,010	City of Asheville.
	Approximately 60 feet upstream of Shady Oak Drive	+2,069	
Sweeten Creek Tributary 3	At the confluence with Sweeten Creek	+2,018	City of Asheville.
	Approximately 1,370 feet upstream of Forest Street	+2,206	
Sweeten Creek Tributary 4	At the confluence with Sweeten Creek	+2,078	Unincorporated Areas of Buncombe County, City of Asheville.
	Approximately 1,150 feet upstream of West Chapel Road	+2,139	
Taylor Creek	The Buncombe/Rutherford county boundary	+2,000	Unincorporated Areas of Buncombe County.
	Approximately 1,000 feet upstream of the Buncombe/Rutherford county boundary.	+2,034	
Tomahawk Branch	At the confluence with Swannanoa River	+2,287	Town of Black Mountain.
	Approximately 490 feet upstream of Hiawassee Avenue (State Road 2495).	+2,383	
Town Branch Creek	At the confluence with Dillingham Creek	+2,436	Unincorporated Areas of Buncombe County.
	Approximately 190 feet upstream of Martin Lane (State Road 2165).	+2,768	
Trantham Creek	At the confluence with Cane Creek	+2,265	Unincorporated Areas of Buncombe County.

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground modified	Communities affected
	Approximately 960 feet upstream of Ivy Cove Road	+2,391	
Trent Branch	Approximately 300 feet upstream of the confluence with Ragsdale Creek.	+2,024	City of Asheville.
	Approximately 0.5 mile upstream of I–40	+2,064

National Oceanic and Atmospheric Administration

50 CFR Part 300

RIN 0648–XS30

Fraser River Sockeye and Pink Salmon Fisheries; Inseason Orders

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary orders; inseason orders; request for comments.

SUMMARY: NMFS publishes Fraser River salmon inseason orders to regulate salmon fisheries in U.S. waters. The orders were issued by the Fraser River Panel (Panel) of the Pacific Salmon Commission (Commission) and subsequently approved and issued by NMFS during the 2009 salmon fisheries within the U.S. Fraser River Panel Area. These orders established fishing dates, times, and areas for the gear types of U.S. treaty Indian and all citizen fisheries during the period the Panel exercised jurisdiction over these fisheries.

DATES: The effective dates for the inseason orders are set out in this document under the heading Inseason Orders. Comments will be accepted through December 10, 2009.

ADDRESSES: You may submit comments, identified by 0648–XS30 by any one of the following methods:

Electronic Submissions: Submit all electronic public comments via the Federal eRulemaking Portal *http://www.regulations.gov*

Fax: 206–526–6736

Mail: NMFS NWR, 7600 Sand Point Way NE, Seattle, WA 98115.

Instructions: All comments received are a part of the public record and will generally be posted to *http://www.regulations.gov* without change. All Personal Identifying Information (for example, name address, etc.) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information.

NMFS will accept anonymous comments (enter N/A in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, WordPerfect, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT: Peggy Busby, by phone at 206–526–4323, *peggy.busby@noaa.gov*

SUPPLEMENTARY INFORMATION: The Treaty between the Government of the United States of America and the Government of Canada concerning Pacific Salmon was signed at Ottawa on January 28, 1985, and subsequently was given effect in the United States by the Pacific Salmon Treaty Act (Act) at 16 U.S.C. 3631–3644.

Under authority of the Act, Federal regulations at 50 CFR part 300, subpart F provide a framework for the implementation of certain regulations of the Commission and inseason orders of the Commission's Fraser River Panel for U.S. sockeye and pink salmon fisheries in the Fraser River Panel Area.

The regulations close the U.S. portion of the Fraser River Panel Area to U.S. sockeye and pink salmon fishing unless opened by Panel orders that are given effect by inseason regulations published by NMFS. During the fishing season, NMFS may issue regulations that establish fishing times and areas consistent with the Commission agreements and inseason orders of the Panel. Such orders must be consistent with domestic legal obligations and are issued by Regional Administrator, Northwest Region, NMFS. Official notification of these inseason actions is provided by two telephone hotline numbers described at 50 CFR 300.97(b)(1) and in 74 FR 20610 (May 5, 2009). The inseason orders are published in the **Federal Register** as soon as practicable after they are issued. Due to the frequency with which inseason orders are issued, publication of individual orders is impractical. Therefore, the 2009 orders are being published in this single document to avoid fragmentation.

Inseason Orders

The following inseason orders were adopted by the Panel and issued for U.S. fisheries by NMFS during the 2009 fishing season. Each of the following inseason actions was effective upon announcement on telephone hotline numbers as specified at 50 CFR 300.97(b)(1)and in 74 FR 20610 (May 5, 2009); those dates and times are listed herein. The times listed are local times, and the areas designated are Puget Sound Management and Catch Reporting Areas as defined in the Washington State Administrative Code at Chapter 220–22.

Order Number 2009–01: Issued 3 p.m., August 25, 2009

Treaty Indian Fisheries

Areas 4B, 5 and 6C: Open to drift gillnets from 12 p.m. (noon), Wednesday, August 26, 2009 to 12 p.m. (noon) Saturday, August 29, 2009.

All Citizen Fisheries

Areas 7 and 7A Reef net: Open to pink salmon fishing with non-retention of sockeye salmon 5 a.m. to 9 p.m. on Wednesday, August 26, 2009, 5 a.m. to 9 p.m. on Thursday, August 27, 2009; and 5 a.m. to 9p.m. on Friday, August 28, 2009.

Order Number 2009–02: Issued 1:50 p.m., August 26, 2009

Treaty Indian Fisheries

Areas 6, 7, and 7A: Open to drift gillnets and purse seine from 5 a.m., Friday, August 28, 2009 to 8 a.m., Saturday, August 29, 2009.

All Citizen Fisheries

Area 7 Purse Seine: Open to pink salmon fishing with non-retention of sockeye salmon 5 a.m. to 9 p.m. on Thursday, August 27, 2009.

Area 7 Gillnet: Open to pink salmon fishing with non-retention of sockeye salmon 8 a.m. to 11:59 p.m. (midnight) on Thursday August 27, 2009.

Area 7 Purse Seine Open to pink salmon fishing with non-retention of sockeye salmon 3 p.m. to 9 p.m. on Thursday, August 27, 2009.

Area 7A Gillnet: Open 3 p.m. to 11:59 p.m. (midnight) on Thursday August 27, 2009.

Order Number 2009–03: Issued 12:15 p.m., August 28, 2009

Treaty Indian Fisheries

Areas 4B, 5 and 6C: Open to drift gillnets from 12 p.m. (noon), Saturday, August 29, 2009 to 12 p.m. (noon) Wednesday, September 2, 2009.

Areas 6, 7, and 7A: Open to drift gillnets and purse seine from 5 a.m., Sunday, August 30, 2009 to 8 a.m., Monday, August 31, 2009; and from 5 a.m., Tuesday, September 1, 2009 to 8 a.m., Wednesday, September 2, 2009; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the Province of British Columbia.

All Citizen Fisheries

Areas 7 and 7A Purse seine: Open to pink salmon fishing with non-retention of sockeye salmon 5 a.m. to 9 p.m., Saturday, August 29, 2009 and Monday, August 31, 2009; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the province of British Columbia.

Areas 7 and 7A Gillnet: Open to pink salmon fishing with non-retention of sockeye salmon 8 a.m. to 11:59 p.m. (midnight) on Saturday, August 29, 2009 and Monday, August 31, 2009; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the province of British Columbia.

Areas 7 and 7A Reef net: Open to pink salmon fishing with non-retention of sockeye salmon 5 a.m. to 9 p.m. on Saturday, August 29, 2009; 5 a.m. to 9 p.m. on Sunday, August 30, 2009; 5 a.m. to 9 p.m. on Monday, August 31, 2009; and 5 a.m. to 9 p.m. on Tuesday, September 1, 2009; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the province of British Columbia.

Order Number 2009–04: Issued 12:30 p.m., September 1, 2009

Treaty Indian Fisheries

Areas 4B, 5 and 6C: Open to drift gillnets from 12 p.m. (noon) Wednesday, September 2, 2009 to 12 p.m. (noon) Saturday, September 5, 2009.

Areas 6, 7, and 7A: Open to drift gillnets and purse seines from 8 a.m., Wednesday, September 2, 2009 to 11 a.m., Saturday, September 5, 2009; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the Province of British Columbia.

All Citizen Fisheries

Areas 7 and 7A Purse seine: Open to pink salmon fishing with non-retention of sockeye salmon 10 a.m. to 9 p.m. Thursday, September 3, 2009; and 5 a.m. to 9 p.m. Friday, September 4; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the province of British Columbia.

Areas 7 and 7A Gillnet: Open to pink salmon fishing with non-retention of sockeye salmon 10 a.m. to 11:59 p.m. (midnight) on Thursday, September 3, 2009; and 8 a.m. to 11:59 p.m. (midnight) on Friday, September 4, 2009; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the province of British Columbia.

Areas 7 and 7A Reef net: Open for pink salmon fishing with non-retention of sockeye salmon 5 a.m. to 9 p.m. on Wednesday, September 2, 2009; 5 a.m. to 9 p.m. on Thursday, September 3, 2009; and 5 a.m. to 9 p.m. on Friday, September 4, 2009; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the province of British Columbia.

Order Number 2009–05: Issued 12:05 p.m., September 4, 2009

Treaty Indian Fishery

Areas 48, 5 and 6C: Open to drift gillnets from 12 p.m. (noon) Saturday, September 5, 2009 to 12 p.m. (noon) Wednesday, September 9, 2009.

Areas 6, 7, and 7A: Open to drift gillnets and purse seines from 11 a.m., Saturday, September 5, 2009 to 11 a.m. Wednesday, September 9, 2009; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the Province of British Columbia.

All Citizen Fisheries

Areas 7 and 7A Purse seine: Open to pink salmon fishing with non-retention of sockeye salmon 10 a.m. to 9 p.m. Monday, September 7, 2009; and 5 a.m. to 9 p.m. Tuesday, September 8; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the province of British Columbia.

Areas 7 and 7A Gillnet: Open to pink salmon fishing with non-retention of sockeye salmon 10 a.m. to 11:59 p.m. (midnight) on Monday, September 7, 2009; and 8 a.m. to 11:59 p.m. (midnight) on Tuesday, September 8, 2009; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the province of British Columbia.

Areas 7 and 7A Reef net: Open to pink salmon fishing with non-retention of sockeye salmon 5 a.m. to 9 p.m. on Saturday, September 5, 2009; 5 a.m. to 9 p.m. on Sunday, September 6, 2009; 5 a.m. to 9 p.m. on Monday, September 7; and 5 a.m. to 9 p.m. on Tuesday, September 8, 2009; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the province of British Columbia.

Order Number 2009–06: Issued 2:15 p.m., September 8, 2009

Treaty Indian Fisheries

Areas 4B, 5 and 6C: Open to drift gillnets from 12 p.m. (noon) Wednesday, September 9, 2009 to 12 p.m. (noon) Saturday, September 12, 2009.

Areas 6, 7, and 7A: Open to drift gillnets and purse seines from 11 a.m. Wednesday, September 9, 2009 to 11 a.m. Saturday, September 12, 2009; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the Province of British Columbia.

All Citizen Fisheries

Areas 7 and 7A Purse Seine: Open to pink salmon fishing with non-retention of sockeye salmon 10 a.m. to 9 p.m. Thursday, September 10, 2009; and 5 a.m. to 9 p.m. Friday, September 11; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the province of British Columbia.

Areas 7 and 7A Gillnet: Open to pink salmon fishing with non-retention of sockeye salmon 10 a.m. to 11:59 p.m. (midnight) on Thursday, September 10, 2009; and 8 a.m. to 11:59 p.m. (midnight) on Friday, September 11, 2009; southerly and easterly of a straight line drawn from the Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the province of British Columbia.

Areas 7 and 7A Reef net: Open to pink salmon fishing with non-retention of sockeye salmon 5 a.m. to 9 p.m. on Wednesday, September 9, 2009; 5 a.m. to 9 p.m. on Thursday, September 10, 2009; and 5 a.m. to 9 p.m. on Friday, September 11, 2009; southerly and easterly of a straight line drawn from the

Iwersen Dock on Point Roberts in the State of Washington to the Georgina Point Light at the entrance to Active Pass in the province of British Columbia.

Order Number 2009–07: Issued 1:45 p.m., September 10, 2009

All Citizen Fisheries

Areas 7 and 7A Purse Seine: Will remain closed after 9 p.m. Thursday, September 10, 2009; and will not reopen Friday, September 11, 2009.

Areas 7 and 7A Gillnet: Will remain closed after 11:59 p.m. (midnight) on Thursday, September 10, 2009; and will not reopen on Friday, September 11, 2009.

Areas 7 and 7A Reef net: Will remain closed after 9 p.m. on Thursday, September 10, 2009; and will not reopen Friday, September 11, 2009.

Order Number 2009–08: Issued 11:45 a.m., September 11, 2009

Treaty Indian Fisheries

Areas 4B, 5, and 6C: Open to drift gillnets from 12 p.m. (noon) Saturday, September 12, 2009 to 11:59 p.m. (midnight) on Monday, September 14, 2009.

Areas 6, 7, and 7A: Open to drift gillnets and purse seines from 11 a.m. Saturday, September 12, 2009 to 9 p.m. Monday, September 14, 2009. Iwersen Dock Line restriction is not in effect. Iwerson Dock Line restriction rescinded effective 11:05 a.m. Friday, September 11, 2009.

The Fraser River Panel approved the following relinquishment of regulatory control in U.S. Puget Sound Panel waters:

Area 4B, 5, and 6C: Relinquish regulatory control effective 12:01 a.m., Tuesday, September 15, 2009.

Order Number 2009–09: Issued 1:20 p.m., September 12, 2009

Treaty Indian Fisheries

Areas 6, 7, and 7A: Fishery closed at 9:00 p.m. Sunday, September 13, 2009.

Order Number 2009–10: Issued 12:01 a.m., September 18, 2009

The Fraser River Panel approved the following relinquishment of regulatory control in U.S. Puget Sound Panel waters:

Area 7: Relinquish Regulatory Control effective 12:01 a.m. Friday, September 18, 2009.

Classification

The Assistant Administrator for Fisheries NOAA (AA), finds that good cause exists for the inseason orders to be issued without affording the public prior notice and opportunity for comment under 5 U.S.C. 553(b)(B) as such prior notice and opportunity for comments is impracticable and contrary to the public interest. Prior notice and opportunity for public comment is impracticable because NMFS has insufficient time to allow for prior notice and opportunity for public comment between the time the stock abundance information is available to determine how much fishing can be allowed and the time the fishery must open and close in order to harvest the appropriate amount of fish while they are available.

The AA also finds good cause to waive the 30–day delay in the effective date, required under 5 U.S.C. 553(d)(3), of the inseason orders. A delay in the effective date of the inseason orders would not allow fishers appropriately controlled access to the available fish at that time they are available.

This action is authorized by 50 CFR 300.97, and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 3636(b).

Dated: November 20, 2009.

Emily H. Menashes,

Acting DirectorOffice of Sustainable Fisheries, National Marine Fisheries Service.

[Docket No. 09100091344–9056–02]

RIN 0648–XT10

Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by Vessels Catching Pacific Cod for Processing by the Inshore Component in the Western Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for Pacific cod by vessels catching Pacific cod for processing by the inshore component in the Western Regulatory Area of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the 2009 total allowable catch (TAC) of Pacific cod apportioned to vessels catching Pacific cod for processing by the inshore component of the Western Regulatory Area of the GOA.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), November 22, 2009, until 2400 hrs, A.l.t., December 31, 2009.

FOR FURTHER INFORMATION CONTACT: Josh Keaton, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2009 TAC of Pacific cod apportioned to vessels catching Pacific cod for processing by the inshore component of the Western Regulatory Area of the GOA is 14,558 metric tons (mt) as established by the final 2009 and 2010 harvest specifications for groundfish of the GOA (74 FR 7333, February 17, 2009).

In accordance with § 679.20(d)(1)(i), the Regional Administrator has determined that the 2009 TAC of Pacific cod apportioned to vessels catching Pacific cod for processing by the inshore component of the Western Regulatory Area of the GOA will soon be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 14,508 mt, and is setting aside the remaining 50 mt as bycatch to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance has been reached. Consequently, NMFS is prohibiting directed fishing for Pacific cod by vessels catching Pacific cod for processing by the inshore component in the Western Regulatory Area of the GOA.

After the effective date of this closure the maximum retainable amounts at § 679.20(e) and (f) apply at any time during a trip.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is

impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the closure of Pacific cod apportioned to vessels catching Pacific cod for processing by the inshore component of the Western Regulatory Area of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of November 19, 2009.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 20, 2009.

Proposed Rules

Federal Register
Vol. 74, No. 226
Wednesday, November 25, 2009

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 989

[Doc. No. AMS–FV–08–0042; FV08–989–2 PR]

Raisins Produced From Grapes Grown in California; Withdrawal of a Proposed Rule

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Withdrawal of proposed rule.

SUMMARY: This document withdraws a proposed rule published in the **Federal Register** on July 18, 2008, on use of an estimated trade demand figure to compute volume regulation percentages for 2008–09 Natural (sun-dried) Seedless (NS) raisins covered under the Federal marketing order for California raisins (order). The order regulates the handling of raisins produced from grapes grown in California and is administered locally by the Raisin Administrative Committee (Committee). The proposal provided parameters for implementing volume regulation for 2008–09 NS raisins, if supplies were short, for the purpose of maintaining the industry's export markets and stabilizing the domestic market. Since the 2008–09 NS crop was larger than anticipated, this action is no longer warranted. Therefore, the proposed rule is being withdrawn.

DATES: The proposed rule published on July 18, 2008 (73 FR 41302), is withdrawn effective November 25, 2009.

FOR FURTHER INFORMATION CONTACT: Rose M. Aguayo, Marketing Specialist, or Kurt J. Kimmel, Regional Manager, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA; *Telephone:* (559) 487–5901, *Fax:* (559) 487–5906, or *E-mail: Rose.Aguayo@ams.usda.gov* or *Kurt.Kimmel@ams.usda.gov.*

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW., STOP 0237, Washington, DC 20250–0237; *Telephone:* (202) 720–2491, *Fax:* (202) 720–8938, or *E-mail: Jay.Guerber@usda.gov.*

SUPPLEMENTARY INFORMATION: Marketing Agreement and Order No. 989, both as amended (7 CFR part 989), regulate the handling of raisins produced from grapes grown in California, hereinafter referred to as the ''order.'' The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the ''Act.''

This action withdraws a proposed rule published in the **Federal Register** on July 18, 2008 (73 FR 41302), on use of an estimated trade demand figure to compute volume regulation percentages for 2008–09 NS raisins. Specifically, the proposed rule would have provided parameters for implementing volume regulation for 2008–09 crop NS raisins, if supplies were short, for the purpose of maintaining a raisin reserve pool to support a portion of the industry's export markets and help stabilize the domestic market.

Historically, reserve raisins have been used by the Committee to support market development programs that have strengthened export sales and reduced surpluses, thus stabilizing the domestic market. In two previous years when raisin supplies were low, the Committee recommended an alternative method of calculating its volume control percentages, including the use of an estimated trade demand figure, to ensure that a reserve was maintained and the export programs could continue from year to year.

Subsequent to publication of the proposed rule, the Committee determined that the 2008–09 crop was larger than anticipated and that use of the alternative method for calculating volume control percentages would be unnecessary for that crop year. Therefore, the proposed action is no longer warranted.

Accordingly, the proposed rule regarding use of an estimated trade demand figure to compute volume regulation percentages for 2008–09 NS raisins published in the **Federal Register** July 18, 2008 (73 FR 41302), is hereby withdrawn.

AGENCIES: Customs and Border Protection, Department of Homeland Security; Department of the Treasury.

ACTION: Notice of proposed rulemaking; second extension of comment period.

SUMMARY: This document provides a second 30-day extension period for interested parties to submit comments on the proposal to amend title 19 of the Code of Federal Regulations to preclude the filing of substitution drawback claims for internal revenue excise tax paid on imported merchandise in situations where no excise tax was paid upon the substituted merchandise or where the substituted merchandise is the subject of a different claim for refund or drawback of excise tax under any provision of the Internal Revenue Code. The proposed rule was published in the **Federal Register** on October 15, 2009, with comments due on or before November 16, 2009. A related proposed rulemaking prepared by the Alcohol and Tobacco Tax and Trade Bureau (TTB) within the Department of the Treasury was published in the same edition of the **Federal Register**, with comments due on or before December 14, 2009. A subsequent notice extending the time within which the public may submit comments on CBP's proposed

rulemaking to coincide with the December 14, 2009 TTB comment deadline was published in the **Federal Register** (74 FR 57125) on November 4, 2009. In response to a request from the public to provide additional time to prepare comments on the proposed rule, CBP is extending the comment period for an additional 30 days to January 12, 2010.

DATES: Comments on the proposed rule must be received on or before January 12, 2010.

ADDRESSES: You may submit comments, identified by *USCBP docket number,* by *one* of the following methods:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments via docket number USCBP–2009–0021.

• *Mail:* Trade and Commercial Regulations Branch, Regulations and Rulings, Office of International Trade, U.S. Customs and Border Protection, 799 9th Street, NW. (Mint Annex), Washington, DC 20229–1179.

Instructions: All submissions received must include the agency name and USCBP docket number for this proposed rulemaking. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. For detailed instructions on submitting comments and additional information on the rulemaking process, see the ''Public Participation'' heading of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov.* Submitted comments may also be inspected during regular business days between the hours of 9 a.m. and 4:30 p.m. at the Trade and Commercial Regulations Branch, Regulations and Rulings, Office of International Trade, U.S. Customs and Border Protection, 799 9th Street, NW., 5th Floor, Washington, DC. Arrangements to inspect submitted comments should be made in advance by calling Joseph Clark at (202) 325–0118.

FOR FURTHER INFORMATION CONTACT: William Rosoff, Entry Process and Duty Refunds, Regulations and Rulings, Office of International Trade, (202) 325–0047.

SUPPLEMENTARY INFORMATION:

Public Participation

Interested persons are invited to participate in this rulemaking by submitting written data, views, or arguments on all aspects of the proposed rule. Customs and Border Protection (CBP) also invites comments that relate to the economic, environmental, or federalism effects that might result from this proposed rule. If appropriate to a specific comment, the commenter should reference the specific portion of the proposed rule, explain the reason for any recommended change, and include data, information, or authority that support such recommended change.

Background

Customs and Border Protection (CBP) published a document in the **Federal Register** (74 FR 52928) on October 15, 2009 proposing to amend title 19 of the Code of Federal Regulations to preclude the filing of substitution drawback claims for internal revenue excise tax paid on imported merchandise in situations where no excise tax was paid upon the substituted merchandise or where the substituted merchandise is the subject of a different claim for refund or drawback of excise tax under any provision of the Internal Revenue Code. The document solicited public comment on the proposed amendments, and requested that submitted comments be received by CBP on or before November 16, 2009.

A related proposed rulemaking prepared by the Alcohol and Tobacco Tax and Trade Bureau (TTB) within the Department of the Treasury was published in the same edition of the **Federal Register** (74 FR 52937, October 15, 2009). Comments on TTB's proposed rule are due on or before December 14, 2009.

A subsequent notice extending the time within which the public may submit comments on CBP's proposed rulemaking to coincide with the December 14, 2009 TTB comment deadline was published in the **Federal Register** (74 FR 57125) on November 4, 2009.

Second Extension of Comment Period

CBP received a written submission from the trade, dated November 2, 2009, requesting that the comment period be extended for an additional 30 days to provide adequate time to prepare comments on the proposed rule. Upon review, a decision has been made to grant the request. Accordingly, the comment period is extended to January 12, 2010 and comments must be received by CBP on or before that date.

Dated: November 20, 2009.

Sandra L. Bell,

Executive Director, Regulations and Rulings, Office of International Trade, U.S. Customs and Border Protection.

Approved: November 20, 2009.

Timothy E. Skud,

Deputy Assistant Secretary of the Treasury.

BILLING CODE 9111–14–P

DEPARTMENT OF STATE

22 CFR Part 126

[Public Notice: 6813]

RIN 1400–AC52

Amendment to the International Arms Traffic in Arms Regulations: U.S. Government Transfer Programs and Foreign-Owned Military Aircraft and Naval Vessels

AGENCY: Department of State.

ACTION: Proposed rule.

SUMMARY: The Department of State is proposing to amend Section 126.6 of the International Traffic in Arms Regulations (ITAR) pertaining to U.S. Government transfer programs and foreign-owned military aircraft and naval vessels. Section 126.6 is being amended to clarify the particular circumstances when a license is not required by the Directorate of Defense Trade Controls.

DATES: The Department of State will accept comments on this proposed rule until January 25, 2010.

ADDRESSES: Interested parties may submit comments within 60 days of the date of the publication by any of the following methods:

• *E-mail: DDTCResponseTeam@state.gov* with an appropriate subject line.

• *Mail:* Department of State, Directorate of Defense Trade Controls, Office of Defense Trade Controls Policy, ATTN: Regulatory Change, 126.6, SA–1, 12th Floor, Washington, DC 20522–0112.

Persons with access to the Internet may also view this notice by going to the U.S. Government regulations.gov Web site at *http://regulations.gov/index.cfm.*

FOR FURTHER INFORMATION CONTACT: Director Charles B. Shotwell, Office of Defense Trade Controls Policy, Department of State, Telephone (202) 663–2792 or Fax (202) 261–8199; E-mail *DDTCResponseTeam@state.gov.* ATTN: Regulatory Change, 126.6.

SUPPLEMENTARY INFORMATION: Section 126.6 of the ITAR specifies when a license from the Directorate of Defense Trade Controls is not required for certain specified U.S. Government transfer programs and exports involving foreign-owned military aircraft and naval vessels. The title of this particular section has been changed from ''Foreign-owned military aircraft and naval vessels, and the Foreign Military Sales program'' to ''U.S. Government transfer programs and foreign-owned military aircraft and naval vessels'' to more accurately describe its coverage. Section 126.6 is being amended to clarify the particular circumstances when a license is not required by the Directorate of Defense Trade Controls. Current regulatory language was implemented when the U.S. Government executed these programs with mostly U.S. Government personnel. Over the years the U.S. Government, especially the Department of Defense, has expanded operations and migrated to utilization of the Defense Transportation System as well as commercial carriers to, in some instances, fully replace government transportation systems and personnel. As a result, U.S. Customs and Border Protection was unclear as to which programs were U.S. Government programs and, therefore, which items were qualified to be exported from the United States without an associated export license. The proposed changes address this issue. Also, the proposed amendment addresses in more detail the export requirements involving the Foreign Military Sales program and extends the exemption to exports pursuant to section 1206 of the National Defense Authorization Act for Fiscal Year 2006, as amended and extended, or section 1206 of the National Defense Authorization Act for Fiscal Year 2008. It further delineates requirements, authorized periods for license exemptions, documentary requirements, and the applicable terms and conditions relating to the U.S. Government's transfer and/or loan of defense articles to foreign governments or international organizations.

Regulatory Analysis and Notices

Administrative Procedure Act and Executive Order 12866

Applicability of 5 U.S.C. 553 and Executive Order 12866 is under discussion with the Office of Management and Budget.

Regulatory Flexibility Act

The applicability of the Regulatory Flexibility Act is contingent on the applicability of 5 U.S.C. 553, which will be determined at a later time.

Unfunded Mandates Act of 1995

This proposed amendment does not involve a mandate that will result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of $100 million or more in any year and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Small Business Regulatory Enforcement Fairness Act of 1996

This proposed amendment has been found not to be a major rule within the meaning of the Small Business Regulatory Enforcement Fairness Act of 1996.

Executive Orders 12372 and 13132

This proposed amendment will not have substantial effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 13132, it is determined that this amendment does not have sufficient federalism implications to require consultations or warrant the preparation of a federalism summary impact statement. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities do not apply to this proposed amendment.

Paperwork Reduction Act

This proposed rule would not impose any new reporting or recordkeeping requirements subject to the Paperwork Reduction Act, 44 U.S.C. Chapter 35.

List of Subjects in 22 CFR Part 126

Arms and munitions, Exports.

Accordingly, for the reasons set forth above, Title 22, Chapter I, Subchapter M, part 126 is proposed to be amended as follows:

PART 126—GENERAL POLICIES AND PROVISIONS

1. The authority citation for part 126 continues to read as follows:

Authority: Secs. 2, 38, 40, 42 and 71, Public Law 90–629, 90 Stat. 744 (22 U.S.C. 2752, 2778, 2780, 2791 and 2797); E.O. 11958, 42 FR 4311; 3 CFR, 1977 Comp., p. 79; 22 U.S.C. 2651a; 22 U.S.C. 287c; E.O. 12918, 59 FR 28205; 3 CFR, 1994 Comp., p. 899; Sec. 1225, Public Law 108–375.

2. Section 126.6 is amended by revising paragraphs (a)(1), (a)(2), (a)(3), (b), (c), and (d) to read as follows:

§ 126.6 U.S. Government transfer programs and foreign-owned military aircraft and naval vessels.

(a) * * *

(1) The defense article to be exported was sold, granted, leased, or loaned by the Department of Defense to the government of a foreign country or to an international organization pursuant to the Arms Export Control Act, as amended, (AECA) or the Foreign Assistance Act of 1961, as amended;

(2) The defense article is exported to representatives of the government of the foreign country or international organization in the United States;

(3) The defense article is to be exported from the United States:

(i) On a military aircraft or naval vessel of the government of the foreign country or international organization. The shippers export declaration (SED) must be entered in the Automated Export System (AES) by such government or international organization prior to export;

(ii) By the Department of Defense via the Department of Defense Transportation System (DTS) in accordance with the vetting procedures and the requirements in DoD 5105.38–M, ''Security Assistance Management Manual'' (SAMM), and DoD Regulations 4500.9E and 4500.9R, ''Defense Transportation Regulations'' (DTR). The SED must be entered in the AES by the cognizant or responsible military service or implementing agency; or

(iii) By a Department of Defense contracted carrier via the DTS in accordance with the vetting procedures and the requirements in DoD 5105.38–M, ''Security Assistance Management Manual'' (SAMM), and DoD Regulations 4500.9E and 4500.9R, ''Defense Transportation Regulations'' (DTR). The SED must be entered in the AES by the cognizant or responsible military service or implementing agency; and

(4) In the event the defense article to be exported is classified, the export is made by a person having the appropriate USG security clearance, in compliance with the Department of Defense National Industrial Security Program Operating Manual (DoD NISPOM), and pursuant to an approved transportation plan.

(b) *Foreign military aircraft and naval vessels.* A license is not required for the entry into and subsequent exit from the United States of military aircraft or naval vessels of any foreign state if no overhaul, repair, or modification of the aircraft or naval vessel is to be

performed. However, Department of State approval for overflight (pursuant to 49 U.S.C. 40103) and naval visits must be obtained from the Department of State, Bureau of Political-Military Affairs, Office of International Security Operations.

(c) *Foreign Military Sales program.* A license from the Directorate of Defense Trade Controls is not required if the defense article or defense service is to be exported to a foreign country or international organization under the Foreign Military Sales (FMS) program of the AECA pursuant to a jointly-signed Letter of Offer and Acceptance (LOA) authorizing such export where such export meets the criteria stated below:

(1) Exports of the defense article or defense service using this exemption may take place only during the period in which the FMS Program LOA and implementing USG FMS contracts and subcontracts are in effect and serve as authorization for the exports hereunder in lieu of a license. The Department of Defense shall ensure that defense articles and defense services exported are limited to those authorized under the valid LOA, maintain the dollar value balance shipped against the LOA, and shall promptly notify U.S. Customs and Border Protection (CBP) of any amendments or modifications to the LOA, including the remaining balance when the LOA is completed, closed, or is no longer valid as an authorization;

(2) The defense article or defense service to be exported is specifically identified in an executed LOA, in furtherance of the FMS program, signed by an authorized representative of the Department of Defense and an authorized representative of the foreign government;

(3) The total value of the defense articles and defense services exported must not exceed that value authorized by the relevant LOA and any relevant contract and subcontract;

(4) The export is not to a country proscribed in § 126.1 of this subchapter;

(5) The U.S. person responsible for the transfer or the Department of Defense (in the case of DTS shipments) maintains records of all exports in accordance with Part 122 of this subchapter;

(6) For exports of defense articles:

(i) The shipment is made by the relevant foreign diplomatic mission of the purchasing country or its authorized freight forwarder, provided that the freight forwarder is so designated in writing by the foreign government to, and is registered with, the Directorate of Defense Trade Controls pursuant to Part 122 of this subchapter;

(ii) Prior to shipment, the Department of Defense shall lodge the LOA, and any amendments or modifications thereto, with the Port Director of U.S. Customs and Border Protection of the primary port;

(iii) The relevant foreign diplomatic mission of the purchasing country, or its authorized freight forwarder, prepares and provides to the Port Director of U.S. Customs and Border Protection a properly executed DSP–94 that has been countersigned by an authorized representative of the Department of Defense verifying that the export is in accordance with the LOA. The exporter must also provide any other documents required by the Port Director of U.S. Customs and Border Protection in carrying out its responsibilities. The AES SED or, if authorized, the outbound manifest must be annotated as follows: ''This shipment is being exported under the authority of Department of State Form DSP–94 pursuant to a current and valid FMS Case [case identification], implemented [implementation date]. 22 CFR 126.6(c) applicable. The U.S. Government point of contact is_____, telephone number _____,''; and

(iv) In the event the defense article to be exported is classified, the export must be made by a person having the appropriate USG security clearance and must be made in compliance with the Department of Defense National Industrial Security Program Operating Manual (DoD NISPOM) and pursuant to an approved transportation plan; and

(7) For exports of defense services:

(i) The U.S. exporter must have entered into a contract with the Department of Defense that:

(A) Specifically defines the scope of the defense service to be exported;

(B) Cites the FMS case identifier;

(C) Identifies the foreign recipients of the defense service;

(D) Identifies any other U.S. or foreign parties that may be involved and their roles/responsibilities to the extent known when the contract is executed; and

(E) Specifies the period during which the defense service may be performed;

(ii) The U.S. person that is a party to a contract with the Department of Defense for the provision of defense services pursuant to an FMS case must maintain a valid registration with the Directorate of Defense Trade Controls for the entire time that the defense service is being provided. In any instance when that U.S. person employs a U.S. subcontractor, that subcontractor may only provide defense services pursuant to this subsection when registered with Directorate of Defense Trade Controls, and when such subcontract meets the requirements of paragraphs (c)(7)(i)(A) thorugh (E) of this section;

(iii) In instances when the defense service involves the transfer of classified technical data, the U.S. person transferring the defense service must have the appropriate USG security clearance and a transportation plan, if appropriate, in compliance with the Department of Defense National Industrial Security Program Operating Manual (DoD NISPOM);

(iv) Where defense articles are exported along with defense services, the exporter must comply with paragraph (c)(6) of this section; and

(v) The U.S. exporter reports its initial export, citing this section of the International Traffic in Arms Regulations. The U.S. exporter must maintain records of the export to include the FMS case identifier, the contract and subcontract number, the foreign country, and the duration of the service being provided. These records must be kept in accordance with § 122.5 of this subchapter.

(d) *Other USG Programs.* A license from the Directorate of Defense Trade Controls is not required if:

(1) Defense articles to be exported were sold, granted, leased or loaned by the Department of Defense to a foreign country or international organization pursuant to section 1206 of the National Defense Authorization Act for Fiscal Year 2006, as amended and extended, or section 1206 of the National Defense Authorization Act for Fiscal Year 2008;

(2) The defense article is to be exported from the United States:

(i) By the Department of Defense via the Department of Defense Transportation System (DTS) in accordance with the vetting procedures and the requirements in DoD 5105.38–M, ''Security Assistance Management Manual'' (SAMM), and DoD Regulations 4500.9E and 4500.9R, ''Defense Transportation Regulations'' (DTR). The SED must be entered in the AES by the cognizant or responsible military service or implementing agency; or

(ii) By a Department of Defense contracted carrier via the DTS in accordance with the vetting procedures and the requirements in DoD 5105.38–M, ''Security Assistance Management Manual'' (SAMM), and DoD Regulations 4500.9E and 4500.9R, ''Defense Transportation Regulations'' (DTR). The SED must be entered in the AES by the cognizant or responsible military service or implementing agency; and

(3) In the event the defense article to be exported is classified, the export is made by a person having the appropriate USG security clearance, in

compliance with the Department of Defense National Industrial Security Program Operating Manual (DoD NISPOM) and pursuant to an approved transportation plan.

Dated: November 3, 2009.

Ellen O. Tauscher,

Under Secretary, Arms Control and International Security, Department of State.

BILLING CODE 4710–25–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 301

[REG–111833–99]

RIN 1545–AX46

Regulations Under I.R.C. Section 7430 Relating to Awards of Administrative Costs and Attorneys Fees

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed regulations relating to awards of administrative costs and attorneys fees under section 7430 to conform to the amendments made in the Taxpayer Relief Act of 1997 and the IRS Restructuring and Reform Act of 1998. The regulations affect taxpayers seeking attorneys fees and costs. This document also provides notice of a public hearing on these proposed regulations.

DATES: Written or electronic comments must be received by February 8, 2010. Outlines of topics to be discussed at the public hearing scheduled for 10 a.m. on March 10, 2010 must be received by February 10, 2010.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG–111833–99), room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to: CC:PA:LPD:PR (REG–111833–99), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC. Alternatively, taxpayers may submit comments electronically via the Federal eRulemaking Portal at *http://www.regulations.gov* (IRS REG–111833–99). The public hearing will be held in the Internal Revenue Building, Room 2615, 1111 Constitution Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Concerning the hearing, submission of written comments, and to be placed on the building access list to attend the hearing, contact Regina Johnson, (202) 622–7180; concerning the proposed regulations, contact Ronald J. Goldstein (202) 622–4910 (not toll-free numbers).

Background and Explanation of Provisions

The proposed amendments to the Treasury Regulations incorporate the 1997 and 1998 amendments to section 7430 of the Internal Revenue Code relating to awards of attorneys fees. These amendments were enacted as part of the Taxpayer Relief Act of 1997, Public Law 105–34, 111 Stat. 788, and the IRS Restructuring and Reform Act of 1998, Public Law 105–206, 112 Stat. 685.

The Taxpayer Relief Act of 1997 (TRA) contained several amendments to section 7430 that are addressed in the proposed amendments to the regulations. First, the TRA provided that a taxpayer has ninety days after the date the IRS mails to the taxpayer a final decision determining tax, interest or penalty, to file an application with the IRS to recover administrative costs. Second, a taxpayer has ninety days after the date the IRS mails to the taxpayer, by certified or registered mail, a final adverse decision regarding an award of administrative costs, to file a petition with the Tax Court. Third, the TRA clarified the application of the net worth requirements by providing that individuals filing joint returns should be treated as separate taxpayers for purposes of determining net worth. The TRA added trusts to the list of taxpayers subject to the net worth requirements and also specified the date on which the net worth determination should be made.

The TRA also added section 7436 to the Code, which gives the Tax Court jurisdiction in certain employment tax cases. Under section 7436, if the IRS determines in connection with an audit that (1) one or more individuals performing services for the taxpayer are employees of the taxpayer or (2) the taxpayer is not entitled to relief from employment taxes under section 530 of the Revenue Act of 1978 with respect to the individual(s), and the IRS sends a Notice of Determination of Worker Classification (NDWC) to the taxpayer by certified or registered mail, the taxpayer may petition the Tax Court to determine (1) whether the IRS's determination, as set forth in the NDWC, is correct and (2) the proper amount of employment tax under the determination. Various restrictions on assessment and collection in section 6213 apply to a section 7436 proceeding in the same manner as if the NDWC were a notice of deficiency. Section 7436(d)(2) provides that section 7430 applies to proceedings brought under section 7436.

The proposed amendments reflect the changes outlined in this preamble. Additional clarifying changes address the calculation of net worth. First, the regulation specifies that net worth will be calculated using the fair market value of assets to provide a more accurate assessment of a taxpayer's actual and current net worth as of the administrative proceeding date. Second, the regulation specifies which net worth and size limitations apply when a taxpayer is an owner of an unincorporated business. Third, the regulation has been amended to clarify the net worth requirement in cases involving partnerships subject to the unified audit and litigation procedures of sections 6221 through 6234 of the Code (the TEFRA partnership procedures).

The IRS Restructuring and Reform Act of 1998 (RRA) also contained several amendments affecting section 7430. First, the RRA increased the hourly rate limitation from $110 per hour to $125 per hour. Second, two special factors were added that may be considered to increase an attorney's hourly rate: Difficulty of the issues presented and local availability of tax experts. Third, the RRA added a provision that requires a court to consider whether the IRS has lost cases with substantially similar issues in other circuit courts of appeal in deciding whether the IRS's position was substantially justified. Fourth, the RRA created an exception to the requirement that to recover attorneys fees, the taxpayer must have paid or incurred the fees. The exception provides that if an individual who is authorized to practice before the Tax Court or the IRS is representing the taxpayer on a *pro bono* basis, then the taxpayer may petition for an award of reasonable attorneys fees in excess of the amounts that the taxpayer paid or incurred, as long as the fee award is ultimately paid to the individual or the individual's employer. Fifth, the period for recovery of reasonable administrative costs was extended to include costs incurred after the date on which the first letter of proposed deficiency, commonly known as a 30-day letter, is mailed to the taxpayer. The regulations clarify, however, that a taxpayer may be eligible to recover reasonable administrative costs from the date of the 30-day letter only if at least one issue (other than recovery of

administrative costs) remains in dispute as of the date that the IRS takes a position in the administrative proceeding.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations and, because these regulations do not impose on small entities a collection of information requirement, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this regulation has been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments (a signed original and eight (8) copies) or electronic comments that are submitted timely to the IRS. The IRS and Treasury Department specifically request comments on the clarity of the proposed rules and how it may be made easier to understand. All public comments will be made available for public inspection and copying.

A public hearing has been scheduled for 10 a.m. on March 10, 2010 in the Internal Revenue Building, Room 2615, 1111 Constitution Avenue, NW., Washington, DC. Due to building security procedures, visitors must enter at the Constitution Avenue entrance. In addition, all visitors must present photo identification to enter the building. Because of access restrictions, visitors will not be admitted beyond the immediate entrance area more than 30 minutes before the hearing starts. For information about having a visitor's name placed on the building access list to attend the hearing, *see* the **FOR FURTHER INFORMATION CONTACT** caption.

An outline of the topics to be discussed and the time to be devoted to each topic (a signed original and eight (8) copies) must be submitted by any person that wishes to present oral comments at the hearing. Outlines must be received by February 10, 2010.

The rules of 26 CFR 601.601(a)(3) apply to the hearing. A period of 10 minutes will be allotted to each person for making comments.

An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving requests to speak has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal author of these regulations is Ronald J. Goldstein, Office of Associate Chief Counsel (Procedure and Administration).

List of Subjects in 26 CFR Part 301

Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Penalties, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 301 is proposed to be amended as follows:

PART 301—PROCEDURE AND ADMINISTRATION

Paragraph 1. The authority citation for part 301 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 301.7430–0 is amended by:

1. Adding a new entry for § 301.7430–3(c)(4).
2. Adding new entries for § 301.7430–4(b)(3)(iii)(A) through (F) and (d).
3. Revising the entries for § 301.7430–5.
4. Revising the section heading for § 301.7430–6.
5. Adding new entries for §§ 301.7430–7 and 301.7430–8.

The additions and revisions read as follows:

(a) In general.

(b) Prevailing party.
(c) Administrative proceeding.
(d) Costs incurred after filing of bankruptcy petition.
(e) Time for filing claim for administrative costs.
(f) Effective date.

Par. 3. Section 301.7430–1 is amended by:

1. Revising paragraphs (b)(1)(ii)(A), (d)(1)(i), (d)(1)(ii) and (d)(2) introductory text.

2. Removing the language ''district director'' in paragraphs (f)(2)(i), (f)(3)(ii), (f)(3)(iii), (f)(4)(i) and (g) *Examples 6, 7* and *8* and adding the language ''Internal Revenue Service office'' in its place in all locations.

3. Removing the language ''such'' in the second sentence of paragraph (g) *Example 9* and adding the language ''these'' in its place.

The revisions read as follows:

§ 301.7430–1 Exhaustion of administrative remedies.

* * * * *

(b) * * *

(1) * * *

(ii) * * *

(A) Requests an Appeals office conference in accordance with §§ 601.105 and 601.106 of this chapter or any successor published guidance; and

* * * * *

(d) * * *

(1) * * *

(i) The party follows all applicable Internal Revenue Service procedures for contesting the matter (including filing a written protest or claim, requesting an administrative appeal, and participating in an administrative hearing or conference); or

(ii) If there are no applicable Internal Revenue Service procedures, the party submits to the area director of the area having jurisdiction over the dispute a written claim for relief reciting facts and circumstances sufficient to show the nature of the relief requested and that the party is entitled to the requested relief; and the area director has denied the claim for relief in writing or failed to act on the claim within a reasonable period after the claim is received by the area director.

(2) For purposes of paragraph (d)(1)(ii) of this section, a *reasonable period* is—

* * * * *

Par. 4. Section 301.7430–2 is amended by:

1. Adding the language ''from the Internal Revenue Service'' at the end of the last sentence of paragraph (a).

2. Removing the language ''such'' in the fourth and fifth sentences of paragraph (b)(2) and adding the language ''these'' in its place in both locations.

3. Removing the '';'' at the end of paragraph (c)(3)(i)(B) and adding a ''.'' in its place.

4. Adding a new sentence at the end of paragraphs (c)(3)(i)(B), (c)(3)(i)(E) and (c)(7).

5. Revising paragraphs (c)(3)(ii)(C), (c)(5) and (e).

6. Adding new paragraph (c)(3)(iii)(C).

7. Removing the language ''which'' in the first sentence of paragraph (c)(4) and adding the language ''that'' in its place.

8. Removing the language ''such'' in the second sentence of paragraph (c)(6) and adding the language ''the'' in its place.

The additions and revisions read as follows:

§ 301.7430–2 Requirements and procedures for recovery of reasonable administrative costs.

* * * * *

(c) * * *

(3) * * *

(i) * * *

(B) * * * For costs incurred after January 18, 1999, if the taxpayer alleges that the United States has lost in courts of appeal for other circuits on substantially similar issues, the taxpayer must provide the full name of the case, volume and pages of the reporter in which the opinion appears, the circuit in which the case was decided, and the year of the opinion;

* * * * *

(E) * * * This statement must identify whether the representation is on a *pro bono* basis as defined in § 301.7430–4(d) and, if so, to whom payment should be made. Specifically, the statement must direct whether payment should be made to the taxpayer's representative or to the representative's employer.

(ii) * * *

(C) For costs incurred after January 18, 1999, if more than $125 per hour as adjusted for increases in the cost of living pursuant to § 301.7430–4(b)(3) is claimed for the fees of a representative in connection with the administrative proceeding, an affidavit stating that a special factor described in § 301.7430–4(b)(3) is applicable, such as the difficulty of the issues presented in the case or the lack of local availability of tax expertise. If a special factor is claimed based on specialized skills and distinctive knowledge as described in § 301.7430–4(b)(2)(ii), the affidavit must state—

(1) Why the specialized skills and distinctive knowledge were necessary in the representation;

(2) That there is a limited availability of representatives possessing these specialized skills and distinctive knowledge; and

(3) How the education and experience qualifies the representative as someone with the necessary specialized skills and distinctive knowledge.

(iii) * * *

(C) In cases of *pro bono* representation, time records similar to billing records, detailing the time spent and work completed must be submitted for the requested fees.

* * * * *

(5) *Period for requesting costs from the Internal Revenue Service.* To recover reasonable administrative costs pursuant to section 7430 and this section, the taxpayer must file a written request for costs within 90 days after the date the final adverse decision of the Internal Revenue Service with respect to all tax, additions to tax, interest, and penalties at issue in the administrative proceeding is mailed or otherwise furnished to the taxpayer. For purposes of this section, *interest* means the interest that is specifically at issue in the administrative proceeding independent of the taxpayer's objections to the underlying tax imposed. The final decision of the Internal Revenue Service for purposes of this section is the document that resolves the tax liability of the taxpayer with regard to all tax, additions to tax, interest, and penalties at issue in the administrative proceeding (such as a Form 870 or closing agreement), or a notice of assessment for that liability (such as the notice and demand under section 6303), whichever is earlier mailed or otherwise furnished to the taxpayer. For purposes of this section, if the 90th day falls on a Saturday, Sunday, or a legal holiday, the 90-day period shall end on the next succeeding day that is not a Saturday, Sunday, or a legal holiday as defined by section 7503.

* * * * *

(7) * * * If the notice of decision denying (in whole or in part) an award for reasonable administrative costs was mailed by the Internal Revenue Service via certified mail or registered mail, a taxpayer may obtain judicial review of that decision by filing a petition for review with the Tax Court prior to the 91st day after the mailing of the notice of decision.

* * * * *

(e) * * *

Example 1. Taxpayer A receives a notice of proposed deficiency (30-day letter). A requests and is granted Appeals office consideration. Appeals requests that A submit certain documents as substantiation for the tax matters at issue. Appeals determines that the information submitted is

insufficient. Appeals then issues a notice of deficiency. After receiving the notice of deficiency but before the 90-day period for filing a petition with the Tax Court has expired, A convinces Appeals that the information submitted during the review by Appeals is sufficient and, therefore, the notice of deficiency is incorrect and A owes no additional tax. Appeals then closes the case showing a zero deficiency and mails A a notice to this effect. Assuming that all of the other requirements of section 7430 are satisfied, A may recover reasonable administrative costs incurred after the date of the 30-day letter (the administrative proceeding date). To recover these costs, A must file a request for administrative costs with the Appeals office personnel who settled A's tax matter, or if that person is unknown to A, with the Area Director of the area that considered the underlying matter, within 90 days after the date of mailing of the Office of Appeals' final decision that A owes no additional tax.

Example 2. Taxpayer B files a request for an abatement of interest pursuant to section 6404 and the regulations thereunder. The Area Director issues a notice of proposed disallowance of the abatement request (akin to a 30-day letter). B requests and is granted Appeals office consideration. No agreement is reached with Appeals and the Office of Appeals issues a notice of disallowance of the abatement request. B does not file suit in the Tax Court, but instead contacts the Appeals office within 180 days after the mailing date of the notice of disallowance of the abatement request to attempt to reverse the decision. B convinces the Appeals office that the notice of disallowance is in error. The Appeals office agrees to abate the interest and mails the taxpayer a notification of this decision. The mailing date of the notification from Appeals of the decision to abate interest commences the 90-day period from which the taxpayer may request administrative costs. Assuming that all of the other requirements of section 7430 are satisfied, B may recover reasonable administrative costs incurred after the date of the notice of proposed disallowance of the abatement request (the administrative proceeding date). To recover these costs, B must file a request for costs with the Appeals office personnel who settled B's tax matter, or if that person is unknown to B, with the Area Director of the area that considered the underlying matter within 90 days after the date of mailing of the Office of Appeals' final decision that B is entitled to abatement of interest.

Example 3. Taxpayer C receives a notice of proposed adjustment and employment tax 30-day letter. C requests and is granted Appeals office consideration. Appeals requests that C submit certain documents to support C's position in the tax matters at issue. Appeals determines that the documents submitted are insufficient. Appeals then issues a notice of determination of worker classification. After receiving the notice of determination but before the 90-day period for filing a petition with the Tax Court has expired, C convinces Appeals that the documents submitted during the review by Appeals adequately support its position and, therefore, C owes no additional employment tax. Appeals then closes the case showing a zero tax adjustment and mails C a no-change letter. Assuming that all of the other requirements of section 7430 are satisfied, C may recover reasonable administrative costs incurred after the date of the notice of proposed adjustment and 30-day letter (the administrative proceeding date). To recover these costs, C must file a request for administrative costs with the Appeals office personnel who settled C's tax matter, or if that person is unknown to C, with the Area Director of the area that considered the underlying matter, within 90 days after the date of mailing of the Office of Appeals' final decision that C owes no additional tax.

Par. 5. Section 301.7430–3 is amended by:

1. Revising paragraphs (b), (c)(1), (c)(3) and (d).

2. Adding paragraph (c)(4).

The addition and revisions read as follows:

§ 301.7430–3 Administrative proceeding and administrative proceeding dates.

* * * * *

(b) *Collection action.* A collection action generally includes any action taken by the Internal Revenue Service to collect a tax (or any interest, additional amount, addition to tax, or penalty, together with any costs in addition to the tax) or any action taken by a taxpayer in response to the Internal Revenue Service's act or failure to act in connection with the collection of a tax (including any interest, additional amount, addition to tax, or penalty, together with any costs in addition to the tax). A collection action for purposes of section 7430 and this section includes any action taken by the Internal Revenue Service under Chapter 64 of Subtitle F to collect a tax. Collection actions also include collection due process hearings under sections 6320 and 6330 (unless the underlying tax liability is properly at issue), and those actions taken by a taxpayer to remedy the Internal Revenue Service's failure to release a lien under section 6325 or to remedy any unauthorized collection action as defined by section 7433, except those collection actions described by section 7433(e). An action or procedure directly relating to a claim for refund after payment of an assessed tax is not a collection action.

(c) *Administrative proceeding date*—(1) *General rule.* For purposes of section 7430 and the regulations thereunder, the term *administrative proceeding date* means the earlier of—

(i) The date of the receipt by the taxpayer of the notice of the decision of the Internal Revenue Service Office of Appeals;

(ii) The date of the notice of deficiency; or

(iii) The date on which the first letter of proposed deficiency that allows the taxpayer an opportunity for administrative review in the Internal Revenue Service Office of Appeals is sent.

(2) * * *

(3) *Notice of deficiency.* A notice of deficiency is a notice described in section 6212(a), including a notice rescinded pursuant to section 6212(d). For purposes of determining reasonable administrative costs under section 7430 and the regulations thereunder, the following will be treated as a notice of deficiency:

(i) A notice of final partnership administrative adjustment described in section 6223(a)(2).

(ii) A notice of determination of worker classification issued pursuant to section 7436.

(iii) A final notice of determination denying innocent spouse relief issued pursuant to section 6015.

(4) *First letter of proposed deficiency that allows the taxpayer an opportunity for administrative review in the Office of Appeals.* Generally, the first letter of proposed deficiency that allows the taxpayer an opportunity for administrative review in the Office of Appeals is the first letter issued to the taxpayer that describes the proposed adjustments and advises the taxpayer of the opportunity to contact the Office of Appeals. It also may be a claim disallowance or the first letter of determination that allows the taxpayer an opportunity for administrative review in the Office of Appeals.

(d) *Examples.* The provisions of this section are illustrated by the following examples:

Example 1. Taxpayer A receives a notice of proposed deficiency (30-day letter). A files a request for and is granted an Appeals office conference. At the Appeals conference no agreement is reached on the tax matters at issue. The Office of Appeals then issues a notice of deficiency. Upon receiving the notice of deficiency, A does not file a petition with the Tax Court. Instead, A pays the deficiency and files a claim for refund. The claim for refund is considered by the Internal Revenue Service and the Area Director issues a notice of proposed claim disallowance. A requests and is granted Appeals office consideration. A convinces Appeals that A's claim is correct and Appeals allows A's claim. A may recover reasonable administrative costs incurred on or after the date of the notice of proposed deficiency (30-day letter), but only if the other requirements of section 7430 and the regulations thereunder are satisfied. A cannot recover costs incurred prior to the date of the 30-day letter because these costs were incurred before the administrative proceeding date.

Example 2. Taxpayer B files an individual income tax return showing a balance due. No payment is made with the return and the Internal Revenue Service assesses the amount shown on the return. The Internal Revenue Service issues a notice of levy pursuant to section 6330. B requests and is granted a Collection Due Process (CDP) hearing. In connection with the CDP hearing, B enters into an installment agreement as a collection alternative. The costs that B incurred in connection with the CDP hearing were not incurred in an administrative proceeding, but rather in a collection action. Accordingly, B may not recover those costs as reasonable administrative costs under section 7430 and the regulations thereunder.

Par. 6. Section 301.7430–4 is amended by:

1. Removing the language ''such'' in the second and fifth sentences of paragraph (b)(2)(ii) and adding the language ''that'' in its place in both locations.

2. Revising paragraphs (b)(3)(i), (b)(3)(iii)(B), and (c)(4) *Examples 1* and *2*.

3. Removing the language ''$110'' from the first and second sentences in paragraph (b)(3)(ii) and adding the language ''$125'' in its place in both locations.

4. Revising the first sentence in paragraph (b)(3)(iii)(C).

5. Redesignating paragraph (b)(3)(iii)(D) as paragraph (b)(3)(iii)(F) and revising newly-designated paragraph (b)(3)(iii)(F).

6. Adding new paragraphs (b)(3)(iii)(D), (b)(3)(iii)(E) and (d).

7. Removing the language ''Such'' in the third sentence of paragraph (c)(2)(i) and adding the language ''These'' in its place.

8. Removing the language ''$110'' from the second and third sentences in paragraph (c)(2)(ii) and adding the language ''$125'' in its place in both locations.

9. Removing the language ''which'' in the fourth sentence of paragraph (c)(2)(i) and adding the language ''that'' in its place.

The additions and revisions read as follows:

§ 301.7430–4 Reasonable administrative costs.

* * * * *

(b) * * *

(3) *Limitation on fees for a representative*—(i) *In general.* Except as otherwise provided in this section, fees incurred after January 18, 1999, and described in paragraph (b)(1)(iv) of this section that are recoverable under section 7430 and the regulations thereunder as reasonable administrative costs may not exceed $125 per hour increased by a cost of living adjustment (and if appropriate, a special factor adjustment).

* * * * *

(iii) * * *

(B) *Special factor.* A *special factor* is a factor, other than an increase in the cost of living, that justifies an increase in the $125 per hour limitation of section 7430(c)(1)(B)(iii). The undesirability of the case, the work and the ability of counsel, the results obtained, and customary fees and awards in other cases, are factors applicable to a broad spectrum of litigation and do not constitute special factors for the purpose of increasing the $125 per hour limitation. By contrast, the limited availability of a specially qualified representative for the proceeding, the difficulty of the issues, and the limited local availability of tax expertise are special factors justifying an increase in the $125 per hour limitation.

(C) *Limited availability.* Limited availability of a specially qualified representative is established by demonstrating that a specially qualified representative for the proceeding is not available at the $125 per hour rate (as adjusted for an increase in the cost of living). * * *

(D) *Limited local availability of tax expertise.* Limited local availability of tax expertise is established by demonstrating that a representative possessing tax expertise is not available in the taxpayer's geographical area. Initially, this showing may be made by submission of an affidavit signed by the taxpayer, or by the taxpayer's counsel, that no representative possessing tax expertise practices within a reasonable distance from the taxpayer's principal residence or principal office. The hourly rate charged by representatives in the geographical area is not relevant in determining whether tax expertise is locally available. If the Internal Revenue Service challenges this initial showing, the taxpayer may submit additional evidence to establish the limited local availability of a representative possessing tax expertise.

(E) *Difficulty of the issues.* In determining whether the difficulty of the issues justifies an increase in the $125 per hour limitation on the applicable hourly rate, the Internal Revenue Service will consider the following factors:

(*1*) The number of different provisions of law involved in each issue.

(*2*) The complexity of the particular provision or provisions of law involved in each issue.

(*3*) The number of factual issues present in the proceeding.

(*4*) The complexity of the factual issues present in the proceeding.

(F) *Example.* The provisions of this section are illustrated by the following example:

Example. Taxpayer A is represented by B, a CPA and attorney with a LL.M. Degree in Taxation with Highest Honors and who regularly handles cases dealing with TEFRA partnership issues. B represents A in an administrative proceeding involving TEFRA partnership issues that is subject to the provisions of this section. Assuming the taxpayer qualifies for an award of reasonable administrative costs by meeting the requirements of section 7430, the amount of the award attributable to the fees of B may not exceed the $125 per hour limitation (as adjusted for the cost of living), absent a special factor. B is not a specially qualified representative because extraordinary knowledge of the tax laws does not constitute distinctive knowledge or a unique and specialized skill constituting a special factor. A special factor must be comprised of nontax expertise unless the taxpayer establishes the limited local availability of tax expertise.

* * * * *

(c) * * *

(4) * * *

Example 1. After incurring fees for representation during the Internal Revenue Service's examination of taxpayer A's income tax return, A receives a notice of proposed deficiency (30-day letter). A files a request for and is granted an Appeals office conference. At the conference no agreement is reached on the tax matters at issue. The Internal Revenue Service then issues a notice of deficiency. Upon receiving the notice of deficiency, A discontinues A's administrative efforts and files a petition with the Tax Court. A's costs incurred before the date of the mailing of the 30-day letter are not reasonable administrative costs because they were incurred before the administrative proceeding date. Similarly, A's costs incurred in connection with the preparation and filing of a petition with the Tax Court are litigation costs and not reasonable administrative costs.

Example 2. Assume the same facts as in *Example 1* except that after A receives the notice of deficiency, A recontacts Appeals and Appeals agrees with A. If A seeks administrative costs, A may recover costs incurred after the date of the mailing of the 30-day letter, costs incurred in recontacting Appeals after the issuance of the notice of deficiency, and costs incurred up to the time the Tax Court petition was filed, as reasonable administrative costs, but only if the other requirements of section 7430 and the regulations thereunder are satisfied. The costs incurred before the date of the mailing of the 30-day letter are not reasonable administrative costs because they were incurred before the administrative proceeding date, as set forth in § 301.7430–3(c)(1)(iii). A's costs incurred in connection with the filing of a petition with the Tax Court are not reasonable administrative costs because those costs are litigation costs. Similarly, A's costs incurred after the filing of the petition are not reasonable administrative costs, as they are litigation costs.

(d) *Pro bono services*—(1) *In general.* Fees recoverable under section 7430 and the regulations thereunder as reasonable administrative costs may exceed the attorneys' fees paid or incurred by the prevailing party if these fees are less than the reasonable attorneys' fees because an individual is representing the prevailing party on a *pro bono* basis. In addition to attorneys' fees, reasonable costs incurred or paid by the individual providing the *pro bono* services that are normally billed separately also may be recovered under this section.

(2) *Requirements. Pro bono* representation is established by demonstrating—

(i) Legal services were provided for no fee or for a fee that (taking into account all the facts and circumstances) constitutes a nominal fee;

(ii) The legal services were provided to or on behalf of either—

(A) Persons of limited financial means who meet the eligibility requirements for programs funded by the Legal Services Corporation as set forth in 45 CFR 1611; or

(B) Organizations operating primarily to address the needs of persons with limited means if payment of a standard legal fee would significantly deplete the person's financial resources; and

(iii) The service provider intended to perform services for no fee or for a nominal fee from the commencement of the representation. Intent to perform services for no fee or for a nominal fee may be demonstrated through documentation such as a retainer agreement. An individual will not be considered to have represented a client on a *pro bono* basis if the facts demonstrate that the individual anticipated a fee or provided services on a contingency fee basis. The fact that the service provider intended to seek recovery of fees under section 7430 will not prevent the service provider from satisfying this requirement.

(3) *Nominal fee.* A *nominal fee* is defined as one that is slight, inconsiderable or trifling (taking into account all the facts and circumstances).

(4) *Payment when services provided at no charge or for a nominal fee.* A prevailing party who receives legal services at no charge or for a nominal fee and who satisfies the requirements under this section is eligible to receive reasonable fees in excess of the fees actually paid or incurred and those otherwise meeting the requirements of this paragraph. Payment will be made to the representative or the representative's employer.

(5) *Recordkeeping.* Contemporaneous records must be maintained, demonstrating the work performed and the time allocated to each task. These records should contain similar information to billing records.

(6) *Hourly rate.* For purposes of this section, the hourly rate may not exceed the lesser of—

(i) The rate prescribed under section 7430(c)(1)(B); or

(ii) The hourly rate customarily charged by the representative in cases that are not handled on a *pro bono* basis.

(7) *Examples.* The provisions of this section are illustrated by the following examples:

Example 1. Taxpayer A, an attorney, files a petition with the Tax Court and pays a $60 filing fee. A appears pro se in the court proceeding. If A prevails, he will not be entitled to an award of reasonable litigation costs for his services. A is rendering services on his own behalf, not providing *pro bono* representation. His lost opportunity costs are not compensable under section 7430. A may recover the filing fee as a litigation cost, but only if the other requirements of section 7430 and the regulations thereunder are satisfied.

Example 2. Taxpayer retains attorney B with regard to the audit of taxpayer's individual income tax return. B agrees to represent taxpayer on a *pro bono* basis. Under this arrangement, taxpayer pays to attorney B a nominal fee. The customary hourly rate charged by B in cases not handled on a *pro bono* basis is less than the rate prescribed under section 7430(c)(1)(B). Any award paid to attorney B, or attorney B's employer, would be limited to attorney B's customary hourly rate. Thus, attorney B, or attorney B's employer, would receive the customary hourly rate charged in cases not handled by attorney B on a *pro bono* basis rather than the nominal fee actually paid or incurred by the taxpayer.

Example 3. Assume the same facts in *Example 2* except that attorney B's customary hourly rate exceeds the rate prescribed under section 7430(c)(1)(B). Any award paid to attorney B, or attorney B's employer, would be made at the rate prescribed under section 7430(c)(1)(B).

Example 4. Organization C, a low income taxpayer clinic within the meaning of section 7526, agrees to represent taxpayer on a *pro bono* basis. Attorneys employed by C do not have a customary hourly rate and work exclusively for C. Any award paid to C, for representation by its attorneys, would be limited to the rate prescribed under section 7430(c)(1)(B).

§ 301.7430–5 [Amended]

Par. 7. For each entry in the table, redesignate the paragraph designated in the ''Old Paragraph'' column as the new paragraph designation in the ''New Paragraph'' column to read as follows:

Old paragraph	New paragraph
301.7430–5(a)(1)	301.7430–5(a)(2)
301.7430–5(a)(2)	301.7430–5(a)(3)
301.7430–5(a)(3)	301.7430–5(a)(4)
301.7430–5(c)	301.7430–5(d)(1)
301.7430–5(c)(2)	301.7430–5(d)(6)
301.7430–5(c)(3)	301.7430–5(d)(7)
301.7430–5(d)	301.7430–5(e)
301.7430–5(e)	301.7430–5(f)(1)
301.7430–5(f)(1)	301.7430–5(g)(1)
301.7430–5(f)(2)	301.7430–5(g)(3)
301.7430–5(f)(3)	301.7430–5(g)(4)
301.7430–5(g)	301.7430–5(h)

Par. 8. Section 301.7430–5 is amended by:

1. Removing the language ''only if—'' at the end of the introductory text in paragraph (a) and adding the language ''(other than by reason of section 7430(c)(4)(E)) only if—'' in its place.

2. Adding new paragraphs (a)(1), (c), (d)(2), (d)(3), (d)(4), (d)(5), (g)(2) and (g)(5).

3. Revising paragraph (b).

4. Revising the third sentence and removing the language ''(c)(3)'' from the fourth sentence in newly-designated paragraph (d)(7) and adding the language ''(d)(7)'' in its place.

5. Revising the paragraph heading for newly-designated paragraph (f)(1) and adding new paragraph (f)(2).

6. Revising newly-designated paragraphs (g)(1) and (g)(3).

7. Removing the language ''Internal Revenue Code'' in the first sentence of newly-designated paragraph (g)(4) in both places.

8. Removing the language ''such'' in the first sentence of newly-designated paragraph (h) and adding the language ''an'' in its place.

9. Removing paragraph (h).

The additions and revisions read as follows:

§ 301.7430–5 Prevailing party.

(a) * * *

(1) At least one issue (other than recovery of administrative costs) remains in dispute as of the date that the Internal Revenue Service takes a position in the administrative proceeding, as described in paragraph (b) of this section;

* * * * *

(b) *Position of the Internal Revenue Service.* The position of the Internal Revenue Service in an administrative proceeding is the position taken by the Internal Revenue Service as of the earlier of—

(1) The date of the receipt by the taxpayer of the notice of the decision of the Internal Revenue Service Office of Appeals; or

(2) The date of the notice of deficiency or any date thereafter.

* * * * *

(c) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. Taxpayer A receives a notice of proposed deficiency (30-day letter). A pays the amount of the proposed deficiency and files a claim for refund. A's claim is considered and a notice of proposed claim disallowance is issued by the Area Director. A does not request an Appeals office conference and the Area Director issues a notice of claim disallowance. A then files suit in a United States District Court. A cannot recover reasonable administrative costs because the notice of claim disallowance is not a notice of the decision of the Internal Revenue Service Office of Appeals or a notice of deficiency. Accordingly, the Internal Revenue Service has not taken a position in the administrative proceeding pursuant to section 7430(c)(7)(B).

Example 2. Taxpayer B receives a notice of proposed deficiency (30-day letter). B disputes the proposed adjustments and requests an Appeals office conference. The Appeals office determines that B has no additional tax liability. B requests administrative costs from the date of the 30-day letter. B is not the prevailing party and may not recover administrative costs because all of the proposed adjustments in the case were resolved as of the date that the Internal Revenue Service took a position in the administrative proceeding.

(d) * * *

(2) *Position in courts of appeal.* Whether the United States has won or lost an issue substantially similar to the one in the taxpayer's case in courts of appeal for circuits other than the one to which the taxpayer's case would be appealable should be taken into consideration in determining whether the Internal Revenue Service's position was substantially justified.

(3) *Example.* The provisions of this section are illustrated by the following example:

Example. The Internal Revenue Service, in the conduct of a correspondence examination of taxpayer A's individual income tax return, requests substantiation from A of claimed medical expenses. A does not respond to the request and the Service issues a notice of deficiency. After receiving the notice of deficiency, A presents sufficient information and arguments to convince a revenue agent that the notice of deficiency is incorrect and that A owes no tax. The revenue agent then closes the case showing no deficiency. Although A incurred costs after the issuance of the notice of deficiency, A is unable to recover these costs because, as of the date these costs were incurred, A had not presented relevant information under A's control and relevant legal arguments supporting A's position to the appropriate Internal Revenue Service personnel. Accordingly, the position of the Internal Revenue Service was substantially justified at the time the costs were incurred.

(4) *Included costs.* (i) An award of reasonable administrative costs shall only include costs incurred on or after the earliest of—

(A) The date of the receipt by the taxpayer of the notice of decision from Appeals;

(B) The date of the notice of deficiency; or

(C) The date on which the first letter of proposed deficiency that allows the taxpayer an opportunity for administrative review in the Office of Appeals is sent.

(ii) If the Internal Revenue Service takes a position in an administrative proceeding, as defined in paragraph (b) of this section, and the position is not substantially justified, the taxpayer may be permitted to recover costs incurred before the position was taken, but not before the dates set forth in this paragraph (d)(4).

(5) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. Pursuant to section 6672, taxpayer D receives from the Area Director Collection Operations (Collection) a proposed assessment of trust fund taxes (Trust Fund Recovery Penalty). D requests and is granted Appeals office consideration. Appeals considers the issues and decides to uphold Collection's recommended assessment. Appeals notifies D of this decision in writing. Collection then assesses the tax and notice and demand is made. D timely pays the minimum amount required to commence a court proceeding, files a claim for refund, and furnishes the required bond. Collection disallows the claim, but Appeals, on reconsideration, reverses its original position, thus upholding D's position. If Appeals concedes its initial determination was not substantially justified, D may recover administrative costs incurred on or after the mailing of the proposed assessment of trust fund taxes, because the proposed assessment is the first determination letter that allows the taxpayer an opportunity for administrative review in the Internal Revenue Service Office of Appeals.

Example 2. Taxpayer E receives a notice of proposed deficiency (30-day letter). E pays the amount of the proposed deficiency and files a claim for refund. E's claim is considered and a notice of proposed disallowance is issued by the Area Director. E requests and is granted Appeals office consideration. No agreement is reached with Appeals and the Office of Appeals issues a notice of claim disallowance. E does not file suit in a United States District Court but instead contacts the Appeals office to attempt to reverse the decision. E convinces the Appeals officer that the notice of claim disallowance is in error. The Appeals officer then abates the assessment. E may recover reasonable administrative costs if the position taken in the notice of claim disallowance issued by the Office of Appeals was not substantially justified and the other requirements of section 7430 and the regulations thereunder are satisfied. If so, E may recover administrative costs incurred from the mailing date of the 30-day letter because the requirements of paragraph (c)(2) of this section are met. E cannot recover the costs incurred prior to the mailing of the 30-day letter because they were incurred before the administrative proceeding date.

* * * * *

(7) *Presumption.* * * * For purposes of this paragraph (d)(7), the term *applicable published guidance* means final or temporary regulations, revenue rulings, revenue procedures, information releases, notices and announcements published in the Internal Revenue Bulletin and, if issued to the taxpayer, private letter rulings, technical advice memoranda, and determination letters (§ 601.601(d)(2) of this chapter). * * *

* * * * *

(f) *Most significant issue or set of issues presented*—(1) *In general.* * * *

(2) *Example.* The provisions of this section may be illustrated by the following example:

Example. In the purchase of an ongoing business, Taxpayer F obtains from the previous owner of the business a covenant not to compete for a period of five years. On audit of F's individual income tax return for the year in which the business is acquired, the Internal Revenue Service challenges the basis assigned to the covenant not to compete and a deduction taken as a business expense for a seminar attended by F. Both parties agree that the covenant not to compete is amortizable over a period of five years; however, the Internal Revenue Service asserts that the proper basis of the covenant is $2X while F asserts the basis is $4X. The deduction for the seminar attended by F was reported on the return in question in the amount of $7X. The Internal Revenue Service determines that the deduction for the seminar should be disallowed entirely. In the notice of deficiency, the Internal Revenue Service adjusts the amortization deduction to reflect the change to the basis of the covenant not to compete, and disallows the seminar expense. Thus, of the two adjustments determined for the year under audit, the adjustment attributable to the disallowance of the seminar is larger than that attributable to the covenant not to compete. Due to the impact on the next succeeding four years, however, the covenant not to compete adjustment is objectively the most significant issue to both F and the Internal Revenue Service.

* * * * *

(g) *Net worth and size limitations*—(1) *Individuals.* A taxpayer who is a natural person meets the net worth and size limitations of this paragraph if the taxpayer's net worth does not exceed two million dollars. The net worth limitation shall be determined for individuals using the fair market value of the individual's assets as of the administrative proceeding date. For purposes of determining net worth, individuals filing a joint return shall be treated as separate individuals. Thus,

individuals filing a joint return will each be subject to a separate net worth limitation of two million dollars.

(2) *Estates and trusts.* An estate or a trust meets the net worth and size limitations of this paragraph if the taxpayer's net worth does not exceed two million dollars. The net worth of an estate shall be determined using the fair market value of the assets of the estate as of the date of the decedent's death provided the date of death is prior to the date the court proceeding is commenced. The net worth of a trust shall be determined using the fair market value of the assets of the trust as of the last day of the last taxable year involved in the proceeding.

(3) *Others.* (i) A taxpayer that is a partnership, corporation, association, unit of local government, or organization (other than an organization described in paragraph (g)(4) of this section) meets the net worth and size limitations of this paragraph if, as of the administrative proceeding date:

(A) The taxpayer's net worth does not exceed seven million dollars.; and

(B) The taxpayer does not have more than 500 employees.

(ii) A taxpayer who is a natural person and owns an unincorporated business is subject to the net worth and size limitations contained in paragraph (g)(3)(i) of this section if the tax at issue (or any interest, additional amount, addition to tax, or penalty, together with any costs in addition to the tax) relates directly to the business activities of the unincorporated business.

(4) * * *

(5) *Special rule for TEFRA partnership proceedings.* (i) In cases involving partnerships subject to the unified audit and litigation procedures of subchapter C of chapter 63 of the Internal Revenue Code (TEFRA partnership cases), the TEFRA partnership meets the net worth and size limitations requirements of this paragraph (g) if, on the administrative proceeding date—

(A) The partnership's net worth does not exceed seven million dollars; and

(B) The partnership does not have more than 500 employees.

(ii) In addition, each partner requesting fees pursuant to section 7430 must meet the appropriate net worth and size limitations set forth in paragraph (g)(1), (g)(2) or (g)(3) of this section. For example, if a partner is an individual, his or her net worth must not exceed two million dollars as of the administrative proceeding date. If the partner is a corporation, its net worth must not exceed seven million dollars and it must not have more than 500 employees.

Par. 9. Section 301.7430–6 is amended by revising the section heading and adding a new sentence at the end of the paragraph to read as follows:

§ 301.7430–6 Effective/applicability dates.

* * *Sections 301.7430–2(c)(3)(i)(B), (c)(3)(i)(E), (c)(3)(ii)(C), (c)(3)(iii)(C), (c)(5), (c)(7), (e); 301.7430–3(c)(1), (c)(4), (d); 301.7430–4(b)(3)(i), (b)(3)(iii)(B), (b)(3)(iii)(D), (b)(3)(iii)(E), (c)(4), (d); and 301.7430–5(a), (b), (c), (d)(2), (d)(3), (d)(4), (d)(5), (f)(2), (g)(1), (g)(2) and (g)(5), as proposed, apply to costs incurred and services performed as of the date of publication of a Treasury decision adopting these rules as final regulations in the **Federal Register**.

Par. 10. Section 301.7430–7 is amended by adding new paragraph (c)(8) and new *Examples 16* and *17* to paragraph (e) to read as follows:

§ 301.7430–7 Qualified offers.

* * * * *

(c) * * *

(8) *Interest as a contested issue.* To constitute a qualified offer, an offer must specify the offered amount of the taxpayer's liability (determined without regard to interest, unless interest is a contested issue in the proceeding), as provided in paragraphs (c)(1)(ii) and (c)(3) of this section. Therefore, a qualified offer generally may only include an offer to compromise tax, penalties, additions to the tax and additional amounts. Interest may only be included in a qualified offer if interest is a contested issue in the proceeding. For purposes of this section, interest is a contested issue in the proceeding only if the court in which the proceeding could be brought would have jurisdiction to determine the amount of interest due on the underlying tax, penalties, additions to the tax and additional amounts. Examples of proceedings in which interest might be a contested issue include proceedings in which the increased interest rate for large corporate underpayments under section 6621(c) is imposed by the Internal Revenue Service and interest abatement proceedings brought under section 6404. Interest is not a contested issue in the proceeding if the court that would have jurisdiction over the proceeding would not have jurisdiction to determine the amount or rate of interest, regardless of whether the taxpayer attempts to raise interest as an issue in the proceeding. Consequently, interest will not be a contested issue in the vast majority of tax cases because they merely involve the straight forward application of statutory interest under section 6601. Accordingly, in those cases, interest may not be included in the offer.

* * * * *

(e) * * *

Example 16. Qualified offer may not compromise interest unless it is a contested issue. Taxpayer J receives a notice of deficiency making an adjustment resulting in a deficiency in tax of $6,500 plus a penalty of $500. Interest is not a contested issue in the proceeding. Within the qualified offer period, J submits a written offer to settle the case for a deficiency of $1,000, including all taxes, penalties, and interest. The offer states that it is a qualified offer for purposes of section 7430(g) and that it will remain open for acceptance by the IRS for a period of 90 days. Section 7430(g)(2)(B) and paragraph (c)(3) of this section state that the amount of a qualified offer must be without regard to interest unless interest is at issue in the proceeding. Since J's offer attempts to compromise interest, which is not a contested issue in the proceeding, it is not a qualified offer.

Example 17. Qualified offer based on new defense or legal theory. Taxpayers K and L received a statutory notice of deficiency for tax year 2005, a tax year when they were married and filed a joint income tax return. Taxpayer K files a sole petition claiming innocent spouse relief and simultaneously submits an offer purporting to be a qualified offer. The offer states that K is entitled to innocent spouse relief and offers to settle the 2005 deficiency as to K in the amount of $1,000. K's innocent spouse claim was not raised during K and L's audit, nor was it raised during their appeals conference. Additionally, at no time prior to or contemporaneously with submitting the offer did K file with the IRS a Form 8857, Request for Innocent Spouse Relief, or otherwise provide the information specified in § 1.6015–5(a) of this chapter. K's offer is not a qualified offer because K did not file a Form 8857 or otherwise provide substantiation or legal and factual arguments necessary to allow for informed consideration of the merits of the innocent spouse claim as required by paragraph (c)(4) of this section, contemporaneously with the offer or prior to making the offer.

Linda E. Stiff,

Deputy Commissioner for Services and Enforcement.

BILLING CODE 4830–01–P

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 9

RIN 1024–AD78

Minerals Management, Nonfederal Oil and Gas Development

AGENCY: National Park Service, Interior.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: We are seeking comments to assist us in developing proposed a proposed rule to revise regulations governing nonfederal oil and gas development within the boundaries of units of the National Park System. The regulations have been in effect for over thirty years and have not been substantively updated during that period. The National Park Service (NPS) is seeking public input on how to bring exempted operations under the scope of the regulations, and on how to improve resource protection aspects of the regulations while accounting for advances in oil and gas technology and industry practices.

DATES: Comments must be received by January 25, 2010.

ADDRESSES: You may submit comments, identified by RIN 1024–AD78, by any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Fax: 303–987–6792. Attn: 9B Rulemaking Team. Include RIN 1024–AD78 on cover page.

Mail: Department of the Interior; National Park Service; Attention: 9B Rulemaking Team, Geologic Resources Division, National Park Service, P.O. Box 25287, Denver, Colorado 80225–0287.

Instructions: All submissions received must include the agency name and docket number or Regulatory Information Number (RIN) for this rulemaking. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. For detailed instructions on submitting comments and additional information on the rulemaking process, see the ''Public Participation'' heading of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Carol McCoy, Chief, Planning, Evaluation & Permits Branch, Geologic Resources Division, National Park Service, (303) 969–2096; P.O. Box 25287, Denver, Colorado 80225–0287.

SUPPLEMENTARY INFORMATION:

Background

The NPS promulgated regulations at 36 CFR part 9, subpart B (''9B regulations'') governing nonfederal oil and gas development in units of the National Park System in December 1978, with a January 1979 effective date. The regulations control all activities associated with nonfederal oil and gas development inside park boundaries where access is on, across, or through federally owned or controlled lands or waters. As of the drafting of this Advance Notice of Proposed Rulemaking (ANPR), there are 693 nonfederal oil and gas operations that exist in a total of 13 units of the National Park System.

The legal authority for the NPS to promulgate the 9B regulations is derived from the Property Clause (art. IV, section 3, cl. 2) and the Commerce Clause (art. I, section 8, cl. 3) of the United States Constitution, and from various statutes enacted by Congress for the administration of the National Park System. Under sections 1 and 3 of the NPS Organic Act, Congress has given the NPS, through the Secretary of the Interior, the authority to promulgate regulations necessary for the administration and management of the National Park System, which includes the authority to regulate nonfederal oil and gas activities within park boundaries for the purpose of protecting park resources and values. In addition, the enabling statutes for several individual parks contain specific provisions authorizing the NPS to regulate such oil-and gas-related activities.

Not all parks with non-federal oil and gas development occurring within their boundaries have such specific direction within their enabling statutes. Whether or not specified in an individual park enabling act, the Organic Act authority alone is legally sufficient to authorize such regulations.

Non-Federal oil and gas rights are the result of a conveyance of an interest in real property from a grantor other than the United States and may be held by individuals, companies, nonprofit organizations, or state and local governments. Such rights are a form of real property and fall under the protection of the 5th Amendment of the U.S. Constitution (''No person shall be * * * deprived of * * * property, without due process of law; nor shall private property be taken for public use, without just compensation.''). The NPS nonetheless may regulate these rights pursuant to the authority stated above.

Under the existing 9B regulations, an entity seeking to undertake nonfederal oil and gas activities in a park generally must submit and obtain NPS approval of a proposed plan of operations before commencing operations inside a park. A plan is essentially a prospective operator's blueprint of all intended activities within the boundary of the park, including exploration, drilling, production, transportation, and reclamation. The regulations require the operator to provide documentation demonstrating that the operator is exercising a bona fide property right to non-federal oil and gas in the park unit. In a proposed plan, an operator must also identify those specific measures that will be undertaken to protect park resources and values. Finally, an operator must submit a performance bond for the principal purpose of ensuring that funds will be available to reclaim a site should an operator default on its obligations under a plan.

The plan of operations requirement is the primary tool for protecting park resources and values from potential adverse impacts associated with the exercise of nonfederal oil and gas rights inside park boundaries. In reviewing a proposed plan to determine whether the NPS can approve an operation, the NPS undertakes a variety of analyses required by federal statutes, such as the National Environmental Policy Act, the Endangered Species Act, and the National Historic Preservation Act, as well as the standards specified in the 9B regulations. In analyzing proposed plans, the NPS coordinates and consults with a variety of other regulatory agencies at the federal and state level. The NPS also works closely with the operator in order to have park protection concerns addressed through the incorporation of appropriate mitigation measures into plans.

Once the NPS has completed its review and environmental compliance responsibilities and determined that a given proposal meets applicable requirements and approval standards, the NPS will approve an operator's plan of operations. The approved plan authorizes the operator to conduct its operation in a unit of the National Park System.

During the life of an oil and gas operation in a park, park resource managers monitor activities at the operator's site to ensure compliance with the plan. The existing regulations also authorize the NPS to enforce the terms of the plan as may be necessary via such means as suspension of operations or revocation of the plan approval.

It is important to note that while nonfederal oil and gas operations in parks must also comply with state requirements, the 9B regulations differ from most state oil and gas regulations by focusing on the protection of the park's natural and cultural resources and visitors. State regulations may contain some surface use provisions but

mainly focus on conservation of the oil and gas resource, protection of the associated ownership interests, and protection of surface and groundwater.

Information Requested

The NPS is interested in ideas from the public on ways the NPS could improve the existing regulations. The NPS intends to use the input from the public to aid in developing a proposed rulemaking, which will then also be published in the **Federal Register** for comment. In particular, the NPS encourages the public to provide comments and suggestions related to the topics described in the body of this ANPR.

Please indicate which of the topics your comments address and which question you are responding to. If your comments cover issues outside of these topics, please identify them as ''other.''

Regulation of Exempt Operations

The existing regulations, as provided at § 9.30(a), apply where an operator's access is ''on across, or through federally owned or controlled lands or waters.'' As a result, 109 operations (17%) are currently exempt from the regulatory requirements even though the operations occur inside park boundaries. For example, oil and gas rights under privately owned lands just inside the boundary of a park unit, and for which access to those lands is solely maintained without crossing park owned or administered lands, are not subject to these regulations.

In addition, under § 9.33, operations covered by a valid state permit in existence at the time the regulations became effective are also exempt (i.e., 255 operations or 37%). Ultimately, as these operations change hands or state permits expire, the exemption no longer applies and operators must comply with the regulations. However, the rate of turnover and permit expiration has been much slower than anticipated by the original drafters of the 9B regulations, leaving a large number of this class of operations outside the scope of the Service's regulations.

Because of these two exemptions, 53% (364 wells) of the wells in parks today are not subject to the requirements of the regulations to protect park resources and values. These exemptions are not specified in any statute, but were an exercise of the NPS's discretion at the time the regulations were promulgated.

The NPS has identified the following factors to be considered in evaluating options for possibly revising the current approach to existing operations:

A. Existing exempt operations already have established site locations and associated access routes.

B. The operations may or may not have equipment on site that reflects current-day industry standards.

C. Most of the currently exempt operations exist in 3 out of the 13 parks with nonfederal oil and gas operations within their boundaries.

D. Limited park staff and fiscal resources exist in parks for carrying out a multitude of responsibilities, including the administration of the 9B regulatory program.

The NPS is considering requiring all previously exempt operations to comply with the 9B regulations. The following ideas for how such operations could be brought under the regulations have been discussed:

Option #1—Require presently exempt operators to submit plans of operations, comply with operating standards, and provide financial assurance by a set date.

Option #2—Same as Option #1, however, the submittal of a plan of operations, compliance with operating standards, and financial assurance would be under a phased timeframe.

Option #3—Instead of requiring the submittal of a plan of operations for approval, require operators with exempt operations to verify that their operations are being conducted in a manner that fulfills a defined set of operating standards which would be enforceable by park staff. Under this option, operators will also be required to provide documentation of the legal basis for their respective oil and gas activities within the park unit, and submit financial assurance.

Questions:

1. Taking into account the factors identified above, do any of the option(s) above have greater merit for bringing previously exempt operations under the 9B regulations, and if so, why?

2. Do you have another option that you would like to suggest?

Directional Drilling

Under the existing regulations at § 9.32(e), if an operator locates surface facilities outside the park and proposes to directionally drill from those surface facilities to reach its non-Federal oil and gas rights inside the park, the operator can apply for an exemption to the 9B regulatory requirements. This provision provides an incentive to operators to locate their surface facilities outside the park and thereby greatly reduce impacts to park resources and values.

The scope of § 9.32(e) addresses only those activities that are occurring within the external boundaries of a park; that is, the downhole operations that pass through Federal subsurface estate within the boundary of a park. Surface activities associated with directional drilling operations outside the park are not within the scope of the jurisdiction provided to the NPS under § 9.32(e), or under the 9B regulations in general. If granted an exemption, operators do not need to submit a proposed plan of operation or a bond covering the activities occurring in the park (i.e., the downhole activities) to the NPS for approval. Essentially, under this provision of the regulations if an operator meets the requirements, the NPS must determine that the 9B regulations do not apply to the operator's activities.

The Service's goal relative to non-Federal oil and gas operations is to protect parks by eliminating direct impacts to park resources and values. When an operator takes advantage of the directional drilling provision of the regulations and locates its surface facilities outside park boundaries, the operator has significantly reduced direct impacts to park resources and values. By so doing, the operator has deployed a major park protection mitigation measure. While potential indirect impacts of sight, sound, artificial light, odor, and spills may exist from drilling operations outside a park, they are usually much reduced relative to surface operations in a park. Such impacts are diminished even further once the operation progresses from the drilling to production phase.

In evaluating options for revising this section of the existing regulation, the NPS has identified the following factors:

A. The NPS wants to ensure that it retain incentives for operators to locate their surface facilities outside park boundaries, and, if possible, even enhance those incentives. The NPS realizes that the primary incentive for operators to locate facilities outside park boundaries is the ability to save time and money.

B. The NPS wants to ensure the protection of park resources and values from indirect effects potentially resulting from operations that are located outside park boundaries.

The NPS is evaluating how to address directional drilling operations for the proposed rulemaking. The following ideas have been discussed:

Option #1: Retain the scope of the existing regulatory provision governing directional drilling operations.

Option #2: Expand the regulation to cover all activities associated with directional drilling operations which may affect park resources and values, both the downhole operations in the

park and the surface location outside the park.

Option #3: Exempt directional drilling operations entirely from the scope of the 9B regulations.

Questions:

3. Taking into account the factors identified above, what option(s) do you recommend for addressing directional drilling operations under the 9B regulations?

4. Are there other options for addressing the potential indirect impacts from directional drilling operations that retain the incentive for operators to locate their well pad and surface access routes outside the boundary of a park?

Operating Standards

The existing regulations contain requirements that operators must meet in conducting their operations, such as using technologically feasible least damaging methods in their operations; locating facilities away from water courses, structures, and visitor and administrative developed areas; and maintaining sites in a safe and workmanlike manner. These operating standards are found throughout various sections of the existing regulations.

The NPS realizes that the formulation of the existing standards is 30 years old. The NPS is aware that in the intervening years other agencies and industry groups have developed effective standards (e.g., API and AGA Standards and Practices, BLM Gold Book, State operating standards) that the NPS could incorporate into its regulations.

Question:

5. Do you know of examples of effective, enforceable operating standards that the NPS should consider when it develops its own comprehensive list?

Financial Assurance

The existing 9B regulations require that an operator file a performance bond, or other acceptable method of financial assurance, for all types of nonfederal oil and gas operations and all phases of the operation(s). The objective of requiring a bond is to ensure that in the event an operator becomes insolvent or defaults on his/her obligations under an approved plan of operations, adequate funds will be available for the NPS to have a third party carry out the plugging and reclamation requirements. The existing regulations place a bonding cap of up to $200,000 per operator, per NPS unit. Therefore, if one operator has multiple wells in a park unit, the NPS can only require up to $200,000 financial assurance from that one operator.

The NPS is considering eliminating the bonding cap, which was established in 1978, and replacing it with a variable amount of financial assurance equal to the reasonable estimated cost of reclamation and liability today.

Questions:

6. Are there alternatives to the existing acceptable financial assurance instruments (e.g., performance bonds, irrevocable letters of credit, and cash) that will protect the taxpayer in the event an operator defaults on its responsibilities under its approved plan of operations?

7. If so, please describe the advantages or disadvantages of one type of instrument over another.

Access Fees

The current 9B regulations at § 9.50(a)(1) authorize the park to impose a registration fee for vehicles used in connection with oil and gas operations that are using existing roads administered by the NPS. While this fee provision applies to the use of existing roads administered by the NPS, it does not apply to an operator's construction of new roads across federally owned lands to reach their non-Federal oil and gas rights.

As a result, the NPS is considering eliminating the current registration fee and replacing it with an access fee. This fee would compensate the United States for an operator's access across federally owned surface estate in order to reach the operator's non-Federal oil and gas rights, be it on an existing road administered by the NPS, or across undisturbed federally owned lands. Because the operator generally has only a right to reasonably use the federally owned surface estate immediately above the non-federal oil and gas right, this fee would not apply to access within this area. It would also bring NPS practice with respect to access fees in line with what other agencies and private land owners are doing.

Both the BLM and USFS charge fees for access where the operator has no pre-existing right to cross Federal lands. Similarly, adjacent private land owners also require operators to pay a fee to cross their land to reach the operator's oil and gas rights. Such fees are generally recognized today by the oil and gas industry as a cost of doing business.

Questions:

8. Should the NPS calculate fees for the privilege of access across federally owned lands, and how?

9. Should the NPS use an appraisal, available data from other Federal agencies that calculate and compile fair market land values (such as the National Agricultural Statistics Service), or other means to determine fair compensation for such use?

Assessments for Non-Compliance

The Superintendent's current enforcement mechanisms for operations under an approved plan are limited to suspension or revocation of the plan. If an operator fails to comply with a suspension or revocation order, the NPS must request that the Department of Justice file a civil action in Federal court seeking an injunction or restraining order to halt operations. The Superintendent has no practical method for dealing with minor regulatory infractions that do not rise to the level of suspension, revocation, or judicial intervention. Examples of minor infractions include accumulation of oilfield debris onsite, slow response to small contained spills, and lack of maintenance on access roads.

The NPS is considering revising the regulations to allow the use of administrative assessments to address minor violations of the regulations or a term or condition of an approved permit. Whenever the NPS learns of a compliance issue associated with an operation in a park, the Service's first approach is always to work with operators to have them rectify the situation. If this approach is not successful, then the NPS issues a formal notice of non-compliance to the operator. The NPS is now considering authorizing park staff to issue administrative assessments upon the failure of an operator to comply with a notice of non-compliance. The assessment would be a monetary amount that an operator must pay to the park, based on an estimation of the cost of damages to park resources due to the operator's violation of a term or condition of an approved permit. An example of such an approach is found under BLM regulations at 43 CFR 3163.1, which gives BLM authority to assess a penalty of $500 per day for major violations, and $250 for minor violations.

Question:

10. Are there other more effective means beyond the imposition of an administrative assessment that the NPS can use to address minor infractions and to provide operators an incentive to comply with the regulations?

NPS seeks responses to the above noted questions from the public. Additionally, the NPS seeks any relevant comments to other issues regarding these regulations. Where options are presented, the NPS especially seeks comments as to which ones may be considered the most

effective and efficient approach to managing nonfederal oil and gas development inside park boundaries. After analyzing the comments received from this notice, the NPS intends to determine how to proceed with a proposed rulemaking.

Additional information about the NPS Non-Federal Oil and Gas Program is available at *http://www.nature.nps.gov/geology/oil_and_gas/index.cfm.*

Public Participation

All submissions received must include the agency name and RIN 1024–AD78 for this notice. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

At this time, the NPS is not soliciting comments on environmental impacts. The NPS will do so as part of its environmental compliance under the National Environmental Policy Act.

Dated: October 2, 2009.

Will Shafroth,

Acting Assistant Secretary for Fish and Wildlife and Parks.

Fuel Economy Regulations for Automobiles: Technical Amendments and Corrections

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to amend and correct portions of its existing fuel economy regulations. There are three reasons for this action. First, some minor corrections and amendments are needed to EPA's December 27, 2006 final rule for fuel economy labeling requirements for cars and light trucks. Second, the Department of Transportation finalized new average fuel economy standards for 2008–2011 light trucks on April 6, 2006. Third, on March 30, 2009, NHTSA revised CAFE requirements for 2011 trucks and finalized new average fuel economy (CAFE) standards for 2011 passenger automobiles. In order for DOT to administer these new standards, EPA must make some conforming changes to its regulations. In addition, some minor conforming changes to EPA's regulations are needed for two other separate statutory and regulatory actions. None of the above amendments and corrections would have any direct impact on human health and the environment, but they would allow for the more effective administration of existing regulations. In the ''Rules and Regulations'' section of this **Federal Register,** we published the above actions as a direct final rule without a prior proposed rule. If we receive no adverse comment, we will not take further action on this proposed rule. If we receive adverse comment, we will withdraw the portions of the final rule receiving such comment and those portions will not take effect. We will address all public comments in a subsequent final rule based on this proposed rule. We will not institute a second comment period on this action. Any parties interested in commenting must do so at this time.

DATES: Written comments must be received by December 28, 2009.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2005–0169, by one of the following methods:

- *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.
- *Fax:* (202) 566–1741.
- *Mail:* Environmental Protection Agency, EPA Docket Center (EPA/DC), Air and Radiation Docket, Mail Code 6102T, 1200 Pennsylvania Avenue, NW., Washington, DC 20460, Attention Docket ID No. EPA–HQ–OAR–2005–0169. In addition, please mail a copy of your comments on the information collection provisions to the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), *Attn:* Desk Officer for EPA, 725 17th St., NW., Washington, DC 20503.''
- *Hand Delivery:* Docket Center, (EPA/DC) EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC, Attention Docket ID No. OAR–2005–0169. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA–HQ–OAR–2005–0169. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or e-mail. The *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.* For additional instructions on submitting comments, go to Section VII of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: All documents in the docket are listed in the www.regulations.gov index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in www.regulations.gov or in hard copy at the EPA Docket Center, EPA/DC, EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC. This Docket Facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The EPA Docket Center telephone number is (202) 566–1742. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number

for the Public Reading Room is (202) 566–1744.

FOR FURTHER INFORMATION CONTACT: Christine Mikolajczyk, Office of Transportation and Air Quality, Compliance and Innovative Strategies Division, Environmental Protection Agency, 2000 Traverwood Drive, Ann Arbor, MI 48105; *telephone number:* (734) 214–4403; *fax number:* (734) 214–4053; *e-mail address: mikolajczyk.christine@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Why Is EPA Issuing This Proposed Rule?

This document proposes to take action on minor amendments and corrections to EPA's existing emission and fuel economy regulations, located at 40 CFR Part 86 and Part 600. This proposal clarifies that special test procedures, calculation methods and label formats may be used for fuel economy labels and CAFE calculations of advanced technology vehicles. Advanced technology vehicles include, but are not limited to electric vehicles, fuel cell vehicles, plug-in hybrid vehicles and vehicles equipped with hydrogen-fueled internal combustion engines. This proposal also includes technical amendments to the fuel economy label regulations, including changes to the minivan definition, van definition, interior volume measurements of passenger vehicles, and special purpose class of vehicles. Today's action also proposes to correct some typographical errors and make other minor modifications to ensure accurate interpretation of the regulations. The changes to the EPA CAFE regulations are being proposed to conform to the NHTSA regulations, and include adding new reporting provisions that would enable EPA to provide NHTSA with the data it needs to determine compliance with the 2008–2011 CAFE standards for passenger automobiles and trucks.

In addition, two conforming changes are being proposed to align the EPA CAFE regulations with a 2007 Energy Independence and Security Act (EISA) amendment extending the alternative fuel vehicle CAFE credits to 2019, and to align the EPA CAFE regulations with a previous NHTSA rulemaking which eliminated the requirement to report separate CAFE values for domestic and imported trucks.

We have published a direct final rule which amends the Fuel Economy and Emission Regulation requirements in the ''Rules and Regulations'' section of this **Federal Register** because we view this as a noncontroversial action and anticipate no adverse comment. We have explained our reasons for this action in the preamble to the direct final rule. This proposal incorporates by reference all of the reasoning, explanation, and regulatory text for this proposal. Please refer to the direct final rule that is located in the ''Rules and Regulations'' section of this **Federal Register** publication. The direct final rule will be effective on January 25, 2010 unless we receive adverse comment by December 28, 2009.

If we receive no adverse comment, we will not take further action on this proposed rule. If we receive adverse comment, we will withdraw the direct final rule and it will not take effect. We would address all public comments in any subsequent final rule based on this proposed rule. If we receive adverse comment on a distinct provision of this rulemaking, we will publish a withdrawal in the **Federal Register** indicating which provisions we are withdrawing. The provisions that are not withdrawn will become effective on the date set out above, notwithstanding adverse comment on any other provision.

We do not intend to institute a second comment period on this action. Any parties interested in commenting must do so at this time. For further information, please see the information provided in the **ADDRESSES** section of this document.

II. Does This Action Apply to Me?

This action applies to manufacturers of new passenger cars and light trucks, including medium-duty passenger vehicles.[1] Regulated categories and entities include:

Category	NAICS codes [a]	Examples of potentially regulated entities
Industry	336111, 336112	Motor vehicle manufacturers.
Industry	811112, 811198, 541514.	Commercial Importers of Vehicles and Vehicle Components.

[a] North American Industry Classification System (NAICS).

III. What Should I Consider as I Prepare My Comments for EPA?

A. Submitting CBI

Do not submit this information to EPA through *http://www.regulations.gov* or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

B. Tips for Preparing Your Comments

When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns, and suggest alternatives.
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

[1] ''Passenger car,'' ''light truck,'' and ''medium-duty passenger vehicle'' are defined in 40 CFR 600.002–08. Generally, the term ''light truck'' means a pick-up truck, sport-utility vehicle, or minivan of up to 8,500 lbs gross vehicle weight rating, and ''medium-duty passenger vehicle'' means a sport-utility vehicle or passenger van from 8,500 to 10,000 lbs gross vehicle weight rating. Medium-duty passenger vehicles do not include pick-up trucks.

• Make sure to submit your comments by the comment period deadline identified.

C. Docket Copying Costs

You may be charged a reasonable fee for photocopying docket materials, as provided in 40 CFR Part 2.

IV. What Are the Administrative Requirements of This Proposed Rule?

A. Executive Order 12866: Regulatory Planning and Review

Under Executive Order (EO) 12866 (58 FR 51735, October 4, 1993), this action is a ''significant regulatory action'' because it has the potential to raise novel legal or policy issues. Accordingly, EPA submitted this action to the Office of Management and Budget (OMB) for review under EO 12866 and any changes made in response to OMB recommendations have been documented in the docket for this action.

B. Paperwork Reduction Act

This action does not impose any substantive new information collection burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* for the changes to the minivan definition, the requirements to include medium-duty passenger vehicles (MDPVs) in CAFE calculations, the additional CAFE footprint reporting requirements, or any other certification, fuel economy labeling and CAFE changes contained in this direct final rule. Burden is defined at 5 CFR 1320.3(b). Note that the data submittal requirements to include MDPVs in 2011 and later CAFE data and to report footprint information for reformed CAFE have already been established by NHTSA in its final rules for new passenger automobile and truck CAFE standards,[2] and the accompanying NHTSA ICR (OMB 2127–00019).

The revision to the minivan definition in today's action has a de minimis impact; however, if anything, the revision is expected to reduce manufacturers' information collection burden. For example, manufacturers were previously required to calculate and report to EPA the total interior volume of each style of minivan and full-sized van to determine whether the van was at or below 180 cubic feet in interior volume. Today's action eliminates the 180 cubic feet interior volume specification from the minivan definition, thus slightly reducing manufacturers' reporting and recordkeeping burden.

Regarding the MDPV requirements for 2011 and later CAFE, the following statement was made in EPA's Information Collection Request (ICR) for the 2008 Fuel Economy Labeling rule (71 FR 77872, December 27, 2006):

> Also beginning with model year 2011, medium-duty passenger vehicles (MDPVs) will be included in the labeling program. MDPVs essentially include SUVs and passenger vans that are between 8,500 and 10,000 lbs. ''GVWR'' (gross vehicle weight ratings). This change is congruent with the National Highway Traffic Safety Administration's (NHTSA's) expansion of the Corporate Average Fuel Economy (CAFE) program to include MDPVs beginning the same model year (71 FR 17565; April 6, 2006). Because more vehicle testing is required under CAFE than under labeling, the impacts of increased testing for MDPVs will be in the ICR for the rule to implement EPA's role in the CAFE program, which will be finalized in a separate action, in time for model year 2011, *or in the appropriate fuel economy program information collection renewal.*[3] (Emphasis added.)

Thus, in the 2008 FE Label rulemaking EPA indicated we would either include the MDPV information collection requirements in an ICR for today's rulemaking or include it in the EPA's emission and fuel economy ICR renewal request to OMB (which occurs every three years). EPA elected the latter approach, and has included the additional MDPV testing, reporting and recordkeeping burden for fuel economy labeling and CAFE purposes in ICR 0783.54 (OMB 2060–0320), the renewal of the Motor Vehicle Emissions and Fuel Economy Compliance ICR which was submitted to OMB for review on October 23, 2008. Since EPA MDPV ICR requirements have been previously submitted to OMB and because they were also included in NHTSA's ICR (OMB 2127–00019), they are not included in today's action.

Regarding footprint information, the reporting requirements for footprint information and related data were not specifically addressed in the ICR for EPA's Fuel Economy Labeling Rule (ICR 0783.51, OMB 2060–0104) because any change in burden was considered to be negligible and within the margin of error for the information technology estimate in that ICR; and because the information collection burden was partially included in the NHTSA ICR (OMB 2127–00019). The information collection burden for footprint information is currently included in EPA's ICR 0783.54 (OMB 2060–0320), the renewal of the Motor Vehicle Emissions and Fuel Economy Compliance ICR, which was submitted to OMB for review on October 23, 2008.

Additionally, the footprint information reported to EPA for final CAFE reports (wheelbase, track width and sales information) is essentially the same information which will have been previously reported to NHTSA when manufacturers submitted their preliminary CAFE (PCAFE) and mid-model year CAFE reports to NHTSA. [Note that manufacturers are not required to submit PCAFE or mid-model year reports to EPA.] Reporting footprint information to EPA with final sales data is expected to be a minimal burden because manufacturers will have already established company business practices to track footprint and sales information for NHTSA and because manufacturers have been reporting CAFE final sales information to EPA since 1978.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

For purposes of assessing the impacts of this proposed rule on small entities, a small entity is defined as: (1) A small business as defined by the Small Business Administration (SBA) regulations at 13 CFR 121.201; (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of this action on small entities, I certify that this action will not have a significant economic impact on a substantial number of small entities. Based on Small Business Administration size standards, small businesses in the automobile manufacturing industry are defined as those having less than 1000 employees per firm. Additionally, they are identified using the North America Industrial Classification System (NAICS) by NAICS code 336111. Out of a total of approximately 80 automotive manufacturers subject to this action,

[2] *See* 49 CFR 537.7(c)(4), as amended by 71 FR 17678, April 6, 2006 and 74 FR 14196, March 30, 2009.

[3] *See* 71 FR 77872, December 27, 2006.

EPA estimates that approximately 10 of these could be classified as small entities based on SBA size standards. No new burden for fuel economy labeling is being imposed by this action. The new reporting requirement for the reform CAFE footprint data has already been established by NHTSA in its final rule for new truck CAFE standards,[4] and thus this action imposes no additional burden.

D. Unfunded Mandates Reform Act

This rule does not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and tribal governments, in the aggregate, or the private sector in any one year. This action simply makes minor amendments, clarifications, and corrections that will allow for the more effective administration of existing regulations. Thus, this rule is not subject to the requirements of sections 202 or 205 of the Unfunded Mandates Reform Act. This rule is also not subject to the requirements of section 203 of the Unfunded Mandates Reform Act because it contains no regulatory requirements that might significantly or uniquely affect small governments. This action imposes no enforceable duty on any State, local or tribal governments.

E. Executive Order 13132: Federalism

Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' ''Policies that have federalism implications'' is defined in the Executive Order to include regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.''

This proposed rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. Thus, Executive Order 13132 does not apply to this rule.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175 (65 FR 67249, November 9, 2000). The impacts of this proposed rule are limited to the regulated entities: the automotive manufacturing industry. Thus, Executive Order 13175 does not apply to this action. EPA specifically solicits additional comment on this proposed action from tribal officials.

G. EO 13045 ''Protection of Children From Environmental Health Risks and Safety Risks''

Executive Order 13045: ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997) applies to any rule that: (1) Is determined to be ''economically significant'' as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

EPA interprets EO 13045 (62 FR 19885, April 23, 1997) as applying only to those regulatory actions that concern health or safety risks, such that the analysis required under section 5–501 of the EO has the potential to influence the regulation. This action is not subject to EO 13045 because it does not establish an environmental standard intended to mitigate health or safety risks.

H. Executive Order 13211 (Energy Effects)

This rule is not a ''significant energy action'' as defined in Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001) because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Further, we have concluded that this rule is not likely to have any adverse energy effects.

I. National Technology Transfer Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (''NTTAA''), Public Law 104–113, 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This action does not involve technical standards. Therefore, EPA did not consider the use of any voluntary consensus standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order (EO) 12898 (59 FR 7629, Feb. 16, 1994) establishes federal executive policy on environmental justice. Its main provision directs federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA has determined that this proposed rule will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it does not affect the level of protection provided to human health or the environment. This action simply makes minor amendments, clarifications, and corrections that will allow for the more effective administration of existing regulations without impacting the current fuel economy and emission control measures.

V. Statutory Provisions and Legal Authority

Statutory authority for the fuel economy labeling program and for corporate average fuel economy can be found in the Clean Air Act, 42 U.S.C. 7401–7671q, 49 U.S.C. 32901–32919, and Public Law 109–58. Statutory authority for vehicle emission control program is found in the Clean Air Act, as amended 42 U.S.C. 7401 *et seq.,* in particular sections 202 and 206 of the Act, 42 U.S.C. 7521 and 7525.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

[Docket ID FEMA–2008–0020; Internal Agency Docket No. FEMA–B–1080]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule.

SUMMARY: Comments are requested on the proposed Base (1% annual-chance) Flood Elevations (BFEs) and proposed BFE modifications for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the proposed regulatory flood elevations for the reach described by the downstream and upstream locations in the table below. The BFEs and modified BFEs are a part of the floodplain management measures that the community is required either to adopt or show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, these elevations, once finalized, will be used by insurance agents, and others to calculate appropriate flood insurance premium rates for new buildings and the contents in those buildings.

DATES: Comments are to be submitted on or before February 23, 2010.

ADDRESSES: The corresponding preliminary Flood Insurance Rate Map (FIRM) for the proposed BFEs for each community is available for inspection at the community's map repository. The respective addresses are listed in the table below.

You may submit comments, identified by Docket No. FEMA–B–1080, to Kevin C. Long, Acting Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–2820, or (e-mail) *kevin.long@dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Kevin C. Long, Acting Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–2820, or (e-mail) *kevin.long@dhs.gov.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) proposes to make determinations of BFEs and modified BFEs for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

Comments on any aspect of the Flood Insurance Study and FIRM, other than the proposed BFEs, will be considered. A letter acknowledging receipt of any comments will not be sent.

National Environmental Policy Act. This proposed rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

Regulatory Flexibility Act. As flood elevation determinations are not within the scope of the Regulatory Flexibility Act, 5 U.S.C. 601–612, a regulatory flexibility analysis is not required.

Executive Order 12866, Regulatory Planning and Review. This proposed rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866, as amended.

Executive Order 13132, Federalism. This proposed rule involves no policies that have federalism implications under Executive Order 13132.

Executive Order 12988, Civil Justice Reform. This proposed rule meets the applicable standards of Executive Order 12988.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 67 is proposed to be amended as follows:

PART 67—[AMENDED]

1. The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.4 [Amended]

2. The tables published under the authority of § 67.4 are proposed to be amended as follows:

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground ^ Elevation in meters (MSL)		Communities affected
		Effective	Modified	
Cherokee County, Alabama, and Incorporated Areas				
Coosa River	Approximately 1,080 feet downstream of State Highway 35.	None	+575	Town of Gaylesville.
	Approximately 2.0 miles upstream of State Highway 35.	None	+579	

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground ^ Elevation in meters (MSL)		Communities affected
		Effective	Modified	
Weiss Lake	Entire shoreline of Weiss Lake	None	+573	Town of Cedar Bluff.

* National Geodetic Vertical Datum.
+ North American Vertical Datum.
# Depth in feet above ground.
^ Mean Sea Level, rounded to the nearest 0.1 meter.
** BFEs to be changed include the listed downstream and upstream BFEs, and include BFEs located on the stream reach between the referenced locations above. Please refer to the revised Flood Insurance Rate Map located at the community map repository (see below) for exact locations of all BFEs to be changed.

Send comments to Kevin C. Long, Acting Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472.

ADDRESSES

Acting Deputy Assistant Administrator for Mitigation, Mitigation Directorate, Department of Homeland Security, Federal Emergency Management Agency.

[FR Doc. E9–28311 Filed 11–24–09; 8:45 am]

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

[Docket ID FEMA–2008–0020; Internal Agency Docket No. FEMA–B–1076]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule.

SUMMARY: Comments are requested on the proposed Base (1% annual-chance) Flood Elevations (BFEs) and proposed BFE modifications for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the proposed regulatory flood elevations for the reach described by the downstream and upstream locations in the table below. The BFEs and modified BFEs are a part of the floodplain management measures that the community is required either to adopt or show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, these elevations, once finalized, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents in those buildings.

DATES: Comments are to be submitted on or before February 23, 2010.

ADDRESSES: The corresponding preliminary Flood Insurance Rate Map (FIRM) for the proposed BFEs for each community is available for inspection at the community's map repository. The respective addresses are listed in the table below.

You may submit comments, identified by Docket No. FEMA–B–1076, to Kevin C. Long, Acting Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–2820, or (e-mail) *kevin.long@dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Kevin C. Long, Acting Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–2820, or (e-mail) *kevin.long@dhs.gov.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) proposes to make determinations of BFEs and modified BFEs for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

Comments on any aspect of the Flood Insurance Study and FIRM, other than the proposed BFEs, will be considered. A letter acknowledging receipt of any comments will not be sent.

National Environmental Policy Act. This proposed rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

Regulatory Flexibility Act. As flood elevation determinations are not within the scope of the Regulatory Flexibility Act, 5 U.S.C. 601–612, a regulatory flexibility analysis is not required.

Executive Order 12866, Regulatory Planning and Review. This proposed rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866, as amended.

Executive Order 13132, Federalism. This proposed rule involves no policies that have federalism implications under Executive Order 13132.

Executive Order 12988, Civil Justice Reform. This proposed rule meets the applicable standards of Executive Order 12988.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 67 is proposed to be amended as follows:

PART 67—[AMENDED]

1. The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.;* Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.4 [Amended]

2. The tables published under the authority of § 67.4 are proposed to be amended as follows:

Flooding source(s)	Location of referenced elevation	*Elevation in feet (NGVD) +Elevation in feet (NAVD) #Depth in feet above ground ^Elevation in meters (MSL)		Communities affected
		Effective	Modified	
Greene County, Georgia, and Incorporated Areas				
Oconee River	Approximately 0.79 mile downstream of the Oglethorpe/Greene County Border.	None	+459	Unincorporated Areas of Greene County.
	At the Oglethorpe/Greene County border	None	+462	

* National Geodetic Vertical Datum.
+ North American Vertical Datum.
# Depth in feet above ground.
^ Mean Sea Level, rounded to the nearest 0.1 meter.
** BFEs to be changed include the listed downstream and upstream BFEs, and include BFEs located on the stream reach between the referenced locations above. Please refer to the revised Flood Insurance Rate Map located at the community map repository (see below) for exact locations of all BFEs to be changed.

Send comments to Kevin C. Long, Acting Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472.

Deborah S. Ingram,

Acting Deputy Assistant Administrator for Mitigation, Mitigation Directorate, Department of Homeland Security, Federal Emergency Management Agency.

[FR Doc. E9–28312 Filed 11–24–09; 8:45 am]

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

[Docket ID FEMA–2008–0020; Internal Agency Docket No. FEMA–B–1078]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule.

SUMMARY: Comments are requested on the proposed Base (1% annual-chance) Flood Elevations (BFEs) and proposed BFE modifications for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the proposed regulatory flood elevations for the reach described by the downstream and upstream locations in the table below. The BFEs and modified BFEs are a part of the floodplain management measures that the community is required either to adopt or show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, these elevations, once finalized, will be used by insurance agents, and others to calculate appropriate flood insurance premium rates for new buildings and the contents in those buildings.

DATES: Comments are to be submitted on or before February 23, 2010.

ADDRESSES: The corresponding preliminary Flood Insurance Rate Map (FIRM) for the proposed BFEs for each community is available for inspection at the community's map repository. The respective addresses are listed in the table below.

You may submit comments, identified by Docket No. FEMA–B–1078, to Kevin C. Long, Acting Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–2820, or (e-mail) *kevin.long@dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Kevin C. Long, Acting Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–2820, or (e-mail) *kevin.long@dhs.gov.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) proposes to make determinations of BFEs and modified BFEs for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

Comments on any aspect of the Flood Insurance Study and FIRM, other than the proposed BFEs, will be considered. A letter acknowledging receipt of any comments will not be sent.

National Environmental Policy Act. This proposed rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

Regulatory Flexibility Act. As flood elevation determinations are not within the scope of the Regulatory Flexibility Act, 5 U.S.C. 601–612, a regulatory flexibility analysis is not required.

Executive Order 12866, Regulatory Planning and Review. This proposed rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866, as amended.

Executive Order 13132, Federalism. This proposed rule involves no policies that have federalism implications under Executive Order 13132.

Executive Order 12988, Civil Justice Reform. This proposed rule meets the applicable standards of Executive Order 12988.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 67 is proposed to be amended as follows:

PART 67—[AMENDED]

1. The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.;* Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.4 [Amended]

2. The tables published under the authority of § 67.4 are proposed to be amended as follows:

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground ^ Elevation in meters (MSL)		Communities affected
		Effective	Modified	
Jackson County, Florida, and Incorporated Areas				
Buck Pelt Creek	Just upstream of Fillmore Drive	None	+83	Unincorporated Areas of Jackson County.
	Approximately 0.4 mile upstream of State Highway 73	None	+137	
Chipola River	Approximately 1,450 feet upstream of County Highway 162.	None	+88	Unincorporated Areas of Jackson County.

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground ^ Elevation in meters (MSL)		Communities affected
		Effective	Modified	
	At the confluence with Marshall Creek	None	+93	
Chipola River Tributary 7	Approximately 0.4 mile downstream of Jefferson Street.	None	+83	Unincorporated Areas of Jackson County, City of Marianna
	Approximately 1.6 mile upstream of Penn Avenue	None	+134	
Dry Creek	Approximately 2.7 miles upstream of the confluence with Chipola River.	None	+74	Unincorporated Areas of Jackson County.
	Just downstream of Mill Road	None	+97	
Dry Creek Tributary 11	At the confluence with Dry Creek	None	+74	Unincorporated Areas of Jackson County.
	Approximately 1.5 mile upstream of the confluence with Dry Creek.	None	+74	
Little Creek	Just downstream of Ezell Road	None	+147	Unincorporated Areas of Jackson County.
	Approximately 590 feet downstream of Ezell Road	None	+147	
Long Branch	At the confluence with Dry Creek	None	+74	Unincorporated Areas of Jackson County.
	Approximately 0.8 mile upstream of Interstate 10	None	+132	
Long Branch Tributary 2	At the confluence with Long Branch	None	+78	Unincorporated Areas of Jackson County.
	Approximately 0.7 mile upstream of the confluence with Long Branch.	None	+98	
Long Branch Tributary 3	At the confluence with Long Branch	None	+87	Unincorporated Areas of Jackson County.
	Approximately 1.3 mile upstream of Thompson Road	None	+129	
Unnamed Stream 59	At the confluence with Unnamed Stream 59–1	None	+77	Unincorporated Areas of Jackson County.
	Approximately 1.1 mile upstream of the confluence with Unnamed Stream 59–1.	None	+96	
Unnamed Stream 59–1	At the confluence with Unnamed Stream 59	None	+77	Unincorporated Areas of Jackson County.
	Approximately 0.5 mile upstream of Bright Prospect Road.	None	+108	

* National Geodetic Vertical Datum.
+ North American Vertical Datum.
# Depth in feet above ground.
^ Mean Sea Level, rounded to the nearest 0.1 meter.
** BFEs to be changed include the listed downstream and upstream BFEs, and include BFEs located on the stream reach between the referenced locations above. Please refer to the revised Flood Insurance Rate Map located at the community map repository (see below) for exact locations of all BFEs to be changed.

Send comments to Kevin C. Long, Acting Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472.

49 CFR Part 214

[Docket No. FRA–2008–0059, Notice No. 3]

RIN 2130–AB96

Railroad Workplace Safety; Adjacent-Controlled-Track On-Track Safety for Roadway Workers

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FRA proposes to amend its regulations on railroad workplace safety to reduce further the risk of serious injury or death to roadway workers. In particular, FRA proposes to require that railroads adopt specified on-track safety procedures to protect certain roadway work groups from the movement of trains or other on-track equipment on ''adjacent controlled track.'' FRA proposes to define ''adjacent controlled track'' to mean ''a controlled track whose track center is spaced 19 feet or less from the track center of the occupied track.'' These on-track safety procedures would be required for each adjacent controlled track when a roadway work group with at least one of the roadway workers on the ground is engaged in a common task with an on-track roadway maintenance machine or coupled equipment on an occupied track. FRA also proposes to require that railroads, contractors to railroads, and roadway workers comply with these procedures. The NPRM issued as ''Notice No. 1'' under this same docket number and published July 17, 2008 (73 FR 41214), was withdrawn by ''Notice No. 2'' published August 13, 2008 (73 FR 47124).

DATES: (1) Written comments must be received no later than January 25, 2010. Comments received after that date will be considered to the extent possible without incurring additional expense or delay.

(2) FRA anticipates being able to resolve this rulemaking without a public, oral hearing. However, if FRA receives a specific request for a public, oral hearing prior to December 28, 2009, one will be scheduled and FRA will publish a supplemental notice in the **Federal Register** to inform interested parties of the date, time, and location of any such hearing.

ADDRESSES: *Comments:* You may submit comments on this NPRM, identified by Docket No. FRA–2008–0059, Notice No. 3, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, West Building, Ground Floor, M–33, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.
- *Hand Delivery or Courier:* Docket Management Facility, U.S. Department of Transportation, West Building, Ground Floor, M–33, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.
- *Fax:* 202–493–2251.

Instructions: For detailed instructions on submitting comments, and additional information on the rulemaking process, see the ''Public Participation'' heading of the **SUPPLEMENTARY INFORMATION** section of this preamble. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the ''Privacy Act'' subheading under the ''Regulatory Impact and Notices''

heading, below, in Section VIII.I. of this preamble.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov* anytime, or to the Docket Management Facility, U.S. Department of Transportation, West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays. Follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT: Kenneth Rusk, Staff Director, Track Division, Office of Safety Assurance and Compliance, FRA, 1200 New Jersey Avenue, SE., RRS–15, Mail Stop 25, Washington, DC 20590 (telephone 202–493–6236); or Anna Winkle, Trial Attorney, Office of Chief Counsel, FRA, 1200 New Jersey Avenue, SE., RCC–12, Mail Stop 10, Washington, DC 20590 (telephone 202–493–6166 or 202–493–6052).

I. Impetus for Rulemaking

As will be detailed in this NPRM, the recent increase in roadway worker fatalities that have occurred on an adjacent track (*i.e.,* under the existing rule, any track within 25 feet of the centerline of the track to which the roadway work group was assigned to perform one or more roadway worker duties) has caused considerable concern at FRA and throughout the industry, even prompting the filing of a joint petition for emergency order under 49 U.S.C. 20104 on April 11, 2008. *See* 49 CFR part 214, subpart C (''Roadway Worker Protection Rule'' or ''RWP Rule''). FRA had issued a notice of safety advisory to address this same issue in May of 2004; however, it appears that the salutary effects of the safety advisory, which produced a period of 16 months with no fatalities on an adjacent track, were not long-lasting, as four fatalities have since occurred on an adjacent track where a roadway work group, with at least one of the roadway workers on the ground, was engaged in a common task with an on-track roadway maintenance machine or coupled equipment on an occupied track. These proposed amendments to the Roadway Worker Protection Rule are based on the consensus language developed through the Roadway Worker Protection (RWP) Working Group of FRA's Railroad Safety Advisory Committee (RSAC), which is comprised of various representatives of the groups that are affected by this rule (including railroad management, railroad labor organizations, and contractors). Because incidents involving adjacent controlled tracks appear to present clear evidence of significant risk that is not effectively addressed by the current regulation, FRA has concluded that moving forward with this proposal in advance of the other proposals contained in the RSAC consensus [1] is necessary and appropriate.

II. Overview of the Existing RWP Rule

A. Applicability and Basic Definitions

The RWP Rule requires each railroad that operates rolling equipment on track that is part of the general railroad system of transportation to ''adopt and implement a program that will afford on-track safety to all roadway workers whose duties are performed on that railroad.'' *See* 49 CFR 214.3, 214.303(a).[2] ''On-track safety'' is defined as ''a state of freedom from the danger of being struck by a moving railroad train or other railroad equipment, provided by operating and safety rules that govern track occupancy by personnel, trains and on-track equipment.'' *See* § 214.7. The roadway workers that must be afforded on-track safety are any employees of a railroad, or of a contractor to a railroad, whose duties include ''inspection, construction, maintenance or repair of railroad track, bridges, roadway, signal and communication systems, electric traction systems, roadway facilities or roadway maintenance machinery on or near track or with the potential of fouling a track, and flagmen and watchmen/lookouts . * * *'' *See* § 214.7, ''Roadway worker.''

B. Authorized Methods of Establishing On-Track Safety

Several methods are authorized to be used to provide on-track safety for roadway workers, and many of those methods involve establishing ''working limits,'' which is defined in part as ''a segment of track with definite boundaries established in accordance with [part 214] upon which trains and engines may move only as authorized by the roadway worker having control over that defined segment of track.'' *See* §§ 214.7 and 214.319. Working limits may be established on controlled track (*i.e.,* ''track upon which the railroad's operating rules require that all movements of trains must be authorized by a train dispatcher or a control operator'') through exclusive track occupancy (§ 214.321), foul time (§ 214.323), or train coordination (§ 214.325). *See* §§ 214.7 and 214.319. Regardless of which method is chosen, the working limits are only permitted to be under the control of a qualified roadway worker in charge, and all affected roadway workers must be notified and either clear of the track or provided on-track safety through train approach warning (in accordance with § 214.329) before the working limits are released to permit the operation of trains or other on-track equipment through the working limits. *See id.*

Train approach warning is another common method of establishing on-

[1] While the consensus language relating to adjacent track issues that was developed through the RSAC was originally intended to be published as part of a larger NPRM, FRA has decided to propose these adjacent-track-related provisions in this separate NPRM so that an appropriate provision will be in effect in a more timely fashion than if the provision were one of many in the larger rulemaking that would need to undergo internal review and approval and public notice and comment. The remaining provisions not related to adjacent track will be proposed in a separate NPRM at a later date, as part of the larger RWP rulemaking.

[2] All references in this preamble to a section or other provision of a regulation are to a section, part or, other provision in title 49, Code of Federal Regulations unless otherwise specified.

track safety in which a trained and qualified watchman/lookout provides warning to roadway worker(s) of the approach of a train or on-track equipment in sufficient time to enable each roadway worker to move to and occupy a previously arranged place of safety not less than 15 seconds before a train moving at the maximum speed authorized on that track would arrive at the location of the roadway worker. *See* §§ 214.329 and 214.7 ''Watchman/lookout.'' Train approach warning is sometimes used as a temporary form of on-track safety when a roadway worker in charge needs to nullify the on-track safety previously established by working limits in order to permit a train or piece of on-track equipment to enter the roadway work group's working limits. Train approach warning permits the roadway workers to continue working for longer (than if working limits were the only form of on-track safety in effect) if the working limits span several miles and the train or equipment will not be passing by the work area for some time due to a speed restriction, the distance away, or the train or equipment halting its movement. It should be noted that switching temporarily to ''train approach warning'' is permissible only if the change was previously discussed in detail with the roadway work group either in the on-track safety job briefing prior to beginning work or in an updated on-track safety job briefing pursuant to § 214.315(d). *See* § 214.315.

C. Existing On-Track Safety Requirements for Roadway Work Groups With Respect to Adjacent Tracks

Section 214.335(c) of the RWP Rule currently requires that roadway work groups engaged in ''large-scale maintenance or construction'' be provided with on-track safety in the form of ''train approach warning'' for train or equipment movements on adjacent tracks if the adjacent tracks are not already included within the working limits. Under the current definition of ''adjacent tracks,'' on-track safety as discussed above is required for any tracks with track centers spaced less than 25 feet apart from the track center of the track to which a roadway work group is assigned to perform large-scale maintenance or construction. *See* §§ 214.7, 214.335(c). The track to which the roadway work group is assigned to perform the large-scale maintenance or construction is commonly referred to as the ''occupied track.'' Thus, in triple-main track territory, if a roadway work group is occupying the middle track (*e.g.,* Main Track No. 2) in order to perform large-scale maintenance or construction, and the track centers of the tracks on either side of the occupied track are within 25 feet of the track center of the occupied track, then on-track safety is required to be established on both adjacent tracks (*e.g.,* Main Track Nos. 1 and 3). In some yards or territories, where track centers may be spaced only 12 feet apart, an occupied track (*e.g.,* Yard Track No. 3) may have up to four adjacent tracks (*e.g.,* Yard Track Nos. 1, 2, 4, and 5). In such cases, the current rule requires on-track safety to be established on all four adjacent tracks, in addition, of course, to the on-track safety required for the occupied track itself. *See* §§ 214.335(c) and 214.337(a).

Although the term ''large-scale maintenance or construction'' is not specifically defined in the regulation, FRA noted in the preamble to the 1996 final rule establishing the RWP Rule that the principle behind the reference to large-scale maintenance or construction ''is the potential for distraction, or the possibility that a roadway worker or roadway maintenance machine might foul the adjacent track and be struck by an approaching or passing train,'' and further stated that ''conditions in which the risk of distraction is significant'' require measures to provide on-track safety on adjacent tracks.'' *See* 61 FR 65959, 65971 (December 16, 1996). To further clarify what was meant by the term ''large-scale maintenance or construction,'' FRA adopted the recommendation of the Roadway Worker Safety Advisory Committee, which described large-scale track maintenance and/or renovations, such as but not limited to, ''rail and tie gangs, production in-track welding, ballast distribution, and undercutting.'' *See id.* Under such guidance, many railroads were not providing on-track safety on adjacent tracks for surfacing operations, small tie renewal operations, or similar maintenance operations that, while smaller in scale, still included one or more on-track roadway maintenance machines or coupled equipment. Fatalities occurred on the adjacent track during such operations when on-track safety was not established on the adjacent track or had been temporarily or permanently nullified or suspended to permit the passage of a train or other on-track equipment.

III. Notice of Safety Advisory 2004–01

After the occurrence of five roadway worker fatalities in one calendar year (2003), including one on an adjacent track, FRA responded on April 27, 2004, by issuing Notice of Safety Advisory 2004–01, which was later published in the **Federal Register** on May 3, 2004. *See* 69 FR 24220. FRA issued this safety advisory to recommend certain safety practices, to review existing requirements for the protection of roadway workers from traffic on adjacent tracks, and to heighten awareness to prevent roadway workers from inadvertently fouling a track when on-track safety is not provided. *See id.*

The safety advisory explained that the requirements of the RWP Rule, including the requirement to provide adjacent track on-track safety for large-scale maintenance or construction in § 214.335(c), are only minimum standards. The advisory emphasized that railroads and railroad contractors are free to prescribe additional or more-stringent standards consistent with the rule. *See id.* at 24222 and § 214.301(b).

FRA recommended that railroads and contractors to railroads develop and implement basic risk assessment procedures for use by roadway workers to determine the likelihood that a roadway worker or equipment would foul an adjacent track prior to initiating work activities, regardless of whether those activities were ''large-scale'' or ''small-scale.'' The advisory provided examples of relevant factors to consider in making such an assessment. These factors included whether the work could be conducted by individuals positioned between the rails of a track on which on-track safety has been established, as opposed to being on the field side of such a track toward an adjacent track; whether there was a structure between the tracks to prevent intrusion (such as a fence between the tracks at a passenger train station and the tall beam of a through-plate girder bridge); the track-center distance, to ensure that the adjacent track would not be fouled if a worker were to inadvertently trip and fall; the nature of the work (inspection or repair); the sight distances; and the speed of trains on the adjacent track. *See* 69 FR 24222. FRA further noted that, upon completion of an on-site risk assessment, the on-track safety briefing required by § 214.315(a) would be the ideal instrument to implement preventive measures concerning adjacent tracks. *See id.*

In addition to the above recommendation concerning basic risk assessment, FRA recommended that railroads and contractors to railroads consider taking the following actions:

- Use of working limits for activities where equipment could foul adjacent track (whether large-scale or small-scale activities);
- Use rotation stops to mitigate the dangers associated with on-track

equipment and trains passing on adjacent tracks;

- Review procedures for directing trains through adjacent track working limits, and enhance such procedures when necessary;
- Install adjacent track warning signs/devices in the operating cab of on-track machines to remind roadway maintenance machine operators to not inadvertently depart the equipment onto a track where there may be trains and other on-track equipment passing;
- Provide additional training and monitoring to employees, emphasizing the need to cross tracks in a safe manner (i.e., single file and after looking in both directions);
- Reinforce to individual roadway workers that it is critical not to foul a track except in the performance of duty and only when on-track safety has been established. This training could be accomplished through training sessions, as well as daily job briefings; and
- Institute peer-intervention measures by which workers are encouraged to intervene when observing another roadway worker engaging in potentially non-compliant and unsafe activity.

See id.

IV. Recent Roadway Worker Accidents (1997–2008)

In the twelve years since the RWP Rule went into effect on January 15, 1997, there have been nine roadway worker fatalities on an adjacent track. Seven of those fatalities have occurred on a controlled track that was adjacent to the track on which a roadway work group, with at least one of the roadway workers on the ground, was engaged in a common task with an on-track roadway maintenance machine or coupled equipment. FRA notes that there has been only one adjacent-track fatality where a roadway work group had been engaged in a common task with a lone hi-rail vehicle, defined in § 214.7 as ''a roadway maintenance machine that is manufactured to meet Federal Motor Vehicle Safety Standards and is equipped with retractable flanged wheels so that the vehicle may travel over the highway or on railroad tracks.'' [3] In addition, there have been no adjacent-track fatalities where a roadway work group had been engaged in a common task with a catenary maintenance tower car on the occupied track. This is likely because the duties normally performed by an employee operating a hi-rail or a catenary maintenance tower car tend to be less distracting to on-ground roadway workers and produce less dust and noise than a typical on-track roadway maintenance machine. Given the above, FRA proposes that adjacent-track on-track safety not be required for roadway work groups engaged in a common task with a hi-rail or a catenary maintenance tower car, as discussed in the section-by-section analysis of paragraphs (b)(2) and (b)(3), respectively, in new proposed § 214.336.

Of the seven fatalities that occurred under the circumstances described above and which this rule proposes to address, three occurred during the period after the effective date of the rule and before the publication of the safety advisory on May 3, 2004, and four have occurred since that period. In the four-year period prior to May of 2004 (May 1, 2000—April 30, 2004), there has been one adjacent-track fatality known to have occurred under such circumstances, for a rate of .25 per year. In the four-year period since (May 1, 2004—April 30, 2008), there have been four adjacent-track fatalities, for a rate of one per year, which is four times the rate of the previous four-year period. While FRA recognizes that even one death can make rates change dramatically when the total number of deaths is small, the increase in the rate of these deaths despite the safety advisory leads FRA to conclude that regulatory action is needed to avert an escalating number of deaths. Moreover, given the extensive participation in developing these consensus regulatory provisions by representatives of all of the key interests involved in this issue, it is contrary to the public interest to wait for all of the other issues in the larger RWP rulemaking to be resolved or to engage in lengthy periods for notice and public comment before acting to prevent more deaths.

The following is a brief summary of the results of FRA's investigations of the four most recent incidents that resulted in these unfortunate fatalities:

- *October 5, 2005:* A roadway surfacing gang tamper operator, with 28 years of service, was walking up to the front of the tamper to put away the light buggies as his surfacing gang, having just completed its work, was getting ready to travel to clear the number two main track. The operator was walking east on the side of the tamper between the two main tracks when he was struck by a westbound train on the adjacent track. The track centers were spaced approximately 13 feet apart, and the train was traveling at an estimated speed of 40 miles per hour (mph).
- *March 12, 2007:* A surfacing gang was occupying the number one main track in a double-main territory. The surfacing gang foreman (the roadway worker in charge), who earlier had notified the other members of the gang of pending movement on the adjacent track, was standing in the gage of the same adjacent track when he was struck by a train. It remains unclear why he was fouling the adjacent track at the time of the incident. The track centers were spaced approximately 13 feet, 6 inches apart, and the maximum authorized speed on the adjacent track was 50 mph. The foreman was the only roadway worker on the ground at the time of the incident.
- *February 10, 2008:* A train struck a roadway worker inside an interlocking on a triple-main track territory. The worker was part of a gang that consisted of approximately 10 workers that were engaged in the repair of a crossover on the middle main track with a tamper. Foul time was being used as adjacent-track on-track protection, but this protection was removed by the roadway worker in charge, who gave permission to the dispatcher to permit a train to operate on the adjacent track through the roadway work group working limits. As the train entered the interlocking on a limited clear signal indication for a crossover move past the work area, one of the roadway workers attempted to cross the track in front of the train and was struck. The track centers were spaced approximately 13 feet apart, and the maximum authorized speed for the train on the adjacent track was 45 mph.
- *March 27, 2008:* A surfacing gang was working on double-main track territory. The surfacing gang foreman was standing in the foul of the adjacent track while his surfacing crew worked on the number two main track (the occupied track). A train operating on the adjacent track struck the foreman. No on-track safety was in effect on the adjacent track involved at the time of the incident. The track centers were spaced approximately 14 feet, 7 inches apart, and the maximum authorized speed on the adjacent track was 70 mph. The foreman was the only roadway worker on the ground at the time of the incident.

While the above discussion focuses on those fatalities that have occurred on an adjacent track where a roadway work group, with at least one of the roadway workers on the ground, was engaged in a common task with an on-track roadway maintenance machine or coupled equipment on an occupied track, it is important to discuss some of the common circumstances in all nine of the fatalities that have occurred on an

[3] In that case, the roadway workers were under the impression that adjacent-track on-track safety was in effect, but it was not, due to a miscommunication.

adjacent track since the rule went into effect, as these circumstances were considered by FRA in its decision to issue this NPRM. The first common circumstance is the type of track. All nine of the fatalities occurred on ''controlled'' track, rather than ''non-controlled'' track. This was taken into consideration in writing FRA's proposed definition of ''adjacent controlled track,'' which would be included in proposed new § 214.336(a)(3) and would be limited to controlled tracks whose track centers are spaced 19 feet or less from the track center of the occupied track. The term would only be applicable to § 214.336 and would not replace the broader term ''adjacent tracks,'' which is defined in § 214.7.

Second, all nine of the fatalities occurred on an adjacent track that was quite closely-spaced to the track that the roadway work group was occupying. Six of the adjacent tracks had track centers that were spaced approximately 14 feet or less from the respective track centers of the tracks that the roadway work groups were occupying, and all nine of the adjacent tracks were spaced 15 feet or less from the track centers of the respective occupied tracks. This common circumstance was also taken into consideration in FRA's proposed definition of ''adjacent controlled track,'' which would have a narrower applicability for purposes of proposed § 214.336 than the term ''adjacent tracks,'' because it would not include tracks with track centers that were spaced more than 19 feet (but less than 25 feet) away from the track center of the occupied track.

The third common circumstance of the nine fatalities on adjacent track is the time of year. Four of the fatalities occurred during the first quarter (January–March), none of the fatalities occurred in the second and third quarters of the year (April–June and July–September, respectively), and the other five fatalities occurred during the fourth quarter (October–December). As noted earlier in Section I., above, because incidents involving adjacent controlled tracks appear to present clear evidence of significant risk that is not effectively addressed by the current regulation, FRA has concluded that moving forward with this proposal in advance of the other proposals contained in the RSAC consensus is necessary and appropriate in order to reduce the risk of additional fatalities on adjacent track that are likely to occur late this year or early next year in the absence of further regulatory action.

V. Joint Petition to FRA for an Emergency Order

On April 11, 2008, the Brotherhood of Maintenance of Way Employes Division (BMWED) and the Brotherhood of Railroad Signalmen (BRS) filed a joint petition requesting that FRA issue an emergency order under 49 U.S.C. 20104(a) requiring adjacent-track protection for roadway work groups. The petition noted that similar requests, which were filed on October 7, 2005, November 7, 2003, and December 21, 1999, were denied by FRA. The petitioners expressed their belief that, under the existing provisions of the rule, roadway workers will continue to suffer preventable serious injuries and death. The petitioners asserted that FRA should require railroads and their contractors to establish on-track safety on adjacent tracks (''adjacent-track on-track safety'') for a wider range of work activities. In FRA's January 5, 2006 denial of the October 2005 petition, FRA noted that the RSAC working group tasked to review and revise the RWP Rule (''RWP Working Group'') was ''committed to presenting comprehensive draft language * * * that would more closely tailor the solution to the problem.'' And while the RWP Working Group did in fact draft this language, and both the Working Group and the full RSAC were able to reach consensus on such language, BMWED and BRS were concerned that the language, which has not been published as an NPRM, would not become a final rule for a considerable period of time, leaving the possibility for further preventable fatalities. BMWED and BRS urged FRA to issue an emergency order that would adopt the adjacent-track consensus language of the RWP RSAC.

On April 18, 2008, the American Train Dispatchers Association (ATDA) filed a letter in support of the BMWED and BRS joint petition. In the letter, ATDA agreed that preventable injuries and deaths continue to occur because of a lack of positive regulation mandating adjacent-track on-track safety and urged FRA to issue an emergency order based upon the RSAC-approved and consensus-based replacement language for § 214.235(c), as indicated in the joint petition.

As an emergency order does not require prior notice to the affected party or an opportunity to be heard prior to issuance of the order, Congress declared that such an order may be invoked only where an unsafe condition or practice ''causes an emergency situation involving a hazard of death or personal injury.'' 49 U.S.C. 20104. By letter dated June 4, 2008, FRA denied the joint petition for emergency order, noting that the increased rate of adjacent-track-related fatalities cited in the joint petition makes a strong case for regulatory action, but does not constitute an emergency situation ''that has developed suddenly and unexpectedly in which the danger is immediate.'' To address this serious safety concern, FRA decided to issue a separate NPRM with an abbreviated comment period, as further discussed in Section VI.C., below.

VI. Current Rulemaking To Revise the RWP Rule

A. Overview of the RSAC

In March 1996, FRA established RSAC, which provides a forum for developing consensus recommendations to FRA's Administrator on rulemakings and other safety program issues. The Committee includes representation from all of the agency's major stakeholder groups, including railroads, labor organizations, suppliers and manufacturers, and other interested parties. A list of member groups follows:

- American Association of Private Railroad Car Owners (AARPCO);
- American Association of State Highway and Transportation Officials (AASHTO);
- American Chemistry Council;
- American Petroleum Institute;
- American Public Transportation Association (APTA);
- American Short Line and Regional Railroad Association (ASLRRA);
- ATDA;
- Association of American Railroads (AAR);
- Association of Railway Museums;
- Association of State Rail Safety Managers (ASRSM);
- Brotherhood of Locomotive Engineers and Trainmen (BLET);
- BMWED;
- BRS;
- Chlorine Institute;
- Federal Transit Administration (FTA)*;
- Fertilizer Institute;
- High Speed Ground Transportation Association (HSGTA);
- Institute of Makers of Explosives;
- International Association of Machinists and Aerospace Workers;
- International Brotherhood of Electrical Workers (IBEW);
- Labor Council for Latin American Advancement*;
- League of Railway Industry Women*;
- National Association of Railroad Passengers (NARP);
- National Association of Railway Business Women*;

- National Conference of Firemen & Oilers;
- National Railroad Construction and Maintenance Association (NRC);
- National Railroad Passenger Corporation (Amtrak);
- National Transportation Safety Board (NTSB)*;
- Railway Supply Institute (RSI);
- Safe Travel America (STA);
- Secretaria de Comunicaciones y Transporte*;
- Sheet Metal Workers International Association (SMWIA);
- Tourist Railway Association, Inc.;
- Transport Canada*;
- Transport Workers Union of America (TWU);
- Transportation Communications International Union/BRC (TCIU/BRC);
- Transportation Security Administration (TSA)*; and
- United Transportation Union (UTU).

* Indicates associate, non-voting membership.

When appropriate, FRA assigns a task to RSAC, and after consideration and debate, RSAC may accept or reject the task. If the task is accepted, RSAC establishes a working group that possesses the appropriate expertise and representation of interests to develop recommendations to FRA for action on the task. These recommendations are developed by consensus. A working group may establish one or more task forces to develop facts and options on a particular aspect of a given task. The individual task force then provides that information to the working group for consideration. If a working group comes to unanimous consensus on recommendations for action, the package is presented to the full RSAC for a vote. If the proposal is accepted by a simple majority of RSAC, the proposal is formally recommended to FRA. FRA then determines what action to take on the recommendation. Because FRA staff play an active role at the working group level in discussing the issues and options and in drafting the language of the consensus proposal, FRA is often favorably inclined toward the RSAC recommendation. However, FRA is in no way bound to follow the recommendation, and the agency exercises its independent judgment on whether the recommended rule achieves the agency's regulatory goal, is soundly supported, and is in accordance with policy and legal requirements. Often, FRA varies in some respects from the RSAC recommendation in developing the actual regulatory proposal or final rule. Any such variations would be noted and explained in the rulemaking document issued by FRA. If the working group or RSAC is unable to reach consensus on a recommendation for action, FRA moves ahead to resolve the issue through traditional rulemaking proceedings.

B. Proceedings in This Rulemaking to Date Generally

On January 26, 2005, the RSAC formed the RWP Working Group (''Working Group'') to consider specific actions to advance the on-track safety of employees of covered railroads and their contractors engaged in maintenance-of-way activities throughout the general system of railroad transportation, including clarification of existing requirements. The assigned task was to review the existing rule, technical bulletins, and a safety advisory dealing with on-track safety. The Working Group was to consider implications and, as appropriate, consider enhancements to the existing rule. The Working Group would report to the RSAC any specific actions identified as appropriate, and would report planned activity to the full Committee at each scheduled Committee meeting, including milestones for completion of projects and progress toward completion.

The Working Group is comprised of members from the following organizations:

- Amtrak;
- APTA;
- ASLRRA;
- ATDA;
- AAR, including members from BNSF Railway Company (BNSF), Canadian National Railway Company (CN), Canadian Pacific Railway, Limited (CP), Consolidated Rail Corporation (Conrail), CSX Transportation, Inc. (CSXT), Kansas City Southern (KCS), Norfolk Southern Corporation (NS), and Union Pacific Railroad Company (UP);
- Belt Railroad of Chicago;
- BLET;
- BMWED;
- BRS;
- Federal Railroad Administration (FRA);
- Indiana Harbor Belt Railroad (IHB);
- Long Island Rail Road (LIRR);
- Metro-North Commuter Railroad Company (Metro-North);
- Montana Rail Link;
- NRC;
- Northeast Illinois Regional Commuter Railroad Corporation (Metra);
- RailAmerica, Inc.;
- Southeastern Pennsylvania Transportation Authority (SEPTA);
- UTU; and
- Western New York and Pennsylvania Railroad (WNY&P).

The Working Group held 12 multi-day meetings. The group worked diligently and was able to reach consensus on 32 separate items.

C. Proceedings Concerning On-Track Safety Procedures for Adjacent Tracks, Including Response to Comments on the July 17, 2008 NPRM

One of the items on which the Working Group was able to reach consensus dealt specifically with the adjacent-track on-track safety issue in § 214.335 On-track safety procedures for roadway work groups. The consensus language developed by the Working Group for this topic, which was approved by the full RSAC and formally recommended to FRA for paragraphs (c), (d), and (e), is as follows:

For paragraph (c)—''On-track safety is required for adjacent controlled track within 19 feet of the centerline of the occupied track when roadway work group(s) consisting of roadway workers on the ground and on-track self-propelled or coupled equipment are engaged in a common task on an occupied track.

- ''Except as provided by paragraph (c)(3) of this section, when trains are cleared through working limits on an adjacent controlled track, or when watchman/lookout warning in accordance with § 214.329 is the form of adjacent on-track safety, roadway workers shall occupy a predetermined place of safety and all on-ground work and equipment movement activity within the fouling space of the occupied track shall cease upon notification of pending adjacent track movement (working limits) or upon receiving the watchman/lookout warning.
- ''When single or multiple movements are cleared through adjacent controlled track working limits, on-ground work and equipment movement on the occupied track may resume only after all such movements on adjacent track have passed each component of the Roadway Work Group(s). If the train stops before passing all roadway workers, the employee in charge shall communicate with the engineer prior to allowing the work to resume.
- ''When single or multiple movements are cleared through adjacent controlled track working limits at a speed no greater than 25 mph, work performed exclusively between the rails of the occupied track, or to the field side of the occupied track with no adjacent track, may continue upon notification of each roadway worker of movement on adjacent track. On-ground work shall not be performed within 25 feet to the front or 25 feet to the rear of roadway maintenance machine(s) on the

occupied track during such adjacent track movement.''

For paragraph (d), the Working Group recommended ''Equipment may not foul an adjacent controlled track unless protected by working limits and there are no movements authorized through the working limits by the roadway worker in charge.''

And for paragraph (e), the Working Group recommended ''The mandatory provisions for adjacent controlled track protection under this subpart are not applicable to work activities involving—

- ''A hi-rail vehicle as defined in § 214.7, provided such hi-rail vehicle is not coupled to railroad cars. Where multiple hi-rail vehicles are engaged in a common task, the on-track safety briefing shall include discussion of the nature of the work to be performed to determine if adjacent controlled track protection is necessary. Nothing in this subpart prohibits the roadway worker in charge of the hi-rail vehicle from establishing adjacent controlled track protection, as he/she deems necessary.
- ''On-ground roadway workers exclusively performing work on the field side of the occupied track.
- ''Catenary maintenance tower cars with roadway workers positioned on the ground within the gage of the occupied track for the sole purpose of applying or removing grounds. Nothing in this subpart prohibits the roadway worker in charge of the catenary maintenance tower car from establishing adjacent track protection, as he/she deems necessary.''

Upon reviewing the joint petition of the BRS and BMWED for an emergency order, the consensus language of the Working Group quoted above, and the relevant accident data concerning roadway workers fouling adjacent tracks, FRA decided to issue a separate NPRM [4] to lower the safety risk associated with roadway workers fouling adjacent tracks. Although FRA's safety advisory may have had an initial effect and have raised awareness enough to help keep the number of all categories of roadway worker fatalities in 2004 and through almost six months in 2005 at zero, the effect was not sustained enough to combat the rise of roadway worker fatality incidents since late June of 2005, when the first roadway worker fatality occurred after the issuance of the safety advisory, or since October of 2005, when the first adjacent track roadway worker fatality occurred.

In light of recent roadway worker fatality trends, FRA determined that the agency must propose a more prescriptive approach to prevent further fatalities. The need to mandate adjacent-track on-track safety was recognized by FRA, members of the Working Group, and members of the full RSAC. The consensus language developed by the Working Group and recommended by the full RSAC is expected to reduce the risk of roadway worker fatalities due to fouling an adjacent track while working in conjunction with on-track equipment on an occupied track. As part of the process in drafting the NPRM in the larger RWP rulemaking, FRA circulated the consensus rule text concerning adjacent track and other items for errata review. Both AAR and BMWED submitted comments on this provision. To address these issues, and other potential ambiguities discovered upon a closer review of the rule text, FRA reorganized and modified the consensus text in issuing an NPRM.

FRA published an NPRM addressing adjacent-track on-track safety on July 17, 2008 (73 FR 41214), but formally withdrew the notice on August 13, 2008 (73 FR 47124). The withdrawal stated, in part—''[i]n crafting the NPRM, FRA presented the RSAC consensus language in the preamble verbatim and transparently explained its rationale for all changes it made to the consensus language. As this was an NPRM, FRA sought comment on the entire proposal, including those portions that FRA sought to clarify.

''FRA recognizes that inadvertent errors do sometimes occur in formulating a proposal and expects that interested parties would provide comments to both FRA and all other interested parties through the established comment process detailed in the NPRM. Given the alleged discrepancies between the consensus language and the proposed rule, the need to clarify the essential issues and move toward resolution of the safety concern at hand, and the ex parte communications regarding this proposed rule, FRA has decided to withdraw this rulemaking and will take such further regulatory steps as safety requires.''

Id. Due to the inherent dangers of roadway workers working in multiple-track territories among machines, FRA has decided to revisit the issues and language of the withdrawn NPRM in light of the comments received, formal and informal, and issue this revised NPRM. In accordance with the Department of Transportation's Policy (Order No. 2100.2 (1970)), all communications (including emails) between FRA employees and other parties since the publication of the July 17, 2008 NPRM and prior to its withdrawal were reduced to writing and placed in the public docket. While some comments were marked ''draft'' or received after the withdrawal of the NPRM, FRA has decided to post them to the docket, since they were still taken into consideration in drafting this NPRM. A summary of the comments received follows, below.

1. Joint Comments of BMWED and BRS

BMWED and BRS filed a joint request to extend the comment period to 60 days on July 28, 2008, as well as preliminary joint comments detailing their concerns with the substance of FRA's initial NPRM on August 10, 2008 (just after FRA issued the withdrawal notice, but prior to the publication of the notice in the **Federal Register**). FRA has considered all of the comments submitted by BMWED and BRS, formal and informal, and recognizes areas where the initial proposed rule text could be adjusted to address their concerns with FRA's initial proposal, while still addressing FRA's concerns with the consensus language that was recommended to FRA by RSAC. While BMWED also commented on the rule through ex parte communications, as posted to the docket, FRA believes that the joint initial comments address these same concerns, as well as those summarized in the joint request to extend the comment period, in one document; thus, FRA will be referencing the comments made in the preliminary joint comments, rather than those made through ex parte communications and the joint request to extend the comment period.

The first issue raised in the joint comments was the proposed removal of the definition of the term ''Adjacent tracks'' in § 214.7. BMWED and BRS stated that the removal of the definition in § 214.7 would remove tens of thousands of miles of non-controlled track from the scope of the regulation. FRA disagrees with this interpretation of the NPRM, since the proposed removal of the definition is not what would have removed non-controlled track from the scope of adjacent-track on-track safety; rather, it was the substantive provision itself that the RSAC recommended and that formed the basis for FRA's proposal that would have removed it. Since the term was no longer being used anywhere else in part 214, it would have caused confusion to have a definition that included non-

[4] As noted in Section I. of this document, the provisions related to adjacent-controlled-track on-track safety were originally intended to be published as part of a larger NPRM concerning part 214, but have been proposed here as a separate NPRM to expedite the effective date of such provisions.

controlled tracks within 25 feet of the occupied track and controlled tracks greater than 19 feet, but less than 25 feet from the occupied track, without any relevance to a substantive provision. BMWED and BRS believe that leaving the definition in would give the roadway worker in charge the necessary discretion to establish on-track safety on an adjacent track, even when on-track safety is not mandated by FRA. FRA believes that this concern may be addressed by adjusting the proposed section concerning the on-track safety job briefing (§ 214.315) to use the term ''adjacent tracks'' [5] and adding language to that section regarding the roadway worker in charge, and by modifying the language in § 214.336 to make it clear that the new requirement does not prohibit the roadway worker in charge from establishing additional on-track safety on one or more adjacent tracks as he or she deems necessary.

The joint comments also describe a concern with the withdrawn NPRM's proposed language in § 214.336(a)(1)(ii) that would have permitted a component of a roadway work group to resume all on-ground work and equipment movement after the ''head-end'' of a movement passed by the component's location when trains are cleared through working limits at speeds greater than 25 mph. The joint comments insist that the RSAC Working Group's intent was for work to stop for the entire movement, not just the head-end.

While drafting this section in the withdrawn NPRM, FRA made a good faith determination of the meaning of the consensus language and could not distinguish whether the Working Group meant ''head-end'' or entire ''movement.'' (This determination is reflected in the preamble, and comments were requested.) Based on AAR's errata review comments and FRA's review of the January 10–11, 2006 Working Group meeting minutes, it appeared possible that an error was made, with respect to the ''head-end only'' requirement, by the Working Group in creating the final draft of the consensus language that was eventually presented to the full RSAC for approval. The draft being discussed at the January meeting allowed work to commence at the head-end during movement at 30 mph, but required that the entire movement pass before allowing work to commence at speeds greater than 30 mph. The Working Group reached consensus on the ''concepts of the proposal'' for this item at its February 1–2, 2006 meeting.[6] While it was clear from the Working Group meeting minutes that the speed threshold of 30 mph was being negotiated (railroad management proposed that it be raised to 40 mph, while railroad labor proposed that it be lowered to 10 mph), the meeting minutes did not clearly capture the discussion that led to the use of the term ''movement,'' rather than ''head-end'' or ''entire movement.''

Upon reviewing other documents from that meeting, FRA has determined that railroad management's proposal that included the 40-mph threshold also appears to have conceded that the entire movement must pass before permitting work to resume, regardless of speed. While it is possible that the concession of the entire movement passing was conditioned upon railroad labor accepting railroad management's proposal as a whole (including the 40-mph threshold), FRA did not receive any further comments from AAR or any of its members on this issue, despite the request for comments on this issue in the July 17, 2008 NPRM. Since the consensus language eventually approved by the full RSAC most closely resembled that which railroad labor proposed to the Working Group, FRA has decided to edit the language in this NPRM to require that all work not subject to an exception be permitted to resume only after the entire movement (*i.e.,* the trailing-end of the movement) has passed by the location of the roadway work group component. This requirement would apply regardless of the speed of the movement.

Regarding the limited work activities that would be permitted to continue under FRA's initial proposal when trains are passing on an adjacent controlled track at speeds of 25 mph or less, BMWED and BRS note that the language proposed by FRA in paragraph (a)(2) differed from the consensus language in paragraph (c)(3) (indicating that work conducted ''exclusively between the rails of the occupied track, or to the field side of the occupied track with no adjacent track'' would be permitted to continue, provided that the work was not conducted within 25 feet of the front or rear of any roadway maintenance machine). BMWED and BRS expressed their concern that it would be unsafe to permit work to the field side if working limits are not specifically required on any adjacent track on that side.

While paragraph (c)(3) of the consensus language permitted all work to continue to the field side of the occupied track only if there was no adjacent track present, the consensus language did not impose such a limitation in the broad exception for on-ground work on the field side of the occupied track in paragraph (e)(2) (now proposed paragraph (e)(1)). FRA's original proposal would have permitted certain work to continue to the field side, provided that on-track safety (including train approach warning) had been established in accordance with this subpart on any adjacent track on that side.

In consideration of the concern raised by BMWED and BRS in their joint comments, FRA has adjusted the language originally proposed so as to better ensure the safety of the workers on that side of the occupied track. In addition to permitting work to continue while exclusively positioned on the field side of an occupied track that has no adjacent track on that side, the new proposal would also permit work to continue while exclusively positioned on the field side of an occupied track that has an adjacent track on that side provided that working limits have been established on the closest adjacent track on that side and there are no movements authorized through the working limits by the roadway worker in charge on that adjacent track. The above proposed conditions for conducting work while positioned on the field side have been summarized in the definition of a new term, ''clear side,'' in § 214.336(a)(3), so as to avoid having to repeat these conditions in the rule text proposed in paragraphs (c) and (e)(1) of this section. In applying the exception in proposed paragraph (e)(1), FRA notes that the ''clear side'' portion of the proposal would have the effect of requiring that working limits be established on an adjacent track (on the field side where the on-ground roadway workers are exclusively positioned) that is non-controlled and whose centerline is 25 feet from the centerline of the occupied track, while no form of on-track safety (*i.e.,* working limits or train approach warning) would be required on the adjacent controlled track that is located on the other side of the occupied track

[5] The consensus language stated ''information about any tracks adjacent to the track to be occupied.'' One could interpret this language to have included a discussion of adjacent tracks without regard to a set distance, since the term limiting the distance to 25 feet was not used. The term ''adjacent tracks'' would thus limit the discussion to those within 25 feet.

[6] On page 13 of the meeting minutes, the facilitator ''reminded the group that the vote would be on the concepts of the proposal and the language may change and be simplified when finalized.'' A representative of AAR then asked if everyone agreed on ''the principles of the write-up.'' At the March 15–16, 2006 meeting, the ''RWP Working Group Table'' included the language that was eventually approved by the full RSAC (except that ''employee in charge'' was changed to ''roadway worker in charge'' in paragraph (d)) and indicated ''Consensus 02/02/06. Draft language from 02/02/06 revised by consolidating the exceptions.''

and whose centerline is within 12 feet of the occupied track. FRA seeks comment as to the frequency with which these, or similar, circumstances would occur, and whether the ''clear side'' portion of the exception in proposed paragraph (e)(1) imposes an unreasonable burden.

Another issue that BMWED and BRS would like FRA to reconsider is the proposed requirement for railroads to provide training or issue a bulletin with the proposed new requirements for adjacent-track on-track safety. The proposed requirement that railroads issue a bulletin or other document to the roadway workers was intended as a stop-gap measure, together with extended on-track safety job briefings, since most railroads provide their employees with annual training at the beginning of the calendar year. This was not a new concept, as the proposal was based on a similar provision in Emergency Order No. 24, and because FRA believes that this, in conjunction with job briefings on the issue, is the approach most railroads take to train their employees when an operating rule change goes into effect mid-year. BMWED and BRS, however, noted in their joint comments that this was not adequate training, and expressed their fear that that this would shift the burden for effective training from the employer to unsuspecting employees. They also noted a concern that the proposed requirement for the employers to obtain a written receipt or acknowledgement may also affect their memberships' legal rights under the Federal Employers' Liability Act. Because of the timing of the withdrawal of the NPRM, FRA believes that it can coordinate this NPRM and final rule to correspond with the railroad's annual training cycle for roadway worker protection, thus making the requirement to issue a bulletin unnecessary as a stop-gap measure.

Finally, the joint comments note that FRA's initial proposal also differs from the RSAC consensus language because FRA proposed to move the section of the rule that pertains to adjacent-track on-track safety from § 214.335(c) to a new proposed § 214.336. FRA does not agree with these comments and denies that moving language from one section to another, for clarification purposes, changes the substance and intent of the provision. Currently, § 214.335 of the existing regulation for on-track safety for roadway work groups contains only one short provision that is applicable to adjacent track protection, that is, paragraph (c). The RSAC recognized that this provision is vague as to what circumstances mandate adjacent-track on-track safety, and this was the very reason for the RSAC's recommendation to amend it. Because of the complex revisions to the regulation with respect to adjacent-track on-track safety, and to avoid having too many levels of subparagraphs in the rule text, FRA believes it is necessary to create a new section. A new section would not change the substance or application of the regulation in any way, and additions to regulations often require the restructuring of subsections in order to promote clear, concise interpretation.

2. Draft Comments of AAR

AAR submitted draft comments to FRA on September 16, 2008. Although the draft comments were received after the date that the NPRM was formally withdrawn, FRA has decided to post them to the docket and discuss them in this NPRM, in an effort to continue FRA's transparency in these proceedings as well as to encourage an open discussion and resolution of the related issues at this NPRM stage, rather than at the later, final rule stage.

The first issue concerns the applicability of proposed § 214.336(a) to ''a roadway work group with at least *one of the roadway workers on the ground*'' (emphasis added). AAR urges FRA to return to the consensus language, which applied ''when roadway work group(s) consisting of *roadway workers on the ground* and on-track self-propelled equipment are engaged in a common task on an occupied track'' (*emphasis added*). AAR is concerned that this subtle change would bring several work activities into the scope of the rule that were not intended to be covered by the Working Group consensus language. Specifically, AAR is concerned about work activities such as ''an employee remaining within the gage of the occupied track fueling a machine; getting off equipment to load anchors, spikes, or other equipment; deploying a laser device for a tamping machine; and checking cross level.'' AAR proposes that FRA amend part of the first sentence of § 214.336(a) from ''with at least one of the roadway workers on the ground'' to ''with more than one roadway worker on the ground,'' and make further conforming amendments by deleting the phrase ''one or more'' in paragraphs (b)(1), (2), and (3).

FRA had proposed to amend this portion of the consensus language for clarity, since the consensus language (''when roadway work group(s) consisting of roadway workers on the ground and on-track self-propelled or coupled equipment are engaged in a common task on an occupied track'') contained the words ''roadway work group(s)'' and ''equipment,'' both of which could be interpreted as plural and result in confusion concerning how many roadway workers needed to be on the ground before this section would apply. FRA specifically chose the clarifying words ''one or more roadway workers on the ground'' because FRA believed that this was the intent of the Working Group, since there was no safety rationale for excluding roadway work groups that consist of only two roadway workers. In choosing this language, FRA assumed that in a two-person roadway work group, one roadway worker was assigned to operate the equipment, and the other was assigned to perform duties on the ground in a common task with the machine and presumably its operator. The potential for distraction of the one roadway worker on the ground in a roadway work group consisting of only two roadway workers is the same as for each of the two roadway workers on the ground in a roadway work group consisting of three roadway workers. Moreover, FRA analysis of the agency's accident investigations of these types of incidents has revealed that four [7] of the seven fatalities on an adjacent track occurred with only one of the roadway workers on the ground that had been engaged in a common task with an on-track roadway maintenance machine.

AAR also requested that the exception for hi-rails in proposed § 214.336(b)(2) of the former NPRM be expanded to include rail-bound geometry and detection equipment, since the level of distraction posed by this equipment is similar to that of hi-rails. AAR suggests that the language in that section be amended by adding ''or self-propelled track geometry or detector car.'' FRA notes that while a rail-bound geometry car tends to be much larger than a hi-rail, it seems that the level of distraction is similar for a roadway worker on the ground who is field-verifying a measurement behind a geometry car and a roadway worker on the ground who is replacing a bolt behind a hi-rail; nonetheless, FRA seeks comment as to whether this type of equipment should be added to the exception.

The comments further request that an exception be added (*i.e.,* that no adjacent-controlled-track on-track safety be required) when there is a physical barrier between the occupied track and the adjacent controlled track. AAR indicates that there are several locations where there is a physical barrier, such as a fence, between tracks operated by

[7] The dates and locations of those incidents were October 9, 1999 (Juniata, NE), October 30, 2003 (Argyle, IA), March 12, 2007 (Piketon, OH), and March 27, 2008 (Emporia, KS).

different railroads, especially where the corridor is shared by both freight and passenger railroads. AAR believes that this barrier is sufficient to protect against movements on an adjacent track located on the other side of the barrier, and suggests that a fourth exception be added as follows: ''Work on occupied track where there is a physical barrier such as a fence between the occupied track and the adjacent track.'' While FRA agrees that a continuous permanent or semi-permanent barrier could be sufficient to prevent accidental fouling of an adjacent controlled track located on the other side of the barrier, FRA is concerned that the language that AAR has suggested is overly broad and could be interpreted to allow orange construction cones or barrels connected with flimsy plastic ''fences'' to be sufficient. FRA seeks comment on whether a fourth exception should be added and, if so, whether it should be limited to where there is a continuous permanent or semi-permanent physical barrier of a certain height, such as a chain-linked fence at least 4′ in height or a concrete barrier of at least 32″ in height, between the occupied track and the adjacent controlled track.

AAR also recommended that FRA permit the machine operator to perform work on the ground within 25 feet of the front or rear of the roadway maintenance machine that he or she is operating, during adjacent-controlled-track movements of 25 mph or less. It would be impractical not to allow the operator to step off of his machine and walk directly behind it. Accordingly, AAR suggests that the proposed paragraph 214.336(a)(2)(i) (now proposed as § 214.336(c)) be amended by adding after the word ''movement'' the phrase ''unless the employee is operating the machine.'' FRA believes that the phrase ''unless the employee is the assigned operator of the machine'' would better address AAR's concerns, since presumably the employee would place the machine in the idle position and set the brakes before alighting and, therefore, would not be operating or moving the machine from the ground. FRA seeks comment as to whether this amendment should be added.

Finally, AAR requested that FRA reconsider the proposed training and recordkeeping requirements in the initial NPRM. While recognizing that training is vital, AAR urges FRA to make the effective date for training on the new requirements consistent with the railroads' training schedules. Regarding the proposed recordkeeping requirements, AAR notes that the requirement for a written acknowledgment is ''burdensome, unwarranted, and violates both Congressional and OMB mandates,'' and requests that FRA permit railroads to use electronic signatures in lieu of handwritten signatures. While FRA is not opposed to permitting electronic signatures under the circumstances proposed in the initial NPRM, the proposed recordkeeping requirement has been deleted from this NPRM, making this a moot point.

3. Comments of Additional Interested Parties

FRA received a number of brief comments. The July 30, 2008 joint comments submitted by ATDA, BLET, and UTU, expressed support for the BMWED and BRS' joint request to extend the comment period on the initial NPRM to 60 days. Other brief comments raised different concerns, which have been summarized, below.

Three general comments were submitted to the docket. The first general comment was submitted by John Walsh. He indicates that while part 214 is intended to provide for the safety of railroad workers, it also preempts State laws concerning the railroads. As such, he believes that FRA's regulations should also require railroads to provide for the protection of emergency workers, including firefighters, emergency medical technicians (EMTs), and those working under their direction and control. He recommends that railroads annually notify every firefighting agency with tracks in their jurisdiction of whom to contact whenever the firefighters or EMTs are operating within the railroad's right of way, and that railroads have procedures in place to restrict train traffic in the area until the firefighters' or EMTs' incident commander grants the railroad permission to allow trains to pass through the incident area. As Mr. Walsh's comments are outside the scope of part 214, it appears that this request would be more appropriate if filed in the form of a petition for a new rulemaking under 49 CFR 211.11.

The second general comment was submitted by Michael McGinley, who indicates that he is a retiree from the Southern California Regional Rail Authority (Metrolink) engineering department. He states that the weakest link is the widespread failure of locomotive engineers to comply with sounding warning signals upon seeing roadway workers, and expressed his belief that this may be due to the part 214 requirements being taught to the engineering department employees and not to the transportation department employees. He recommends that the application of the present regulations be reinforced through the operating practices perspective and focus on the locomotive engineers. While FRA is not proposing to amend the section that relates to audible warning (§ 214.339) in this NPRM, FRA notes that this is one of the most common violations cited under part 214, and many railroads have taken steps to reinforce and raise awareness of these requirements through increased training and efficiency testing. Thus, FRA does not believe that this section should be amended at this time.

The third general comment was submitted by Frederic W. Yocum, who is a retired railroader who served on RSAC. He suggests that FRA amend the language to add the phrase ''or desirable'' to the language proposed in the initial NPRM so as to read ''nothing in this section prohibits the roadway worker in charge from establishing adjacent-track on-track safety as he or she deems necessary *or desirable'' (emphasis added).* He notes that there are probably occasions on which the roadway worker in charge would want to increase safety by establishing adjacent-track on-track safety, but would not meet the standard of ''necessary'' if taken literally. FRA recognizes that the roadway worker in charge needs the flexibility to establish on-track safety as he or she deems necessary for completion of the work, but is mindful not to provide unfettered discretion, which could result if the words ''or desirable'' were to be added. If the nature of the work that is being performed by the roadway work group will likely cause one of the roadway workers in the group to foul an adjacent track, then additional on-track safety is necessary. FRA has added language to the new proposed section to ensure that the roadway worker in charge has the discretion to establish on-track safety on one or more adjacent tracks (regardless of whether the track is controlled or non-controlled) as necessary, consistent with both the purpose and requirements of subpart C of part 214.

In addition to these comments, FRA also received comments from Todd Cotie, Health and Safety Coordinator for the United Steelworkers Local 2004, representing 3,200 track maintenance workers across Canada. He recommends that trains be ordered to reduce their speed to a maximum of 30 mph when passing in proximity to workers on adjacent mainline tracks, since a slower train would allow engineers and work crews more time to notice and react to various situations that occur from the passing train. This recommendation is based on various rules, including the speed restriction for trains passing in

proximity to occupied on-track living accommodations (boarding cars) that are eight feet away on the adjacent track, just as roadway workers would be. As another example, Mr. Cotie submitted a copy of a February 7, 2008 letter from CN regarding the train clearing guidelines for the protection of employees who work under Canadian Rail Operating Rules (CROR) Rule 42. These guidelines appear to require that trains be instructed by the Rule 42 foreman to proceed through limits at a speed not exceeding 30 mph if the employees cannot clear to a location at least 19 feet away from the nearest rail of the track on which the train is approaching. Mr. Cotie believes that the few minutes of delay that would result in slowing a 60-mph freight or 100-mph passenger train to 30 mph when passing work crews is well worth assuring the security of the workers. FRA believes that its proposal in this NPRM assures the security of the roadway workers while taking into consideration the productivity costs to the railroads. A detailed analysis of this balancing is discussed in the regulatory evaluation, which has been posted to the docket.

VII. Section-by-Section Analysis

Proposed Amendments to 49 CFR Part 214, Railroad Workplace Safety

Subpart C—Roadway Worker Protection

Section 214.315 Supervision and Communication

Given the importance of an on-track safety job briefing in roadway workers' understanding of the nature of the work they will be conducting and the conditions under which they will conduct it, FRA thinks that the existing requirements in § 214.315 for a job briefing ''when an employer assigns duties to a roadway worker that call for that employee to foul a track'' should also be expanded to cover the new proposed procedures for adjacent-controlled-track on-track safety in § 214.336 if such procedures are required for that assignment or if adjacent-track on-track safety is deemed necessary by the roadway worker in charge. With a few minor changes, the text concerning the additional components of an on-track safety job briefing that is proposed in this NPRM was consensus language developed by the Working Group and recommended by the full RSAC. The consensus language relating to adjacent tracks was proposed as a new paragraph (a)(2) in § 214.315, to read: ''Information about any tracks adjacent to the track to be occupied, on-track safety for such tracks, and identification of roadway maintenance machines that will foul any adjacent track. In such cases, the briefing shall include procedural instructions addressing the nature of the work to be performed and the characteristics of the work location to ensure compliance with this part.''

On December 18, 2007, FRA emailed the Working Group members and requested an errata review of a document in which FRA had compiled all of the consensus items. In its errata review comments, AAR requested that FRA clarify that the provision is not intended to require a discussion on the on-track safety of an adjacent track unless on-track safety is required on that track by part 214. FRA agrees that this is not the intent of the proposed requirement, and has added the language ''if required by this subpart or deemed necessary by the roadway worker in charge'' to the consensus rule text, which has been proposed as new paragraph (a)(3). The language concerning the roadway worker in charge's discretion was added to emphasize that the roadway worker in charge would still be permitted to establish on-track safety on an adjacent track, regardless of whether it is controlled or non-controlled, if it is reasonably necessary given the nature of the work that is to be performed. This proposed section would still require the on-track safety job briefing to include information concerning any ''adjacent tracks'' (as defined in § 214.7), so as to serve as a warning to each roadway worker of the potential danger in fouling such a track, even if no on-track safety is required for that particular track because it does not meet the definition of ''adjacent controlled track'' in proposed § 214.336(a)(3). While the second sentence of the consensus language began with the phrase ''in such cases,'' FRA has deleted that language, and proposes to move the rest of the language into a new paragraph (a)(4), since the on-track safety job briefing must always address the nature of the work to be performed and the characteristics of the work location to ensure compliance with this subpart, regardless of whether there is an adjacent track present.

FRA has further clarified in a proposed revision to introductory paragraph (a) that this section lists only the minimum items that must be discussed in an on-track safety briefing. The words ''at a minimum'' were added, and the rest of existing paragraph (a) has been moved to proposed paragraphs (a)(1) and (a)(2).

Section 214.335 On-Track Safety Procedures for Roadway Work Groups, General

FRA proposes to amend this section by deleting paragraph (c) and creating new requirements in a separate section to address adjacent-controlled-track on-track safety procedures for certain roadway work groups, § 214.336, for the reasons discussed below. Existing paragraph (c) reads: ''Roadway work groups engaged in large-scale maintenance or construction shall be provided with train approach warning in accordance with § 214.327 for movements on adjacent tracks that are not included within working limits.''

The proposal would also amend the heading of § 214.335 to reflect the general nature of the remaining requirements in that section.

Section 214.336 Adjacent-Controlled-Track On-Track Safety Procedures for Certain Roadway Work Groups

Paragraph (a), Procedures; General

As discussed in Section II.C., above, § 214.335(c) currently requires adjacent-track on-track safety for a roadway work group only if such a work group is engaged in ''large-scale maintenance or construction.'' Under this criterion and the limited guidance provided in the preamble to the final rule, many railroads have not been providing on-track safety on adjacent tracks for surfacing operations, small tie-renewal operations, or similar maintenance operations that, while smaller in scale, still include on-track, self-propelled equipment. This proposed new section seeks to eliminate this interpretive issue by establishing new, more objective criteria for determining whether adjacent-track on-track safety is required for a roadway work group. Fatalities have occurred in connection with such operations, which many believe the existing language should be interpreted to cover.

In developing language to address the increasing number of roadway worker fatalities on an adjacent track, the Working Group considered that most of the fatalities on an adjacent track occurred when a roadway work group with at least one of the roadway workers on the ground, was engaged in a common task with on-track, self-propelled equipment on an occupied track. In those circumstances, the potential for a roadway worker in the group to be distracted from the danger of an oncoming train was great due to the noise and dust generated by operation of the roadway maintenance machines, the need to avoid entanglement in the operation of those

machines, and the need to monitor the quality of the work being performed. This set of factual circumstances became the basis for the proposed new criteria for triggering the requirement to establish adjacent-track on-track safety in introductory paragraph (c)(1) of the consensus language, and in paragraph (a)(1) of proposed new § 214.336, which, as a general rule, would require that on-track safety be established for each adjacent controlled track when a roadway work group with at least one of the roadway workers on the ground, is engaged in a common task with an on-track roadway maintenance machine or coupled equipment on an occupied track. In particular, the on-track safety would have to be provided in accordance with § 214.319 (Working limits, generally) (which includes § 214.321 (Exclusive track occupancy), § 214.323 (Foul time), and § 214.325 (Train coordination)), or § 214.329 (Train approach warning provided by watchmen/lookouts).

The general rule would be set forth in paragraph (a), which would also direct the reader to the three exceptions described in proposed paragraph (e). The more specific procedures for adjacent-controlled-track on-track safety would be set forth in paragraphs (b) and (c), concerning movements on an adjacent controlled track at over 25 mph, and at 25 mph or less, respectively. Paragraph (a)(2) provides that if an occupied track has two adjacent controlled tracks, and one of these adjacent controlled tracks has one or more movements authorized at 25 mph or less, and the other adjacent controlled track has one or more concurrent movements authorized at over 25 mph, the more restrictive procedures in paragraph (b) would apply. This would require that all work (*i.e.,* both on-ground work and roadway maintenance machine or coupled equipment movement) on or fouling the occupied track or either of the adjacent controlled tracks cease, since, as will be further discussed below, there would be no ''clear side'' on which to continue even on-ground work on the field side. *See* proposed § 214.336(e)(1).

Paragraph (a)(3) would add definitions of three new terms used exclusively in § 214.336 (''adjacent controlled track,'' ''clear side,'' and ''occupied track''), and one existing term (''adjacent tracks'') that is defined in § 214.7, but which would be repeated in this section to ensure that the reader is aware that two similar terms are being used in this section, with different meanings. For purposes of this section, ''adjacent controlled track'' would mean ''a controlled track whose track center is spaced 19 feet or less from the track center of the occupied track.'' In contrast, the definition of ''adjacent tracks'' (in § 214.7) includes any tracks, controlled or non-controlled, whose track centers are spaced less than 25 feet apart. FRA proposes to adopt this narrower definition of ''adjacent controlled track'' based on the roadway worker fatality data discussed above in ''IV. Recent Roadway Worker Accidents (1997–2008),'' which show that the adjacent tracks on which the roadway worker fatalities occurred were all controlled tracks and that the track centers of these controlled tracks were within 15 feet of the track centers of the occupied track. In light of these data, the Working Group agreed that 19 feet would be a reasonable and safe threshold to trigger the requirement to establish on-track safety on an adjacent track and that it would be reasonable to cover controlled tracks within that 19-foot zone but to exclude non-controlled tracks. FRA notes that the lack of fatalities on non-controlled adjacent tracks may be attributable to the reduced operating speeds on non-controlled tracks, where railroad operating rules generally require that movements must stop short of obstructions within half the range of vision. The Working Group discussed, and the full RSAC recommended for inclusion in § 214.335(c), that on-track safety be required for ''adjacent controlled track within 19 feet of the centerline of the occupied track'' for certain work activities. FRA agrees with this analysis and has reflected it in the proposed definition of ''adjacent controlled track.'' Note, however, that this section also uses the broader term ''adjacent track'' or ''adjacent tracks'' in paragraphs (c)(2)(i), (e)(1), and (f), as further discussed, below.

The third proposed definition in § 214.336(a) is for the term ''clear side.'' FRA proposes to define the term for purposes of § 214.336 to mean ''the field side of the occupied track that either has no adjacent track on that side, or has an adjacent track or tracks on that side and working limits have been established in accordance with this subpart on the closest adjacent track on that side and there are no movements authorized through the working limits by the roadway worker in charge on that adjacent track.'' This term was added so that the above language would not need to be included in the rule text in proposed paragraphs (c) and (e)(1) of this section. It should be noted that there are two field sides to each occupied track, beginning at each rail and continuing outward and away from the track center of the occupied track. One or both field sides may meet the definition of ''clear'' at some point during the work period (depending on the presence of an adjacent track on one or both sides and the method and circumstances of the on-track safety established on the adjacent track or tracks), but since the term is only used when making the determination as to whether work must cease due to one or more movements on an adjacent-controlled track, there could be only one ''clear side'' at the time of that determination.

FRA believes that the work permitted to continue under the circumstances described in proposed paragraphs (c) and (e)(1) should not be limited to only those situations where there is no adjacent track present. While paragraph (c)(3) of the consensus language (pertaining to single or multiple adjacent-track movements at a speed of 25 mph or less) permitted all work to continue to the field side of the occupied track only if there was no adjacent track present during such movements, the consensus language did not impose such a limitation in the broad exception for on-ground work on the field side of the occupied track in paragraph (e)(2) (now proposed paragraph (e)(1)). FRA's original proposal would have permitted certain work to continue, provided that on-track safety (including train approach warning) had been established in accordance with this subpart on any adjacent track on that side. In consideration of the joint comments submitted by BMWED and BRS, FRA has adjusted the language originally proposed so as to better ensure the safety of the workers on that side of the occupied track.

Specifically, under the proposed sections that use the term ''clear side,'' certain work would be permitted to continue on the field side furthest from the adjacent controlled track if working limits (including those established by making the track inaccessible per § 214.327 if the adjacent track is non-controlled) have been established on that track, and the roadway worker in charge has not authorized any movements through the working limits of that adjacent track. This proposal would allow the roadway worker in charge to better monitor and control the on-track safety of roadway workers performing work in triple-track territory, especially since the designated place of safety during an adjacent-controlled-track movement may very well be the field side towards another adjacent track on which no movement is occurring. Train approach warning would not be

permitted, since a train would be free to move on the adjacent track on that side without the roadway worker in charge's permission or knowledge. FRA believes that this new language addresses the safety concern raised in the joint comments.

The fourth proposed definition to be used for purposes of § 214.336 is ''occupied track.'' FRA proposes to define the term ''occupied track'' to mean the track on which a roadway maintenance machine or coupled equipment is located while engaged in a common task with a roadway work group. FRA replaced the consensus language of ''on-track, self-propelled or coupled equipment'' with ''on-track roadway maintenance machine or coupled equipment'' so as to use a term that is already defined in part 214. It should be noted that while the language that would trigger the requirement to establish adjacent-controlled-track on-track safety contains the term ''on-track roadway maintenance machine'' (which excludes hi-rails), the proposed definition of ''occupied track'' contains the broader term ''roadway maintenance machine'' (which includes hi-rails), since a roadway work group that is engaged in a common task with a hi-rail would still be ''occupying'' the track, regardless of whether adjacent-track on-track safety would be required during that task. The language in RSAC-recommended paragraph (a) was also modified in light of the proposed new definition of ''adjacent controlled track,'' namely by moving the reference to the 19-foot track center distance and placing it in the definition.

Paragraphs (b), Procedures for Adjacent-Controlled-Track Movements Over 25 mph; and (c), Procedures for Adjacent-Controlled-Track Movements 25 mph or Less

In an effort to make the section easier to understand, FRA has reorganized the section into proposed paragraph (b), which lists the procedures to follow for one or more adjacent-controlled-track movements over 25 mph (*i.e.*, if a train or other on-track equipment is authorized to move on an adjacent controlled track at a speed greater than 25 mph), and proposed paragraph (c), which lists the procedures to follow when one or more adjacent-controlled-track movements are authorized at a speed of 25 mph or less.[8] As noted above in the discussion of paragraph (a)(2), if an occupied track has two adjacent controlled tracks, and one of these adjacent controlled tracks has one or more movements authorized at 25 mph or less, and the other adjacent controlled track has one or more concurrent movements authorized at over 25 mph, the more restrictive procedures in paragraph (b) would apply.

Proposed paragraph (b)(1) would generally require that each roadway worker in the roadway work group stop any work on the ground and stop the movement of any roadway maintenance machine or coupled equipment in the fouling space of the occupied track and the adjacent controlled track, and occupy a predetermined place of safety. If on-track safety has been established on the adjacent controlled track through train approach warning in accordance with § 214.329 (either as the sole method of on-track safety or in addition to working limits), all work would have to cease upon receiving a watchman/lookout warning. *See* § 214.336(b)(1)(ii). On the other hand, if working limits have been established on the adjacent controlled track and the roadway work group has not been assigned a watchman/lookout, all work would have to cease upon receiving notification that the roadway worker in charge intends to authorize one or more train movements or other on-track equipment movements through the working limits on an adjacent controlled track. *See* § 214.336(b)(1)(i). This notification would have to occur before the roadway worker in charge releases the working limits, in order to comply with existing § 214.319(c).

FRA notes that the language in proposed paragraph (b)(1) that would generally require roadway workers to cease all on-ground work within the fouling space of the occupied track could potentially be interpreted by some as conflicting with the language in proposed paragraph (e)(1), which would permit on-ground work on the clear (field) side, a portion of which would be within the fouling space of the occupied track. While proposed paragraphs (a) and (e) both contain language indicating, directly or indirectly, that paragraph (e) would apply notwithstanding any conflicting language in proposed paragraphs (a) through (c), to ensure that there is no confusion as to the interrelation of these sections, FRA has added the phrase ''except as provided in paragraph (e) of this section'' at the beginning of proposed paragraph (b)(1) and seeks comment regarding whether this was the intent of the consensus language. FRA does not believe that this same clarification would be necessary in proposed paragraph (c), since proposed paragraph (c) refers the reader to proposed paragraph (b).

In its errata review comments on the FRA document compiling all of the Working Group consensus language, AAR requested that FRA clarify whether work would be permitted to resume at a particular location after the head-end of the movement had passed or after the entire train had passed, under the RSAC-recommended § 214.335(c)(2). As discussed in section VI.C.1., above, upon an extensive review of all related meeting documents, FRA has determined that railroad management's proposal appears to have conceded that the entire movement must pass before permitting work to resume, regardless of speed. While it is possible that the concession of the entire movement passing was conditioned upon railroad labor accepting railroad management's proposal as a whole (including the proposal of a 40-mph threshold), FRA did not receive any further comments from AAR or any of its members on this issue, despite the request for comments on this issue in the July 17, 2008 NPRM. FRA did, however, receive joint comments from BMWED and BRS on this issue. The joint comments noted the hazards presented to roadway workers by abnormal consist conditions (*e.g.,* ''shifted loads/shifted ladings, loose banding, dragging chains/binders, loose brake piping, loose/swinging boxcar doors, [and] fragmented brake shoes'') and by ''dust, rust, debris, stone, and track construction/maintenance materials'' which may become airborne while trains pass roadway workers. Given these potential hazards and the information available in the related meeting documents, FRA proposes to require that all work not subject to an exception be permitted to resume only after the entire movement (the trailing-end of the movement) has passed by the location of the roadway work group component. *See* proposed § 214.336(b)(2). This would apply regardless of the speed of the movement, since the procedures for adjacent-controlled-track movements at 25 mph or less are the same as for those

[8] If a roadway worker in charge, in his or her discretion, authorizes a train through working limits on an adjacent controlled track at 30 mph, but the train is actually traveling at a speed of only 20 mph, the procedures in proposed paragraph (b), regarding adjacent-controlled-track movements over 25 mph, would still apply. Where exclusive track occupancy is the method of on-track safety established on the adjacent controlled track, FRA notes that existing § 214.321(d) provides that movements of trains and roadway maintenance machines within working limits shall be made only under the direction of the roadway worker having control over the working limits, and further notes that such movements shall be at restricted speed unless a higher speed has been specifically authorized by the roadway worker in charge of the working limits.

at over 25 mph, unless the work being performed is subject to an exception. *See* proposed § 214.336(c).

In modifying the language in consensus paragraphs (c)(2) (concerning when work would be permitted to resume) and (c)(3) (concerning which work would be permitted to continue during adjacent-controlled-track movements of 25 mph or less) for inclusion in its proposal, FRA realized that these same paragraphs did not address situations where train approach warning was the established method of adjacent-controlled-track on-track safety (either as the sole method, or in combination with working limits). Where train approach warning is the sole method of adjacent-controlled-track on-track safety, there are no working limits established on the adjacent controlled track, and trains are not being ''cleared through adjacent-controlled-track working limits'' by the roadway worker in charge. Regarding consensus paragraph (c)(3) (concerning which work would be permitted to continue during adjacent-controlled-track movements of 25 mph or less), this simply means that this type of work would always be permitted so long as train approach warning was in effect, since a train or other on-track equipment would not be authorized to exceed 25 mph. Regarding consensus paragraph (c)(2) (concerning when work would be permitted to resume), this means that the watchman/lookout may not know (depending on the span of the working limits and the available sight distance) how many movements at any given time are operating within the same segment of track on the adjacent-controlled-track as that of the working limits established on the occupied track. Thus, it would be reasonable for work to resume after the trailing-end of a train passes unless and until the watchman/lookout provides a warning for a subsequent train. To address these oversights, FRA made adjustments to the consensus language in paragraphs (c)(2) and (c)(3) in proposed §§ 214.336(b)(2)(i) and 214.336(c), respectively.

As the roadway workers are presented with similar safety risks and would still receive notification of the train or other on-track equipment movements, regardless of the method of adjacent-track on-track safety established, FRA has decided to adopt language in proposed § 214.336(b)(2)(i), that would clarify that a component of a roadway work group may resume on-ground work and movement of any roadway maintenance machine or coupled equipment on the occupied track only after the trailing-end of all trains or other on-track equipment moving on the adjacent controlled track (for which a notification or warning has been received in accordance with paragraph (b)(1) of this section) has passed and remains ahead of[9] that component of the roadway work group. Thus, if there are three trains cleared through the working limits by the roadway worker in charge, and there is no watchman/lookout assigned, the roadway workers would not, under this proposal, be permitted to resume work until the trailing-end of all three trains had passed by (and remained ahead of) that component of the roadway work group. However, if there are three trains operating within the same segment of track on the adjacent-controlled-track as that of the working limits established on the occupied track, and there is sufficient space between each of the trains to provide adequate warning to clear the track, the watchman/lookout may provide a warning for the first train, and work would be permitted to resume after the trailing-end of that train passed by (and remained ahead of) that component of the roadway work group, until such time as the watchman/lookout provided a warning for the second train, and so forth.

On the other hand, if the train or other on-track equipment were to stop before its trailing-end passed all of the roadway workers in the roadway work group, then the work to be performed on or while fouling the occupied track ahead of the trailing-end of the train or other on-track equipment on the adjacent controlled track would be permitted to resume only if adjacent-controlled-track on-track safety has been established. *See* proposed § 214.336(b)(2)(ii). In most cases, this would likely mean that on-track safety through train approach warning (§ 214.329) has been established on the adjacent track. *See* proposed § 214.336(b)(2)(ii)(A). In the remaining cases, this would mean that the roadway worker in charge has communicated with the train engineer or equipment operator and established that such train or other on-track equipment shall move only under his or her direction. *See* proposed § 214.336(b)(2)(ii)(B).

It should be noted that the train approach warning option provided in proposed § 214.336(b)(2)(ii)(A) would not be permitted alongside the train (or for a certain distance on the occupied track ahead of the location of the train on the adjacent controlled track), since the train, if it were traveling at the ''maximum speed authorized on that track'' would already be at the roadway worker's location (or, at certain distances, would be able to reach the roadway worker's location sooner than 15 seconds) and would not permit the roadway worker any (or sufficient) time to clear. Under such circumstances, work would not be permitted to resume until the conditions proposed in § 214.336(b)(2)(ii)(B) have been met, or until the train resumes its movement and its trailing-end passes the roadway worker's location, whichever comes first.

The proposed procedures to be followed for adjacent-track movements of 25 mph or less are the same as those procedures for adjacent-track movements over 25 mph, except that work would be permitted to continue in certain circumstances without regard to when the trailing-end passed the roadway work group's location, due to the low speed of the movements. In proposed paragraph (a)(2), FRA makes clear that if an occupied track has two adjacent controlled tracks, and one of the tracks has one or more adjacent-controlled-track movements authorized at 25 mph or less, and the other has one or more concurrent adjacent-controlled-track movements authorized at over 25 mph, the more restrictive procedures in paragraph (b) would apply.

The circumstances under which work may continue during low-speed movements on adjacent controlled tracks have been included in proposed paragraph (c). Unless the work falls under one of the exceptions in proposed paragraph (e), the work that would be permitted to continue after receiving a warning or notification of an adjacent-controlled-track movement would have to be performed more than 25 feet in front of or behind any roadway maintenance machine that is on or fouling the occupied track. While existing § 214.341(a)(5) requires each employer to include in its on-track safety program specific provisions addressing spacing ''between machines and roadway workers to prevent personal injury,'' the rule does not prescribe a specific distance, as certain work activities may require a roadway worker to work closer to a machine than others. Many railroads that subscribe to the General Code of Operating Rules (''GCOR''), for example, have adopted a 15-foot work zone in which roadway workers are not permitted to enter without first communicating with the

[9] The language ''and remains ahead of'' was added to this section to ensure that a roadway worker who has been passed (*e.g.,* at milepost 10) would not be permitted to then move up (*e.g.,* by hi-rail or walking to milepost 11) and perform work on the occupied track at a point alongside of (or ahead of) a train that has stopped on the adjacent controlled track (*e.g.,* with its trailing-end located at milepost 10.9 and its head-end located at milepost 11.2).

operator of the equipment and establishing safe work procedures. *See* GCOR Rule 136.7.3. The Working Group proposed a larger work zone of 25 feet to help lessen the distraction and danger posed by a roadway maintenance machine working on or fouling an occupied track, as both an on-ground roadway worker and an operator of a roadway maintenance machine will be performing work with the additional distraction of one or more adjacent-controlled-track movements. FRA proposes to adopt this recommendation as one of the circumstances for permitting work to continue as described in proposed paragraph (c).

FRA believes that the intent of the consensus language regarding the 25-foot zone in paragraph (c) was to ensure that roadway workers were not performing on-ground work within 25 feet of the forward or rearward path of a moving machine; thus, workers would still be permitted to work alongside a machine on a clear side (to verify the quality of the work being performed by that machine, for example). A roadway worker that is performing duties alongside a roadway maintenance machine would, of course, need to be mindful of the machine's footprint (which would include any brooms or wings of a machine, if extended) in deciding where to position himself or herself in performing such duties. FRA believes that the procedures addressing spacing ''between machines and roadway workers to prevent personal injury'' that are required by existing § 214.341(a)(5) should adequately address the risk of working alongside a machine (under any circumstance, not just during movements on adjacent controlled track); however, FRA seeks comment regarding the adequacy of these procedures.

Proposed paragraph (c) would permit work to continue that is performed ''exclusively while positioned on or between the rails of the occupied track or to the clear side'' of the occupied track, provided it is performed outside of the 25-foot work zone discussed above. The rationale for permitting work to continue while positioned between the rails is that a roadway worker who is positioned between the rails of the occupied track is in little danger of fouling the adjacent controlled track. This proposed condition is similar to an existing provision in § 214.103(d) that permits bridge workers to perform minor repair work exclusively between the rails (so long as the weight-bearing portion of the roadway worker's body is between the rails) without any fall protection. As this condition has worked well in the bridge worker area, FRA proposes to adopt the RSAC-recommended condition in the roadway worker area.

The other set of circumstances in proposed paragraph (c) for permitting work to continue when a movement on the adjacent controlled track is authorized at 25 mph or less is when work is performed to the ''clear side'' of the occupied track, provided that it is performed outside of the 25-foot work zone. As discussed above in the analysis of proposed paragraph (a)(3) of this section, the ''clear side'' means ''the field side of the occupied track that either has no adjacent track on that side, or has an adjacent track or tracks on that side and working limits have been established in accordance with this subpart on the closest adjacent track on that side and there are no movements authorized through the working limits by the roadway worker in charge on that adjacent track.'' Both the Working Group and FRA recognize that if there is little danger of a roadway worker fouling an adjacent controlled track (*e.g.,* Main Track No. 1) while positioned between the rails of the occupied track (*e.g.,* Main Track No. 2), a roadway worker is in even less danger of fouling that adjacent controlled track if he or she is positioned on the field side of the occupied track furthest from the adjacent controlled track. If, however, there is another adjacent track present (*e.g.,* Main Track No. 3, whether controlled or non-controlled) on the field side farthest from the adjacent controlled track on which a train or other on-track equipment movement has been authorized (*e.g.,* Main Track No. 1), then the roadway worker would potentially be in danger of fouling the other adjacent track (*e.g.,* Main Track No. 3). FRA makes clear that even if on-track safety in the form of working limits had been established on the other adjacent track (*e.g.,* Main Track No. 3), the roadway worker would still be in potential danger if he or she were to foul that adjacent track if the protection had in effect been nullified by the roadway worker in charge authorizing a train or other on-track equipment movement through the working limits on that other adjacent track. This is why FRA is proposing that work would be permitted on that side only if it truly is a ''clear side.''

Given the potential danger posed by concurrent movements on two adjacent controlled tracks, it is important to note that while proposed § 214.336 would apply to each adjacent controlled track individually, the impact on the type of work that would be permitted to continue on the occupied track must be examined as a whole. Thus, where a roadway worker receives notification of adjacent-controlled-track movements authorized at 25 mph or less that are occurring concurrently on both adjacent tracks, FRA proposes that the roadway worker would not be permitted to work on either field side of the occupied track, as the movement on one adjacent controlled track would not permit any work on the field side closest to it, and the movement on the other adjacent (controlled or non-controlled) track would not permit any work on the field side closest to it. *See* proposed paragraph (c)(2). Under these circumstances, there would be no ''clear side'' on which to perform even on-ground work as provided in the general exception in proposed paragraph (e)(1).

It should also be noted that paragraph (c) only directly addresses the types of work that a component of a roadway work group may continue performing while waiting for the trailing-end of an adjacent-controlled-track movement to pass by that component's location. It does not directly address when all other work (*i.e.,* work that paragraph (c) does not cover) may resume. Thus, roadway workers who are assigned to perform work not covered by paragraph (c) must look to the procedures in paragraph (b)(2) for guidance. For example, since on-ground work that would be performed between the rails and near a roadway maintenance machine (*i.e.,* in the 25-foot zone in front of or behind a machine that is on or fouling the occupied track) is not covered by paragraph (c), such work would not be permitted to resume until the conditions in paragraph (b)(2) had been fulfilled. That is to say, such work (as well as all other work that must cease as noted in paragraph (b) that is not permitted to continue by paragraph (c) and not subject to one of the general exceptions in paragraph (e)) would be permitted to resume only after the trailing-end of all movements (for which a notification or warning has been received in accordance with paragraph (b)(1) of this section) have passed by (and remain ahead of) the roadway work group component's location. Paragraph (d), Procedures for a roadway maintenance machine or coupled equipment fouling an adjacent controlled track.

Regarding the prohibition in consensus paragraph (d) against ''equipment'' fouling an adjacent controlled track unless protected by working limits, FRA has changed the term to ''roadway maintenance machine'' to clarify that this prohibition is meant to be broad and would include hi-rails that are part of the roadway work group or otherwise working within the same working limits as the roadway

work group. *See* proposed §§ 214.336(d) and 214.336(e)(2). While a hi-rail alone would not trigger the requirement to establish adjacent-controlled-track on-track safety, once a hi-rail has become part of a roadway work group involving at least one roadway worker on the ground and ''an on-track roadway maintenance machine or coupled equipment,'' the hi-rail would be subject to this prohibition against fouling, as well as to the machine spacing requirement in consensus paragraph (c). *See* proposed §§ 214.336(c), 214.336(d), and 214.336(e)(2). Further, FRA clarifies that the prohibition was not meant to be so broad that a roadway worker would not be permitted to use readily portable tools or equipment similar to a jackhammer, such as a pneumatic tamping gun or a spike driver, on an adjacent controlled track while afforded on-track safety through train approach warning. FRA would urge that employers and employees use common sense in determining which tools or equipment they would permit to be used or use under train approach warning. If there is any doubt as to whether the equipment could be readily removed, the employee must not foul the track with those tools or equipment under watchman/lookout (*i.e.,* train approach warning) protection.

Paragraph (e), Exceptions to the Requirement for Adjacent-Controlled-Track On-Track Safety

The Working Group also discussed, and the RSAC recommended, three exceptions when adjacent-controlled-track on-track safety would not have to be established at all. *See* consensus paragraphs (e)(1)–(e)(3). FRA proposes to adopt all three exceptions in this NPRM. *See* proposed § 214.336(e).

The first proposed exception to the requirement for adjacent-controlled-track on-track safety would be for one or more on-ground roadway workers performing work while exclusively positioned on the clear (field) side of the occupied track, provided that there should essentially be no danger posed by any other adjacent track. In particular, there would be no danger posed by any other adjacent track either because there is no adjacent track on the field side of the occupied track or, even though there is an adjacent track on the field side of the occupied track, working limits have been established in accordance with this subpart on the closest adjacent track on that side and there are no movements authorized through the working limits on that adjacent track. Regarding the language ''while exclusively positioned on the clear side,'' FRA notes that this language refers to the positioning of the weight-bearing portion of the roadway worker's body. This interpretation is consistent with FRA's interpretation of a similar provision in the bridge worker area (*see* § 214.103(d)) and also with the working group's intent that the exception in proposed paragraph (e)(1) be written so as to permit an on-ground roadway worker to change out a stone on a rail grinder, which may require that part of his or her body (*e.g.,* his or her hands) be within the gage of the occupied track.

As noted above in the discussion of proposed paragraphs (b)(1) and (c), this exception would apply notwithstanding any conflicting language in proposed paragraphs (a) through (c). Thus, on-ground work within the fouling space of the occupied track on the clear (field) side would still be permitted to continue during adjacent-controlled-track movements occurring on the other field side of the occupied track, regardless of the speed of those movements. Moreover, this on-ground work would not be subject to the condition that the on-ground work permitted to continue must be conducted more than 25 feet in front of or behind any roadway maintenance machine on or fouling the occupied track. FRA seeks comment as to whether the 25-foot zone should apply to the work performed in paragraph (e)(1) as well.

The second exception to the requirement for adjacent-controlled-track on-track safety would be for a hi-rail vehicle on the occupied track, provided such hi-rail vehicle is not coupled to any equipment and not operating on the same occupied track and within working limits of a roadway work group as described in paragraph (a) of this section. *See* proposed § 214.336(e)(2). As discussed in Section IV. of this preamble, there has been only one adjacent-track fatality where a roadway work group had been engaged in a common task with a hi-rail vehicle as defined in § 214.7, and the roadway workers in that case were under the impression that adjacent-track on-track safety was in effect when, due to a miscommunication, it was not. Given the circumstances of the one fatality and because the duties normally performed by an employee operating a hi-rail tend to be less distracting to on-ground roadway workers and produce less dust and noise than a typical on-track roadway maintenance machine, FRA proposes that adjacent-track on-track safety not be required for roadway work groups engaged in a common task with a hi-rail.

The consensus language for this second exception also included language indicating that where multiple hi-rails are engaged in a common task, the on-track safety briefing shall include discussion of the nature of the work to be performed to determine if ''adjacent controlled track protection'' is necessary. FRA has added a cross-reference to proposed § 214.315(a)(4) to this language in its proposal because the roadway worker in charge must always consider the nature of the work to be performed to determine the appropriate level of on-track safety. In fact, the consensus language emphasizes that nothing in this subpart prohibits the roadway worker in charge from establishing adjacent controlled track protection as he or she deems necessary. Consensus paragraph (e)(1) (now proposed paragraph (e)(2)) was also amended to remove the words ''as defined in § 214.7,'' since each time that a term defined in § 214.7 is used in part 214, FRA intends the term to be interpreted in the manner in which it is defined in § 214.7, unless otherwise noted. As discussed in section VI.C.2., above, FRA seeks comment as to whether this proposed exception should be expanded to include rail-bound geometry and detection equipment.

The third proposed exception to the requirement for adjacent-controlled-track on-track safety is for a catenary maintenance tower car with one or more roadway workers positioned on the ground exclusively within the gage of the occupied track for the sole purpose of applying or removing grounds. As discussed in Section IV. of this preamble, there have been no adjacent-track fatalities where a roadway work group had been engaged in a common task with a catenary maintenance tower car on the occupied track and the duties normally performed by an employee operating a catenary maintenance tower car tend to be less distracting to on-ground roadway workers and produce less dust and noise than a typical on-track roadway maintenance machine. FRA proposes to add this exception, with the same caveat added as for hi-rails, which is that once the catenary maintenance tower car is operating on the same occupied track and within the working limits of a roadway work group as described in paragraph (a) of this section, the exception would no longer apply.

As discussed in section VI.C.2., above, AAR is requesting that a fourth exception be added when there is a physical barrier between the occupied track and the adjacent controlled track. FRA seeks comment on whether a fourth exception should be added, and if so, whether it should be limited to ''where there is a continuous permanent

or semi-permanent physical barrier of a certain height, such as a chain-linked fence of at least 4′ in height or a concrete barrier of at least 32″ in height, between the occupied track and the adjacent controlled track.''

Paragraph (f), Discretion of Roadway Worker in Charge

In BMWED's errata review comments on the FRA document compiling all of the Working Group consensus language that was recommended to FRA by the RSAC, BMWED noted that from the manner in which the consensus exceptions (paragraphs (e)(1)-(e)(3)) were constructed, one could interpret that the roadway worker in charge of on-ground roadway workers exclusively performing work on the field side of the occupied track described in consensus paragraph (e)(2) would not be afforded the same right to establish a greater level of adjacent-track on-track safety as the roadway worker in charge of the hi-rail vehicle or catenary maintenance tower car described in paragraphs (e)(1) and (e)(3), respectively. FRA agrees that the provisions should be consistent. The section has been reorganized so that the language in paragraph (e)(3) stating that ''[n]othing in this subpart prohibits the roadway worker in charge of the catenary maintenance tower car from establishing adjacent track protection, as he/she deems necessary'' has been removed from paragraph (e)(3) (along with similar language in paragraph (e)(1)) and slightly reworded and moved into a new paragraph (f) so as to apply generally to proposed § 214.336, including all three exceptions in proposed paragraphs (e)(1)–(e)(3). Proposed paragraph (f) reads—''*Discretion of roadway worker in charge.* Nothing in this subpart prohibits the roadway worker in charge from establishing on-track safety on one or more adjacent tracks as he or she deems necessary consistent with both the purpose and requirements of this subpart.''

VIII. Regulatory Impact and Notices

A. Executive Order 12866 and DOT Regulatory Policies and Procedures

This NPRM has been evaluated in accordance with existing policies and procedures, and determined to be significant under both Executive Order 12866 and DOT policies and procedures. *See* 44 FR 11034 (Feb. 26, 1979). FRA has prepared and placed in the docket a regulatory evaluation addressing the economic impact of this NPRM. Document inspection and copying facilities are available at the Federal Docket Management Facility, U.S. Department of Transportation, West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590. Docket material is also available for inspection on the Internet at *http://www.regulations.gov*. Photocopies may also be obtained by submitting a written request to the FRA Docket Clerk at Office of Chief Counsel, Mail Stop 10, Federal Railroad Administration, 1200 New Jersey Avenue, SE., Washington, DC 20590; please refer to Docket No. FRA–2008–0059, Notice No. 3.

Certain of the requirements reflect current industry practice, or restate existing regulations, or both. As a result, in calculating the costs of this NPRM, FRA has neither included the costs of those actions that would be performed voluntarily in the absence of a regulation, nor has FRA included the costs of those actions that would be required by an existing regulation.

This evaluation includes quantitative measurements and qualitative discussions of implementation costs for this proposed rule. The costs would primarily be imposed by a small increase in job briefing time and additional resources spent to provide on-track safety for the safe conduct of other than large-scale maintenance and construction of track located adjacent to (and within a certain distance of) one or more controlled tracks on which train movements may be occurring. Training costs would also accrue. The benefits would primarily accrue from a reduction in roadway worker casualties (fatalities and injuries). Business benefits stemming from avoided train delays and property damages would also accrue.

FRA estimates that the present value (PV, 7%) of the total 20-year costs that the industry would be expected to incur to comply with the requirements in this NPRM would be $130.7 million. FRA also estimates that the PV (7%) of the total 20-year benefits accruing to society from the implementation of the requirements would be $131.9 million. The following table includes a summary of the regulatory impact analysis (RIA) costs and benefits, broken down by section of the rule and benefit category, respectively:

COST AND BENEFIT SUMMARY

Costs (by section of rule)	Reference: section of RIA	Total: PV, 7% (in millions—rounded)
Section 214.315—Job Briefings	9.2	$1.21
Section 214.335—On Track	9.4	127.59
Other (Signalmen, Lone Workers)	9.4	1.70
Section 214.336—Training	9.4	0.16
COST Total for NPRM		*130.65*
Benefits (by benefit category)	**Reference: section of RIA**	**Total: PV, 7% (in millions—rounded)**
Casualty Mitigation—Fatality	10.1	$49.16
Casualty Mitigation—Injury	10.2	30.83
Nonfatal Injury Prevention	10.3	5.65
Adjacent Track Revision	10.4	6.04
Damage Reduction	10.5	0.64
Reporting and Recordkeeping—Cost Savings	10.6	0.01
Business Industry Benefit	10.7	39.60
BENEFIT Total for NPRM		*131.94*

FRA believes that taking into account non-quantifiable benefits, including reduced train delays and property damages resulting from roadway worker incidents, the benefits associated with this proposed rule would justify the implementation costs. FRA requests comment on all of the assumptions used in the regulatory evaluation to calculate the costs and benefits.

B. Regulatory Flexibility Act and Executive Order 13272

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) and Executive Order 13272 require a review of proposed and final rules to assess their impact on small entities. FRA has prepared and placed in the docket a Small Entity Impact Assessment and Evaluation that assesses the small entity impact of this NPRM. Document inspection and copying facilities are available at the Docket Management Facility, U.S. Department of Transportation, West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590. Docket material is also available for inspection on the Internet at *http://www.regulations.gov*. Photocopies may also be obtained by submitting a written request to the FRA Docket Clerk at Office of Chief Counsel, Mail Stop 10, Federal Railroad Administration, 1200 New Jersey Avenue, SE., Washington, DC 20590; please refer to Docket No. FRA–2008–0059, Notice No. 3.

This Small Entity Impact Assessment and Evaluation concludes that this proposed rule would not have a significant economic impact on a substantial number of small entities. In order to determine the significance of the economic impact for the final rule's Regulatory Flexibility Act (RFA) requirements, FRA invites comments from all interested parties concerning data and information regarding the potential economic impact caused by this proposed rule, during the comment period.

The U.S. Small Business Administration (SBA) stipulates in its ''Size Standards'' that a ''for profit'' railroad business firm may not have more than ''1,500 employees for ''Line-Haul Operating'' Railroads and 500 employees for ''Switching and Terminal Establishments'' to be considered as a ''small entity.''[10] ''Small entity'' is defined in 5 U.S.C. 601 as a small business concern that is independently owned and operated and is not dominant in its field of operation. SBA's ''size standards'' may be altered by Federal agencies upon consultation with SBA and in conjunction with public comment.

Pursuant to that authority, FRA has published a final policy that classifies ''small entities'' as, inter alia, being railroads that meet the line haulage revenue requirements of a Class III railroad.[11] 49 CFR part 209, appendix C. Currently, the revenue requirements are 20 million inflation-adjusted dollars or less in annual operating revenue. The 20-million limit is based on the Surface Transportation Board's threshold of a Class III railroad carrier, which is adjusted by applying the railroad revenue deflator adjustment.[12] The same dollar limit on revenues is established to determine whether a railroad shipper or contractor is a small entity. FRA is using this definition of ''small entity'' for regulatory flexibility purposes in this rulemaking.

There are approximately 665 small railroads.[13] Potentially all small railroads could be impacted by this proposed regulation. However, because of certain characteristics that these railroads typically have, there should not be any impact on the majority of them. Most have only single-track operations. Some small railroads such as the tourist and historic railroads, operate across the lines of other railroads that would bear the burden or impact of the proposed rules requirements. Finally, other small railroads, if they do have more than a single track, typically have operations that are light enough such that the railroads have generally always performed the pertinent trackside work with the track and right-of-way taken out of service, or conducted the work during hours that the track is not used.

In addition, FRA is not aware of any commuter railroads that qualify as small entities. This is likely because commuter railroad operations in the United States are part of larger governmental entities whose jurisdictions exceed 50,000 in population. *See* 49 CFR part 209, appendix C.

FRA is uncertain as to the number of contractors that would be affected by this proposed rule. FRA is aware that some railroads hire contractors to conduct some of the functions of roadway workers on their railroads. However, most of the costs associated with the burdens from this rulemaking would ultimately get passed on to the pertinent railroad. Most likely, the contracts would be written to reflect that, and the contractor would bear no additional burden for the proposed requirements. In addition, FRA is uncertain as to the number of contractors that would be considered to be small entities. FRA requests any information during the rulemaking comment period related to contractors and the burdens that might impact them as a result of this proposed rulemaking.

No other small businesses (non-railroads) are expected to be impacted by this proposed rulemaking.

The impacts from this regulation are primarily a result of the proposed requirements for roadway work groups to be provided on-track safety when working on a track within close proximity of an adjacent track that is controlled. Again, since small railroads either do not have any adjacent track or conduct track work on the occupied track with an adjacent track when the adjacent track is out of service, there is no impact for small railroads. Since FRA does not anticipate that this proposed rule would impose any burdens on small entities, there is no alternative treatment proposed for small entities.

Having made these determinations, FRA certifies that this NPRM is not expected to have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act or Executive Order 13272.

C. Paperwork Reduction Act

The information collection requirements in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.* The sections that contain the new and current information collection requirements, and the estimated time to fulfill each requirement are as follows:

[10] ''Table of Size Standards,'' U.S. Small Business Administration, January 31, 1996, 13 CFR part 121.

[11] *See* 68 FR 24891 (May 9, 2003).

[12] For further information on the calculation of the specific dollar limit, please reference 49 CFR part 1201.

[13] 715 railroads—50 (large freight, medium freight, passenger, and commuter railroads) = 665 small railroads.

All estimates include the time for reviewing instructions; searching existing data sources; gathering or maintaining the needed data; and reviewing the information. Pursuant to 44 U.S.C. 3506(c)(2)(B), FRA solicits comments concerning whether these information collection requirements are necessary for the proper performance of the functions of FRA, including whether the information has practical utility; the accuracy of FRA's estimates of the burden of the information collection requirements; the quality, utility, and clarity of the information to be collected; and whether the burden of collection of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology, may be minimized. For information or a copy of the paperwork package submitted to OMB, contact Mr. Robert Brogan, Information Clearance Officer, at 202–493–6292, or Ms. Nakia Jackson at 202–493–6073.

Organizations and individuals desiring to submit comments on the collection of information requirements should direct them to Mr. Robert Brogan or Ms. Nakia Jackson, Federal Railroad Administration, 1200 New Jersey Avenue, SE., 3rd Floor, Washington, DC 20590. Comments may also be submitted via e-mail to Mr. Brogan or Ms. Jackson at the following addresses: *robert.brogan@dot.gov* or *nakia.jackson@dot.gov.*

OMB is required to make a decision concerning the collection of information requirements contained in this proposed rule between 30 and 60 days after publication of this document in the **Federal Register.** Therefore, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication. The final rule will respond to any OMB or public comments on the information collection requirements contained in this proposal.

FRA is not authorized to impose a penalty on persons for violating information collection requirements which do not display a current OMB control number, if required. FRA intends to obtain current OMB control numbers for any new information collection requirements resulting from this rulemaking action prior to the effective date of the final rule. The OMB control number, when assigned, will be announced by separate notice in the **Federal Register.**

D. Federalism Implications

FRA has analyzed this NPRM in accordance with the principles and criteria contained in Executive Order 13132, issued on August 4, 1999, which directs Federal agencies to exercise great care in establishing policies that have federalism implications. *See* 64 FR 43255. This NPRM will not have a substantial direct effect on the States, on the relationship between the National government and the States, or on the distribution of power and responsibilities among various levels of government.

One of the fundamental federalism principles, as stated in Section 2(a) of Executive Order 13132, is that ''Federalism is rooted in the belief that issues that are not national in scope or significance are most appropriately addressed by the level of government closest to the people.'' Congress expressed its intent that there be national uniformity of regulation concerning railroad safety matters when it enacted 49 U.S.C. 20106. As amended to date, that section provides that all regulations prescribed by the Secretary of Transportation with respect to railroad safety matters and the Secretary of Homeland Security with respect to railroad security matters preempt any State law, regulation, or order covering the same subject matter, except a provision necessary to eliminate or reduce an essentially local safety or security hazard that is not incompatible with a Federal law, regulation, or order and that does not unreasonably burden interstate commerce. Nothing in this NPRM proposes to alter the preemptive effect of the RWP Rule so these provisions, once adopted as a final rule, would have the same preemptive effect as the current RWP Rule in accordance with the statute.

FRA notes that the above factors have been considered throughout the development of this NPRM both internally and through discussions within the RSAC forum, as described in Sections VI and VII of this preamble. The full RSAC, which, prior to the publication of this NPRM, reached consensus on proposed rule text and recommended the proposal to FRA, has as permanent voting members two organizations representing State and local interests: AASHTO and ASRSM. As such, these State organizations concurred with the proposed requirements, which differ in only limited respects from the requirements contained in this NPRM. The RSAC regularly provides recommendations to the FRA Administrator for solutions to regulatory issues that reflect significant input from its State members. To date, FRA has received no indication of concerns about the Federalism implications of this rulemaking from these representatives or from any other representative.

For the foregoing reasons, FRA believes that this NPRM is in accordance with the principles and criteria contained in Executive Order 13132.

E. Environmental Impact

FRA has evaluated this NPRM in accordance with its ''Procedures for Considering Environmental Impacts'' (FRA's Procedures) (*see* 64 FR 28545 (May 26, 1999)) as required by the National Environmental Policy Act (*see* 42 U.S.C. 4321 *et seq.*), other environmental statutes, Executive Orders, and related regulatory requirements. FRA has determined that this NPRM is not a major FRA action (requiring the preparation of an environmental impact statement or environmental assessment) because it is categorically excluded from detailed environmental review pursuant to section 4(c)(20) of FRA's Procedures. *See* 64 FR 28547 (May 26, 1999). In accordance with section 4(c) and (e) of FRA's Procedures, the agency has further concluded that no extraordinary circumstances exist with respect to this regulation that might trigger the need for a more detailed environmental review. As a result, FRA finds that this NPRM is not a major Federal action significantly affecting the quality of the human environment.

F. Unfunded Mandates Reform Act of 1995

Pursuant to Section 201 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1531), each Federal agency ''shall, unless otherwise prohibited by law, assess the effects of Federal regulatory actions on State, local, and tribal governments, and the private sector (other than to the extent that such regulations incorporate

requirements specifically set forth in law).'' Section 202 of the Act (2 U.S.C. 1532) further requires —''[b]efore promulgating any general notice of proposed rulemaking that is likely to result in the promulgation of any rule that includes any Federal mandate that may result in expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more (annually adjusted for inflation) in any 1 year, and before promulgating any final rule for which a general notice of proposed rulemaking was published, the agency shall prepare a written statement. * * *''

The written statement must detail the effect on State, local, and tribal governments and the private sector. This NPRM will not result in the expenditure, in the aggregate, of $141,300,000 in any one year, and thus preparation of such a statement is not required.

G. Energy Impact

Executive Order 13211 requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' *See* 66 FR 28355 (May 22, 2001). Under the Executive Order, a ''significant energy action'' is defined as any action by an agency (normally published in the **Federal Register**) that promulgates or is expected to lead to the promulgation of a final rule or regulation, including notices of inquiry, advance notices of proposed rulemaking, and notices of proposed rulemaking: (1)(i) that is a significant regulatory action under Executive Order 12866 or any successor order, and (ii) is likely to have a significant adverse effect on the supply, distribution, or use of energy; or (2) that is designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. FRA has evaluated this NPRM in accordance with Executive Order 13211. FRA has determined that this NPRM is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Consequently, FRA has determined that this regulatory action is not a ''significant energy action'' within the meaning of Executive Order 13211.

H. Trade Impact

The Trade Agreements Act of 1979 (Pub. L. 96–39, 19 U.S.C. 2501 *et seq.*) prohibits Federal agencies from engaging in any standards setting or related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

FRA has assessed the potential effect of this NPRM on foreign commerce and believes that its requirements are consistent with the Trade Agreements Act. The requirements imposed are safety standards, which, as noted, are not considered unnecessary obstacles to trade.

I. Privacy Act

Anyone is able to search the electronic form of all comments received into any of FRA's dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78), or you may visit *http://DocketsInfo.dot.gov*.

List of Subjects in 49 CFR Part 214

Occupational safety and health, Penalties, Railroad safety.

The Proposed Rule

In consideration of the foregoing, FRA proposes to amend part 214 of chapter II, subtitle B of title 49, Code of Federal Regulations, as follows:

PART 214—[AMENDED]

1. The authority citation for part 214 is revised to read as follows:

Authority: 49 U.S.C. 20102–20103, 20107, 21301–21302, 21304; 28 U.S.C. 2461, note; and 49 CFR 1.49.

Subpart C—Roadway Worker Protection

2. Section 214.315 is amended by revising paragraph (a) to read as follows:

§ 214.315 Supervision and communication.

(a) When an employer assigns a duty to a roadway worker that calls for that employee to foul a track, the employer shall provide the employee with an on-track safety job briefing that, at a minimum, includes the following:

(1) Information on the means by which on-track safety is to be provided for each track identified to be fouled;

(2) Instruction on each on-track safety procedure to be followed;

(3) Information about any adjacent tracks, on-track safety for such tracks, if required by this subpart or deemed necessary by the roadway worker in charge, and identification of any roadway maintenance machines that will foul such tracks; and

(4) A discussion of the nature of the work to be performed and the characteristics of the work location to ensure compliance with this subpart.

* * * * *

3. Section 214.335 is amended by removing paragraph (c) and revising the section heading to read as follows:

§ 214.335 On-track safety procedures for roadway work groups, general.

* * * * *

4. New § 214.336 is added to read as follows:

§ 214.336 Adjacent-controlled-track on-track safety procedures for certain roadway work groups.

(a) *Procedures; general.* (1) Except as provided in paragraph (e) of this section, on-track safety is required for each adjacent controlled track when a roadway work group with at least one of the roadway workers on the ground is engaged in a common task with an on-track roadway maintenance machine or coupled equipment on an occupied track. The required on-track safety shall be established through working limits (§ 214.319) or train approach warning provided by watchmen/lookouts (§ 214.329) and as more specifically described in this section.

(2) If an occupied track has two adjacent controlled tracks, and one of these adjacent controlled tracks has one or more adjacent-controlled-track movements authorized at 25 mph or less, and the other adjacent controlled track has one or more concurrent adjacent-controlled-track movements authorized at over 25 mph, the more restrictive procedures in paragraph (b) of this section apply.

(3) As used in this section—

''*Adjacent controlled track''* means a controlled track whose track center is spaced 19 feet or less from the track center of the occupied track.

''*Adjacent tracks''* means two or more tracks with track centers spaced less than 25 feet apart.

''*Clear side''* means the field side of the occupied track that either has no adjacent track on that side or has an adjacent track or tracks on that side and working limits have been established in accordance with this subpart on the closest adjacent track on that side and there are no movements authorized through the working limits by the roadway worker in charge on that adjacent track.

''*Occupied track''* means the track on which a roadway maintenance machine or coupled equipment is located while engaged in a common task with a roadway work group.

(b) *Procedures for adjacent-controlled-track movements over 25*

mph. Except as provided in paragraph (e) of this section, if a train or other on-track equipment is authorized to move on an adjacent controlled track at a speed greater than 25 mph, each roadway work group to which this section applies must comply with the following procedures:

(1) *Ceasing work and occupying a place of safety.* Each roadway worker in the roadway work group shall cease any on-ground work and movement of any roadway maintenance machine or coupled equipment in the fouling space of the occupied track and the adjacent controlled track, and occupy a predetermined place of safety upon receiving—

(i) A notification in accordance with § 214.319(c) indicating that the roadway worker in charge intends to authorize one or more train or other on-track equipment movements through the working limits on the adjacent controlled track, if adjacent-controlled-track on-track safety has been established through working limits alone; or

(ii) A watchman/lookout warning, if on-track safety through train approach warning (§ 214.329) has been established on the adjacent controlled track either as the sole method of on-track safety or in addition to working limits.

(2) *Resuming work.* (i) A component of a roadway work group may resume on-ground work and movement of any roadway maintenance machine or coupled equipment on or fouling the occupied track only after the trailing-end of all trains or other on-track equipment moving on the adjacent controlled track (for which a notification or warning has been received in accordance with paragraph (b)(1) of this section) has passed and remains ahead of that component of the roadway work group.

(ii) If the train or other on-track equipment stops before its trailing-end has passed all of the roadway workers in the roadway work group, the work to be performed on or fouling the occupied track ahead of the trailing-end of the train or other on-track equipment on the adjacent controlled track may resume only—

(A) If on-track safety through train approach warning (§ 214.329) has been established on the adjacent controlled track; or

(B) After the roadway worker in charge has communicated with the train engineer or equipment operator and established that further movements of such train or other on-track equipment shall be made only as permitted by the roadway worker in charge.

(c) *Procedures for adjacent-controlled-track movements 25 mph or less.* If a train or other on-track equipment is authorized to move on an adjacent controlled track at a speed of 25 mph or less, each roadway work group to which this section applies must comply with the procedures listed in paragraph (b) of this section, except that work that is performed exclusively while positioned on or between the rails of the occupied track or on the clear side may continue, provided that any on-ground work is performed more than 25 feet in front of or behind any roadway maintenance machine on or fouling the occupied track during such adjacent-controlled-track movement.

(d) *Procedures for a roadway maintenance machine or coupled equipment fouling an adjacent controlled track.* A roadway maintenance machine or coupled equipment shall not foul an adjacent controlled track unless working limits have been established on the adjacent controlled track and there are no movements authorized through the working limits by the roadway worker in charge.

(e) *Exceptions to the requirement for adjacent-controlled-track on-track safety.* The procedures for adjacent-controlled-track on-track safety in paragraphs (a) through (c) of this section do not apply to the following work activities:

(1) One or more on-ground roadway workers performing work while exclusively positioned on the clear side of the occupied track.

(2) A hi-rail vehicle on or fouling an occupied track while engaged in a common task with one or more roadway workers on the ground, provided that such hi-rail vehicle is not coupled to one or more railroad cars or operating on the same occupied track and within the working limits of a roadway work group as described in paragraph (a) of this section. In accordance with § 214.315(a)(3), where multiple hi-rail vehicles are engaged in a common task, the on-track safety briefing shall include discussion of the nature of the work to be performed to determine if adjacent-controlled-track on-track safety is necessary.

(3) A catenary maintenance tower car on or fouling an occupied track that is engaged in a common task with one or more roadway workers positioned on the ground within the gage of the occupied track for the sole purpose of applying or removing grounds, provided that such catenary maintenance tower car is not operating on the same occupied track and within the working limits of a roadway work group as described in paragraph (a) of this section.

(f) *Discretion of roadway worker in charge.* Nothing in this subpart prohibits the roadway worker in charge from establishing on-track safety on one or more adjacent tracks as he or she deems necessary consistent with both the purpose and requirements of this subpart.

Issued in Washington, DC, on November 16, 2009.

Karen J. Rae,

Deputy Administrator.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Doc. No. AMS–LS–09–0054]

Results of Soybean Request for Referendum

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice.

SUMMARY: The results of the Agricultural Marketing Service's (AMS) Request for Referendum indicate that too few soybean producers wanted a referendum on the Soybean Promotion and Research Order (Order) for one to be conducted. The Request for Referendum was conducted from May 4, 2009, through May 29, 2009, at the Department of Agriculture's (USDA) Farm Service Agency county offices. To trigger a referendum, 58,918 soybean producers needed to complete a Request for Referendum. The number of soybean producers requesting a referendum was 759.

FOR FURTHER INFORMATION CONTACT: Kenneth R. Payne, Chief, Marketing Programs Branch, Livestock and Seed Program, AMS, USDA, Room 2628–S, STOP 0251, 1400 Independence Avenue, SW., Washington, DC 20250–0251; Telephone 202/720–1115; Fax 202/720–1125; or e-mail to *Kenneth.Payne@ams.usda.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to the Soybean Promotion, Research, and Consumer Information Act (Act) (7 U.S.C. 6301 *et seq.*), every 5 years the Secretary of Agriculture (Secretary) gives soybean producers the opportunity to request a referendum on the Order. If the Secretary determines that at least 10 percent of U.S. producers engaged in growing soybeans (not in excess of one-fifth of which may be producers in any one State) support the conduct of a referendum, the Secretary must conduct a referendum within 1 year of that determination. If these requirements are not met, a referendum is not conducted.

A notice of opportunity to Request a Soybean Referendum was published in the **Federal Register** (74 FR 9382) on March 4, 2009. To be eligible to participate in the Request for Referendum, producers or the producer entity that they are authorized to represent must provide supporting documentation showing that they or the producer entity they represent paid an assessment sometime during the representative period between January 1, 2007, and December 31, 2008. Based on USDA data, there are 589,182 soybean producers in the United States. This information was published in the **Federal Register** (74 FR 9047) on March 2, 2009, to establish the number of producers eligible to request a referendum.

A total of 759 valid Requests for Referendum were completed by eligible soybean producers. This number does not meet the requisite number of 58,918. Therefore, based on the Request for Referendum results, a referendum will not be conducted. In accordance with the provisions of the Act, soybean producers will be provided another opportunity to request a referendum in 5 years.

The following is the State-by-State results of the Request for Referendum:

State	Valid ballots
Alabama	2
Alaska	0
Arizona	0
Arkansas	1
California	0
Colorado	0
Connecticut	0

BILLING CODE 3410–02–P

COMMISSION ON CIVIL RIGHTS

Sunshine Act Notice

AGENCY: United States Commission on Civil Rights.

ACTION: Notice of meeting.

DATE AND TIME: Friday, December 4, 2009; 9:30 a.m. EST.

PLACE: 624 9th St., NW., Room 540, Washington, DC 20425.

Meeting Agenda

This meeting is open to the public.

I. Approval of Agenda.

II. Program Planning.

- Update on Status of 2010 Enforcement Report.
- Update on Status of Title IX Project.
- Approval of Briefing Report on Covert Wiretapping in the War on Terror.
- Approval of MEPA Briefing Report.

III. Management & Operations.

- Update Regarding Special Assistant GS Level.

IV. Approval of September 24, October 8, October 15, October 30, and November 20 Meeting Minutes.
V. Staff Director's Report.
VI. Adjourn.

CONTACT PERSON FOR FURTHER INFORMATION: Lenore Ostrowsky, Acting Chief, Public Affairs Unit (202) 376–8591. TDD: (202) 376–8116.

Persons with a disability requiring special services, such as an interpreter for the hearing impaired, should contact Pamela Dunston at least seven days prior to the meeting at 202–376–8105. TDD: (202) 376–8116.

Dated: November 23, 2009.

David Blackwood,

General Counsel.

[FR Doc. E9–28423 Filed 11–23–09; 4:15 pm]

BILLING CODE 6335–01–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Northeast Region Permit Family of Forms.

OMB Control Number: 0648–0202.

Form Number(s): NA.

Type of Request: Regular submission.

Number of Respondents: 21,554.

Average Hours per Response: Permit applications or renewals, 30 minutes to 1 hour; vessel replacement/upgrade requests, 3 hours; requests for lobster or gillnet tags, exemption requests and notifications, 5 minutes; and proposed sector allocation proposal and plan of operations, 50 hours each.

Burden Hours: 26,832.

Needs and Uses: The participants in the marine fishing industry, including vessel owners, vessel operators, and fish dealers, who wish to participate in regulated Northeast Regional fisheries must apply for, and obtain, permits. Persons obtaining permits may also be subject to notification, tagging, and other requirements. This request affects collections associated with the Atlantic Herring, Atlantic Mackerel, Atlantic Sea Scallop, Black Sea Bass, Bluefish, Illex Squid, Loligo Squid, Butterfish, Monkfish, Northeast (NE) Multispecies, Ocean Quahog, Scup, Spiny Dogfish, Summer Flounder, Surf Clam, Tilefish, Deep-sea Red Crab, NE Skates, and American Lobster Fishery Management Plans, developed under the authority of the Magnuson-Stevens Fishery Conservation and Management Act.

Affected Public: Business or other for-profit organizations.

Frequency: Annually and on occasion.

Respondent's Obligation: Mandatory.

OMB Desk Officer: David Rostker, (202) 395–3897.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482–0266, Department of Commerce, Room 7845, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at *dHynek@doc.gov*).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to David Rostker, OMB Desk Officer, FAX number (202) 395–7285, or *David_Rostker@omb.eop.gov.*

Dated: November 19, 2009.

First Antidumping Duty Administrative Review of Sodium Hexametaphosphate from the People's Republic of China: Extension of Time Limit for the Preliminary Results

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: November 25, 2009.

FOR FURTHER INFORMATION CONTACT: Paul Walker, AD/CVD Operations, Office 9, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482–0413.

SUPPLEMENTARY INFORMATION:

Background

On April 27, 2009, the Department of Commerce (''Department'') published in the **Federal Register** a notice of initiation of an administrative review of sodium hexametaphosphate from the People's Republic of China (''PRC''), covering the period September 14, 2007 - February 28, 2009. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part*, 74 FR 19042 (April 27, 2009) (''*Initiation*''). From May 26, 2009 to October 28, 2009, the respondent in this review submitted responses to the Department's antidumping duty questionnaires. The preliminary results of this administrative review are currently due on December 1, 2009.

Extension of Time Limit for the Preliminary Results

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (''the Act''), requires the Department to issue the preliminary results of an administrative review within 245 days after the last day of the anniversary month of an order for which a review is requested. If it is not practicable to complete the review within the time period, section 751(a)(3)(A) of the Act allows the Department to extend this deadline to a maximum of 365 days.

The Department determines that completion of the preliminary results of this review within the statutory time period is not practicable, given the extraordinarily complicated nature of the proceeding. The Department requires more time to gather and analyze a significant amount of information pertaining to the respondent's corporate structure and ownership, sales practices, and manufacturing methods. The Department also requires additional time to analyze the questionnaire responses and conduct verification. Therefore, given the number and complexity of issues in this case, and in accordance with section 751(a)(3)(A) of the Act, we are extending the time period for issuing the preliminary results of review by 60 days until January 30, 2010. The final results continue to be due 120 days after the publication of the preliminary results.

This notice is published pursuant to sections 751(1)(3)(A) and 777(i)(1) of the Act and 19 CFR 351.213(h)(2).

Dated: November 19, 2009.

John M. Andersen,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Circular Welded Carbon Steel Pipes and Tubes from Thailand: Extension of Time Limit for Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce

EFFECTIVE DATE: November 25, 2009.

FOR FURTHER INFORMATION CONTACT: Jacqueline Arrowsmith, AD/CVD Operations, Office 6, Import Administration, International Trade Administration, Department of Commerce, Room 7866, 14th Street and Constitution Avenue, NW, Washington DC 20230; telephone: (202) 482–5255.

SUPPLEMENTARY INFORMATION:

Background

On April 27, 2009, the Department published the initiation of the administrative review of the antidumping duty order on circular welded carbon steel pipes and tubes (pipes and tubes) from Thailand for the period March 1, 2008 through February 28, 2009. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part* 74 FR FR 19042 (April 27,2009) (*Initiation Notice*). This review covers the respondent, Saha Thai Steel Pipe (Public) Co., Ltd. (Saha Thai), a producer/exporter of the subject merchandise to the United States.

Extension of Time Limit for the Preliminary Results

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), and section 351.213(h)(1) of the Department's regulations require the Department to issue the preliminary results of a review within 245 days after the last day of the anniversary month of the order or suspension agreement for which the administrative review was requested, and final results of the review within 120 days after the date on which the notice of the preliminary results is published in the **Federal Register**. However, if the Department determines that it is not practicable to complete the review within the aforementioned specified time limits, section 751(a)(3)(A) of the Act and section 351.213(h)(2) of the Department's regulations allow the Department to extend the 245-day period to 365 days and to extend the 120-day period to 180 days.

The Department requires additional time to evaluate Saha Thai's questionnaire responses in order to conduct a thorough analysis of all information on the record. Specifically, the Department needs more time to analyze respondent's cost information and to consider whether to use quarterly costs as Saha Thai has requested. The Department, therefore, finds that it is not practicable to complete the preliminary results of this review within the original time limit and is extending the deadline for completion of the preliminary results of this administrative review of the antidumping duty order on circular welded carbon steel pipes and tubes from Thailand by 120 days, from December 1, 2009 to March 31, 2010.

This notice is issued and published pursuant to sections 751(a)(3)(A) and 777(i)(1) of the Act.

Dated: November 18, 2009.

John M. Andersen,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 52–2009]

Foreign-Trade Zone 61—San Juan, Puerto Rico; Application for Expansion

An application has been submitted to the Foreign-Trade Zones (FTZ) Board (the Board) by the Puerto Rico Trade and Export Company, grantee of FTZ 61, requesting authority to expand its zone to include additional sites in the San Juan, Puerto Rico area, in and adjacent to the San Juan Customs and Border Protection port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on November 17, 2009.

FTZ 61 was approved on October 20, 1980 (Board Order No. 165, 45 FR 71408, 10/28/80) and expanded on September 28, 2007 (Board Order No. 1528, 72 FR 56723, 10/04/07). The zone project currently consists of the following sites: *Site 1* (244 acres) *Parcel A* (192 acres)—International Trade Center Grounds, Highway 165, km. 2.4; *Parcel B* (23 acres)—tract of undeveloped land, intersection of State Road 22 and State Road 28; *Parcel C* (12 acres)—tract of developed land, at Highway 28 and Cano Avenue; *Parcel D* (5 acres)—Amelia Distribution Center, intersection of Highway 165 and Calle Amelia; *Parcel E* (5 acres)—warehouse building, within the Centro Mercantil Internacional Complex, West Street, at the International Trade Center Grounds, Guaynabo; *Parcel F* (7 acres)—warehouse building (expires 11/1/11) located at Road #5, Km. 4.0, Barrio Palmas, Catano; *Site 2* (11 acres)—North Distribution Center, located at km. 1.1 on Highway 869, Catano; *Site 3* (15 acres)—Catano Equipment and Storage Complex, intersection of Highway 165 and Las Palmas Avenue, Catano; *Site 4* (2 acres)—Bayamon Logistics, Storage and Distribution Center, intersection of Calle C and Highway 28, Bayamon; *Site 5* (3 acres)—Corujo Industrial Park, located at Road 866, Km. 1.7, Hato Tejas; *Site 6* (4 acres)—warehouse facilities located on the north side of Highway 2, one mile east of Highway 165, Toa Baja; *Site 7* (2 acres)—Baldorioty de Castro Warehouse and Distribution Center, located at Km. 10.3, Marginal de la Avenida de Baldorioty de Castro at the intersection of Mercedez Drive, Carolina; *Site 8* (5 acres)—Manati chemical warehouse, intersection of Highways 686 and 670, Manati; *Site 9* (7 acres)—warehouse facilities located at km. 28.6 on Highway 1, Caguas; *Site 10* (14 acres)—storage complex at Km. 3.9, Marginal de J.F. Kennedy Avenue at the intersection of Blay Street, San Juan; *Site 11* (32 acres)—Mayaguez Regional Distribution Center, located at 201 Algarrobo Avenue, Mayaguez; *Site 12* (307 acres, 2 parcels)—Yabucoa Industrial Park, at the intersection of Highway 901 and Highway 53, Yabucoa; and, *Site 13* (3 acres)—warehouse facility, located at State Road 3, Km. 77.2, Barrio Abajo, Humacao.

The applicant is requesting authority to expand Sites 1, 5 and 10 to include additional acreage and to include 3 additional sites in the San Juan area:

—Expand Site 1 which will include temporary Site 1 Parcel F (7 acres) on a permanent basis (expires 11/01/11) and to restore to Site 1 Parcel B (19 acres) which had been removed for minor boundary modifications (new overall Site 1 total acreage-263 acres);

—Expand Site 5 to include an additional eight acres (new total-11 acres) (within the 350-acre Corujo Industrial Park);

—Expand Site 10 to include an additional acre (new total-15 acres);

—*Proposed Site 14* (6 acres)—Angora Industrial Park, Rd. #1, Km. 32.6, Bairoa Avenue, Caguas;

—*Proposed Site 15* (9 acres)—Royal Industrial Park, Rd. #869, Km. 2.8, Barrio Palmas, Catano; and,

—*Proposed Site 16* (1 acre)—Benitez commercial complex, Rd. #1, Km. 32.9, Bairoa Avenue, Caguas.

The sites will provide public warehousing and distribution services to area businesses. No specific manufacturing authority is being requested at this time. Such requests would be made to the Board on a case-by-case basis.

In accordance with the Board's regulations, Kathleen Boyce of the FTZ Staff is designated examiner to evaluate and analyze the facts and information presented in the application and case record and to report findings and recommendations to the Board.

Public comment on the application is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address listed below. The closing period for their receipt is January 25, 2010. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to February 8, 2010).

A copy of the application will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 2111, U.S. Department of Commerce, 1401 Constitution Avenue, NW., Washington, DC 20230–0002, and in the ''Reading Room'' section of the Board's Web site, which is accessible via *http://www.trade.gov/ftz.*

For further information, contact Kathleen Boyce at *Kathleen_Boyce@ita.doc.gov* or (202) 482–1346.

Dated: November 17, 2009.

Andrew McGilvray,

Executive Secretary.

DEPARTMENT OF COMMERCE

International Trade Administration

Initiation of Antidumping and Countervailing Duty Administrative Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (''the Department'') has received requests to conduct administrative reviews of various antidumping duty orders and findings with October anniversary dates. In accordance with the Department's regulations, we are initiating those administrative reviews.

EFFECTIVE DATE: November 25, 2009.

FOR FURTHER INFORMATION CONTACT: Sheila E. Forbes, Office of AD/CVD Operations, Customs Unit, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230, telephone: (202) 482–4697.

SUPPLEMENTARY INFORMATION:

Background

The Department has received timely requests, in accordance with 19 CFR 351.213(b), for administrative reviews of various antidumping duty orders and findings with October anniversary dates.

Notice of No Sales

Under 19 CFR 351.213(d)(3), the Department may rescind a review where there are no exports, sales, or entries of subject merchandise during the respective period of review (''POR'') listed below. If a producer or exporter named in this notice of initiation had no exports, sales, or entries during the POR, it should notify the Department within 30 days of publication of this notice in the **Federal Register**. The Department will consider rescinding the review only if the producer or exporter, as appropriate, submits a properly filed and timely statement certifying that it had no exports, sales, or entries of subject merchandise during the POR. All submissions must be made in accordance with 19 CFR 351.303 and are subject to verification in accordance with section 782(i) of the Tariff Act of 1930, as amended (''the Act''). Six copies of the submission should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, Room 1870, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230. Further, in accordance with 19 CFR 351.303(f)(1)(i), a copy of each request must be served on every party on the Department's service list.

Respondent Selection

In the event the Department limits the number of respondents for individual examination for administrative reviews, the Department intends to select respondents based on U.S. Customs and Border Protection (''CBP'') data for U.S. imports during the POR. We intend to release the CBP data under Administrative Protective Order (''APO'') to all parties having an APO within five days of publication of this initiation notice and to make our decision regarding respondent selection within 20 days of publication of this **Federal Register** notice. The Department invites comments regarding the CBP data and respondent selection within 10 calendar days of publication of this **Federal Register** notice.

Separate Rates

In proceedings involving non–market economy (''NME'') countries, the Department begins with a rebuttable presumption that all companies within the country are subject to government control and, thus, should be assigned a single antidumping duty deposit rate. It is the Department's policy to assign all exporters of merchandise subject to an administrative review in an NME country this single rate unless an exporter can demonstrate that it is sufficiently independent so as to be entitled to a separate rate.

To establish whether a firm is sufficiently independent from government control of its export activities to be entitled to a separate rate, the Department analyzes each entity exporting the subject merchandise under a test arising from the *Final Determination of Sales at Less Than Fair Value: Sparklers from the People's Republic of China*, 56 FR 20588 (May 6, 1991), as amplified by *Final Determination of Sales at Less Than Fair Value: Silicon Carbide from the People's Republic of China*, 59 FR 22585 (May 2,1994). In accordance with the separate–rates criteria, the Department assigns separate rates to companies in NME cases only if respondents can demonstrate the absence of both *de jure* and *de facto* government control over export activities.

All firms listed below that wish to qualify for separate–rate status in the administrative reviews involving NME countries must complete, as appropriate, either a separate–rate application or certification, as described below. For these administrative reviews, in order to demonstrate separate–rate eligibility, the Department requires entities for whom a review was requested, that were assigned a separate rate in the most recent segment of this proceeding in which they participated, to certify that they continue to meet the criteria for obtaining a separate rate. The Separate Rate Certification form will be available on the Department's website at http://www.trade.gov/ia on the date of publication of this **Federal Register** notice. In responding to the certification, please follow the ''Instructions for Filing the Certification'' in the Separate Rate Certification. Separate Rate Certifications are due to the Department no later than 30 calendar days after publication of this **Federal Register** notice. The deadline and requirement for submitting a Certification applies

equally to NME–owned firms, wholly foreign–owned firms, and foreign sellers who purchase and export subject merchandise to the United States.

For entities that have not previously been assigned a separate rate, to demonstrate eligibility for such, the Department requires a Separate Rate Status Application. The Separate Rate Status Application will be available on the Department's website at http://www.trade.gov/ia on the date of publication of this **Federal Register** notice. In responding to the Separate Rate Status Application, refer to the instructions contained in the application. Separate Rate Status Applications are due to the Department no later than 60 calendar days of publication of this **Federal Register** notice. The deadline and requirement for submitting a Separate Rate Status Application applies equally to NME–owned firms, wholly foreign–owned firms, and foreign sellers that purchase and export subject merchandise to the United States.

For exporters and producers who submit a separate–rate status application or certification and subsequently are selected as mandatory respondents, these exporters and producers will no longer be eligible for separate–rate status *unless* they respond to all parts of the questionnaire as mandatory respondents.

INITIATION OF REVIEWS:

In accordance with 19 CFR 351.221(c)(1)(i), we are initiating administrative reviews of the following antidumping duty orders and findings. We intend to issue the final results of these reviews not later than October 31, 2010.

[1] If the above-named company does not qualify for a separate rate, all other exporters of Certain Helical Spring Lock Washers from the People's Republic of China (''PRC'') who have not qualified for a separate rate are deemed to be covered by this review as part of the single PRC entity of which the named exporter is a part.

[2] If one of the above-named companies does not qualify for a separate rate, all other exporters of Steel Wire Garment Hangers from the PRC who have not qualified for a separate rate are deemed to be covered by this review as part of the single PRC entity of which the named exporter is a part.

During any administrative review covering all or part of a period falling between the first and second or third and fourth anniversary of the publication of an antidumping duty order under 19 CFR 351.211 or a determination under 19 CFR 351.218(f)(4) to continue an order or suspended investigation (after sunset review), the Secretary, if requested by a domestic interested party within 30 days of the date of publication of the notice of initiation of the review, will determine, consistent with *FAG Italia v. United States*, 291 F.3d 806 (Fed Cir. 2002), as appropriate, whether antidumping duties have been absorbed by an exporter or producer subject to the review if the subject merchandise is sold in the United States through an importer that is affiliated with such exporter or producer. The request must include the name(s) of the exporter or producer for which the inquiry is requested.

For the first administrative review of any order, there will be no assessment of antidumping or countervailing duties on entries of subject merchandise entered, or withdrawn from warehouse, for consumption during the relevant provisional–measures ''gap'' period, of the order, if such a gap period is applicable for the POR.

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. On January 22, 2008, the Department published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedure*s, 73 FR 3634 (January 22, 2008). Those procedures apply to administrative reviews included in this notice of initiation. Parties wishing to participate in any of these administrative reviews should ensure that they meet the requirements of these procedures (*e.g.*, the filing of separate letters of appearance as discussed in 19 CFR 351.103(d)).

These initiations and this notice are in accordance with section 751(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1675(a)), and 19 CFR 351.221(c)(1)(i).

Dated: November 19, 2009.

John M. Andersen,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

National Oceanic and Atmospheric Administration

Hydrographic Services Review Panel Meeting

AGENCY: National Ocean Service, National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of public meeting (via conference call) on December 16, 2009.

SUMMARY: The Hydrographic Services Review Panel (HSRP), a Federal Advisory Committee, will be holding a public meeting via teleconference on December 16, 2009. The purpose of the meeting is to discuss and vote on proposed revisions to an updated version of the Hydrographic Services Review Panel Federal Advisory Committee Special Report 2007, ''HSRP Most Wanted Hydrographic Services Improvements.''

Date and Time: The conference call will commence at 2 p.m. Eastern Standard Time on Wednesday, December 16, 2009, and will end by 4 p.m. Eastern Standard Time, if not earlier. Agenda topics and times are subject to change. For the most current meeting agenda, refer to the HSRP Web site: *http://www.nauticaicharts.noaa.gov/ocs/hsrp/hsrp.htm.*

Public Participation: The meeting is open to the public and will be held via conference call with documents reviewed by meeting participants via WebEx. To register for the meeting and participate in the conference call and on-line document review, contact Rebecca Arenson at *Hydroservices.panel@noaa.gov* or 301–713–2780 x158. Register for the meeting by Friday, December 11, 2009. Please note that there are a limited number of access lines for WebEx participation, with participation available on a first-come, first served basis. For more information on meeting topics, refer to the HSRP Web site at: *http://www.nauticaicharts.noaa.gov/ocs/hsrp/hsrp.htm.* A public comment period will be scheduled during the meeting. The public comment period will be part of the final agenda that will be published before the meeting date on the HSRP Web site (*http://www.nauticaicharts.noaa.gov/ocs/hsrp/hsrp.htm*). Written public comments should be submitted to Rebecca Arenson no later than December 11, 2009. Those individuals planning to provide oral comments are requested to inform Rebecca Arenson no later than December 11, 2009. The time period for oral comments may be limited. Please contact Rebecca Arenson via e-mail: *Hydroservices.panel@noaa.gov* or phone: 301–713–2780 x158.

FOR FURTHER INFORMATION CONTACT: Rebecca Arenson, NOAA, Office of Coast Survey, National Ocean Service (NOS), NOAA (N/CS), 1315 East West Highway, Silver Spring, Maryland 20910; Telephone: 301–713–2780 x158, e-mail: *Hydroservices.panel@noaa.gov* or visit the NOAA HSRP Web site at *http://www.nauticaicharts.noaa.gov/ocs/hsrp/hsrp.htm.*

SUPPLEMENTARY INFORMATION:

The Hydrographic Services Review Panel (HSRP) was established by the Secretary of Commerce to advise the Under Secretary of Commerce for Oceans and Atmosphere on matters related to the responsibilities and authorities set forth in section 303 of the Hydrographic Services Improvement Act of 1998, its amendments, and such other appropriate matters that the Under Secretary refers to the Panel for review and advice.

The HSRP conference call is open to the public; participation is available on a first-come, first-served basis, and may be limited.

Items on the meeting agenda include: (1) Proposed revisions to an updated version of the Hydrographic Services Review Panel Federal Advisory Committee Special Report 2007, ''HSRP Most Wanted Hydrographic Services Improvements,'' and (2) other topics. Agenda topics and times are subject to change. For the most current meeting agenda, refer to the HSRP Web site: *http://www.nauticaicharts.noaa.gov/ocs/hsrp/hsrp.htm.*

Dated: November 9, 2009.

John E. Lowell, Jr.,

Director, Office of Coast Survey, National Ocean Service, National Oceanic and Atmospheric Administration.

BILLING CODE 3510–JE–M

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

Regulations and Procedures Technical Advisory Committee; Notice of Partially Closed Meeting

The Regulations and Procedures Technical Advisory Committee (RPTAC) will meet December 9, 2009, 9 a.m., Room 3884, in the Herbert C. Hoover Building, 14th Street between Constitution and Pennsylvania Avenues, NW., Washington, DC. The Committee advises the Office of the

Assistant Secretary for Export Administration on implementation of the Export Administration Regulations (EAR) and provides for continuing review to update the EAR as needed.

Agenda

Public Session

1. Opening remarks by the Chairman.

2. Presentation of papers or comments by the Public.

3. Opening remarks by Bureau of Industry and Security.

4. Export Enforcement update.

5. Regulations update.

6. Working group reports.

7. Automated Export System (AES) update.

Closed Session

8. Discussion of matters determined to be exempt from the provisions relating to public meetings found in 5 U.S.C. app. 2 section 10(a)(1) and 10(a)(3).

The open session will be accessible via teleconference to 20 participants on a first come, first serve basis. To join the conference, submit inquiries to Ms. Yvette Springer at *Yspringer@bis.doc.gov* no later than December 2, 2009.

A limited number of seats will be available for the public session. Reservations are not accepted. To the extent that time permits, members of the public may present oral statements to the Committee. The public may submit written statements at any time before or after the meeting. However, to facilitate the distribution of public presentation materials to the Committee members, the Committee suggests that presenters forward the public presentation materials prior to the meeting to Ms. Springer via e-mail.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on March 23, 2009, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. app. 2 section (10)(d)), that the portion of the meeting dealing with matters the disclosure of which would be likely to frustrate significantly implementation of an agency action as described in 5 U.S.C. 552b(c)(9)(B) shall be exempt from the provisions relating to public meetings found in 5 U.S.C. app. 2 section 10(a)1 and 10(a)(3). The remaining portions of the meeting will be open to the public.

For more information, call Yvette Springer at (202) 482–2813.

Dated: November 18, 2009.

Yvette Springer,

Committee Liaison Officer.

National Oceanic and Atmospheric Administration

RIN 0648–XT11

Western Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: This notice advises the public that the Western Pacific Fishery Management Council (Council) will convene a meeting of its Advisory Panel.

DATES: The Advisory Panel meeting will be held December 15–17, 2009. For the specific time and agenda for the meeting see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The meeting of the Advisory Panel will be held at the Council office at 1164 Bishop Street, Suite 1400, Honolulu, HI 96813.

FOR FURTHER INFORMATION CONTACT: Kitty M. Simonds, Executive Director; telephone: (808) 522–8220.

SUPPLEMENTARY INFORMATION: The date, time and agenda for each meeting are as follows:

Tuesday, December 15, 2009, 9 a.m. - 5 p.m.

1. Welcome and Introductions
2. Review and approval of agenda
3. Reports on fishery and community issues, American Samoa, Guam, CNMI and Hawaii
4. Status of Council programs
5. New directions
   a. Council process
   b. Administrative initiatives
   c. Leveraging Council family resources and networks
   d. Other initiatives
6. Guest presentation on effects of El Nino in the Western Pacific Region
7. Breakout session on how the Advisors can help implement Council programs
   a. Improving communication
   b. Public engagement strategies
8. Review and discussion on breakout outcomes

Wednesday, December 16, 2009 9 a.m. - 5 p.m.

9. Hawaii Institute of Marine Biology site visit and guest presentations on (1) Using genetics and life history to track spread of introduced taape, roi and toau in Hawaii; (2) Recent advances in population resolution with examples from Hawaii; and (3) Complex population structure and management of migratory marine animals.
10. Council issues and actions
   a. Catch shares
   b. Annual Catch Limits
   c. Collecting fishing information
   i. Report on data workshop
   ii. Non-commercial federal permit and reporting
   iii. Voluntary data collection
   d. Marine spatial planning
   i. Offshore aquaculture options
   ii. Hawaii bottomfish essential fish habitat and habitat of particular concern options
   iii. Monuments
   iv. Marine protected area policy
   v. Buoys and Moorings
   vi. Other
   e. Community programs
   i. Cooperative research
   ii. Marine Education and Training
   iii. Community networking
   iv. Fish aggregation devices
   v. Marine Conservation Plan community development project
   vi. Traditional Ecological Knowledge Summit
   f. Federal/agency presentations
   i. Status of Western Pacific Region sea turtles
   ii. Coral reef assessments
11. Breakout session to discuss fishery and program issues
   a. Develop recommendations on action items as presented
   b. Develop strategy and plan to further discuss issues with the public
12. Reconvene plenary
   a. Review breakout outcomes
   b. Summarize recommendations
   c. Consider region-wide recommendations

Thursday, December 17, 2009, 9 a.m. - noon

13. Guest presentation - TBD
14. 2010 Calendar of meeting and events
   a. Council meetings, workshops and events
   b. Other meetings and events
15. Review and finalize outcomes
   a. Recap recommendations and plans by island area
   b. Consider additional actions
16. Other issues

The order in which agenda items are addressed may change. Public comment

periods will be provided throughout each agenda. The Advisory Panel will meet as late as necessary to complete scheduled business.

Although non-emergency issues not contained in this agenda may come before this group for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), those issues may not be the subject of formal action during these meetings. Actions will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kitty M. Simonds, (808) 522–8220 (voice) or (808) 522–8226 (fax), at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 20, 2009.

Tracey L. Thompson,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–S

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Proposed Information Collection; Comment Request

AGENCY: Corporation for National and Community Service.

ACTION: Notice.

SUMMARY: The Corporation for National and Community Service (hereinafter the ''Corporation''), as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) (44 U.S.C. 3506(c)(2)(A)). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirement on respondents can be properly assessed.

Currently, the Corporation is soliciting comments on the Service-Learning Evaluation Study Feasibility Questionnaire. In this process, State Education Agencies will be asked about the type of service-learning within their state and the feasibility of the Service-Learning Evaluation Study. This information will be used to help determine the recruitment strategy for the Service-Learning Evaluation Study.

Copies of the information collection requests can be obtained by contacting the office listed in the **ADDRESSES** section of this notice.

DATES: Written comments must be submitted to the individual and office listed in the **ADDRESSES** section by January 25, 2010.

ADDRESSES: You may submit comments, identified by the title of the information collection activity, by any of the following methods:

(1) *By mail sent to:* Corporation for National and Community Service, Office of Research and Policy Development; Attention Carla Fletcher, Policy Analyst, Room 10913B; 1201 New York Avenue, NW., Washington, DC 20525.

(2) By hand delivery or by courier to the Corporation's mailroom at Room 8100 at the mail address given in paragraph (1) above, between 9 a.m. and 4 p.m. Monday through Friday, except Federal holidays.

(3) *By fax to:* (202) 606–3464, Attention Carla Fletcher, Policy Analyst.

(4) *Electronically through the Corporation's e-mail address system: cfletcher@cns.gov.*

FOR FURTHER INFORMATION CONTACT: Carla Fletcher, (202) 606–6720, or by e-mail at *cfletcher@cns.gov.*

SUPPLEMENTARY INFORMATION: The Corporation is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Corporation, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are expected to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (*e.g.,* permitting electronic submissions of responses).

Background

The Corporation is developing a Service-Learning Evaluation in response to the Edward M. Kennedy Serve America Act (H.R. 1388) legislative mandate to assess the impact of the activities carried out under the Learn and Serve America Program. In developing the recruitment plan, the Corporation would like to work with the State Education Agencies to develop an effective strategy and begin to identify states that are able to participate in the study.

Current Action

The Corporation seeks to collect new information on the feasibility of a Service-Learning Evaluation Study in order to identify an effective recruitment strategy and potential states that could participate in the Service-Learning Evaluation.

Type of Review: New.

Agency: Corporation for National and Community Service.

Title: Service-Learning Evaluation Study Feasibility Questionnaire.

OMB Number: None.

Agency Number: None.

Affected Public: State Education Agencies.

Total Respondents: 59.

Frequency: One time.

Average Time per Response: Averages 60 minutes.

Estimated Total Burden Hours: 59 hours.

Total Burden Cost (capital/startup): None.

Total Burden Cost (operating/maintenance): None.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: November 19, 2009.

Robert Grimm,

Director, Office of Research and Policy Development.

[FR Doc. E9–28292 Filed 11–24–09; 8:45 am]

BILLING CODE 6050–$$–P

DELAWARE RIVER BASIN COMMISSION

Notice of Commission Meeting and Public Hearing

Notice is hereby given that the Delaware River Basin Commission will

hold an informal conference followed by a public hearing on Wednesday, December 9, 2009. The hearing will be part of the Commission's regular business meeting. The conference session and business meeting both are open to the public and will be held at the Commission's office building, located at 25 State Police Drive, West Trenton, New Jersey.

The conference among the commissioners and staff will begin at 10:30 a.m. and will consist of a presentation by a spokesperson for New York City regarding temporary closure of the Delaware Aqueduct; a report by the chair of the Toxics Advisory Committee; a report by the chair of the Water Quality Advisory Committee; and a presentation on the Pocono Creek Watershed Sustainability Study.

The subjects of the public hearing to be held during the 1 p.m. business meeting include the dockets listed below:

1. *Melody Lakes, D–1980–079–3.* An application for renewal of the applicant's 0.072 mgd WWTP discharge. The project WWTP will continue to discharge to Tohickon Creek, a tributary of the Delaware River at River Mile 157.00—26.16 (Delaware River—Tohickon Creek) in Richland Township, Bucks County, Pennsylvania. The project WWTP is located in the drainage area of the section of the non-tidal Delaware River known as the Lower Delaware, which is classified as Special Protection Waters.

2. *Schering Corporation, D–1986–004–2.* An application to modify Schering Corporation's industrial waste treatment plant (IWTP) docket to approve an existing discharge of 0.04 mgd of treated industrial wastewater from Outfall No. 001A (approved by Docket D–1986–4) and a 0.02 mgd discharge of cooling tower blowdown and HVAC condensate from Outfall No. DSN002A. Outfalls Nos. 001A and DSN002A will continue to discharge to an Unnamed Tributary of the Paulins Kill at River Mile 207.0—33.8—0.3 (Delaware River—Paulins Kill—unnamed tributary), in Lafayette Township, Sussex County, New Jersey. The project IWTP is located in the drainage area of the section of the non-tidal Delaware River known as the Lower Delaware, which is classified as Special Protection Waters.

3. *Lower Perkiomen Valley Regional Sewer Authority, D–2001–042 CP–3.* An application for approval to renew a discharge of up to 14.25 mgd from the existing Oaks Wastewater Treatment Plant (WWTP). The Oaks WWTP discharges to the Schuylkill River at River Mile 92.47—32.35 (Delaware River—Schuylkill River), in Upper Providence Township, Montgomery County, Pennsylvania.

4. *Delaware County Solid Waste Authority, D–89–18 CP–4.* An application for approval of the modification and expansion from 0.08 mgd to 0.115 mgd of the Delaware County Solid Waste Authority's (DCSWA) Rolling Hills leachate treatment plant (LTP). Modifications include the addition of a clarifier, new ozone system, additional blowers, new pumps, and new boilers to ensure the treatment process complies with permit limitations such as color, ammonia, and TDS. The LTP treats leachate from the Rolling Hills landfill and discharges to the Manatawny Creek at River Mile 92.47—54.15—12.2 (Delaware River—Schuylkill River—Manatawny Creek) through a diffused outfall. The project LTP is located in Earl Township, Berks County, Pennsylvania.

5. *Gloucester County Utilities Authority D–1990–074 CP–3.* An application for the continued approval of a 27 mgd discharge of treated wastewater from the Gloucester County Utilities Authority (GCUA) wastewater treatment plant (WWTP). On May 6, 2009, the DRBC approved Docket No. D–2008–27–1 for the West Deptford Energy Station (WDES), allowing WDES to withdraw up to 7.5 mgd of GCUA's effluent for cooling water purposes and to discharge approximately 2.0 mgd of contact cooling water (CCW) back to GCUA's effluent stream. As a result of the WDES approval, a TDS and thermal mixing zone are required for existing GCUA Outfall No. DSN004A at the Delaware River. This application includes a thermal mixing zone of 164 feet and a TDS mixing zone of 105 feet for Outfall No. DSN004A. The project WWTP is located in Water Quality Zone 4 at River Mile 89.7 (Delaware River), in West Deptford Township, Gloucester County, New Jersey.

6. *Aqua Pennsylvania—Chalfont System, D–1993–083 CP–2.* An application for approval of a groundwater withdrawal project for which the Commission's approval has expired, to continue a withdrawal of 39 mg/30 days to supply the applicant's public water supply system from five existing wells. The project is located in the Stockton Formation in the Neshaminy, Pine Run and Cooks Run watersheds in Chalfont and New Britain boroughs, Montgomery County, Pennsylvania within the Southeastern Pennsylvania Ground Water Protected Area (GWPA). The project wells are located in three sub-basins of the Neshaminy Creek Basin, as defined by the GWPA Regulations: North Branch Neshaminy Creek, Pine Run Basin and Doylestown Sub-basin Neshaminy Creek.

7. *The Upper Hanover Authority and The Red Hill Water Authority, D–2002–10 CP–3.* An application for a groundwater withdrawal project to increase the withdrawal from 43.113 mg/30 days to 56.88 mg/30 days from six existing wells and one existing spring water withdrawal (Kemmerer Spring) to supply the applicant's public water supply. The 13.767 mg/30 days increase would be obtained from existing Wells Nos. TUHA–1 and TUHA–2. The project is located in the Brunswick, Leithsville and Hardyston Formations. The increased allocation is requested in order to meet 10-year projected increases in service area demand. The project is located in the Perkiomen Creek and Macoby Creek watersheds in Upper Hanover, Hereford and Upper Milford Townships, Montgomery, Berks and Lehigh Counties, Pennsylvania and is located in the Southeastern Pennsylvania Ground Water Protected Area (GWPA). The project wells are in the Upper Reach Perkiomen Creek and Perkiomen-Macoby Run sub-basins as defined by the GWPA Regulations.

8. *Yukiguni Maitake Manufacturing Corporation of America, D–2003–026–1.* An application for approval of a groundwater withdrawal project to supply up to 13.14 mg/30 days of water to the applicant's mushroom facility from new Well No. 001. The project is located in the Lower Devonian and Sulurian Formations in the Basher Kill Watershed in Mamakating Township, Sullivan County, New York. The site is located within the drainage area to the section of the non-tidal Delaware River known as the Upper Delaware, which is designated as Special Protection Waters.

9. *Inversand Company, D–2007–015–1.* An application for approval of a groundwater withdrawal project to supply up to 15.5 mg/30 days of water to the applicant's glauconite mining operations from new Wells Nos. 1 and 2 and a mining pit. The project is located in the Mt. Laurel-Wenonah and Potomac-Raritan-Magothy formations in the Mantua Creek Watershed in Mantua Township, Gloucester County, New Jersey.

10. *Yukiguni Maitake Manufacturing Corporation of America, D–2008–035–1.* An application for approval to construct wastewater treatment facilities for the Yukiguni Maitake Mushroom Growing Facility and to construct three land discharges from a pilot-scale growing facility (1-story, 44,100 square foot building) on the site. Two of the proposed discharges are to a three-bay infiltration basin system, whereas the

third is to an on-site septic tank discharging to a leach field. The three-bay infiltration basin system will accept up to 55,000 gpd, 51,000 gpd of which will be from a geothermal system (Outfall No. 005) and the remaining 4,000 gpd from process water (Outfall No. 002). The on-site septic tank and leach field are proposed to receive up to 1,000 gpd of sanitary wastewater (Outfall No. 001). The project is located in the Basher Kill Watershed in Mamakating Township, Sullivan County, New York, within the drainage area to the section of the non-tidal Delaware River known as the Upper Delaware, which is designated as Special Protection Waters.

11. *UMH Properties Inc., D–2009–021–1.* An application for approval of the Highland Estates Mobile Home Park WWTP. The existing WWTP discharges treated sewage effluent at an average annual daily flow rate of 0.08325 mgd to an unnamed tributary of Mill Creek, which is a tributary of the Schuylkill River. The facility is located in Greenwich Township, Berks County, Pennsylvania.

12. *White Manor Country Club, D–2009–022–1.* An application for approval of a new ground and surface water withdrawal project to supply up to 7.02 mg/30 days of water to the applicant's irrigation process from existing Well No. 1 and existing Intakes 1 and 2. The project well and intakes are located in the Felsic Gneiss, granulite facies in the Crum Creek Watershed in Willistown Township, Chester County, Pennsylvania and is located in the Southeastern Pennsylvania Ground Water Protected Area.

13. *Camp Lohikan, D–2009–024–1.* An application for approval of the proposed Camp Lohikan Spray Irrigation Sewage Disposal System. The proposed WWTP is comprised of an aerated lagoon system designed to provide secondary treatment and disinfection, followed by land application via spray irrigation. The hydraulic design capacity of the facility is 0.03 million gallons per day (mgd). The proposed project is located in the Equinunk Creek Watershed in Buckingham Township, Wayne County, Pennsylvania, within the drainage area to the section of the non-tidal Delaware River known as the Upper Delaware, which is classified as Special Protection Waters.

14. *Lehigh Carbon Community College, D–2009–025 CP–1.* An application for approval to install two new final clarifiers and aerobic digesters at the existing 36,225 gallons per day (gpd) WWTP of the Lehigh Carbon Community College. No change in hydraulic design is proposed. The project is located in North Whitehall Township, Lehigh County, Pennsylvania, within the drainage area of the section of the non-tidal Delaware River known as the Lower Delaware, which is classified as Special Protection Waters. The WWTP discharges to an unnamed tributary of Jordan Creek, a High Quality-Cold Water Fishery, Migrating Fishery (HQ–CWF, MF) at River Mile 183.66—16.25—13.79—1.26 (Delaware River—Lehigh River—Jordan Creek—Unnamed Tributary).

In addition to the standard business meeting items, including adoption of the Minutes of the Commission's previous (October 22, 2009) business meeting; announcements of upcoming advisory committee meetings and events of interest; a report on hydrologic conditions; a report by the Executive Director; and a report by the Commission's General Counsel, the business meeting also will include public hearings and consideration by the Commission of resolutions: (a) Extending Docket No. D–69–210 CP Final (Revision 12) for the Limerick Generating Station Water Supply Modification Demonstration Project and Wadesville Mine Pool Withdrawal and Streamflow Augmentation Demonstration Project for a period of one year or until the Commission approves a revised docket, whichever occurs first; (b) authorizing the Executive Director to modify Docket D–71–86–2 for DuPont's Edge Moor Titanium Dioxide Facility Industrial Wastewater Discharge to provide additional time and to establish an approved schedule for installation of a diffuser by January 31, 2010; (c) approving the Commission's FY 2010–2015 Water Resources Program; (d) approving guidance consisting of a DRBC ''penalty matrix'' to assist regulated entities and DRBC staff in reaching negotiated settlements for suspected violations of DRBC regulations; (e) authorizing and directing the Executive Director to enter into a revised administrative agreement with the State of New Jersey for the submission and review of projects under Section 3.8 of the Compact; and (f) approving the DRBC fiscal year 2011 operating and capital budgets. An opportunity for public dialogue will be provided at the end of the meeting.

Draft dockets scheduled for public hearing on December 9, 2009 can be accessed through the Notice of Commission Meeting and Public Hearing on the Commission's Web site, drbc.net, ten days prior to the meeting date. Additional public records relating to the dockets may be examined at the Commission's offices. Please contact William Muszynski at 609–883–9500, extension 221, with any docket-related questions.

Note that conference items are subject to change and items scheduled for hearing are occasionally postponed to allow more time for the Commission to consider them. Please check the Commission's website, drbc.net, closer to the meeting for changes that may be made after the deadline for filing this notice.

Individuals in need of an accommodation as provided for in the Americans with Disabilities Act who wish to attend the informational meeting, conference session or hearings should contact the commission secretary directly at 609–883–9500 ext. 203 or through the Telecommunications Relay Services (TRS) at 711, to discuss how the Commission can accommodate your needs.

Dated: November 17, 2009.

Pamela M. Bush,

Commission Secretary.

DEPARTMENT OF EDUCATION

Submission for OMB Review; Comment Request

AGENCY: Department of Education.

SUMMARY: The Acting Director, Information Collection Clearance Division, Regulatory Information Management Services, Office of Management invites comments on the submission for OMB review as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before December 28, 2009.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, *Attention:* Education Desk Officer, Office of Management and Budget, 725 17th Street, NW., Room 10222, New Executive Office Building, Washington, DC 20503, be faxed to (202) 395–5806 or send e-mail to *oira_submission@omb.eop.gov.*

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public

participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Acting Director, Regulatory Information Management Services, Office of Management, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g. new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment.

Dated: November 20, 2009.

James Hyler,

Acting Director, Information Collection Clearance Division, Regulatory Information Management Services, Office of Management.

Office of Special Education and Rehabilitative Services

Type of Review: Revision.

Title: Report of Dispute Resolution Under Part C of the Individuals with Disabilities Education Act.

Frequency: Annually.

Affected Public: State, local, or tribal gov't.

Reporting and Recordkeeping Hour Burden:

Responses: 56.

Burden Hours: 3,360.

Abstract: This package provides instructions and forms necessary for States to report the number of written, signed complaints; mediation requests; and hearing requests and the status of these actions with regards to children served under Part C of IDEA initiated during the reporting year. The form satisfies reporting requirements and is used by OSEP to monitor SEAs and for Congressional reporting.

Requests for copies of the information collection submission for OMB review may be accessed from *http://edicsweb.ed.gov,* by selecting the ''Browse Pending Collections'' link and by clicking on link number 4145. When you access the information collection, click on ''Download Attachments '' to view. Written requests for information should be addressed to U.S. Department of Education, 400 Maryland Avenue, SW., LBJ, Washington, DC 20202–4537. Requests may also be electronically mailed to the Internet address *ICDocketMgr@ed.gov* or faxed to 202–401–0920. Please specify the complete title of the information collection when making your request.

Comments regarding burden and/or the collection activity requirements should be electronically mailed to *ICDocketMgr@ed.gov*. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

SUMMARY: The Acting Director, Information Collection Clearance Division, Regulatory Information Management Services, Office of Management invites comments on the submission for OMB review as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before December 28, 2009.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Education Desk Officer, Office of Management and Budget, 725 17th Street, NW., Room 10222, New Executive Office Building, Washington, DC 20503, be faxed to (202) 395–5806 or send email to *oira_submission@omb.eop.gov.*

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Acting Director, Regulatory Information Management Services, Office of Management, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g. new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment.

Dated: November 20, 2009.

James Hyler,

Acting Director, Information Collection Clearance Division, Regulatory Information Management Services, Office of Management.

Office of Special Education and Rehabilitative Services

Type of Review: Revision.

Title: Report of Children and Toddlers Receiving Early Intervention Services in accordance with Part C, Report of Program Settings Where Early Intervention Services are Provided to Children with Disabilities and Their Families in Accordance with Part C; Report on Infants and Toddlers Exiting Part C.

Frequency: Annually.

Affected Public: State, Local, or Tribal Gov't.

Reporting and Recordkeeping Hour Burden:

Responses: 56.

Burden Hours: 5,987.

Abstract: This package provides instructions and forms necessary for States to report the number of children receiving early intervention services under Part C of IDEA, the settings in which these children are provided services, and the reasons by which these children exit Part C of IDEA. The form satisfies reporting requirements and is used by OSEP to monitor State agencies and for Congressional reporting.

Requests for copies of the information collection submission for OMB review may be accessed from *http://edicsweb.ed.gov,* by selecting the ''Browse Pending Collections'' link and by clicking on link number 4144. When you access the information collection, click on ''Download Attachments '' to view. Written requests for information should be addressed to U.S. Department of Education, 400 Maryland Avenue, SW., LBJ, Washington, DC 20202–4537. Requests may also be electronically mailed to the Internet address *ICDocketMgr@ed.gov* or faxed to 202–401–0920. Please specify the complete title of the information collection when making your request.

Comments regarding burden and/or the collection activity requirements should be electronically mailed to *ICDocketMgr@ed.gov*. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal

Information Relay Service (FIRS) at 1–800–877–8339.

Dated: November 20, 2009.

James Hyler,

Acting Director, Information Collection Clearance Division, Regulatory Information Management Services, Office of Management.

Office of Special Education and Rehabilitative Services

Type of Review: Extension.
Title: State Plan for Independent Living (SPIL).
Frequency: Every three years.
Affected Public: Federal Government, not-for-profit institutions; private sector; State, Local, or Tribal Gov't.
Reporting and Recordkeeping Hour Burden:
Responses: 56.
Burden Hours: 3,360.
Abstract: States wishing to receive funding under the State Independent Living Services (SILS) and Centers for Independent Living (CIL) programs must submit an approvable three-year State Plan for Independent Living (SPIL) to the Rehabilitation Services Administration (RSA). The purpose of these programs is to promote the independent living philosophy—based on consumer control, peer support, self-help, self-determination, equal access and individual and systems advocacy—to maximize the leadership, empowerment, independence and productivity of individuals with significant disabilities and to promote and maximize the integration and full inclusion of individuals with significant disabilities into the mainstream of American society. The SPIL encompasses the activities planned by the State to achieve its specified independent living objectives and reflects the State's commitment to comply with all applicable statutory and regulatory requirements during the three years covered by the plan.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

November 19, 2009.

Take notice that the Commission received the following exempt wholesale generator filings:

Docket Numbers: EG10–9–000.
Applicants: Nacogdoches Power, LLC.
Description: Self Certification Notice of Nacogdoches Power, LLC.
Filed Date: 11/18/2009.
Accession Number: 20091118–5043.
Comment Date: 5 p.m. Eastern Time on Wednesday, December 9, 2009.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER98–2782–016.
Applicants: Power City Partners LP.
Description: Power City Partners, LP submits notice of change in status in compliance with the requirements of Section 35.42 of the regulations of the FERC *etc.*
Filed Date: 11/17/2009.
Accession Number: 20091118–0104.
Comment Date: 5 p.m. Eastern Time on Tuesday, December 8, 2009.

Docket Numbers: ER05–757–005.
Applicants: Victoria International LTD.
Description: Amendment to Application of Victoria International LTD.
Filed Date: 11/18/2009.
Accession Number: 20091118–5094.
Comment Date: 5 p.m. Eastern Time on Wednesday, December 9, 2009.

Docket Numbers: ER09–1556–000; ER09–1556–001; ER09–1557–000; ER09–1557–001; ER09–1619–000.
Applicants: Midwest Independent Transmission System Operator, Inc.
Description: The Midwest Independent Transmission System Operator, Inc submits response to the Commission's letter dated 10/20/09 seeking additional information re the filing dated 8/7/09 *etc.*
Filed Date: 11/04/2009.
Accession Number: 20091106–0062.
Comment Date: 5 p.m. Eastern Time on Wednesday, November 25, 2009.

Docket Numbers: ER10–34–001.

Applicants: Energy Consulting Services.

Description: Energy Consulting Services, LLC submits the Petition for Acceptance of Initial Tariff, Waivers and Blanket Authority, FERC Electric Tariff, Original Volume 1.

Filed Date: 11/09/2009.

Accession Number: 20091112–0094.

Comment Date: 5 p.m. Eastern Time on Monday, November 30, 2009.

Docket Numbers: ER10–71–001.

Applicants: Elmwood Park Power LLC.

Description: Elmwood Park Power LLC submits sub. tariff sheets to reflect the Elmwood is a Category 1 seller in all regions other than the Northwest region *etc.*

Filed Date: 11/17/2009.

Accession Number: 20091118–0105.

Comment Date: 5 p.m. Eastern Time on Tuesday, December 8, 2009.

Docket Numbers: ER10–266–001.

Applicants: Trans Bay Cable LLC.

Description: Trans Bay Cable LLC submits Substitute Original Sheet 20 reflecting the deletion in Section 5.1 as well as a blackline of Sheet 20 to show the change.

Filed Date: 11/16/2009.

Accession Number: 20091118–0107.

Comment Date: 5 p.m. Eastern Time on Monday, December 7, 2009.

Docket Numbers: ER10–281–000.

Applicants: Southwest Power Pool, Inc., E.ON U.S. LLC.

Description: Southwest Power Pool, Inc *et al.* submits joint of notice of termination of the ITO Agreement.

Filed Date: 10/26/2009.

Accession Number: 20091117–0080.

Comment Date: 5 p.m. Eastern Time on Friday, November 27, 2009.

Docket Numbers: ER10–285–000.

Applicants: Carolina Power & Light Company.

Description: Carolina Power & Light Company submits revised Power Supply Agreement, Sixth Revised Rate Schedule FERC No 134 with North Carolina Electric Membership Corp.

Filed Date: 11/17/2009.

Accession Number: 20091118–0108.

Comment Date: 5 p.m. Eastern Time on Tuesday, December 8, 2009.

Take notice that the Commission received the following electric securities filings:

Docket Numbers: ES10–9–000.

Applicants: Southern Power Company.

Description: Application for financing authority of Southern Power Company.

Filed Date: 11/18/2009.

Accession Number: 20091118–5093.

Comment Date: 5 p.m. Eastern Time on Wednesday, December 9, 2009.

Any person desiring to intervene or to protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. Eastern time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St., NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed dockets(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov.* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–8977–7; Docket ID No. EPA–HQ–ORD–2009–0816]

A Framework for Categorizing the Relative Vulnerability of Threatened and Endangered Species to Climate Change

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public comment period.

SUMMARY: EPA is announcing a 30-day public comment period for the draft document titled, ''A Framework for Categorizing the Relative Vulnerability of Threatened and Endangered Species to Climate Change'' (EPA/600/R–09/011). The document was prepared by the National Center for Environmental Assessment within EPA's Office of Research and Development. This draft document describes an evaluative framework that may be used to categorize the relative vulnerability of species to climate change. To illustrate the use of this framework, it was applied to five U.S. threatened and endangered species: The golden-cheeked warbler, the salt marsh harvest mouse, the Mount Graham red squirrel, the Lahontan cutthroat trout, and the desert tortoise. A sixth species, the bald eagle which is no longer listed as threatened or endangered, except for the southwest population, was also evaluated.

An external peer review of this report has been completed. The public comment period and the external peer review are separate processes. The public comment period provides an opportunity for all interested parties to comment on the document. When finalizing the draft document, EPA will consider any public comments received in accordance with this notice.

EPA is releasing this draft document solely for the purpose of pre-dissemination review and comment under applicable information quality guidelines. This document has not been formally disseminated by EPA and does not represent and should not be construed to represent any Agency policy or determination. The first draft of this report was reviewed in 2002 by the U.S. Fish and Wildlife Service within the Department of the Interior. This final draft is being released to the public as well as to other federal agencies who may wish to comment.

DATES: The 30-day public comment period begins November 25, 2009, and ends December 28, 2009. Technical comments should be in writing and must be received by EPA by December 28, 2009.

ADDRESSES: The draft ''A Framework for Categorizing the Relative Vulnerability of Threatened and Endangered Species to Climate Change'' is available primarily via the Internet on the National Center for Environmental Assessment's home page under the Recent Additions and the Data and Publications menus at *http://www.epa.gov/ncea.* A limited number of paper copies are available from the Information Management Team, NCEA; telephone: 703–347–8561; facsimile: 703–347–8691. If you are requesting a paper copy, please provide your name, your mailing address, and the document title, ''A Framework for Categorizing the Relative Vulnerability of Threatened and Endangered Species to Climate Change.''

Comments may be submitted electronically via *http://www.regulations.gov,* by mail, by facsimile, or by hand delivery/courier. Please follow the detailed instructions provided in the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: For information on the public comment period, contact the Office of Environmental Information Docket; telephone: 202–566–1752; facsimile: 202–566–1753; or e-mail: *ORD.Docket@epa.gov.*

For technical information, contact Susan Julius, NCEA; telephone: 703–347–8619; facsimile: 703–347–8694; or e-mail: *julius.susan@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Information About the Project/ Document

The document, ''A Framework for Categorizing the Relative Vulnerability of Threatened and Endangered Species to Climate Change'' describes an evaluative framework that may be used to categorize the relative vulnerability of species to climate change. It is intended that the results of applying the framework be regarded as indications of the comparative vulnerabilities of species, not estimates of a species' absolute vulnerability to climate change. Four modules compose this framework: Module 1 categorizes baseline vulnerability to extinction or major population reduction by scoring those elements of the species' life history, demographics, and conservation status that influence the likelihood of its survival or extinction (excluding climatic changes); Module 2 scores the likely vulnerability of a species to future climate change, including the species' potential physiological, behavioral, demographic, and ecological response to climate change; Module 3 combines the results of Modules 1 and 2 into a matrix to produce an overall score of the species' vulnerability to climate change, which maps to an adjectival category, such as ''critically vulnerable,'' ''highly vulnerable,'' ''less vulnerable,'' and ''least vulnerable;'' Module 4 is a qualitative determination of uncertainty of overall vulnerability (high, medium, and low) based on evaluations of uncertainty done in each of the first 3 modules.

To illustrate the use of this framework, it was applied to six U.S. species that were listed as threatened or endangered at the time the framework was developed. Based on the framework, four of those species were categorized as ''critically vulnerable'' to climate change: The golden-cheeked warbler (*Dendroica chrysoparia*), the salt marsh harvest mouse (*Reithrodontomys raviventris*), the Mount Graham red squirrel (*Tamiasciurus hudsonicus grahamensis*), and the Lahontan cutthroat trout (*Oncorhyncus clarki henshawi*). The desert tortoise (*Gopherus agassizii*) was characterized as ''highly vulnerable'' and the bald eagle (*Haliaeetus leucocephalus*) was categorized as ''less vulnerable.'' Certainty scores in Module 4 ranged between medium and high and reflect the amount and quality of information available.

This framework was developed by EPA's Global Change Research Program and is offered as one of a number of potential approaches for prioritizing those species most vulnerable to climate change. It is not intended to serve as a tool for determining whether a species is endangered or threatened under the Section 4 listing process of the Endangered Species Act.

EPA's Global Change Research is an assessment-oriented program committed to developing frameworks and tools to assist decision-makers in evaluating the impacts of climate change to air quality, water quality and ecosystems.

II. How To Submit Technical Comments to the Docket at http://www.regulations.gov.

Submit your comments, identified by Docket ID No. EPA–HQ–ORD 2009–0816, by one of the following methods:

- *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.
- *E-mail: ORD.Docket@epa.gov.*
- *Fax:* 202–566–1753.
- *Mail:* Office of Environmental Information (OEI) Docket (Mail Code: 2822T), U.S. Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460. The phone number is 202–566–1752.
- *Hand Delivery:* The OEI Docket is located in the EPA Headquarters Docket Center, Room 3334 EPA West Building, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center's Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is 202–566–1744. Such deliveries are only accepted during the docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

If you provide comments by mail or hand delivery, please submit three copies of the comments. For attachments, provide an index, number pages consecutively with the comments, and submit an unbound original and three copies.

Instructions: Direct your comments to Docket ID No. EPA–HQ–ORD–2009–0816. Please ensure that your comments are submitted within the specified comment period. Comments received after the closing date will be marked ''late,'' and may only be considered if time permits. It is EPA's policy to include all comments it receives in the public docket without change and to make the comments available online at *http://www.regulations.gov,* including any personal information provided, unless a comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or e-mail. The *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov*, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

Docket: Documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other materials, such as copyrighted material, are publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at the OEI Docket in the EPA Headquarters Docket Center.

Dated: October 21, 2009.

Rebecca Clark,

Director, National Center for Environmental Assessment.

Access to Confidential Business Information by Computer Sciences Corporation and Its Identified Subcontractors

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized contractor, Computer Sciences Corporation (CSC) of Chantilly, VA and its subcontractors, to access information which has been submitted to EPA under all sections of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be Confidential Business Information (CBI).

DATES: Access to the confidential data will occur no sooner than December 2, 2009.

FOR FURTHER INFORMATION CONTACT: *For general information contact*: Colby Lintner, Regulatory Coordinator, Environmental Assistance Division (7408M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (202) 554–1404; e-mail address: *TSCA-Hotline@epa.gov*.

For technical information contact: Scott Sherlock, Environmental Assistance Division (7408M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (202) 564–8257; fax number: (202) 564–8251; e-mail address: *sherlock.scott@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Notice Apply to Me?

This action is directed to the public in general. This action may, however, be of interest to all who manufacture, process or distribute industrial chemicals. Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

EPA has established a docket for this action under docket identification (ID) number EPA–HQ–OPPT–2003–0004. All documents in the docket are listed in the docket index available at *http://www.regulations.gov*. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available electronically at *http://www.regulations.gov*, or, if only available in hard copy, at the OPPT Docket. The OPPT Docket is located in the EPA Docket Center (EPA/DC) at Rm. 3334, EPA West Bldg., 1301 Constitution Ave., NW., Washington, DC. The EPA/DC Public Reading Room hours of operation are 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. The telephone number of the EPA/DC Public Reading Room is (202) 566–1744, and the telephone number for the OPPT Docket is (202) 566–0280. Docket visitors are required to show photographic identification, pass through a metal detector, and sign the EPA visitor log. All visitor bags are processed through an X-ray machine and subject to search. Visitors will be provided an EPA/DC badge that must be visible at all times in the building and returned upon departure.

II. What Action is the Agency Taking?

Under Contract Number GS00T99ALD0203, Task Order Number EP10H000097, contractors CSC of 15000 Conference Center Drive, Chantilly, VA and its subcontractors Apex Systems, Inc. of 5430 Wade Park Blvd, Raleigh, NC; APPTIS Systems, Inc. of 4800 Westfields Blvd, Chantilly, VA; Berrett and Associates, Inc. of P.O. Box 2891, Sterling, VA; Digital Intelligence Systems Corp. of 4151 Lafayette Center Dr, Suite 600, Chantilly, VA; Excel Management Systems, Inc. of P.O. Box 8280, Columbus, OH; General Dynamics Advanced Information Systems of 10560 Arrowhead Dr., Fairfax, VA; KForce, Inc. of 12010 Sunset Hills Road, Suite 200, Reston, VA; and Paloma Systems, Inc. of 11250 Waples Mill Road, Suite 300, Fairfax, VA will assist the Office of Pollution Prevention and Toxics (OPPT) in the Local Technology Service (LTS) support task; provide Information Technology (IT) services in support of EPA's program offices; provide the EPA community with voice, data, and video technologies that meet their needs and requirements. The contractors will also provide engineering, operational, consulting, and/or development support services as requested by the TSCA CBI office. Finally, the contractor team will manage each project from start to completion and provide follow-on support when applicable.

In accordance with 40 CFR 2.306(j), EPA has determined that under Contract Number GS00T99ALD0203, Task Order Number EP10H000097, CSC and its subcontractors will require access to CBI submitted to EPA under all sections of TSCA to perform successfully the duties specified under the contract. CSC and its subcontractors' personnel will be given access to information submitted to EPA under all sections of TSCA.

EPA is issuing this notice to inform all submitters of information under all sections of TSCA that EPA may provide CSC and its subcontractors access to these CBI materials on a need-to-know basis only. All access to TSCA CBI under this contract will take place at EPA Headquarters and the Research Triangle Park, NC facilities in accordance with EPA's TSCA CBI Protection Manual.

Access to TSCA data, including CBI, will continue until March 30, 2010. If the contract is extended, this access will also continue for the duration of the extended contract without further notice.

CSC and its subcontractors' personnel will be required to sign nondisclosure agreements and will be briefed on appropriate security procedures before they are permitted access to TSCA CBI.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Notice Apply to Me?

This action is directed to the public in general. This action may, however, be of interest to all who manufacture, process, or distribute industrial chemicals. Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

Docket. EPA has established a docket for this action under docket identification (ID) number EPA–HQ–OPPT–2003–0004. All documents in the docket are listed in the docket index available at *http://www.regulations.gov*. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available electronically at *http://www.regulations.gov*, or, if only available in hard copy, at the OPPT Docket. The OPPT Docket is located in the EPA Docket Center (EPA/DC) at Rm. 3334, EPA West Bldg., 1301 Constitution Ave., NW., Washington, DC. The EPA/DC Public Reading Room hours of operation are 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. The telephone number of the EPA/DC Public Reading Room is (202) 566–1744, and the telephone number for the OPPT Docket is (202) 566–0280. Docket visitors are required to show photographic identification, pass through a metal detector, and sign the EPA visitor log. All visitor bags are processed through an X-ray machine and subject to search. Visitors will be provided an EPA/DC badge that must be visible at all times in the building and returned upon departure.

II. What Action is the Agency Taking?

Under Contract Number EP–W–09–032, contractor SAIC of 10260 Campus Point Drive, San Diego, CA, will assist the Office of Pollution Prevention and Toxics (OPPT) and the Office of Civil Enforcement (OCE) Core TSCA enforcement program by targeting facilities for inspections and investigations; inspecting and investigating facilities; case reviews and case development of activities relating to the manufacture, processing, distribution in commerce and disposal of toxic substances; developing and implementing data systems for internal enforcement tracking; and information collection from businesses that may request TSCA-CBI claims. SAIC may work in conjunction with the Information Management Division, Chemical Control Division, Economics, Exposure and Technology Division, and the Risk Assessment Division in OPPT. SAIC may work with data contained in the OPPT data systems, such as CICIS (TSCA Public Inventory), CCID (TSCA Confidential Inventory), CUS (Chemical Update System), CBITS (Confidential Business Information Tracking System), and MITS (Management Information Tracking System), to obtain information to support OCE's enforcement activities. All CBI claims requested when conducting investigations and inspections, issuing warrants or delivering subpoenas from which information collected and reviewed determines compliance, will be handled in accordance to the CBI Procedures. SAIC will administer a CBI documents tracking system beginning when the initial control number is assigned until the document is transferred to the EPA DCO, other SAIC DCO, returned to the company by the DCO, or destroyed by the DCO as required.

In accordance with 40 CFR 2.306(j), EPA has determined that under Contract Number EP–W–09–032, SAIC will require access to CBI submitted to EPA under sections 4, 5, 8, 12, and 13 of TSCA to perform successfully the duties specified under the contract. SAIC personnel will be given access to information submitted to EPA under sections 4. 5, 8, 12, and 13 of TSCA.

EPA is issuing this notice to inform all submitters of information under sections 4, 5, 8, 12, and 13 of TSCA that EPA may provide SAIC access to these CBI materials on a need-to-know basis only. All access to TSCA CBI under this contract will take place at EPA Headquarters and SAIC's sites located at the Energy, Environment and Infrastructure Business Unit, 12100 Sunset Hills Road, Reston, VA and 405 Urban Street, Suite 400, Lakewood, CO. However, no CBI storage or access will take place at the facilities until after an inspection has taken place and the Agency is satisfied that the sites meet the specifications for the use and storage of TSCA CBI materials.

Access to TSCA data, including CBI, will continue until September 30, 2014. If the contract is extended, this access will also continue for the duration of the extended contract without further notice.

SAIC personnel will be required to sign nondisclosure agreements and will be briefed on appropriate security procedures before they are permitted access to TSCA CBI.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–RCRA–2009–0319, FRL–8984–8]

Agency Information Collection Activities; Submission to OMB for Review and Approval; Comment Request; Part B Permit Application, Permit Modifications, and Special Permits (Renewal), EPA ICR Number 1573.12, OMB Control Number 2050–0009

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), this document announces that an Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval. This is a request to renew an existing approved collection. The ICR, which is abstracted below, describes the nature of the information collection and its estimated burden and cost.

DATES: Additional comments may be submitted on or before December 28, 2009.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA–HQ–RCRA–2009–0319, to (1) EPA, either online using *http://www.regulations.gov* (our preferred method), or by e-mail to *rcra-docket@epa.gov,* or by mail to: RCRA Docket (28221T), U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington, DC 20460; and (2) OMB, by mail to: Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Attention: Desk Officer for EPA, 725 17th Street, NW., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Toshia King, Office of Resource Conservation and Recovery, mailcode 5303P, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: 703–308–7033; fax number: 703–308–8617; e-mail address: *king.toshia@epa.gov.*

SUPPLEMENTARY INFORMATION: EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On May 27, 2009 (74 FR 25236) EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA received no comments. Any additional comments on this ICR should be submitted to EPA and OMB within 30 days of this notice.

EPA has established a public docket for this ICR under Docket ID No EPA–HQ–RCRA–2009–0319, which is available for online viewing at *http://www.regulations.gov,* or in person viewing at the Resource Conservation and Recovery Act (RCRA) Docket in the EPA Docket Center (EPA/DC), EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The EPA/DC Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566–1744, and the telephone number for the RCRA Docket is (202) 566–0270.

Use EPA's electronic docket and comment system at *http://www.regulations.gov,* to submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the docket that are available electronically. Once in the system, select ''docket search,'' then key in the docket ID number identified above. Please note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at *http://www.regulations.gov* as EPA receives them and without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose public disclosure is restricted by statute. For further information about the electronic docket, go to *http://www.regulations.gov.*

Title: Part B Permit Application, Permit Modifications, and Special Permits (Renewal).

ICR numbers: EPA ICR No. 1573.12, OMB Control No. 2050–0009.

ICR Status: This ICR is scheduled to expire on November 30, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Section 3005 of Subtitle C of RCRA requires treatment, storage or disposal facilities (TSDFs) to obtain a permit. To obtain the permit, the TSDFs must submit an application describing the facility's operation. There are two parts to the RCRA permit application—Part A and Part B. Part A defines the processes to be used for treatment, storage, and disposal of hazardous wastes; the design capacity of such processes; and the specific hazardous wastes to be handled at the facility. Part B requires detailed site specific information such as geologic, hydrologic, and engineering data. In the event that permit modifications are proposed by the applicant or EPA, modifications must conform to the requirements under Sections 3004 and 3005.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 229 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities potentially affected by this action are business or other for-profit; as well as State, Local, or Tribal governments.

Estimated Number of Respondents: 145.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 33,260.

Estimated Total Annual Cost: $7,956,839, which includes $2,254,188 annualized labor costs and $5,702,651 annualized capital or O&M costs.

Changes in the Estimates: There is a slight increase of 783 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens due to revised estimates of the respondent universe.

Dated: November 19, 2009.

John Moses,

Director, Collection Strategies Division.

Title: NSPS for the Phosphate Fertilizer Industry (Renewal).

ICR Numbers: EPA ICR Number 1061.11, OMB Control Number 2060–0037.

ICR Status: This ICR is scheduled to expire on December 31, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: 40 CFR part 60, subparts T, U, V, W, and X, applies to owners and operators of each phosphate fertilizer production and storage facility. The provisions of this subpart apply to wet-process phosphoric acid plants having a design capacity of more than 15 tons of equivalent phosphorous pentoxide (P_2O_5) feed per calendar day. The affected facility includes any combination of: reactors, filters, evaporators, and hot wells. Any facility that commences construction or modification after October 22, 1974 is subject to the requirements. Owners and operators must conduct an initial performance test, record amounts of feed material and storage, record pressure drop across control devices, and comply with a total fluoride emission standard. In addition to the monitoring, recordkeeping and reporting requirements listed in the General Provisions (40 CFR part 60), the phosphate fertilizer industry is required to meet the specific requirements at 40 CFR part 60, subparts T, U, V, W, and X to determine if compliance has been achieved.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 46 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Phosphate fertilizer plants.

Estimated Number of Respondents: 13.

Frequency of Response: Initially, occasionally, and semiannually.

Estimated Total Annual Hour Burden: 1,194.

Estimated Total Annual Cost: $437,702, which includes $117,512 in labor costs, no annualized capital/startup costs and $320,190 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations. First, the

regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for respondents is very low, negative, or non-existent. Therefore, the labor hours in the previous ICR reflect the current burden to the respondents and are reiterated in this ICR. There is a minor change to the cost figures because the previous ICR used a technical labor rate only. The updated labor categories and associated rates result in an increase to total labor cost. In addition, the previous ICR rounded to the nearest $1,000; this ICR presents cost figures which differ by less than $500 from the previous ICR due to using exact figures instead of rounding.

Dated: November 16, 2009.

John Moses,

Director, Collection Strategies Division.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2008–0917; FRL–8984–9]

Agency Information Collection Activities; Submission to OMB for Review and Approval; Comment Request; Standards for Pesticide Containers and Containment; EPA ICR No. 1632.03, OMB Control No. 2070–0133

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), this document announces that an Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval. This is a request to renew an existing approved collection. The ICR, which is abstracted below, describes the nature of the information collection and its estimated burden and cost.

DATES: Additional comments may be submitted on or before December 28, 2009.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA–HQ–OPP–2008–0917, to (1) EPA online using *http://www.regulations.gov* (our preferred method), by mail—Office of Pesticide Programs (OPP), Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460, and (2) OMB by mail to: Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Attention: Desk Officer for EPA, 725 17th Street, NW., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Cameo Smoot, Field and External Affairs Division, Office of Pesticide Programs, 7506P, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: 703–305–5454; fax number: 703–305–5884; e-mail address: *smoot.cameo@epa.gov.*

SUPPLEMENTARY INFORMATION: EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On February 25, 2009 (74 FR 8537), EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA received no comments. Any additional comments on this ICR should be submitted to EPA and OMB within 30 days of this notice.

EPA has established a public docket for this ICR under Docket ID No. EPA–HQ–OPP–2008–0917, which is available for online viewing at *http://www.regulations.gov,* or in person viewing at the OPP Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket telephone number is (703) 305–5805. Use EPA's electronic docket and comment system at *http://www.regulations.gov,* to submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the docket that are available electronically. Once in the system, select ''docket search,'' then key in the docket ID number identified above. Please note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at *http://www.regulations.gov* as EPA receives them and without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose public disclosure is restricted by statute. For further information about the electronic docket, go to *http://www.regulations.gov.*

Title: Standards for Pesticide Containers and Containment.

ICR numbers: EPA ICR No. 1632.03, OMB Control No. 2070–0133.

ICR Status: This ICR is scheduled to expire on November 30, 2009. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This information collection request covers the information collection activities associated with the container design and residue removal requirements and containment structure requirements. With respect to the container design and residue removal requirements, the information collection activities are associated with the requirement that businesses subject to the container regulations (pesticide registrants) and repackaging regulations (pesticide registrants and refillers) maintain records of test data, cleaning procedures, certain data when a container is refilled, and other supporting information. These records are subject to both call-in by EPA and on-site inspection by EPA and its representatives. EPA has not established a regular schedule for the collection of these records, and there is no reporting. With respect to the containment structure requirements, the information collection activities are associated with the requirement that businesses subject to the containment structure regulations maintain records of the: (1) Monthly inspection and maintenance of each containment structure and all stationary bulk containers; (2) duration over which non-stationary bulk containers holding pesticide and not protected by a secondary containment unit remain at the same location; and (3) construction date of the containment structure. The businesses subject to the containment structure regulations include agrichemical retailers and refilling establishments, custom blenders and commercial applicators of agricultural pesticides. The records have to be maintained by the owners and operators of such businesses. There is no regular schedule for the collection of either of these records, nor does EPA anticipate a call-in of records at some future date. Instead, the records would be available to inspectors to ensure that businesses are in compliance with containment requirements. These inspections are

generally conducted by the states, who enforce FIFRA regulations through cooperative agreements with EPA.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 7.4 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Entities potentially affected by this ICR include pesticide registrants and businesses who formulate pesticide products or pesticide formulation intermediates (NAICS code 325320), farm supply wholesalers (NAICS code 422910), swimming pool applicators (classified under NAICS codes 561790, 453998, and 235990), and agricultural (aerial and ground) commercial applicators (classified under NAICS code 115112).

Estimated Number of Respondents: 23,586. This includes 1,804 registrant facilities, 16,795 agricultural pesticide refillers, 322 swimming pool supply companies, and 4,665 facilities requiring secondary containment.

Frequency of Response: On occasion. There is no regular reporting involved. This ICR only involves recordkeeping requirements.

Estimated Total Annual Hour Burden: 174,550.5 hours. This includes 139,563 hours for container design and residue removal requirements and 34,987.5 hours for containment structure requirements.

Estimated Total Annual Cost: $6,124,953. This includes $4,902,723 for container design and residue removal requirements and $1,222,230 for containment structure requirements.

Changes in the Estimates: The renewal of this ICR will result in an overall increase of 122,493.5 hours in the total estimated respondent burden identified in the currently approved ICR. When the information collection associated with this ICR was approved in 2006, the burden hours were adjusted to reflect only the burden associated with initial rule familiarization and state requests to use their containment regulations in lieu of Federal regulations—a total of 52,057 hours. These were the only burdens that were imposed by the pesticide container and containment regulations during the course of that approval. EPA was instructed to revise the estimates, upon resubmission, to reflect the burden imposed in 2009 and beyond because of compliance with the requirements.

Dated: November 18, 2009.

John Moses,

Director, Collection Strategies Division.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[Regional Docket Nos. V–2008–2, FRL–8985–3]

Clean Air Act Operating Permit Program; Petition for Objection to State Operating Permit for BP Products North America, Inc., Whiting Business Unit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final order on petition to object to Clean Air Act (Act) operating permit.

SUMMARY: This document announces that the Administrator of EPA has responded to a petition submitted by the Environmental Law and Policy Center, Hoosier Environmental Council, Natural Resources Defense Council, Save the Dunes, Sierra Club, Susan Eleuterio, and Tom Tsourlis (petitioners) asking EPA to object to an operating permit issued by the Indiana Department of Environmental Management to the BP Products North America, Inc., Whiting Business Unit (Whiting). The Administrator granted the petition in part and denied it in part.

Pursuant to section 505(b)(2) of the Act, a petitioner may seek in the United States Court of Appeals for the appropriate circuit judicial review of those portions of a petition which EPA denied. Any petition for review shall be filed within 60 days from the date this notice appears in the **Federal Register**, pursuant to section 307 of the Act.

ADDRESSES: You may review copies of the final order, the petition, and other supporting information at the EPA Region 5 Office, 77 West Jackson Boulevard, Chicago, Illinois 60604. If you wish to examine these documents, you should make an appointment at least 24 hours before visiting the EPA office. Additionally, the final order for the Whiting petition is available electronically at: *http://www.epa.gov/region07/programs/artd/air/title5/petitiondb/petitiondb.htm.*

FOR FURTHER INFORMATION CONTACT: Pamela Blakley, Chief, Air Permits Section, Air Programs Branch, Air and Radiation Division, EPA, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, telephone (312) 886–4447.

SUPPLEMENTARY INFORMATION: The Act affords EPA a 45-day period to review, and object, as appropriate, to operating permits proposed by State permitting authorities. Section 505(b)(2) of the Act authorizes any person to petition the EPA Administrator within 60 days after the expiration of the EPA review period to object to a State operating permit if EPA has not done so. A petition must be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided by the State, unless the petitioner demonstrates that it was impracticable to raise issues during the comment period, or the grounds for the issues arose after this period.

On August 19, 2008, EPA received a petition requesting that EPA object to the Title V operating permit for Whiting. The Petitioners allege that the permit is not in compliance with the requirements of the Act.

Specifically, the Petitioners allege that: (1) The permit application lacks emission information and calculations critical for determining applicable requirements and setting appropriate limits and conditions; (2) the minor source permit fails to comply with New Source Review requirements because the project is a major modification when all project emissions are properly included; (3) the permit does not include applicable Best Available Control Technology and Lowest Achievable Emission Rate limits for flares and other sources; (4) BP and IDEM failed to conduct the proper greenhouse gas Best Achievable Control Technology analysis; and (5) the permit omits compliance schedules that Title V requires to ensure compliance with all applicable requirements, as supported by the Notice of Violation issued by EPA to BP for its Whiting refinery.

On October 16, 2009, the Administrator issued an order granting the Whiting petition in part and denying it in part. The order explains the reasons behind EPA's conclusions.

Dated: November 9, 2009.

Bharat Mathur,

Acting Regional Administrator, Region 5.

[FR Doc. E9–28266 Filed 11–24–09; 8:45 am]

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–SFUND–2006–0361; FRL–8985–7]

Emergency Planning and Community Right-to-Know Act; Contractor Access to Trade Secrets and Address Change for Submitting Trade Secret Claims

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The EPA has authorized the following contractor to access trade secret information that has been, or will be, submitted to EPA under sections 303, 311 and 312 of the Emergency Planning and Community Right-to-Know Act (EPCRA): CGI Federal, Inc. and its subcontractor, Management Support Technology, Inc. (MSTI), (GSA Contract #GS–35F4797H TO#1518, expiring March 30, 2012). The EPA also announces a new address to which EPCRA trade secrets are to be sent.

DATES: This new address is effective on November 25, 2009.

ADDRESSES: EPCRA Trade Secrets submitted to EPA should be mailed to: CGI Federal, c/o CDX Reporting Center, P.O. 10162, Fairfax, VA 22038. Courier deliveries and express mail should be addressed to: CDX Reporting Center, c/o CGI Federal, 12601 Fair Lakes Circle, Fairfax, VA 22033.

FOR FURTHER INFORMATION CONTACT: Sicy Jacob at (202) 564–8019.

SUPPLEMENTARY INFORMATION: The EPA is issuing this notice to inform all submitters of trade secret claims submitted under sections 303, 311 and 312 of EPCRA that EPA may provide the above mentioned contractor and its subcontractor access to these materials on a need-to-know basis. This contractor will provide technical support to the Office of Emergency Management in the receipt, processing and storage of these trade secret claims submitted to EPA. In accordance with 40 CFR 350.23, EPA has determined that the contractor and its subcontractor require access to trade secret and confidential information submitted to EPA under 40 CFR part 350 in order to perform work satisfactorily under the above noted contract. The contractor's and subcontractor's personnel will be required to sign nondisclosure agreements prior to receiving access to trade secrets. All contractor access to trade secrets will take place at the contractor's facility. The contractor will have appropriate procedures and facilities in place to safeguard the trade secrets to which the contractor and its subcontractor have access. Clearance for access to trade secrets is scheduled to expire on March 30, 2012 or at contract termination.

EPCRA Trade Secrets submitted to EPA should be mailed to: CGI Federal, c/o CDX Reporting Center, P.O. 10162, Fairfax, VA 22038. Courier deliveries and express mail should be addressed to: CDX Reporting Center, c/o CGI Federal, 12601 Fair Lakes Circle, Fairfax, VA 22033.

Dated: November 16, 2009.

Deborah Y. Dietrich,

Director, Office of Emergency Management.

Clean Water Act and Federal Insecticide, Fungicide, and Rodenticide Act Common Effects Aquatic Life Assessment for Pesticides Using Available Data: Regional Stakeholder Meetings

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Public Meetings.

SUMMARY: EPA will conduct six public meetings to solicit input on methods being evaluated by the Office of Pesticide Programs (OPP) and the Office of Water (OW), with the support of the Office of Research and Development (ORD) to characterize effects from pesticides on fish, other aquatic organisms, and aquatic plants in aquatic ecosystems. These public meetings will be held in Chicago, IL (Region 5), Edison, NJ (Region 2), Kansas City, KS (Region 7), Atlanta, GA (Region 4), San Francisco, CA (Region 9), and Seattle, WA (Region 10), starting in January 2010. At the public meetings, EPA will provide presentations that detail its initial thinking on how to ensure that pesticide effects are characterized consistently by both OPP and OW.

DATES: The public meetings will be held on the following dates: January 11, 2010; January 12, 2010; January 14, 2010; January 19, 2010; January 21, 2010; and January 22, 2010.

ADDRESSES: The meetings will be held at the following locations and times:

Date	Time	Location
January 11, 2010	1 p.m. to 5 p.m.	EPA Region 2 2890 Woodbridge Ave. Building 205 Main Conference Room Edison, NJ 08837
January 12, 2010	1 p.m. to 5 p.m.	EPA Region 4 Sam Nunn Atlanta Federal Center Augusta Conference Room 61 Forsyth St., SW Atlanta, GA 30303
January 14, 2010	9 a.m. to 1 p.m	EPA Region 5 Ralph Metcalfe Federal Building Valdas V. Adamkus Resource Center – 12th Floor Lake Michigan Room 77 W. Jackson Boulevard Chicago, IL 60604
January 19, 2010	9 a.m. to 1 p.m	EPA Region 7 901 North 5th St. Room 2240 A Kansas City, KS 66101
January 21, 2010	9 a.m. to 1 p.m	EPA Region 10 1200 Sixth Ave., Suite 900 Seattle, WA 98101
January 22, 2010	1 p.m. to 4 p.m.	EPA Region 9 Ronald V. Dellums Federal Building Edward R. Roybal Auditorium and Conference Center 1301 Clay St. Oakland, CA 94612

Additional information concerning these meetings will be available on December 1, 2009 at the following web site: *www.epa.gov/oppefed1/cwa_fifra_effects_methodology/index.html.*

To request accommodation of a disability, please contact the person listed under **FOR FURTHER INFORMATON CONTACT**, preferably at least 10 days prior to the meeting, to give EPA as much time as possible to process your request.

FOR FURTHER INFORMATION CONTACT: Jane Hopkins, Field and External Affairs Division (7506P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW, Washington, D.C. 20460; telephone number: (703) 305–7195; e-mail address: *hopkins.jane@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders, including environmental, water resources professionals, and agricultural advocates, the chemical industry, pesticide users, and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

EPA has established a docket for this action under docket ID number EPA–HQ–OPP–2009–0773. Publicly available docket materials are available either in the electronic docket at *http://www.regulations.gov*, or, if only available in hard copy, at the Office of Pesticide Programs (OPP) Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

II. Background

Section 304(a)(1) of the Clean Water Act (CWA) requires EPA to develop, publish, and from time to time, revise criteria for water quality accurately reflecting the latest scientific knowledge. Water quality criteria are scientifically derived numeric values that measure the level beyond which pollutants in ambient water will have deleterious effects on aquatic life or human health. Water quality criteria developed under Section 304(a) are based solely on data and scientific judgments on the relationship between pollutant concentrations and environmental and human health effects. Section 304(a) criteria do not reflect consideration of economic impacts or the technological feasibility of meeting the chemical concentrations in ambient water.

Section 304(a) criteria provide guidance to states and authorized tribes in adopting water quality standards that ultimately provide the basis for controlling discharges or releases of pollutants. The criteria also provide guidance to EPA when promulgating Federal regulations under Section 303(c) when such action is necessary. Under the CWA and its implementing regulations, states and authorized tribes adopt water quality criteria to measure attainment of designated uses (e.g., public water supply, recreational use, industrial use). EPA's recommended criteria do not impose legally binding requirements. States and authorized tribes have the discretion to adopt, where appropriate, other scientifically defensible water quality criteria that differ from EPA's recommended criteria.

FIFRA requires that all pesticides used in the United States be registered by EPA for use and, thus, ensures Federal control of distribution, sale, and use of pesticides. Registration assures that pesticides will be properly labeled and that, if used in accordance with labeled specifications, will not cause unreasonable adverse effects on human health and the environment. FIFRA ecological risk assessments quantitatively evaluate reduced survival of aquatic animals from direct acute exposures and survival, growth, and reproductive impairment for aquatic animals from direct chronic exposures. Assessments for aquatic plants focus on growth rates and biomass (reproduction) measurements. Risk management decisions for pesticide registration under FIFRA take into consideration benefits in addition to risks of pesticides used; however, benefits are not considered in characterizing ecological effects under FIFRA or in deriving ambient water quality criteria (AWQC) values under CWA.

For FIFRA ecological effects assessments, EPA peer reviews toxicity data provided by the registrant as required by regulation, as well as data from public sources obtained from EPA's ECOTOX database. Current testing requirements for aquatic organisms include toxicity studies containing information on survival, reproduction, and growth endpoints for freshwater and estuarine/marine animals and biomass and growth endpoints for aquatic plants. These test requirements are defined for each chemical class by use category in title 40 of the Code of Federal Regulations, part 158. Studies are performed on laboratory test organisms in the following broad taxonomic groupings: freshwater fish and invertebrates, estuarine/marine fish and invertebrates, and aquatic plants. For screening-level assessments, OPP's effects assessments are based on the lowest acute and chronic toxicity values from the most sensitive species tested in acceptable studies. More refined assessments may use the full species sensitivity distribution for a given taxa or other toxicity endpoints, as for the variability and uncertainty of the data (probabilistic approaches). The ''OPP Aquatic Benchmarks'' is a web site developed by OPP that contains the aquatic toxicity endpoints used in EPA pesticide risk assessments. (*http://www.epa.gov/oppefed1/ecorisk_ders/aquatic_life_benchmarks.htm*).

Although both OPP's and OW's approaches afford a high degree of protection for aquatic life, stakeholders have identified a need for consistent and timely Federal input that will allow EPA, states, tribes, and the public to gauge whether pesticides represent a concern for aquatic life, for example, based on water monitoring results. To address these concerns, the Agency has begun a process to explore how to build on the high quality science in both OW and OPP to develop additional tools and approaches to support a consistent and common set of effects characterization methods using best available information. A Scoping Document has been developed that describes this effort in more detail. A letter signed by the Office Directors of OPP and OW, and reinforced by the Scoping Document, has invited public participation in our collective efforts. Following through on this invitation, regional public meetings are being planned for January 2010 to solicit input on the Agency's initial thinking regarding methods, tools, and approaches that are being developed and evaluated by OPP and OW, with the support of ORD, to assure that pesticide ecological effects are characterized consistently. The areas for consideration under this effort include:

- Development and evaluation of predictive tools for use in development of community level benchmarks
- Development of aquatic life community level benchmarks with datasets that do not conform to the ''1985 Guidelines''
- Derivation of aquatic life screening values for aquatic plants

The tools and approaches developed by EPA will:

- Continue to be based upon sound science and utilize the available data,
- Be legally defensible under our statutory mandates,
- Be based upon methodologies that are as consistent and practical as possible,
- Be implementable at the Federal and State level.
- Be developed as quickly and efficiently as possible, and
- Reflect stakeholder input and comments.

During these meetings, EPA will also solicit input from Regional stakeholders regarding the following:

1. Additional sources of pesticide data and relevant reports.
2. The white paper topics.
3. The availability of data, tools, approaches, and data sets on aquatic toxicity that may be useful for this effort.
4. The types of values that are used by states and/or regions for protecting aquatic life in the absence of ambient water quality criteria.
5. Examples of situations in which differences between OW and OPP assessment approaches were an issue.

Following these meetings, the Agency plans to develop a set of white papers, describing potential new tools and analytical approaches that may be used by the Agency, state pesticide and water quality agencies, and other stakeholders.

For more information about water quality criteria and Water Quality Standards, refer to the following:

- Water Quality Standards Handbook (EPA 823–B94–005a);
- Advanced Notice of Proposed Rule Making (ANPRM), (63 FR 36742);
- Water Quality Criteria and Standards Plan – Priorities for the Future (EPA 822–R–98–003);
- Guidelines and Methodologies Used in the Preparation of Health Effects Assessment Chapters of the Consent Decree Water Criteria Documents (45 FR 79347);
- Methodology for Deriving Ambient Water Quality Criteria for the Protection of Human Health (2000), EPA–822–B–00–004);
- Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses (EPA 822/R–85–100);
- National Strategy for the Development of Regional Nutrient Criteria (EPA 822–R–98–002); and
- EPA Review and Approval of State and Tribal Water Quality Standards (65 FR 24641).

You can find these publications through EPA's National Service Center for Environmental Publications (NSCEP, previously NCEPI) or on the Office of Science and Technology's home page (*http://www.epa.gov/waterscience*).

For more information about the OPP Ecological Exposure Assessment Process under FIFRA, refer to the following: ''Overview of the Ecological Risk Assessment Process in the Office of Pesticide Programs,'' which describes how pesticide data are used in ecological risk assessments (*http://www.epa.gov/oppfead1/endanger/consultation/ecorisk-overview.pdf*). The data requirements for aquatic non-target plants and animals for pesticides are described in title 40 of the Code of Federal Regulations, revised July 1, 2008 (§ 158.660 Non-target Plant Protection Data Requirements). The required procedures for conducting the studies are described in OPPTS Harmonized Test Guidelines Series 850 ''Ecological Effects Test Guidelines – Public Drafts'' (*http://www.epa.gov/opptsfrs/publications/OPPTS_Harmonized/850_Ecological_Effects_Test_Guidelines/Drafts/*). Information on procedures used to evaluate these studies are described in: Standard Evaluation Protocols, the guidance document entitled ''the Rejection Rate Analysis: Ecological Effects'' (EPA 738–R–94–035), and in the OPP Overview Document. Public literature is accessed by OPP through EPA's ECOTOX database (*http://cfpub.epa.gov.ecotox/*). The ''OPP Aquatic Benchmarks,'' a web site developed by OPP, contains the aquatic toxicity endpoints used in pesticide assessments (*Http://www.epa.gov/oppefed1ecorisk_ders/aquatic_life_benchmarks.htm*).

III. How Can I Request to Participate in this Meeting?

This meeting is open to the public; registration is not required for attending or for participating in this meeting. Seats will be available on a first come, first served basis.

List of Subjects

Environmental protection, Ambient water quality criteria, Aquatic benchmarks, Aquatic community, Aquatic life, Ecological risk assessment, Pesticides and pest.

Dated: November 13, 2009.

Difenzoquat; Notice of Receipt of Request to Voluntarily Cancel Pesticide Registrations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, EPA is issuing a notice of receipt of a request by the registrant to voluntarily cancel their registrations of products containing the pesticide difenzoquat. The request would terminate difenzoquat use on barley and wheat. The request would terminate the last difenzoquat products registered for use in the United States. EPA intends to grant this request at the close of the comment period for this announcement unless the Agency receives substantive comments within the comment period that would merit its further review of the request, or unless the registrant withdraws their request within this period. Upon acceptance of this request, any sale, distribution, or use of products listed in this notice will be permitted only if such sale, distribution, or use is consistent with the terms as described in the final order.

DATES: Comments must be received on or before December 28, 2009.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2009–0787, by one of the following methods:

- *Federal eRulemaking Portal*: *http://www.regulations.gov*. Follow the on-line instructions for submitting comments.
- *Mail*: Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.
- *Delivery*: OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. Deliveries are only accepted during the Docket Facility's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket Facility telephone number is (703) 305–5805.

Instructions: Direct your comments to docket ID number EPA–HQ–OPP–2009–0787. EPA's policy is that all comments received will be included in the docket without change and may be made available on-line at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through regulations.gov or e-mail. The regulations.gov website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is

placed in the docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the docket index available at *http://www.regulations.gov*. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either in the electronic docket at *http://www.regulations.gov*, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

FOR FURTHER INFORMATION CONTACT: Eric Miederhoff, Pesticide Re-evaluation Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 347–8028; fax number: (703) 308–7070; e-mail address: *miederhoff.eric@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).

ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

iv. Describe any assumptions and provide any technical information and/or data that you used.

v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

vi. Provide specific examples to illustrate your concerns and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

II. Background on the Receipt of Requests to Cancel and/or Amend Registrations to Delete Uses

This notice announces receipt by EPA of a request from registrant AMVAC Chemical Corporation to cancel all 3 product registrations for the herbicide difenzoquat. Difenzoquat is registered for use on only two crops, wheat and barley. In a letter dated November 2, 2009, AMVAC Chemical Corporation requested EPA to cancel the affected product registrations identified in Table 1 of this notice. If the registrant's request is granted, the last difenzoquat products registered in the United States will be canceled effective December 31, 2009.

III. What Action is the Agency Taking?

This notice announces receipt by EPA of a request from a registrant to cancel difenzoquat product registrations. The affected products and the registrants making the requests are identified in Table 1 of this unit.

Under section 6(f)(1)(A) of FIFRA, registrants may request, at any time, that their pesticide registrations be canceled or amended to terminate one or more pesticide uses. Section 6(f)(1)(B) of FIFRA requires that before acting on a request for voluntary cancellation, EPA must provide a 30–day public comment period on the request for voluntary cancellation or use termination. In addition, section 6(f)(1)(C) of FIFRA requires that EPA provide a 180–day comment period on a request for voluntary cancellation or termination of any minor agricultural use before granting the request, unless: The registrants request a waiver of the comment period, or; the Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

The difenzoquat registrants have requested that EPA waive the 180–day comment period. EPA will provide a 30–day comment period on the proposed requests.

Unless a request is withdrawn by the registrant within 30 days of publication of this notice, or if the Agency determines that there are substantive comments that warrant further review of this request, an order will be issued canceling the affected registrations.

TABLE 1. — DIFENZOQUAT PRODUCT REGISTRATIONS WITH PENDING REQUESTS FOR CANCELLATION

Registration Number	Product Name	Company
5481–536	Avenge Technical Herbicide	AMVAC Chemical Corporation
5481–537	Avenge Wild Oat Herbicide	AMVAC Chemical Corporation
5481–538	Avenge SG Wild Oat Herbicide	AMVAC Chemical Corporation

Table 2, of this unit includes the name and address of record for the

registrant of the products listed in Table 1 of this unit.

TABLE 2. — REGISTRANT REQUESTING VOLUNTARY CANCELLATION AND/OR AMENDMENTS

EPA Company Number	Company Name and Address
5481	AMVAC Chemical Corporation, 4695 Macarthur Court, Suite 1250, Newport Beach, CA 92660–1706

IV. What is the Agency's Authority for Taking this Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, following the public comment period, the Administrator may approve such a request.

V. Procedures for Withdrawal of Request and Considerations for Reregistration of Difenzoquat

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**, postmarked before December 28, 2009. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the products have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

VI. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which were packaged, labeled, and released for shipment prior to the effective date of the cancellation action.

In any order issued in response to these requests for cancellation of difenzoquat product registrations, EPA proposes to include the following provisions for the treatment of any existing stocks of the products identified or referenced in Table 1 in Unit III.

If the request for voluntary cancellation is granted as discussed in this unit, the Agency proposes to issue a cancellation order that will allow AMVAC to sell and distribute existing stocks of the products identified in Unit III. until December 31, 2010. All sale or distribution of existing stocks by AMVAC is prohibited after December 30, 2010, unless that sale or distribution is solely for the purpose of facilitating disposal or export of the product.

The Agency will allow persons other than the registrant to continue to sell and/or use existing stocks of canceled products until such stocks are exhausted, provided that such use is consistent with the terms of the previously approved labeling on, or that accompanied, the canceled product. The order will specifically prohibit any use of existing stocks that is not consistent with such previously approved labeling. The Agency will publish the cancellation order in the **Federal Register**.

List of Subjects

Environmental protection, Pesticides and pests.

Dated: November 12, 2009.

Peter Caulkins,

[EPA–HQ–OPP–2006–0955; FRL–8800–2]

Rodenticides; Product Cancellation Order; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; correction and clarification.

SUMMARY: EPA issued a rodenticides product Cancellation Order in the **Federal Register** of September 30, 2009. This document is being issued to correct clerical errors and to clarify the existing stocks provisions.

DATES: The correction is effective date of publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Rusty Wasem, Pesticide Re-evaluation Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: 703-305-6979; e-mail address: *wasem.russell@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

The Agency included in the notice a list of those who may be potentially affected by this action. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

EPA has established a docket for this action under docket identification (ID) number EPA–HQ–OPP–2006–0955. Publicly available docket materials are available either in the electronic docket at *http://www.regulations.gov*, or, if only available in hard copy, at the Office of Pesticide Programs (OPP) Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

II. What Does this Correction Do?

In the **Federal Register** of September 30, 2009 EPA issued a product cancellation order canceling certain rodenticide registrations voluntarily requested by the registrants and accepted by the Agency. Subsequent to the September 30, 2009 publication date, it was determined that some of the products which were listed in Table 1—Rodenticide Product Cancellations, had been cancelled previously. This notice corrects the September 30, 2009 notice and clarifies the provisions for disposition of existing stocks.

FR Doc.E9-23452 published in the **Federal Register** of September 30, 2009 (74 FR 50194) (FRL–8438–6) is corrected as follows:

1. The **DATES** caption on page 50194, is corrected to read:

DATES: The products listed in Table 1 are cancelled on June 4, 2011.

2. On page 50195, table 1 is corrected to read as follows:

TABLE 1.—RODENTICIDE PRODUCT CANCELLATIONS

EPA Registration Number	Product Name
Cholecalciferol (PC Code 202901)	
12455-57	Quintox Mouse Seed
Bromadiolone (PC Code 112001)	
12455-68	Contrac Mouse Bait Station
12455-104	Contract Mouse Control Kit
Bromethalin (PC Code 112802)	
47629-10	Bromethalin Manufacturing Concentrate
Diphacinone (PC Code 067701)	
3487-26	Eagles-14 Diphacinone Rat Bait
11885-12	Master Mix Blue Death-D Rat & Mouse Bait

62577-7	Echols Mouse & Rat Pellets
72500-7	Kaput Mouse Blocks

III. Products Previously Cancelled

The registrations listed in Table 2 below were inadvertently included in Table 1 of the notice published on September 30, 2009, for which this notice corrects. The products listed in Table 2 below were canceled previously for non-payment of maintenance fees and do not have an effective cancellation date of June 4, 2011. Please note that regardless of the existing stocks provision for products listed in Table 2 below, registrants of these products are not permitted to release these products into the channels of trade after June 4, 2011.

TABLE 2.—PRODUCTS PREVIOUSLY CANCELLED

[FRL–8984–2]

Notice of a Project Waiver of Section 1605 (Buy American Requirement) of the American Recovery and Reinvestment Act of 2009 (ARRA) to the Gwinnett County, GA, Department of Water Resources

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The EPA is hereby granting a project waiver of the Buy American requirements of ARRA Section 1605 under the authority of Section 1605(b)(2) [manufactured goods are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality] to the Gwinnett County, Georgia, Department of Water Resources (County) for the purchase of an Austrian manufactured Anaerobic digester gas fueled engine generator set specified as General Electric (GE) Jenbacher JMS 616, 2147 kilowatts for application in a combined heat and power system for use at the F. Wayne Hill Resources Center in the County. The product is manufactured by GE Jenbacher (Jenbach, Austria) and provided by General Electric Water & Process Technologies. The County stated that there was no apparent domestic manufactured biogas engine generator set with the specific fuel utilization/electric power output capacity and variable fuel blending capability required for the utility's combined heat and power needs. This is a project specific waiver and only applies to the use of the specified product for the ARRA funded project being proposed. Any other ARRA project that may wish to use the same product must apply for a separate waiver based on the specific project circumstances. The Acting Regional Administrator is making this determination based on the review and recommendation of the EPA Region 4, Water Protection Division, Grants and Infrastructure Branch. The County has provided sufficient documentation to support their request. The Assistant Administrator of the Office of Administration and Resources Management has concurred on this decision to make an exception to Section 1605 of ARRA. This action permits the purchase of an anaerobic digester gas fueled engine generator set manufactured by GE Jenbacher for the proposed project being implemented by Gwinnett County, Georgia.

DATES: *Effective Date:* October 7, 2009.

FOR FURTHER INFORMATION CONTACT: Carl Biemiller, Project Officer, (404) 562–9341, Grants and Infrastructure Branch, Water Protection Division, Region 4, US EPA, Atlanta Federal Center, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960.

SUPPLEMENTARY INFORMATION: In accordance with ARRA Section 1605(c) and pursuant to Section 1605(b)(2) of Public Law 111–5, Buy American requirements, the EPA hereby provides notice that it is granting a project waiver to the County for the acquisition of the GE Jenbacher Austrian manufactured biogas engine generator set. The manufacturer is GE Water & Process Technologies Company.

Section 1605 of the ARRA requires that none of the appropriated funds may be used for the construction, alteration, maintenance, or repair of a public building or public work unless all of the iron, steel, and manufactured good use in the project are produced in the United States, unless a waiver is provided to the recipient by the EPA. A waiver may be provided if EPA determines that (1) Applying these requirements would be inconsistent with the public interest; (2) iron, steel, and the relevant manufactured goods are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality; or (3) iron, steel and the relevant manufactured goods produced in the United States will increase the cost of the overall project by more than 25 percent.

The County's Department of Water Resources proposes to construct the F. Wayne Hill Water Resources Center (WRC) Digester Gas to Energy Project. This project would permit a renewable energy source for use by the project and the nearby wastewater treatment plant (WWTP). The project intends to convert previously flared anaerobic digester gas to electricity and heat for plant operations. The County proposes to use a General Electric (GE) Jenbacher JMS 616, 2147 kilowatts gas engine to convert digester gas to electrical and thermal energy with the recapture of the heat from the engine-generator in a combined heat and power (CHP) design. Electrical energy generated by the CHP system will reduce the utility needs of the WRC by an estimated thirty (30) percent, partially replacing grid purchased electricity. Thermal energy from the CHP system will be beneficially utilized to maintain the optimum temperature in the anaerobic digestion process now performed by natural gas boilers. The County's specifications require that the design rating of the biogas engine generator be sized to utilize as much of the WRC's available biogas as possible. The application states that based on this requirement, the engine generator set to be supplied must be rated for a power output in excess of 2000 kw. Also, to maximize the utilization of the Center's available biogas, the engine generator

must be capable of utilizing a blended fuel mixture of petroleum derived gas and biogas in order to be capable of operating continuously between the specified range of methane gas production (varying between 400 SCFM and 700 SCFM). This variable blending fuel capacity feature is known as ''blend-on-the fly.''

The County's Department of Water Resources has requested a waiver from the Buy American provision for the purchase of a GE Jenbacher JMS 616, 2147 kilowatts gas engine set manufactured in Jenbach, Austria. The project specifications provided listed manufacturers for the project, and the prospective bidders consulted with multiple suppliers. All of the prospective bidders provided alternative pricing for a Caterpillar G3520C DM 5860, 1600kw/12.47V low BTU gas cogeneration system assembled in Mapelton, IL. Upon evaluation of the domestic manufacturer's product, the county determined that a single Caterpillar unit could not produce excess of 2000kw that could operate continuously over the specified range (as low as 400 SCFM and as high as 700 SCFM). The Caterpillar unit is rated at 1600kw and also has no blending capabilities.

The application also states that the Caterpillar unit is not able to run continuously due to its inability to ''blend-on-the-fly'' until the influent flow of a facility is in excess of approximately 50 million gallons per day (MGD). Above 50 MGD, the gas would have to be stored to burn at a later time. If the gas storage tanks are full, the gas would be burned through the flairs. Conversely, the GE Jenbacher gas engine generator can utilize the full range of gas production quantities by operating at reduced engine speeds with a variable speed drive or by operating at the full engine speed-supplementing the low BTU digester gas with natural gas provided by the gas utility to provide the greatest electrical output. This ''blend-on-the-fly'' technology beneficially utilizes the full amount of available gas, allowing for continuous operations through periods of variable digester gas production. Therefore, the GE Jenbacher gas engine can still be run during periods of low digester gas production to reduce utility fed electricity usage during peak consumption periods. Continuous operation of the engine-generator will also provide a contant heat source to meet the digester's process heating requirement, thereby eliminating the need for natural gas boilers. These boilers would still be required with the Caterpillar gas engine generator. Thus, the Caterpillar unit is neither as efficient nor is it otherwise of a satisfactory quality to meet the specifications of the project.

The functional requirement to maximize biogas use is clearly essential to the objective of substantially increasing the energy efficiency of the facility and turning the current environmental detriment of flaring methane, a particularly potent greenhouse gas, into an energy asset. By doing so, the project has also qualified for the ARRA Green Project Reserve, which is a high priority ARRA objective for SRF funded projects. Requiring a less efficient product would be inconsistent with the explicit and specific intent of Congress to achieve greater energy efficiency as stated in the SRF specific 20% Green Project Reserve requirements of Title VII of the ARRA. The County's submission clearly articulates entirely functional reasons for its technical specifications, and has provided sufficient documentation that the relevant manufactured goods are not produced in the United States in sufficient and reasonably available quantity and of a satisfactory quality to meet its technical requirements and specifications.

The April 28, 2009 EPA Headquarters Memorandum, ''Implementation of Buy American provisions of Public Law 111–5, the American Recovery and Reinvestment Act of 2009,'' defines ''satisfactory quality'' as ''the quality of steel, iron or manufactured goods specified in the project plans and designs.''

EPA's national contractor prepared a technical assessment report dated August 14, 2009 based on the submitted waiver request. The report determined that the waiver request submittal was complete, that adequate technical information was provided, and that there were no weaknesses in the justification provided. The report confirmed the waiver applicant's claim that there are no comparable domestic products that can meet both the power output of the engine generator and the dual fuel capability needed for the project.

Furthermore, the purpose of the ARRA is to stimulate economic recovery in part by funding current infrastructure construction, not to delay projects that are ready to proceed. Approval of the waiver would permit construction to promptly proceed with positive economic benefits to the County in the form of jobs and related services and materials which would aid the economic recovery.

The Region 4 Grants and Infrastructure Branch has reviewed this waiver request and has determined that the supporting documentation provided by the County is sufficient to meet the criteria listed under ARRA Section 1605(b), OMB's regulation at 2 CFR 176.100 and the aforementioned EPA Headquarters Memorandum of April 28, 2009. ARRA Section 1605(b) (2) permits a waiver if ''Iron, steel, and manufactured goods are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality.'' Based on the information provided to EPA from the County, and to the best of our knowledge at the time of the review, there does not appear to be any biogas engine generator set currently manufactured in the United States available to meet the County's specifications and requirements. Therefore, this waiver request meets the applicable criteria and is justified.

The Administrator's March 31, 2009, delegation of authority memorandum provided acting Regional Administrators with the authority to issue exceptions to Section 1605 of ARRA within the geographic boundaries of their respective regions and with respect to requests by individual grant recipients. Having established both a proper basis to specify the particular good required for this project, and that this manufactured good was not available from a producer in the United States, the Gwinnett County, Georgia, Department of Water Resources is granted a waiver from the Buy American requirements of Section 1605(a) of Public Law 111–5 for the purchase of a anaerobic digester gas-fueled engine generator set specified as GE Jenbacher JMS 616, 2147 kilowatts for application in a combined heat and power system as specified in the County's request of July 22, 2009, with supplemental information. This supplementary information constitutes the detailed written justification required by Section 1605(c) for waivers ''based on a finding under subsection 9b.''

Authority: Public Law 111–5, section 1605.

Dated: October 7, 2009.

J. Scott Gordon,

Acting Regional Administrator, Region 4.

[FR Doc. E9–28293 Filed 11–24–09; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–8984–1]

Notice of a Project Waiver of Section 1605 (Buy American requirement) of the American Recovery and Reinvestment Act of 2009 (ARRA) to the Johnston County Department of Public Utilities (the County), North

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Acting Regional Administrator of EPA Region 4 is hereby granting a waiver of the Buy America requirements of ARRA Section 1605 under the authority of Section 1605(b)(2) (manufactured goods are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality) to the County for the purchase of resin beads (MIEX® DOC Resin) supplied by Orica Ltd, in Victoria, Australia and manufactured in Australia. The applicant indicates that MIEX® DOC Resin is necessary to the MIEX® process, a treatment process evaluated in pilot studies at the County and selected for implementation. The MIEX® DOC Resin is only manufactured in Australia. It is patented and no alternative exists which can be used with the MIEX® process. The Acting Regional Administrator is making this determination based on the review and recommendations of the Grants and SRF Section. The County has provided sufficient documentation to support their request.

DATES: *Effective Date:* October 1, 2009.

FOR FURTHER INFORMATION CONTACT: Ed Springer, Chief, Grants and SRF Section, Water Protection Division (WPD), (404) 562–8410, U.S. EPA Region 4,61 Forsyth St. SW, Atlanta, GA 30303.

SUPPLEMENTARY INFORMATION: In accordance with ARRA Section 1605(c), the EPA hereby provides notice that it is granting a project waiver of the requirements of Section 1605(b)(2) of Public Law 111–5, Buy American requirements, to the County for the acquisition of resin beads (MIEX® DOC Resin) supplied by Orica Ltd, in Victoria, Australia and manufactured in Australia. The applicant indicates that MIEX® DOC Resin is necessary to the MIEX® process, a treatment process evaluated in pilot studies at the County and selected for use. The MIEX® DOC Resin is only manufactured in Australia. It is patented and no alternative exists which can be used with the MIEX® process. Section 1605 of the ARRA requires that none of the appropriated funds may be used for the construction, alteration, maintenance, or repair of a public building or public work unless all of the iron, steel, and manufactured goods used in the project is produced in the United States unless a waiver is provided to the recipient by EPA. A waiver may be provided if EPA determines that (1) applying these requirements would be inconsistent with public interest; (2) iron, steel, and the relevant manufactured goods are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality; or (3) inclusion of iron, steel, and the relevant manufactured goods produced in the United States will increase the cost of the overall project by more than 25 percent.

In order to meet the new Long Term II Surface Water Treatment Rule and Stage 2 Disinfection By-Product Rule under the Safe Drinking Water Act, the County will be required to reduce the levels of dissolved organic carbon (DOC)—a disinfection byproduct precursor of regulatory concern—from its source water supply. In 2007, the County commissioned their engineer to conduct a treatability testing program to evaluate treatment technologies for removing DOC from the County's source water supply. The treatability testing program evaluated powdered activated carbon, granular activated carbon, and the MIEX® process/resin for DOC removal. The 2007 treatability study summarized a previous treatability testing program conducted for the County in 2000, which concluded that physical/chemical treatments (*i.e.,* conversion of chlorine disinfection to chloramines, alternative coagulants with enhanced clarification, dissolved air flotation and membrane treatment [using submerged low pressure membranes]) would be ineffective in meeting required treatment levels. The 2007 treatability testing program selected the MIEX® process/resin to meet the County's treatment requirements.

Further, the County's waiver request states that ''[t]he Public Water Supply Section, Division of Environmental Health, N.C. Department of Environment and Natural Resources has reviewed the report and subsequent design and approved the project.'' Approval of a public water system's compliance technology by the primary regulatory enforcement agency of a State is a crucial prerequisite to initiation of a drinking water infrastructure project to comply with a National Primary Drinking Water Standard. Given this approval and in light of the outcome of the treatability testing program, the County did not have a basis to use a practicable alternative compliance technology within the ARRA time requirements for SRF projects to be under contract or construction by February 17, 2010.

The County's submission clearly articulates entirely reasonable reasons for choosing the type of technology that it chose for this project and has provided sufficient documentation that the relevant manufactured goods are not produced in the United States in sufficient and reasonably available quantity and of a satisfactory quality to meet its technical specifications.

The April 28, 2009 EPA HQ Memorandum, Implementation of Buy American provisions of Public Law 111–5, the ''American Recovery and Reinvestment Act of 2009'', defines ''reasonably available quantity'' as the quantity of iron, steel, or relevant manufactured good is available or will be available at the time needed and place needed, and in the proper form or specification as specified in the project plans and design. The County has incorporated specific technical design features for the proposed project based on pilot studies which demonstrated MIEX® treatment is the best alternative.

The County has provided information to the EPA representing that there are currently no resin beads manufactured in the United States that have the exact same product specifications in place. The County has also provided certification from its supplier representing that there are no beads of comparable quality available from a domestic manufacturer to meet its exact specifications. Based on additional research by EPA's consulting contractor (Cadmus), and to the best of the Region's knowledge at this time, there do not appear to be other resin beads available to meet the County's specifications.

Furthermore, the purpose of the ARRA provisions was to stimulate economic recovery by funding current infrastructure construction, not to delay projects that are already shovel ready by requiring entities, like the County, to revise their design and potentially choose a more costly and less efficient project. The imposition of ARRA Buy American requirements on such projects eligible for DWSRF assistance would result in unreasonable delay and thus displace the ''shovel ready'' status for this project. To further delay construction is in direct conflict with the most fundamental economic purposes of ARRA: to create or retain jobs.

The Grants and SRF Section has reviewed this waiver request and has determined that the supporting documentation provided by the County is sufficient to meet the following criteria listed under Section 1605(b) and in the April 28, 2009, Implementation of Buy American provisions of Public Law 111–5, the ''American Recovery and Reinvestment Act of 2009'' Memorandum: Iron, steel, and the manufactured goods are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality. The basis for this project waiver is the authorization provided in Section 1605(b)(2), due to the lack of production of this product in the United States in sufficient and reasonably available quantities and of a satisfactory quality in order to meet the County's design specifications. The March 31, 2009 Delegation of Authority Memorandum provided Regional Administrators with the authority to issue exceptions to Section 1605 of ARRA within the geographic boundaries of their respective regions and with respect to requests by individual grant recipients.

Having established both a proper basis to specify the particular good required for this project, and that this manufactured good was not available from a producer in the United States, the County is hereby granted a waiver from the Buy American requirements of Section 1605(a) of Public Law 111–5 for the purchase of resin beads (MIEX® DOC Resin) supplied by Orica Ltd, in Victoria, Australia and manufactured in Australia as specified in the County's request of June 26, 2009. This supplementary information constitutes the detailed written justification required by Section 1605(c) for waivers based on a finding under subsection (b).

Authority: Public Law 111–5, section 1605.

Dated: October 7, 2009.

J. Scott Gordan,

Acting Regional Administrator, Region 4.

BILLING CODE 6560–50–P

FEDERAL MARITIME COMMISSION

Notice of Agreement Filed

The Commission hereby gives notice of the filing of the following agreement under the Shipping Act of 1984. Interested parties may submit comments on the agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within ten days of the date this notice appears in the **Federal Register**. A copy of the agreement is available through the Commission's Web site (*http://www.fmc.gov*) or by contacting the Office of Agreements at (202)–523–5793 or *tradeanalysis@fmc.gov.*

Agreement No.: 011775–002.

Title: NYK/WWL South America Space Charter Agreement.

Parties: Nippon Yusen Kaisha (''NYK'') and Wallenius Wilhelmsen Lines AS (''WWL'').

Filing Party: Wayne R. Rohde, Esq.; Sher & Blackwell LLP; 1850 M Street, NW.; Suite 900; Washington, DC 20036.

Synopsis: The amendment deletes the U.S. Pacific Coast, Alaska and Hawaii from the geographic scope of the agreement, and authorizes the parties to discuss and agree on the operation of two vessel loops.

Dated: November 20, 2009.

By Order of the Federal Maritime Commission.

Karen V. Gregory,

Secretary.

BILLING CODE 6730–01–P

FEDERAL MARITIME COMMISSION

Ocean Transportation Intermediary License Applicants

Notice is hereby given that the following applicants have filed with the Federal Maritime Commission an application for license as a Non-Vessel-Operating Common Carrier and Ocean Freight Forwarder—Ocean Transportation Intermediary pursuant to section 19 of the Shipping Act of 1984 as amended (46 U.S.C. Chapter 409 and 46 CFR part 515).

Persons knowing of any reason why the following applicants should not receive a license are requested to contact the Office of Transportation Intermediaries, Federal Maritime Commission, Washington, DC 20573.

Non-Vessel-Operating Common Carrier Ocean Transportation Intermediary Applicants

Emarat Shipping Inc., 1106 S Technology Cir., Anaheim, CA 92805. *Officer:* Tareq K. Elbarq, President (Qualifying Individual).

New Pacific Alliance, Inc., 15117 S. Broadway Street, Gardena, CA 90248. *Officer:* Danny Kim, CEO (Qualifying Individual).

Daystar Global Solutions, Inc., 100 Wallace Ave., Ste. 207, Sarasota, FL 34237. *Officer:* Jennifer Chung, President (Qualifying Individual).

All Transport Worldwide, Corp., 2816 Timothy Ave., Redondo Beach, CA 90278. *Officer:* Andres J. Villablanca, CEO (Qualifying Individual).

Non-Vessel-Operating Common Carrier and Ocean Freight Forwarder Transportation Intermediary Applicants

Eagle Transportation, LLC, 63 Ninety Eight Place Blvd., Hattiesburg, MS 39402. *Officers:* Maria Hurtado, Account Executive (Qualifying Individual), Ronnie Sharpe, President.

U.S. Xpress, Inc. dba Xpress Network Solutions, 4080 Jenkins Road, Chattanooga, TN 37421. *Officer:* Christine M. Geror, Freight Forwarding Agent (Qualifying Individual).

Mariam International Ltd. Co. dba Liberty Logistics, 939 Poydras Street, Sugarland, TX 77498. *Officers:* Teresa L. Roberson, Vice President (Qualifying Individual), Suhail Sharief, President.

Ghanem Forwarding, LLC, 1 N Charles Street, Ste. 1200, Baltimore, MD 21201. *Officer:* Wael Ghanem, General Manager (Qualifying Individual).

Triton Overseas Transport, Inc., 3340 Greens Rd., Bldg. A, Ste. 410, Houston, TX 77032. *Officer:* William R. Onorato, President (Qualifying Individual).

Ocean Freight Forwarder—Ocean Transportation Intermediary Applicants

ITT Forwarding, Inc., 2537 S. Gessner, Suite 108, Houston, TX 77063. *Officers:* Edward Schmidt, Vice President (Qualifying Individual), Jon Hulsey, President.

Preferred Movers International, LLC, 49 Forbus Drive, Crossville, TN 38555. *Officers:* Johnny Simon, Vice President (Qualifying Individual), Robert G. Krumpols, President.

Dated: November 20, 2009.

Ocean Transportation Intermediary License Revocations

The Federal Maritime Commission hereby gives notice that the following Ocean Transportation Intermediary licenses have been revoked pursuant to section 19 of the Shipping Act of 1984 (46 U.S.C. Chapter 409) and the regulations of the Commission pertaining to the licensing of Ocean Transportation Intermediaries, 46 CFR

Part 515, effective on the corresponding date shown below:

License Number: 018630N.
Name: American International Shipping Company.
Address: 7 Emily Road, Manalapan, NJ 07726.
Date Revoked: November 7, 2009.
Reason: Failed to maintain a valid bond.

License Number: 014160N.
Name: Cargo Logistics Inc.
Address: 186 Sherman Ave., P.O. Box 186, Glenridge, NJ 07028.
Date Revoked: October 21, 2009.
Reason: Failed to maintain a valid bond.

License Number: 004411N.
Name: Debbie D. Sukhai-Sheffield DBA S & S Enterprises.
Address: 4463 Niobe Circle, Rancho Cordova, CA 95742.
Date Revoked: October 30, 2009.
Reason: Failed to maintain a valid bond.

License Number: 020146N.
Name: Global Carrier Alliance Corp.
Address: 1880 Century Park East, Ste. 900, Los Angeles, CA 90067.
Date Revoked: October 28, 2009.
Reason: Failed to maintain a valid bond.

License Number: 018084F.
Name: Go-Trans (North America) Inc.
Address: 147–32 Farmers Blvd., 2nd Floor, Jamaica, NY 11434.
Date Revoked: August 22, 2009.
Reason: Failed to maintain a valid bond.

License Number: 019788N.
Name: Miriam Family Cargo, Inc.
Address: 18 NW 12th Ave., Miami, FL 33128.
Date Revoked: October 22, 2009.
Reason: Failed to maintain a valid bond.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Announcement of Meeting of the Secretary's Advisory Committee on National Health Promotion and Disease Prevention Objectives for 2020

AGENCY: Department of Health and Human Services, Office of the Secretary, Office of Public Health and Science, Office of Disease Prevention and Health Promotion.

ACTION: Notice of meeting.

Authority: 42 U.S.C. 217a, Section 222 of the Public Health Service Act, as amended. The Committee is governed by the provision of Public Law 92–463, as amended (5 U.S.C. Appendix 2), which sets forth standards for the formation and use of advisory committees.

SUMMARY: The U.S. Department of Health and Human Services (HHS) announces the next federal advisory committee meeting regarding the national health promotion and disease prevention objectives for 2020. This meeting will be open to the public and will be held online via WebEx software. The Secretary's Advisory Committee on National Health Promotion and Disease Prevention Objectives for 2020 will address efforts to develop the nation's health promotion and disease prevention objectives and strategies to improve the health status and reduce health risks for Americans by the year 2020. The Committee will provide to the Secretary of Health and Human Services advice and consultation for developing and implementing the next iteration of national health promotion and disease prevention goals and objectives and provide recommendations for initiatives to occur during the initial implementation phase of the goals and objectives. HHS will use the recommendations to inform the development of the national health promotion and disease prevention objectives for 2020 and the process for implementing the objectives. The intent is to develop and launch objectives designed to improve the health status and reduce health risks for Americans by the year 2020.

DATES: The Committee will meet on December 11, 2009 from 1:30 p.m. to 4:30 p.m. Eastern Standard Time (EST).

ADDRESSES: The meeting will be held online, via WebEx software. For detailed instructions about how to make sure that your windows computer and browser is set up for WebEx, please visit the ''Secretary's Advisory Committee'' Web page of the Healthy People Web site at: *http://www.healthypeople.gov/hp2020/advisory/default.asp.*

FOR FURTHER INFORMATION CONTACT: Emmeline Ochiai, Designated Federal Officer, Secretary's Advisory Committee on National Health Promotion and Disease Prevention Objectives for 2020, U.S. Department of Health and Human Services, Office of Public Health and Science, Office of Disease Prevention and Health Promotion, 1101 Wootton Parkway, Room LL–100, Rockville, MD 20852, (240) 453–8259 (telephone), (240) 453–8281 (fax). Additional information is available on the Internet at *http://www.healthypeople.gov.*

SUPPLEMENTARY INFORMATION:

Purpose of Meeting: Every 10 years, through the Healthy People initiative, HHS leverages scientific insights and lessons from the past decade, along with the new knowledge of current data, trends, and innovations to develop the next iteration of national health promotion and disease prevention objectives. Healthy People provides science-based, 10-year national objectives for promoting health and preventing disease. Since 1979, Healthy People has set and monitored national health objectives to meet a broad range of health needs, encourage collaborations across sectors, guide individuals toward making informed health decisions, and measure the impact of our prevention and health promotion activities. Healthy People

2020 will reflect assessments of major risks to health and wellness, changing public health priorities, and emerging issues related to our nation's health preparedness and prevention.

Public Participation at Meeting: Members of the public are invited to listen to the online Committee meeting. There will be no opportunity for oral public comments during the online Committee meeting. Written comments, however, are welcome throughout the development process of the national health promotion and disease prevention objectives for 2020. They can be submitted through the Healthy People Web site at: *http://www.healthypeople.gov/hp2020/comments/* or they can be e-mailed to *HP2020@hhs.gov*.

To listen to the Committee meeting, individuals must pre-register to attend at the Healthy People Web site located at *http://www.healthypeople.gov.* Participation in the meeting is limited. Registrations will be accepted until maximum WebEx capacity is reached and must be completed by 9 a.m. EST on December 11, 2009. A waiting list will be maintained should registrations exceed WebEx capacity. Individuals on the waiting list will be contacted as additional space for the meeting becomes available.

Registration questions may be directed to Hilary Scherer at *HP2020@norc.org* (e-mail), (301) 634–9374 (phone) or (301) 634–9301 (fax).

Dated: November 18, 2009.

Penelope Slade-Sawyer,

RADM, USPHS, Deputy Assistant Secretary for Health (Disease Prevention and Health Promotion).

BILLING CODE 4150–32–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Agency for Healthcare Research and Quality, HHS.

ACTION: Notice.

SUMMARY: This notice announces the intention of the Agency for Healthcare Research and Quality (AHRQ) to request that the Office of Management and Budget (OMB) approve the proposed information collection project: ''Spreading Techniques to Radically Reduce Antibiotic Resistant Bacteria (Methicillin Resistant Staphylococcus aureus, or MRSA).'' In accordance with the Paperwork Reduction Act, 44 U.S.C. 350 1–3520, AHRQ invites the public to comment on this proposed information collection.

DATES: Comments on this notice must be received by January 25, 2010.

ADDRESSES: Written comments should be submitted to: Doris Lefkowitz, Reports Clearance Officer, AHRQ, by e-mail at *doris.lefkowitz@AHRQ.hhs.gov.*

Copies of the proposed collection plans, data collection instruments, and specific details on the estimated burden can be obtained from the AHRQ Reports Clearance Officer.

FOR FURTHER INFORMATION CONTACT: Doris Lefkowitz, AHRQ Reports Clearance Officer, (301) 427–1477, or by e-mail at *doris.lefkowitz@AHRQ.hhs.gov.*

SUPPLEMENTARY INFORMATION:

Proposed Project

Spreading Techniques To Radically Reduce Antibiotic Resistant Bacteria (Methicillin Resistant Staphylococcus aureus, or MRSA)

Healthcare Acquired Infections (HAIs) caused almost 100,000 deaths among the 2.1 million people who acquired infections while hospitalized in 2000, and HAI rates have risen relentlessly since then. Alarmingly, 70% of HATs are due to bacteria that are resistant to commonly used antibiotics, with Methicillin Resistant Staphylococcus aureus (MRSA) being the most rapidly growing, and among the most virulent, pathogens. Resistance is increasing rapidly in all types of hospitals (Huang 2007). Despite evidence that routinely applied, simple interventions do work, most hospitals have failed to make notable progress in reducing MRSA infections. Hospitals in some European countries and select U.S. hospitals, however, have succeeded with impressive results.

Sites that have already achieved dramatic decreases in their MRSA infection rates have done so by implementing precautions to prevent transmission, using system redesign approaches. Further, many hospitals have successfully instituted isolation procedures for patients suspected to be MRSA carriers. In doing so, these hospitals have followed the broadly disseminated guidelines for hand hygiene and contact isolation precautions. This study is a follow up to a recent study implemented in 6 hospital systems in the Indianapolis metropolitan area that used a ''MRSA intervention bundle'' composed of active surveillance screening, contact isolation precautions, and increased hand hygiene. Preliminary data from that initial study suggest a 60% decrease in MRSA rates in participating intensive care units (ICUs) (Doebbeling, B. Redesigning Hospital Care for Quality and Efficiency Applications of Positive Deviance and Lean in Reducing MRSA. Presentation at AHRQ Annual Meeting, Rockville, MD, Sept 2009).

This study is designed to further test this intervention bundle in non-ICU settings in hospitals currently using the intervention bundle in their ICUs, as well as in additional ICUs in newly recruited hospital systems. This project will utilize the same guidelines and precautions that were applied in the original study, and will add an innovative feature that will use electronic medical record systems to improve identifying, communicating and tracking MRSA infections among healthcare systems. More specifically, this study has five aims:

(1) Further test the ''MRSA intervention bundle'' from the original Indianapolis MRSA study, and test the intervention in additional units in the 4 original Indianapolis hospital systems and an additional 3 hospital systems beyond Indianapolis;

(2) Identify and monitor healthcare associated community onset (HACO) MRSA cases and controls who receive care in participating hospitals and affiliated settings, identify strategies to reduce HACO MRSA and demonstrate reduction of HACO MRSA;

(3) Assess the relative effectiveness of various antibiotics in abatement or eradication of MRSA carriage in hospital patients;

(4) Evaluate the effectiveness of the tested implementation strategies and innovations by applying information technology to enable consistent collection, sharing, analysis and reporting of data;

(5) Disseminate findings and promote outreach to target audiences and other stakeholders.

While many secondary data are available for this study, Aims 1 and 2 involve primary data collection. Use of the intervention bundle requires that opinion leaders and front line workers be equipped with techniques used in the reorganization of healthcare delivery to improve health outcomes (Singhal and Greiner, 2007; IHI, 2005). These techniques will assist in identifying goals, implementing the interventions to meet local needs and measuring and feeding back progress on key processes and outcomes to staff and others.

The study also incorporates an additional informatics surveillance system to allow participating hospitals to more efficiently communicate, share and track MRSA infections. This system will save infection control and clinicians' time—for example, by electronically identifying patients with a known history of drug-resistant infections when they first contact a new institution.

This study is being conducted by AHRQ through its contractor, Indiana University and the Regenstrief Institute, pursuant to AHRQ's statutory authority to conduct and support research on healthcare and on systems for the delivery of such care, including activities with respect to the quality, effectiveness, efficiency, appropriateness and value of healthcare services and with respect to quality measurement and improvement. 42 U.S.C. 299a(a)(l) and (2).

Method of Collection

There will be 3 types of data collection to support the study Aims:

- Electronic medical record data on MRSA infections and rates will be collected from an existing and unique healthcare information exchange (Indiana Network for Patient Care or INPC) in the Indianapolis area, and the CDC's National Healthcare Safety Network (Aims 1–5).
- Data on hand washing, swabbing, and isolation rates will be collected by observation (Aims 1, 2, and 4).
- Four surveys will be conducted: A brief Social Network Analysis (SNA), a Cultural Survey, a Patient Healthcare Use survey, and an Implementation Assessment of key informants (Aims 1, 4, and 5).

The social network analysis questionnaire (SNA) (Wasserman *et al.*, 1994) will be administered to understand with whom hospital personnel work, how hospital networks mature over time and how information is shared. Additionally, cultural beliefs, attitudes, and knowledge will be captured by surveying staff on intervention units of participating hospitals using a cultural questionnaire. To compare changes in the network and cultural beliefs, both the SNA and the cultural questionnaire will be administered to staff at baseline and again one year later. These data will be collected from a sample of staff in the intervention units. Project team leaders will select relevant staff regularly working and providing patient care or direct patient services on the unit in a purposive sample. These staff will receive the paper-based questionnaires during staff meetings and will return them anonymously. A study ID will serve to determine which staff has responded and allow linkage of baseline and follow-up surveys.

The implementation assessment will be an interview obtained quarterly to key informants at each organization to assess the approaches to implementation of the program (*e.g.*, dose, intensity, leadership support, teamwork, etc). This assessment will be a short (10–12) item questionnaire.

Additionally, to better understand the healthcare associated community acquired aspect of MRSA transmission, 200 patients will be surveyed to gather risk factors and healthcare use statistics that we have found in preliminary studies are not otherwise available in electronic databases or medical records.

Estimated Annual Respondent Burden

Exhibit 1 shows the estimated annualized burden hours associated with the hospital's time to participate in this research. Electronic medical record data will be collected weekly from 7 participating hospitals, however only two of these hospitals will use their staff to perform this data collection. Over the course of the project electronic medical record data will be extracted 52 times and each data extraction will take about 10 hours. Observational data will be collected weekly from all participating hospitals, however only 3 hospitals will use their staff to perform the observations. The project will require 52 observations per hospital and are estimated to take about 3 hours to perform.

Both the social network analysis questionnaire and the culture questionnaire will be administered twice, pretest and posttest, to about 75 personnel at each of the 7 hospitals. The social network analysis questionnaire will take about 15 minutes to complete while the culture questionnaire will take 30 minutes. The implementation assessment questionnaire will be administered quarterly to 3 key informants at each hospital and will take about one hour.

The patient healthcare use questionnaire will be completed by 200 patients sampled from the 7 participating hospitals. Each patient will respond once which will require about 15 minutes. The total annualized burden hours for all the associated data collections are estimated to be 2,430. Exhibit 2 shows the estimated annualized cost burden associated with the respondents' time to participate in this research. The total annual cost burden is estimated to be $76,118.

EXHIBIT 1—ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of hospitals	Numer of responses per hospital	Hours per response	Total burden hours
Electronic Medical Record Data Collection	2	52	10	1,040
Observational Data Collection	3	52	3	468
Social Network Analysis Questionnaire	7	150	15/60	263
Culture Questionnaire	7	150	30/60	525
Implementation Assessment Questionnaire	7	12	1	84
Patient Healthcare Use Questionnaire	200	1	15/60	50
Total	226	na	na	2,430

EXHIBIT 2—ESTIMATED ANNUALIZED COST BURDEN

Form name	Number of hospitals	Total burden hours	Average hourly wate rate*	Total cost burden
Electronic Medical Record Data Collection	2	1040	$30.03	$31,231
Observational Data Collection	3	468	$20.98	9,819
Social Network Analysis Questionnaire	7	263	$38.28	10,068

EXHIBIT 2—ESTIMATED ANNUALIZED COST BURDEN—Continued

Form name	Number of hospitals	Total burden hours	Average hourly wate rate*	Total cost burden
Culture Questionnaire	7	525	$38.28	$20,097
Implementation Assessment Questionnaire	7	84	$45.33	$3,808
Patient Healthcare Use Questionnaire	200	50	$21.90	$1,095
Total	226	2,430	na	$76,118

*Based upon the mean of the average wages for Nursing Care Providers ($30.03), Primary Care Physicians ($84.97), Allied Health Providers ($20.98), Administrators, Chief Executives ($76.23) and All Workers ($21.90); National Compensation Survey: Occupational wages in the United States May 2008, ''U.S. Department of Labor, Bureau of Labor Statistics.''

Estimated Annual Costs to the Federal Government

Exhibit 3 shows the total and annualized cost of this project to the Federal Government over a two-year period. The total cost of this project is $1.8 million dollars which includes $785,000 for project development, $70,000 for data collection activities, $235,000 for data analysis, $125,000 for publication of the results, $170,000 for project management and $415,000 for overhead costs.

EXHIBIT 3—ESTIMATED TOTAL AND ANNUALIZED COST

Cost component	Total cost	Annualized cost
Project Development	$785,000	$262,000
Data Collection Activities	$70,000	$35,000
Data Processing and Analysis	$235,000	$78,000
Publication of Results	$125,000	$125,000
Project Management	$170,000	$57,000
Overhead	$415,000	$138,000
Total	$1,800,000	$900,000

Request for Comments

In accordance with the above-cited Paperwork Reduction Act legislation, comments on AHRQ's information collection are requested with regard to any of the following: (a) Whether the proposed collection of information is necessary for the proper performance of AHRQ healthcare research and healthcare information dissemination functions, including whether the information will have practical utility; (b) the accuracy of AHRQ's estimate of burden (including hours and costs) of the proposed collection(s) of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information upon the respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the Agency's subsequent request for OMB approval of the proposed information collection. All comments will become a matter of public record.

Dated: November 16, 2009.

Carolyn M. Clancy,

Director.

BILLING CODE 4160–90–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2008–D–0413]

Guidance for Industry on Residual Solvents in Drug Products Marketed in the United States; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a guidance for industry entitled ''Residual Solvents in Drug Products Marketed in the United States.'' On July 1, 2008, the United States Pharmacopeia (USP) published a new test requirement for the control of residual solvents, General Chapter <467> ''Residual Solvents,'' which replaced USP General Chapter <467> ''Organic Volatile Impurities.'' The change affects all compendial drug products marketed in the United States. This guidance reflects FDA's recommendations on how to comply with those USP changes.

DATES: Submit written or electronic comments on agency guidances at any time.

ADDRESSES: Submit written requests for single copies of the guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, rm. 2201, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. Submit written comments on the guidance to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Submit electronic comments to *http://www.regulations.gov* . See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT: Chris Watts, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, rm. 4142 Silver Spring, MD 20993–0002, 301–796–1625.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for industry entitled ''Residual Solvents in Drug Products Marketed in the United States.'' On August 7, 2008 (73 FR 46020), FDA announced the availability of the draft version of this guidance. The public comment period closed on October 6, 2008. A number of comments were received, which the agency considered carefully as it finalized the guidance. In response to the comments, FDA made appropriate changes. The guidance provides information on how new drug application (NDA) and abbreviated new drug application (ANDA) applicants for noncompendial drug products should limit residual solvents as described in the International Conference on Harmonisation guidance for industry ''Q3C Impurities: Residual Solvents;'' how manufacturers of compendial drug products that are not marketed under an approved NDA or ANDA can comply with the new General Chapter <467> and the Federal Food, Drug, and Cosmetic Act; and how holders of NDAs or ANDAs for compendial drug products should report changes in chemistry, manufacturing, and controls specifications to FDA to comply with the USP General Chapter <467> ''Residual Solvents'' and § 314.70 (21 CFR 314.70).

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the agency's current thinking on USP General Chapter <467> ''Residual Solvents.'' It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.

II. The Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). Information submitted in the chemistry, manufacturing, and controls section of an application under 21 CFR 314.50(d)(1), as well as in amendments to pending applications under 21 CFR 314.60, is approved by OMB under Control Number 0910–0001. Information submitted in an annual report under § 314.70(d)(2)(i) and (d)(3) is approved by OMB under Control Number 0910–0001. Recordkeeping required under 21 CFR 211.165(e) and 211.194(a)(2) is approved by OMB under Control Number 0910–0139.

III. Comments

Interested persons may submit to the Division of Dockets Management (see **ADDRESSES**) written or electronic comments regarding this document. Submit a single copy of electronic comments or two paper copies of any mailed comments, except that individuals may submit one paper copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

IV. Electronic Access

Persons with access to the Internet may obtain the document at either *http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm* or *http://www.regulations.gov*.

Dated: November 19, 2009.

David Horowitz,

Assistant Commissioner for Policy.

National Institutes of Health

Center for Scientific Review; Notice of Meeting

Pursuant to section 10(a) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a meeting of the National Institutes of Health Peer Review Advisory Committee.

The meeting will be open to the public, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

Name of Committee: National Institutes of Health Peer Review Advisory Committee.

Date: February 1, 2010.

Time: 8 a.m. to 5 p.m.

Agenda: Provide technical and scientific advice and recommendations to the NIH Director, the Deputy Director for Extramural Research, and the Director of the Center for Scientific Review (CSR) on all procedures and policies related to the process of peer review by which the scientific and technical merit of NIH grant applications is assessed.

Place: Bethesda North Marriott Hotel & Conference Center, Montgomery County Conference Center Facility, 5701 Marinelli Road, North Bethesda, MD 20852.

Contact Person: Cheryl A. Kitt, PhD, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3030, MSC 7776, Bethesda, MD 20892, 301–435–1112, *kittc@csr.nih.gov*.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

(Catalogue of Federal Domestic Assistance Program Nos. 93.306, Comparative Medicine; 93.333, Clinical Research, 93.306, 93.333, 93.337, 93.393–93.396, 93.837–93.844, 93.846–93.878, 93.892, 93.893, National Institutes of Health, HHS)

Dated: November 17, 2009.

Jennifer Spaeth,

Director, Office of Federal Advisory Committee Policy.

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Mental Health; Notice of Meeting

Pursuant to section 10(a) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of an Interagency Autism Coordinating Committee (IACC) meeting.

The purpose of the IACC meeting is to continue discussing recommendations for the annual update of the IACC Strategic Plan for Autism Spectrum Disorders Research. The IACC meeting will be conducted and available to the public via a telephone conference call and a webinar.

Name of Committee: Interagency Autism Coordinating Committee (IACC)

Type of meeting: Open meeting via conference call and webinar only; no in-person meeting.

Date: December 11, 2009.

Time: 9 a.m. to 1 p.m.* Eastern Time—* Approximate end time.

Meeting Registration: No registration is required to listen to the conference call or view the webinar.

Agenda: To continue discussion on recommendations for the annual update of the IACC Strategic Plan for Autism Spectrum Disorder Research.

Webinar: https://www2.gotomeeting.com/register/906979171.

Conference Call Access: Dial: 888–455–2920. Access code: 9984461.

Contact Person: Ms. Lina Perez, Office of Autism Research Coordination, Office of the Director, National Institute of Mental Health, NIH, 6001 Executive Boulevard, NSC, Room 8200, Bethesda, MD 20892–9669, Phone: (301) 443–6040, E-mail: *IACCPublicInquiries@mail.nih.gov*.

Any interested person may submit written comments to the IACC prior to the meeting by sending the statement to the Contact Person listed on this notice by 5 p.m. ET on December 8, 2009. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person. All written statements received by the deadline will be provided to the IACC for their consideration.

The meeting will be open to the public through a conference call phone number and a webinar conducted using a web presentation tool on the Internet. Individuals who participate using this service and who need special assistance, such as captioning of the conference call or other reasonable accommodations, should submit a request to the contact person listed above at least seven days prior to the meeting. If you experience any technical problems with the Web presentation tool or conference call, please e-mail *IACCTechSupport@acclaroresearch.com*.

Members of the public who participate using the conference call phone number will be able to listen to the meeting but will not be heard. This phone call may end prior to or later than 1 p.m., depending on the needs of the Committee.

To access the webinar on the Internet the following computer capabilities are required: (A) Internet Explorer 5.0 or later, Netscape Navigator 6.0 or later or Mozilla Firefox 1.0 or later; (B) Windows® 2000, XP Home, XP Pro, 2003 Server or Vista; (C) Stable 56k, cable modem, ISDN, DSL or better Internet connection; (D) Minimum of Pentium 400 with 256 MB of RAM (Recommended); (E) Java Virtual Machine enabled (Recommended)

This meeting is being published less than 15 days prior to the meeting due to the timing limitations for completing the updating of the Annual Strategic Plan for Autism Spectrum Disorder Research.

Information about the IACC is available on the Web site: *http://www.iacc.hhs.gov*.

Meeting schedule subject to change.

Dated: November 19, 2009.

Jennifer Spaeth,

Director, Office of Federal Advisory Committee Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Arthritis and Musculoskeletal and Skin Diseases; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Arthritis and Musculoskeletal and Skin Diseases Special Emphasis Panel; Clinical Trial Grant Review.

Date: December 8, 2009.

Time: 2 p.m. to 4 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892 (Telephone Conference Call).

Contact Person: Eric H. Brown, PhD, Scientific Review Officer, National Institute of Arthritis, Musculoskeletal and Skin Diseases, National Institutes of Health, 6701 Democracy Blvd., Room 824, Msc 4872, Bethesda, MD 20892–4872, (301) 594–4955,*browneri@mail.nih.gov*.

Name of Committee: National Institute of Arthritis and Musculoskeletal and Skin Diseases Special Emphasis Panel; Providing Radiologic Outcomes for the Osteoarthritis Initiative.

Date: December 16, 2009.

Time: 10 a.m. to 11:30 a.m.

Agenda: To review and evaluate contract proposals.

Place: National Institutes of Health, One Democracy Plaza, 6701 Democracy Boulevard, Bethesda, MD 20892 (Telephone Conference Call).

Contact Person: Charles N. Rafferty, PhD, Chief, Review Branch, National Institute of Arthritis, Musculoskeletal and Skin Diseases, National Institutes of Health, 6701 Democracy Boulevard, Suite 800, Bethesda, MD 20817, 301–534–4952, *raffertycn@mail.nih.gov*.

Name of Committee: National Institute of Arthritis and Musculoskeletal and Skin Diseases Special Emphasis Panel; Clinical Outcome Instrument Development.

Date: January 26, 2010.

Time: 8 a.m. to 1 p.m.

Agenda: To review and evaluate grant applications.

Place: Embassy Suites at the Chevy Chase Pavilion, 4300 Military Road, NW., Washington, DC 20015.

Contact Person: Michael L. Bloom, PhD., MBA, Scientific Review Officer, National Institute of Arthritis, Musculoskeletal and Skin Diseases, National Institutes of Health, 6701 Democracy Blvd.; Room 820, MSC 4872, Bethesda, MD 20892–4872, 301–594–4953, *Michael_Bloom@nih.gov*.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Agency Information Collection Activities: Application To Establish a Centralized Examination Station

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: 30-Day notice and request for comments; Extension of an existing information collection: 1651–0061.

SUMMARY: U.S. Customs and Border Protection (CBP) of the Department of Homeland Security has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act: Application to Establish a Centralized Examination Station (CES). This is a proposed extension and revision of an information collection that was previously approved. CBP is proposing that this information collection be extended with no change to the burden hours. This document is published to obtain comments from the public and affected agencies. This proposed information collection was previously published in the **Federal Register** (74 FR 48280) on September 22, 2009, allowing for a 60-day comment period. This notice allows for an additional 30 days for public comments. This process is conducted in accordance with 5 CFR 1320.10.

DATES: Written comments should be received on or before December 28, 2009.

ADDRESSES: Interested persons are invited to submit written comments on this proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the OMB Desk Officer for Customs and Border Protection, Department of Homeland Security, and sent via electronic mail to *oira_submission@omb.eop.gov* or faxed to (202) 395–5806.

SUPPLEMENTARY INFORMATION:

U.S. Customs and Border Protection (CBP) encourages the general public and affected Federal agencies to submit written comments and suggestions on proposed and/or continuing information collection requests pursuant to the Paperwork Reduction Act (Pub. L. 104–13). Your comments should address one of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency/component, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agencies/components estimate of the burden of The proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collections of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological techniques or other forms of information.

Title: Application to Establish Centralized Examination Station.

OMB Number: 1651–0061.

Form Number: None.

Abstract: If a port director decides his or her port needs a Centralized Examination Station (CES), the port director announces this need to the public and solicits applications to operate a CES. The information contained in the application will be used to determine the suitability of the applicant's facility, the fairness of his

fee structure, his knowledge of cargo handling operations and his knowledge of CBP procedures.

Current Actions: There are no changes to the information collection. This submission is being made to extend the expiration date.

Type of Review: Extension (without change).

Affected Public: Businesses.

Estimated Number of Respondents: 50.

Estimated Number of Annual Responses per Respondent: 1.

Estimated Time per Response: 2 hours.

Estimated Total Annual Burden Hours: 100.

If additional information is required contact: Tracey Denning, U.S. Customs and Border Protection, Office of Regulations and Rulings, 799 9th Street, NW., 7th Floor, Washington, DC 20229–1177, at 202–325–0265.

Dated: November 19, 2009.

Tracey Denning,

Agency Clearance Officer, U.S. Customs and Border Protection.

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–1829–DR; Docket ID FEMA–2008–0018]

North Dakota; Amendment No. 7 to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of North Dakota (FEMA–1829–DR), dated March 24, 2009, and related determinations.

DATES: *Effective Date:* November 6, 2009.

FOR FURTHER INFORMATION CONTACT: Peggy Miller, Disaster Assistance Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–3886.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated November 6, 2009, the President amended the cost-sharing arrangements regarding Federal funds provided under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), in a letter to W. Craig Fugate, Administrator, Federal Emergency Management Agency, Department of Homeland Security, under Executive Order 12148, as follows:

I have determined that the damage in certain areas of the State of North Dakota resulting from severe storms and flooding during the period of March 13 to August 10, 2009, is of sufficient severity and magnitude that special cost sharing arrangements are warranted regarding Federal funds provided under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (''the Stafford Act'').

Therefore, I amend my declaration of March 24, 2009, to authorize Federal funds for all categories of Public Assistance at 90 percent of total eligible costs.

This adjustment to State and local cost sharing applies only to Public Assistance costs and direct Federal assistance eligible for such adjustments under the law. The Robert T. Stafford Disaster Relief and Emergency Assistance Act specifically prohibits a similar adjustment for funds provided for Other Needs Assistance (Section 408), and the Hazard Mitigation Grant Program (Section 404). These funds will continue to be reimbursed at 75 percent of total eligible costs.

(The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050 Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Dated: November 10, 2009.

Federal Radiological Preparedness Coordinating Committee

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice of public meeting.

SUMMARY: The Federal Radiological Preparedness Coordinating Committee (FRPCC) is holding a public meeting on December 9, 2009 in Washington, DC.

DATES: The meeting will take place on December 9, 2009 from 9 a.m. to 11 a.m. Send written statements and requests to make oral statements to the contact person listed below by close of business November 30, 2009.

ADDRESSES: The meeting will be held in the large first floor conference room in the North building of the Technology World Building Conference Facility located at 800 K St. NW., Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Timothy Greten, FRPCC Executive Secretary, DHS/FEMA, 1800 South Bell Street-CC847, Mail Stop 3025, Arlington, VA 20598–3025; telephone (202) 646–3907; fax (703) 305–0837; or e-mail *timothy.greten@dhs.gov*.

SUPPLEMENTARY INFORMATION: The role and functions of the Federal Radiological Preparedness Coordinating Committee (FRPCC) are described in 44 CFR 351.10(a) and 351.11(a). The FRPCC is holding a public meeting on December 9, 2009, from 9 a.m. to 11 a.m., in the large first floor conference room in the North building of the Technology World Building Conference Facility located at 800 K St. NW., Washington, DC 20024. Please note that the meeting may close early. This meeting is open to the public, subject to the availability of space. Public meeting participants must pre-register to be admitted to the meeting. To pre-register, please provide your name and telephone number by close of business on November 30, 2009, to the individual listed in the **FOR FURTHER INFORMATION CONTACT** section above.

The tentative agenda for the FRPCC meeting includes: (1) Introductions; (2) reports from FRPCC Subcommittees; (3) old business and new business; and (4) business from the floor. The FRPCC Chair shall conduct the meeting in a way that will facilitate the orderly conduct of business. Reasonable provisions will be made, if time permits, for oral statements from the public of not more than five minutes in length. Any member of the public who wishes to make an oral statement at the meeting should send a written request for time by close of business on November 30, 2009, to the individual listed in the **FOR FURTHER INFORMATION CONTACT** section above. Any member of the public who wishes to file a written statement with the FRPCC should provide the statement by close of business on November 30, 2009, to the individual listed in the **FOR FURTHER INFORMATION CONTACT** section above.

Information on Services for Individuals With Disabilities

For information on facilities or services for individuals with disabilities or to request special assistance at the meeting, please write or call the individual listed in the **FOR FURTHER INFORMATION CONTACT** section above as soon as possible.

Authority: 44 CFR 351.10(a) and 351.11(a).

Dated: November 4, 2009.

James R. Kish,

Director, Technological Hazards Division, Chair, Federal Radiological Preparedness Coordinating Committee, National Preparedness Directorate, Department of Homeland Security, Federal Emergency Management Agency.

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

[CBP Dec. 09–43]

Updated List of the Ports-of-Entry Designated for Departure of Nonimmigrant Aliens Who Are Subject to Special Registration

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Notice.

SUMMARY: This notice announces that U.S. Customs and Border Protection is adding two new ports of entry to the list of ports through which nonimmigrant aliens subject to special registration requirements may depart from the United States. The new ports-of-entry include Oakland International Airport, California and Saipan, the Commonwealth of the Northern Mariana Islands. Special registration is required of nonimmigrant aliens whose presence in the United States requires closer monitoring.

DATES: *Effective Date:* Nonimmigrant aliens subject to special registration requirements may depart from the Oakland International Airport, California, effective November 25, 2009, and Saipan, the Commonwealth of the Northern Mariana Islands, effective November 28, 2009.

FOR FURTHER INFORMATION CONTACT: Kenneth Sava, U.S. Customs and Border Protection, Office of Field Operations, at (202) 344–2589.

SUPPLEMENTARY INFORMATION:

Nonimmigrant Aliens Subject to Special Registration Requirements

Certain nonimmigrant aliens, who apply for admission to the United States, are subject to special registration requirements. Upon arrival in the United States, they shall provide information required by the Department of Homeland Security (DHS), such as information relating to their visa status, and they shall be fingerprinted and photographed. Other special registration requirements include appearing at in-person verification or re-registration interviews at the discretion of DHS; providing notice to DHS of any change of address, residence, employment, or educational institution; and reporting departure from the United States to close their registration.

Pursuant to 8 CFR 264.1(f)(2)(i), the Secretary of Homeland Security, in consultation with the Secretary of State, may designate, by publishing a notice in the **Federal Register**, nonimmigrant aliens from certain foreign countries as subject to the special registration requirements. Nonimmigrant aliens, who meet certain pre-existing criteria indicating that such aliens' presence in the United States warrants monitoring due to the national security interests or law enforcement interests of the United States, are also subject to the special registration requirements. *See* 8 CFR 264.1(f)(2)(iii). By regulation, the special registration requirements also apply to any nonimmigrant aliens whom a consular or inspecting officer has reason to believe are nationals or citizens of one of the designated countries. *See* 8 CFR 264.1(f)(2)(ii).

Upon departure from the United States, nonimmigrant aliens subject to the special registration requirements must report to an inspecting officer at and depart from an approved port-of-entry (POE) as set forth by publication in the **Federal Register.**[1] *See* 8 CFR 264.1(f)(8). To date, there have been four **Federal Register** publications designating approved POEs for departure. On September 30, 2002, the former INS published a notice in the **Federal Register** at 67 FR 61352 which sets forth an affirmative list of 68 POEs that could be used for departure by specially registered nonimmigrant aliens. On February 19, 2003, the former INS published a notice in the **Federal Register** at 68 FR 8047, corrected at 68 FR 8967 (Feb. 26, 2003), adding 31 POEs, expanding the listing of POEs approved for departure to 99. Finally, on August 8, 2006, CBP published a notice in the **Federal Register** at 71 FR 45061 updating the listing of POEs by removing one POE from the listing and adding 17 further POEs for a total of 115 POEs that could be used for departure by specially registered nonimmigrant aliens.

[1] An alien who has been specially registered and has not yet departed the United States may seek relief from the departure control requirement for that admission by applying to the U.S. Customs and Border Protection (CBP) field office director for the port from which the alien intends to depart. The alien must establish that exigent or unusual circumstances exist and that the alien warrants a favorable exercise of discretion. *See* 8 CFR 264.1(f)(7)(i).

This notice expands the August 8, 2006 listing by adding two POEs.

Additional Ports-of-Entry Designated for Final Registration and Departure by Nonimmigrant Aliens Subject to Special Registration

Effective November 25, 2009, Oakland International Airport, California, is designated as a POE authorized to provide final registration and departure by nonimmigrant aliens subject to special registration.

Effective November 28, 2009, Saipan, the Commonwealth of the Northern Mariana Islands, is designated as a POE authorized to provide final registration and departure by nonimmigrant aliens subject to special registration.

Ports-of-Entry Which Are Not Authorized for the Departure of Nonimmigrant Aliens Subject to Special Registration

Due to the limited availability of resources, specifically departure staff and facilities, CBP must limit the POEs authorized for departure registration to effectively capture departure data. Nonimmigrant aliens who are subject to special registration may not depart the United States from any POE, or from any other location, other than those listed below.

Ports-of-Entry Designated for Final Registration and Departure by Nonimmigrant Aliens Subject to Special Registration: Updated List

The below updated list of POEs includes all POEs designated for final registration and departure by nonimmigrant aliens subject to special registration, including the two POEs added by this notice. Nonimmigrant aliens subject to special registration may be examined by CBP and may depart from the following POEs:

Amistad Dam POE, Texas;
Alcan POE, Alaska;
Anchorage International Airport, Alaska;
Atlanta Hartsfield International Airport, Georgia;
Baltimore Washington International Airport, Maryland;
Boeing Field, Seattle, Washington;
Bridge of the Americas POE, Texas;
Brownsville/Matamoros POE, Texas;
Buffalo Peace Bridge POE, New York;
Cape Vincent POE, New York;
Calexico POE, California;
Calais POE, Maine;
Cape Canaveral Seaport, Florida;
Chicago Midway Airport, Illinois;
Chicago O'Hare International Airport, Illinois;
Champlain POE, New York;
Charlotte International Airport, North Carolina;
Chateaugay POE, New York;
Cincinnati/Northern Kentucky International Airport, Ohio;
Cleveland International Airport, Ohio;
Columbus POE, New Mexico;
Cyril E. King Airport, United States Virgin Islands;
Dallas/Fort Worth International Airport, Texas;
Del Rio International Bridge POE, Texas;
Denver International Airport, Colorado;
Derby Line POE, Vermont;
Detroit International (Ambassador) Bridge POE, Michigan;
Detroit Canada Tunnel, Michigan;
Detroit Metro Airport, Michigan;
Douglas POE, Arizona;
Dunseith POE, North Dakota;
Eagle Pass POE, Texas;
Eastport POE, Idaho;
Fort Covington POE, New York;
Fort Duncan Bridge POE, Texas;
Frontier POE, Washington;
Galveston POE, Texas;
Grand Portage POE, Minnesota;
Guam International Airport;
Heart Island POE, New York;
Hidalgo POE, Texas;
Highgate Springs POE, Vermont;
Honolulu International Airport, Hawaii;
Honolulu Seaport, Hawaii;
Houlton POE, Maine;
Houston George Bush Intercontinental Airport, Texas;
Houston Seaport, Texas;
International Falls POE, Minnesota;
Jacksonville Seaport, Florida;
John F. Kennedy International Airport, New York;
Ketchikan Seaport, Alaska;
Kona International Airport and Seaport, Hawaii;
Gateway to the Americas Bridge POE, Laredo, Texas;
Las Vegas (McCarran) International Airport, Nevada;
Lewiston Bridge POE, New York;
Logan International Airport, Massachusetts;
Long Beach Seaport, California;
Los Angeles International Airport, California;
Lukeville, Arizona;
Madawaska POE, Maine;
Mayaguez Seaport, Puerto Rico;
Melbourne International Airport, Florida;
Memphis International Airport;
Miami International Airport, Florida;
Miami Marine Unit, Florida;
Minneapolis/St. Paul International Airport, Minnesota;
Mooers POE, New York;
New Orleans International Airport and Seaport;
Niagara Falls, Rainbow Bridge, New York;
Newark International Airport, New Jersey;
Nogales POE, Arizona;
Oakland International Airport, California;
Ogdensburg POE, New York;
Orlando, Florida;
Oroville POE, Washington;
Otay Mesa POE, California;
Pacific Highway POE, Washington;
Pembina POE, North Dakota;
Philadelphia International Airport, Pennsylvania;
Phoenix (Sky Harbor) International Airport, Arizona;
Piegan POE, Montana;
Pittsburgh International Airport, Pennsylvania;
Point Roberts POE, Washington;
Ponce Seaport, Puerto Rico;
Port Everglades Seaport, Florida;
Port Arthur POE, Texas;
Port Huron POE, Michigan;
Portal POE, North Dakota;
Portland International Airport, Oregon;
Progreso Bridge POE, Texas;
Raymond POE, Montana;
Rochester International Airport, Minnesota;
Rochester-Ferry Terminal, New York;
Roosville POE, Montana;
Rouses Point POE, New York;
Saipan, the Commonwealth of the Northern Mariana Islands (on or after November 28, 2009);
San Antonio International Airport, Texas;
San Diego (Lindbergh Field) International Airport, California;
San Diego Seaport, California;
San Francisco International Airport, California;
San Juan International Airport and Seaport, Puerto Rico;
Sanford International Airport, Florida;
Sault Ste. Marie POE, Michigan;
Savannah International Airport, Georgia;
Seaway International Bridge/Massena POE, New York;
Seattle Tacoma International Airport, Washington;
Southwest Florida International Airport, Florida;
St. Petersburg/Clearwater International Airport, Florida;
St. Louis International Airport (Lambert Field), Missouri;
St. Thomas Seaport, U.S. Virgin Islands;
Sumas POE, Washington;
Sweetgrass POE, Montana;
Tampa International Airport and Seaport, Florida;
Thousand Islands POE, New York;
Trout River POE, New York;
Washington Dulles International Airport, Virginia; and
Ysleta POE, Texas.

Notice of Where To Report for Final Registration and Departure

The regulations governing the manner in which aliens are registered in the

United States are contained in 8 CFR 264.1. Upon registration, whether registered at a POE upon admission to the United States or subsequent to admission, each nonimmigrant alien subject to special registration will be issued an information packet that will list each POE authorized for departure and other instructions on how to comply with 8 CFR 264.1. This packet will also contain specific information regarding hours of operation, directions and contact numbers.

This updated list will also be available on the following Web site: *http://www.cbp.gov/linkhandler/cgov/travel/id_visa/nseers/nseers_ports.ctt/nseers_ports.doc.* CBP will announce any changes to the list of POEs by notice in the **Federal Register** and will make the list available on the above Web site.

Dated: November 23, 2009.

Jayson P. Ahern,

Acting Commissioner, U.S. Customs and Border Protection.

[FR Doc. E9–28418 Filed 11–23–09; 4:15 pm]

BILLING CODE 9111–14–P

DEPARTMENT OF THE INTERIOR

National Park Service

Final White-tailed Deer Management Plan, Environmental Impact Statement, Valley Forge National Historical Park, PA

AGENCY: National Park Service, Department of the Interior.

ACTION: Notice of Availability of the Record of Decision for the Final White-tailed Deer Management Plan and Environmental Impact Statement for Valley Forge National Historical Park.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the National Park Service (NPS) announces the availability of the Record of Decision for the Final White-tailed Deer Management Plan/Environmental Impact Statement (Final plan/EIS) for Valley Forge National Historical Park, Pennsylvania. The Regional Director, Northeast Region, has approved the Record of Decision for the Final plan/EIS, selecting Alternative D, Combined Lethal and Nonlethal Actions, which was described as the NPS preferred alternative in the Final plan/EIS, released to the public for the required 30-day no-action period beginning August 28, 2009 and ending September 28, 2009. The Record of Decision includes a statement of the decision made, synopses of other alternatives considered, the basis for the decision, a description of the environmentally preferred alternative, a finding on impairment of park resources and values, a description of consistency with Section 101(b) of the National Environmental Policy Act, a listing of measures to minimize environmental harm, and an overview of public involvement in the decision-making process. As soon as practicable, the National Park Service will begin to implement the selected alternative.

Copies of the Record of Decision may be downloaded from the NPS Planning, Environment and Public Comment (PEPC) Web site (*http://parkplanning.nps.gov/vafo*) or a hardcopy may be obtained from the contact listed below.

FOR FURTHER INFORMATION CONTACT: Kristina M. Heister, Natural Resource Manager, Valley Forge National Historical Park, 1400 North Outer Line Drive, King of Prussia, PA 19406, (610) 783–0252, or online at *http://parkplanning.nps.gov/vafo.*

SUPPLEMENTARY INFORMATION: Development of the Environmental Impact Statement for the White-tailed Deer Management Plan for Valley Forge National Historical Park was initiated in 2006, pursuant to the 2006 House Appropriations Report (HR 109–465): ''The public has been patient as the NPS has worked through its process in regard to management of the over-abundance of white-tailed deer at the park. Within existing funds, NPS is directed to begin the environmental impact statement for deer management. The Committee expects that the plan will be funded fully so that it can be completed in fiscal year 2008. The Committee further expects that implementation of the selected action will begin immediately upon signing of the Record of Decision.''

The purpose of the plan/EIS is to develop a white-tailed deer management strategy that supports long-term protection, preservation, and restoration of native vegetation and other natural and cultural resources while maintaining a deer population at Valley Forge NHP. Forest regeneration has been selected as the primary measure of plan success. Although other factors may affect forest regeneration, such as the forest canopy, nonnative invasive species, pests/disease, fire, and forest fragmentation, this plan focuses on the role and impact of white-tailed deer in the ecological environment, which has been documented through research and long-term monitoring at Valley Forge NHP. The secondary purpose of the plan/EIS is to provide appropriate response to chronic wasting disease (CWD), a fatal, neurological disease identified in free-ranging and captive mule deer, white-tailed deer, elk, and moose. CWD is not currently known to be present in the park or the Commonwealth of Pennsylvania; however, changes in the proximity of CWD to the park boundary and other risk factors have resulted in an elevated risk of CWD occurrence within the park; therefore, integration of CWD response into white-tailed deer management represents an effort on the part of the NPS to be proactive and fully prepared given the high level of risk of the park for exposure to and amplification of CWD.

The following objectives related to deer management at Valley Forge NHP were developed for the plan.

Vegetation

- Protect arid promote restoration of the natural abundance, distribution, structure, and composition of native plant communities by reducing deer browsing.
- Reduce deer browsing pressure enough to promote tree and shrub regeneration that results in a diverse forest structure dominated by native species.
- Promote a mix of native herbaceous plant species and reduce the competitive advantage of invasive, nonnative plant species.

Wildlife and Wildlife Habitat

- Maintain a white-tailed deer population within the park that allows for protection and restoration of native plant communities.
- Protect and preserve other native wildlife species by promoting the restoration of native plant communities.
- Reduce the probability of occurrence, promote early detection, and reduce the probability of spread of chronic wasting disease.

Threatened, Endangered, and Special Status Species

- Protect and promote restoration of special status plant and animal species and their habitat.

Cultural Resources

- Protect the integrity of the cultural landscape, including the patterns of open versus wooded land, commemorative plantings, and vegetative screenings.
- Protect archeological resources by promoting the growth and maintenance of native vegetative cover and reducing trampling and soil erosion.

The NPS has selected Alternative D (Combined Lethal and Nonlethal Actions), which was described as the NPS preferred alternative in the Final

plan/ETS. The selected alternative continues current deer management actions, including vegetation and deer population monitoring, small fenced areas, roadkill removal, public education, coordination with the PGC, and CWD monitoring and response. In addition, the selected alternative includes two lethal actions (sharpshooting and capture and euthanasia in certain circumstances where sharpshooting is not appropriate) that will be used in combination to reduce deer population size and a non-lethal action (reproductive control) to maintain the deer population at the desired density. These actions will be conducted by qualified Federal employees or contractors. The selected alternative establishes a range of 31 to 35 deer per square mile as the initial deer density goal. This deer density is consistent with the density range reported in the scientific literature as necessary for adequate tree regeneration and reflects the documented deer density at the park in 1983, when habitat was considered in good condition. Up to four years will be required to reach this goal given the limited accessibility of some areas and increased difficulty in locating deer as the population size decreases.

Forest regeneration has been selected as the primary measure of plan success; therefore, tree seedlings will be monitored to determine at what point the browsing impacts will warrant implementation of the management actions contained in the selected alternative. Because the goal is to manage for successful forest regeneration within the park and not for deer density, the selected alternative incorporates an adaptive management strategy to better manage based on the uncertainty concerning the impacts the change in deer population densities will have on vegetation recovery. The results of deer removal would be documented annually through monitoring of forest regeneration so that the number of deer to be removed could be adjusted based on the response of the vegetation to a lower deer density. If monitoring indicated that vegetation was not regenerating, management actions would be adjusted.

By using an adaptive management approach, park managers will be able to change the timing or intensity of management treatments to better meet the goals of the plan as new information is obtained.

The selected alternative includes measures to respond to detection of CWD. Should chronic wasting disease (CWD) be confirmed within five miles of the park boundary or the park falls within a State established CWD-containment zone then active lethal surveillance will be implemented (lethal removal of deer for the purposes of assessing disease presence, prevalence, and distribution). Portions of the plan related to CWD were prepared in cooperation with the Pennsylvania Game Commission.

In addition to the selected alternative, two other action alternatives and the no action alternative were presented and analyzed in the Draft and Final Environmental Impact Statements.

Alternative A (no action) would continue the existing deer management activities of monitoring deer population size and vegetation, small scale fencing of selected vegetation, removal of deer killed on roadways, public education, coordination with the Pennsylvania Game Commission, and continuation of limited CWD surveillance; no new deer management actions would be implemented.

Alternative B, Combined Nonlethal Actions, would combine several non-lethal actions, including large-scale rotational fencing of 10% to 15% of the park's forested area and reproductive control of does to gradually reduce deer population in the park. Chronic wasting disease surveillance would include live testing (via tonsillar biopsy) and removal of CWD-positive individuals.

Alternative C, Combined Lethal Actions, would use qualified Federal employees or contractors to directly reduce the deer population in the park through sharpshooting and through capture and euthanasia, where appropriate. CWD response would include rapid reduction of the deer population to the target deer density and the potential for a one-time reduction action to not less than 10 deer per square mile through sharpshooting and through capture and euthanasia. These actions would be taken for the purposes of assessing disease presence, prevalence, and distribution. These actions may also minimize the likelihood of CWD becoming established, minimize the likelihood of amplification and spread if the disease is introduced, and promote elimination of CWD, if possible.

To identify the selected alternative, the planning team ranked each alternative based on: (1) The ability to meet the individual plan objectives; and (2) the potential impacts on the environment. The rankings were added up to determine which alternative best met the objectives. Alternatives C and D were closely ranked in their ability to meet all of the objectives. The NPS also considered the safety of implementing each alternative in identifying the selected alternative. Under Alternative D, the time that shooting would occur in the park would be less than under Alternative C. Because Alternative D maintains the efficiency of Alternative C in meeting the plan objectives and further improves safety by reducing the time that sharpshooting activities would occur in the park, Alternative D was selected for implementation.

The foreseeable environmental consequences of the selected alternative were fully assessed and documented in the Final plan/EIS. All practicable means to avoid and minimize environmental harm that could result from implementation of the selected alternative have been identified and incorporated into the selected alternative. After review of the potential environmental effects, the alternative selected for implementation will not impair park resources or values and will not violate the NPS Organic Act.

This decision is the result of a public planning process that began in 2006. At different points in the development of the plan/EIS, the NPS provided information and updates via newsletters, news releases, public meetings, the park Web site, and briefings. A Notice of Intent to prepare an ETS was published in the **Federal Register** on September 7, 2006, initiating a 90-day public scoping period between September 7, 2006 and December 8, 2006. Two public scoping meetings were held to facilitate the public involvement process early in the planning stage and to obtain community feedback on the initial concepts for deer management at Valley Forge NHP. The results of public scoping were documented in a Public Comment Analysis Report which was provided for public review on the park Web site (*http://www.nps.gov/vafo*) and on PEPC (*http://parkplanning.nps.gov/vafo*).

A Notice of Availability of the Draft White-tailed Deer Management Plan/EIS (Draft plan/EIS) for Valley Forge NHP was published in the **Federal Register** on December 19, 2008. The Draft plan/EIS was available for a 60-day public and agency review from December 19, 2008 through February 17, 2009. Copies of the document were distributed to individuals, agencies, organizations, and local libraries. Two public meetings were held in January, 2009. Comments received on the Draft plan/EIS related to general lethal reduction, objectives in taking action, and the preferred combined lethal and nonlethal alternative. The majority of these comments were nonsubstantive. Comments in support of Alternative D: Combined Lethal and Nonlethal Actions were the second most common

comment. Comments received on the Draft plan/EIS resulted in minor factual changes to the text, and an update of Appendix E: Review of White-tailed Deer Reproductive Control, with current literature, expert review and comments, and more detailed explanation of criteria for an acceptable chemical reproductive control agent. Associated sections of the Final plan/EIS were updated to reflect changes to Appendix E. A summary of public comments and NPS responses is contained in Appendix F of the Final plan/EIS. A Notice of Availability of the Final plan/EIS was published in the **Federal Register** on August 28, 2009. The 30-day no-action period ended on September 28, 2009.

The official primarily responsible for implementing the updated General Management Plan is the Superintendent of Valley Forge National Historical Park.

Dennis R. Reidenbach,

Regional Director, Northeast Region, National Park Service.

BILLING CODE M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Kalispel Tribe of Indians Tobacco and Liquor Code

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This notice publishes an amendment to the Kalispel Tribe of Indians' Tobacco and Liquor Code published in the **Federal Register** August 1, 1979 (44 FR 45258). The amendment regulates and controls the possession and consumption of liquor within the Tribal lands. The Tribal lands are located in Indian country and this amended Code allows for possession of alcoholic beverages within their boundaries. This Ordinance will increase the ability of the Tribal government to control liquor sales, possession and consumption by the community and its members.

DATES: *Effective Date:* This amended Code is effective on December 28, 2009.

FOR FURTHER INFORMATION CONTACT: Betty Scissons, Tribal Government Services Officer, Northwest Regional Office, 911 NE. 11th Ave., 8th Floor, Portland, OR 97232, Telephone: (503) 231–6723, Fax (503) 231–2189; or Elizabeth Colliflower, Office of Indian Services, 1849 C Street NW., Mail Stop 4513–MIB, Washington, DC 20240, Telephone: (202) 513–7640.

SUPPLEMENTARY INFORMATION: Pursuant to the Act of August 15, 1953, Public Law 83–277, 67 Stat. 586, 18 U.S.C. 1161, as interpreted by the Supreme Court in *Rice* v. *Rehner,* 463 U.S. 713 (1983), the Secretary of the Interior shall certify and publish in the **Federal Register** notice of adopted or amended liquor ordinances or codes for the purpose of regulating liquor transactions in Indian country. The Kalispel Tribe of Indians amended its Tribal Tobacco and Liquor Code by Resolution No. 2008–45 on July 22, 2008. The purpose of this Code is to govern the sale and possession of alcohol within Tribal lands of the Tribe. This notice is published in accordance with the authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs. I certify that the amended Tobacco and Liquor Code for the Kalispel Tribe of Indians was duly adopted by the Kalispel Tribe's Business Committee on July 22, 2008.

Dated: November 17, 2009.

Larry Echo Hawk,

Assistant Secretary—Indian Affairs.

The amended Kalispell Tribe of Indian's Tobacco and Liquor Code reads as follows:

Chapter 10

Kalispel Tobacco and Liquor Code

§ 10–1 Title and Purpose.

10–1.01 Title.

This chapter shall be known as the Kalispel Tobacco and Liquor Code.

10–1.02 Purpose

This Code is enacted to:

1. Regulate the distribution and sale of tobacco products on the Kalispel Reservation in conformity with the compact between the Kalispel Tribe and the State of Washington.

2. Regulate the distribution and sale of liquor and beer products on the Kalispel Reservation in conformity with 18 U.S.C. 1161 and any Tribal-State liquor compact.

3. Regulate tobacco, liquor and beer products in order to protect and promote the general health, safety and welfare of members of the Kalispel Tribe.

4. Generate revenue to fund needed Tribal programs and services.

§ 10–2 Definitions.

10–2.01 Definitions

Unless otherwise required by the context, the following words and phrases shall have the designated meanings:

1. ''Alcohol'' is that substance known as ethyl alcohol, hydrated oxide of ethyl, or spirit of wine, which is produced by the fermentation or distillation of grain, starch, molasses, or sugar, or other substance including all dilutions and mixtures of this substance.

2. ''Beer'' means any malt beverage, flavored malt beverage, or malt liquor as these terms are defined in this chapter.

3. ''Cigarette'' shall mean any roll for smoking made wholly or in part of tobacco being flavored, adulterated, or mixed with any other ingredients, where such wrapper is wholly or in the greater part made of paper of any material except where such is wholly or in the greater part made of natural leaf tobacco in its natural state.

4. ''Commercial Sale'' shall mean the transfer, exchange or barter, in any or by any means whatsoever for a consideration, by any person, association, partnership, or corporation, of cigarettes, tobacco products and/or liquor and beer products.

5. ''Council'' shall mean the Kalispel Tribal Business Committee as constituted by Article III of the Constitution and By-laws of the Kalispel Indian Tribe, Washington.

6. ''Distributor'' shall mean a person who buys liquor in any variety from a brewery, distillery, vineyard, foreign source outside of the United States, and includes any representatives of such a source such as a brewer or brewer agent.

7. ''Liquor'' includes the four varieties of liquor herein defined (alcohol, spirits, wine and beer), and all fermented, spirituous, vinous, or malt liquor, or combinations thereof, and mixed liquor, a part of which is fermented, spirituous, vinous or malt liquor, or otherwise intoxicating; and every liquid or solid or semisolid or other substance, patented or not, containing alcohol, spirits, wine or beer, and all drinks or drinkable liquids and all preparations or mixtures capable of human consumption, and any liquid, semisolid, solid, or other substance, which contains more than one percent of alcohol by weight shall be conclusively deemed to be intoxicating. Liquor does not include confections or food products that contain one percent or less of alcohol by weight.

8. ''Liquor Outlet'' shall mean a Tribally licensed retail sales business selling liquor or beer on the Kalispel Indian Reservation.

9. ''Malt Beverage'' or ''malt liquor'' means any beverage such as beer, ale, lager, stout, porter, flavored malt beverages such as wine coolers, or Guinness obtained by the alcoholic fermentation of an infusion or decoction of pure hops, or the pure extract of hops and pure barley malt or other

wholesome grain or cereal in pure water containing not more than eight percent of alcohol by weight, and not less than one-half of one percent of alcohol by volume. Any such beverage containing more than eight percent of alcohol by weight shall be referred to as *strong beer.*

10. ''Member'' shall mean any person whose name appears on the official roll of the Kalispel Indian Tribe.

11. ''Operator'' shall mean an enrolled member of the Kalispel Tribe, enrolled member of another Federally recognized Tribe, a Tribal leasee or Tribally-licensed business entity licensed by the Kalispel Tribe of Indians to operate a tobacco and/or liquor and beer outlet.

12. ''Reservation'' shall mean the Kalispel Indian Reservation as set apart by Executive Order of March 23,1914, and all other lands, wherever located, owned by the Kalispel Tribe of Indians, including lands held in fee, or any interest in lands held by the Tribe, whether or not such lands or interests are held in trust for the Tribe by the United States, and any lands, wherever located, held in trust by the United States for a member or members of the Kalispel Tribe of Indians unless located on another Federally recognized Indian Tribe's Reservation and having already been determined by the Federal Government to be in ''reservation'' status as to a Tribe other than the Kalispel Tribe of Indians. All waterways, roadways, rights of way, public lands, lakes and streams located on the above described lands held by the Tribe or its members are considered Reservation lands, subject to applicable Federal and Tribal laws and regulations.

13. ''Spirits'' shall mean any beverage which contains alcohol obtained by distillation and intended for consumption.

14. ''Tobacco Outlet'' shall mean a Tribally licensed retail sales business selling tobacco products on the Kalispel Indian Reservation.

15. ''Tobacco Products'' shall mean cigars, cheroots, stogies, granulated, plug cut, crim cut, ready rubbed, and other smoking tobacco, snuff, cavendish, snuff flour, plug and twist tobacco, fine cut and other chewing tobaccos shorts and other kinds and forms of tobacco, prepared in such a manner as to be suitable for chewing or smoking in a pipe or otherwise, or both for smoking and chewing. Tobacco products shall not include cigarettes.

16. ''Tribe'' shall mean the Kalispel Indian Community of the Kalispel Indian Reservation, Washington.

17. ''Wholesale Price'' shall mean the established price for which cigarettes, tobacco products and/or liquor and beer products are sold to the Kalispel Indian Tribe or any licensed operator by the manufacturer or distributor, exclusive of any discount or other reduction.

18. ''Wine'' shall mean any alcoholic beverage obtained by fermentation of fruits or other agricultural products containing sugar and containing not more than twenty-four percent alcohol by volume and not less than one-half of one percent of alcohol by volume. For purposes of this chapter, ''wine coolers'' shall not be defined as wine but rather as a ''malt beverage''.

§ 10–3 Kalispel Tobacco, Liquor and Beer Control Commission.

10–3.01 Creation and Authority

The Kalispel Business Committee shall be the Kalispel Tobacco, Liquor and Beer Control Commission. The Commission is empowered to:

1. Administer this Code by exercising general control, management, and supervision of all tobacco and/or liquor and beer sales, places of sale and sales outlets as well as exercising all powers necessary to accomplish the purposes of this Code;

2. Adopt and enforce rules and regulations in furtherance of the purposes of this Code and in the performance of its administrative functions.

10–3.02 Records Confidential

All records of the Kalispel Tobacco, Liquor and Beer Commission showing purchase of liquor by any individual or group shall be confidential and shall not be inspected except by members or employees of the Kalispel Tobacco, Liquor and Beer Commission or its authorized representative.

§ 10–4 Generally Applicable Regulations

10–4.01 Conformity with State and Federal Laws.

Operators of tobacco and/or liquor and beer outlets shall comply with applicable Tribal/State compact requirements and State of Washington liquor standards to the extent required by 18 U.S.C. 1161. However, total jurisdiction over the sale of liquor and beer products is reserved to and exercised by the Kalispel Tobacco, Liquor and Beer Commission within the boundaries of the Kalispel Indian Reservation.

10–4.02 Sales to Persons Apparently Intoxicated

Any person who sells, gives or otherwise provides liquor, wine or beer to a person apparently under the influence of liquor shall be in violation of this Chapter.

10–4.03 Identification for Sale Required—Proof of Minimum Age

Where there may be question of a person's right to purchase cigarettes, tobacco products or alcoholic beverages by reason of his or her age, such person shall be required to present any one of the following officially issued cards of identification which shows correct age and bears his or her signature and photograph:

1. Driver's license of any State or Identification Card issued by any State Department of Motor Vehicles;

2. United States Active Duty Military Identification;

3. Passport;

4. Tribal Identification Card approved by the Washington State Liquor Control Board;

5. Kalispel Tribal Identification or Enrollment card.

10–4.04 Expired Identification Not Valid

An officially issued identification card described in Section 10–4.02 must be current to be valid identification. An officially issued identification card that is expired is not valid identification for the purpose of purchasing cigarettes, tobacco products or alcoholic beverages.

10–4.05 Sales to Minors Prohibited

It shall be unlawful to:

1. Provide, give, sell or otherwise supply liquor, beer or other alcoholic beverages to any person under twenty-one (21) years of age, either for his or her own use or for the use of his or her parents or for the use of any other person.

2. Provide, give, sell or otherwise supply cigarettes or tobacco products to any person under eighteen (18) years of age, either for his or her own use or for the use of his or her parents or for the use of any other person.

10–4.06 Employment of Minors

No person under the age of twenty-one (21) years shall be employed in any service in connection with the sale, handling or dispensing of liquor, either on a paid or voluntary basis, except as otherwise provided herein.

1. Northern Quest Casino employees must be twenty-one (21) years of age to be employed in a position involving the sale or dispensing of liquor. Northern Quest Casino employees under twenty-one (21) years of age shall not sell or dispense liquor. Individuals under twenty-one (21) years of age may be employed as:

(a) Servers not working on the gaming floor who handle beer, wine and liquor

provided they have successfully completed Mandatory Alcohol Server Training (MAST) and there is direct supervision by an adult twenty-one (21) years of age or older; or

(b) As cashiers, greeters, cooks or custodians, or as a gaming employee as defined in Kalispel Tribal Code § 11–11.02(B), where they are not selling or handling beer, wine or liquor.

2. Non-gaming facility employees eighteen (18) years or older may sell and handle beer or wine not to be consumed on the premises provided that they have successfully completed Mandatory Alcohol Server Training (MAST) and there is direct supervision by an adult twenty-one (21) years of age or older.

10–4.07 Consumption of Liquor Upon Licensed Premises Prohibited

No Tribal operator shall permit any person to open or consume liquor on his or her premises or any premises adjacent thereto and in his or her control. This prohibition shall not apply to lawful sales and consumption of alcohol at the Kalispel Tribe's Northern Quest Casino located on the Reservation lands in Airway Heights, Washington or upon approval of the Commission of additional licensed liquor outlets on Reservation lands acquired in the future.

10–4.08 Conduct on Licensed Premises

1. No Tribal operator shall be disorderly, boisterous or intoxicated on the licensed premises or on any public premises adjacent thereto which are under his or her control, nor shall he or she permit any disorderly boisterous or intoxicated person to be thereon.

2. No operator or employee shall consume liquor of any kind while working on the licensed premises.

3. No Tribal operator shall encourage, sanction or knowingly permit any activity that would be in violation of Chapter 9 of the Kalispel Tribe Law and Order Code.

§ 10–5 Tribal Taxation of Tobacco and Liquor

10–5.01 Tribal Cigarette Tax

The Kalispel Tribe will levy a tax on the retail sale of each pack of cigarettes, the amount of which is established by the cigarette tax compact between the Kalispel Tribe and the State of Washington.

10–5.02 Tribal Tobacco Product Tax

Other tobacco products, excluding cigarettes, shall be taxed at a rate determined to be fair and equitable by the Commission, but the Commission may establish tax rates dependent solely on the given class of merchandise.

10–5.03 Exemption From Cigarette and Tobacco Tax

An operator may, upon approval of the Commission and in a non-discriminatory manner, exempt enrolled members of the Kalispel Tribe and enrolled members of another Federally recognized Indian Tribe, band, or Alaskan Native, or a member of the Canadian First Nations, from imposition of the Tribe's cigarette and tobacco product taxes, provided, however, the individual present a valid Tribal identification card upon purchase of the cigarettes or tobacco products.

10–5.04 Tribal Alcoholic Beverage Tax

All alcoholic beverages, including packaged liquor, wine and beer, and those products dispensed for consumption at a licensed liquor outlet, shall be taxed at a rate determined to be fair and equitable by the Commission, but the Commission may establish tax rates dependent solely on the given class of merchandise.

10–5.05 Added to Retail Price

The excise taxes levied hereunder shall be added to the retail selling price of cigarettes, tobacco products, and alcoholic beverages sold to the ultimate consumer.

10–5.06 Use and Allocation of Revenue

The excise taxes levied hereunder shall be placed in the General Fund of the Kalispel Tribe. The revenue may be allocated at the discretion of the Tribal Council to Tribal projects and expenses for essential government services.

§ 10–6 Application for Tobacco Outlet License or Liquor and Beer Outlet License

10–6.01 Eligibility for Application

Any enrolled member of the Kalispel Indian Tribe, an enrolled member of another Federally recognized Tribe, a Tribal leasee or a Tribally-licensed business entity may apply to the Commission for a tobacco outlet license and/or a liquor and beer outlet license.

10–6.02 Processing of Application

The Tribal secretary-treasurer shall receive and process applications, and be the official representative of the Tribe and Commission in matters relating to tobacco and/or liquor and beer outlets excise tax collections and related matters. The Commission or its authorized representative shall obtain additional information as deemed appropriate. If the Commission or its authorized representative is satisfied that the applicant is a suitable and reputable person, the Commission or its authorized representative may issue a license for the sale of tobacco products and/or liquor and beer products.

10–6.03 Application Fee

Each application shall be accompanied by an application charge or fee of fifty dollars ($50.00). An application for both a tobacco outlet license and a liquor and beer outlet license shall be considered to be two applications with an application charge of fifty dollars ($50.00) each.

10–6.04 Issuance of License

Upon approval of an application, the Commission shall issue the applicant a tobacco outlet license and/or a liquor and beer outlet license whichever the case may be, for one year which shall entitle the operator to establish and maintain one outlet for the type being permitted on the Kalispel Indian Reservation. This license shall be nontransferable. It shall be renewable annually at the discretion of the Commission by filing a new application form and payment of the application fee as provided in this Section.

10–6.05 Display of License

Any entity issued a license shall frame under glass and display the license on the premises.

10–6.06 Revocation of Operator's License

Failure of an operator to abide by the provisions of this chapter and any additional regulations or requirements imposed by the Commission will constitute grounds for revocation of the operator's license as well as enforcement of the penalties provided in Section 10.10.

§ 10–7 Non-Tribal Owned Outlets

10–7.01 Applicability

This Section applies to tobacco and liquor outlets that are owned and operated by an individual who is an enrolled member of the Kalispel Indian Tribe, an enrolled member of another Federally recognized Tribe, a Tribal leasee or a Tribally-licensed business entity. This section shall not apply to gaming facilities or outlets operated by the Kalispel Tribe as business enterprises of the Tribe.

10–7.02 Nature of Outlet

Each tobacco and/or liquor and beer outlet, licensed hereunder, shall be managed by an operator pursuant to a license granted by the Commission, hereunder, and shall conform to the regulations and prohibitions outlined by this Chapter.

10–7.03 Right of Commission To Screen Suppliers

The operator of any licensed outlet shall keep the Commission informed in writing of the identity of suppliers and wholesalers who supply or are expected to supply tobacco or liquor stocks to the outlet. The Commission may at its discretion and for any reasonable cause limit or prohibit the purchase of said stock from a supplier or wholesaler.

10–7.04 Freedom of Information From Suppliers

Operators shall in their purchase of stock and in their business relationships with suppliers cooperate with and assure a free flow of information and data to the Commission from suppliers relating to all sales to and business arrangements between the suppliers and operators. The Commission may, in its discretion, require the receipt from the suppliers of all invoices, bills of lading, billings or other documentary record of sales to the operator.

10–7.05 Operator's Premises Open to Commission Inspection

The premises of all Tribal Operators, including vehicles used in connection with liquor sales, shall be open at all times to inspection by the Kalispel Liquor Commission.

10–7.06 Operator's Records

The originals or copies of all sales slips, invoices and other memoranda covering all purchases of liquor by operators shall be kept on file in the retail premises of the operator purchasing the same for at least five (5) years after each purchase, and shall be filed separately and kept apart from all other records, and as nearly as possible shall be filed in consecutive order and each month's records kept separate so to render the same readily available for inspection and checking. All canceled checks, bank statements and books of accounting covering or involving the purchase of liquor, and all memoranda, if any, showing payment of money for liquor other than by check, shall be likewise preserved for availability for inspection and checking.

10–7.07 Other Business by Operator

An operator may conduct another business simultaneously with managing a tobacco or liquor and beer outlet for the Tribe. The other business may be conducted on the same premises, but the operator shall be required to maintain separate books of account for the other business.

10–7.08 Audit

All of the books and other business records of the outlet shall be available for inspection and audit by the Commission or its authorized representative for any reasonable time.

10–7.09 Tribal Liability and Credit

An operator is forbidden to represent or give the impression to any supplier or other person with whom he or she does business that he is an official representative of the Tribe or Commission authorized to pledge Tribal credit or financial responsibility for any of the expenses of his or her business operation. The operator shall hold the Kalispel Indian Tribe harmless from all claims and liability of whatever nature. The Commission shall revoke the operator's outlet license if the outlet is not operated in a businesslike manner or if it does not remain financially solvent or does not pay its operating expenses and bills before they become delinquent.

10–7.10 Bond for Excise Tax

The excise tax together with reports on forms to be supplied by the Tribe shall be remitted to the Tribal office monthly unless otherwise specified in writing by the Commission. The operator shall furnish a satisfactory bond to the Tribe in an amount to be specified by the Commission guaranteeing his or her payment of excise tax.

10–7.11 Insurance

The operator shall maintain at his or her expense adequate insurance covering liability, fire, theft, vandalism and other insurable risks. The Commission or the Business Committee may establish as a condition of any licenses, higher limits and any additional coverage it deems advisable. All insurance policies shall name the Tribe as an insured.

10–7.12 Liability for Bills

The Tribe shall have no legal responsibility for any unpaid bills owed by a non-Tribally owned tobacco or liquor and beer outlet to a wholesale supplier or to any other person. The operator shall make arrangements with his or her wholesalers to send copies of all of his or her purchase invoices to the Tribal office.

10–7.13 Assent to Tribal Court Jurisdiction

Operation of a Tribally-licensed tobacco or liquor outlet by a business entity creates a consensual relationship between the Tribe and the operator and the operator consents to Tribal court jurisdiction.

§ 10–8 Tribal Enterprises

10–8.01 Applicability

This Section applies to Kalispel Tribal business enterprises, including tobacco and liquor outlets and gaming facilities. This Section is not applicable to outlets described in Section 10–7.01.

10–8.02 Subrogation of Chapter 17 Provisions

Each tobacco and/or liquor and beer outlet, owned, managed and operated as a Kalispel Tribal Business Enterprise shall conform to the regulations and prohibitions outlined by this Chapter, to the extent that they are not in conflict with Chapter 17 of the Kalispel Tribe Law and Order Code. In case of conflict, the provisions of this Chapter shall be subrogated for the applicable provisions in Chapter 17.

10–8.03 Other Business

A tobacco and/or liquor and beer outlet, owned, managed and operated as a Kalispel Tribal Business Enterprise may conduct another business simultaneously with the outlet. The other business may be conducted on the same premises, but separate books of account for the other business shall be maintained.

10–8.04 Insurance

A tobacco and/or liquor and beer outlet, owned, managed and operated as a Kalispel Tribal Business Enterprise shall be covered by adequate insurance covering liability, fire, theft, vandalism and other insurable risks. The Commission or the Business Committee may establish higher limits and any additional coverage it deems advisable. All insurance policies shall name the Tribe as an insured.

10–8.05 Liability For Bills

The Tribe shall have legal responsibility for any unpaid bills owed by a tobacco or liquor and beer outlet owned, managed and operated as a Kalispel Tribal Business Enterprise to a wholesale supplier or to any other person. This liability is expressly limited by Section 17–8 of the Kalispel Tribe Law and Order Code.

§ 10–9 Tribal Court Jurisdiction

10–9.01 Jurisdiction

The Kalispel Tribal Court shall have jurisdiction over all matters described in this Code. This jurisdiction shall extend over Indians and Non-Indians to the full extent allowed by Federal, State and Tribal Law.

§ 10–10 Violations and Penalties

1–10.01 Violation and Penalties

Any tobacco or liquor outlet operator violating this chapter shall be guilty of an offense and subject to fine that the Tribal Court determines to be appropriate and/or the Tribal Court may also order that the license to sell tobacco or liquor be revoked or suspended.

1–10.02 Integration of Chapter 9

With the exception of Section 10–4.07, which permits purchase and consumption of alcoholic beverages at Northern Quest casino and other Tribally licensed liquor outlets, nothing in this chapter shall be deemed to override the criminal offenses described in Chapter 9 of the Kalispel Tribe Law and Order Code. The criminal offenses described therein shall have full force and effect concurrently with any violation of this Chapter.

10–10.03 Integration of Chapter 13

If an action or omission is deemed to violate both this Chapter and Chapter 9, the Tribal prosecutor shall prosecute the offense or violation under whichever provision provides for the harsher sentence, either under this Chapter or Chapter 13 of the Kalispel Tribe Law and Order Code.

10–10.04 Non-Indian Violators

Non-Indian individuals found to be in violation of this Chapter, Chapter 9 or an applicable statute under the Revised Code of Washington shall be subject to legal action that is in conformity with current Washington law.

§ 10–11 Sovereign Immunity

10–11.01 Consent To Sue Tribe Not Granted

This Chapter does not grant jurisdiction or authority to bring suit against the Kalispel Indian Tribe. Nothing in this Chapter shall be deemed a waiver of the sovereign immunity from suit of the Tribe or its agents, entities, instrumentalities, or officials, which immunity is hereby held to extend to the Tribe and its officers and employees acting for the Tribe within the scope of their Tribal authority.

§ 10–12 Separability

10–12.01 Separability

If any provision of this chapter, its application to any person or circumstance is held invalid, the remainder of the chapter or the application of the provision to other persons or circumstances is not affected.

BILLING CODE P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–686]

Certain Bulk Welding Wire Containers and Components Thereof and Welding Wire; Notice of Commission Determination Not To Review an Initial Determination Granting Complainant's Motion To Amend the Complaint and Notice of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade

Commission has determined not to review an initial determination (''ID'') (Order No. 9) of the presiding administrative law judge (''ALJ'') granting complainant's motion to amend the complaint and notice of investigation.

FOR FURTHER INFORMATION CONTACT: Panyin A. Hughes, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205–3042. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server at *http://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on September 8, 2009, based on a complaint filed by The Lincoln Electric Company of Cleveland, Ohio and Lincoln Global, Inc. of City of Industry, California (collectively, ''Lincoln''). 74 FR 46223 (Sept. 8, 2009). The complaint alleged violations of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain bulk welding wire containers and components thereof and welding wire by reason of infringement of certain claims of United States Patent Nos. 6,260,781; 6,648,141; 6,708,864; 6,913,145; 7,309,038; 7,398,881; and 7,410,111. *Id.* The complaint named five respondents: Atlantic China Welding Consumables, Inc., of Sichuan, China; ESAB AB, of Göteborg, Sweden (''ESAB AB''); Hyundai Welding Co., Ltd., of Seoul, Korea; Kiswel Co., Ltd. of Seoul, Korea; and Sidergas SpA, of Ambrogio (Verona) Italy. *Id.* at 46224.

On October 28, 2009, Lincoln filed an unopposed motion to amend the complaint and notice of investigation to remove ESAB AB from the investigation and add The ESAB Group, Inc. of Florence, South Carolina (''The ESAB Group''). Lincoln stated that ESAB AB has represented that it is not involved in the manufacture, importation into the United States, sale for importation, or sale with the United States after importation of bulk wire containers, components thereof and welding wire. Lincoln further stated that the entity responsible for the activities that form the basis of Lincoln's claim against ESAB AB is The ESAB Group, and that neither ESAB AB nor The ESAB Group oppose the motion.

On October 30, 2009, the ALJ issued Order No. 9 granting Lincoln's motion. None of the parties petitioned for review of Order No 9. The Commission has determined not to review the ID.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in section 210.42(h) of the Commission's Rules of Practice and Procedure (19 CFR 210.42(h)).

Issued: November 19, 2009.

By order of the Commission.

Marilyn R. Abbott,

Secretary to the Commission.

[FR Doc. E9–28222 Filed 11–24–09; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of a Consent Decree Under the Clean Water Act

Notice is hereby given that on November 13, 2009, a proposed Consent Decree in *United States* v. *City of Akron, Ohio and State of Ohio,* Civil Action No. 05:09–cv–0272 was lodged with the United States District Court for the Northern District of Ohio.

In this action the United States, and the State of Ohio in a cross-claim, sought civil penalties and injunctive relief for violations of the Clean Water Act, 33 U.S.C. 1251 *et seq.,* in connection with the City of Akron's (''Akron's'') operation of its municipal wastewater treatment facility and sewer system. The United States' First Amended Complaint and the State's cross-claim allege, among other things, that Akron violated the Clean Water Act and its National Pollution Discharge Elimination System (''NPDES'') Permit by discharging pollutants from Combined Sewer Overflow (''CSO'') points to navigable waters and waters of the State during dry weather, and during wet weather in a manner that violates the general effluent limitations of the NPDES Permit; diverting wastewater from secondary treatment at the treatment plant, known as the Water Pollution Control Station (''WPCS''); failing to monitor or report the results of its monitoring; and releasing untreated sewage from its sewer system into buildings and onto public and private property.

Under the proposed Decree, Akron will develop and implement a comprehensive plan to eliminate or reduce (i) combined sewer overflows in its sewer system and (ii) bypasses around secondary treatment at the WPCS. Within eight years, Akron will expand secondary treatment capacity at the WPCS to at least 130 million gallons of wastewater per day and will construct separate sewer lines for five combined sewer outfall points. Akron will also implement capacity, maintenance and emergency response programs to improve sewer system performance and to eliminate or reduce releases from the sewer collection system, including basement backups, releases into buildings, and onto property. The proposed Decree requires Akron to pay a total civil penalty of $500,000. Also, as a State Supplemental Environmental Project to improve water quality in the Cuyahoga River, Akron will pay $900,000 towards the removal of the Brecksville (or Route 82) Dam.

The Department of Justice will receive for a period of sixty (60) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and either e-mailed to *pubcomment-ees.enrd@usdoj.gov* or mailed to P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611, and should refer to *United States* v. *City of Akron, Ohio and State of Ohio,* D.J. Ref. 90–5–1–1–3144/2.

The proposed Consent Decree may be examined at the Office of the United States Attorney, Northern District of Ohio, 208 Federal Building, Two South Main Street, Akron, OH 44308–1855 (contact Assistant United States Attorney James Bickett (330/761–0523), and at U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, IL 60604–3590 (contact Associate Regional Counsel Susan Perdomo (312/886–0557)). During the public comment period the proposed Consent Decree may also be examined on the following Department of Justice Web site, *http://www.usdoj.gov/enrd/Consent_Decrees.html.* A copy of the proposed consent decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611 or by faxing or e-mailing a request to Tonia Fleetwood (*tonia.fleetwood@usdoj.gov*), fax no.

(202) 514–0097, phone confirmation number (202) 514–1547. In requesting a copy from the Consent Decree Library, please enclose a check in the amount of $29.50 (25 cents per page reproduction cost) payable to the U.S. Treasury or, if by e-mail or fax, forward a check in that amount to the Consent Decree Library at the stated address.

Maureen M. Katz,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

Federal Bureau of Investigation

[OMB Number 1110–NEW]

Agency Information Collection Activities: New Collection, Comments Requested

ACTION: 60-day emergency notice of information collection under review: New collection; Cargo Theft Incident Report.

The Department of Justice, Federal Bureau of Investigation, Criminal Justice Information Services Division will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with emergency review procedures of the Paperwork Reduction Act of 1995. OMB approval has been requested by February 27, 2010. The proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted until January 25, 2010 This process is conducted in accordance with 5 CFR 1320.10.

All comments and suggestions, or questions regarding additional information, to include obtaining a copy of the proposed information collection instrument with instructions, should be directed to Gregory E. Scarbro, Unit Chief, Federal Bureau of Investigation, Criminal Justice Information Services Division (CJIS), Module E–3, 1000 Custer Hollow Road, Clarksburg, West Virginia 26306, or facsimile to (304) 625–3566.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Comments should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques of other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of information collection:* New collection.

(2) *The title of the form/collection:* Cargo Theft Incident Report.

(3) *The agency form number, if any, and the applicable component of the department sponsoring the collection: Form Number:* None;

Sponsor: Criminal Justice Information Services Division, Federal Bureau of Investigation, Department of Justice.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* City, county, state, federal, and tribal law enforcement agencies.

Brief Abstract: This collection is needed to collect information on cargo theft incidents committed throughout the United States.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* There are approximately 17,799 law enforcement agency respondents that submit monthly for a total of 213,588 responses with an estimated response time of 5 minutes per response.

(6) *An estimate of the total public burden (in hours) associated with this collection:* There are approximately 17,799 hours, annual burden, associated with this information collection.

If additional information is required contact: Ms. Lynn Bryant, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Patrick Henry Building, Suite 1600, 601 D Street, NW., Washington, DC 20530.

Dated: November 19, 2009.

Lynn Bryant,

Department Clearance Officer, PRA, United States Department of Justice.

BILLING CODE 4410–02–P

DEPARTMENT OF LABOR

Office of the Secretary

Submission for OMB Review: Comment Request

November 19, 2009.

The Department of Labor (DOL) hereby announces the submission of the following public information collection requests (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. chapter 35). A copy of each ICR, with applicable supporting documentation; including, among other things, a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained from the RegInfo.gov Web site at *http://www.reginfo.gov/public/do/PRAMain* or by contacting Darrin King on 202–693–4129 (this is not a toll-free number)/e-mail: *DOL_PRA_PUBLIC@dol.gov.*

Interested parties are encouraged to send comments to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the Department of Labor—Occupational Safety and Health Administration (OSHA), Office of Management and Budget, Room 10235, Washington, DC 20503, Telephone: 202–395–7316/Fax: 202–395–5806 (these are not toll-free numbers), E-mail: *OIRA_submission@omb.eop.gov* within 30 days from the date of this publication in the **Federal Register.** In order to ensure the appropriate consideration, comments should reference the OMB Control Number (see below).

The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and

• Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: Occupational Safety and Health Administration.

Type of Review: Extension without change of a previously approved collection.

Title of Collection: Benzene (29 CFR 1910.1028).

OMB Control Number: 1218–0129.

Affected Public: Business or other for-profits.

Estimated Number of Respondents: 13,498.

Estimated Total Annual Burden Hours: 126,184.

Estimated Total Annual Costs Burden (excludes hourly wage costs): $8,189,789.

Description: The Department's regulations at 29 CFR 1910.1028 requires employers to train workers about the hazards of benzene, to monitor worker exposure, to provide medical surveillance, and maintain accurate records of worker exposure to benzene. These records are used by employers, workers, physicians and the Government to ensure that workers are not harmed by exposure to benzene in the workplace. For additional information, see the related 60-day preclearance notice published in the **Federal Register** at Vol. 74 FR 39978 on August 10, 2009. PRA documentation prepared in association with the preclearance notice is available on *http://www.regulations.gov* under docket number OSHA–2009–00021.

Agency: Occupational Safety and Health Administration.

Type of Review: Extension without change of a previously approved collection.

Title of Collection: Personal Protective Equipment (PPE) for Shipyard Employment (29 CFR part 1915, subpart 1).

OMB Control Number: 1218–0215.

Affected Public: Business or other for-profits.

Estimated Number of Respondents: 639.

Estimated Total Annual Burden Hours: 2,827.

Estimated Total Annual Costs Burden (excludes hourly wage costs): $0.

Description: The Department's regulations at 29 CFR part 1915, subpart I requires employers to provide and ensure that each affected employee uses the appropriate personal protective equipment (PPE) for the eyes, face, head, extremities, torso, and respiratory system, including protective clothing, protective shields, protective barriers, life-saving equipment, personal fall arrest systems, and positioning device systems that meets the applicable provisions of this subpart, whenever workers are exposed to hazards that require the use of PPE. For additional information, see the related 60-day preclearance notice published in the **Federal Register** at Vol. 74 FR 45883 on September 4, 2009. PRA documentation prepared in association with the preclearance notice is available on *http://www.regulations.gov* under docket number OSHA–2009–0017.

Darrin A. King,

Departmental Clearance Officer.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2009–0030]

Announcement of a Meeting of the Advisory Committee on Construction Safety and Health (ACCSH) and ACCSH Work Group Meetings

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Announcement of a meeting of the Advisory Committee on Construction Safety and Health (ACCSH) and ACCSH Work Group meetings.

SUMMARY: ACCSH will meet December 10 and 11, 2009, in Washington, DC. In conjunction with ACCSH's meeting, its Work Groups will meet December 8 and 9, 2009.

DATES: *ACCSH:* ACCSH will meet from 8:30 a.m. to 4:30 p.m., Thursday, December 10, 2009, and from 8:30 a.m. to Noon, Friday, December 11, 2009.

ACCSH Work Groups: ACCSH Work Groups will meet Tuesday, December 8, and Wednesday, December 9, 2009. (For Work Group meeting times, see the Work Group Schedule information in the **SUPPLEMENTARY INFORMATION** section of this notice.)

Submission of comments, requests to speak, speaker presentations, and requests for special accommodation: Comments, requests to address the ACCSH meeting, written or electronic speaker presentations, and requests for special accommodation for the ACCSH and ACCSH Work Group meetings must be submitted (postmarked, sent, transmitted) by December 2, 2009.

ADDRESSES:

ACCSH and ACCSH Work Group Meetings: ACCSH and ACCSH Work Group meetings will be held in Rooms N–3437 A–C, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Submission of comments, requests to speak, and speaker presentations: Interested persons may submit comments, requests to address the ACCSH meeting, and speaker presentations using one of the following methods:

Electronically: You may submit materials, including attachments, electronically at *http://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the on-line instructions for submissions or comments.

Facsimile (FAX): If your submission, including attachments, does not exceed 10 pages, you may fax it to the OSHA Docket Office at (202) 693–1648.

Mail, hand delivery, express mail, messenger, or courier service: Submit three copies of your submissions to the OSHA Docket Office, Room N–2625, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693–2350 (TTY (877) 889–5627). Deliveries (hand deliveries, express mail, messenger, and courier service) are accepted during the Department of Labor's and OSHA Docket Office's normal business hours, 8:15 a.m.–4:45 p.m., e.t., weekdays, except holidays.

Requests for special accommodations: Submit requests for special accommodations to Ms. Veneta Chatmon, OSHA, Office of Communications, Room N–3647, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693–1999; e-mail *chatmon.veneta@dol.gov.*

Instructions: All submissions, requests to speak, speaker presentations, and requests for special accommodations must include the Agency name (Occupational Safety and Health Administration) and the docket number for this meeting (Docket No. OSHA–2009–0030). Because of security-related procedures, submissions by regular mail may experience significant delays. For information about security procedures for submitting materials by hand delivery, express mail, messenger, or courier service, contact the OSHA Docket Office.

Comments, speaker presentations and requests to speak, including personal information, are placed in the public

docket without change and may be available online. Therefore, OSHA cautions against submitting certain personal information such as social security numbers and birthdates. For further information on submitting comments, requests to speak, speaker presentations, and requests for public accommodation, see the Public Participation information in the **SUPPLEMENTARY INFORMATION** section.

To read or download documents in the public docket for this ACCSH meeting, go to Docket No. OSHA–2009–0030 at *http://www.regulations.gov.* All documents in the public docket are listed in the *http://www.regulations.gov* index; however, some documents (e.g., copyrighted material) are not available to read on line or download from that webpage. All documents, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Please contact the OSHA Docket Office for assistance making submissions to or obtaining materials from the public docket.

FOR FURTHER INFORMATION CONTACT:

For press inquiries: Ms. Jennifer Ashley, OSHA, Office of Communications, Room N–3647, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693–1999.

For general information about ACCSH and ACCSH meetings: Mr. Michael Buchet, OSHA, Directorate of Construction, Room N–3468, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693–2020; e-mail *buchet.michael@dol.gov.*

SUPPLEMENTARY INFORMATION:

ACCSH Meeting

ACCSH will meet Thursday, December 10, 2009 and Friday, December 11, 2009, in Washington, DC. The meeting is open to the public.

ACCSH is authorized to advise the Secretary of Labor and Assistant Secretary of Labor for Occupational Safety and Health in the formulation of standards affecting the construction industry and on policy matters arising in the administration of the safety and health provisions of the Contract Work Hours and Safety Standards Act (Construction Safety Act) (40 U.S.C. 3701, 3704) and the Occupational Safety and Health Act of 1970 (29 U.S.C. 651 *et seq.*). (See also 29 CFR 1911.10 and 1912.3).

The agenda topics for this meeting include:

- *Welcome/Remarks from the Office of the Assistant Secretary;*
- *Remarks from the Directorate of Construction;*
- *OSHA 10–Hour Outreach Training and Hispanic Summit Discussion—Office of the Assistant Secretary;*
- *Analysis of FY 2007 Construction Health Enforcement Data—Center for Construction Research and Training (CPWR);*
- *Stimulus Impact on Transportation and Utility Construction—Associated General Contractors;*
- *Stimulus Impact on Alternate Energy, Transmission and Distribution, Including Smart Grid Concerns—National Electrical Contractors Association;*
- *Committee Consideration of and Recommendations to the Assistant Secretary Concerning the following:*
- Proposed Rule on the Standards Improvement Project III (SIP III);
- Revisions to OSHA's Occupational Injury and Illness Recording and Reporting (Recordkeeping) regulation; and
- Proposed Rule on Occupational Exposure to Crystalline Silica;
- *Work Group Reports, Work Group and Committee Administration; and*
- *Public Comment Period.*

ACCSH meetings are transcribed and detailed minutes of the meetings are prepared. The transcript and minutes are placed in the public docket for the meeting. The docket also includes ACCSH Work Group reports, speaker presentations, comments, and other materials and requests submitted to the Committee.

ACCSH Work Group Meetings

In conjunction with the ACCSH meeting, the following ACCSH Work Groups will meet on Tuesday, *December 8, 2009 in Rooms N–3437 A/B or C:*

- Regulatory Compliance (Focused Inspection) 8 to 9:40 a.m.—Room C;
- Silica 9:50 to 11:30 a.m.—Room A/B;
- Residential Fall Protection 12:30 to 2:10 p.m.—Room A/B;
- Trenching 2:20 to 4 p.m.—Room C; and
- Multilingual 4:10 to 5:50 p.m.—Room C.

The following additional ACCSH Work Groups will meet on Wednesday,

December 9, 2009 in Rooms N–3437 A/B or C:

- Powered Fastening Tools (Nail guns) 8:30 to 10:10 a.m.—Room A/B;
- ROPS (Roll Over Protective Structures) 10:20 to Noon—Room A/B;
- Diversity—Women in Construction 1:00 to 2:40 p.m.—Room C; and
- Education and Training (OTI) 2:50 to 4:30 p.m.—Room A/B.

For additional information on ACCSH Work Group meetings or participating in them, please contact Mr. Buchet at the address above or look on the ACCSH page on OSHA's Web page at *http://www.osha.gov.*

Public Participation

ACCSH Meetings and ACCSH Work Group Meetings: ACCSH and ACCSH Work Group meetings are open to the public. Individuals needing special accommodations for ACCSH or ACCSH Work Group meeting access please contact Ms. Chatmon (see **ADDRESSES** section).

Submission of written comments, requests to address ACCSH, speaker presentations, and requests for special accommodations: Interested persons may submit comments, requests to address ACCSH, presentations, and requests for special accommodations (1) Electronically, (2) by FAX, or (3) by hard copy (mail, hand delivery, express mail, messenger, and courier). All submissions must include the docket number for this ACCSH meeting (Docket No. OSHA–2009–0030). Individuals who want to address ACCSH at the meeting must submit their requests and written or electronic presentations (e.g. PowerPoints) by December 2, 2009. The request must state the amount of time desired to speak, the interest the presenter represents (e.g., businesses, organizations, affiliations, etc.), if any, and a brief outline of the presentation. PowerPoint presentations must be compatible with PowerPoint 2003.

Alternately at the ACCSH meeting, individuals may also request to address ACCSH by signing the public comment request sheet and listing the interests they represent, if any, and the topic(s) to be addressed. In addition, they must provide 20 hard copies of any materials, written or electronic, that they plan to present to ACCSH.

Requests to address the Committee may be granted at the ACCSH Chair's discretion and as time and circumstances permit.

Comments, requests to address ACCSH, and speaker presentations are included without change in the meeting record and may be made available online at *http://www.regulations.gov.* Therefore, OSHA cautions interested parties about submitting certain personal information such as birth dates and social security numbers.

Access to the record of ACCSH meetings, including Work Group reports: To read or download the record of this ACCSH meeting including transcript, minutes, Work Group reports and other submissions go to Docket No. OSHA–2009–0030 at *http://www.regulations.gov.* The meeting record and all submissions for this meeting will be listed in the *http://*

www.regulations.gov index; however, some documents (e.g., copyrighted materials) are not publicly available through the Web page. The record and all submissions, including materials not available through *http://www.regulations.gov* will be available for inspection and copying in the OSHA Docket Office (see **ADDRESSES**).

Authority and signature: Mr. Jordan Barab, Acting Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice under the authority granted by section 7 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 656), section 107 of the Contract Work Hours and Safety Standards Act (Construction Safety Act) (40 U.S.C. 3701 *et seq.*), the Federal Advisory Committee Act (5 U.S.C. App), 29 CFR Parts 1911 and 1912, 41 CFR Part 102, and Secretary of Labor's Order No. 5–2007 (72 FR 31160).

Signed at Washington, DC this 19th day of November 2009.

Jordan Barab,

Acting Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

LEGAL SERVICES CORPORATION

Sunshine Act Meeting Notice; Board of Directors and Four Board Committees

DATE AND TIME: The Legal Services Corporation Board of Directors and four of the Board's Committees will meet on November 30, 2009 in the order set forth in the following schedule. The first meeting will commence at 11 a.m., Eastern Time. Each meeting thereafter will commence promptly upon adjournment of the immediately preceding meeting, with the Audit Committee and the Finance Committee meeting jointly.

LOCATION: Legal Services Corporation, 3333 K Street, NW., Washington, DC 20007, 3rd Floor Conference Center.

PUBLIC OBSERVATION: For all meetings and portions thereof open to public observation, members of the public who are unable to attend but wish to listen to the proceedings may do so by following the telephone call-in directions given below. You are asked to keep your telephone muted to eliminate background noises. From time to time the presiding Chairman may solicit comments from the public.

CALL-IN DIRECTIONS FOR OPEN SESSIONS:

- Call toll-free number: 1–866–451–4981;
- When prompted, enter the following numeric pass code: 3899506694;
- When connected to the call, please mute your telephone immediately.

MEETING SCHEDULE:

	Time
1. Joint Meeting of the *Audit Committee* and *Finance Committee.*	11 a.m.
2. *Governance & Performance Review Committee.*	
3. *Search Committee for an Interim LSC President.*	
4. *Board of Directors.*	

Status of Meetings

Open, except as noted below:

- *Joint Meeting of the Audit & Finance Committees*—A portion of the meeting may be closed to the public pursuant to a vote of the Board of Directors so the committees may consider and perhaps act on recommendations related to how the Corporation may proceed with self-correction of an independent contractor issue and what related actions to take on proposed resolutions concerning LSC's 403(b) Thrift Plan and related provisions of the Employee Handbook. The Committees will also hear a briefing by the Corporation's independent auditors regarding the status of LSC's fiscal year 2009 financial audit and their preliminary findings.[1] A *verbatim* written transcript will be made of the closed session of the meeting. However, the transcript of any portions of the closed session falling within the relevant provisions of the Government in the Sunshine Act, 5 U.S.C. 552b(c)(2) and (9)(B), and the corresponding provisions of the Legal Services Corporation's implementing regulation, 45 CFR 1622.5(a) and (g), will not be available for public inspection. A copy of the General Counsel's Certification that, in his opinion, the closing is authorized by law will be available upon request.
- *Search Committee for LSC Interim President*—A portion of the meeting may be closed to the public pursuant to a vote of the Board of Directors so the committee may consider and perhaps act on a recommendation to make to the full Board as to an Interim President for LSC. A *verbatim* written transcript will be made of the closed session of the Committee meeting. However, the transcript of any portions of the closed session falling within the relevant provisions of the Government in the Sunshine Act, 5 U.S.C. 552b(c)(6), and the corresponding provisions of the Legal Services Corporation's implementing regulation, 45 CFR 1622.5(e), will not be available for public inspection. A copy of the General Counsel's Certification that in his opinion the closing is authorized by law will be available upon request.
- *Board of Directors*—A portion of the meeting of the Board of Directors may be closed to the public pursuant to a vote of the Board of Directors to consider and perhaps act on: recommendations on selection of labor counsel to advise and represent the Corporation on union matters; recommendations related to how the Corporation may proceed with self-correction of an independent contractor issue and what related actions to take on the proposed resolutions concerning LSC's 403(b) Thrift Plan and related provisions of the Employee Handbook; and a recommendation on selection of an Interim President for LSC.

A *verbatim* written transcript will be made of the closed session of the Board meeting. However, the transcript of any portions of the closed session falling within the relevant provisions of the Government in the Sunshine Act, 5 U.S.C. 552b(c)(2), (6) and (9)(B), and the corresponding provisions of the Legal Services Corporation's implementing regulation, 45 CFR 1622.5(a), (e) and (g), will not be available for public inspection. A copy of the General Counsel's Certification that, in his opinion, the closing is authorized by law will be available upon request.

MATTERS TO BE CONSIDERED:

Joint Meeting of Audit Committee & Finance Committee

Agenda

Open Session

1. Approval of agenda.

Closed Session

2. Briefing by the auditing firm performing the annual independent audit of LSC on the status of the fiscal year 2009 audit and any preliminary findings.

3. Consider and act on recommendations to make to the Board related to how the Corporation should proceed with self-correction of an independent contractor issue and what related actions to take on proposed resolutions revising LSC's 403(b) Thrift Plan with regard to the minimum hours

[1] Any portion of the closed session consisting solely of briefings does not fall within the Sunshine Act definition of the term ''meeting'' and, therefore, the requirements of the Sunshine Act do not apply to such portion of the closed session. 5 U.S.C. 552b (a)(2) and (b). See also 45 CFR 1622.2 and 1622.3.

requirements for participation and related conforming amendments to the LSC Employee Handbook.

Open Session

4. Consider and act on recommendations to make to the Board related to what actions to take on proposed resolutions revising LSC's 403(b) Thrift Plan with regard to the minimum hours requirements for participation, related conforming amendments to the LSC Employee Handbook, and amendments to the LSC Employee Handbook regarding merger of LSC's TDA and 403(b) thrift plans.

5. Consider and act on recommendation to make to the Board regarding proposed use of the LSC President's discretionary fund.

6. Consider and act on other business.

7. Public comment.

8. Consider and act on motion to adjourn meeting.

Governance and Performance Review Committee

Agenda

Open Session

1. Approval of agenda.

2. Consider and act on performance review of the Inspector General.

3. Consider and act on other business.

4. Public comment.

5. Consider and act on motion to adjourn meeting.

Search Committee for Interim LSC President

Agenda

Open Session

1. Approval of agenda.

Closed Session

2. Consider and act on a recommendation to make to Board as to an interim President for LSC.

Open Session

3. Consider and act on other business.

4. Public Comment.

5. Consider and act on motion to adjourn meeting.

Board of Directors

Agenda

Open Session

1. Approval of agenda.

2. Consider and act on whether to authorize an executive session of the *Board* to address items listed below under Closed Session.

Closed Session

3. Consider and act on recommendations regarding selection of labor counsel to advise and represent the Corporation on union matters.

4. Consider and act on recommendation as to selection of an interim President for LSC.

5. Consider and act on recommendations related to how the Corporation may proceed with self-correction of an independent contractor issue and related proposed resolutions revising LSC's 403(b) Thrift Plan with regard to the minimum hours requirements for participation and related conforming amendments to the LSC Employee Handbook.

6. Consider and act on the annual performance evaluation of the Inspector General.

Open Session

7. Consider and act on recommendations related to what actions to take on proposed resolutions revising LSC's 403(b) Thrift Plan with regard to the minimum hours requirements for participation, related conforming amendments to the LSC Employee Handbook, and amendments to the LSC Employee Handbook regarding merger of LSC's TDA and 403(b) thrift plans.

8. Public comment.

9. Consider and act on other business.

10. Consider and act on motion to adjourn meeting.

Contact Person for Information: Katherine Ward, Executive Assistant to the Vice President & General Counsel, at (202) 295–1500. Questions may be sent by electronic mail to *FR_NOTICE_QUESTIONS@lsc.gov.*

Special Needs: Upon request, meeting notices will be made available in alternate formats to accommodate visual and hearing impairments. Individuals who have a disability and need an accommodation to attend the meeting may notify Katherine Ward, at (202) 295–1500 or *FR_NOTICE_QUESTIONS@lsc.gov.*

Dated: November 20, 2009.

Victor M. Fortuno,

Vice President & General Counsel.

BILLING CODE 7050–01–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. They authorize the preservation of records of continuing value in the National Archives of the United States and the destruction, after a specified period, of records lacking administrative, legal, research, or other value. Notice is published for records schedules in which agencies propose to destroy records not previously authorized for disposal or reduce the retention period of records already authorized for disposal. NARA invites public comments on such records schedules, as required by 44 U.S.C. 3303a(a).

DATES: Requests for copies must be received in writing on or before December 28, 2009. Once the appraisal of the records is completed, NARA will send a copy of the schedule. NARA staff usually prepare appraisal memorandums that contain additional information concerning the records covered by a proposed schedule. These, too, may be requested and will be provided once the appraisal is completed. Requesters will be given 30 days to submit comments.

ADDRESSES: You may request a copy of any records schedule identified in this notice by contacting the Life Cycle Management Division (NWML) using one of the following means:

Mail: NARA (NWML), 8601 Adelphi Road, College Park, MD 20740–6001.

E-mail: request.schedule@nara.gov.

Fax: 301–837–3698.

Requesters must cite the control number, which appears in parentheses after the name of the agency which submitted the schedule, and must provide a mailing address. Those who desire appraisal reports should so indicate in their request.

FOR FURTHER INFORMATION CONTACT: Laurence Brewer, Director, Life Cycle Management Division (NWML), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740–6001. *Telephone:* 301–837–1539. *E-mail: records.mgt@nara.gov.*

SUPPLEMENTARY INFORMATION: Each year Federal agencies create billions of records on paper, film, magnetic tape, and other media. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these

schedules for NARA's approval, using the Standard Form (SF) 115, Request for Records Disposition Authority. These schedules provide for the timely transfer into the National Archives of historically valuable records and authorize the disposal of all other records after the agency no longer needs them to conduct its business. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

The schedules listed in this notice are media neutral unless specified otherwise. An item in a schedule is media neutral when the disposition instructions may be applied to records regardless of the medium in which the records are created and maintained. Items included in schedules submitted to NARA on or after December 17, 2007, are media neutral unless the item is limited to a specific medium. (*See* 36 CFR 1225.12(e).)

No Federal records are authorized for destruction without the approval of the Archivist of the United States. This approval is granted only after a thorough consideration of their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and whether or not they have historical or other value.

Besides identifying the Federal agencies and any subdivisions requesting disposition authority, this public notice lists the organizational unit(s) accumulating the records or indicates agency-wide applicability in the case of schedules that cover records that may be accumulated throughout an agency. This notice provides the control number assigned to each schedule, the total number of schedule items, and the number of temporary items (the records proposed for destruction). It also includes a brief description of the temporary records. The records schedule itself contains a full description of the records at the file unit level as well as their disposition. If NARA staff has prepared an appraisal memorandum for the schedule, it too includes information about the records. Further information about the disposition process is available on request.

Schedules Pending:

1. Department of Agriculture, Grain Inspection, Packers and Stockyards Administration (N1–545–10–1, 1 item, 1 temporary item). Master files for an electronic information system used to manage the national grain inspection and weighing program.

2. Department of Health and Human Services, Food and Drug Administration (N1–88–09–11, 3 items, 3 temporary items). Files and reports relating to fees charged for services to industry and annual fees relating to products currently on the market. Also included are master files used for tracking the receipt and payment of user fees.

3. Department of Homeland Security, Immigration and Customs Enforcement (N1–567–09–5, 1 item, 1 temporary item). Master files for an electronic information system that contains information concerning aliens who are allowed to live outside of a detention facility while undergoing the deportation process.

4. Department of Homeland Security, Immigration and Customs Enforcement (N1–567–09–6, 3 items, 3 temporary items). Master files and outputs for an electronic information system that maintains information concerning suspected immigration status violators.

5. Department of the Interior, Southwestern Pennsylvania Heritage Preservation Commission (N1–48–09–14, 13 items, 6 temporary items). Records relating to operational functions of the Commission, including such records as project files, grants management records, and general correspondence. Proposed for permanent retention are substantive files, such as policy records, publications, Executive Committee records, and photographs.

6. Department of Justice, Executive Office for U.S. Attorneys (N1–60–09–30, 4 items, 4 temporary items). Records relating to the accreditation of continuing legal education courses sponsored by the Office of Legal Education. Included are such records as certifications, credit instruction packets, and individual state accreditation files.

7. Department of Justice, National Drug Intelligence Center (N1–523–09–3, 1 item, 1 temporary item). Master files of an electronic information system that tracks intelligence projects. Included is such information as project number and title, name of analyst assigned to the project, and dates of initiation and completion.

8. Department of Justice, U.S. Trustee Program (N1–60–09–53, 3 items, 3 temporary items). Master files of an electronic information system used to track the application and approval process for agencies and vendors being considered as credit and debt counseling providers.

9. Department of State, Bureau of East Asian and Pacific Affairs (N1–59–09–10, 6 items, 2 temporary items). Records relating to trips, as well as country files consisting of extra copies of telegrams. Proposed for permanent retention are calendars and appointment books of the Assistant Secretary, subject files, policy files, and files relating to interagency meetings. The proposed disposition instructions are limited to paper records for permanent items.

10. Department of State, Bureau of Human Resources (N1–59–09–46, 1 item, 1 temporary item). Records relating to career development workshops, such as instructors' materials and handouts.

11. Department of State, Bureau of Public Affairs (N1–59–09–23, 1 item, 1 temporary item). Master files of an electronic information system that contains data concerning the media environment in specific countries.

12. Department of State, Foreign Service Institute (N1–59–09–47, 1 item, 1 temporary item). Records relating to students at the School of Applied Information Technology. Records relate to such matters as courses taken, attendance, class rosters, funding for travel, and evaluations.

13. Department of State, Office of the Chief of Protocol (N1–59–09–45, 1 item, 1 temporary item). Master files of an electronic information system containing information on guests and participants at events.

14. Department of the Treasury, Internal Revenue Service (N1–58–09–38, 3 items, 3 temporary items). Master files, outputs, and system documentation associated with an electronic information system used to collect and centralize data from other agency systems for more efficient analysis.

15. Department of the Treasury, Internal Revenue Service (N1–58–09–39, 2 items, 2 temporary items). Master files and system documentation associated with an electronic information system used to provide states with taxpayer information.

16. Department of the Treasury, Internal Revenue Service (N1–58–09–46, 2 items, 2 temporary items). Master files and system documentation associated with an electronic information system used to track employee workload regarding taxpayer information requests at customer services sites.

17. Department of the Treasury, Internal Revenue Service (N1–58–09–47, 3 items, 3 temporary items). Master files, outputs, and system documentation associated with an electronic information system which

stores scanned payment images in order to expedite access to taxpayer remittance information.

18. Department of the Treasury, Internal Revenue Service (N1–58–09–58, 4 items, 4 temporary items). Master files, inputs, outputs, and system documentation associated with an electronic information system used in connection with notifying taxpayers of potential backup withholding due to unmet tax obligations.

19. Department of the Treasury, Internal Revenue Service (N1–58–09–111, 4 items, 4 temporary items). Master files, inputs, and system documentation associated with an electronic information system used to issue calling cards to employees who must place long distance telephone calls while traveling on business.

20. Department of the Treasury, Internal Revenue Service (N1–58–09–112, 2 items, 2 temporary items). Master files and system documentation associated with an electronic information system used to store information concerning solutions and remedies to technical problems and issues.

21. Agency for International Development, Management Bureau (N1–286–09–5, 1 item, 1 temporary item). Master files associated with an electronic information system used in connection with agency procurement activities.

22. Environmental Protection Agency, Agency-wide (N1–412–08–16, 1 item, 1 temporary item). Duplicative comments received from stakeholders that have been summarized. Summaries were previously approved for permanent retention.

23. Environmental Protection Agency, Agency-wide (N1–412–10–1, 2 items, 2 temporary items). Electronic and paper input documents associated with an electronic information system that contains information on toxic chemical releases and other waste management activities. Records were previously approved for disposal. The related electronic information system was previously scheduled as permanent.

24. Federal Energy Regulatory Commission, Agency-wide (N1–138–09–5, 1 item, 1 temporary item). Docketed case files relating to electric utilities. Paper copies of these files were previously approved for disposal.

25. Nuclear Regulatory Commission, Office of Nuclear Security and Incident Response (N1–431–08–11, 3 items, 2 temporary items). Master files and system operations records for an electronic information system used to capture data on conditions at nuclear power plants during an emergency event. Proposed for permanent retention are reports documenting events.

Dated: November 20, 2009.

Michael J. Kurtz,

Assistant Archivist for Records Services—Washington, DC.

BILLING CODE 7515–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Meeting of the ACRS Subcommittee on Regulatory Policies and Practices; Amendment to December 1, 2009, ACRS meeting Federal Register Notice

The **Federal Register** Notice for the ACRS Subcommittee Meeting on Regulatory Policies and Practices scheduled to be held on December 1, 2009, is being amended to notify the following:

The time of the meeting is being changed from 2:30 p.m.–4:30 p.m., to 8:30 a.m.–12 p.m. In addition to the review of the Draft Final Revision 1 to Regulatory Guide 1.151 (DG–1178), the Subcommittee will also review the Draft Final Revision 1 to Regulatory Guide 1.141 (DG–1213), ''Containment Isolation Provisions for Fluid Systems.''

The notice of this meeting was previously published in the **Federal Register** on Tuesday, November 10, 2009, [74 FR 58064]. All other items remain the same as previously published.

Further information regarding this meeting can be obtained by contacting Zena Abdullahi, Designated Federal Official (*Telephone:* 301–415–8716, *E-mail: Zena.Abdullahi@nrc.gov*), between 8:45 a.m. and 5:30 p.m. (ET).

Dated: November 18, 2009.

Antonio F. Dias,

Chief, Reactor Safety Branch B, Advisory Committee on Reactor Safeguards.

[FR Doc. E9–28244 Filed 11–24–09; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards (ACRS); Meeting of the Subcommittee on Digital Instrumentation and Control Systems; Notice of Meeting

The ACRS Subcommittee on Digital Instrumentation and Control Systems (DI&C) will hold a meeting on December 17, 2009, Room T2–B1, 11545 Rockville Pike, Rockville, Maryland.

The agenda for the subject meeting shall be as follows:

Thursday, December 17, 2009, 8:30 a.m.–12 p.m.

The Subcommittee will hear presentations by and hold discussions with representatives of the NRC staff and the industry regarding review of Draft Final Regulatory Guide 1.62, ''Manual Initiation of Protective Actions.'' The Subcommittee will gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the full Committee.

Members of the public desiring to provide oral statements and/or written comments should notify the Designated Federal Official (DFO), Ms. Christina Antonescu (Telephone: 301–415–6792, E-mail: *Christina.Antonescu@nrc.gov*) five days prior to the meeting, if possible, so that appropriate arrangements can be made. Thirty-five hard copies of each presentation or handout should be provided to the DFO thirty minutes before the meeting. In addition, one electronic copy of each presentation should be e-mailed to the DFO one day before the meeting. If an electronic copy cannot be provided within this timeframe, presenters should provide the DFO with a CD containing each presentation at least 30 minutes before the meeting. Electronic recordings will be permitted only during those portions of the meeting that are open to the public. Detailed procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 14, 2009, (74 FR 52829–52830).

Detailed meeting agendas and meeting transcripts are available on the NRC Web site at *http://www.nrc.gov/reading-rm/doc-collections/acrs.* Information regarding topics to be discussed, changes to the agenda, whether the meeting has been canceled or rescheduled, and the time allotted to present oral statements can be obtained from the Web site cited above or by contacting the identified DFO. Moreover, in view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with these references if such rescheduling would result in major inconvenience.

Dated: November 19, 2009.

Antonio F. Dias,

Chief, Reactor Safety Branch B, Advisory Committee on Reactor Safeguards.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards (ACRS); Meeting of the ACRS Subcommittee on Radiation Protection and Nuclear Materials; Notice of Meeting

The ACRS Subcommittee on Radiation Protection and Nuclear Materials will hold a meeting on December 16, 2009, Room T2–B3, 11545 Rockville Pike, Rockville, Maryland.

The meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, December 16, 2009—8:30 a.m.–4 p.m.

The Subcommittee will review (1) The NRC staff efforts to revise and update the radiation protection standards in 10 CFR Parts 20 and 50; (2) the status of NRC rulemaking efforts for unique waste streams including depleted uranium; and (3) the proposed Revision 2 to Regulatory Guide 4.11, ''Terrestrial Environmental Studies for Nuclear Power Plants.'' The Subcommittee will hear presentations by and hold discussions with NRC staff and other interested persons regarding these matters. The Subcommittee will gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the full Committee.

Members of the public desiring to provide oral statements and/or written comments should notify the Designated Federal Official (DFO), Mr. Neil Coleman, (Telephone: 301–415–7656, E-mail: *Neil.Coleman@nrc.gov*) five days prior to the meeting, if possible, so that appropriate arrangements can be made. Thirty-five hard copies of each presentation or handout should be provided to the DFO thirty minutes before the meeting. In addition, one electronic copy of each presentation should be emailed to the DFO one day before the meeting. If an electronic copy cannot be provided within this timeframe, presenters should provide the DFO with a CD containing each presentation at least 30 minutes before the meeting. Electronic recordings will be permitted. Detailed procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 14, 2009, (74 FR 52829–52830).

Detailed meeting agendas and meeting transcripts are available on the NRC Web site at: *http://www.nrc.gov/reading-rm/doc-collections/acrs.* Information regarding topics to be discussed, changes to the agenda, whether the meeting has been canceled or rescheduled, and the time allotted to present oral statements can be obtained from the website cited above or by contacting the identified DFO. Moreover, in view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with these references if such rescheduling would result in major inconvenience.

Dated: November 18, 2009.

Antonio F. Dias,

Chief, Reactor Safety Branch B, Advisory Committee on Reactor Safeguards.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2009–0511]

Proposed Generic Communications; Inservice Inspection and Testing Requirements of Dynamic Restraints (SNUBBERS)

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of opportunity for public comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC or Commission) is proposing to issue this draft regulatory issue summary (RIS) to remind licensees of the requirements for the inservice inspection (ISI) and testing of dynamic restraints (snubbers) under 10 CFR 50.55a(g) and 10 CFR 50.55a(b)(3)(v). This RIS requires no action or written response on the part of an addressee.

DATES: Comment period expires January 11, 2010. Comments submitted after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except for comments received on or before this date.

ADDRESSES: You may submit comments by any one of the following methods. Please include Docket ID NRC–2009–0511 in the subject line of your comments. Comments submitted in writing or in electronic form will be posted on the NRC Web site and on the Federal rulemaking Web site Regulations.gov. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed.

The NRC requests that any party soliciting or aggregating comments received from other persons for submission to the NRC inform those persons that the NRC will not edit their comments to remove any identifying or contact information, and therefore, they should not include any information in their comments that they do not want publicly disclosed.

Federal Rulemaking Web site: Go to *http://www.regulations.gov* and search for documents filed under Docket ID NRC–2009–0511. Address questions about NRC dockets to Carol Gallagher 301–492–3668; e-mail *Carol.Gallagher@nrc.gov.*

Mail comments to: Michael T. Lesar, Chief, Rulemaking and Directives Branch (RDB), Division of Administrative Services, Office of Administration, Mail Stop: TWB–05–B01M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, or by fax to RDB at (301) 492–3446.

You can access publicly available documents related to this notice using the following methods:

NRC's Public Document Room (PDR): The public may examine and have copied for a fee publicly available documents at the NRC's PDR, Public File Area O1 F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland.

NRC's Agencywide Documents Access and Management System (ADAMS): Publicly available documents created or received at the NRC are available electronically at the NRC's Electronic Reading Room at *http://www.nrc.gov/reading-rm/adams.html.* From this page, the public can gain entry into ADAMS, which provides text and image files of NRC's public documents. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC's PDR reference staff at 1–800–397–4209, 301–415–4737, or by e-mail to *pdr.resource@nrc.gov.*

Federal Rulemaking Web site: Public comments and supporting materials related to this notice can be found at *http://www.regulations.gov* by searching on Docket ID: NRC–2009–0511.

FOR FURTHER INFORMATION CONTACT: Gurjendra S. Bedi, NRR/DCI/CPTB, at 301–415–1393 or by e-mail at *Gurjendra.Bedi@nrc.gov*

SUPPLEMENTARY INFORMATION:

NRC Regulatory Issue Summary 2009–XX; Inservice Inspection and Testing Requirements of Dynamic Restraints (SNUBBERS)

Addressees

All holders of operating licenses for nuclear power reactors under the provisions of Title 10 of the Code of Federal Regulations (10 CFR) part 50, ''Domestic Licensing of Production and Utilization Facilities,'' except those who have permanently ceased operations and have certified that fuel has been permanently removed from the reactor vessel.

All holders of, and applicants for, nuclear power plant construction permits, early site permits, and limited work authorizations for nuclear power reactors under the provisions of 10 CFR part 50.

Intent

The U.S. Nuclear Regulatory Commission (NRC or Commission) is issuing this regulatory issue summary (RIS) to remind licensees of the requirements for the inservice inspection (ISI) and testing of dynamic restraints (snubbers) under 10 CFR 50.55a(g) and 10 CFR 50.55a(b)(3)(v). This RIS requires no action or written response on the part of an addressee.

Background

The regulations at 10 CFR 50.55a(b) detail the Codes and standards that have been approved for inclusion in 10 CFR part 50, including the effective edition and addenda of the American Society of Mechanical Engineer (ASME) Boiler and Pressure Vessel (BPV) Code and the ASME Code for Operation and Maintenance of Nuclear Power Plants (OM Code).

The regulations at 10 CFR 50.55a(g) establish the ISI requirements that licensees must use when performing ISI of components (including supports). 10 CFR 50.55a(g)(4) states, ''Throughout the service life of a boiling or pressurized water-cooled nuclear power facility, components (including supports) which are classified as ASME Code Class 1, Class 2, and Class 3 must meet the requirements, except design and access provisions and preservice examination requirements, set forth in Section XI of editions of the ASME BPV Code and addenda.'' ASME Section XI provides the rules for ISI of nuclear power plant components.

The regulation at 10 CFR 50.55a(g)(4)(ii) requires the use of the latest edition and addenda of the Code that has been incorporated by reference 12 months prior to the beginning of each 120-month inspection interval. This Code is considered the ''Code of Record'' for the inspection interval.

The regulation at 10 CFR 50.55a(g)(4)(iv) states that ISI of components (including supports) may meet the requirements set forth in subsequent editions to the ''Code of Record'' and addenda that are incorporated by reference in 10 CFR 50.55a(b), subject to limitations and modifications listed in 10 CFR 50.55a(b) and subject to Commission approval.

The regulations at 10 CFR 50.55a(g) require ISI of components (including supports) without specifically mentioning ''snubbers.'' Consequently, confusion resulted and some licensees mistakenly believed that ISI and testing of snubbers is not a regulatory requirement. The NRC clarified, in the final rule dated September 22, 1999, [(Volume 64 of the **Federal Register**, pages 51370, 51388–89 (64 FR 51370, 51388–89)], that testing of snubbers is a regulatory requirement and has been for many years.

The regulations at 10 CFR 50.55a(g)(4) require that ASME Code Class 1, 2, and 3 components (including supports) meet the ISI requirements of ASME Code Section XI. Article IWF–5000, ''Inservice Inspection Requirements for Snubbers,'' of ASME Code Section XI provides requirements for the examination and testing of snubbers in nuclear power plants. Therefore, inservice examination and testing of snubbers are required by 10 CFR 50.55a because it incorporates by reference ASME Section XI requirements, including Article IWF–5000. Article IWF–5000 has required the ISI and testing of snubbers since the first issuance of Subsection IWF in the Winter 1978 Addenda of ASME Section XI, which was incorporated in 10 CFR 50.55a in January 1982. Before ASME Section XI incorporated snubber examination and testing requirements, licensees used snubber examination and testing requirements as defined in their plants' TS.

Improved Standard TS for various boiling and pressurized water-cooled nuclear power plants (NUREG–1430 thru 1434, Revision 3, published in June 2004) allow relocating inservice examination and testing requirements of snubbers from the TS to a plant's Technical Requirements Manual (TRM). However, relocating snubber ISI and testing requirements from the TS to TRM does not eliminate the need to comply with the 10 CFR 50.55a requirements.

For plants using their TS to govern ISI and testing of snubbers, 10 CFR 50.55a (g)(5)(ii) requires that if a revised ISI program for a facility conflicts with the TS, the licensee shall apply to the Commission for amendment of the TS to conform the TS to the revised program. Therefore, when performing 120-month ISI program updates in accordance with 10 CFR 50.55a (g)(4), licensees must submit any required amendments to ensure their TS remain consistent with the new code of record or NRC-approved alternative used in lieu of the Code requirements. The TS governing the snubber ISI and test program do not eliminate the 10 CFR50.55a requirements to update the program at 120-month intervals or to request and receive NRC authorization for alternatives to the Code requirements when appropriate.

The 2004 edition of ASME Section XI and the ASME OM Code are incorporated in 10 CFR 50.55a (Industry Codes and Standards; Amended Requirements, 73 FR 52730; September 10, 2008). Article IWF–5000 of the ASME BPV Code, Section XI, 2004 Edition, requires preservice and inservice examinations and testing of snubbers at nuclear power plants as part of the licensee's ISI program in accordance with ASME/American National Standards Institute Standard for Operation and Maintenance of Nuclear Power Plants, Part 4 (OM–4), 1987 Edition with OMa-1988 Addenda.

The regulation at 10 CFR 50.55a(b)(3)(v) allows the optional use of Subsection ISTD, ''Preservice and Inservice Examination and Testing of Dynamic Restraint (Snubbers) in Light-Water Reactor Nuclear Power Plants,'' of the ASME OM Code-1995 Edition through the latest edition and addenda incorporated by reference in 10 CFR 50.55a(b)(3) in lieu of ASME Section XI, Articles IWF–5200(a) and (b) and IWF–5300(a) and (b) by making appropriate changes to TS or licensee-controlled documents. The regulation at 10 CFR 50.55a(b)(3)(v) also states, ''Preservice and inservice examination must be performed using the VT–3 visual examination method described in IWA–2213.''

Licensees shall perform the ISI and testing of snubbers in accordance with ASME Section XI or the OM Code and the applicable addenda as required by 10 CFR 50.55a(g) or 10 CFR 50.55a(b)(3)(v), except where the NRC has granted specific written relief, pursuant to 10 CFR 50.55a(g)(6)(i), or authorized alternatives pursuant to 10 CFR 50.55a(3). The regulation at 10 CFR 50.55a(a)(3) states that licensees may use alternatives to the requirements of 10 CFR 50.55a(g) when authorized by the NRC if (1) the proposed alternatives would provide an acceptable level of quality and safety, or (2) compliance

with the specified requirements would result in hardship or unusual difficulty without a compensating increase in the level of quality and safety.

Licensees have the option to control the ASME Code-required examination and testing of snubbers through their plant's TS or other licensee-controlled documents (*i.e.,* TRM *etc.*). However, when these documents represent an alternative to the code requirements incorporated by reference in 10 CFR 50.55a, they must be authorized by the NRC, pursuant to 10 CFR 50.55a(a)(3), on a case by case basis. As stated in 10 CFR 50.55a(a)(3), the use of an alternative in lieu of the Code requirements is subject to Commission approval. Additionally, plant TS may require updating in accordance with 10 CFR 50.55a(g)(5)(ii) if needed to conform them to the program that is in effect for the 120-month ISI interval.

Discussion

The staff has identified several instances in which nuclear power plant licensees have used a TRM, or other licensee-controlled documents and procedures which do not meet requirements of the ''Code of Record'' for the ISI and testing of snubbers without requesting approval to use these alternatives from the Commission. The staff is issuing this RIS to remind licensees that they must submit a request and receive NRC approval to use an alternative to control the examination and testing of snubbers through their plants licensee-controlled documents (*i.e.*, TRM *etc.*), when they represent a departure from and are used in lieu of the ASME Section XI or OM Code requirements.

The regulation at 10 CFR 50.55a requires ISI of components (including supports) in accordance with ASME Section XI or OM Code requirements. The use of a TRM, or any other licensee-controlled documents that represent a departure from the Code requirements for snubber ISI and testing requires NRC approval. The use of alternatives in lieu of the Code requirements is addressed in 10 CFR 50.55a(a)(3). When requesting authorization to use an alternative, licensees must demonstrate the proposed alternative would provide an acceptable level of quality and safety, or they must demonstrate why compliance with the Code requirement would result in hardship or unusual difficulty without a compensating increase in the level of quality and safety.

In addition, for licensees using plant TS to control snubber examination and testing, the requirement to perform 10-year program updates in accordance with 10 CFR 50.55a(g)(4) still exists. If the TS represent an alternative to the requirements of the code edition and addenda specified in 10 CFR 50.55a(b) that is to be used for the ISI interval, licensees are required to request authorization from the NRC to use the alternative in accordance with 10 CFR 50.55a(a)(3). The regulation at 10 CFR 50.55a(g)(5)(ii) also requires that a licensee apply for an amendment to conform the TS to the revised program in cases where there is a conflict between the revised program and the TS.

Some licensees mistakenly concluded that the ISI and testing of snubbers is not a 10 CFR 50.55a regulatory requirement, because 10 CFR 50.55a requires ISI of components (including supports) without specifically mentioning snubbers and since snubber examination and testing was historically covered by a plant's TS. The resulting confusion led some licensees to believe that they do not need to request NRC approval to use an alternative (i.e., TS, TRM, or other licensee-controlled documents) in lieu of the Code requirements. The Commission has clarified, however, that snubber inspection and testing is a regulatory requirement.

Typically, if licensees use TS, TRM, or any other licensee-controlled documents which represent a departure from the ASME Code requirements for the ISI and testing of snubbers, they would submit an alternative for NRC approval as required by 10 CFR 50.55a(a)(3). The authorized alternative becomes a regulatory requirement that may be used in lieu of ASME Section XI or OM Code requirements for performing the ISI and testing of snubbers. The NRC staff must review and approve changes to these requirements for authorization under 10 CFR 50.55a(a)(3) or as an exemption under 10 CFR 50.12, ''Specific Exemptions.'' Alternatives requested and authorized pursuant to 10 CFR 50.55a(a)(3) are only valid for that particular 10-year ISI interval, unless specifically authorized for a different period in the associated NRC safety evaluation. In a subsequent 10-year ISI interval, licensees must resubmit an alternative for NRC staff review and approval if they choose not to adopt the ASME Code edition and addenda specified in the regulations for snubber examination and testing. In addition, for program changes that create a conflict with the plant TS, the licensee shall apply for an amendment to conform the TS to the program in accordance with 10 CFR 50.55a(g)(5)(ii).

Backfit Discussion

This RIS reminds stakeholders of existing regulatory requirements within 10 CFR 50.55a(b) and 10 CFR 50.55a(g) for the ISI and testing of dynamic restraints (snubbers). This RIS does not represent a new or different staff position about the implementation of 10 CFR 50.55a. This RIS reminds addressees of the need to request NRC approval for the use of TS, TRM, or other licensee-controlled documents in lieu of the ASME Code requirements as required by 10 CFR 50.55a(a)(3). It requires no action or written response beyond what is required in 10 CFR 50.55a. Any action that addressees take to implement procedural or inspection changes in accordance with the information in this RIS ensures compliance with current regulations; and therefore, is not a backfit under 10 CFR 50.109, ''Backfitting'' and specifically the exception provided for in 10 CFR 50.109(a)(4)(i). Consequently, the NRC staff did not perform a backfit analysis.

BILLING CODE 7590–01–P

POSTAL REGULATORY COMMISSION

[Docket No. A2010–1; Order No. 342]

Post Office Closing

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: This document informs the public that an appeal of the closing of the Cranberry, PA post office has been filed. It identifies preliminary steps and provides a procedural schedule. Publication of this document will allow the Postal Service, petitioner, and others to take appropriate action.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Commenters who cannot submit their views electronically should contact the person identified in **FOR FURTHER INFORMATION CONTACT** by telephone for advice on alternatives to electronic filing.

FOR FURTHER INFORMATION CONTACT: Stephen L. Sharfman, General Counsel, 202–789–6820 or *stephen.sharfman@prc.gov.*

SUPPLEMENTARY INFORMATION: Notice is hereby given that pursuant to 39 U.S.C. 404(d), the Commission has received an appeal of the closing of the Cranberry Post Office, Cranberry, PA 16319. The appeal was received by the Commission on October 6, 2009. The appeal was not filed as a Participant Statement on PRC Form 61; however, the petitioners have the option of filing supplemental information or facts. The Commission hereby institutes a proceeding under 39 U.S.C. 404(d)(5) and designates the case as Docket No. A2010–1 to consider the petitioner's appeal.

Categories of issues apparently raised. The categories of issues that appear to be raised include: Effect on the community (39 U.S.C. 404(d)(2)(A)(i)).

After the Postal Service files the administrative record and the Commission reviews it, the Commission may find that there are additional legal issues. Or, the Commission may find that the Postal Service's determination disposes of one or more of those issues. The deadline for the Postal Service to file the administrative record with the Commission is December 1, 2009. 39 CFR 3001.113.

Availability; Web site posting. The Commission has posted the appeal and supporting material on its Web site at *http://www.prc.gov.* Additional filings in this case and participants' submissions also will be posted on the Web site, if provided in electronic format or amenable to conversion, and not subject to a valid protective order or Privacy Act concerns. Information on how to use the Commission's Web site is available online or by contacting the Commission's Web master via telephone at 202–789–6873 or via electronic mail at *PRC-WEBMASTER@prc.gov.*

The appeal and all related documents are also available for public inspection in the Commission's docket section. Docket section hours are 8 a.m. to 4:30 p.m., Monday through Friday, except on Federal government holidays. Docket section personnel may be contacted via electronic mail at *prc-dockets@prc.gov* or via telephone at 202–789–6846.

Filing of documents. All filing of documents in this case shall be made using the Internet (Filing Online) pursuant to Commission rules 9(a) and 10(a) at the Commission's Web site *http://www.prc.gov,* unless a waiver is obtained. 39 CFR 3001.9(a) and 10(a). Instructions for obtaining an account to file documents online may be found on the Commission's Web site, *http://www.prc.gov,* or by contacting the Commission's docket section at *prc-dockets@prc.gov* or via telephone at 202–789–6846.

Intervention. Those, other than the petitioners and respondent, wishing to be heard in this matter are directed to file a notice of intervention on or before December 7, 2009 in accordance with 39 CFR 3001.111. The notice of intervention shall be filed using the Internet (Filing Online) at the Commission's Web site (*http://www.prc.gov*), unless a waiver is obtained for hardcopy filing. 39 CFR 3001.9(a) and 10(a).

Public Representative. Patricia Gallagher is designated as the Public Representative to represent the interests of the general public.

Further procedures. By statute, the Commission is required to issue its decision within 120 days from the date this appeal was filed. 39 U.S.C. 404(d)(5). A standard procedural schedule has been developed to accommodate this statutory deadline. The procedural schedule contemplated by 39 CFR 3001.110 *et seq.* has been adjusted for administrative convenience and will provide the petitioners and Postal Service with ample time to file documents. In the interest of expedition, in light of the 120-day decision schedule, the Commission may request the Postal Service or other participants to submit memoranda of law on any appropriate issue. As required by the Commission rules, if any motions are filed, responses are due 7 days after any such motion is filed. 39 CFR 3001.21. If necessary, the Commission also may ask petitioners or the Postal Service for more information.

It is ordered:

1. The Postal Service shall file the administrative record in this appeal, or otherwise file a responsive pleading to the appeal, by December 1, 2009.

2. The procedural schedule listed below is hereby adopted.

3. Pursuant to 39 U.S.C. 505, Patricia Gallagher is designated officer of the Commission (Public Representative) to represent the interests of the general public.

4. The Secretary shall arrange for publication of this notice and order in the **Federal Register**.

By the Commission.

Judith M. Grady,

Acting Secretary.

PROCEDURAL SCHEDULE

October 6, 2009	Filing of Appeal.
December 1, 2009	Deadline for Postal Service to file administrative record in this appeal or responsive pleading.
December 7, 2009	Deadline for supplemental information or facts in support of petition (*see* 39 CFR 3001.115(a) and (b)).
December 7, 2009	Deadline for filing petitions to intervene (*see* 39 CFR 3001.111(b)).
December 29, 2009	Deadline for answering brief in support of Postal Service (*see* 39 CFR 3001.115(c)).
January 13, 2010	Deadline for reply briefs in response to answering briefs (*see* 39 CFR 3001.115(d)).

PROCEDURAL SCHEDULE—Continued

January 15, 2010	Deadline for motions by any party requesting oral argument; the Commission will schedule oral argument only when it is a necessary addition to the written filings (*see* 39 CFR 3001.116).
February 3, 2010	Expiration of the Commission's 120-day decisional schedule (*see* 39 U.S.C. 404(d)(5)).

[FR Doc. E9–28243 Filed 11–24–09; 8:45 am]
BILLING CODE 7710–FW–P

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549–0213.

Extension:

Rule 23c–3 and Form N–23c–3; SEC File No. 270–373; OMB Control No. 3235–0422.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 350 *et seq.*), the Securities and Exchange Commission (the ''Commission'') has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Rule 23c–3 (17 CFR 270.23c–3) under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*) is entitled: ''Repurchase of Securities of Closed-End Companies.'' The rule permits certain closed-end investment companies (''closed-end funds'' or ''funds'') to offer to repurchase from shareholders a limited number of shares at net asset value. The rule includes several reporting and recordkeeping requirements. The fund must send shareholders a notification that contains specified information each time the fund makes a repurchase offer (on a quarterly, semi-annual, or annual basis, or for certain funds, on a discretionary basis not more often than every two years). The fund also must file copies of the shareholder notification with the Commission (electronically through the Commission's Electronic Data Gathering, Analysis, and Retrieval System (''EDGAR'')) attached to Form N–23c–3 (17 CFR 274.221), a filing that provides limited information about the fund and the type of offer the fund is making.[1] The fund must describe in its annual report to shareholders the fund's policy concerning repurchase offers and the results of any repurchase offers made during the reporting period. The fund's board of directors must adopt written procedures designed to ensure that the fund's investment portfolio is sufficiently liquid to meet its repurchase obligations and other obligations under the rule. The board periodically must review the composition of the fund's portfolio and change the liquidity procedures as necessary. The fund also must file copies of advertisements and other sales literature with the Commission as if it were an open-end investment company subject to section 24 of the Investment Company Act (15 U.S.C. 80a–24) and the rules that implement section 24.[2]

The requirement that the fund send a notification to shareholders of each offer is intended to ensure that a fund provides material information to shareholders about the terms of each offer, which may differ from previous offers on such matters as the maximum amount of shares to be repurchased (the maximum repurchase amount may range from 5% to 25% of outstanding shares). The requirement that copies be sent to the Commission is intended to enable the Commission to monitor the fund's compliance with the notification requirement. The requirement that the shareholder notification be attached to Form N–23c–3 is intended to ensure that the fund provides basic information necessary for the Commission to process the notification and to monitor the fund's use of repurchase offers. The requirement that the fund describe its current policy on repurchase offers and the results of recent offers in the annual shareholder report is intended to provide shareholders current information about the fund's repurchase policies and its recent experience. The requirement that the board approve and review written procedures designed to maintain portfolio liquidity is intended to ensure that the fund has enough cash or liquid securities to meet its repurchase obligations, and that written procedures are available for review by shareholders and examination by the Commission. The requirement that the fund file advertisements and sales literature as if it were an open-end investment company is intended to facilitate the review of these materials by the Commission or FINRA to prevent incomplete, inaccurate, or misleading disclosure about the special characteristics of a closed-end fund that makes periodic repurchase offers.

Compliance with the collection of information requirements of the rule and form is mandatory only for those funds that rely on the rule in order to repurchase shares of the fund. The information provided to the Commission on Form N–23c–3 will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The Commission staff estimates that 31 funds make use of rule 23c–3 annually, including one fund that is relying upon rule 23c–3 for the first time. The Commission staff estimates that on average a fund spends 89 hours annually in complying with the requirements of the rule and Form N–23c–3, with funds relying upon rule 23c–3 for the first time incurring an additional one-time burden of 28 hours. The Commission therefore estimates the total annual burden of the rule's and form's paperwork requirements to be 2787 hours.

Written comments are invited on: (a) Whether the collections of information are necessary for the proper performance of the functions of the Commission, including whether the information has practical utility; (b) the accuracy of the Commission's estimate of the burdens of the collections of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burdens of the collections of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and

[1] Form N–23c–3 requires the fund to state its registration number, its full name and address, the date of the accompanying shareholder notification, and the type of offer being made (periodic, discretionary, or both).

[2] Rule 24b–3 under the Investment Company Act (17 CFR 270.24b–3), however, would generally exempt the fund from that requirement when the materials are filed instead with the Financial Industry Regulatory Authority (''FINRA''). These materials are virtually always submitted to FINRA, instead of the Commission, under FINRA procedures which apply to the underwriter of every fund.

suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Charles Boucher, Director/CIO, Securities and Exchange Commission, C/O Shirley Martinson, 6432 General Green Way, Alexandria, VA 22312; or send an e-mail to: *PRA_Mailbox@sec.gov.*

Dated: November 17, 2009.

Florence E. Harmon,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549–0213.

Extension:

Form N–3; SEC File No. 270–281; OMB Control No. 3235–0316.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the ''Commission'') is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

The title for the collection of information is ''Form N–3 (17 CFR 239.17a and 274.11b) under the Securities Act of 1933 (15 U.S.C. 77) and under the Investment Company Act of 1940 (15 U.S.C. 80a), Registration Statement of Separate Accounts Organized as Management Investment Companies.'' Form N–3 is the form used by separate accounts offering variable annuity contracts which are organized as management investment companies to register under the Investment Company Act of 1940 (''Investment Company Act'') and/or to register their securities under the Securities Act of 1933 (''Securities Act''). Form N–3 is also the form used to file a registration statement under the Securities Act (and any amendments thereto) for variable annuity contracts funded by separate accounts which would be required to be registered under the Investment Company Act as management investment companies except for the exclusion provided by Section 3(c)(11) of the Investment Company Act (15 U.S.C. 80a–3(c)(11)). Section 5 of the Securities Act (15 U.S.C. 77e) requires the filing of a registration statement prior to the offer of securities to the public and that the statement be effective before any securities are sold, and Section 8 of the Investment Company Act (15 U.S.C. 80a–8) requires a separate account to register as an investment company.

Form N–3 also permits separate accounts offering variable annuity contracts which are organized as investment companies to provide investors with a prospectus and a statement of additional information covering essential information about the separate account when it makes an initial or additional offering of its securities. Section 5(b) of the Securities Act requires that investors be provided with a prospectus containing the information required in a registration statement prior to the sale or at the time of confirmation or delivery of the securities. The form also may be used by the Commission in its regulatory review, inspection, and policy-making roles.

The Commission estimates that there is one initial registration statement and 30 post-effective amendments to initial registration statements filed on Form N–3 annually and that the average number of portfolios referenced in each initial filing and post-effective amendment is 2. The Commission further estimates that the hour burden for preparing and filing a post-effective amendment on Form N–3 is 154.7 hours per portfolio. The total annual hour burden for preparing and filing post-effective amendments is 9,282 hours (30 post-effective amendments × 2 portfolios × 154.7 hours per portfolio). The estimated annual hour burden for preparing and filing initial registration statements is 1,845.4 hours (1 initial registration statement × 2 portfolios × 922.7 hours per portfolio). The total annual hour burden for Form N–3, therefore, is estimated to be 11,127.4 hours (9,282 hours + 1,845.4 hours).

The information collection requirements imposed by Form N–3 are mandatory. Responses to the collection of information will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid control number.

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Charles Boucher, Director/CIO, Securities and Exchange Commission, C/O Shirley Martinson, 6432 General Green Way, Alexandria, VA 22312; or send an e-mail to: *PRA_Mailbox@sec.gov.*

Dated: November 18, 2009.

Florence E. Harmon,

Deputy Secretary.

[FR Doc. E9–28225 Filed 11–24–09; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549–0213.

Extension:

Rule 17j–1; SEC File No. 270–239; OMB Control No. 3235–0224.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 350l–3520), the Securities and Exchange Commission (the ''Commission'') is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Conflicts of interest between investment company personnel (such as portfolio managers) and their funds can arise when these persons buy and sell securities for their own accounts (''personal investment activities''). These conflicts arise because fund personnel have the opportunity to profit from information about fund transactions, often to the detriment of fund investors. Beginning in the early 1960s, Congress and the Securities and Exchange Commission (''Commission'') sought to devise a regulatory scheme to effectively address these potential conflicts. These efforts culminated in the addition of section 17(j) to the Investment Company Act of 1940 (the

''Investment Company Act'') (15 U.S.C. 80a–17(j)) in 1970 and the adoption by the Commission of rule 17j–1 (17 CFR 270.17j–1) in 1980.[1] The Commission proposed amendments to rule 17j–1 in 1995 in response to recommendations made in the first detailed study of fund policies concerning personal investment activities by the Commission's Division of Investment Management since rule 17j–1 was adopted. Amendments to rule 17j–1, which were adopted in 1999, enhanced fund oversight of personal investment activities and the board's role in carrying out that oversight.[2] Additional amendments to rule 17j–1 were made in 2004, conforming rule 17j–1 to rule 204A–1 under the Investment Advisers Act of 1940 (15 U.S.C. 80b), avoiding duplicative reporting, and modifying certain definitions and time restrictions.[3]

Section 17(j) makes it unlawful for persons affiliated with a registered investment company (''fund'') or with the fund's investment adviser or principal underwriter (each a ''17j–1 organization''), in connection with the purchase or sale of securities held or to be acquired by the investment company, to engage in any fraudulent, deceptive, or manipulative act or practice in contravention of the Commission's rules and regulations. Section 17(j) also authorizes the Commission to promulgate rules requiring 17j–1 organizations to adopt codes of ethics.

In order to implement section 17(j), rule 17j–1 imposes certain requirements on 17j–1 organizations and ''Access Persons'' [4] of those organizations. The rule prohibits fraudulent, deceptive or manipulative acts by persons affiliated with a 17j–1 organization in connection with their personal securities transactions in securities held or to be acquired by the fund. The rule requires each 17j–1 organization, unless it is a money market fund or a fund that does not invest in Covered Securities,[5] to: (i) Adopt a written codes of ethics, (ii) submit the code and any material changes to the code, along with a certification that it has adopted procedures reasonably necessary to prevent Access Persons from violating the code of ethics, to the fund board for approval, (iii) use reasonable diligence and institute procedures reasonably necessary to prevent violations of the code, (iv) submit a written report to the fund describing any issues arising under the code and procedures and certifying that the 17j–1 entity has adopted procedures reasonably necessary to prevent Access Persons from violating the code, (v) identify Access Persons and notify them of their reporting obligations, and (vi) maintain and make available to the Commission for review certain records related to the code of ethics and transaction reporting by Access Persons.

The rule requires each Access Person of a fund (other than a money market fund or a fund that does not invest in Covered Securities) and of an investment adviser or principal underwriter of the fund, who is not subject to an exception,[6] to file: (i) Within 10 days of becoming an Access Person, a dated initial holdings report that sets forth certain information with respect to the access person's securities and accounts; (ii) dated quarterly transaction reports within 30 days of the end of each calendar quarter providing certain information with respect to any securities transactions during the quarter and any account established by the Access Person in which any securities were held during the quarter; and (iii) dated annual holding reports providing information with respect to each Covered Security the Access Person beneficially owns and accounts in which securities are held for his or her benefit. In addition, rule 17j–1 requires investment personnel of a fund or its investment adviser, before acquiring beneficial ownership in securities through an initial public offering (IPO) or in a private placement, to obtain approval from the fund or the fund's investment adviser.

The requirements that the management of a rule 17j–1 organization provide the fund's board with new and amended codes of ethics and an annual issues and certification report are intended to enhance board oversight of personal investment policies applicable to the fund and the personal investment activities of Access Persons. The requirements that Access Persons provide initial holdings reports, quarterly transaction reports, and annual holdings reports and request approval for purchases of securities through IPOs and private placements are intended to help fund compliance personnel and the Commission's examinations staff monitor potential conflicts of interest and detect potentially abusive activities. The requirement that each rule 17j–1 organization maintain certain records is intended to assist the organization and the Commission's examinations staff in determining if there have been violations of rule 17j–1.

We estimate that annually there are approximately 75,757 respondents under rule 17j–1, of which 5,757 are rule 17j–1 organizations and 70,000 are Access Persons. In the aggregate, these respondents make approximately 105,125 responses annually. We estimate that the total annual burden of complying with the information collection requirements in rule 17j–1 is approximately 292,740 hours. This hour burden represents time spent by Access Persons that must file initial and annual holdings reports and quarterly transaction reports, investment personnel that must obtain approval before acquiring beneficial ownership in any securities through an IPO or private

[1] Prevention of Certain Unlawful Activities with Respect to Registered Investment Companies, Investment Company Act Release No. 11421 (Oct. 31, 1980) (45 FR 73915 (Nov. 7, 1980)).

[2] Personal Investment Activities of Investment Company Personnel, Investment Company Act Release No. 23958 (Aug. 20, 1999) (64 FR 46821–01 (Aug. 27, 1999)).

[3] Investment Adviser Codes of Ethics, Investment Advisers Act Release No. 2256 (Jul. 2, 2004) (66 FR 41696 (Jul. 9, 2004)).

[4] Rule 17j–1(a)(1) defines an ''access person'' as ''Any advisory person of a Fund or of a Fund's investment adviser. If an investment adviser's primary business is advising Funds or other advisory clients, all of the investment adviser's directors, officers, and general partners are presumed to be Access Persons of any Fund advised by the investment adviser. All of a Fund's directors, officers, and general partners are presumed to be Access Persons of the Fund.'' The definition of Access Person also includes ''Any director, officer or general partner of a principal underwriter who, in the ordinary course of business, makes, participates in or obtains information regarding, the purchase or sale of Covered Securities by the Fund for which the principal underwriter acts, or whose functions or duties in the ordinary course of business relate to the making of any recommendation to the Fund regarding the purchase or sale of Covered Securities.'' Rule 17j–1(a)(1).

[5] A ''Covered Security'' is any security that falls within the definition in section 2(a)(36) of the Act, except for direct obligations of the U.S. Government, bankers' acceptances, bank certificates of deposit, commercial paper and high quality short-term debt instruments, including repurchase agreements, and shares issued by open-end funds. Rule 17j–1(a)(4).

[6] Rule 17j–1(d)(2) contains the following exceptions: (i) An Access Person need not file a report for transactions effected for, and securities held in, any account over which the Access Person does not have control; (ii) an independent director of the fund, who would otherwise not need to report and who does not have information with respect to the fund's transactions in a particular security, does not have to file an initial holdings report or a quarterly transaction report; (iii) an Access Person of a principal underwriter of the fund does not have to file reports if the principal underwriter is not affiliated with the fund (unless the fund is a unit investment trust) or any investment adviser of the fund and the principal underwriter of the fund does not have any officer, director, or general partner who serves in one of those capacities for the fund or any investment adviser of the fund; (iv) an Access Person to an investment adviser need not make quarterly reports if the report would duplicate information provided under the reporting provisions of the Investment Adviser's Act; and (v) an Access Person need not make quarterly transaction reports if the information provided in the report would duplicate information received by the 17j–1 organization in the form of broker trade confirmations or account statements or information otherwise in the records of the 17j–1 organization.

placement, and the responsibilities of Rule 17j–1 organizations arising from information collection requirements under rule 17j–1. These include notifying Access Persons of their reporting obligations, preparing an annual rule 17j–1 report and certification for the board, documenting their approval or rejection of IPO and private placement requests, maintaining annual rule 17j–1 records, maintaining electronic reporting and recordkeeping systems, amending their codes of ethics as necessary, and, for new fund complexes, adopting a code of ethics.

We estimate that there is an annual cost burden of approximately $5,000 per fund complex, for a total of $3,275,000, associated with complying with the information collection requirements in rule 17j–1. This represents the costs of purchasing and maintaining computers and software to assist funds in carrying out rule 17j–1 recordkeeping.

These burden hour and cost estimates are based upon the Commission staff's experience and discussions with the fund industry. The estimates of average burden hours and costs are made solely for the purposes of the Paperwork Reduction Act. These estimates are not derived from a comprehensive or even a representative survey or study of the costs of Commission rules.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid control number.

Written comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (b) the accuracy of the Commission's estimate of the burden of the collections of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burdens of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Charles Boucher, Director/CIO, Securities and Exchange Commission, C/O Shirley Martinson, 6432 General Green Way, Alexandria, VA 22312; or send an e-mail to: *PRA_Mailbox @sec.gov*.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Rule 17Ad–16; SEC File No. 270–363; OMB Control No. 3235–0413]

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549–0213.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the existing collection of information provided for in Rule 17Ad–13 (17 CFR 240.17Ad–13) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*) (''Exchange Act''). The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Rule 17Ad–16 requires a registered transfer agent to provide written notice to the appropriate qualified registered securities depository when assuming or terminating transfer agent services on behalf of an issuer or when changing its name or address. In addition, transfer agents that provide such notice shall maintain such notice for a period of at least two years in an easily accessible place. This rule addresses the problem of certificate transfer delays caused by transfer requests that are directed to the wrong transfer agent or the wrong address.

We estimate that the transfer agent industry submits 3,000 Rule 17Ad–16 notices to appropriate qualified registered securities depositories. The staff estimates that the average amount of time necessary to create and submit each notice is approximately 15 minutes per notice. Accordingly, the estimated total industry burden is 750 hours per year (15 minutes multiplied by 3,000 notices filed annually).

Because the information needed by transfer agents to properly notify the appropriate registered securities depository is readily available to them and the report is simple and straightforward, the cost is relatively minimal. The average cost to prepare and send a notice is approximately $7.50 (15 minutes at $30 per hour). This yields an industry-wide cost estimate of $22,500 (3,000 notices multiplied by $7.50 per notice).

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Comments should be directed to Charles Boucher, Director/Chief Information Officer, Securities and Exchange Commission, c/o Shirley Martinson, 6432 General Green Way, Alexandria, VA 22312 or send an e-mail to: *PRA_Mailbox@sec.gov.*

Dated: November 18, 2009.

Florence E. Harmon,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–61032; File No. PCAOB–2009–01]

Public Company Accounting Oversight Board; Notice of Filing of Proposed Amendment to Board Rules Relating to Inspections

November 19, 2009.

Pursuant to Section 107(b) of the Sarbanes-Oxley Act of 2002 (the ''Act''), notice is hereby given that on July 2, 2009, the Public Company Accounting Oversight Board (the ''Board'' or ''PCAOB'') filed with the Securities and Exchange Commission (the ''SEC'' or ''Commission'') the proposed rule changes described in Items I, II, and III below, which items have been prepared by the Board. The Commission is publishing this notice to solicit comments on the proposed rule from interested persons.

I. Board's Statement of the Terms of Substance of the Proposed Rule

On June 25, 2009, the Board adopted an amendment to its rule relating to the

frequency of inspections. The proposed amendment adds a new paragraph (g) to existing Rule 4003. The text of the proposed amendment is set out below. Language added by the amendment is in italics.

Rule 4003. Frequency of Inspections

* * * * *

(g) With respect to any foreign registered public accounting firm concerning which the preceding provisions of this Rule, other than paragraphs (a) and (f), would set a 2009 deadline for the first Board inspection and that is headquartered in a country in which no foreign registered public accounting firm that the Board inspected before 2009 is headquartered, such deadline is extended to 2012, provided, however, that from among the group of all such firms, the Board shall conduct some first inspections in each of the years from 2009 to 2012, scheduled according to such criteria as the Board shall publicly announce.

II. Board's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule

In its filing with the Commission, the Board included statements concerning the purpose of, and basis for, the proposed rule. The text of these statements may be examined at the places specified in Item IV below. The Board has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Board's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule

(a) Purpose

The Sarbanes-Oxley Act of 2002 directs the Board to conduct a continuing program of inspections to assess registered public accounting firms' compliance with certain requirements.[1] The Act prescribes inspection frequency requirements but also authorizes the Board to adjust the frequency requirements by rule if the Board finds that an adjustment is consistent with the purposes of the Act, the public interest, and the protection of investors.[2] Inspection frequency requirements adopted by the Board are set out in PCAOB Rule 4003, ''Frequency of Inspections.''

The Board began a regular cycle of inspections of U.S. firms in 2004 and has conducted 982 such inspections, including repeat inspections of several firms. Inspections of non-U.S. firms began in 2005, and the Board has inspected 140 non-U.S. firms. Those firms are located in 26 jurisdictions.[3] There are, however, currently 68 non-U.S. firms that, by virtue of when they first issued audit reports after registering with the PCAOB, the Board is required to inspect for the first time by the end of 2009.[4] For the reasons described below, the Board has adopted Rule 4003(g), which would affect the timing of a subset of those 68 inspections. Specifically, Rule 4003(g) will give the Board the ability to postpone, for up to three years, first inspections that the Board is currently required to conduct before the end of 2009 in jurisdictions where the Board conducted no inspections before 2009. The amendment does not affect inspection frequency requirements concerning any other first inspections, or concerning any second or later inspections, of firms that issue audit reports for issuers.[5]

The PCAOB has recognized since the outset of its inspection program that inspections of non-U.S. firms pose special issues.[6] In its oversight of non-U.S. firms, the Board seeks, to the extent reasonably possible, to coordinate and cooperate with local authorities. Since 2003, when the PCAOB began operations, a number of jurisdictions have also developed their own auditor oversight authorities with inspection responsibilities or enhanced existing oversight systems.[7] The Board believes that it is in the interests of the public and investors for the Board to develop efficient and effective cooperative arrangements with its non-U.S. counterparts.[8] In jurisdictions that have their own inspection programs, this may include conducting joint inspections of firms that are subject to both regulators' authority.

Indeed, the Board has a specific framework for working cooperatively with its non-U.S. counterparts to conduct joint inspections and, to the extent deemed appropriate by the Board in any particular case, relying on inspection work performed by that counterpart.[9] PCAOB Rule 4011 permits non-U.S. firms that are subject to Board inspection to formally request that the Board, in conducting its inspection, rely on a non-U.S. inspection to the extent deemed appropriate by the Board. If a Rule 4011 request is made, Rule 4012 provides that the Board will, at an appropriate time before each inspection of the firm, determine the degree, if any, to which the Board may rely on the non-U.S. inspection. Rule 4012 describes aspects of the non-U.S. system that the Board will evaluate in making that determination. Even where the Board does not work with a local regulator to conduct joint inspections, the Board communicates with its counterpart or other local authorities (such as securities regulators or other government agencies and ministries) regarding its inspections to be conducted in the jurisdiction.

In some jurisdictions, the PCAOB's ability to conduct inspections, either by itself or jointly with a local regulator, is complicated by the concerns of local authorities about potential legal obstacles and sovereignty issues. The Board seeks to work with the home-country authorities to try to resolve these and any other concerns.[10]

The effort involved in attempting to resolve potential conflicts of law, or to evaluate a non-U.S. system in response to a Rule 4011 request, can be

[1] *See* Section 104(a) of the Act.

[2] *See* Section 104(b) of the Act.

[3] The Board has inspected non-U.S. firms located in Argentina, Australia, Bermuda, Brazil, Canada, Chile, Colombia, Greece, Hong Kong, India, Indonesia, Ireland, Israel, Japan, Kazakhstan, Mexico, New Zealand, Norway, Panama, Peru, the Russian Federation, Singapore, South Africa, South Korea, Chinese-Taipei, and the United Kingdom.

[4] This discussion does not include, or apply to, 21 non-U.S. firms whose first inspection deadline has been moved from 2008 to 2009 under Rule 4003(f).

[5] Existing Rule 4003 effectively sets deadlines for the Board's inspections not only of firms that issue audit reports, but also of firms that play a substantial role in the preparation or furnishing of an audit report (as defined in PCAOB Rule 1001(p)(ii)). The Board has previously submitted for Commission approval amendments to Rules 4003(b) and 4003(d) that would eliminate from the Rule any frequency requirement or deadline for the Board to inspect a firm that plays a substantial role but does not issue an audit report. Unless and until the Commission approves such a rule change, however, the extension in proposed rule 4003(g) would (if approved by the Commission) apply to required 2009 PCAOB inspections of non-U.S. firms (in jurisdictions encompassed by the rule's terms) that have played a substantial role as well as to required 2009 inspections of non-U.S. firms that have issued audit reports.

[6] *See* Briefing Paper, Oversight of Non-U.S. Public Accounting Firms (October 28, 2003) (hereinafter ''Oversight of Non-U.S. Firms''); Final Rules Relating to the Oversight of Non-U.S. Public Accounting Firms, PCAOB Release No. 2004–005 (June 9, 2004).

[7] In 2006, for instance, the European Union enacted a directive requiring the creation of an effective system of public oversight for statutory auditors and audit firms within each Member State. See The Directive 2006/43/EC of the European Parliament and the Council (May 17, 2006) (the ''Eighth Directive''). In addition, among others, Canada created the Canadian Public Accountability Board, and in Australia, the responsibilities of the Australian Securities and Investments Commission were expanded to include auditor oversight. In Asia, Japan established the Certified Public Accountants and Auditing Oversight Board, South Korea delegated responsibility for auditor oversight to its Financial Supervisory Service, and Singapore established the Accounting and Corporate Regulatory Authority.

[8] *See* Oversight of Non-U.S. Firms at 2–3.

[9] *See* PCAOB Rules 4011 and 4012; *see also* Oversight of Non-U.S. Firms at 2–3.

[10] *See* Oversight of Non-U.S. Firms at 3.

substantial. The effort typically involves negotiating the principles of an arrangement for cooperation consistent with the inspection obligations that the Act imposes on the Board. It also involves the Board gaining a detailed understanding of the other jurisdiction's auditor oversight system in order for the Board to determine the degree of reliance it is willing to place on inspection work performed under that system in a particular inspection year.

Additional effort is involved in coordinating the scheduling of specific inspections. Where possible, the Board seeks to conduct inspections jointly with local authorities both to take advantage of potential efficiencies and to avoid imposing unnecessary regulatory burdens on firms. Like the PCAOB, several of these other authorities proceed according to inspection frequency requirements. While some of the Board's counterparts are established and have inspection programs, many have only recently begun inspections or are still building up their inspections resources. As a result, synchronizing the inspections schedules of these authorities and the PCAOB's requirements is sometimes difficult.

Notwithstanding these challenges, the Board has so far conducted 140 non-U.S. inspections. Moreover, 61 of those inspections, in six jurisdictions, have been conducted jointly with other auditor oversight authorities, while inspections in 20 jurisdictions have been conducted solely by the PCAOB.[11]

As noted above, under existing Rule 4003, there are 68 non-U.S. firms that, by virtue of when they first issued audit reports after registering with the PCAOB, the Board is required to inspect for the first time by the end of 2009. Those firms are located in 36 jurisdictions, including several jurisdictions in which the Board has already conducted first inspections of other firms. Of those firms, 49 are located in 24 jurisdictions where the Board has not conducted any inspections to date. Most of those 24 jurisdictions have or soon will have a local auditor oversight authority with which the Board would seek to work toward cooperative arrangements before conducting inspections. Because of the steps involved in concluding such arrangements and to evaluate the local system, the Board has concerns about proceeding as if that work can be completed for all of the jurisdictions in which the PCAOB has not previously conducted inspections in time to conduct the required inspections by the end of 2009.

Accordingly, the Board is adopting a new paragraph (g) to Rule 4003 to allow the Board to postpone, for up to three years, the first inspection of any non-U.S. firm that the Board is currently required to conduct by the end of 2009 and that is in a jurisdiction where the Board has not conducted an inspection before 2009.

In determining the schedule for completion of the inspections subject to new paragraph (g), the Board will implement its proposal to sequence these 49 inspections such that certain minimum thresholds will be satisfied in each of the years from 2009 to 2012. The minimum thresholds relate to U.S. market capitalization of firms' issuer audit clients. The Board will begin by ranking the 49 firms according to the total U.S. market capitalization of a firm's foreign private issuer audit clients.[12] Working from the top of the list (highest U.S. market capitalization total) down, the 49 firms will be distributed over 2009 to 2012 such that, at a minimum, the following criteria are satisfied:

- By the end of 2009, the Board will inspect firms whose combined issuer audit clients' U.S. market capitalization constitutes at least 35 percent of the aggregate U.S. market capitalization of the audit clients of all 49 firms;
- By the end of 2010, the Board will inspect firms whose combined issuer audit clients' U.S. market capitalization constitutes at least 90 percent of that aggregate;
- By the end of 2011, the Board will inspect firms whose combined issuer audit clients' U.S. market capitalization constitutes at least 99.9 percent of that aggregate; and
- The Board will inspect the remaining firms in 2012.[13]

In addition to meeting those market capitalization thresholds, the Board also will satisfy certain criteria concerning the number of those 49 firms that will be inspected in each year. Specifically, the Board will conduct at least four of the 49 inspections in 2009, at least 11 more in 2010, and at least 14 more in 2011.[14]

It is important to note that the distribution described above will not operate to prevent an inspection from occurring earlier than called for by the schedule. Any inspection may be moved to an earlier year for a variety of reasons, such as the presence of risk factors (including risk factors relating to referred work[15] that the firm performs on audits for which it is not the principal auditor), synchronization of schedules with a local regulator for purposes of a joint inspection, or simply the opportunity and the availability of resources to do an inspection earlier (including availability of inspectors with specialized industry knowledge and relevant language skills). In addition, the Board will at least annually review updated market capitalization data and consider whether there have been any changes that warrant moving a particular inspection forward to an earlier year.

Conversely, the Board does not intend to make changes that would move an inspection of one of these 49 firms to a later year than in the initial distribution except as the result of a development relating to the market capitalization of the firm's issuer clients. Specifically, if a firm's issuer audit client market capitalization drops significantly and the firm performs no significant amount of referred work on audits, its inspection might be delayed to a later year. In any event, the Board will not, for any reason, move one of these 49 inspections to a later year than in the initial distribution without publicly describing the change and the reason for it.

In the Board's view, this adjustment to the inspection frequency requirement is consistent with the purposes of the Act, the public interest, and the protection of investors. The Board believes that its approach to implementing Rules 4011 and 4012, developing cooperative arrangements, and conducting joint inspections with foreign regulators is enhancing the Board's efforts to carry out its inspection responsibilities. There is long-term value in accepting a limited delay in inspections to continue working toward

[11] Joint inspections have been conducted in Australia, Canada, South Korea, Norway, Singapore and the United Kingdom.

[12] For purposes of the ranking described here, the Board will use the average monthly market capitalization on which each issuer's share of the Board's 2008 accounting support fee was based. Thus, the market capitalization figure used for the ranking does not include the value of any referred work performed by the firm.

[13] Under existing provisions of Rule 4003 that are not affected by this amendment, 2012 would also be the deadline for the Board to conduct the second inspection of those of the 49 firms whose first inspection occurs in 2009.

[14] The issuer audit client U.S. market capitalization currently associated with a significant number of the 49 firms is relatively low, and even zero in a number of cases where firms appear to have stopped issuing audit reports for issuers. As a result, approximately 92% of the relevant issuer market capitalization is associated with 15 of the 49 firms.

[15] Because the PCAOB is still in the process of gathering information about each firm's referred work, the 2009 inspections will not use referred work as a risk factor for purposes of scheduling.

cooperative arrangements where it appears reasonably possible to reach them. The Board also believes that the additional time to conduct certain inspections will have the added benefit of giving the Board more time to continue to enhance its inspection program, particularly in the areas of risk assessment and pre-inspection planning, and the Board intends to do so.

The Board recognizes that some non-U.S. firms may be reluctant to comply with PCAOB inspection demands because of a concern that doing so might violate local law or the sovereignty of their home country. The Board believes that the purposes of the Act, the public interest, and the protection of investors are better served, up to a point, by delaying some of the first inspections to work toward a cooperative resolution than by precipitating legal disputes involving conflicts between U.S. and non-U.S. law that could arise if the Board sought to enforce compliance with its preferred schedule without regard for the concerns of non-U.S. authorities.

The Board does not intend, however, to make any further adjustments to the inspection frequency requirements applicable to firms whose first inspection was due no later than 2009. While the Board will continue to work toward cooperation and coordination with authorities in the relevant jurisdictions, the Board will make inspection demands on the firms early enough in the year in which they are scheduled for inspection according to the above described sequencing to allow the Board to conduct the inspections during that year.[16]

(b) Statutory Basis

The statutory basis for the proposed rule is Title I of the Act.

B. Board's Statement on Burden on Competition

The Board does not believe that the proposed rule will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule imposes no burden beyond the burdens clearly imposed and contemplated by the Act.

C. Board's Statement on Comments on the Proposed Rule Received From Members, Participants or Others

The Board released the proposed rule amendment for public comment in Release No. 2008–007 (December 4, 2008). A copy of Release No. 2008–007 and the comment letters received in response to the PCAOB's request for comment are available on the PCAOB's Web site at *http://www.pcaobus.org/Rules/Docket_027.* The Board received twenty-four written comment letters. The Board has carefully considered the comment letters, as discussed below.

Several commenters suggested that the Board exercise its authority under Section 106 of the Act to exempt firms that cannot cooperate with PCAOB inspections due to legal conflicts or sovereignty-based opposition from their local governments. The Board believes that it is not in the interests of investors or the public to exempt non-U.S. firms from the Act's inspection requirement given that the Board has previously determined not to exempt non-U.S. firms from the Act's registration requirements and given that an inspection is the Board's primary tool of oversight.[17]

The Board also received several comment letters addressing the length of the proposed extension for certain firms with 2009 deadlines. Some comment letters expressed concern about the inspection delay of up to three years but ultimately expressed qualified support for the Board's decision. These comments urged the Board to permit no further delays and to proceed as described above by sequencing the inspection of firms subject to the extension based on certain thresholds relating to the U.S. market capitalization of firms' issuer audit clients. Some comments also suggested that the Board should utilize the additional time provided by the proposed extension to enhance its international inspections program, particularly in the areas of risk assessment and pre-inspection planning.

Other comment letters supported the Board's decision to extend the inspection deadlines, but some qualified their support by noting that three years may not be enough time to overcome the legal conflicts and sovereignty concerns in all relevant jurisdictions. Several comments expressed support for the Board's plan to sequence the deferred inspections in time based on the U.S. market capitalization of the firms' clients, but some also noted that this plan did not adequately take into account the varying degree of legal conflicts present in the different jurisdictions and might have the effect of requiring early on during the three year period the inspection of firms in jurisdictions with legal obstacles that cannot be overcome quickly.

As explained above, the Board believes that an extension of up to three years for the relevant firms is the appropriate course. Distributing the affected firms across three years strikes the proper balance between avoiding unnecessary delays in the inspection of registered firms and allowing reasonable time for the Board to continue its efforts to reach cooperative arrangements with the relevant home-country regulators. The Board believes that any longer or further extension would not be in the interests of investors or the public.

III. Date of Effectiveness of the Proposed Rule and Timing for Commission Action

Within 60 days of the date of publication of this notice in the **Federal Register** or within such longer period as (i) the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Board consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule changes are consistent with the requirements of Title I of the Act. Comments may be submitted by any of the following methods:

[16] Apart from the proposed rule amendment, the Board has implemented certain practices to provide additional transparency with regard to the Board's international inspections program. These practices include (1) making a public announcement, near the beginning of each year until 2012, identifying all non-U.S. jurisdictions in which there are firms that the Board will inspect that year, (2) maintaining a public list of all registered firms that have not yet had their first Board inspection even though more than four years have passed since the end of the calendar year in which they first issued an audit report while registered with the Board, and (3) making biannual public announcements of the Board's progress toward meeting the thresholds described above with respect to the number of firms to be inspected and the aggregate market capitalization of firm clients. The Board also maintains on its Web site a list of all jurisdictions in which there are registered firms that the Board has inspected. Additional details concerning these practices are provided in PCAOB Release No. 2009–003, available on the Board's Web site at *http://www.pcaobus.org/Rules/Docket_027.*

[17] When it first became operational, the Board considered whether to exempt non-U.S. firms from registration with the Board. The Board determined that exempting non-U.S. firms would not protect the interests of investors or further the public interest given that registration is the predicate to all of the Board's other oversight programs. See Registration System for Public Accounting Firms, PCAOB Release No. 2003–007 (May 6, 2003) at 13.

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/pcaob.shtml*); or

• Send an e-mail to *rule-comments@sec.gov*. Please include File Number PCAOB–2009–01 on the subject line.

Paper Comments

Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number PCAOB–2009–01. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/pcaob/shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule changes that are filed with the Commission, and all written communications relating to the proposed rule changes between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 100 F Street, NE., Washington, DC 20549 on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the PCAOB. All comments received will be posted without change; we do not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number PCAOB–2009–01 and should be submitted on or before December 16, 2009.

By the Commission.

Elizabeth M. Murphy,

Secretary.

[FR Doc. E9–28239 Filed 11–24–09; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–61025; File No. SR–NYSEArca–2009–102]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by NYSE Arca, Inc. Amending Rule 7.25

November 18, 2009.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on November 6, 2009, NYSE Arca, Inc. (''NYSE Arca'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.25 to remove the requirement that for each security in which a Market Maker is registered as a Lead Market Maker, the Lead Market Maker also register as an Odd Lot Dealer in that security. The text of the proposed rule change is available at the Exchange, the Commission's Public Reference Room, and *http://www.nyse.com*.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 7.25 to remove the requirement that for each security in which a Market Maker is registered as a Lead Market Maker (''LMM''), the LMM also register as an Odd Lot Dealer (''OLD'') in that security (the ''LMM–OLD requirement''). Going forward, LMMs may choose to register as an OLD, but will not be required to do so.

The LMM–OLD requirement was originally established in order to ensure that a mechanism existed whereby the Exchange could facilitate odd lot executions for its primary listings that could not otherwise be routed away to another market center for execution.[4] This historical concern no longer exists. All orders in primary listings, whether odd lot or round lot, are eligible for routing to away market centers. Any eligible unexecuted balance of odd lot orders, like round lot orders, shall be routed to away market centers for execution pursuant to NYSE Arca Equities Rule 7.37(d). Also, for purposes of ranking and execution, round lot, mixed lot and odd lot orders are treated in the same manner on the NYSE Arca Marketplace.[5] As a result, it is no longer necessary to require LMMs to register as OLDs. Instead, as with all market makers, LMMs may choose to register as an OLD, but will not be required to do so.

In addition, until recently, the Exchange paid a $0.02 per share credit to market makers that executed against an odd lot order. This rebate represented a higher than standard rebate, and acted as an incentive for market makers to register as OLDs. However, the Exchange notes that as of August 3, 2009, the Exchange eliminated all distinct odd lot pricing and now makes no distinction with respect to the rates applied to odd lot and round lot executions.[6]

The Exchange is not otherwise altering any other rights or obligations of LMMs.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with and furthers the objectives of Section 6(b)(5) of the Act,[7] in that it is designed to promote just and equitable principles of

[1] 15 U.S.C.78s(b)(1).

[3] 17 CFR 240.19b–4.

[4] *See* Securities Exchange Act Release No. 52827 (November 23, 2005), 70 FR 72139 (December 1, 2005) (order approving SR–PCX–2005–56).

[5] If there is an Odd Lot Dealer registered in the security, the order shall be matched in the Odd Lot Tracking Order Process pursuant to Rule 7.37(c). If there is no Odd Lot Dealer registered in that security, the odd lot will be routed away pursuant to NYSE Arca Equities Rule 7.37(d).

[6] *See* Securities Exchange Act Release No. 60495 (August 13, 2009), 74 FR 41957 (August 19, 2009) (notice of filing and immediate effectiveness of SR–NYSEArca–2009–72).

[7] 15 U.S.C. 78f(b)(5).

trade, remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange is simply eliminating the requirement that LMMs register as an OLD in the security in which they are also registered as an LMM. The Exchange is not otherwise altering the rights and obligations of LMMs.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [8] and Rule 19b–4(f)(6) thereunder.[9]

A proposed rule change filed under Rule 19b–4(f)(6) of the Act [10] normally does not become operative prior to 30 days after the date of the filing. However, Rule 19b–4(f)(6) [11] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest.

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–NYSEArca–2009–102 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2009–102. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 100 F Street, NE., Washington, DC 20549–1090 on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing will also be available for inspection and copying at NYSE Arca's principal office and on its Internet Web site at *http://www.nyse.com*. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2009–102 and should be submitted on or before December 16, 2009.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

Florence E. Harmon,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–61026; File No. SR–FINRA–2009–076]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing of Proposed Rule Change To Amend the FINRA Rule 9550 Series (Expedited Proceedings)

November 18, 2009.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 5, 2009, Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by FINRA. On November 17, 2009, FINRA filed Amendment No. 1. [3] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

FINRA is proposing to (1) Modify various time requirements regarding expedited proceedings, (2) add an expedited proceeding for failure to pay restitution, and (3) harmonize a remedy in an expedited procedure with a remedy in the FINRA By-Laws.

The text of the proposed rule change is available on FINRA's Web site at: *http://www.finra.org,* at the principal office of FINRA and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Amendment No. 1 to SR–FINRA–2009–076 supersedes and replaces in its entirety the proposed rule change as filed on November 5, 2009. FINRA filed Amendment No. 1 so that the text of Proposed FINRA Rule 9559 as set forth in this rule filing could reflect amendments adopted pursuant to proposed rule change SR–FINRA–2008–067. *See* Securities Exchange Act Release No. 60933 (November 4, 2009), 74 FR 58334 (November 12, 2009) (Order Approving File No. SR–FINRA–2008–067).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

In March 2004, the SEC approved a rule change that created the NASD Rule 9550 Series to consolidate, clarify, and streamline most procedural rules that had an expedited proceeding component.[4] Having used the procedures for five years and having conducted a recent analysis of their effectiveness, FINRA is proposing a few modifications that will strengthen investor protection and improve administrative efficiency. The proposed changes are discussed separately below.

Shortening Time Periods

The Rule 9550 Series provides a procedural mechanism for FINRA to address certain types of misconduct more quickly than would be possible using the ordinary disciplinary process. At the same time, the Rule 9550 Series provides firms and associated persons with numerous procedural protections, including the ability to request a hearing that often results in a stay of the action. FINRA proposes shortening the time within which a hearing must be held from the current 60 days after a hearing request to 30 days after the request in relation to the following FINRA rules:

- Rule 9551 (Failure To Comply With Public Communication Standards);
- Rule 9552 (Failure To Provide Information or Keep Information Current);
- Rule 9553 (Failure To Pay FINRA Dues, Fees and Other Charges);
- Rule 9554 (Failure To Comply With an Arbitration Award or Related Settlement); and
- Rule 9555 (Failure to Meet the Eligibility or Qualification Standards or Prerequisites for Access to Services).

The proposed change[5] strengthens investor protection while maintaining procedural safeguards for respondents, makes the timing of the hearings more consistent with other hearings in the rule series, and reflects FINRA's experience over the past five years in resolving these matters. The change would increase investor protection by limiting the period during which a wrongdoer could continue doing business while the matter is pending. Moreover, the issues involved in these cases usually are straightforward (*e.g.,* whether the respondent paid an arbitration award or FINRA fee or provided required information) and do not require lengthy preparation time. The change also would bring these hearing provisions more in line with the other expedited actions in the Rule 9550 Series, which require hearings to be held within 14 days or five business days of the respondent's request for a hearing depending on the type of conduct at issue. Finally, five years' experience has established that hearings can be held much more quickly than the current scheme contemplates.

In addition to modifying the timing of hearings, FINRA proposes amending Rule 9552 to shorten the period before a suspension automatically turns into an expulsion or bar. Rule 9552 allows FINRA to suspend a member or associated person for failure to provide any information requested or required to be filed pursuant to the FINRA By-Laws or rules, such as FOCUS reports or annual audits. Under the rule, FINRA may provide written notice to such member or person specifying the nature of the failure and stating that failure to take corrective action within 21 days after service of the notice will result in suspension. The rule also provides that a member or person suspended under the rule who fails to request termination of the suspension within six months is automatically expelled or barred. FINRA proposes shortening that timeframe from six months to three months. Three months provides sufficient time for respondents to seek to lift the suspension while moving the process forward at a more efficient and reasonable pace.

Adding an Expedited Procedure for Failure To Pay Restitution

FINRA proposes amending Rule 9554, which contains expedited procedures for failure to pay FINRA arbitration awards, to also permit FINRA to take expedited action for failure to comply with a FINRA order of restitution or a FINRA settlement providing for restitution. Restitution is an equitable remedy used to restore victims to their position before the wrongful conduct occurred and to compensate them for unjust losses or injury suffered as the result of another's wrongdoing.[6] The SEC and FINRA have long stressed the importance of imposing restitution where an ''identifiable person … has suffered a quantifiable loss as a result of a respondent's misconduct.''[7]

Although FINRA can take expedited action against a member firm or associated person for failure to pay fines, dues, and fees to FINRA and for failure to pay an arbitration award to a third party, FINRA currently does not have explicit authority to take expedited action against firms or associated persons who fail to pay restitution to a third party (usually investors who have been harmed). FINRA's only recourse is to initiate an ordinary disciplinary action, which can take several months to conclude. FINRA believes that firms and associated persons should not be permitted to continue doing business for prolonged periods when they have failed to pay restitution to third parties. The proposal would close this loophole.

Harmonizing Remedies

FINRA proposes harmonizing the remedy for an individual's failure to pay an arbitration award in Rule 9554 with the remedy for the same misconduct in the FINRA By-Laws. At present, Rule 9554 states that FINRA may suspend or cancel the membership of a firm and may suspend or bar an individual for failure to pay an arbitration award. Article VI, Section 3(b) of the FINRA By-Laws, however, limits the remedy regarding an individual's failure to pay an arbitration award to a suspension. To make the rule consistent with the By-Laws, the proposed change would limit the remedy against individuals in such

[4] *See* Securities Exchange Act Release No. 49380 (March 9, 2004), 69 FR 12386 (March 16, 2004) (Order Approving File No. SR–NASD–2003–110)); *Notice to Members* 04–36 (May 2004). Expedited proceedings in this context refer to fast-tracked matters that take place outside the ordinary FINRA disciplinary process. In September 2008, the SEC approved the adoption of the NASD Rule 9550 Series as the FINRA Rule 9550 Series. *See* Securities Exchange Act Release No. 58643 (September 25, 2008), 73 FR 57174 (October 1, 2008) (Order Approving File Nos. SR–FINRA–2008–021; SR–FINRA–2008–022; SR–FINRA–2008–026; SR–FINRA–2008–028 and SR–FINRA–2008–029); Regulatory Notice 08–57 (October 2008).

[5] FINRA would implement the proposed change by amending Rule 9559, which contains the hearing provisions for the Rule 9550 Series. FINRA also would make conforming changes to Rule 9559 regarding the pre-hearing exchange of documents between the parties to the expedited proceeding.

[6] *See David Joseph Dambro,* 51 S.E.C. 513, 518 (1993).

[7] FINRA Sanction Guidelines, at 4; *see also Dambro,* 51 S.E.C. at 518 (emphasizing importance of getting money back to investors who were harmed by broker's misconduct).

cases to suspension and would eliminate any reference to barring individuals.

FINRA will announce the effective date of the proposed rule change in a *Regulatory Notice* to be published no later than 60 days following Commission approval. The effective date will be 30 days following publication of the *Regulatory Notice* announcing Commission approval.

2. Statutory Basis

The proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,[8] which requires, among other things, that FINRA's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. The proposal also is consistent with Section 15A(b)(7) of the Act,[9] which provides that FINRA members and associated persons must be appropriately disciplined for violations of any provisions of the Act or FINRA rules. The proposed rule change is consistent with these purposes because it promotes a fair and efficient disciplinary process and provides a mechanism to take expedited action when a member or associated person fails to pay restitution.

B. Self-Regulatory Organization's Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–FINRA–2009–076 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–FINRA–2009–076. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of FINRA. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make publicly available. All submissions should refer to File Number SR–FINRA–2009–076 and should be submitted on or before December 16, 2009.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[10]

DEPARTMENT OF STATE

[Public Notice 6807]

Notice of Meeting of the Advisory Committee on International Law

A meeting of the Advisory Committee on International Law will take place on Friday, December 11, 2009, from 9:15 a.m. to approximately 5:30 p.m., at the George Washington University Law School (Michael K. Young Faculty Conference Center, 5th Floor), 2000 H St., NW., Washington, DC. The meeting will be chaired by the Legal Adviser of the Department of State, Harold H. Koh, and will be open to the public up to the capacity of the meeting room. It is anticipated that the agenda of the meeting will cover a range of current international legal topics, including treaty scope and enforcement issues, the relationship between human rights treaties and humanitarian law; issues relating to the International Criminal Court; options for compliance with the International Court of Justice's decision in the *Case Concerning Avena and Other Mexican Nationals* (*Mexico* v. *United States of America*); and the law of non-international armed conflict. Members of the public will have an opportunity to participate in the discussion.

Members of the public who wish to attend the session should, by Monday, December 7, 2009, notify the Office of the Legal Adviser (telephone: 202–776–8323) of their name, professional affiliation, address, and telephone number. A valid photo ID is required for admittance. A member of the public who needs reasonable accommodation should make his or her request by December 4, 2009; requests made after that time will be considered but might not be possible to accommodate.

Dated: November 19, 2009.

David DeBartolo,

Office of Claims and Investment Disputes, Office of the Legal Adviser, Executive Director, Advisory Committee on International Law, Department of State.

DEPARTMENT OF STATE

[Public Notice 6810]

Defense Trade Advisory Group Meeting Agenda

Summary: As announced in the **Federal Register** (Volume 74, Number 218, Pages 58675–58676) the Defense Trade Advisory Group (DTAG) will meet in open session from 1 p.m. until 5 p.m. on Friday, December 4, 2009. The meeting agenda will be as follows: 1 until 1:15 Opening Remarks; 1:15–2:45 Export Control Reform; 2:45–3:00 Break; 3–3:45 Draft revision to ITAR Section 126.4; 3:45–4:45 Draft revision to ITAR Section 129; 4:45–5 Concluding Remarks. The draft revisions to ITAR Sections 126.4 and 129 that will be discussed at the meeting will be posted on the PM/DDTC Web site (*http://www.pmddtc.state.gov*) prior to the meeting in order to provide attendees with the opportunity to review before the meeting. Please refer to the **Federal Register** Notice referenced above for particulars regarding location of meeting and attendance.

Dated: 18 November 2009.

Robert S. Kovac,

Designated Federal Officer, Defense Trade Advisory Group, Department of State.

DEPARTMENT OF STATE

[Public Notice 6820]

Bureau of Political-Military Affairs: Directorate of Defense Trade Controls; Notifications to the Congress of Proposed Commercial Export Licenses

SUMMARY: Notice is hereby given that the Department of State has forwarded the attached Notifications of Proposed Export Licenses to the Congress on the dates indicated on the attachments pursuant to sections 36(c) and 36(d) and in compliance with section 36(f) of the Arms Export Control Act (22 U.S.C. 2776).

DATES: *Effective Date:* As shown on each of the 16 letters.

FOR FURTHER INFORMATION CONTACT: Mr. Robert S. Kovac, Managing Director, Directorate of Defense Trade Controls, Bureau of Political-Military Affairs, Department of State (202) 663–2861.

SUPPLEMENTARY INFORMATION: Section 36(f) of the Arms Export Control Act mandates that notifications to the Congress pursuant to sections 36(c) and 36(d) must be published in the **Federal Register** when they are transmitted to Congress or as soon thereafter as practicable.

October 13, 2009 (Transmittal 091–09)
Hon. Nancy Pelosi, Speaker of the House of Representatives.

Dear Madam Speaker: Pursuant to Section 36(c) of the Arms Export Control Act, I am transmitting, herewith, certification of a proposed technical assistance agreement to include the export of technical data, defense services, and defense articles in the amount of $50,000,000 or more.

The transaction contained in the attached certification involves the transfer of technical data, defense services, and hardware to support the Proton launch of the SkyTerra 2 Commercial Communication Satellite from the Baikonur Cosmodrome in Kazakhstan.

The United States Government is prepared to license the export of these items having taken into account political, military, economic, human rights, and arms control considerations.

More detailed information is contained in the formal certification which, though unclassified, contains business information submitted to the Department of State by the applicant, publication of which could cause competitive harm to the United States firm concerned.

Sincerely,

Richard R. Verma,
Assistant Secretary Legislative Affairs.

October 22, 2009 (Transmittal 099–09)
Hon. Nancy Pelosi, Speaker of the House of Representatives.

Dear Madam Speaker: Pursuant to Section 36(c) of the Arms Export Control Act, I am transmitting, herewith, certification of a proposed technical assistance agreement to include the export of defense articles, technical data and defense services in the amount of $50,000,000 or more.

The transaction contained in the attached certification involves the transfer of defense articles, to include technical data, and defense services to support the Proton launch of the Telstar 14R Commercial Communication Satellite from the Baikonur Cosmodrome in Kazakhstan.

The United States Government is prepared to license the export of these items having taken into account political, military, economic, human rights, and arms control considerations.

More detailed information is contained in the formal certification which, though unclassified, contains business information submitted to the Department of State by the applicant, publication of which could cause competitive harm to the United States firm concerned.

Sincerely,

Richard R. Verma,
Assistant Secretary Legislative Affairs.

November 12, 2009 (Transmittal 104–09)
Hon. Nancy Pelosi, Speaker of the House of Representatives.

Dear Madam Speaker: Pursuant to Section 36(d) of the Arms Export Control Act, I am transmitting, herewith, certification of a proposed manufacturing license agreement for the manufacture of significant military equipment abroad.

The transaction contained in the attached certification involves the export of defense articles, including technical data, and defense services for the manufacture of Modified 20mm x 102mm PELE Ammunition for end use by the U.S. Air Force in the F–15 and F–16 Aircraft.

The United States Government is prepared to license the export of these items having taken into account political, military, economic, human rights, and arms control considerations.

More detailed information is contained in the formal certification which, though unclassified, contains business information submitted to the Department of State by the applicant, publication of which could cause competitive harm to the United States firm concerned.

Sincerely,

Richard R. Verma,
Assistant Secretary Legislative Affairs.

October 13, 2009 (Transmittal 109–09)
Hon. Nancy Pelosi, Speaker of the House of Representatives.

Dear Madam Speaker: Pursuant to Section 36(c) of the Arms Export Control Act, I am transmitting, herewith, certification of a proposed amendment to a manufacturing license agreement for the export of defense articles, including technical data, and defense services in the amount of $100,000,000 or more.

The transaction contained in the attached certification involves the export of defense articles, including technical data, and defense services to support the manufacture of X200–Series transmissions in the Republic of Korea for an authorized sales territory.

The United States Government is prepared to license the export of these items having taken into account political, military, economic, human rights, and arms control considerations.

More detailed information is contained in the formal certification which, though unclassified, contains business information submitted to the Department of State by the applicant, publication of which could cause competitive harm to the United States firm concerned.

Sincerely,

Richard R. Verma,
Assistant Secretary Legislative Affairs.

October 13, 2009 (Transmittal 110–09)
Hon. Nancy Pelosi, Speaker of the House of Representatives.

Dear Madam Speaker: Pursuant to Section 36(c) and Section 36(d) of the Arms Export Control Act, I am transmitting, herewith, certification of a proposed manufacturing license agreement for the manufacture of significant military equipment abroad in the amount of $100,000,000 or more.

The transaction contained in the attached certification involves the export of defense articles, including technical data, and defense services for the manufacture of the 737 Airborne Early Warning & Control (AEW&C) System, Peace Eagle, for end-use by the Turkish Air Force.

The United States Government is prepared to license the export of these items having taken into account political, military, economic, human rights and arms control considerations.

More detailed information is contained in the formal certification which, though unclassified, contains business information submitted to the Department of State by the applicant, publication of which could cause competitive harm to the United States firm concerned.

Sincerely,

Richard R. Verma,

Assistant Secretary Legislative Affairs.

October 15, 2009 (Transmittal 112–09)

Hon. Nancy Pelosi, Speaker of the House of Representatives.

Dear Madam Speaker: Pursuant to Section 36(c) of the Arms Export Control Act, I am transmitting, herewith, certification of a proposed amendment to a technical assistance agreement for the export of defense articles, including technical data, and defense services in the amount of $50,000,000 or more.

The transaction contained in the attached certification involves the export of defense articles, including technical data and defense services for the integration of surfaced launched AMRAAM electronics kits for the National Advanced Surface to Air Missile System FIN Program in Finland.

The United States Government is prepared to license the export of these items having taken into account political, military, economic, human rights, and arms control considerations.

More detailed information is contained in the formal certification which, though unclassified, contains business information submitted to the Department of State by the applicant, publication of which could cause competitive harm to the United States firm concerned.

Sincerely,

Richard R. Verma,

Assistant Secretary Legislative Affairs.

Hon. Nancy Pelosi, Speaker of the House of Representatives.

Dear Madam Speaker: Pursuant to Section 36(c) of the Arms Export Control Act, I am transmitting, herewith, certification of a proposed permanent export license for the export of defense articles, to include technical data, related to firearms in the amount of $1,000,000 or more.

The transaction contained in the attached certification involves the export of defense articles, to include technical data, related to sale of Lewis Machine & Tool Co. (LMT) .308 caliber (7.62mm) Semi Automatic Rifles for use by the United Kingdom Ministry of Defence.

The United States Government is prepared to license the export of these items having taken into account political, military, economic, human rights and arms control considerations.

More detailed information is contained in the formal certification which, though unclassified, contains business information submitted to the Department of State by the applicant, publication of which could cause competitive harm to the United States firm concerned.

Sincerely,

Richard R. Verma,

Assistant Secretary Legislative Affairs.

November 12, 2009 (Transmittal 123–09)

Hon. Nancy Pelosi, Speaker of the House of Representatives.

Dear Madam Speaker: Pursuant to Section 36(c) of the Arms Export Control Act, I am transmitting, herewith, certification of a proposed amendment to a manufacturing license agreement for the export of defense articles, to include technical data, and defense services.

The transaction contained in the attached certification involves the export of defense articles, to include technical data, and defense services for the Laser Target Designator/Range Finders and Gated Laser illuminators for Night Television for the AC–130U Gunship for end-use by the U.S. Air Force.

The United States Government is prepared to license the export of these items having taken into account political, military, economic, human rights and arms control considerations.

More detailed information is contained in the formal certification which, though unclassified, contains business information submitted to the Department of State by the applicant, publication of which could cause competitive harm to the United States firm concerned.

Sincerely,

Richard R. Verma,

Assistant Secretary Legislative Affairs.

November 12, 2009 (Transmittal 124–09)

Hon. Nancy Pelosi, Speaker of the House of Representatives.

Dear Madam Speaker: Pursuant to Section 36(d) of the Arms Export Control Act, I am transmitting, herewith, certification of a proposed manufacturing license agreement for the manufacture of significant military equipment abroad.

The transaction contained in the attached certification involves the export of defense articles, including technical data, and defense services for the manufacture in Japan of the GAU–19 Gun.

The United States Government is prepared to license the export of these items having taken into account political, military, economic, human rights, and arms control considerations.

More detailed information is contained in the formal certification which, though unclassified, contains business information submitted to the Department of State by the applicant, publication of which could cause competitive harm to the United States firm concerned.

Sincerely,

Richard R. Verma,

Assistant Secretary Legislative Affairs.

November 12, 2009 (Transmittal 125–09)

Hon. Nancy Pelosi, Speaker of the House of Representatives.

Dear Madam Speaker: Pursuant to Section 36(c) of the Arms Export Control Act, I am transmitting, herewith, certification of a proposed amendment to a manufacturing assistance agreement for the export of defense articles, including technical data, and defense services in the amount of $100,000,000 or more.

The transaction contained in the attached certification involves the export of defense articles, to include technical data, and defense services to Japan for the overhaul and manufacture of SIIS–3XT4/T4 ejection seats for the XT4/T4 trainer aircraft for use in Japan.

The United States Government is prepared to license the export of these items having taken into account political, military, economic, human rights and arms control considerations.

More detailed information is contained in the formal certification which, though unclassified, contains business information submitted to the Department of State by the applicant, publication of which could cause competitive harm to the United States firm concerned.

Sincerely,

Richard R. Verma,
Assistant Secretary Legislative Affairs.

November 12, 2009 (Transmittal 127–09)

Hon. Nancy Pelosi, Speaker of the House of Representatives.

Dear Madam Speaker: Pursuant to Section 36(c) and Section 36(d) of the Arms Export Control Act, I am transmitting, herewith, certification of a proposed manufacturing license agreement for the manufacture of significant military equipment abroad in the amount of $50,000,000 or more.

The transaction contained in the attached certification involves the export of defense articles, including technical data, and defense services for the modification of CH–47SD Chinook Helicopters to the CH–47F configuration for the Singapore Ministry of Defence.

The United States Government is prepared to license the export of these items having taken into account political, military, economic, human rights and arms control considerations.

More detailed information is contained in the formal certification which, though unclassified, contains business information submitted to the Department of State by the applicant, publication of which could cause competitive harm to the United States firm concerned.

Sincerely,

Richard R. Verma,
Assistant Secretary Legislative Affairs.

October 22, 2009 (Transmittal 129–09)

Hon. Nancy Pelosi, Speaker of the House of Representatives.

Dear Madam Speaker: Pursuant to Section 36(c) of the Arms Export Control Act, I am transmitting, herewith, certification of a proposed amendment to a manufacturing license agreement for the export of defense articles, to include technical data, and defense services in the amount of $100,000,000 or more.

The transaction contained in the attached certification involves the export of defense articles, to include technical data, and defense services for the manufacture of control section units and associated electronics modules in the United Kingdom for the AIM–120 Medium Range Air-to-Air Missile for end-use by the United States of America.

The United States Government is prepared to license the export of these items having taken into account political, military, economic, human rights and arms control considerations.

More detailed information is contained in the formal certification which, though unclassified, contains business information submitted to the Department of State by the applicant, publication of which could cause competitive harm to the United States firm concerned.

Sincerely,

Richard R. Verma,
Assistant Secretary Legislative Affairs.

Notice of Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart B (Formerly Subpart Q) During the Week Ending November 7, 2009

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under Subpart B (formerly Subpart Q) of the Department of Transportation's Procedural Regulations (*See* 14 CFR 301.201 *et seq.*). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: DOT–OST–2009–0287.

Date Filed: November 2, 2009.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: November 23, 2009.

Description: Application of Brussels Airlines NV/SA (''Brussels Airlines'') requesting an amended exemption authority and the issuance of a foreign air carrier permit to conduct scheduled and charter services, including; (i) Foreign scheduled and charter air transportation of persons, property and mail from any point or points behind any Member State(s) of the European Union, via any point or points in any Member State(s) and via intermediate points to any point or points in the United States and beyond; (ii) foreign scheduled and charter air transportation of persons, property and mail between any point or points in the United States and any point or points in any member of the European Common Aviation Area; (iii) foreign scheduled and charter cargo air transportation between any point or points in the United States and any other point or points; (iv) other charters; and (v) transportation authorized by any additional route rights made available to European Community carriers in the future. Brussels Airlines further requests a corresponding exemption to the extent necessary to enable it to provide the service described above pending issuance of a foreign air carrier permit and such additional or other relief as the Department may deem necessary or appropriate.

Docket Number: DOT–OST–2005–20491.

Date Filed: November 5, 2009.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: November 27, 2009.

Description: Application of NetJets—Transportes Aereos, S.A. (''NTA'') requesting a renewal and amended exemption and a foreign air carrier permit authorizing NTA to engage in charter foreign air transportation of persons, property and mail to and from points in the United States to the full extent permitted by its homeland operating authority and the EU–U.S. open-skies agreement.

Maritime Administration

[USCG–2007–28532]

Port Dolphin Energy LLC, Port Dolphin Liquefied Natural Gas Deepwater Port License Application

AGENCY: Maritime Administration, DOT.

ACTION: Notice of Availability of Record of Decision.

SUMMARY: The Maritime Administration announces the availability of the Record of Decision for the Port Dolphin Energy LLC (Port Dolphin Energy) Deepwater Port License Application. On October 26, 2009, the Acting Maritime Administrator, David T. Matsuda, issued the Record of Decision ''approving with conditions'' Port Dolphin Energy's application to own, construct, and operate a liquefied natural gas (LNG) deepwater port 28 miles southwest of Tampa Bay, Florida. Issuance of this Record of Decision completes the application review and license approval process, mandated by the Deepwater Port Act of 1974, as amended (the Act).

ADDRESSES: Copies of the Record of Decision for the Port Dolphin Energy LNG Deepwater Port License Application are available on request from the Docket Management Facility, M–30, U.S. Department of Transportation, West Building, Ground Floor, Rm. W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, or via the Internet at *http://www.regulations.gov* (Document ID: USCG–2007–28532–0240).

FOR FURTHER INFORMATION CONTACT: Yvette Fields, Director, Office of Deepwater Ports and Offshore Activities, Maritime Administration, telephone: 202–366–0926, e-mail: *Yvette.Fields@dot.gov* or Patrick Marchman, Maritime Administration, telephone: 202–366–7206, e-mail: *Patrick.Marchman@dot.gov.* The full text of the Record of Decision (Document ID: USCG–2007–28532–0240) is available as a part of the public docket for the complete Port Dolphin Energy Deepwater Port License Application (Docket Number USCG–2007–28532), maintained by the U.S. Department of Transportation Docket Management Facility. If you have questions regarding the docket, please contact Renee V. Wright, Program Manager, Docket Operations, telephone: 202–493–0402.

SUPPLEMENTARY INFORMATION:

Application Review Process

On March 29, 2007, Port Dolphin Energy LLC, a limited liability company organized and existing under the laws of the State of Delaware and an ultimate subsidiary of Leif Hoegh & Company Limited, submitted to the Maritime Administration and the U.S. Coast Guard (USCG), an application for approval of a license to own, construct, operate, and ultimately decommission a deepwater port, known as Port Dolphin, approximately 28 miles southwest of Tampa Bay, Florida, for the purpose of importing Liquefied Natural Gas (LNG) into the United States. On June 15, 2007, Port Dolphin Energy's application was deemed complete by the Maritime Administration and the USCG. On June 25, 2007, the Maritime Administration and USCG published a notice in the **Federal Register** [72 FR 34741–34742] to announce the availability of the application for public inspection and request public comments on the proposed project and its potential impacts on the environment.

Pursuant to the statutory requirements of the Act, the Maritime Administration and the USCG conducted an environmental review of the Port Dolphin project and prepared an environmental impact statement in accordance with procedures stipulated under the National Environmental Policy Act (NEPA). The Federal environmental review process was conducted in close coordination with cooperating Federal and Florida State agencies, integrating the environmental values and concerns expressed by local communities. Additional information

regarding the application and environmental review process for the Port Dolphin project can be found on the public docket at *http://www.regulations.gov* (Document ID: USCG–2007–28532).

Decision Process

Provisions of the Act require the Maritime Administrator to render his decision on a deepwater port license application within 90 days from the date of the final public hearing. The final public hearing for the Port Dolphin project was held on July 28, 2009. In rendering a decision, the Maritime Administrator must either: (1) Approve the application as it is proposed, (2) approve the application ''subject to certain conditions'', or (3) deny the application. This Record of Decision, approves the Port Dolphin Energy Deepwater Port License Application, ''subject to certain conditions,'' which have been designed to ensure that Port Dolphin Energy utilizes the best available technology in the operation of its port, exercises care to preserve and enhance the environment, and protect Florida's coastal communities and natural resources. Further, the Record of Decision describes the framework by which the Maritime Administrator must base his decision as defined by the nine approval criteria prescribed by the Act. These nine approval criteria ensure: (1) Financial responsibility; (2) compliance with all applicable laws, regulations and license conditions; (3) national interest; (4) international navigation, safety, and use of the high seas; (5) protection and enhancement of the environment; (6) advice of the Administrator of the Environmental Protection Agency; (7) consultation with the Secretaries of State, Defense, and Army, (8) approval of the Governor of the adjacent coastal State, in this case the Governor of Florida, and (9) consistency with the Coastal Zone Management Act.

The Port Dolphin Record of Decision provides an overview of the Federal environmental review process and describes the comprehensive consultation and technical review of the application conducted by the Maritime Administration and USCG, in consultation with the National Oceanic Atmospheric Administration (NOAA), the Environmental Protection Agency, the State of Florida, and other cooperating Federal and State agencies. During the decision-making process, the Acting Maritime Administrator gave careful consideration to the specific concerns expressed by members of the local Florida coastal communities, such as Longboat Key and Manatee County, regarding the potential impacts on local sand resources. Reasonable efforts were made by the Federal Government, the State of Florida, local communities, and Port Dolphin Energy to bring this matter to a satisfactory resolution. Conditions recommended by cooperating Federal and State agencies, including the specific conditions of approval required by the Governor of Florida, as outlined in his decision letter of September 11, 2009 and in a subsequent Memorandum of Agreement established between the State of Florida and Port Dolphin Energy, have been incorporated into this Record of Decision as conditions of approval. These conditions, which allow for removal of sand prior to the pipeline installation and sharing of costs, will become enforceable and binding under the official deepwater port License upon issuance. The Maritime Administration projects that the official Port Dolphin Energy Deepwater Port License will be issued in early 2010. The full text of the Record of Decision can be viewed at *http://www.regulations.gov* (Document ID: USCG–2007–28532–0240).

Dated: November 16, 2009.

By order of the Maritime Administrator.

Christine Gurland,

Secretary, Maritime Administration.

Federal Aviation Administration

Notice of Opportunity for Public Comment on Surplus Property Release at Kinston Regional Jetport, Kinston, NC

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice.

SUMMARY: Under the provisions of Title 49, U.S.C. 47153(d), notice is being given that the FAA is considering a request from the North Carolina Global TransPark Authority to waive the requirement that a 9.683 acre parcel of surplus property, located at the Kinston Regional Jetport, be used for aeronautical purposes.

DATES: Comments must be received on or before December 28, 2009.

ADDRESSES: Comments on this notice may be mailed or delivered in triplicate to the FAA at the following address: Atlanta Airports District Office, 1701 Columbia Ave., Campus Building, Suite 2–260, College Park, GA 30337.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Ms. Darlene A. Waddell, Executive Director at the following address: 2780 Jetport Road, Suite A, Kinston, NC 28504.

FOR FURTHER INFORMATION CONTACT: Rusty Nealis, Program Manager, Atlanta Airports District Office, 1701 Columbia Ave., Campus Bldg., Suite 2–260, College Park, GA 30337, (404) 305–7142. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA is reviewing a request by the North Carolina Global TransPark Authority to release 9.683 acres of surplus property at the Kinston Regional Jetport. The surplus property will be developed for industrial and commercial use.

Any person may inspect the request in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT.**

In addition, any person may, upon request, inspect the request, notice and other documents germane to the request in person at 2780 Jetport Road, Suite A, Kinston, NC 28504.

Issued in Atlanta, Georgia on November 16, 2009.

Scott L. Seritt,

Manager, Atlanta Airports District Office, Southern Region.

BILLING CODE M

DEPARTMENT OF THE TREASURY

Fiscal Service

Notice of Rate for Use in Federal Debt Collection and Discount and Rebate Evaluation

AGENCY: Financial Management Service, Fiscal Service, Treasury.

ACTION: Notice of rate for use in Federal debt collection and discount and rebate evaluation.

SUMMARY: Pursuant to Section 11 of the Debt Collection Act of 1982, as amended (31 U.S.C. 3717), the Secretary of the Treasury is responsible for computing and publishing the percentage rate to be used in assessing interest charges for outstanding debts owed to the Government. Treasury's Cash Management Requirements (TFM Volume I, Part 6, Chapter 8000) prescribe use of this rate by agencies as a comparison point in evaluating the cost effectiveness of a cash discount. In addition, 5 CFR 1315.8 of the Prompt Payment rule on ''Rebates'' requires that this rate be used in determining when agencies should pay purchase card invoices when the card issuer offers a rebate. Notice is hereby given that the applicable rate is 1.00 percent for calendar year 2010.

DATES: The rate will be in effect for the period beginning on January 1, 2010, and ending on December 31, 2010.

FOR FURTHER INFORMATION CONTACT: Inquiries should be directed to the Agency Enterprise Solutions Division, Financial Management Service, Department of the Treasury, 401 14th Street, SW., Washington, DC 20227 (Telephone: 202–874–6720).

SUPPLEMENTARY INFORMATION: The rate reflects the current value of funds to the Treasury for use in connection with Federal Cash Management systems and is based on investment rates set for purposes of Public Law 95–147, 91 Stat. 1227. Computed each year by averaging Treasury Tax and Loan (TT&L) investment rates for the 12-month period ending every September 30, rounded to the nearest whole percentage, for applicability effective each January 1, the rate is subject to quarterly revisions if the annual average, on a moving basis, changes by 2 percentage points. The rate in effect for the calendar year 2010 reflects the average investment rates for the 12-month period that ended September 30, 2009.

Dated: November 17, 2009.

Sheryl R. Morrow,

Assistant Commissioner, Federal Finance.

Medicare Program; Payment Policies Under the Physician Fee Schedule and Other Revisions to Part B for CY 2010

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule with comment period.

SUMMARY: This final rule with comment period implements changes to the physician fee schedule and other Medicare Part B payment policies to ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services. It also implements or discusses certain provisions of the Medicare Improvements for Patients and Providers Act of 2008. (See the Table of Contents for a listing of the specific issues addressed in this rule.)

This final rule with comment period also finalizes the calendar year (CY) 2009 interim relative value units (RVUs) and issues interim RVUs for new and revised codes for CY 2010. In addition, in accordance with the statute, it announces that the update to the physician fee schedule conversion factor is −21.2 percent for CY 2010, the preliminary estimate for the sustainable growth rate for CY 2010 is −8.8 percent, and the conversion factor (CF) for CY 2010 is $28.4061.

DATES: *Effective Dates:* With the exception of the provisions of § 414.68 and § 414.210(e)(5), this final rule is effective on January 1, 2010. The provisions of § 414.68 are effective on October 30, 2009, and the provisions of § 414.210(e)(5) are effective on July 1, 2010.

Comment Date: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on December 29, 2009.

ADDRESSES: In commenting, please refer to file code CMS–1413–FC. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov*. Follow the instructions under the ''More Search Options'' tab.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1413–FC, P.O. Box 8013, Baltimore, MD 21244–8013.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1413–FC, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

4. *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments before the close of the comment period to either of the following addresses:

a. For delivery in Washington, DC—

Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—

Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244–1850.

If you intend to deliver your comments to the Baltimore address, please call telephone number (410) 786–9994 in advance to schedule your arrival with one of our staff members.

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

FOR FURTHER INFORMATION CONTACT: Rick Ensor, (410) 786–5617, for issues related to practice expense methodology.

Craig Dobyski, (410) 786–4584, for issues related to geographic practice cost indices and malpractice RVUs.

Ken Marsalek, (410) 786–4502, for issues related to the physician practice information survey and the multiple procedure payment reduction.

Regina Walker-Wren, (410) 786–9160, for issues related to the phasing out of the outpatient mental health treatment limitation.

Diane Stern, (410) 786–1133, for issues related to the physician quality reporting initiative and incentives for e-prescribing.

Lisa Grabert, (410) 786–6827, for issues related to the Physician Resource Use Feedback Program.

Colleen Bruce, (410) 786–5529, for issues related to value-based purchasing.

Sandra Bastinelli, (410) 786–3630, for issues related to the implementation of accreditation standards.

Jim Menas, (410) 786–4507, for issues related to teaching anesthesia services.

Sarah McClain, (410) 786–2994, for issues related to the coverage of cardiac rehabilitation services.

Dorothy Shannon, (410) 786–3396, for issues related to payment for cardiac and pulmonary rehabilitation services.

Roya Lotfi, (410) 786–4072, for issues related to the coverage of pulmonary rehabilitation.

Jamie Hermansen, (410) 786–2064, for issues related to kidney disease patient education programs.

Terri Harris, (410) 786–6830, for issues related to payment for kidney disease patient education.

Brijet Burton, (410) 786–7364, for issues related to the compendia for determination of medically-accepted indications for off-label uses of drugs and biologicals in an anti-cancer chemotherapeutic regimen.

Henry Richter, (410) 786–4562, or Lisa Hubbard, (410) 786–5472, for issues related to renal dialysis provisions and payments for end-stage renal disease facilities.

Cheryl Gilbreath, (410) 786–5919, for issues related to payment for covered outpatient drugs and biologicals.

Edmund Kasaitis, (410) 786–0477, or Bonny Dahm, (410) 786–4006, for issues related to the Competitive Acquisition Program (CAP) for Part B drugs.

Pauline Lapin, (410) 786–6883, for issues related to the chiropractic services demonstration BN issue.

Monique Howard, (410) 786–3869, for issues related to CORF conditions of coverage.

Roechel Kujawa, (410) 786–9111, for issues related to ambulance services.

Anne Tayloe Hauswald, (410) 786–4546, for clinical laboratory issues.

Troy Barsky, (410) 786–8873, or Roy Albert, (410) 786–1872, for issues related to physician self-referral.

Christopher Molling, (410) 786–6399, or Anita Greenberg, (410) 786–4601, for issues related to the repeal of transfer of title for oxygen equipment.

Michelle Peterman, (410) 786–2591, or Iffat Fatima, (410) 786–6709 for issues related to the grandfathering provisions of the durable medical equipment, prosthetics, orthotics, and supplies (DMEPOS) Competitive Acquisition Program.

Ralph Goldberg, (410) 786–4870, or Heidi Edmunds, (410) 786–1781, for issues related to the damages process caused by the termination of contracts awarded in 2008 under the DMEPOS Competitive Bidding program.

Diane Milstead, (410) 786–3355, or Gaysha Brooks, (410) 786–9649, for all other issues.

SUPPLEMENTARY INFORMATION:

Submitting Comments: We welcome comments from the public on the following issues: interim relative value units (RVUs) for selected codes identified in Addendum C; the physician self-referral designated health services (DHS) codes listed in Tables 31 and 32; services for consideration for the Five-Year Review of work RVUs for services as discussed in section II.P., and information concerning services provided under arrangement as discussed in section II.N.2.

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following Web site as soon as possible after they have been received: *http://www.regulations.gov*. Follow the search instructions on that Web site to view public comments.

Comments received timely will also be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244, Monday through Friday of each week from 8:30 a.m. to 4 p.m. To schedule an appointment to view public comments, phone 1–800–743–3951.

Table of Contents

To assist readers in referencing sections contained in this preamble, we are providing a table of contents. Some of the issues discussed in this preamble affect the payment policies, but do not require changes to the regulations in the *Code of Federal Regulations* (CFR). Information on the regulation's impact appears throughout the preamble, and therefore, is not discussed exclusively in section XIII. of this final rule with comment period.

I. Background

Since January 1, 1992, Medicare has paid for physicians' services under section 1848 of the Social Security Act (the Act), ''Payment for Physicians' Services.'' The Act requires that payments under the physician fee schedule (PFS) are based on national uniform relative value units (RVUs) based on the relative resources used in furnishing a service. Section 1848(c) of the Act requires that national RVUs be established for physician work, practice expense (PE), and malpractice expense. Before the establishment of the resource-based relative value system, Medicare payment for physicians'

services was based on reasonable charges.

A. Development of the Relative Value System

1. Work RVUs

The concepts and methodology underlying the PFS were enacted as part of the Omnibus Budget Reconciliation Act (OBRA) of 1989 (Pub. L. 101–239), and OBRA 1990, (Pub. L. 101–508). The final rule, published on November 25, 1991 (56 FR 59502), set forth the fee schedule for payment for physicians' services beginning January 1, 1992. Initially, only the physician work RVUs were resource-based, and the PE and malpractice RVUs were based on average allowable charges.

The physician work RVUs established for the implementation of the fee schedule in January 1992 were developed with extensive input from the physician community. A research team at the Harvard School of Public Health developed the original physician work RVUs for most codes in a cooperative agreement with the Department of Health and Human Services (DHHS). In constructing the code-specific vignettes for the original physician work RVUs, Harvard worked with panels of experts, both inside and outside the Federal government, and obtained input from numerous physician specialty groups.

Section 1848(b)(2)(B) of the Act specifies that the RVUs for anesthesia services are based on RVUs from a uniform relative value guide, with appropriate adjustment of the conversion factor (CF), in a manner to assure that fee schedule amounts for anesthesia services are consistent with those for other services of comparable value. We established a separate CF for anesthesia services, and we continue to utilize time units as a factor in determining payment for these services. As a result, there is a separate payment methodology for anesthesia services.

We establish physician work RVUs for new and revised codes based on our review of recommendations received from the American Medical Association's (AMA) Specialty Society Relative Value Update Committee (RUC).

2. Practice Expense Relative Value Units (PE RVUs)

Section 121 of the Social Security Act Amendments of 1994 (Pub. L. 103–432), enacted on October 31, 1994, amended section 1848(c)(2)(C)(ii) of the Act and required us to develop resource-based PE RVUs for each physician's service beginning in 1998. We were to consider general categories of expenses (such as office rent and wages of personnel, but excluding malpractice expenses) comprising PEs.

Section 4505(a) of the Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33), amended section 1848(c)(2)(C)(ii) of the Act to delay implementation of the resource-based PE RVU system until January 1, 1999. In addition, section 4505(b) of the BBA provided for a 4-year transition period from charge-based PE RVUs to resource-based RVUs.

We established the resource-based PE RVUs for each physicians' service in a final rule, published November 2, 1998 (63 FR 58814), effective for services furnished in 1999. Based on the requirement to transition to a resource-based system for PE over a 4-year period, resource-based PE RVUs did not become fully effective until 2002.

This resource-based system was based on two significant sources of actual PE data: the Clinical Practice Expert Panel (CPEP) data; and the AMA's Socioeconomic Monitoring System (SMS) data. The CPEP data were collected from panels of physicians, practice administrators, and nonphysicians (for example, registered nurses (RNs)) nominated by physician specialty societies and other groups. The CPEP panels identified the direct inputs required for each physician's service in both the office setting and out-of-office setting. We have since refined and revised these inputs based on recommendations from the RUC. The AMA's SMS data provided aggregate specialty-specific information on hours worked and PEs.

Separate PE RVUs are established for procedures that can be performed in both a nonfacility setting, such as a physician's office, and a facility setting, such as a hospital outpatient department. The difference between the facility and nonfacility RVUs reflects the fact that a facility typically receives separate payment from Medicare for its costs of providing the service, apart from payment under the PFS. The nonfacility RVUs reflect all of the direct and indirect PEs of providing a particular service.

Section 212 of the Balanced Budget Refinement Act of 1999 (BBRA) (Pub. L. 106–113) directed the Secretary of Health and Human Services (the Secretary) to establish a process under which we accept and use, to the maximum extent practicable and consistent with sound data practices, data collected or developed by entities and organizations to supplement the data we normally collect in determining the PE component. On May 3, 2000, we published the interim final rule (65 FR 25664) that set forth the criteria for the submission of these supplemental PE survey data. The criteria were modified in response to comments received, and published in the **Federal Register** (65 FR 65376) as part of a November 1, 2000 final rule. The PFS final rules published in 2001 and 2003, respectively, (66 FR 55246 and 68 FR 63196) extended the period during which we would accept these supplemental data through March 1, 2005.

In the Calendar Year (CY) 2007 PFS final rule with comment period (71 FR 69624), we revised the methodology for calculating PE RVUs beginning in CY 2007 and provided for a 4-year transition for the new PE RVUs under this new methodology.

3. Resource-Based Malpractice (MP) RVUs

Section 4505(f) of the BBA amended section 1848(c) of the Act requiring us to implement resource-based malpractice (MP) RVUs for services furnished on or after 2000. The resource-based MP RVUs were implemented in the PFS final rule published November 2, 1999 (64 FR 59380). The MP RVUs were based on malpractice insurance premium data collected from commercial and physician-owned insurers from all the States, the District of Columbia, and Puerto Rico.

4. Refinements to the RVUs

Section 1848(c)(2)(B)(i) of the Act requires that we review all RVUs no less often than every 5 years. The first Five-Year Review of the physician work RVUs was published on November 22, 1996 (61 FR 59489) and was effective in 1997. The second Five-Year Review was published in the CY 2002 PFS final rule with comment period (66 FR 55246) and was effective in 2002. The third Five-Year Review of physician work RVUs was published in the CY 2007 PFS final rule with comment period (71 FR 69624) and was effective on January 1, 2007. (**Note:** Additional codes relating to the third Five-Year Review of physician work RVUs were addressed in the CY 2008 PFS final rule with comment period (72 FR 66360).)

In 1999, the AMA's RUC established the Practice Expense Advisory Committee (PEAC) for the purpose of refining the direct PE inputs. Through March 2004, the PEAC provided recommendations to CMS for over 7,600 codes (all but a few hundred of the codes currently listed in the AMA's Current Procedural Terminology (CPT) codes). As part of the CY 2007 PFS final rule with comment period (71 FR 69624), we implemented a new

methodology for determining resource-based PE RVUs and are transitioning it over a 4-year period.

In the CY 2005 PFS final rule with comment period (69 FR 66236), we implemented the first Five-Year Review of the MP RVUs (69 FR 66263).

5. Adjustments to RVUs Are Budget Neutral

Section 1848(c)(2)(B)(ii)(II) of the Act provides that adjustments in RVUs for a year may not cause total PFS payments to differ by more than $20 million from what they would have been if the adjustments were not made. In accordance with section 1848(c)(2)(B)(ii)(II) of the Act, if revisions to the RVUs cause expenditures to change by more than $20 million, we make adjustments to ensure that expenditures do not increase or decrease by more than $20 million.

As explained in the CY 2009 PFS final rule with comment period (73FR 69730), as required by section 133(b) of the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) (Pub. L. 110–275), the separate budget neutrality (BN) adjustor resulting from the third Five-Year Review of physician work RVUs is being applied to the CF beginning with CY 2009 rather than the work RVUs.

B. Components of the Fee Schedule Payment Amounts

To calculate the payment for every physicians' service, the components of the fee schedule (physician work, PE, and MP RVUs) are adjusted by a geographic practice cost index (GPCI). The GPCIs reflect the relative costs of physician work, PE, and malpractice expense in an area compared to the national average costs for each component.

RVUs are converted to dollar amounts through the application of a CF, which is calculated by CMS' Office of the Actuary (OACT).

The formula for calculating the Medicare fee schedule payment amount for a given service and fee schedule area can be expressed as:

Payment = [(RVU work × GPCI work) + (RVU PE × GPCI PE) + (RVU malpractice × GPCI malpractice)] × CF.

C. Most Recent Changes to the Fee Schedule

The CY 2009 PFS final rule with comment period (73 FR 69726) implemented changes to the PFS and other Medicare Part B payment policies. It also finalized the CY 2008 interim RVUs and implemented interim RVUs for new and revised codes for CY 2009 to ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services. The CY 2009 PFS final rule with comment period also addressed other policies, as well as certain provisions of the MIPPA.

As required by the statute, and based on section 131 of the MIPPA, the CY 2009 PFS final rule with comment period also announced the following for CY 2009: the PFS update of 1.1 percent, the initial estimate for the sustainable growth rate of 7.4 percent, and the conversion factor (CF) of $36.0666.

II. Provisions of the Final Regulation

In response to the CY 2010 PFS proposed rule (74 FR 33520) we received approximately 16,500 timely public comments. These included comments from concerned citizens, individual physicians, health care workers, professional associations and societies, manufacturers and Congressmen. The majority of the comments addressed proposals related to the MIPPA provisions concerning teaching anesthesiology and cardiac and pulmonary rehabilitation, the physician practice information survey (PPIS), and the impact of the proposed rule on specific specialties. To the extent that comments were outside the scope of the proposed rule, they are not addressed in this final rule with comment period.

A. Resource-Based Practice Expense (PE) Relative Value Units (RVUs)

Practice expense (PE) is the portion of the resources used in furnishing the service that reflects the general categories of physician and practitioner expenses, such as office rent and personnel wages but excluding malpractice expenses, as specified in section 1848(c)(1)(B) of the Act.

Section 121 of the Social Security Amendments of 1994 (Pub. L. 103–432), enacted on October 31, 1994, required CMS to develop a methodology for a resource-based system for determining PE RVUs for each physician's service. Until that time, PE RVUs were based on historical allowed charges. This legislation stated that the revised PE methodology must consider the staff, equipment, and supplies used in the provision of a variety of medical and surgical services in various settings beginning in 1998. The Secretary has interpreted this to mean that Medicare payments for each service would be based on the relative PE resources typically involved with furnishing the service.

The initial implementation of resource-based PE RVUs was delayed from January 1, 1998, until January 1, 1999, by section 4505(a) of the BBA. In addition, section 4505(b) of the BBA required that the new payment methodology be phased in over 4 years, effective for services furnished in CY 1999, and fully effective in CY 2002. The first step toward implementation of the statute was to adjust the PE values for certain services for CY 1998. Section 4505(d) of the BBA required that, in developing the resource-based PE RVUs, the Secretary must—

- Use, to the maximum extent possible, generally-accepted cost accounting principles that recognize all staff, equipment, supplies, and expenses, not solely those that can be linked to specific procedures and actual data on equipment utilization.
- Develop a refinement method to be used during the transition.
- Consider, in the course of notice and comment rulemaking, impact projections that compare new proposed payment amounts to data on actual physician PE.

In CY 1999, we began the 4-year transition to resource-based PE RVUs utilizing a ''top-down'' methodology whereby we allocated aggregate specialty-specific practice costs to individual procedures. The specialty-specific PEs were derived from the American Medical Association's (AMA's) Socioeconomic Monitoring Survey (SMS). In addition, under section 212 of the BBRA, we established a process extending through March 2005 to supplement the SMS data with data submitted by a specialty. The aggregate PEs for a given specialty were then allocated to the services furnished by that specialty on the basis of the direct input data (that is, the staff time, equipment, and supplies) and work RVUs assigned to each CPT code.

For CY 2007, we implemented a new methodology for calculating PE RVUs. Under this new methodology, we use the same data sources for calculating PE, but instead of using the ''top-down'' approach to calculate the direct PE RVUs, under which the aggregate direct and indirect costs for each specialty are allocated to each individual service, we now utilize a ''bottom-up'' approach to calculate the direct costs. Under the ''bottom up'' approach, we determine the direct PE by adding the costs of the resources (that is, the clinical staff, equipment, and supplies) typically required to provide each service. The costs of the resources are calculated using the refined direct PE inputs assigned to each CPT code in our PE database, which are based on our review of recommendations received from the AMA's Relative Value Update Committee (RUC). For a more detailed

explanation of the PE methodology, see the Five-Year Review of Work Relative Value Units Under the PFS and Proposed Changes to the Practice Expense Methodology proposed notice (71 FR 37242) and the CY 2007 PFS final rule with comment period (71 FR 69629).

Note: In section II.A.1 of this final rule with comment period rule, we discuss the current methodology used for calculating PE. In section II.A.2. of this final rule with comment period, which contains PE proposals for CY 2010, we summarize and respond to comments on our proposal to use data from the AMA Physician Practice Information Survey (PPIS) in place of the AMA's SMS survey data and supplemental survey data that is currently used in the PE methodology, as well as our proposal concerning equipment utilization assumptions.

1. Practice Expense Methodology

a. Data Sources for Calculating Practice Expense

The AMA's SMS survey data and supplemental survey data from the specialties of cardiothoracic surgery, vascular surgery, physical and occupational therapy, independent laboratories, allergy/immunology, cardiology, dermatology, gastroenterology, radiology, independent diagnostic testing facilities (IDTFs), radiation oncology, and urology are currently used to develop the PE per hour (PE/HR) for each specialty. For those specialties for which we do not have PE/HR, the appropriate PE/HR is obtained from a crosswalk to a similar specialty.

The AMA developed the SMS survey in 1981 and discontinued it in 1999. Beginning in 2002, we incorporated the 1999 SMS survey data into our calculation of the PE RVUs, using a 5-year average of SMS survey data. (See the CY 2002 PFS final rule with comment period (66 FR 55246).) The SMS PE survey data are adjusted to a common year, 2005. The SMS data provide the following six categories of PE costs:

- Clinical payroll expenses, which are payroll expenses (including fringe benefits) for nonphysician clinical personnel.
- Administrative payroll expenses, which are payroll expenses (including fringe benefits) for nonphysician personnel involved in administrative, secretarial, or clerical activities.
- Office expenses, which include expenses for rent, mortgage interest, depreciation on medical buildings, utilities, and telephones.
- Medical material and supply expenses, which include expenses for drugs, x-ray films, and disposable medical products.
- Medical equipment expenses, which include depreciation, leases, and rent of medical equipment used in the diagnosis or treatment of patients.
- All other expenses, which include expenses for legal services, accounting, office management, professional association memberships, and any professional expenses not previously mentioned in this section.

In accordance with section 212 of the BBRA, we established a process to supplement the SMS data for a specialty with data collected by entities and organizations other than the AMA (that is, those entities and organizations representing the specialty itself). (See the Criteria for Submitting Supplemental Practice Expense Survey Data interim final rule with comment period (65 FR 25664).) Originally, the deadline to submit supplementary survey data was through August 1, 2001. In the CY 2002 PFS final rule (66 FR 55246), the deadline was extended through August 1, 2003. To ensure maximum opportunity for specialties to submit supplementary survey data, we extended the deadline to submit surveys until March 1, 2005 in the Revisions to Payment Policies Under the Physician Fee Schedule for CY 2004 final rule with comment period (68 FR 63196) (hereinafter referred to as CY 2004 PFS final rule with comment period).

The direct cost data for individual services were originally developed by the Clinical Practice Expert Panels (CPEP). The CPEP data include the supplies, equipment, and staff times specific to each procedure. The CPEPs consisted of panels of physicians, practice administrators, and nonphysicians (for example, RNs) who were nominated by physician specialty societies and other groups. There were 15 CPEPs consisting of 180 members from more than 61 specialties and subspecialties. Approximately 50 percent of the panelists were physicians.

The CPEPs identified specific inputs involved in each physician's service provided in an office or facility setting. The inputs identified were the quantity and type of nonphysician labor, medical supplies, and medical equipment. The CPEP data has been regularly updated by various RUC committees on PE.

b. Allocation of PE to Services

Currently, the aggregate level specialty-specific PEs are derived from the AMA's SMS survey and supplementary survey data. For CY 2010, we discuss in section II.A.2. of this final rule with comment period how a new data source, PPIS, will be used. To establish PE RVUs for specific services, it is necessary to establish the direct and indirect PE associated with each service.

(i) *Direct costs.* The direct costs are determined by adding the costs of the resources (that is, the clinical staff, equipment, and supplies) typically required to provide the service. The costs of these resources are calculated from the refined direct PE inputs in our PE database. These direct inputs are then scaled to the current aggregate pool of direct PE RVUs. The aggregate pool of direct PE RVUs can be derived using the following formula: (PE RVUs × physician CF) × (average direct percentage from survey PE/HR data)).

(ii) *Indirect costs.* Currently, the SMS and supplementary survey data are the sources for the specialty-specific aggregate indirect costs used in our PE calculations. For CY 2010, we discuss in section II.A.2. of this final rule with comment period how a new data source, PPIS, will be used. We then allocate the indirect costs to the code level on the basis of the direct costs specifically associated with a code and the greater of either the clinical labor costs or the physician work RVUs. For calculation of the 2010 PE RVUs, we use the 2008 procedure-specific utilization data crosswalked to 2010 services. To arrive at the indirect PE costs—

- We apply a specialty-specific indirect percentage factor to the direct expenses to recognize the varying proportion that indirect costs represent of total costs by specialty. For a given service, the specific indirect percentage factor to apply to the direct costs for the purpose of the indirect allocation is calculated as the weighted average of the ratio of the indirect to direct costs (based on the survey data) for the specialties that furnish the service. For example, if a service is furnished by a single specialty with indirect PEs that were 75 percent of total PEs, the indirect percentage factor to apply to the direct costs for the purposes of the indirect allocation would be (0.75/0.25) = 3.0. The indirect percentage factor is then applied to the service level adjusted indirect PE allocators.
- We currently use the specialty-specific PE/HR from the SMS survey data, as well as the supplemental surveys for cardiothoracic surgery, vascular surgery, physical and occupational therapy, independent laboratories, allergy/immunology, cardiology, dermatology, radiology, gastroenterology, IDTFs, radiation oncology, and urology. (**Note:** For radiation oncology, the data represent the combined survey data from the

American Society for Therapeutic Radiology and Oncology (ASTRO) and the Association of Freestanding Radiation Oncology Centers (AFROC)). As discussed in the CY 2008 PFS final rule with comment period (72 FR 66233), the PE/HR survey data for radiology is weighted by practice size. For CY 2010, we discuss in section II.A.2. of this final rule with comment period how a new data source, PPIS, will be used. We incorporate this PE/HR into the calculation of indirect costs using an index which reflects the relationship between each specialty's indirect scaling factor and the overall indirect scaling factor for the entire PFS. For example, if a specialty had an indirect practice cost index of 2.00, this specialty would have an indirect scaling factor that was twice the overall average indirect scaling factor. If a specialty had an indirect practice cost index of 0.50, this specialty would have an indirect scaling factor that was half the overall average indirect scaling factor.

- When the clinical labor portion of the direct PE RVU is greater than the physician work RVU for a particular service, the indirect costs are allocated based upon the direct costs and the clinical labor costs. For example, if a service has no physician work and 1.10 direct PE RVUs, and the clinical labor portion of the direct PE RVUs is 0.65 RVUs, we would use the 1.10 direct PE RVUs and the 0.65 clinical labor portions of the direct PE RVUs to allocate the indirect PE for that service.

c. Facility and Non-Facility Costs

Procedures that can be furnished in a physician's office, as well as in a hospital or facility setting have two PE RVUs: facility and non-facility. The non-facility setting includes physicians' offices, patients' homes, freestanding imaging centers, and independent pathology labs. Facility settings include hospitals, ambulatory surgical centers (ASCs), and skilled nursing facilities (SNFs). The methodology for calculating PE RVUs is the same for both facility and non-facility RVUs, but is applied independently to yield two separate PE RVUs. Because the PEs for services provided in a facility setting are generally included in the payment to the facility (rather than the payment to the physician under the PFS), the PE RVUs are generally lower for services provided in the facility setting.

d. Services With Technical Components (TCs) and Professional Components (PCs)

Diagnostic services are generally comprised of two components: a professional component (PC) and a technical component (TC), both of which may be performed independently or by different providers. When services have TCs, PCs, and global components that can be billed separately, the payment for the global component equals the sum of the payment for the TC and PC. This is a result of using a weighted average of the ratio of indirect to direct costs across all the specialties that furnish the global components, TCs, and PCs; that is, we apply the same weighted average indirect percentage factor to allocate indirect expenses to the global components, PCs, and TCs for a service. (The direct PE RVUs for the TC and PC sum to the global under the bottom-up methodology.)

e. Transition Period

As discussed in the CY 2007 PFS final rule with comment period (71 FR 69674), the change to the PE methodology was implemented over a 4-year period. In CY 2010, the transition period for the change to the PE methodology is complete and PE RVUs will be calculated based entirely on the current methodology.

f. PE RVU Methodology

The following is a description of the PE RVU methodology. While there are some changes to the data sources, the methodology remains the same.

(i) Setup File

First, we create a setup file for the PE methodology. The setup file contains the direct cost inputs, the utilization for each procedure code at the specialty and facility/non-facility place of service level, and the specialty-specific survey PE per physician hour data.

(ii) Calculate the Direct Cost PE RVUs

Sum the costs of each direct input.

Step 1: Sum the direct costs of the inputs for each service. The direct costs consist of the costs of the direct inputs for clinical labor, medical supplies, and medical equipment. The clinical labor cost is the sum of the cost of all the staff types associated with the service; it is the product of the time for each staff type and the wage rate for that staff type. The medical supplies cost is the sum of the supplies associated with the service; it is the product of the quantity of each supply and the cost of the supply. The medical equipment cost is the sum of the cost of the equipment associated with the service; it is the product of the number of minutes each piece of equipment is used in the service and the equipment cost per minute. The equipment cost per minute is calculated as described at the end of this section.

Apply a BN adjustment to the direct inputs.

Step 2: Calculate the current aggregate pool of direct PE costs. To do this, multiply the current aggregate pool of total direct and indirect PE costs (that is, the current aggregate PE RVUs multiplied by the CF) by the average direct PE percentage from the SMS and supplementary specialty survey data. For CY 2010, we discuss in section II.A.2. of this final rule with comment period how a new data source, PPIS, will be used.

Step 3: Calculate the aggregate pool of direct costs. To do this, for all PFS services, sum the product of the direct costs for each service from Step 1 and the utilization data for that service.

Step 4: Using the results of Step 2 and Step 3 calculate a direct PE BN adjustment so that the aggregate direct cost pool does not exceed the current aggregate direct cost pool and apply it to the direct costs from Step 1 for each service.

Step 5: Convert the results of Step 4 to an RVU scale for each service. To do this, divide the results of Step 4 by the Medicare PFS CF.

(iii) Create the Indirect PE RVUs

Create indirect allocators.

Step 6: Based on the SMS and supplementary specialty survey data, calculate direct and indirect PE percentages for each physician specialty. For CY 2010, we discuss in section II.A.2. of this final rule with comment period how a new data source, PPIS, will be used.

Step 7: Calculate direct and indirect PE percentages at the service level by taking a weighted average of the results of Step 6 for the specialties that furnish the service. Note that for services with TCs and PCs, we are calculating the direct and indirect percentages across the global components, PCs, and TCs. That is, the direct and indirect percentages for a given service (for example, echocardiogram) do not vary by the PC, TC and global component.

Step 8: Calculate the service level allocators for the indirect PEs based on the percentages calculated in Step 7. The indirect PEs are allocated based on the three components: the direct PE RVU, the clinical PE RVU, and the work RVU.

For most services the indirect allocator is:

*indirect percentage * (direct PE RVU/direct percentage) + work RVU.*

There are two situations where this formula is modified:

- If the service is a global service (that is, a service with global, professional, and technical components), then the

indirect allocator is: *indirect percentage * (direct PE RVU/direct percentage) + clinical PE RVU + work RVU.*

• If the clinical labor PE RVU exceeds the work RVU (and the service is not a global service), then the indirect allocator is: *indirect percentage * (direct PE RVU/direct percentage) + clinical PE RVU.*

Note: For global services, the indirect allocator is based on both the work RVU and the clinical labor PE RVU. We do this to recognize that, for the professional service, indirect PEs will be allocated using the work RVUs, and for the TC service, indirect PEs will be allocated using the direct PE RVU and the clinical labor PE RVU. This also allows the global component RVUs to equal the sum of the PC and TC RVUs.

For presentation purposes in the examples in the Table 1, the formulas were divided into two parts for each service. The first part does not vary by service and is *the indirect percentage * (direct PE RVU/direct percentage).* The second part is either the work RVU, clinical PE RVU, or both depending on whether the service is a global service and whether the clinical PE RVU exceeds the work RVU (as described earlier in this step.)

Apply a BN adjustment to the indirect allocators.

Step 9: Calculate the current aggregate pool of indirect PE RVUs by multiplying the current aggregate pool of PE RVUs by the average indirect PE percentage from the physician specialty survey data. This is similar to the Step 2 calculation for the direct PE RVUs.

Step 10: Calculate an aggregate pool of indirect PE RVUs for all PFS services by adding the product of the indirect PE allocators for a service from Step 8 and the utilization data for that service. This is similar to the Step 3 calculation for the direct PE RVUs.

Step 11: Using the results of Step 9 and Step 10, calculate an indirect PE adjustment so that the aggregate indirect allocation does not exceed the available aggregate indirect PE RVUs and apply it to indirect allocators calculated in Step 8. This is similar to the Step 4 calculation for the direct PE RVUs.

Calculate the Indirect Practice Cost Index.

Step 12: Using the results of Step 11, calculate aggregate pools of specialty-specific adjusted indirect PE allocators for all PFS services for a specialty by adding the product of the adjusted indirect PE allocator for each service and the utilization data for that service.

Step 13: Using the specialty-specific indirect PE/HR data, calculate specialty-specific aggregate pools of indirect PE for all PFS services for that specialty by adding the product of the indirect PE/HR for the specialty, the physician time for the service, and the specialty's utilization for the service.

Step 14: Using the results of Step 12 and Step 13, calculate the specialty-specific indirect PE scaling factors as under the current methodology.

Step 15: Using the results of Step 14, calculate an indirect practice cost index at the specialty level by dividing each specialty-specific indirect scaling factor by the average indirect scaling factor for the entire PFS.

Step 16: Calculate the indirect practice cost index at the service level to ensure the capture of all indirect costs. Calculate a weighted average of the practice cost index values for the specialties that furnish the service. (**Note:** For services with TCs and PCs, we calculate the indirect practice cost index across the global components, PCs, and TCs. Under this method, the indirect practice cost index for a given service (for example, echocardiogram) does not vary by the PC, TC and global component.)

Step 17: Apply the service level indirect practice cost index calculated in Step 16 to the service level adjusted indirect allocators calculated in Step 11 to get the indirect PE RVU.

(iv) Calculate the Final PE RVUs.

Step 18: Add the direct PE RVUs from Step 6 to the indirect PE RVUs from Step 17.

Step 19: Calculate and apply the final PE BN adjustment by comparing the results of Step 18 to the current pool of PE RVUs. This final BN adjustment is required primarily because certain specialties are excluded from the PE RVU calculation for ratesetting purposes, but all specialties are included for purposes of calculating the final BN adjustment. (See ''Specialties excluded from ratesetting calculation'' below in this section.)

(v) Setup File Information

• *Specialties excluded from ratesetting calculation:* For the purposes of calculating the PE RVUs, we exclude certain specialties such as midlevel practitioners paid at a percentage of the PFS, audiology, and low volume specialties from the calculation. These specialties *are* included for the purposes of calculating the BN adjustment.

• *Crosswalk certain low volume physician specialties:* Crosswalk the utilization of certain specialties with relatively low PFS utilization to the associated specialties.

• *Physical therapy utilization:* Crosswalk the utilization associated with all physical therapy services to the specialty of physical therapy.

• *Identify professional and technical services not identified under the usual TC and 26 modifiers:* Flag the services that are PC and TC services, but do not use TC and 26 modifiers (for example, electrocardiograms). This flag associates the PC and TC with the associated global code for use in creating the indirect PE RVU. For example, the professional service code 93010 is associated with the global code 93000.

• *Payment modifiers:* Payment modifiers are accounted for in the creation of the file. For example, services billed with the assistant at surgery modifier are paid 16 percent of the PFS amount for that service; therefore, the utilization file is modified to only account for 16 percent of any service that contains the assistant at surgery modifier.

• *Work RVUs:* The setup file contains the work RVUs from this proposed rule.

(vi) Equipment cost per minute

The equipment cost per minute is calculated as:

*(1/(minutes per year * usage)) * price * ((interest rate/(1 − (1/((1 + interest rate) ** life of equipment)))) + maintenance)*

Where:

minutes per year = maximum minutes per year if usage were continuous (that is, usage = 1); 150,000 minutes.

usage = equipment utilization assumption; 0.9 for certain expensive diagnostic equipment (see section II.A.2. of this final rule with comment period rule) and 0.5 for others.

price = price of the particular piece of equipment.

interest rate = 0.11.

life of equipment = useful life of the particular piece of equipment.

maintenance = factor for maintenance; 0.05.

Note: To illustrate the PE calculation, in Table 1 we have used the conversion factor (CF) of $28.3769 which is the CF effective January 1, 2010 as published in this final rule with comment period.

BILLING CODE 4120-01-C

2. PE Revisions for CY 2010

a. SMS and Supplemental Survey Background

Currently, we use PE/HR obtained from the SMS surveys from 1995 through 1999. For several specialties that collected additional PE/HR data through a more recent supplemental survey, we accepted and incorporated these data in developing current PE/HR values.

While the SMS survey was not specifically designed for the purpose of establishing PE RVUs, we found these data to be the best available at the time. The SMS was a multi-specialty survey effort conducted using a consistent survey instrument and method across specialties. The survey sample was randomly drawn from the AMA Physician Masterfile to ensure national representativeness. The AMA discontinued the SMS survey in 1999.

As required by the BBRA, we also established a process by which specialty groups could submit supplemental PE data. In the May 3, 2000 interim final rule entitled, Medicare Program; Criteria for Submitting Supplemental Practice Expense Survey Data, (65 FR 25664), we established criteria for acceptance of supplemental data. The criteria were modified in the CY 2001 and CY 2003 PFS final rules with comment period (65 FR 65380 and 67 FR 79971, respectively). We currently use supplemental survey data for the following specialties: cardiology; dermatology; gastroenterology; radiology; cardiothoracic surgery; vascular surgery; physical and occupational therapy; independent laboratories; allergy/immunology; independent diagnostic testing facilities (IDTFs); radiation oncology; medical oncology; and urology.

Because the SMS data and the supplemental survey data are from different time periods, we have historically inflated them by the MEI to help put them on as comparable a time basis as we can when calculating the PE RVUs. This MEI proxy has been necessary in the past due to the lack of contemporaneous, consistently collected, and comprehensive multispecialty survey data.

b. Physician Practice Information Survey (PPIS)

The AMA has conducted a new survey, the PPIS, which was expanded (relative to the SMS) to include nonphysician practitioners (NPPs) paid under the PFS. The PPIS, administered in CY 2007 and CY 2008, was designed to update the specialty-specific PE/HR data used to develop PE RVUs.

The AMA and our contractor, The Lewin Group (Lewin), analyzed the PPIS data and calculated the PE/HR for physician and nonphysician specialties, respectively. The AMA's summary worksheets and Lewin's final report are available on the CMS Web site at *http://www.cms.gov/PhysicianFeeSched/.* (See AMA PPIS Worksheets 1–3 and Lewin Group Final Report PPIS.) We also included a table in the proposed rule showing the current indirect PE/HR based on SMS and supplemental surveys, the PPIS indirect PE/HR, and the indirect cost percentages of total costs (74 FR 33530 through 33531).

The PPIS is a multispecialty, nationally representative, PE survey of both physicians and NPPs using a consistent survey instrument and methods highly consistent with those used for the SMS and the supplemental surveys. The PPIS has gathered information from 3,656 respondents across 51 physician specialty and health care professional groups. We believe the PPIS is the most comprehensive source of PE survey information available to date.

As noted, the BBRA required us to establish criteria for accepting supplemental survey data. Since the supplemental surveys were specific to individual specialties and not part of a comprehensive multispecialty survey, we had required that certain precision levels be met in order to ensure that the supplemental data was sufficiently valid, and acceptable for use in the development of the PE RVUs. Because the PPIS is a contemporaneous, consistently collected, and comprehensive multispecialty survey, we do not believe similar precision requirements are necessary and we did not propose to establish them for the use of the PPIS data.

For physician specialties, the PPIS responses were adjusted for non-response bias. Non-response bias is the bias that results when the characteristics of survey respondents differ in meaningful ways, such as in the mix of practice sizes, from the general population. The non-response adjustment was developed based on a comparison of practice size and other characteristic information between the PPIS survey respondents and data from the AMA Masterfile (for physician specialties) or information from specialty societies (for non-physician specialties). For six specialties (chiropractors, clinical social workers, nuclear medicine, osteopathic manipulative therapy, physical therapy, and registered dietitians) such an adjustment was not possible due to a lack of available characteristic data. The AMA and Lewin have indicated that the non-response weighting has only a small impact on PE/HR values.

Under our current policy, various specialties without SMS or supplemental survey data have been crosswalked to other similar specialties to obtain a proxy PE/HR. For specialties that were part of the PPIS for which we currently use a crosswalked PE/HR, we proposed instead to use the PPIS-based PE/HR. We also proposed to continue current crosswalks for specialties that did not participate in PPIS.

Supplemental survey data on independent labs, from the College of American Pathologists, was implemented for payments in CY 2005. Supplemental survey data from the National Coalition of Quality Diagnostic Imaging Services (NCQDIS), representing IDTFs, was blended with supplementary survey data from the American College of Radiology (ACR) and implemented for payments in CY 2007. Neither IDTFs, nor Independent Labs, participated in the PPIS. Therefore, we proposed to continue using the current PE/HR that was developed using their supplemental survey data.

We did not propose to use the PPIS data for reproductive endocrinology, sleep medicine, and spine surgery since these specialties are not separately recognized by Medicare and we do not know how to blend this data with Medicare recognized specialty data. We sought comment on this issue.

We did not propose changes to the manner in which the PE/HR data are used in the current PE RVU methodology. We proposed to update the PE/HR data itself based on the new survey. We proposed to utilize the PE/HR developed using PPIS data for all Medicare recognized specialties that participated in the survey for payments effective January 1, 2010. The impact of using the new PPIS-based PE/HR is discussed in the Regulatory Impact Analysis in section XIII. of this final rule with comment period.

The following is a summary of the public comments received on the PPIS survey and our responses.

Comment: MedPAC was generally supportive of the use of the PPIS survey data, stating:

> Ensuring the accuracy of PE payments is important given that close to half of all payments under the physician fee schedule are associated with practice expense. The Commission has repeatedly raised concerns that the specialty-specific cost data that CMS uses to derive PE RVUs are not current for most specialties, which might lead to payments becoming inaccurate over time.

Compared with the multiple data sources that CMS currently relies on for practice cost information, the PPIS is a step forward because: (1) It reflects current practice patterns and costs; (2) it measures costs of nearly all physician and nonphysician specialties; and (3) it uses a standard protocol for all specialty groups that was designed to derive PE RVUs. However, CMS should provide more information about the PPIS's response rate and representativeness. We are also concerned that CMS has not laid out options for ensuring the accuracy of PE RVUs in the long term. As a future step, CMS should consider alternatives for collecting specialty-specific cost data or options to decrease the reliance on such data.

Response: We agree with MedPAC that the PPIS is a step forward compared to the data sources currently used in the development of the PE RVUs.

With respect to additional information on the PPIS survey, the AMA has continued to respond to requests from the individual specialty societies for additional data analysis as they have done since the PPIS results were first released. We have also performed further analyses in response to comments received on the proposed rule. The results of these analyses are available on our Web site (described later in this section) and have not changed our conclusion that the PPIS is the most comprehensive, multi-specialty, contemporaneous, consistently collected PE data source available.

We also agree with MedPAC that it is appropriate to consider the future of the PE RVUs moving forward. We did not propose any changes to the methodology in conjunction with the use of the PPIS data. However, we seek comments from other stakeholders on the issues raised by MedPAC for the future. In particular, we seek comments regarding MedPAC's suggestion that we consider alternatives for collecting specialty-specific cost data or options to decrease the reliance on such data. For example, MedPAC stated that ''CMS should consider if Medicare or provider groups should sponsor future data collection efforts, if participation should be voluntary (such as surveys) or mandatory (such as cost reports), and whether a nationally representative sample of practitioners would be sufficient for either a survey or cost reports.'' MedPAC also stated that one option for decreasing the reliance on specialty-specific cost data would be the elimination of specialty-specific cost pools from the method used to derive indirect PE RVUs. We would address any changes through future rulemaking.

Comment: In addition to MedPAC, numerous specialty groups and individual physicians and practitioners supported utilizing the PPIS data. The commenters included family practice, general practice, geriatrics, pediatrics, internal medicine, obstetrics and gynecology, general surgery, infectious disease, emergency medicine, psychiatry, anesthesiology, colorectal surgery, dermatology, endocrinology, gastroenterology, neurology, neurosurgery, ophthalmology, optometry, orthopedic surgery, osteopathic physicians, otolaryngology, pathology, physical medicine and rehabilitation, physical and occupational therapy, plastic surgery, podiatry, pulmonary disease, spine surgery, thoracic surgery, transplant surgery, and vascular surgery.

Those in favor of using the PPIS data made one or more of the following points:

- PPIS was a nationally representative survey providing the most up-to-date and comprehensive data available from 51 specialties. It was a highly scientific and controlled undertaking, using a survey instrument that the AMA took great care to design, test, and implement.
- Seventy organizations contributed to the costs of the survey and agreed to take responsibility for communicating and publicizing the effort in order to enhance response rates. All groups had ample time to review and provide input and received monthly updates on response rates for their group.
- PPIS followed the exacting criteria that CMS has established for gathering this type of data and for producing results that are acceptable for submission. The AMA worked with CMS's contractor to ensure that all data met these criteria and were analyzed consistently across the various physicians and practitioner specialties. Any data that did not meet the criteria such as response outliers were excluded.
- The vast majority of the data currently used are completely outdated. MedPAC and GAO have been calling on CMS to update PE payments. The annual update of such data is inadequate to capture the true changes in practice costs that physicians have experienced over the years.
- Supplemental survey data from a limited number of specialties have caused significant distortions and misallocations of PE payments, and provided an unfair advantage to some specialties. Many organizations were unable to submit supplemental survey data due to the high cost of gathering the data.
- Concurrently and uniformly collected data will correct payment imbalances caused by the supplemental surveys. Due to BN, this leads to a shift in payment to some specialties at the expense of others. The new data will reduce the payment gap between primary care and other specialties.
- Blending PPIS data with existing data would preserve distortions and continue utilization of data that are more than 10 years old for some groups.

Response: We appreciate the support of this broad-based and diverse mix of primary care, surgical, and other nonsurgical specialties for our proposal. We agree with the commenters that the PPIS is the most comprehensive, multi-specialty, contemporaneous, consistently collected PE data source available.

Comment: There were also many specialty groups and individual physicians and practitioners strongly opposed to the use of the PPIS data. The commenters included representatives of the specialties of cardiology, radiation oncology, medical oncology, interventional radiology, hematology, nuclear medicine, urology, rheumatology, and dieticians. Those opposed to using the PPIS data made one or more of the following points:

- Some commenters stated that data were not collected in a contemporaneous, consistent, and comprehensive way;
- Some commenters stated that the PPIS should be subject to the same level of analysis as the supplemental surveys to assess accuracy and precision. The commenters also indicated that the survey did not meet the target goal for useable responses. The commenters stated that the low response rates, for some specialties, means that the data are not representative of the specialties' PEs. The commenters also stated that specialty societies should be given the names of the survey respondents, especially those that failed to fully complete the survey, so they could be contacted;
- Some commenters stated that there was not adequate transparency in the PPIS survey process and that there was insufficient information provided about the survey methodology and process;
- Some commenters stated that CMS should withdraw the proposal and take the time necessary to adequately examine the data submitted by AMA, consider changes to the PE methodology, and solicit public input on the validity of the data and the most appropriate way to integrate this data into the PFS; and
- Some commenters stated that if PPIS data is used, it should be blended with supplemental survey data and/or phased in over a number of years.

Response: The PPIS uses a consistent survey instrument and methodology across all specialty and health care professional groups. The sample was drawn from the AMA's Physician Masterfile, which is a listing of all member and non-member physicians in the United States. The survey was conducted in conjunction with national medical specialty societies and other health care professionals, representing 51 specialties and health professions in order to maximize the overall response rate. Respondents could submit information through multiple modalities, including telephone, fax, and Web-based reporting.

The survey was conducted by external contractors. In 2007 the PPIS project was contracted to the Gallup Organization. In late 2007 the AMA transitioned the survey effort to dmrkynetec, formally Doane Marketing Research, to complete the project. Dmrkynetec conducted the majority of the specialty level surveys that were previously implemented by CMS. Dmrkynetec used the same survey instruments as did the Gallup Organization in order that survey data collected by Gallup could be appropriately merged in the dmrkynetec data collection.

The survey methodology was highly consistent with the prior SMS methodology because only small deviations were allowed to accommodate practice style differences across the various groups surveyed. The PPIS was conducted in accordance with known conventions governing PE collection activities. One hundred completed surveys for each specialty was set as a goal for the PPIS, but was not a minimum requirement. More than 7,000 surveys were collected for 51 physicians, non MD/DO specialties, and health professions. For the majority of specialties, at least 100 surveys were collected.

The AMA provided specialty groups with information on the survey throughout the survey process. Monthly progress reports were issued on response rates. Due to confidentiality agreements with the AMA and participating specialty groups, raw survey data was not distributed to CMS or the specialty groups. However, this does not mean that analysis was not performed on the PPIS data.

In conjunction with publication of the proposed rule, we posted information on our Web site on physician response rates, precision and PE/HR. In addition, we posted Lewin's report entitled, ''Physician Practice Information Survey (PPIS) Data Submitted for 2010: Non-MD/DO and Health Professionals Practice Information'' (June 19, 2009). This report includes information on the PPIS survey process as well as the methodology for determining the PE/HR.

As noted earlier in our response to the MedPAC comment, the AMA has continued to respond to requests from the individual specialty societies for additional data analysis, as they have done since the PPIS results were first released. In response to comments received on the proposed rule, we have also performed additional analyses of summary data supplied by the AMA, the supplemental survey, and cardiology, urology, and radiology groups. This additional analysis indicates that while the PE/HR for these specialties differs between the data sources reviewed for certain practice sizes, these differences do not validate the commenters' conclusion that the PPIS data is invalid. We continue to believe that the PPIS is the most appropriate data source available for the development of resource-based PE RVUs. To view this analysis, please see our Web site at *http://www.cms.hhs.gov/PhysicianFeeSched/*. (At this Web site, Go to ''PFS Federal Regulation Notices'' tab, and then chose ''CMS–1413–P.'' Lewin's original report is listed under the CY 2010 PFS proposed rule page. The additional AMA information and analysis of the PPIS is available at *http://www.ama-assn.org/go/ppisurvey*.

We disagree with some commenters that the same precision requirements that applied to the individual specialty supplemental surveys should apply to the broad multispecialty contemporaneous PPIS. Each individual specialty supplemental survey was being used alongside the multispecialty contemporaneous SMS survey data for all the other specialties. This is not the case for the PPIS data. We proposed to use the PPIS data in its entirety for all Medicare recognized specialties, with the exception of two supplier specialties that did not participate in the PPIS. Precision requirements were appropriate, and required by the BBRA, in the context of the selective acceptance of individual supplemental surveys, but are not necessary in the context of the much broader adoption of the PPIS data.

We also disagree that we should blend the supplemental survey data with the PPIS data. One of the advantages of the PPIS data is precisely that it is contemporaneous and collected in a consistent, broad multi-specialty manner. Blending this data with the supplemental survey data weakens the advantage of using the PPIS data, as was pointed out by commenters who favored its use.

However, we do recognize that some specialties experience significant payment reductions with the use of the PPIS data. Given the magnitude of these payment reductions for some specialties, we agree with commenters who suggested a transition to the new PE RVUs developed using the PPIS data. Historically, we have provided for 4-year transitions when we have significantly altered the PE methodology. While we did not propose any changes to the methodology in the proposed rule, we are persuaded by commenters that the use of the new PPIS data has a sufficiently significant impact to warrant the use of such a transition. In light of the comments received and our past practice, we are finalizing a 4-year transition (75/25, 50/50, 25/75, 0/100) from the current PE RVUs to the PE RVUs developed using the new PPIS data.

Comment: Some commenters that supported the use of the PPIS data and some who opposed its use claimed that Medicare pays only 51 percent of direct costs. Commenters maintained that the PE methodology results in the underpayment of procedures with high direct costs, and will shift procedures from the office to the higher cost hospital setting.

Response: The purpose of the resource-based PE methodology is to develop RVUs within the overall PFS BN requirements. We are unaware of any independent analysis that indicates that Medicare pays 51 percent of direct costs as a result of these BN requirements. In the PE methodology, there is a scaling factor applied in the development of the direct PE portion of the PE RVUs and there is a scaling factor applied in the development of the indirect PE portion. We believe that commenters may be misinterpreting the scaling factor applied in the development of the direct cost portion of the PE RVUs.

The PPIS data indicated a significant decrease in the percentage of PEs that are attributable to direct PEs and a corresponding increase in the percentage that are attributable to indirect PEs. The incorporation of the PPIS data, therefore, results in a decrease in the scaling factor applied in the development of the direct cost portion of the PE methodology from its current value of 0.63 to its new value of 0.51 and a corresponding increase in the scaling factor applied in development of the indirect cost portion. As stated earlier, the PPIS is the most comprehensive, multi-specialty, contemporaneous, consistently

collected source of PE data. The PPIS data indicates that direct costs are a smaller proportion of total PE costs for almost every single specialty surveyed (see Table 2). We are incorporating this result into our methodology and disagree with commenters that this empirically based decrease in the scaling factor for the direct cost portion of the PE RVU using the PPIS survey data is inappropriate.

Comment: The American Society of Clinical Oncology (ASCO) noted that section 303 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (Pub. L. 108–173) (MMA) added section 1848(c)(2)(H) of the Act, which requires us to use their supplemental survey submitted in 2003 for oncology drug administration services.

Response: We have reviewed the MMA provision and agree that, as amended, section 1848(c)(2)(H)(i) of the Act requires that we continue to use the supplemental survey data for oncology. We have revised the PE/HR for medical oncology, hematology, and hematology/oncology to reflect the continued use of these supplemental survey data.

Comment: Several commenters indicated that PPIS data for reproductive endocrinology, sleep medicine, and spine surgery should not be used because they are not separately recognized specialties by Medicare and it is difficult to blend this data with data from specialties that are recognized. Other commenters disagreed and recommended weights we could use to blend the PPIS data with the data from the recognized specialties for certain services.

Some commenters encouraged us to make these Medicare-recognized specialties because they perform work that is separate and apart from their parent specialty, require additional training, and have separate liability issues. Other commenters opposed the recognition of separate specialties for these groups, indicating that they are not markedly different from their parent specialties.

Response: We did not specifically solicit comments on whether reproductive endocrinology, sleep medicine, and spine surgery should be separately recognized Medicare specialties, nor did we make such a proposal. Specialties seeking such recognition must make a formal request using our existing process. (See the CMS Internet-Only Medicare Claims Processing Manual, Pub. L. 100–04, Chapter 26, Section 10.8, Requirements for Specialty Codes.)

We did consider the comments on blending in the PPIS data for the above physician groups as suggested by some commenters. However, we are more persuaded by the commenters who indicated that determining the correct blend would be difficult. We are reluctant to assign utilization weights to the mix of specialties that perform these services in the absence of actual claims data. We suggest that the commenters who wish us to use the PPIS data for these groups apply for a specialty code using our normal process. If approved, the claims data associated with the new specialty code could be used to incorporate the PPIS survey data for that specialty.

Comment: A group of commenters indicated that they were precluded from participating in the PPIS. Some commenters representing portable x-ray suppliers indicated that an inability to participate in the PPIS resulted in an inappropriately low crosswalk for their specialty to radiology.

Response: We did not exclude any specialty from participating in PPIS. Individual specialties made the decision whether to participate. However, we agree with the commenters representing portable x-ray suppliers that radiology may not be the most appropriate crosswalk for their specialty given the relatively low amount of physician time in the services performed by the specialty. In light of these comments, we are changing the PE/HR crosswalk for portable x-ray suppliers to IDTF, a specialty similar with respect to the physician time issue.

Comment: As noted earlier, commenters representing freestanding radiation oncology centers are opposed to the use of the PPIS data. However, if CMS were to use the PPIS data, these commenters requested that CMS adjust the PE/HR used for freestanding radiation oncology centers by eliminating the weighting of the data and by eliminating 21 survey responses whose physician hour information was missing from the data and imputed. The commenters also requested that we update the weights used to blend the hospital-based and freestanding radiation oncology center survey data based on more recent claims data.

Response: We agree with the commenters that it would be more consistent with the methodology used for other specialties to remove the 21 survey responses whose physician hour information was missing from the data and imputed. We also agree it is more appropriate to update the weights used to blend the hospital-based and freestanding radiation oncology center survey data based on more recent claims data. However, we disagree that it is appropriate to eliminate the weighting of the survey data, especially with the 21 observations with imputed physician practice hours removed from the survey sample respondent mix. Consistent with the weighting methodology for other physician specialties, we applied the AMA Masterfile weights to the data. More details on our analysis of this comment can be found on our Web site.

Comment: Some commenters indicated that since, by statute, registered dieticians are paid 85 percent of what a physician would be paid for providing medical nutrition therapy services, the PPIS survey data for registered dieticians should not be used in calculation of PE RVUs; and that we should, therefore, base the RVUs for these services only on the physician specialties that provide the service.

Response: We agree with commenters that, under the current PE methodology, the PPIS survey data for registered dieticians should not be used in the calculation of PE RVUs since they are paid 85 percent of what a physician would be paid for providing the service. To include them in the PE calculation would influence the rate setting to include what the services would be paid if performed by registered dieticians and not strictly on what the payment rate would be if provided by physicians. We will crosswalk the specialty of registered dietician to the ''all physician'' PE/HR rate.

In summary, based on the decisions described above, Table 2 shows the indirect PE/HR for the specialties that have PPIS survey data that we are adopting to calculate the PE RVUs. Also shown for these specialties is the previous indirect PE/HR used to calculate the PE RVUs. Note that for oncology, clinical laboratories, and IDTFs we are continuing to use the supplemental survey data as described above. Consistent with our past practice, the previous indirect PE/HRs for these specialties have been updated to CY 2006 using the MEI to put them on a comparable basis with the PPIS survey data.

TABLE 2—INDIRECT PE/HR FOR THE SPECIALTIES THAT HAVE PPIS SURVEY DATA

c. Equipment Utilization Rate

As part of the PE methodology associated with the allocation of equipment costs for calculating PE RVUs, we currently perform these calculations with an equipment usage assumption of 50 percent. In the CY 2008 PFS proposed rule (72 FR 38132), we noted that if the assumed equipment usage percentage is set too high, the result would be an insufficient allowance at the service level for the practice costs associated with equipment. If the assumed equipment usage percentage is set too low, the result would be an excessive allowance for the practice costs of equipment at the service level. We acknowledged that the current 50 percent usage assumption does not capture the actual usage rates for all equipment, but stated that we did not believe that we had strong empirical evidence to justify any alternative approaches.

In the CY 2008 PFS final rule with comment period, we summarized comments received on this issue. Commenters' recommendations about making adjustments to the 50 percent utilization rate assumption varied. Some commenters recommended that we do nothing until stronger empirical evidence is available. Other commenters recommended a decrease in the utilization assumption while others recommended an increase in the utilization assumption. We agreed with the commenters that the equipment utilization rate should continue to be examined for accuracy. We indicated that we would continue to monitor the appropriateness of the equipment utilization assumption, and evaluate whether changes should be proposed in light of the data available.

In the CY 2010 PFS proposed rule (74 FR 33532), we acknowledged that since the publication of the CY 2008 PFS final rule with comment period, MedPAC addressed this issue in its March 2009 Report to Congress (see *http://www.medpac.gov/documents/Mar09_EntireReport.pdf).* In part of its discussion, MedPAC stated:

> In 2006, the Commission sponsored a survey by NORC of imaging providers in six markets, which found that MRI and CT machines are used much more than the 25 hours per week that CMS assumes (Table 2B–6). According to data from this survey, MRI scanners are used 52 hours per week, on average (median of 46 hours), and CT machines are operated 42 hours per week, on average (median of 40 hours) (NORC 2006). Although the survey results are not nationally representative, they are representative of imaging providers in the six markets included in the survey. We also analyzed data from a 2007 survey of CT providers by IMV, a market research firm (IMV Medical Information Division 2008). IMV data are widely used in the industry and have also appeared in published studies (Baker et al. 2008, Baker and Atlas 2004). Using IMV's data on 803 nonhospital CT providers (imaging centers, clinics, and physician offices), we calculated that the average provider uses its CT scanner 50 hours per week, which is twice the number CMS assumes. The IMV survey also found that nonhospital providers increased the average number of procedures per CT machine by 31 percent from 2003 to 2007, which indicates that providers either used their machines more hours per day or performed more scans per hour (IMV Medical Information Division 2008) (p. 108).

In the proposed rule, we stated that the studies cited by MedPAC indicated that the current equipment usage rate assumption is significantly understated, especially with respect to the types of high cost equipment that were the subject of the studies. The current 50 percent utilization rate translates into about 25 hours per week out of a 50-hour work week. The median value of 46 hours for Magnetic Resonance Imaging equipment from the first study cited by MedPAC is equivalent to a utilization rate of 92 percent on a 50-hour week. For Computed Tomography scanners, averaging the value from the first study of 40 hours per week and the value from the second study of 50 hours per week yields 45 hours and is equivalent to a 90 percent utilization rate on a 50-hour work week. Therefore, in the CY 2010 PFS proposed rule, we proposed to increase the equipment usage rate to 90 percent for all services containing equipment that cost in excess of $1 million dollars. We stated that the studies cited by MedPAC suggested that physicians and suppliers would not typically make huge capital investments in equipment that would only be utilized 50 percent of the time. We stated that we would continue to explore data sources regarding the utilization rates of equipment priced at less than $1 million dollars, but we did not propose a change in the usage rate for this less expensive equipment.

The following is a summary of the public comments received and our responses.

Comment: We received comments supporting our proposal to apply a 90 percent equipment utilization rate to expensive equipment priced at more than $1 million and comments opposing our proposal. MedPAC stated:

> ''The Commission supports CMS's proposal as it applies to diagnostic imaging machines that cost more than $1 million, and we encourage CMS to explore increasing the equipment use factor for diagnostic imaging machines that cost less than $1 million. MedPAC did not contemplate applying the policy to radiation therapy machines.''

Commenters supporting our proposal cited the MedPAC studies and the rationale we provided in the proposed rule.

Commenters opposing our proposal stated that the Balanced Budget Act of 1997 (BBA) directed CMS to ''utilize, to the maximum extent practicable, generally accepted cost accounting principles which: (1) Recognize all staff, equipment, supplies and expense, not just those which can be tied to specific procedures; and (2) use actual data on equipment utilization and other key assumptions.'' The commenters stated that the equipment usage proposal violates this provision of the BBA since we lacked sufficient empirical justification for the change. The commenters indicated that the National Opinion Research Center survey data, which was one data source used by MedPAC, was not nationally representative, and was never intended to determine equipment usage rates.

Some commenters referenced information submitted by the Radiology Benefit Management Association (RBMA) based on a survey of its members. The commenters stated that the information supported maintaining a 50 percent utilization usage rate assumption for diagnostic imaging equipment. The commenters also stated that the information indicated differences in utilization rates between rural and urban areas and that our proposal would create access issues, especially in rural areas.

In MedPAC's comment letter, it agreed with CMS that ''decreasing PE RVUs for expensive diagnostic imaging services should not affect access to care in rural areas.''

The AMA submitted summary equipment utilization data from the PPIS survey on MRI, CT, angiography, IMRT, and gamma camera. It stated that although there was a relatively small sample size, the survey responses suggest that equipment utilization varies depending on the type of equipment involved. The AMA requested that we allow specialty societies to provide data supporting lower utilization rates, if appropriate. It stated that this would allow for varying equipment utilization rate assumptions depending on the type of equipment being used, rather than a single utilization assumption.

Some commenters indicated that even if the available data did indicate a higher utilization rate for certain types of diagnostic equipment, we should not apply the change to all types of expensive diagnostic equipment. For example, we should not apply the usage rate to new imaging technology.

Some commenters requested that we not change the equipment usage rate assumption to 90 percent for any equipment until additional data sources can be identified. The commenters suggested that the equipment usage rate policy should not be limited to increasing usage rate assumptions but should also include potentially decreasing equipment usage rate assumptions when appropriate.

If we were to implement a higher utilization rate, some commenters suggested that the change be phased in over a number of years.

Response: We appreciate all of the comments received on this issue. At the time that we published the proposed rule, we had the data on MRI and CT from the MedPAC analysis. We indicated that the MedPAC studies suggested that physicians and suppliers would not typically make significant capital investments in equipment that would only be utilized 50 percent of the time. Commenters opposed to our proposal have questioned both the validity of the MedPAC analysis for CT and MRI and extrapolation of this data to all expensive equipment, particularly therapeutic equipment. While we are persuaded by PPIS data on angiography, IMRT, and Gamma Camera that the extrapolation of the MRI and CT data to all expensive equipment may be inappropriate, we disagree with commenters who indicated that we do not have an empirical basis for applying a 90 percent usage rate to MRIs and CTs.

As described earlier, the MedPAC analysis was performed on two data sources for different types of equipment. The first data source was the survey done by NORC for MRIs and CTs. The second data source was the IMV data for

CT scans. With respect to MRIs and CTs, we have now also received summary information from the RBMA and summary PPIS survey data from the AMA. The PPIS survey data results for MRIs (n=97) and CTs (n=86) are consistent with the findings from the MedPAC studies on MRIs and CTs. However, the data from the RBMA (17 members submitted a total of 46 center surveys) indicates a lower utilization rate for CT and MRI.

As we have described in section II.A.2.b. of this final rule with comment, the PPIS is the best available data source currently available on PEs. Given the corroboration of the MedPAC analysis by the PPIS data, we are confident that we are using the best data currently available on the utilization of MRIs and CTs (90 percent), consistent with the BBA requirement that we use actual data on equipment utilization.

We are open to receiving more comprehensive data than the responses of 16 RBMA members on this issue from the RBMA or other members of the public. We will evaluate any data submitted for consideration in future rulemaking.

We continue to agree with the MedPAC analysis and comment indicating that decreasing the PE payments for expensive diagnostic imaging services should not affect access to care in rural areas.

We also agree with commenters that it would be appropriate to transition the new PE RVUs developed using the higher 90 percent utilization rate for MRIs and CTs. As discussed elsewhere in this final rule, we are providing for a 4-year transition (25/75, 50/50, 75/25, 100/0) to the new PE RVUs.

As indicated above, we are not finalizing our proposal to increase the utilization rate assumption for expensive equipment other than MRIs and CTs, including therapeutic equipment. We are finalizing our proposal to increase the utilization rate to 90 percent for expensive diagnostic equipment priced at more than $1 million.

d. Miscellaneous PE Issues

As we have discussed in the past rulemaking (see the CY 2007 and CY 2008 PFS final rules with comment period (71 FR 69647 and 72 FR 66236, respectively), we continue to have concerns about the issue of PE RVUs for services which are utilized 24 hours a day/7 days a week, such as certain monitoring systems. For example, the PE equipment methodology was not developed with this type of 24/7 equipment in mind. As stated in the CY 2010 PFS proposed rule (74 FR 33532), we are continuing to analyze the issue of PEs for services, which are utilized 24 hours a day/7 days a week to identify any modifications to our methodology that would address the specific ''constant use'' issues associated with these services. Services that are currently contractor priced in CY 2009 would remain contractor priced in CY 2010. We also indicated that any proposed changes will be communicated through future rulemaking.

Comments: We received three comments regarding the proposal to continue to contractor price these services. All three commenters supported the establishment of a national price for cardiac outpatient telemetry. The commenters also indicated that they believe they were the only ones that should be billing these codes.

Response: We will finalize our proposal to continue to contractor price these services in 2010 so that we may conduct further analysis. Any proposed changes will be communicated through future rulemaking.

As discussed in the proposed rule, (74 FR 33532) we received comments regarding the PE direct cost inputs (for example, supply costs and the useful life of the renewable sources) related to the high dose radiation therapy (HDRT) and placement CPT codes (CPT codes 77785, *Remote afterloading high dose rate radionuclide brachytherapy; 1 channel,* 77786, *Remote afterloading high dose rate radionuclide brachytherapy; 2–12 channels,* 77787, *Remote afterloading high dose rate radionuclide brachytherapy; over 12 channels).* Based on our review of these codes and comments received, we requested that the AMA RUC consider these CPT codes for additional review.

Comment: The AMA RUC reviewed these CPT codes based on our request and recommended revisions to the clinical labor staff type, supplies, and equipment. The AMA RUC also recommended further discussion between the specialty and CMS regarding a resolution regarding the useful life of Iridium-192 source. The AMA RUC and other commenters stated that the useful life of the Iridium-192 source is 70 to 90 days. However, many commenters stated that physician offices enter into 1 year contracts for its replacement.

Several commenters supported the AMA RUC's recommended changes to the practice expense inputs for these codes. The commenters agreed that certain direct PE inputs were previously omitted.

Response: We accept the AMA RUC's recommendations regarding the direct PE inputs for these CPT codes. Based on the comments received and further analysis, we are changing the useful life of the Iridium-192 source from 5 years to 1 year and it will be considered as equipment. We are also revising the direct PE inputs for clinical labor staff type, supplies, and equipment.

e. AMA RUC Recommendations for Direct PE Inputs

The AMA RUC provided recommendations for PE inputs for the codes listed in Table 3 (74 FR 33532).

TABLE 3—CODES WITH AMA RUC PE RECOMMENDATIONS

CPT [1] code	Description
37183	Remove hepatic shunt (tips).
47382	Percut ablate liver rf.
50200	Biopsy of kidney.
55873	Cryoablate prostate.
93025	Microvolt t-wave assess.

[1] CPT codes and descriptions are Copyright 2009 American Medical Association.

In the proposed rule, we stated that we were in agreement with the AMA RUC recommendations for the direct PE inputs for the codes listed in Table 3 and proposed to adopt these for CY 2010.

Comment: Several commenters stated that it did not appear that we had adopted the AMA RUC recommendations for these codes. Commenters requested that we review their direct PE inputs to determine if we had adopted the RUC's recommendations.

Response: We have reviewed the direct PE inputs for these codes and it appears that some were omitted in error. We have now updated the PE inputs for these codes consistent with the RUC recommendation.

f. Practice Expense for Intranasal Vaccine Administration Codes (CPT Codes 90467, 90468, 90473, and 90474)

Comment: We received a comment from a manufacturer that the payment for the intranasal vaccine administration codes (represented by CPT codes 90467, 90468, 90473, and 90474) is approximately half the rate of the injected vaccine administration codes (represented by CPT codes 90465, 90466, 90471, and 90472). The commenter stated that the apparent source of the difference is the clinical staff time inputs of the PE component of the RVUs for these codes. The commenter noted that these codes are used to administer the intranasal form

of the influenza vaccine to healthy individuals between 2 to 49 years of age.

Response: We responded to a similar comment in the CY 2008 PFS final rule with comment period (72 FR 66242). At that time, we stated that a manufacturer had expressed concern that the PE RVUs for intranasal administration of vaccines (CPT codes 90467/8 and 90473/4) are inappropriately low and should be equalized to the injectable immunization administration PE RVUs. The commenter stated that when the codes were re-evaluated in 2004 there was not enough experience in the office to fully understand the time associated with providing an intranasal vaccine. The commenter stated that specialty organizations have indicated that this issue is worth reexamining and indicated that they had been encouraged to communicate with the AMA RUC in support of equalizing payment for the codes. In our response we stated that we appreciated the commenter's concerns about the disparity in the PE RVUs for the intranasal and injectable immunization administration procedures. To the extent that these concerns related to the direct PE inputs, we encouraged the commenters to work with the specialty organizations to determine if it was appropriate to bring these codes forward for further AMA RUC review.

The AMA RUC reviewed the immunization administration services (CPT codes 90465 through 90474) in February 2008. It recommended similar PE inputs for the intramuscular and intranasal immunization administration codes. In the CY 2009 PFS final rule with comment period (73 FR 38512), we stated that we accepted all of the AMA RUC recommendations, except for inclusion of the clinical staff time related to quality activities for the codes. In the CY 2009 PFS final rule with comment period (73 FR 69736), we stated that we had reexamined the issue and that there was evidence to support the inclusion of QA time in this case. We revised the PE database to reflect QA time for these codes.

B. Geographic Practice Cost Indices (GPCIs): Locality Discussion

1. Update—Expiration of 1.0 Work GPCI Floor

Section 1848(e)(1)(A) of the Act requires us to develop separate Geographic Practice Cost Indices (GPCIs) to measure resource cost differences among localities compared to the national average for each of the three fee schedule components (that is, work, PE and malpractice). While requiring that the PE and malpractice GPCIs reflect the full relative cost differences, section 1848(e)(1)(A)(iii) of the Act requires that the physician work GPCIs reflect only one-quarter of the relative cost differences compared to the national average.

Section 1848(e)(1)(C) of the Act requires us to review and, if necessary, adjust the GPCIs at least every 3 years. This section also specifies that if more than 1 year has elapsed since the last GPCI revision, we must phase in the adjustment over 2 years, applying only one-half of any adjustment in each year. As discussed in the CY 2009 PFS final rule with comment period (73 FR 69740), the CY 2009 adjustment to the GPCIs reflected the fully implemented fifth comprehensive GPCI update. We noted that a 1.0 work GPCI floor was enacted and implemented for CY 2006, and was set to expire on June 30, 2008. We also noted that section 134 of the MIPPA extended the 1.0 work GPCI floor from July 1, 2008, through December 31, 2009. Additionally, section 1848(e)(1)(G) of the Act, as amended by section 134(b) of the MIPPA, set a permanent 1.5 work GPCI floor in Alaska for services furnished beginning January 1, 2009. Therefore, as required by the MIPPA, beginning on January 1, 2010, the 1.0 work GPCI floor will be removed. However, the 1.5 work GPCI floor for Alaska will remain in place. See Addenda D and E of this final rule for the GPCIs and summarized geographic adjustment factors (GAFs), respectively.

Comment: A few commenters urged us to make the 1.0 work GPCI floor permanent.

Response: With regard to the 1.0 work GPCI floor, we do not have the authority to extend this provision beyond December 31, 2009. As explained in the CY 2010 PFS proposed rule (74 FR 33533), section 134 of the MIPPA only extended the 1.0 work GPCI floor from July 1, 2008, through December 31, 2009.

2. Payment Localities

a. Background

As stated above in this section, section 1848(e)(1)(A) of the Act requires us to develop separate GPCIs to measure resource cost differences among localities compared to the national average for each of the three fee schedule components (this is, work, PE, and malpractice). Payments under the PFS are based on the relative resources involved in furnishing physicians' services, and are adjusted for differences in relative resource costs among payment localities using the GPCIs. As a result, PFS payments vary between localities.

The current PFS locality structure was developed and implemented in 1997. There are currently 89 localities including 37 higher-cost areas; 16 Rest of State areas (comprising the remaining counties not located in a higher-cost area within a State); 34 Statewide areas; and Puerto Rico and the Virgin Islands which are designated as ''territory-wide'' localities. The development of the current locality structure is described in detail in the CY 1997 PFS proposed rule (61 FR 34615) and the subsequent final rule (61 FR 59494).

As we have frequently noted, any changes to the locality configuration must be made in a budget neutral manner within a State and can lead to significant redistributions in payments. For many years, we have not considered making changes to localities without the support of a State medical association in order to demonstrate consensus for the change among the professionals whose payments would be affected (with some increasing and some decreasing). However, we have recognized that, over time, changes in demographics or local economic conditions may lead us to conduct a more comprehensive examination of existing payment localities.

Payment Locality Approaches Discussed in the CY 2008 PFS Proposed Rule

For the past several years, we have been involved in discussions with California physicians and their representatives about recent shifts in relative demographics and economic conditions among a number of counties within the current California payment locality structure. In the CY 2008 PFS proposed and final rules with comment period, we described three potential options for changing the payment localities in California (72 FR 38139 and 72 FR 66245, respectively).

After reviewing the comments on these options, we decided not to proceed with implementing any of them at that time. We explained that there was no consensus among the California medical community as to which, if any, of the options would be most acceptable. We also received suggestions from the Medicare Payment Advisory Commission (MedPAC) for developing changes in payment localities for the entire country and other States expressed interest in having their payment localities reconfigured as well. In addition, other commenters wanted us to consider a national reconfiguration of localities rather than just making changes one State at a time. Because of the divergent views

expressed in comments, we explained in the CY 2008 PFS final rule with comment period that we intended to conduct a thorough analysis of potential approaches to reconfiguring localities and would address this issue again in future rulemaking.

Interim Study of Alternative Payment Localities Under the PFS

As a follow-up to the CY 2008 PFS final rule with comment period, we contracted with Acumen, LLC (Acumen), to conduct a preliminary study of several options for revising the payment localities on a nationwide basis. The contractor's interim report was posted on the CMS Web site on August 21, 2008, and we requested comments from the public. The report entitled, ''Review of Alternative GPCI Payment Locality Structures,'' is still accessible from the CMS PFS Web page under the heading ''Interim Study of Alternative Payment Localities under the PFS.'' The report may also be accessed directly from the following link: *http://www.cms.hhs.gov/PhysicianFeeSched/10_Interim_Study.asp#TopOfPage.* We accepted comments on the interim report through November 3, 2008. The alternative locality configurations discussed in the report are described briefly below in this section.

Option 1: CMS Core Based Statistical Area (CBSA) Payment Locality Configuration

This option uses the Office of Management and Budget (OMB's) Metropolitan Statistical Area (MSA) designations for the payment locality configuration. MSAs would be considered as urban CBSAs. Micropolitan Areas (as defined by OMB) and rural areas would be considered as non-urban (rest of State) CBSAs. This approach would be consistent with the inpatient hospital prospective payment system (IPPS) pre-reclassification CBSA assignments and with the geographic payment adjustments used in other Medicare payment systems. This option would increase the number of localities from 89 to 439.

Option 2: Separate High Cost Counties From Existing Localities (Separate Counties)

Under this approach, higher cost counties are removed from their existing locality structure and they would each be placed into their own locality. This option would increase the number of localities from 89 to 214 using a 5 percent GAF differential to separate high cost counties.

Option 3: Separate MSAs From Statewide Localities (Separate MSAs)

This option begins with Statewide localities and creates separate localities for higher cost MSAs (rather than removing higher cost counties from their existing locality as described in option 2). This option would increase the number of localities from 89 to 130 using a 5 percent GAF differential to separate high cost MSAs.

Option 4: Group Counties Within a State Into Locality Tiers Based on Costs (Statewide Tiers)

This option creates tiers of counties (within each State) that may or may not be contiguous but share similar practice costs. This option would increase the number of localities from 89 to 140 using a 5 percent GAF differential to group similar counties into Statewide tiers.

Additionally, as discussed in the interim locality study report, our contractor, Acumen, applied a ''smoothing'' adjustment to the current PFS locality structure, as well as to each of the alternative locality configurations (except option 4: Statewide Tiers). The ''smoothing'' adjustment was applied to mitigate large payment differences (or payment ''cliffs'') between adjacent counties. Since large payment differences between adjacent counties could influence a physician's decision on a practice location (and possibly impact access to care), the ''smoothing'' adjustment was applied to ensure that GAF differences between adjacent counties do not exceed 10 percent. (For more information on the ''smoothing'' adjustment see the interim locality study report on the PFS Web page via the link provided above).

b. Summary of Public Comments on Interim Locality Study Report

In the CY 2009 PFS proposed rule (73 FR 38514), we encouraged interested parties to submit comments on the options presented both in the proposed rule and in the interim report posted on our Web site. We also requested comments and suggestions on other potential alternative locality configurations (in addition to the options described in the report). Additionally, we requested comments on the administrative and operational issues associated with the various options under consideration. We also emphasized that we would not be proposing any changes to the current PFS locality structure for CY 2009 and that we would provide extensive opportunities for public comment before proposing any change.

In the CY 2010 PFS proposed rule (74 FR 33533), we noted that approximately 200 industry comments were submitted on the alternative locality options discussed in the CY 2009 PFS proposed rule and on the interim locality study report. Comments were submitted from various specialty groups, medical societies, state medical associations, individual practitioners, and beneficiaries. Commenters generally commended us for acknowledging the need to reconfigure PFS payment localities and expressed support for our study of alternative locality configurations. Some urged us to expedite any changes while other commenters requested that we take a cautious approach.

Several commenters who supported the adoption of an MSA-based PFS locality structure suggested that option 3 could be used as a transition to the CMS CBSA locality configuration (option 1). Many commenters from the State of California supported option 3 (Separate High Cost MSAs) because the commenters believe it would improve payment accuracy (over the current locality configuration) and mitigate possible payment reductions to rural areas as compared to option 1 (CMS CBSA) and option 4 (Statewide Tiers. Because of the payment reductions to rural areas, most commenters did not support option 4 (Statewide Tiers).

Many commenters also acknowledged the significant redistribution of payments that would occur under each option and requested that we minimize the payment discrepancy between urban and rural areas to ensure continued access to services. One medical association stated that ''budget neutral redistributions would only exacerbate an already flawed and under-funded Medicare PFS'' and suggested that States with a Statewide locality be given the option of remaining a Statewide locality. The commenter also requested that we continue our policy of allowing any State the option of converting to a Statewide locality.

For a more detailed discussion of the comments submitted on the interim locality study, see the CY 2010 PFS proposed rule (74 FR 33534).

We did not make a specific proposal for changing the PFS locality structure in the CY 2010 PFS proposed rule. As noted by the commenters and reflected in the report, significant payment redistribution would occur if a nationwide change in the PFS locality configuration were undertaken. All four of the potential alternative payment locality configurations reviewed in the report would increase the number of localities and separate higher cost,

typically urban areas from lower cost, typically rural ''Rest of State'' areas. In general, payments to urban areas would increase while rural areas would see a decrease in payment under each of the options studied because they would no longer be grouped with higher cost ''urbanized'' areas. We intend to continue our review of the suggestions made by the commenters and consider the impact of each of the potential alternative locality configurations.

Comment: We received some comments on the locality discussion from various specialty groups and medical societies. A few commenters expressed support for our decision to defer proposing changes to the PFS locality reconfiguration and recommended that we continue pursuing a cautious approach. One State Medical Association stated that it is hopeful that the Congress will provide a method to update all payment localities in a manner that prevents cuts to payments in lower-cost counties. However, in the event the Congress does not provide additional funding to hold lower cost counties harmless, the commenter supports a PFS locality configuration based on MSAs. Another commenter noted that the redistribution of payments could have a negative impact on access to care. The commenter stated that geographic location should not be a detriment as to whether a physician can provide care to a Medicare beneficiary. One specialty group stated that changes in localities should only be made to improve the relative accuracy of Medicare payment. In the event we make a proposal to change the PFS locality structure, the commenter urged us to provide sufficient data for the public to ascertain the impact on specific geographic areas.

Response: We agree that a nationwide locality reconfiguration requires a cautious approach and will carefully consider the commenter's suggestion regarding an MSA-based locality configuration. We would also like to thank the public again for the many thoughtful comments on the interim locality study report entitled, ''Review of Alternative GPCI Payment Locality Structures''. A final report will be posted to the CMS Web site after further review of the studied alternative locality approaches. As explained in the CY 2010 PFS proposed rule, we are not proposing changes in the PFS locality structure at this time. In the event we decide to make a specific proposal for changing the locality configuration, we would provide data on the impact of the changes. We would also provide extensive opportunities for public input (for example, Town Hall meetings or Open Door Forums, as well as opportunities for public comments afforded by the rulemaking process).

C. Malpractice Relative Value Units (RVUs)

1. Background

Section 1848(c) of the Act requires that each service paid under the PFS be comprised of three components: Work, PE, and malpractice. From 1992 to 1999, malpractice RVUs were charge-based, using weighted specialty-specific malpractice expense percentages and 1991 average allowed charges. Malpractice RVUs for new codes after 1991 were extrapolated from similar existing codes or as a percentage of the corresponding work RVU. Section 4505(f) of the BBA required us to implement resource-based malpractice RVUs for services furnished beginning in 2000. Initial implementation of resource-based malpractice RVUs occurred in 2000. The statute also requires that we review, and if necessary adjust, RVUs no less often than every 5 years. The first review and update of resource based malpractice RVUs was addressed in the CY 2005 PFS final rule (69 FR 66263). Minor modifications to the methodology were addressed in the CY 2006 PFS final rule (70 FR 70153). In the CY 2010 PFS proposed rule, we proposed to implement the second review and update of malpractice RVUs.

2. Methodology for the Revision of Resource-Based Malpractice RVUs

The proposed malpractice RVUs were developed by Acumen, LLC (Acumen) under contract to us (74 FR 33537).

The methodology used in calculating the proposed second review and update of resource-based malpractice RVUs largely parallels the process used in the CY 2005 update. The calculation requires information on malpractice premiums, linked to the physician work conducted by different specialties that furnish Medicare services. Because malpractice costs vary by State and specialty, the malpractice premium information must be weighted geographically and across specialties. Accordingly, the malpractice expense RVUs that we proposed are based upon three data sources:

- Actual CY 2006 and CY 2007 malpractice premium data.
- CY 2008 Medicare payment data on allowed services and charges.
- CY 2008 Geographic adjustment data for malpractice premiums.

Similar to the previous update of the resource-based malpractice expense RVUs, we proposed to revise the RVUs using specialty-specific malpractice premium data because they represent the actual malpractice expense to the physician. In addition, malpractice premium data are widely available through State Departments of Insurance. We proposed to use actual CY 2006 and CY 2007 malpractice premium data because they are the most current data available (CY 2008 malpractice premium data were not consistently available during the data collection process). Accounting for market share, three fourths of all included rate filings were implemented in CY 2006 and CY 2007. The remaining rate filings were implemented in CY 2003 through CY 2005 but still effective in CY 2006 and CY 2007. Carriers submit rate filings to their State Departments of Insurance listing the premiums and other features of their coverage. The rate filings include an effective date, which is the date the premiums go into effect. Some States require premium changes to be approved before their effective date; others just require the rate filings to be submitted. We attempted to capture at least 2 companies and at least 50 percent of the market share, starting with the largest carriers in a State.

The primary determinants of malpractice liability costs continue to be physician specialty, level of surgical involvement, and the physician's malpractice history. We collected malpractice premium data from 49 States and the District of Columbia for all physician specialties represented by major insurance providers. Rate filings were not available through Departments of Insurance in Mississippi or Puerto Rico. Premiums were for $1 million/$3 million, mature, claims-made policies (policies covering claims made, rather than services furnished during the policy term). A $1 million/$3 million liability limit policy means that the most that would be paid on any claim is $1 million and that the most that the policy would pay for several claims over the timeframe of the policy is $3 million. We collected data from commercial and physician-owned insurers and from joint underwriting associations (JUAs). A JUA is a State government-administered risk pooling insurance arrangement in areas where commercial insurers have left the market. Adjustments were made to reflect mandatory surcharges for patient compensation funds (PCFs) (funds to pay for any claim beyond the statutory amount, thereby limiting an individual physician's liability in cases of a large suit) in States where PCF participation is mandatory. We sought to collect premium data representing at least 50

percent of physician malpractice premiums paid in each State as identified by State Departments of Insurance and by the National Association of Insurance Commissioners (NAIC).

Rather than select the top 20 physician specialties as we did when the malpractice RVU were originally established and updated, we included premium information for all physician and surgeon specialties, and risk classifications available in the collected rate filings. Most insurance companies provided crosswalks from insurance service office (ISO) codes to named specialties; we matched these crosswalks to CMS specialty codes. We also preserved information obtained regarding surgery classes, which are categorizations that affect premium rates. For example, many insurance companies grouped general practice physicians into nonsurgical, minor-surgical and major-surgical classes, each with different malpractice premiums. Some companies provided additional surgical subclasses; for example, distinguishing general practice physicians that conducted obstetric procedures, which further impacted malpractice rates. We standardized this information to CMS specialty codes.

We proposed a resource based methodology for developing malpractice RVUs for technical component (TC) services (for example diagnostic tests). Currently, the MP RVUs for TC services and the TC portion of global services are based on historical allowed charges and have not been made resource based due to a lack of available malpractice premium data for nonphysician suppliers. Over the last few years, we have requested malpractice premium data for nonphysician suppliers, but had not received any data prior to last year. In response to our request in last year's rulemaking cycle, one commenter did provide information on one of the largest insurance companies that provides liability insurance for medical physicists employed by imaging facilities. After our contractor, Acumen, verified the medical physicist premium information submitted in response to last year's proposed rule, we proposed to use the medical physicist premium data as a proxy for the malpractice premiums paid by all entities providing TC services; primarily independent diagnostic testing facilities (IDTFs).

Other than the change in methodology for developing malpractice RVUs for TC services, our proposed methodology for updating malpractice RVUs conceptually followed the same approach, with some minor refinements, used to originally develop the resource based malpractice RVUs in CY 2000 and used in the CY 2005 update. These refinements included an expansion in the malpractice premium data collection to include additional specialties, a distinction between major and minor surgical risk factors, and a proposal to use the malpractice risk factor of the specialty that performs a given service the most (dominant specialty) for services with less than 100 occurrences. We solicited comments on our proposed methodology for updating the malpractice RVUs and posted the Acumen report, ''Interim Report on Malpractice RVUs for the CY 2010 Medicare Physician Fee Schedule Proposed Rule'' on the CMS Web site. The interim report on Malpractice RVUs for the CY 2010 PFS proposed rule and Malpractice premium amounts and risk factors by specialty, which was produced by Acumen, LLC under contract to CMS, is accessible from the CMS PFS Web page under the heading ''Interim Report on Malpractice RVUs for the CY 2010 Medicare PFS Proposed rule.'' The report and malpractice premiums may also be accessed directly on the CMS Web site at *http://www.cms.hhs.gov/PhysicianFeeSched/05_Malpractice_Report.asp#TopOfPage.*

A more detailed explanation of our proposed malpractice RVU update can be found in the CY 2010 PFS proposed rule (74 FR 33537).

We received over 250 industry comments on the CY 2010 proposed malpractice RVU update.

Comment: Many commenters commended us for employing an expanded data collection that included premium information for all physician specialties, rather than just the top 20 Medicare physician specialties. Commenters also applauded our use of the most current PLI premium data available from State filings.

Response: We agree with the commenters that the use of the most current PLI data and the expanded data collection is appropriate.

Comment: Some commenters supported the use of medical physicist data as a proxy for developing malpractice RVUs for TC services. The commenters expressed their belief that using medical physicist data provide a better reflection of PLI premiums paid by entities furnishing TC services than the current charge-based approach or cross-walking to physician specialties. Many commenters did not support the proposed change to resource-based MP RVUs for TC services because premium amounts paid by medical physicists were used as a proxy for all entities furnishing TC services. The commenters objected to our proposed use of medical physicist data, stating that the use of this data will result in inappropriately low MP RVUs for the affected services. The commenters indicated that we should use premium data from the suppliers of these TC services, such as IDTFs and audiologists. Some commenters requested that we work with the Radiology Business Management Association (RBMA) to obtain PLI premium information for IDTFs. Other suppliers of TC services, including suppliers of imaging services and remote cardiac monitoring services, also submitted liability policy information. Several commenters requested that we use the current charge-based malpractice RVUs until data from TC suppliers can be collected.

Response: We appreciate all the comments received on this issue. While we agree with the commenters who stated that the medical physicist data provide a better reflection of PLI premiums paid by entities furnishing TC services than the current charge-based approach or crosswalking to physician specialties, we also agree with the commenters who indicated that we should use premium data from the suppliers of these services, if the data are available and meet the same standards as the other premium data collected for use in the development of the malpractice RVUs. As noted earlier, we have repeatedly requested PLI data sources for suppliers of TC services. Our proposal for TC services was based on the first verifiable data source provided to us. In the comment period, alternative PLI sources were recommended for use with the TC services. In some circumstances, the information submitted by the commenters included insurance coverage beyond the scope of the malpractice RVUs (for example, property liability, errors and omissions liability) and/or coverage limits beyond the $1 million/$3 million coverage malpractice premium collection parameters used for professional services. However, these same commenters also submitted the names of several insurance companies who provide malpractice insurance for IDTFs. We contacted these insurance companies in an attempt to collect premium data for the suppliers of TC services. We were able to verify the premium information for IDTFs consistent with the information collected for physician specialties. Therefore, we are using this verified premium data in the calculation of the malpractice RVUs for TC services.

Comment: Many commenters stated that all services have some level of malpractice risk and that it was

inappropriate for CMS to allow rounding to result in zero malpractice RVUs for some services.

Response: After considering the comments on this issue, we agree that it would be inappropriate for services to receive zero payment for malpractice due to rounding. These services will be assigned 0.01 malpractice RVUs for CY 2010.

Comment: One commenter did not support the use of work RVUs to account for differences in risk-of-service for drug administration services and that these services were being inappropriately penalized in the malpractice risk allocation.

Response: When developing the current resource-based PE RVU methodology, we received similar comments since the work RVUs are also a component of the indirect PE allocation. In response to those comments, we modified the resource-based PE methodology to allow the allocation to be done using the greater of the clinical labor involved in the service or the work RVUs. In light of similar comments on this issue in the malpractice allocation, we will make a similar modification. Specifically, we will use the greater of the clinical labor involved in the service or the work RVUs in the malpractice allocation.

Comment: The AMA RUC and other commenters requested that we use the generally lower malpractice survey data from the Physician Practice Information Survey (PPIS) for NPPs instead of crosswalking NPPs to the lowest *physician* specialty (allergy/immunology). One commenter also noted that the average premiums collected for diagnostic radiology were lower than the average reported premium from the AMA PPIS data.

Response: The resource-based malpractice RVUs are based on verifiable PLI premium data. We do not believe it would be appropriate to base the malpractice RVUs for nonphysician specialties or selected specialties on survey data and use premium data for all other specialties. Therefore, we do not agree with the commenters who suggested the use of survey data for NPPs or selected specialties.

Comment: The AMA RUC and two other commenters requested that we crosswalk gynecologic oncology to general surgery and surgical oncology (instead of crosswalking it to medical oncology) because gynecologic oncologists are predominantly cancer surgeons.

Response: We agree with the commenters and will crosswalk gynecologic oncology to general surgery premium data.

Comment: Some commenters raised questions about our proposal to crosswalk maxillofacial surgery and oral surgery to allergy/immunology. The commenters suggested that we use PLI data collected from the American Association of Maxillofacial Surgery (AAOMS) or the PPIS data instead of crosswalking to the lowest physician specialty.

Response: As noted earlier, the resource-based malpractice RVUs are based on verifiable premium data. We do not agree with the commenters who suggested the use of unverified maxillofacial surgery and oral surgery PLI information. However, we do agree that it would be more appropriate to use a surgical specialty's premium data rather than allergy/immunology premium data for surgical specialties. Therefore, we will crosswalk these specialties to the similar specialty of plastic surgery.

Comment: Some commenters did not support using the global surgery indicator for assigning the major or minor risk factor to surgical procedures. The commenters stated that using this methodology for determining the surgical class will not adequately address all the instances in which a surgical procedure should be classified as major. The commenters requested that we work with PLI insurance companies and the AMA RUC to determine a more comprehensive definition of major and minor surgical classifications. One commenter requested that we assign the surgical risk factor to injection procedures performed during cardiac catheterization as described by CPT codes 93501 through 93572.

Response: For the original implementation of resource-based MP RVUs (CY 2000), we assigned one of two risk factors to each service based on code range: surgery and nonsurgery (the surgery risk factor did not distinguish between major and minor). This methodology of assigning risk factors to specific services was also used in the first Five-Year Review. For the second malpractice RVU update, we proposed to assign each service code to one of the following three risk factors: Nonsurgical; minor surgical; and major surgical (74 FR 33539). Risk factor classes for each service were assigned based on procedure code ranges and whether or not the service had a 90-day global period. The 90-day global period was used to assign surgical codes to major surgery.

After consideration of the comments, we will not finalize our proposal but will continue to use our current approach for assigning risk factors to individual services while we study this issue further. We will consider the request to assign the surgical risk factor to injection procedures as part of our further study and would propose any changes through future rulemaking.

As is done under the current methodology, we will continue to assign each service to either a nonsurgical or surgical risk factor based on CPT code ranges: Surgery (CPT code range 10000 through 69999; 92980 through 92998; 93501 through 93536; 92973 through 92974; 93501 through 93533; 93580 through 93581; 93600 through 93613; 93650 through 93652; 92975; 92980 through 92998; 93617 through 93641); and nonsurgery (all other CPT codes). Consistent with current practice, the surgery risk factor would not distinguish between major and minor.

Comment: While commenters agreed with most of our proposed claims based dominant specialty designations for codes with less than 100 allowed services, the commenters disagreed with our proposal for some services. The commenters believe that the claims have been miscoded, resulting in erroneous specialty designations.

Response: Service specific malpractice RVUs are determined based on the weighted average risk factor(s) of the specialties that furnish the service. For rarely-billed Medicare services (that is, when allowed services are less than 100), we proposed to use the risk factor of the dominant specialty as reflected in our claims data. In the past, we had used all the specialties performing these low volume services as reflected in our claims data. Approximately 2,000 services met the criteria for ''low volume.'' The dominant specialty for each 'low volume' service was determined from CY 2008 Medicare claims data.

By using the dominant specialty from our claims data to assign the specialty for these low volume services, we attempted to strike a balance between our preference for the empirical, objective use of all of our claims data in the development of the malpractice RVUs and the desire of commenters to override our claims data for these low volume services using less objective criteria. After careful consideration of the comments, we continue to believe that a more balanced approach between the complete reliance on all of the specialties in our claims data and the subjective review of each low volume service is the most appropriate way of approaching the development of malpractice RVUs for these low volume services. We disagree with the commenters that we should override the dominant specialty from the claims data

with the recommended specialty. Therefore, we will finalize our proposal to use Medicare claims data to assign a dominant specialty to low volume services.

D. Medicare Telehealth Services

1. Requests for Adding Services to the List of Medicare Telehealth Services

Section 1834(m)(4)(F) of the Act defines telehealth services as professional consultations, office visits, and office psychiatry services, and any additional service specified by the Secretary. In addition, the statute requires us to establish a process for adding services to or deleting services from the list of telehealth services on an annual basis.

In the December 31, 2002 **Federal Register** (67 FR 79988), we established a process for adding services to or deleting services from the list of Medicare telehealth services. This process provides the public with an ongoing opportunity to submit requests for adding services. We assign any request to make additions to the list of Medicare telehealth services to one of the following categories:

- *Category #1:* Services that are similar to professional consultations, office visits, and office psychiatry services. In reviewing these requests, we look for similarities between the requested and existing telehealth services for the roles of, and interactions among, the beneficiary, the physician (or other practitioner) at the distant site and, if necessary, the telepresenter. We also look for similarities in the telecommunications system used to deliver the proposed service, for example, the use of interactive audio and video equipment.
- *Category #2:* Services that are not similar to the current list of telehealth services. Our review of these requests includes an assessment of whether the use of a telecommunications system to deliver the service produces similar diagnostic findings or therapeutic interventions as compared with the face-to-face ''hands on'' delivery of the same service. Requestors should submit evidence showing that the use of a telecommunications system does not affect the diagnosis or treatment plan as compared to a face-to-face delivery of the requested service.

Since establishing the process, we have added the following to the list of Medicare telehealth services: psychiatric diagnostic interview examination; ESRD services with two to three visits per month and four or more visits per month (although we require at least one visit a month to be furnished in-person ''hands on'', by a physician, clinical nurse specialist (CNS), nurse practitioner (NP), or physician assistant (PA) to examine the vascular access site); individual medical nutrition therapy; neurobehavioral status exam; and follow-up inpatient telehealth consultations.

Requests to add services to the list of Medicare telehealth services must be submitted and received no later than December 31 of each calendar year to be considered for the next rulemaking cycle. For example, requests submitted before the end of CY 2009 are considered for the CY 2011 proposed rule. Each request for adding a service to the list of Medicare telehealth services must include any supporting documentation you wish us to consider as we review the request. Because we use the annual PFS rulemaking process as a vehicle for making changes to the list of Medicare telehealth services, requestors should be advised that any information submitted is subject to disclosure for this purpose. For more information on submitting a request for an addition to the list of Medicare telehealth services, including where to mail these requests, visit our Web site at *http://www.cms.hhs.gov/telehealth/.*

2. Submitted Requests for Addition to the List of Telehealth Services

We received requests in CY 2008 to add the following services as Medicare telehealth services effective for CY 2010: (1) Health and behavior assessment and intervention (HBAI) procedures; and (2) nursing facility services. In addition, we received a number of requests to add services that we did not approve as Medicare telehealth services in previous PFS rules. These requested services include critical care services; initial and subsequent hospital care; group medical nutrition therapy; diabetes self-management training; speech and language pathology services; and physical and occupational therapy services.

In the CY 2010 PFS proposed rule (74 FR 33543), we responded to these requests. We proposed to add individual HBAI services to the list of Medicare telehealth services, and we proposed to revise our regulations at § 410.78 and § 414.65 accordingly. We proposed to revise § 410.78 to restrict physicians and practitioners from using telehealth to furnish the physician visits required under § 483.40(c). We proposed to revise § 410.78 to specify that the G-codes for follow-up inpatient telehealth consultations (as described by HPCPCS codes G0406 through G0408) include follow-up telehealth consultations furnished to beneficiaries in hospitals and SNFs. We did not propose to add group HBAI, family-with-patient HBAI, nursing facility services, critical care services, or any of the other requested services to the list of Medicare telehealth services. The following is a summary of the discussion from the proposed rule, a summary of comments we received, and our responses.

a. Health and Behavior Assessment and Intervention (HBAI)

The American Psychological Association (APA) submitted a request to add HBAI services (as described by HCPCS codes 96150 through 96154) to the list of approved telehealth services. The APA asked us to evaluate and approve HBAI services as a Category #1 service because they are comparable to the psychotherapy services currently approved for telehealth.

As discussed in the CY 2010 PFS proposed rule (74 FR 33543), clinical psychologists furnish HBAI services to beneficiaries to help them manage or improve their behavior in response to physical problems. Elements of HBAI services typically include interviewing, observing, and counseling beneficiaries to help them modify their behavior. These elements are also common to the office psychiatry services currently approved for telehealth. In the proposed rule, we stated that we believe the interaction between a practitioner and a beneficiary receiving individual HBAI services (as described by HCPCS codes 96150 through 96152) is similar to the assessment and counseling elements of the individual office psychiatry services currently approved for telehealth. Therefore, we proposed to revise § 410.78 and § 414.65 to include individual HBAI services as Medicare telehealth services.

With regard to group HBAI (as described by HCPCS code 96153) or family-with-patient HBAI (as described by HCPCS code 96154), we noted that group services are not currently approved as Medicare telehealth services. Group counseling services have a different interactive dynamic between the physician or practitioner and his or her patients as compared to individual services. Since the interactive dynamic for group HBAI services is not similar to that for individual HBAI services or any other approved telehealth services, we stated that we do not believe that group HBAI or family-with-patient HBAI services should be considered as Category #1 requests. To be considered as a Category #1 request, a service must be similar to the current list of Medicare telehealth services. (See 70 FR 45787 and 70157, and 73 FR 38516 and 69743). Instead,

we believe that group HBAI and family-with-patient HBAI must be evaluated as Category #2 services. Accordingly, we need to evaluate whether these are services for which telehealth can be an adequate substitute for a face-to-face encounter. The requestor did not submit evidence suggesting that the use of a telecommunications system to deliver these services would produce similar diagnostic findings or therapeutic interventions as compared to the face-to-face delivery of these services. Therefore, we did not propose to add group HBAI (as described by HCPCS code 96153) or family-with-patient HBAI (as described by HCPCS code 96154) to the list of approved Medicare telehealth services.

Comment: The APA stated that it was pleased that we proposed to add individual HBAI to the list of approved telehealth services and that it may wish to resume the discussion of adding other HBAI services in the future. Other commenters were also pleased that we proposed to add individual HBAI to the list of approved telehealth services. However, they disagreed with our proposal not to add the other HBAI services to the list of approved Medicare telehealth services. The commenters noted that CMS has no evidence that it is not appropriate to furnish group services via telehealth. In addition, the commenters believe that the involvement of family members in patient counseling can often be critical in developing an appropriate plan of care.

Response: Office psychiatry services currently approved for telehealth are individual rather than group services. There are no group services approved for telehealth. In order to add services for Medicare telehealth that are not similar to the existing list of Medicare telehealth services, we evaluate comparative studies to assess whether the use of an interactive audio and video telecommunications system is an adequate substitute for the in-person (face-to-face) delivery of the requested service. Requestors did not submit sufficient comparative analyses showing that the use of a telecommunications system is an adequate substitute for group counseling services furnished in person.

b. Nursing Facility Services

Section 149 of the MIPPA added SNFs as telehealth originating sites effective for services furnished on or after January 1, 2009. We received a request from the American Telemedicine Association (ATA) to add subsequent nursing facility care; nursing facility discharge services; and other nursing facility services to the list of approved telehealth services. The Center for Telehealth and e-Health Law submitted a request to add the same nursing facility services and indicated its support of ATA's request. We also received a request from the Marshfield Clinic to add the same services requested by the ATA, plus the initial nursing facility care services.

The procedure codes included in these requests are used to report evaluation and management (E/M) services furnished onsite to patients in SNFs. The requestors drew analogies to the E/M services currently approved for Medicare telehealth, and they provided evidence in support of their belief that the use of telehealth could be a reasonable surrogate for the face-to-face delivery of this type of care.

As discussed in the CY 2010 PFS proposed rule (74 FR 33543), the long-term care regulations at § 483.40 require that residents of SNFs receive initial and periodic personal visits. These regulations insure that at least a minimal degree of personal contact between a physician or a qualified NPP and a resident is maintained, both at the point of admission to the facility and periodically during the course of the resident's stay. We believe that these Federally-mandated visits should be conducted in-person, and not as Medicare telehealth services. We proposed to revise § 410.78 to restrict physicians and practitioners from using telehealth to furnish the physician visits required under § 483.40(c).

We reviewed the use of telehealth for each of the subcategories of nursing facility services included in these requests. We identified the E/M services that fulfill Federal requirements for personal visits under § 483.40 and we did not propose to add any procedure codes that are used exclusively to describe these Federally-mandated visits.

Initial Nursing Facility Care

The initial nursing facility care procedure codes (as described by HCPCS codes 99304 through 99306) are used to report the initial E/M visit in a SNF or NF that fulfills Federally-mandated requirements under § 483.40(c). We did not propose to add the initial nursing facility care services (as described by HCPCS codes 99304 through 99306) to the list of approved Medicare telehealth services because these procedure codes are used exclusively to describe E/M services that fulfill Federal requirements for personal visits under § 483.40.

Subsequent Nursing Facility Care

The subsequent nursing facility care procedure codes (as described by HCPCS codes 99307 through 99310) are used to report either a Federally-mandated periodic visit under § 483.40(c), or any E/M visit, prior to and after the initial physician visit, that is reasonable and medically necessary to meet the medical needs of the individual resident. In the past, we have not added hospital E/M visits to the list of approved Medicare telehealth services because of our concern regarding the use of telehealth for the ongoing E/M of a high-acuity hospital inpatient. (See 69 FR 47511, 69 FR 66276, 72 FR 38144, 72 FR 66250, 73 FR 38517, and 73 FR 69745.) Many residents of SNFs also require medically complex care, and we have similar concerns about allowing physicians or NPPs to furnish E/M visits via telehealth to residents of SNFs.

The complexity of care required by many residents of SNFs may be significantly greater than the complexity of care generally associated with patients receiving the office visits approved for telehealth. Accordingly, we do not consider E/M visits furnished to residents of SNFs similar to the office visits on the current list of Medicare telehealth services. Therefore, we believe the use of subsequent nursing facility care for medically necessary E/M visits that are in addition to Federally-mandated periodic personal visits must be evaluated as a Category #2 service.

We evaluated whether these are services for which telehealth can be an adequate substitute for a face-to-face encounter. The requestors submitted supporting documentation to demonstrate that the use of telehealth could be a reasonable surrogate for the face-to-face delivery of this type of care. However, we did not receive sufficient comparative analysis or other compelling evidence to demonstrate that furnishing E/M visits via telehealth to residents of SNFs is an adequate substitute for the face-to-face encounter between the practitioner and the resident, especially in cases where the resident requires medically complex care. We were also concerned that one study demonstrated that services provided via telehealth do not elicit adequate participation in informed medical decision-making from residents with low to moderate illness when compared to face-to-face encounters. We determined that telehealth is not an adequate substitute for the face-to-face delivery of E/M visits to residents of SNFs. Therefore, we did not propose to

add subsequent nursing facility care services to the list of approved Medicare telehealth services.

Nursing Facility Discharge Day Management

The nursing facility discharge day management codes (as described by HCPCS codes 99315 and 99316) are used to report an E/M visit that prepares a resident for discharge from a nursing facility. We note that there is no Medicare Part B requirement to furnish and bill an E/M visit in preparation for a resident's discharge from a SNF. However, if a physician or qualified NPP bills a Nursing Facility Discharge Services code, we believe that a face-to-face encounter will better insure that the resident is prepared for discharge. We do not have evidence that nursing facility discharge services furnished via telehealth are equivalent to face-to-face provision of this service. We did not propose to add the nursing facility discharge day management services to the list of approved Medicare telehealth services.

Other Nursing Facility Service

In 2006, CPT added a procedure code for Other Nursing Facility Service (CPT code 99318) to describe an annual nursing facility assessment. An annual assessment is not one of the required visits under the long-term care regulations at § 483.40. For Medicare purposes, this code can be used in lieu of a Subsequent Nursing Facility Care code to report a Federally-mandated periodic personal visit furnished under § 483.40(c). An annual assessment visit billed using CPT code 99318 does not represent a distinct benefit service for Medicare Part B physician services, and it cannot be billed in addition to the required number of Federally-mandated periodic personal visits. Under Medicare Part B, we cover this procedure code if the visit fully meets the CPT code 99318 requirements for an annual nursing facility assessment. In order to cover and pay for this service, we also require that this annual assessment falls on the 60-day mandated visit cycle. We did not propose to add the other nursing facility care services described by this code to the list of approved Medicare telehealth services because this code is payable by Medicare only if the visit is substituted for a Federally-mandated visit under § 483.40(c). We believe all of the Federally-mandated periodic visits must be conducted in person.

Follow-up Inpatient Consultations

Prior to 2006, follow-up inpatient consultations (as described by CPT codes 99261 through 99263) were approved telehealth services. In 2006, the CPT Editorial Panel of the American Medical Association (AMA) deleted the codes for follow-up inpatient consultations. In the hospital setting, the AMA advised practitioners to bill for services that would previously have been billed as follow-up inpatient consultations using the procedure codes for subsequent hospital care (as described by CPT codes 99231 through 99233). In the nursing facility setting, the AMA advised practitioners to bill for these services using the procedure codes for subsequent nursing facility care (as described by CPT codes 99307 through 99310).

In the CY 2009 PFS final rule with comment period (73 FR 69745), we created follow-up inpatient telehealth consultation codes (as described by HCPCS codes G0406 through G0408) to furnish care to hospital inpatients, and we added these G-codes to the list of Medicare telehealth services. These HCPCS codes are limited to the range of services included in the scope of the previous CPT codes for follow-up inpatient consultations, and the descriptions limit the use of such services for telehealth.

In the CY 2010 PFS proposed rule (74 FR 33547), we stated that if the former codes for follow-up consultations (as described by CPT codes 99261 through 99263) still existed, these procedure codes would also be available to practitioners providing follow-up consultations via telehealth to SNF patients. Although we did not receive a public request to add follow-up inpatient consultations for SNF patients to the list of approved Medicare telehealth services, we stated that we also recognized a need to establish a method for practitioners to provide these services. For CY 2010, we proposed to revise § 410.78 to specify that the G-codes for follow-up inpatient telehealth consultations (as described by HCPCS codes G0406 through G0408) include follow-up inpatient telehealth consultations furnished to beneficiaries in SNFs, as well as in hospitals. The HCPCS codes clearly designate these services as follow-up consultations provided via telehealth, and not as subsequent care used for E/M visits. Utilization of these codes for patients in SNFs will facilitate payment for these services, as well as enable us to monitor whether the codes are used appropriately. (See the CMS Internet-Only Medicare Claims Processing Manual, Pub. 100–04, Chapter 12, Section 190, for the definition of follow-up inpatient telehealth consultations.)

The following is a summary of the comments we received regarding our proposed decisions on Nursing Facility Services.

Comment: Commenters supported our proposal to restrict physicians and practitioners from using telehealth to furnish the physician visits required under § 483.40(c). Commenters also supported our proposal to expand the definition of Follow-Up Inpatient Telehealth Consultations (as described by HCPCS codes G0406–G0408) to allow their use for residents of SNFs. Commenters noted that this change would be a positive step towards increasing access to care for Medicare beneficiaries in rural areas.

Some commenters disagreed with our proposal not to add Nursing Facility Services to the list of approved Medicare telehealth services. Commenters acknowledged Congressional intent expressed in section 413 of the MMA that the use of telehealth should not be a substitute for the Federally-mandated periodic personal visits required under § 483.40(c). All commenters agreed with our proposal not to add any procedure codes that are used exclusively to describe these Federally-mandated visits. Commenters stated that they believed that the Congress intended to allow the use of telehealth to furnish E/M medically necessary visits onsite to residents of SNFs that are in addition to Federally-mandated periodic personal visits. Some commenters also noted that due to health professional shortages in rural areas, many SNFs lack essential onsite services. Some commenters believe adding nursing facility visits to the list of approved telehealth services will improve the quality of care furnished to residents of SNFs. Commenters also noted that not adding nursing facility visits to the list of approved Medicare telehealth services will not prevent the use of telehealth to furnish services to residents of SNFs, including those residents requiring medically complex care. These same residents could be transported to physicians' offices or hospitals where they could receive similar E/M visits via telehealth.

Response: We did not receive sufficient comparative analysis or other compelling evidence to demonstrate that furnishing E/M visits via telehealth to residents of SNFs is an adequate substitute for the face-to-face encounter between the practitioner and the resident, especially in cases where the resident requires medically complex care. We are further concerned that the use of telehealth may not elicit adequate participation from residents of SNFs in

making informed medical decisions with their clinicians when compared to face-to-face encounters.

We agree with the commenters who noted that expanding the definition of Follow-Up Inpatient Telehealth Consultations (G0406–G0408) to allow their use for residents of SNFs will increase access to care for Medicare beneficiaries in rural areas. We believe the availability of inpatient consultations to furnish care via telehealth to residents of SNFs is consistent with the addition of SNFs as approved telehealth originating sites. Physicians and NPPs who furnish inpatient consultations via telehealth complement the care provided by the SNF and furnished onsite by the attending physician or physician of record.

c. Critical Care Services

In the CY 2009 PFS final rule with comment period (73 FR 69744), we did not add critical care services to the list of approved Medicare telehealth services. In 2009, Philips Healthcare submitted an expanded request to add critical care services to the list of approved Medicare telehealth services. It stated that critical care services can be approved as a Category #1 service based on their similarity to the inpatient consultation services currently approved for Medicare telehealth. The requestor also stated that many of the components of critical care are similar to a high-level inpatient consultation service, which is currently approved for Medicare telehealth. Common components include obtaining a patient history, conducting an examination, and engaging in complex medical decision-making for patients who may be severely ill. Because we classified critical care as a Category #2 service last year, the requestor also submitted evidence to support its belief that the use of telehealth could be a reasonable surrogate for the face-to-face delivery of this type of care.

In the CY 2010 PFS proposed rule (74 FR 33548), we stated that remote critical care services are different than the telehealth delivery of critical care (as described by HCPCS codes 99291 and 99292). We did not propose adding critical care services (as described by HCPCS codes 99291 and 99292) to the list of approved Medicare telehealth services. We reiterated that our decision not to add critical care services to the list of approved telehealth services does not preclude physicians from furnishing telehealth consultations to critically ill patients.

Comment: A commenter disagreed with our proposal not to add critical care services to the list of approved Medicare telehealth services. The commenter submitted a new study to support its belief that these services are comparable to critical care furnished in-person. The commenter asserted that the role of the intensivist, whether in-person or remotely, is to provide the required expertise and ability to direct onsite clinical staff to perform any necessary hands-on intervention, not necessarily to effectuate them personally. To support this, the commenter submitted a vignette describing critical care services, including an analysis detailing the types of services furnished when critical care (as described by HCPCS codes 99291 and 99292) was billed by a sample of intensivists. The commenter noted that the critical care services included in this sample did not require hands-on intervention.

Another commenter who submitted the CY 2009 request submitted descriptions of telestroke technology to support the assertion that the elements of a stroke-related neurological assessment performed by a neurologist are effectively the same whether furnished in-person or via telehealth. The commenter acknowledges that some telestroke services satisfy the criteria for billing consultations via telehealth, but noted that the payment is less than the same neurological assessment furnished in-person and billed as a critical care service. The commenter requested that we consider adding critical care services to the list of approved Medicare telehealth services when the underlying diagnosis is stroke-related.

Response: We continue to believe that remote critical care services are different from the telehealth delivery of critical care services (as described by HCPCS codes 99291 and 99292). The AMA created remote critical care tracking codes. Such codes track utilization of a service, facilitating data collection on, and assessment of, new services and procedures. We believe that the data collected for these tracking codes will help provide useful information on how to best categorize and value remote critical care services in the future.

We did not find the studies submitted during the comment period persuasive that telehealth can be an adequate substitute for the face-to-face delivery of critical care services (as described by HCPCS codes 99291 and 99292). As described in these studies, the role of the physician furnishing remote critical care services includes monitoring patients and directing on-site staff to intervene, as necessary. Within the current standards of practice, we believe that critical care services (as described by HCPCS codes 99291 and 99292) require the physical presence of a physician who is available to furnish any hands-on intervention. We continue to believe that remote critical care services are different services than the telehealth delivery of critical care (as described by HCPCS codes 99291 and 99292). As noted above, we believe that the data collected for the remote critical care tracking codes will help provide useful information on how to best categorize and value remote critical care services in the future.

d. Other Requests

We received a number of requests to add services that we reviewed and did not accept in previous PFS Rules. The following are brief summaries of our discussions from the proposed rule, summaries of comments received, and our responses.

Initial and Subsequent Hospital Care

We received a request to add initial hospital care (as described by HCPCS codes 99221 through 99223) and subsequent hospital care (as described by HCPCS codes 99231 through 99233) to the list of approved Medicare telehealth services. In response to previous requests, we did not add initial or subsequent hospital care to the list of approved telehealth services because of our concern regarding the use of telehealth for the ongoing E/M of a high-acuity hospital inpatient. (See 69 FR 47510 and 66276, 72 FR 38144 and 66250, and 73 FR 38517 and 69745.) We did not receive any new information with this request that would alter our previous decision. Therefore, we did not propose adding initial hospital care or subsequent hospital care to the list of approved Medicare telehealth services. We did not receive any comments on this proposal.

Group Medical Nutrition Therapy Services

We received a request to add group medical nutrition therapy (MNT) services (as described by HCPCS codes G0271 and 97804) to the list of approved Medicare telehealth services. In response to a previous request, we did not add group MNT to the list of approved telehealth services because we believe that group services are not appropriately delivered through telehealth. (See 70 FR 45787 and 70157.) We did not receive any new information with this request that would alter our previous decision. Therefore, we did not propose adding group MNT to the list of approved Medicare telehealth services. We did

not receive any comments on this proposal.

Diabetes Self-Management Training (DSMT)

We received a request to add diabetes self-management training (DSMT) (as described by HCPCS codes G0108 and G0109) to the list of approved telehealth services. In response to previous requests, we did not add DSMT to the list of approved telehealth services because of the statutory requirement that DSMT include teaching beneficiaries to self-administer injectable drugs. Furthermore, DSMT is often performed in group settings and we believe that group services are not appropriately delivered through telehealth. (See 70 FR 45787 and 70157, and 73 FR 38516 and 69743.) We did not receive any new information with this request that would alter our previous decision. Therefore, we did not propose to add DSMT to the list of approved Medicare telehealth services.

Comment: We received two comments opposing our proposal not to add DSMT to the list of approved Medicare telehealth services. The American Association of Diabetes Educators (AADE) agrees that telehealth is not an appropriate venue for initial DSMT when it includes teaching beneficiaries to self-administer injectable drugs. One commenter submitted studies to support its belief that the use of a telecommunications system was equivalent to the face-to-face delivery of follow-up DSMT.

Response: We believe that skill-based training, such as teaching patients how to inject insulin, would be difficult to accomplish effectively without the physical presence of the teaching practitioner. We disagree that this training element should be carved out of individual DSMT for purposes of providing Medicare telehealth services. The training involved in teaching beneficiaries the skills necessary for the self-administration of injectable drugs is a key component of this statutorily described benefit (and therefore inherent in the codes that describe DSMT). We continue to believe that it would not be appropriate to add individual follow-up DSMT to the list of approved Medicare telehealth services.

Speech and Language Pathology Services

We received a request to add various speech and language pathology services to the list of approved telehealth services. Speech-language pathologists are not permitted under current law to furnish and receive payment for Medicare telehealth services. Therefore, we did not propose to add any speech and language pathology services to the list of approved Medicare telehealth services. (For further discussion, see 69 FR 47512 and 66276, and 71 FR 48995 and 69657.)

Comment: The American Speech-Language Hearing Association (ASHA) commented that telehealth has been successfully applied to speech-language pathology and audiology services. ASHA requested that CMS support expansion of Medicare telehealth coverage for speech-language pathologists in communications with Congress. The American Academy of Audiology commented on the shortage of audiologists in rural areas. The group requested that we use our administrative authority to add audiology services to the list of approved Medicare telehealth services.

Response: It is not within our administrative authority to pay speech-language pathologists and audiologists for services furnished via telehealth. The statute authorizes the Secretary to pay only for telehealth services furnished by a physician or a practitioner as those terms are defined in the statute.

Physical and Occupational Therapy Services

We received a request to add various physical and occupational therapy services to the list of approved Medicare telehealth services. The statute does not authorize Medicare payment to physical and occupational therapists for Medicare telehealth services. Therefore, we did not propose to add any physical and occupational therapy services to the list of approved Medicare telehealth services. (For further discussion, see 71 FR 48995 and 69657.)

e. Summary: Result of Evaluation of 2010 Requests

We will finalize our proposal to add the individual HBAI services (as described by HCPCS codes 96150 through 96152) and not to add group HBAI (as described by HCPCS code 96153) or family-with-patient HBAI (as described by HCPCS code 96154) to the list of approved Medicare telehealth services. We will also finalize our proposal to add individual HBAI services to the list of approved Medicare telehealth services at § 410.78 and § 414.65.

We will finalize our proposal to revise § 410.78 to restrict physicians and practitioners from using telehealth to furnish the physician visits required under § 483.40(c). We will finalize our proposal not to add Nursing Facility Services (as described by HCPCS codes 99304 through 99318) to the list of approved Medicare telehealth services. We will also finalize our proposal to revise § 410.78 to specify that the G-codes for follow-up inpatient telehealth consultations (as described by HPCPCS codes G0406 through G0408) include follow-up telehealth consultations furnished to beneficiaries in hospitals and SNFs.

We will finalize our proposals not to add critical care services (as described by HCPCS codes 99291 and 99292) or any of the other requested services to the list of approved Medicare telehealth services.

3. Other Issues

We received other comments on matters related to Medicare telehealth services that were not the subject of proposals in the CY 2010 PFS proposed rule. We thank the commenters for sharing their views and suggestions. Because we did not make any proposals regarding these matters, we do not generally summarize or respond to such comments in this final rule. However, we have chosen to summarize and respond to the following comments in order to furnish more information.

Comment: The American Society of Nephrology requested clarification on whether Medicare would pay for kidney disease patient education furnished via telehealth. Other commenters specifically requested that we add kidney disease patient education services to the list of approved telehealth services.

Response: Kidney disease patient education services are not approved Medicare telehealth services. Any interested parties may submit requests to add services to the list of Medicare telehealth services. Requests submitted before the end of CY 2009 will be considered for the CY 2011 PFS proposed rule. Requestors should be advised that each request to add a service to the list of Medicare telehealth services must include any supporting documentation the requestor wishes us to consider as we review the request. For more information on submitting a request for an addition to the list of Medicare telehealth services, including where to directly mail these requests, visit our Web site at *http://www.cms.hhs.gov/telehealth*.

Comment: We received a few comments that questioned our criteria and process for reviewing requests to add to the list of approved Medicare telehealth services. The commenters stated that our standards interfere with appropriate physician medical judgment under section 1801 of the Act. One commenter noted that since the

standards are not specified in regulation text, we can change them without formal rulemaking.

Response: Our established criteria and process for reviewing requests to add to the list of approved Medicare telehealth services were subject to full notice and comment procedures in the CY 2003 PFS proposed and final rules. Since we did not make any proposals relating to the criteria or process, any potential revisions to the process for adding or deleting services from the list of approved Medicare telehealth services are outside the scope of this final rule.

Comment: We received a request to provide a list of physician services that can be furnished without an in-person examination.

Response: General guidance regarding physician services that can be furnished by visualizing some aspect of the patient's condition without an in-person examination is provided in the CMS Internet-Only Medicare Benefits Policy Manual, Pub. 100–02, Chapter 15, § 30.

E. Specific Coding Issues Related to the Physician Fee Schedule

1. Canalith Repositioning

In 2008, the CPT Editorial Panel created a new code for canalith repositioning (CRP). This procedure is a treatment for vertigo which involves therapeutic maneuvering of the patient's body and head in order to use the force of gravity to redeposit the calcium crystal debris in the semicircular canal system.

In the CY 2009 PFS final rule with comment period (73 FR 69896), new CPT code 95992, *Canalith repositioning procedure(s) (e.g., Epley maneuver, Semont maneuver), per day*, was assigned the bundled status indicator (B). We explained that this procedure previously was billed as part of an evaluation and management (E/M) service or under a number of CPT codes, including CPT code 97112, *Therapeutic procedure, one or more areas, each 15 minutes; neuromuscular reeducation of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities.* We also explained that because neurologists and therapists are the predominant providers of this service to Medicare patients (each at 22 percent), it was assigned as a ''sometimes therapy'' service under the therapy code abstract file.

After publication of the CY 2009 PFS final rule with comment period, we received comments on this issue from an organization representing physical therapists, as well as others expressing opposition to our decision to bundle the new code. Commenters stated that they believe that our decision to bundle CPT code 95992 was flawed since physical therapists are unable to bill E/M services. One commenter also stated that therapists would be precluded from using another code for billing for this service because CPT correct coding instructions require that the provider/supplier select the procedure that most accurately defines the service provided.

Based upon the commenters' feedback, we realized that we had failed to address how therapists would bill for the service since they cannot bill E/M services. In order to address this situation so that access to this service would not be impacted we released a MedLearn article informing PTs to continue using one of the more generally defined ''always therapy'' CPT codes (97112) as a temporary measure. See *http://www.cms.hhs.gov/transmittals/downloads/R1691CP.pdf* and *http://www.cms.hhs.gov/MLNMattersArticles/downloads/MM6397.pdf*.

In response to the concerns raised and upon additional review of this issue in the CY 2010 PFS proposed rule, we proposed to change the status indicator for this code from B (Bundled) to I (Not valid for Medicare purposes). We proposed that physicians would continue to be paid for CRP as a part of an E/M service. Physical therapists would continue to use one of the more generally defined ''always therapy'' CPT codes (97112). We stated that we believe that this will enable beneficiaries to continue to receive this service while at the same time it will address our concerns about the potential for duplicate billing for this service to the extent that this service is paid as a part of an E/M service. As a result of this proposal, CPT code 95992 would be removed as a ''sometimes'' therapy code from the therapy code list.

The following is a summary of the comments we received regarding the canalith repositioning proposal.

Comment: Some commenters stated that the canalith repositioning treatment requires 20 minutes of intraservice time as valued by the AMA RUC and that the pre-time was specifically removed because the service is typically performed with an E/M code. The commenters also stated that they believe we expected physicians to forgo payment for CRP and asked that we pay it separately from an E/M service. The commenters requested that CMS recognize the service as separate and distinct from an E/M service.

Response: As we stated in the CY PFS final rule (73 FR 69896) canalith repositioning has been billed using E/M codes and therapy service codes in the past and we believe it should continue to be billed this way. Physicians will continue to be paid for the work performed when CRP is billed using E/M codes.

Comment: Some commenters opposed designating CPT code 95992 as not valid for Medicare purposes. The commenters stated that the code was developed to describe and value CRP and that it should be utilized. Another commenter stated that it is not consistent with CPT coding principles to direct therapists to use a less specific code.

Response: As stated in the CY 2010 PFS proposed rule we initially decided to bundle this code, but upon further review proposed to change the status indicator to ''I'' (not valid for Medicare purposes). Physicians will continue to be paid for CRP as part of an E/M service. Physical therapists will continue to use an ''always therapy'' CPT code as they have in the past. The code will be removed from the ''sometimes'' therapy list. This change will address our concerns about the potential for duplicate billing of this service while still allowing physicians and therapists to perform the service.

Comment: Some commenters are concerned that audiologists have no way to bill for CRP. They requested that CMS reconsider allowing payment to audiologists for this treatment.

Response: Audiological tests are covered under the benefit category for other diagnostic tests. There is no statutory authority to allow audiologists to bill Medicare for treatment services, such as CRP. CRP may be covered under the benefit category for physician services or physical therapy services. If covered as a physician service, it may be furnished incident to a physician's service by any qualified staff.

We will finalize our proposal to designate CPT code 95992 as ''I'', not valid for Medicare purposes. We will also remove it from the ''sometimes'' therapy code list in order to allow therapists to bill appropriately for the service, using one of the more generally defined ''always therapy'' codes.

2. Payment for an Initial Preventive Physical Examination (IPPE)

In the CY 2010 PFS proposed rule, we proposed to increase the payment for an initial preventive physical examination (IPPE) furnished face-to-face with the patient and billed with HCPCS code G0402, *Initial preventive physical examination; face-to-face visit, services limited to new beneficiary during the first 12 months of Medicare enrollment* beginning January 1, 2010. The IPPE service includes a broad array of

components and focuses on primary care, health promotion, and disease prevention.

Section 101(b) of the MIPPA changed the IPPE benefit by adding to the IPPE visit the measurement of an individual's body mass index and, upon an individual's consent, end-of-life planning. Section 101(b) of the MIPPA also removed the screening electrocardiogram (EKG) as a mandatory service of the IPPE.

In order to implement this MIPPA provision, in the CY 2009 PFS final rule with comment period (73 FR 69870), we created HCPCS code G0402 as a new HCPCS code and retained, on an interim basis, the work RVUs of 1.34 assigned to HCPCS code G0344, the code that was previously used to bill for the IPPE. While we did not believe the revisions to the IPPE required by MIPPA impacted the work RVUs associated with this service, we solicited public comments on this issue, as well as suggested valuations of this service to reflect resources involved in furnishing the service. (For a summary of the comments received on the CY 2009 PFS final rule with comment period, see the CY 2010 PFS proposed rule (74 FR 33549)).

Based on a review of the comments received on the CY 2009 PFS final rule with comment period and upon further evaluation of the component services of the IPPE, we stated in the CY 2010 PFS proposed rule that we believe the services, in the context of work and intensity, contained in HCPCS code G0402 are most equivalent to those services contained in CPT code 99204, *Evaluation and management new patient, office or other outpatient visit*, and proposed increasing the work RVUs for HCPCS code G0402 to 2.30 effective for services furnished beginning on January 1, 2010.

The following is a summary of the comments we received regarding the proposed increase to the payment for the IPPE billed with HCPCS code G0402.

Comment: All commenters strongly supported CMS' proposal to increase the payment for the IPPE. Commenters believe that the CY 2010 payment will fairly account for the services rendered.

Response: We are finalizing our proposal to increase the work RVUs for the IPPE to 2.30 effective for services furnished beginning January 1, 2010.

3. Audiology Codes: Policy Clarification of Existing CPT Codes

In the CY 2009 PFS final rule with comment period (73 FR 69890), we noted that the AMA RUC reviewed and recommended work RVUs for 6 audiology codes with which we agreed (that is, CPT codes 92620, 92621, 92625, 92626, 92627, and 92640). We also noted that in the Medicare program, audiology services are covered under the diagnostic test benefit and that some of the work descriptors for these services include ''counseling,'' ''potential for remediation,'' and ''establishment of interventional goals.''

Since audiology services fall under the diagnostic test benefit, aspects of services that are therapeutic or management activities are not payable to audiologists. This distinction is of particular importance since CPT codes 92620, 92621, 92626, 92627, and 92640 are ''timed'' codes. These codes are billed based on the actual time spent furnishing the service.

We noted that we do not believe these aspects fit within the diagnostic test benefit. We solicited comments on this issue. For a summary of the comments received and our responses to those comments, see the CY 2010 PFS proposed rule (74 FR 33550).

The following is summary of the comments we received regarding the policy clarification of existing CPT codes for audiology services.

Comment: We received additional comments reiterating the comments to which we had responded previously in the proposed rule that ''counseling,'' ''potential for remediation,'' and ''establishment of interventional goals'' were part of the diagnostic test and were not therapeutic or management activities. Other commenters agreed with the clarification as it was presented in the proposed rule.

Response: After a careful consideration of all the comments, we are finalizing the clarification of audiology services with respect to CPT codes 92620, 92621, 92625, 92626, 92627, 92640, and other audiologist services as discussed in the proposed rule. Although we understand that test results are sometimes appropriately and briefly conveyed to the patient at the time of the diagnostic test, any therapeutic activities or activities that should be billed as E/M services associated with these audiology codes are not payable to audiologists because they do not fall within the benefit category under which these tests are covered.

4. Consultation Services

a. Background

The current physician visit and consultation codes were developed by the American Medical Association (AMA) Current Procedural Terminology (CPT) Editorial Panel in November 1990. A consultation service is an evaluation and management (E/M) service furnished to evaluate and possibly treat a patient's problem(s). It can involve an opinion, advice, recommendation, suggestion, direction, or counsel from a physician or qualified NPP at the request of another physician or appropriate source. (See the Internet-Only Medicare Claims Processing Manual, Pub. 100–04, chapter 12, § 30.6.10 A for more information.) A consultation service must be documented and a written report given to the requesting professional. Currently, consultation services are predominantly billed by specialty physicians. Primary care physicians infrequently furnish these services.

The required documentation supports the accuracy and medical necessity of a consultation service that is requested and provided. Medicare pays for a consultation service when the request and report are documented as a consultation service, regardless of whether treatment is initiated during the consultation evaluation service. (See the Internet-Only Medicare Claims Processing Manual, Pub. 100–04, chapter 12, § 30.6.10 B.) A consultation request between professionals may be done orally by telephone, face-to-face, or by written prescription brought from one professional to another by the patient. The request must be documented in the medical record.

In the Physician Fee Schedule Final Rule issued June 5, 1991, (56 FR 25828) we stated that the agency's goal for the development of the new visit and consultation codes was that they meet two criteria: (1) They should be used reliably and consistently by all physicians and carriers; that is, the same service should be coded the same way by different physicians; and (2) they should be defined in a way that enables us to properly crosswalk the new codes to the relative values for the Harvard vignettes so valid RVUs for work are assigned to the new codes.

Based on requests from the physician community to clarify our consultation payment policy and to provide consultation examples, we convened an internal workgroup of medical officers within CMS (then called the Health Care Financing Administration, or HCFA) and revised the payment policy instructions in August 1999 in the Medicare Claims Processing Manual (at § 30.6.10 as cited above). We provided examples of consultation services and examples of clinical scenarios that did not satisfy Medicare criteria for consultation services. Without explicit instructions for every possible clinical scenario outlined in national policy

instructions or in AMA coding definitions or coding instructions, the local policy interpretations by Medicare contractors were not universally equivalent or acceptable to the physician community and resulted in denials in different localities. Some Medicare contractors would consider a consultation service with treatment to be an initial visit rather than a consultation thus resulting in a denial for the billed consultation. We clarified in the 1999 revision that Medicare would pay for a consultation whether treatment was initiated at the consultation visit or not. The physician community has stated that terms such as referral, transfer and consultation, used interchangeably by physicians in clinical settings, confuse the actual meaning of a consultation service and that interpretation of these words varies greatly among members of that community as some label a transfer as a referral and others label a consultation as a referral. Although we clarified the terms referral and consultation in the 1999 revision, there was disagreement with our policy by physicians in the health care community and by AMA CPT staff. We provided our documentation guidance so physicians would be in compliance with our payment policy. The consultation definition in the AMA CPT simply stated that the consultant's opinion or other information must be communicated to the requesting physician.

Additional manual revisions in both January and September 2001 (at § 30.6.10 as cited above) clarified that NPPs can both request and furnish consultation services within their scope of practice and licensure requirements. We continued to explain our documentation requirements to the physician community through our Medicare contractors and in our discussions with the AMA CPT staff. Under our current policy and in the AMA CPT definition, a consultation service must have a request from another physician or other professional and be followed by a report to the requesting professional. The AMA CPT definition does not state that the request must be written in the requesting physician's medical record. However, we require the request to be documented in the requesting physician's plan of care in the medical record as a condition for Medicare payment. The E/M documentation guidelines which apply to all E/M visits or consultations (*http://www.cms.hhs.gov/MLNEdWebGuide/25_EMDOC.asp*) clearly state that when referrals are made, consultations are requested, or advice is sought, the medical record should indicate to whom and where the referral or consultation is made or from whom the advice is requested. Our Medicare contractors are responsible for reviewing and paying consultation claims when submitted. When there is a question that triggers a review of a consultation service, our Medicare contractors will look at both the requesting physician's medical record (where the request should be noted) and the consultant's medical record where the consultation is reported and at the report generated for the requesting physician. Medicare contractors do not look for evidence of documentation on every claim, only when there is a concern raised during random sampling or during a specific audit performed by a contractor. The AMA CPT coding manual, which is not a payment manual, does not specify these requirements, and, therefore, as we understand it, many physicians do not agree with the CMS policy.

In March 2006, the Office of the Inspector General (OIG) published a report entitled, ''Consultations in Medicare: Coding and Reimbursement'' (OEI–09–02–00030). The stated purpose of the report was to assess whether Medicare's payments for consultation services were appropriate. While the OIG study was being conducted, we continued our ongoing discussions with the AMA CPT staff for potential changes to the consultation definition and guidance in CPT. The findings in the OIG report (based on claims paid by Medicare in 2001) indicated that Medicare allowed approximately $1.1 billion more in 2001 than it should have for services that were billed as consultations. Approximately 75 percent of services paid as consultations did not meet all applicable program requirements (per the Medicare instructions) resulting in improper payments. The majority of these errors (47 percent of the claims reviewed) were billed as the wrong type or level of consultation. The second most frequent error was for services that did not meet the definition of a consultation (19 percent of the claims reviewed). The third category of improperly paid claims was a lack of appropriate documentation (9 percent of the claims reviewed). The OIG recommended that CMS, through our Medicare contractors, should educate physicians and other health care practitioners about Medicare criteria and proper billing for all types and levels of consultations with emphasis on the highest levels and follow-up inpatient consultation services.

We agreed with the OIG findings that additional education would help physicians understand the differences in the requirements for a consultation service from those for other E/M services. With each additional revision from 1999 until the OIG study began, we continually educated physicians through the guidance provided by our Medicare contractors. However, there remained discrepancies with unclear and ambiguous terms and instructions in the AMA CPT definition of a consultation, transfer of care and documentation, and the feedback from the physician community that indicated they disagreed with Medicare guidance.

Prior to the official publication of the OIG report, we issued a Medlearn Matters article, effective January 2006, to educate the physician community about requirements and proper billing for all types and levels of consultation services as requested by the OIG in their report. The Medlearn Matters article reflected the manual changes we made in 2006 and the AMA CPT coding changes as noted below. (This article and related documents can be accessed at *http://www.cms.hhs.gov/MLNMattersArticles/2005MMA/itemdetail.asp?filterType=none&filterByDID=-99&sortByDID=7&sortOrder=ascending&itemID=CMS053630&intNumPerPage=2000*.)

Our consultation policy revisions continued as a work-in-progress over several years as disagreements were raised by the physician community. We continued to work with AMA CPT coding staff in an attempt to have improved guidance for consultation services in the CPT coding definition. In looking at physician claims data (for example, the low usage of confirmatory consultation services) and in response to concerns from the physician community regarding how to correctly use the follow-up consultation codes, the AMA CPT Editorial Panel chose to delete some of the consultation codes for 2006. The Follow-Up Inpatient Consultation codes (CPT codes 99261 through 99263) and the Confirmatory Consultation codes (CPT codes 99271 through 99275) were deleted. During our ongoing discussions, the AMA CPT staff maintained that physicians did not fully understand the use of these codes and historically submitted them inappropriately for payment as was reflected in the OIG study.

We issued a manual revision in the Medicare Claims Processing Manual (at § 30.6.10 as cited above) simultaneously with the publication of AMA CPT 2006

coding changes removing the follow-up consultation codes, and instructed physicians to use the existing subsequent hospital care code(s) and subsequent nursing facility care codes for visits following a consultation service. The confirmatory consultation codes (which were typically used for second opinions) were also removed and we instructed physicians to use the existing E/M codes for a second opinion service. We further clarified the documentation requirements by making it easier to document a request for a consultation service from another physician and to submit a consultation report to the requesting professional. Again, physicians stated that a consultant has no control over what a requesting or referring physician writes in a medical record, and that they should not be penalized for the behavior of others. However, our consultation policy instructions apply to all physicians, whether they request a consultation or furnish a consultation. As noted above, documentation by both the requesting physician and the physician who furnishes the consultation is required under the E/M documentation guidelines. The E/M documentation guidelines have been in use since 1995. In our discussions with the AMA CPT staff and physician groups, and national physician open door conference calls, we have emphasized that the requesting physician medical record is not reviewed unless there is a specific audit or random sampling performed. The physician furnishing the consultation service should document in the medical record from whom a request is received.

We continue to hear from the AMA and from specific national physician specialty representatives that physicians are dissatisfied with Medicare documentation requirements and guidance that distinguish a consultation service from other E/M services such as transfer of care. CPT has not clarified transfer of care. Many physician groups disagree with our requirements for documentation of transfer of care. Interpretation differs from one physician to another as to whether transfer of care should be reported as an initial E/M service or as a consultation service.

Despite our efforts, the physician community disagrees with Medicare interpretation and guidance for documentation of transfer of care and consultation. The existing consultation coding definition in the AMA CPT definition has been ambiguous and confusing for certain clinical scenarios and without a clear definition of transfer of care. The CPT consultation codes are used by physicians and qualified NPPs to identify their services for Medicare payment. There has been an absence of any guidance in the AMA CPT consultation coding definition that distinguishes a transfer of care service (when a new patient visit is billed) from a consultation service (when a consultation service is billed). Although Medicare has provided guidance, there has continued to be disagreement with our policy from AMA CPT staff and some members of the physician community. Because of the disparity between AMA coding guidance and Medicare policy, some physicians have stated that they have difficulty in choosing the appropriate code to bill. The payment for both inpatient consultation and office/outpatient consultation services is higher than for initial hospital care and new patient office/outpatient visits. However, the associated physician work is clinically similar. Many physicians contend that there is more work involved with a new patient visit than a consultation service because of the post work involvement with a new patient. The payment for a consultation service has been set higher than for initial visits because a written report must be made to the requesting professional. However, all medically necessary Medicare services require documentation in some form in a patient's medical record. Over the past several years, some physicians have asked CMS to recognize the provision of the consultation report via a different form of communication in lieu of a written letter report to the requesting physician so as to lessen any paperwork burden on physicians. We have eased the consultation reporting requirements by lessening the required level of formality and permitting the report to be made in any written form of communication, (including submission of a copy of the evaluation examination taken directly from the medical record and submitted without a letter format) as long as the identity of the physician who furnished the consultation is evident. Although preparation and submission of the consultant's report is no longer the major defining aspect of consultation services, the higher payment has remained. (See the Internet-Only Medicare Claims Processing Manual, Pub. 100–04, chapter 12, § 30.6.10 F.)

Both AMA CPT coding rules and Medicare Part B payment policy have always required that there is only one admitting physician of record for a particular patient in the hospital or nursing facility setting. (AMA CPT 2009, Hospital Inpatient Services, Initial Hospital Care, p.12) This physician has been the only one permitted to bill the initial hospital care codes or initial nursing facility codes. All other physicians must bill either the subsequent hospital care codes, subsequent nursing facility care codes or consultation codes. (See the Internet-Only Medicare Claims Processing Manual, Pub. 100–04, chapter 12, § 30.6.9.1 G.)

Beginning January 1, 2008, we ceased to recognize office/outpatient consultation CPT codes for payment of hospital outpatient visits (72 FR 66790 through 66795). Instead, we instructed hospitals to bill a new or established patient visit CPT code, as appropriate to the particular patient, for all hospital outpatient visits. Regardless of all of our efforts to educate physicians on Medicare guidance for documentation, transfer of care, and consultation policy, disagreement in the physician community prevails.

b. Summary of CY 2010 Proposal

In the CY 2010 PFS proposed rule (74 FR 33551), we proposed, beginning January 1, 2010, to budget neutrally eliminate the use of all consultation codes (inpatient and office/outpatient codes for various places of service except for telehealth consultation G-codes) by increasing the work RVUs for new and established office visits, increasing the work RVUs for initial hospital and initial nursing facility visits, and incorporating the increased use of these visits into our PE and malpractice RVU calculations.

We noted that section 1834(m) of the Act includes ''professional consultations'' (including the initial inpatient consultation codes ''as subsequently modified by the Secretary'') in the definition of telehealth services. We recognize that consultations furnished via telehealth can facilitate the provision of certain services and/or medical expertise that might not otherwise be available to a patient located at an originating site. Therefore, for CY 2010, we proposed to create HCPCS codes specific to the telehealth delivery of initial inpatient consultations. The purpose of these codes would be solely to preserve the ability for practitioners to provide and bill for initial inpatient consultations delivered via telehealth. These codes are intended for use by practitioners when furnishing services that meet Medicare requirements relating to coverage and payment for telehealth services. Practitioners would use these codes to submit claims to their Medicare contractors for payment of initial inpatient consultations provided via

telehealth. The proposed HCPCS codes would be limited to the range of services included in the scope of the CPT codes for initial inpatient consultations, and the descriptions would be modified to limit the use of such services for telehealth. The HCPCS codes would clearly designate these as initial inpatient consultations provided via telehealth, and not initial hospital care or initial nursing facility care used for inpatient visits. Utilization of these codes would allow us to provide payment for these services, as well as enable us to monitor whether the codes are used appropriately.

We also stated that, if we create HCPCS G-codes specific to the telehealth delivery of initial inpatient consultations, then we would crosswalk the RVUs for these services from the RVUs for initial hospital care (as described by CPT codes 99221 through 99223). We believed this is appropriate because a physician or practitioner furnishing a telehealth service is paid an amount equal to the amount that would have been paid if the service had been furnished without the use of a telecommunication system. Since physicians and practitioners furnishing initial inpatient consultations in a face-to-face encounter to hospital inpatients must continue to utilize initial hospital care codes (as described by CPT codes 99221 through 99223), we believe it is appropriate to set the RVUs for the proposed inpatient telehealth consultation G-codes at the same level as for the initial hospital care codes.

We considered creating separate G-codes to enable practitioners to bill initial inpatient telehealth consultations when furnished to residents of SNFs and crosswalking the RVUs to initial nursing facility care (as described by CPT codes 99304 through 99306). For the sake of administrative simplicity, if we create HCPCS G-codes specific to the telehealth delivery of initial inpatient consultations, they will be defined in § 410.78 and in our manuals as appropriate for use to deliver care to beneficiaries in hospitals or skilled nursing facilities.

We stated in the CY 2010 PFS proposed rule that if we adopt this proposal, we would then make corresponding changes to our regulations at § 410.78 and § 414.65. In addition, we would add the definition of these codes to the CMS Internet-Only Medicare Benefit Policy Manual, Pub. 100–02, Chapter 15, Medicare Claims Processing Manual, Pub. 100–04, Chapter 12, Section 190.

Outside the context of telehealth services, physicians will bill an initial hospital care or initial nursing facility care code for their first visit during a patient's admission to the hospital or nursing facility in lieu of the consultation codes these physicians may have previously reported. The initial visit in a skilled nursing facility and nursing facility must be furnished by a physician except as otherwise permitted as specified in § 483.40(c)(4). In the nursing facility setting, an NPP who is enrolled in the Medicare program, and who is not employed by the facility, may perform the initial visit when the State law permits this. (See this exception in the Internet-Only Medicare Claims Processing Manual, Pub. 100–04, chapter 12, § 30.6.13 A). An NPP, who is enrolled in the Medicare program, is permitted to report the initial hospital care visit or new patient office visit, as appropriate, under current Medicare policy.

Because of an existing CPT coding rule and current Medicare payment policy regarding the admitting physician, we will create a modifier to identify the admitting physician of record for hospital inpatient and nursing facility admissions. For operational purposes, this modifier will distinguish the admitting physician of record who oversees the patient's care from other physicians who may be furnishing specialty care. The admitting physician of record will be required to append the specific modifier to the initial hospital care or initial nursing facility care code which will identify him or her as the admitting physician of record who is overseeing the patient's care. Subsequent care visits by all physicians and qualified NPPs will be reported as subsequent hospital care codes and subsequent nursing facility care codes.

We believe that the rationale for a differential payment for a consultation service is no longer supported because documentation requirements are now similar across all E/M services. To be consistent with OPPS policy, as noted above, we will pay only new and established office or other clinic visits under the PFS.

We proposed that this change would be implemented in a budget neutral manner, meaning it would not increase or decrease PFS expenditures. We proposed to make this change budget neutral for the work RVUs by increasing the work RVUs for new and established office visits by approximately 6 percent to reflect the elimination of the office consultation codes and the work RVUs for initial hospital and facility visits by approximately 2 percent to reflect the elimination of the facility consultation codes. We crosswalked the utilization for the office consultation codes into the office visits and the utilization of the hospital and facility consultation codes into the initial hospital and facility visits. We proposed that this change would be made budget neutral in the PE and malpractice RVU methodologies through the use of the new work RVUs and the crosswalked utilization.

We solicited comments on the proposal to eliminate payment for all consultation services codes under the PFS and to allow all physicians to bill, in lieu of a consultation service code, an initial hospital care visit or initial nursing facility care visit for their first visit during a patient's admission to the hospital or nursing facility. Additionally, we solicited comments on the proposal to create HCPCS G-codes to identify the telehealth delivery of initial inpatient consultations.

We received many comments on our proposal. MedPAC also commented on our proposal. The following is a summary of the comments we received regarding the discussion of the proposed changes to consultation services and our responses.

Comment: One commenter noted that ''there may be both advantages and disadvantages to this proposal,'' but urged that we refrain from finalizing it for January 1, 2010. The commenter expressed concerns about whether there would be sufficient time to educate physicians who currently employ the consultation codes in order to avoid ''a flood of claim denials and appeals.'' Other commenters raised similar concerns about whether there would be adequate time to educate physicians and billing personnel about the change and to assess the effects of the proposal.

Response: We agree that adoption of this proposal would call for appropriate measures to educate physicians and billing personnel about the change. However, we do not believe that the requisite educational efforts are extensive and complex enough as to warrant delaying implementation of the proposal. Essentially, the proposal would require physicians to cease submitting the consultation codes on their Medicare claims, and to employ the appropriate visit codes in their place. The determination of the appropriate visit code would be made solely on the basis of the existing rules and guidelines for the use of these codes, without any reference to the guidelines that have been employed for the use of the consultation codes. The guidelines for use of the visit codes are well established and well known and used by nearly all physicians. It is not necessary to develop any complicated coding crosswalk or guidelines for translating the consultation code

requirements for purposes of applying the visit codes. The major effects of the provision may actually simplify coding because physicians will use the office and hospital visit codes in place of consultations and will not have to determine whether the requirements to bill a consult are met. For these reasons, we believe the proposal should be implemented beginning January 1, 2010.

Comment: Some commenters urged delay or deferral of the proposal in order to allow time to determine whether the new CPT definition of ''transfer of care'' that goes into effect for 2010 would address concerns about the use of consultation codes. Other commenters stated more generally that the proposed change is not the appropriate way to resolve the confusion about using consultation codes versus patient visits.

Response: As we discussed in presenting our proposal, the confusion and disagreement about the proper use of the consultation codes have persisted for a long time. We discussed in detail our efforts over a period of years to clarify the guidelines and to resolve the persistent disagreements. As a result of this experience, we are skeptical that any further changes in guidelines or definitions would resolve these issues. We appreciate the efforts by the CPT committee to develop a new definition of transfer of care. However, we do not believe that this new definition will clarify all the ambiguities and resolve all the differences about the appropriate use of these codes.

As we stated when we implemented the PFS in 1992, one of our goals for the development of new visit and consultation codes was that they should be used reliably and consistently by all physicians and carriers, that is, that the same service should be coded the same way by different physicians. In addition, as we discussed in the CY 2010 PFS proposed rule, we believe that the confusion and disagreement about the use of the consultation codes have produced a situation in which that goal is far from being met.

As we also discussed in the proposed rule, we believe that a good deal of this confusion and disagreement arises from the use of terms such as referral, transfer, and consultation which are used sometimes interchangeably and sometimes inconsistently, by physicians in clinical settings.

The divergent interpretations and uses of these terms have served to confuse the meaning of a consultation service, as some label a transfer as a referral while others label a consultation as a referral. Even with the new definition of ''transfer of care,'' we foresee many clinical situations in which two physicians may not agree as to whether the referral was for consultation or transfer of care, and it may be difficult to resolve the issue based upon the conflicting interpretations reflected in the two physicians' medical records.

Comment: A number of commenters recommended a delay in order to develop alternative approaches on this issue. The commenters recommended that we revise the consultation codes or provide additional payments to physicians who provide thorough consultation reports to referring physicians.

Response: As we discussed in the proposed rule, we have considered numerous approaches to the issues posed by the use of the consultation codes over a period of years, and we have adopted some measures in an attempt to resolve those issues. We believe that, if there any other realistic and reasonable resolution to the issues surrounding the consultation codes, it would have emerged by now during the discussions that we have recounted above. The specific proposal mentioned by the commenter would have us pay more to physicians that provide thorough consultation reports to the referring physicians. However, we previously have tried to resolve the issues surrounding consultations in part by revising the documentation requirements, with the result that the documentation requirements for consultation codes have been reduced to the point where there is no longer a sufficient difference between the requirements for consultations and those for visits to justify a payment differential. The commenter's idea would have us return to increasing documentation requirements to receive higher payment for providing a thorough consultation report. We believe that any attempt to increase documentation requirements again to justify a payment differential will lead to objections from some physicians, and that it would be very difficult or impossible to define the requirements for a ''detailed report'' with sufficient precision to justify the provision of an additional payment.

Comment: Other commenters disagreed with our assessment that there is no substantial difference in work between consultations and visits. The commenters observed that consultations necessarily involve more complex cases that the referring physician is unable to treat. Furthermore, the commenters stated that these services require greater cognitive work and more complex medical decision making. Several commenters emphasized that consultation services required greater knowledge and expertise, acquired through additional training and experience, than is required for initial hospital and office visits. The preparation of a written report to the referring physician also requires additional time, regardless of the format in which the report is provided. One commenter expressed disagreement with our statement that ''the higher work value for consultations is entirely related to the provision of a written report to the requesting physicians.'' However, other commenters agreed with our assessment that there is no substantial difference in work between consultations and visits.

Response: To some degree, greater complexity and cognitive effort may be relative to the training and specialization of the physician. A case that presents clinical complexity and complex medical decision-making for one physician may be relatively simple and straightforward to another physician because of their repeated experience evaluating the same or similar problems. Evaluation and management services, although similar in the types of activities that occur during the encounter, may vary widely in the types of conditions being evaluated. The major difference between the work of a hospital or office visit and a consultation is that the patient has been referred to the consultant to obtain a specialized opinion. However, with the requirements lessened upon the consultant, the actual work done during the encounter with a patient for a consultation or an office or hospital visit has become harder to distinguish in terms of clinical complexity and medical decisionmaking. Further, many physicians contend that a new patient office visit may actually require more work than a consultation service because of the post work involvement with a new patient. As we discussed in the proposed rule, the documentation requirements for consultation services have been reduced to the point where it is difficult to justify a payment differential between consultations and new visits. Therefore, for these reasons, we support the view of those commenters who contend that in most cases, there is no substantial difference in work between consultations and visits.

Comment: Several commenters objected to the proposal on the grounds that it constitutes an unprecedented elimination of a set of CPT codes widely used by large numbers of physicians. Some commenters also stated that the proposal circumvents the CPT and AMA RUC processes.

Response: We do not agree that discontinuing the use of these codes for Medicare purposes is unprecedented. On the contrary, our proposal follows existing program precedent. As we noted in the proposed rule, beginning January 1, 2008, we ceased to recognize office/outpatient consultation CPT codes for payment of hospital outpatient visits (72 FR 66790 through 66795). Instead, we instructed hospitals to bill a new or established patient visit CPT code, as appropriate to the particular patient, for all hospital outpatient visits. We also do not believe that we have in any way circumvented the existing CPT and AMA RUC processes. We described in the CY 2010 PFS proposed rule the numerous attempts that we have made to resolve the relevant issues with AMA CPT staff. Despite all of our efforts to devise and implement relevant guidance, and educate physicians regarding documentation, transfer of care, and consultation policy, there is still substantial disagreement and inconsistency within the physician community regarding these issues.

Comment: Some commenters stated that the overall payment decreases that various specialists would face as a result of the proposed change are unwarranted.

Response: In making the proposal to eliminate use of the consultation codes under the PFS, it has not been our intention to increase or to decrease overall payments for any group or groups of physicians. Rather, our intent has been to provide for correct and consistent coding for services provided by physicians, as well as to provide for appropriate payment for the specific services that have been billed using the consultation codes, specifically, as well as the evaluation and management codes. It is in the nature of any budget neutral payment system for changes such as this to have a somewhat differential impact on various groups of providers and/or practitioners. In this particular case, we do not believe that these impacts are disproportionate to the goals we have sought to achieve in making and finalizing this proposal. It is important to keep in mind that, while elimination of the differential payment for consultation services will have a greater negative impact on some physician specialties than on others, all physicians will benefit from the budget neutral increase in the payment levels for the visit codes.

For more information on the impact of the changes in this rule, see section XIII. of this final rule with comment period.

Comment: Some commenters objected to our failure to increase the bundled payments for post-operative visits occurring over a 10-day or 90-day global period. For example, one major specialty society recommended extending the incremental work RVU increase to the E/M codes that are built into the 10-day and 90-day global codes. ''Arbitrarily changing the work RVUs for some E/M codes without adjusting the E/M components of other procedural codes undermines the relative value scale on which physician payment is based.'' The commenters otherwise supported the proposal, but strongly recommended that the global codes be increased for the sake of consistency. However, some other commenters who supported the proposal urged us to maintain this position in the final rule on the grounds that these services, by their very nature, were never billed as consultations.

Response: Payment for major surgeries includes bundled payment for the related post-operative visits occurring over a 10-day or 90-day global period. Historically, when payments for new and established office visits were increased after the third Five-Year Review, we also increased the bundled payments for these post-operative visits in the global period. However, we did not propose to increase the payments for the major surgeries to reflect the increase in the visits. We agree with those commenters who contended that consistency requires that we increase the bundled payments for these services proportionately in order to account for the increase in the visits that are incorporated into these bundles. We have accordingly increased the payments for those services in conjunction with finalizing our proposal to eliminate use of the consultation codes in the PFS. However, the increases in the payments for these services due specifically to this change are quite small because visits are a relatively small proportion of the total global payment amount.

Comment: A few commenters objected that we did not make available the crosswalk we used to relate the consultation codes to visit codes for purposes of ensuring BN. Other commenters expressed concerns about the assumptions we used in crosswalking the consultation codes to existing E/M codes. For example, one commenter stated that, for E/M services, a physician must consider three elements (extent of history obtained, extent of examination performed, and complexity of medical decision making) in determining the appropriate code level. However, for subsequent hospital care or hospital outpatient E/M services, only two of these three elements are necessary. In contrast, all three elements must be considered in determining the appropriate coding level for consultation services, both initial and follow-up consultations. There is no established patient visit code or subsequent hospital care code that adequately describes the work of consultation codes (CPT codes 99245 and 99255) when a patient is seen for follow-up consultation. One of these commenters noted that while there are five consultation codes, there are only three initial visit codes, and expressed concern that it would be difficult for physicians to accurately employ the visit codes for the services previously billed under the consultation codes. Another commenter observed that none of the E/M codes reflect the face-to-face times reflected in the highest level consultation codes (for example, 80 minutes for CPT code 99245 and 110 minutes for CPT code 99255). Still other commenters took issue with some elements of the destination mapping in our crosswalk, for example, the assumption that 50 percent of the cases represented as office consultation code (CPT code 99245) would be coded as a new patient office visit code (CPT code 99205), and 50 percent as an established patient office visit code (CPT code 99215).

Response: We made the relevant crosswalk available on our Web site at *http://www.cms.hhs.gov/PhysicianFeeSched/PFSFRN/itemdetail.asp?filterType=none&filterByDID=-99&sortByDID=4&sortOrder=descending&itemID=CMS1223902&intNumPerPage=10*.

As we have noted above, we did not develop that crosswalk for purposes of providing any guidelines or principles for using the visit codes in place of the consultation codes that physicians have employed prior to the implementation of this proposal. Rather, the crosswalk was developed solely for purposes of making the requisite BN calculations. For purposes of coding specific cases, adoption of this proposal will essentially require physicians to cease submitting the consultation codes on their Medicare claims, and to employ the appropriate visit codes in their place. The determination of the appropriate visit code should be made solely on the basis of the existing rules and guidelines for the use of the relevant visit codes (for example, office visit or inpatient visit), without any reference to the guidelines that have been employed for the use of the consultation codes. The guidelines for use of the visit codes are well established and well understood. Therefore, we do not believe that it is necessary to provide any coding

crosswalk or guidelines for translating the consultation code requirements into the appropriate visit codes. Commenters are correct that while there are five consultation codes, there are only three initial visit codes, that none of the E/M codes reflect the face-to-face times reflected in the highest level consultation codes, and various other differences between the two sets of codes. Nevertheless, it remains possible to determine the appropriate visit code for the services in question by applying the appropriate guidelines and requirements for using those codes. There are, for example, legitimate coding measures to take into account face-to-face times over and above the times specified in the relevant visit codes. Since we ordinarily refrain from providing coding advice in this context, we recommend that physicians, coders, and billing personnel consult the appropriate manuals and coding authorities about how to make the appropriate coding determinations for services previously coded under the consultation codes.

In crosswalking the codes for purposes of making the requisite BN calculations, we employed the same estimating techniques that we normally employ in such calculations. In the absence of concrete data on certain factors in the calculation, we also employed standard assumptions that are appropriate in a system based on averages. For example, office consultation CPT code 99245 was employed to report consultations provided to new *or* established patients in a physician's office or other ambulatory setting. For purposes of making the BN calculations, it was necessary to apportion the utilization of that code between the separate office visit codes for new patients (CPT code 99205) and established patients (CPT code 99215). In the absence of concrete data on the number of new and established patients reported under CPT 99245, we employed the standard technique of assuming that half the patients were new patients, and half the patients were established patients. Such an assumption minimizes the range of potential error and negative impacts in a system based of averages. Similarly, with respect to the new or established patient initial inpatient consultation codes such as CPT code 99251, it was necessary to apportion the utilization estimates between inpatient visits in a hospital setting and in nursing homes. In this case, we believe that there would be far fewer consultation visits in nursing homes than in the inpatient hospital setting. Therefore, we adopted a standard assumption that 70 percent of the cases would be in inpatient hospitals (CPT initial hospital inpatient visit code 99221) and 30 percent in nursing homes (CPT initial nursing care facility visit code 99304). We employed similar assumptions throughout the crosswalk.

Comment: Several commenters maintained that we had not adequately responded to the OIG report about the use of consultation codes prior to developing this proposal. These commenters noted that the majority of the billing errors detected by the OIG were created by lack of documentation and/or services that did not meet the definition of consultation, and that the OIG recommended education and outreach to physicians to reduce such errors. The commenters recommended that we not proceed with the proposal until we can demonstrate that education and outreach efforts cannot improve the situation.

Response: Prior to the official publication of the OIG report, we issued a Medlearn Matters article, effective January 2006, to educate the physician community about requirements and proper billing for all types and levels of consultation services as requested by the OIG in their report. The Medlearn Matters article reflected the manual changes we made in 2006 and the AMA CPT coding changes as noted below. We have also answered numerous questions and inquiries regarding the use of these codes at open door forums and other settings.

With each additional revision from 1999 until the OIG study began, we made repeated efforts to educate physicians through the guidance provided by, and through, our Medicare contractors. However, there were continued discrepancies with unclear and ambiguous terms and instructions in the AMA CPT consultation coding definition, transfer of care and documentation, and the feedback from the physician community indicated they disagreed with Medicare guidance. Despite our best, these disagreements and misunderstandings among the physician community with Medicare interpretations and guidance relating to documentation of transfer of care and consultation have continued.

Comment: A number of commenters expressed concern about the effects of this proposal on coordination of payment between CMS and other payers. The commenters believe that if other payers continue to recognize consultation codes, the result could be confusion, erroneous billings, and serious delays or even denials of payment.

Response: We do not have the authority to determine which services will be recognized and paid by other third party payers. Some payers may choose to adopt this policy subsequent to this final rule. In cases where other payers do not adopt this policy, physicians and their billing personnel will need to take into consideration that Medicare will no longer recognize consultation codes submitted on bills, whether those bills are for primary or secondary payment. In those cases where Medicare is the primary payer, physicians must submit claims with the appropriate visit code in order to receive payment from Medicare for these services. In these cases, physicians should consult with the secondary payers in order to determine how to bill those services in order to receive secondary payment. In those cases where Medicare is the secondary payer, physicians and billing personnel will first need to determine whether the primary payer continues to recognize the consultation codes. If the primary payer does continue to recognize those codes, the physician will need to decide whether to bill the primary payer using visit codes, which will preserve the possibility of receiving a secondary Medicare payment, or to bill the primary payer with the consultation codes, which will result in a denial of payment for invalid codes.

Comment: One commenter stated that we had not responded to several letters over the last few years requesting clarification of the confusion over consultation and transfer of care, and providing suggested language to clarify the confusion. In addition, the commenter stated that the agency has never responded to a request that the contractors suspend audits of consultation services pending resolution of the confusion.

Response: We have received many similar requests and suggestions regarding the confusion over consultation and transfer of care over many years. We have continuously discussed these issues in the appropriate forums, including proposed and final rules, manual instructions, Medlearn matters articles, and meetings of the AMA CPT Committee. We recounted this extensive history in the proposed rule. As for the status of audits of consultation services, we generally do not discuss the specific audit measures and priorities that we are currently pursuing. In general, the goal of medical review is to identify, through analysis of data and evaluation of other information, program vulnerabilities concerning coverage and coding made by individual providers and to take the

necessary action to prevent or address the identified vulnerabilities.

Comment: A few commenters stated that it was inconsistent to continue separate payment for consultation services under the telehealth benefit, but to discontinue them in other contexts in which physician services are provided. Some commenters also stated that discontinuing the consultation codes may be contrary to the statute. Specifically, section 1845(c)(5) of the Act, states:

> Coding.—The Secretary shall establish a uniform coding system for the coding of all physician services. The Secretary shall provide for an appropriate coding structure for visits and consultations. The Secretary may incorporate the use of time in the coding for visits and consultations. The Secretary, in establishing such coding system, shall consult with the Physician Payment Review Commission and other organizations representing physicians.

Response: We note that section 1845(c)(5) of the Act calls for the Secretary to provide for ''an appropriate coding structure for visits and consultations.'' We believe the use of the adjective ''appropriate'' indicates that the statute is granting the Secretary discretion to determine the structure of coding for these services. For the reasons given above and in our proposed rule, we believe that we are creating an appropriate coding structure for visits and consultations by employing a set of codes that accurately describes, and permits appropriate payment for, those services. We also note that discontinuing the use of the consultation codes does not imply discontinuing payment for consultation services, but only discontinuing the payment differential between consultations and visits. These services will continue to be reported, coded, and paid under the PFS. On the other hand, as we noted previously, section 1834(m) of the Act merely states that the definition of telehealth services includes ''professional consultations,'' and points to the initial inpatient consultation codes (''as subsequently modified by the Secretary'') as part of the coding structure for such services. We believe it is more consistent with legislative intent, as expressed in this provision, to retain the separate recognition of consultation services in the context of telehealth services. We believe that we have appropriately exercised the Secretary's discretion under section 1845(c)(5) of the Act in eliminating the consultation codes under the PFS, while at the same time respecting the legislative intent underlying section 1834(m) of the Act for separate recognition of consultation services in the context of telehealth.

Comment: MedPAC commented that the proposed change ''seems an appropriate policy response'' to the relaxation of documentation requirements. However, the Commission noted that:

> * * * reduced consultation documentation may not sufficiently meet the needs of the requesting physician, and thus not help achieve the goals and benefits of well-coordinated care. While CMS' proposed payment policy for consultation may be appropriate in the light of current practice, in the future, the agency may wish to consider whether to increase the requirements for consultations in order to better coordinate care and increase consultation payments commensurately.

Other commenters expressed similar concerns that the elimination of the consultation codes might financially discourage coordination of care and communication among physicians.

Response: We appreciate MedPAC's evaluation that our proposal has merit as a response to the reduction in the documentation requirements for consultation services. We also agree with MedPAC that promoting effective coordination of care must be an essential goal of our payment systems. However, we are not aware of any evidence that the reduced consultation documentation requirements are currently failing to sufficiently meet the needs of referring physicians, or that the benefits of effective coordination of care are otherwise not being realized as result of these reduced requirements. If we become aware of such evidence in the future, we would certainly consider whether there is an appropriate policy response to promote more effective coordination of care. It is, however, premature to consider what the appropriate responses might be until and unless specific evidence of an issue comes to our attention. Nevertheless, we will certainly be attentive to any concerns that develop about the effects of this policy on the goal of promoting effective coordination of care.

Comment: Many other commenters supported the proposal. The commenters agreed with us that the documentation requirements are now generally similar among consultation services, office visits, and hospital and facility visits. The commenters also agreed that the proposed change would simplify documentation and resolve the confusion surrounding the billing of consultation codes, ''transfer of care,'' and other matters.

Response: We appreciate the support of the commenters, and we continue to believe that the approach we proposed is the most appropriate policy response to the confusion, disagreement, and problems that have beset the use of the consultation codes under the PFS. Accordingly, we are adopting our proposal in this final rule.

Specifically, beginning January 1, 2010, we will eliminate the use of all consultation codes (inpatient and office/outpatient codes for various places of service except for telehealth consultation G-codes) on a budget neutral basis by increasing the work RVUs for new and established office visits, increasing the work RVUs for initial hospital and initial nursing facility visits, and incorporating the increased use of these visits into our PE and malpractice RVU calculations.

Since section 1834(m) of the Act includes ''professional consultations'' (including the initial inpatient consultation codes ''as subsequently modified by the Secretary'') in the definition of telehealth services, we will not eliminate the use of these codes in the telehealth context. Therefore, for CY 2010, we will create HCPCS codes specific to the telehealth delivery of initial inpatient consultations. Specifically, we are establishing the following HCPCS codes to describe initial inpatient consultations approved for telehealth:

- G0425, *Initial inpatient telehealth consultation, typically 30 minutes communicating with the patient via telehealth.*
- G0426, *Initial inpatient telehealth consultation, typically 50 minutes communicating with the patient via telehealth.*
- G0427, *Initial inpatient telehealth consultation, typically 70 minutes or more communicating with the patient via telehealth.*

The purpose of these codes is solely to preserve the ability for practitioners to provide and bill for initial inpatient consultations delivered via telehealth. These codes are intended for use by practitioners when furnishing services that meet Medicare requirements relating to coverage and payment for telehealth services. Practitioners will use these codes to submit claims to their Medicare contractors for payment of initial inpatient consultations provided via telehealth. The new HCPCS codes will be limited to the range of services included in the scope of the CPT codes for initial inpatient consultations, and the descriptions will limit the use of such services for telehealth. Utilization of these codes will allow us to provide payment for these services, as well as enable us to monitor whether the codes are used appropriately.

As we also stated in the CY 2010 PFS proposed rule, we will crosswalk the RVUs for these services from the RVUs for initial hospital care (as described by CPT codes 99221 through 99223). We believed this is appropriate because a physician or practitioner furnishing a telehealth service is paid an amount equal to the amount that would have been paid if the service had been furnished without the use of a telecommunication system. Since physicians and practitioners furnishing initial inpatient consultations in a face-to-face encounter to hospital inpatients must continue to utilize initial hospital care codes (as described by CPT codes 99221 through 99223), we believe it is appropriate to set the RVUs for the proposed inpatient telehealth consultation G-codes at the same level as for the initial hospital care codes. As we stated in the CY 2010 PFS proposed rule, we also will make corresponding changes to our regulations at § 410.78 and § 414.65. In addition, we will add the definition of these codes to the CMS Internet-Medicare Claims Processing Manual, Pub. 100–04, Chapter 12, Section 190.

Outside the context of telehealth services, physicians will bill an initial hospital care or initial nursing facility care code for their first visit during a patient's admission to the hospital or nursing facility in lieu of the consultation codes these physicians may have previously reported. The initial visit in a skilled nursing facility and nursing facility must be furnished by a physician except as otherwise permitted as specified in § 483.40(c)(4). In the nursing facility setting, an NPP who is enrolled in the Medicare program, and who is not employed by the facility, may perform the initial visit when the State law permits this. (See this exception in the Internet-Only Medicare Claims Processing Manual, Pub. 100–04, chapter 12, § 30.6.13 A). An NPP, who is enrolled in the Medicare program is permitted to report the initial hospital care visit or new patient office visit, as appropriate, under current Medicare policy. Because of an existing CPT coding rule and current Medicare payment policy regarding the admitting physician, we will create a modifier to identify the admitting physician of record for hospital inpatient and nursing facility admissions. For operational purposes, this modifier will distinguish the admitting physician of record who oversees the patient's care from other physicians who may be furnishing specialty care. The admitting physician of record will be required to append the specific modifier to the initial hospital care or initial nursing facility care code which will identify him or her as the admitting physician of record who is overseeing the patient's care. Subsequent care visits by all physicians and qualified NPPs will be reported as subsequent hospital care codes and subsequent nursing facility care codes.

As proposed, this change will be implemented in a budget neutral manner, meaning that it will not increase or decrease aggregate PFS expenditures. We will make this change budget neutral for the work RVUs by increasing the work RVUs for new and established office visits by approximately 6 percent to reflect the elimination of the office consultation codes and the work RVUs for initial hospital and facility visits by approximately 0.3 percent to reflect the elimination of the facility consultation codes. As discussed above, in this final rule we are also increasing the incremental work RVUs for the E/M codes that are built into the 10-day and 90-day global surgical codes. As we did for the CY 2010 PFS proposed rule, we have crosswalked the utilization for the office consultation codes into the office visits and the utilization of the hospital and facility consultation codes into the initial hospital and facility visits. And, as we proposed, this change will be made budget neutral in the PE and malpractice RVU methodologies through the use of the new work RVUs and the crosswalked utilization.

F. Potentially Misvalued Services Under the Physician Fee Schedule

1. Valuing Services Under the Physician Fee Schedule

As explained in the CY 2010 PFS proposed rule (74 FR 33554), the American Medical Association's (AMA) Relative Value System Update Committee (RUC) provides recommendations to CMS for the valuation of new and revised codes, as well as codes identified as misvalued. On an ongoing basis, the AMA RUC's Practice Expense (PE) Subcommittee reviews direct PE (clinical staff, medical supplies, medical equipment) for individual services and examines the many broad and methodological issues relating to the development of PE relative value units (RVUs).

To address concerns expressed by stakeholders with regard to the process we use to price services paid under the PFS, the AMA RUC created the Five-Year Review Identification Workgroup. As we stated in the CY 2009 PFS proposed rule (73 FR 38582), the workgroup identified some potentially misvalued codes through several vehicles. It focused on codes for which there have been shifts in the site of service (site of service anomalies), codes with a high intra-service work per unit of time (IWPUT), high volume codes, new technology designation, and shifts from practice expense to work. We also identified other methods that the AMA RUC could undertake to assist in identifying potentially misvalued services including reviewing the fastest growing procedures, Harvard-valued codes, and practice expense RVUs. There were 204 potentially misvalued services identified in 2008.

We believe that there are additional steps we can take to address the issue of potentially misvalued services. In the CY 2009 PFS proposed rule, we identified approaches to address this issue including reviewing services often billed together and the possibility of expanding the multiple procedure payment reduction (MPPR) to additional nonsurgical procedures and the update of high cost supplies.

Comment: We received several comments concerning the misvalued code initiative. One commenter, representing a physician specialty organization, expressed concern about the ongoing misuse of intraservice work per unit of time (IWPUT) as a means to determine appropriate work values. The commenter states that IWPUT was never intended to compare intensity or work across specialties and was to be used only as a measure of relativity between codes or in families of codes. Commenters also expressed concern about the need for transparency concerning the development of values for codes, including the review of PE inputs; the need for CMS to consider the underlying reasons why utilization for certain services may increase; and the economic and public health implications of appropriate valuation of services. A commenter also recommended that the agency become more proactive in identifying problematic trends in utilization and in re-evaluating new technology. The commenter recognized that additional resources would be needed and acknowledged that the Congress may need to ensure adequate resources are available but believes that such an investment could result in lower overall costs in the system over the long-term.

Response: We thank the commenters for sharing their concerns and will consider them as we continue examining the valuation of services under the misvalued code initiative.

We also share some the concerns expressed by the commenter with regards to IWPUT, which is a

calculation that was used as the primary tool to value physician services for some codes during the third Five-Year Review. This calculation poorly assesses intensity for services that are short in time duration and also services that are short in time duration and of high intensity. The IWPUT has also been used to align procedures within a family of codes. It has value in some instances, such as in validating the RVUs for a given procedure using the building block methodology. However, the IWPUT has not proven to be a valuable tool in evaluating or validating cognitive services. The building block methodology is the accepted methodology used by the AMA RUC and CMS for valuing all physician procedures and services. We believe that the building block methodology should be consistently used when the AMA RUC considers valuation of physician services for its recommendations.

2. High Cost Supplies

In the CY 2010 PFS proposed rule (74 33554), we referenced our CY 2009 PFS proposal concerning updating prices for high cost supplies (73 FR 38582) and (73 FR 69882), and stated that we are continuing to examine alternatives on the best way to obtain accurate pricing information and will propose a revised process in future rulemaking.

The following is a summary of the comments received to date regarding high cost supplies and our response.

Comment: Several commenters expressed support for this initiative. A few commenters were disappointed that we did not propose any new methodologies in the CY 2010 PFS proposed rule.

Commenters were in agreement that we must ensure accurate pricing of supplies, as the cost of supplies plays an important role in the payment calculation for services under the PFS.

Commenters also offered the following suggestions for pricing high cost supplies including:

- Identify high cost disposable supplies (that is, over $200) with separate HCPCS codes;
- Use the supply pricing methodology used by the Veterans Administration;
- Work with specialty societies to obtain invoices for high priced items from a designated group of physicians that are geographically representative; and
- Work with the industry or physicians directly to get current pricing information.

MedPAC stated it is important for us to update the prices of higher priced supplies on a regular basis as inaccurate prices can distort PE RVUs over time. MedPAC believes that prices drop over time as items diffuse through the market and as other companies begin to produce them, and encouraged us to regularly update information.

A few commenters also recommended that any pricing proposal should be available for public comment through future rulemaking, possibly on an annual basis. This would enable stakeholders to evaluate and provide feedback to the agency on pricing accuracy as well as practical availability of the item itself.

Response: We want to thank the commenters for sharing their suggestions and will take these comments into consideration as we explore the best way to address this issue.

3. Review of Services Often Billed Together and the Possibility of Expanding the Multiple Procedure Payment Reduction (MPPR) to Additional Nonsurgical Procedures

In the CY 2009 PFS final rule with comment period (73 FR 69882), we stated that we planned to perform a data analysis of nonsurgical CPT codes that are often billed together. We stated that we would identify whether there are inequities in PFS payments that are a result of variations between services in the comprehensiveness of the codes used to report the services or in the payment policies applied to each (for example, global surgery and MPPRs). The rationale for the MPPR is that certain clinical labor activities, supplies, and equipment are not performed or furnished twice when multiple procedures are performed. The MPPR currently applies to certain diagnostic and surgical procedures (73 FR 38586). We stated that we would consider developing a proposal either to bundle more services or expand application of the MPPR to additional procedures. Additionally, the Medicare Payment Advisory Committee (MedPAC) requested that we consider duplicative physician work and PE in any expansion of the MPPR.

In the CY 2010 PFS proposed rule (74 FR 33554), we stated that we planned to analyze codes furnished together more than 75 percent of the time, excluding E/M codes. We also stated that we planned to analyze both physician work and PE inputs. If duplications are found, we said that we would consider whether to propose to implement an MPPR or to bundle the services involved. We stated that we would propose any changes through future rulemaking.

Comment: Several commenters did not support the analysis of codes furnished together more than 75 percent of the time. The commenters stated that limiting the review to codes performed together 90 to 95 percent of the time was more appropriate. A few commenters suggested that 75 percent should not be the only criterion we use when considering whether to implement an MPPR or bundle services. Some commenters requested that we postpone our review of services that are often billed together and rely on the work that is being done in this area by the AMA RUC. The commenters believe that the work the AMA RUC is doing will be informative regarding which services should be considered in the future in determining whether to propose to expand the MPPR or to bundle services. The AMA RUC stated that it wants to work with CMS to accurately assess these services.

A few commenters generally supported the analysis of codes furnished together more than 75 percent of the time. One commenter stated that almost all imaging procedures and equipment have become more efficient in recent years allowing more procedures in a given time.

Most commenters were in agreement that this policy should not be expanded until CMS has additional data and there is an opportunity for public comment through future rulemaking.

Response: We appreciate the comments received and will consider these comments as we explore the best way to address this issue. We also look forward to working with the AMA RUC to accurately assess these services.

4. AMA RUC Review of Potentially Misvalued Codes

a. Site of Service

In the CY 2009 PFS final rule with comment period (73 FR 69883), we said that although we would accept the AMA RUC valuation for these site of service anomaly codes for 2009, we indicated that we had concerns about the methodology used by the AMA RUC to review these services because they may have resulted in removal of hospital days and deletion or reallocation of office visits without extraction of the associated RVUs from the valuation of the code. We also stated that we would continue to examine these codes and would consider whether it would be appropriate to propose additional changes in future rulemaking.

In the CY 2010 PFS proposed rule (74 FR 33554), we proposed work RVU changes to several of the codes where the valuation had been adjusted to

reflect changes in the site of service but the RVUs had not been extracted by the AMA RUC. The proposed work RVUs were recalculated based upon the AMA RUC-recommended inputs (that is, changes in pre-service and post-service times and associated E/M services). The proposed work RVUs for each CPT code were recalculated using the pre-AMA RUC review work RVUs as a starting point, and adjusted for the addition or extraction of pre-service and post-service times, inpatient hospital days, discharge day management services and outpatient visits as recommended by the AMA RUC.

In addition to the proposed revisions to the AMA RUC-recommended RVUs, we encouraged the AMA RUC to utilize the building block methodology as described in the CY 2007 PFS proposed rule (71 FR 37172) in the future when revaluing codes with site of service anomalies. We recognized that the AMA RUC looks at families of codes and may assign RVUs based on a particular code ranking within the family. However, we stated that we believed that the relative value scale requires each service to be valued based on the resources used in furnishing the service.

We also sought public comment on alternative methodologies that could be used to establish work RVUs for codes that would have a negative valuation under the methodology we utilized to develop proposed revisions to the AMA RUC-recommended values described above.

The following is summary of the comments we received regarding the proposed revisions to the codes with site of service anomalies.

Comment: Some commenters supported CMS' attempt to account for recognized changes in physician work for certain procedures in which the typical site of service has changed. However, other commenters opposed the proposed work RVUs and found the methodology unclear and problematic since some cases resulted in negative work values. Many commenters recommended the acceptance of the AMA RUC recommended values and encouraged CMS to work with them to develop a clearer methodology.

Response: As a result of the comments, we are not finalizing our proposal to change the work RVUs for codes with site of service anomalies that were included in Table 8 of the CY 2010 proposed rule (74 FR 33555). Although we still have concerns about the methodology used by the AMA RUC to review the services, we are accepting the AMA RUC-recommended work RVUs in the interim and request that the AMA RUC utilize the building block methodology to revalue the services listed in Table 4.

TABLE 4—CY 2010 CMS INTERIM WORK RVUS FOR SITE OF SERVICE ANOMALIES REVIEWED BY THE AMA RUC IN CY 2009

CPT code [1]	Descriptor	2009 AMA RUC recommended work RVU	CMS decision	2010 CMS interim work RVU [2]

64708	Revise arm/leg nerve	6.22	Agree	6.36
64831	Repair of digit nerve	9.00	Agree	9.16
65285	Repair of eye wound	14.43	Agree	14.71

[1] All CPT codes copyright 2009 American Medical Association.

[2] 2010 CMS Interim Work RVUs may differ from AMA RUC-recommended work RVU due to work increases in 10 and 90 day global codes as a result of the elimination of the consultation codes.

b. ''23-Hour'' Stay

Services that are performed in the hospital outpatient setting and require a stay of less than 24 hours are considered outpatient services. We received recommendations from the AMA RUC for inclusion of inpatient services for services that are typically performed in an outpatient setting.

In the 2010 PFS proposed rule (74 FR 33556), we stated that we believed the use of E/M codes for services rendered in the post-service period for procedures requiring less than a 24-hour hospital stay would result in overpayment for pre- and post-service work that would not be provided. Therefore, we stated that we would not allow an additional E/M service to be billed for care furnished during the post procedure period when care is furnished for an outpatient service requiring less than a 24-hour hospital stay.

The following is summary of the comments we received regarding the proposed revisions to the ''23-Hour'' stay.

Comment: The majority of commenters disagreed with CMS'

proposal because they believed it would result in surgeons not being paid for the work they perform. Commenters urged CMS to engage in a discussion at CPT and/or the AMA RUC regarding alternative E/M coding solutions.

Response: As a result of the comments, we are not finalizing our proposal and will work with CPT and the AMA RUC regarding alternative E/M coding solutions to address our concerns about using inpatient hospital visit codes as a proxy for the work being performed.

c. AMA RUC Review of Potentially Misvalued Codes for CY 2010

We are addressing the AMA RUC's recommendations from the February and April 2009 meetings for potentially misvalued codes in this final rule with comment period in a manner consistent with the way we address other AMA RUC recommendations. Specifically, we completed our own review of the AMA RUC recommendations and we describe the AMA RUC's recommendations, indicate whether or not we accept them, and provide a rationale for our decision in this final rule with comment period. The values for these services are interim values for the next calendar year.

The AMA RUC continued its review of potentially misvalued codes using various screens, including codes with site of anomalies, high IWPUT, high volume, fastest growing procedures, and other CMS requests. For CY 2010, the AMA RUC submitted recommendations for 113 codes. Of those codes 1 was recommended for a reduction in valuation; 7 were recommended for an increase in valuation; 11 were recommended to maintain the same valuation; 45 were referred to CPT for further code clarification, 33 were recommended for PE changes and 16 were recommended for clinical labor revisions.

We have agreed to accept the valuation for these codes for CY 2010 as interim, including the conforming changes to the PE inputs for these codes, as applicable with the exception of CPT 92597, *Evaluation for use and/or fitting of voice prosthetic device to supplement oral speech.* With the enactment of the MIPPA, speech-language pathologists were able to bill the Medicare program independently as private practitioners effective July 1, 2009. In response, speech-language pathologists requested that the AMA RUC value the work of certain codes. Previously, the work of the speech-language pathologists had been accounted for and paid under the PE component for these codes. CPT code 92597 was evaluated by the AMA RUC, after which the AMA RUC recommended a work RVU of 1.48 based upon a survey that included speech-language pathologists and otolaryngologists, the most frequent providers of the service. The work description for CPT code 92597 includes initial fitting of a prosthesis. The code descriptor for CPT code 31611, *Construction of tracheoesophageal fistula and subsequent insertion of an alaryngeal speech prosthesis (eg, voice button, Blom-Singer prosthesis),* with a work RVU of 5.92 also includes insertion or fitting of a speech prosthesis. Otolaryngologists perform this service a majority of the time. It appears that both codes include fitting a prosthesis and that there is an overlap of work between CPT codes 92597 and 31611. To account for the overlap of work between these two codes, for CPT code 92597 we have assigned a work RVU value at the 25th percentile, 1.26 work RVUs. We note that the work RVU for CPT code 31611 may not have been reviewed by the RUC since 1995. We invite the RUC to review these two codes and any others for which work may overlap.

We continue to have concerns about the methodology used by the AMA RUC to review services with site of service anomalies. We request that the AMA RUC utilize the building block methodology to revalue these services.

The AMA RUC also recommended that we review claims data for CPT codes 76970, *Ultrasound study follow-up (specify),* 94450, *Breathing response to hypoxia (hypoxia response curve),* 94014, *Patient-initiated spirometric recording per 30-day period of time; includes reinforced education, transmission of spirometric tracing, data capture, analysis of transmitted data, periodic recalibration and physician review and interpretation,* 94015, *Patient-initiated spirometric recording per 30-day period of time; recording (includes hook-up, reinforced education, data transmission, data capture, trend analysis, and periodic recalibration)* and 94016, *Patient-initiated spirometric recording per 30-day period of time; physician review and interpretation only.* We will take the AMA RUC's suggestions under consideration and further investigate these claims.

5. PE Issues—Arthoscopy

Previously, the AMA RUC recommended that an arthoscopic procedure (CPT code 29870, *Arthroscopy, knee, diagnostic, with or without synovial biopsy (separate procedure*)) not be valued in the non-facility setting because they believed the procedure was unsafe to perform outside of the facility setting. In the CY 2008 PFS final rule (72 FR 66238), we deferred proposing non-facility inputs for these types of procedures. We stated that the physicians performing arthroscopic services in the non-facility setting should be given the opportunity to have a multi-specialty review by the AMA RUC.

Comment: We have received many inquiries about why CPT code 29870 was not valued in the non-facility setting. For CY 2010, in response to a request from CMS, the AMA RUC has recommended PE inputs for CPT code 29870.

Response: We accept the AMA RUC's recommended PE inputs for this procedure and are valuing this code in the non-facility setting.

6. Establishing Appropriate Relative Values for Physician Fee Schedule Services

In MedPAC's March 2006 Report to Congress, MedPAC made a number of recommendations to improve the review of the relative values for PFS services. Since that time, we have taken significant actions to improve the accuracy of the RVUs. As MedPAC noted in its recent March 2009 Report to Congress, ''CMS and the AMA RUC have taken several steps to improve the review process'' in the intervening years since those initial recommendations. Many of our efforts to improve the accuracy of RVUs have also resulted in substantial increases in the payments for primary care services.

The original March 2006 recommendation was summarized in the March 2008 Report to Congress:

> We also recommended that CMS establish a group of experts, separate from the AMA RUC, to help the agency conduct these and other activities. This recommendation was intended not to supplant the AMA RUC but to augment it. To that end, the panel should include members who do not directly benefit from changes to Medicare's payment rates, such as experts in medical economics and technology diffusion and physicians who are employed by managed care organizations and academic medical centers.

The idea of a group of experts separate from the AMA RUC, to help the agency improve the review of relative values, raises a number of issues. In the proposed rule, we solicited input on specific points concerning the creation of such a group, including:

- How could input from a group of experts best be incorporated into existing processes of rulemaking and agency receipt of AMA RUC recommendations?
- What specifically would be the roles of a group of experts (for example, identify potentially misvalued services, provide recommendations on valuation of specified services, review AMA RUC recommendations selected by the Secretary, etc.)?
- What should be the composition of a group of experts? How could such a group provide expertise on services that clinician group members do not furnish?
- How would such a group relate to the AMA RUC and existing Secretarial advisory panels such as the Practicing Physician Advisory Committee?

We also requested comments on the resources required to establish and maintain such a group. We stated that we would consider these comments as we consider the establishment of a group of experts to assist us in our ongoing reviews of the PFS RVUs.

Comments: We received comments from many organizations, specialty societies, and groups, including the AMA, the AMA RUC, and MedPAC concerning the creation of a group of experts.

Some commenters expressed support of such a panel. The commenters offered suggestions concerning its establishment and operations. The commenters stated that adequate resources and funding would be needed. The commenters viewed the panel as a vehicle to independently assess the AMA RUC recommendations. Several commenters stressed the importance of including consumers or purchasing representatives on such a panel and that the current process is too narrowly focused on resource costs. Commenters stated there is a need to restructure the payment system so that it appropriately values coordinated care delivery, encourages appropriate use of services, and rewards value and not volume.

Other commenters opposed creation of such a panel. The commenters stated that the current process has been successful, is transparent, and the rulemaking process provides additional oversight of the AMA RUC's recommendations. The commenters also stated that the AMA RUC has the technical knowledge and objective judgment to assist CMS in maintenance of the RVUs and that a superimposed panel would lack its insight. Commenters also stated that the addition of a separate group would increase demands on CMS; create coordination problems; and would be fiscally unsound and imprudent. Commenters noted that CMS and the AMA RUC have made strides in the misvalued codes initiative. Some of the commenters suggested that we consider enhancing the existing refinement panel process used to address the comments received on interim work RVUs (see section III for additional information on this process). Some commenters expressed concern that the refinement panels have not been adequately developed and that there is a lack of transparency.

MedPAC stated there are valid reasons that a panel should be established. It stated that CMS needs a regular source of expertise available to assist in valuing services and that such expertise is not solely the domain of the AMA RUC.

Response: We appreciate all of the comments and suggestions provided regarding the creation of a group of experts. We will take these comments into consideration as we continue to explore this issue.

We also appreciate the comments raised concerning the existing refinement panel process. Any revisions to this process would be discussed in future rulemaking.

G. Issues Related to the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA)

This section addresses certain provisions of the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) (Pub. L. 110–275). We proposed to revise our policies and regulations as described below in order to conform them to the statutory amendments.

1. Section 102: Elimination of Discriminatory Copayment Rates for Medicare Outpatient Psychiatric Services

Prior to the enactment of the MIPPA, section 1833(c) of the Act provided that for expenses incurred in any calendar year in connection with the treatment of mental, psychoneurotic, and personality disorders of an individual who is not an inpatient of a hospital, only 62½ percent of such expenses are considered to be incurred under Medicare Part B when determining the amount of payment and application of the Part B deductible in any calendar year. This provision is known as the outpatient mental health treatment limitation (the limitation), and has resulted in Medicare paying only 50 percent of the approved amount for outpatient mental health treatment, rather than the 80 percent that is paid for most other outpatient services.

Section 102 of the MIPPA amends the statute to phase out the limitation on recognition of expenses incurred for outpatient mental health treatment, which will result in an increase in the Medicare Part B payment for outpatient mental health services to 80 percent by CY 2014. When this section is fully implemented in 2014, Medicare will pay for outpatient mental health services at the same level as other Part B services. For CY 2010, section 102 of the MIPPA provides that Medicare will recognize 68¾ percent of expenses incurred for outpatient mental health treatment, which translates to a payment of 55 percent of the Medicare-approved amount. Section 102 of the MIPPA specifies that the phase out of the limitation will be implemented as shown in Table 6 provided that the patient has satisfied his or her deductible.

TABLE 6—IMPLEMENTATION OF SECTION 102 OF THE MIPPA

Calendar year	Recognized incurred expenses	Patient pays	Medicare pays
CY 2009 and prior calendar years	62.50%	50%	50%
CY 2010 and CY 2011	68.75%	45%	55%
CY 2012	75.00%	40%	60%
CY 2013	81.25%	35%	65%
CY 2014	100.00%	20%	80%

At present, § 410.155(c) of the regulations includes examples to illustrate application of the current limitation. We proposed to remove these examples from the regulations and, instead, provided examples in the CY 2010 PFS proposed rule (74 FR 33521), in our manual, and under provider education materials as needed. (See the CY 2010 PFS proposed rule (74 FR 33557) for the examples illustrating the application of the limitation in various circumstances as it is gradually reduced under section 102 of the MIPPA.) Section 102 of the MIPPA did not make any other changes to the outpatient mental health treatment limitation. Therefore, other aspects of the limitation will remain unchanged during the transition period between CYs 2010 and 2014. The limitation will continue to be applied as it has been in accordance with our regulation at § 410.155(b) which specifies that the limitation applies to outpatient treatment of a mental, psychoneurotic, or personality disorder, identified under the International Classification of Diseases (ICD) diagnosis code range 290–319. We use this ICD diagnosis code range, place of service code, and the procedure code to identify services to which the limitation applies.

Additionally, we proposed to make technical corrections to § 410.155(b)(2) in order to update and clarify the services already under these regulations to which the limitation does not apply. We proposed the following technical changes:

- Under § 410.155(b)(2)(ii), revise the regulation to specify the HCPCS code, M0064 (or any successor code), that represents the statutory exception to the limitation for brief office visits for the sole purpose of monitoring or changing drug prescriptions used in mental health treatment.
- At § 410.155(b)(2)(iv), we proposed to revise the regulation to add neuropsychological tests and diagnostic psychological tests to the examples of diagnostic services that are not subject to the limitation when performed to establish a diagnosis.
- Under § 410.155(b)(2)(v), we proposed to revise the regulation to specify the CPT code 90862 (or any successor code) that represents pharmacologic management services to which the limitation does not apply when furnished to treat a patient who is diagnosed with Alzheimer's disease or a related disorder.

Finally, we proposed to add a new paragraph (c) to § 410.155 that provides a basic formula for computing the limitation during the phase-out period from CY 2010 through CY 2013, as well as after the limitation is fully removed from CY 2014 onward.

The following is a summary of the comments we received regarding the proposed implementation of section 102 of the MIPPA.

Comment: All of the comments on section 102 of the MIPPA support the enactment by the Congress and implementation by CMS of this provision that will eventually achieve parity in payment for outpatient mental health services under the Medicare Part B program with the program's payment for other outpatient services. Most of the commenters describe the limitation as discriminatory and inequitable, and believe that it should have been eliminated a long time ago. The majority of the commenters believe that the elimination of the limitation will increase access to outpatient mental health services in the Medicare population. Therefore, elimination of the limitation will have a positive impact on Medicare beneficiaries because they will have to pay less out-of-pocket. Also, commenters believe that physicians and other providers of outpatient mental health care will be ''held harmless'' with respect to this change because, although they will collect less from the patient, they will ultimately be able to collect from the program the full Medicare approved amount for outpatient mental health services. The commenters that embrace our proposal to implement section 102 of the MIPPA, request that we maintain our proposal in the final rule, and encourage CMS to finalize section 102 of the MIPPA in a timely fashion.

Response: We appreciate the supportive comments received on our proposal to implement section 102 of the MIPPA and the encouragement to finalize our proposal. Also, we are grateful for the offerings made by a few commenters to assist in educating the provider community about section 102 of the MIPPA.

Comment: One commenter opposed two of our technical corrections to current regulations on the limitation at § 410.155(b)(2) and provided suggested changes. Specifically, under § 410.155(b)(2)(iv), we proposed to insert neuropsychological tests along with diagnostic tests that are performed to establish a diagnosis as diagnostic services that are not subject to the limitation. While this commenter has no issue with including neuropsychological tests, the commenter believes that a complete list of services would include outpatient consultation codes, all outpatient new patient and initial visit evaluation and management (E/M) codes, and the psychiatric diagnostic and evaluation interview codes (90801 and 90802). Accordingly, the commenter believes that if we expand the list of identified services not subject to the limitation by inserting neuropsychological tests only, without including the complete listing of services, we could be subjecting services inappropriately to the limitation.

On this particular technical correction, another commenter suggested that we should consider including a definition of ''diagnostic services'' to provide further guidance to the field on this issue.

The other technical correction that the commenter opposed is the provision under § 410.155(b)(2)(v) that lists medical management services billed under CPT code 90862 (or its successor code), as opposed to psychotherapy, as not being subject to the limitation when furnished to treat a patient who is diagnosed with Alzheimer's disease or a related disorder. The commenter believes that medical management services are not limited to those billed under CPT code 90862, but also

includes E/M of a patient with a mental illness using the outpatient E/M codes (CPT codes 99211 through 99215), and in a nursing facility, the subsequent nursing facility care E/M CPT codes (CPT codes 99307 through 99310). Hence, this commenter suggests that the proposed technical correction would unnecessarily and improperly limit the exception to only those instances when CPT code 90862 is billed. This commenter urged that the exception to the limitation for the treatment of a patient who is diagnosed with Alzheimer's disease or a related disorder should continue to include all non-psychotherapy services. Accordingly, this commenter suggested that the current language under regulations should be retained or that new language clarify that any outpatient service including CPT code 90862, E/M codes, and any other non-psychotherapy service provided to a patient with Alzheimer's disease or a related condition is not subject to the limitation.

One commenter who supports our implementation of the MIPPA provision commented that it is appropriate to update the list of services to which the limitation does not apply by specifying HCPCS code M0064, neuropsychological tests and diagnostic psychological tests, as well as CPT code 90862 when reporting services provided to a patient with Alzheimer's disease or a related disorder.

Response: The intent of our technical corrections to § 410.155 was to clarify, not to expand, our current policy. We intended to amend the existing regulations in a way that would update and clarify the already stated policy. Diagnostic psychological and neuropsychological tests are diagnostic services that are excluded from the limitation when performed to establish a diagnosis. The neuropsychological test codes were established years after the CPT codes for diagnostic psychological tests and that is why the reference to neuropsychological tests had not been included under current regulations. Additionally, in the context of psychiatric mental health services, the specific diagnostic services for which we have national policy regarding the limitation are the psychiatric diagnostic services under CPT codes 90801 and 90802, and, the CPT codes for diagnostic psychological and neuropsychological testing. In the absence of national policy concerning application of the limitation to diagnostic services billed under the outpatient consultation codes or the outpatient new patient and initial visit E/M codes, contractors use their discretion in making decisions about whether the limitation should be applied to such services under a variety of circumstances. To list these additional outpatient consultation and E/M codes as suggested by the commenter would represent an expansion of the current regulatory exception at § 410.155(b)(2)(iv).

However, we believe that if we revise the wording under § 410.155(b)(2)(iv) to specify that *psychiatric* diagnostic services billed under CPT codes 90801 and 90802 (or successor codes) and diagnostic psychological and neuropsychological tests billed under CPT code range 96101 through 96125 (or any successor code range) that are performed to establish a diagnosis are not subject to the limitation, we will address the commenter's concerns. Also, such a change will provide the field with specific guidance on our definition of ''diagnostic services'' in terms of mental health services.

We agree with the commenter that our technical correction to § 410.155(b)(2)(v) might have been read to restrict application of the exception to CPT code 90862. We will refrain from addressing specifically in the regulation outpatient E/M codes or nursing facility E/M codes. Rather, we will continue to leave in the hands of our contractors decisions as to whether the exception applies for these codes under particular circumstances. We have provided policy guidance to our contractors that medical management services furnished under CPT code 90862 to treat a patient diagnosed with Alzheimer's disease or a related disorder are not subject to the limitation. Therefore, we believe it is consistent with current national policy to amend the regulatory exception under § 410.155(b)(2)(v) to read, ''medical management such as that furnished under CPT code 90862 (or its successor code), as opposed to psychotherapy, furnished to a patient diagnosed with Alzheimer's disease or a related disorder.''

We received comments on issues that are outside the scope of our proposals for section 102 of MIPPA. These comments are not addressed in this final rule with comment.

2. Section 131: Physician Payment, Efficiency, and Quality Improvements—Physician Quality Reporting Initiative (PQRI)

a. Program Background and Statutory Authority

The Physician Quality Reporting Initiative (PQRI) is a voluntary reporting program that provides an incentive payment to eligible professionals who satisfactorily report data on quality measures for covered professional services during a specified reporting period. Under section 1848(k)(3)(B) of the Act, the term ''eligible professional'' means any of the following a: (1) physician; (2) practitioner described in section 1842(b)(18)(C); (3) physical or occupational therapist or a qualified speech-language pathologist; or (4) qualified audiologist. The PQRI was first implemented in 2007 as a result of section 101 of Division B of the Tax Relief and Health Care Act of 2006—the Medicare Improvements and Extension Act of 2006 (Pub. L. 109–432) (MIEA–TRHCA), which was enacted on December 20, 2006. The PQRI was extended and further enhanced as a result of the Medicare, Medicaid, and SCHIP Extension Act of 2007 (Pub. L. 110–173) (MMSEA), which was enacted on December 29, 2007, and the MIPPA, which was enacted on July 15, 2008. Changes to the PQRI as a result of these laws, as well as information about the PQRI in 2007, 2008, and 2009, are discussed in detail in the CY 2008 PFS proposed rule (72 FR 38196 through 38204), CY 2008 PFS final rule with comment period (72 FR 66336 through 66353), CY 2009 PFS proposed rule (73 FR 38558 through 38575), and CY 2009 PFS final rule with comment period (73 FR 69817 through 69847). In addition, detailed information about the PQRI is available on the CMS Web site at *http://www.cms.hhs.gov/PQRI*.

We received several comments from the public on the CY 2010 PFS proposed rule related to the PQRI. General comments about the PQRI are addressed immediately below.

Comment: Many commenters supported proposed program changes for 2010, in particular those that make reporting flexible and less burdensome such as changes to the criteria for satisfactory reporting of measures groups (specifically, the removal of the requirement to report on consecutive patients), the proposed electronic health record-based (EHR-based) reporting mechanism, and the group practice reporting option.

Response: We appreciate the commenters' support of the changes proposed for the 2010 PQRI, many of which are finalized herein. We agree with commenters that many of the changes that we are finalizing for the 2010 PQRI, including the ones listed above, provide eligible professionals with greater flexibility and make reporting less burdensome.

Comment: Several commenters suggested that we consider and recommend to the Congress a modified version of the proposed option

presented by the Senate Finance Committee in the April 29, 2009, ''Description of Policy Options, Transforming the Health Care Delivery System: Proposals to Improve Patient Care and Reduce Health Care Costs'' to add a new participation option allowing eligible professionals to receive PQRI incentive payments for 3 successive years if, on a triennial (every 3 year) basis, the eligible professional: (1) participates in a qualified American Board of Medical Specialties (ABMS) certification known as the Maintenance of Certification (MOC), or equivalent programs; and (2) completes a qualified MOC practice assessment. Such practice assessments typically consist of the use of performance measures to evaluate practice activities, which includes documentation of evidence of practice changes to improve quality, and re-evaluation to determine the effect of a change in the practice process or structure of care.

Response: Section 1848(m)(1) of the Act specifies the PQRI incentive amount for each program year and how the incentive payment amount is to be calculated for each reporting period during the program year. We do not have the authority to change how the incentive payment amount is determined and, therefore, cannot continue payments beyond the authorized program year.

With respect to the commenters' suggestion to provide PQRI incentive payments to eligible professionals who participate in an ABMS MOC program and complete a qualified MOC practice assessment, section 1848(m)(3)(A) of the Act dictates the criteria that eligible professionals must meet in order to be treated as satisfactorily submitting data on quality measures. These criteria include the reporting, by eligible professionals, of quality data on a standardized set of national consensus-based measures. For years after 2009, section 1848(m)(3)(D) of the Act gives us the discretion to revise the criteria for satisfactorily submitting data on quality measures. The proposed criteria for 2010, which did not explicitly include the option suggested by the commenters, were discussed in the CY 2010 PFS proposed rule (74 FR 33565 through 33569). We believe that basing criteria for satisfactory reporting solely on participation in an ABMS MOC and completion of a qualified MOC practice assessment without the submission of PQRI measures results would defeat the ability of CMS to analyze and compare eligible professional performance based on a standardized set of measures. PQRI is not based upon such qualifications, but rather on the submission of data on quality measures to measure eligible professional performance.

However, to the extent that ABMS member certification boards collect information on PQRI quality measures from eligible professionals, the ABMS member boards may qualify as registries under the PQRI and report such information to CMS on behalf of eligible professionals. Currently, one of the ABMS member boards has qualified as a CMS PQRI registry and successfully submitted data on PQRI measures on behalf of eligible professionals. This would allow eligible professionals to concurrently participate in an ABMS MOC and PQRI.

Comment: Several commenters suggested that we expand our education and outreach efforts so that professionals can gain a better understanding of the program, coding, and how to participate satisfactorily. Specifically, commenters suggested that we:

- Publish a list of professions that have participated in PQRI.
- Communicate potential incentive amounts that could be earned by an individual participant.
- Work with the AMA and other national stakeholder organizations to increase education and outreach for professionals about the requirements for satisfactorily reporting under various options.
- Use provider-neutral language, such as ''clinician'' or ''provider'' in describing the array of eligible professionals.

Response: We value the input received from stakeholders and participants who have provided constructive feedback and have collaborated with us to disseminate educational PQRI materials to eligible professionals in the health care community. We will continue to work with national and regional stakeholder organizations to educate their members on program requirements for satisfactory reporting.

We also plan to continue to host monthly national provider calls in which we expect to provide guidance on specific topics, including having our PQRI subject matter experts available to answer questions on the PQRI. Information about upcoming calls can be obtained from the CMS Sponsored Calls page of the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI/04_CMSSponsoredCalls.asp#TopOfPage.* We will continue to make PQRI educational materials and other resources available on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI* as well. Updated educational materials and resources for the 2010 PQRI will be made available as soon as possible following publication of this final rule with comment period. Where appropriate, we will consistently use inclusive terminology such as ''eligible professionals'' rather than ''physicians'' in PQRI educational resources and related documents. We encourage eligible professionals to visit this Web site and to review the frequently asked questions (FAQs) found on this Web site. Eligible professionals are also encouraged to join the physician listserv to obtain periodic updates about the PQRI. Instructions for joining the listserv can be found at *https://list.nih.gov/archives/physicians-1.html*.

Finally, we anticipate conducting and publishing an evaluation of the 2008 PQRI similar to the ''PQRI 2007 Reporting Experience'' posted on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI/Downloads/PQRI2007ReportFinal12032008CSG.pdf.* Although we have not yet finalized the operational details of our evaluation strategy, we expect the report to include participation rates by specialty/profession, associated trends in clinical performance and beneficiary outcomes, and other observable impacts on participants, the Medicare program, and beneficiaries.

Comment: Several commenters requested that we provide more detailed educational resources well in advance of the 2010 PQRI start date and provide enough lead time so that electronic systems may be updated to allow data capture for new or revised 2010 PQRI measures.

Response: We agree with the commenters that it is desirable to provide final measure specifications and other educational resources sufficiently in advance of the start of a new program year to allow reasonable time for professionals to analyze new or revised reporting options and measures, and implement any needed changes in their office workflows so that they may accurately capture and satisfactorily submit data on a selection of measures applicable to their practice. We are aware that such lead time would also help the eligible professionals' specialty or professional societies to prepare to support the professionals' selection of relevant measures. Having detailed information on measures available in advance also enhances the ability of vendors (such as practice-management software, billing services, and electronic health record vendors) to support professionals' successful implementation of revised data capture processes for the measures. We are

targeting finalization and publication of the detailed specifications for all 2010 PQRI measures on the CMS Web site, by November 15, 2009, but no later than December 31, 2009. The detailed specifications include instructions for reporting and identifying the circumstances in which each measure is applicable. The specifications for measures in the final listing for the 2010 PQRI, including a measure's title, remain potentially subject to corrections until the start of the 2010 reporting period. We are also committed to making other educational resources for the 2010 PQRI available on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI* as quickly as possible after publication of this final rule with comment period.

As discussed below, to assist eligible professionals who may need additional time to make updates to their electronic systems or practice workflows, we also are finalizing a 6-month reporting period beginning July 1, 2010, for claims-based reporting of individual measures. Thus, the 6-month reporting period will be available for both those who wish to report individual measures, as well as measures groups through claims or a qualified registry.

Comment: Some commenters requested that we provide detailed data used to determine that a professional failed to report on 80 percent of eligible cases and to inform them about what they need to do to rectify errors.

Response: We considered recommendations about PQRI participant feedback reports as part of an ongoing dialogue with the stakeholder and participant community. We convened a multi-specialty focus group and have revised the design and content of the 2008 PQRI feedback reports, which were recently released. These revised feedback reports include more detailed information at the individual eligible professional level than was provided in the 2007 PQRI feedback reports.

Comment: Several commenters stated that the 2007 feedback reports were too difficult to obtain, did not provide sufficient detailed information to allow correction, and were not available on an interim basis to prevent eligible professionals from making the same errors in the following program year.

Response: To address concerns expressed about our secure method used to obtain the feedback reports (which requires eligible professionals to register and obtain an Individuals Authorized Access to CMS Computer Services, or IACS, account), we identified an alternative feedback report request process for individual eligible professionals requesting NPI level reports, which allows an individual participant to obtain his or her own feedback report through their carrier or MAC after providing appropriate identification. Information about this new process is available on the PQRI section of the CMS Web site and was discussed on the October 15, 2009, PQRI national provider call.

We have assessed the feasibility of providing some type of interim feedback report to participants. We have determined, however, detailed, accurate, participant-level interim feedback reports cannot be provided in an appropriately secure access environment. However, given that the most prevalent underlying reasons for failure to meet incentive eligibility are due to (1) failure by the professional to identify and report on at least 80 percent of denominator-eligible cases for the measures selected, and (2) quality data code errors due to incorrect or insufficient coding, we have determined that an aggregate-level quality data submission error report could be published on a quarterly basis on the PQRI section of the CMS Web site, to provide information on the types of submission errors found for each measure. Following the posting of the ''PQRI 2007 Reporting Experience'' report, we have continued to post updated error reports on a quarterly basis on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI*.

Comment: Several commenters who participated in the 2008 PQRI have commented on the lack of timely feedback reports and incentive payments.

Response: For claims-based reporting, PQRI analysis of individual professionals' claims begins after the conclusion of the program year when all claims have been processed. Conducting individual-level analysis on a portion of a professional's claims during the program year would result in inaccurate data and presents a significant expense to CMS. We acknowledge participating professionals' need for interim information on the accuracy of their quality reporting through claims. Therefore, we have posted aggregate-level information on the PQRI section of the CMS Web site on a quarterly basis describing quality-data code submission errors that we observe on claims for each PQRI measure and anticipate continuing to do so in the future.

In addition, many registries provide interim feedback to their clients. Therefore, eligible professionals who participate in PQRI through a qualified registry may be able to receive interim feedback from the registry and have the opportunity to correct those errors prior to the program year data submission deadline.

Comment: Several commenters requested that we establish a formal appeals process for those professionals who participate in PQRI but do not qualify for the incentive payment.

Response: Section 1848(m)(5)(e) of the Act provides that with respect to the PQRI there shall be no administrative or judicial review under section 1869, section 1879, or otherwise of (1) The determination of measures applicable to services furnished by eligible professionals; (2) the determination of satisfactory reporting; and (3) the determination of any incentive payment. Since 2007, we have addressed inquiries about the PQRI through the question-and-answer sessions held during monthly PQRI national provider calls and open door forums. More recently, a dedicated Help Desk has been implemented to respond to participants' inquiries related to all aspects of the PQRI, including assisting eligible professionals in understanding why they did not receive a PQRI incentive payment. The Help Desk is available from 7 a.m. to 7 p.m. CT and can be reached by phone at (866) 288–8912 or via e-mail at *qnetsupport@sdps.org*.

Comment: Several commenters expressed the need to evaluate the impact of PQRI and make evaluation results available to stakeholders. Some commenters stated that an evaluation of outcomes achieved is needed before deciding whether to expand the program, impose penalties, or make participation mandatory. One commenter noted that such an evaluation is needed to restore confidence in the PQRI since the program's validity within the eligible professional community has been compromised due to the PQRI being rushed. Other commenters urged us to provide medical specialty organizations with the PQRI data files so that they may perform an independent analysis to assist CMS to improve the clinical appropriateness of physician quality measures and better understand or correct potential barriers to satisfactory reporting.

Response: We have conducted and published an evaluation of the 2007 PQRI and have posted the ''PQRI 2007 Reporting Experience'' on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI/Downloads/PQRI2007ReportFinal12032008CSG.pdf*. We anticipate conducting a similar evaluation of the 2008 PQRI and expect to include participation rates by

specialty/profession, associated trends in clinical performance and beneficiary outcomes, and other observable impacts on participants, the Medicare program, and beneficiaries. Although we have not yet finalized the operational details of our evaluation strategy for the 2008 PQRI and beyond, we do anticipate making the results of the evaluation, at the national level, available to the public. We also may make publicly available the results of such analyses aggregated at other meaningful levels (for example, State, specialty, or profession). We do not at this time plan to make results publicly available in a format or with content that would enable identification of individual professionals or specific practices' reporting or performance results.

Comment: Several commenters urged CMS to expand PQRI in a manner that would allow participation by therapy professionals who practice in institutional settings such as hospitals, rehabilitation facilities, and skilled nursing facilities and submit their individual National Provider Identifier (NPI) either through claims or through registry-based reporting.

Response: As we stated in the CY 2008 PFS final rule with comment period (74 FR 69820 through 69821), we agree with the goal of offering the opportunity to participate in PQRI to as many eligible professionals as feasible and practical, consistent with the statutory requirements. Except for group practices participating in the group practice reporting option, which begins in 2010, the determination of satisfactory reporting and the calculation of any earned incentive payment amount must be determined at the individual professional level, regardless of the method of reporting quality data. For therapy professionals who practice in institutional settings, we cannot make the determination of satisfactory reporting and calculate earned incentive payment amounts at the individual eligible professional level without extensive modifications to the claims processing systems of CMS and providers, which would represent a material administrative burden to us and to providers. It would also require modifications to the industry standard claims formats, which would require substantial time to effect through established processes and structures that we do not maintain or control. We have also found that most institutions that employ therapists do not tie the individual therapist to the service rendered to an individual patient. Instead, therapists are hired for a fixed number of hours per day per week. In this case, there are no provider identifiers available to use in processing these claims.

Comment: Several commenters indicated that we should convert PQRI from a pay-for-reporting program to a pay-for performance program, stating that reporting on quality measures is not sufficient and that consumers need performance data for informed choice based on quality and value.

Response: Our plans for a report to Congress on transitioning to a physician value-based purchasing program are discussed in section II.G.4. of this final rule with comment period.

Comment: Some commenters expressed concern that the impact analysis of the estimated costs for participation by professionals for claims-based, registry-based, and EHR-based reporting contained in the CY 2010 PFS proposed rule (74 FR 33664 through 33665) are too low or inaccurate and should be rectified in the final rule. One commenter noted that one estimate of the cost for a practice to participate in PQRI ranges from $55,000 to $1.3 million. Other commenters cited an example from a practice with 1 full-time eligible professional and 1 part-time eligible professional where it was determined that the cost for claims-based reporting in PQRI was $1,780 per year, or $1,186 per eligible professional. Some commenters suggested that we conduct a survey of successful PQRI participants and/or data submission vendors to determine all participation costs and publish survey results in future rules.

Response: As stated in the CY 2010 PFS proposed rule (74 FR 33664), individual eligible professionals and group practices may have different processes for integrating the PQRI into their practices' work flows. Therefore, it is difficult for us to accurately quantify the cost burden because it would vary with each eligible professional by the number of measures applicable to the eligible professional, the number of measures on which an eligible professional chooses to report, the complexity of the measure(s) chosen by the eligible professional, the eligible professional's patient population and how frequently the professional's selected measure(s) apply to the professional's patient population, the eligible professional's familiarity, understanding, and experience with the PQRI, and the reporting option selected by the eligible professional. To be able to provide any cost estimates we had to use certain assumptions with respect to the number of measures reported on and the number of reporting instances per eligible professional. Given that practices vary in size and patient population, these assumptions will not hold true for every practice participating in PQRI and some practices' costs associated with PQRI participation will exceed the estimates provided in our cost estimates while other practices will have costs below our estimates. We cannot assess the examples offered by commenters without additional information on the number of measures reported by each eligible professional in the practice and the number of reporting instances per eligible professional. We will consider, however, the commenters' suggestions for future years but believe that it would be unlikely that we would be able to obtain a representative sample of survey respondents given the many variables that impact participation costs.

Comment: A specific concern cited by commenters with respect to the impact analysis was that reliance on historical data from the Physician Voluntary Reporting Program (PVRP) is inappropriate and does not take into consideration the development and maintenance of new workflows necessary to participate in PQRI and the new measure, measure specification changes and reporting option changes that occur on an annual basis.

Response: Information from the PVRP was used solely for developing cost estimates for participation in PQRI through the claims-based reporting mechanism; not through other reporting mechanisms. To develop our cost estimates for claims-based reporting, we applied information from PVRP on how much time it takes one eligible professional, in a median practice, to report one measure one time through claims to our assumptions. We recognize that the PVRP cost estimates are historical, but we do not believe that the process for reporting measures through claims has changed significantly from PVRP to PQRI in a way to considerably change the amount of time it takes one eligible professional to report one measure one time through claims. However, for our impact analysis, we did use a higher average practice labor cost than what was indicated in the information from the PVRP (that is, we used $55 per hour instead of $50 per hour) to account for increases in labor costs over time (74 FR 33655).

Comment: Other commenters had specific concerns about the estimates provided for participation in PQRI via registries. Some commenters offered anecdotal information that the annual cost to one practice of participating in a specific registry is approximately $3,000. Another commenter believed that more than 5 minutes is needed for

an eligible professional to authorize a registry to submit quality measure results and numerator and denominator data on their behalf. Other commenters were concerned that our estimate of $1,500 to $5,000 to purchase an EHR product was too low. One commenter noted that EHR systems have capital costs of over $1 million per year. Another commenter noted that researchers recently found that it would cost about $124,000 for a single doctor or small practice to upgrade to EHRs over 5 years.

Response: We appreciate the input from commenters and have taken the additional information provided by commenters into consideration to revise the estimates associated with registry and EHR reporting where appropriate in sections XIII.E.2 and XI. of this final rule with comment period.

For registry reporting, however, we note that many registries offer additional services beyond what is required to participate in PQRI. In the example provided by commenters, it is not clear whether those costs that are not related to reporting PQRI quality measure results and numerator and denominator data on PQRI measures have been taken into consideration and excluded. Our impact analysis is limited to the incremental cost of participating in PQRI.

b. Incentive Payments for the 2010 PQRI

For 2010, section 1848(m)(1)(B) of the Act authorizes the Secretary to provide an incentive payment equal to 2.0 percent of the estimated total Medicare Part B PFS allowed charges (based on claims submitted not later than 2 months after the end of the reporting period) for all covered professional services furnished during the reporting period for 2010. Although PQRI incentive payments are only authorized through 2010 under section 1848(m)(1)(A) of the Act, section 1848(k)(2)(C) of the Act provides for the use of consensus-based quality measures for the PQRI for 2010 and subsequent years.

The PQRI incentive payment amount is calculated using estimated Medicare Part B PFS allowed charges for all covered professional services, not just those charges associated with the reported quality measures. ''Allowed charges'' refers to total charges, including the beneficiary deductible and coinsurance, and is not limited to the 80 percent paid by Medicare or the portion covered by Medicare where Medicare is secondary payer. Amounts billed above the PFS amounts for assigned and non-assigned claims will not be included in the calculation of the incentive payment amount. In addition, since, by definition under section 1848(k)(3)(A) of the Act, ''covered professional services'' are limited to services for which payment is made under, or is based on, the PFS and which are furnished by an eligible professional, other Part B services and items that may be billed by eligible professionals but are not paid under or based upon the Medicare Part B PFS are not included in the calculation of the incentive payment amount.

Under section 1848(m)(6)(C) of the Act, the ''reporting period'' for the 2008 through 2011 PQRI is defined to be the entire year, but the Secretary is authorized to revise the reporting period for years after 2009 if the Secretary determines such ''revision is appropriate, produces valid results on measures reported, and is consistent with the goals of maximizing scientific validity and reducing administrative burden.''

We are also required by section 1848(m)(5)(F) of the Act to establish alternative criteria for satisfactorily reporting and alternative reporting periods for registry-based reporting and for reporting measures groups. Therefore, eligible professionals who meet the alternative criteria for satisfactorily reporting for registry-based reporting and for reporting measures groups for the 2010 alternative reporting periods for registry-based reporting and for reporting measures groups will also be eligible to earn an incentive payment equal to 2.0 percent of the estimated total Medicare Part B PFS allowed charges for all covered professional services furnished by the eligible professional during the alternative reporting periods for 2010 PQRI registry-based reporting or for reporting measures groups.

Prior to 2010, the PQRI was an incentive program in which determination of whether an eligible professional satisfactorily reported quality data was made only at the individual professional level, based on the NPI. Although the incentive payments were made to the practice(s) represented by the Tax Identification Number (TIN) to which payments are made for the individual professional's services, there were no incentive payments made to the group practice based on a determination that the group practice, as a whole, satisfactorily reported PQRI quality measures data. To the extent individuals (based on the individuals' NPIs) satisfactorily reported data on PQRI quality measures that were associated with more than one practice or TIN, the determination of whether an eligible professional satisfactorily reported PQRI quality measures data was made for each unique TIN/NPI combination. Therefore, the incentive payment amount was calculated for each unique TIN/NPI combination and payment was made to the holder of the applicable TIN.

However, section 1848(m)(3)(C)(i) of the Act requires that by January 1, 2010, the Secretary establish and have in place a process under which eligible professionals in a group practice (as defined by the Secretary) shall be treated as satisfactorily submitting data on quality measures for the PQRI for covered professional services for a reporting period, if, in lieu of reporting measures under subsection (k)(2)(C), the group practice reports measures determined appropriate by the Secretary, such as measures that target high-cost chronic conditions and preventive care, in a form and manner, and at a time, specified by the Secretary. Therefore, beginning with the 2010 PQRI, group practices that satisfactorily submit data on quality measures also would be eligible to earn an incentive payment equal to 2.0 percent of the estimated total Medicare Part B PFS allowed charges for all covered professional services furnished by the group practice during the applicable reporting period. As required by section 1848(m)(3)(C)(iii) of the Act, payments to a group practice by reason of the process described above would be in lieu of the PQRI incentive payments that would otherwise be made to eligible professionals in the group practice for satisfactorily submitting data on quality measures. Therefore, an individual eligible professional who is participating in the group practice reporting option as a member of a group practice would not be able to separately earn a PQRI incentive payment as an individual eligible professional under that same TIN (that is, for the same TIN/NPI combination).

The following is summary of the comments we received regarding the 2010 PQRI incentive payment amount.

Comment: One commenter expressed support of the proposed extension of the PQRI incentive related to the group practice reporting option.

Response: We appreciate the commenter's support of the extension of the PQRI incentive to group practices.

Commenter: One commenter expressed a concern that the PQRI incentive payment is calculated as a percentage of the total Medicare billing of the individual eligible professional. The commenter expressed concern that for an equal amount of relative value unit work, eligible professionals in lower GPCI localities will receive as

much as 38 percent less PQRI payment for the same work, time, and effort used in providing quality care than eligible professionals in higher GPCI localities. The commenter suggested that PQRI incentive payment calculations should not be geographically adjusted and recommended that we change the basis of the incentive to RVUs rather than dollars billed to Medicare.

Response: While we acknowledge the effect of the GPCI on the calculation of the PQRI incentive amount, we do not have authority to change the basis for the calculation of the incentive amount, which is defined by section 1848(m)(1) of the Act.

Comment: A commenter requested clarification on whether radiopharmaceuticals are included in the PQRI and electronic prescribing incentive payments (see section II.G.5. of this final rule with comment period for further discussion of the E-Prescribing Incentive Program).

Response: Medicare Part B PFS allowed charges for radiopharmaceuticals have been included for determining the PQRI and electronic prescribing incentive payments. Radiopharmaceuticals are included as part of section 1861(s)(4) of the Act, which is incorporated into the list of PFS services cited in section 1848(j)(3) of the Act, and therefore, are part of the PQRI and electronic prescribing incentive calculations.

The relevant radiopharmaceutical codes are paid on the basis of invoices submitted by physicians. Such invoices are considered similar to contractor priced items or services. In addition, radiopharmaceuticals are classified as A codes (A9500–A9699) which inadvertently have not previously been included in Addendum B. Commencing with CY 2010, radiopharmaceuticals will be included in Addendum B as MPFSDB covered charges.

Furthermore, FAQ 8545, which can be accessed via the PQRI section of the CMS Web site, states that for ''PQRI participants who report satisfactorily, radiopharmaceuticals furnished as part of a covered professional service will be included in the basis of total Medicare Part B PFS allowed charges on which the incentive is calculated.''

No changes in radiopharmaceutical payment will be necessary. Payment will continue to be contractor-priced on the basis of invoices under the physician fee schedule.

c. 2010 Reporting Periods for Individual Eligible Professionals

As we indicated above, section 1848(m)(6)(C) of the Act defines ''reporting period'' for 2010 to be the entire year. Section 1848(m)(6)(C)(ii) of the Act, however, authorizes the Secretary to revise the reporting period for years after 2009, if the Secretary determines such revision is appropriate, produces valid results on measures reported, and is consistent with the goals of maximizing scientific validity and reducing administrative burden. In addition, section 1848(m)(5)(F) of the Act requires, for 2008 and subsequent years, the Secretary to establish alternative reporting periods for reporting groups of measures and for registry-based reporting.

In the CY 2010 PFS proposed rule (74 FR 33560), we proposed that the 2010 PQRI reporting period for the reporting of individual PQRI quality measures through claims or a qualified EHR would be the entire year (that is, January 1, 2010 through December 31, 2010). We also proposed to retain the 2 alternative reporting periods from the 2008 and 2009 PQRI for reporting measures groups and for registry-based reporting: (1) the entire year; and (2) a 6-month reporting period beginning July 1.

We solicited comments on these proposals and the decision not to propose a 6-month reporting period for claims-based reporting of individual PQRI quality measures. The following is a summary of the comments received regarding the proposed reporting periods.

Comment: Although a majority of the commenters supported the proposed reporting periods, we received several comments requesting that CMS retain or add a 6-month reporting period for claims-based reporting of individual measures. Many commenters requested this additional reporting period because they believe that doing so would encourage PQRI participation by allowing more time for eligible professionals to implement PQRI into their practice workflows and providing an opportunity for those who are hesitant to continue participating in PQRI until they receive feedback from the previous year to do so as well. Many commenters noted that reporting measures groups or reporting through a registry is not an option for them. Other commenters suggested that we maintain the 6-month reporting period for claims-based reporting of individual measures to maintain flexibility and uniformity in reporting periods for all PQRI reporting options to reduce confusion since many eligible professionals already believe that they can start claims-based reporting of individual measures in July.

Some commenters also requested that we have a 6-month reporting period for claims-based reporting of individual measures for situations in which an eligible professional who was planning to report through an alternative reporting mechanism may have to revert to claims-based reporting during the year, such as when an eligible professional's EHR system requires re-installation or significant maintenance or upgrades or when it takes longer for a practice to acquire a new EHR system than anticipated.

Response: Although many commenters requested that we ''retain'' the 6-month reporting period for claims-based reporting of individual measures, we would like to clarify there was no 6-month reporting period for claims-based reporting of individual quality measures available for either the 2008 or 2009 PQRI. In the 2008 and 2009 PQRI, the 6-month reporting period beginning July 1 was only available to eligible professionals who chose to report on measures groups or chose registry-based reporting (of either individual measures or measures groups). Prior to 2010 we did not have the authority to change the reporting period for claims-based reporting of individual measures, which is defined by section 1848(m)(6)(C)(i)(II) of the Act to be the entire year for 2008, 2009, 2010, and 2011. The only program year in which the reporting period was defined by statute to be the 6-month period beginning July 1 was the 2007 PQRI.

However, as a result of the compelling arguments presented by commenters, we will exercise our authority under section 1848(m)(6)(C)(ii) of the Act to revise the reporting period for the 2010 PQRI. Thus, in addition to the 12-month reporting period beginning January 1, 2010, we are finalizing a 6-month reporting period beginning July 1, 2010, available for claims-based reporting of individual measures for the 2010 PQRI.

Comment: One commenter supported not adding a 6-month reporting period for claims-based reporting of individual measures based on the assumption that we would eliminate claims-based reporting after 2010.

Response: As we stated in the CY 2010 PFS proposed rule (74 FR 33561), our ability to reduce or eliminate our reliance on claims-based reporting is contingent on there being an adequate number and variety of registries available and/or EHR reporting options. Since it is unlikely that there will be an adequate number of measures available for EHR reporting in 2011 for us to solely rely on registry and EHR reporting, we anticipate continuing to offer claims-based reporting options for the PQRI beyond 2010. Therefore, for the reasons discussed above, we believe that a 6-month reporting period for claims-based reporting of individual

measures should be available to the extent that claims-based reporting of individual measures continues to be an available option for eligible professionals.

Comment: One commenter requested that we provide a ''clarifying definition of the term 'qualified' '' with respect to the proposed 2010 PQRI reporting periods. The commenter noted that there is a similar term in industry use and a definition would help to avoid confusion.

Response: We are unclear as to how the term ''qualified'' relates to the PQRI reporting periods and believe that the commenter may be referring to our use of the term ''qualified'' with respect to registry and EHR reporting. As proposed for the 2010 PQRI (74 FR 33563 through 33565), for purposes of the PQRI, a ''qualified'' registry is one that has self-nominated to be able to submit PQRI quality measures results and numerator and denominator data on PQRI quality measures or measures groups on behalf of eligible professionals and that has been vetted by CMS to ensure the registry's meets certain technical and other requirements. Similarly, a ''qualified'' EHR vendor is one that has self-nominated to have one or more of its EHR products vetted by CMS to ensure that the product(s) meets certain technical and other requirements. Eligible professionals who wish to submit PQRI measures via an EHR may only use qualified EHR products to do so.

For the reasons discussed above and based on the comments, for 2010, we will retain a 12-month reporting period beginning January 1, 2010, which will be available for all reporting mechanisms and regardless of whether an individual eligible professional chooses to report on 2010 PQRI individual measures or measures groups. In addition, we are adopting a 6-month reporting beginning July 1, 2010, for claims-based and registry-based reporting of 2010 PQRI individual measures or measures groups. This 6-month reporting period will not be available for EHR-based reporting in 2010. Once we have additional experience with EHR reporting in PQRI we may consider including a 6-month reporting period for EHR reporting in future years.

In addition, an eligible professional who satisfactorily reports 2010 PQRI measures or measures groups through claims or a qualified registry for the 6-month reporting period will qualify to earn a PQRI incentive payment equal to 2.0 percent of his or her total estimated Medicare Part B PFS allowed charges for covered professional services furnished between July 1, 2010 and December 31, 2010 only. As required by section 1848(m)(1)(A) of the Act, the incentive payment will be calculated based on the eligible professional's charges for covered professional services furnished during the applicable reporting period only.

d. 2010 PQRI Reporting Mechanisms for Individual Eligible Professionals

When the PQRI was first implemented in 2007, there was only 1 reporting mechanism available to submit data on PQRI quality measures. For the 2007 PQRI, the only way that eligible professionals could submit data on PQRI quality measures was by reporting the appropriate quality data codes on their Medicare Part B claims (claims-based reporting). For the 2008 PQRI, we added a second reporting mechanism as required by section 1848(k)(4) of the Act, so that eligible professionals could submit data on PQRI quality measures to a qualified PQRI registry and request the registry to submit PQRI quality measures results and numerator and denominator data on the 2008 PQRI quality measures or measures groups on their behalf (registry-based reporting). For the 2009 PQRI, we retained the 2 reporting mechanisms used in the 2008 PQRI (that is, claims-based reporting and registry-based reporting) for reporting individual PQRI quality measures and for reporting measures groups.

To promote the adoption of EHRs, we also conducted limited testing of a third reporting mechanism for the 2008 and 2009 PQRI, which was the submission of clinical quality data extracted from an EHR, or the EHR-based reporting mechanism. No incentive payment was available to those eligible professionals who participated in testing the EHR-based reporting mechanism.

For the 2010 PQRI, we proposed to retain the claims-based reporting mechanism and the registry-based reporting mechanism. In addition, we proposed to accept PQRI quality measure data extracted from a qualified EHR product (that is, an EHR successfully completing the 2009 EHR Testing Program) for a limited subset of the proposed 2010 PQRI quality measures, as identified in Table 20 of the CY 2010 PFS proposed rule, contingent upon the successful completion of our 2009 EHR data submission testing process and a determination based on that testing process that accepting data from EHRs on quality measures for the 2010 PQRI is practical and feasible. We solicited comments on the proposed reporting mechanisms for the 2010 PQRI, including the proposal to add an EHR-based reporting mechanism to the 2010 PQRI, contingent upon the successful completion of our 2009 EHR data submission testing process and a determination that accepting data from EHRs on quality measures for the 2010 PQRI is practical and feasible.

We also discussed in the CY 2010 PFS proposed rule how we may consider significantly limiting the claims-based mechanism of reporting clinical quality measures for the PQRI after 2010. We solicited comments on our intent to lessen our reliance on the claims-based reporting mechanism for the PQRI beyond 2010.

The following is a summary of the comments received with regard to the proposed 2010 PQRI reporting mechanisms and our intent to lessen reliance on the claims-based reporting mechanism for the PQRI beyond 2010.

Comment: A majority of the commenters agreed with our reasons for lessening our reliance of claims-based reporting, supported alternative reporting mechanisms, or agreed that we should eventually transition away from claims-based reporting. At the same time, however, many of these same commenters urged us to reconsider limiting or eliminating claims-based reporting in 2011. Many commenters noted that claims-based reporting is currently the only option available for many eligible professionals and is the only reporting mechanism that is available to all eligible professionals. Other commenters cited claims-based reporting as the most convenient and cost-effective reporting mechanism available to eligible professionals, particularly solo practitioners and those in small practices. Also, the commenters noted that the EHR-based reporting mechanism initially will only be available on a limited basis so we should wait until EHR-based reporting becomes well established before transitioning away from claims-based reporting.

Response: We acknowledge the commenters' concerns that prematurely eliminating the claims-based reporting mechanism could create barriers to participation. While our goal continues to be to eventually phase-out claims-based reporting, our ability to reduce or eliminate our reliance on claims-based reporting is contingent on there being an adequate number and variety of registries available and/or EHR reporting options. As we stated previously, since it is unlikely that there will be an adequate number of measures available for EHR reporting in 2011 for us to completely eliminate the claims-based reporting mechanism, we

anticipate continuing to offer claims-based reporting options for the PQRI beyond 2010. We may, however, avoid introducing new claims-based measures and increasingly limit the circumstances in which claims-based reporting is an available reporting mechanism in order to encourage wider adoption of registry or EHR-based reporting.

Comment: One commenter recommended that, as we move towards reducing reliance on claims-based reporting for PQRI and increase registry-based and EHR-based options, we require registries and EHR vendors to seek and obtain a license to use the measures from the measure developers.

Response: PQRI measure specifications are developed in consultation with the measure developers and are made available to the public via posting on the PQRI section of the CMS Web site. Registries must use the PQRI measure specifications posted on the PQRI section of the CMS Web site to calculate reporting or performance unless otherwise stated. Similarly, eligible professionals who choose to participate in PQRI via the EHR-based reporting mechanism must use PQRI measure specifications to do so. We believe use of these measure specifications, regardless of the method by which quality data is submitted to PQRI for analysis, ensures consistent use and reporting of the measures.

Comment: One commenter expressed concern that registry and EHR-based reporting may not account for changes in patient condition over the course of the reporting period, and suggested reporting options be restructured so that results submitted using any method for a given patient population and a specific time period are identical.

Response: Regardless of the reporting mechanism an eligible professional selects to participate in PQRI, measure specifications and instructions for reporting a measure are consistent across mechanisms. If the measure specifications are analyzed properly by a registry or EHR vendor, the results should be very close or identical to the results for claims-based reporting, as the commenter requested.

Comment: Several commenters recommended uniform data submission deadlines be established across all reporting mechanisms. The commenter noted specifically that the proposed deadline for submission of data on PQRI quality measures for EHR-based reporting and for registry reporting was March 31, 2011 while the proposed deadline for submission of data on PQRI quality measures for other reporting mechanisms was February 28, 2011.

Response: We agree that the deadline for submission of data on PQRI quality measures for EHR-based reporting should be consistent with the deadline for submission of data on PQRI quality measures for claims-based reporting. Therefore, eligible professionals participating in the 2010 PQRI via EHR reporting or claims reporting will be required to submit all data on 2010 PQRI quality measures by no later than February 28, 2011 in order for the data to be included in the 2010 PQRI data analysis. Whereas CMS receives the raw data elements from eligible professionals for EHR and claims-based reporting and calculates the eligible professionals' reporting and performance results, registries must calculate and submit eligible professionals' quality measure reporting and performance results to us. In implementing registry-based reporting for the 2008 PQRI, we determined that a February deadline for submission of data on PQRI quality measures would be insufficient for registries to collect the data from their participants, calculate PQRI quality measure results, and submit the quality measure results and numerator and denominator data to CMS. Thus, registries are given additional time beyond February 28, 2011, to submit their data on behalf of participating eligible professionals. Eligible professionals participating in the 2010 PQRI via registry reporting should check with their selected registry regarding the registry's deadline for submission of data on PQRI quality measures from eligible professionals.

For the reasons discussed above and based on the comments received, as well as our experience with the EHR testing process to date, we are finalizing the option for an eligible professional to be able to choose to report data on 2010 PQRI quality measures through claims, through a qualified registry, or through a qualified EHR product (contingent on there being a qualified 2010 EHR product). Depending on which PQRI individual quality measures or measures groups an eligible professional selects, however, one or more of the 2010 reporting mechanisms may not be available for reporting a particular 2010 PQRI individual quality measure or measures group. The 2010 reporting mechanism(s) through which each 2010 PQRI individual quality measure and measures group can be reported is identified in Tables 11 through 27 of this final rule with comment period.

Regardless of the reporting mechanism chosen by an eligible professional, there is no requirement for the eligible professional to sign up or register to participate in the PQRI. However, there may be some requirements for participation through a specific reporting mechanism that are unique to that particular reporting mechanism. In addition to the criteria for satisfactory reporting of individual measures and measures groups described in sections II.G.2.e. and II.G.2.f. of this final rule with comment period, eligible professionals must ensure that they meet all requirements for their chosen reporting mechanism as described in sections II.G.2.d.1. through II.G.2.d.3. of this final rule.

(1) Final Requirements for Individual Eligible Professionals Who Choose the Claims-Based Reporting Mechanism

For eligible professionals who choose to participate in the 2010 PQRI by submitting data on individual quality measures or measures groups through the claims-based reporting mechanism, we proposed that the eligible professional would be required to submit the appropriate PQRI quality data codes on the professionals' Medicare Part B claims. As in previous years, an eligible professional would be permitted to start submitting the quality data codes for the eligible professional's selected individual PQRI quality measures or measures group at any time during 2010. Please note, however, that as required by section 1848(m)(1)(A) of the Act, all claims for services furnished between January 1, 2010 and December 31, 2010, would need to be processed by no later than February 28, 2011, to be included in the 2010 PQRI analysis.

We did not receive any comments specific to the requirements for individual eligible professionals who choose claims-based reporting. Therefore, we are finalizing the requirements as proposed. Eligible professionals should refer to the ''2010 PQRI Implementation Guide'' to facilitate satisfactory reporting of quality data codes for 2010 PQRI individual measures on claims and to the ''Getting Started with 2010 PQRI Reporting of Measures Groups'' to facilitate satisfactory reporting of quality data codes for 2010 PQRI measures groups on claims. By no later than December 31, 2009, both of these documents will be posted on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/pqri.*

(2) Final Requirements for Individual Eligible Professionals Who Choose the Registry-Based Reporting Mechanism

In order to report quality measures results and numerator and denominator data on the 2010 PQRI individual quality measures or measures group through a qualified clinical registry, we

proposed that eligible professionals would need to enter into and maintain an appropriate legal arrangement with a qualified 2010 PQRI registry. Such arrangements would provide for the registry's receipt of patient-specific data from the eligible professional and the registry's disclosure of quality measures results and numerator and denominator data on PQRI quality measures or measures groups on behalf of the eligible professional to CMS. Thus, the registry would act as a Health Insurance Portability and Accountability Act of 1996 (Pub. L. 104–191) (HIPAA) Business Associate and agent of the eligible professional. Such agents are referred to as ''data submission vendors.'' The ''data submission vendors'' would have the requisite legal authority to provide clinical quality measures results and numerator and denominator data on individual quality measures or measures groups on behalf of the eligible professional for the PQRI. The registry, acting as a data submission vendor, would submit CMS-defined registry-derived measures information to the CMS designated database for the PQRI, using a CMS-specified record layout. The record layout will be provided to the registry by CMS.

To maintain compliance with applicable statutes and regulations, our program and its data system must maintain compliance with the HIPAA requirements for requesting, processing, storing, and transmitting data. Eligible professionals that conduct HIPAA covered transactions also would need to maintain compliance with the HIPAA requirements.

We proposed that eligible professionals choosing to participate in PQRI by submitting quality measures results and numerator and denominator data on PQRI individual quality measures or measures groups through the registry-based reporting mechanism for 2010 would be required to select a qualified PQRI registry and submit information on PQRI individual quality measures or measures groups to the selected registry in the form and manner and by the deadline specified by the registry (74 FR 33562).

In addition to meeting the above proposed requirements specific to registry-based reporting, we proposed that eligible professionals who choose to participate in PQRI through the registry-based reporting mechanism would need to meet the relevant criteria proposed for satisfactory reporting of individual measures or measures groups that all eligible professionals must meet in order to qualify to earn a 2010 PQRI incentive payment (74 FR 33563).

The following is a summary of the comments we received regarding the proposed requirements for individual eligible professionals who choose the registry-based reporting mechanism for the 2010 PQRI.

Comment: We received multiple comments requesting that we not wait until the qualified 2009 registries successfully submit their 2009 PQRI data to publish the list of qualified registries for 2010 PQRI. Commenters suggested that approved registries and the vetting of the self-nominated registries must occur earlier in the reporting year to allow eligible providers time to review and select an appropriate registry for their needs. A few commenters suggested that the list of eligible registries be made available prior to the start of the reporting period and one commenter recommended these registries be announced at least one month prior to the reporting period. Another commenter suggested the delay in listing qualified registries for 2010 PQRI would penalize 2009 qualified registries and could lead to an unintended consequence of decreasing the number of participating eligible professionals in 2010.

Response: We understand the concern posed by the commenters. We make every effort to increase the likelihood of successful data submission to PQRI on behalf of eligible professionals from qualified registries. While we cannot guarantee that a qualified registry will be able to send the quality measure data on behalf of their eligible professionals, a thorough vetting process has been established in order to qualify new registries. Part of this process includes determining the success of the 2009 PQRI registries with respect to their data submission. As in 2009, we are again requiring a self-nomination process for registries wishing to submit quality measures results and numerator and denominator data on 2010 PQRI quality measures or measure groups on behalf of eligible professionals for services furnished during the applicable reporting periods in 2010. Similar to previous years, the 2010 PQRI registry self-nomination process is based on a registry meeting specific technical and other requirements. While we strive to announce the qualified 2010 registries in advance of our target date, the selection process to determine qualified registries for 2010 PQRI is time-consuming. We anticipate posting the complete list of qualified 2010 registries as soon as we have completed vetting the registries interested in participating in the 2010 PQRI and identified the qualified registries for the 2010 PQRI. We expect to post the qualified registries no later than Summer 2010. In an attempt to address the commenters' requests, however, we do intend to post the names of the successful 2008 registries who intend to continue their participation in the 2010 PQRI. As stated in the CY 2010 PFS proposed rule (74 FR 33562 through 33563), this initial list of 2010 qualified registries will be available on the Web site by no later than December 31, 2009.

Comment: One commenter suggested we consider implementing a registry submission process that allows registries to demonstrate the recording and feedback of quality information, rather than go through a cumbersome method to transform the data for submission to CMS. The commenter noted that the current registry requirements appear to be designed in a way that would allow registry data to be transformed to claims data.

Response: We believe the commenter is reacting to the fact that the PQRI originated as a claims-based quality reporting program and he or she believes that registry requirements are still being designed to allow registry data to be transformed to claims data. We do not require registries to transform the quality data that they collect into a claims data format, as such a requirement would be overly prescriptive. In accordance with the registry qualifications set forth in section II.G.2.d.4. of this final rule with comment period, registries may collect and analyze data on PQRI measures and measures groups on behalf of eligible professionals pursuing incentive payment for the 2010 PQRI in any manner they deem appropriate for successful business operations. Therefore, an eligible professional who chooses registry-based reporting must submit data on PQRI quality measures or measures groups in whatever manner that is required by his or her selected qualified registry.

Comment: A commenter suggested that individual eligible professionals and small practices be offered a mechanism by which registry data could be cross-referenced with claims data to see if any other provider has supplied the appropriate care. The commenter remarked that this would allow eligible professionals to participate in registry-based reporting even if they do not have access to the quality information needed to report.

Response: The PQRI does not allow for one eligible professional's data to be ''cross-referenced'' with other eligible professional's data at the individual eligible professional level. This is however, consistent with one of the benefits of the physician group option

method of PQRI reporting, which will start in 2010 and is discussed in further detail in section II.G.2.g. of this final rule with comment period. Satisfactory participation in PQRI for individuals looks at reporting rates at the individual TIN/NPI level.

As a result of the comments, we are finalizing the requirements for individual eligible professionals who choose the registry-based reporting mechanism as proposed (74 FR 33562 through 33563) and discussed above.

We will post on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov* a list of qualified registries for the 2010 PQRI, including the registry name, contact information, and the 2010 measure(s) and/or measures group(s) for which the registry is qualified and intends to report. As proposed in the CY 2010 PFS proposed rule (74 FR 33562 through 33563), we will post the names of 2010 PQRI qualified registries in 2 phases. In either event, even though a registry is listed as ''qualified,'' we cannot guarantee or assume responsibility for the registry's successful submission of PQRI quality measures results and numerator and denominator data on PQRI quality measures or measures groups on behalf of eligible professionals.

In the first phase, we will post, by December 31, 2009, a list of those registries qualified for the 2010 PQRI based on: (1) Being a qualified registry for the 2008 and 2009 PQRI that successfully submitted 2008 PQRI quality measures results and numerator and denominator data on the quality measures; (2) having received a letter indicating their continued interest in being a PQRI registry for 2010; and (3) the registry's compliance with the 2010 PQRI registry requirements. By posting this first list of qualified registries for the 2010 PQRI, we seek to make available the names of registries that can be qualified at the start of the 2010 reporting period.

In the second phase, we will complete posting of the list of qualified 2010 registries as soon as we have completed vetting the additional registries interested in participating in the 2010 PQRI and identified the qualified registries for the 2010 PQRI, which we anticipate will be completed by no later than Summer 2010. An eligible professional's ability to report PQRI quality measures results and numerator and denominator data on PQRI quality measures or measures groups using the registry-based reporting mechanism should not be impacted by the complete list of qualified registries for the 2010 PQRI being made available after the start of the reporting period. First, registries will not begin submitting eligible professionals' PQRI quality measures results and numerator and denominator data on the quality measures or measures groups to CMS until 2011. Second, if an eligible professional decides that he or she is no longer interested in submitting quality measures results and numerator and denominator data on PQRI individual quality measures or measures group through the registry-based reporting mechanism after the complete list of qualified registries becomes available, this does not preclude the eligible professional from attempting to meet the criteria for satisfactory reporting through another 2010 PQRI reporting mechanism.

The process and requirements that will be used to determine whether a registry is qualified to submit quality measures results and numerator data on PQRI quality measures or measures groups on an eligible professional's behalf in 2010 are described in section II.G.2.d.4. of this final rule with comment period.

(3) Requirements for Individual Eligible Professionals Who Choose the EHR-Based Reporting Mechanism

For eligible professionals who choose to participate in the 2010 PQRI by submitting data on individual quality measures through the EHR-based reporting mechanism, the requirements we proposed associated with EHR-based reporting other than meeting the criteria for satisfactory reporting of individual measures were to: (1) select a qualified EHR product and (2) submit clinical quality data extracted from the EHR to a CMS clinical data warehouse (74 FR 33563). Provided that our 2009 EHR data submission testing process is successful, we proposed to begin accepting submission of clinical quality data extracted from ''qualified'' EHRs on January 1, 2010, or as soon thereafter as is technically feasible. We proposed that eligible professionals will have until March 31, 2011, to complete data submission through qualified EHRs for services furnished during the 2010 PQRI reporting period.

We did not propose any option to report measures groups through EHR-based reporting on services furnished during 2010. Because EHR-based reporting to CMS of data on quality measures would be new to PQRI for 2010, we proposed, for EHR-based reporting, to make available only the criteria applicable to reporting of individual PQRI measures. The criteria applicable to reporting of measures groups were not proposed to be available for EHR-based reporting for 2010.

The following is a summary of the comments we received regarding the proposed requirements for individual eligible professionals who choose the EHR-based reporting mechanism.

Comment: Some commenters urged CMS to conduct extensive education and outreach prior to implementation of EHR reporting for PQRI.

Response: We agree that it is necessary to educate eligible professionals regarding this new reporting mechanism prior to implementation. We anticipate doing so through PQRI National Provider Calls, or other CMS-sponsored calls, and through educational materials to be posted on the PQRI section of CMS Web site once qualified EHR vendors have been identified for the 2010 PQRI.

Comment: One commenter noted his or her expectation that the 2009 EHR Testing Program would be a success. Another commenter suggested we include a discussion of the 2009 EHR submission testing experience in this final rule.

Response: We appreciate the positive comment and anticipate the ongoing 2009 EHR data submission testing process will be a success. However, we have not completed the final beta test as of the writing of this final rule with comment period and therefore, we are unable to discuss the results of the testing process in this final rule with comment period.

Comment: Many commenters supported further expanding reporting mechanisms and moving forward with accepting quality measures data through EHRs for the PQRI program. Several commenters were pleased with our proposal to accept PQRI quality measure data extracted from qualified EHRs in 2010 and one commenter urged us to quickly finalize testing for the EHR-based reporting mechanism and allow participation in 2010 PQRI through the use of qualified EHRs. One commenter indicated the use of EHR data submission will result in the reporting of more robust quality measures.

Response: We encourage the adoption and use of EHRs and are appreciative of the commenters' support. We believe EHR-based reporting will enhance the quality of PQRI data reported by eligible professionals participating in the PQRI program and, compared to claims-based reporting, will relieve some of the reporting burden on eligible professionals.

Comment: One commenter remarked that all eligible professionals should have the option to report measures through an EHR. Similarly, another

commenter indicated opposition to the decision to limit EHR based reporting initially to a narrow subset of the universe of approved quality measures.

Response: We have selected 10 measures which can be reported from an EHR in this initial phase of quality data reporting from EHRs for PQRI. As we gain experience accepting quality measures data electronically, we will evaluate the feasibility of expanding the list of measures for which we have this capability.

Comment: A commenter suggested we allow hospital EHR systems to qualify as a reporting method for PQRI, as some eligible professionals are employed in a hospital facility which may be using an EHR (for example, Registered Dietitians).

Response: To the extent that a hospital utilizes an EHR system that is ''qualified'' for the 2010 PQRI, eligible professionals employed by the hospital can participate in the 2010 PQRI by submitting PQRI quality measures data extracted from the hospital's EHR system. We do not place restrictions on who can self-nominate to have one or more of their EHR products become qualified PQRI EHR products as long as the vendor successfully completes the self-nomination process described in section II.G.2.d.5. of this final rule with comment period.

Comment: One commenter concurred that we cannot assume responsibility for the successful submission of data from an eligible professional's EHRs.

Response: As discussed in the proposed rule (74 FR 33563), we cannot assume responsibility for the successful submission of data from any eligible professional's EHR. It is each EHR vendor's responsibility to ensure that it has updated its EHR product(s) to facilitate PQRI quality measures data submission.

Comment: One commenter recommended a more streamlined approach to simplify the reporting criteria and time-periods for EHR users, by allowing EHR users to report on all their patients throughout the year.

Response: For satisfactory PQRI reporting via a qualified EHR, we are requiring all PQRI quality data to be submitted at one time. This will allow us to finish the infrastructure development and will also allow CMS and eligible professionals to avoid redundant reporting by inadvertently submitting data previously reported. Also, we believe one-time reporting is more convenient for eligible professionals.

Comment: One commenter commended CMS for acknowledging the Health Information Technology for Economic and Clinical Health (HITECH) Act and its focus on EHR implementation for incentive payments, meaningful use, and quality reporting. Some commenters suggested that we align initiatives in response to the health information technology (HIT) incentives and with applicable provisions in the HITECH Act regarding EHR certification requirements (that is, HITECH requires eligible professionals to use certified technology) so that eligible professionals can follow similar qualification and/or certification requirements as they prepare for quality reporting for both PQRI and the HITECH Act incentive programs. Another commenter remarked that EHR systems may require reinstallation or significant maintenance/upgrades to meet ''meaningful use'' criteria, which could potentially take months to achieve. Coordinating reporting standards may help minimize preparation and reporting requirements for program participants. Another commenter suggested we advocate to the Certification Commission of Health Information Technology for the inclusion of PQRI reporting capabilities in the certification criteria.

Response: Any EHR quality data submission will be required to comply with all current regulations regarding security and privacy. ''Meaningful use'' criteria will be reviewed as they are finalized and we will endeavor to align our work in the future, as appropriate. However, since meaningful use criteria have not yet been finalized, this comment is currently beyond the scope of this final rule with comment period.

Comment: One commenter remarked that an EHR is a tool that allows physicians to improve work flow and efficiency by electronically documenting data, however it does not, in all cases, have a quality feedback loop for providers. One commenter recommended that we provide back to the submitter, feedback on the extracted data that is received and then that feedback should be provided back to the eligible professional. The commenter also suggested we require that this process include return receipt for the data content prior to scoring for PQRI participation and calculation of incentive payment.

Response: With regard to a ''feedback loop,'' we note that the EHR data submission process is such that the eligible professional will know if the file he or she sent to us has been successfully submitted and accepted. A file which is not accepted will be returned with an error code. We note, however, that successful submission of a data file does not indicate that the eligible professional met the criteria for satisfactory reporting; it just indicates that we received the data file that was sent to us.

As is the case for other eligible professionals participating in PQRI, eligible professionals submitting their quality data through an EHR will receive a feedback report from us that will be accessible in the same manner as other feedback reports we provide for other reporting mechanisms.

As a result of the comments and our experience thus far with the ongoing 2009 EHR Testing Program, eligible professionals who choose the EHR-based reporting mechanism for the 2010 PQRI will be required to (in addition to meeting the criteria for satisfactory reporting of individual measures):

- Have a qualified EHR product;
- Have an active IACS user account that will be used to submit clinical quality data extracted from the EHR to a CMS clinical data warehouse;
- Submit a test file containing real or dummy clinical quality data extracted from the EHR to a CMS clinical data warehouse via IACS between July 1, 2010 and September 30, 2010 (if technically feasible); and
- Submit a file containing the eligible professional's 2010 PQRI clinical quality data extracted from the EHR for the entire reporting period (that is January 1, 2010 through December 31, 2010) via IACS between January 1, 2011 through February 28, 2011.

As stated above, however, the 2009 EHR Testing Program is still ongoing. Since only EHR vendors that self-nominated to participate in the 2009 EHR Testing Program and successfully complete the 2009 EHR Testing Program will be considered qualified EHR vendors for the 2010 PQRI, there is no guarantee that there will be any qualified EHR vendors available for the 2010 PQRI. In addition, as we complete the 2009 EHR Testing Program and are better able to determine what is technically feasible, the actual dates on which eligible professionals are required to submit their test files and/or to begin submitting the actual 2010 PQRI data are subject to change.

As stated above, we also cannot assume responsibility for the successful submission of data from eligible professionals' EHRs. Any eligible professional who chooses to submit PQRI data extracted from an EHR should contact the EHR product's vendor to determine if the product is qualified and has been updated to facilitate PQRI quality measures data submission. Such professionals also should begin attempting submission soon after the opening of the clinical

data warehouse in order to assure the professional has a reasonable period of time to work with his or her EHR and/or its vendor to correct any problems that may complicate or preclude successful quality measures data submission through that EHR. As we indicated above, data submission for the 2010 PQRI will need to be completed by February 28, 2011.

The specifications for the electronic transmission of the 2010 PQRI measures identified in Table 14 of this final rule as being available for EHR-based reporting in 2010 are posted on Alternative Reporting Mechanisms page of the PQRI section of the CMS Web site.

(4) Qualification Requirements for Registries

For the 2010 PQRI, we proposed to require a self-nomination process for registries wishing to submit 2010 PQRI quality measures or measures groups on behalf of eligible professionals for services furnished during the applicable reporting periods in 2010 (74 FR 33563). The proposed registry self-nomination process for the 2010 PQRI would be based on a registry meeting specific technical and other requirements.

To be considered a qualified registry for purposes of submitting individual quality measures and measures groups on behalf of eligible professionals who choose to report using this reporting mechanism under the 2010 PQRI, we proposed that a registry would need to:

- Be in existence as of January 1, 2009;
- Be able to collect all needed data elements and calculate results for at least 3 measures in the 2010 PQRI program (according to the posted 2010 PQRI Measure Specifications);
- Be able to calculate and submit measure-level reporting rates by TIN/NPI;
- Be able to calculate and submit, by TIN/NPI, a performance rate (that is, the percentage of a defined population who receive a particular process of care or achieve a particular outcome) for each measure on which the TIN/NPI reports;
- Be able to separate out and report on Medicare Part B FFS patients;
- Provide the name of the registry;
- Provide the reporting period start date the registry will cover;
- Provide the reporting period end date the registry will cover;
- Provide the measure numbers for the PQRI quality measures on which the registry is reporting;
- Provide the measure title for the PQRI quality measures on which the registry is reporting;
- Report the number of eligible instances (reporting denominator);
- Report the number of instances of quality service performed (numerator);
- Report the number of performance exclusions;
- Report the number of reported instances, performance not met (eligible professional receives credit for reporting, not for performance);
- Be able to transmit this data in a CMS-approved XML format. We expect that this CMS-specified record layout will be substantially the same as for the 2008 and 2009 PQRI. This layout will be provided to registries in 2010;
- Comply with a CMS-specified secure method for data submission, such as submitting its data in an XML file through an IACS user account;
- Submit an acceptable ''validation strategy'' to CMS by March 31, 2010. A validation strategy ascertains whether eligible professionals have submitted accurately and on at least the minimum number (80 percent) of their eligible patients, visits, procedures, or episodes for a given measure. Acceptable validation strategies often include such provisions as the registry being able to conduct random sampling of their participants' data, but may also be based on other credible means of verifying the accuracy of data content and completeness of reporting or adherence to a required sampling method;
- Enter into and maintain with its participating professionals an appropriate Business Associate agreement that provides for the registry's receipt of patient-specific data from the eligible professionals, as well as the registry's disclosure of quality measure results and numerator and denominator data on behalf of eligible professionals who wish to participate in the PQRI program;
- Obtain and keep on file signed documentation that each holder of an NPI whose data are submitted to the registry has authorized the registry to submit quality measures results and numerator and denominator data to CMS for the purpose of PQRI participation. This documentation must be obtained at the time the eligible professional signs up with the registry to submit PQRI quality measures data to the registry and must meet any applicable laws, regulations, and contractual business associate agreements;
- Provide CMS access (if requested) to review the Medicare beneficiary data on which 2010 PQRI registry-based submissions are founded;
- Provide the reporting option (reporting period and reporting criteria) that the eligible professional has satisfied or chosen; and
- Provide CMS a signed, written attestation statement via mail or e-mail which states that the quality measure results and numerator and denominator data provided to CMS are accurate and complete (74 FR 33563 through 33564).

With respect to the submission of 2010 measure results and numerator and denominator data on measures groups, we proposed to retain in 2010 the following registry requirements from the 2009 PQRI:

- Indicate the reporting period chosen for each eligible professional who chooses to submit data on measures groups;
- Base reported information on measures groups only on patients to whom services were furnished during the 12-month reporting period of January through December 2010 or the 6-month reporting period of July 2010 through December 2010;
- Agree that the registry's data may be inspected by CMS under our oversight authority if non-Medicare patients are included in the patient sample;
- Be able to report data on all of the measures in a given measures group and on either 30 patients from January 1 through December 31, 2010 (note this patient sample must include some Medicare Part B FFS beneficiaries) or on 80 percent of applicable Medicare Part B FFS patients for each eligible professional (with a minimum of 15 patients during the January 1, 2010 through December 31, 2010 reporting period or a minimum of 8 patients during the July 1, 2010 through December 31, 2010 reporting period); and
- Be able to report the number of Medicare FFS patients and the number of Medicare Advantage patients that are included in the patient sample for a given measures group (74 FR 33564).

In addition to the above requirements, we proposed the following new requirements for registries for the 2010 PQRI:

- Registries must have at least 25 participants;
- Registries must provide at least 1 feedback report per year to participating eligible professionals;
- Registries must not be owned and managed by an individual locally-owned single-specialty group (in other words, single-specialty practices with only 1 practice location or solo practitioner practices would be prohibited from self-nominating to become a qualified PQRI registry);
- Registries must participate in ongoing 2010 PQRI mandatory support conference calls hosted by CMS

(approximately 1 call per month), including an in-person registry kick-off meeting to be held at CMS headquarters in Baltimore, MD;

- Registries must provide a flow and XML of a measure's calculation process for each measure type that the registry intends to calculate; and
- Registries must use PQRI measure specifications to calculate reporting or performance unless otherwise stated (74 FR 33654).

The following is summary of the comments we received regarding the proposed qualification requirements and self-nomination process for registries for the 2010 PQRI.

Comment: We received several comments supporting many of the proposed qualification requirements for registries. A number of commenters agreed with the proposed requirement that registries must have a minimum of 25 participants. Similarly, one commenter remarked that the rationale for restricting a single practice site or solo practitioners from becoming a qualified registry is unclear and suggested that such entities should not be prohibited from becoming a qualified registry if they otherwise meet the requirements.

Response: We appreciate the supportive comments and believe that the additional requirements will improve registry based reporting. We limited registry participation to registries with at least 25 participants to conserve both CMS and eligible professionals' resources. Every registry goes through a vetting process which includes providing a sample measure flow illustrating how that registry will calculate an example of each type of measure it plans to submit to CMS. Additionally, registries must send in a sample XML file per the CMS specifications. This process occurs over a 2–3 month period and requires resources on the part of CMS, as well as the potential registry. Finally, a mandatory in-person registry kick-off meeting is held each year at CMS headquarters in Baltimore, MD. We believe the time and expense for a solo practitioner or single practice site to go through these steps would be prohibitive for most practitioners or practice sites. We do not believe that a majority of solo practitioners or single practice sites do not have the information technology (IT) staffing and resources needed to successfully complete the vetting process. Furthermore, we do not have the resources to provide IT support to such entities.

Comment: Numerous commenters strongly supported the requirement for registries to provide at least one feedback report per year to participating eligible professionals. Several commenters suggested the feedback reports from registries be issued to eligible professionals at some point during the reporting year so as to allow practices to assess their performance both on reporting and on performance, which may inform and promote internal quality improvement. One commenter stated providing eligible professionals with access to feedback reports during the reporting year would allow more accurate assessment of their performance before the close of the reporting period.

Response: We agree that the requirement for registries to provide at least one feedback report per year is an essential tool for quality improvement and must be provided to participating eligible professionals. The information contained within feedback reports will allow the eligible professional to assess the quality of care they provided to their patients during the specific reporting timeframe of the report. Furthermore the report may provide information for the promotion of internal quality improvement. While we will not require registries to provide more than the minimum number of feedback reports per year (one) to participating eligible professionals, we would be supportive of such a decision by a registry.

Comment: One commenter recommended we develop an audit program for registry vendors, as the PQRI program moves away from claims-based reporting. The commenter suggested eligible professionals participating in the PQRI look to CMS for assurance that registry vendors are regularly inspected for quality.

Response: As we gain more experience with registry submission, we would expect to further specify through rulemaking qualification requirements for registries that may include more comprehensive validation requirements. As we evaluate our policies, we plan to continue a dialogue with stakeholders to discuss opportunities for program efficiency and flexibility.

As a result of the comments, we are finalizing the 2010 qualification requirements for registries as proposed (74 FR 33563 through 33565).

We will post the 2010 PQRI registry requirements, including the exact date by which registries that wish to qualify for 2010 must submit a self-nomination letter and instructions for submitting the self-nomination letter, on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI* by November 15, 2009. We anticipate that new registries that wish to self-nominate for 2010 will be required to do so by January 31, 2010.

We are finalizing our proposal (74 FR 33563 through 33565) that registries that were ''qualified'' for 2009 and wish to continue to participate in 2010 will not need to be ''re-qualified'' for 2010 unless they are unsuccessful at submitting 2009 PQRI data (that is, fail to submit 2009 PQRI data per the 2009 PQRI registry requirements). Registries that are ''qualified'' for 2009 and wish to continue to participate in 2010 were required to indicate their desire to continue participation for 2010 by submitting a letter to CMS indicating their continued interest in being a PQRI registry for 2010 and their compliance with the 2010 PQRI registry requirements by no later than October 31, 2009. Instructions regarding the procedures for submitting this letter were provided to qualified 2009 PQRI registries on the 2009 PQRI registry support conference calls.

If a qualified 2009 PQRI registry fails to submit 2009 PQRI data per the 2009 PQRI registry requirements, the registry will be considered unsuccessful at submitting 2009 PQRI data and will need to go through the full self-nomination process again to participate in the 2010 PQRI. By March 31, 2010, registries that are unsuccessful submitting quality measures results and numerator and denominator data for 2009 will need to be able to meet the 2010 PQRI registry requirements and go through the full vetting process again.

As stated in the proposed rule, the above registry requirements will apply not only for the purpose of a registry qualifying to report 2010 PQRI quality measure results and numerator and denominator data on PQRI individual quality measures or measures groups, but also for the purpose of a registry qualifying to submit the proposed electronic prescribing measure for the 2010 E-Prescribing Incentive Program (see section II.G.5. of this final rule with comment period.

(5) Qualification Requirements for EHR Vendors and Their Products

As stated in the proposed rule (74 FR 33565), we proposed that EHR products listed on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI* as a ''qualified'' EHR product (that is, the name of the vendor software product and the version that is qualified), would be available for the product's users to submit quality data to CMS directly from their system for the 2010 PQRI. We also proposed that we would post this list of qualified EHR vendors and products upon completion of the 2009 EHR Testing Program. We

anticipate the 2009 EHR Testing Program will be complete in early 2010.

Vendors' EHR products that are listed as ''qualified'' products were selected because the vendor self-nominated to participate in the 2009 EHR Testing Program and demonstrated that their products met the ''Requirements for Electronic Health Record (EHR) Vendors to Participate in the 2009 PQRI EHR Testing Program'' that were posted on the Alternative Reporting Mechanisms page of the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI/20_Reporting.asp#TopOfPage* on December 31, 2008. Additionally, a vendor's EHR system must be updated according to the Draft 2010 EHR specifications posted on the Alternative Reporting Mechanisms page of the PQRI section of the CMS Web site in order for an EHR vendor and its product to be qualified to submit information on 2010 PQRI measures.

As stated in the proposed rule (74 FR 33565), we proposed that the EHR vendor requirements described above would apply not only for the purpose of a vendor's EHR product being qualified for the purpose of the product's users being able to submit data extracted from the EHR for the 2010 PQRI, but also for the purpose of a vendor's EHR product being qualified for the purpose of the product's users being able to electronically submit data extracted from the EHR for the electronic prescribing measure for the 2010 E-Prescribing Incentive Program.

The following is a summary of the comments received regarding the proposed 2010 EHR vendor qualification requirements and/or process.

Comment: One commenter recommended we implement an ongoing qualification process for new vendors and systems to enable inclusion of vendors that did not self-nominate or did not exist prior to the reporting year.

Response: Currently there is an ongoing qualification process for new EHR vendors and their products. EHR vendors interested in enabling their customers to submit data on PQRI that is extracted from their customers' EHRs must complete the EHR vendor quality data submission qualification process to be considered. For the 2010 PQRI, we will consider those EHR vendors who successfully completed the 2009 EHR Testing Program to be qualified for purposes of the 2010 PQRI. We will list the vendors qualified for the 2010 PQRI on the PQRI section of the CMS Web site upon completion of the 2009 PQRI EHR Testing Process. We anticipate completing the 2009 PQRI EHR Testing Process in early 2010.

During 2010, we expect to use a similar self-nomination process described in the ''Requirements for Electronic Heath Record (EHR) Vendors to Participate in the 2009 PQRI EHR Testing Program'' posted on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI/20_Reporting.asp#TopOfPage* to qualify additional vendors for the 2011 PQRI. This document is subject to modification for the 2011 EHR self-nomination process. In any case, a vendor must self-nominate no later than January 31, 2010 to be eligible to participate in the 2011 PQRI Testing Process in 2010. Sometime in 2010, those EHR products that meet all of the EHR vendor requirements will be listed on the PQRI section page of the CMS Web site at *http://www.cms.hhs.gov/PQRI* as a ''qualified'' EHR product, which indicates that the vendor's product's users may submit quality data to CMS for the 2011 PQRI or subsequent years.

Comment: Some commenters commended the establishment of electronic standards for EHR-based reporting.

Response: We appreciate the supportive comments regarding the establishment of standard qualification requirements for EHR reporting.

Comment: A few of commenters expressed concern regarding the criteria set forth to rigidly define ''qualified'' EHRs. These concerns stem from the fact that some EHR products are developed for health care professionals specific to their needs (such as physical therapists, oncologists, etc.). Another commenter remarked that vendors for specialty-specific EHR products, such as oncology-specific EHR products, should not have to adjust their software to comply with certification procedures designed for a general ambulatory system. This commenter stated that the goal of EHRs should be to contain comprehensive information relevant to each patient's condition, their treatment plan and outcomes, but in some cases, specific terminology and data collection to support the eligible professional.

Response: We recognize that some EHR products have been designed to accommodate specific specialties, however, we are unclear how this would prevent the EHR product from meeting the EHR qualification requirements other than that there are no measures available for reporting via EHR. As we analyze the EHR reporting mechanism for 2010, we will consider expanding the measures available for electronic submission in the future.

Comment: One commenter recommended that we develop an audit program for EHR vendors, as the PQRI moves away from claims-based reporting. The commenter suggested eligible professionals participating in the PQRI look to CMS for assurance that vendors are regularly inspected for quality.

Response: Ensuring that vendors meet and perform properly would fall under the purview of their certifying body, which is currently CCHIT (if the product is CCHIT certified). During the qualification process (in which we conduct testing to ensure that the EHR can extract and transmit the necessary quality data elements), we evaluate the vendor and their program to see if the system is capable of performing the necessary tasks required for quality reporting to us for PQRI.

Comment: One commenter noted that some practitioners do not have authority under state law to prescribe medications, and thus products developed to meet the needs of these eligible professionals need not incorporate electronic prescribing functionality at this time.

Response: We recognize the concerns cited by the commenter and note that PQRI does not require qualified EHRs to have an electronic prescribing module in order for eligible professionals to participate in the PQRI via a qualified EHR. We believe the commenter is referring to the idea of ''meaningful use'' with respect to requiring an electronic prescribing module in the EHR system for purposes of the HITECH Act incentive programs. The issue of ''meaningful use'' is beyond the scope of this rule.

As previously stated above, only EHR vendors that self-nominated to participate in the 2009 EHR Testing Program and successfully complete the 2009 EHR Testing Program will be considered qualified EHR vendors for the 2010 PQRI. There is no guarantee that there will be any qualified EHR vendors available for the 2010 PQRI since the 2009 EHR Testing Program is still ongoing.

During 2010, we expect to use the self-nomination process described in the ''Requirements for Electronic Health Record (EHR) Vendors to Participate in the 2009 PQRI EHR Testing Program'' posted on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI/20_AlternativeReporting Mechanisms.asp#TopOfPage,* to qualify additional EHR vendors and their EHR products to submit quality data extracted from their EHR products to the CMS clinical quality data warehouse for program years after 2010. We anticipate that the requirements will be similar to those used to qualify EHR products for

the 2009 PQRI EHR Testing Program, but they may be modified based on the results of our 2009 EHR testing. Any updates to the EHR vendor requirements, which would be based on our experience with the 2009 EHR Testing Program and would be non-substantive in nature, will be made December 15, 2009, and will be posted on the PQRI section of CMS Web site at *http://www.cms.hhs.gov/PQRI.* As stated previously, any EHR vendor interested in having one or more of their EHR products ''qualified'' to submit quality data extracted from their EHR products to the CMS clinical quality data warehouse for 2011 and subsequent years must submit their self-nomination letter by January 31, 2010. Instructions for submitting the self-nomination letter will be provided in the 2011 EHR vendor requirements. At the conclusion of this process, those EHR products that meet all of the EHR vendor requirements will be listed on the PQRI section of the CMS Web site as a ''qualified'' EHR product, which indicates that the product's users may submit quality data to CMS for the 2011 PQRI or subsequent years.

e. Criteria for Satisfactory Reporting of Individual Quality Measures for Individual Eligible Professionals

As discussed in the proposed rule (74 33565 through 33568), for years after 2009, section 1848(m)(3)(D) of the Act authorizes the Secretary, in consultation with stakeholders and experts, to revise the criteria for satisfactorily reporting data on quality measures. Based on this authority and the input we have received from stakeholders via the invitation to submit suggestions for the 2010 PQRI reporting options posted on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI* in April 2009, we proposed 3 criteria for satisfactory reporting of individual PQRI quality measures for 2010. In an effort to continue to be consistent with the criteria of satisfactory reporting used in prior PQRI program years, we proposed to retain the following 2 criteria with respect to satisfactorily reporting data on individual quality measures in circumstances where 3 or more individual quality measures apply to the services furnished by an eligible professional:

- Report on at least 3 2010 PQRI measures; and
- Report each measure for at least 80 percent of the eligible professional's Medicare Part B FFS patients for whom services were furnished during the reporting period to which the measure applies.

These criteria would apply to all 2010 PQRI reporting mechanisms available for reporting individual PQRI quality measures.

If an eligible professional has fewer than 3 PQRI measures that apply to the professional's services, then the professional would be able to meet the criteria for satisfactorily reporting data on individual quality measures by meeting the following 2 criteria:

- Reporting on all measures that apply to the services furnished by the professional (that is 1 to 2 measures); and
- Reporting each measure for at least 80 percent of the eligible professional's Medicare Part B FFS patients for whom services were furnished during the reporting period to which the measure applies.

We proposed that, as in previous years, these criteria for satisfactorily reporting data on fewer than 3 individual quality measures would be available for the claims-based reporting mechanism only. An eligible professional who has fewer than 3 PQRI measures that apply to the professional's services would not be able to meet the criteria for satisfactory reporting by reporting on all applicable measures (that is, 1 or 2 measures) through the registry-based or EHR-based reporting mechanisms.

We also proposed that an eligible professional who reports on fewer than 3 measures through the claims-based reporting mechanism in 2010 may be subject to the Measure Applicability Validation (MAV) process, which allows us to determine whether an eligible professional should have reported quality data codes for additional measures. When an eligible professional reports on fewer than 3 measures, we proposed to review whether there are other closely related measures (such as those that share a common diagnosis or those that are representative of services typically provided by a particular type of professional). If an eligible professional who reports on fewer than 3 measures in 2010 reports on a measure that is part of an identified cluster of closely related measures and did not report on any other measure that is part of that identified cluster of closely related measures, then the professional would not qualify to receive a 2010 PQRI incentive payment. Additional information on the MAV process can be found on the Analysis and Payment page of the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI.*

In addition to the above criteria related to the number of measures on which an eligible professional would be required to report and the frequency of reporting, we proposed a third criterion for satisfactory reporting of individual measures. Based on our authority to revise the criteria for satisfactory reporting under section 1848(m)(3)(D) of the Act, we proposed (74 FR 33566) that an eligible professional also be required to report data on at least one individual measure on a minimum number of Medicare Part B FFS patients seen during the reporting period, as detailed below.

Regardless of the reporting mechanism chosen by the eligible professional, we proposed (74 FR 33567) that the minimum patient sample size for reporting individual quality measures be 15 Medicare Part B FFS patients for the 12-month reporting period. An eligible professional would need to meet this minimum patient sample size requirement for at least one measure on which the eligible professional chooses to report. Similarly, for the 6-month reporting period (which was proposed to be available for registry-based reporting only), we proposed that the minimum patient sample size for reporting on individual quality measures be 8 Medicare Part B FFS patients seen during the 6-month reporting period. An eligible professional would need to meet this minimum patient sample size requirement for at least one measure on which the eligible professional chooses to report.

We solicited comments on the proposal to add a minimum patient sample size criterion to the criteria for satisfactory reporting of data on individual quality measures. In addition, we solicited comments on the specific thresholds proposed for the 12-month reporting period (which was proposed to be available for claims-based, registry-based, and EHR-based reporting) and for the 6-month reporting period (which was proposed to be available for registry-based reporting only) for reporting individual quality measures.

The following is summary of the comments we received regarding the criteria for satisfactory reporting of individual quality measures for individual eligible professionals.

Comment: We received several comments supporting the proposed minimum patient sample size requirement for PQRI reporting of individual measures (that is, at least 15 patients for at least 1 measure for the 12-month reporting period and at least 8 patients for at least 1 measure for the 6-month reporting period). A few commenters supported the proposed minimum patient sample requirement

only if eligible professionals are required to meet the proposed threshold(s) for only 1 measure on which they report. Many commenters remarked that the minimum patient sample size requirement would encourage eligible professionals to select more applicable measures while discouraging eligible professionals from selectively reporting measures that are not representative of the types of services they normally provide in their practice. The commenters also remarked that the minimum sample size requirements will enhance the scientific validity of eligible professionals' performance results.

Response: We agree with the reasons cited by commenters for why the minimum patient sample size requirement is important. However, analysis of preliminary data from the 2008 PQRI indicates that a significant number of eligible professionals who would otherwise meet the criteria for satisfactory reporting would be adversely impacted by the addition of a minimum patient sample size requirement to the criteria for satisfactory reporting of individual measures by individual eligible professionals. Therefore, we are not finalizing the proposed minimum patient sample requirement. We will reconsider adding a minimum patient sample requirement to the criteria for satisfactory reporting of individual measures for future years upon further analysis of the PQRI data.

Comment: We also received comments requesting that we withdraw the proposed minimum patient sample requirement. The commenters were concerned that this requirement would create a participation barrier for certain eligible professionals, such as those who treat patients with rare conditions, those with small practices, and/or those with relatively few Medicare patients.

Response: For the reasons stated above and based on the commenters' concerns that such a requirement would create participation barriers for certain eligible professionals, we are not finalizing the proposed minimum patient sample size requirement for the PQRI reporting options for individual measures reporting. However, upon further analysis of the PQRI data, we will reconsider adding a minimum patient sample requirement to the criteria for satisfactory reporting of individual measures and explore other means of enhancing the PQRI criteria for satisfactory reporting for future years.

Comment: A majority of commenters believed that the proposed minimum patient sample size thresholds were appropriate. Some commenters, however, believed that the thresholds should be lowered to 10 or 15 for the 12-month reporting period and 6 for the 6-month reporting period. Other commenters believed that the thresholds should be higher, such as 25 or 30 for the 12-month reporting period.

Response: As stated previously, we are not finalizing the proposed minimum patient sample size requirement for reporting of 2010 PQRI individual measures. As we reassess this requirement for future years, we anticipate that we will continue to monitor the PQRI data on an ongoing basis and reassess the thresholds as needed for future years.

Comment: One commenter suggested that we reconsider allowing registry-based reporting for fewer than 3 measures, primarily to encourage eligible professionals to transition to registry-based reporting, as the claims-based option becomes phased out. This option may also allow greater flexibility for the program.

Response: We appreciate the intent of this comment, however, as in previous years, satisfactorily reporting data on fewer than 3 individual quality measures will only be available for the claims-based reporting mechanism. While we have received similar comments in the past, we continue to believe that permitting an eligible professional to report fewer than 3 measures through the registry-based reporting mechanism, (if fewer than 3 measures apply to him or her) would be inefficient at this time. Analytically it would be difficult to implement in that if an eligible professional submits fewer than 3 measures via registries, we would not know whether the eligible professional did so because only 2 measures applied to him or her or because the registry only accepts data for 2 of the provider's measures and he or she is reporting their third measure via claims. We also look for the most favorable method of reporting (that is, did the eligible professional report via a different method for a longer reporting period as well as whether an eligible professional satisfactorily reported under a different reporting option if he or she did not satisfactorily report for a particular reporting option). Accepting fewer than 3 measures from registries would increase the amount of cross-checking already required and makes it impractical to implement the commenter's suggestions at this time. Should the claims-based reporting mechanism be removed entirely from the PQRI program at some point in the future, we may revisit the issue of allowing registries to submit data for eligible professionals on fewer than 3 measures.

Comment: One commenter remarked that limiting EHR-based reporting to reporting on individual measures would limit the ability of some eligible professionals to report on the measures most relevant to them by eliminating one reporting mechanism (such as electronic reporting of the back pain measures for spine care).

Response: The EHR reporting mechanism for PQRI is still in an early development phase. This mechanism will be closely examined in the future, and may be expanded as appropriate. We believe that the first set of measures specified electronically have broad appeal in that they deal with common conditions such as diabetes and prevention.

Comment: Some commenters recommended significant changes to the criteria for satisfactory reporting that would not be consistent with the criteria for satisfactory reporting for prior years. For example, one commenter recommended that as the PQRI moves forward, the definition of satisfactory reporting should not be determined by what the commenter believed were somewhat arbitrary formulas but rather by accurate data that is able to reflect the ways in which a provider attempted to relay the quality of their patient care. Another commenter recommended that CMS phase out the existing process by which participating professionals select the measures on which they will be report. Instead CMS should assign each participating individual eligible professional with sets of measures for high volume conditions, based on services provided to their patient population. Similarly, another commenter recommended more criteria to guide measure selection by eligible professionals and that we require eligible professionals to report on 6 measures.

Response: We agree with commenters that as the PQRI matures, we will need to reassess the criteria for satisfactory reporting so that the information that we collect becomes more representative of the quality of care provided by eligible professionals. We also generally agree with the goals cited by the commenters, but have concerns that the specific suggestions offered by the commenters are not operationally practical and feasible when we take into account the vast numbers of eligible professionals and the diversity of their practices.

In addition, we believe that such significant changes should occur gradually. The criteria for satisfactory reporting are specifically defined under section 1848(m)(3)(A) of the Act. With

the authority under section 1848(m)(3)(D) of the Act to revise the criteria for satisfactory reporting for years after 2009, we have started to move towards the direction recommended by commenters with the introduction of the minimum patient sample size requirement for individual measures reporting for the 2010 PQRI. In addition, the new PQRI group practice reporting option also moves the PQRI towards the direction recommended by commenters in that we assign participating group practices both the measures and patients on which they are required to report. We will consider additional changes to the criteria for satisfactory reporting for 2011 and beyond and look forward to receiving stakeholder input on how we can revise the criteria for satisfactory reporting in an operationally practical and feasible manner to achieve the goals cited by commenters.

Comment: One comment was received with respect to the MAV, which allows us to determine whether an eligible professional should have reported quality data codes for additional measures when an eligible professional submits fewer than 3 individual PQRI measures. The commenter requested that CMS provide updates on newly identified clusters of closely related measures that will be employed in the MAV for 2010.

Response: No changes are planned for the MAV process for 2010. Additional information on the MAV process are listed on the Analysis and Payment page of the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI.* However, we are contemplating some changes to the clusters of closely related measures based on the addition or removal of measures in the 2010 PQRI or the fact that certain measures included in these clusters will become registry-only measures for 2010. For example, if measures in an existing cluster are retired for the 2010 PQRI or are made registry-only then the cluster will be revised or deleted as appropriate.

Based on the new 2010 PQRI measures, the only new clusters being contemplated are a second preventive cluster, 2 new anesthesia care clusters, an ear care cluster, and an Ischemic Vascular (IVD) cluster. The second preventive cluster would consist of the following 2 measures: (1) Measure #114 Preventive Care and Screening: Inquiry Regarding Tobacco Use and (2) Measure #115 Preventive Care and Screening: Advising Smokers and Tobacco Users to Quit. The first anesthesia care cluster would consist of 2 measures: (1) Measure #30 Perioperative Care: Timely Administration of Prophylactic Parenteral Antibiotics and (2) Measure #76 Prevention of Catheter-Related Bloodstream Infections (CRBI): Central Venous Catheter (CVC) Insertion Protocol. The second anesthesia care cluster would consist of Measure #76 and the new Perioperative Temperature Management measure. For both of the anesthesia care clusters, however, the MAV would not apply if an eligible professional reports only Measure #76. Measure # 76 is a broadly applicable measure that encompasses services often provided by eligible professionals for whom Measure #30 and the Perioperative Temperature Management measure do not apply such as intensivists, hospitalists, internists, and emergency physicians. The ear care cluster would consist of the 3 new referral for otologic evaluation measures listed in Table 13 of this final rule. The IVD cluster would consist of the following 4 new PQRI measures:

- Ischemic Vascular Disease (IVD): Blood Pressure Management Control;
- Ischemic Vascular Disease (IVD): Complete Lipid Profile;
- Ischemic Vascular Disease (IVD): Low Density Lipoprotein (LDL–C) Control; and
- Ischemic Vascular Disease (IVD): Use of Aspirin or Another Anti-Thrombotic.

By no later than December 31, 2009, we will post the final MAV process for 2010 and the final 2010 MAV clusters on the Analysis and Payment page of the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI/25_AnalysisAndPayment.asp#TopOfPage.*

After considering the comments and the new 6-month reporting period for claims-based reporting of individual PQRI quality measures that we are adding to the 2010 PQRI at the request of commenters, the final 2010 criteria for satisfactory reporting of data on individual PQRI quality measures are summarized in Table 7 and are arranged by reporting mechanism and reporting period. The criteria for satisfactory reporting for claims-based reporting of individual PQRI quality measures for the 6-month reporting period are consistent with the criteria for satisfactory reporting of individual PQRI quality measures.

For the 2010 PQRI, there are a total of 5 reporting options, or ways, in which an eligible professional may meet the criteria for satisfactory reporting on individual quality measures. Each reporting option consists of the criteria for satisfactory reporting such data and results on individual quality measures relevant to a given reporting mechanism and reporting period. While eligible professionals may potentially qualify as satisfactorily reporting individual quality measures under more than one of the reporting criteria, reporting mechanisms, and/or for more than one reporting period, only one incentive payment will be made to an eligible professional based on the longest reporting period for which the eligible professional satisfactorily reports.

TABLE 7—2010 CRITERIA FOR SATISFACTORY REPORTING OF DATA ON INDIVIDUAL PQRI QUALITY MEASURES, BY REPORTING MECHANISM AND REPORTING PERIOD

Reporting mechanism	Reporting criteria	Reporting period
Claims-based reporting	• Report at least 3 PQRI measures, or 1–2 measures if less than 3 measures apply to the eligible professional; and • Report each measure for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measure applies.	January 1, 2010–December 31, 2010.
Claims-based reporting	• Report at least 3 PQRI measures, or 1–2 measures if less than 3 measures apply to the eligible professional; and • Report each measure for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measure applies.	July 1, 2010–December 31, 2010.
Registry-based reporting	• Report at least 3 PQRI measures; and	January 1, 2010–December 31, 2010.

TABLE 7—2010 CRITERIA FOR SATISFACTORY REPORTING OF DATA ON INDIVIDUAL PQRI QUALITY MEASURES, BY REPORTING MECHANISM AND REPORTING PERIOD—Continued

Reporting mechanism	Reporting criteria	Reporting period
Registry-based reporting	• Report each measure for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measure applies. • Report at least 3 PQRI measures; and • Report each measure for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measure applies.	July 1, 2010–December 31, 2010.
EHR-based reporting	• Report at least 3 PQRI measures; and • Report each measure for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measure applies.	January 1, 2010–December 31, 2010.

f. Proposed Criteria for Satisfactory Reporting Measures Groups for Individual Eligible Professionals

For the 2010 PQRI, we proposed 2 basic sets of criteria for satisfactory reporting on a measures group (74 FR 33568). Both sets of criteria would apply to the claims-based and registry-based reporting mechanism. We did not propose to make the EHR-based reporting mechanism available for reporting on measures groups in 2010.

The first set of proposed criteria, which we proposed to make available for either the 12-month or 6-month reporting period in 2010, would be consistent with the 2009 criteria for satisfactory reporting of measures groups through registry-based reporting, which require the reporting of at least 1 measures group for at least 80 percent of patients to whom the measures group applies during the applicable reporting period (with reporting required on a minimum number of Medicare Part B FFS patients commensurate with the reporting period duration). In the 2009 PQRI, there was a requirement under these criteria to report each measures group on at least 30 Medicare Part B FFS patients for the 12-month reporting period and at least 15 Medicare Part B FFS patients for the 6-month reporting period for registry-based reporting of measures groups. For the 2010 PQRI, we proposed to revise the requirement by making these criteria applicable to both registry-based and claims-based reporting and to change the number of Medicare Part B FFS patients on which an eligible professional would be required to report a measures group. We proposed to require an eligible professional who chooses to report on measures groups based on reporting on 80 percent of applicable patients to report on a minimum of 15 Medicare Part B FFS patients for the 12-month reporting period and a minimum of 8 Medicare Part B FFS patients for the 6-month reporting period, regardless of whether the eligible professional chooses to report the measures group through claims-based reporting or registry-based reporting.

The second set of proposed criteria, which we proposed to make available for the 12-month reporting period only, would be based on reporting on a measures group on a specified minimum number of patients (74 FR 33568). The second set of criteria would require reporting on at least 1 measures group for at least 30 patients seen between January 1, 2010 and December 31, 2010 to whom the measures group applies. Unlike the 2009 PQRI, which required that eligible professionals report on consecutive patients (that is, patients seen in order, by date of service), the 30 patients on which an eligible professional would need to report a measures group for 2010 would not need to be consecutive patients. The eligible professional would be able to report on *any* 30 unique patients seen during the reporting period to which the measures group applies. As in previous years, we proposed that for 2010, the patients, for claims-based reporting, would be limited to Medicare Part B FFS patients. For registry-based reporting, however, we proposed that the patients could include some, but not be exclusively, non-Medicare Part B FFS patients.

We solicited comments on our proposal to make the criteria for satisfactory reporting of measures groups more consistent with those proposed for reporting individual measures, including our proposal to revise the minimum sample size requirement related to satisfactory reporting on measures group through the registry-based reporting mechanism so that the criteria for satisfactory reporting of measures groups, regardless of reporting mechanism, would be identical to those proposed for reporting individual measures. We also solicited comments on our proposal to allow eligible professionals to report on measures groups on any 30 patients rather than a consecutive patient sample.

The following is summary of the comments we received regarding the criteria for satisfactory reporting measures groups for individual eligible professionals.

Comment: A few commenters agreed with the proposal to make the criteria for satisfactory reporting of measures groups more consistent with those proposed for reporting individual measures. One commenter cited that doing so makes the program more accessible and improves the commenter's ability to educate their members.

Response: We agree that making the criteria for satisfactory reporting of measures groups more consistent with those proposed for reporting individual measures should facilitate participation and enhance education efforts. For the reasons cited in section II.G.2.e. of this final rule with comment period, we are not finalizing our proposal to add a minimum patient sample requirement to the criteria for satisfactory reporting of individual measures. For the 2010 PQRI criteria for satisfactory reporting of measures groups, however, we will retain the minimum patient sample size requirement for those eligible professionals who choose to report on measures groups based on reporting on 80 percent of applicable patients and will finalize the lower thresholds for the minimum patient sample size requirement proposed for 2010.

Comment: We received numerous comments in support of our proposal to allow eligible professionals to report on measures groups on any 30 patients rather than a consecutive patient sample.

Response: We appreciate the commenters' positive feedback and hope that this change will make measures group reporting a more

attractive option for eligible professionals.

Comment: A few commenters were opposed to removing the requirement that the 30 patients be consecutive. A few commenters expressed that reporting of measures groups on consecutive patients reduces opportunities for selectively reporting patients or cases with more favorable results or would result in reporting on non-representative patient samples. Another commenter suggested the CMS eliminate the option of reporting on 30 patients through claims altogether or allow eligible professionals to report on non-consecutive patients but require a reporting period within which the 30 patients must be selected.

Response: We believe that retaining the option to report on 30 patients provides an incentive to eligible professionals to consider reporting measures groups instead of individual PQRI measures. As we have stated previously, we believe that measures groups enable a more comprehensive assessment of patient care for a given clinical condition or focus by addressing several aspects of care for that particular clinical condition or focus. Because we believe that measures groups may often provide more meaningful information about the care being furnished to Medicare beneficiaries than individual measures reported in isolation, we would like to encourage measures group reporting where possible.

With respect to commenters' concerns that removing the requirement that eligible professionals report on 30 patients, we reiterate that we believe that it would be difficult for eligible professionals to selectively choose which patients to report on since they must report on multiple measures for a given clinical condition or focus. We will, however, continue to monitor the PQRI data to determine whether this needs to be reassessed in future years.

Comment: We received some comments supporting the proposed revisions to the minimum patient sample size requirement for PQRI reporting of measures group (that is, reducing the thresholds from reporting at least 30 patients for at least 1 measures group for the 12-month reporting period and at least 15 patients for at least 1 measures group for the 6-month reporting period to 15 and 8 patients, respectively). Some commenters also remarked that the proposed thresholds were reasonable and appropriate. One commenter, however, remarked that the proposed thresholds were not adequate.

Response: We are finalizing the thresholds as proposed to provide eligible professionals with fewer than 30 patients an opportunity to report on PQRI measures groups for 2010. As identified in Table 8, the new minimum patient sample size thresholds for measures groups reporting for the 2010 PQRI will be 15 patients for at least 1 measures group for the 12-month reporting period and 8 patients for at least 1 measures group for the 6-month reporting period.

As suggested by another commenter, however, we will continue to monitor the PQRI data on an ongoing basis to determine whether the criteria for satisfactory reporting of measures groups, including the minimum patient sample size requirements, need to be re-evaluated for future years.

After considering the comments and for the reasons discussed previously, the final 2010 criteria for satisfactory reporting of data on measures groups are summarized in Table 8 and are arranged by reporting mechanism and reporting period. Accordingly, there are a total of 6 reporting options, or ways in which an eligible professional may meet the criteria for satisfactory reporting of measures groups for the 2010 PQRI. Each reporting option consists of the criteria for satisfactory reporting relevant to a given reporting mechanism and reporting period. As stated previously, while eligible professionals may potentially qualify as satisfactorily reporting on measures groups under more than one of the reporting criteria, reporting mechanisms, and/or for more than one reporting period, only one incentive payment will be made to an eligible professional based on the longest reporting period for which the eligible professional satisfactorily reports. Similarly, an eligible professional could also potentially qualify for the PQRI incentive payment by satisfactorily reporting both individual measures and measures groups. However, only one incentive payment will be made to the eligible professional based on the longest reporting period for which the professional satisfactorily reports.

TABLE 8—2010 CRITERIA FOR SATISFACTORY REPORTING ON MEASURES GROUPS, BY REPORTING MECHANISM AND REPORTING PERIOD

Reporting mechanism	Reporting criteria	Reporting period
Claims-based reporting	• Report at least 1 PQRI measures group; • Report each measures group for at least 30 Medicare Part B FFS patients.	January 1, 2010—December 31, 2010.
Claims-based reporting	• Report at least 1 PQRI measures group; • Report each measures group for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measures group applies; and • Report each measures group on at least 15 Medicare Part B FFS patients seen during the reporting period to which the measures group applies.	January 1, 2010—December 31, 2010.
Claims-based reporting	• Report at least 1 PQRI measures group; • Report each measures group for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measures group applies; and • Report each measures group on at least 8 Medicare Part B FFS patients seen during the reporting period to which the measures group applies.	July 1, 2010–December 31, 2010.
Registry-based reporting	• Report at least 1 PQRI measures group; • Report each measures group for at least 30 patients. Patients may include, but may not be exclusively, non-Medicare Part B FFS patients.	January 1, 2010–December 31, 2010.

TABLE 8—2010 CRITERIA FOR SATISFACTORY REPORTING ON MEASURES GROUPS, BY REPORTING MECHANISM AND REPORTING PERIOD—Continued

Reporting mechanism	Reporting criteria	Reporting period
Registry-based reporting	• Report at least 1 PQRI measures group; • Report each measures group for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measures group applies; and • Report each measures group on at least 15 Medicare Part B FFS patients seen during the reporting period to which the measures group applies.	January 1, 2010–December 31, 2010.
Registry-based reporting	• Report at least 1 PQRI measures group; • Report each measures group for at least 80% of the eligible professional's Medicare Part B FFS patients seen during the reporting period to whom the measures group applies; and • Report each measures group on at least 8 Medicare Part B FFS patients seen during the reporting period to which the measures group applies.	July 1, 2010–December 31, 2010.

g. Reporting Option for Satisfactory Reporting on Quality Measures by Group Practices

As discussed above, for 2010, incentive payments will be available to group practices based on the determination that the group practice, as a whole (that is, for the TIN), satisfactorily reports on PQRI quality measures for 2010. If, however, an individual eligible professional is affiliated with a group practice participating in the group practice reporting option and the group practice satisfactorily reports under the group practice reporting option, the eligible professional will not be eligible to earn a separate PQRI incentive payment for 2010 on the basis of his or her satisfactorily reporting PQRI quality measures data at the individual level under that same TIN (that is, for the same TIN/NPI combination).

(1) Definition of ''Group Practice''

As stated in the proposed rule (74 FR 33570), section 1848(m)(3)(C)(i) of the Act authorizes the Secretary to define ''group practice.'' For purposes of determining whether a group practice satisfactorily submits PQRI quality measures data, we proposed that a ''group practice'' would consist of a physician group practice, as defined by a single TIN, with at least 200 or more individual eligible professionals (as identified by Individual NPIs) who have reassigned their billing rights to the TIN. We solicited comments on the proposed definition of ''group practice'' and our proposal to limit initial implementation of the PQRI group practice reporting option in 2010 to practices with 200 or more individual eligible professionals.

We also proposed to require group practices to complete a self-nomination process and to meet certain technical and other requirements in order to participate in the 2010 PQRI through the group practice reporting option (74 FR 33570). Group practices interested in participating in the 2010 PQRI through the group practice reporting option would be required to submit a self-nomination letter to CMS requesting to participate in the 2010 PQRI group practice reporting option. The following is a summary of the comments received regarding the proposed definition of ''group practice'' and the proposed self-nomination requirements.

Comment: Several commenters requested that we consider allowing smaller group practices to participate in this reporting option. Commenters were concerned that defining a group practice as 200 or more eligible professionals will lead to inaccurate data and further bias. Commenters encouraged us to look for ways to make the option more accessible for most group practices, including those that are not large group practices. Commenters requested that we consider whether in the future smaller group practice sizes should be allowed to participate in this option. Commenters also requested an alternative reporting option that uses statistical sampling for primary care oriented group practices that report measures only applicable to primary care physicians.

Response: We are appreciative of the commenters' thoughtful and constructive feedback and will take these concerns into consideration as we further develop the group practice reporting option. However, the group practice reporting option draws from the experiences of the Physician Group Practice (PGP) demonstration and the Medicare Care Management Performance (MCMP) demonstration. Each of these demonstrations included physician groups, but of different sizes. The PGP demonstration, which the group practice reporting option statistical sampling method is primarily modeled after, has been successful. We recognize that the group practice size of 200 or more individual eligible professionals limits participation. The inclusion of smaller group practices that is those with less than 200 individual eligible professionals, in the group practice reporting option was not proposed at this time because we believe it is unlikely that the smaller groups would be able to achieve 411 assigned Medicare beneficiaries per disease module or preventive care measure that we use under the demonstration. We will use this initial implementation year to further develop and refine aspects of the group practice reporting option and anticipate adapting and expanding this option to group practices less than 200 individual eligible professionals in future program years.

Comment: Several commenters were supportive of the group practice reporting option and thought that the group level data would be more meaningful. Commenters expressed that they are pleased to see the group practice reporting option which has many benefits and that CMS has taken a logical step of initially basing the group reporting process on the PGP and MCMP demonstrations. A commenter stated that group practice reporting option encourages voluntary reporting and promotes better care coordination and a team-based approach to care. One commenter suggested that the group practice reporting option reduces the significant resources which practices currently need to report measures. Another commenter stated the group

practice reporting option allows for increased provider participation and greater transparency in the healthcare provided to Medicare beneficiaries and suggested that the group practice reporting option will bring greater attention to a range of important therapeutic areas.

Response: The group practice reporting option is based on certain aspects of the PGP and the MCMP demonstrations. As defined, the group practice reporting option is intended for large physician groups to report on the high-cost chronic care quality measures for the specific disease modules and preventive care.

Comment: A few commenters supported the proposal for public reporting of group practices' performance results. One commenter, however, did so with the caveat that CMS monitors the results to ensure that there are no unintended consequences.

Response: We appreciate the commenters' positive feedback. As we have stated previously, it is our desire to be able to move towards public reporting of performance results for physicians and other eligible professionals. We believe that public reporting of group practice performance results provides an opportunity to move towards achieving that goal with PQRI data.

Comment: Several commenters were opposed to public reporting of the group practices' PQRI performance results because they believe:

- The reporting process for group practices needs to be further tested to ensure that there are no problems when we implement this process into PQRI, that validity and accuracy of the measures as a reflection of performance, and that there are no unintended consequences;
- CMS does not have specific authority from the Congress to post performance results;
- Doing so would be premature and discourage groups from participating in this option;
- Many issues identified in the CMS Issue Paper: Development of a Plan to Transition to a Medicare Value-Based Purchasing Program for Physician and Other Professional Services should be addressed prior to public reporting of performance results. Once addressed, public reporting of performance results should be conducted for all PQRI participants, not just group practices;

For similar reasons, other commenters requested that we delay public reporting of the group practices' performance results for at least 1 year or wait until we are fully satisfied with the reliability and validity of the performance data collected from group practices.

Response: Section 1848(m)(3)(C) of the Act requires us to establish a process under which eligible professionals in a group practice shall be treated as satisfactorily submitting data on PQRI quality measures and provides the Secretary with the discretion to determine how to set up this process. For group practices that choose to participate in the PQRI, participation in the group practice reporting option is voluntary. Group practices have a choice as to whether they wish to participate in PQRI with each eligible professional in the group participating individually using one of the reporting options available to individual eligible professionals or to participate as a group through the group practice reporting option.

Furthermore, we believe that public reporting of performance information at the group level does not present some of the same issues that public reporting of performance information at the individual eligible professional would. For example, as we stated in the CY 2010 PFS proposed rule, no performance results would be calculated based on small denominator sizes due to the reporting criteria for the group practice reporting option, which require that group practices report each disease module or preventive care measure under the group practice reporting option for 411 patients. Nevertheless, we take note of the importance of working through the concerns raised by commenters about publicly posting groups' performance results, especially commenters' concerns about doing so in the first year of implementation of the group practice reporting option and the importance of giving participating group practices an opportunity to review their results from the first year of the group practice reporting option before any information is publicly reported. Therefore, we are not finalizing our proposal to require group practices that wish to utilize the group practice reporting option in 2010 to agree to have their PQRI performance results publicly reported. In addition, we will not report any 2010 group practice performance results publicly except as otherwise required by law and will limit public reporting of information on the PQRI group practice reporting for 2010 to the information required by section 1848(m)(5)(G)(i) of the Act (that is, the names of group practices that satisfactorily submitted data on 2010 PQRI quality measures). Instead, we will consider implementing public reporting of group practices' performance results in the 2011 PQRI program year.

For the reasons discussed above and based on these comments, a group practice, for purposes of finalizing the 2010 PQRI group practice reporting option, a group practice will consist of a single TIN with at least 200 or more individual eligible professionals (as identified by Individual NPIs) who have reassigned their billing rights to the TIN. Additionally, the TIN and all Individual NPIs must be established Medicare providers.

To participate in the 2010 PQRI group practice reporting option, a group practice will be required to submit a self-nomination letter indicating the group practice's interest in participating in the 2010 PQRI group practice reporting option. Also, the letter must be accompanied by an electronic file submitted in a format specified by CMS (such as, a Microsoft Excel file) that includes the group practice's TIN and the Individual NPI numbers, name of the group practice, and names of all eligible professionals who will be participating as part of the group practice (that is, all Individual NPI numbers, which are established Medicare providers and associated with the group practice's TIN), a single point of contact for handling administrative issues as well as a single point of contact for technical support purposes. In addition, the self-nomination letter must also indicate the group practice's compliance with the following requirements:

- Have an active IACS user account;
- Agree to attend and participate in all mandatory training sessions; and
- Have billed Medicare Part A and Part B on or after January 1, 2009 and prior to October 29, 2009.

The final participation requirements listed above for group practices, including instructions for submitting the self-nomination letter and other requested information, will be posted on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI* by November 15, 2009. Group practices that wish to self-nominate for 2010 will be required to do so by January 31, 2010. Upon receipt of the self-nomination letters we will assess whether the participation requirements were met by each self-nominated group practice using 2009 Medicare claims data.

As discussed further in section II.G.5. of this final rule, participation in the E-Prescribing Incentive Program is voluntary for group practices selected to participate in the PQRI group practice reporting option. However, we are requiring group practices to participate in the PQRI group practice reporting option in order to be eligible to

participate in the electronic prescribing group practice reporting option. Therefore, a group practice that wishes to participate in both the PQRI group practice reporting option and the electronic prescribing group practice reporting must notify CMS of its desire to do so at the time that it self-nominates to participate in the PQRI group practice reporting option.

(2) Process for Physician Group Practices to Participate as Group Practices and Criteria for Satisfactory Reporting Data on Quality Measures by Group Practices

For physician groups selected to participate in the PQRI group practice reporting option for 2010, we proposed (74 FR 33570) the reporting period would be the 12-month reporting period beginning January 1, 2010. We proposed that group practices would be required to submit information on these measures using a data collection tool based on the data collection tool used in CMS' MCMP demonstration and the quality measurement and reporting methods used in CMS' PGP demonstration. We proposed that physician groups selected to participate in the 2010 PQRI through the group practice reporting option would be required to report on a common set of 26 NQF-endorsed quality measures that are based on measures currently used in the MCMP and/or PGP demonstration and that target high-cost chronic conditions and preventive care.

As part of the data submission process, we proposed that, beginning in 2011, each group practice would be required to report quality measures with respect to services furnished during the 2010 reporting period (that is, January 1, 2010 through December 31, 2010) on an assigned sample of Medicare beneficiaries. We proposed to analyze the January 1, 2010 through October 29, 2010 (that is, the last business day of October 2010) National Claims History (NCH) file to assign Medicare beneficiaries to each physician group practice using the same patient assignment methodology used in the PGP demonstration.

We solicited comments on our proposal to adopt the PGP demonstration's quality measurement and reporting methods for the PQRI group practice reporting option. We specifically requested comments on the proposed patient assignment methodology and our proposal to use a data collection tool based on the one used in the MCMP demonstration as the reporting mechanism for physician groups selected to participate in the PQRI group practice reporting option.

We also proposed 2 criteria for satisfactory reporting of quality measures by a physician group (74 FR 33571). First, the physician group would be required to report completely on all of the proposed modules and measures listed in Table 34 of the proposed rule (74 FR 33588). Second, the physician group would be required to report completely on the first 411 consecutively assigned and ranked Medicare beneficiaries per disease module or preventive care measure.

The following is a summary of the comments we received regarding the proposed reporting option for satisfactory reporting on quality measures by group practices under PQRI.

Comment: One commenter was troubled by our proposal to model the PQRI group practice reporting option on the PGP demonstration since only half of PGP participants earned the incentive payment in the 3rd year of the demonstration. Another commenter noted that transitioning from individual eligible professional reporting to group practice reporting and from pay-for-reporting to pay-for-performance are major and challenging steps.

Response: Although we are planning to model the data collection and sampling process for the PQRI group practice reporting option after the PGP demonstration, we reiterate that the PQRI group practice reporting option is distinct from the PGP demonstration. The requirements to qualify for the incentive for PQRI are different from the requirements to qualify for an incentive payment under the demonstration. Whereas the PGP demonstration is a pay-for-performance demonstration, the PQRI group practice reporting option, like the remainder of the PQRI program, is solely a pay-for-reporting program. Group practices will qualify for a PQRI incentive payment based on meeting the reporting criteria. The PQRI incentive is *not* based on the group practice's performance on the measures nor on cost savings.

Comment: Several Commenters were concerned with the proposed patient assignment methodology. A few commenters asked CMS to reconsider requirements in order to refine the attribution methodology. One commenter opposed the retrospective attribution. One commenter suggested that we limit the E/M visits to primary care physicians selected other specialists, such as endocrinologists and cardiologists, who frequently provide and coordinate care for Medicare beneficiaries. Another commenter recommended the following refinements: (1) Use claims that have the CPT code for ''established'' patients only; (2) use claims that show the place of service code 11 (the code for office visits); and (3) require that the patients have had at least two office visits during the year in order to get into the sample.

Response: For the group practice reporting option, the patient sample will be based on Medicare Part B claims submitted by the group practices' TIN for services provided from January 1, 2010 through October 29, 2010. Only claims appearing in CMS NCH by October 29, 2010, will be considered in the patient sampling and assignment processes. Patients will be assigned to the group practice if they receive the plurality of their Office or Other Outpatient E/M services from the practice. The assigned patients who are selected for quality reporting must have received Office or Other Outpatient E/M services from the practice at least two times in the 10-month period. Furthermore, part-year and managed care patients will not be considered since we have incomplete claims for these individuals and groups may not have had sufficient time to impact the quality of their care. The retrospective attribution will allow CMS to more accurately assign patients using Medicare Part B claims that have been submitted by the group practices' TIN and processed into the NCH.

Comment: One commenter stated that the eligible professionals' affiliation with a group practice will dictate participation. A commenter asked us to allow group practices the flexibility to decide at any stage in the reporting process whether they want to continue with the group reporting process.

Response: The group practice reporting option provides an additional method of participating in PQRI. We do not dictate participation in PQRI, nor do we dictate whether an eligible professional participates in PQRI as an individual or as part of a group. PQRI is a voluntary program. The decision to participate in PQRI is at the discretion of the eligible professional. The eligible professional may participate in PQRI under multiple unique TIN/NPI combinations. An eligible professional may also report via more than one reporting option. The eligible professional cannot, however, receive a duplicate incentive payment for the same TIN/NPI combination.

The eligible professional can receive separate incentive payments by participating and qualifying under one or more unique TIN/NPI combinations. For example, if an eligible professional with TIN/NPI 003/001 participates in the group practice reporting option for one practice and also participates as an

individual using TIN/NPI 005/001 the eligible professional can qualify and earn a separate incentive payment for both TIN/NPI combinations because this is under a different TIN/NPI combination. In the event that a group practice is unsuccessful with the group practice reporting option, we will not conduct analysis to determine if the TIN/NPI qualified and is incentive eligible for other methods of PQRI participation. There is no appeals process for PQRI.

Comment: One commenter asked that we provide a mechanism for allowing group practices to deselect patients who have been assigned to the group practice.

Response: We understand that due to circumstances out of the groups' control (that is, death, unable to locate a medical record, etc.) that the group practice may not be able to report completely on 100 percent of the first 411 consecutively ranked assigned patient sample. The reporting tool allows for exclusions in certain instances and the group will not be required to populate the tool when these circumstances arise. In order to accommodate for such issues, each group practice will be assigned an over sample of patients, which will assure that the group practice reports completely on 411 consecutively assigned patients per disease module and preventive care measure to report on. The experience from the PGP demonstration has shown that this sampling method provides a sufficient number of assigned patients in the event that the deselection of assigned patients is warranted.

Comment: One commenter specifically supported using the Performance Assessment Tool (PAT), which is the data collection tool used in the PGP and MCMP demonstrations and proposed for use in PQRI group practice reporting option. Another commenter supports using the PAT and applauds quick turnaround time we anticipate for providing pre-populated results to practices.

Response: We appreciate the commenters' support for the data collection tool. We anticipate providing the selected group practices with a pre-populated data collection tool. Data fields will be pre-populated based on Medicare claims and demographic information for dates of service between January 1, 2010 and October 29, 2010. This tool will be modeled after the PAT currently in use for the MCMP program, with some modifications. The tool will require, at a minimum, standard PC image with Microsoft Office and Microsoft Access software installed and minimum software configurations for the group practices to successfully complete the data collection tool. The data collection tool may potentially provide a high level feedback (submission) report to the group practice, including such information as percentage of patients that have been completed in the sample and percentage of positive measure results. These features will allow the group practices to verify data prior to submitting it to us. We reserve the right to audit the data submitted by the group practices.

Comment: One commenter stated that only those group practices that have participated in the PGP demonstration will be successful in completing the tool and participating in the group practice reporting option.

Response: Group practices participating in the PGP demonstration will not be allowed to participate in the PQRI group practice reporting option in 2010. We acknowledge that there will be a learning period needed to become familiar with and to complete the tool. Group practices that are selected to participate in the PQRI group practice reporting option will be required to attend mandatory training sessions. Prior to these mandatory training sessions, we anticipate providing the group practices with a sample tool to become familiar with its functionality and reporting process. Additionally, we may establish periodic conference calls with the group practices, with most calls being held during the tool data entry period, to provide technical support to practices. The group practices will be required to designate administrative and technical points of contact to streamline and assist with communication.

Comment: One commenter stated that it would be challenging for group practices to report on 26 measures.

Response: We disagree that it would be challenging for group practices to report on 26 measures. We will be prepopulating the data collection tool that will be used for the PQRI group practice reporting option with claims and other demographic information on the group practices' assigned Medicare beneficiaries prior to sending the data collection tool to the groups to complete. Furthermore, we believe the burden of reporting the 26 measures is outweighed by the potential incentive payment. Completion of this data collection tool on all 26 measures for the required number of patients essentially qualifies the group practice for an incentive payment equal to 2.0 percent of the group practice's estimated total Medicare Part B PFS allowed charges for services furnished during the reporting period.

For the reasons discussed above and after taking into consideration the comments, we are finalizing the process group practices will be required to use to report data on quality measures for the 2010 PQRI as a group practice and the associated criteria for satisfactory reporting of data on quality measures by group practices, which are summarized in Table 9. Group practices participating in PQRI as a group practice will be required to report on all of the measures listed in Table 28 of this final rule with comment period. These quality measures are grouped into preventive care measures and four disease modules: diabetes; heart failure; coronary artery disease; and hypertension.

Although the process for physician groups to participate in PQRI as a group practice incorporates some characteristics and methods from the PGP demonstration and the MCMP demonstration, the PQRI group practice reporting option is a separate program with its own specifications and methodology from the PGP and MCMP demonstration programs. The reporting process for the group practice reporting option, including the use of a data collection tool as the reporting mechanism, will not be available to individual eligible professionals participating in the 2010 PQRI.

As stated in the proposed rule (74 FR 33570 through 33571), we will analyze the January 1, 2010 through October 29, 2010, NCH file to assign Medicare beneficiaries to each physician group practice using the same patient assignment methodology used in the PGP demonstration. Assigned beneficiaries will be limited to those Medicare FFS beneficiaries with Medicare Parts A and B for whom Medicare is the primary payer. Assigned beneficiaries will not include Medicare Advantage enrollees. A beneficiary will be assigned to the physician group that provides the plurality of a beneficiary's office or other outpatient E/M allowed charges (based on Medicare Part B claims submitted for the beneficiary for dates of services between January 1, 2010 and October 29, 2010). Beneficiaries with only 1 visit to the group practice between January 1, 2010 and October 29, 2010, will be eliminated from the group practice's assigned patient sample. For inclusion in the sample, beneficiaries will be required to have at least 2 visits to the group practice between January 1, 2010 and October 29, 2010.

Once the beneficiary assignment has been made for each physician group

during the fourth quarter of 2010, we will provide each physician group selected to participate in the group practice reporting option with access to a database (that is, a data collection tool) that will include the group's assigned beneficiary samples and the quality measures listed in Table 28. We will prepopulate the data collection tool with the assigned beneficiaries' demographic and utilization information based on all of their Medicare claims data. We intend to provide the selected physician groups with access to this prepopulated database by no later than the first quarter of 2011. The physician group will be required to populate the remaining data fields necessary for capturing quality measure information on each of the assigned beneficiaries. Numerators for each of the quality measures will include all beneficiaries in the denominator population who also satisfy the quality performance criteria for that measure. Denominators for each quality measure will include a sample of the assigned beneficiaries who meet the eligibility criteria for that disease module or each preventive care quality measure. All of the assigned patients' inpatient, outpatient, and physician claims will be used in determining clinical eligibility for each module. Identical to the sampling method used in the PGP demonstration, the random sample must consist of at least 411 assigned beneficiaries. If the pool of eligible assigned beneficiaries is less than 411, then the group practice must report on 100 percent, or all, of the assigned beneficiaries to satisfactorily participate in the group practice reporting option. For each disease module or preventive care measure, the physician group will be required to report information on the assigned patients in the order in which they appear in the group's sample (that is, consecutively).

TABLE 9—2010 PROCESS FOR PHYSICIAN GROUP PRACTICES TO PARTICIPATE AS GROUP PRACTICES AND CRITERIA FOR SATISFACTORY REPORTING OF DATA ON QUALITY MEASURES BY GROUP PRACTICES

Reporting mechanism	Reporting criteria	Reporting period
• A pre-populated data collection tool provided by CMS.	• Report on all measures included in the data collection tool (26 measures); and • Complete the tool for the first 411 consecutively ranked and assigned beneficiaries in the order in which they appear in the group's sample for each disease module or preventive care measure. If the pool of eligible assigned beneficiaries is less than 411, then report on 100% of assigned beneficiaries.	January 1, 2010–December 31, 2010.

h. Statutory Requirements and Other Considerations for 2010 PQRI Measures

(1) Statutory Requirements for 2010 PQRI Measures

As discussed in the proposed rule (74 FR 33571 through 33572), the statutory requirements with respect to the use of quality measures for the 2010 PQRI are different from the statutory requirements for previous program years. For purposes of reporting data on quality measures for covered professional services furnished during 2010 and subsequent years for the PQRI, subject to the exception noted below, section 1848(k)(2)(C)(i) of the Act, as added by MIPPA, requires that the quality measures shall be such measures selected by the Secretary from measures that have been endorsed by the entity with a contract with the Secretary under subsection 1890(a) of the Act (that is, the National Quality Forum, or NQF). In the case of a specified area or medical topic determined appropriate by the Secretary for which a feasible and practical measure has not been endorsed by the NQF, however, section 1848(k)(2)(C)(ii) of the Act authorizes the Secretary to specify a measure that is not so endorsed as long as due consideration is given to measures that have been endorsed or adopted by a consensus organization identified by the Secretary, such as the AQA alliance.

Finally, section 1848(k)(2)(D) of the Act requires that for each 2010 PQRI quality measure, ''the Secretary shall ensure that eligible professionals have the opportunity to provide input during the development, endorsement, or selection of measures applicable to services they furnish.''

(2) Other Considerations for Measures Selected for Inclusion in the 2010 PQRI

Based on the statutory requirements described above, we stated in the CY 2010 PFS proposed rule (74 FR 33572 through 33573) that we proposed to apply the following considerations with respect to the selection of 2009 PQRI quality measures for inclusion in the 2010 PQRI quality measure set:

• Where some 2009 PQRI quality measures have been endorsed by the NQF and others have not, those 2009 PQRI quality measures that have been specifically considered by NQF for possible endorsement, but NQF has declined to endorse it, will not be included in the 2010 PQRI quality measure set (that is, we will retire the measure for 2010).

• In circumstances where no NQF-endorsed measure is available, we will exercise the exception under section 1848 (k)(2)(C)(ii) of the Act. Under these circumstances, a 2009 PQRI quality measure that previously (that is, prior to January 31, 2009) has been adopted by the AQA will meet the requirements under the Act and it would be appropriate for eligible professionals to use the measure to submit quality measures data and/or quality measures results and numerator and denominator data on quality measures, as appropriate.

• Although we are not including any 2009 PQRI measures that have not been endorsed by the NQF or adopted by the AQA in the final 2010 PQRI quality measure set, we acknowledge that section 1848(k)(C)(ii) of the Act provides an exception to the requirement that the Secretary select measures that have been endorsed by the entity with a contract under section 1890(a) of the Act (that is, the NQF) as long as an area or medical topic for which a feasible and practical NQF-endorsed measure is not available has been identified and due consideration has been given to measures that have been endorsed by the NQF and/or, prior to January 31, 2009, adopted by the AQA.

• The statutory requirements under section 1848(k)(2)(C) of the Act, subject to the exception noted above, require only that the measures be selected from measures that have been endorsed by the entity with a contract with the Secretary under section 1890(a) (that is, the NQF) and are silent with respect to how the measures that are submitted to the NQF for endorsement were developed. The basic steps for

developing measures applicable to physicians and other eligible professionals prior to submission of the measures for endorsement may be carried out by a variety of different organizations. We do not believe there needs to be any special restrictions on the type or make up of the organizations carrying out this basic development of physician measures, such as restricting the initial development to physician-controlled organizations. Any such restriction would unduly limit the basic development of quality measures and the scope and utility of measures that may be considered for endorsement as voluntary consensus standards.

• 2009 PQRI measures that were part of the 2007 and/or 2008 PQRI in which the 2007 and 2008 PQRI analytics indicate a lack of significant reporting and usage were not considered for inclusion in the 2010 PQRI.

In addition to reviewing the 2009 PQRI measures and previously retired measures, for purposes of developing the proposed 2010 PQRI measures, we reviewed and considered measure suggestions including comments received in response to the CY 2009 PFS proposed rule and final rule with comment period. Additionally, suggestions and input received through other venues, such as an invitation for measures suggestions posted on the PQRI section of the CMS Web site in February 2009 were also reviewed and considered for purposes of our development of the list of proposed 2010 PQRI quality measures. All measures and measures groups reviewed for potential inclusion in the 2010 PQRI measure set are listed in the ''Table of 2010 Measure Suggestions'' posted on the Statute/Regulations/Program Instructions page of the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI/05_StatuteRegulationsProgramInstructions.asp#TopOfPage.*

With respect to the selection of new measures (that is, measures that have never been selected as part of a PQRI quality measure set for 2009 or any prior year), we stated in the CY 2010 PFS proposed rule (74 FR 33572 through 33573) that we would apply the following considerations, which include many of the same considerations applied to the selection of 2009 PQRI quality measures for inclusion in the 2010 PQRI quality measure set described above:

• High Impact on Healthcare.

+ Measures that are high impact and support CMS and HHS priorities for improved quality and efficiency of care for Medicare beneficiaries. These current and long term priority topics include: prevention; chronic conditions; high cost and high volume conditions; elimination of health disparities; healthcare-associated infections and other conditions; improved care coordination; improved efficiency; improved patient and family experience of care; improved end-of-life/palliative care; effective management of acute and chronic episodes of care; reduced unwarranted geographic variation in quality and efficiency; and adoption and use of interoperable HIT.

+ Measures that are included in, or facilitate alignment with, other Medicare, Medicaid, and CHIP programs in furtherance of overarching healthcare goals.

• NQF Endorsement.

+ Measures must be NQF-endorsed by July 1, 2009, in order to be considered for inclusion in the 2010 PQRI quality measure set.

+ Although we did not propose to include any new measures that were not endorsed by the NQF by July 1, 2009 in the final 2010 PQRI quality measure set, we acknowledge that section(k)(2)(C)(ii) of the Act provides an exception to the requirement that the Secretary select measures that have been endorsed by the entity with a contract under section 1890(a) of the Act (that is, the NQF). As long as an area or medical topic for which a feasible and practical NQF-endorsed measure is not available has been identified and due consideration has been given to measures that have been adopted by the AQA or other consensus organization identified by the Secretary.

+ The statutory requirements under section 1848(k)(2)(C) of the Act, subject to the exception noted above, require only that the measures be selected from measures that have been endorsed by the entity with a contract with the Secretary under section 1890(a) (that is, the NQF) and are silent with respect to how the measures that are submitted to the NQF for endorsement were developed. The basic steps for developing measures applicable to physicians and other eligible professionals prior to submission of the measures for endorsement may be carried out by a variety of different organizations. We do not believe there needs to be any special restrictions on the type or make up of the organizations carrying out this basic development of physician measures, such as restricting the initial development to physician-controlled organizations. Any such restriction would unduly limit the basic development of quality measures and the scope and utility of measures that may be considered for endorsement as voluntary consensus standards. The requirements under section 1848(k)(2)(C) of the Act pertain only to the selection of measures and not to the development of measures.

• Address Gaps in PQRI Measure Set.

+ Measures that increase the scope of applicability of the PQRI measures to services furnished to Medicare beneficiaries and expand opportunities for eligible professionals to participate in PQRI. We seek to achieve broad ability to assess the quality of care furnished to Medicare beneficiaries, and ultimately to compare performance among professionals. We seek to increase the circumstances where eligible professionals have at least three measures applicable to their practice and measures that help expand the number of measures groups with at least four measures in a group.

+ Measures of various aspects of clinical quality including outcome measures, where appropriate and feasible, process measures, structural measures, efficiency measures, and measures of patient experience of care.

Other considerations that we proposed to apply to the selection of measures for 2010, regardless of whether the measure is a 2009 PQRI measure or not, were:

• Measures that are functional, which is to say measures that can be technically implemented within the capacity of the CMS infrastructure for data collection, analysis, and calculation of reporting and performance rates. This leads to preference for measures that reflect readiness for implementation, such as those that are currently in the 2009 PQRI program or have been through testing. The purpose of measure testing is to reveal the measure's strengths and weaknesses so that the limitations can be addressed and the measure refined and strengthened prior to implementation. For new measures, preference is given to those that can be most efficiently implemented for data collection and submission. Therefore, any measures that have been found to be technically impractical to report because they are analytically challenging due to any number of factors, including those that are claims-based, have not been included in the 2010 PQRI. For example, in some cases, we are replacing existing 2009 PQRI measures with updated and improved measures that are less technically challenging to report.

• For some measures that are useful, but where data submission is not feasible through all otherwise available PQRI reporting mechanisms, a measure may be included for reporting solely through specific reporting mechanism(s)

in which its submission is feasible. For example, we proposed to limit reporting of some measures that previously were available for claims-based reporting and registry-based reporting to registry-based reporting only because they were technically challenging to report and/or analyze through the claims-based reporting mechanism (74 FR 33579 through 33580).

We also reviewed 33 measures that have been retired from the PQRI in previous years using the considerations for selecting measures for the 2010 PQRI discussed above (74 FR 33573). None were found to be eligible for inclusion in the 2010 PQRI quality measure set because they did not meet the criteria described above.

We solicited comments on the implication of including or excluding any given measure or measures in the final 2010 PQRI quality measure set and to our approach in selecting measures. As we stated in the proposed rule, we recognize that some commenters may also wish to recommend additional measures for inclusion in the 2010 PQRI measures that we did not propose (74 FR 33573). While we may consider such recommended measures for inclusion in future measure sets for PQRI and/or other programs to which such measures may be relevant, we will not be able to consider such additional measures for inclusion in the 2010 measure set.

(3) Summary of Comments and Responses

The following is a summary of the comments we received regarding the statutory requirements and other considerations for the selection of 2010 PQRI measures.

Comment: Some commenters appreciated our continued efforts to expand the PQRI quality measure set with measures that are scientifically valid and minimize eligible professional burden. In order to promote the provisions that reflect up-to-date care for beneficiaries as the program matures, these commenters urged us to revise its quality measures regularly to reflect current guidelines.

Response: We appreciate these supportive comments regarding our continued efforts to expand the PQRI quality measure set. As the program evolves, we will continue to consider more effective processes to update and/or revise the PQRI quality measure set to reflect the most current guidelines of care.

Comment: Several commenters supported our proposal to only use quality measures that have been endorsed by the NQF, thereby ensuring a rigorous evaluation of the measures by multiple stakeholders and providing an opportunity for public comment from those various stakeholders. These commenters suggested the utilization of NQF endorsed measures reflect areas that are common to providers, allow for appropriate measurement of services provided in Medicare, and provide a thorough standardized review framework. One commenter, however, was unclear whether NQF or consensus organization endorsement or adoption is required for all suggested measures for 2010 or 2011 or whether the Secretary can suggest measures of her own accord when measures do not already exist with this endorsement.

Response: We appreciate the commenters' supportive feedback and agree with the points raised by the commenters with respect to the benefits of NQF endorsement. As we stated above, subject to the exception under section 1848(k)(2)(C)(ii) of the Act, measures selected for the 2010 PQRI are required by section 1848(k)(2)(C)(i) of the Act to be endorsed by Secretary. Section 1848(k)(2)(C)(ii) of the Act authorizes us to select measures for the 2010 PQRI and subsequent years that have not been endorsed by the NQF in a specified area or medical topic for which a feasible and practical measure has not been so endorsed as long as we give due to consideration to measures that have been endorsed or adopted by other consensus organizations identified by the Secretary.

Comment: One commenter notes that the proposed rule makes allowance for measures used in the 2009 PQRI that have not been endorsed by the NQF but were previously approved by the AQA. The commenter believes that for new measures, NQF endorsement should be a requirement not only for the PQRI measures but also for measures for the hospital outpatient quality data reporting program, or HOP QDRP. While the underlying statutes for both reporting programs differ, the commenter believes CMS has the discretion to adopt a consistent policy with respect to NQF endorsement.

Response: As discussed previously, the requirements for measures selected for the PQRI are defined in statute. The requirements for other quality data reporting programs are beyond the scope of this rule.

Comment: Some commenters recommended that we require NQF endorsement not only of individual measures, but also NQF endorsement of measures groups.

Response: When we create measures groups, we only utilize individual measures that meet statutory requirements. All measures in current measures groups meet the statutory requirements. We are unaware of any efforts by NQF to review groups of measures for separate endorsement. Section 1848(m)(5)(F) of the Act required us to establish alternative criteria for satisfactorily reporting and alternative reporting periods for reporting groups of measures for 2008 and subsequent years but did not establish any additional limitations on the discretion of the Secretary.

Comment: Some commenters urged us to recognize additional consensus organizations to endorse quality measures for the PQRI. The commenters suggested we recognize measure development organizations such as the American Medical Association's Physician Consortium for Performance Improvement (AMA–PCPI) or the National Committee for Quality Assurance (NCQA) as consensus endorsement organizations.

Response: MIPPA modified the requirements for measure selection by the Secretary for PQRI as previously described. Further, as we stated in response to similar comments in previous years, we are unaware of other consensus organizations that are comparable to the NQF in terms of meeting the formal requirements of the NTTAA or of organizations other than AQA that do not strictly meet the requirements of the National Institute of Standards and Technology Act (NISTA), as amended by the NTTAA but that feature the breadth of stakeholder involvement in the consensus process necessary to meet the intent of the Act.

Comment: One commenter suggested that the measure development process should not be restricted to physician-controlled organizations but that the measure development process must include relevant physician input due to their expertise in the subject areas.

Response: We are in agreement that while physician expertise is an important ingredient in measure development and in the consensus process, physicians should not be in complete control of the process of measure development. Any such restriction would unduly limit the basic development of physician quality measures.

Comment: A few commenters did not believe that endorsement or adoption by the NQF or the AQA, respectively, was a necessary condition for inclusion of a measure in the PQRI for 2010 or subsequent years. One commenter urged us to use measures from other nationally recognized sources in areas for which NQF-endorsed measures are not available on the condition that the

measures are expedited through the NQF endorsement process.

Response: We agree that NQF endorsement or AQA adoption is not a necessary condition for all measures included in the PQRI quality measure set. As stated previously, section 1848(k)(2)(C)(ii) of the Act does permit us to select measures for the 2010 PQRI and subsequent years that have not been endorsed by the NQF in a specified area or medical topic for which a feasible and practical measure has not been so endorsed as long as we give due consideration to measures that have been endorsed or adopted by other consensus organizations identified by the Secretary.

We proposed to exercise this authority for 2010 in the CY 2010 PFS proposed rule (74 FR 33576 through 33579) by proposing to include in the 2010 PQRI several 2009 PQRI measures that had not yet achieved NQF endorsement but that were AQA adopted. As we stated in the proposed rule, we would include such measures in the 2010 PQRI as long as a measure had not been reviewed by the NQF prior to July 1, 2009 and specifically declined for endorsement.

We are also exercising this authority with respect to our decision to finalize 3 proposed new measures (that is, Referral for Otologic Evaluation for Patients with Congenital or Traumatic Deformity of the Ear; Referral for Otologic Evaluation for Patients with History of Active Drainage from the Ear within the Previous 90 days; and Referral for Otologic Evaluation for Patients with History of Sudden or Rapidly Progressive Hearing Loss) that were neither NQF endorsed prior to July 1, 2009 nor AQA adopted prior to January 31, 2009. We decided to finalize these 3 measures despite the lack of consensus endorsement or adoption due to the lack of measures available for audiologists to report on. Audiologists are a new a category of eligible professionals that were added to the list of professionals eligible to participate in the PQRI beginning with the 2009 PQRI.

We stress, however, that inclusion of measures that are not NQF endorsed or AQA adopted is an exception to the requirement under section 1848(k)(2)(C)(i) of the Act that measures be endorsed by the NQF. Therefore, we do believe that this exception authority should be exercised in very limited circumstances, such as when few or no measures are available for a particular specialty or category of eligible professionals to report.

Comment: Several commenters suggested what the PQRI quality measure set should focus on and how the PQRI quality measure set should evolve. One commenter believes the PQRI quality measure set should evolve with the development of better clinical evidence and a greater understanding of the benefit-cost tradeoffs of particular services and treatments. Another commenter urged us to adopt quality measures that would address the existing gaps in quality and that focus on services with the potential to deliver high value to Medicare beneficiaries and to avoid services that may have little or no value to beneficiaries, such as high-cost or high-volume services. One commenter suggested additional criteria that should be utilized in the selection of measures, which include selecting: (1) More outcome and resource use measures; (2) care coordination measures; (3) measures addressing appropriateness of care which deliver high value to Medicare patients; (4) measures that allow for assessing and reporting on disparities of care. Some commenters also believe the measures selected for PQRI should not reward eligible professionals for providing marginally effective care or care that is already routinely furnished.

Response: In the 2010 PFS proposed rule, we listed the considerations that we applied for the selection of proposed 2010 PQRI quality measures. As described above, many of these considerations reflect the commenters' suggestions, particularly our focus on:

- Measures with high impact on healthcare.
- Measures that support CMS and HHS priorities for improved quality and efficiency of care for Medicare beneficiaries (such as, prevention; chronic conditions; high cost and high volume conditions; elimination of health disparities; healthcare-associated infections and other conditions; improved care coordination; improved efficiency; improved patient and family experience of care; improved end-of-life/palliative care; effective management of acute and chronic episodes of care; reduced unwarranted geographic variation in quality and efficiency; and adoption and use of interoperable HIT).
- Measures that are included in, or facilitate alignment with, other Medicare, Medicaid, and CHIP programs in furtherance of overarching healthcare goals.
- Measures that address gaps in the PQRI measure set in order to increase the scope of applicability of the PQRI measures to services furnished to Medicare beneficiaries and expand opportunities for eligible professionals to participate in PQRI.

Comment: Some commenters encouraged us to identify and add more quality measures and to develop interim opportunities for eligible professionals that have a dearth of available measures to participate in PQRI. One commenter specifically recommended that we expand the number of measures to reflect all types of services provided to all beneficiaries.

Response: Despite our efforts to expand the PQRI quality measure set to increase the scope of applicability of the PQRI measures to services furnished to Medicare beneficiaries and expand opportunities for eligible professionals to participate in PQRI, we are aware that there remains some gaps in the PQRI quality measure set. However, we largely depend on the development of measures by professional organizations and other measure developers. Although we had significant involvement in the development of measures applicable to eligible professionals at the start of the PQRI, ideally we would not need to be closely involved in the development of clinician-level quality measures but would select from measures that meet the statutory requirements. Thus, we encourage professional organizations and other measure developers to fund and develop measures that address some of the gaps identified by the commenters.

Comment: Some commenters recommended we utilize data from previous reporting periods to determine the appropriateness and effectiveness of the measures. The commenters recommended that we continually evaluate and revise the criteria for measure selection to ensure measures align with clinical practice and can be reported with minimal administrative burden.

Response: We will continue to evaluate data from previous reporting periods to assess the appropriateness and effectiveness of the PQRI measures. We will also continue to work with measure developers to urge alignment of the PQRI measures with clinical practice as the program evolves and matures.

i. The Final 2010 PQRI Quality Measures for Individual Eligible Professionals

For 2010, we proposed that final PQRI quality measures would be selected from 153 of the 2009 PQRI measures and the measures listed in the ''Table of 2010 Measure Suggestions'' posted on the Statute/Regulations/Program Instructions page of the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI/05_StatuteRegulationsProgramInstructions.asp#*

TopOfPage. We proposed to include a total of 176 measures (this includes both individual measures and measures that are part of a proposed 2010 measures group) on which individual eligible professionals can report for the 2010 PQRI (74 FR 33574 through 33587, and 39032). In addition, we proposed to retire 7 measures because they did not meet one or more of the considerations for selection of proposed 2010 measures (74 FR 33574). In addition we proposed 13 measures groups for the 2010 PQRI (74 FR 33582 through 33587).

The following is a summary of the comments received on the 2010 PQRI measures in general and comments on the measures from the 2009 PQRI not proposed for inclusion in the 2010 PQRI, which are addressed below. Comments specific to measures proposed for inclusion in the 2010 PQRI are addressed in sections II.G.2.i.1. through II.G.2.i.5. below.

Comment: Several commenters requested or recommended that we make readily available on an ongoing basis more detailed information on the measure development process and on measures in development.

Response: We agree that it is desirable for the public to have information on the measures development process and measures in development. To this end, we have developed a standardized process to be used for CMS contracted measures development. This standardized process is detailed in the ''Measures Management System Blueprint'' found on the CMS Web site at *http://www.cms.hhs.gov/apps/QMIS/mmsBlueprint.asp*.

As stated previously, however, we largely depend on the development of measures by professional organizations and other measure developers for the PQRI. Many major measures developers follow a similar process for the measures that they develop, in that they publish measures and specifications during development and seek public comment. Both the NQF and AQA also publish measures and specifications during their consensus processes and seek public comment.

Comment: Numerous commenters requested final measure specifications for the 2010 PQRI be published as far in advance of the beginning of the reporting period as possible, and that more detailed information about measures proposed or finalized for use in PQRI be published at the same time as or in advance of future rulemaking.

Response: We agree with the commenters that it is desirable to provide final measure specifications sufficiently in advance of the reporting period to allow reasonable time for professionals to analyze new or revised measures and implement any needed changes in their office workflows to accurately capture and successfully submit data on a selection of measures applicable to their practice on which they can act to improve the quality of the services they furnish.

Having detailed information on measures available in advance of the reporting period also enhances the ability of vendors (such as practice management software, billing services, and electronic health records vendors) to support professionals' successful implementation of revised data-capture processes for the measures. Our intent is to provide the final list of 2010 PQRI measures and the detailed measures specifications on the PQRI section of the CMS Web site by November 15, 2009, but no later than December 31, 2009. These detailed specifications will include instructions for reporting and identifying the circumstances in which each measure is applicable. The detailed technical specifications for measures in the final listing for the 2010 PQRI remain potentially subject to corrections until the start of the 2010 reporting period, as we stated in the proposed rule.

Comment: One commenter supported removal from the PQRI quality measure set for 2010 and 2009 PQRI measure that was part of the 2007 and/or 2008 PQRI for which the 2007 and 2008 PQRI analytics indicate a lack of significant reporting and usage. The commenter remarked that continued review and revision of the measures list will help to refine the process and validity of the program and reduce undue burden on participants, increasing meaningful participation.

Response: We appreciate the commenter's constructive feedback and agree that it is necessary to review and revise the PQRI quality measure set on an ongoing basis as we gain more experience with particular measures and/or new measures become available to replace existing measures.

We are unclear, however, with respect to the commenter's remark that continued revision of the PQRI quality measure set will reduce undue burden on participants. Although there are several measures available in the PQRI quality measure set, participants are not required, nor are they expected to, report on all measures included in the PQRI quality measure set. As discussed further in sections II.G.2.e. and II.G.2.f. above, an individual eligible professional generally needs to report on only 3 individual 2010 PQRI quality measures or 1 2010 PQRI measures group in order to meet the criteria for satisfactory reporting for 2010.

Comment: Some commenters specifically suggested that Measure #143 Oncology: Medical and Radiation—Pain Intensity Quantified and Measure #144 Oncology: Medical and Radiation Plan of Care for Pain be retained for the 2010 PQRI because they believe the measures address quality of life issue for patients with cancer. One commenter requested that if the measures are analytically challenging as claims-based measures, we retain the measures as registry-only measures instead.

Response: We only proposed to retire these measures because they were too complex to calculate via claims. Based on the commenter's suggestion to retain these measures as registry-only measures for the 2010 PQRI, we are finalizing and including them in the measures listed in ''Table 11: 2010 Measures Selected From the 2009 PQRI Quality Measure Set Available for Registry-based Reporting Only.''

Comment: One commenter requested that Measure #94 Otitis Media with Effusion (OME): Diagnostic Evaluation—Assessment of Tympanic Membrane Mobility and Measure #95 Otitis Media with Effusion (OME) Hearing Testing not be retired since audiologists were just added to the list of eligible professionals with the 2009 PQRI and there are few measures on which they can report. The commenter requested that we retain both measures for at least an additional year to reassess the level of use since PQRI reporting, for audiologists, is a new process that requires extensive training.

Response: We agree that in order to provide audiologists with opportunities to participate in the PQRI, it is necessary to retain at least one of these measures for at least another year. Thus, we have decided to retain Measure #94 Otitits Media with Effusion (OME): Diagnostic Evaluation—Assessment of Tympanic Membrane Mobility and retire only Measure #95 Otitis Media with Effusion (OME) Hearing Testing for 2010. Measure #94, in conjunction with the 3 new measures developed by the Audiology Quality Consortium (AQC) listed in Table 13, will provide audiologists with at least 4 measures on which they can report for the 2010 PQRI.

Comment: One commenter was not clear on which measure was being proposed to replace Measure #34 Stroke and Stroke Rehabilitation: Tissue Plasminogen Activator (tPA) Considered and requested that CMS not retire Measure #34 until clarification is provided. Another commenter,

however, supported the retirement of Measure #34 and CMS' decision to replace this measure with the proposed new Stroke and Stroke Rehabilitation: Thrombolytic Therapy measure (see Table 19 of the CY 2010 PFS proposed rule).

Response: As indicated by the commenter, we are replacing Measure #34 with the Stroke and Stroke Rehabilitation: Thrombolytic Therapy measure listed in Table 13 of this final rule with comment period.

Comment: One commenter expressed support for a proposed revision of Measure #11 for 2010 PQRI that expands the eligible denominator patient population.

Response: We wish to clarify that at the request of the measure developer, we are retiring Measure #11 and replacing it with the proposed new NQF-endorsed measure: Stenosis Management in Cardiac Imaging Studies (see Table 13 of this final rule with comment period).

Based on the criteria discussed above and our review of these comments, we are retiring the 4 measures listed in Table 10 and are including the 175 individual measures listed in Tables 11 through 13 in the final 2010 PQRI individual quality measure set. We are also including 13 measures groups in the final 2010 PQRI quality measure set, which are listed in Tables 15 through 27. The individual measures selected for the 2010 PQRI can be categorized as follows:

(1) 2010 Individual Quality Measures Selected From the 2009 PQRI Quality Measures Set Available for Claims-based Reporting and Registry-Based Reporting;

(2) 2010 Individual Quality Measures Selected From the 2009 PQRI Quality Measures Set Available for Registry-based Reporting Only;

(3) New Individual Quality Measures Selected for 2010; and

(4) 2010 Measures Available for EHR-based Reporting.

TABLE 10—2009 PQRI QUALITY MEASURES NOT INCLUDED IN THE 2010 PQRI

Measure No.	Measure title
11	Stroke and Stroke Rehabilitation: Carotid Imaging Reporting.
34	Stroke and Stroke Rehabilitation: Tissue Plasminogen Activator (tPA) Considered.
95	Otitis Media with Effusion (OME): Hearing Testing.
152	Coronary Artery Disease (CAD): Lipid Profile in Patients with CAD.

(1) 2010 Individual Quality Measures Selected From the 2009 PQRI Quality Measures Set Available for Claims-based Reporting and Registry-based Reporting

We proposed to include in the 2010 PQRI quality measure set 116 of the 2009 PQRI measures, which would be available for either claims-based reporting or registry-based reporting as individual quality measures (74 FR 33574 through 33579). We also noted that one of the proposed measures, Measure #46 Medication Reconciliation: Reconciliation After Discharge from an Inpatient Facility, is reportable through the registry-based reporting mechanism only in the 2009 PQRI. However, for the 2010 PQRI, we proposed to make this measure available for either claims-based reporting or registry-based reporting.

These 116 proposed measures did not include any measures that were proposed to be included as part of the 2010 Back Pain measures group. Similar to the 2009 PQRI, we proposed that any 2010 PQRI measure that is included in the Back Pain measures group would not be reportable as individual measures through claims-based reporting or registry-based reporting.

The following is a summary of the comments received on the 116 proposed measures selected from the 2009 PQRI quality measure set.

Comment: We received numerous comments in support of the 2009 PQRI quality measures proposed for inclusion in the 2010 PQRI. Several commenters supported the retention of all the 2009 PQRI measures proposed for 2010. Other commenters supported inclusion of specific 2009 PQRI measures in the 2010 PQRI. Measures on which we received specific support include:

- Measure #1 Diabetes Mellitus: Hemoglobin A1c Poor Control in Diabetes Mellitus;
- Measure #2 Diabetes Mellitus: Low Density Lipoprotein (LDL–C) Control in Diabetes Mellitus;
- Measure #3 Diabetes Mellitus: High Blood Pressure Control in Diabetes Mellitus;
- Measure #9 Major Depressive Disorder (MDD): Antidepressant Medication During Acute Phase for Patients with MDD;
- Measure #18 Diabetic Retinopathy: Documentation of Presence or Absence of Macular Edema and Level of Severity of Retinopathy;
- Measure #19 Diabetic Retinopathy: Communication with the Physician Managing On-going Diabetes Care;
- Measure #67 Myelodysplastic Syndrome (MDS) and Acute Leukemias: Baseline Cytogenetic Testing Performed on Bone Marrow;
- Measure #68 Myelodysplastic Syndrome (MDS): Documentation of Iron Stores in Patients Receiving Erythopoietin Therapy;
- Measure #102 Prostate Cancer: Avoidance of Overuse of Bone Scan for Staging Low-Risk Prostate Cancer Patients;
- Measure #104 Prostate Cancer: Adjuvant Hormonal Therapy for High-Risk Prostate Cancer Patients;
- Measure #105 Prostate Cancer: Three-Dimensional (3D) Radiotherapy;
- Measure #106 Major Depressive Disorder (MDD): Diagnostic Evaluation;
- Measure #107 Major Depressive Disorder (MDD): Suicide Risk Assessment;
- Measure #110 Preventive Care and Screening: Influenza Immunization for Patients ≥50 Years Old;
- Measure #111 Preventive Care and Screening: Pneumonia Vaccination for Patients 65 Years and Older;
- Measure #112 Preventive Care and Screening: Screening Mammography;
- Measure #113 Preventive Care and Screening: Colorectal Cancer Screening;
- Measure #114 Preventive Care and Screening: Inquiry Regarding Tobacco Use;
- Measure #115 Preventive Care and Screening: Advising Smokers and Tobacco Users to Quit;
- Measure #117 Diabetes Mellitus: Dilated Eye Exam in Diabetic Patient;
- Measure #119 Diabetes Mellitus: Urine Screening for Microalbumin or Medical Attention for Nephropathy in Diabetic Patients;
- Measure #124 Health Information Technology (HIT): Adoption/Use of Electronic Health Records (EHR);
- Measure #126 Diabetes Mellitus: Diabetic Foot and Ankle Care, Peripheral Neuropathy-Neurological Evaluation;
- Measure #127 Diabetes Mellitus: Diabetic Foot and Ankle Care, Ulcer Prevention—Evaluation of Footwear;
- Measure #134 Screening for Clinical Depression and Follow-Up Plan;
- Measure #136 Melanoma: Follow-Up Aspects of Care;
- Measure #137 Melanoma: Continuity of Care—Recall System;
- Measure #138 Melanoma: Coordination of Care;
- Measure #156 Oncology: Radiation Dose Limits to Normal Tissues; and
- Measure #163 Diabetes Mellitus: Foot exam.

Response: All 116 of the proposed measures listed in Table 17 of the proposed rule (74 FR 33575 through 33579), including all of the measures specifically supported by commenters, have been finalized for the 2010 PQRI, and are included in Table 11.

Comment: One commenter commended CMS on the format of Table 17 of the proposed rule (74 FR 33575 through 33579) which clearly stated the status of NQF endorsement, AQA adoption, and the measure developer for each proposed measure. The commenter encouraged us to use this format in future rules.

Response: We appreciate the positive feedback on the newly formatted tables in the proposed rule.

Comment: One commenter urged us to finalize the proposed new measures related to age-related macular degeneration, osteoporosis, and cancer care and to work with the community to ensure these measures are appropriately reported.

Response: We note that the measures referenced by the commenter are existing 2009 PQRI measures that will be included for 2010 PQRI. As noted previously, we have developed an education and outreach plan that is continuously expanding in scope in our efforts to educate eligible professionals on the nuances of the PQRI, including educating eligible professionals and office staff on appropriate reporting of the PQRI measures.

Comment: Several commenters recommended changes to specific quality measures' titles, definitions, and detailed specifications or coding. Many of these recommendations were based on alternative interpretations of clinical evidence or concerns about the utility of the measures. Some requests were specifically concerned that measures be expanded to include specific professionals to whom the measure may be applicable such as physical therapists, audiologists, and hospitalists.

Specifically, one commenter suggested that in order to maximize the impact of Measure #1 Diabetes Mellitus: Hemoglobin A1c Poor Control in Diabetes Mellitus, the PQRI specification should continue to require a performance period of 12 months and reporting that identifies whether A1c control is good (that is, A1c ≤ 7.0 percent), moderate (that is, A1c ≤ 9.0 percent, but > 7.0 percent), or poor (that is, A1c > 9.0 percent).

Another commenter suggested that audiologists should be included in Measure #154 Falls: Risk Assessment. The commenter noted that audiologists are consulted to provide vestibular rehabilitation that results in improved quality of care for these patients and reduces unnecessary and excessive cost.

Another commenter requested that Measure #52 Chronic Obstructive Pulmonary Disease (COPD): Spirometry Evaluation needs to be re-evaluated and CMS should consider modifying this measure or creating a new one that addresses the appropriate use of LABA.

We received one comment regarding Measure #158 Carotid Endarterectomy: Use of Patch During Conventional Carotid Endarterectomy, expressing concern that there is no reliable data, controlled or otherwise, that shows that use of patch graft results in better outcomes.

Finally, one commenter suggested that the following proposed 2010 measures selected from the 2009 PQRI quality measure set available for either claims-based reporting or registry-based reporting may not promote quality care because they do not adequately address concerns of patient groups that rely on plasma derived treatments such as those with primary immune deficiency or alpha-1 antitrypsin deficiency:

- Measure #51 Chronic Obstructive Pulmonary Disease (COPD): Spirometry Evaluation;
- Measure #64 Asthma: Asthma Assessment;
- Measure #65 Treatment for Children with Upper Respiratory Infection (URI): Avoidance of Inappropriate Use;
- Measure #110 Preventive Care and Screening: Influenza Immunization for Patients ≥ 50 Years Old; and
- Measure #126 Diabetes Mellitus: Diabetic Foot and Ankle Care, Peripheral Neuropathy—Neurological Evaluation.

The commenter suggested that we focus on aligning these measures with accepted clinical practices for patients that rely on plasma-derived treatments.

Response: Health care quality measures are currently developed by a variety of organizations and used by a variety of governmental and nongovernmental, and public-private initiatives which have various and at times differing priorities and programmatic needs for quality measures. As reflected by the considerations for identifying proposed PQRI quality measures described above, we are committed to having a broad and robust set of quality measures for the PQRI. However, we largely depend on the development of measures by professional organizations and other measure developers. Although we had significant involvement in the development of measures applicable to eligible professionals at the start of the PQRI, currently we are not directly involved in the development of clinician-level quality measures for PQRI, but do select from measures that meet the statutory requirements and other considerations described above.

Quality measures that have completed the consensus processes of NQF or AQA have a designated party (generally the measure developer/owner) who has accepted responsibility for maintaining the measure. In general, it is the role of the measure owner, developer, or maintainer to make substantive changes to a measure, including any updates to the measure to reflect the current clinical evidence such as the changes suggested by the commenters above. The measure maintainer and/or the developer/owner of a measure included in the final set of quality measures selected for the 2010 PQRI is identified as the ''Measure Developer'' in Tables 11 through 28. In addition, NQF has, for its endorsed measures, an established maintenance process which may be accessed. The Secretary is required to provide opportunities for public comment on selected measures and do so through notice and comment rulemaking. We do not, however, use notice and comment rulemaking as a means to update or modify measure specifications. We retain the ability to update or modify specifications to the measures until December 31, 2009.

After that date, there will be no changes to the measure for the 2010 reporting period(s).

Comment: One commenter was concerned about the potential retention of claims-based reporting for Measure #124 Health Information Technology (HIT): Adoption/Use of Electronic Health Records (EHR). The commenter assumes that if an eligible professional had an EHR, he or she would be able to submit this type of data directly from the EHR rather through claims. This also appears to conflict with the statement that Measure #124 is proposed to be an EHR measure. The commenter requests further clarification.

Response: As reflected in Tables 11 and 14, Measure #124 is available for reporting via claims, a qualified registry, or a qualified EHR for the 2010 PQRI. We decided to continue to allow eligible professionals to report Measure #124 via claims for the 2010 PQRI because we do not anticipate that there will be a sufficient number of qualified EHR vendors for the 2010 PQRI to permit a majority of those who adopt and use an EHR to report this measure via their EHR.

Comment: One commenter supported the proposal that Measure #46 Medication Reconciliation: Reconciliation After Discharge from an Inpatient Facility would be available for claims and registry reporting since registries reported difficulty capturing the required information for the 2009 PQRI.

Response: We agree. As such, Measure #46 is listed in Table 11 as a measure that is available for claims and registry reporting in the 2010 PQRI.

Comment: With respect to Measure #52 Chronic Obstructive Pulmonary Disease (COPD): Bronchodilator Therapy, one commenter pointed out that Medicare DMERC coverage criteria for LABA are not consistent with clinical guidelines.

Response: Medicare coverage policy is beyond the scope of this section of the final rule. Questions or concerns about Medicare coverage policy should be directed to *CMS_caginquiries@cms.hhs.gov.*

For the reasons discussed above and based on the comments received, we are finalizing in the 2010 PQRI quality measure set the 116 2009 PQRI measures that were proposed to be available in the 2010 PQRI for claims and registry reporting identified in Table 11. In addition, Table 11 includes 1 2009 PQRI measure that was proposed for retirement in 2010 and 2 2009 PQRI measures that were proposed to be available for registry reporting only (see sections II.G.2.i. and II.G.2.i.2., respectively, of this final rule for further details). The 119 individual 2009 PQRI measures selected for inclusion in the 2010 PQRI quality measure set as individual quality measures for either claims-based reporting or registry-based reporting are listed by their Measure Number and Title in Table 11, along with the name of the measure's developer/owner. The PQRI Measure Number is a unique identifier assigned by CMS to all measures in the PQRI measure set. Once a PQRI Measure Number is assigned to a measure, it will not be used again to identify a different measure, even if the original measure to which the number was assigned is subsequently retired from the PQRI measure set. A description of the measures listed in Table 11 can be found in the ''2009 PQRI Quality Measures List,'' which is available on the Measures and Codes page of the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI.*

BILLING CODE 4120–01–P

TABLE 11: 2010 Measures Selected From the 2009 PQRI Quality Measure Set Available for Either Claims-based Reporting or Registry-based Reporting

Measure Number	Measure Title	Measure Developer
1	Diabetes Mellitus: Hemoglobin A1c Poor Control in Diabetes Mellitus	NCQA
2	Diabetes Mellitus: Low Density Lipoprotein (LDL-C) Control in Diabetes Mellitus	NCQA
3	Diabetes Mellitus: High Blood Pressure Control in Diabetes Mellitus	NCQA
6	Coronary Artery Disease (CAD): Oral Antiplatelet Therapy Prescribed for Patients with CAD	AMA-PCPI
9	Major Depressive Disorder (MDD): Antidepressant Medication During Acute Phase for Patients with MDD	NCQA
10	Stroke and Stroke Rehabilitation: Computed Tomography (CT) or Magnetic Resonance Imaging (MRI) Reports	AMA-PCPI/NCQA
12	Primary Open Angle Glaucoma (POAG): Optic Nerve Evaluation	AMA-PCPI/NCQA
14	Age-Related Macular Degeneration (AMD): Dilated Macular Examination	AMA-PCPI/NCQA
18	Diabetic Retinopathy: Documentation of Presence or Absence of Macular Edema and Level of Severity of Retinopathy	AMA-PCPI/NCQA
19	Diabetic Retinopathy: Communication with the Physician Managing On-going Diabetes Care	AMA-PCPI/NCQA
20	Perioperative Care: Timing of Antibiotic Prophylaxis – Ordering Physician	AMA-PCPI/NCQA
21	Perioperative Care: Selection of Prophylactic Antibiotic – First OR Second Generation Cephalosporin	AMA-PCPI/NCQA
22	Perioperative Care: Discontinuation of Prophylactic Antibiotics (Non-Cardiac Procedures)	AMA-PCPI/NCQA
23	Perioperative Care: Venous Thromboembolism (VTE) Prophylaxis (When Indicated in ALL Patients)	AMA-PCPI/NCQA

Measure Number	Measure Title	Measure Developer
24	Osteoporosis: Communication with the Physician Managing On-going Care Post-Fracture of Hip, Spine or Distal Radius for Men and Women Aged 50 Years and Older	AMA-PCPI/NCQA
28	Aspirin at Arrival for Acute Myocardial Infarction (AMI)	AMA-PCPI/NCQA
30	Perioperative Care: Timely Administration of Prophylactic Parenteral Antibiotics	AMA-PCPI/NCQA
31	Stroke and Stroke Rehabilitation: Deep Vein Thrombosis Prophylaxis (DVT) for Ischemic Stroke or Intracranial Hemorrhage	AMA-PCPI/NCQA
32	Stroke and Stroke Rehabilitation: Discharged on Antiplatelet Therapy	AMA-PCPI/NCQA
35	Stroke and Stroke Rehabilitation: Screening for Dysphagia	AMA-PCPI/NCQA
36	Stroke and Stroke Rehabilitation: Consideration of Rehabilitation Services	AMA-PCPI/NCQA
39	Screening or Therapy for Osteoporosis for Women Aged 65 Years and Older	AMA-PCPI/NCQA
40	Osteoporosis: Management Following Fracture of Hip, Spine or Distal Radius for Men and Women Aged 50 Years and Older	AMA-PCPI/NCQA
41	Osteoporosis: Pharmacologic Therapy for Men and Women Aged 50 Years and Older	AMA-PCPI/NCQA
43	Coronary Artery Bypass Graft (CABG): Use of Internal Mammary Artery (IMA) in Patients with Isolated CABG Surgery	Society of Thoracic Surgeons (STS)
44	Coronary Artery Bypass Graft (CABG): Preoperative Beta-Blocker in Patients with Isolated CABG Surgery	STS
45	Perioperative Care: Discontinuation of Prophylactic Antibiotics (Cardiac Procedures)	AMA-PCPI/NCQA
46	Medication Reconciliation: Reconciliation After Discharge from an Inpatient Facility	AMA-PCPI/NCQA
47	Advance Care Plan	AMA-PCPI/NCQA

Measure Number	Measure Title	Measure Developer
48	Urinary Incontinence: Assessment of Presence or Absence of Urinary Incontinence in Women Aged 65 Years and Older	AMA-PCPI/NCQA
49	Urinary Incontinence: Characterization of Urinary Incontinence in Women Aged 65 Years and Older	AMA-PCPI/NCQA
50	Urinary Incontinence: Plan of Care for Urinary Incontinence in Women Aged 65 Years and Older	AMA-PCPI/NCQA
51	Chronic Obstructive Pulmonary Disease (COPD): Spirometry Evaluation	AMA-PCPI
52	Chronic Obstructive Pulmonary Disease (COPD): Bronchodilator Therapy	AMA-PCPI
53	Asthma: Pharmacologic Therapy	AMA-PCPI
54	12-Lead Electrocardiogram (ECG) Performed for Non-Traumatic Chest Pain	AMA-PCPI/NCQA
55	12-Lead Electrocardiogram (ECG) Performed for Syncope	AMA-PCPI/NCQA
56	Community-Acquired Pneumonia (CAP): Vital Signs	AMA-PCPI/NCQA
57	Community-Acquired Pneumonia (CAP): Assessment of Oxygen Saturation	AMA-PCPI/NCQA
58	Community-Acquired Pneumonia (CAP): Assessment of Mental Status	AMA-PCPI/NCQA
59	Community-Acquired Pneumonia (CAP): Empiric Antibiotic	AMA-PCPI/NCQA
64	Asthma: Asthma Assessment	AMA-PCPI
65	Treatment for Children with Upper Respiratory Infection (URI): Avoidance of Inappropriate Use	NCQA
66	Appropriate Testing for Children with Pharyngitis	NCQA
67	Myelodysplastic Syndrome (MDS) and Acute Leukemias: Baseline Cytogenetic Testing Performed on Bone Marrow	AMA-PCPI/American Society of Hematology (ASH)
68	Myelodysplastic Syndrome (MDS): Documentation of Iron Stores in Patients Receiving Erythropoietin Therapy	AMA-PCPI/ASH

Measure Number	Measure Title	Measure Developer
69	Multiple Myeloma: Treatment with Bisphosphonates	AMA-PCPI/ASH
70	Chronic Lymphocytic Leukemia (CLL): Baseline Flow Cytometry	AMA-PCPI/ASH
71	Breast Cancer: Hormonal Therapy for Stage IC-IIIC Estrogen Receptor/Progesterone Receptor (ER/PR) Positive Breast Cancer	AMA-PCPI/American Society of Clinical Oncology (ASCO)/National Comprehensive Cancer Network (NCCN)
72	Colon Cancer: Chemotherapy for Stage III Colon Cancer Patients	AMA-PCPI/ASCO/NCCN
76	Prevention of Catheter-Related Bloodstream Infections (CRBSI): Central Venous Catheter (CVC) Insertion Protocol	AMA-PCPI
79	End-Stage Renal Disease (ESRD): Influenza Immunization in Patients with ESRD	AMA-PCPI
84	Hepatitis C: Ribonucleic Acid (RNA) Testing Before Initiating Treatment	AMA-PCPI
85	Hepatitis C: HCV Genotype Testing Prior to Treatment	AMA-PCPI
86	Hepatitis C: Antiviral Treatment Prescribed	AMA-PCPI
87	Hepatitis C: HCV Ribonucleic Acid (RNA) Testing at Week 12 of Treatment	AMA-PCPI
89	Hepatitis C: Counseling Regarding Risk of Alcohol Consumption	AMA-PCPI
90	Hepatitis C: Counseling Regarding Use of Contraception Prior to Antiviral Therapy	AMA-PCPI
91	Acute Otitis Externa (ACE): Topical Therapy	AMA-PCPI
92	Acute Otitis Externa (ACE): Pain Assessment	AMA-PCPI
93	Acute Otitis Externa (ACE): Systemic Antimicrobial Therapy – Avoidance of Inappropriate Use	AMA-PCPI

Measure Number	Measure Title	Measure Developer
94	Otitis Media with Effusion (OME): Diagnostic Evaluation – Assessment of Tympanic Membrane Mobility	AMA-PCPI
99	Breast Cancer Resection Pathology Reporting: pT Category (Primary Tumor) and pN Category (Regional Lymph Nodes) with Histologic Grade	AMA-PCPI/College of American Pathologists (CAP)
100	Colorectal Cancer Resection Pathology Reporting: pT Category (Primary Tumor) and pN Category (Regional Lymph Nodes) with Histologic Grace	AMA-PCPI/CAP
102	Prostate Cancer: Avoidance of Overuse of Bone Scan for Staging Low-Risk Prostate Cancer Patients	AMA-PCPI
104	Prostate Cancer: Adjuvant Hormonal Therapy for High-Risk Prostate Cancer Patients	AMA-PCPI
105	Prostate Cancer: Three-Dimensional (3D) Radiotherapy	AMA-PCPI
106	Major Depressive Disorder (MDD): Diagnostic Evaluation	AMA-PCPI
107	Major Depressive Disorder (MDD): Suicide Risk Assessment	AMA-PCPI
108	Rheumatoid Arthritis (RA): Disease Modifying Anti-Rheumatic Drug (DMARD) Therapy	NCQA
109	Osteoarthritis: Function and Pain Assessment	AMA-PCPI
110	Preventive Care and Screening: Influenza Immunization for Patients ≥ 50 Years Old	AMA-PCPI
111	Preventive Care and Screening: Pneumonia Vaccination for Patients 65 Years and Older	NCQA
112	Preventive Care and Screening: Screening Mammography	NCQA
113	Preventive Care and Screening: Colorectal Cancer Screening	NCQA
114	Preventive Care and Screening: Inquiry Regarding Tobacco Use	AMA-PCPI
115	Preventive Care and Screening: Advising Smokers and Tobacco Users to Quit	NCQA

Measure Number	Measure Title	Measure Developer
116	Antibiotic Treatment for Adults with Acute Bronchitis: Avoidance of Inappropriate Use	NCQA
117	Diabetes Mellitus: Dilated Eye Exam in Diabetic Patient	NCQA
119	Diabetes Mellitus: Urine Screening for Microalbumin or Medical Attention for Nephropathy in Diabetic Patients	NCQA
121	Chronic Kidney Disease (CKD): Laboratory Testing (Calcium, Phosphorous, Intact Parathyroid Hormone (iPTH) and Lipid Profile)	AMA-PCPI
122	Chronic Kidney Disease (CKD): Blood Pressure Management	AMA-PCPI
123	Chronic Kidney Disease (CKD): Plan of Care – Elevated Hemoglobin for Patients Receiving Erythropoiesis-Stimulating Agents (ESA)	AMA-PCPI
124	Health Information Technology (HIT): Adoption/Use of Electronic Health Records (EHR)	CMS/Quality Insights of Pennsylvania (QIP)
126	Diabetes Mellitus: Diabetic Foot and Ankle Care, Peripheral Neuropathy – Neurological Evaluation	American Podiatric Medical Association (APMA)
127	Diabetes Mellitus: Diabetic Foot and Ankle Care, Ulcer Prevention – Evaluation of Footwear	APMA
128	Preventive Care and Screening: Body Mass Index (BMI) Screening and Follow-Up	CMS/QIP
130	Documentation and Verification of Current Medications in the Medical Record	CMS/QIP
131	Pain Assessment Prior to Initiation of Patient Therapy and Follow-Up	CMS/QIP
134	Screening for Clinical Depression and Follow-Up Plan	CMS/QIP
135	Chronic Kidney Disease (CKD): Influenza Immunization	AMA-PCPI
139	Cataracts: Comprehensive Preoperative Assessment for Cataract Surgery with Intraocular Lens (IOL) Placement	AMA-PCPI/NCQA

Measure Number	Measure Title	Measure Developer
140	Age-Related Macular Degeneration (AMD): Counseling on Antioxidant Supplement	AMA-PCPI/NCQA
141	Primary Open-Angle Glaucoma (POAG): Reduction of Intraocular Pressure (IOP) by 15% OR Documentation of Plan of Care	AMA-PCPI/NCQA
142	Osteoarthritis (OA): Assessment for Use of Anti-Inflammatory or Analgesic Over-the-Counter (OTC) Medications	AMA-PCPI
145	Radiology: Exposure Time Reported for Procedures Using Fluoroscopy	AMA-PCPI/NCQA
146	Radiology: Inappropriate Use of "Probably Benign" Assessment Category in Mammography Screening	AMA-PCPI/NCQA
147	Nuclear Medicine: Correlation with Existing Imaging Studies for All Patients Undergoing Bone Scintigraphy	AMA-PCPI
153	Chronic Kidney Disease (CKD): Referral for Arteriovenous (AV) Fistula	AMA-PCPI
154	Falls: Risk Assessment	AMA-PCPI/NCQA
155	Falls: Plan of Care	AMA-PCPI/NCQA
156	Oncology: Radiation Dose Limits to Normal Tissues	AMA-PCPI
157	Thoracic Surgery: Recording of Clinical Stage for Lung Cancer and Esophageal Cancer Resection	STS
158	Carotid Endarterectomy: Use of Patch During Conventional Carotid Endarterectomy	Society of Vascular Surgeons (SVS)
163	Diabetes Mellitus: Foot Exam	NCQA
172	Hemodialysis Vascular Access Decision-Making by Surgeon to Maximize Placement of Autogenous Arterial Venous (AV) Fistula	SVS
173	Preventive Care and Screening: Unhealthy Alcohol Use – Screening	AMA-PCPI
175	Pediatric End-Stage Renal Disease (ESRD): Influenza Immunization	AMA-PCPI
176	Rheumatoid Arthritis (RA): Tuberculosis Screening	AMA-PCPI/NCQA

Measure Number	Measure Title	Measure Developer
177	Rheumatoid Arthritis (RA): Periodic Assessment of Disease Activity	AMA-PCPI/NCQA
178	Rheumatoid Arthritis (RA): Functional Status Assessment	AMA-PCPI/NCQA
179	Rheumatoid Arthritis (RA): Assessment and Classification of Disease Prognosis	AMA-PCPI/NCQA
180	Rheumatoid Arthritis (RA): Glucocorticoid Management	AMA-PCPI/NCQA
181	Elder Maltreatment Screen and Follow-Up Plan	CMS/QIP
182	Functional Outcome Assessment in Chiropractic Care	CMS/QIP
183	Hepatitis C: Hepatitis A Vaccination in Patients with HCV	AMA-PCPI
184	Hepatitis C: Hepatitis B Vaccination in Patients with HCV	AMA-PCPI
185	Endoscopy & Polyp Surveillance: Colonoscopy Interval for Patients with a History of Adenomatous Polyps – Avoidance of Inappropriate Use	AMA-PCPI/NCQA
186	Wound Care: Use of Compression System in Patients with Venous Ulcers	AMA-PCPI/NCQA

BILLING CODE 4120–01–C

Please note that detailed measure specifications, including the measure's title, for 2009 individual PQRI quality measures may have been updated or modified during the NQF endorsement process or for other reasons prior to 2010. The 2010 PQRI quality measure specifications for any given individual quality measure may, therefore, be different from specifications for the same quality measure used for 2009. Specifications for all 2010 individual PQRI quality measures, whether or not included in the 2009 PQRI program, must be obtained from the specifications document for 2010 individual PQRI quality measures, which will be available on the PQRI section of the CMS Web site on or before December 31, 2009.

(2) 2010 Individual Quality Measures Selected From the 2009 PQRI Quality Measures Set Available for Registry-Based Reporting Only

We proposed to select 26 registry-only individual measures from the 2009 PQRI for the 2010 PQRI (74 FR 33579 through 33580). Nine of the 26 proposed measures were previously available for either claims-based reporting or registry-based reporting. We solicited comments on our proposal to increase the number of registry-only measures for the 2010 PQRI.

The following is a summary of the comments received on the 26 proposed registry-only measures.

Comment: We received one comment in support of the following registry-only measures:

- Measure #136 Melanoma: Follow-Up Aspects of Care;
- Measure #137 Melanoma: Continuity of Care—Recall System; and
- Measure #138 Melanoma: Coordination of Care.

Response: We appreciate the commenters' positive feedback. These final measures are listed in Table 12 as 2009 PQRI measures selected for the 2010 PQRI available for registry reporting only.

Comment: We received several comments regarding the proposed reporting mechanism(s) available for proposed 2010 measures. There were several recommendations that the following 2009 PQRI quality measures, which were available for claims or registry reporting in the 2009 PQRI, should not be limited to registry reporting for the 2010 PQRI:

- Measure #83 Hepatitis C: Testing for Chronic Hepatitis C—Confirmation of Hepatitis C Viremia;
- Measure #136 Melanoma: Follow-Up Aspects of Care;
- Measure #137 Melanoma: Continuity of Care—Recall System;
- Measure #138 Melanoma: Coordination of Care;
- Measure #139 Cataracts: Comprehensive Preoperative Assessment for Cataract Surgery with Intraocular Lens (IOL) Placement; and
- Measure #141 Primary Open-Angle Glaucoma (POAG): Reduction of Intraocular Pressure (IOP) by 15 percent OR Documentation of a Plan of Care.

The primary reason cited by commenters for opposing limiting certain measures to registry reporting is the lack of an available registry.

Response: With respect to the limited availability of registries for certain eligible professionals, we reiterate that there are qualified registries in our 2009 PQRI program that do report all of the PQRI measures. These registries are accepting eligible professionals who wish to sign up as new clients of the

registry. While we acknowledge that there may be costs associated with participating through registries, we note that the decision to participate via a registry is voluntary.

We do, however, agree with commenters' concerns about limiting Measures #139 and #141 to registry reporting. These measures were first introduced in the PQRI quality measure set for the 2009 PQRI and are currently available for claims and registry reporting for 2009. Keeping these measures as measures available for claims and registry reporting for 2010 will allow us to collect more data to analyze the measures' feasibility via claims reporting. Therefore, the measures are listed in Table 11 of this final rule with comment period as 2009 PQRI measures selected for the 2010 PQRI that are available for registry and claims reporting.

Comment: Some commenters were specifically opposed to continuing to limit Measure #174 Pediatric End-Stage Renal Disease (ESRD): Plan of Care for Inadequate Hemodialysis to registry reporting for the 2010 PQRI. Specifically, the commenters suggested that CMS permit claims-based reporting of the measure for 2010 since there are only two pediatric ESRD measures included in PQRI for 2010. One of the pediatric ESRD measures, Measure #175 Pediatric ESRD Influenza Immunization Measure, was proposed to be available for either claims or registry reporting. Because eligible professionals must report on at least 3 measures when using the registry-based reporting mechanism, the commenter felt that making Measure #174 registry only will exclude pediatric nephrologists from participating in the PQRI. In addition, a registry is not available for pediatricians who participate in small academic departments.

Response: The commenter is correct in that eligible professionals who wish to have a qualified registry submit PQRI measure results and numerator and denominator data on PQRI quality measures are required to report at least 3 PQRI quality measures when reporting on individual quality measures or to report all measures in at least 1 measure group when reporting on measure groups. Measure #174 Pediatric End-Stage Renal Disease (ESRD): Plan of Care for Inadequate Hemodialysis was registry only for 2009 PQRI. Due to complexities surrounding the timing of the expected quality action (once per month) this measure will remain registry only for the 2010 PQRI.

However, in response to the commenters' concern that there are only 2 2010 PQRI measures that apply to pediatric nephrologists and only 1 of them (that is, Measure #175) is available for claims-based reporting, eligible professionals who have fewer than 3 applicable measures can still participate in the 2010 PQRI via claims. Such eligible professionals would need to report on all applicable measures that are available for claims-based reporting via claims and meet the appropriate criteria for satisfactory reporting of individual measures in order to qualify for a 2010 PQRI incentive payment.

For the reasons discussed above and based on the comments received, we are finalizing in the 2010 PQRI quality measure set 24 of the 26 proposed 2009 PQRI measures identified in Table 18 of the proposed rule for registry reporting only. As stated above, 2 of the 26 2009 PQRI measures that were proposed to be available for registry reporting only for the 2010 PQRI (that is, Measure #139 and Measure #141), will be available for both registry and claims reporting in the 2010 PQRI and are listed in Table 11 of this final rule with comment period. In addition, we are also retaining 2 2009 PQRI measures that were proposed for retirement for 2010, but we are limiting reporting of these measures to registry reporting for the 2010 PQRI. The 26 2009 PQRI measures selected for the 2010 PQRI that are available for registry reporting only are listed in Table 12 of this final rule with comment period. The 26 individual 2009 PQRI measures selected for inclusion in the 2010 PQRI quality measure set as individual quality measures for registry-based reporting only are listed by their Measure Number and Title in Table 12, along with the name of the measure's developer/owner. A description of the measures listed in Table 12 can be found in the ''2009 PQRI Quality Measures List,'' which is available on the Measures and Codes page of the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI.* Measures that were available for either claims-based reporting or registry-based reporting in the 2009 PQRI but are available for registry-based reporting only in the 2010 PQRI are identified by an asterisk (*) in Table 12.

TABLE 12—2010 MEASURES SELECTED FROM THE 2009 PQRI QUALITY MEASURE SET AVAILABLE FOR REGISTRY-BASED REPORTING ONLY

Measure Number	Measure title	Measure developer
5	Heart Failure: Angiotensin-Converting Enzyme (ACE) Inhibitor or Angiotensin Receptor Blocker (ARB) Therapy for Left Ventricular Systolic Dysfunction (LVSD)*.	AMA–PCPI
7	Coronary Artery Disease (CAD): Beta-Blocker Therapy for CAD Patients with Prior Myocardial Infarction (MI).	AMA–PCPI
8	Heart Failure: Beta-Blocker Therapy for Left Ventricular Systolic Dysfunction (LVSD)*.	AMA–PCPI
33	Stroke and Stroke Rehabilitation: Anticoagulant Therapy Prescribed for Atrial Fibrillation at Discharge.	AMA–PCPI/NCQA
81	End-Stage Renal Disease (ESRD): Plan of Care for Inadequate Hemodialysis in ESRD Patients.	AMA–PCPI
82	End-Stage Renal Disease (ESRD): Plan of Care for Inadequate Peritoneal Dialysis.	AMA–PCPI
83	Hepatitis C: Testing for Chronic Hepatitis C—Confirmation of Hepatitis C Viremia*.	AMA–PCPI
118	Coronary Artery Disease (CAD): Angiotensin-Converting Enzyme (ACE) Inhibitor or Angiotensin Receptor Blocker (ARB) Therapy for Patients with CAD and Diabetes and/or Left Ventricular Systolic Dysfunction (LSVD)*.	AMA–PCPI
136	Melanoma: Follow-Up Aspects of Care*	AMA–PCPI/NCQA
137	Melanoma: Continuity of Care—Recall System*	AMA–PCPI/NCQA
138	Melanoma: Coordination of Care*	AMA–PCPI/NCQA

TABLE 12—2010 MEASURES SELECTED FROM THE 2009 PQRI QUALITY MEASURE SET AVAILABLE FOR REGISTRY-BASED REPORTING ONLY—Continued

Measure Number	Measure title	Measure developer
143	Oncology: Medical and Radiation—Pain Intensity Quantified*.	AMA–PCPI
144	Oncology: Medical and Radiation—Plan of Care for Pain*	AMA–PCPI
159	HIV/AIDS: CD4+ Cell Count or CD4+ Percentage	AMA–PCPI/NCQA
160	HIV/AIDS: Pneumocystis Jiroveci Pneumonia (PCP) Prophylaxis.	AMA–PCPI/NCQA
161	HIV/AIDS: Adolescent and Adult Patients with HIV/AIDS Who Are Prescribed Potent Antiretroviral Therapy.	AMA–PCPI/NCQA
162	HIV/AIDS: HIV RNA Control After Six Months of Potent Antiretroviral Therapy.	AMA–PCPI/NCQA
164	Coronary Artery Bypass Graft (CABG): Prolonged Intubation (Ventilation).	STS
165	Coronary Artery Bypass Graft (CABG): Deep Sternal Wound Infection Rate.	STS
166	Coronary Artery Bypass Graft (CABG): Stroke/Cerebrovascular Accident (CVA).	STS
167	Coronary Artery Bypass Graft (CABG): Postoperative Renal Insufficiency.	STS
168	Coronary Artery Bypass Graft (CABG): Surgical Re-exploration.	STS
169	Coronary Artery Bypass Graft (CABG): Antiplatelet Medications at Discharge.	STS
170	Coronary Artery Bypass Graft (CABG): Beta-Blockers Administered at Discharge.	STS
171	Coronary Artery Bypass Graft (CABG): Lipid Management and Counseling.	STS
174	Pediatric End-Stage Renal Disease (ESRD): Plan of Care for Inadequate Hemodialysis.	AMA–PCPI

* Individual 2009 PQRI measures that were available for both claims-based and registry-based reporting but will be available for registry-based reporting only for the 2010 PQRI.

Although we are designating certain measures as registry-only measures, we cannot guarantee that there will be a registry qualified to submit each registry-only measure for 2010. We rely on registries to self-nominate and identify the types of measures for which they would like to be qualified to submit quality measures results and numerator and denominator data on quality measures. If no registry self-nominates to submit measure results and numerator and denominator data on a particular type of measure for 2010, then an eligible professional would not be able to report that particular measure type.

We note also that detailed measure specifications, including a measure's title, for 2009 PQRI quality measures may have been updated or modified during the NQF endorsement process or for other reasons prior to 2010. Therefore, the 2010 PQRI quality measure specifications for any given quality measure may be different from specifications for the same quality measure used for 2009. Specifications for all 2010 individual PQRI quality measures, whether or not included in the 2009 PQRI program, must be obtained from the specifications document for 2010 individual PQRI quality measures, which will be available on the PQRI section of the CMS Web site on or before December 31, 2009.

(3) New Individual Quality Measures Selected for 2010

We proposed to include in the 2010 PQRI quality measure set 30 measures that were not included in the 2009 PQRI quality measures provided that each measure obtains NQF endorsement by July 1, 2009 and its detailed specifications are completed and ready for implementation in PQRI by August 15, 2009. Besides having NQF endorsement, we proposed that the development of a measure is considered complete for the purposes of the 2010 PQRI if by August 15, 2009—(1) the final, detailed specifications for use in data collection for PQRI have been completed and are ready for implementation, and (2) all of the Category II Current Procedural Terminology (CPT II) codes required for the measure have been established and will be effective for CMS claims data submission on or before January 1, 2010.

Due to the complexity of their measure specifications, we proposed that 24 of these 30 measures would be available as registry-only measures for the 2010 PQRI. The remaining 6 measures were proposed to be available for reporting through either claims-based reporting or registry-based reporting.

The following is a summary of the comments received on the 30 new individual quality measures proposed for 2010.

Comment: We received numerous comments in support of the proposed additional quality measures for 2010 PQRI. Several commenters stated that these measures ''continue to build upon potential gaps that exist in the prevention and management of chronic conditions.'' One commenter was pleased to see the use of evidence-based clinical quality measures in the 2010 PQRI proposed measures. Comments were received specifically in support of the following measures:

- Functional Communication—Spoken Language Comprehension;
- Functional Communication—Attention;
- Functional Communication—Memory;
- Functional Communication—Motor Speech;
- Functional Communication—Reading;
- Functional Communication—Spoken Language Expression;
- Functional Communication—Writing;

• Functional Communication—Swallowing;
• Perioperative Temperature Management;
• Oncology: Cancer Stage Documented;
• Cataracts: 20/40 or Better Visual Acuity within 90 days following Cataract Surgery;
• Cataracts: Complications within 30 days following Cataract Surgery requiring Additional Surgical;
• Ischemic Vascular Disease (IVD): Blood Pressure Management Control;
• Stenosis Management in Cardiac Imaging Studies;
• Referral for Otologic Evaluation for Patients with Congenital or Traumatic Deformity of the Ear;
• Referral for Otologic Evaluation for Patients with History of Active Drainage from the Ear within the Previous 90 days;
• Referral for Otologic Evaluation for Patients with a History of Sudden or Rapidly Progressive Hearing Loss;
• Coronary Artery Disease (CAD): Symptom and Activity Assessment;
• Coronary Artery Disease (CAD): Drug Therapy for Lowering LDL–Cholesterol;
• Heart Failure: Left Ventricular Function (LVF) Assessment;
• Heart Failure: Patient Education; and
• Heart Failure: Warfarin Therapy for Patients with Atrial Fibrillation.

Response: We appreciate the commenters' support and are finalizing all of the 30 proposed new measures, which are identified in Table 13 of this final rule with comment period.

Comment: We received many comments opposed to limiting one or more new measures proposed for the 2010 PQRI to registry reporting, including the 2 new proposed cataract measures and the 11 new proposed cardiology measures. The commenters suggested that the measures be available for both claims-based and registry reporting for the 2010 PQRI so that practices may choose the best reporting option for them. One commenter also remarked that we should resolve any analytic reporting difficulties with claims-based reporting of these measures internally and not place the burden on eligible professionals.

Response: While we proposed that 19 of the 30 proposed new measures would be available for registry reporting only for 2010 PQRI, we agree, after consideration of the comments received, that it would be feasible to make some of these measures available for either claims or registry reporting. Therefore, the following measures originally proposed for registry only reporting will be available for either claims or registry reporting for the 2010 PQRI:

• Ischemic Vascular Disease (IVD): Blood Pressure Management Control.
• Ischemic Vascular Disease (IVD): Complete Lipid Profile.
• Ischemic Vascular Disease (IVD): Low Density Lipoprotein (LDL–C) Control.
• Ischemic Vascular Disease (IVD): Use of Aspirin or Another Anti-Thrombotic.

The measure specifications developed by the measure developer for the remaining 15 measures are too complex for claims-based reporting.

Based on the reasons discussed above and comments received, we are finalizing in the 2010 PQRI quality measure set all of 30 proposed 2010 PQRI measures identified in Table 19 of the proposed rule. Please note that 4 measures that were proposed to be available for registry only will be made available for either registry or claims reporting in the 2010 PQRI. These measures are:

• Ischemic Vascular Disease (IVD): Blood Pressure Management Control;
• Ischemic Vascular Disease (IVD): Complete Lipid Profile;
• Ischemic Vascular Disease (IVD): Low Density Lipoprotein (LDL–C) Control; and
• Ischemic Vascular Disease (IVD): Use of Aspirin or Another Anti-Thrombotic.

The titles of the 30 additional, or new, PQRI measures for 2010 are listed in Table 13 along with the name of the measure developer and the reporting mechanism(s) available (that is, whether the measure will be reportable using claims, registries, or both).

TABLE 13—NEW INDIVIDUAL QUALITY MEASURES SELECTED FOR 2010

Measure title	NQF Endorsement status as of 5/1/09	AQA Adoption status as of 1/31/09	Measure developer	Reporting mechanism(s)
Stroke and Stroke Rehabilitation: Thrombolytic Therapy.	Yes	No	American Heart Association (AHA)/American Stroke Association (ASA).	Registry.
Referral for Otologic Evaluation for Patients with Congenital or Traumatic Deformity of the Ear.	Pending NQF review	No	Audiology Quality Consortium (AQC).	Claims, Registry.
Referral for Otologic Evaluation for Patients with History of Active Drainage from the Ear within the Previous 90 days.	Pending NQF review	No	AQC	Claims, Registry.
Referral for Otologic Evaluation for Patients with a History of Sudden or Rapidly Progressive Hearing Loss.	Pending NQF review	No	AQC	Claims, Registry.
Cataracts: 20/40 or Better Visual Acuity within 90 days Following Cataract Surgery.	Pending NQF review	Yes	AMA–PCPI/NCQA	Registry.
Cataracts: Complications within 30 Days Following Cataract Surgery Requiring Additional Surgical Procedures.	Pending NQF review	Yes	AMA–PCPI/NCQA	Registry.
Perioperative Temperature Management	Yes	Yes	AMA–PCPI	Claims, Registry.
Oncology: Cancer Stage Documented	Yes	Yes	AMA–PCPI/ASCO	Claims, Registry.
Stenosis Measurement in Carotid Imaging Studies.	Yes	Yes	AMA–PCPI/NCQA	Claims, Registry.
Coronary Artery Disease (CAD): Symptom and Activity Assessment.	Yes	No	AMA–PCPI	Registry.
Coronary Artery Disease (CAD): Drug Therapy for Lowering LDL-Cholesterol.	Yes	No	AMA–PCPI	Registry.

TABLE 13—NEW INDIVIDUAL QUALITY MEASURES SELECTED FOR 2010—Continued

Measure title	NQF Endorsement status as of 5/1/09	AQA Adoption status as of 1/31/09	Measure developer	Reporting mechanism(s)
Heart Failure: Left Ventricular Function (LVF) Assessment.	Yes	No	AMA–PCPI	Registry.
Heart Failure: Patient Education	Yes	No	AMA–PCPI	Registry.
Heart Failure: Warfarin Therapy for Patients with Atrial Fibrillation.	Yes	No	AMA–PCPI	Registry.
Ischemic Vascular Disease (IVD): Blood Pressure Management Control.	Yes	No	NCQA	Claims, Registry.
Ischemic Vascular Disease (IVD): Complete Lipid Profile.	Yes	No	NCQA	Claims, Registry.
Ischemic Vascular Disease (IVD): Low Density Lipoprotein (LDL–C) Control.	Yes	No	NCQA	Claims, Registry.
Ischemic Vascular Disease (IVD): Use of Aspirin or Another Anti-thrombotic.	Yes	No	NCQA	Claims, Registry.
HIV/AIDS: Sexually Transmitted Disease Screening for Chlamydia and Gonorrhea.	Yes	No	AMA–PCPI/NCQA	Registry.
HIV/AIDS: Screening for High Risk Sexual Behaviors.	Yes	No	AMA–PCPI/NCQA	Registry.
HIV/AIDS: Screening for Injection Drug Use	Yes	No	AMA–PCPI/NCQA	Registry.
HIV/AIDS: Sexually Transmitted Disease Screening for Syphilis.	Yes	No	AMA–PCPI/NCQA	Registry.
Functional Communication Measure—Spoken Language Comprehension.	Yes	No	American Speech Language Hearing Association (ASHA).	Registry.
Functional Communication Measure—Attention.	Yes	No	ASHA	Registry.
Functional Communication Measure—Memory.	Yes	No	ASHA	Registry.
Functional Communication Measure—Motor Speech.	Yes	No	ASHA	Registry.
Functional Communication Measure—Reading.	Yes	No	ASHA	Registry.
Functional Communication Measure—Spoken Language Expression.	Yes	No	ASHA	Registry.
Functional Communication Measure—Writing	Yes	No	ASHA	Registry.
Functional Communication Measure—Swallowing.	Yes	No	ASHA	Registry.

We note also that we are finalizing the following new measures for the 2010 PQRI even though they are still pending NQF endorsement and were not AQA adopted as of January 31, 2009:

- Referral for Otologic Evaluation for Patients with Congenital or Traumatic Deformity of the Ear;
- Referral for Otologic Evaluation for Patients with History of Active Drainage from the Ear within the Previous 90 days; and
- Referral for Otologic Evaluation for Patients with a History of Sudden or Rapidly Progressive Hearing Loss. As stated above, we are exercising our exception authority under section 1848(k)(2)(C)(ii) of the Act due to the lack of available measures for audiologists. Measures for audiologists represent a specific area for which there are a dearth of measures that have been endorsed by the NQF and/or adopted by the AQA.

(4) 2010 Individual Quality Measures Available for EHR-Based Reporting

We proposed to accept PQRI data from EHRs for a limited subset (10) of the proposed 2010 PQRI quality measures, contingent upon the successful completion of our 2009 EHR data submission testing process and a determination that accepting data from EHRs on quality measures for the 2010 PQRI is practical and feasible (74 FR 33582).

The following is a summary of the comments received on the proposed electronic submission of these 10 measures.

Comment: One commenter requested that the 2010 EHR measure specifications be released in an expedited fashion so that vendors may properly configure their software in time for the 2010 PQRI.

Response: We agree with the commenter that vendors need sufficient time to adapt their products to support EHR-based capture and submission of data for PQRI measures. To that end, the specifications for the electronic transmission of 2010 PQRI measures were posted on the QualityNet Web site in April 2009 and were updated and reposted in July and September 2009 on the Alternative Reporting Mechanisms page of the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI/20_AlternativeReportingMechanisms.asp#TopOfPage.*

We should note that only eligible professionals using EHR systems that have been ''qualified'' by CMS by virtue of passing our self-nomination and testing process will be able to report their quality data to CMS via their EHR.

Comment: Several comments voiced support for EHR-based reporting of Measure #124, Measure #112, and Measure #113. One commenter was disappointed that no measures relevant to oncology were proposed to be available for 2010 PQRI EHR reporting. Another commenter recommended that the new CAD and heart failure measures proposed for 2010 PQRI registry only reporting also be available for EHR reporting for 2010. One commenter recommended that any potential

retooling of measures for reporting through EHRs should not undermine the scientific basis of the measure.

Response: We appreciate the commenters' support for EHR-based reporting of measures. However, the number of measures available for EHR reporting is limited because in order for measures to be available for EHR-based reporting, measure specifications for the electronic reporting of those measures must be available. We will consider adding new measures for future PQRI program years as specifications become available. The retooling of measures will not change the intent of the measure. We believe that all PQRI measures are evidence-based and consistent with standards of care.

Comment: One commenter suggested that increasing the number of PQRI measures is discriminatory to those that cannot or have not incorporated electronic prescribing due to expense of initiating EHRs and electronic prescribing for small provider offices.

Response: With respect to practices that have not implemented technology that would allow for participation in PQRI via an EHR, there are other 2010 PQRI reporting options available for such practices. There are a total of 125 individual quality measures available for claims or registry reporting for the 2010 PQRI. In addition, 8 of the 13 2010 PQRI measures groups are available for claims or registry reporting (see section II.G.2.i.5. of this final rule with comment period for discussion of the final 2010 PQRI measures groups). The remaining 50 individual PQRI quality measures and 4 measures groups are available for registry reporting in 2010.

With respect to practices that have not implemented technology that would allow for electronic prescribing, we reiterate that the E-Prescribing Incentive Program is a separate and distinct incentive program for eligible professionals. Participation in the E-Prescribing Incentive Program is voluntary and is not required for participation in the 2010 PQRI. Details of the 2010 E-Prescribing Incentive Program can be found in section II.G.5. of this final rule with comment period.

Based on the reasons discussed above and the comments received, we are finalizing the option of accepting clinical quality data extracted from qualified EHRs on all 10 of the proposed 2010 PQRI quality measures identified in Table 20 of the proposed rule. The final 2010 measures available for EHR-based reporting are identified in Table 14 of this final rule with comment period.

TABLE 14—2010 MEASURES AVAILABLE FOR EHR-BASED REPORTING

Measure No.	Measure title	NQF endorsement status as of 5/1/09	AQA adoption status as of 1/31/09	Measure developer
1	Diabetes Mellitus: Hemoglobin A1c Poor Control in Diabetes Mellitus	Yes	Yes	NCQA
2	Diabetes Mellitus: Low Density Lipoprotein (LDL–C) Control in Diabetes Mellitus.	Yes	Yes	NCQA
3	Diabetes Mellitus: High Blood Pressure Control in Diabetes Mellitus	Yes	No	NCQA
5	Heart Failure: Angiotensin-Converting Enzyme (ACE) Inhibitor or Angiotensin Receptor Blocker (ARB) Therapy for Left Ventricular Systolic Dysfunction (LVSD).	Yes	Yes	AMA–PCPI
7	Coronary Artery Disease (CAD): Beta-Blocker Therapy for CAD Patients with Prior Myocardial Infarction (MI).	Yes	Yes	AMA–PCPI
110	Preventive Care and Screening: Influenza Immunization for Patients ≥ 50 Years Old.	Yes	No	AMA–PCPI
111	Preventive Care and Screening: Pneumonia Vaccination for Patients 65 Years and Older.	Yes	Yes	NCQA
112	Preventive Care and Screening: Screening Mammography	Yes	Yes	NCQA
113	Preventive Care and Screening: Colorectal Cancer Screening	Yes	Yes	NCQA
124	Health Information Technology (HIT): Adoption/Use of Electronic Health Records (EHR).	Yes	Yes	CMS/QIP

(5) Measures Selected for Inclusion in 2010 Measures Groups

We proposed to retain the 7 2009 PQRI measures groups for the 2010 PQRI: (1) Diabetes Mellitus; (2) CKD; (3) Preventive Care; (4) CABG; (5) Rheumatoid Arthritis; (6) Perioperative Care; and (7) Back Pain (74 FR 33582 through 33587). As in 2009, we proposed the CABG measures group would be reportable through the registry-based reporting mechanism only for 2010 while the remaining 6 2009 PQRI measures groups would be reportable through either claims-based reporting or registry-based reporting for the 2010 PQRI.

In addition to the 7 measures groups that we proposed to retain from the 2009 PQRI, we proposed 6 new measures groups for the 2010 PQRI, for a total of 13 CY 2010 measures groups. The 6 new measures groups proposed for the 2010 PQRI were: (1) Coronary Artery Disease (CAD); (2) Heart Failure; (3) Ischemic Vascular Disease (IVD); (4) Hepatitis C; (5) Human Immunodeficiency Virus (HIV)/Acquired Immune Deficiency Syndrome (AIDS); and (6) Community Acquired Pneumonia (CAP). Since many of the 6 new measures groups proposed for 2010 contained proposed new registry-only measures, only 8 proposed 2010 measures groups would be reportable through either claims-based reporting or registry-based reporting: Diabetes Mellitus; CKD; Preventive Care; Perioperative Care; Rheumatoid Arthritis; Back Pain; Hepatitis C; and Community Acquired Pneumonia. We solicited comments on our proposal to limit claims-based reporting of measures groups in 2010.

Finally, we also proposed that except for the measures included in the Back Pain measures group, the measures included in any proposed 2010 measures group would be reportable either as individual measures or as part of a measures group. Similar to the 2009 PQRI, we proposed that the measures proposed for inclusion in the Back Pain measures group would be reportable only as part of a measures group and not as individual measures in 2010.

The measures proposed for inclusion in each of the proposed 2010 measures groups were identified in Tables 21 through 33 of the CY 2010 PFS proposed rule (74 FR 33582 through 33587).

The following is a summary of the comments received on the proposed 2010 measures groups.

Comment: We received several comments in support of the proposed 2010 PQRI measures groups. Specifically, we received comments in support of the Preventive Care, CAP, HIV/AIDS, Hepatitis C, Rheumatoid Arthritis, IVD, and Heart Failure measures groups. Some commenters also commended CMS for the inclusion of specific measures in certain measures groups.

Response: We appreciate the commenters' feedback. As identified in Tables 15 through 27 of this final rule with comment period, we are finalizing all of the 13 proposed 2010 PQRI measures groups. No changes were made to the measures included in the measures groups. However, as a result of 4 measures proposed for inclusion in the IVD measures group that were proposed to be registry only measures now being available for either claims or registry reporting, the IVD measures group will also be available for either claims or registry reporting.

Comment: Some commenters suggested changes to our definition of ''measures group.'' One commenter urged us to reduce the number of measures required for reporting a measure group to a minimum of 3 measures. Another commenter requested that we define ''measures group'' to be any 3 measures. One commenter recommended that we implement measures groups with complex denominators to allow for reporting on measures that have an associated impact on patient care and positive outcomes.

Response: As stated in the CY 2010 PFS proposed rule (74 FR 33568), ''measures group'' has been previously defined as a subset of 4 or more PQRI measures that have a particular clinical condition or focus in common. The denominator definition and coding of the measures groups identifies the condition or focus that is shared across the measures within a particular measures group. If we change this definition as suggested by commenters, then there would be no difference in terms of reporting measures groups and reporting PQRI individual quality measures since eligible professionals who choose to report on individual PQRI quality measures are already generally required to report on 3 measures. The only exception that permits eligible professionals to report on fewer than 3 measures is when an eligible professional has fewer than 3 applicable measures. For eligible professionals in this situation, the only option is to report applicable measures via claims.

Comment: One commenter recommended that we monitor Measure #115 Preventive Care and Screening: Advising Smokers and Tobacco Users to Quit for the CAD measures group for ''appropriate conclusion as more evidence is released which will show whether advising smokers to quit increases the chances that they actually will quit.''

Response: We assume that that the commenter is requesting that we monitor Measure #115 for appropriate inclusion in CAD the measures groups. As with all measures and measures groups selected for inclusion in the PQRI quality measure set, we will continue to monitor the appropriateness of including Measure #115 in the CAD measures group on an ongoing basis for future program years.

Comment: One commenter recommended that claims-based reporting be available for all measures groups. Other commenters recommended that claims-based reporting be available for specific measures groups, such as the CAD, IVD, Heart Failure, HIV/AIDS measures groups.

Response: The following 2010 PQRI measures groups will be reportable only via registry-based reporting: (1) CABG; (2) CAD; (3) Heart Failure; and (4) HIV/AIDS. These measures groups will be registry-only because they include individual 2010 PQRI registry-only measures that cannot be feasibly specified for claims based reporting.

Although we proposed that the IVD measures group would also be registry-only for 2010, we determined, based on comments that it is feasible to make the proposed registry-only measures proposed for inclusion in the IVD measures group available for either claims or registry reporting for 2010. Therefore, the IVD measures group will be available for either claims or registry reporting.

Comment: Some commenters recommended the addition of specific codes to particular measures that were proposed for inclusion in a measures group. Specifically, one commenter recommended the addition of 2 physical therapy codes to the back pain measures for the proposed Back Pain measures group. Another commenter recommended the addition of inpatient codes for the measures proposed for inclusion in the CAP measures group.

Response: As stated previously, it is generally the role of the measure owner, developer, or maintainer to make substantive changes to a measure. The addition of physical therapy codes would mean that it is appropriate to hold such professionals accountable for the measure, which we believe constitutes such a substantive issue. The measure maintainer and/or the developer/owner of a measure included in the final set of 2010 PQRI measures groups is identified as the ''Measure Developer'' in Tables 15 through 27 of this final rule with comment period. In addition, NQF has, for its endorsed measures, an established maintenance process which may be accessed. Both venues would be available to seek such substantive changes to the measures. Although we are required by section 1848(k)(2)(D) of the Act to give the public an opportunity to provide input on the selection of PQRI measures and do so via notice and comment rulemaking, we do not use notice and comment rulemaking as a means to make substantive changes to measures nor to update or modify measure specifications. We retain the ability to update or modify specifications to the measures until December 31, 2009. After that date, there will be no changes to the measure for the 2010 reporting period(s).

Based on the reasons discussed above and comments received, we are finalizing the following proposed 2010 measures groups: (1) Diabetes Mellitus; (2) CKD; (3) Preventive Care; (4) CABG; (5) Rheumatoid Arthritis; (6) Perioperative Care; (7) Back Pain; (8) CAD; (9) Heart Failure; (10) IVD; (11) Hepatitis C; (12) HIV/AIDS; and (13) CAP. The following 4 measures groups are reportable through the registry-based reporting mechanism only: (1) CABG; (2) CAD; (3) Heart Failure; and (4) HIV/AIDS. The IVD measures group is no longer limited to registry only reporting since 4 measures included in the group that were proposed to be registry-only measures are now available for either claims or registry reporting for 2010 (see section II.G.2.i.2. above).

The measures selected for inclusion in each of the 2010 measures groups are identified in Tables 15 through 27 of this final rule with comment period. Some measures selected for inclusion in these 6 measures group are current 2009 individual PQRI measures. The title of each such measure is preceded with its PQRI Measure Number in Tables 15 through 27. As stated previously, the PQRI Measure Number is a unique identifier assigned by CMS to all measures in the PQRI measure set. Once a PQRI Measure Number is assigned to a measure, it will not be used again, even if the measure is subsequently retired from the PQRI measure set. Measures that are not preceded by a number (in other words, those preceded

by ''TBD'') in Tables 15 through 27 were never part of a PQRI measure set prior to 2010. A number will be assigned to such measures for 2010.

In addition, some measures selected for inclusion in some of these measures groups for 2010 were not included in the measures groups in 2009. The 2009 measures selected for inclusion in a 2010 measures group that were not included in the measures group for 2009 are identified with an asterisk (*).

We also note that the proposed 2010 Heart Failure measures group included the measure Heart Failure: Warfarin Therapy for Patients with Atrial Fibrillation, which is not included in the final 2010 Heart Failure measures group. The measure does not meet the common denominator criteria for the Heart Failure measures group because it requires an additional denominator code for atrial fibrillation. This additional code is not in the other 7 measures included in the Heart Failure measures group. As stated previously, measures groups must have a particular condition or focus in common, as identified by the denominator definition and coding of the measures group.

As with measures group reporting in the 2008 and 2009 PQRI, each eligible professional electing to report a group of measures for 2010 must report all measures in the group that are applicable to each patient or encounter to which the measures group applies at least up to the minimum number of patients required by the applicable reporting criteria. The measures selected for the Back Pain measures group continue to be reportable only as part of a measures group and not as individual measures for the 2010 PQRI. Measures selected for inclusion in all other 2010 PQRI measures groups are reportable either as individual measures or as part of a measures group.

BILLING CODE 4120–01–P

TABLE 15: Measures Selected for 2010 Diabetes Mellitus Measures Group

Measure Number	Measure Title	Measure Developer
1	Diabetes Mellitus: Hemoglobin A1c Poor Control in Diabetes Mellitus	NCQA
2	Diabetes Mellitus: Low Density Lipoprotein (LDL-C) Control in Diabetes Mellitus	NCQA

BILLING CODE 4120–01–C

We note that the specifications for measures groups do not necessarily contain all the specification elements of each individual measure making up the measures group. This is based on the need for a common set of denominator specifications for all the measures making up a measures group in order to define the applicability of the measures group. Therefore, the specifications and instructions for measures groups will be provided separately from the specifications and instructions for the individual 2010 PQRI measures. We will post the detailed specifications and specific instructions for reporting measures groups on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI* by no later than December 31, 2008.

Additionally, the detailed measure specifications and instructions for submitting data on those 2010 measures groups that were also included as 2009 PQRI measures groups may be updated or modified prior to 2010. Therefore, the 2010 PQRI measure specifications for any given measures group could be different from specifications and submission instructions for the same measures group used for 2009. These measure specification changes do not materially impact the intended meaning of the measures or the strength of the measures.

(6) Request for Public Comment on Measure Suggestions for Future PQRI Quality Measure Sets

In the CY 2010 PFS proposed rule (74 FR 33587), we invited commenters to submit suggestions for individual quality measures and measures groups (that is, suggestions for new measures groups and/or suggestions for the composition of measures groups) for consideration for possible inclusion in the proposed set of quality measures for use in the 2011 PQRI. We asked individuals or organizations submitting suggestions to provide us with the following information:

- Requestor contact information, such as name and title, organization/practice name, phone number and e-mail address;
- Measure title;
- Measure description;
- Measure owner/developer;
- NQF endorsement status, including the date of endorsement or anticipated endorsement (if not NQF-endorsed) and type of endorsement (for example, time-limited endorsement);
- AQA adoption status, including date of AQA adoption or anticipated AQA adoption;
- Preferred PQRI reporting option for the suggested measure(s) (that is, claims, registry, registry-only, measures group, measures group only, EHRs); and
- The measure specifications.

The following is summary of the comments we received regarding suggestions for individual quality measures and measures groups (that is, suggestions for new measures groups and/or suggestions) for the 2011 PQRI.

Comment: Several commenters suggested quality measures or measures groups for the 2010 PQRI in addition to the quality measures and measures groups for individual eligible professionals we had proposed in Tables 19 through 33 of the CY 2010 PFS proposed rule (74 FR 33575 through 33587).

Response: We have not included in this final rule with comment period for the 2010 PQRI any individual quality measures that were not identified in the CY 2010 PFS proposed rule as proposed 2010 PQRI measures. As discussed above in this final rule with comment period, we are obligated by section 1848(k)(2)(D) of the Act to give eligible professionals an opportunity to provide input during the selection of measures for the 2010 PQRI and subsequent years. Eligible professionals have not had an opportunity to provide input on measures recommended for selection via comments on the proposed rule that were not specifically included in the proposed rule. Thus, such additional measures recommended via comments on the proposed rule cannot be included in the 2010 PQRI quality measure set. However, we have captured these recommendations and will have them available for consideration in identifying measure sets for future years' PQRI and other initiatives to which those measures may be pertinent.

Comment: As we requested in the CY 2010 PFS proposed rule (74 FR 33587), several commenters suggested quality measures or measures groups for the 2011 PQRI.

Response: We have captured these recommendations. To the extent information provided is complete (that is, includes the measure or measure group details requested in the proposed rule), we will consider the commenters' recommendations in identifying measure sets for future years' PQRI and other initiatives to which those measures may be pertinent. As we stated in the CY 2010 PFS proposed rule, suggesting individual measures or measures for new or proposed measures groups does not mean that the measure(s) or measures group(s) will be included in the proposed or final sets of measures or measures groups of any proposed or final rules that address the 2011 PQRI. We will determine what individual measures and measures group to include in the proposed set of quality measures, and after a period of public comment, we will make the final determination with regard to the final set of quality measures for the 2011 PQRI.

Comment: Some commenters urged us to expand the opportunities for measures to be presented to CMS for potential inclusion in the PQRI. One commenter elaborated that the process to develop and endorse measures takes a considerable amount of time and measure developers should have greater opportunities to bring measures forward. The commenter also requested that we review the process by which PQRI measures are selected to ensure transparency and greater communication with measure developers. The commenter stated that currently the process leaves little opportunity for the measure developer to dialogue with CMS if the measure is denied. The commenter believes we should provide feedback on suggested measures prior to publication of the proposed rule.

Response: We understand the commenters' concerns. As stated previously, we largely depend on the development of measures by professional organizations and other measure developers. As such, we depend on the measure developers and other stakeholders to bring forth potential measures to our attention. We are continuing to look for ways to improve the process for allowing stakeholders to bring forth suggested measures and are considering some changes in the process future years PQRI. For example, in addition to our invitation to submit suggestions for measures and measures groups for potential inclusion in the 2011 PQRI contained in CY 2010 PFS proposed rule (74 FR 33587), we are considering a Call for 2011 Measures that will allow stakeholders to submit additional measures and/or measures groups suggestions for the 2011 PQRI after publication of this final rule followed by a listening session in early 2010 to promote a dialogue with stakeholders with respect to the measure or measures group suggestions we receive.

j. 2010 PQRI Quality Measures for Physician Groups Selected To Participate in the Group Practice Reporting Option

We proposed that physician groups selected to participate in the 2010 PQRI group practice reporting option would be required to report on 26 measures (74 FR 33587). These measures are NQF-endorsed measures currently collected

as part of the PGP and/or MCMP demonstrations.

The following is summary of the comments we received regarding the proposed 2010 PQRI Quality Measures for physician groups selected to participate in the PQRI group practice reporting option.

Comment: Some commenters suggested that we broaden the scope of measures so that the measures would be applicable to specialty care such as emergency medicine, gastroenterology, and surgical specialties. A few commenters felt that group practices are being required to report on too many measures. Several commenters believe that it is appropriate for CMS to first implement the group practice reporting option by focusing on the high-cost chronic conditions and preventive care reflected by the proposed measures.

Response: We recognize that the measures largely apply to primary care. However, as required by statute, the measures shall target high-cost chronic conditions and preventive care. This reporting option is for group practices with 200 or more eligible professionals. On average, these group practices typically have 20,000 patients assigned to each group practice. Each group practice will be required to complete the data collection tool on a total of no more than 3,699 consecutively assigned and ranked patients, which is 411 patients per disease module and preventive care measure. Thus, the number of measures is considered to be equitable for practices with this volume of patients and eligible professionals. We will continue to evaluate the number and types of measures and modules for future program years.

Comment: We received some comments in support of the proposed measures for the group practice reporting option. A few commenters expressed support for specific proposed measures, including:

- Measure #1 Diabetes Mellitus: Hemoglobin A1c Poor Control;
- Measure #5 Heart Failure: Angiotensin-Converting Enzyme (ACE) Inhibitor or Angiotensin Receptor Blocker (ARB) Therapy for Left Ventricular Systolic Dysfunction (LVSD);
- Measure #6 Coronary Artery Disease (CAD): Oral Antiplatelet Therapy Prescribed for Patients with CAD;
- Measure #7 Coronary Artery Disease (CAD): Beta-Blocker Therapy for CAD Patients with Prior Myocardial Infarction (MI);
- Measure #8 Heart Failure: Beta-Blocker Therapy for Left Ventricular Systolic Dysfunction (LVSD); Measure #118 Coronary Artery Disease (CAD): Angiotensin-Converting Enzyme (ACE) Inhibitor or Angiotensin Receptor Blocker (ARB) Therapy for Patients with CAD and Diabetes and/or Left Ventricular Systolic Dysfunction (LVSD);
- Heart Failure: Left Ventricular Function (LVF) Testing;
- Heart Failure: Left Ventricular Function (LVF) Assessment;
- Heart Failure: Weight Measurement;
- Heart Failure: Patient Education;
- Heart Failure: Warfarin Therapy for Patients with Atrial Fibrillation; and
- Coronary Artery Disease (CAD): Drug Therapy for Lowering LDL-Cholesterol.

Response: We appreciate the commenters support. The final measures for physician groups participating in the 2010 PQRI group practice reporting option are identified in Table 28.

Comment: One commenter noted that the 2 proposed hypertension measures (Hypertension (HTN): Blood Pressure Control and Hypertension (HTN): Plan of Care) are not included in the larger list of 2010 PQRI measures for individual eligible professionals. The commenter recommended that we include these 2 measures as 2010 PQRI individual quality measures for individual eligible professionals.

Response: The commenter is correct; these 2 measures are not available to individual eligible professionals to report for the 2010 PQRI. Since these measures were not proposed to be included in the 2010 PQRI quality measure set for individual eligible professionals, however, we are unable to add them to the PQRI quality measure set for individual quality measures for 2010. As stated previously, section 1848(k)(2)(D) of the Act requires us to give the public an opportunity to provide input on the selection of measures for the PQRI, which we accomplish through notice and comment rulemaking. Since these measures have not been placed before the public as potential measures for individual eligible professionals for the 2010 PQRI, eligible professionals and other stakeholders have not had an opportunity to provide input on the inclusion of these 2 measures in the 2010 PQRI quality measure set for individual eligible professionals.

Comment: The measure developer/owner of the Heart Failure: Weight measurement measure requested that we remove the measure from the group reporting option since the measure owner's measure workgroup is planning to retire the measure from its heart failure measure set in the upcoming months.

Response: We value the input of the measure developer/owner. Furthermore, we look to the measure developer/owner to maintain and update measures based on the standards of care and evidence base. We believe, however, that the Heart Failure: Weight Measurement measure targets a high-cost chronic condition. The measure is a valuable measure in the evaluation of patients with heart failure and continues to have a significant impact on the care and improvement in outcomes. Additionally, the measure has undergone the scientific rigor of achieving consensus endorsement by the NQF. Therefore, we will retain this measure, as proposed, in the group practice reporting option. The final measure specifications for the group practice reporting option will be posted on the CMS Web site *http://www.cms.hhs.gov/pqri* no later than December 31, 2009.

Comment: One commenter noted that measure developer listed in the proposed rule for the ''Preventive Care: Blood Pressure Management'' measure was incorrect and should be corrected in the final rule.

Response: The measure title was incorrectly listed as ''Preventive Care: Blood Pressure Management.'' The correct title is ''Hypertension: Blood Pressure Measurement.'' This correction is reflected in Table 28.

Based on the reasons discussed above and after considering the comments, for the 2010 PQRI, group practices selected to participate in the PQRI group practice reporting option will be required to report on all measures listed in Table 28. To the extent that a measure is an existing PQRI measure available for reporting by individual eligible professionals, the Measure Title is preceded by the measure's PQRI Measure Number. If there is no number in the PQRI Measure Number column of the table, then the measure is not an existing PQRI measure and will be added to the 2010 PQRI for purposes of the group practice reporting option.

A separate measures specifications manual and other supporting documents will be available for group practices participating in the 2010 PQRI group practice reporting option. We anticipate that the group practice measures specifications manual will be available by November 15, 2009 on the PQRI section of the CMS Web site at *http://www.cms.hhs.gov/PQRI.*

TABLE 28—MEASURES FOR PHYSICIAN GROUPS PARTICIPATING IN THE 2010 PQRI GROUP PRACTICE REPORTING OPTION

PQRI Measure No.	Measure title	Measure developer

TBD	Hypertension (HTN): Plan of Care	AMA–PCPI

k. Public Reporting of PQRI Data

Section 1848(m)(5)(G) of the Act, as added by the MIPPA, requires the Secretary to post on the CMS Web site, in an easily understandable format, a list of the names of eligible professionals (or group practices) who satisfactorily submitted data on quality measures for the PQRI and the names of the eligible professionals (or group practices) who are successful electronic prescribers. In accordance with section 1848(m)(5)(G) of the Act, we stated in the CY 2010 PFS proposed rule (74 FR 33588 through 33589) our intent to make public the names of eligible professionals and group practices that satisfactorily submit quality data for the 2010 PQRI on the Physician and Other Health Care Professionals Directory. In addition to posting the information required by section 1848(m)(5)(G) of the Act, for those group practices that are selected to participate in PQRI under the group practice reporting option, we also proposed to make the group practices' PQRI performance rates publicly available, for each of the measures. We solicited comments regarding our proposal to publicly report group practices' PQRI performance results.

The following is summary of the comments we received regarding the public reporting of PQRI data required under section 1848(m)(5)(G)(i) of the Act and our proposal to publicly report group practices' PQRI performance results.

Comment: We received some comments in support of public reporting of either the information required by section 1848(m)(5)(G)(i) of the Act or all PQRI measure results, including individual eligible professionals' performance results. One commenter stated that CMS needs to articulate a clear and aggressive path forward, with short-term benchmarks and a goal of having publicly available, actionable performance and cost information for all participating Medicare clinicians.

Response: We appreciate the commenters' support. As we have stated previously, we believe that public reporting of group practices' PQRI performance results represents an opportunity to make strides towards the goal of being able to make quality information about physicians and other healthcare professionals publicly available.

Comment: One commenter encouraged the use of composite measures to help increase the reliability of individual eligible professionals' performance data.

Response: At this time we have no plans to publicly release individual eligible professionals' performance data. Additional refinements to the PQRI are likely needed as the program matures.

Comment: One commenter recommended that CMS also publicly report the names of eligible professionals who choose not to participate in the PQRI. The commenter stated that the willingness (or lack thereof) of clinicians to participate in performance measurement and reporting should be publicly recognized.

Response: We disagree that such information would be useful to consumers since there are several valid reasons why an eligible professional may choose to not participate in a voluntary initiative, such as the PQRI. Consumers may potentially misinterpret the lack of participation to mean that an eligible professional is not interested in providing quality care.

Comment: Many commenters were opposed to releasing any other data on PQRI until issues with the Physician and Other Health Care Professional Directory are addressed and corrected.

Some of the issues cited by commenters include, the lack of accurate provider listings, poor and difficult to find disclaimer information regarding participation in PQRI, and poor user instructions. Many comments, in particular, requested that the disclaimer that was provided with the list of 2007 PQRI participants be updated and made more prominent.

Response: We appreciate the comments and plan to make improvements to the Directory with respect to reporting PQRI participation.

Comment: Many commenters were opposed to releasing any additional PQRI information, including the information required under section 1848(m)(5)(G)(i) of the Act, because of issues with the PQRI itself. Some of the concerns cited by commenters include the following:

- The errors identified with the 2007 PQRI have compromised the program's validity within the participant community;
- The program's plans to transition away from claims-based reporting may force eligible professionals who satisfactorily reported in the past to stop doing so;
- The potential for consumers to misunderstand the significance of the information being publicly reported since there are still many valid reasons why an eligible professional may not have participated or may have participated but was not considered a satisfactory reporter.

One commenter suggested that we consider alternative data sets for public reporting such as Board certification, CAHPS data, and/or a physician or other health care professional's participation in a registry. Other commenters requested that a formal evaluation of the 2007 and 2008 PQRI be conducted before releasing any participation, reporting, or performance rates.

Response: As required by section 1848(m)(5)(G)(i) of the Act, we must, at a minimum, make public the names of eligible professionals and group practices that satisfactorily submit quality data for the 2010 PQRI on the Physician and Other Health Care Professionals Directory. We anticipate that the names of individual eligible professionals and group practices that satisfactorily submit quality data for the 2010 PQRI will not be made available any earlier than in 2011 after the 2010 incentive payments are paid. In an attempt to address commenters' concerns, we will make information about the intended uses and/or limitations of the information being presented in the form of a disclaimer available on the Web site as well. To the extent that additional information derived from the PQRI, is made public we would also take such concerns into account.

Comment: Several commenters provided recommendations for CMS to consider with respect to publicly reporting PQRI information, including the information required by section 1848(m)(5)(G)(i) of the Act. These suggestions include the following:

- Establishing a process that allows for prior review and comment before data are made public and that allows for any comments received to be included with the publicly reported data;
- Establishing an appeals process with regard to any data that is to be publicly reported;
- Providing information outlining the data's potential uses and limitations;
- Providing information that clearly and specifically states that information about whether an eligible professional is a satisfactory reporter does not necessarily indicate that higher quality care was or will be provided by those eligible professionals (or group practices) who qualified to earn PQRI incentive payments;
- Providing better access to and more timely feedback;
- Avoiding characterization of the names of satisfactory reporters as comparative quality information; and
- Giving eligible professionals an opportunity to explain why they are not participating.

Response: We appreciate the commenters' valuable input. We believe that many of these suggestions have already been addressed. For example, eligible professionals have an opportunity to review their reporting and performance results via the feedback reports that are made available to all participating eligible professionals at the time that incentive payments are released for a particular program year. As discussed previously, we have also created an alternate process to make it easier for eligible professionals to obtain their feedback reports and created a dedicated Help Desk that is available to assist eligible professionals who have any concerns about the information contained in their feedback reports. All information that is publicly reported will also be accompanied by appropriate disclaimers that address the information's potential uses and limitations, including the fact that an eligible professional or group practice is listed as having satisfactorily reported PQRI quality measures does not necessarily indicate that he or she provides higher quality care than those who did not participate or those who participated but did not do so satisfactorily.

Comment: Several commenters provided recommendations for CMS to consider specifically with respect to our proposal to publicly report group practices' PQRI performance results. These suggestions include the following:

- Providing group practices the opportunity to suppress their data;
- Precisely defining what performance data CMS plans to post; and
- Conducting and publishing an evaluation of PQRI on its impact on quality of care before selecting measures for public reporting.

Response: As stated in the CY 2010 PFS proposed rule (74 FR 33589), we proposed to make the group practices' performance rates for each of the PQRI group practice reporting option measures public for each group selected to participate in PQRI group practice reporting option. We proposed to attribute the performance rates to the entire group and will not post any information with respect to the performance of individual eligible professionals other than, potentially, to identify the individual eligible professionals that were associated with the group during the reporting period.

As stated in section II.G.2.g.1. above, however, we have taken the commenters' concerns about publicly reporting the group practices' performance results in the first year of implementation of the PQRI group practice reporting option into consideration. We are not finalizing our proposal to require group practices that wish to utilize the group practice reporting option in 2010 to agree to have their PQRI performance results publicly reported. In addition, we will not report any 2010 group practice performance results publicly at all except as otherwise required by law and will limit public reporting of information on the PQRI group practice reporting to the information required by section 1848(m)(5)(G)(i) of the Act (that is, the names of group practices that satisfactorily submitted data on PQRI quality measures). Instead, we will consider implementing public reporting of group practices' performance results in the 2011 PQRI program year.

Comment: Many commenters were opposed to the public reporting of any PQRI information beyond what is specifically required by section 1848(m)(5)(G)(i) of the Act. These concerns include the following:

- CMS only has the specific authority to publicly report the information

required by section 1848(m)(5)(G)(i) of the Act;

- There continue to be substantial gaps in the PQRI quality measure set that may create a barrier to participation in PQRI;
- The value of PQRI data is questionable since there has been no formal evaluation of the PQRI to determine its impact on the quality of care, whether it allows for fair and meaningful comparisons of performance on eligible professionals, and whether it is valid; and
- PQRI is not available to all specialties.

Response: Other than the information required by section 1848(m)(5)(G)(i) of the Act, the only PQRI information that we contemplated making public is the PQRI performance results for group practices selected to participate in the PQRI group practice reporting option (that is, group practices that have agreed to have their PQRI performance results publicly reported as a condition of utilizing the group practice reporting option). As stated above, we have taken commenters' concerns into consideration and have decided to defer implementation of public reporting of group practices' performance results until the 2011 PQRI program year.

Comment: One commenter requested clarification of the term ''satisfactorily submitted.'' The commenter recommended that we exercise flexibility until there is a guarantee that we can accurately collect and analyze the submission of quality data codes.

Response: We do not believe we have the authority to flexibly define the term ''satisfactorily submitted.'' Section 1848(m) of the Act clearly considers any eligible professional or group practice who satisfies the criteria for satisfactory reporting, as defined in sections II.G.2.e. through II.G.2.g. of this final rule with comment period, to be an eligible professional or group practice who qualifies for an incentive payment. Furthermore, section 1848(m)(5)(G) of the Act clearly requires us to post the names of eligible professionals or group practices that satisfactorily submitted data on PQRI quality measures.

After considering the comments above, we intend to post the names of eligible professionals who: (1) Submit data on the 2010 PQRI quality measures through one of the reporting mechanisms available for the 2010 PQRI; (2) meet one of the proposed satisfactory reporting criteria of individual measures or measures groups for the 2010 PQRI; and (3) qualify to earn a PQRI incentive payment for covered professional services furnished during the applicable 2010 PQRI reporting period for purposes of satisfying the requirements under section 1848(m)(5)(G)(i) of the Act, on the Physician and Other Health Care Professionals Directory.

Similarly, for purposes of satisfying the requirements under section 1848(m)(5)(G)(i) of the Act with respect to group practices, on the Physician and Other Health Care Professionals Directory, we intend to post the names of group practices that: (1) Submit data on the 2010 PQRI quality measures through the proposed group practice reporting option; (2) meet the proposed criteria for satisfactory reporting under the group practice reporting option; and (3) qualify to earn a PQRI incentive payment for covered professional services furnished during the applicable 2010 PQRI reporting period for group practices.

We do not intend to make performance rates for group practices participating in the 2010 PQRI group practice reporting option publicly available but anticipate publicly reporting group practices' performance results for the 2011 PQRI program year.

We anticipate that information with respect to quality data submitted for the 2010 PQRI (that is, the names of individual eligible professionals and group practices that satisfactorily report in 2010) will not be available until after the 2010 incentive payments are paid in 2011.

3. Section 131(c): Physician Resource Use Measurement and Reporting Program

a. Statutory Authority

As required under section 1848(n) of the Act, as added by section 131(c) of the MIPPA, we established and implemented by January 1, 2009, the Physician Resource Use Measurement & Reporting Program for purposes of providing confidential reports to physicians that measure the resources involved in furnishing care Medicare beneficiaries. Section 1848(n) of the Act also authorizes CMS to include information on the quality of care furnished to Medicare beneficiaries by a physician or group of physicians.

b. Background

As stated in the CY 2009 PFS final rule with comment period (73 FR 69866), the Program would consist of multiple phases. We included a summary of the activities of phase I of the Program in the CY 2009 PFS final rule with comment period (73 FR 69866 through 69869). In addition to discussing phase I of the Program, we also highlighted the activities of several other initiatives, including Medicare Value-Based Purchasing (VBP) programs and demonstrations and related activities undertaken by the MedPAC and the Government Accountability Office (GAO). We refer readers to the CY 2009 PFS final rule with comment period (73 FR 69866 through 69869) for a detailed discussion of these activities.

In the CY 2009 PFS final rule with comment period (73 FR 69866 through 69869), we finalized, on an interim basis, the following parameters for phase I of the Program: (1) Use of both per capita and episode of care methodologies for resource use measurement; (2) cost of service category analysis (for example, imaging services or inpatient admissions); (3) use of 4 calendar years of claims data; (4) focus on high cost and/or high volume conditions; (5) reporting to physician specialties relevant to the selected focal conditions; (6) focus on physicians practicing in certain geographic areas, and (7) low, median, and high cost benchmarks.

In the CY 2010 PFS proposed rule (74 FR 33589 through 33591), we summarized the comments received from the CY 2009 PFS final rule with comment period and our responses. Further, we made the following proposals in the CY 2010 PFS proposed rule (74 FR 33591): (1) Reporting on quality measures in addition to resource use measures, and (2) reporting to groups of physicians in addition to individual physicians.

c. Phase I of the Program

As indicated above, the Program consists of multiple phases. Under this approach, each phase of the Program will inform future phases of the Program. We refer readers to the CY 2009 PFS final rule with comment period (73 FR 69866 through 69869) for a description of phase I Program activities. Using the parameters that were finalized on an interim basis, we have disseminated approximately 310 resource use reports (a sample report is available at *http://rurinfo.mathematica-mpr.com/*) to physicians in 13 geographic regions (74 FR 33590). In the proposed rule, we solicited public comments on the interim final Program parameters.

Commenters supported the Program parameters that were finalized on an interim basis in the CY 2009 PFS final rule (73 FR 69866 through 69869). Our summary of those comments and our responses are contained in the CY 2010 PFS proposed rule (74 FR 33589 through 33591). Accordingly, we are finalizing the interim final Program parameters.

In addition to the eight conditions finalized on an interim basis in the CY 2009 PFS final rule(74 FR 33590), we solicited public comment on adding diabetes as an episode of care.

Comment: Commenters supported including diabetes as one of the selected episodes of care for the Program.

Response: We are finalizing adding diabetes to the episode of care analysis in the Program.

In the CY 2010 PFS proposed rule (74 FR 33591), we referred readers to the following Web site to review a de-identified sample of the resource use reports disseminated to physicians: *http://rurinfo.mathematica-mpr.com/.* We solicited public comment on the resource use report used in phase I of the Program.

Comment: Commenters supported dissemination of feedback reports both in hard copy and electronically.

Response: We intend to offer both hard copy and electronic delivery of feedback reports in the Program.

Comment: Commenters supported electronic reports that allow user-driven data drilldown capability to the claim level.

Response: We intend to explore the feasibility of such drill-down capability.

Comment: A few commenters suggested that additional cost of service categories (described on pages 30 and 34–35 at *http://rurinfo.mathematica-mpr.com/*) should be included in the feedback reports. Additional categories mentioned included: prescribed drugs, costs due to infections, and specific information on diagnostic tests and services.

Response: We intend to explore the feasibility of these additional cost of service categories in the future.

Comment: A few commenters suggested capturing hospital readmissions as a measure in the feedback reports.

Response: We are committed to closely monitoring hospital readmissions in the Medicare program. We intend to explore the feasibility of capturing readmissions in the physician group feedback reports in the future.

Comment: A few commenters stated that some of the benchmarks used in the reports were too broad in order to make meaningful peer comparisons.

Response: We are committed to refining the benchmarks used in the Program to ensure meaningful peer comparisons. We note that there is a trade-off between statistical precision and narrow benchmarks. For additional discussion on this statistical topic, we refer readers to the CY 2010 PFS proposed rule (74 FR 33590 through 33591). Further, we note that the broad geographic benchmarks provide additional value to CMS by informing policymakers of measurement variation across geographic regions.
