FEDERAL REGISTER

Vol. 83 Friday,

No. 231 November 30, 2018

Book 1 of 2 Books

Pages 61509–61728

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 83 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

FEDERAL RESERVE SYSTEM

12 CFR Part 210

[Regulation J; Docket No. R–1599]

RIN 7100–AE98

Collection of Checks and Other Items by Federal Reserve Banks and Funds Transfers Through Fedwire

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) is publishing final amendments to Regulation J. The amendments clarify and simplify certain provisions Regulation J, remove obsolete provisions, and align the rights and obligations of sending banks, paying banks, and Federal Reserve Banks (Reserve Banks) with the Board's recent amendments to Regulation CC to reflect the virtually all-electronic check collection and return environment. The final rule also amends Regulation J to clarify that terms used in financial messaging standards, such as ISO 20022, do not confer legal status or responsibilities.

DATES: Effective January 1, 2019.

FOR FURTHER INFORMATION CONTACT: Clinton N. Chen, Senior Attorney (202) 452–3952, Legal Division; or Ian C.B. Spear, Manager (202) 452–3959; Division of Reserve Bank Operations and Payment Systems; for users of Telecommunication Devices for the Deaf (TDD) only, contact 202–263–4869; Board of Governors of the Federal Reserve System, 20th and C Streets NW, Washington, DC 20551.

SUPPLEMENTARY INFORMATION:

I. Background

Subpart A of Regulation J governs the collection of checks and other items by the Reserve Banks. This subpart includes the warranties and indemnities that are given to the Reserve Banks by parties that send items to the Reserve Banks for collection and return, as well as the warranties and indemnities for which the Reserve Banks are responsible in connection with the items they handle. Subpart A also describes the methods by which the Reserve Banks may recover for losses associated with their collection of items. Subpart A authorizes the Reserve Banks to issue operating circulars governing the details of the collection of checks and other items and provides that such operating circulars have binding effect on all parties interested in an item handled by a Reserve Bank. The Reserve Banks' Operating Circular No. 3, ''Collection of Cash Items and Returned Checks'' (OC 3),[1] is the operating circular that is most relevant to the Reserve Banks' check collection activities. Subpart B of Regulation J provides rules to govern funds transfers through the Reserve Banks' Fedwire Funds Service. This service is also governed by the Reserve Banks' Operating Circular No. 6, ''Funds Transfers through the Fedwire Funds Service'' (OC 6).[2]

II. Overview of Proposal and Comments

In March 2018, the Board published a notice of proposed rulemaking (''proposal'') intended to align subpart A of Regulation J with the Board's 2017 amendments to Regulation CC and cross reference certain provisions (83 FR 11431). The proposal also included amendments to subpart B of Regulation J to clarify that terms used in financial messaging standards, such as ISO 20022, do not confer legal status or responsibilities. The Board received 25 comments in response to its proposal during the comment period from a variety of commenters, including financial institutions, trade associations, clearinghouses, and private individuals. The Board has considered all comments received and has adopted amendments to Regulation J as described below.

A. Alignment With Regulation CC Amendments Addressing Electronic Checks

Under subpart A of Regulation J, Reserve Banks handle ''items,'' which are defined to include ''electronic items.'' Regulation J currently defines an ''electronic item'' as an electronic image of, and information describing, an item that a Reserve Bank agrees to handle pursuant to an operating circular. Regulation J also sets forth certain warranties provided to the Reserve Banks by the sender of an electronic item and certain warranties provided by the Reserve Banks when sending or presenting an electronic item. Specifically, Regulation J provides that for electronic items, the sender and the Reserve Banks make warranties (1) as set forth in the Uniform Commercial Code (U.C.C.) and Regulation CC as if the electronic item were subject to their terms; and (2) similar to those made for substitute checks under the Check 21 Act (''Check-21-like warranties''). Regulation J also currently provides similar provisions related to checks that are returned as electronic items.

In 2017, the Board published a final rule amending Regulation CC to reflect the virtually all-electronic check collection and return environment (82 FR 27552). Among other things, the amendments created a regulatory framework for the collection and return of electronic items (*i.e.,* electronic images and electronic information derived from a paper item) by defining the terms ''electronic check'' and ''electronic returned check,'' creating Check-21-like warranties for electronic checks and electronic returned checks, and applying existing paper-check warranties to electronic checks and electronic returned checks.

In its proposal, the Board proposed to remove the term ''electronic item'' from Regulation J and define ''check'' and ''returned check'' to include an electronic check and electronic returned check as defined in § 229.2 of Regulation CC. The proposal defined the term ''item'' to include an electronic check as defined in Regulation CC. The Board also proposed to eliminate duplicative provisions by removing the Check-21-like warranties currently provided under Regulation J by the sender and the Reserve Banks. Instead, the proposal provided that the sender of an item (including an electronic check) and the Reserve Banks would (as applicable and unless otherwise provided) make all the warranties and indemnities set forth in and subject to the terms of subparts C and D in

Regulation CC. The Board proposed similar amendments to the provisions of Regulation J that currently address returning checks as electronic items.

Commenters generally supported aligning Regulation J with Regulation CC's amendments regarding electronic checks. The Board received specific comments on cross referencing Regulation CC electronic check warranties and indemnities, which is discussed in detail in the relevant section-by-section analysis. The Board has revised proposed §§ 210.6(b)(3) and 210.12(e) to extend the warranties with respect to electronic checks and electronic returned checks provided by Reserve Banks to the same scope of recipients as in Regulation CC, as discussed in detail in the relevant section-by-section analyses.

B. Electronically Created Items

In the 2017 amendments to Regulation CC, the Board included certain indemnities with respect to electronically-created items (ECIs), which are check-like items created in electronic form that never existed in paper form. ECIs can be difficult to distinguish from electronic images of paper checks. As a practical matter, a bank receiving an ECI often handles it as if it were derived from a paper check. However, because there was no original paper check corresponding to the ECI, the warranties, indemnities, and other provisions of Regulation CC would not apply to those items. As the Board explained in the 2017 Regulation CC amendments, the payee and the depositary bank are in the best position to know whether an item is electronically created and to prevent the item from entering the check-collection system. Therefore, to protect banks that receive ECIs during the check collection process, the Board's Regulation CC amendments provided indemnities that ultimately shift liability for losses to the depositary bank. These losses could arise because the ECI (1) is not derived from a paper check, (2) was unauthorized, or (3) was transferred or presented for payment more than once.[3] As described above, the final rule cross references Regulation CC's warranties and indemnities in Regulation J, including Regulation CC's ECI indemnities.

In its proposal, the Board explained that although Regulation J does not explicitly address ECIs, the definition of item in Regulation J does not encompass ECIs and therefore Regulation J does not allow for the handling of ECIs by the Reserve Banks. Specifically, Regulation J defines an item, in part, as ''an instrument or a promise or order to pay money, whether negotiable or not'' that meets several other requirements.[4] The terms ''instrument,'' ''promise,'' and ''order'' are defined under the U.C.C. as requiring a writing.[5] Because they never existed in tangible form and therefore do not qualify as writings, ECIs are not ''items'' as defined in Regulation J.

To provide greater clarity that Regulation J does not allow for the handling of ECIs by the Reserve Banks, the Board proposed to amend the definition of ''item'' in subpart A of Regulation J to state explicitly that the term does not include an ECI as defined in Regulation CC. Furthermore, because Regulation J is intended to provide rules for the collection and return of items by the Reserve Banks, the Board proposed to allow the Reserve Banks to require senders to provide warranties and indemnities that only ''items'' and any ''noncash items'' the Reserve Banks have agreed to handle will be provided to the Reserve Banks. The Board's proposal also permitted the Reserve Banks to provide a subsequent collecting bank and a paying bank the warranties and indemnities provided by the sender. The Board requested comment on possible implications that this clarification and change related to ECIs in Regulation J may have on financial institutions or the industry more broadly. The Board also requested comment on whether, and to what extent, the Board should consider amending Regulation J as part of a future rulemaking to permit the Reserve Banks to accept ECIs.

Three commenters, including a Federal Reserve Bank and a comment letter submitted by a group of trade associations (''group letter''), supported the Board's proposal on ECIs. The Reserve Bank commenter noted that it is aware that some advocates support allowing ECIs to be handled in the same manner as checks and has worked with these advocates to explore the possibility of making legal and operational changes to support ECIs. However, the Reserve Bank commenter stated that there is currently no consensus among industry participants to change laws or adopt standards necessary to support ECIs. In the absence of such laws and standards supporting ECIs, the Reserve Bank commenter believes that ECIs represent an unacceptable level of risk to financial institutions. Similarly, the group letter stated that ECIs lack legal status under existing laws and expose financial institutions to risks that cannot be effectively mitigated. The group letter stated that due to ECIs uncertain legal status, it is important to protect financial institutions that receive ECIs during the check collection process from damage or loss arising from the fact that ECIs are not derived from paper checks. Therefore, the group supported the Board's proposal to allow Reserve Banks to require senders to provide warranties and indemnities with respect to ECIs and did not support additional rulemaking to allow the handling of ECIs by the Reserve Banks.

Fourteen commenters, including a joint commenter letter submitted by businesses, financial institutions, and industry associations (''joint letter''), generally did not support the Board's proposed amendments on ECIs. The joint letter stated that the Board's proposal concerning ECIs is not in line with the Board's recent payment system improvement efforts.[6] Another commenter stated that the Board's proposal limited consumer choice because ECIs may be initiated by consumers that do not have access to a debit or credit card. Commenters stated that the Board's proposal discouraged the evolution of the check system to an all-electronic payment system that would result in lower barriers to entry, lower cost, increased speed, and increased parity among financial institutions. Two commenters requested

[3] 12 CFR 229.34(g) provides that each bank that transfers or presents an electronically-created item and receives a settlement or other consideration for it shall indemnify, as set forth in § 229.34(i), each transferee bank, any subsequent collecting bank, the paying bank, and any subsequent returning bank against losses that result from the fact that (1) the electronic image or electronic information is not derived from a paper check; (2) the person on whose account the electronically-created item is drawn did not authorize the issuance of the item in the amount stated on the item or to the payee stated on the item (for purposes of paragraph (g)(2), ''account'' includes an account as defined in § 229.2(a) as well as a credit or other arrangement that allows a person to draw checks that are payable by, through, or at a bank); or (3) a person receives a transfer, presentment, or return of, or otherwise is charged for an electronically-created item such that the person is asked to make payment based on an item or check it has already paid.

[4] 12 CFR 210.2(i).

[5] Terms not otherwise defined in Regulation J or Regulation CC have the meanings set forth in the U.C.C. Under the U.C.C., ''instrument'' means a ''negotiable instrument'' which is defined in part as ''unconditional promise or order to pay a fixed amount of money.'' U.C.C. 3–104. ''Promise'' is defined as ''a written undertaking to pay money signed by the person undertaking to pay.'' U.C.C. 3–103. ''Order'' is defined as ''a written instruction to pay money signed by the person giving the instruction.'' U.C.C. 3–103. ''Writing'' and ''written'' are defined as including ''printing, typewriting, or any other intentional reduction to tangible form.'' U.C.C. 1–201.

[6] The joint letter specifically cited the Federal Reserve's 2013 consultation paper. The Federal Reserve Banks, Payment System Improvement—Public Consultation Paper (2013).

the Board to conduct further studies on ECIs. One commenter expressed concern that institutions would be unable to identify ECIs and requested that the Board provide guidance on how banks can recognize ECIs. Another commenter requested that the Board expressly set out rules for alternative methods of direct exchange of ECIs in its final rule and guidance.

The Board has considered the comments received and has adopted the amendments concerning ECIs as proposed in its final rule. The Board notes that numerous comments erroneously viewed the Board's proposed amendments as substantive modifications that created a new prohibition on ECIs. However, as discussed above, ECIs are not ''items'' under the Board's current Regulation J and therefore cannot be handled by the Reserve Banks. This exclusion of ECIs under current Regulation J is already reflected in current OC 3, which requires that an ''electronic item'' contain an image and data captured from a paper check. The Board's amendments to the definition of ''item'' are intended only to provide additional clarity regarding these existing exclusions and do not create any new prohibitions. The Board believes this existing exclusion shifts liability to parties better positioned to know whether a purported item is electronically created and that can either prevent the ECI from entering the check-collection system or assume the risk of sending it forward. Moreover, the Board's amendments would not prevent entities that desire to exchange ECIs from doing so by agreement using direct exchange relationships or other methods not involving the Reserve Banks.

The Board appreciates comments regarding the Federal Reserve's payment system improvement efforts and continues to support technological innovation in the payments system. However, as set forth in the Federal Reserve's *Strategies for Improving the U.S. Payment System* paper,[7] the Federal Reserve is committed to improving the speed and efficiency of the U.S. payment system from end-to-end while maintaining a high level of safety and accessibility. As explained in that paper, ''credit-push payments,'' which allow the paying bank to authenticate the customer and confirm ''good funds'' are available to support the transaction, have become the expectation when making electronic person-to-person, business-to-business and certain bill payments. Unlike ''credit-push payments,'' ''debit-pull payments'' such as ECIs have a higher risk profile because they generally do not have the same authentication processes and may allow unauthorized parties who have access to a payer's account information to fraudulently pull funds out of the payer's account. To date, there has not been the industry support or necessary investment to address the heightened risk profiles created by processing electronically-created debit instruments through the check collection system. Moreover, there is legal uncertainty as to the status of ECIs that are processed as if they were checks under the U.C.C. and the Electronic Funds Transfer Act. The Board believes that the heightened risk profile and legal uncertainty surrounding ECIs currently outweigh the potential benefits of ECIs mentioned by the commenters and, accordingly, will not conduct further studies on ECIs at this time.

The Board does not believe it is appropriate to adopt guidance to clarify how banks can distinguish ECIs from electronic checks. As it stated in its proposal, the Board recognizes that a bank receiving an electronic image generally cannot distinguish an image that is derived from a paper check from an ECI. This inability to distinguish ECIs from electronic images of paper checks is the reason the Board adopted indemnities with respect to ECIs in Regulation CC. The parties in the best position to know whether a purported item is electronically created are also in the best position to assess and take on any associated risks that may arise from ECIs entering the check collection system and can also address such risk in agreements with their customers that deposit ECIs.

C. Settlement and Payment

Regulation J currently provides that settlement with a Reserve Bank for cash items ''shall be made by debit to an account on the Reserve Bank's books, cash, or other form of settlement'' to which the Reserve Bank has agreed.[8] With respect to noncash items, Regulation J provides that a Reserve Bank may require settlement by cash, by a debit to an account on a Reserve Bank's books or ''by any of the following that is in a form acceptable to the collecting Reserve Bank: Bank draft, transfer of funds or bank credit, or any other form of payment authorized by State law.'' [9] Regulation J also currently provides that a Reserve Bank may require a nonbank payor to settle for items by cash, or by ''any of the following that is in a form acceptable to the Reserve Bank: Cashier's check, certified check, or other bank draft or obligation.'' [10] In order to facilitate the efficient collection of items, the Reserve Banks' current practice is generally to settle for items by debit to an account on the Reserve Bank's books. The use of cash is rare, typically only done in emergency situations, and could be covered by a provision allowing ''other form of settlement to which the Reserve Bank agrees.''

The Board proposed to revise certain settlement provisions of Regulation J to remove references to cash and other specified forms of settlement (*e.g.,* cashier's checks or certified checks) and instead state that the Reserve Banks may settle by a debit to an account on the Reserve Bank's books, or another form of settlement acceptable to the Reserve Banks. The Board requested comment on possible implications that the proposed changes may have on financial institutions with which the Reserve Banks settle for the presentment of items.

The Board received one comment supporting the proposal and no opposing comments. The Board has adopted these amendments as proposed in the final rule.

D. Legal Status of Terms Used in Financial Messaging Standards

Financial messaging standards provide a common format that allows different financial institutions to communicate. The Board has separately requested comment on the Federal Reserve Banks' plan to migrate to the ISO 20022 financial messaging standard for the Fedwire Funds Service.[11] ISO 20022 is an international standard that employs terminology that differs in key respects from that used in U.S. funds-transfer law, including Regulation J. The Board proposed an amendment to subpart B of Regulation J that would clarify that terms used in financial messaging standards, such as ISO 20022, do not confer or connote legal status or responsibilities.

The Board received four comments supporting these proposed changes and no opposing comments. The Board has adopted these amendments as proposed.

III. Section-by-Section Analysis

Subpart A—Collection of Checks and Other Items by Federal Reserve Banks

Section 210.2 Definitions

1. Section 210.2(h)—Check

Regulation J defines the term ''check'' as a draft as defined in the U.C.C. drawn on a bank and payable on demand. The Board proposed to revise the definition of ''check'' to mean a ''check'' and an ''electronic check'' as those terms are defined in Regulation CC. This amendment aligns the terminology in the two regulations.

Regulation J also includes the term ''check as defined in 12 CFR 229.2(k)'' (the Regulation CC definition of ''check''). This term is used in Regulation J in those provisions that require specific references to the Regulation CC definition of ''check.'' (See §§ 210.2(m), 210.7(b)(2), and 210.12(a)(2).) The Board proposed to delete the definition of ''check as defined in 12 CFR 229.2(k)'' because it was no longer needed in light of the proposed revision of the Regulation J definition of ''check'' to cross-reference the Regulation CC definition. The Board also proposed to revise the three provisions where it is used by deleting the reference to ''check as defined in 12 CFR 229.2(k).''

Six commenters, including the group letter, were generally supportive of the Board's proposed changes to align Regulation J with Regulation CC. The Board did not receive specific comments on proposed § 210.2(h) or any opposing comments. The Board has adopted these changes as proposed.

2. Section 210.2(i)—Item

Regulation J uses the term ''item'' to refer to the instruments and electronic images that the Reserve Banks handle. Regulation J uses the term ''electronic item'' to refer to an electronic image of an item, and information describing that item, that a Reserve Bank agrees to handle as an item pursuant to an operating circular. To align the terminology of Regulation J with Regulation CC, the Board proposed to delete the definition of ''electronic item'' and revise the definition of ''item'' in § 210.2(i) to include a check, which, under the proposed amendment discussed above would include both a check and an electronic check as defined in Regulation CC. The Board also proposed to add a clarifying statement that the term ''item'' does not include an ECI as defined in § 229.2 of Regulation CC.

Six commenters, including the group letter, were generally supportive of alignment between Regulation J and Regulation CC. With respect to ECIs in particular, three commenters supported the Board's proposed amendments, while fourteen commenters generally opposed amendments that restricted the Reserve Banks' handling of ECIs. For reasons described in the overview section, the Board has adopted § 210.2(i) as proposed.

3. Section 210.2(m)—Returned Check

Current § 210.2(m) defines a ''returned check'' as ''a cash item or a check as defined in 12 CFR 229.2(k) returned by a paying bank.'' To align the definition of ''returned check'' with ''check,'' the Board proposed to delete the reference to ''check as defined in 12 CFR 229.2(k)'' and instead refer to the definition of ''electronic returned check'' in Regulation CC. The Board did not receive any comments on proposed § 210.2(m). The Board has adopted these changes as proposed.

4. Section 210.2(n)—Sender

A ''sender'' under § 210.2(n) is any of several listed entities that sends an item to a Reserve Bank for forward collection. The Board proposed to add ''member bank, as defined in section 1 of the Federal Reserve Act'' in § 210.2(n)(2) to include a bank or trust company that is a member of one of the Federal Reserve Banks to ensure inclusion of any member bank that does not fall under the existing definition. The Board proposed to redesignate current § 210.2(n)(2)–(6) to § 210.2(n)(3)–(7) to accommodate the insertion.

One commenter requested that the Board clarify whether its proposed changes to § 210.2(n) would expand the types of institutions that may directly participate as a sender in the Fedwire services subject to subpart B of Regulation J, such as nondepository trust companies. The commenter noted that revising the definition of sender to capture member nondepository trust companies would prompt concerns regarding payment system risk with respect to access to Federal Reserve financial services. The Board's proposed changes to the definition of ''sender'' does not affect the rights of any particular type of entity to obtain access to Federal Reserve services. (In any case, the definition of ''sender'' in § 210.2(n) applies only to the collection of checks and other items by the Reserve Banks and not to the Fedwire Funds Service.) As stated in the Board's proposal, proposed § 210.2(n) is intended to ensure inclusion of any member bank that does not fall under the existing list of entities that send items to a Reserve Bank for forward collection. Whether any particular member bank, including a nondepository trust company, obtains an account and access to Reserve Bank check services continues to be governed by existing laws, rules, and policies, including the Federal Reserve Act, the Board's Policy on Payment System Risk and the Reserve Banks' internal risk analysis. The Board intends no expansion of rights by this technical change. The Board has adopted the amendments as proposed.

5. Section 210.2(q)—Fedwire

Current § 210.2(q) defines ''Fedwire'' as having the same meaning set forth in § 210.26(e). The Board proposed to amend this definition to refer to both ''Fedwire Funds Service and Fedwire'' to conform to the proposed amendment to § 210.26(e). The Board did not receive any comments on proposed § 210.2(q) and has adopted the revisions as proposed.

Section 210.3 General Provisions

Section 210.3(a) provides general provisions concerning the obligations of Reserve Banks and the role of operating circulars. As discussed in the overview section on ECIs, the Board proposed to add a sentence to § 210.3(a) to permit Reserve Banks to require a sender to provide warranties and indemnities that only items and any noncash items the Reserve Banks have agreed to handle will be sent to the Reserve Banks. Additionally, in order to allow the Reserve Banks to pass any such warranties and indemnities forward, the Board proposed to authorize the Reserve Banks to provide to a subsequent collecting bank and to the paying bank any warranties and indemnities provided by the sender pursuant to this paragraph.

The Board received one comment, the group letter, supporting the proposal. The Board did not receive any comments opposing these particular amendments, although as discussed in the overview section, fourteen commenters generally opposed amendments that restricted the Reserve Banks' handling of ECIs. For the reasons described in the overview section, the Board has adopted these revisions as proposed.

Section 210.4 Sending Items to Reserve Banks

Section 210.4(a) sets forth the rule for determining the Reserve Bank to which an item should be sent. The Board proposed to clarify this paragraph to provide that a sender's Administrate Reserve Bank may direct a sender (other than a Reserve Bank) to send any item to a specified Reserve Bank, whether or

not the item is payable in the Reserve Bank's district. This amendment reflects current practice in the Reserve Banks' check service and is not expected or intended to have a substantive affect. The Board also proposed to capitalize the term ''Administrative Reserve Bank'' wherever it appears to conform to the defined term in § 210.2(c).

The Board did not receive any comments on proposed § 210.4 and has adopted the revisions as proposed.

Section 210.5 Sender's Agreement; Recovery by Reserve Bank

1. Section 210.5(a)—Sender's Agreement

Current § 210.5(a) lists the warranties, authorizations, and agreements made by a sender. The first two paragraphs (current § 210.5(a)(1) and (2)) apply to all items and require the sender to authorize the Reserve Banks to handle the item sent and warrant that the sender is entitled to enforce the item, that the item has not been altered, and that the item bears the indorsements applied by all prior parties. The Board did not propose to revise these paragraphs. Current § 210.5(a)(3) and (4) set out warranties for electronic items and electronic items that are not representations of substitute checks, respectively. These warranties are now specified in Regulation CC, and the Board proposed to revise Regulation J accordingly. Specifically, the Board proposed to amend § 210.5(a)(3) to require the sender to make all applicable warranties and indemnities set forth in Regulation CC and the U.C.C. The proposal retained the existing requirement that the sender make all warranties set forth in and subject to the terms of U.C.C. 4–207 for an electronic check as if it were an item subject to the U.C.C. The proposed changes were intended to streamline Regulation J, align § 210.5(a) with the Regulation CC provisions that set out warranties and indemnities for electronic checks, and ensure a seamless chain of warranties for the items handled by the Reserve Banks.

The Board also proposed to require a sender to make any warranties or indemnities regarding the sending of items that the Reserve Banks include in an operating circular issued in accordance with § 210.3(a) to ensure that only items and any noncash items the Reserve Banks have agreed to handle will be sent to the Reserve Banks (proposed § 210.5(a)(4)). Finally, the Board proposed to add a reference to ''indemnities'' to the introductory text of § 210.5(a) to reflect the coverage of sender indemnities in proposed § 210.5(a)(3) and (4).

One commenter, the group letter, requested that the Board add commentary concerning the cross referencing of Regulation CC's image quality warranty. Under Regulation CC, each bank that transfers an electronic check warrants that ''the electronic image accurately represents all of the information on the front and back of the original check as of the time the original check was truncated and the electronic information includes an accurate record of all MICR line information required for a substitute check under § 229.2(aa) and the amount of the check.'' [12] The group letter requests that the Board add commentary in Regulation J to clarify that the warranty does not require that the electronic check capture those characteristics of the paper check, such as watermarks, microprinting, or other physical security features, that cannot survive the imaging process.

The Board acknowledges that the warranty in § 229.34(a)(1)(i) does not require that the electronic check capture those characteristics of the paper check that cannot survive the imaging process. The commentary to § 229.34(a)(1)(i) states that the electronic check warranties correspond to the warranties made by a bank that transfers, presents, or returns a substitute check.[13] The commentary to the corresponding substitute check warranty states ''a substitute check need not capture other characteristics of the check, such as watermarks, microprinting, or other physical security features that cannot survive the imaging process or decorative images, in order to meet the accuracy requirement.'' [14] The Board's amendments to Regulation J requiring the sender to make all applicable warranties and indemnities set forth in Regulation CC also cross reference the relevant commentary in Regulation CC. Accordingly, the Board does not believe it is necessary to add additional commentary in Regulation J and adopts the revisions as proposed.

2. Section 210.5(a)(5)—Sender's Liability to Reserve Bank

Current § 210.5(a)(5) sets out the sender's liability to Reserve Banks. The Board proposed to amend this paragraph to align this paragraph to changes elsewhere in the proposed rule.

Current § 210.5(a)(5)(i)(C) states that the sender agrees to indemnify the Reserve Bank for any loss or expense resulting from ''[a]ny warranty or indemnity made by the Reserve Bank under § 210.6(b), part 229 of this chapter, or the U.C.C.'' The Board proposed to amend this provision to provide that the sender will also indemnify a Reserve Bank for any loss or expense sustained resulting from any warranties and indemnities regarding the sending of ''items'' required by the Reserve Bank in an operating circular issued pursuant to proposed § 210.3(a).

Current § 210.5(a)(5)(ii) specifies conditions and limitations to a sender's liability for warranties and indemnities that a Reserve Bank makes for a substitute check, a paper or electronic representation thereof, or any other electronic item. The Board proposed to delete the term ''electronic item'' in current § 210.5(a)(5)(ii) and replace it with ''electronic check.''

Current § 210.5(a)(5)(ii)(A) provides that a sender of an original check is not liable for any amount that the Reserve Bank pays under subpart D of Regulation CC for a subsequently created substitute check or under § 210.6(b)(3) for an electronic item, absent the sender's agreement to the contrary. The Board proposed to delete the reference to current § 210.6(b)(3), which lists warranties and an indemnity for an electronic item that is not a representation of a substitute check, and replace it with a reference to § 229.34 of Regulation CC with respect to an electronic check, consistent with other proposed amendments to § 210.6(b) described below.

Current § 210.5(a)(5)(ii)(B) provides that nothing in Regulation J alters the liability structure that applies to substitute checks and paper or electronic representations of substitute checks under subpart D of Regulation CC. The Board proposed to add that this subpart also does not alter the liability of a sender of an electronic check under § 229.34 of Regulation CC, consistent with the other proposed revisions to Regulation J.

Current § 210.5(a)(5)(ii)(C) provides that a sender of an electronic item that is not a representation of a substitute check is not liable for any related warranties or indemnities that a Reserve Bank pays that are attributable to the Reserve Bank's own lack of good faith or failure to exercise ordinary care. The Board proposed to broaden this provision by applying the limitation on liability to all senders for any amount that the Reserve Bank pays that is attributable to the Reserve Bank's own lack of good faith or failure to exercise

[12] 12 CFR 229.34(a)(1)(i).

[13] *See* Regulation CC, Official Staff Commentary Section 229.34(a)–2.

[14] *See* Regulation CC, Official Staff Commentary Section 229.51(a)–3; *see also First Am. Bank* v. *Fed. Reserve Bank of Atlanta,* 842 F.3d 487 (7th Cir. 2016).

ordinary care under Regulation J or Regulation CC. The Board proposed to redesignate this paragraph as § 210.5(a)(5)(iii) and make conforming changes to cross-references.

The Board did not receive any comments on proposed § 210.5(a). As discussed in the overview section, the Board received numerous comments generally supporting aligning Regulation J with Regulation CC. The Board has adopted these revisions as proposed.

3. Section 210.5(c) & (d)—Recovery by Reserve Bank and Methods of Recovery

Section 210.5(c) sets out the procedures by which a Reserve Bank may recover against a sender if certain actions or proceedings related to the sender's actions are brought against (or defense is tendered to) a Reserve Bank. A portion of this paragraph was inadvertently dropped from the Code of Federal Regulations. The Board proposed to reinstate the dropped language, which provides that, upon entry of a final judgment or decree, a Reserve Bank may recover from the sender the amount of attorneys' fees and other expenses of litigation incurred, as well as any amount the Reserve Bank is required to pay because of the judgment or decree or the tender of defense, with interest. In addition, the Board proposed to correct cross-references to this provision in § 210.5(d).

The Board did not receive any comments on proposed § 210.5(c) & (d). The Board has adopted these revisions as proposed.

4. Section 210.5(e)—Security Interest

Current § 210.5(e) provides that when a sender sends an item to a Reserve Bank, the sender and any prior collecting bank grant to the sender's Administrative Reserve Bank a security interest in all of their respective assets in the possession of, or held for the account of, any Reserve Bank to secure their respective obligations due or to become due to the Administrative Reserve Bank under this subpart or subpart C of part 229 (Regulation CC). The Board proposed to amend this paragraph to refer to subpart D of Regulation CC in addition to subpart C, as senders may have obligations to Reserve Banks under that subpart as well.

The Board did not receive any comments on proposed § 210.5(e). The Board has adopted these revisions as proposed.

Section 210.6 Status, Warranties, and Liability of Reserve Bank

1. Section 210.6(a)(2)—Limitations on Reserve Bank Liability

Section 210.6(a)(2) limits a Reserve Bank's liability with respect to an item to three instances: (1) The Reserve Bank's own lack of good faith or failure to exercise ordinary care, (2) as provided in this section of Regulation J, and (3) as provided in subparts C and D of Regulation CC. The Board proposed to expand this list to provide that a Reserve Bank may be liable under any warranties and indemnities provided in an operating circular issued in accordance with § 210.3(a) regarding the sending of items.

The Board received one comment, the group letter, supporting its proposal to allow the Reserve Banks to address warranties and indemnities for eligible items and non-cash items in the operating circular. The Board did not receive any opposing comments. The Board has adopted these revisions as proposed.

2. Section 210.6(b)—Warranties and Liability

Section 210.6(b) sets forth the warranties and indemnities made by a Reserve Bank when it presents or sends an item. In alignment with the Board's proposed amendments to the sender's warranties in § 210.5(a), the Board proposed to replace current § 210.6(b)(2) and (3), which provide warranties and indemnities for electronic items and electronic items that are not representations of substitute checks, respectively. Those warranties are now covered by Regulation CC. The Board also proposed to make a conforming amendment to § 210.6(b)(1)(iii) to eliminate the unnecessary reference to ''paper or electronic form.''

The Board proposed a new § 210.6(b)(2) to provide that a Reserve Bank would make any warranties or indemnities regarding the sending of items as set forth in an operating circular issued pursuant to proposed § 210.3(a). This language corresponds to the similar proposed provision for sender liability in § 210.5(a)(4).

The Board proposed a new § 210.6(b)(3) to provide that the Reserve Bank makes to a subsequent collecting bank and to the paying bank all the warranties and indemnities set forth in subparts C and D for Regulation CC. Proposed § 210.6(b)(3) would retain the existing application of U.C.C. 4–207 warranties to electronic items (now called electronic checks).

In § 210.6(b)(4), the Board proposed to retain the existing Reserve Bank indemnity for substitute checks created from electronic checks, which is in current § 210.6(b)(3)(ii). This provision provides an indemnity chain for substitute check indemnity claims under Regulation CC, enabling receiving banks (and, in turn, Reserve Banks) to pass the loss on such claims to the bank whose choice to handle an item electronically necessitated the later creation of a substitute check.

The Board received one comment, the group letter, on proposed § 210.6(b)(3). The group letter noted that the persons that receive the electronic check warranties from the Reserve Banks appeared to be more limited than the persons that receive the electronic check warranties under Regulation CC. Specifically, proposed § 210.6(b)(3) does not extend the electronic check warranties to the drawer of the check on the forward side, unlike the warranties in Regulation CC. The group letter noted, however, that proposed § 210.6(a)(2)(iv) provides that a Reserve Bank does not assume any liability with respect to an item or its proceeds ''except as provided under subparts C and D of Regulation CC.'' The group letter requested that the Board clearly require that the Reserve Banks provide the same scope and recipients of the new electronic check warranties in Regulation J as provided under Regulation CC.

The Board agrees with the group letter that Reserve Banks should provide the electronic check and electronic returned check warranties to the same scope of recipients in Regulation J as in Regulation CC, including to drawers and owners of checks. The Board believes that extending the warranties to the drawers and owners is consistent with the warranty flow set forth in section 5 of the Check 21 Act for substitute checks and will protect parties outside the banking system from any undesirable consequences resulting from check truncation. The Board has revised proposed § 210.6(b)(3) accordingly in the final rule. Otherwise, the Board has adopted § 210.6(b) as proposed, with minor revisions to correct typographical errors in § 210.6(b)(2) & (3).

3. Section 210.6(c)—Limitation on Liability

The limitations on Reserve Bank liability are set forth in proposed (and current) § 210.6(a)(2). The Board proposed to delete paragraph (c) as it is redundant and to redesignate current paragraph (d) as paragraph (c). The Board did not receive any comments on proposed § 210.6(c). The Board has adopted these revisions as proposed.

Section 210.7 Presenting Items for Payment

Section 210.7(b) provides the places of presentment for a Reserve Bank or subsequent collecting bank. Current § 210.7(b)(2) states ''In the case of a check as defined in 12 CFR 229.2(k), in accordance with 12 CFR 229.36.'' In alignment with the Board's proposed deletion of the defined term ''check as defined in 12 CFR 229.2(k),'' the Board proposed to delete the use of that term in § 210.7(b)(2), as it is no longer needed, and make other minor edits.

The Board did not receive any comments on proposed § 210.7. The Board has adopted these revisions as proposed.

Section 210.9 Settlement and Payment

1. Section 210.9(b)(5), (c), and (d)—Manner of Settlement, Noncash Items, and Nonbank Payor

Current § 210.9(b)(5) requires that settlement for cash items with a Reserve Bank be made by debit to an account on the Reserve Bank's books, cash, or other form of settlement to which the Reserve Bank agrees. The Board proposed to amend this provision by removing the reference to cash as a means of settlement. The Board also proposed to make conforming amendments to § 210.9(c) and (d), as well as to remove the references to other rarely-used forms of settlement (cashier's checks, certified checks, or other bank drafts or obligations). The Board proposed to correct cross-references and to capitalize the term ''Administrative Reserve Bank'' wherever it appears to conform to the defined term in § 210.2(c).

As discussed in the overview section, the Board received one comment, the group letter, supporting the proposal. The Board did not receive any opposing comments. The Board has adopted the revisions as proposed.

2. Section 210.9(e)—Handling of Payment

Current § 210.9(e) states that a Reserve Bank may handle a bank draft or other form of payment it receives in payment of a cash item as a cash item and that a Reserve Bank may handle a bank draft or other form of payment it receives in payment of a noncash item as either a cash item or a noncash item. The Board proposed to delete this paragraph as it is now obsolete.

The Board did not receive any comments on proposed § 210.9(e) and has deleted this paragraph as proposed.

3. Section 210.9(f)—Liability of Reserve Bank

Current § 210.9(f) states that a Reserve Bank that acts in good faith and exercises ordinary care shall not be liable for the nonpayment of, or failure to realize upon, any bank draft or other form of payment that it accepts pursuant to § 210.9(b)–(d). The Board proposed to renumber this paragraph as § 210.9(e) and to replace the reference to ''bank draft or other form of payment'' with ''any non-cash form of payment'' to conform to the proposed changes to the other provisions of this section.

The Board did not receive any comments on proposed § 210.9(f). The Board has adopted these revisions as proposed.

Section 210.10 Time Schedule and Availability of Credits for Cash Items and Returned Checks

Section 210.10(a) states that each Reserve Bank shall ''include in its operating circulars'' its time schedules for availability of cash items and returned checks and, correspondingly, when credits can be counted toward reserve balance requirements for purposes of Regulation D (12 CFR part 204). The Reserve Banks' practice is to publish the time schedules on the Federal Reserve website for financial services. Accordingly, the Board proposed to amend this paragraph to delete the requirement that time schedules be included in the operating circulars and, instead, require only that the time schedules be published.

The Board did not receive any comments on proposed § 210.10. The Board has adopted these revisions as proposed.

Section 210.11 Availability of Proceeds of Noncash Items; Time Schedule

1. Section 210.11(b)—Time Schedule

Section 210.11(b) states that a Reserve Bank may give credit for the proceeds of a noncash item subject to payment in actually and finally collected funds in accordance with a time schedule included in its operating circulars. To conform to amendments made in proposed § 210.10, the Board proposed to delete the reference to operating circulars and require only that the time schedule be published.

The Board did not receive any comments on proposed § 210.11(b). The Board has adopted these revisions as proposed.

2. Section 210.11(c)—Handling of Payment

Current § 210.11(c) prohibits a Reserve Bank from providing credit for a bank draft or other form of payment for a noncash item until it receives payment in actually and finally collected funds. The Board proposed to delete this paragraph, as actually and finally collected funds are already required by § 210.11(a).

The Board did not receive any comments on proposed § 210.11(c) and has adopted these revisions as proposed.

Section 210.12 Return of Cash Items and Handling of Returned Checks

Section 210.12 sets out provisions governing the handling of returned checks. It is the counterpart to §§ 210.5 and 210.6, which govern the handling of items for forward collection.

1. Section 210.12(a)—Return of Items

Current § 210.12(a)(2) sets out the procedures by which a paying bank may return checks not handled by Reserve Banks and refers to ''check as defined in § 229.2(k) of this chapter (Regulation CC).'' In alignment with the Board's proposal to delete the defined term ''check as defined in § 229.2(k)'' in § 210.2(h), the Board proposed to delete the use of this term in this paragraph, as it is no longer needed, and to use the term ''check'' instead.

The Board did not receive any comments on proposed § 210.12(a) and has adopted these revisions as proposed.

2. Section 210.12(c)—Paying Bank's and Returning Bank's Agreement

Current § 210.12(c) provides the warranties, authorizations, and agreements related to returned checks made by paying banks and returning banks. The Board proposed amendments to this paragraph that are parallel to the proposed amendments for forward-collection items with respect to the liability of the sender (§ 210.5(a)(3)) and the Reserve Banks (§ 210.6(b)(2)). Specifically, the Board proposed to replace current § 210.12(c)(3) and (4), which provide warranties for all returned checks that are electronic items and warranties for returned checks that are electronic items that are not representations of substitute checks, respectively, with a provision that requires the paying bank or returning bank to make all the warranties and indemnities as set forth in Regulation CC, as applicable (proposed § 210.12(c)(3)).

Current § 210.12(c)(5) sets out the conditions under which a paying bank

or returning bank is liable to a Reserve Bank. The Board proposed to redesignate this paragraph as § 210.12(c)(4) and amend the paragraph to correspond with the proposed amendments to the section on sender's liability to a Reserve Bank (§ 210.5(a)(4)). The proposed amendments were intended to create consistent liability provisions for senders, paying banks, and returning banks.

The Board did not receive any comments on proposed § 210.12(c) and has adopted these revisions as proposed, with a minor revision to correct a typographical error in § 210.12(c)(1).

3. Section 210.12(d)—Liability Under Other Law

Current § 210.12(d) is titled ''Preservation of other warranties and indemnities.'' The Board proposed to change the title of this paragraph to ''Returning bank's or paying bank's liability under other law'' to mirror the heading for the corresponding paragraph for senders (§ 210.5(b)).

The Board did not receive any comments on proposed § 210.12(d). The Board has adopted these revisions as proposed.

4. Section 210.12(e)—Warranties by and Liability of Reserve Bank

Current § 210.12(e) sets forth a Reserve Bank's liability when it handles a returned check, including warranties and liabilities. The Board proposed to amend this paragraph to correspond to the amendments proposed in § 210.6(b) related to the warranties and liabilities that are made by Reserve Banks when presenting or sending an item.

The Board receive one comment, the group letter, on proposed § 210.12(e). Corresponding to the comment discussed in the section-by-section analysis for § 210.6(b)(3), the group letter stated that the proposed Regulation J does not extend the electronic check warranties for returns to the owner of the check, unlike the warranties in Regulation CC. The group letter requested that the Board require the Reserve Banks provide in Regulation J the same scope and recipients of the new electronic check warranties as provided under Regulation CC.

For the reasons described in the section-by-section analysis for § 210.6(b), the Board has revised proposed § 210.12(e)(ii) to extend the warranties for electronic returned checks provided by Reserve Banks to the same scope of recipients as provided in Regulation CC. The Board has also revised proposed § 210.12(e)(2)(i) to correct a typographical error.

5. Section 210.12(f) & (g)—Recovery by Reserve Bank & Methods of Recovery

Section 210.12(f) parallels § 210.5(c) and sets out the procedures by which a Reserve Bank may recover against a paying bank or returning bank if certain actions or proceedings related to the paying bank's or returning bank's actions are brought against (or defense is tendered to) a Reserve Bank. A portion of this paragraph was inadvertently dropped from the Code of Federal Regulations. The Board proposed to reinstate the dropped language, which provides that, upon entry of a final judgment or decree, a Reserve Bank may recover from the paying bank or returning bank the amount of attorneys' fees and other expenses of litigation incurred, as well as any amount the Reserve Bank is required to pay because of the judgment or decree or the tender of defense, with interest. In addition, the Board proposed to correct cross-references and make organizational changes in § 210.12(g).

The Board did not receive any comments on proposed § 210.12(f) & (g) and has adopted these revisions as proposed.

Subpart B—Funds Transfers Through Fedwire

Section 210.25 Authority, Purpose, and Scope

Section 210.25 sets out the authority, purpose, and scope for subpart B of Regulation J, which governs Fedwire funds transfers. The Board proposed to add a new § 210.25(e) to clarify that financial messaging standards (*e.g.,* ISO 20022), including the financial messaging components, elements, technical documentation, tags, and terminology used to implement those standards, do not confer or connote legal status or responsibilities. The proposed amendment would specify that Regulation J, Article 4A of the U.C.C., and the operating circulars of the Reserve Banks govern the rights and obligations of parties to the Fedwire Funds Service and supersede any inconsistency between a financial messaging standard adopted by the Fedwire Funds Service. The proposal would also make a conforming change to § 210.25(b)(2). Additionally, the Board proposed to add in the commentary examples of inconsistent terminology between the ISO 20022 financial messaging standard and U.S. funds transfer law.

The Board received four comments supporting these proposed changes and no opposing comments. The Board has adopted these amendments as proposed.

Section 210.26 Definitions

Section 210.2(e) defines the term ''Fedwire'' to mean the funds-transfer system owned and operated by the Federal Reserve Banks that is used primarily for the transmission and settlement of payment orders governed by subpart B. The Board proposed to amend this definition so that it applies to the official title of the service, ''Fedwire Funds Service,'' as well as the shorthand term ''Fedwire.'' The Board also proposed to change references to ''Fedwire'' to ''Fedwire Funds Service'' in §§ 210.9(b)(4)(i), 210.25(a) and (b)(3), and 210.29(b).

The Board did not receive any comments on proposed § 210.26 and has adopted these revisions as proposed.

Section 210.32 Federal Reserve Bank Liability; Payment of Interest

Current § 210.32 sets out provisions that govern Federal Reserve Bank liability and payment of interest. Section 210.32(b) provides that compensation that is paid by Federal Reserve Banks in the form of interest shall be calculated in accordance with section 4A–506 of Article 4A. Under section 4A–506(a), the amount of interest may be determined by agreement between the sender and receiving bank or by funds-transfer system rule. If there is no such agreement, under section 4A–506(b), the amount of interest is based on the federal funds rate. The current commentary to § 210.32(b) states that ''Interest would be calculated in accordance with the procedures specified in section 4A–506(b).'' The Board proposed to delete this statement and rearrange the commentary to clarify that interest can be calculated in accordance with both section 4A–506(a) and (b).

The Board did not receive any comments on the proposed commentary to § 210.32. The Board has adopted these revisions as proposed.

IV. Competitive Impact Analysis

The Board conducts a competitive impact analysis when it considers an operational or legal change, if that change would have a direct and material adverse effect on the ability of other service providers to compete with the Federal Reserve in providing similar services due to legal differences or due to the Federal Reserve's dominant market position deriving from such legal differences. All operational or legal changes having a substantial effect on payments-system participants will be

subject to a competitive-impact analysis, even if competitive effects are not apparent on the face of the proposal. If such legal differences exist, the Board will assess whether the same objectives could be achieved by a modified proposal with lesser competitive impact or, if not, whether the benefits of the proposal (such as contributing to payments-system efficiency or integrity or other Board objectives) outweigh the materially adverse effect on competition.[15]

The Board does not believe that the amendments to Regulation J will have a direct and material adverse effect on the ability of other service providers to compete effectively with the Reserve Banks in providing similar services due to legal differences. The final rule would align the provisions in Regulation J governing Reserve Bank services to the generally applicable provisions in Regulation CC. The final rule would not affect the competitive position of private-sector presenting banks vis-à-vis the Reserve Banks.

V. The Riegle Community Development and Regulatory Improvement Act of 1994

The Riegle Community Development Regulatory Improvement Act of 1994 requires that agency regulations that impose additional reporting, disclosure, and other requirements on insured depository institutions take effect on the first calendar quarter following publication in final form, unless the agency determines for good cause that the regulation should become effective before such time. 12 U.S.C. 4802(b). Consistent with the Riegle Community Development Act, this final rule is effective on January 1, 2019.

VI. Paperwork Reduction Act

In accordance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3506; 5 CFR part 1320, appendix A.1), the Board may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a valid Office of Management and Budget (OMB) control number. The Board reviewed the final rule under the authority delegated to the Board by the OMB and determined that it contains no collections of information under the PRA.[16] Accordingly, there is no paperwork burden associated with the rule.

VII. Regulatory Flexibility Act

An initial regulatory flexibility analysis (IRFA) was included in the proposal in accordance with section 3(a) of the Regulatory Flexibility Act (RFA), 5 U.S.C. 601 *et seq.* (RFA). In the IRFA, the Board requested comment on the effect of the proposed rule on small entities and on any significant alternatives that would reduce the regulatory burden on small entities. The Board did not receive any comments. The RFA requires an agency to prepare a final regulatory flexibility analysis (FRFA) unless the agency certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities. In accordance with section 3(a) of the RFA, the Board has reviewed the final regulation. Based on its analysis, and for the reasons stated below, the Board certifies that the rule will not have a significant economic impact on a substantial number of small entities.

The final rule will apply to all depository institutions regardless of their size.[17] Pursuant to regulations issued by the Small Business Administration (13 CFR 121.201), a ''small banking organization'' includes a depository institution with $550 million or less in total assets. Based on call report data, there are approximately 9,631 depository institutions that have total domestic assets of $550 million or less and thus are considered small entities for purposes of the RFA. The Board's final rule generally does not have any projected reporting, recordkeeping or other compliance requirements, as the revisions to Regulation J align the rights and obligations of sending banks, paying banks, and Federal Reserve Banks (Reserve Banks) with the Board's recent amendments to Regulation CC. The final rule's warranties and indemnities are similar to the warranties and indemnities that apply to paper and electronic checks under existing Regulation J and other law. The final rule does not require any bank to change the form in which it submits checks, nor do they require any bank to submit reports, maintain records, or provide notices or disclosures.

With respect to ECIs, provisions in the final rule would allow the Reserve Banks to require that senders provide certain warranties and indemnities. The Board recognizes these provisions may affect the creation and acceptance of ECIs by small entities. Neither Regulation J nor Regulation CC would prevent private-sector collecting banks from doing the same. In addition, the Board's final rule would not prevent small entities that desire to exchange ECIs from doing so by agreement using direct exchange relationships or other methods not involving the Reserve Banks. The Board believes the final rule will help to shift liability to parties better positioned to know whether an item is electronically created and that can either prevent the item from entering the check-collection system or assume the risk of sending it forward.

Furthermore, the Board does not expect the amendments that remove references to cash and other specified forms of settlement to burden small entities, as the use of cash as settlement is rare and typically only done in emergency situations. The Board's final rule will allow use of cash as settlement in emergency situations by continuing to permit other forms of settlement to which the Reserve Banks agree. The Board does not expect the rule to have a significant economic impact on a substantial number of small entities.

List of Subjects in 12 CFR Part 210

Banks, Banking, Federal Reserve System.

Authority and Issuance

For the reasons set forth in the preamble, the Board amends 12 CFR part 210 as follows:

PART 210—COLLECTION OF CHECKS AND OTHER ITEMS BY FEDERAL RESERVE BANKS AND FUNDS TRANSFERS THROUGH FEDWIRE (REGULATION J)

■ 1. The authority citation for part 210 continues to read as follows:

Authority: 12 U.S.C. 248 (i), (j), and (o); 12 U.S.C. 342; 12 U.S.C. 360; 12 U.S.C. 464; 12 U.S.C. 4001–4010; 12 U.S.C. 5001–5018.

■ 2. In part 210, revise all references to ''article 4A'' to read ''Article 4A.''

Subpart A—Collection of Checks and Other Items by Federal Reserve Banks

■ 3. In § 210.2, revise paragraphs (h), (i), (m), (n), (q), and (s)(1) to read as follows:

§ 210.2 Definitions.

* * * * *

(h) *Check* means a check or an electronic check, as those terms are defined in § 229.2 of this chapter (Regulation CC).

(i) *Item.* (1) Means—

(i) An instrument or a promise or order to pay money, whether negotiable or not, that is—

(A) Payable in a Federal Reserve District [1] (District);

[15] Federal Reserve Regulatory Service, 7–145.2.

[16] *See* 44 U.S.C. 3502(3).

[17] The final rule would not impose costs on any small entities other than depository institutions.

[1] For purposes of this subpart, the Virgin Islands and Puerto Rico are deemed to be in the Second

Continued

(B) Sent by a sender to a Reserve Bank for handling under this subpart; and

(C) Collectible in funds acceptable to the Reserve Bank of the District in which the instrument is payable; or

(ii) A check.

(2) Unless otherwise indicated, *item* includes both a cash and a noncash item, and includes a returned check sent by a paying or returning bank. *Item* does not include a check that cannot be collected at par, or a *payment order* as defined in § 210.26(i) and handled under subpart B of this part. The term also does not include an electronically-created item as defined in § 229.2 of this chapter (Regulation CC).

* * * * *

(m) *Returned check* means a cash item returned by a paying bank, including an electronic returned check as defined in § 229.2 of this chapter (Regulation CC) and a notice of nonpayment in lieu of a returned check, whether or not a Reserve Bank handled the check for collection.

(n) *Sender* means any of the following entities that sends an item to a Reserve Bank for forward collection—

(1) A *depository institution,* as defined in section 19(b) of the Federal Reserve Act (12 U.S.C. 461(b));

(2) A member bank, as defined in section 1 of the Federal Reserve Act (12 U.S.C. 221);

(3) A clearing institution, defined as—

(i) An institution that is not a depository institution but that maintains with a Reserve Bank the balance referred to in the first paragraph of section 13 of the Federal Reserve Act (12 U.S.C. 342); or

(ii) A corporation that maintains an account with a Reserve Bank in conformity with § 211.4 of this chapter (Regulation K);

(4) Another Reserve Bank;

(5) An international organization for which a Reserve Bank is empowered to act as depositary or fiscal agent and maintains an account;

(6) A foreign correspondent, defined as any of the following entities for which a Reserve Bank maintains an account: A foreign bank or banker, a foreign state as defined in section 25(b) of the Federal Reserve Act (12 U.S.C. 632), or a foreign correspondent or agency referred to in section 14(e) of that act (12 U.S.C. 358); or

(7) A branch or agency of a foreign bank maintaining reserves under section 7 of the International Banking Act of 1978 (12 U.S.C. 347d, 3105).

* * * * *

(q) *Fedwire Funds Service* and *Fedwire* have the same meaning as that set forth in § 210.26(e).

* * * * *

(s) * * *

(1) The terms not defined herein have the meanings set forth in § 229.2 of this chapter applicable to subpart C or D of part 229 of this chapter (Regulation CC), as appropriate; and

* * * * *

■ 4. In § 210.3, revise paragraph (a) to read as follows:

§ 210.3 General provisions.

(a) *General.* Each Reserve Bank shall receive and handle items in accordance with this subpart, and shall issue operating circulars governing the details of its handling of items and other matters deemed appropriate by the Reserve Bank. The circulars may, among other things, classify cash items and noncash items, require separate sorts and letters, provide different closing times for the receipt of different classes or types of items, provide for instructions by an Administrative Reserve Bank to other Reserve Banks, set forth terms of services, and establish procedures for adjustments on a Reserve Bank's books, including amounts, waiver of expenses, and payment of compensation. As deemed appropriate by the Reserve Bank, the circulars may also require the sender to provide warranties and indemnities that only items and any noncash items the Reserve Banks have agreed to handle will be sent to the Reserve Banks. The Reserve Banks may provide to a subsequent collecting bank and to the paying bank any warranties and indemnities provided by the sender pursuant to this paragraph (a).

* * * * *

■ 5. In § 210.4, revise paragraphs (a), (b)(1)(ii) and (iii), and (b)(3) to read as follows:

§ 210.4 Sending items to Reserve Banks.

(a) *Sending of items.* A sender's Administrative Reserve Bank may direct a sender other than a Reserve Bank to send any item to a specified Reserve Bank, whether or not the item is payable in the Reserve Bank's district.

(b) * * *

(1) * * *

(ii) The initial sender's Administrative Reserve Bank (which is deemed to have accepted deposit of the item from the initial sender);

(iii) The Reserve Bank that receives the item from the initial sender (if different from the initial sender's Administrative Reserve Bank); and

* * * * *

(3) The identity and order of the parties under paragraph (b)(1) of this section determine the relationships and the rights and liabilities of the parties under this subpart, part 229 of this chapter (Regulation CC), section 13(1) and section 16(13) of the Federal Reserve Act, and the Uniform Commercial Code. An initial sender's Administrative Reserve Bank that is deemed to accept an item for deposit or handle an item is also deemed to be a sender with respect to that item. The Reserve Banks that are deemed to handle an item are deemed to be agents or subagents of the owner of the item, as provided in § 210.6(a).

* * * * *

■ 6. In § 210.5, revise paragraphs (a), (c), (d), and (e) to read as follows:

§ 210.5 Sender's agreement; recovery by Reserve Bank.

(a) *Sender's agreement.* The warranties, indemnities, authorizations, and agreements made pursuant to this paragraph (a) may not be disclaimed and are made whether or not the item bears an indorsement of the sender. By sending an item to a Reserve Bank, the sender does all of the following.

(1) *Authorization to handle item.* The sender authorizes the sender's Administrative Reserve Bank and any other Reserve Bank or collecting bank to which the item is sent to handle the item (and authorizes any Reserve Bank that handles settlement for the item to make accounting entries), subject to this subpart and to the Reserve Banks' operating circulars, and warrants its authority to give this authorization.

(2) *Warranties for all items.* The sender warrants to each Reserve Bank handling the item that—

(i) The sender is a person entitled to enforce the item or authorized to obtain payment of the item on behalf of a person entitled to enforce the item;

(ii) The item has not been altered; and

(iii) The item bears all indorsements applied by parties that previously handled the item for forward collection or return.

(3) *Warranties and indemnities as set forth in Regulation CC and U.C.C.* As applicable and unless otherwise provided, the sender of an item makes to each Reserve Bank that handles the item all the warranties and indemnities set forth in and subject to the terms of subparts C and D of part 229 of this chapter (Regulation CC) and Article 4 of the U.C.C. The sender makes all the warranties set forth in and subject to the terms of 4–207 of the U.C.C. for an electronic check as if it were an item subject to the U.C.C.

District, and Guam, American Samoa, and the Northern Mariana Islands in the Twelfth District.

(4) *Warranties and indemnities as set forth in Reserve Bank operating circulars.* The sender makes any warranties and indemnities regarding the sending of items as set forth in an operating circular issued in accordance with § 210.3(a).

(5) *Sender's liability to Reserve Bank.* (i) Except as provided in paragraphs (a)(5)(ii) and (iii) of this section, the sender agrees to indemnify each Reserve Bank for any loss or expense sustained (including attorneys' fees and expenses of litigation) resulting from—

(A) The sender's lack of authority to make the warranty in paragraph (a)(1) of this section;

(B) Any action taken by the Reserve Bank within the scope of its authority in handling the item; or

(C) Any warranty or indemnity made by the Reserve Bank under § 210.6(b), part 229 of this chapter, the U.C.C., or, regarding the sending of items, an operating circular issued in accordance with § 210.3(a).

(ii) A sender's liability for warranties and indemnities that the Reserve Bank makes for a substitute check, a paper or electronic representation thereof, or for an electronic check is subject to the following conditions and limitations—

(A) A sender of an original check shall not be liable under paragraph (a)(5)(i) of this section for any amount that the Reserve Bank pays under subpart D of part 229 of this chapter, or under § 229.34 of this chapter with respect to an electronic check, absent the sender's agreement to the contrary; and

(B) Nothing in this subpart alters the liability of a sender of a substitute check or paper or electronic representation of a substitute check under subpart D of part 229 of this chapter, or a sender of an electronic check under § 229.34 of this chapter.

(iii) A sender shall not be liable for any amount that the Reserve Bank pays under this subpart or part 229 of this chapter that is attributable to the Reserve Bank's own lack of good faith or failure to exercise ordinary care.

* * * * *

(c) *Recovery by Reserve Bank.* (1) A Reserve Bank that has handled an item may recover as provided in paragraph (c)(2) of this section if an action or proceeding is brought against (or if defense is tendered to) the Reserve Bank based on—

(i) The alleged failure of the sender to have the authority to make the warranty and agreement in paragraph (a)(1) of this section;

(ii) Any action by the Reserve Bank within the scope of its authority in handling the item; or

(iii) Any warranty or indemnity made by the Reserve Bank under § 210.6(b), part 229 of this chapter, or the U.C.C.

(2) Upon entry of a final judgment or decree in an action or proceeding described in paragraph (c)(1) of this section, a Reserve Bank may recover from the sender the amount of attorneys' fees and other expenses of litigation incurred, as well as any amount the Reserve Bank is required to pay because of the judgment or decree or the tender of defense, together with interest thereon.

(d) *Methods of recovery.* (1) The Reserve Bank may recover the amount stated in paragraph (c) of this section by charging any account on its books that is maintained or used by the sender (or by charging a Reserve Bank sender), if—

(i) The Reserve Bank made seasonable written demand on the sender to assume defense of the action or proceeding; and

(ii) The sender has not made any other arrangement for payment that is acceptable to the Reserve Bank.

(2) The Reserve Bank is not responsible for defending the action or proceeding before using this method of recovery. A Reserve Bank that has been charged under this paragraph (d) may recover from its sender in the manner and under the circumstances set forth in this paragraph (d).

(3) A Reserve Bank's failure to avail itself of the remedy provided in this paragraph (d) does not prejudice its enforcement in any other manner of the indemnity agreement referred to in paragraph (a)(5) of this section.

(e) *Security interest.* When a sender sends an item to a Reserve Bank, the sender and any prior collecting bank grant to the sender's Administrative Reserve Bank a security interest in all of their respective assets in the possession of, or held for the account of, any Reserve Bank to secure their respective obligations due or to become due to the Administrative Reserve Bank under this subpart or subpart C or D of part 229 of this chapter (Regulation CC). The security interest attaches when a warranty is breached or any other obligation to the Reserve Bank is incurred. If the Reserve Bank, in its sole discretion, deems itself insecure and gives notice thereof to the sender or prior collecting bank, or if the sender or prior collecting bank suspends payments or is closed, the Reserve Bank may take any action authorized by law to recover the amount of an obligation, including, but not limited to, the exercise of rights of set off, the realization on any available collateral, and any other rights it may have as a creditor under applicable law.

■ 7. In § 210.6:

■ a. Remove the word ''and'' at the end of paragraph (a)(2)(ii).

■ b. Revise paragraph (a)(2)(iii).

■ c. Add paragraph (a)(2)(iv).

■ d. Revise paragraphs (b) and (c).

■ e. Remove paragraph (d).

The revisions and addition read as follows:

§ 210.6 Status, warranties, and liability of Reserve Bank.

(a) * * *

(2) * * *

(iii) As provided in an operating circular issued in accordance with § 210.3(a) regarding the sending of items; and

(iv) As provided in subparts C and D of part 229 of this chapter (Regulation CC).

* * * * *

(b) *Warranties and liability.* The following provisions apply when a Reserve Bank presents or sends an item.

(1) *Warranties for all items.* The Reserve Bank warrants to a subsequent collecting bank and to the paying bank and any other payor that—

(i) The Reserve Bank is a person entitled to enforce the item (or is authorized to obtain payment of the item on behalf of a person that is either entitled to enforce the item or authorized to obtain payment on behalf of a person entitled to enforce the item);

(ii) The item has not been altered; and

(iii) The item bears all indorsements applied by parties that previously handled the item for forward collection or return.

(2) *Warranties and indemnities as set forth in Reserve Bank operating circulars.* The Reserve Bank makes any warranties and indemnities regarding the sending of items as set forth in an operating circular issued in accordance with § 210.3(a).

(3) *Warranties and indemnities as set forth in Regulation CC and U.C.C.* As applicable and unless otherwise provided, the Reserve Bank makes all the warranties and indemnities set forth in and subject to the terms of subparts C and D of part 229 of this chapter (Regulation CC) and Article 4 of the U.C.C. The Reserve Bank makes all the warranties set forth in and subject to the terms of 4–207 of the U.C.C. for an electronic check as if it were an item subject to the U.C.C.

(4) *Indemnity for substitute check created from an electronic check.* (i) Except as provided in paragraph (b)(4)(ii) of this section, the Reserve Bank shall indemnify the bank to which it transfers or presents an electronic check (the recipient bank) for the amount of any losses that the recipient bank incurs under subpart D of part 229

of this chapter (Regulation CC) for an indemnity that the recipient bank was required to make under subpart D of part 229 of this chapter in connection with a substitute check later created from the electronic check.

(ii) The Reserve Bank shall not be liable under paragraph (b)(4)(i) of this section for any amount that the recipient bank pays under subpart D of part 229 of this chapter that is attributable to the lack of good faith or failure to exercise ordinary care of the recipient bank or a person that handled the item, in any form, after the recipient bank.

(c) *Time for commencing action against Reserve Bank.* (1) A claim against a Reserve Bank for lack of good faith or failure to exercise ordinary care shall be barred unless the action on the claim is commenced within two years after the claim accrues. Such a claim accrues on the date when a Reserve Bank's alleged failure to exercise ordinary care or to act in good faith first results in damages to the claimant.

(2) A claim that arises under paragraph (b)(3) of this section shall be barred unless the action on the claim is commenced within one year after the claim accrues. Such a claim accrues as of the date on which the claimant first learns, or by which the claimant reasonably should have learned, of the facts and circumstances giving rise to the claim.

(3) This paragraph (c) does not alter the time limit for claims under § 229.38(g) of this chapter (which include claims for breach of warranty under § 229.34 of this chapter) or subpart D of part 229 of this chapter.

■ 8. In § 210.7, revise paragraphs (a)(1) and (b)(2) to read as follows:

§ 210.7 Presenting items for payment.

(a) * * *

(1) A Reserve Bank or a subsequent collecting bank may present an item for payment or send the item for presentment and payment; and

* * * * *

(b) * * *

(2) In accordance with § 229.36 of this chapter (Regulation CC);

* * * * *

■ 9. In § 210.9, revise paragraphs (b)(2)(i), (b)(3)(i)(A) and (B), (b)(4) through (6), and (c) through (e) and remove paragraph (f) to read as follows:

§ 210.9 Settlement and payment.

* * * * *

(b) * * *

(2) * * *

(i) On the day a paying bank receives a cash item from a Reserve Bank, it shall settle for the item so that the proceeds of the settlement are available to its Administrative Reserve Bank, or return the item, by the latest of—

(A) The next clock hour or clock half-hour that is at least one half-hour after the paying bank receives the item;

(B) 8:30 a.m. eastern time; or

(C) Such later time as provided in the Reserve Banks' operating circulars.

* * * * *

(3) * * *

(i) * * *

(A) On that day, settle for the item so that the proceeds of the settlement are available to its Administrative Reserve Bank, or return the item, by the latest of the next clock hour or clock half-hour that is at least one half-hour after it ordinarily would have received the item, 8:30 a.m. eastern time, or such later time as provided in the Reserve Banks' operating circulars; or

(B) On the next day that is a banking day for both the paying bank and the Reserve Bank, settle for the item so that the proceeds of the settlement are available to its Administrative Reserve Bank by 8:30 a.m. eastern time on that day or such later time as provided in the Reserve Banks' operating circulars; and compensate the Reserve Bank for the value of the float associated with the item in accordance with procedures provided in the Reserve Bank's operating circular.

* * * * *

(4) *Reserve Bank closed.* If a paying bank receives a cash item from a Reserve Bank on a banking day that is not a banking day for the Reserve Bank, the paying bank shall—

(i) Settle for the item so that the proceeds of the settlement are available to its Administrative Reserve Bank by the close of the Fedwire Funds Service on the Reserve Bank's next banking day, or return the item by midnight of the day it receives the item (if the paying bank fails to settle for or return a cash item in accordance with this paragraph (b)(4)(i), it shall become accountable for the amount of the item as of the close of its banking day on the day it receives the item); and

(ii) Settle for the item so that the proceeds of the settlement are available to its Administrative Reserve Bank by 8:30 a.m. eastern time on the Reserve Bank's next banking day or such later time as provided in the Reserve Bank's operating circular, or return the item by midnight of the day it receives the item. If the paying bank fails to settle for or return a cash item in accordance with this paragraph (b)(4)(ii), it shall be subject to any applicable overdraft charges. Settlement under this paragraph (b)(4)(ii) satisfies the settlement requirements of paragraph (b)(4)(i) of this section.

(5) *Manner of settlement.* Settlement with a Reserve Bank under paragraphs (b)(1) through (4) of this section shall be made by debit to an account on the Reserve Bank's books or other form of settlement to which the Reserve Bank agrees, except that the Reserve Bank may, in its discretion, obtain settlement by charging the paying bank's account. A paying bank may not set off against the amount of a settlement under this section the amount of a claim with respect to another cash item, cash letter, or other claim under § 229.34 of this chapter (Regulation CC) or other law.

(6) *Notice in lieu of return.* If a cash item is unavailable for return, the paying bank may send a notice in lieu of return as provided in § 229.31(f) of this chapter (Regulation CC).

(c) *Noncash items.* A Reserve Bank may require the paying or collecting bank to which it has presented or sent a noncash item to pay for the item by a debit to an account maintained or used by the paying or collecting bank on the Reserve Bank's books or by any other form of settlement acceptable to the Reserve Bank.

(d) *Nonbank payor.* A Reserve Bank may require a nonbank payor to which it has presented an item to pay for it by debit to an account on the Reserve Bank's books or other form of settlement acceptable to the Reserve Bank.

(e) *Liability of Reserve Bank.* Except as set forth in § 229.35(b) of this chapter (Regulation CC), a Reserve Bank shall not be liable for the failure of a collecting bank, paying bank, or nonbank payor to pay for an item, or for any loss resulting from the Reserve Bank's acceptance of any form of payment other than cash authorized in paragraphs (b), (c), and (d) of this section. A Reserve Bank that acts in good faith and exercises ordinary care shall not be liable for the nonpayment of, or failure to realize upon, any non-cash form of payment that it accepts under paragraphs (b), (c), and (d) of this section.

■ 10. In § 210.10, revise paragraph (a) to read as follows:

§ 210.10 Time schedule and availability of credits for cash items and returned checks.

(a) Each Reserve Bank shall publish a time schedule indicating when the amount of any cash item or returned check received by it is counted toward the balance maintained to satisfy a reserve balance requirement for purposes of part 204 of this chapter (Regulation D) and becomes available for use by the sender or paying or

returning bank. The Reserve Bank that holds the settlement account shall give either immediate or deferred credit to a sender, a paying bank, or a returning bank (other than a foreign correspondent) in accordance with the time schedule of the receiving Reserve Bank. A Reserve Bank ordinarily gives credit to a foreign correspondent only when the Reserve Bank receives payment of the item in actually and finally collected funds, but, in its discretion, a Reserve Bank may give immediate or deferred credit in accordance with its time schedule.

* * * * *

■ 11. In § 210.11, revise paragraph (b) and remove paragraph (c) to read as follows:

§ 210.11 Availability of proceeds of noncash items; time schedule.

* * * * *

(b) *Time schedule.* A Reserve Bank may give credit for the proceeds of a noncash item subject to payment in actually and finally collected funds in accordance with a published time schedule. The time schedule shall indicate when the proceeds of the noncash item will be counted toward the balance maintained to satisfy a reserve balance requirement for purposes of part 204 of this chapter (Regulation D) and become available for use by the sender. A Reserve Bank may, however, refuse at any time to permit the use of credit given by it for a noncash item for which the Reserve Bank has not yet received payment in actually and finally collected funds.

■ 12. In § 210.12, revise paragraphs (a) and (c) through (g) to read as follows:

§ 210.12 Return of cash items and handling of returned checks.

(a) *Return of items*—(1) *Return of cash items handled by Reserve Banks.* A paying bank that receives a cash item from a Reserve Bank, other than for immediate payment over the counter, and that settles for the item as provided in § 210.9(b), may, before it has finally paid the item, return the item to any Reserve Bank (unless its Administrative Reserve Bank directs it to return the item to a specific Reserve Bank) in accordance with subpart C of part 229 of this chapter (Regulation CC), the Uniform Commercial Code, and the Reserve Banks' operating circulars. A paying bank that receives a cash item from a Reserve Bank also may return the item prior to settlement, in accordance with § 210.9(b) and the Reserve Banks' operating circulars. The rules or practices of a clearinghouse through which the item was presented, or a special collection agreement under which the item was presented, may not extend these return times, but may provide for a shorter return time.

(2) *Return of checks not handled by Reserve Banks.* A paying bank that receives a check, other than from a Reserve Bank, and that determines not to pay the check, may send the returned check to any Reserve Bank (unless its Administrative Reserve Bank directs it to send the returned check to a specific Reserve Bank) in accordance with subpart C of part 229 of this chapter (Regulation CC), the Uniform Commercial Code, and the Reserve Banks' operating circulars. A returning bank may send a returned check to any Reserve Bank (unless its Administrative Reserve Bank directs it to send the returned check to a specific Reserve Bank) in accordance with subpart C of part 229 of this chapter (Regulation CC), the Uniform Commercial Code, and the Reserve Banks' operating circulars.

* * * * *

(c) *Paying bank's and returning bank's agreement.* The warranties, indemnities, authorizations, and agreements made pursuant to this paragraph (c) may not be disclaimed and are made whether or not the returned check bears an indorsement of the paying bank or returning bank. By sending a returned check to a Reserve Bank, the paying bank or returning bank does all of the following.

(1) *Authorization to handle returned check.* The paying bank or returning bank authorizes the paying bank's or returning bank's Administrative Reserve Bank, and any other Reserve Bank or returning bank to which the returned check is sent, to handle the returned check (and authorizes any Reserve Bank that handles settlement for the returned check to make accounting entries) subject to this subpart and to the Reserve Banks' operating circulars.

(2) *Warranties for all returned checks.* The paying bank or returning bank warrants to each Reserve Bank handling a returned check that the returned check bears all indorsements applied by parties that previously handled the returned check for forward collection or return.

(3) *Warranties and indemnities as set forth in Regulation CC.* As applicable and unless otherwise provided, a paying bank or returning bank makes to each Reserve Bank that handles the returned check all the warranties and indemnities set forth in and subject to the terms of subparts C and D of part 229 of this chapter (Regulation CC).

(4) *Paying bank or returning bank's liability to Reserve Bank.* (i) Except as provided in paragraph (c)(4)(ii) and (iii) of this section, a paying bank or returning bank agrees to indemnify each Reserve Bank for any loss or expense (including attorneys' fees and expenses of litigation) resulting from—

(A) The paying or returning bank's lack of authority to give the authorization in paragraph (c)(1) of this section;

(B) Any action taken by a Reserve Bank within the scope of its authority in handling the returned check; or

(C) Any warranty or indemnity made by the Reserve Bank under paragraph (e) of this section or part 229 of this chapter.

(ii) A paying bank's or returning bank's liability for warranties and indemnities that a Reserve Bank makes for a returned check that is a substitute check, a paper or electronic representation thereof, or an electronic returned check is subject to the following conditions and limitations—

(A) A paying bank or returning bank that sent an original returned check shall not be liable for any amount that a Reserve Bank pays under subpart D of part 229 of this chapter, or under § 229.34 of this chapter with respect to an electronic returned check, absent the paying bank's or returning bank's agreement to the contrary; and

(B) Nothing in this subpart alters the liability under subpart D of part 229 of this chapter of a paying bank or returning bank that sent a substitute check or a paper or electronic representation of a substitute check or under § 229.34 of this chapter of a paying bank or returning bank that sent an electronic returned check; and

(iii) A paying bank or returning bank shall not be liable for any amount that the Reserve Bank pays under this subpart or part 229 of this chapter that is attributable to the Reserve Bank's own lack of good faith or failure to exercise ordinary care.

(d) *Paying bank or returning bank's liability under other law.* Nothing in paragraph (c) of this section limits any warranty or indemnity by a returning bank or paying bank (or a person that handled an item prior to that bank) arising under state law or regulation (such as the U.C.C.), other federal law or regulation (such as part 229 of this chapter), or an agreement with a Reserve Bank.

(e) *Warranties by and liability of Reserve Bank*—(1) *Warranties and indemnities.* The following provisions apply when a Reserve Bank handles a returned check under this subpart.

(i) *Warranties for all items.* The Reserve Bank warrants to the bank to which it sends the returned check that the returned check bears all

indorsements applied by parties that previously handled the returned check for forward collection or return.

(ii) *Warranties and indemnities as set forth in Regulation CC.* As applicable and unless otherwise provided, the Reserve Bank makes all the warranties and indemnities set forth in and subject to the terms of subparts C and D of part 229 of this chapter (Regulation CC).

(2) *Indemnity for substitute check created from electronic returned check.* (i) Except as provided in paragraph (e)(2)(ii) of this section, the Reserve Bank shall indemnify the bank to which it transfers or presents an electronic returned check (the recipient bank) for the amount of any losses that the recipient bank incurs under subpart D of part 229 of this chapter (Regulation CC) for an indemnity that the recipient bank was required to make under subpart D of part 229 of this chapter in connection with a substitute check later created from the electronic returned check.

(ii) The Reserve Bank shall not be liable under paragraph (e)(2)(i) of this section for any amount that the recipient bank pays under subpart D of part 229 of this chapter that is attributable to the lack of good faith or failure to exercise ordinary care of the recipient bank or a person that handled the item, in any form, after the recipient bank.

(3) *Liability of Reserve Bank.* A Reserve Bank shall not have or assume any other liability to any person except—

(i) For the Reserve Bank's own lack of good faith or failure to exercise ordinary care;

(ii) As provided in this paragraph (e); and

(iii) As provided in subparts C and D of part 229 of this chapter (Regulation CC).

(f) *Recovery by Reserve Bank.* (1) A Reserve Bank that has handled a returned check may recover as provided in paragraph (f)(2) of this section if an action or proceeding is brought against (or if defense is tendered to) the Reserve Bank based on—

(i) The alleged failure of the paying bank or returning bank to have the authority to give the authorization in paragraph (c)(1) of this section;

(ii) Any action by the Reserve Bank within the scope of its authority in handling the returned check; or

(iii) Any warranty or indemnity made by the Reserve Bank under paragraph (e) of this section or part 229 of this chapter; and

(2) Upon entry of a final judgment or decree in an action or proceeding described in paragraph (f)(1) of this section, a Reserve Bank may recover from the paying bank or returning bank the amount of attorneys' fees and other expenses of litigation incurred, as well as any amount the Reserve Bank is required to pay because of the judgment or decree or the tender of defense, together with interest thereon.

(g) *Methods of recovery.* (1) The Reserve Bank may recover the amount stated in paragraph (f) of this section by charging any account on its books that is maintained or used by the paying bank or returning bank (or by charging another returning Reserve Bank), if—

(i) The Reserve Bank made seasonable written demand on the paying bank or returning bank to assume defense of the action or proceeding; and

(ii) The paying bank or returning bank has not made any other arrangement for payment that is acceptable to the Reserve Bank.

(2) The Reserve Bank is not responsible for defending the action or proceeding before using this method of recovery. A Reserve Bank that has been charged under this paragraph (g) may recover from the paying or returning bank in the manner and under the circumstances set forth in this paragraph (g).

(3) A Reserve Bank's failure to avail itself of the remedy provided in this paragraph (g) does not prejudice its enforcement in any other manner of the indemnity agreement referred to in paragraph (c)(4) of this section.

* * * * *

Subpart B—Funds Transfers Through Fedwire

■ 13. In § 210.25:

■ a. In paragraphs (a) and (b)(3), remove the word ''Fedwire'' and add in its place the words ''the Fedwire Funds Service''.

■ b. Revise the introductory text of paragraph (b)(2).

■ c. Add paragraph (e).

The revision and addition read as follows:

§ 210.25 Authority, purpose, and scope.

* * * * *

(b) * * *

(2) Except as otherwise provided in paragraphs (b)(3) and (4) of this section, including Article 4A as set forth in appendix B to this subpart, and operating circulars of the Reserve Banks issued in accordance with paragraph (c) of this section, this subpart governs the rights and obligations of:

* * * * *

(e) *Financial messaging standards.* Financial messaging standards (*e.g.,* ISO 20022), including the financial messaging components, elements, technical documentation, tags, and terminology used to implement those standards, do not confer or connote legal status or responsibilities. This subpart, including Article 4A as set forth in appendix B to this subpart, and the operating circulars of the Reserve Banks issued in accordance with paragraph (c) of this section govern the rights and obligations of parties to funds transfers sent through the Fedwire Funds Service as provided in paragraph (b) of this section. To the extent there is any inconsistency between a financial messaging standard adopted by the Fedwire Funds Service and this subpart, this subpart shall prevail.

■ 14. In § 210.26, revise paragraph (e) to read as follows:

§ 210.26 Definitions.

* * * * *

(e) *Fedwire Funds Service* and *Fedwire* means the funds-transfer system owned and operated by the Federal Reserve Banks that is used primarily for the transmission and settlement of payment orders governed by this subpart. Fedwire does not include the system for making automated clearing house transfers.

* * * * *

§ 210.29 [Amended]

■ 15. In § 210.29(b), remove the word ''Fedwire'' and add in its place the words ''the Fedwire Funds Service''.

■ 16. In appendix A to subpart B:

■ a. Under ''Section 210.25—Authority, Purpose, and Scope'', add paragraph (e).

■ b. Under ''Section 210.32—Federal Reserve Bank Liability; Payment of Interest'', revise paragraph (b).

The addition and revision read as follows:

Appendix A to Subpart B of Part 210—Commentary

* * * * *

Section 210.25—Authority, Purpose, and Scope

* * * * *

(e) *Financial messaging standards.* This paragraph makes clear that financial messaging standards, including the financial messaging components, elements, technical documentation, tags, and terminology used to implement those standards, do not confer or connote legal status or responsibilities. Instead, subpart B of this part and Federal Reserve Bank operating circulars govern the rights and obligations of parties to funds transfers sent through the Fedwire Funds Service as provided in § 210.25(b). Thus, to the extent there is any inconsistency between a financial messaging standard adopted by the Fedwire Funds Service and subpart B of this part, subpart B of this part, including Article 4A as adopted in appendix B to subpart B of this part, will prevail. In the ISO 20022 financial messaging standard, for

example, the term *agent* is used to refer to a variety of bank parties to a funds transfer (*e.g., debtor agent, creditor agent, intermediary agent*). Notwithstanding use of that term in the standard and in message tags, such banks are not the agents of any party to a funds transfer and owe no duty to any other party to such a funds transfer except as provided in subpart B of this part (including Article 4A) or by express agreement. The ISO 20022 financial messaging standard also permits information to be carried in a funds-transfer message regarding persons that are not parties to that funds transfer (*e.g., ultimate debtor, ultimate creditor, initiating party*) for regulatory, compliance, remittance, or other purposes. An ''ultimate debtor'' is not an ''originator'' as defined in Article 4A. The relationship between the ultimate debtor and the originator (what the ISO 20022 standard calls the ''debtor'') is determined by law other than Article 4A.

* * * * *

Section 210.32—Federal Reserve Bank Liability; Payment of Interest

* * * * *

(b) *Payment of interest.* (1) Under article 4A, a Federal Reserve Bank may be required to pay compensation in the form of interest to another party in connection with its handling of a funds transfer. For example, payment of compensation in the form of interest is required in certain situations pursuant to sections 4A–204 (relating to refund of payment and duty of customer to report with respect to unauthorized payment order), 4A–209 (relating to acceptance of payment order), 4A–210 (relating to rejection of payment order), 4A–304 (relating to duty of sender to report erroneously executed payment order), 4A–305 (relating to liability for late or improper execution or failure to execute a payment order), 4A–402 (relating to obligation of sender to pay receiving bank), and 4A–404 (relating to obligation of beneficiary's bank to pay and give notice to beneficiary).

(2) Section 210.32(b) requires Federal Reserve Banks to provide compensation through an explicit interest payment. Under section 4A–506(a), the amount of such interest may be determined by agreement between the sender and receiving bank or by funds-transfer system rule. If there is no such agreement, under section 4A–506(b), the amount of interest is based on the federal funds rate. Similarly, compensation in the form of explicit interest will be paid to government senders, receiving banks, or beneficiaries described in § 210.25(d) if they are entitled to interest under this subpart. A Federal Reserve Bank may also, in its discretion, pay explicit interest directly to a remote party to a Fedwire funds transfer that is entitled to interest, rather than providing compensation to its direct sender or receiving bank.

(3) If a bank that received an explicit interest payment is not the party entitled to interest compensation under article 4A, the bank must pass the benefit of the explicit interest payment made to it to the party that is entitled to compensation in the form of interest from a Federal Reserve Bank. The benefit may be passed on either in the form of a direct payment of interest or in the form of a compensating balance, if the party entitled to interest agrees to accept the other form of compensation, and the value of the compensating balance is at least equivalent to the value of the explicit interest that otherwise would have been provided.

* * * * *

By order of the Board of Governors of the Federal Reserve System, November 14, 2018.

Ann Misback,

Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2018–0642; Product Identifier 2018–NM–087–AD; Amendment 39–19507; AD 2018–24–03]

RIN 2120–AA64

Airworthiness Directives; Dassault Aviation Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for all Dassault Aviation Model Falcon 10 airplanes. This AD was prompted by a determination that new and more restrictive maintenance requirements and airworthiness limitations are necessary. This AD requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive maintenance requirements and airworthiness limitations. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective January 4, 2019.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of January 4, 2019.

ADDRESSES: For service information identified in this final rule, contact Dassault Falcon Jet Corporation, Teterboro Airport, P.O. Box 2000, South Hackensack, NJ 07606; telephone 201–440–6700; internet *http://www.dassaultfalcon.com.* You may view this service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0642.

Examining the AD Docket

You may examine the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0642; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the regulatory evaluation, any comments received, and other information. The address for Docket Operations (phone: 800–647–5527) is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Tom Rodriguez, Aerospace Engineer, International Section, Transport Standards Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3226.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Dassault Aviation Model Falcon 10 airplanes. The NPRM published in the **Federal Register** on August 10, 2018 (83 FR 39626). The NPRM was prompted by a determination that more restrictive maintenance requirements and airworthiness limitations are necessary. The NPRM proposed to require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive maintenance requirements and airworthiness limitations.

We are issuing this AD to address, among other things, fatigue cracking and damage in principal structural elements; such fatigue cracking and damage could result in reduced structural integrity of the airplane.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2018–0078, dated April 9, 2018 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for all Dassault Aviation Model Falcon 10 airplanes. The MCAI states:

The airworthiness limitations and certification maintenance instructions for the Dassault Falcon 10 aeroplanes, which are

approved by EASA, are currently defined and published in the Dassault Falcon 10 [Airplane Maintenance Manual] AMM, Chapter 5–40. These instructions have been identified as mandatory for continued airworthiness.

Failure to accomplish these instructions could result in an unsafe condition [fatigue cracking and damage in principal structural elements, which could result in reduced structural integrity of the airplane.]

Previously, EASA issued AD 2008–0221 to require accomplishment of the maintenance tasks, and implementation of the airworthiness limitations, as specified in the Dassault Falcon 10 AMM, Chapter 5–40, at Revision 8.

Since that [EASA] AD was issued, Dassault issued the [Airworthiness Limitations Section] ALS, which introduces new and more restrictive maintenance requirements and/or airworthiness limitations.

For the reason described above, this [EASA] AD takes over the requirements for Falcon 10 aeroplanes from EASA AD 2008–0221, and requires accomplishment of the actions specified in the ALS.

You may examine the MCAI in the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0642.

Comments

We gave the public the opportunity to participate in developing this final rule. We received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting this final rule as proposed, except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for addressing the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

Dassault has issued Section 5–40–00, Airworthiness Limitations, Revision 13, dated July 2017, of the Dassault Falcon 10 Maintenance Manual. This service information describes repetitive mandatory maintenance tasks. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 60 airplanes of U.S. registry. We estimate the following costs to comply with this AD:

We have determined that revising the existing maintenance or inspection program takes an average of 90 work-hours per operator, although we recognize that this number may vary from operator to operator. In the past, we have estimated that this action takes 1 work-hour per airplane. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), we have determined that a per-operator estimate is more accurate than a per-airplane estimate. Therefore, we estimate the total cost per operator to be $7,650 (90 work-hours × $85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

This AD is issued in accordance with authority delegated by the Executive Director, Aircraft Certification Service, as authorized by FAA Order 8000.51C. In accordance with that order, issuance of ADs is normally a function of the Compliance and Airworthiness Division, but during this transition period, the Executive Director has delegated the authority to issue ADs applicable to transport category airplanes and associated appliances to the Director of the System Oversight Division.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2018–24–03 Dassault Aviation: Amendment 39–19507; Docket No. FAA–2018–0642; Product Identifier 2018–NM–087–AD.

(a) Effective Date

This AD is effective January 4, 2019.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Dassault Aviation Model Falcon 10 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Reason

This AD was prompted by a determination that new and more restrictive maintenance requirements and airworthiness limitations are necessary. We are issuing this AD to address, among other things, fatigue cracking and damage in principal structural elements; such fatigue cracking and damage could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Maintenance or Inspection Program Revision

Within 90 days after the effective date of this AD, revise the existing maintenance or inspection program, as applicable, to incorporate Section 5–40–00, Airworthiness Limitations, Revision 13, dated July 2017, of the Dassault Falcon 10 Maintenance Manual (''Section 5–40–00''). The initial compliance time for accomplishing the actions is at the applicable time specified in Section 5–40–00; or within 90 days after the effective date of this AD; whichever occurs later.

(h) No Alternative Actions or Intervals

After the maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (*e.g.,* inspections) or intervals may be used unless the actions or intervals are approved as an alternative method of compliance (AMOC) in accordance with the procedures specified in paragraph (i)(1) of this AD.

(i) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Section, Transport Standards Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Section, send it to the attention of the person identified in paragraph (j)(2) of this AD. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Section, Transport Standards Branch, FAA; or the European Aviation Safety Agency (EASA); or Dassault Aviation's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(j) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2018–0078, dated April 9, 2018, for related information. This MCAI may be found in the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0642.

(2) For more information about this AD, contact Tom Rodriguez, Aerospace Engineer, International Section, Transport Standards Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3226.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Section 5–40–00, Airworthiness Limitations, Revision 13, dated July 2017, of the Dassault Falcon 10 Maintenance Manual.

(ii) [Reserved]

(3) For service information identified in this AD, contact Dassault Falcon Jet Corporation, Teterboro Airport, P.O. Box 2000, South Hackensack, NJ 07606; telephone 201–440–6700; internet *http://www.dassaultfalcon.com.*

(4) You may view this service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Des Moines, Washington, on November 8, 2018.

Chris Spangenberg,

Acting Director, System Oversight Division, Aircraft Certification Service.

Airworthiness Directives; Leonardo S.p.A. (Type Certificate Previously Held by Finmeccanica S.p.A. and AgustaWestland S.p.A.) Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for Leonardo S.p.A. (Leonardo) Model AW189 helicopters. This AD requires replacing the tail plane lower fitting with an improved tail plane lower fitting. This AD was prompted by reports of cracks on the tail plane fittings of Model AW189 helicopters. The actions of this AD are intended to correct an unsafe condition on these products.

DATES: This AD is effective January 4, 2019.

ADDRESSES: For service information identified in this final rule, contact Leonardo S.p.A. Helicopters, Matteo Ragazzi, Head of Airworthiness, Viale G.Agusta 520, 21017 C.Costa di Samarate (Va) Italy; telephone +39–0331–711756; fax +39–0331–229046; or at *http://www.leonardocompany.com/-/bulletins.* You may review the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177.

Examining the AD Docket

You may examine the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2017–1081; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the European Aviation Safety Agency (EASA) AD, any incorporated-by-reference service information, the economic evaluation, any comments received, and other information. The street address for Docket Operations (phone: 800–647–5527) is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Kristi Bradley, Aerospace Engineer, Safety Management Section, Rotorcraft Standards Branch, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817–222–5110; email *kristin.bradley@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

On May 23, 2018, at 83 FR 23827, the **Federal Register** published our notice of proposed rulemaking (NPRM), which proposed to amend 14 CFR part 39 by adding an AD that would apply to AgustaWestland S.p.A. (now Leonardo) Model AW189 helicopters with a tail plane lower fitting part number (P/N) 8G5350A07051 installed. The NPRM proposed to require replacing the tail plane lower fitting with an improved tail plane lower fitting. The proposed requirements were intended to prevent a crack on a tail plane fitting, which could result in failure of the tail plane fitting and loss of helicopter control.

The NPRM was prompted by AD No. 2016–0161, dated August 8, 2016 (EASA AD 2016–0161), issued by EASA, which is the Technical Agent for the Member States of the European Union, to correct an unsafe condition for Leonardo Model AW189 helicopters. EASA advises that some cracks have been reported in-service on the tail plane fitting of AW189 helicopters following an onset of abnormal play. According to EASA, this condition, if not detected and corrected, could jeopardize structural integrity of the helicopter. EASA further advises that Leonardo developed a tail plane lower fitting with an improved design (P/N 8G0000P00511). Accordingly, EASA AD 2016–0161 requires repetitive inspections of the tail plane lower fitting assembly until the improved tail plane lower fitting is installed.

When the NPRM was issued, the FAA was in the process of updating AgustaWestland's name changes to Finmeccanica S.p.A. and then to Leonardo Helicopters on its FAA type certificate; therefore the NPRM specified AgustaWestland as the type certificate holder. Because this name change is now effective, this AD applies to Leonardo helicopters.

Comments

We gave the public the opportunity to participate in developing this AD, but we received no comments on the NPRM.

FAA's Determination

These helicopters have been approved by the aviation authority of Italy and are approved for operation in the United States. Pursuant to our bilateral agreement with Italy, EASA, its technical representative, has notified us of the unsafe condition described in the EASA AD. We are issuing this AD because we evaluated all information provided by Italy and determined the unsafe condition exists and is likely to exist or develop on other helicopters of these same type designs and that air safety and the public interest require adopting the AD requirements as proposed except for the name change from AgustaWestland to Leonardo. We have also updated the estimated costs to reflect that this AD affects 4 helicopters of U.S. Registry rather than 2 helicopters. These changes are consistent with the intent of the proposals in the NPRM (83 FR 23827, May 23, 2018) and will not increase the economic burden on any operator nor increase the scope of this AD.

Differences Between This AD and the EASA AD

The EASA AD requires inspecting the tail plane lower fitting for play within 50 flight hours and thereafter at intervals not to exceed 25 flight hours. If a crack or other damage exists, the EASA AD requires the improved tail plane lower fitting be installed within 10 flight hours. If no crack exists, the EASA AD requires that the improved tail plane lower fitting be installed within 200 flight hours or 2 months, whichever occurs first. This AD does not require inspections and requires installing the improved tail plane lower fitting within 50 hours time-in-service.

Related Service Information

We reviewed Leonardo Helicopters Bollettino Tecnico (BT) No. 189–038, Revision B, dated October 13, 2016, which specifies repetitively inspecting the tail plane assembly for a crack.

We also reviewed BT No. 189–070, Revision A, dated October 13, 2016, which provides instructions for replacing the tail plane lower fitting with the improved tail plane lower fitting retromodification P/N 8G0000P00511.

Costs of Compliance

We estimate that this AD affects 4 helicopters of U.S. Registry and that labor costs average $85 a work-hour. Based on these estimates, we expect that replacing the tail plane lower fitting with an improved tail plane lower fitting requires 64 work-hours and parts cost $15,424 for a total cost of $20,864 per helicopter and $83,456 for the U.S. fleet.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on helicopters identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866;

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

(3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction; and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared an economic evaluation of the estimated costs to comply with this AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2018–24–06 Leonardo S.p.A. (Type Certificate previously held by Finmeccanica S.p.A. and AgustaWestland S.p.A.): Amendment 39–19510; Docket No. FAA–2017–1081; Product Identifier 2017–SW–090–AD.

(a) Applicability

This AD applies to Leonardo S.p.A. (Type Certificate previously held by Finmeccanica S.p.A. and AgustaWestland S.p.A.) Model AW189 helicopters, certificated in any category, with a tail plane lower fitting part number (P/N) 8G5350A07051 installed.

(b) Unsafe Condition

This AD defines the unsafe condition as a crack on a tail plane fitting, which could result in failure of the tail plane fitting and loss of helicopter control.

(c) Effective Date

This AD becomes effective January 4, 2019.

(d) Compliance

You are responsible for performing each action required by this AD within the specified compliance time unless it has already been accomplished prior to that time.

(e) Required Actions

Within 50 hours time-in-service, install tail plane retromodification kit P/N 8G0000P00511.

(f) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Safety Management Section, Rotorcraft Standards Branch, FAA, may approve AMOCs for this AD. Send your proposal to: Kristi Bradley, Aerospace Engineer, Safety Management Section, Rotorcraft Standards Branch, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817–222–5110; email *9–ASW–FTW–AMOC-Requests@faa.gov.*

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, we suggest that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or certificate holding district office, before operating any aircraft complying with this AD through an AMOC.

(g) Additional Information

(1) Leonardo Helicopters Bollettino Tecnico (BT) No. 189–038, Revision B, and BT No. 189–070, Revision A, both dated October 13, 2016, which are not incorporated by reference, contain additional information about the subject of this AD. For service information identified in this AD, contact Leonardo S.p.A. Helicopters, Matteo Ragazzi, Head of Airworthiness, Viale G.Agusta 520, 21017 C.Costa di Samarate (Va) Italy; telephone +39–0331–711756; fax +39–0331–229046; or at *http://www.leonardocompany.com/-/bulletins.* You may review the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy, Room 6N–321, Fort Worth, TX 76177.

(2) The subject of this AD is addressed in European Aviation Safety Agency (EASA) AD No. 2016–0161, dated August 8, 2016. You may view the EASA AD on the internet at *http://www.regulations.gov* in Docket No. FAA–2017–1081.

(h) Subject

Joint Aircraft Service Component (JASC) Code: 5510, Horizontal Stabilizer Structure.

Issued in Fort Worth, Texas, on November 21, 2018.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

Airworthiness Directives; General Electric Company Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain General Electric Company (GE) GEnx–2B67, –2B67B, and –2B67/P turbofan engines. This AD was prompted by low-cycle fatigue (LCF) cracking of the fuel manifold leading to an engine fire. This AD requires removal from service of certain fuel manifolds at the next engine shop visit and their replacement with parts eligible for installation. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective January 4, 2019.

ADDRESSES: For service information identified in this final rule, contact General Electric Company, GE Aviation, Room 285, 1 Neumann Way, Cincinnati, OH 45215; phone: 513–552–3272; email: *aviation.fleetsupport@ge.com.* You may view this service information at the FAA, Engine and Propeller Standards Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call 781–238–7759. It is also available on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0633.

Examining the AD Docket

You may examine the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0633; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the regulatory evaluation, any comments received, and other information. The address for Docket Operations (phone: 800–647–5527) is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Herman Mak, Aerospace Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7147; fax: 781–238–7199; email: *herman.mak@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain GE GEnx–2B67, –2B67B, and –2B67/P turbofan engines. The NPRM published in the **Federal Register** on August 3, 2018 (83 FR 38086). The NPRM was prompted by LCF cracking of the fuel manifold leading to an engine fire. The NPRM proposed to require removal from service of certain fuel manifolds at the next engine shop visit and their replacement with parts eligible for installation. We are issuing this AD to address the unsafe condition on these products.

Revision to Related Service Information

GE published GEnx–2B Service Bulletin (SB) 73–0038 R03, dated August 17, 2018, to provide operators with instructions for replacing the lower fuel manifold system when in the intermixed configuration. This SB eliminates the need to replace the top main and lower fuel manifolds in the shop.

Comments

We gave the public the opportunity to participate in developing this final rule. We have considered the comment received. The Boeing Company supported the NPRM.

Conclusion

We reviewed the relevant data, considered the comment received, and determined that air safety and the public interest require adopting this final rule as proposed.

Related Service Information

We reviewed GE GEnx–2B SB 73–0038 R02, dated November 19, 2015, and GEnx–2B SB 73–0038 R03, dated August 17, 2018. GE GEnx–2B SB 73–0038 R02, dated November 19, 2015 describes procedures for removing and replacing the fuel manifold system with parts eligible for installation. GE GEnx–2B SB 73–0038 R03, dated August 17, 2018 describes procedures for replacing the fuel manifold system when in the intermixed configuration.

Costs of Compliance

We estimate that this AD affects two engines installed on airplanes of U.S.

registry. We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Replace fuel manifolds	220 work-hours × $85 per hour = $18,700	$119,485	$138,185	$276,370

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

This AD is issued in accordance with authority delegated by the Executive Director, Aircraft Certification Service, as authorized by FAA Order 8000.51C. In accordance with that order, issuance of ADs is normally a function of the Compliance and Airworthiness Division, but during this transition period, the Executive Director has delegated the authority to issue ADs applicable to engines, propellers, and associated appliances to the Manager, Engine and Propeller Standards Branch, Policy and Innovation Division.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2018–21–12 General Electric Company: Amendment 39–19470; Docket No. FAA–2018–0633; Product Identifier 2018–NE–22–AD.

(a) Effective Date

This AD is effective January 4, 2019.

(b) Affected ADs

None.

(c) Applicability

This AD applies to General Electric Company (GE) GEnx–2B67, –2B67B, and –2B67/P turbofan engines with top main fuel manifolds, part numbers (P/Ns) 2419M11G01, 2561M11G01, or 2546M11G01, or lower fuel manifolds, P/Ns 2419M12G01, 2561M12G01, or 2546M12G01, installed.

(d) Subject

Joint Aircraft System Component (JASC) Code 7310, Engine Fuel Distribution.

(e) Unsafe Condition

This AD was prompted by low-cycle fatigue cracking of the fuel manifold leading to an engine fire. We are issuing this AD to prevent the failure of the fuel manifold. The unsafe condition, if not addressed, could result in failure of the fuel manifold, engine fire, and damage to the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

At the next engine shop visit, remove the applicable fuel manifolds from service and replace with parts eligible for installation.

(h) Installation Prohibition

After the effective date of this AD, do not install top main fuel manifolds, P/Ns 2419M11G01, 2561M11G01, or 2546M11G01, or lower fuel manifolds, P/Ns 2419M12G01, 2561M12G01, or 2546M12G01.

(i) Definition

For the purpose of this AD, an ''engine shop visit'' is the induction of an engine into the shop for maintenance involving the separation of pairs of major mating engine case flanges, except for the following situations, which do not constitute an engine shop visit:

(1) Separation of engine flanges solely for the purposes of transportation of the engine without subsequent maintenance.

(2) Separation of engine flanges solely for the purposes of replacing the fan or propulsor without subsequent maintenance.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, ECO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (k) of this AD. You may email your request to: *ANE-AD-AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Related Information

For more information about this AD, contact Herman Mak, Aerospace Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7147; fax: 781–238–7199; email: *herman.mak@faa.gov.*

(l) Material Incorporated by Reference

None.

Issued in Burlington, Massachusetts, on November 27, 2018.

Robert J. Ganley,

Manager, Engine and Propeller Standards Branch, Aircraft Certification Service.

Airworthiness Directives; CFM International S.A. Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for all CFM International S.A. (CFM) LEAP–1B21, LEAP–1B23, LEAP–1B25, LEAP–1B27, LEAP–1B28, LEAP–1B28B1, LEAP–1B28B2, LEAP–1B28B2C, LEAP–1B28B3, LEAP–1B28BBJ1, and LEAP–1B28BBJ2 turbofan engines with a certain high-pressure turbine (HPT) stator case (HPT cases) installed. This AD requires removal of affected HPT cases from service and their replacement with a part eligible for installation. This AD was prompted by the discovery of a quality escape at a manufacturing facility involving unapproved welds on HPT cases. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 17, 2018.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 17, 2018.

We must receive comments on this AD by January 14, 2019.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this final rule, contact CFM International Inc., Aviation Operations Center, 1 Neumann Way, M/D Room 285, Cincinnati, OH 45125; phone: 877–432–3272; fax: 877–432–3329; email: *aviation.fleetsupport@ge.com*. You may view this service information at the FAA, Engine and Propeller Standards Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call 781–238–7759. It is also available on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0869.

Examining the AD Docket

You may examine the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0869; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations (phone: 800–647–5527) is listed above. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Christopher McGuire, Aerospace Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7120; fax: 781–238–7199; email: *chris.mcguire@faa.gov*.

SUPPLEMENTARY INFORMATION:

Discussion

We learned from CFM of a quality escape at one of their suppliers, AECC Aero Science and Technology Co., Ltd., which was performing welds on newly-manufactured components to correct errors introduced in their manufacturing process. These welds were not reviewed or approved by either CFM or the FAA. CFM's review of manufacturing records determined that these parts include HPT cases installed on CFM LEAP–1B turbofan engines. These HPT cases are life limited. The unapproved repairs reduced the material capability of these cases which requires their removal prior to reaching their published Airworthiness Limitation Section life limit. This condition, if not addressed, could result in failure of the HPT case, engine fire, and damage to the airplane. We are issuing this AD to address the unsafe condition on these products.

Related Service Information Under 1 CFR Part 51

We reviewed CFM Service Bulletin (SB) LEAP–1B–72–00–0193–01A–930A–D, Issue 003, dated November 5, 2018. The SB describes procedures for removing the affected HPT cases from the engine. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

We are issuing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

AD Requirements

This AD requires removal of the affected HPT cases from service and their replacement with a part eligible for installation.

FAA's Justification and Determination of the Effective Date

An unsafe condition exists that requires the immediate adoption of this AD without providing an opportunity for public comments prior to adoption. The FAA has found that the risk to the flying public justifies waiving notice and comment prior to the adoption of this rule because the compliance time for the required action is shorter than the time necessary for the public to comment and for us to publish the final rule. Certain HPTs cases must be removed within 200 cycles after the effective date of this AD to ensure they do not fail. Therefore, we find good cause that notice and opportunity for prior public comment are impracticable. In addition, for the reason stated above, we find that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety and was not preceded by notice and an opportunity for public comment. However, we invite you to send any written data, views, or arguments about this final rule. Send your comments to an address listed under the **ADDRESSES** section. Include the docket number FAA–2018–0869 and Product Identifier 2018–NE–32–AD at the beginning of your comments. We specifically invite comments on the overall regulatory,

economic, environmental, and energy aspects of this final rule. We will consider all comments received by the closing date and may amend this final rule because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this final rule.

Costs of Compliance

We estimate that this AD affects two engines installed on airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Remove HPT case and FPI of forward flange	1000 work-hour × $85 per hour = $85,000	$179,400	$264,400	$528,800

We estimate the following costs to do any necessary replacements that would be required based on the results of the inspection. We have no way of determining the number of aircraft that might need this replacement:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replace combustion case assembly	10 work-hours × $85 per hour = $850	$558,800	$559,650

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

This AD is issued in accordance with authority delegated by the Executive Director, Aircraft Certification Service, as authorized by FAA Order 8000.51C. In accordance with that order, issuance of ADs is normally a function of the Compliance and Airworthiness Division, but during this transition period, the Executive Director has delegated the authority to issue ADs applicable to engines, propellers, and associated appliances to the Manager, Engine and Propeller Standards Branch, Policy and Innovation Division.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2018–20–01 CFM International S.A.: Amendment 39–19435; Docket No. FAA–2018–0869; Product Identifier 2018–NE–32–AD.

(a) Effective Date

This AD is effective December 17, 2018.

(b) Affected ADs

None.

(c) Applicability

This AD applies to CFM International S.A. (CFM) LEAP–1B21, LEAP–1B23, LEAP–1B25, LEAP–1B27, LEAP–1B28, LEAP–1B28B1, LEAP–1B28B2, LEAP–1B28B2C, LEAP–1B28B3, LEAP–1B28BBJ1, and LEAP–1B28BBJ2 turbofan engines with a high-pressure turbine (HPT) stator case (HPT case), part number (P/N) 2541M81G01 installed, and with any HPT case serial number (S/N) listed in Table 1 or Table 2 of Planning Information, paragraph 3.A., of CFM Service Bulletin (SB) LEAP–1B–72–00–0193–01A–930A–D, Issue 003, dated November 5, 2018.

(d) Subject

Joint Aircraft System Component (JASC) Code 7250, Turbine Section.

(e) Unsafe Condition

This AD was prompted by the discovery of a quality escape at a manufacturing facility involving unapproved welds on HPT cases. We are issuing this AD to prevent failure of the HPT case. The unsafe condition, if not addressed, could result in engine fire and damage to the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

(1) After the effective date of this AD, remove the affected HPT case from service no later than the number of cycles in service specified in Table 1 or Table 2 of Planning Information, paragraph 3.A., of CFM SB LEAP–1B–72–00–0193–01A–930A–D, Issue 003, dated November 5, 2018.

(2) After removing the HPT case as required in paragraph (g)(1) of this AD, and before further flight, determine if the combustor diffuser nozzle (CDN) case, P/N 2548M30G01 to 2548M30G07, inclusive, and with any CDN case S/N listed in Table 1 or Table 2 of Planning Information, paragraph 3.A., of CFM SB LEAP–1B–72–00–0193–01A–930A–D, Issue 003, dated November 5, 2018, needs to be replaced as follows:

(i) Inspect the HPT case forward flange outer diameter using the Accomplishment Instructions, paragraphs 5.B.(1), 5.B.(2), and 5.B.(4) of CFM SB LEAP–1B–72–00–0193–01A–930A–D, Issue 003, dated November 5, 2018.

(ii) If, during the inspection required by paragraph (g)(2)(i) of this AD, you find an HPT case forward flange cracked across the full axial length of the outer diameter, remove the CDN case, P/N 2548M30G01 to 2548M30G07, inclusive, from service and, before further flight, replace with a part eligible for installation.

(h) Alternative Methods of Compliance (AMOCs)

(1) The Manager, ECO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (i) of this AD. You may email your request to: *ANE-AD-AMOC@faa.gov*.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(i) Related Information

For more information about this AD, contact Christopher McGuire, Aerospace Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7120; fax: 781–238–7199; email: *chris.mcguire@faa.gov*.

(j) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

BILLING CODE 4910–13–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2018–1035]

Drawbridge Operation Regulation; Atlantic Intracoastal Waterway, Albemarle and Chesapeake Canal, Chesapeake, VA

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the S168/Great Bridge bridge. This bridge carries SR168 (Battlefield Boulevard South) over the Atlantic Intracoastal Waterway (AICW), Albemarle and Chesapeake Canal, mile 12.0, at Chesapeake, VA. The deviation is necessary to facilitate the Annual Chesapeake Rotary Christmas Parade. This deviation allows the bridge to remain in the closed-to-navigation position.

DATES: The deviation is effective from 4 p.m. to 10 p.m., on Saturday, December 1, 2018.

ADDRESSES: The docket for this deviation, USCG–2018–1035 is available at *http://www.regulations.gov.* Type the docket number in the ''SEARCH'' box and click ''SEARCH''. Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email Mr. Michael Thorogood, Bridge Administration Branch Fifth District, Coast Guard, telephone 757–398–6557, email *Michael.R.Thorogood@uscg.mil.*

SUPPLEMENTARY INFORMATION: The City of Chesapeake owner and operator of the S168/Great Bridge bridge has requested a temporary deviation from the current operating regulations to ensure the safety of the increased volumes of spectators that will be participating in the Annual Chesapeake Rotary Christmas Parade on Saturday, December 1, 2018. The S168/Great Bridge Bridge carries SR 168/Battlefield Boulevard South over the Atlantic Intracoastal Waterway (AICW), Albemarle and Chesapeake Canal, mile 12.0, at Chesapeake, VA. This bridge is a double bascule drawbridge and has a vertical clearance of 8 feet above mean high water in the closed position. The bridge has an unlimited vertical clearance in the open position.

The current operating regulation is set out in 33 CFR 117.997(g). Under this temporary deviation, the bridge will be maintained in the closed-to-navigation position from 4 p.m. to 6 p.m. and from 8 p.m. to 10 p.m. on Saturday, December 1, 2018.

The AICW, Albemarle and Chesapeake Canal, is used by a variety of vessels including U.S. government vessels, small commercial vessels, recreational vessels and tug and barge traffic. The Coast Guard has carefully considered the nature and volume of vessel traffic on the waterway in publishing this temporary deviation.

Vessels able to pass through the bridge in the closed-to-navigation position may do so at any time. The bridge will be able to open for emergencies and there is no immediate alternative route for vessels unable to pass through the bridge in the closed position. The Coast Guard will also inform the users of the waterway through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: November 27, 2018.

Hal R. Pitts,

Bridge Program Manager, Fifth Coast Guard District.

[FR Doc. 2018–26051 Filed 11–29–18; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2018–1041]

Recurring Safety Zone; Steelers Fireworks, Pittsburgh, PA

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the safety zone for the Pittsburgh Steelers Fireworks to provide for the safety of persons, vessels, and the marine environment on the navigable waters of the Allegheny, Ohio, and Monongahela Rivers during this event. Our regulation for marine events within the Eighth Coast Guard District identifies the regulated area for this event in Pittsburgh, PA. During the enforcement periods, entry into this zone is prohibited unless authorized by the Captain of the Port Marine Safety Unit Pittsburgh or a designated representative.

DATES: The regulations in 33 CFR 165.801, Table 1, Line 57 will be enforced from 7 p.m. through 11 p.m. on December 2, 2018.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notice of enforcement, call or email Petty Officer Jennifer Haggins, Marine Safety Unit Pittsburgh, U.S. Coast Guard; telephone 412–221–0807, email *Jennifer.L.Haggins@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce a safety zone for the Steelers fireworks listed in 33 CFR 165.801, Table 1, Line 57 from 7 p.m. through 11 p.m. on December 2, 2018. This action is being taken to provide for the safety of persons, vessels, and the marine environment on the navigable waters of the Allegheny, Ohio, and Monongahela Rivers during this event. Our regulation for marine events within the Eighth Coast Guard District, § 165.801, specifies the location of the safety zone for the Steelers fireworks, which covers a less than one-mile stretch of the Ohio, Allegheny, and Monongahela Rivers. Entry into the safety zone is prohibited unless authorized by the Captain of the Port Marine Safety Unit Pittsburgh (COTP) or a designated representative. Persons or vessels desiring to enter into or pass through the area must request permission from the COTP or a designated representative. They can be reached on VHF FM channel 16. If permission is granted, all persons and vessel shall comply with the instructions of the COTP or designated representative.

In addition to this notice of enforcement in the **Federal Register**, the COTP or a designated representative will inform the public through Broadcast Notices to Mariners (BNMs), Local Notices to Mariners (LNMs), Marine Safety Information Bulletins (MSIBs), and/or through other means of public notice as appropriate at least 24 hours in advance of each enforcement.

Dated: November 26, 2018.

F.M. Smith,

Commander, U.S. Coast Guard, Acting Captain of the Port Marine Safety Unit Pittsburgh.

[FR Doc. 2018–26050 Filed 11–29–18; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF EDUCATION

34 CFR Chapter II

[Docket ID ED–2018–OII–0062]

RIN 1855–AA14

Final Priorities, Requirements, Definitions, and Selection Criteria—Expanding Opportunity Through Quality Charter Schools Program; Grants to Charter Management Organizations for the Replication and Expansion of High-Quality Charter Schools

AGENCY: Office of Innovation and Improvement, Department of Education.

ACTION: Final priorities, requirements, definitions, and selection criteria.

SUMMARY: The Acting Assistant Deputy Secretary for Innovation and Improvement announces priorities, requirements, definitions, and selection criteria for Grants to Charter Management Organizations for the Replication and Expansion of High-Quality Charter Schools (CMO grants or CMO grant program) under the Expanding Opportunity Through Quality Charter Schools Program (CSP), Catalog of Federal Domestic Assistance (CFDA) number 84.282M. We may use one or more of these priorities, requirements, definitions, and selection criteria for competitions in fiscal year (FY) 2019 and later years. We take this action to support the replication and expansion of high-quality charter schools by charter management organizations (CMOs) throughout the Nation, particularly those that serve *educationally disadvantaged students,* such as students who are *individuals from low-income families,* students with disabilities, and English learners; and students who traditionally have been underserved by charter schools, such as *Native American* students and students in *rural communities.*

DATES: These priorities, requirements, definitions, and selection criteria are effective November 30, 2018.

FOR FURTHER INFORMATION CONTACT: Allison Holte, U.S. Department of Education, 400 Maryland Avenue SW, Room 4W243, Washington, DC 20202. Telephone: (202) 205–7726.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: *Summary of the Major Provisions of This Regulatory Action:* We announce these final priorities, requirements, definitions, and selection criteria to achieve two main goals.

First, we seek to continue to use funds under this program to support high-quality applications from highly qualified applicants. To that end, we announce priorities, requirements, definitions, and selection criteria that encourage or require applicants to describe, for example: Past successes working with *academically poor-performing public schools*;[1] experience operating or managing multiple charter schools; plans to expand their reach into new and diverse communities; logical connections between their proposed projects and intended outcomes for the students they propose to serve; and plans to evaluate the extent to which their proposed projects, if funded, yield intended outcomes.

Second, these final priorities, requirements, definitions, and selection criteria are designed to increase the likelihood that CMO grants support expanded high-quality educational opportunities for *educationally disadvantaged students,* as well as students who traditionally have been underserved by charter schools, such as *Native American* students and students in *rural communities.* Specifically, among other things, the final priorities, requirements, definitions, and selection criteria enable the Department to give

[1] Italicized terms are defined in the Final Definitions section of this document.

priority to applications that propose to: Replicate or expand high-quality charter schools with an intentional focus on recruiting students from racially and socioeconomically diverse backgrounds, and maintaining racially and socioeconomically diverse student bodies, consistent with nondiscrimination requirements contained in the U.S. Constitution and Federal civil rights laws; serve a meaningful proportion of students who are *individuals from low-income families*; and replicate or expand high-quality charter schools that serve high school students, students in *rural communities,* and *Native American* students. Further, in order to meet the final requirements announced in this document, CMO applicants must describe how the schools they intend to replicate or expand would recruit and enroll *educationally disadvantaged students* and support such students in mastering State academic standards.

Costs and Benefits: The Department of Education (Department) believes that the benefits of this regulatory action outweigh any associated costs, which we believe would be minimal. While this action imposes cost-bearing requirements on participating CMOs, we expect that applicants will include requests for funds to cover such costs in their proposed project budgets. We believe this regulatory action strengthens accountability for the use of Federal funds by helping to ensure that the Department awards CSP grants to CMOs that are most capable of expanding the number of high-quality charter schools available to our Nation's students. Please refer to the *Regulatory Impact Analysis* in this document for a more detailed discussion of costs and benefits.

Purpose of Program: The major purposes of the CSP are to: Expand opportunities for all students, particularly students facing educational disadvantages and students who traditionally have been underserved by charter schools, to attend high-quality charter schools and meet challenging State academic standards; provide financial assistance for the planning, program design, and initial implementation of public charter schools; increase the number of high-quality charter schools available to students across the United States; evaluate the impact of charter schools on student achievement, families, and communities; share best practices between charter schools and other public schools; encourage States to provide facilities support to charter schools; and support efforts to strengthen the charter school authorizing process. Through the CMO grant program, the Department provides funds to CMOs on a competitive basis to enable them to replicate or expand one or more high-quality charter schools. More specifically, grant funds may be used to expand the enrollment of one or more existing high-quality charter schools, or to open one or more high-quality charter schools by replicating an existing high-quality charter school model.

Program Authority: Title IV, Part C of the Elementary and Secondary Education Act of 1965, as amended by the Every Student Succeeds Act (ESEA).

We published a notice of proposed priorities, requirements, definitions, and selection criteria for this program in the **Federal Register** on July 27, 2018 (83 FR 35571) (NPP). The NPP contained background information and our reasons for proposing the particular priorities, requirements, definitions, and selection criteria.

There are several significant differences between the NPP and this notice of final priorities, requirements, definitions, and selection criteria (NFP). First, we have revised the title and focus of Priority 2 (which was proposed as ''School Improvement through Restart Efforts'') to clarify that applicants addressing the priority should be focused on reopening, and not restarting, *academically low-performing public schools* as charter schools. In addition, we have revised Priority 2 to require applicants to address each subpart in order to meet the priority. Second, we have revised *Priority 3—High School Students* to clarify that there is a broad range of postsecondary education options for which high-quality charter schools that serve high school students may prepare their students, including certain one-year training programs as well as two- and four-year colleges and universities. We have also revised *Priority 3* to specify that high school students include *educationally disadvantaged students.* In addition, we have revised *Priority 4—Low-Income Demographic* to require applicants receiving priority points to demonstrate that they will maintain a poverty threshold that is the same as, or substantially similar to, the level specified in the grant application for the entire grant period. Further, we have revised *Priority 7* and related definitions to include students who are Native Hawaiian or Native American Pacific Islander, as well as students who are Indians (including Alaska Natives), and to clarify that applicants must meaningfully collaborate with community leaders. Finally, we have revised *Selection Criterion (b)—Significance of Contribution in Assisting Educationally Disadvantaged Students* to emphasize students with disabilities [2] and English learners. We discuss these changes in detail in the *Analysis of Comments and Changes* section of this document.

Public Comment: In response to our invitation in the NPP, 36 parties submitted comments on the proposed priorities, requirements, definitions, and selection criteria.

We group major issues according to subject. Generally, we do not address technical and other minor changes. In addition, we do not address comments that raised concerns not directly related to the proposed priorities, requirements, definitions, or selection criteria.

Analysis of Comments and Changes: An analysis of the comments and changes in the priorities, requirements, definitions, and selection criteria since publication of the NPP follows.

General

Comments: One commenter suggested that we include a focus on students from military families, noting that military families may not be able to afford charter school tuition.

Discussion: First, we note that charter schools are public schools and, by definition, may not charge tuition (ESEA section 4310(2)). Nonetheless, we agree that military- and veteran-connected students often face unique challenges. On March 2, 2018, the Department published in the **Federal Register** (83 FR 9096) the Secretary's Final Supplemental Priorities and Definitions for Discretionary Grant Programs (Supplemental Priorities), which are available for use in all of the Department's discretionary grant programs, including the CMO grant program. In recognition of the unique challenges faced by military families, Priority 11 in the Supplemental Priorities focuses on ensuring that service members, veterans, and their families have access to high-quality educational options. In any fiscal year in which the Department awards new grants under the CMO grant program, we may use this supplemental priority in conjunction with the priorities, requirements, definitions, and selection

[2] For purposes of these final priorities, requirements, definitions, and selection criteria, ''students with disabilities'' or ''student with a disability'' has the same meaning as ''children with disabilities'' or ''child with a disability,'' respectively, as defined in section 8101(4) of the Elementary and Secondary Education Act of 1965, as amended by the Every Student Succeeds Act (ESEA). Under section 8101(4), ''child with a disability'' has the same meaning given that term in section 602 of the Individuals with Disabilities Education Act.

criteria in the ESEA and established in this document. Therefore, we decline to revise the final priorities, requirements, definitions, and selection criteria to add a focus on military families.

Changes: None.

Comments: Seven commenters urged the Department to clarify through these final priorities, requirements, definitions, and selection criteria that virtual charter schools must ensure that all students, particularly students with disabilities, can access virtual and online content. Several commenters requested that we require all virtual public schools, including virtual charter schools, to demonstrate compliance with the Web Content Accessibility Guidelines (WCAG). Other commenters suggested that applicants proposing to replicate or expand virtual charter schools be required to focus on enrollment and retention of, and academic outcomes for, *educationally disadvantaged students,* and make performance and compliance data available publicly and in a timely manner. One commenter suggested that we refrain from awarding grants to virtual charter schools altogether.

Discussion: Section 4310(2)(G) of the ESEA requires charter schools receiving CSP funds to comply with various laws, including section 504 of the Rehabilitation Act of 1973 (Section 504), the Americans with Disabilities Act of 1990 (ADA), and Part B of the Individuals with Disabilities Education Act (IDEA). Thus, consistent with the requirements in Section 504 and Title II of the ADA, virtual charter schools must ensure that all content is accessible to students with disabilities enrolled in the school as well as prospective students with disabilities and parents or guardians. Similarly, like other local educational agencies (LEAs), public charter schools that operate as LEAs under State law, including virtual charter school LEAs and LEAs that include virtual charter schools among their public schools, must ensure that eligible students with disabilities enrolled in these schools receive a free appropriate public education (FAPE) in accordance with the requirements of Part B of the IDEA.[3] To meet this obligation, these schools must provide instructional materials to students with disabilities in accessible formats, consistent with the requirements in Section 504 and Title II of the ADA. If web-based instruction or online instructional platforms are used, these schools must ensure that the information provided through those sources is accessible to students with disabilities, consistent with the requirements in Section 504 and Title II of the ADA. Because these requirements are already established by Federal law, we decline to revise these final priorities, requirements, definitions, or selection criteria.

Further, while we understand that WCAG is designed to make web content accessible to a wide range of individuals with disabilities and that demonstrating compliance with WCAG is a widely accepted method for public schools, including virtual public charter schools, to meet the obligations discussed above, the Department does not require grantees to adopt a particular standard to ensure accessibility of web content or online platforms to meet their obligations under Section 504 or Title II of the ADA. Moreover, the WCAG standards are updated periodically.

With respect to requiring virtual charter schools to focus on the enrollment and retention of, and academic outcomes for, *educationally disadvantaged students,* to receive a grant under the CMO grant program, an applicant must provide, among other things, student assessment results and attendance and retention rates for all students served by its schools, including *educationally disadvantaged students* (ESEA section 4305(b)(3)(A)). Further, CMO grantees must assure that each charter school receiving CSP funds makes annual performance and enrollment data publicly available (ESEA section 4303(f)(2)(G)(v)). CMO applicants must also provide the Department with information on existing significant compliance and management issues (ESEA section 4305(b)(3)(A)(iii)). These requirements apply to all CMO grantees, regardless of whether they intend to replicate or expand virtual or brick-and-mortar charter schools.

Finally, while we recognize that virtual charter schools can present unique challenges with respect to the enforcement of CSP requirements, the ESEA does not preclude virtual charter schools from receiving CSP funds. For this reason, we decline to adopt the commenter's suggestion that we preclude applicants that propose to replicate or expand virtual charter schools from applying for funds under this program.

Changes: None.

Comments: Several commenters requested that we clarify that charter schools are obligated to serve students with disabilities. One commenter stated that charter schools must adhere to the IDEA, hold regular individualized education plan meetings, and offer face-inclusive policies as codified by State law. Another commenter urged the Department to focus specifically on the needs of students with Tourette's syndrome and obsessive compulsive disorder. Several commenters suggested that we include a priority for applicants that propose to replicate or expand high-quality charter schools that serve students with disabilities.

Discussion: It is unclear what the commenter meant by ''face-inclusive policies,'' but we agree that students with disabilities face unique educational challenges. As stated above, all eligible students with disabilities attending public charter schools and their parents retain all rights under Part B of the IDEA, including the right to receive FAPE. In addition, these final priorities, requirements, definitions, and selection criteria include a requirement that applicants for CMO grants describe how they intend to comply with Part B of the IDEA.

Further, a number of priorities, requirements, definitions, and selection criteria under this program focus on *educationally disadvantaged students,* which include students who are *children with disabilities,* as defined in section 8101(4) of the ESEA. The Supplemental Priorities also include two priorities that focus on the needs of students with disabilities and could be used in future CMO grant competitions. These priorities are: Priority 1—Empowering Families and Individuals to Choose a High-quality Education that Meets their Unique Needs (which includes a specific option for focusing on students with disabilities) and Priority 5—Meeting the Unique Needs of Students and Children with Disabilities and/or Those with Unique Gifts and Talents. For these reasons, we decline to include a specific priority for students with disabilities or to focus this priority on students with a particular disability or impairment, such as Tourette's Syndrome or obsessive compulsive disorder.

Changes: None.

Comments: Several commenters urged the Department to clarify whether applicants could still apply for CMO grants as groups or consortia and, if so, what the Department's expectations are for how a group or consortium application should be organized.

Discussion: Federal regulations at 34 CFR 75.127–75.129 specifically

[3] Students with disabilities attending public charter schools and their parents retain all rights under Part B of the IDEA. Further, charter schools that operate as LEAs under State law, as well as LEAs that include charter schools among their public schools, are responsible for ensuring that the requirements of Part B of the IDEA are met, unless State law assigns that responsibility to some other entity. *See* 34 CFR 300.209.

authorize applicants to apply as a group or consortium, and prescribe the requirements governing such applications. These final priorities, requirements, definitions, and selection criteria do not alter the requirements for group applications in 34 CFR 75.127–75.129. Therefore, we decline to make any changes in this area.

Changes: None.

Comments: One commenter suggested that the Department allow high-performing applicants to submit streamlined applications for CMO grants. The commenter also suggested that we increase per-seat funding caps for CMOs that are expanding grades in schools because grade expansion can often be as costly as opening new schools. In addition, the commenter asked that we allow CMOs to apply for CMO grants and subgrants under section 4303 of the ESEA. Finally, the commenter asked that we issue nonregulatory guidance that would broadly interpret the term ''minor facilities repairs'' to ensure that charter schools can use CSP funds to ensure that students attend safe, clean, and well-maintained schools.

Discussion: Although the Department may have information regarding the past performance of some applicants—in particular, CMOs that have received CSP grants previously—we rely on the expertise of independent peer reviewers to evaluate the quality of applications submitted under a grant competition in order to ensure the fairness and integrity of the competition. Further, each application proposes to carry out different activities, and an applicant's successful implementation of one project does not guarantee the successful implementation of subsequent projects. To ensure an equal playing field, we believe it is critical that all applicants be required to submit the same general information for review. Therefore, we decline to enable high-performing applicants to submit streamlined applications, as suggested by the commenter.

With respect to the commenter's suggestion to raise per-seat funding caps, no revisions to these final priorities, requirements, definitions, or selection criteria are necessary for the Department to change per-seat funding caps for CMO grants in a given year. Under 34 CFR 75.101 and 75.104(b), the Secretary may establish maximum funding amounts for grants by publishing a notice in the **Federal Register**. When establishing funding limits under a CMO grant competition for a given fiscal year, the Department considers a number of factors, including the availability of funds.

We also note that section 4303 of the ESEA authorizes the CSP Grants to State Entities (State Entities) program, under which the Department awards grants to State entities, and State entities, in turn, award subgrants to eligible applicants (*i.e.,* charter school developers and charter schools) to enable such eligible applicants to open and prepare for the operation of new charter schools and replicated high-quality charter schools, and to expand high-quality charter schools. The ESEA does not explicitly prohibit an entity that qualifies as a CMO and an eligible applicant from applying for both a CMO grant under section 4305(b) and a subgrant under section 4303(b). In order to receive funds under both programs, however, the CMO must propose to carry out different activities under each application and demonstrate that it has the resources and capability to administer multiple projects effectively and efficiently.

Finally, we agree that students learn best in safe, clean, and well-maintained environments. Section 4303(h)(3) of the ESEA authorizes the use of CSP funds to ''[carry] out necessary renovations to ensure that a new school building complies with applicable statutes and regulations, and minor facilities repairs (excluding construction)'' (20 U.S.C. 7221b(h)(3)).[4] We believe this provision affords CMO grantees the flexibility they need to ensure that the charter schools they manage occupy buildings and facilities that are safe, clean, and well-maintained. For examples of the types of repairs that could qualify as ''minor facilities repairs'' under section 4305(c), please see the Department's nonregulatory guidance entitled, ''Charter Schools Program New Flexibilities under the Every Student Succeeds Act (ESSA): Frequently Asked Questions.'' [5]

Changes: None.

Comments: One commenter suggested that we add a priority for CMOs that propose to replicate or expand high-quality charter schools that focus on dropout recovery and academic re-entry in order to maintain consistency with the authorizing statute.

Discussion: We agree that these final priorities, requirements, definitions, and selection criteria should align with the ESEA and believe that they do. Section 4305(b)(5)(D) of the ESEA authorizes the Secretary to give priority to applicants that ''propose to operate or manage high-quality charter schools that focus on dropout recovery and academic re-entry.'' We believe this statutory language is clear. Like the other statutory priorities as well as the priorities established under this NFP, the Secretary may choose to apply the statutory priority for dropout recovery and academic re-entry charter schools under a CMO grant competition in FY 2019 and future years. Accordingly, we decline to add a priority for CMOs that propose to replicate or expand high-quality charter schools that focus on dropout recovery and academic re-entry.

Changes: None.

Comments: Several commenters suggested that we designate specific priorities as absolute priorities or competitive preference priorities for competitions in FY 2019 and later years.

Discussion: Federal regulations at 34 CFR 75.105 authorize the Department to establish annual priorities and to designate the priorities as invitational, competitive preference, or absolute. Therefore, we do not need to revise the final priorities in order to designate them as absolute or competitive preference priorities for competitions in FY 2019 and in later years. In accordance with 34 CFR 75.105(c), we will designate specific priorities as invitational, absolute or competitive preference priorities for the FY 2019 competition, and competitions in later years, through a notice inviting applications (NIA) in the **Federal Register**.

Changes: None.

Priority 1—Promoting Diversity

Comments: Several commenters expressed support for a priority that encourages diverse student populations. One commenter recommended that we follow a specific methodology for assessing whether applicants meet the priority. Several commenters questioned whether an applicant could meet this priority and *Priority 4—Low-Income Demographic,* stating that it may be difficult for a school focused on socioeconomic diversity to maintain a high percentage of students who are *individuals from low-income families.* Some commenters recommended that the Department expand the scope of the priority to include students with disabilities, in addition to students from racially and socioeconomically diverse backgrounds. Finally, two commenters expressed concern about the priority's effect on communities and school districts more broadly. Specifically, one commenter argued that providing incentives for CMOs that propose to replicate or expand charter schools with diverse student bodies is unlikely to be

[4] Under section 4305(c) of the ESEA, ''the same terms and conditions'' that apply to State Entity grants under section 4303 apply to CMO grants.

[5] See *https://innovation.ed.gov/files/2017/12/CSP-ESSA-Flexibilities-FAQ-2017.pdf.*

successful because students typically attend schools in or near their neighborhoods, and neighborhoods, particularly in cities, tend to be segregated due to decades of deeply rooted societal forces, including racially motivated housing practices and school assignments. Another commenter suggested that we revise the priority to require that any efforts to replicate or expand high-quality charter schools with an intentional focus on diversity yield ''zero net effect'' on the demographics of the schools from which the students are recruited.

Discussion: We believe that students can benefit from attending high-quality charter schools with racially and socioeconomically diverse student bodies. We agree that following a rubric, or methodology, for determining whether an applicant meets the priority can be useful. We will determine an appropriate method for reviewing applications addressing this priority in the NIA for a given competition.

We agree with the commenters that some aspects of *Priority 1—Promoting Diversity* could potentially conflict with certain subparts of *Priority 4—Low-Income Demographic* and, as such, it may be challenging for a CMO grant application to meet both priorities. The Department has flexibility in choosing priorities, requirements, and selection criteria for its grant competitions. In FY 2019 and in future years, we will select a combination of priorities, requirements, and selection criteria that is appropriate for the CMO program and aligned with the Secretary's policy objectives.

In addition, we share the commenters' concerns about ensuring that students with disabilities receive FAPE. However, this priority focuses specifically on diversity with respect to race and socioeconomic status. Race and socioeconomic status are commonly cited in research on diversity and its relationship with student academic achievement as two demographic factors that have a major impact.[6] Further, we believe it is important that the final priority aligns with the statutory priority for this program in ESEA section 4305(b)(5)(A), which focuses on replicating or expanding *high-quality charter schools* with racially and socioeconomically diverse student bodies.

We agree with the commenter that cultivating and maintaining a diverse student body can be difficult and is unlikely to happen overnight. We also agree that high-quality charter schools can be a powerful option for *educationally disadvantaged students* but that many factors, such as safe and reliable transportation to and from school, can impact a family's realistic educational choices. This priority focuses on applicants that propose to replicate or expand high-quality charter schools with an intentional focus on racial and socioeconomic diversity, but it does not dictate how a CMO should approach this work. Promising practices for promoting diversity continue to emerge, and charter schools have great flexibility to choose an educational program that attracts students from diverse backgrounds and geographic areas outside of the immediate area surrounding the school. The intent of this priority is to encourage CMOs to replicate or expand high-quality charter schools with purposefully diverse student bodies through strategies that comply with non-discrimination requirements in the U.S. Constitution and in Federal civil rights laws, make sense for their local contexts, and are aligned with reliable research on the relationship between academic achievement and racial and socioeconomic diversity in schools.

Finally, we agree with the commenter that CMOs should consider the community context when replicating or expanding high-quality charter schools, particularly charter schools with an intentional focus on racial and socioeconomically diverse student bodies. However, we do not think it is appropriate or practical to require that CMOs demonstrate to the Department a net zero effect on surrounding schools. For these reasons, we decline to revise the priority.

Changes: None.

Comment: None.

Discussion: Upon further review, we determined that it is critical to remind applicants addressing Priority 1 of their nondiscrimination obligations under Federal law. As such, we are revising the priority to clarify that proposed projects must be consistent with nondiscrimination requirements contained in the U.S. Constitution and Federal civil rights laws.

Changes: We have added the phrase ''consistent with nondiscrimination requirements contained in the U.S. Constitution and Federal civil rights laws'' to the priority.

Priority 2—Reopening Academically Poor-Performing Public Schools as Charter Schools

Comments: Several commenters expressed support for this priority. One commenter asked that we revise the priority to encourage applications from CMOs that can share best practices for turning around low-performing traditional public schools. Two commenters requested that we clarify whether an applicant could address the priority by proposing to open a new charter school, rather than to reopen an *academically poor-performing public school* as a charter school. One commenter suggested that we focus the priority on reopening academically poor-performing middle and high schools as charter schools.

Discussion: We agree with the commenters that the purpose of this priority—to ''reopen'' academically poor-performing charter schools—could be clearer. An applicant proposing only to open new charter schools, and not ''reopen'' an *academically poor-performing public school* as a charter school, would not meet this specific priority (but could meet other priorities established in this NFP). Therefore, in order to clarify the purpose of this priority, we are replacing the term ''restart'' with ''reopen.'' In addition, we agree that starting a new school is an important endeavor, and note that opening new high-quality charter schools is a key element of the CSP. We also believe that charter schools can play an important role in helping to improve academic outcomes for students in low-performing public schools. Therefore, this priority is specifically focused on CMOs that propose to reopen *academically poor-performing public schools* as charter schools.

We also agree that applicants should be required to demonstrate past success working with low-achieving public schools in order to meet the priority. Accordingly, we are revising the stem of the priority to require applicants to address each subpart of the priority, including the subpart focused on demonstrating past success working with at least one *academically poor-performing public school* or schools that were designated as persistently lowest-achieving schools or priority schools under the School Improvement Grant program or ESEA flexibility. Under this standard, an applicant can share best practices working with traditional public schools as well as nontraditional public schools, such as public charter schools.

Finally, we agree that a focus on middle schools and high schools may be appropriate in specific contexts, and have included a priority for applications that propose to replicate or expand high-quality charter schools that serve high school students. Under this priority, an applicant can propose to

[6] *See, e.g.:* The Century Foundation (2018). *Diverse by Design Charter Schools. https://tcf.org/content/report/diverse-design-charter-schools/.*

reopen an academically poor-performing middle school or high school as a charter school as it sees fit. Therefore, we decline to revise the priority to focus on reopening academically poor-performing middle schools and high schools.

Changes: We have revised the priority to replace the term ''restart'' with ''reopen.'' In addition, we have revised the stem of the priority so that all subparts must be addressed in order for an applicant to meet the priority.

Comments: Several commenters opined that there is a disproportionately high percentage of students with disabilities in turnaround schools and suggested that we require CMOs proposing to reopen *academically poor-performing public schools* as charter schools to address the issue.

Discussion: A major goal of these priorities, requirements, definitions, and selection criteria is to expand high-quality educational opportunities for *educationally disadvantaged students,* including students with disabilities. CMO grantees, and the charter schools they manage, must comply with applicable laws, including Part B of the IDEA, Section 504, and Title II of the ADA. Further, to meet the priority, an applicant must propose a strategy that targets a student population that is demographically similar to that of the *academically poor-performing public school.* Therefore, we decline to revise this priority in the manner suggested by the commenter.

Changes: None.

Comments: Several commenters requested that the Department clarify its policy regarding admissions lotteries, including how a CMO might use a weighted lottery to address this priority. One commenter urged the Department to ensure that any grantee using a weighted lottery meet all relevant statutory requirements, and another commenter suggested that we ensure that any weighted lotteries are designed to enroll students with disabilities in proportion to the enrollment of such students in neighboring schools. Several commenters suggested that the Department update its nonregulatory guidance to clarify that CMOs that are reopening *academically poor-performing public schools* as charter schools could exempt from admissions lotteries students who are enrolled in the *academically poor-performing public school* at the time it is reopened.

Discussion: Under section 4303(c)(3) of the ESEA, charter schools receiving funds under a CMO grant generally may use ''a weighted lottery to give slightly better chances for admission to all, or a subset of, educationally disadvantaged students,'' so long as weighted lotteries in favor of such students are not prohibited under State law and are not used to create schools that would serve a particular group of students exclusively.[7] Therefore, a charter school could use a weighted lottery for the purpose of enrolling a proportionate number of students with disabilities in the charter school as compared to the number of such students enrolled in neighboring schools. As such, the Department declines to expand the statutory requirements for weighted lotteries as they apply to CMO grants.

Further, the Department's most recent update to the CSP nonregulatory guidance was issued in January 2014.[8] Although that guidance was issued prior to enactment of the ESSA, much of it is applicable to the CSP lottery requirement in section 4310(2)(H) of the ESEA. Specifically, the January 2014 CSP Nonregulatory Guidance identifies several categories of students who may be exempted from a charter school's lottery, including students who are enrolled in a public school at the time it is converted into a charter school. The Department may update this guidance to address changes to the CSP made by the ESSA. In the meantime, CMO grantees may continue to follow the guidelines in the January 2014 CSP Nonregulatory Guidance regarding the categories of students who may be exempted from the lottery requirement.

Changes: None.

Comments: One commenter recommended that we use Priority 2 cautiously because available research on charter school performance is mixed.

Discussion: We agree that, where possible, Federal funding should be used primarily to support strategies that are based on research. To meet this priority, applicants would need to demonstrate past success working with *academically poor-performing public schools.* In addition, all applicants, regardless of whether they address this priority, must disclose compliance issues, provide a logic model for how they will replicate or expand high-quality charter schools, and describe how they currently operate or manage high-quality charter schools. This program specifically supports the replication and expansion of high-quality charter schools, and the final priorities, requirements, definitions, and selection criteria are designed to differentiate between high-quality applications that are likely to be successful and low-quality applications that have little chance of succeeding.

Changes: None.

Comment: None.

Discussion: Upon further review, we determined that it is critical to remind applicants addressing Priority 2 of their nondiscrimination obligations under Federal law. As such, we are revising the priority to clarify that proposed projects must be consistent with nondiscrimination requirements contained in the U.S. Constitution and Federal civil rights laws.

Changes: We have added the phrase ''consistent with nondiscrimination requirements contained in the U.S. Constitution and Federal civil rights laws'' to the priority.

Priority 3—High School Students

Comments: Several commenters expressed support for the priority but asked that we revise it to require applicants to demonstrate that their proposed strategy for replicating or expanding high-quality charter high schools is evidence-based. One commenter also suggested that applicants be required to provide data on former students' postsecondary degree attainment and employment. Conversely, another commenter suggested we use this priority cautiously due to a lack of research on charter high schools.

Discussion: We agree that using research to inform CMO grant proposals is useful in certain contexts, but we also understand that research in this area is limited. The Department's regulations at 34 CFR 75.226 specifically authorize the Secretary to give priority to applications that are supported by ''evidence.'' The Department may choose to implement such a priority under the CMO grant competition in a given year.

Likewise, we agree that obtaining data on students' postsecondary degree attainment and employment may be relevant and encourage applicants to submit such information, as appropriate. On the other hand, the Department must balance its interest in obtaining sufficient information to assist peer reviewers in evaluating the quality of applications with its interest in minimizing the burden on applicants. In order to meet the priority, an applicant must describe how it will prepare students for postsecondary education and provide support for its graduates who enroll in institutions of higher education (IHEs) and certain one-year training programs that prepare students for gainful employment in a recognized occupation. In addition, applicants must establish one or more project-specific

[7] As stated above, under section 4305(c) of the ESEA, CMO grantees generally are subject to the same terms and conditions as State entity grantees funded under section 4303.

[8] See *http://www2.ed.gov/programs/charter/fy14cspnonregguidance.doc.*

performance measures that will provide reliable information about the grantee's progress in meeting the objectives of the project. We believe these requirements will generate the necessary information to enable peer reviewers to evaluate the quality of applications without placing an undue burden on applicants. For these reasons, we decline to revise the priority in the manner suggested by the commenters.

Changes: None.

Comments: Several commenters suggested that we broaden the priority to focus on high schools that prepare students for paths to career and technical training and military service, as well as enrollment in two- and four-year colleges and universities. Several other commenters suggested that we revise the priority to encompass high schools that focus on transitional programming for students with disabilities.

Discussion: We agree that sending students to two- or four-year colleges and universities is not the only measure of a charter high school's success and that, for some students, getting a job or attending technical school may be the best option immediately after high school. Accordingly, we are revising subparts (ii) and (iii) of the priority to encompass a broader range of postsecondary education, training, and career options. Specifically, for this priority, postsecondary education institutions include both IHEs and educational institutions that offer one-year training programs that prepare students for gainful employment in a recognized occupation (as described in section 101(b)(1) of the Higher Education Act of 1965, as amended (HEA)). For clarity, we are also defining ''IHE'' in this NFP. The definition we are adding to the NFP is the same as the definition of ''IHE'' in section 8101(29) of the ESEA.

Further, while a career in the military can be very rewarding, the Department's mission is to promote student academic achievement and preparation for global competitiveness by fostering educational excellence and ensuring equal access. Therefore, we believe the primary goal of elementary and secondary education should be preparing students for success at the postsecondary education level. Nevertheless, charter schools have great flexibility to establish a unique mission and educational focus. Thus, an applicant may propose to replicate or expand charter schools with a wide range of educational programs, including a military (*i.e.,* Reserve Officers' Training Corps (ROTC)) focus, so long as the charter school meets the definition of ''high-quality charter school'' in section 4310(8) of the ESEA and the terms of its charter. Our ultimate focus remains on ensuring that students graduate from high school prepared to succeed in a wide variety of postsecondary education options.

We also agree with the commenters that ensuring that students with disabilities (as well as other *educationally disadvantaged students*) graduate from high school with adequate preparation for postsecondary education options is paramount. Therefore, we are revising the priority to include specific references to *educationally disadvantaged students* where appropriate. Also, as stated above, eligible students with disabilities attending public charter schools and their parents retain their right to receive FAPE, and the IDEA requirements for transition services apply beginning with the first individualized education plan (IEP) to be in effect when the student turns 16, or younger if determined appropriate by the IEP team.[9] Further, in order to be considered a high-quality charter school (a key aspect of this program), a charter school that serves high school students must have demonstrated success in increasing student academic achievement and graduation rates, and must provide that information disaggregated by subgroups of students defined in section 1111(c)(2) of the ESEA, which includes children with disabilities, as defined in the IDEA. Therefore, while we are revising the priority to include specific references to *educationally disadvantaged students,* we decline to revise the priority to include a specific focus on high schools that provide transitional programming (*i.e.,* preparation for specific postsecondary education options) for students with disabilities.

Changes: We have revised *Priority 3—High School Students* to include specific references to *educationally disadvantaged students* and to clarify that the priority applies to high-quality charter schools that prepare high school students to attend IHEs, which generally consist of two- and four-year colleges and universities, as well as certain postsecondary education institutions that offer one-year training programs. We have also added a definition for ''IHE;'' this change is discussed later in this notice.

Priority 4—Low-Income Demographic

Comments: Several commenters expressed support for the priority but requested that we revise it to support only CMOs that can demonstrate that at least 60 percent of the students across all of the charter schools they operate or manage are *individuals from low-income families.* One commenter stated that the vast majority of CMOs operate schools with at least 60 percent students who are *individuals from low-income families,* so this priority would not meaningfully differentiate applicants. Another commenter suggested that we keep the priority's original structure but revise it to support CMOs that can demonstrate that 60 to 90 percent, instead of 40 to 60 percent, of the students across all of the charter schools that they operate or manage are *individuals from low-income families.*

Discussion: We believe that this priority is essential to provide incentives for CMOs to support charter schools that serve student populations with the most need. As written, the priority affords the Secretary discretion to establish a poverty threshold of 40 percent, 50 percent, or 60 percent *individuals from low-income families* under the CMO grant competition in a given fiscal year. We believe that 40 percent is an appropriate lower bound for this priority because it is aligned with the poverty threshold a Title I school generally must meet in order to operate a schoolwide program under section 1114 of the ESEA. For this reason, we decline to revise the priority to establish only one poverty threshold of 60 percent *individuals from low-income families.*

We also decline to revise the priority to require that CMOs operate or manage charter schools with 60 to 90 percent students who are *individuals from low-income families* since, as stated above, the priority could potentially conflict with *Priority 1—Promoting Diversity* in a single competition. We recognize that many CMOs focus their efforts in high-need communities, but we believe it is also important to support high-quality charter schools that are designed with an intentional focus on racial and socioeconomic diversity. In any given year, we may include in an NIA one or more of these final priorities, requirements, definitions, and selection criteria individually or in combination with each other; therefore, we decline to revise the priority as suggested by the commenters.

Changes: None.

Comments: One commenter stated that applicants addressing this priority must demonstrate past success. The commenter also suggested that we revise the priority to encourage applicants to provide transportation and meal services to students.

[9] *See* 20 U.S.C. 1414(d)(1)(A)(i)(VIII) and 34 CFR 300.320(b); *see also* 20 U.S.C. 1401(34) and 34 CFR 300.43.

Discussion: While applicants' past performance is not an explicit focus of this priority, it is embedded in the program through the various application priorities, requirements, definitions, and selection criteria, including the *Quality of the Eligible Applicant* selection criterion. We also recognize that transportation and meals are important issues for charter schools that serve large numbers of low-income students. While CSP funds may be used to provide transportation and ''healthy snacks'' for students in limited circumstances, a number of other Federal, State, and local programs (such as the United States Department of Agriculture's National School Lunch Program) provide resources specifically for those purposes. For this reason, we decline to revise the priority to encourage applicants to provide transportation and meal services to students.

Changes: None.

Comments: One commenter asked that we expand the priority to focus on other high-need populations, such as students with disabilities and English learners.

Discussion: Many aspects of the CMO grant program and these priorities, requirements, definitions, and selection criteria focus on *educationally disadvantaged students,* which include students with disabilities and English learners. In addition, we are revising some selection factors under the *Contribution in Assisting Educationally Disadvantaged Students* criterion to include specific references to students with disabilities and English learners. Further, the Supplemental Priorities, which may be used under the CMO grant program, include several priorities (*e.g.,* Priority 1(b)(ii) and (iii) and Priority 5) that focus on students with disabilities and English learners. Therefore, we decline to revise this priority to focus on other high-need groups, such as students with disabilities or English learners.

Changes: None.

Comments: One commenter requested that we clarify how the priority would work as a competitive preference priority in a competition. Specifically, the commenter asked us to clarify whether points would be awarded on a sliding scale (*e.g.,* one point for an applicant that can demonstrate its schools have at least 40 percent students who are *individuals from low-income families,* two points for an applicant that can demonstrate its schools have at least 50 percent students who are *individuals from low-income families,* and three points for an applicant that can demonstrate its schools have at least 60 percent students who are *individuals from low-income families*). The commenter expressed concern that an applicant could receive the maximum number of priority points for a higher poverty threshold, but only be required to maintain the minimum threshold throughout its grant project. The commenter also expressed concern that the focus of the priority is on all schools operated or managed by the CMO, and not only on the charter schools to be replicated or expanded as part of the grant project.

Discussion: While the priority is written in a manner that gives the Department flexibility to apply one, two, or all three poverty standards in a single competition, we do not anticipate applying more than one poverty standard in a single competition or assigning points on a sliding scale.

We agree with the commenter that an applicant receiving points for this priority should be required to maintain the same, or a substantially similar, poverty threshold throughout the life of the grant. As such, we are revising the priority to clarify that an applicant must demonstrate not only that its current portfolio of schools meets the specified poverty threshold, but also that it will maintain the same, or a substantially similar, poverty level in the charter schools that it replicates or expands, as well as its other schools, for the entire grant period. We recognize that the percentage of students who are *individuals from low-income families* may fluctuate on an annual basis and, for this reason, believe the priority should focus on all schools operated by a CMO and not just the charter schools to be replicated or expanded as part of the grant project.

Changes: We have added a requirement that applicants demonstrate that they will maintain for the entire grant period a poverty threshold across the schools they operate or manage that is the same as, or substantially similar to, the poverty level proposed in the grant application.

Priority 5—Number of Charter Schools Operated or Managed by the Eligible Applicant

Comments: Several commenters suggested that we use the priority sparingly or remove it altogether. One commenter noted that the size of a CMO does not directly correlate to the quality of its schools, and another cited recent research suggesting that CMO size should not be used as a proxy for other characteristics. Other commenters expressed concern that the priority would dilute the quality of funded applications because it would create several smaller competitions for CMO grants. One commenter questioned the purpose of the priority, noting that if the intent is to support smaller, less-established CMOs, we may get better results using the priority for novice applicants in 34 CFR 75.225.

Discussion: We agree that size is not necessarily positively correlated with quality. We note, however, that the Department can employ several mechanisms, established in the ESEA and these final priorities, requirements, definitions, and selection criteria, to assess the quality of an applicant and its proposal. This priority, by itself, is not intended to assess quality with respect to the size of the applicant. Rather, this priority is designed primarily to enable the Secretary to give a competitive advantage to small, medium, or large CMOs in a given year based on the Department's policy objectives for that year. We understand the concern that this priority could be used to create smaller sub-competitions that would decrease the amount of available funds for other CMOs. In any year in which we announce a competition, we will select a combination of priorities, requirements, and selection criteria that meet the requirements of the CMO grant program and is aligned with the Secretary's policy objectives.

Finally, we agree that 34 CFR 75.225 provides a useful tool for encouraging applications from novice applicants. The Department will continue to follow the requirements in 34 CFR 75.225 to give priority to novice applicants in future CMO grant competitions, as we deem appropriate.

Changes: None.

Priority 6—Rural Community

Comments: Several commenters expressed support for the priority but questioned whether an applicant could meet the priority by proposing to replicate or expand schools in a combination of *rural communities* and other communities.

Discussion: As written, this priority gives the Department flexibility to establish an absolute or competitive preference priority for applications that propose to replicate or expand one or more high-quality charter schools in a *rural community* or one or more high-quality charter schools in a non-rural community. To meet the priority, an applicant would need to propose to replicate or expand at least one high-quality charter school in a *rural community* or at least one high-quality charter school in a non-rural community, depending on the Department's policy objectives in a given year and which prong of the

priority the applicant is addressing. The priority language does not preclude an applicant from also proposing to replicate or expand high-quality charter schools in other communities. We believe the priority is clear and, therefore, decline to revise it.

Changes: None.

Comments: One commenter asked that we revise the priority to focus on opening new charter schools in rural areas. Conversely, another commenter raised concerns that new charter schools in rural areas would drain resources from traditional public schools.

Discussion: The purpose of the CMO grant program is to replicate or expand high-quality charter schools. Although replicated charter schools are based on educational models at existing high-quality charter schools, for all practical purposes, they are new charter schools. Further, in light of the unique challenges faced by *rural communities,* we believe prospective applicants for CMO grants should have the flexibility to design their projects in a way that meets the specific needs of the communities they plan to serve, including determining whether a particular *rural community* would be best served by creating a new, or replicated, charter school or by expanding an existing charter school.

In addition, we recognize that replicating or expanding high-quality charter schools will impact the surrounding community and is likely to have a greater impact in a rural community. The Department's broad focus is on expanding high-quality educational options for all students, including students in rural communities. Ideally, increasing access to high-quality educational options in *rural communities* will help improve student academic achievement not only in charter schools, but also in traditional public schools in the community. For these reasons, we decline to revise the priority.

Changes: None.

Priority 7—Replicating or Expanding High-Quality Charter Schools To Serve Native American Students

Comments: Several commenters urged the Department to add a priority that would support Indian students by encouraging CMOs to replicate or expand dual language immersion schools that focus primarily on Indian languages. Another commenter suggested that the Department consider a CMO's ability to meaningfully engage with Tribal communities when making CMO grant decisions.

Discussion: As discussed in the ''Definitions'' section below, we have replaced the term ''students who are Indians'' with the term ''*Native American* students'' in this priority. These changes allow applicants to receive priority points for proposing to replicate or expand high-quality charter schools that serve Native Hawaiian and Native American Pacific Islander students, as well as students who are Indians (including Alaska Natives). We agree with the commenters that cultivating strong relationships with the communities to be served is crucial, and that focusing on *Native American language* immersion is a promising strategy for building and maintaining those relationships and improving academic outcomes for *Native American* students. To meet this priority, an applicant must propose to replicate or expand a high-quality charter school that will meet the unique needs of *Native American* students. The applicant may employ various strategies that reflect and preserve *Native American language,* culture, and history, including a ''dual language immersion'' program that focuses on *Native American languages.* Thus, an applicant proposing to replicate or expand a high-quality charter school with a dual language immersion program that focuses on *Native American languages* could meet this priority.

In addition, while we believe that a requirement for applicants to demonstrate a commitment to meaningfully collaborate with Tribal communities would result in actual collaborations, we agree that the language in the priority could be clearer with respect to requiring applicants to meaningfully engage with Tribal communities. Therefore, we are revising the priority to clarify that applicants must do more than demonstrate a commitment to collaborate.

Changes: We have revised the priority to replace the phrase ''demonstrate a commitment to meaningfully collaborate'' with ''meaningfully collaborate.''

Comments: One commenter expressed support for the priority but suggested that we revise it to require applicants to submit a resolution or official document, rather than a letter, from surrounding *Indian Tribes* or *Indian organizations* that demonstrates their support for the proposed project. The commenter also suggested that we clarify our expectations for the composition of the board for a charter school to be replicated or expanded under the grant, and suggested that we require the board to have a percentage of *Indian Tribe* or *Indian organization* members that is comparable to the percentage of *Native American* students enrolled in the school. Finally, the commenter suggested that we revise the priority to require that applicants demonstrate a record of success in Tribal communities, particularly for applicants proposing to replicate or expand virtual charter schools.

Discussion: We agree that a CMO with strong support from surrounding *Indian Tribes* or *Indian organizations* is more likely to succeed in replicating or expanding high-quality charter schools that serve a *high proportion* of *Native American* students. Accordingly, in order to meet this priority, the applicant must submit a letter of support from an *Indian Tribe* or *Indian organization* located in the area to be served by the charter school. While a resolution is not required, an applicant is not precluded from submitting a resolution, or other official document, to demonstrate support.

Likewise, we believe that charter school developers and charter schools in the communities where the charter school will be located are best suited to assemble a school board that understands the unique educational needs of the students to be served. We believe that requiring a specific percentage or number of board members from *Indian Tribes* or *Indian organizations* could limit the ability of applicants to fully respond to the needs of the communities they propose to serve. In order to meet the priority, however, CMOs will need to collaborate with an Indian Tribe or Indian organization in the communities in which they propose to replicate or expand high-quality charter schools to ensure that school boards represent their students appropriately. While a school board with a percentage of members of *Indian Tribes* or *Indian organizations* that is comparable to the percentage of *Native American* students to be served could satisfy the substantial percentage requirement in this priority, there may be circumstances where a smaller or larger percentage of members from an Indian Tribe or Indian organization is appropriate. For these reasons, we decline to revise the priority as suggested by the commenter.

Finally, while an applicant is not precluded from demonstrating past success working with Tribal communities, we decline to revise the priority to impose such a requirement. In order to receive CMO funds, all applicants must describe how they operate or manage the charter schools (including virtual charter schools) for which they have presented evidence of success (*see* Requirement (e)). We believe that *Indian Tribes* and *Indian*

organizations located in the community to be served by the replicated or expanded charter school are in the best position to determine whether a particular CMO applicant has the requisite knowledge and experience to serve *Native American* students effectively. Therefore, the requirements that an applicant obtain a letter of support from, and meaningfully collaborate with, a local *Indian Tribe* or *Indian organization* should prevent CMOs that lack the knowledge and experience necessary to serve Tribal communities successfully from meeting the priority. For these reasons, we decline to revise the priority in the manner suggested by the commenter.

Changes: None.

Comment: None.

Discussion: Upon further review, we determined that it is critical to remind applicants addressing Priority 7 of their nondiscrimination obligations under Federal law. As such, we are revising the priority to clarify that proposed projects must be consistent with nondiscrimination requirements contained in the U.S. Constitution and Federal civil rights laws.

Changes: We have added the phrase ''consistent with nondiscrimination requirements contained in the U.S. Constitution and Federal civil rights laws'' to the priority.

Requirements

Comments: A few commenters requested that we clarify which requirements we would include in future CMO grant competitions. One commenter also requested that we clarify which requirements represent existing obligations under Federal law.

Discussion: As a general matter, the CSP statute prescribes the priorities, requirements, definitions, and selection criteria that apply to all CMO grants, regardless of the fiscal year in which the grant is awarded. In addition, the Department's regulations at 34 CFR part 75 prescribe the procedures the Department must follow when awarding and administering discretionary grants. The main purposes of these final priorities, requirements, definitions, and selection criteria are to clarify the Department's interpretation of certain statutory requirements and to establish other priorities, requirements, definitions, and selection criteria consistent with congressional intent. The Department generally has discretion to choose specific priorities, requirements, definitions, and selection criteria to apply to CMO grants in a given year based on the Department's policy objectives for that year. All of the requirements in this NFP are aligned with existing requirements for CMO grants under the ESEA and the Department's regulations.

Changes: None.

Comments: One commenter suggested that we require applicants to disclose whether any charter schools in their network meet the definition of ''*academically poor-performing public school.*'' The commenter also suggested that we differentiate between ''schools'' and ''campuses'' because States vary in how they define the two terms.

Discussion: We agree that knowing whether an applicant has ''*academically poor-performing public schools*'' in its network could give the Department an indication of the overall quality of the CMO's charter schools. On the other hand, there are many reasons why a charter school may qualify as an *academically poor-performing public school* and, ultimately, the existence of one or more *academically poor-performing public schools* in a CMO's network is not necessarily dispositive proof that the CMO is unable to administer a CMO grant effectively and efficiently. For example, it would not be unusual for an applicant that has reopened one or more low-achieving public schools to have an *academically poor-performing public school* in its network. Under Requirement (e), any CMO that receives a grant must provide evidence of success, regardless of whether the CMO has operated or managed *academically poor-performing public schools.*

In addition, Requirement (a) provides that applicants must demonstrate that they operate more than one charter school. Requirement (a) clearly states that, for purposes of the CMO grant program, multiple charter schools are considered to be separate schools if each school meets the definition of ''charter school'' in section 4310(2) of the ESEA and is treated as a separate school by its authorized public chartering agency and the State in which the charter school is located, including for purposes of accountability and reporting under Title I, Part A of the ESEA. For these reasons, we decline to revise the priority as suggested by the commenter.

Changes: None.

Definitions

Comments: Several commenters requested that we clarify the definition of ''*high proportion,*'' as that term is used in Priority 7. One commenter provided data suggesting that the definition of ''*high proportion*'' may not be ambitious enough. Conversely, one commenter suggested that we define ''*high proportion*'' as 25 percent students who are Indians, consistent with one of the requirements in section 6112 of the ESEA.

Discussion: As discussed above, we are revising *Priority 7—Replicating or Expanding High-Quality Charter Schools to Serve Native American Students* to replace ''students who are Indians'' with ''*Native American* students.'' As written, the priority gives applicants an opportunity to explain why the number of *Native American* students it proposes to serve constitutes a ''*high proportion,*'' based on the specific circumstances and context of the community in which the charter school is or will be located. For this reason, we decline to require charter schools to serve a specific percentage of *Native American* students, such as 25 percent, in order to meet the priority.

We appreciate that some data may suggest that many charter schools have student bodies comprised of 75 percent or more *Native American* students. Such schools would generally meet the definition of *high proportion* established in this document. On the other hand, if an applicant proposes to replicate or expand a charter school that has less than a majority of *Native American* students but provides a compelling rationale for why the school should be considered to have a *high proportion* of *Native American* students, we may consider the applicant to have met the standard. Applicants addressing Priority 7 must, among other things, meaningfully collaborate with *Indian Tribes* or *Indian organizations* and must replicate or expand high-quality charter schools that have an academic program purposely designed to meet the unique needs of *Native American* students. We believe that all of the components of Priority 7, including the definition of ''*high proportion,*'' set an appropriately rigorous bar for CMO applicants while also affording some flexibility. Therefore, we decline to revise the definition of *high proportion* as suggested by the commenters.

Changes: None.

Comments: A few commenters suggested that we revise the definition of ''Indian'' to include Native Hawaiians.

Discussion: We agree that Native Hawaiian students have many of the same unique educational needs as students who are Indians. We also believe that students who are Native American Pacific Islanders have similar educational needs. Therefore, as stated above, we are replacing the terms ''Indian'' and ''Indian language,'' respectively, with ''*Native American*'' and ''*Native American language*'' throughout the final priorities, requirements, definitions, and selection criteria. Likewise, we are removing the definition of the term ''Indian'' and

adding definitions for ''*Native American*'' and ''*Native American language,*'' based on the definitions for those terms in section 8101(34) of the ESEA.[10] The ESEA definition of ''*Native American*'' explicitly includes Indians (including Alaska Natives), Native Hawaiians, and Native American Pacific Islanders.

Changes: We have removed the definition of ''Indian'' and added definitions for ''*Native American*'' and ''*Native American language.*''

Comments: One commenter suggested that we use the term ''Tribal organization'' instead of ''*Indian organization*'' because ''Tribal organization'' is the term used in the ESEA.

Discussion: While the term ''Tribal organization'' is used under several ESEA programs, the term is not defined in section 8101 of the ESEA, which provides general definitions that apply to programs authorized under the ESEA. The term ''*Indian organization*'' is used in the authorizing statute for the Department's Indian Education program (20 U.S.C. 7401–7492) and defined in the Department's regulations implementing the Indian Education program at 34 CFR 263.20. We think it is important to maintain consistency with the Indian Education program.

Changes: None.

Selection Criteria

Comments: One commenter suggested that we revise *Selection Criterion (b)—Contribution in assisting educationally disadvantaged students* to enable the Department to assess better the extent to which an applicant would effectively support students with disabilities. Specifically, the commenter suggested that we add a selection factor focused on attendance rates and outcomes for *educationally disadvantaged students,* including students with disabilities and English learners, and revise the existing selection factors to focus on effective instructional strategies for *educationally disadvantaged students.*

Discussion: Two major purposes of the CSP are to expand educational opportunities for *educationally disadvantaged students* and to assist such students in meeting State academic content and performance standards. As written in the NPP, this selection criterion would enable the Department to evaluate the quality of an application with respect to achieving these two objectives. While *educationally disadvantaged students* include students with disabilities, we agree with the commenter that an emphasis should be placed on students with disabilities and English learners because enrollment of such students in charter schools tends to be lower than enrollment of such students in neighboring traditional public schools. Therefore, we are revising the selection criterion to emphasize students with disabilities and English learners.

Changes: We have revised two selection factors in Selection Criterion (b) to sharpen the criterion's focus on serving *educationally disadvantaged students.* We also have revised the title of the criterion to clarify the focus on the significance of the contribution in assisting educationally disadvantaged students.

Final Priorities

Priority 1—Promoting Diversity

Under this priority, applicants must propose to replicate or expand high-quality charter schools that have an intentional focus on recruiting students from racially and socioeconomically diverse backgrounds and maintaining racially and socioeconomically diverse student bodies in those charter schools, consistent with nondiscrimination requirements contained in the U.S. Constitution and Federal civil rights laws.

Priority 2—Reopening Academically Poor-Performing Public Schools as Charter Schools

Under this priority, applicants must—

(i) Demonstrate past success working with one or more *academically poor-performing public schools* or schools that previously were designated as persistently lowest-achieving schools or priority schools under the former School Improvement Grant program or in States that exercised ESEA flexibility, respectively, under the ESEA, as amended by the No Child Left Behind Act of 2001; and

(ii) Propose to use grant funds under this program to reopen one or more *academically poor-performing public schools* as charter schools during the project period by—

(A) Replicating one or more high-quality charter schools based on a successful charter school model for which the applicant has provided evidence of success; and

(B) Targeting a demographically similar student population in the replicated charter schools as was served by the *academically poor-performing public schools,* consistent with nondiscrimination requirements contained in the U.S. Constitution and Federal civil rights laws.

Priority 3—High School Students

Under this priority, applicants must propose to—

(i) Replicate or expand high-quality charter schools to serve high school students, including *educationally disadvantaged students;*

(ii) Prepare students, including *educationally disadvantaged students,* in those schools for enrollment in postsecondary education institutions through activities such as, but not limited to, accelerated learning programs (including Advanced Placement and International Baccalaureate courses and programs, dual or concurrent enrollment programs, and early college high schools), college counseling, career and technical education programs, career counseling, internships, work-based learning programs (such as apprenticeships), assisting students in the college admissions and financial aid application processes, and preparing students to take standardized college admissions tests;

(iii) Provide support for students, including *educationally disadvantaged students,* who graduate from those schools and enroll in postsecondary education institutions in persisting in, and attaining a degree or certificate from, such institutions, through activities such as, but not limited to, mentorships, ongoing assistance with the financial aid application process, and establishing or strengthening peer support systems for such students attending the same institution; and

(iv) Propose one or more project-specific performance measures, including aligned leading indicators or other interim milestones, that will provide valid and reliable information about the applicant's progress in preparing students, including *educationally disadvantaged students,* for enrollment in postsecondary education institutions and in supporting those students in persisting in and attaining a degree or certificate from such institutions. An applicant addressing this priority and receiving a CMO grant must provide data that are responsive to the measure(s), including performance targets, in its annual performance reports to the Department.

(v) For purposes of this priority, postsecondary education institutions include institutions of higher education, as defined in section 8101(29) of the Elementary and Secondary Education Act of 1965, as amended by the Every

[10] Section 8101(34) defines ''Native American'' and ''Native American language'' as having the same meaning given those terms in section 103 of the Native American Languages Act of 1990 (NALA). Under section 103, ''Native American'' includes Indians (including Alaska Natives), Native Hawaiians, and Native American Pacific Islanders.

Student Succeeds Act, and one-year training programs that meet the requirements of section 101(b)(1) of the HEA.

Priority 4—Low-Income Demographic

Under this priority, applicants must demonstrate one of the following—

(i) That at least 40 percent of the students across all of the charter schools the applicant operates or manages are *individuals from low-income families,* and that the applicant will maintain the same, or a substantially similar, percentage of such students across all of its charter schools during the grant period;

(ii) That at least 50 percent of the students across all of the charter schools the applicant operates or manages are *individuals from low-income families,* and that the applicant will maintain the same, or a substantially similar, percentage of such students across all of its charter schools during the grant period; or

(iii) That at least 60 percent of the students across all of the charter schools the applicant operates or manages are *individuals from low-income families,* and that the applicant will maintain the same, or a substantially similar, percentage of such students across all of its charter schools during the grant period.

Priority 5—Number of Charter Schools Operated or Managed by the Eligible Applicant

Under this priority, applicants must demonstrate one of the following—

(i) That they currently operate or manage two to five charter schools;

(ii) That they currently operate or manage six to 20 charter schools; or

(iii) That they currently operate or manage 21 or more charter schools.

Priority 6—Rural Community

Under this priority, applicants must propose to replicate or expand one or more high-quality charter schools in—

(i) A *rural community;* or

(ii) A community that is not a *rural community.*

Priority 7—Replicating or Expanding High-Quality Charter Schools To Serve Native American Students

Under this priority, applicants must—

(i) Propose to replicate or expand one or more high-quality charter schools that—

(A) Utilize targeted outreach and recruitment in order to serve a *high proportion* of *Native American* students, consistent with nondiscrimination requirements contained in the U.S. Constitution and Federal civil rights laws;

(B) Have a mission and focus that will address the unique educational needs of *Native American* students, such as through the use of instructional programs and teaching methods that reflect and preserve *Native American language,* culture, and history; and

(C) Have a governing board with a substantial percentage of members who are members of *Indian Tribes* or *Indian organizations* located within the area to be served by the replicated or expanded charter school;

(ii) Submit a letter of support from at least one *Indian Tribe* or *Indian organization* located within the area to be served by the replicated or expanded charter school; and

(iii) Meaningfully collaborate with the *Indian Tribe(s)* or *Indian organization(s)* from which the applicant has received a letter of support in a timely, active, and ongoing manner with respect to the development and implementation of the educational program at the charter school.

Types of Priorities

When inviting applications for a competition using one or more priorities, we designate the type of each priority as absolute, competitive preference, or invitational through a notice in the **Federal Register**. The effect of each type of priority follows:

Absolute priority: Under an absolute priority, we consider only applications that meet the priority (34 CFR 75.105(c)(3)).

Competitive preference priority: Under a competitive preference priority, we give competitive preference to an application by (1) awarding additional points, depending on the extent to which the application meets the priority (34 CFR 75.105(c)(2)(i)); or (2) selecting an application that meets the priority over an application of comparable merit that does not meet the priority (34 CFR 75.105(c)(2)(ii)).

Invitational priority: Under an invitational priority, we are particularly interested in applications that meet the priority. However, we do not give an application that meets the priority a preference over other applications (34 CFR 75.105(c)(1)).

Final Requirements

Applicants for funds under this program must meet one or more of the following requirements—

(a) Demonstrate that the applicant currently operates or manages more than one charter school. For purposes of this program, multiple charter schools are considered to be separate schools if each school—

(i) Meets each element of the definition of ''charter school'' under section 4310(2) of the ESEA; and

(ii) Is treated as a separate school by its authorized public chartering agency and the State in which the charter school is located, including for purposes of accountability and reporting under title I, part A of the ESEA.

(b) Provide information regarding any compliance issues, and how they were resolved, for any charter schools operated or managed by the applicant that have—

(i) Closed;

(ii) Had their charter(s) revoked due to problems with statutory or regulatory compliance, including compliance with sections 4310(2)(G) and (J) of the ESEA; or

(iii) Had their affiliation with the applicant revoked or terminated, including through voluntary disaffiliation.

(c) Provide a complete logic model (as defined in 34 CFR 77.1) for the grant project. The logic model must include the applicant's objectives for replicating or expanding one or more high-quality charter schools with funding under this program, including the number of high-quality charter schools the applicant proposes to replicate or expand.

(d) If the applicant currently operates, or is proposing to replicate or expand, a single-sex charter school or coeducational charter school that provides a single-sex class or extracurricular activity (collectively referred to as a ''single-sex educational program''), demonstrate that the existing or proposed single-sex educational program is in compliance with title IX of the Education Amendments of 1972 (20 U.S.C. 1681, *et seq.*) and its implementing regulations, including 34 CFR 106.34.

(e) Describe how the applicant currently operates or manages the high-quality charter schools for which it has presented evidence of success and how the proposed replicated or expanded charter schools will be operated or managed, including the legal relationship between the applicant and its schools. If a legal entity other than the applicant has entered or will enter into a performance contract with an authorized public chartering agency to operate or manage one or more of the applicant's schools, the applicant must also describe its relationship with that entity.

(f) Describe how the applicant will solicit and consider input from parents and other members of the community on the implementation and operation of each replicated or expanded charter

school, including in the area of school governance.

(g) Describe the lottery and enrollment procedures that will be used for each replicated or expanded charter school if more students apply for admission than can be accommodated, including how any proposed weighted lottery complies with section 4303(c)(3)(A) of the ESEA.

(h) Describe how the applicant will ensure that all eligible children with disabilities receive a free appropriate public education in accordance with part B of the IDEA.

(i) Describe how the proposed project will assist *educationally disadvantaged students* in mastering challenging State academic standards.

(j) Provide a budget narrative, aligned with the activities, target grant project outputs, and outcomes described in the logic model, that outlines how grant funds will be expended to carry out planned activities.

(k) Provide the applicant's most recent independently audited financial statements prepared in accordance with generally accepted accounting principles.

(l) Describe the applicant's policies and procedures to assist students enrolled in a charter school that closes or loses its charter to attend other high-quality schools.

(m) Provide—

(i) A request and justification for waivers of any Federal statutory or regulatory provisions that the applicant believes are necessary for the successful operation of the charter schools to be replicated or expanded; and

(ii) A description of any State or local rules, generally applicable to public schools, that will be waived, or otherwise not apply, to such schools.

Final Definitions

Academically poor-performing public school means:

(a) A school identified by the State for comprehensive support and improvement under section 1111(c)(4)(D)(i) of the ESEA; or

(b) A public school otherwise identified by the State or, in the case of a charter school, its authorized public chartering agency, as similarly academically poor-performing.

Educationally disadvantaged student means a student in one or more of the categories described in section 1115(c)(2) of the ESEA, which include children who are economically disadvantaged, students who are children with disabilities, migrant students, English learners, neglected or delinquent students, homeless students, and students who are in foster care.

High proportion, when used to refer to *Native American* students, means a fact-specific, case-by-case determination based upon the unique circumstances of a particular charter school or proposed charter school. The Secretary considers ''high proportion'' to include a majority of *Native American* students. In addition, the Secretary may determine that less than a majority of *Native American* students constitutes a ''high proportion'' based on the unique circumstances of a particular charter school or proposed charter school, as described in the application for funds.

Indian organization means an organization that—

(1) Is legally established—

(i) By Tribal or inter-Tribal charter or in accordance with State or Tribal law; and

(ii) With appropriate constitution, by-laws, or articles of incorporation;

(2) Includes in its purposes the promotion of the education of Indians;

(3) Is controlled by a governing board, the majority of which is Indian;

(4) If located on an Indian reservation, operates with the sanction or by charter of the governing body of that reservation;

(5) Is neither an organization or subdivision of, nor under the direct control of, any institution of higher education; and

(6) Is not an agency of State or local government.

Indian Tribe means a federally-recognized or a State-recognized Tribe.

Individual from a low-income family means an individual who is determined by a State educational agency or local educational agency to be a child from a low-income family on the basis of (a) data used by the Secretary to determine allocations under section 1124 of the ESEA, (b) data on children eligible for free or reduced-price lunches under the Richard B. Russell National School Lunch Act, (c) data on children in families receiving assistance under part A of title IV of the Social Security Act, (d) data on children eligible to receive medical assistance under the Medicaid program under title XIX of the Social Security Act, or (e) an alternate method that combines or extrapolates from the data in items (a) through (d) of this definition.

Institution of higher education means an educational institution in any State that—

(i) Admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, or persons who meet the requirements of section 484(d)of the HEA;

(ii) Is legally authorized within such State to provide a program of education beyond secondary education;

(iii) Provides an educational program for which the institution awards a bachelor's degree or provides not less than a 2-year program that is acceptable for full credit toward such a degree, or awards a degree that is acceptable for admission to a graduate or professional degree program, subject to review and approval by the Secretary;

(iv) Is a public or other nonprofit institution; and

(v) Is accredited by a nationally recognized accrediting agency or association, or if not so accredited, is an institution that has been granted preaccreditation status by such an agency or association that has been recognized by the Secretary for the granting of preaccreditation status, and the Secretary has determined that there is satisfactory assurance that the institution will meet the accreditation standards of such an agency or association within a reasonable time.

Native American means an Indian (including an Alaska Native), Native Hawaiian, or Native American Pacific Islander.

Native American language means the historical, traditional languages spoken by *Native Americans.*

Rural community means a community that is served by a local educational agency that is eligible to apply for funds under the Small Rural School Achievement (SRSA) program or the Rural and Low-Income School (RLIS) program authorized under title V, part B of the ESEA. Applicants may determine whether a particular local educational agency is eligible for these programs by referring to information on the following Department websites. For the SRSA program: *www2.ed.gov/programs/reapsrsa/eligible16/index.html.* For the RLIS program: *www2.ed.gov/programs/reaprlisp/eligibility.html.*

Final Selection Criteria

(a) *Quality of the eligible applicant.* In determining the quality of the eligible applicant, the Secretary considers one or more of the following factors:

(i) The extent to which the academic achievement results (including annual student performance on statewide assessments, annual student attendance and retention rates, and, where applicable and available, student academic growth, high school graduation rates, college attendance rates, and college persistence rates) for *educationally disadvantaged students* served by the charter schools operated or managed by the applicant have exceeded the average academic

achievement results for such students served by other public schools in the State.

(ii) The extent to which one or more charter schools operated or managed by the applicant have closed; have had a charter revoked due to noncompliance with statutory or regulatory requirements; or have had their affiliation with the applicant revoked or terminated, including through voluntary disaffiliation.

(iii) The extent to which one or more charter schools operated or managed by the applicant have had any significant issues in the area of financial or operational management or student safety, or have otherwise experienced significant problems with statutory or regulatory compliance that could lead to revocation of the school's charter.

(b) *Significance of contribution in assisting educationally disadvantaged students.*

In determining the significance of the contribution the proposed project will make in expanding educational opportunities for *educationally disadvantaged students* and enabling those students to meet challenging State academic standards, the Secretary considers one or more of the following factors:

(i) The extent to which charter schools currently operated or managed by the applicant serve *educationally disadvantaged students,* particularly students with disabilities and English learners, at rates comparable to surrounding public schools or, in the case of virtual charter schools, at rates comparable to public schools in the State.

(ii) The quality of the plan to ensure that the charter schools the applicant proposes to replicate or expand will recruit, enroll, and effectively serve *educationally disadvantaged students,* particularly students with disabilities and English learners.

(c) *Quality of the evaluation plan for the proposed project.*

In determining the quality of the evaluation plan for the proposed project, the Secretary considers the extent to which the methods of evaluation include the use of objective performance measures that are clearly related to the intended outcomes of the proposed project, as described in the applicant's logic model (as defined in 34 CFR 77.1), and that will produce quantitative and qualitative data by the end of the grant period.

(d) *Quality of the management plan.*

In determining the quality of the applicant's management plan, the Secretary considers the ability of the applicant to sustain the operation of the replicated or expanded charter schools after the grant has ended, as demonstrated by the multi-year financial and operating model required under section 4305(b)(3)(B)(iii) of the ESEA.

This document does not preclude us from proposing additional priorities, requirements, definitions, or selection criteria, subject to meeting applicable rulemaking requirements.

Note: This document does *not* solicit applications. In any year in which we choose to use one or more of these priorities, requirements, definitions, and selection criteria, we invite applications through a notice in the **Federal Register**.

Executive Orders 12866, 13563, and 13771

Regulatory Impact Analysis

Under Executive Order 12866, it must be determined whether this regulatory action is ''significant'' and, therefore, subject to the requirements of the Executive order and subject to review by the Office of Management and Budget (OMB). Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of $100 million or more, or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or Tribal governments or communities in a material way (also referred to as an ''economically significant'' rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles stated in the Executive order.

This final regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866.

Under Executive Order 13771, for each new rule that the Department proposes for notice and comment or otherwise promulgates that is a significant regulatory action under Executive Order 12866, and that imposes total costs greater than zero, it must identify two deregulatory actions. For Fiscal Year 2019, any new incremental costs associated with a new regulation must be fully offset by the elimination of existing costs through deregulatory actions. Because the proposed regulatory action is not significant, the requirements of Executive Order 13771 do not apply.

We have also reviewed this final regulatory action under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency ''to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.'' The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include ''identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.''

We are issuing these final priorities, requirements, definitions, and selection criteria only on a reasoned determination that their benefits justify their costs. In choosing among alternative regulatory approaches, we selected those approaches that maximize net benefits. Based on the analysis that follows, the Department believes that this regulatory action is consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action does not unduly interfere with State, local, and Tribal

governments in the exercise of their governmental functions.

In accordance with these Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs are those resulting from statutory requirements and those we have determined as necessary for administering the Department's programs and activities.

Discussion of Potential Costs and Benefits

The Department believes that this regulatory action does not impose significant costs on eligible entities, whose participation in this program is voluntary. While this action does impose some requirements on participating CMOs that are cost-bearing, the Department expects that applicants for this program will include in their proposed budgets a request for funds to support compliance with such cost-bearing requirements. Therefore, costs associated with meeting these requirements are, in the Department's estimation, minimal.

This regulatory action strengthens accountability for the use of Federal funds by helping to ensure that the Department selects for CSP grants the CMOs that are most capable of expanding the number of high-quality charter schools available to our Nation's students, consistent with a major purpose of the CSP as described in section 4301(3) of the ESEA. The Department believes that these benefits to the Federal government and to State educational agencies outweigh the costs associated with this action.

Regulatory Alternatives Considered

The Department believes that the priorities, requirements, definitions, and selection criteria are needed to administer the program effectively. As an alternative to the selection criteria announced in this document, the Department could choose from among the selection criteria authorized for CSP grants to CMOs in section 4305(b) of the ESEA (20 U.S.C. 7221c) and the general selection criteria in 34 CFR 75.210. We do not believe that these criteria provide a sufficient basis on which to evaluate the quality of applications. In particular, the criteria do not sufficiently enable the Department to assess an applicant's past performance with respect to the operation of high-quality charter schools or with respect to compliance issues that the applicant has encountered.

We note that several of the final priorities, requirements, definitions, and selection criteria are based on priorities, requirements, definitions, selection criteria, and other provisions in the authorizing statute for this program.

Paperwork Reduction Act of 1995

The final priorities, requirements, and selection criteria contain information collection requirements that are approved by OMB under OMB control number 1894–0006; the final priorities, requirements, and selection criteria do not affect the currently approved data collection.

Intergovernmental Review: This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. One of the objectives of the Executive order is to foster an intergovernmental partnership and a strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

This document provides early notification of our specific plans and actions for this program.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (*e.g.,* braille, large print, audiotape, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of the Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: November 27, 2018.

James C. Blew,

Acting Assistant Deputy Secretary for Innovation and Improvement.

[FR Doc. 2018–26095 Filed 11–29–18; 8:45 am]

BILLING CODE 4000–01–P

LIBRARY OF CONGRESS

Copyright Office

37 CFR Parts 201 and 202

[Docket Nos. 2018–2, 2018–3]

Group Registration of Newsletters and Serials

AGENCY: U.S. Copyright Office, Library of Congress.

ACTION: Final rule.

SUMMARY: The U.S. Copyright Office is amending its regulations governing the group registration options for newsletters and serials. With respect to group newsletters, the final rule amends the definition of ''newsletter,'' eliminating the requirement that each issue must be a work made for hire, and the provision stating that group newsletter claims must be received within three months after publication. Under the final rule, newsletter publishers now should register their issues with the online application and upload a digital copy of each issue through the electronic registration system instead of submitting them in a physical form. With respect to group serials, the final rule clarifies that serials governed by the rule generally must be published at intervals of a week or longer, and that the publication dates provided in the application need not match the dates appearing on the issues themselves. In addition, the rule phases out the paper application for group serials and the submission of physical copies. Beginning one year after the rule goes into effect, serial publishers will be required to use the online application for group serials and to upload a digital copy of each issue, rather than submitting them in a physical form. The final rule updates the regulations for both newsletters and serials by confirming that publishers do not need to provide the Library of Congress with complimentary subscriptions to or microfilm of each issue as a condition for registering their works with the Office, but newsletter and serial issues that are submitted for purposes of registration will no longer satisfy the mandatory deposit requirement. Publishers will be expected to separately provide the Library with two complimentary subscriptions if the newsletter or serial is published in the United States in a physical format (unless the publisher is informed that the publication is not needed for the Library's collections). If the newsletter or serial is published solely in electronic form, the publisher will remain exempt from mandatory deposit

unless the Office issues a formal demand for copies of that publication.

DATES: *Effective date:* December 31, 2018.

FOR FURTHER INFORMATION CONTACT: Robert J. Kasunic, Associate Register of Copyrights and Director of Registration Policy and Practice, or Erik Bertin, Deputy Director of Registration Policy and Practice, by telephone at 202–707–8040, or by email at *rkas@copyright.gov* or *ebertin@copyright.gov; or* Cindy Paige Abramson, Assistant General Counsel, by telephone at 202–707–0676, or by email at *ciab@copyright.gov.*

SUPPLEMENTARY INFORMATION: On May 17, 2018, the Copyright Office (the ''Office'') published two notices of proposed rulemaking (''NPRMs'') setting forth proposed amendments to the regulations governing the group registration options for newsletters and serials. 83 FR 22902 (May 17, 2018); 83 FR 22896 (May 17, 2018). The Office did not receive any comments in response to the NPRM on group newsletters. In response to the NPRM on group serials, the Office received comments from the Copyright Alliance and one individual.[1] Having reviewed and carefully considered these comments, the Office is issuing a final rule that is nearly identical to the rule proposed in the NPRM on group newsletters, and substantially similar to the rule proposed in the NPRM on group serials; in both cases, the Office has made a few modifications reflecting the concerns raised by the comments regarding online registration and electronic submission of deposits regarding group registration of serials, which are discussed in more detail below.[2]

Topics Involving Solely the Group Registration Option for Newsletters

The final rule revises current practices for the group registration option for newsletters. It clarifies and expands the category of works eligible for this option by amending the definition of what constitutes a ''newsletter'' and by making clear that newsletters need not be collective works. It also eliminates the work-made-for-hire requirement and the requirement that the issues must be submitted within three months after publication.

The final rule also phases out the paper application (known as Form G/DN) and generally requires applicants to register their newsletters using the designated online application. In addition, it requires applicants to upload their newsletters in a digital format through the electronic registration system. If an applicant submits Form G/DN after the effective date of the final rule, the Office will refuse to register the claim. Likewise, the Office will refuse registration if an applicant submits physical copies of a newsletter, such as printed copies or photocopies, or digital copies that have been saved onto a flash drive, disc, or other physical storage medium.

Topics Involving Solely the Group Registration Options for Serials

The final rule codifies, clarifies, and revises current practices for the group registration option for serials.

First, the final rule requires that each claim must include at least two issues, that each issue must be a work made for hire, and that the author and copyright claimant for each issue must be the same person or organization.

Second, the final rule eliminates the current requirement that each issue must have been created no more than one year prior to publication.

Third, the final rule requires that applicants may only register serials that are ''generally . . . published at intervals of a week or longer'' (*e.g.,* weekly, every two weeks, monthly), and requires that the issues be ''published in a given three month period'' within ''the same calendar year.'' The proposed rule reflected the current practice that issues must be published at intervals of one week or more, however, the Copyright Alliance noted that publishers sometimes distribute two issues during the same week, such as when a ''special'' issue is published in addition to a regularly scheduled issue.[3] To accommodate these practices, the final rule clarifies that a serial must ''generally'' be published at intervals of one week or more. The Copyright Alliance also explained that issues may be published in one month but contain an issue date for the following month and, in the case of issues published in December, may contain the issue date for January of the following year.[4] Based on this information, the final rule eliminates the requirements that the issues themselves must bear issue dates reflecting the same three-month period and the same calendar year. Instead, applicants will be required to provide a publication date for each issue in the group.

Fourth, the final rule requires that each issue must be an ''all-new'' collective work that has not been previously published, and each issue must be fixed and distributed as a discrete, self-contained collective work. The Copyright Alliance expressed concern that this requirement may prevent publishers from registering ''enhanced, digital issues which may contain content hosted on and linked to another platform such as videos and blogs that allow the reader to manipulate or interact with the issue.'' [5] The Office does not believe a change to the language of the rule is necessary. If a particular issue contains enhanced content, such as an embedded video, the registration will cover that material if it is included within the deposit and if the examiner can access and view that material in the context where it appears within the actual serial.[6] Any additional content that appears on the publisher's website—but does not appear within the issues themselves—must be registered separately.

Fifth, the final rule generally requires applicants to register their issues using the online application designated for group serial claims, and eliminates the paper application known as Form SE/Group.[7]

Finally, the final rule amends the deposit requirements by requiring applicants to upload their issues in digital form through the electronic registration system, instead of submitting them in a physical form, absent exceptional cases. While the Copyright Alliance agreed that requiring publishers to upload a digital copy of each issue ''will generally 'increase the efficiency of the group registration

[1] The comments can be found on the Copyright Office's website at *https://www.copyright.gov/rulemaking/group-serials/.*

[2] The final rule also includes a few technical amendments. The rule has been revised to account for a recent amendment that was made by the final rule on group registration of newspapers. *See* 83 FR 25375 (June 1, 2018). The rule removes cross-references to the prior regulations on newsletters and serials. *See* 37 CFR 202.4(l), 202.6(e)(1). It also corrects an error made by the **Federal Register** in publishing the regulation on supplementary registration. *See* 82 FR 27424 (June 15, 2017). Specifically, the rule removes the term ''SE.'' (which is an abbreviation for ''southeast'') and replaces it with the term ''SE'' (which is the correct abbreviation for the term ''serials''). *See* 37 CFR 202.6(e)(1).

[3] Copyright Alliance Comment at 2–3.

[4] Copyright Alliance Comment at 2.

[5] Copyright Alliance Comment at 2.

[6] *See* U.S. Copyright Office, Compendium of U.S. Copyright Office Practices, sec. 1508.1 (3d ed. 2017) (noting that the Office ''must be able to perceive the entire content of the work, including the context where each element appears within the work as a whole'').

[7] An individual filed a public comment supporting the requirement for applicants to file electronically and stated that he believed this would promote efficiency, reduce the burden on applicants, and encourage broader participation in the registration system. Kotelnikov Comment at 1. The Copyright Alliance also agreed that eliminating the paper form and requiring publishers to use the online application will ''facilitate economy and efficiency.'' Copyright Alliance Comment at 3.

process,' '' it questioned whether the electronic registration system is capable of handling large digital files, whether the process of uploading these files may be burdensome for some publishers, and whether the Office has implemented and deployed robust security measures to protect its digital deposits.[8] The Copyright Alliance suggested that the Office should gradually phase out the paper application and continue to accept physical deposits ''[u]ntil the registration system is able to fully accommodate the digital deposit process.'' [9] After carefully reviewing these comments, the Office has decided to adopt the online digital deposit requirement proposed in the NPRM, but to give publishers time to adjust to this change, the Office will continue to accept physical deposits and paper applications for another twelve months. Generally, if a publisher submits a Form SE/Group or submits a physical deposit after the phase-out period has expired, the Office will refuse to register the claim.

The Office has concluded that the other concerns raised by the Copyright Alliance about digital deposits were already adequately addressed by the proposed rule. The Office has accepted digital deposits from serial publishers since September 14, 2012, and is not aware of any technical issues that have prevented them from using the upload feature. The current registration system will accept any digital deposit, as long as it is submitted in an acceptable file format and does not exceed 500MB. And as noted in the proposed rule, the files may be compressed to comply with this limit, if necessary.

The Office first introduced its electronic registration system more than a decade ago, and as the Copyright Alliance acknowledged, the Office has not experienced any issues concerning the security of its digital deposits.[10] The Office utilizes a multi-level security design to ensure the confidentiality and integrity of the files that are stored within this system. The system is certified to operate at the moderate security level, as defined by the FIPS 200 and SP 800–53 standards published by the National Institute of Standards and Technology.[11] The entire system operates on hardware and software that is dedicated to this system and it does not share storage resources with other systems. Strict access controls have been placed throughout the system that enforce the principle of ''least privilege,'' meaning that each type of user may access only what is needed for that particular role. The system is also protected by multiple levels of network firewalls and other network-based security, such as anti-malware protection, and it is continuously monitored to ensure that these security controls remain effective.

In addition to these technical measures, the Office's regulations restrict the parties who may obtain access to its digital registration deposits. Briefly stated, the Office will provide a copy of a registration deposit only if it receives (i) written authorization from the copyright claimant or the owner of the exclusive rights in the work, (ii) a written request from an attorney representing a plaintiff or defendant in litigation involving that work, or (iii) a court order directing the Office to produce a copy of that work for use in a legal proceeding.[12]

Similarly, regulations restrict how parties may access digital registration deposits that have been transferred to the Library of Congress. Specifically, the Library currently provides access to the digital registration deposits that it receives through the group registration option for newspaper issues, subject to certain conditions specified in the regulations.[13] But the Library currently does not provide public access to digital registration deposits for any other type of work, including deposits submitted under the group registration option for serial issues. As noted in the NPRM on group newspapers, the Library would like to expand the regulation to include other types of digital registration deposits, but before doing so, the Office will conduct separate rulemakings to provide notice and seek comment from the public.[14]

Topics Involving Both the Group Registration Option for Newsletters and the Group Registration Option for Serials

The final rule makes four changes that modify the regulations governing both newsletters and serials.

First, the rule memorializes the Office's longstanding position regarding the scope of a group registration. It confirms that a registration for a group of newsletter or serial issues covers each issue in the group. It also confirms that if each issue is a collective work, the registration will cover the articles, photographs, illustrations, or other contributions appearing within those issues if they are fully owned by the copyright claimant and if they were first published in those issues.

Second, the rule confirms that newsletter and serial publishers will no longer be required to provide the Library of Congress with complimentary subscriptions to or microfilm copies of their issues as a condition for seeking a group registration under section 408(c)(1) of the Copyright Act. The Copyright Alliance applauded the elimination of this requirement.[15] But newsletter and serial issues that are submitted to the Office for purposes of registration will no longer satisfy the mandatory deposit requirement set forth in section 407 of the Copyright Act.[16]

Third, the rule provides guidance on how newsletter and serial publishers may comply with the mandatory deposit requirement. If a newsletter or serial is published in the United States in a physical format, the publisher will be expected to provide the Library with two complimentary subscriptions to physical copies of that publication, unless the publisher is notified that the newsletter or serial is not needed for the Library's collections. The rule does not change for newsletters or serials published solely in electronic format; in that case, the publisher will not be expected to provide copies of that publication unless the Office issues a formal demand for that newsletter or serial under section 202.24 of the regulations.

Fourth, the final rule includes provisions to address the Copyright Alliance's concerns about the potential burdens of electronic filing and digital deposit on applicants transitioning from traditional print to digital media.[17] These provisions permit the Office to waive the online filing requirement in ''an exceptional case'' and ''subject to such conditions as the Associate Register and Director of the Office of Registration Policy and Practice may impose on the applicant.'' Registrants who do not have internet access or are unable to use the online applications may contact the Office, and the Office will review the specific details of their cases and determine their eligibility.

[14] *See* 82 FR at 51377.

[15] Copyright Alliance Comment at 1.

[16] The final rule does not apply to newspapers; deposits submitted in compliance with group registration of newspapers also satisfy the mandatory deposit requirement. 37 CFR 202.19(d)(2)(x).

[17] Copyright Alliance Comment at 3.

The rule also provides that applicants may request special relief under § 202.20(d) if they are unable to comply with the deposit requirements for these group options. These provisions are consistent with recently amended rules for group registration of contributions to periodicals and of photographs (published and unpublished) and for supplemental registration.[18]

The Office plans to offer several resources for newsletter and serial publishers that should ease the transition to these new requirements, including an updated version of the *Compendium of U.S. Copyright Office Practices, Third Edition* and updated Circulars that discuss these group registration options and the mandatory deposit requirements for these types of works. The Office will also update the onscreen instructions and help text that accompanies the online applications for each type of claim, and add warnings to the corresponding paper applications to notify applicants that Forms G/DN and SE/Group will soon be phased out.

Final Regulations

For the reasons set forth in the preamble, the Copyright Office amends 37 CFR parts 201 and 202 as follows:

PART 201—GENERAL PROVISIONS

■ 1. The authority citation for part 201 continues to read as follows:

Authority: 17 U.S.C. 702.

■ 2. Amend § 201.1 by revising paragraph (c)(6) to read as follows:

§ 201.1 Communication with the Copyright Office.

* * * * *

(c) * * *

(6) *Mandatory Deposit Copies.* Mandatory deposit copies of published works submitted for the Library of Congress under 17 U.S.C. 407 and § 202.19 of this chapter (including complimentary subscriptions to serial publications), and newspaper microfilm copies submitted under § 202.4(e) of this chapter, should be addressed to: Library of Congress, U.S. Copyright Office, Attn: 407 Deposits, 101 Independence Avenue SE, Washington, DC 20559–6600.

* * * * *

■ 3. Amend § 201.3 by revising paragraph (c)(6) to read as follows:

§ 201.3 Fees for registration, recordation, and related services, special services, and services performed by the Licensing Division.

* * * * *

(c) * * *

Registration, recordation and related services	Fees ($)
* * * * * * *	
(6) Registration of a claim in a group of serials (per issue, minimum two issues)	25
* * * * * * *	

* * * * *

PART 202—PREREGISTRATION AND REGISTRATION OF CLAIMS TO COPYRIGHT

■ 4. The authority citation for part 202 continues to read as follows:

Authority: 17 U.S.C. 408(f), 702.

§ 202.3 [Amended]

■ 5. Amend § 202.3 by removing and reserving paragraphs (b)(6) and (9).

■ 6. Amend § 202.4 as follows:

■ a. Add paragraphs (d) and (f).

■ b. In paragraph (l) remove ''through (7), or (9)''.

■ c. Revise the first sentence of paragraph (n).

The additions and revision read as follows:

§ 202.4 Group registration.

* * * * *

(d) *Group registration of serials.* Pursuant to the authority granted by 17 U.S.C. 408(c)(1), the Register of Copyrights has determined that a group of serial issues may be registered with one application, the required deposit, and the filing fee required by § 201.3(c) of this chapter, if the following conditions are met:

(1) *Eligible works.* (i) All the issues in the group must be serials.

(ii) The group must include at least two issues.

(iii) Each issue in the group must be an all-new collective work that has not been previously published, each issue must be fixed and distributed as a discrete, self-contained collective work, and the claim in each issue must be limited to the collective work.

(iv) Each issue in the group must be a work made for hire, and the author and claimant for each issue must be the same person or organization.

(v) The serial generally must be published at intervals of a week or longer. All of the issues must be published within three months, under the same continuing title, within the same calendar year, and the applicant must specify the date of publication for each issue in the group.

(2) *Application.* The applicant may complete and submit the online application designated for a group of serial issues. Alternatively, the applicant may complete and submit a paper application using Form SE/Group, provided that the application is received on or before December 30, 2019. The application may be submitted by any of the parties listed in § 202.3(c)(1).

(3) *Deposit.* The applicant must submit one complete copy of each issue that is included in the group. Copies submitted under this paragraph will be considered solely for the purpose of registration under 17 U.S.C. 408, and will not satisfy the mandatory deposit requirement under 17 U.S.C. 407.

(i) The issues may be submitted in digital form if the following requirements have been met. Each issue must be contained in a separate electronic file. The applicant must use the file-naming convention and submit digital files in accordance with instructions specified on the Copyright Office's website. The files must be submitted in Portable Document Format (PDF), they must be assembled in an orderly form, and they must be uploaded to the electronic registration system as individual electronic files (*i.e.,* not .zip files). The files must be viewable and searchable, contain

[18] 37 CFR 202.4(g)(9), (h)(11), (i)(11), 202.6(e)(7); *see also* 82 FR 47415, 47419 (Oct. 12, 2017) (proposing same for group registration of unpublished works).

embedded fonts, and be free from any access restrictions (such as those implemented through digital rights management) that prevent the viewing and examination of the work. The file size for each uploaded file must not exceed 500 megabytes, but files may be compressed to comply with this requirement.

(ii) Alternatively, the applicant may submit a physical copy of each issue, provided that the deposit is received on or before December 30, 2019. If the claim is submitted with an online application, the copies must be accompanied by the required shipping slip generated by the electronic registration system, the shipping slip must be attached to one of the copies, the copies and the shipping slip must be included in the same package, and the package must be sent to the address specified on the shipping slip.

(4) *Exceptional cases.* In an exceptional case, the Copyright Office may waive the online filing requirement set forth in paragraph (d)(2) of this section or may grant special relief from the deposit requirement under § 202.20(d), subject to such conditions as the Associate Register of Copyrights and Director of the Office of Registration Policy and Practice may impose on the applicant.

* * * * *

(f) *Group registration of newsletters.* Pursuant to the authority granted by 17 U.S.C. 408(c)(1), the Register of Copyrights has determined that a group of newsletter issues may be registered with one application, the required deposit, and the filing fee required by § 201.3(c) of this chapter, if the following conditions are met:

(1) *Eligible works.* (i) All the issues in the group must be newsletters. For purposes of this section, a newsletter is a serial that is published and distributed by mail, electronic media, or other medium, including paper, email, or download. Publication must usually occur at least two days each week and the newsletter must contain news or information that is chiefly of interest to a special group, such as trade and professional associations, colleges, schools, or churches. Newsletters are typically distributed through subscriptions, but are not distributed through newsstands or other retail outlets.

(ii) The group must include at least two issues.

(iii) Each issue in the group must be an all-new issue or an all-new collective work that has not been previously published, and each issue must be fixed and distributed as a discrete, self-contained work.

(iv) The author and claimant for each issue must be the same person or organization.

(v) All the issues in the group must be published under the same continuing title, they must be published within the same calendar month and bear issue dates within that month, and the applicant must identify the earliest and latest date that the issues were published during that month.

(2) *Application.* The applicant must complete and submit the online application designated for a group of newsletter issues. The application may be submitted by any of the parties listed in § 202.3(c)(1).

(3) *Deposit.* The applicant must submit one complete copy of each issue that is included in the group. The issues must be submitted in digital form, and each issue must be contained in a separate electronic file. The applicant must use the file-naming convention and submit digital files in accordance with instructions specified on the Copyright Office's website. The files must be submitted in Portable Document Format (PDF), they must be assembled in an orderly form, and they must be uploaded to the electronic registration system as individual electronic files (*i.e.,* not .zip files). The files must be viewable and searchable, contain embedded fonts, and be free from any access restrictions (such as those implemented through digital rights management) that prevent the viewing and examination of the work. The file size for each uploaded file must not exceed 500 megabytes, but files may be compressed to comply with this requirement. Copies submitted under this paragraph will be considered solely for the purpose of registration under 17 U.S.C. 408, and will not satisfy the mandatory deposit requirement under 17 U.S.C. 407.

(4) *Exceptional cases.* In an exceptional case, the Copyright Office may waive the online filing requirement set forth in paragraph (f)(2) of this section or may grant special relief from the deposit requirement under § 202.20(d), subject to such conditions as the Associate Register of Copyrights and Director of the Office of Registration Policy and Practice may impose on the applicant.

* * * * *

(n) *The scope of a group registration.* When the Office issues a group registration under paragraphs (d), (e), or (f) of this section, the registration covers each issue in the group and each issue is registered as a separate work or a separate collective work (as the case may be). * * *

* * * * *

§ 202.6 [Amended]

■ 7. In § 202.6(e)(1) remove ''§ 202.3(b)(6) through (10) or''; and remove ''SE.'' and add ''SE'' in its place.

■ 8. Amend § 202.19 by adding paragraph (d)(2)(xi) to read as follows:

§ 202.19 Deposit of published copies or phonorecords for the Library of Congress.

* * * * *

(d) * * *

(2) * * *

(xi) In the case of serials (as defined in § 202.3(b)(1)(v), but excluding newspapers) published in the United States in a physical format, or in both a physical and an electronic format, the copyright owner or the owner of the exclusive right of publication must provide the Library of Congress with two complimentary subscriptions to the serial, unless the Copyright Acquisitions Division informs the owner that the serial is not needed for the Library's collections. Subscription copies must be physically mailed to the Copyright Office, at the address for mandatory deposit copies specified in § 201.1(c) of this chapter, promptly after the publication of each issue, and the subscription(s) must be maintained on an ongoing basis. The owner may cancel the subscription(s) if the serial is no longer published by the owner, if the serial is no longer published in the United States in a physical format, or if the Copyright Acquisitions Division informs the owner that the serial is no longer needed for the Library's collections. In addition, prior to commencing the subscriptions, the owner must send a letter to the Copyright Acquisitions Division at the address specified in § 201.1(b) of this chapter confirming that the owner will provide the requested number of subscriptions for the Library of Congress. The letter must include the name of the publisher, the title of the serial, the International Standard Serial Number (''ISSN'') that has been assigned to the serial (if any), and the issue date and the numerical or chronological designations that appear on the first issue that will be provided under the subscriptions.

* * * * *

§ 202.20 [Amended]

■ 9. Amend § 202.20 by removing and reserving paragraph (c)(2)(xvii).

■ 10. In Appendix B to Part 202, revise the last sentence of paragraph a. to read as follows:

Appendix B to Part 202—''Best Edition'' of Published Copyrighted Works for the Collections of the Library of Congress

a. * * * (For works first published only in a country other than the United States, the law requires the deposit of the work as first published.)

* * * * *

Dated: November 5, 2018.

BILLING CODE 1410–30–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2018–0413; FRL–9985–75–Region 9]

Revisions to California State Implementation Plan; South Coast Air Quality Management District; Stationary Source Permits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is finalizing action on a revision to the South Coast Air Quality Management District (SCAQMD or District) portion of the California State Implementation Plan (SIP). We are finalizing a conditional approval of one rule governing issuance of permits for stationary sources, including review and permitting of major sources and major modifications under part D of title I of the Clean Air Act (CAA). Specifically, the revision pertains to SCAQMD Rule 1325—*Federal $PM_{2.5}$ New Source Review Program.*

DATES: This rule will be effective on December 31, 2018.

ADDRESSES: The EPA has established a docket for this action under Docket No. EPA–R09–OAR–2018–0413. All documents in the docket are listed on the *http://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *e.g.,* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through *http://www.regulations.gov,* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Laura Yannayon, EPA Region 9, (415) 972–3534, *yannayon.laura@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, the terms ''we,'' ''us,'' and ''our'' refer to EPA.

Table of Contents

I. Proposed Action

On August 8, 2018 (83 FR 39012), the EPA proposed to conditionally approve the following rule that was submitted for incorporation into the SCAQMD portion of the California SIP.

TABLE 1—SUBMITTED RULE

Rule No.	Rule title	Amended	Submitted
1325	Federal $PM_{2.5}$ New Source Review Program	11/4/16	5/8/17

We proposed a conditional approval of this rule because we determined that, separate from the deficiencies listed in Section II.B of our proposed rulemaking action, the rule met the statutory requirements for SIP revisions as specified in section 110(l) of the CAA, as well as the substantive statutory and regulatory requirements for a nonattainment New Source Review (NSR) permit program as contained in CAA sections 110(a)(2)(C) and 173(a) through (c), and 40 CFR 51.165 that pertain to a $PM_{2.5}$ nonattainment area classified as Serious. Moreover, we concluded that if the State submits the changes it committed to submit in its July 16, 2018 commitment letter, the identified deficiencies will be cured.

II. Public Comments and EPA Responses

The EPA's proposed action provided a 30-day public comment period. During this period, we received two comments on the proposed rule. These comments raised issues that are outside the scope of our proposed approval of Rule 1325, including air pollution monitoring in China and India, climate change, and wind and solar power costs and regulations. None of those comments are germane to our evaluation of Rule 1325.

III. EPA Action

No comments were submitted that change our assessment that submitted Rule 1325 satisfies the applicable CAA requirements. Therefore, under CAA sections 110(k)(4) and 301(a), and for the reasons set forth in our August 8, 2018 proposed rule, we are finalizing the conditional approval of Rule 1325. This action incorporates Rule 1325 into the federally enforceable SIP and will be codified through revisions to 40 CFR 52.220 (Identification of plan) and 40 CFR 52.248 (Identification of plan—conditional approval).

If the State meets its commitment to submit the required changes, the revisions to Rule 1325 will remain a part of the SIP until EPA takes final action approving or disapproving the new SIP revisions. However, if the State fails to submit these revisions within the required timeframe, the conditional approval will automatically become a disapproval, and EPA will issue a finding of disapproval. EPA is not required to propose the finding of disapproval.

In addition, because we are finalizing our proposed action, we are removing the existing Rule 1325 from the SCAQMD portion of the California SIP.

IV. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of the SCAQMD rule listed in Table 1 of this preamble. The EPA has made, and will continue to make, these materials available electronically through *www.regulations.gov* and in hard copy at the EPA Region IX Office (please contact the person identified in the **FOR**

FURTHER INFORMATION CONTACT section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, New Source Review, Particulate matter, Reporting and recordkeeping requirements.

Dated: October 11, 2018.

Deborah Jordan,

Acting Regional Administrator, Region IX.

Part 52, Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Section 52.220 is amended by adding paragraphs (c)(458)(i)(A)(*2*) and (c)(509) to read as follows:

§ 52.220 Identification of plan—in part.

* * * * *

(c) * * *

(458) * * *

(i) * * *

(A) * * *

(*2*) Previously approved on May 1, 2015 in paragraph (c)(458)(i)(A)(*1*) of this section and now deleted with replacement in paragraph (c)(509)(i)(A)(*1*), Rule 1325.

* * * * *

(509) New and amended regulations for the following APCDs were submitted on May 8, 2017 by the Governor's designee.

(i) *Incorporation by reference.* (A) South Coast Air Quality Management District.

(1) Rule 1325, ''Federal $PM_{2.5}$ New Source Review Program'' amended on November 4, 2016.

■ 3. Section 52.248 is amended by adding paragraph (f) to read as follows:

§ 52.248 Identification of plan—conditional approval.

* * * * *

(f) The EPA is conditionally approving a California State Implementation Plan (SIP) revision submitted on May 8, 2017, updating Rule 1325—Federal $PM_{2.5}$ New Source Review Program, for the South Coast Air Quality Management District. The conditional approval is based on a commitment from the State to submit a SIP revision that will correct the identified deficiencies. If the State fails to meet its commitment by December 30, 2019, the conditional approval is treated as a disapproval.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 260, 261, and 262

[EPA–HQ–OLEM–2018–0646; FRL9986–91–OLEM]

Safe Management of Recalled Airbags

AGENCY: Environmental Protection Agency (EPA).

ACTION: Interim final rule with request for comments.

SUMMARY: The Environmental Protection Agency (EPA) is issuing this interim final rule in response to the urgent public health issue posed by recalled Takata airbag inflators still installed in vehicles. With this rule, EPA is facilitating a more expedited removal of defective Takata airbag inflators from vehicles by dealerships, salvage yards and other locations for safe and environmentally sound disposal by exempting the collection of airbag waste

from hazardous waste requirements so long as certain conditions are met. The Agency is also seeking comment on this interim final rule.

DATES: This interim final rule is effective on November 30, 2018. Comments must be received on or before January 29, 2019. Under the Paperwork Reduction Act (PRA), comments on the information collection provisions must be received on or before January 29, 2019.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OLEM–2018–0646, at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Office of Resource Conservation and Recovery, Materials Recovery and Waste Management Division, MC 5304P, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460, Tracy Atagi, at (703) 308–8672, (*atagi.tracy@epa.gov*).

SUPPLEMENTARY INFORMATION:

Preamble Outline

I. General Information

A. Does this action apply to me?

This action applies to entities that manage airbag waste (*i.e.,* discarded airbag modules and airbag inflators) that are subject to hazardous waste regulations. The dealerships performing the Takata recall work constitute the majority of the facilities that will be impacted by this rule. These dealerships fall under NAICS code 441: Motor Vehicle and Parts Dealers. EPA estimates that about 15,256 dealerships may be affected by this rule. Other potentially affected entities include those in NAICS code 336: Transportation Equipment Manufacturing, and in NAICS code 562: Waste Management and Remediation Services.

B. Why is EPA issuing an interim final rule?

Section 553(b)(B) of the Administrative Procedure Act, 5 U.S.C. 553(b)(B), provides that, when an agency for good cause finds that notice and public procedures are impracticable, unnecessary or contrary to the public interest, the agency may issue a rule without providing notice and an opportunity for public comment. EPA has determined that there is good cause for issuing this interim final rule without prior proposal and opportunity for comment because such notice and opportunity for comment would be impracticable and contrary to the public interest. Specifically, prompt promulgation of this rule without delay is necessary to protect human health and the environment by facilitating the urgent removal of dangerously defective Takata airbag inflators from vehicles, and by preventing defective Takata airbag inflators from scrap vehicles from being reused, while maintaining protection of human health and the environment during airbag waste collection, storage and disposal.

In its November 3, 2015 Coordinated Remedy Order, the U.S. Department of Transportation (DOT) National Highway Traffic Safety Administration (NHTSA) found that it was imperative to accelerate the rate of the recalls because ''[e]ach airbag inflator with the capacity to rupture, as the recalled Takata inflators do, presents an unreasonable risk of serious injury or death . . . Since the propensity for rupture increases with the age of the inflator, and increases even more when the vehicle has been exposed to consistent long-term HAH [high absolute humidity] conditions, the risk for injurious or lethal rupture increases with each passing day.'' [1] This report emphasizes that as the inflators get older, each day that passes brings forth an increased danger. In addition, as noted in a November 15, 2017 report prepared by the Independent Monitor for the Takata Restructuring on *The State of the Takata Recalls,* ''[t]he words 'grenade' and 'ticking time bomb' accurately convey the lethal potential of these defective inflators.'' [2]

Delaying promulgation of this rule through notice and comment procedures would be impracticable and contrary to the public interest because such a delay would further increase the risk of death or serious injury by slowing down the removal of defective Takata airbag inflators from vehicles and impeding the collection of defective airbag inflators from salvage yards and other locations (and increasing the potential for defective airbag inflators in scrap vehicles to be reused). This existing risk has now increased significantly since the date of the 2015 NHTSA report because of recent events that further heighten the urgency to accelerate the recall.

First, more time has passed since the date of the 2015 NHTSA study, and as noted in that study and reiterated in the 2017 study by the Independent Monitor, each passing day brings forth more danger. The danger is greater today than in 2015 because of the increased age of the inflators.

Second, with the recent amendment to DOT's Preservation Order on April 12, 2018, and with Takata's restructuring due to bankruptcy finalized on February 21, 2018, vehicle manufacturers no longer have to send recalled inflators to Takata warehouses

[1] National Highway Traffic Safety Administration (NHTSA), *Coordinated Remedy Order,* November 3, 2015, Docket No. NHTSA–2015–0055, paragraph 32. *https://www.nhtsa.gov/sites/nhtsa.dot.gov/files/documents/nhtsa-coordinatedremedyorder-takata.pdf.*

[2] The Independent Monitor of Takata and the Coordinated Remedy Program, *The State of the Takata Airbag Recalls,* November 15, 2017, page 1, paragraph 1. *https://www.nhtsa.gov/sites/nhtsa.dot.gov/files/documents/the_state_of_the_takata_airbag_recalls-report_of_the_independent_monitor_112217_v3_tag.pdf.*

for long-term storage but may now send them directly for disposal. EPA is encouraging this through today's conditional exemption, since long-term storage of recalled inflators can make the defect more dangerous. These recalled inflators that are sent directly to disposal are not covered by the amended Preservation Order and thus are regulated as hazardous waste, whereas in the past they were not regulated as waste under the original Preservation Order. As a result, many automobile dealers and other entities who continue to replace recalled airbag inflators at the current rate of repair could become subject to additional hazardous waste generator requirements in 40 CFR part 262, which would impose additional regulatory obligations on the dealers' and salvage vendors' management of the inflators. Through our conversations with DOT, the automobile manufacturers, automotive salvage vendors, and other affected stakeholders, EPA has learned that imposing full generator requirements on automobile dealers and salvage vendors who lack the expertise and experience in managing hazardous waste would result in the slowdown, rather than the necessary acceleration, of the recall effort, resulting in even greater harm to human health and the environment.[3]

This rule is intended to assist the automobile dealers and other entities in their handling of the airbags, and ensure delivery of the airbags to facilities that can more expertly manage these airbags in order to accelerate the recall. Thus, it is essential that there be no delay in promulgating this rule.

Third, there have continued to be deaths as recently as 2018 as a result of Takata airbag explosions. On January 1, 2018, there was a death in Malaysia[4], and before that, on July 13, 2017, a death in Australia[5] as well as another on July 19, 2017 in Florida[6] as a result of defective Takata airbags.

Finally, with respect to the effective date, EPA finds that it has good cause to make the revisions immediately effective under section 553(d) of the Administrative Procedure Act (APA), 5 U.S.C. 553(d), and section 3010(b) of RCRA, 42 U.S.C. 6930(b). Section 553(d) provides in pertinent part that final rules shall not become effective until 30 days after publication in the **Federal Register**, ''except . . . a substantive rule which grants or recognizes an exemption or relieves a restriction . . . or as otherwise provided by the agency for good cause''. RCRA section 3010(b) has similar provisions for an immediate effective date. It provides for an immediate effective date, rather than the usual six month period, for ''(1) a regulation with which the Administrator finds the regulated community does not need six months to come into compliance . . . . or (3) other good cause found and published with the regulation,'' among other exceptions.

The purpose of section 553(d) of the APA is to ''give affected parties a reasonable time to adjust their behavior before the final rule takes effect.'' *Omnipoint Corp.* v. *FCC,* 78 F.3d 620, 630 (D.C. Cir. 1996); *see also United States* v. *Gavrilovic,* 551 F.2d 1099, 1104 (8th Cir. 1977) (quoting legislative history). Similarly, as noted above, whether the regulated community needs a period of time to come into compliance is relevant to the application of RCRA section 3010(b). Because this rule grants a conditional exemption from certain RCRA hazardous waste requirements, it qualifies for the APA exemption for any rule that ''recognizes or grants an exemption or relieves a restriction'' as well as the RCRA exemption for any rule for which ''the regulated community does not need six months to come into compliance.''

Moreover, EPA has determined that for purposes of both the APA and RCRA effective date provisions, there is good cause for making this final rule effective immediately. In determining whether good cause exists to waive the 30-day effective date under the APA, an agency should ''balance the necessity for immediate implementation against principles of fundamental fairness which require that all affected persons be afforded a reasonable amount of time to prepare for the effective date of its ruling.'' *Gavrilovic,* 551 F.2d at 1105. EPA has also applied this balancing test to the RCRA effective date provision for purposes of this rule. This rule facilitates a more expedited removal of defective Takata airbag inflators from vehicles by dealerships, salvage yards and other locations for safe and environmentally sound disposal by exempting the collection of airbag waste from hazardous waste requirements so long as certain conditions are met. Because this action provides an exemption to certain requirements that automobile dealers and other parties would otherwise need to follow under RCRA, and because this exemption is optional, the regulated community does not need time to prepare for this rule. Specifically, as further discussed in this preamble, the conditions for the exemption mirror how recalled airbag modules and airbag inflators have been managed under the DOT Preservation Order during the past three years, and therefore no additional time is needed to start operating under the exemption. In contrast, the necessity of immediate implementation is great, as previously discussed.

As a result, EPA is making this interim final rule effective upon publication.

II. Statutory Authority

These regulations are promulgated under the authority of sections 2002, 3001, 3002, 3003, 3004, 3006, 3010, and 3017 of the Solid Waste Disposal Act of 1965, as amended by the Resource Conservation and Recovery Act of 1976 (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984 (HSWA). This statute is commonly referred to as ''RCRA.''

III. When will this interim final rule be effective?

The revisions to 40 CFR 260.10, CFR 261.4 and CFR 262.14 become effective on November 30, 2018.

IV. Background Information

A. Regulation of Airbag Modules and Airbag Inflators Under RCRA

An airbag module is a fully assembled unit including both the airbag inflator and the fabric cushion. An airbag inflator is the small metal canister within the airbag module that generally houses explosive propellant and an initiator. The airbag module is deployed when the airbag inflator receives an electronic pulse from a vehicle's crash sensor. In properly functioning airbag modules that use a gas generating system, chemical propellant contained in an airbag inflator unit burns in a fast and controlled manner, quickly emitting an inert gas through vents in the canister out into the airbag module, which inflates the cushion. Airbag modules across the automobile safety industry utilize explosive propellants for rapid response to an automobile accident.

Most airbag inflators use oxidizers as part of the gas generating composition of

the propellant and, therefore, when discarded, would meet the definition of ignitable hazardous waste under the RCRA hazardous waste regulations at 40 CFR 261.21(a)(4), which states that a solid waste exhibits the characteristic of ignitability if, ''[i]t is an oxidizer.'' [7] In addition, due to the explosive propellant component, discarded airbag modules and airbag inflators meet the definition of reactive hazardous waste at 40 CFR 261.23(a)(6), which states that a solid waste exhibits the characteristic of reactivity if, ''[i]t is readily capable of detonation or explosive reaction if it is subjected to a strong initiating source or if heated under confinement.'' [8] The deployment of airbag inflators generally results in the depletion of the ignitable and/or reactive components to cause the release of inert gas, after which the inflators would no longer exhibit the ignitable or reactive characteristics under the RCRA regulations.

Airbag modules and airbag inflators that exhibit hazardous waste characteristics under 40 CFR part 261 subpart C may be exempt from hazardous waste regulations under certain scenarios, as summarized in an EPA memorandum signed on July 19, 2018.[9] As the memo explains, the applicable RCRA hazardous waste regulations for airbag modules and airbag inflators depend on the type of device, and how it is managed. However, it is important to note that, as the memo explains, recalled Takata airbag modules and airbag inflators removed from vehicles do *not* qualify for the exemptions and exclusions available to non-recalled airbag modules and airbag inflators because, as described in this preamble, the Takata recalled airbag inflators cannot be safely reused or deployed.

B. Background on the Takata Inflator Recalls

In May 2015, the U.S. Department of Transportation (DOT) announced a national recall of airbag inflators manufactured by Takata due to a defect in their phase-stabilized ammonium nitrate (PSAN) propellant, which has resulted in fifteen deaths and at least 250 injuries in the U.S. as of August 2018.[10] These airbag inflator recalls constitute the largest automotive recall in U.S. history, with 19 vehicle manufacturers affected and approximately 65–70 million airbag inflators scheduled to be recalled by December 2019. Of these affected airbag inflators, 50 million inflators in an estimated 37 million vehicles were recalled as of August 2018 and the remaining inflators will be recalled by December 2019.[11] Included in this number are tens of thousands of ''Alpha'' airbag inflators, which have a significantly higher risk of rupture due to a manufacturing defect resulting in low-density propellant in addition to the propellant defect described below. Nine of the 15 fatalities in the U.S. were caused by Alpha airbag inflators.[12]

On November 3, 2015, the National Highway Traffic Safety Administration (NHTSA) issued a Coordinated Remedy Order that set forth the requirements and obligations of certain motor vehicle manufacturers and the airbag manufacturer, Takata, in connection with the recall and remedy of certain types of Takata airbag inflators.[13] In its Coordinated Remedy Order, NHTSA found that it was imperative to accelerate the rate of the recalls because ''[e]ach airbag inflator with the capacity to rupture, as the recalled Takata inflators do, presents an unreasonable risk of serious injury or death. . . . Since the propensity for rupture increases with the age of the inflator, and increases even more when the vehicle has been exposed to consistent long-term HAH [high absolute humidity] conditions, the risk for injurious or lethal rupture increases with each passing day.'' [14]

The PSAN propellant used in the recalled Takata airbag inflators degrades over time when moist propellant is exposed to long-term daily temperature cycling. Moisture from the air adsorbs to PSAN particles, changing the structure of the propellant and causing the inflator to over-pressurize during deployment.[15] In some cases, this over-pressurization causes the metal canister to rupture, producing shrapnel-like metal shards during airbag inflation. To mitigate these effects, Takata began manufacturing PSAN airbag inflators containing desiccant to prevent the adsorption of moisture to the PSAN particles. While some inflators with desiccant have been recalled, others are still under evaluation and may or may not be recalled in the future.[16]

A 2015 Safety Data Sheet (SDS) for Takata pyrotechnic automotive safety devices, including airbag modules and airbag inflators, describes the hazards of the devices, including an ''[i]nitiation hazard of an uncontrolled activation of the safety device due to: Fire; heat; electrostatic discharge; inductions through electromagnetic radiation; or, excessive mechanical load'' and a ''[b]urn hazard when there is direct contact with pyrotechnic safety device during activations.'' [17] The firefighting measures described in the SDS include evacuating personnel and emergency responders for 1500 feet (⅓ mile). In the event of spilled material from damaged devices, the SDS recommends that an explosive expert conduct the cleanup using anti-static equipment.

Propagation and bonfire testing results submitted to EPA by Takata provides further information regarding the hazards posed by recalled Takata inflators.[18] In September 2016, a third-party company performed sympathetic propagation testing on two types of recalled Takata airbag inflators for Takata. The testing generally consisted of bundling several inflators together and deploying the center inflator in order to observe the effects of deployment on the surrounding inflators. The results of the testing showed that deployment of one inflator does not cause deployment of surrounding inflators. In some tests, the center inflator fragmented, but it still did not cause surrounding inflators to deploy or fragment, although some superficial damage to the surrounding inflators did occur. In April 2017, a third-party company performed the UN 6(c) external fire (bonfire) test on recalled Takata airbag inflators in individual fiberboard boxes. The inflators did not mass detonate when exposed to fire, but they did initiate, as

[7] Ignitable hazardous waste carries the waste code D001.

[8] Reactive hazardous waste carries the waste code D003.

would be expected when inflators are exposed to temperatures generated by this type of fire. In some cases, they were propelled from their initial locations of rupture, throwing fragments beyond the initial location of the inflator.

C. Damage Incidents Related to Airbag Inflator Recycling

While non-Takata airbag inflators do not present the same shrapnel-producing defect as recalled Takata airbag inflators, these airbag inflators can still present an explosive risk when processed or recycled, as demonstrated by recent incidents at two facilities. In February 2015, an explosion and fire occurred at one airbag manufacturing and recycling facility as two workers handled airbag inflators that had been processed in an incinerator prior to recycling the metal.[19] In that incident, one worker was hospitalized with head injuries and burns. In March 2018, a large explosion at a different airbag recycling facility in the dedicated airbag recycling area killed one worker and seriously injured another.[20] This explosion is suspected to have been caused by the ignition of aluminum dust, which was created in the process of shredding airbag inflators. These incidents demonstrate the characteristically hazardous nature of waste airbag inflators and their component materials and the potential risk they pose to human health during processing.

D. Impact of Takata Bankruptcy and the Amended Preservation Order on Management of Takata Inflators

2015 Preservation Order

A Preservation Order issued by DOT and signed by Takata in February 2015 required all recalled airbag inflators be preserved intact, except for those utilized for testing purposes. Takata was required to take all reasonable and appropriate steps designed to prevent the partial or full destruction, alteration, deletion, shredding, incineration or loss of recalled or returned inflators, ruptured inflators and any other inflators under the recalls. The recalled Takata inflators were organized into categories of inflators that must be preserved. Ruptured inflators from field events were required to be preserved in a locked, secured, climate-controlled area, except for testing, inspection or analysis purposes. Recalled or returned inflators were also to be kept in a locked, secured and climate-controlled area.

EPA June Memorandum

In the June 23, 2017 memorandum, EPA clarified that the recalled Takata airbag inflators are not subject to RCRA Subtitle C regulatory requirements while they are being held under the 2015 DOT Preservation Order because EPA does not consider materials being stored pending judicial proceedings or investigations to be ''discarded.'' This interpretation is consistent with previous interpretations EPA has taken on similar materials, such as seized fireworks held as evidence and materials from aircraft accidents subject to investigation, where such items would otherwise be considered hazardous waste.[21] [22] Additionally, EPA clarified that Takata recalled airbag inflators would be considered ''used'' (*i.e.,* spent materials), and therefore a solid waste, once the preservation requirements are lifted. When the recalled Takata airbag inflators are discarded as a solid waste, EPA believes that they meet both the ignitability and reactivity hazardous waste characteristics.[23]

Impact of Takata Bankruptcy on Recall Procedures

Takata's U.S. subsidiary, TK Holdings Inc., filed for Chapter 11 bankruptcy on June 25, 2017, and received U.S. court approval for its plan on February 21, 2018.[24] Takata's manufacturing assets were sold to Key Safety Systems, another automobile safety system manufacturer, and the money from the sale was used to settle debts and legal claims. A small portion of the company emerged from bankruptcy and has a section dedicated to facilitating the replacement of recalled airbag inflators.[25] Takata's plan sets aside funds designated for the removal, handling and eventual disposal of recalled airbag inflators received before the effective date of the bankruptcy, April 10, 2018, and states that Takata will continue to provide replacement airbag inflators until the recall process is finished, expected in 2020.[26] Takata will also continue to receive recalled airbag inflators for storage prior to testing or eventual disposal after April 10, 2018, although it is not required to do so. EPA's understanding is that Takata will charge the automobile manufacturers to cover the costs associated with storage and eventual disposal of these inflators received after April 10, 2018. These costs include the overhead expenses associated with Takata managing the collection, storage, and disposal of airbag inflators, including wages and benefits for their workers that are involved in handling and coordinating the movement of the inflators. Prior to the bankruptcy effective date, Takata accepted and managed these inflators from the affected vehicle manufacturers free of charge.

2018 Amended Preservation Order

The April 12, 2018 Amendment to the February 25, 2015 Preservation Order and Testing Control Plan, issued by the U.S. DOT's NHTSA, requires Takata to preserve certain airbag inflators that are the subject of an ongoing defect investigation by NHTSA and the subject of private litigation.[27] The Amendment also requires Takata to implement a control plan for the inspection, testing, or analysis of those inflators.

The original 2015 Preservation Order required Takata to preserve indefinitely all affected airbag inflators, while the 2018 Amendment enables Takata to reduce the number of preserved airbag inflators by requesting the release of certain inflators from the Preservation Order allowing them to be disposed in compliance with all applicable regulations, including RCRA. The Amended Order also requires Takata to account for returned foreign and other ammonium-nitrate containing inflators. The Amendment applies to Takata airbag inflators removed from vehicles as a result of recalls affecting the 19 vehicle manufacturers.

The terms of the Amendment require Takata to track all airbag inflators in its possession by unique serial number and set aside at least 5% of inflators,

[25] To avoid confusion, the entities responsible for managing the Takata airbag inflator recalls, including Takata's post-bankruptcy successor company TK Global, will collectively be referred to as ''Takata'' in this preamble.

[26] U.S. Bankruptcy Court—District of Delaware, *Fifth Amended Joint Chapter 11 Plan of Reorganization of TK Holdings Inc. and its Affiliated Debtors,* filed February 20, 2018.

[27] National Highway Traffic Safety Administration (NHTSA), *Amendment to the February 25, 2015 Preservation Order and Testing Order Control Plan,* April 12, 2018, EA15–001 (formerly PE14–016). *https://www.nhtsa.gov/sites/nhtsa.dot.gov/files/documents/preservation_order_amendment_public_-_april_12_2018-tag.pdf.*

proportionate to the overall number of inflators received from each State and of each type of inflator, for future analysis. The Amendment allows Takata to submit Disposal Designations to NHTSA, identifying a specific quantity of inflators to be released from preservation and disposed. The designated inflators are considered released from the Preservation Order fifteen business days after NHTSA's confirmation of receipt of the Disposal Designation.

Although the affected vehicle manufacturers may choose to contract with Takata's post-bankruptcy reorganized entity to transport and store recalled airbag inflators, they are not required to do so by the Preservation Order or Amendment. If a vehicle manufacturer chooses to contract with the Takata entity, the Takata entity must preserve those airbag inflators under the terms of the Preservation Order, and therefore those airbag inflators are not solid wastes per EPA's June 23, 2017 memorandum as described above. However, a vehicle manufacturer may choose not to contract with the Takata entity for a variety of reasons, including increased cost, increased liability, and slower disposal, in which case those airbag inflators would not be covered by the Preservation Order or Amendment, and would be considered discarded when removed from the vehicle.

V. Rationale for Conditional Exemption for Collection of Airbag Waste

In its 2015 Coordinated Remedy Order pertaining to the Takata airbag recalls, DOT found that it was imperative to accelerate the rate of the recalls because ''[e]ach airbag inflator with the capacity to rupture, as the recalled Takata inflators do, presents an unreasonable risk of serious injury or death. . .Since the propensity for rupture increases with the age of the inflator, and increases even more when the vehicle has been exposed to consistent long-term HAH [high absolute humidity] conditions, the risk for injurious or lethal rupture increases with each passing day.'' [28]

Since the original order was issued by DOT, the affected vehicle manufacturers have been working steadily to remove the recalled Takata airbag inflators from vehicles. As discussed earlier, because of DOT's Preservation Order, the recalled airbag inflators have not been regulated as hazardous waste and have instead been safely collected, transported as hazardous materials and stored under the Preservation Order.

With the amendment to DOT's Preservation Order and with Takata's restructuring due to bankruptcy, vehicle manufacturers may now dispose of recalled inflators that are not covered by the amended Preservation Order directly, rather than sending them to the Takata warehouses for long-term storage. This approach is preferable from a public health and environmental protection perspective both because it reduces the volume of inflators in long-term storage and because it is more efficient in freeing up resources spent on handling and storage that can be spent directly on the recalls themselves.

However, because this subset of recalled inflators is not subject to the DOT Preservation Order, they would be regulated as hazardous waste. As a result, many automobile dealers and other entities who continue to replace recalled airbag inflators at the current rate of repair would become subject to additional hazardous waste generator requirements in 40 CFR part 262, which would impose additional regulatory obligations on the dealers' and salvage vendors' management of the inflators.

Most automobile dealers and salvage vendors are currently in the category of ''Very Small Quantity Generators'' of hazardous waste. By managing hazardous airbag waste, the dealers and salvage vendors would likely generate sufficient amounts of hazardous waste (on a monthly basis) to become subject to increased regulations associated with higher generator categories for which dealers and salvage vendors typically have not had experience, familiarity, or expertise. Imposing these increased generator obligations on dealers and salvage vendors would result in a much less efficient, effective and environmentally protective approach to the urgent, time-critical recall effort. Through our conversations with DOT, the automobile manufacturers, automotive salvage vendors, and other affected stakeholders, EPA has learned that imposing full generator requirements on automobile dealers and salvage vendors who lack the expertise and experience in managing hazardous waste might result in the slowdown, rather than the necessary acceleration, of the recall effort, resulting in greater harm to human health and the environment.[29] The automobile manufacturers are worried that, because of their lack of familiarity and expertise with full RCRA hazardous waste generator regulations and the additional costs related to the management of hazardous waste in these higher generator categories, if the dealers were to become fully regulated small or large quantity generators due to handling recalled airbag waste, they may slow down or stop removing recalled airbag inflators altogether. In addition, some stakeholders have expressed their concern of a lack of hazardous waste transportation capacity, especially in more sparsely populated rural areas of the country. As hazardous waste generators, dealers would be required to use certified hazardous waste transporters, which are less numerous and more expensive than standard hazardous material transporters used to transport recalled inflators under the DOT preservation order. Thus, placing full hazardous waste generator requirements on dealers or salvage yards would not be the most efficient or environmentally protective approach for the above reasons. In contrast, as explained in the following section, an airbag waste collection facility under the control of a vehicle manufacturer or their authorized representative or under the control of an authorized party administering a remedy program in response to the recalls or a designated facility as defined in 40 CFR 260.10, has greater expertise and familiarity in properly managing hazardous waste.

A related but separate issue involves airbag modules and airbag inflators scavenged from scrapped automobiles. One vendor company has been involved in the collection of Takata airbag modules from the approximately 6,000 salvage yards in the United States. The company was approached by one automobile manufacturer after they discovered a number of injuries were caused by recalled Takata airbag inflators recovered from salvage yards and installed in other vehicles. The salvage vendor worked with the automobile manufacturer, DOT, and the independent monitor to put together a program to retrieve airbag modules containing recalled airbag inflators before the inflators can be removed and placed in another vehicle because at that point, they are virtually untraceable. The vendor collects the airbag and brings them to a central location where they undergo a validation step to determine whether they are definitively recalled airbag inflators. This validation includes using visual aids and scanning all VIN and serial numbers. The vendor also supplies specifically designed packaging and handles the

[28] National Highway Traffic Safety Administration (NHTSA), *Coordinated Remedy Order,* November 3, 2015, Docket No. NHTSA–2015–0055. *https://www.nhtsa.gov/sites/nhtsa.dot.gov/files/documents/nhtsa-coordinated remedyorder-takata.pdf.*

[29] EPA 2018. *Compilation of Stakeholder Meeting Summaries Regarding RCRA Regulation of Airbag Waste.*

transportation for the airbag modules. Once a pallet of validated airbag modules is collected (approximately 100–110 pieces), the pallet is sent for disposal and a certificate of destruction is provided. The airbag modules are transported in compliance with DOT hazardous materials regulations. According to this vendor, if the airbag modules must be handled as RCRA hazardous waste when removed from a vehicle in the salvage yard, the salvage yards would likely stop removing them.

Due to the potential for the replacement of defective Takata airbag inflators to slow down with the application of full RCRA generator requirements, EPA has determined that modified RCRA requirements are appropriate for automobile dealers, salvage yards, and other entities that are removing the recalled airbag inflators and facilitating the recalls.

As discussed earlier, any potential delay to the recalls presents an immediate public health threat, increasing the chances of death or serious injury due to a defective airbag deploying in a vehicle. Moreover, the system for managing the recalled airbag modules and inflators under the DOT Preservation Order over the last three years has provided for protection of human health and the environment during collection and transport of the airbag modules and inflators. Under the recalls, each individual recalled inflator is tracked by vehicle identification number, and subject to DOT packaging and transportation regulations. Vehicle manufacturers work with their dealers to make sure that the recalled inflators are quickly moved offsite and not over-accumulated, and have a strong incentive from a liability perspective to continue to do so in the future.

The conditions for the exemption promulgated by this rule mirror how recalled airbag modules and airbag inflators have been managed under the DOT Preservation Order during the past three years, except that instead of going to long-term storage under the Preservation Order, the collected airbag waste will be sent for safe disposal at a RCRA facility designated to receive hazardous waste per 40 CFR 260.10. Thus, exempting the collection of airbag waste from RCRA requirements, provided certain conditions are met, will result in an increase in protection of public health by facilitating the recalls, allowing the current airbag waste collection system to continue to safely collect the recalled inflators, and sending them directly to appropriate disposal facilities rather than to long-term storage facilities under the Preservation Order.

As previously explained in other rulemakings, EPA has authority under RCRA to issue conditional exclusions from the hazardous waste regulations. EPA has previously interpreted RCRA section 3001(a) to authorize the issuance of ''conditional exemptions'' from the requirements of RCRA Subtitle C, where it determines that ''a waste might pose a hazard only under limited management scenarios, and other regulatory programs already address such scenarios.'' 62 FR at 6636 (February 12, 1997); 66 FR at 27222–27223 (May 16, 2001). The final rule takes a similar approach to those earlier rules.

Section 3001(a) requires that EPA decide whether a waste ''should be subject to'' the requirements of RCRA Subtitle C. Hence, RCRA section 3001 authorizes EPA to determine when subtitle C regulation is appropriate. EPA has consistently interpreted section 3001 of RCRA to give it broad flexibility in developing criteria for hazardous wastes to enter or exit the Subtitle C regulatory system.

RCRA section 1004(5) further supports EPA's interpretation. This interpretation has also been upheld upon judicial review. See, *e.g., Military Toxics Project* v. *EPA,* 146 F. 3d 948 (DC Cir. 1998) (upholding conditional exemption for storage of military munitions, based on EPA determination that such wastes are subject to binding standards that meet or exceed RCRA standards, in addition to an institutional oversight process.) EPA has interpreted the statutory definition of hazardous waste in RCRA section 1004(5)(B) as incorporating the idea that a waste that is otherwise hazardous does not require regulation under RCRA so long as it is properly managed.

EPA has most recently provided a full discussion of EPA's authority for conditional exclusion from RCRA Subtitle C requirements in the preamble in its final rule entitled Hazardous Waste Management System: Conditional Exclusion for Carbon Dioxide (CO2) Streams in Geologic Sequestration Activities, 79 FR 350, 353–354 (January 3, 2014). Consistent with that rule, and other rules involving conditional exemptions, EPA has determined in this rule, as discussed above, that exempting the collection of airbag waste from RCRA requirements, provided certain conditions are met, will result in an increase in protection of public health by facilitating the recalls and allowing the current airbag waste collection system to continue to safely collect the recalled inflators. It is important to note, however, that this conditional exemption only applies to the storage and transport of airbag waste during collection. The final disposition of the hazardous airbag waste continues to be regulated under applicable RCRA Subtitle C hazardous waste regulations.

EPA has received requests from stakeholders to unconditionally exempt airbag modules and inflators from RCRA hazardous waste regulations.[30] However, EPA has determined, based on the nature of the waste and the damage cases that have occurred at airbag recycling facilities, an exemption for the final disposition of airbag waste would not be protective of human health and the environment. While the collection of intact airbag modules and inflators by vehicle manufacturers or their authorized representatives according to DOT requirements can be done safely without imposing RCRA requirements beyond the conditions of the exemption discussed in this preamble, processing the airbag inflator, which requires treatment of the ignitable and reactive propellant inside the inflator, is another matter. As discussed earlier, there have been at least two explosions at airbag recycling facilities, including one that resulted in a fatality, and in the case of the recalled Takata airbag inflators, the degraded nature of the propellant makes the potential for explosive reactions even worse. The protections provided by a RCRA Subtitle C hazardous waste permitted facility, including personnel training, inspections, contingency planning and emergency response, and an informed community through public participation address the risk of explosion from the end-of-life management of the collected airbag waste.

EPA solicits comment on the conditional exemption for airbag waste, including the applicability of the exemption and the specific requirements of this conditional exemption as explained in this preamble. EPA will consider these comments in determining whether any additional revisions to the regulation of airbag waste are necessary in the future.

VI. Summary of Requirements of the Conditional Exemption for the Collection of Airbag Waste

A. Applicability of Conditional Exemption

The new airbag waste conditional exemption found at 40 CFR 261.4(j) applies to all airbag waste (*i.e.,* airbag modules and airbag inflators) collected from auto dealers or other airbag waste handlers for the purpose of safe

[30] EPA 2018. *Compilation of Stakeholder Meeting Summaries Regarding RCRA Regulation of Airbag Waste.*

disposal. Entities that generate airbag waste under the conditional exemption are referred to as ''airbag waste handlers'' and can include automobile dealers, independent repair facilities, collision centers, and salvage and scrap yards.

The vast majority of items affected by the conditional exemption will be Takata airbag waste. As of August 2018, an estimated 50 million defective airbag inflators were under recall in approximately 37 million U.S. vehicles, with the potential for more recalls to be issued in the future.

However, EPA has determined that the conditional exemption should also apply to the collection of non-Takata airbag waste for the purpose of disposal, provided that the conditions of the exemption are met. Managing all airbag waste under the same protective requirements will avoid confusion, increase efficiency and will help prevent non-Takata airbag waste from being diverted into the municipal waste stream. Because non-Takata airbag waste is expected to be a much smaller volume waste than the recalled Takata airbag waste, in many cases automobile dealers that generate hazardous waste would be below the Very Small Quantity Generator threshold of 100 kilograms/month, which under the federal RCRA requirements in 40 CFR 262.14 would allow the non-Takata airbag waste to be disposed of in the municipal wastestream. Including these materials under the airbag waste conditional exemption is more protective of human health and the environment because it would encourage their disposal at hazardous waste management facilities. To make it clear that VSQGs have the option of managing their airbag waste under the airbag waste conditional exemption and sending their airbag waste to an airbag waste collection facility or a designated facility subject to the requirements of 40 CFR part 261.4(j), EPA is including a conforming change to the VSQG regulations at 40 CFR 262.14(a)(xi). (Note that the airbag waste conditional exemption does not prevent the airbag modules or airbag inflators from being managed under other applicable exemptions as explained in the July 2018 memo referenced in section IV.A. in this preamble) In addition, EPA also requests comment on expanding the applicability of the airbag waste exemption to include other similar propellent-actuated devices and their components. It would be helpful if commenters include detailed information on these additional wastestreams, including descriptions of the wastestreams, volumes generated, risks posed and current management practices.

B. Limits on Accumulation Times and Quantities at Airbag Waste Handlers

Based on information provided by automobile manufacturers, automobile dealers limit the quantity of recalled airbag modules and inflators stored onsite. According to one automobile manufacturer, guidance provided by Takata requires that dealers ship out the recalled airbag inflators that have been removed from vehicles every two weeks, or when the quantity reaches 200 inflators (*i.e.,* a small truckload).[31]

Limiting the quantity and accumulation times at airbag waste handlers for airbag waste prevents over-accumulation and limits the potential hazards posed by the inflators in case of a fire. Under the airbag waste exemption finalized in this action, airbag waste handlers are allowed to accumulate up to 250 airbag modules or airbag inflators for up to 180 days, whichever comes first. Limiting the quantity of airbag modules and airbag inflators accumulated onsite to 250 (*i.e.,* a little over one small truckload) allows the dealer and other airbag waste handlers to prepare one truckload for shipping while continuing to accumulate airbag waste for future shipments. The 180-day timeframe is based on the small quantity generator limits in 40 CFR 262.16, and addresses the future situation when the Takata recalls near completion, resulting in a slower turn-around in recalled inflators accumulated at the dealer. At that point it may take much longer to reach the 250-item limit, and the 180-day time limit ensures storage does not extend indefinitely, and that the airbag waste is safely disposed and not abandoned.

C. Packaging, Labeling and Transportation Requirements for Airbag Waste Handlers

During accumulation under the airbag waste exemption, airbag waste must be packaged in a container designed to address the risk posed by the airbag waste. Such a container would help reduce the potential for the airbag waste to react in case of a fire, and also reduce the projectile hazard if the defective Takata airbag inflators were to deploy. In most cases, this container would be the same container that the replacement airbag part was shipped in to the airbag handler, or, in the case of salvage yards, the container provided by the salvage recovery vendor. However, any container that meets DOT requirements for transporting the airbag items would meet the terms of the conditional exemption. Each container must be labeled ''Airbag Waste—Do Not Reuse.''

Airbag waste must be shipped directly to either (1) a designated facility as defined in 40 CFR 260.10, or (2) an airbag waste collection facility in the United States under the control of a vehicle manufacturer or their authorized representative, or under the control of an authorized party administering a remedy program in response to a recall under the National Highway Traffic Safety Administration. Airbag waste collection facilities may include part supply centers/parts distribution centers or any other facility authorized by vehicle manufacturers to collect their airbag waste and hold it for more than 10 days. (Airbag waste held at a transfer facility for less than 10 days is considered to be in transport and only subject to the DOT transportation regulations). Because the airbag waste is not subject to hazardous waste generator requirements under 40 CFR part 262 while at the airbag waste handler, the designated facility or the airbag waste collection facility that accepts the airbag waste from the airbag waste handler is considered the hazardous waste generator for the purposes of 40 CFR part 262 as the person whose act first causes a hazardous waste to become subject to the generator regulations.

D. Tracking and Recordkeeping Requirements for Airbag Waste Handlers

As a condition for exemption from RCRA hazardous waste requirements, airbag waste handlers must maintain at the facility and make available upon inspection certain records that document off-site shipments of airbag waste for a period of three years to help verify the airbag waste went to an appropriate destination. Specifically, for each shipment of airbag waste, the handler must maintain documentation of the date of each shipment, the name of each transporter, the type and quantity of airbag waste (*i.e.,* airbag modules or airbag inflators) shipped, and the name and address of the destination facility or airbag waste collection facility. This recordkeeping requirement may be fulfilled by ordinary business records, such as bills of lading, including electronic records. In addition, airbag waste handlers are required to maintain confirmations of receipt from the designated facility or airbag waste collection facility in order to verify that the airbag waste reached its intended destination and was not diverted. These receipts must be

[31] EPA 2018. *Compilation of Stakeholder Meeting Summaries Regarding RCRA Regulation of Airbag Waste,* Appendix 1.

maintained at the airbag waste handler for a period of three years. Specifically, the airbag waste handlers must maintain documentation of receipt that includes the name and address of the designated facility or airbag waste collection facility, the type and quantity of airbag waste (*i.e.,* airbag modules or airbag inflators) received, and the date which it was received. The Agency is not requiring a specific template or format for confirmations of receipt and anticipates that routine business records (*e.g.,* financial records, bills of lading, copies of DOT shipping papers, electronic confirmations of receipt, etc.) could contain the appropriate information sufficient for meeting this requirement. Note that these recordkeeping requirements will be implemented under an emergency Information Collection Request (ICR). Based on the public comments received on this rule, EPA will publish a separate revised ICR. See Section VIII.C in this preamble.

E. Prohibition on Reuse of Defective Airbag Modules and Airbag Inflators

While used airbag modules and used airbag inflators are not solid waste when reused for their intended purpose, in the case of airbag modules and airbag inflators that are subject to a recall under the National Highway Traffic Safety Administration, such reuse is not allowed under RCRA. Reuse of recalled Takata inflators is particularly dangerous due to the shrapnel producing defect that can cause death or serious injury when the airbag is deployed, even when the vehicle accident would otherwise be considered minor. As noted in a report by the Takata Independent Monitor, salvaged Takata inflators may pose an even greater risk than other defective Takata inflators due to possible exposure to high heat and humidity for an extended time in the scrap vehicles. In one case, a vehicle that was repaired with a salvaged Takata airbag inflator was involved in a minor accident. The resulting shrapnel from deployment of the defective resulted in serious injury to the driver. The family owning the car had no reasonable way of knowing that it contained a defective inflator.[32] Any person who reuses a defective inflator or causes it to be reused may therefore be placing another person in imminent danger of death or serious injury. Such a reuse would not meet the definition of legitimate recycling in 40 CFR 260.43 and would be considered sham recycling under 40 CFR 261.2(g). Specifically, because the defective airbag modules and airbag inflators cannot serve as an effective substitute for a commercial product, and do not otherwise provide a useful contribution per 40 CFR 260.43(a)(1), their reuse is considered to be sham recycling and prohibited under the hazardous waste regulations.

[32] National Highway Traffic Safety Administration (NHTSA), *The State of Takata Airbag Recalls—Report of the Independent Monitor,* November 15, 2017. *https://www.nhtsa.gov/sites/nhtsa.dot.gov/files/documents/the_state_of_the_takata_airbag_recalls-report_of_the_independent_monitor_112217_v3_tag.pdf.*

VII. State Authorization

A. Applicability of Rules in Authorized States

Under section 3006 of RCRA, EPA may authorize a qualified state to administer and enforce a hazardous waste program within the state in lieu of the federal program, and to issue and enforce permits in the state. A state may receive authorization by following the approval process described in 40 CFR 271.21 (see 40 CFR part 271 for the overall standards and requirements for authorization). EPA continues to have independent authority to bring enforcement actions under RCRA sections 3007, 3008, 3013, and 7003. An authorized state also continues to have independent authority to bring enforcement actions under state law.

After a state receives initial authorization, new federal requirements and prohibitions promulgated under RCRA authority existing prior to the 1984 Hazardous and Solid Waste Amendments (HSWA) do not apply in that state until the state adopts and receives authorization for equivalent state requirements. In contrast, under RCRA section 3006(g) (42 U.S.C. 6926(g)), new federal requirements and prohibitions promulgated under HSWA provisions take effect in authorized states at the same time that they take effect in unauthorized states. As such, EPA carries out the HSWA requirements and prohibitions in authorized states, including the issuance of new permits implementing those requirements, until EPA authorizes the state to do so.

Authorized states are required to modify their programs only when EPA enacts federal requirements that are more stringent or broader in scope than existing federal requirements. Under RCRA section 3009, states may impose standards that are more stringent or broader in scope than those in the federal program (see also 40 CFR 271.1(i)). Therefore, authorized states are not required to adopt new federal regulations that are considered less stringent than previous federal regulations or that narrow the scope of the RCRA program. Previously authorized hazardous waste regulations would continue to apply in those states that do not adopt ''deregulatory'' rules.

B. Effect on State Authorization of Interim Final Rule

The regulations finalized in this interim final rule are not promulgated under the authority of HSWA. Thus, the standards will be applicable on the effective date only in those states that do not have final authorization of their base RCRA programs. Moreover, authorized states are required to modify their programs only when EPA promulgates federal regulations that are more stringent or broader in scope than the authorized state regulations. For those changes that are less stringent, states are not required to modify their program. Pursuant to section 3009 of RCRA, states may impose more stringent regulations than the federal program. This rule eliminates specific hazardous waste requirements that would otherwise apply to airbag waste (airbag modules and airbag inflators) managed under the conditional exemption, and therefore, these changes are less stringent than the federal program and authorized states are not required to adopt them. However, if a state were, through implementation of state waiver authorities or other state laws, to allow compliance with the provisions of the conditional exemption in advance of adoption or authorization, EPA would not generally consider such implementation a concern for purposes of enforcement or state authorization. Of course, the state could not implement the requirements in a way that was less stringent than the federal requirements in this rule.

VIII. Statutory and Executive Order (E.O.) Reviews

A. Executive Order 12866: Regulatory Planning and Review & Executive Order 13563: Improving Regulation and Regulatory Review

This action is a significant regulatory action that was submitted to the Office of Management and Budget (OMB) for review. This rule has been determined significant because it raises novel legal or policy issues arising out of a legal mandate, the President's priorities or the principles set forth in the Executive Order. Any changes made in response to OMB recommendations have been documented in the docket. The EPA prepared an economic analysis of the potential costs and benefits associated with this action. This analysis, ''Economic Assessment of the Safe Management of Recalled Airbags Rule'',

is available in the docket. This analysis estimates the impacts of the rule relative to two separate baseline scenarios. The first baseline scenario assumes that all aspects of the Preservation Order established between Takata and the Department of Transportation in February 2015 and amended in April 2018 will remain in effect until the completion of the recall process. The alternative baseline scenario assumes the removal of the Preservation Order provisions that allow dealerships to disregard the volume of recalled airbag inflators when determining their hazardous waste generator status (*e.g.,* LQG) under RCRA. For each baseline and for the rule, EPA created a monthly schedule in order to estimate the number of airbag inflators shipped, accumulated, and disposed of by affected entities. EPA then assigned unit costs for storage, transport, management, and disposal of airbag inflators for each scenario to estimate the cost savings associated with this regulation. The cost impacts of the rule were then calculated as the difference between post-rule costs and costs under each baseline scenario. In summary, this regulatory action is expected to result in a total cost savings between $7.6 million and $56.9. million for the duration of the Takata recalls, resulting in an estimated annual cost savings of $1.7 million to $13.0 million per year (discounted at 7%).

B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs

This action is considered an Executive Order 13771 deregulatory action. Details on the estimated cost savings of this final rule can be found in EPA's analysis of the potential costs and benefits associated with this action.

C. Paperwork Reduction Act (PRA)

The information collection activities in this rule have been granted emergency approval by the Office of Management and Budget (OMB) under the PRA. The Information Collection Request (ICR) that has been approved by OMB was assigned EPA ICR number 2589.02 and OMB Control Number 2050–0221. You can find a copy of the ICR in the docket for this rule, and it is briefly summarized here.

The collection of information is necessary in order to ensure that the hazardous waste airbag modules and airbag inflators exempted under this rule are safely disposed of and that defective airbag modules and airbag inflators are not reinserted into vehicles where they would pose an unreasonable risk of death or serious injury. Information collection activities include requiring affected entities maintain copies of shipping records and confirmations of receipt for three years.

In addition to the emergency ICR which will implement the requirements for up to six months, EPA is also developing an ICR based on comments received on this rulemaking. Towards this goal, pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate.

Respondents/affected entities: The respondents will primarily be composed of automobile dealerships. These dealerships fall under NAICS code 441: Motor Vehicle and Parts Dealers.

Respondent's obligation to respond: The recordkeeping requirements for the interim final rule consist of maintaining at the airbag handler for no less than three years records of (1) all off-site shipments and (2) confirmations of receipt of airbag waste. The recordkeeping requirements may be fulfilled by ordinary business records, such as bills of lading, and are intended to allow the Agency to verify that the airbag waste reaches its intended destination and is not diverted back into vehicles. The statutory authority to require the recordkeeping activities derives from sections 2002, 3001, 3002, 3003, 3004, 3006, 3010, and 3017 of the Solid Waste Disposal Act of 1965, as amended by the Resource Conservation and Recovery Act of 1976 (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984 (HSWA).

Estimated number of respondents: EPA estimates that there will be 15,256 respondents per year.

Frequency of response: EPA estimates that average facility will make 3 relevant shipments per year over a 5-year period. The facilities must retain documentation for each shipment.

Total estimated burden: 4,200 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $130,791 (per year), includes $0 annualized capital or operation & maintenance costs.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for the EPA's regulations in 40 CFR are listed in 40 CFR part 9. When OMB approves this ICR, the Agency will announce that approval in the **Federal Register** and publish a technical amendment to 40 CFR part 9 to display the OMB control number for the approved information collection activities contained in this final rule.

D. Regulatory Flexibility Act

This action is not subject to the RFA. The RFA applies only to rules subject to notice and comment rulemaking requirements under the Administrative Procedure Act (APA), 5 U.S.C. 553, or any other statute. The APA exempts from notice and comment requirements rules for which an Agency finds ''for good cause'' that notice and an opportunity to comment are ''impracticable, unnecessary, or contrary to the public interest.'' The Agency is invoking this exemption to address exigent public health issues associated with the Takata airbag recalls.

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of $100 million or more as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local, or tribal governments or the private sector.

F. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. This action does not have substantial direct effects on one or more Indian tribes, on the relationship

between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

H. Executive Order 13045: Protection of Children From Environmental Health and Safety Risks

Section 5–502 of Executive Order 13045 provides that in emergency situations, or where the Agency is required by law to act more quickly than normal review procedures allow, the Agency shall comply with the Executive Order to the extent practicable. This action is being issued under a good cause exemption of notice and comment rulemaking under the APA to address an emergency situation associated with defective airbag inflators and risks to public health. The rule will remove potential regulatory impediments associated with the Takata airbag recalls. The recalls address explosion risks associated with faulty airbag deployment which could cause (and have caused) serious harm to passengers in vehicles, including children.

I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not a ''significant energy action'' because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. This rulemaking simply removes potential regulatory impediments associated with the Takata airbag recalls; therefore, by itself, this rulemaking will not have any effect on the supply, distribution or use of energy.

J. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes that this action is not subject to Executive Order 12898 (59 FR 7629, February 16, 1994) because the rule increases protection of human health and the environment by removing potential regulatory impediments associated with the Takata airbag recalls while ensuring safe management and disposal of airbag waste. The recalls address explosion risks associated with faulty airbag deployment which could cause (and have caused) serious harm to passengers, including passengers from minority and low-income communities.

M. Congressional Review Act

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. The CRA allows the issuing agency to make a rule effective sooner than otherwise provided by the CRA if the agency makes a good cause finding that notice and comment rulemaking procedures are impracticable, unnecessary or contrary to the public interest (5 U.S.C. 808(2)). The EPA has made a good cause finding for this rule as discussed in Section I.B. of this preamble, including the basis for that finding.

List of Subjects

40 CFR Part 260

Environmental protection, Administrative practice and procedure, Definitions, Hazardous waste.

40 CFR Part 261

Environmental protection, Hazardous waste, Recycling, Solid waste.

40 CFR Part 262

Environmental protection, Hazardous waste, Generator Standards.

Dated: November 13, 2018.

Andrew Wheeler,

Acting Administrator.

For the reasons set out in the preamble, title 40, chapter I of the Code of Federal Regulations is amended as follows:

PART 260—HAZARDOUS WASTE MANAGEMENT SYSTEM: GENERAL

■ 1. The authority citation for part 260 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6921–6927, 6930, 6935, 6937, 6938, 6939 and 6974.

Subpart B—Definitions

■ 2. Section 260.10 is amended by adding in alphabetical order definitions for ''Airbag waste'', ''Airbag waste collection facility'', and ''Airbag waste handler'' to read as follows:

§ 260.10 Definitions

* * * * *

Airbag waste means any hazardous waste airbag modules or hazardous waste airbag inflators.

Airbag waste collection facility means any facility that receives airbag waste from airbag handlers subject to regulation under § 261.4(j) of this chapter, and accumulates the waste for more than ten days.

Airbag waste handler means any person, by site, who generates airbag waste that is subject to regulation under this chapter.

* * * * *

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

■ 3. The authority citation for Part 261 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6921, 6922, 6924(y) and 6938.

Subpart A—General

■ 4. Section 261.4 is amended by adding reserved paragraph (i) and adding paragraph (j) to read as follows:

§ 261.4 Exclusions.

* * * * *

(j) *Airbag waste.* (1) Airbag waste at the airbag waste handler or during transport to an airbag waste collection facility or designated facility is not subject to regulation under parts 262 through 268, part 270, or part 124 of this chapter, and is not subject to the notification requirements of section 3010 of RCRA provided that:

(i) The airbag waste is accumulated in a quantity of no more than 250 airbag modules or airbag inflators, for no longer than 180 days;

(ii) The airbag waste is packaged in a container designed to address the risk posed by the airbag waste and labeled ''Airbag Waste–Do Not Reuse'';

(iii) The airbag waste is sent directly to either:

(A) An airbag waste collection facility in the United States under the control of a vehicle manufacturer or their authorized representative, or under the control of an authorized party administering a remedy program in response to a recall under the National Highway Traffic Safety Administration, or

(B) A designated facility as defined in 40 CFR 260.10;

(iv) The transport of the airbag waste complies with all applicable U.S. Department of Transportation regulations in 49 CFR part 171 through 180 during transit;

(v) The airbag waste handler maintains at the handler facility for no less than three (3) years records of all off-site shipments of airbag waste and all confirmations of receipt from the receiving facility. For each shipment, these records must, at a minimum, contain the name of the transporter and date of the shipment; name and address of receiving facility; and the type and quantity of airbag waste (*i.e.,* airbag modules or airbag inflators) in the shipment. Confirmations of receipt must include the name and address of the

receiving facility; the type and quantity of the airbag waste (*i.e.,* airbag modules and airbag inflators) received; and the date which it was received. Shipping records and confirmations of receipt must be made available for inspection and may be satisfied by routine business records (*e.g.,* electronic or paper financial records, bills of lading, copies of DOT shipping papers, or electronic confirmations of receipt).

(2) Once the airbag waste arrives at an airbag waste collection facility or designated facility, it becomes subject to all applicable hazardous waste regulations, and the facility receiving airbag waste is considered the hazardous waste generator for the purposes of the hazardous waste regulations and must comply with the requirements of 40 CFR part 262.

(3) Reuse in vehicles of defective airbag modules or defective airbag inflators subject to a recall under the National Highway Traffic Safety Administration is considered sham recycling and prohibited under 40 CFR 261.2(g).

PART 262—STANDARDS APPLICABLE TO GENERATORS OF HAZARDOUS WASTE

■ 5. The authority citation for part 262 continues to read as follows:

Authority: 42 U.S.C. 6906, 6912, 6922–6925, 6937, 6938 and 6939g.

Subpart A—General

■ 6. Section 262.14 is amended by revising paragraphs (a) introductory text and (a)(5) to read as follows:

§ 262.14 Conditions for exemption for a very small quantity generator.

(a) Provided that the very small quantity generator meets all the conditions for exemption listed in this section, hazardous waste generated by the very small quantity generator is not subject to the requirements of parts 124, 262 (except §§ 262.10 through 262.14) through 268, and 270 of this chapter, and the notification requirements of section 3010 of RCRA and the very small quantity generator may accumulate hazardous waste on site without complying with such requirements. The conditions for exemption are as follows:

* * * * *

(5) A very small quantity generator that accumulates hazardous waste in amounts less than or equal to the limits in paragraphs (a)(3) and (4) of this section must either treat or dispose of its hazardous waste in an on-site facility or ensure delivery to an off-site treatment, storage, or disposal facility, either of which, if located in the U.S., is:

(i) Permitted under part 270 of this chapter;

(ii) In interim status under parts 265 and 270 of this chapter;

(iii) Authorized to manage hazardous waste by a state with a hazardous waste management program approved under part 271 of this chapter;

(iv) Permitted, licensed, or registered by a state to manage municipal solid waste and, if managed in a municipal solid waste landfill is subject to part 258 of this chapter;

(v) Permitted, licensed, or registered by a state to manage non-municipal non-hazardous waste and, if managed in a non-municipal non-hazardous waste disposal unit, is subject to the requirements in §§ 257.5 through 257.30 of this chapter;

(vi) A facility which:

(A) Beneficially uses or reuses, or legitimately recycles or reclaims its waste; or

(B) Treats its waste prior to beneficial use or reuse, or legitimate recycling or reclamation;

(vii) For universal waste managed under part 273 of this chapter, a universal waste handler or destination facility subject to the requirements of part 273 of this chapter;

(viii) A large quantity generator under the control of the same person as the very small quantity generator, provided the following conditions are met:

(A) The very small quantity generator and the large quantity generator are under the control of the same person as defined in § 260.10 of this chapter. ''Control,'' for the purposes of this section, means the power to direct the policies of the generator, whether by the ownership of stock, voting rights, or otherwise, except that contractors who operate generator facilities on behalf of a different person as defined in § 260.10 of this chapter shall not be deemed to ''control'' such generators.

(B) The very small quantity generator marks its container(s) of hazardous waste with:

(*1*) The words ''Hazardous Waste''; and

(*2*) An indication of the hazards of the contents (examples include, but are not limited to, the applicable hazardous waste characteristic(s) (*i.e.,* ignitable, corrosive, reactive, toxic); hazard communication consistent with the Department of Transportation requirements at 49 CFR part 172 subpart E (labeling) or subpart F (placarding); a hazard statement or pictogram consistent with the Occupational Safety and Health Administration Hazard Communication Standard at 29 CFR 1910.1200; or a chemical hazard label consistent with the National Fire Protection Association code 704);

(ix)–(x) [Reserved]

(xi) For airbag waste, an airbag waste collection facility or a designated facility subject to the requirements of § 261.4(j) of this chapter.

* * * * *

BILLING CODE 6560–50–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

42 CFR Part 10

RIN 0906–AB19

340B Drug Pricing Program Ceiling Price and Manufacturer Civil Monetary Penalties Regulation

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Final rule; effective date change.

SUMMARY: The Health Resources and Services Administration (HRSA) administers section 340B of the Public Health Service Act (PHSA), which is referred to as the ''340B Drug Pricing Program'' or the ''340B Program.'' HHS published a final rule on January 5, 2017, that set forth the calculation of the 340B ceiling price and application of civil monetary penalties. On June 5, 2018, HHS published a final rule that delayed the effective date of the 340B ceiling price and civil monetary rule until July 1, 2019, to consider alternative and supplemental regulatory provisions and to allow for sufficient time for additional rulemaking. On November 2, 2018, HHS issued a proposed rule to solicit comments to change the effective date from July 1, 2019, to January 1, 2019, and to cease any further delay of the rule. HHS proposed this action because it determined that the January 5, 2017, final rule has been subject to extensive public comment, and had been delayed several times. HHS has considered the full range of comments on the substantive issues in the January 5, 2017, final rule. After consideration of the comments received on the effective date of the proposed rule, HHS is changing the effective date of the January 5, 2017, final rule, to January 1, 2019.

DATES: The effective date of the final rule published in the **Federal Register** on January 5, 2017, at 82 FR 1210, and delayed March 6, 2017 at 82 FR 12508, March 20, 2017 at 82 FR 14332, May 19, 2017 at 82 FR 22893, September 29,

2017 at 82 FR 45511, and June 5, 2018 at 83 FR 25944, is changed to January 1, 2019.

FOR FURTHER INFORMATION CONTACT: CAPT Krista Pedley, Director, Office of Pharmacy Affairs, Healthcare Systems Bureau, HRSA, 5600 Fishers Lane, Mail Stop 08W05A, Rockville, MD 20857, or by telephone at 301–594–4353.

SUPPLEMENTARY INFORMATION:

I. Background

HHS published a notice of proposed rulemaking (NPRM) in June 2015 to implement civil monetary penalties (CMPs) for manufacturers who knowingly and intentionally charge a covered entity more than the ceiling price for a covered outpatient drug; to provide clarity regarding the requirement that manufacturers calculate the 340B ceiling price on a quarterly basis and how the ceiling price is to be calculated; and to establish the requirement that a manufacturer charge a $.01 (penny pricing policy) for drugs when the ceiling price calculation equals zero (80 FR 34583, June 17, 2015). The public comment period closed on August 17, 2015, and HRSA received 35 comments.

After review of the initial comments, HHS reopened the comment period (81 FR 22960, April 19, 2016) to invite additional comments on the following areas of the NPRM: 340B ceiling price calculations that result in a ceiling price that equals zero (penny pricing); the methodology that manufacturers use when estimating the ceiling price for a new covered outpatient drug; and the definition of the ''knowing and intentional'' standard to be applied when assessing a CMP for manufacturers that overcharge a covered entity. The comment period closed May 19, 2016, and HHS received 72 comments.

On January 5, 2017, HHS published a final rule in the **Federal Register** (82 FR 1210, January 5, 2017). Comments from both the NPRM and the reopening notification were considered in the development of the final rule. The provisions of that rule were to be effective March 6, 2017; however, through a series of rules, HHS delayed the effective date of the January 5, 2017, final rule until July 1, 2019 (83 FR 25943, June 5, 2018). On November 2, 2018, HHS issued a proposed rule (83 FR 55135) to cease any further delay of the January 5, 2017, final rule and to change the effective date from July 1, 2019, to January 1, 2019. HHS received a number of comments both supporting and opposing the delay. After consideration of the comments received, HHS has decided to change the effective date of the January 5, 2017, final rule to January 1, 2019. The substantive provisions included in the January 5, 2017, final rule were subject to extensive public comment, and have been delayed several times. HHS has considered the full range of comments on the substantive issues in the January 5, 2017, final rule.

In previous rulemaking, delaying the effective date of the January 5, 2017, final rule, HHS stated that it ''is developing new comprehensive policies to address the rising costs of prescription drugs. These policies will address drug pricing in government programs, such as Medicare Parts B & D, Medicaid, and the 340B Program. Due to the development of these comprehensive policies, we are delaying the effective date for the January 5, 2017, final rule to July 1, 2019.'' (83 FR 25944)

However, as explained in the proposed rule, HHS has determined that the finalization of the 340B ceiling price and civil monetary penalty rule will not interfere with HHS's development of these comprehensive policies. Accordingly, HHS no longer believes a delay in the effective date is necessary and is changing the effective date of the rule from July 1, 2019, to January 1, 2019. The implementation date and the effective date will be the same.

II. Analysis and Responses to Public Comments

In the NPRM, HHS solicited comments to change the effective date from July 1, 2019, to January 1, 2019, and cease any further delay of the rule. HHS received approximately 160 comments, which contained a number of issues from covered entities, manufacturers, and groups representing these stakeholders. In this final rule, HHS will only respond to comments related to whether HHS should change the effective date of the January 5, 2017, final rule to January 1, 2019. HHS did not consider and does not address comments that raised issues beyond the narrow scope of the NPRM, including comments related to broader policy matters. HHS has summarized the relevant comments received and provided its responses below.

Comment: Some commenters urge HHS not to change the effective date to January 1, 2019, and to further delay the rule to refocus the 340B Program on its mission, and issue new reforms. Commenters also express concern that the new ceiling price system has not yet been released, substantive guidance on the system has not been issued, and stakeholders will not have had an opportunity to gain experience in the system before the enforcement mechanism for the system becomes effective. These commenters recommend that HHS delay implementation until it rolls out the new ceiling price system in a thoughtful manner. Finally, the commenters state that first issuing substantive guidance on the new pricing system would be more consistent with fundamental fairness in a civil penalty enforcement context, inasmuch as program stakeholders should understand their substantive obligations and the timeframes for compliance prior to any enforcement activity.

Response: HHS does not believe that the issuance of additional guidance is needed in order to implement this final rule. Current policies under the 340B Program already provide stakeholders with sufficient guidance regarding programmatic compliance. More specifically, the January 5, 2017, final rule contains information related to the calculation of the 340B ceiling price and the imposition of CMPs against manufacturers who knowingly and intentionally overcharge a covered entity. In addition, the development of the 340B ceiling price reporting system has proceeded under a separate information collection request (ICR) process that is operational in nature and has not been contingent upon the specific provisions contained in the January 5, 2017, final rule. The ICR was submitted and approved by OMB on September 28, 2015, after a formal notice and comment process (80 FR 22207, April 21, 2015, OMB No. 0915–0327). HHS plans to release the 340B ceiling pricing reporting system shortly and HHS will communicate further information through its website. HRSA will also ensure all impacted stakeholders receive education and training to prepare to utilize the 340B ceiling price reporting system.

Comment: Commenters disagree with HHS that changing the effective date of the rule is necessary. Commenters also disagree that HHS has meaningfully responded to comments or considered the full range of comments on the substantive issues in the January 5, 2017, final rule, despite the rule being delayed several times. Commenters urge HHS to fully reconsider substantive comments on the January 5, 2017, final rule as the rule contains several policies that are inconsistent with the 340B statute and imposes unnecessary costs and needless administrative burdens on manufacturers.

Response: HHS has decided to change the effective date of the final rule to January 1, 2019, as the rule has been

subject to extensive public comment. HHS believes that it has had adequate time to consider comments on the substantive issues in the January 5, 2017, final rule. The rule is consistent with the 340B statute. HHS has the statutory authority under section 340B(d)(1)(B)(i)(I) of the PHSA to develop and publish through appropriate policy or regulatory issuance, the precisely defined standards and methodology for the calculation of 340B ceiling prices. HHS has undertaken the effort to issue the January 5, 2017, final rule to comply with this statutory provision. Section 340(d)(1)(B)(vi) of the PHSA also provides for the imposition of sanctions in the form of civil monetary penalties against manufacturers that knowingly and intentionally charge a covered entity a price for a 340B drug that exceeds the 340B ceiling price. HHS believes that CMPs provide a critical enforcement mechanism for HHS if manufacturers do not comply with statutory pricing obligations under the 340B Program.

Comment: Some commenters express concern that HHS has not provided an adequate rationale for its change of view on the need for additional rulemaking and HHS has not released information related to the ''comprehensive policies'' that it has suggested it intends to promulgate. The commenters explain that HHS made a decision to change course and put the Final Rule into effect before it has fully analyzed and explained to the public its conclusions on key issues it identified as requiring further consideration. The commenters contend that this contradicts the deliberative rulemaking principles at the heart of the Administrative Procedures Act.

Response: The effective date of the final rule, for which comments were collected multiple times, has now been delayed for almost two years. It has now been more than eight years since Congress instructed HHS to issue regulations concerning CMPs. The issues that HHS was examining are well documented in the January 5, 2017, final rule. Furthermore, HHS does not believe that a January 1, 2019, effective date will undermine the comprehensive policies under consideration within the Department to address rising drug prices. Given the significant delays, HHS feels that it would be more efficient for the rule to go into effect and assess the need for further rulemaking and guidance after the rule is in effect.

Comment: Some commenters express concern that HHS has not fully considered any new comprehensive policies that will curb the rising cost of drug prices and the 340B Program's impact on those rising prices. The commenters state that in previous rulemaking, HHS has stated that it would be counterproductive to effectuate the final rule prior to a more deliberative process of considering additional or alternative drug reform measures as HHS is in the process of developing new comprehensive policies to address the rising cost of prescription drugs, not limited to the 340B Program. These comments also explain that there is no basis for HHS to suddenly move up the effective date by six months and there is no material development that rationally justifies HHS's change of view on the need for additional rulemaking. They urge HHS to further delay until additional rulemaking is completed, as opposed to specifying a date certain.

Response: HHS disagrees with the commenters. HHS has issued several policies related to lowering prescription drug prices, particularly in the Medicare Program. HHS also notes that as previously discussed in other rulemaking related to this issue, HHS continues to explore other policy documents related to drug pricing in government programs, including the 340B Program.

In addition, commenters have not demonstrated that the finalization of the January 5, 2017, final rule would interfere with HHS's development of these comprehensive policies. As such, HHS does not believe that any further delay is necessary and is changing the effective date of the final rule from July 1, 2019, to January 1, 2019.

The effective date of the final rule has been delayed for nearly two years, which has provided affected entities more than enough time to prepare for its requirements.

Comment: Several commenters urge HHS to specify that the January 5, 2017, final rule's effective date is at least two quarters after the final rule's publication in the **Federal Register**. These commenters raise that in the January 5, 2017, final rule, HHS explicitly noted that the implementation date would be April 1, 2017, the beginning of the next quarter thereby providing a full quarter for implementation. They believe that HHS should follow the same logic here and anticipate publication of a final rule around January 1, 2019, with implementation coinciding with the beginning of the second quarter of 2019, April 1, 2019. They contend that many companies have not completed operational and other process changes because manufacturers fully expected that HHS would revisit the rule and address the rule's significant infirmities. These commenters raise that HHS previously indicated that it would delay the January 5, 2017, final rule to July 1, 2019, and an abrupt change such as this, with fewer than 60 days to implement, makes it difficult for companies—particularly smaller manufacturers—to upgrade their operational systems in time to ensure compliance with the rule. These commenters explain that there is no precedent where the established effective date of a rule imposing substantial compliance burdens on regulated parties was accelerated. Finally, these commenters state that reducing the effective date by six months will negatively affect their ability to come into compliance, which could be compounded by the implementation of the CMP provisions.

Response: Based on the review of the comments received, HHS has determined that the January 5, 2017, final rule will be effective January 1, 2019. The implementation date and the effective date will be the same. Unlike the previous rule, which was effective in the middle of a quarter, this rule is effective at the beginning of a quarter. HHS does not agree that a further delay is necessary for implementation. Manufacturers that offer 340B ceiling prices as of the quarter beginning January 1, 2019, must comply with the requirements of the January 5, 2017, final rule. HHS believes that since the January 5, 2017, final rule was issued, stakeholders have had sufficient time to adjust systems and update their policies and procedures.

Comment: Some commenters urge HHS to publish the ceiling price data on a secure website shortly after January 1, 2019, because the website is essential for effective enforcement of the 340B Program. These commenters explain that entities have no way of detecting overcharges and are at the mercy of manufacturers.

Response: While the ceiling price reporting system is not directly governed by this rule, HHS agrees that covered entities will be able to utilize the system to detect overcharges. As previously stated, the 340B ceiling pricing reporting system is forthcoming, and HHS will convey further updates through its website. HRSA will ensure all impacted stakeholders receive education and training on how to utilize the system.

Comment: Many commenters supported changing the effective date to January 1, 2019, and stated that any other delay would be unreasonable and would continue to reward manufacturers that are flouting ceiling price requirements. The commenters urge HHS to promptly enforce the final rule in order to bring drug companies

into compliance and to ensure that 340B providers are able to ''stretch scarce federal resources as far as possible, reaching more eligible patients and providing more comprehensive services'' as Congress intended. The commenters state that the rule is entirely consistent with HHS's stated goal of addressing the issue of the rising costs of prescription drugs. These commenters also explain that CMPs are an important deterrent to manufacturers who knowingly overcharge entities and initiatives to strengthen manufacturer transparency should be supported.

Response: For reasons stated above, HHS agrees with the commenters that any other delay is unreasonable and will change the effective date of the January 5, 2017, final rule, to January 1, 2019.

III. Regulatory Impact Analysis

HHS has examined the effects of this final rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 8, 2011), the Regulatory Flexibility Act (September 19, 1980, Pub. L. 96–354), the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), and Executive Order 13132 on Federalism (August 4, 1999).

Executive Orders 12866, 13563, and 13771

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 is supplemental to and reaffirms the principles, structures, and definitions governing regulatory review as established in Executive Order 12866, emphasizing the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility.

Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as an action that is likely to result in a rule: (1) Having an annual effect on the economy of $100 million or more in any 1 year, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities (also referred to as ''economically significant''); (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order. A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million or more in any 1 year), and a ''significant'' regulatory action is subject to review by the Office of Management and Budget (OMB).

HHS does not believe that this final rule to change the effective date of the January 5, 2017, final rule from July 1, 2019, to January 1, 2019, will have an economic impact of $100 million or more in any 1 year, and is therefore not designated as an ''economically significant'' final rule under section 3(f)(1) of Executive Order 12866. The 340B Program as a whole creates significant savings for entities purchasing drugs through the program, with total purchases estimated to be $19 billion in CY 2017. This final rule to implement the January 5, 2017, final rule would codify current policies regarding calculation of the 340B ceiling price and manufacturer civil monetary penalties. HHS does not anticipate that the imposition of civil monetary penalties would result in significant economic impact.

When the 2017 Rule was finalized, it was described as not economically significant. Therefore, changing the effective date of the 2017 Rule is also not likely to have an economically significant impact.

Specifically, the RIA for the 2017 Rule stated that, ''[. . .]manufacturers are required to ensure they do not overcharge covered entities, and a civil monetary penalty could result from overcharging if it met the standards in this final rule. HHS envisions using these penalties in rare situations. Since the Program's inception, issues related to overcharges have been resolved between a manufacturer and a covered entity and any issues have generally been due to technical errors in the calculation. For the penalties to be used as defined in the statute and in this [2017] rule, the manufacturer overcharge would have to be the result of a knowing and intentional act. Based on anecdotal information received from covered entities, HHS anticipates that this would occur very rarely if at all.'' Since the civil penalties envisioned in the 2017 Rule were expected to be rare, changing the effective date of these civil penalties is unlikely to have an economically significant impact.

Executive Order 13771 (January 30, 2017) requires that the costs associated with significant new regulations ''to the extent permitted by law, be offset by the elimination of existing costs associated with at least two prior regulations.'' This rule is not subject to the requirements of Executive Order 13771 because this rule results in no more than *de minimis* costs.

The Regulatory Flexibility Act (RFA)

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) (RFA) and the Small Business Regulatory Enforcement and Fairness Act of 1996, which amended the RFA, require HHS to analyze options for regulatory relief of small businesses. If a rule has a significant economic effect on a substantial number of small entities, the Secretary must specifically consider the economic effect of the rule on small entities and analyze regulatory options that could lessen the impact of the rule. HHS will use an RFA threshold of at least a three percent impact on at least five percent of small entities.

The final rule would affect drug manufacturers (North American Industry Classification System code 325412: Pharmaceutical Preparation Manufacturing). The small business size standard for drug manufacturers is 750 employees. Approximately 600 drug manufacturers participate in the Program. While it is possible to estimate the impact of the final rule on the industry as a whole, the data necessary to project changes for specific manufacturers or groups of manufacturers were not available, as HRSA does not collect the information necessary to assess the size of an individual manufacturer that participates in the 340B Program. For purposes of the RFA, HHS considers all health care providers to be small entities either by virtue of meeting the Small Business Administration (SBA) size standard for a small business, or for being a nonprofit organization that is not dominant in its market. The current SBA size standard for health care providers ranges from annual receipts of $7 million to $35.5 million. As of January 1, 2017, over 12,000 covered entities participate in the 340B Program, which represent safety-net healthcare providers across the country. HHS has determined, and the Secretary certifies that this final rule will not have a significant impact on the operations of a substantial number of small manufacturers; therefore, we are not preparing an analysis of impact for the purposes of this RFA. HHS estimates

that the economic impact on small entities and small manufacturers will be minimal and less than 3 percent.

Unfunded Mandates Reform Act

Section 202(a) of the Unfunded Mandates Reform Act of 1995 requires that agencies prepare a written statement, which includes an assessment of anticipated costs and benefits, before proposing ''any rule that includes any Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any one year.'' In 2018, that threshold is approximately $150 million. HHS does not expect this rule to exceed the threshold.

Executive Order 13132—Federalism

HHS has reviewed this final rule in accordance with Executive Order 13132 regarding federalism, and has determined that it does not have ''federalism implications.'' This rule would not ''have substantial direct effects on the States, or on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The proposal to rescind the June 5, 2018, final rule and make the January 5, 2017, final rule effective as of January 1, 2019, would not adversely affect the following family elements: Family safety, family stability, marital commitment; parental rights in the education, nurture, and supervision of their children; family functioning, disposable income or poverty; or the behavior and personal responsibility of youth, as determined under Section 654(c) of the Treasury and General Government Appropriations Act of 1999.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires that OMB approve all collections of information by a Federal agency from the public before they can be implemented. This final rule is projected to have no impact on current reporting and recordkeeping burden for manufacturers under the 340B Program. Changes finalized in this rule would result in no new reporting burdens.

Dated: November 27, 2018.

George Sigounas,

Administrator, Health Resources and Services Administration.

Approved: November 28, 2018.

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc. 2018–24243 of November 21, 2018 (83 FR 58818), entitled ''Medicare Program: Changes to Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems and Quality Reporting Programs'' (hereinafter referred to as the CY 2019 OPPS/ASC final rule with comment period), there was an error that is identified and corrected in the Correction of Errors section below.

II. Summary of Errors

On page 58818, we made an error in the **DATES** section under the heading ''Comment period.'' We inadvertently stated that comments on the payment classifications assigned to the interim Medicare Ambulatory Payment Classification (APC) assignments and/or status indicators of new or replacement Level II Healthcare Common Procedure Coding System (HCPCS) codes in the final rule with comment period must be received no later than 5 p.m. EST on December 3, 2018. The corrected date is January 2, 2019, 60 days from the date of filing for public inspection.

III. Waiver of Proposed Rulemaking

Under 5 U.S.C. 553(b) of the Administrative Procedure Act (APA), the agency is required to publish a notice of the proposed rule in the **Federal Register** before the provisions of a rule take effect. Similarly, section 1871(b)(1) of the Act requires the Secretary to provide for notice of the proposed rule in the **Federal Register** and provide a period of not less than 60 days for public comment. In addition, section 553(d) of the APA and section 1871(e)(1)(B)(i) mandate a 30-day delay in effective date after issuance or publication of a rule. Sections 553(b)(B) and 553(d)(3) of the APA provide for exceptions from the notice and comment and delay in effective date of the APA requirements; in cases in which these exceptions apply, sections 1871(b)(2)(C) and 1871(e)(1)(B)(ii) of the Act provide exceptions from the notice and 60-day comment period and delay in effective date requirements of the Act as well. Section 553(b)(B) of the APA and section 1871(b)(2)(C) of the Act authorize an agency to dispense with normal rulemaking requirements for good cause if the agency makes a finding that the notice and comment process is impracticable, unnecessary, or contrary to the public interest. In addition, both section 553(d)(3) of the APA and section 1871(e)(1)(B)(ii) of the Act allow the agency to avoid the 30-day delay in effective date where such delay is contrary to the public interest and an agency includes a statement of support.

We believe that this correcting document does not constitute a rulemaking that would be subject to these requirements. This correcting

document corrects a technical error in the preamble to the CY 2019 OPPS/ASC final rule with comment period but does not make substantive changes to the policies or payment methodologies that were adopted in the final rule. Rather, it is intended to ensure that the public has 60 days to comment on the payment classifications assigned to the interim APC assignments and/or status indicators of new or replacement Level II HCPCS codes in the CY 2019 OPPS/ASC final rule with comment period, which is the duration of the typical comment period on these topics.

In addition, even if this were a rulemaking to which the notice and comment procedures and delayed effective date requirements applied, we find that there is good cause to waive such requirements. Undertaking further notice and comment procedures to incorporate the correction in this document into the final rule or delaying the effective date would be contrary to the public interest because it is in the public's interest to have adequate time to comment on the payment classifications assigned to the interim APC assignments and/or status indicators of new or replacement Level II HCPCS codes included in the CY 2019 OPPS/ASC final rule with comment period.

Furthermore, such procedures would be unnecessary, as we are not altering our payment methodologies or policies, but rather, we are simply correcting the incorrect comment period end date. This correcting document is intended solely to ensure that the comment period end date included in the CY 2019 OPPS/ASC final rule with comment period is correct for those items on which the public can submit public comments. For these reasons, we believe we have good cause to waive the notice and comment and effective date requirements.

IV. Correction of Errors

In FR Doc. 2018–24243 of November 21, 2018 (83 FR 58818), make the following corrections:

1. On page 58818, in the second column, in the **DATES** section, under the heading ''Comment Period,'' correct ''December 3, 2018'' to read ''January 2, 2019''.

Dated: November 26, 2018.

Ann C. Agnew,

Executive Secretary to the Department, Department of Health and Human Services.

[Docket No. 151211999–6343–02]

RIN 0648–XG607

Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Georges Bank Cod Trip Limit Adjustment for the Common Pool Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason adjustment.

SUMMARY: This action adjusts the possession and trip limits of Georges Bank cod for Northeast multispecies common pool vessels for the remainder of the 2018 fishing year, in order to ensure that the common pool fishery is able to harvest, but not exceed, its annual quota for the stock. These changes are intended to provide the common pool fishery with additional fishing opportunities.

DATES: These possession and trip limit adjustment are effective November 29, 2018, through April 30, 2019.

FOR FURTHER INFORMATION CONTACT: Spencer Talmage, Fishery Management Specialist, 978–281–9232.

SUPPLEMENTARY INFORMATION:

Possession and Trip Limit Increase for Georges Bank Cod

The regulations at § 648.86(o) authorize the Regional Administrator to adjust the possession and trip limits for common pool vessels in order to help avoid the overharvest or underharvest of the common pool quotas.

Based on information reported through October 13, 2018, the common pool fishery has caught 5,797 lb (2.6 mt) of Georges Bank (GB) cod, or approximately 11 percent of its 53,374 lb (24.2 mt) annual quota. At the current rate of fishing, the common pool fishery is not projected to fully harvest its annual quota for the stock by the end of the 2018 fishing year. A moderate increase in the possession and trip limits for the stock will provide additional opportunities with little risk of exceeding the common pool quota of the stock.

Effective November 29, 2018, the possession and trip limit of GB cod is increased, as summarized in Table 1. Common pool groundfish vessels that have declared their trip through the vessel monitoring system (VMS) or interactive voice response system, and crossed the VMS demarcation line prior to November 29, 2018, may land at the new possession and trip limits for that trip.

TABLE 1—CURRENT AND NEW POSSESSION AND TRIP LIMITS FOR GB COD

Permit type	Current possession/trip limits	New possession/trip limits
Day-At-Sea (DAS) ..	100 lb (45.4 kg) per DAS, up to 200 lb (90.7 kg) per trip (Outside of the Eastern U.S./Canada Area). 100 lb (45.4 kg) per DAS, up to 500 lb (226.8 kg) per trip (Inside the Eastern U.S./Canada Area).	250 lb (113.4 kg) per DAS, up to 500 lb (226.8 kg) per trip.
Handgear A	100 lb (45.4 kg) per trip	250 lb (113.4 kg) per trip.
Handgear B	25 lb (11.3 kg) per trip	unchanged.
Small Vessel Category*.	100 lb (45.4 kg) per trip	250 lb (113.4 kg) per trip.

*The Small Vessel Category trip limit of 300 lb of cod, yellowtail flounder, and haddock combined remains in place.

Reduction of the GB Cod Trip Limit in the Closed Area II Haddock Special Access Program

The projection supporting the increase of the common pool possession and trip limits for GB cod is based on the assumption that the common pool fleet fishes primarily within the Western U.S./Canada area, outside of any Special Access Programs (SAPs), as it has done for several years. As described in 50 CFR 648.85(b), SAPs are established to authorize specific fisheries to allow increased yield of certain target stocks without undermining the achievement of the goals of the Northeast Multispecies Fishery Management Plan. The Closed Area II Haddock SAP (CA2 SAP) has a limit of 1,000 lb (453.6 kg) per trip of GB cod, which is double the GB cod trip limit for common pool vessels not participating in the SAPs.

Under a worst-case scenario projection, the common pool fleet could take up to 12 trips within the CA2 SAP at 1,000 lb (453.6 kg) per trip. In this scenario, the common pool could potentially land the entire common pool Eastern GB cod sub-ACL of 11,500 lb (5.2 mt), and could substantially contribute to exceeding the entire common pool GB cod sub-ACL.

In order to avoid this worst case scenario that would contribute to the common pool exceeding its quotas, effective November 29, 2018, the trip limit of GB cod for common pool vessels participating in the CA2 SAP is set to 500 lb (226.8 kg) per trip. In addition, this change may help avoid confusion and facilitate enforcement by making the CA2 SAP GB cod trip limit consistent with other common pool limits for the stock.

Common pool groundfish vessels participating in the affected SAPs that have declared their trip through the vessel monitoring system (VMS) or interactive voice response system, and crossed the VMS demarcation line prior to November 29, 2018, are not subject new possession and trip limits for that trip.

Weekly quota monitoring reports for the common pool fishery can be found on our website at: *http://www.greateratlantic.fisheries.noaa.gov/ro/fso/MultiMonReports.htm.* We will continue to monitor common pool catch through vessel trip reports, dealer-reported landings, VMS catch reports, and other available information and, if necessary, we will make additional adjustments to common pool management measures.

Classification

This action is required by 50 CFR part 648 and is exempt from review under Executive Order 12866.

The Assistant Administrator for Fisheries, NOAA, finds good cause pursuant to 5 U.S.C. 553(b)(B) and 5 U.S.C. 553(d)(3) to waive prior notice and the opportunity for public comment and the 30-day delayed effectiveness period because it would be impracticable and contrary to the public interest.

The catch data used as the basis for this action only recently became available. The available analysis indicates that the increased possession and trip limit adjustments for GB cod will help the fishery achieve the optimum yield (OY) for this stock. Any delay in this action would limit the benefits to common pool vessels that this action is intended to provide.

The decrease in the CA2 SAP trip limit reduces the low likelihood of overages should vessels participate in the CA2 SAP. An overage of the common pool quota for this stock would undermine conservation objectives and trigger the implementation of accountability measures that could reduce available catch in the next fishing year, which would have negative economic impacts on the common pool fishery.

The time necessary to provide for prior notice and comment, and a 30-day delay in effectiveness, would keep NMFS from implementing the necessary possession and trip limit changes in a timely manner, which could prevent the fishery from achieving the OY and cause negative economic impacts to the common pool fishery.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 26, 2018.

Karen H. Abrams,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Magnuson-Stevens Act Provisions; Fisheries Off West Coast States; Pacific Coast Groundfish Fishery; 2018 Tribal Fishery Allocations for Pacific Whiting; Reapportionment Between Tribal and Non-tribal Sectors

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; reapportionment of tribal Pacific whiting allocation.

SUMMARY: This document announces the reapportionment of 40,000 metric tons of Pacific whiting from the tribal allocation to the non-tribal commercial fishery sectors via automatic action on September 24, 2018. This reapportionment is to allow full utilization of the Pacific whiting resource.

DATES: The reapportionment of Pacific whiting was applicable from 12 noon local time, September 24, 2018 through December 31, 2018. Comments will be accepted through December 17, 2018.

ADDRESSES: You may submit comments, identified by NOAA–NMFS–2017–0160 by any of the following methods:

- *Electronic Submissions:* Submit all electronic public comments via the Federal eRulemaking Portal at *www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2017-0160.* Click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Barry A. Thom, Regional Administrator, West Coast Region, NMFS, 7600 Sand Point Way NE, Seattle, WA 98115–0070, Attn: Miako Ushio.

Instructions: Comments sent by any other method to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain

anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT: Miako Ushio (West Coast Region, NMFS), phone: 206–526–4644 or email: *miako.ushio@noaa.gov*.

SUPPLEMENTARY INFORMATION:

Electronic Access

This document is accessible online at the Office of the Federal Register's website at *http://www.gpo.gov/fdsys/search/home.action.* Background information and documents are available at NMFS' West Coast Region website at *www.westcoast.fisheries.noaa.gov/fisheries/management/whiting/pacific_whiting.html*

Background

Pacific Whiting

Pacific whiting (*Merluccius productus*) is a very productive species with highly variable recruitment (the biomass of fish that mature and enter the fishery each year) and a relatively short life span when compared to other groundfish species. Pacific whiting has the largest annual allowable harvest levels (by volume) of the more than 90 groundfish species managed under the Pacific Coast Groundfish Fishery Management Plan (FMP), which governs the groundfish fishery off Washington, Oregon, and California. The coastwide Pacific whiting stock is managed jointly by the United States and Canada, and mature Pacific whiting are commonly available to vessels operating in U.S. waters from April through December. Background on the stock assessment, and the establishment of the 2018 Total Allowable Catch (TAC), for Pacific whiting was provided in the final rule for the 2018 Pacific whiting harvest specifications, published May 15, 2018 (83 FR 22401). Pacific whiting is allocated to the Pacific Coast treaty tribes (tribal fishery) and to three non-tribal commercial sectors: The catcher/processor cooperative (C/P Coop), the mothership cooperative (MS Coop), and the Shorebased Individual Fishery Quota (IFQ) Program.

This document announces the reapportionment of 40,000 metric tons (mt) of Pacific whiting from the tribal allocation to the non-tribal commercial sectors on September 24, 2018. Regulations at 50 CFR 660.131(h) contain provisions that allow the Regional Administrator to reapportion Pacific whiting from the tribal allocation, specified at 50 CFR 660.50, that will not be harvested by the end of the fishing year to other sectors.

Pacific Whiting Reapportionment

For 2018, the Pacific Coast treaty tribes were allocated 77,251 mt of Pacific whiting. The best available information on September 24, 2018, indicated that less than 5,000 mt of the 2018 allocation had been harvested, and at least 40,000 mt of the tribal allocation would not be harvested by December 31, 2018. To allow for increased utilization of the resource, on September 24, 2018, NMFS reapportioned 40,000 mt from the Tribal sector to the Shorebased IFQ Program, C/P Coop, and MS Coop in proportion to each sector's original allocation. Reapportioning this amount is expected to allow for greater attainment of the TAC while not limiting tribal harvest opportunities for the remainder of the year. NMFS provided notice of the reapportionment on September 24, 2018, via emails sent directly to fishing businesses and individuals, and postings on the NMFS West Coast Region website. Reapportionment was effective the same day as the notice.

The amounts of Pacific whiting available for 2018 before and after the reapportionment are described in the table below.

Sector	Initial 2018 allocation (mt)	Final 2018 allocation (mt)
Tribal	77,251	37,251
C/P Coop	123,312	136,912
MS Coop	87,044	96,644
Shorebased IFQ Program	152,326.5	169,127

Classification

NOAA's Assistant Administrator for Fisheries (AA) finds that good cause exists for this notification to be issued without affording prior notice and opportunity for public comment pursuant to 5 U.S.C. 553(b)(B), because such notification would be impracticable and contrary to the public interest. As previously noted, NMFS provided actual notice of the reapportionment to fishery participants at the time of the action. Prior notice and opportunity for public comment on this reapportionment was impracticable because NMFS had insufficient time to provide prior notice between the time the information about the progress of the fishery needed to make this determination became available and the time at which fishery modifications had to be implemented in order to allow fishers access to the available fish during the remainder of the fishing season. For the same reasons, the AA also finds good cause to waive the 30-day delay in effectiveness for these actions, required under 5 U.S.C. 553(d)(3).

These actions are authorized by §§ 660.55 (i), 660.60(d) and 660.131(h) and are exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.* and 16 U.S.C. 7001 *et seq.*

Dated: November 27, 2018.

Karen H. Abrams,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

COMMODITY FUTURES TRADING COMMISSION

17 CFR Chapter I

RIN Number 3038–AE79

Post-Trade Name Give-Up on Swap Execution Facilities

AGENCY: Commodity Futures Trading Commission.

ACTION: Request for comment.

SUMMARY: The Commodity Futures Trading Commission (Commission or CFTC) is requesting public comment regarding the practice of ''post-trade name give-up'' on swap execution facilities.

DATES: Comments must be received on or before January 29, 2019.

ADDRESSES: You may submit comments, identified by ''Post-Trade Name Give-Up on Swap Execution Facilities'' and RIN number 3038–AE79, by any of the following methods:

- *The agency's website: http://comments.cftc.gov.* Follow the instructions for submitting comments.
- *Mail:* Secretary of the Commission, Commodity Futures Trading Commission, Three Lafayette Center, 1155 21st Street NW, Washington, DC 20581.
- *Hand Delivery/Courier:* Same as Mail, above.

All comments must be submitted in English or, if not, accompanied by an English translation. Comments will be posted as received to *http://www.cftc.gov.* You should submit only information that you wish to make available publicly. If you wish the Commission to consider information that you believe is exempt from disclosure under the Freedom of Information Act,[1] a petition for confidential treatment of the exempt information may be submitted according to the procedures established in Commission Regulation 145.9.[2]

The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from *http://www.cftc.gov* that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of this request for comment will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the Freedom of Information Act.

FOR FURTHER INFORMATION CONTACT: Aleko Stamoulis, Special Counsel, (202) 418–5714, *astamoulis@cftc.gov*; or Nhan Nguyen, Special Counsel, (202) 418–5932, *nnguyen@cftc.gov,* Division of Market Oversight, Commodity Futures Trading Commission, 1155 21st Street NW, Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Background

Historically, swaps traded in over-the-counter (''OTC'') markets rather than on regulated exchanges. Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act (''Dodd-Frank Act'')[3] amended the Commodity Exchange Act (''CEA'' or ''Act'')[4] to establish a new regulatory framework for swaps. This new framework included, among other reforms, the registration and regulation of swap execution facilities (''SEFs'')[5] and the mandatory clearing of certain swaps by derivatives clearing organizations (''DCOs'').[6] SEFs and DCOs have since become a significant part of swaps trading infrastructure and have helped to transition a large portion of swaps trading from unregulated, uncleared OTC markets to regulated trading venues and central clearing.

Many swaps are traded on SEFs through trading methods and protocols that are electronic, voice-based, or a hybrid of both; and that provide for anonymous trade execution, trade execution on a name-disclosed basis, or a combination thereof. This variety of trading methods and protocols has developed because of the broad and diverse range of products traded in the swaps market that trade mostly episodically rather than on a continuous basis. The decision by a market participant to use one execution method or another depends on considerations such as the type of swap, transaction size, complexity, the swap's liquidity at a given time, the number of potential liquidity providers, and the associated desire to minimize potential information leakage and front-running risks.

''Post-trade name give-up'' is a long-standing market practice in many swaps markets and originated as a necessary practice in OTC markets for uncleared swaps. Post-trade name give-up refers to the practice of disclosing the identity of each swap counterparty to the other after a trade has been matched anonymously. In the case of uncleared swaps, post-trade name give-up enables a market participant to perform a credit-check on its counterparty prior to finalizing a trade. Due to the bilateral counterparty relationship that exists in an uncleared swap agreement, post-trade name give-up is also necessary in order to keep track of credit exposure and payment obligations with respect to individual counterparties.

For trades that are cleared, however, the rationale for post-trade name give-up is less clear cut. That is because a DCO enables each party to substitute the credit of the DCO for the credit of the parties, thereby eliminating individual credit risk and counterparty exposure. Swaps that are intended to be cleared are subject to pre-execution credit checks and straight-through processing requirements, effectively eliminating counterparty risk and, presumably, the need for market participants to know the identities of counterparties to anonymously matched trades.

Post-trade name give-up continues today in some swaps markets, including with respect to swaps that are anonymously executed and cleared.

[1] 5 U.S.C. 552.

[2] 17 CFR 145.9. Commission regulations referred to herein are found at 17 CFR chapter I.

[3] Public Law 111–203, 124 Stat. 1376 (2010).

[4] 7 U.S.C. 1 *et seq.*

[5] *See* CEA section 5h, as enacted by section 733 of the Dodd-Frank Act; 7 U.S.C. 7b–3. *See also* Core Principles and Other Requirements for SEFs, 78 FR 33476 (June 4, 2013).

[6] *See* Section 2(h)(1)(A) of the CEA, as enacted by section 723 of the Dodd-Frank Act; 7 U.S.C. 2(h)(1)(A). In 2012, the Commission issued final rules to implement the clearing requirement determination under section 723 of the Dodd-Frank Act. The final rules required certain classes of credit default swaps and interest rate swaps to be cleared by DCOs registered with the Commission. Clearing Requirement Determination Under Section 2(h) of the CEA, 77 FR 74284 (Dec. 13, 2012).

Such disclosure may be made by a SEF as part of its trading protocols, or through middleware used for trade processing and routing trades to DCOs. For example, when a swap is matched using a voice-based execution method, a SEF employee may verbally disclose to a party the name of the other party to the trade. For swaps executed electronically on an anonymous order book, disclosure of counterparty names can occur through an electronic notification provided by the SEF after the trade is matched. Post-trade name give-up can also occur through third-party middleware and associated trade processing and affirmation services that provide counterparties with various trade details captured from SEF trading systems, including the identity of the party on the other side of a trade.[7]

As the swaps market increasingly becomes a cleared market, the Commission believes that it is reasonable to ask whether the post-trade name give-up practice continues to serve a valid industry purpose in facilitating swaps trading. A variety of views exist on both sides of this issue, depending on one's position in the market. Some industry participants have criticized the continued practice of post-trade name give-up in cleared swaps markets. During a meeting of the Commission's Market Risk Advisory Committee held in April 2015, several participants in a panel on SEFs identified post-trade name give-up as a concern with respect to SEF trading.[8] Post-trade name give-up is said to deter buy-side participation on some SEFs due to the prospect of information leakage, whereby disclosing the identity of a market participant could potentially expose the participant's trading intentions, strategies, positions, or other sensitive information to competitors or dealers.[9] Some industry participants have also alleged that post-trade name give-up serves as a policing mechanism used by swaps dealers to retaliate against non-dealer firms that attempt to trade on interdealer markets.[10] Such interdealer markets provide for competitive execution of large-sized trades at wholesale prices. Buy-side participants that have interest in trading on interdealer markets and otherwise meet participation criteria to join these platforms are said to be deterred because of post-trade name give-up.[11] Based on these concerns, critics of post-trade name give-up have argued that the practice is anticompetitive, hinders liquidity, and lacks credible justification in cleared swaps markets where participants are not exposed to counterparty credit risk.[12]

Other industry participants have claimed that post-trade name give-up is an important tool used to mitigate liquidity risk or the risk that traders will game the market.[13] Some participants argue that as bank market-making capital becomes further constrained by regulations,[14] liquidity providers need to more precisely allocate their bank capital among their customer base in coordination with their overall bank cross-marketing strategies. Without the information provided by post-trade name give-up, the ability to make such allocations would become more difficult. As a result, liquidity providers would be less willing to provide liquidity to the market, especially in times of crisis, and charge higher prices to customers.[15] This outcome arguably would hurt all market participants.

Another reported concern is that buy-side clients may undercut prices from dealers, for example, by posting aggressive bids or offers on an interdealer order book and then soliciting dealers through a request-for-quote (''RFQ'') on a dealer-to-client platform, hoping to motivate dealers to provide more favorable quotes based on prices posted in the order book.[16] Post-trade name give-up is said to mitigate these concerns because it can help to identify a client that is attempting to game the market.

II. Request for Comment

The Commission requests comment from the public relating to the practice of post-trade name give-up on SEF markets where trades are anonymously executed and intended to be cleared. The Commission encourages all comments, including relevant background information, actual market examples, best practice principles, expectations for possible impacts on market structure and market liquidity, and estimates of any asserted costs and expenses. The Commission also encourages substantiating data, statistics, and any other information that supports any such comments. In particular, the Commission requests comment on the following questions:

Question 1: What utility or benefits (*e.g.,* commercial, operational, legal, or other) does post-trade name give-up provide in SEF markets where trades are anonymously executed and cleared? Is post-trade name give-up a necessary or appropriate means to achieve such benefits?

Question 2: Does post-trade name give-up result in any restraint of trade, or impose any anticompetitive burden on swaps trading or clearing?

Question 3: Should the Commission intervene to prohibit or otherwise set limitations with respect to post-trade name give-up? If so, what regulatory limitations should be set and how should they be set in a manner that is consistent with the CEA? What would be the potential costs and/or benefits of doing so? What might be the potential impacts on liquidity, pricing, and trading behavior? Would a prohibition cause dealers to remove liquidity from the market or charge higher prices? Would new liquidity makers fully and consistently act in the market to make up any shortfall in liquidity?

---

[7] Trade affirmation refers to a process that occurs after a trade is executed whereby counterparties verify and affirm the details of the trade before submitting it for settlement. Third-party trade processing and affirmation services commonly used for SEF trades include MarkitWire and ICE Link. The Commission has provided that SEFs may use such services to route trades to DCOs if the routing complies with § 37.702(b). *See* Core Principles and Other Requirements for SEFs, 78 FR 33476, 33535 (June 4, 2013).

[8] *See* Transcript of CFTC Market Risk Advisory Committee Meeting (April 2, 2015) (''MRAC Transcript'') at 133 *et seq., available at https://www.cftc.gov/About/CFTCCommittees/MarketRiskAdvisoryCommittee/mrac_meetings.html.*

[9] *See* MRAC Transcript at 142–144, 164. *See also* Managed Funds Association Position Paper: Why Eliminating Post-Trade Name Disclosure Will Improve the Swaps Market (Mar. 31, 2015) (''MFA Position Paper''), p. 4–5. The Commission notes that other factors, such as the current lack of certain trading features, *e.g.,* the ability to calculate volume-weighted average pricing on an order book may have also deterred buy-side participation on certain SEFs.

[10] *See* In re: Interest Rate Swaps Antitrust Litigation, 261 F.Supp.3d 430, 458–59 (S.D.N.Y. 2017) (''The compulsory disclosure of swap counterparties, plaintiffs claim, serves as a policing mechanism, allowing the Dealers to retaliate against entities that attempt to trade on all-to-all platforms.'').

[11] The argument is that swap dealers threaten to shun platforms in the interdealer markets that attempt to execute trades between dealers and non-dealers.

Question 4: Should post-trade name give-up be subject to customer choice or SEF choice given the flexible execution methods in the Commission's recent SEF notice of proposed rulemaking?

Issued in Washington, DC, on November 6, 2018, by the Commission.

Christopher Kirkpatrick,

Secretary of the Commission.

Note: The following appendix will not appear in the Code of Federal Regulations.

Appendix to Post-Trade Name Give-Up on Swap Execution Facilities—Commission Voting Summary

On this matter, Chairman Giancarlo and Commissioners Quintenz, Behnam, Stump, and Berkovitz voted in the affirmative. No Commissioner voted in the negative.

BILLING CODE 6351–01–P

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 36

Loan Guaranty: Revisions to VA-Guaranteed or Insured Cash-Out Home Loans

AGENCY: Department of Veterans Affairs.

ACTION: Advanced notice of rulemaking.

SUMMARY: The Department of Veterans Affairs (VA) is issuing this document in compliance with the Economic Growth, Regulatory Relief, and Consumer Protection Act (the Act). The Act requires VA to amend its regulation on VA-guaranteed or insured cash-out refinance loans and to publish the amended regulation within a shortened time frame. If VA determines that urgent or compelling circumstances make compliance with the advance public notice and comment requirements of the Administrative Procedure Act impracticable or contrary to public interest and publishes notice of that determination in the **Federal Register**, the Act permits VA to amend the regulation through an interim final rule or final rule. VA has determined that urgent and compelling circumstances do exist and is, therefore, issuing this **Federal Register** document announcing VA's intent to promulgate an interim final rule implementing the Act.

DATES: November 30, 2018.

ADDRESSES: Loan Policy & Valuation, Loan Guaranty Service (26), Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420.

FOR FURTHER INFORMATION CONTACT: Greg Nelms, Assistant Director for Loan Policy & Valuation, Loan Guaranty Service (26), Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420, (202) 632–8862. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On May 24, 2018, the President signed into law the Economic Growth, Regulatory Relief, and Consumer Protection Act (the Act), Public Law 115–174, 132 Stat. 1296. Section 309 of the Act, codified at 38 U.S.C. 3709, provides new statutory criteria for determining when, in general, VA may guarantee a refinance loan. The Act also requires, among other things, VA to promulgate regulations, within 180 days after the date of the enactment of the Act, for cash-out refinance loans, specifically those where the principal of the new loan to be VA-guaranteed or insured is larger than the payoff amount of the loan being refinanced. Public Law 115–174, 132 Stat. 1296.

Section 309(a)(2) of the Act permits VA to waive the requirements of the Administrative Procedure Act (APA), 5 U.S.C. 551 through 559, if the Secretary determines that urgent or compelling circumstances make compliance with such requirements impracticable or contrary to public interest. Public Law 115–174, 132 Stat. 1348–1349.

VA believes there are several urgent and compelling circumstances that make advance notice and comment on this rule contrary to the public interest. First, VA is concerned about lenders who seem to continue to exploit legislative and regulatory gaps related to seasoning, recoupment, and net tangible benefit standards, despite anti-predatory lending actions that VA and Congress have already taken. VA's regulatory impact analysis for this rule indicates that perhaps more than 50 percent of cash-out refinances remain vulnerable to predatory terms and conditions until this rule goes into effect. VA believes that VA must immediately seal these gaps to fulfill its obligation to veterans, prudent lenders, and those who invest in securities that include VA-guaranteed loans.

VA is also gravely concerned about constraints in the availability of program liquidity if VA does not act quickly to address early pre-payment speeds for VA-guaranteed cash-out refinance loans. In large part, cashflows derived from investors in mortgage-backed securities (MBS) furnished by the Government National Mortgage Association (Ginnie Mae) provide liquidity for lenders that originate VA-guaranteed refinance loans. When pricing MBS, investors rely on pre-payment models to estimate the level of pre-payments and any resultant potential losses of revenue expected to occur in a set period, given possible changes in interest rates. These pre-payment models tend to drive, at least in significant part, the valuation of Ginnie Mae MBS. Ginnie Mae, buyers of VA-guaranteed loans, and other industry stakeholders have expressed serious concerns that early pre-payments of VA-guaranteed loans are devaluing these investments. See ''Slowing Down VA Refi Churn Proving More Difficult Than Expected'', National Mortgage News (November 12, 2018), *https://www.nationalmortgagenews.com/news/slowing-down-va-refi-churn-proving-more-difficult-than-expected.* If such stakeholders view MBS investments that include VA-guaranteed refinance loans as less desirable, even prudent lenders could be deprived of the cashflows, *i.e.* liquidity, necessary to make new VA-guaranteed loans to veterans.

In a hearing before the House Veterans' Affairs Committee's Subcommittee on Economic Opportunity, the Government National Mortgage Association (Ginnie Mae) issued warnings to Congress regarding the ripple effects that risky refinancing practices had on the valuing of VA-guaranteed loans, as well as Ginnie Mae pools at-large. See *Hearing on Home Loan Churning Practices and How Veteran Homebuyers are Being Affected Before the Subcomm. on Econ. Opportunity of the House Comm. on Veterans' Affairs,* 115 Cong. (2018). Thus, VA believes that, unless VA promulgates rules quickly, a loss of investor optimism in the VA product could further restrict veterans from being able to utilize their earned VA benefits.

Exacerbating the issue is the lending industry's varied interpretation of the Act, which has led to lender uncertainty in how to implement a responsible cash-out refinance program. VA believes this uncertainty has caused prudent lenders to employ a high degree of caution, (*e.g.* refraining from providing veterans with crucial refinance loans that are not predatory or risky). Absent swift implementation of clear regulatory standards, cautious lenders are less likely to make cash-out refinance loans, which means that veterans do not enjoy the widest range of competitive, responsible credit options that can, when used properly, result in placing the veteran in a better financial position than the veteran's current circumstances afford. Unfortunately, such caution has the potential to compound the risk of predatory lending, as irresponsible

lenders have more opportunity to prey upon veterans by stepping into areas where prudent lenders may have stopped competing.

At the same time, VA is concerned that certain lenders are exploiting cash-out refinancing as a loophole to the responsible refinancing Congress envisioned when enacting section 309 of the Act. VA recognizes there are certain advantages to a veteran who wants to obtain a cash-out refinance, and VA has no intention of unduly curtailing veterans' access to the equity they have earned in their homes. Nevertheless, some lenders are pressuring veterans to increase artificially their home loan amounts when refinancing, without regard to the long-term costs to the veteran and without adequately advising the veteran of the veteran's loss of home equity. In doing so, veterans are placed at a higher financial risk, and the lender avoids compliance with the more stringent requirements Congress mandated for less risky refinance loans. Essentially, the lender revives the period of subprime lending under a new name.

VA does not plan to dispense with the notice and comment requirements altogether. Section 309(a)(2)(A)(ii) and (iii) of the Act requires VA, 10 days before publication of the final rule, to submit a notice of the waiver to the House and Senate Committees on Veterans' Affairs and publish the notice in the **Federal Register**. Public Law 115–174, 132 Stat. 1296. VA is complying with these requirements. Section 309(a)(2)(B) further requires VA to seek public notice and comment on this regulation if the regulation will be in effect for a period exceeding one year. Public Law 115–174, 132 Stat. 1296. VA anticipates the regulation will be in effect past the one-year mark. Therefore, VA is seeking public comment on the interim final rule once it is published in the **Federal Register**.

Signing Authority

The Secretary of Veterans Affairs approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Robert L. Wilkie, Secretary, Department of Veterans Affairs, approved this document on November 19, 2018, for publication.

Dated: November 19, 2018.

Jeffrey M. Martin,

Assistant Director, Office of Regulation Policy & Management, Office of the Secretary, Department of Veterans Affairs.

BILLING CODE 8320–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[EPA–HQ–OAR–2018–0195; FRL–9987–37–OAR]

RIN 2060–AU00

Standards of Performance for New Residential Wood Heaters, New Residential Hydronic Heaters and Forced-Air Furnaces

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: In this action, the EPA proposes to amend the 2015 New Source Performance Standards (NSPS) for new residential hydronic heaters and new forced-air furnaces by adding a two-year ''sell-through'' period for all affected new hydronic heaters and forced-air furnaces that are manufactured or imported before the May 2020 compliance date to be sold at retail through May 2022. This will allow retailers additional time, after the May 2020 effective date of the ''Step 2'' standards, for the sale of ''Step 1'' compliant hydronic heaters and forced-air furnaces remaining in inventory. The EPA is also taking comment on whether a sell-through period for all affected new residential wood heaters is appropriate following the May 2020 compliance date and, if so, how long a sell-through period is needed and why. In addition, this action is taking comment on whether the current minimum pellet fuel requirements should be retained and, if so, whether they should be revised.

DATES:

Comments. Comments must be received on or before January 14, 2019. Under the Paperwork Reduction Act (PRA), comments on the information collection provisions are best assured of consideration if the Office of Management and Budget (OMB) receives a copy of your comments on or before December 31, 2018.

Public Hearing. The EPA will hold a public hearing on December 17, 2018, in Washington, DC. Please refer to the **FOR FURTHER INFORMATION CONTACT** section for information on registering for the hearing and the **SUPPLEMENTARY INFORMATION** section for additional information on the public hearing.

ADDRESSES: *Comments.* Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2018–0195, at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. See **SUPPLEMENTARY INFORMATION** for details about how the EPA treats submitted comments. *Regulations.gov* is our preferred method of receiving comments. However, the following other submission methods are also accepted:

- *Email: a-and-r-docket@epa.gov.* Include Docket ID No. EPA–HQ–OAR–2018–0195 in the subject line of the message.
- *Fax:* (202) 566–9744. Attention Docket ID No. EPA–HQ–OAR–2018–0195.
- *Mail:* To ship or send mail via the United States Postal Service, use the following address: U.S. Environmental Protection Agency, EPA Docket Center, Docket ID No. EPA–HQ–OAR–2018–0195, Mail Code 28221T, 1200 Pennsylvania Avenue NW, Washington, DC 20460.
- *Hand/Courier Delivery:* Use the following Docket Center address if you are using express mail, commercial delivery, hand delivery, or courier: EPA Docket Center, EPA WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. Delivery verification signatures will be available only during regular business hours.

Public Hearing. The hearing will be held at EPA Headquarters, EPA WJC East Building, Room 1117A&B, 1201 Constitution Avenue NW, Washington, DC 20004. The hearing will convene at 8:00 a.m. local time and conclude at 6:00 p.m. local time. The EPA will end the hearing two hours after the last registered speaker has concluded their comments but no later than 6:00 p.m. local time. Two 15-minute breaks and a lunch break will be scheduled as time will allow depending on the number of registered speakers.

Because this hearing is being held at a U.S. government facility, individuals planning to attend the hearing should be prepared to show valid picture identification to the security staff in order to gain access to the meeting room. Please note that the REAL ID Act, passed by Congress in 2005, established new requirements for entering federal facilities. For purposes of the REAL ID Act, the EPA will accept government-issued IDs, including driver's licenses from the District of Columbia and all

states and territories except from American Samoa. If your identification is issued by American Samoa, you must present an additional form of identification to enter the federal building where the public hearing will be held. Acceptable alternative forms of identification include: federal employee badges, passports, enhanced driver's licenses, and military identification cards. For additional information for the status of your state regarding REAL ID, go to: *https://www.dhs.gov/real-id-frequently-asked-questions.* Any objects brought into the building need to fit through the security screening system, such as a purse, laptop bag, or small backpack. Demonstrations will not be allowed on federal property for security reasons.

FOR FURTHER INFORMATION CONTACT: For questions about this proposed action, contact Ms. Amanda Aldridge, Outreach and Information Division, Mail Code: C304–05, Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–5268; fax number: (919) 541–0072; and email address: *aldridge.amanda@epa.gov.* For information about the applicability of the NSPS to a particular entity, contact Dr. Rafael Sanchez, Office of Enforcement and Compliance Assurance, U.S. Environmental Protection Agency, EPA WJC South Building (Mail Code 2227A), 1200 Pennsylvania Avenue NW, Washington DC 20460; telephone number: (202) 564–7028; and email address: *sanchez.rafael@epa.gov.*

Public Hearing. The EPA will begin pre-registering speakers for the hearing upon publication of this document in the **Federal Register**. To register to speak at the hearing, please use the online registration form available at *https://www.epa.gov/residential-wood-heaters,* or contact Regina Chappell at (919) 541–3650 to register to speak at the hearing. The last day to pre-register to speak at the hearing will be December 13, 2018. On December 13, 2018, the EPA will post at *https://www.epa.gov/residential-wood-heaters* a general agenda for the hearing that will list pre-registered speakers in approximate order. The EPA will make every effort to follow the schedule as closely as possible on the day of the hearing; however, please plan for the hearing to run either ahead of schedule or behind schedule. Additionally, requests to speak will be taken the day of the hearing at the hearing registration desk. The EPA will make every effort to accommodate all speakers who arrive and register, although preferences on speaking times may not be able to be fulfilled.

SUPPLEMENTARY INFORMATION: *Public Hearing.* Each commenter will have 5 minutes to provide oral testimony. The EPA encourages commenters to provide the EPA with a copy of their oral testimony electronically (via email) or in hard copy form.

The EPA may ask clarifying questions during the oral presentations but will not respond to the presentations at that time. Written statements and supporting information submitted during the comment period will be considered with the same weight as oral comments and supporting information presented at the public hearing. Commenters should notify Regina Chappell if there are special needs related to providing comments at the hearings. Verbatim transcripts of the hearings and written statements will be included in the docket for this rulemaking.

Please note that any updates made to any aspect of the hearing will be posted online at *https://www.epa.gov/residential-wood-heaters.* While the EPA expects the hearing to go forward as set forth above, please monitor our website or contact Regina Chappell at (919) 541–3650 or *chappell.regina@epa.gov* to determine if there are any updates. The EPA does not intend to publish a document in the **Federal Register** announcing updates.

The EPA will not provide audiovisual equipment for presentations. Any media presentations should be submitted to the public docket at *https://www.regulations.gov/,* identified by Docket ID No. EPA–HQ–OAR–2018–0195. The EPA must receive comments on the proposed action no later than January 14, 2019.

If you require the service of a translator or special accommodations such as audio description, please pre-register for the hearing and describe your needs by December 13, 2018. We may not be able to arrange accommodations without advanced notice.

Docket. The EPA has established a docket for this rulemaking under Docket ID No. EPA–HQ–OAR–2018–0195. All documents in the docket are listed in the *Regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *Regulations.gov* or in hard copy at the EPA Docket Center, Room 3334, EPA WJC West Building, 1301 Constitution Avenue NW, Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the EPA Docket Center is (202) 566–1742.

Instructions. Direct your comments to Docket ID No. EPA–HQ–OAR–2018–0195. The EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *https://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be CBI or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *https://www.regulations.gov* or email. This type of information should be submitted by mail as discussed below.

The EPA may publish any comment received to its public docket. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the Web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www2.epa.gov/dockets/commenting-epa-dockets.*

The *https://www.regulations.gov* website is an ''anonymous access'' system, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any digital storage media you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not

be able to consider your comment. Electronic files should not include special characters or any form of encryption and be free of any defects or viruses. For additional information about the EPA's public docket, visit the EPA Docket Center homepage at *http://www.epa.gov/dockets.*

Submitting CBI. Do not submit information containing CBI to the EPA through *http://www.regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information on a digital storage media that you mail to the EPA, mark the outside of the digital storage media as CBI and then identify electronically within the digital storage media the specific information that is claimed as CBI. In addition to one complete version of the comments that includes information claimed as CBI, you must submit a copy of the comments that does not contain the information claimed as CBI for inclusion in the public docket. If you submit any digital storage media that does not contain CBI, mark the outside of the digital storage media clearly that it does not contain CBI. Information not marked as CBI will be included in the public docket and the EPA's electronic public docket without prior notice. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 Code of Federal Regulations (CFR) part 2. Send or deliver information identified as CBI only to the following address: OAQPS Document Control Officer (C404–02), OAQPS, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attention Docket ID No. EPA–HQ–OAR–2018–0195.

Preamble Acronyms and Abbreviations. The Agency uses multiple acronyms and terms in this preamble. While this may not be an exhaustive list, to ease the reading of this preamble and for reference purposes, the following terms and acronyms are defined here:

Wood heaters Refers to all appliances covered in 40 CFR part 60, subpart AAA—woodstoves & pellet stoves

Organization of this Document. The information presented in this preamble is organized as follows:

I. General Information

A. Executive Summary

On March 16, 2015 (80 FR 13672), the Environmental Protection Agency (EPA) finalized the NSPS for new residential wood heaters, new residential hydronic heaters, and new forced-air furnaces. For this action, the term wood heaters refers to all appliances covered in 40 CFR part 60, subpart AAA, and the terms hydronic heaters and forced-air furnaces refer to appliances covered in 40 CFR part 60, subpart QQQQ. Also, for this action, the term wood heating devices refers to all units regulated by the 2015 NSPS (40 CFR part 60, subparts AAA and QQQQ).

In this action, the EPA proposes to amend 40 CFR part 60, subpart QQQQ of the 2015 NSPS by adding a two year ''sell-through'' period for retailers to sell new hydronic heaters and forced-air furnaces that are manufactured or imported before the May 2020 compliance date and are compliant with the ''Step 1'' standards. This will allow retailers additional time after the May 2020 effective date of the ''Step 2'' standard, to sell ''Step 1'' compliant hydronic heaters and forced-air furnaces remaining in inventory. The EPA is also taking comment on whether a sell-through period for retailers to sell new residential wood heaters (40 CFR part 60, subpart AAA) is appropriate following the May 2020 compliance date and, if so, how long a sell-through period is needed and why. In addition, this action is taking comment on whether the current minimum pellet fuel requirements should be retained or revised. In the 2015 Final Rule Preamble (at 80 FR at 13682/2), the EPA stated: ''For pellet-fueled appliances, operation according to the owner's manual includes operation only with pellet fuels that are specified in the owner's manual.''

The Agency estimated the cost and benefits of the proposed rule by developing a memorandum (supplemental RIA) [1] to supplement the Regulatory Impact Analysis prepared for the 2015 Final Rule. This memorandum acknowledges uncertainty driven by consumer, manufacturer, and retailer response to this proposed ''sell-through'' period and evaluates three scenarios. Section VII.A of this preamble summarizes the information in that supplemental RIA. Given the nature of this rule, costs are presented

[1] U.S. EPA. Memorandum: Supplemental Regulatory Impact Analysis (RIA)—Estimated Cost Savings and Forgone Benefits Associated with the Proposed Rule, ''Standards of Performance for New Residential Wood Heaters, New Residential Hydronic Heaters and Forced-Air Furnaces.''

here as the forgone benefits of forgone emission reductions. We estimate the average annual cost savings to be $0.01 billion. We estimate the average annual forgone benefits to be $0.10 billion to $0.23 billion at a 3 percent discount rate and $0.09 billion to $0.21 billion at a 7 percent discount rate. The Agency represents the benefits as cost savings, which the Agency estimates as the increase in revenues to manufacturers and retailers of affected hydronic heaters and forced air furnaces. Estimated costs and benefits reflect the average annual impacts for the 2019 to 2022 timeframe, which are the implementation years analyzed in the supplemental RIA. All estimates in the supplemental RIA reflect the primary scenario analyzed for this proposal (which estimates the number of affected wood heaters available during the sell-through period with no change in wood heater production as estimated in the 2015 NSPS). Results are also provided in the supplemental RIA for wood heaters covered by 40 CFR part 60, subpart AAA, which are wood heating devices not included in the proposed 2-year sell-through extension but for which comments are requested to determine if they should be.

B. Does this action apply to me?

Table 1 of this preamble lists categories and entities that are the subject of this proposal. Table 1 is not intended to be exhaustive, but rather provides a guide for readers regarding the entities likely to be affected by this proposed action. These standards, and any changes considered in this rulemaking, are directly applicable to sources as a federal program. Other federal, state, local and tribal government entities are not directly affected by this action.

TABLE 1—SOURCE CATEGORIES AFFECTED BY THIS ACTION

Category	NAICS Code [1]	Examples of regulated entities
Residential Wood Heating	333414	Manufacturers, owners, and operators of wood heaters, pellet heaters/stoves, and hydronic heaters.
	333415	Manufacturers, owners, and operators of forced-air furnaces.
Testing Laboratories	541380	Testers of wood heaters, pellet heaters/stoves, and hydronic heaters.
Retailers	423730	Warm air heating and air-conditioning equipment and supplies merchant wholesalers.

[1] North American Industry Classification System.

C. How do I obtain a copy of this document and other related information?

In addition to being available in the docket, an electronic copy of this action is available on the internet. Following signature by the EPA Administrator, the EPA will post a copy of this proposed action at *https://www.epa.gov/residential-wood-heaters/final-new-source-performance-standards-residential-wood-heaters.* Following publication in the **Federal Register**, the EPA will post the **Federal Register** version of the proposal at this same website.

II. Background

A. Statutory Background

Section 111 of the Clean Air Act (CAA) requires the EPA Administrator to list categories of stationary sources that, in his or her judgment, cause or contribute significantly to air pollution which may reasonably be anticipated to endanger public health or welfare. The EPA must then issue ''standards of performance'' for new sources in such source categories. The EPA has the authority to define the source categories, determine the pollutants for which standards should be developed, and identify within each source category the facilities for which standards of performance would be established.

CAA section 111(a)(1) defines ''a standard of performance'' as ''a standard for emissions of air pollutants which reflects the degree of emission limitation achievable through the application of the best system of emission reduction which (taking into account the cost of achieving such reduction and any non-air quality health and environmental impact and energy requirement) the Administrator determines has been adequately demonstrated.'' This definition makes clear that the standard of performance must be based on controls that constitute ''the best system of emission reduction (BSER).'' The standard that the EPA develops, based on the BSER, is commonly a numerical emission limit, expressed as a performance level. As provided in CAA 111(b)(5), the EPA does not prescribe a specific technology that must be used to comply with a standard of performance. Rather, sources generally can select any measure or combination of measures that will achieve the emission level of the standard.

The Residential Wood Heaters source category is different from most NSPS source categories in that it is for mass-produced residential consumer products. Thus, important elements in determining BSER include the costs and environmental impacts on consumers of delaying production while wood heating devices with those systems are designed, tested, field evaluated and certified.

Section 111(b)(1)(B) of the CAA requires that the standards be effective upon promulgation of the NSPS. Given this statutory requirement, as discussed more fully in the **Federal Register** notice for the 2015 NSPS rulemaking (80 FR 13672), the EPA adopted the stepped (phased) approach for residential wood heaters, hydronic heaters and forced-air furnaces to provide sufficient implementation time for manufacturers and retailers to comply with Step 2 limits.

B. Regulatory Background

Residential wood heaters were originally listed under CAA section 111(b) in February 18, 1987 (see 52 FR 5065). The NSPS for wood heaters (40 CFR part 60, subpart AAA) was proposed on February 18, 1987 (see 52 FR 4994) and promulgated on February 26, 1988 (see 53 FR 5859) (1988 Wood Heater NSPS). The NSPS was amended in 1998 to address an issue related to certification testing (see 63 FR 64869).

On February 3, 2014, the EPA proposed revisions to the NSPS (See 79 FR 6330) and promulgated revisions on March 16, 2015 (See 80 FR 13672). The final 2015 NSPS updated the 1988 Wood Heater NSPS emission limits, eliminated exemptions over a broad suite of residential wood combustion devices, and updated test methods and the certification process. The 2015 NSPS also added a new subpart (40 CFR part 60, subpart QQQQ) that covers new wood burning residential hydronic heaters and new forced-air furnaces. It also directs owners of pellet or wood chip heaters to burn only the fuel

specified in the owner's manual and that meet certain minimum requirements.

As a part of the 2015 rulemaking, the EPA identified the percentage of wood heaters estimated to be meeting the Step 2 standards prior to promulgation of the 2015 NSPS as 70 percent of pellet stoves and 26 percent of wood stoves. Similarly, 18 percent of hydronic heaters were meeting the Step 2 standards prior to promulgation of the 2015 NSPS, while the limited dataset for forced-air furnaces showed no models meeting the Step 2 standards prior to promulgation of the 2015 NSPS. As of March 20, 2018, there were a total of 78 models (44 pellet models and 34 crib/cord wood) that met the Step 2 standard for wood heaters (as required under 40 CFR 60.532(b) or 60.532(c)), nine models that met the Step 2 standard for hydronic heaters (as required under 40 CFR 60.5474(a)(2) or (b)(3)) and one model that met the Step 2 standard for forced-air furnaces (as required under 40 CFR 60.5474(a)(6)). The inventory of certified models as of March 2018 is provided in the document titled: ''List of EPA certified Wood Heating Devices March 2018,'' which is available in the docket and at the website *https://www.epa.gov/compliance/wood-heater-compliance-monitoring-program.*

In promulgating the 2015 NSPS, the EPA took a ''stepped compliance approach'' in which certain ''Step 1'' standards became effective in May 2015 and more stringent ''Step 2'' standards would become effective five years later, in May 2020.

A major component of demonstrating compliance with either Step 1 or Step 2 is a certification test, using an EPA approved test method, for a given wood heating device. Among other requirements, the emissions from the certification test cannot exceed the emission limit for the standard for which it is certifying (either Step 1 or Step 2). It is worth noting that, because these certification test methods were developed outside of the 2015 NSPS, certification test methods have their own requirements independent of the 2015 NSPS, such as fuel requirements.

The 2015 NSPS included a sell-through provision which allowed seven and a half months for retailers to sell current wood heater and hydronic heater non-compliant inventory (Step 1 sell-through). No sell-through provision was provided for forced-air furnaces because small forced-air furnaces did not have to comply with a numerical emission standard until May 2016, and large forced-air furnaces did not have to comply with a numerical emission standard until May 2017 (see 80 FR 13682 and 13685). While manufacturers could no longer make units that were not certified for the Step 1 standard (after the May 2015 Step 1 effective date), the Step 1 sell-through allowed retailers several months to sell their existing inventory that was not Step 1 compliant. The 2015 NSPS provided no such sell-through provision for the more stringent Step 2 standards that are currently scheduled to become effective in May 2020. The Step 1 and Step 2 standards are discussed further below.

III. Proposed Action

In promulgating the 2015 NSPS, the EPA took a stepped compliance approach to implementing the emission limits for the rule. The Step 1 standard was intended to codify emission limits that were already being met. For wood heaters, (40 CFR part 60, subpart AAA), the Step 1 limit was based on the Washington State standard that had been in effect since 1995 and had been met by most wood heater manufacturers. For hydronic heaters, the Step 1 emission limit was based on the 2010 Phase 2 Voluntary Hydronic Heater Program. Step 1 for forced-air furnaces was what the EPA concluded would be immediately achievable based on a limited dataset.

The Step 1 standard went into effect in May 2015, and Step 2 becomes effective in May 2020 (see discussion at 80 FR 13676–13677). For the Step 1 standards, the EPA provided a ''sell-through'' period of seven and a half months, until December 2015, to allow retailers additional time after the effective date of the rule to sell the non-compliant wood heaters and hydronic heaters remaining in inventory (see 80 FR 13685). Specifically, the 2015 NSPS allowed non-compliant wood heaters and hydronic heaters manufactured before May 15, 2015, to be imported and/or sold at retail through December 31, 2015 (see 40 CFR 60.532(a) and 60.5474(a)(1)).[2] For the Step 2 standards, the EPA did not provide a sell-through period following the May 2020 compliance date. The EPA concluded at the time that the 5-year period leading up to the May 2020 Step 2 compliance date would provide manufacturers with sufficient lead time to develop, test, and certify Step 2-compliant wood heating devices. Meanwhile, in the time before the Step 2-certified models were available for sale, both manufacturers and retailers would be able to continue making and selling Step 1-certified wood heating devices (see 80 FR 13676). The EPA provided further explanation in the 2015 Response to Comments (RTC) document (Docket ID EPA–HQ–OAR–2009–0734). On page 99 of the RTC, the EPA noted that the 5-year period from 2015 to 2020 ''matches the window of time many manufacturers noted they would need to conduct research and development (R&D) and bring a new model to market,'' and on page 231 of the RTC, the EPA concluded that Step 2 standards provide ''appropriate lead times for manufacturers to redesign their model lines to accommodate the improved technology across multiple model lines and test, field evaluate, and certify new model lines.''

Recently, the EPA has learned from manufacturers and retailers that a substantial number of retailers are already reducing or even ending their purchases of Step 1-certified wood heating devices from the manufacturers because they are concerned that they will not be able to sell these devices before the May 2020 Step 2 compliance date and will be left with unsaleable inventory.[3] Additionally, some

[2] The EPA did not provide any sell-through period for forced-air furnaces, because the EPA determined that the requirements that became effective for these heaters in May 2015 (to revise the owner manuals, and training and marketing materials) could be accomplished without disrupting sales and creating undue burden on manufacturers or retailers. See 80 FR 13682 and 13685.

[3] The following statements from various groups or individuals demonstrate these concerns:

Hearth, Patio & Barbecue Association (HPBA): *As time goes on and we get closer to the May 2020 effective date, retailers will reduce their purchase orders of Step 1 products. We are already seeing this happen today—a full two years before the effective date of Step 2. If orders are decreased or cut off, this implies that manufacturing is also being cut off or decreased.* (May 31, 2018, response to request for information from the EPA.)

Frank Moore (President & Owner, Hardy Manufacturing): *Like manufacturers, retailers are making business decisions right now based on the Step 2 2020 requirements. It can sometimes take up to five years for a retailer to sell a hearth product from the time they purchase it from a manufacturer. With that in mind, many retailers aren't purchasing products from manufacturers that don't already meet the 2020 requirements. Even though it is still 2017, in practice the effective date is already having an impact.* (September 13, 2017, testimony before the House Committee on Energy & Commerce Subcommittee on the Environment in support of H.R. 453 (the Relief from New Source Performance Standards Act)).

Mark Freeman (Owner, Kuma Stoves): *SELL THROUGH—This is the most immediate need. I can't tell you how important this is to provide sell-through relief for manufacturers of AAA appliances as well as for the QQQQ manufacturers. Already we are seeing Early-buy orders for the 2018 season being affected from our dealers who are worried about having stock that they won't be able to sell by May 2020. We need this as it is hurting my business and our industry.* (May 1, 2018, email to the EPA.)

Chris Neufeld (Vice President, Blaze King): *The 2015 New Source Performance Standards failed to provide a sell through date. The magnitude of this omission in the 2015 NSPS is growing and growing*

manufacturers have indicated that they will need until May 2020 to develop, test, and certify wood heating devices to meet the 2020 Step 2 standards. As a result, manufacturers may face revenue losses as retailers are not willing to buy the Step 1-certified models and the Step 2-certified models have not yet been developed, tested, and certified. Further, as May 2020 approaches, the EPA expects that retailers will become increasingly reluctant to purchase non-Step 2-compliant wood heating devices which they will not be able to sell after May 2020, resulting in stranded capital. The EPA also acknowledges that the price differential between the Step 2 models and Step 1 models may dampen demand for these heaters and could result in consumers declining to purchase new heaters altogether (although the supplemental RIA does not examine this consumer response in detail).

To address this situation, the EPA is proposing to amend the 2015 NSPS, 40 CFR part 60, subpart QQQQ requirements to create a two-year sell-through period for retailers after the Step 2 compliance date that is similar to the Step 1 sell-through period. The EPA is proposing an amendment that will allow Step 1-compliant hydronic heaters and forced-air furnaces manufactured or imported before May 15, 2020, to be sold at retail through May 15, 2022. The EPA is not proposing any changes to its BSER determination and is not proposing any changes to the 5-year compliance period for Step 2 or the associated May 2020 compliance date. As stated in the March 16, 2015, notice of final rulemaking, the EPA concluded that:

- A final hydronic heater Step 2 emission level of 0.10 lb/mmBtu within 5 years as BSER is a reasonable balance of environmental impacts and costs; and
- a final forced-air furnace Step 2 emission level of 0.15 lb/mmBtu within 5 years as BSER is a reasonable balance of environmental impacts and costs.

While the EPA is soliciting comment on the compliance date for the Step 2 emission limits in a separate **Federal Register** notice, this notice of proposed rulemaking maintains the Agency's 2015 BSER determination, while at the same time seeking to ensure that the full 5-year compliance period is available so that consumers, manufacturers, and retailers are not adversely affected.

In this action, the EPA is seeking comment on this two-year sell-through period for retailers after the Step 2 compliance date, including the reasonableness of the Agency's determination that there is a need for a Step 2 sell-through period and, if providing a sell-through period is reasonable, what length of sell-through period is appropriate and why. The EPA is particularly interested in soliciting comments for the following topics regarding compliant hydronic heaters and forced-air furnaces and the sell-through period:

(1) The Agency solicits comment on whether retailers are currently declining to purchase Step 1-compliant hydronic heaters and forced-air furnaces and how widespread is this reduction in purchases. The EPA also solicits comment as to whether this will become a more significant issue as the May 2020 compliance date approaches and, if so, when is it likely that retailers will no longer be willing to buy Step 1-compliant hydronic heaters and forced-air furnaces at all. The EPA solicits comment on the cost or other impacts that retailers could have on manufacturers who are small businesses if they decline to purchase Step 1-compliant hydronic heaters and forced-air furnaces.

(2) The Agency is soliciting comment as to what is the typical period of time between (a) when a retailer purchases a hydronic heater or forced-air furnace, and (b) when the device is sold to a consumer. In particular, the Agency is soliciting comment on these periods of time for small businesses.

(3) The Agency is soliciting comment on the EPA's proposal that a sell-through period for retailers to sell Step 1-compliant hydronic heaters and forced-air furnaces is a reasonable way to address concerns about retailers' reluctance to purchase Step 1-compliant hydronic heaters and forced-air furnaces and/or manufacturers' inability to sell such heaters and furnaces before Step 2-certified models are available. In particular, the EPA is soliciting comment on the sell-through as a reasonable way to address concerns about retailers of devices and products from small businesses.

(4) The Agency is soliciting comments regarding, if a sell-through period for the May 2020 compliance date were to be promulgated, what period of time after May 2020 would be sufficient for retailers to sell their inventory of Step 1-compliant hydronic heaters and forced-air furnaces. The EPA is proposing a two-year period but is also taking comment on whether either a shorter or a longer sell-through period may be more reasonable and, if so, why a sell-through period other than two years is appropriate. For small businesses in particular, the Agency is soliciting comment on a two-year period and whether that amount of time is reasonable.

(5) The EPA is also soliciting comment on whether the Agency's proposal to provide the same two-year Step 2 sell-through period for both hydronic heaters and forced-air furnaces is reasonable, or whether a sell-through period of some different length may be more appropriate for each of these types of wood heating devices. The EPA is also soliciting comment on whether it may be more appropriate not to provide a sell-through period at all for either hydronic heaters or forced-air furnaces.

(6) The Agency is soliciting information on the number of Step 1 forced-air furnaces and hydronic heaters that are currently in production and the number that are being designed for Step 2 compliance that have not yet received their EPA certification for Step 2 compliance. The EPA requests information on the number of Step 2 pellet and cord/crib wood forced-air furnaces and hydronic heaters that are currently certified to meet Step 2. The EPA is soliciting comment on how far in advance of the current May 2020 Step 2 compliance date manufacturers will need to submit their EPA certification applications to not only meet the standards, but also to manufacture, market, and distribute their products without disruption to their business.

(7) The Agency seeks comment on whether and what type of small business relief may be appropriate in place of the extended sell-through period that would accomplish the same goal.

(8) The Agency seeks comment on the effects on the consumer as a result of a sell-through period.

---

quickly. Here is what we have learned from my visits to nearly 60 retail locations in the past 3 months:

1. Retailers are hesitant to order products that are set to expire on May 15th, 2020.

2. Compounding their concerns, by some estimates, there are 100,000 or more wood and pellet heaters in showrooms across the country that must be sold by May 15th, 2020. Based on these estimates, this could represent an entire year of industry sales. This does not include inventory held by distributors.

3. Dealers expressed real concern that excessive discounting will result and in turn cause their small businesses to become vastly less profitable resulting in layoffs or closure.

4. Retailers are hesitant to schedule summer and fall participation is fairs, home shows and other costly public events, which will reduce profitability.

As a manufacturer, one that has acted in good faith, this could hurt our company to an insurmountable degree. Even though our company and others may demonstrate compliance in advance of May 15, 2020, the very real threat is retailers stop ordering our products in an effort to sell off all the products with the expiration date of May 15, 2020. This matter is very time sensitive. A decision to provide an extension needs to be communicated soon and effectively so as to avoid a serious disruption to our business and that of retailers. (June 1, 2018, email to the EPA.)

Providing specific information and data to explain the basis of your comments on these topics discussed above (and on all matters that you address in your comments) will be helpful in the Agency's consideration of the issues presented by this proposed rule.[4]

IV. Request for Comments on Wood Heaters (40 CFR Part 60, Subpart AAA)

The EPA is also taking comment on whether the 2015 NSPS, 40 CFR part 60, subpart AAA, should also be revised to create a two-year sell-through period for retailers after the Step 2 compliance date for wood heaters similar to what is being proposed for 40 CFR part 60, subpart QQQQ appliances in section III of this preamble. The EPA is seeking comment on whether to allow Step 1-compliant 40 CFR part 60, subpart AAA wood heaters manufactured or imported before May 15, 2020, to be sold at retail through May 15, 2022. In this action, the EPA is seeking comment on a two-year sell-through period for retailers after the Step 2 compliance date, including comment on whether a Step 2 sell-through period for wood heaters is needed, and, if a sell-through period is added, what length of sell-through period is reasonable, and why.

The EPA is particularly interested in soliciting comments for the following topics regarding compliant wood heaters and the sell-through period:

(1) The Agency solicits comment on whether retailers are currently declining to purchase Step 1-compliant wood heaters and whether this reduction in purchases is widespread. In particular, the EPA solicits comment on whether there is a disproportionate change in purchases of crib/cord wood heaters (certification tests with either crib wood or cord wood) compared to pellet wood heaters due to the approaching May 2020 compliance date. The EPA also solicits comment as to whether this will become a more significant issue as the May 2020 compliance date approaches and, if so, when it is likely that retailers will no longer be willing to buy Step 1-compliant wood heaters. The EPA solicits comment on the cost or other impacts that retailers could have on manufacturers who are small businesses if they decline to purchase Step 1-compliant wood heaters.

(2) The Agency is soliciting comment as to what is the typical period of time between (a) when a retailer purchases a wood heater, and (b) when the device is sold to a consumer. In particular, the Agency is soliciting comment on these periods of time for small businesses.

(3) The Agency is soliciting comment as to whether a sell-through period for retailers to sell Step 1-compliant wood heaters is a reasonable way to address these concerns about retailers' reluctance to purchase Step 1-compliant wood heaters and/or manufacturers' inability to sell wood heaters before Step 2-certified models are available. In particular, the Agency is soliciting comment on the sell-through as a reasonable way to address concerns about retailers of devices and products from small businesses.

(4) The Agency is soliciting comments regarding if a sell-through period for the May 2020 compliance date were to be promulgated, what period of time after May 2020 would be sufficient for retailers to sell their inventory of Step 1-compliant wood heaters. The EPA is also taking comment on whether the sell-through period should be as short as one year or as long as three years (or more), and, if so, why such a sell-through period would be more appropriate than two years. For small businesses in particular, the Agency is soliciting comment on a two-year period and whether that amount of time is reasonable.

(5) The Agency is soliciting information on the number of Step 1 wood heater models that are currently in production and the number that are being designed for Step 2 compliance that have not yet received their EPA certification for Step 2 compliance. The EPA requests information on the number of Step 2 pellet and crib/cord wood heaters that are currently certified to meet Step 2. The EPA is soliciting comment on how far in advance of the current May 2020 Step 2 compliance date manufacturers will need to submit their EPA certification applications to not only meet the standards, but also to manufacture, market, and distribute their products without disruption to their business. The EPA solicits comment on any potential impact on consumers if the production of Step 2-compliant wood heaters is limited.

(6) The Agency seeks comment on whether and what type of small business relief may be appropriate in place of the extended sell-through period that would accomplish the same goal.

(7) The Agency seeks comment on the effects on the consumer as a result of a sell-through period.

Providing specific information and data to explain the basis of your comments on these topics discussed above (and on all matters that you address in your comments) will be helpful in the Agency's consideration of the issues presented by this proposed rule.

V. Request for Comments on Pellet Fuel Requirements

Certification tests for residential wood pellet heaters require pellet fuels be made of wood with certain minimum quality requirements to ensure consistent operation for every certification test. These requirements have the added benefit to manufacturers of minimizing emissions during certification testing.

The 2015 NSPS requires that pellets burned in a residential wood pellet heater meet the same minimum quality requirements to ensure consistent operations and comparable emissions. See Pellet Fuel Requirements stated in 40 CFR 60.532(e) and 60.5474(e). These requirements were intended to maintain a level of quality consistent with the requirements of a pellet heater certification test to ensure these pellets are similar to pellets used in certification testing. The EPA concluded at the time that this requirement provided some assurance that the wood pellet heater's performance in the home would be consistent with the laboratory certification test. A pellet manufacturer is not obligated to produce pellets that meet the pellet fuel requirements, but operators and manufacturers of residential pellet heaters in the United States are prohibited from using pellets that do not meet the pellet fuel requirements. However, the Agency has learned of issues regarding these requirements since publication of the 2015 rule. Therefore, the EPA is taking comment on whether the minimum quality pellet fuel requirements in the 2015 NSPS (40 CFR part 60, subparts AAA and QQQQ) should be retained and, if they are retained, whether they should be revised.

(1) The EPA is taking comment on whether 40 CFR part 60, subparts AAA and QQQQ should retain the minimum pellet fuel requirements, which are currently found at 40 CFR 60.532(e) and 60.5474(e). In support of the 2015 NSPS and in response to a remand of the record requested by the EPA, the EPA prepared a memorandum that set forth

[4] In an Advanced Notice of Proposed Rulemaking in another **Federal Register** document that the EPA plans to publish soon, the EPA intends to seek comment on several additional matters, including whether the May 2020 Step 2 compliance date should be extended. The EPA does not view this proposed action for a retailer sell-through period as a measure that would preclude an extension of the Step 2 compliance date. The EPA might both (1) finalize the proposed sell-through period, and (2) subsequently extend the 2020 compliance date. In short, the EPA views the proposed sell-through period and a possible extension of the 2020 compliance date as related, but not mutually exclusive. Whether the EPA does one or both (or neither) will be decided after the EPA considers comments and the other pertinent information.

the Agency's rationale for including pellet fuel requirements. See November 21, 2016, Memorandum from Stephen D. Page, Director, Office of Air Quality Planning and Standards, titled ''EPA's Response to Remand of the Record for Residential Wood Heaters New Source Performance Standards.'' [5] The EPA is requesting comment on the rationale presented in the above-mentioned memorandum and if the current minimum requirements should be retained in its current form at 40 CFR 60.532(e) and 60.5474(e).

(2) The EPA is taking comment on whether the minimum pellet fuel requirements in 40 CFR 60.532(e) and 60.5474(e) should be eliminated entirely.

(3) The EPA is taking comment on whether the pellet fuel requirements, if retained, should be revised. Such revisions could include adding new requirements or removing one or more of the current requirements or revising the requirements that are currently stated. For example, with respect to the maximum dimensions stated in 40 CFR 60.532(e)(2) and 60.5474(e)(2), the Agency is seeking comment on whether this criterion should be removed or replaced with larger or smaller dimensions. The EPA has reviewed the pellet requirements and solicits comment on whether the Agency should revise the current minimum pellet fuel requirements:

1. *Density:* Minimum of 38 lbs/ft^3.

2. *Dimensions:* Maximum length of 1.5″.

3. *Fines:* <1% (EPA referred to ''inorganic fines'' in the 2015 NSPS. Should this be modified to ''fines''?).

4. *Chlorides:* ≤300 ppm.

5. *Ash content:* ≤2%.

6. Contains no demolition or construction waste.

7. Total of each trace metal: 100 mg/kg. Clarify if this should be reported ''as received'' or ''dry basis''. The trace metals include mercury, cadmium, lead, arsenic, chromium, copper, nickel, and zinc.

8. None of the prohibited fuels in paragraph (f) of this section. The prohibited list does not prevent the use of unseasoned wood as an input material for manufacturing pellets.

The EPA is interested in receiving comments that both support the current requirements (and explain why they are necessary) and comments that advocate that the requirements be removed or revised.

[5] This memorandum was placed in the 2015 docket as Docket ID No. EPA–HQ–OAR–2009–0734–1805 and is in the docket for this proposed rule at EPA–HQ–OAR–2018–0195.

VI. Impacts of This Proposed Rule

A. What are the air impacts?

The air impacts associated with the requirements of this proposed rule are the forgone emission reductions of $PM_{2.5}$, HAPs, as well as other criteria pollutants and their precursors, including CO and VOC. VOCs are precursors to $PM_{2.5}$ and ozone. These forgone emission reductions are estimated using the baseline emissions reflected in the final 2015 NSPS as presented in the emissions estimation memorandum and the 2015 NSPS RIA.[6] The average annual forgone emission reductions for the primary scenario (Scenario 2), calculated over the timeframe of 2019–2022, is 257 tons of $PM_{2.5}$, 271 tons of VOC, and 1,444 tons of CO. More information on how these impacts are estimated can be found in the supplemental RIA.

B. What are the energy impacts?

These proposed actions are anticipated to have negligible impacts on energy costs or usage. To the extent that Step 1-compliant hydronic heaters and forced-air furnaces continue to be sold for an additional two years, it is difficult to determine the precise energy impacts that might result from this proposed action. Wood-fueled appliances compete with other biomass forms for residential heating as well as more traditional energy sources such as oil, electricity, and natural gas. There is also a lack of sufficient data to determine the potential for affected consumers to choose other types of fuels and their associated appliances, nor the potential impacts to affected manufacturers.

C. What are the cost savings?

The cost savings of the proposed action are the increase in revenues for manufacturers and retailers of hydronic heaters and forced-air furnaces affected by this rulemaking. The overall distribution of the avoided compliance costs as well as the distribution of forgone benefits is uncertain. The increase in revenues is calculated by estimating the reduction in unit costs from producing Step 1-compliant hydronic heaters and forced-air furnaces as compared to Step 2-compliant devices with estimates of sales taken from the 2015 NSPS RIA, using the estimates calculated for the final 2015 NSPS requirements as the baseline. The revenue estimate calculated is the average of the annual estimates calculated for the 2019–2022 timeframe and the primary scenario (Scenario 2). The estimate of additional average annual revenues to manufacturers is $0.01 billion (2016 dollars). Calculated as an EAV, the estimate is $0.01 billion (2016 dollars). More information on how these impacts are estimated can be found in the supplemental RIA of this proposed rule.

[6] Memo to Gil Wood, USEPA, from EC/R, Inc. Estimated Emissions from Wood Heaters. January 30, 2015. Available in Docket ID: Docket ID No. EPA–HQ–OAR–2009–0734. Regulatory Impact Analysis for Residential Wood Heaters NSPS, Final Report. EPA–452/R–15–001. February 2015. Available at Docket ID: EPA–HQ–OAR–2009–0734–177407344.

D. What are the economic and employment impacts?

The economic impacts of this proposal are the cost savings that are shown in section VI.C of this preamble. Impacts on employment are qualitatively examined in the supplemental RIA.

E. What are the forgone benefits of the proposed rule?

The overall distribution of the avoided compliance costs as well as the distribution of forgone benefits is uncertain. Although this proposed action may result in the delay of the emission reductions from the 2015 NSPS by up to two years, this proposed action to establish a sell-through period does not change the standards upon implementation. The proposed revisions in this action would defer emission reductions into the future, thus delaying the health benefits estimated in the Residential Wood Heaters 2015 NSPS RIA. Due to analytical limitations, it was not possible to conduct air quality modeling for this proposed rule. Instead, the Agency used a ''benefit-per-ton'' approach to estimate the forgone benefits. In brief, the EPA calculated benefit per-ton (BPT) values for this sector by: (1) Characterizing the photochemical modeled $PM_{2.5}$ air quality levels associated with this sector; (2) quantifying the number and economic value of adverse health impacts attributable to these $PM_{2.5}$ concentrations; (3) dividing these values by the sum of the emissions for the sector. The BPT reflects the average national benefits of reducing $PM_{2.5}$ and $PM_{2.5}$ precursors from the residential wood sector and cannot characterize the benefits occurring in discrete geographic locations such as non-attainment areas. For more detailed discussion of the benefit-per-ton approach, please refer to the benefits section in the supplemental RIA accompanying this proposed rulemaking.

As compared to the 2015 NSPS RIA, for the years 2019 to 2022, this proposed rule, if finalized, would result in less

emission reduction of $PM_{2.5}$, HAPs, as well as other criteria pollutants and their precursors, including CO and VOC, compared to the 2015 NSPS final rule. VOC are precursors to $PM_{2.5}$ and ozone. For this proposed rule, the Agency was only able to quantify the monetized forgone health benefits associated with forgone decreased exposure to directly emitted $PM_{2.5}$. The forgone benefits reflect the average of annual $PM_{2.5}$ forgone emission reductions occurring between 2019 and 2022 (inclusive). The Agency estimates the annual average monetized $PM_{2.5}$-related forgone health benefits of the residential wood heaters NSPS in the 2019–2022 timeframe to be $0.10 billion to $0.23 billion (2016 dollars) at a 3-percent discount rate and $0.09 billion to $0.21 billion (2016 dollars) at a 7-percent discount rate. The ends of the range are quantified using Hazard Ratios reported in the Krewski, et al. (2009) and Lepeule, et al. (2012) long-term epidemiological studies. Using alternate relationships between $PM_{2.5}$ and premature mortality supplied by experts, higher and lower estimates of forgone benefits are plausible; but, most of the expert-based estimates fall between these two estimates.[7] A summary of the forgone emissions and monetized forgone benefits estimates for this proposed rule at discount rates of 3 percent and 7 percent is provided in Table 2 of this preamble. All estimates reflect the primary scenario analyzed for this proposal (Scenario 2). Another metric that can be used to calculate such estimates, EAV, yields monetized forgone benefits estimates of $0.09 billion to $0.21 billion at a 3 percent discount rate and $0.07 billion to $0.16 billion at a 7 percent discount rate. More information on all of these calculations can be found in the supplemental RIA.

TABLE 2—SUMMARY OF ANNUAL AVERAGE MONETIZED $PM_{2.5}$-RELATED HEALTH FORGONE BENEFITS FOR NEW RESIDENTIAL WOOD HEATERS, NEW RESIDENTIAL HYDRONIC HEATERS AND FORCED-AIR FURNACES NSPS PROPOSAL IN 2019–2022 TIMEFRAME

[Billions of 2016 dollars][a] [b] [c] [d]

Pollutant	Estimated emission increases (tpy)	Total monetized forgone benefits (3% discount rate)	Total monetized forgone benefits (7% discount rate)
Directly emitted $PM_{2.5}$	257	$0.10 to $0.23	$0.09 to $0.21.
$PM_{2.5}$ Precursors:			
VOC	271		
CO	1,444		

[a] All estimates are for the 2019–2022 timeframe (inclusive) and are rounded to two significant figures. The total monetized forgone benefits reflect the human health benefits associated with reducing exposure to $PM_{2.5}$ through reductions of $PM_{2.5}$ precursors, such as NO_X, and directly emitted $PM_{2.5}$. It is important to note that the monetized benefits do not include reduced health effects from exposure to HAP, direct exposure to nitrogen dioxide (NO_2), exposure to ozone, VOC, ecosystem effects, effects from black carbon or visibility impairment.

[b] Forgone PM benefits are shown as a range from Krewski, *et al.* (2009) to Lepeule, *et al.* (2012).

[c] These models assume that all fine particles, regardless of their chemical composition, are equally potent in causing premature mortality because the scientific evidence is not yet sufficient to allow differentiation of effects estimates by particle type.

[d] All estimates reflect the primary scenario (or Scenario 2) for the proposal.

These forgone benefit estimates represent the annual average economic value of the health benefits that would have occurred in the years 2019, 2020, 2021 and 2022, were the proposed sell-through date not deferred from 2020 to 2022.

The Agency assumes that all fine particles, regardless of their chemical composition, are equally potent in causing premature mortality because the scientific evidence is not yet sufficient to allow differentiation of effects estimates by particle type. Even though the Agency assumes that all fine particles have equivalent health effects, the benefit-per-ton estimates vary between precursors depending on the location and magnitude of their impact on $PM_{2.5}$ levels, which drive population exposure.

For this analysis, policy-specific air quality data are not available. Thus, the Agency is unable to estimate the percentage of forgone premature mortality associated with this specific proposed rule's forgone emission reductions at each $PM_{2.5}$ level. As a surrogate measure of mortality impacts, the Agency provides the percentage of the population exposed at each $PM_{2.5}$ level using the source apportionment modeling used to calculate the benefit-per-ton estimates for this sector. Using the Krewski, *et al.,* (2009) study, 93 percent of the population is exposed to annual mean $PM_{2.5}$ levels at or above the lowest measured level (LML) of 5.8 micrograms per cubic meter ($\mu g/m^3$). Using the Lepeule, *et al,* (2012) study, 67 percent of the population is exposed above the LML of 8 $\mu g/m^3$. Therefore, caution is warranted when interpreting the LML assessment for this proposed rule. The Agency refers the reader to the supplemental RIA prepared for this proposed rule for detailed discussion.

Every benefit analysis examining the potential effects of a change in environmental protection requirements is limited, to some extent, by data gaps, model capabilities (such as geographic coverage) and uncertainties in the underlying scientific and economic studies used to configure the benefit and cost models. A detailed discussion of these uncertainties is provided in the supplemental RIA. Despite these uncertainties, the benefit analysis for this action provides a reasonable indication of the expected forgone health benefits of the proposed rulemaking under a set of reasonable estimations.

The monetized forgone benefits estimates provided above do not include forgone benefits from a variety of additional benefit categories. Although the Agency does not have sufficient information or modeling available to provide monetized estimates for these forgone benefits, the Agency includes a qualitative assessment of these unquantified forgone benefits in the supplemental RIA for this proposed rule. For more information on the benefits analysis, refer to the supplemental RIA for this proposed rule, which is available in the docket at Docket ID No. EPA–HQ–OAR–2018–0195.

VII. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at *http://www2.epa.gov/laws-regulations/laws-and-executive-orders.*

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is an economically significant regulatory action that was submitted to the Office of Management and Budget (OMB) for review. Any changes made in response to OMB recommendations have been documented in the docket. The EPA prepared an analysis of the potential costs and benefits associated with this action. This analysis, Supplemental Regulatory Impact Analysis (RIA)—Estimated Cost Savings and Forgone Benefits Associated with the Proposed Rule, ''Standards of Performance for New Residential Wood Heaters, New Residential Hydronic Heaters and Forced-Air Furnaces'' is a memorandum that is available in the docket. It is also summarized in section I of this preamble.

Consistent with Executive Orders 12866 and 13563, ''Improving Regulation and Regulatory Review,'' the Agency has estimated the cost and benefits of the proposed rule. Given the nature of this rule, the Agency modified the discussion of net benefits (benefits − costs) to be more consistent with the relevant terminology of traditional net benefit analysis. The costs are presented here as the forgone benefits presented in section 5 of the supplemental RIA and section VI.E of this preamble. The Agency represents the benefits as the cost savings presented in section 2 of the supplemental RIA and section VI.C of this preamble, which the Agency estimates as the increase in revenues to manufacturers of affected wood heaters. The net benefits are the benefits (cost savings) minus the costs (forgone benefits). In this proposed rule, the estimated costs are greater than the benefits, leading to a negative net benefit (or net cost). The estimated annual average net benefit at a 3-percent discount rate is $0.09 billion to $0.22 billion, and $0.08 billion to $0.20 billion at a 7-percent discount rate in 2016 dollars, over the 2019 to 2022 timeframe. The net benefit estimate reflects an annual average of 257 tons of forgone $PM_{2.5}$ emission reductions per year, and a total annual average cost savings of $0.01 billion (2016 dollars). The forgone benefits also include forgone emission reductions of 271 tons of VOC reductions per year and 1,444 tons of CO reductions per year; forgone reduced exposure to HAP, including formaldehyde, benzene, and POM; forgone reduced climate effects due to forgone reduced black carbon emissions and GHG emissions; forgone reduced ecosystem effects; and forgone reduced visibility impairments. Table 3 summarizes the estimated costs and forgone benefits for the affected forced-air furnaces and hydronic heaters. The estimated costs and benefits reflect the average annual impacts for the 2019 to 2022 timeframe, which are the implementation years analyzed in the supplemental RIA for this proposed rule. All estimates reflect the primary scenario analyzed for this proposal (Scenario 2). Results for wood stoves, a category not included in the 2-year sell through proposed extension but for which comments are requested to determine if they should be, are also provided in the supplemental RIA.

TABLE 3—SUMMARY OF ANNUAL AVERAGE COST SAVINGS, MONETIZED FORGONE BENEFITS, AND MONETIZED NET FORGONE BENEFITS (BILLIONS OF 2016 DOLLARS) IN THE 2019–2022 TIMEFRAME FOR THE PROPOSED RULE [a] [b]

	3% Discount rate	7% Discount rate
Costs: Forgone Benefits [c]	($0.10) to ($0.23)	($0.09) to ($0.21).
Benefits: Cost Savings from Increased Manufacturers' and Retailers' Revenues	$0.01	
Net Benefits	($0.09) to ($0.22)	($0.08) to ($0.20).

[a] All estimates in this table are rounded to one decimal point, so numbers may not sum due to independent rounding. All estimates reflect the primary scenario (Scenario 2) as described in the supplemental RIA.

[b] All estimates are for the timeframe from 2019 to 2022 inclusive. All estimates reflect the primary scenario (Scenario 2) for this proposal. These results include units anticipated to come online and the lowest cost disposal assumption. These cost savings are presented in the supplemental RIA. The monetized forgone net benefits at a 3% interest rate are minimally different than those calculated at a 7% interest rate.

[c] The total monetized forgone benefits reflect the forgone human health benefits associated with reducing exposure to $PM_{2.5}$ through reductions of directly emitted $PM_{2.5}$. Monetized forgone benefits include many, but not all, health effects associated with $PM_{2.5}$ exposure. Forgone benefits are shown as a range from Krewski *et al.* (2009) to Lepeule *et al.* (2012). We do not report the total monetized forgone benefits by $PM_{2.5}$ species.

In addition, Table 4 reports the present values and equivalent annualized values of the net benefits discounted at 7 and 3 percent. EAV are the annualized present values, or the levelized flow of the present values (PV), over the three years affected by the proposal. The PV of the net benefits are negative $0.07 billion to negative $0.19 billion when using a 7 percent discount rate and negative $0.07 billion to negative $0.20 billion when using a 3 percent discount rate. The equivalent annualized values of the net benefits are negative $0.06 billion to negative $0.15 billion per year when using a 7 percent discount rate and negative $0.08 billion to negative $0.20 billion per year when using a 3 percent discount rate. The negative values indicate that EAV of the estimated benefits (cost savings) of the proposal are smaller than the EAV of estimated costs (forgone benefits). All these estimates are in 2016 dollars and are discounted to 2016.

TABLE 4—ESTIMATED PRESENT VALUES AND EQUIVALENT ANNUALIZED VALUES OF THE BENEFITS, COSTS, AND THE NET BENEFITS OF THE NEW RESIDENTIAL WOOD HEATERS, NEW RESIDENTIAL HYDRONIC HEATERS AND FORCED-AIR FURNACES NSPS PROPOSAL

[Billions of 2016]

	7% Discount rate		3% Discount rate	
	PV	EAV	PV	EAV
Benefits [1]	$0.025	$0.01	$0.029	$0.01.
Costs [2]	($0.09) to ($0.21)	($0.07) to ($0.16)	($0.10) to ($0.23)	($0.09) to ($0.21).
Net Benefits	($0.07) to ($0.19)	($0.06) to ($0.15)	($0.07) to ($0.20)	($0.08) to ($0.20).

[1] The EAV of benefits are the EAV of the cost savings.
[2] The EAV of costs are calculated from the PV of the forgone monetized benefits. Results are rounded to two significant figures. Totals may not sum due to rounding. Values in parentheses are negative.

For more information on the forgone benefits analysis, the cost analysis and the calculation of net benefits, please refer to the supplemental RIA prepared for this proposed rulemaking under Docket ID No. EPA–HQ–OAR–2018–0195.

B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs

This action is expected to be an Executive Order 13771 deregulatory action. Details on the estimated cost savings of this proposed rule can be found in the rule's economic analysis. See section VI of this preamble.

C. Paperwork Reduction Act (PRA)

This action does not impose any new information collection burden under the PRA. OMB has previously approved the information collection activities contained in the existing regulations and assigned OMB Control number 2060–01 for 40 CFR part 60, subpart AAA and OMB Control number 2060–0693 for 40 CFR part 60, subpart QQQQ. This action is believed to result in no changes to the information collection requirements of the 2015 Standards of Performance for New Residential Wood Heaters, New Residential Hydronic Heaters and Forced-air Furnaces rule, so that the information collection estimate of project cost and hour burden from the 2015 final rule have not been revised.

D. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. In making this determination, the impact of concern is any significant adverse economic impact on small entities. An agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, has no net burden, or otherwise has a positive economic effect on the small entities subject to the rule. This proposed rule will not impose any new requirements on any entities because it does not impose any additional regulatory requirements relative to those specified in the 2015 NSPS. The Agency has, therefore, concluded that this action will have no net regulatory burden for all directly regulated small entities.

E. Unfunded Mandates Reform Act of 1995 (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local, or tribal governments or the private sector.

F. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. This rule will not impose any requirements on tribal governments. Thus, Executive Order 13175 does not apply to this action. Consistent with the EPA Policy on Consultation and Coordination with Indian Tribes, the EPA will provide outreach through the National Tribal Air Association and will offer consultation to tribal officials.

H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This proposed action is subject to Executive Order 13045 because it is an economically significant regulatory action as defined by Executive Order 12866. As noted in the preamble to the 2015 NSPS, the EPA does not believe that the environmental health risks or safety risks addressed by the NSPS presents a disproportionate risk to children based on distributional assessments of effects from residential wood smoke emissions (see 80 FR 13700). Although this proposed action may result in the delay of the emission reductions of some hydronic heater and forced air furnace appliances in the 2015 NSPS by up to two years, this will not alter the EPA's prior findings that on a nationwide basis, cancer risks due to residential wood smoke emissions among disadvantaged population groups generally are lower than the risks for the general population due to residential wood smoke emissions. (One of the demographic variables examined by the EPA was that of people 18 years and younger.) Furthermore, the proposed action does not affect the level of public health and environmental protection already being provided by existing NAAQS and other mechanisms in the CAA. This proposed action does not affect applicable local, state, or federal permitting or air quality management programs that will continue to address areas with degraded air quality and maintain the air quality in areas meeting current standards. Areas that need to reduce criteria air pollution to meet the NAAQS will still need to rely on control strategies to reduce emissions. To the extent that states use other mechanisms in order to comply with the NAAQS, this action will not have a disproportionate adverse effect on children's health.

I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not a ''significant energy action'' because it is not likely to have a significant adverse effect on the supply, distribution or use of energy. This action allows affected wood

heating devices to sustain their current levels of operation. It does not promote the reduction in energy use nor does it increase the cost of energy production. Further information on the energy impacts can be found in section VI.B of this preamble.

J. National Technology Transfer and Advancement Act (NTTAA) and 1 CFR Part 51

This rulemaking does not involve technical standards.

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes that this proposed action will not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations or indigenous peoples as specified in Executive Order 12898 (59 FR 7629, February 16, 1994). As noted in the preamble to the 2015 NSPS, the EPA believes that the human health or environmental risk addressed by the NSPS will not have potential disproportionately high and adverse human health or environmental effects on minority, low-income or indigenous populations from residential wood smoke emissions (see 80 FR 13701). Although this proposed action may result in the delay of the emission reductions of some hydronic heater and forced air furnace appliances in the 2015 NSPS by up to two years, this will not alter the EPA's prior findings that on a nationwide basis, cancer risks due to residential wood smoke emissions among disadvantaged population groups generally are lower than the risks for the general population due to residential wood smoke emissions.

Furthermore, the overall distribution of the avoided compliance costs as well as the distribution of forgone benefits is uncertain. Although this proposed action may result in the delay of the emission reductions of some hydronic heater and forced air furnace appliances in the 2015 NSPS by up to two years, this proposed action to establish a sell-through period does not change the standards upon implementation.

List of Subjects in 40 CFR Part 60

Environmental protection, Administrative practice and procedure.

Dated: November 21, 2018.

Andrew R. Wheeler,

Acting Administrator.

For the reasons set out in the preamble, title 40, chapter I of the Code of Federal Regulations is proposed to be amended as follows:

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

■ 1. The authority citation for part 60 continues to read as follows:

Authority: 42 U.S.C. 7401, *et seq.*

Subpart QQQQ—[Amended]

■ 2. Section 60.5474 is amended by revising paragraphs (a)(2) and (a)(6) to read as follows.

§ 60.5474 What standards and requirements must I meet and by when?

(a) * * *

(2) On or after May 15, 2020, manufacture or sell at retail a residential hydronic heater unless it has been certified to meet the 2020 particulate matter emission limit in paragraph (b)(2) or (b)(3) of this section except that a residential hydronic heater certified to meet the 2015 particulate matter emission limit in paragraph (b)(1) of this section manufactured or imported on or before May 15, 2020, may be sold at retail on or before May 15, 2022.

* * * * *

(6) On or after May 15, 2020, manufacture or sell at retail a small or large residential forced-air furnace unless it has been certified to meet the 2020 particulate matter emission limit in paragraph (b)(6) of this section except that a small or large residential forced-air furnace certified to meet the applicable 2015 particulate matter emission limit in paragraph (b)(4) or (b)(5) of this section, respectively, manufactured or imported on or before May 15, 2020 may be sold at retail on or before May 15, 2022.

* * * * *

RIN 2060–AU07

Standards of Performance for New Residential Wood Heaters, New Residential Hydronic Heaters and Forced-Air Furnaces

AGENCY: Environmental Protection Agency (EPA).

ACTION: Advance notice of proposed rulemaking.

SUMMARY: In this action, the Environmental Protection Agency (EPA) is soliciting comment on several aspects of the 2015 Standards of Performance for New Residential Wood Heaters, New Residential Hydronic Heaters and Forced-Air Furnaces (2015 NSPS) in order to inform future rulemaking to improve these standards and related test methods. This action does not propose any changes to the 2015 NSPS, but does take comment on a number of aspects of the rule, including the compliance date for the Step 2 emission limits, Step 2 emission limits for forced-air furnaces, hydronic heaters and wood heaters, Step 2 emission limits based on weighted averages versus individual burn rates, transitioning to cord wood certification test methods, compliance audit testing, third-party review, electronic reporting tool, and warranty requirements.

DATES: *Comments.* Comments must be received on or before February 13, 2019. Under the Paperwork Reduction Act (PRA), comments on the information collection provisions are best assured of consideration if the Office of Management and Budget (OMB) receives a copy of your comments on or before January 29, 2019.

ADDRESSES: *Comments.* Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2018–0196, at *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* See **SUPPLEMENTARY INFORMATION** for details about how the EPA treats submitted comments. *Regulations.gov* is our preferred method of receiving comments. However, the following other submission methods are also accepted:

- *Email: a-and-r-docket@epa.gov.* Include Docket ID No. EPA–HQ–OAR–2018–0196 in the subject line of the message.
- *Fax:* (202) 566–9744. Attention Docket ID No. EPA–HQ–OAR–2018–0196.
- *Mail:* To ship or send mail via the United States Postal Service, use the following address: U.S. Environmental Protection Agency, EPA Docket Center, Docket ID No. EPA–HQ–OAR–2018–0196, Mail Code 28221T, 1200 Pennsylvania Avenue NW, Washington, DC 20460.
- *Hand/Courier Delivery:* Use the following Docket Center address if you are using express mail, commercial delivery, hand delivery, or courier: EPA Docket Center, EPA WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. Delivery

verification signatures will be available only during regular business hours.

FOR FURTHER INFORMATION CONTACT: For questions about this action, contact Ms. Amanda Aldridge, Outreach and Information Division, Mail Code: C304–05, Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–5268; fax number: (919) 541–0072; and email address: *aldridge.amanda@epa.gov.* For information about the applicability of the new source performance standard (NSPS) to a particular entity, contact Dr. Rafael Sanchez, Office of Enforcement and Compliance Assurance, U.S. Environmental Protection Agency, EPA WJC South Building (Mail Code 2227A), 1200 Pennsylvania Avenue NW, Washington, DC 20460; telephone number: (202) 564–7028; and email address: *sanchez.rafael@epa.gov.*

SUPPLEMENTARY INFORMATION:

Docket. The EPA has established a docket for this action under Docket ID No. EPA–HQ–OAR–2018–0196. All documents in the docket are listed in the *Regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *Regulations.gov* or in hard copy at the EPA Docket Center, Room 3334, EPA WJC West Building, 1301 Constitution Avenue NW, Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the EPA Docket Center is (202) 566–1742.

Instructions. Direct your comments to Docket ID No. EPA–HQ–OAR–2018–0196. The EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be CBI or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or email. This type of information should be submitted by mail as discussed below.

The EPA may publish any comment received to its public docket. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www2.epa.gov/dockets/commenting-epa-dockets.*

The *http://www.regulations.gov* website allows you to submit your comment anonymously, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any digital storage media you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should not include special characters or any form of encryption and be free of any defects or viruses. For additional information about the EPA's public docket, visit the EPA Docket Center homepage at *http://www.epa.gov/dockets.*

Submitting CBI. Do not submit information containing CBI to the EPA through *http://www.regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information on any digital storage media that you mail to the EPA, mark the outside of the digital storage media as CBI and then identify electronically within the digital storage media the specific information that is claimed as CBI. In addition to one complete version of the comments that includes information claimed as CBI, you must submit a copy of the comments that does not contain the information claimed as CBI for inclusion in the public docket. If you submit any digital storage media that does not contain CBI, mark the outside of the digital storage media clearly that it does not contain CBI. Information not marked as CBI will be included in the public docket and the EPA's electronic public docket without prior notice. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 Code of Federal Regulations (CFR) part 2. Send or deliver information identified as CBI only to the following address: OAQPS Document Control Officer (C404–02), OAQPS, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attention Docket ID No. EPA–HQ–OAR–2018–0196.

Preamble Acronyms and Abbreviations. The Agency uses multiple acronyms and terms in this preamble. While this may not be an exhaustive list, to ease the reading of this preamble and for reference purposes, the following terms and acronyms are defined here:

BSER Best System of Emission Reduction
CAA Clean Air Act
CBI Confidential Business Information
CFR Code of Federal Regulations
CO Carbon Monoxide
CSA Canadian Standards Association
EPA U.S. Environmental Protection Agency

Organization of this Document. The information presented in this preamble is organized as follows:

I. General Information

A. Does this action apply to me?

Table 1 of this preamble lists categories and entities that are the subject of this notice. Table 1 is not intended to be exhaustive, but rather provides a guide for readers regarding the entities likely to be affected by this proposed action. The issues described in this notice, and any changes considered in future rulemakings, would be directly applicable to sources as a federal program. Other federal, state, local and tribal government entities are not directly affected by this action.

TABLE 1—SOURCE CATEGORIES AFFECTED BY THIS ACTION

Category	NAICS code [1]	Examples of regulated entities
Residential Wood Heating ...	333414	Manufacturers, owners, and operators of wood heaters, pellet heaters/stoves, and hydronic heaters.
	333415	Manufacturers, owners, and operators of forced-air furnaces.
Testing Laboratories	541380	Testers of wood heaters, pellet heaters/stoves, and hydronic heaters.
Retailers	423730	Warm air heating and air-conditioning equipment and supplies merchant wholesalers.

B. How do I obtain a copy of this document and other related information?

In addition to being available in the docket, an electronic copy of this action is available on the internet. Following signature by the EPA Administrator, the EPA will post a copy of this action at *https://www.epa.gov/residential-wood-heaters/final-new-source-performance-standards-residential-wood-heaters.*

Following publication in the **Federal Register**, the EPA will post the **Federal Register** version of this notice at this same website.

II. Background

A. Statutory Background

Section 111 of the CAA requires the EPA Administrator to list categories of stationary sources that, in his or her judgment, cause or contribute significantly to air pollution which may reasonably be anticipated to endanger public health or welfare. The EPA must then issue ''standards of performance'' for new sources in such source categories. The EPA has the authority to define the source categories, determine the pollutants for which standards should be developed, and identify within each source category the facilities for which standards of performance would be established.

Section 111(a)(1) of the CAA defines ''a standard of performance'' as ''a standard for emissions of air pollutants which reflects the degree of emission limitation achievable through the application of the best system of emission reduction (BSER) which (taking into account the cost of achieving such reduction and any non-air quality health and environmental impact and energy requirement) the Administrator determines has been adequately demonstrated.'' This definition makes clear that the standard of performance must be based on measures that constitute BSER, while taking into account multiple statutory factors. The standard that the EPA develops, based on the BSER, is commonly a numerical emission limit, expressed as a performance level. As provided in CAA 111(b)(5), the EPA does not prescribe a specific technology that must be used to comply with a standard of performance. Rather, sources generally can select any measure or combination of measures that will achieve the emission level of the standard. Where certain statutory criteria are met, the EPA may promulgate design, equipment, work practice or operational standards instead of a numerical standard of performance. See CAA 111(h)(1) and (2).

The Residential Wood Heaters source category is different from most NSPS source categories in that it applies to mass-produced residential consumer products. Thus, an important consideration in determining the emission limit that is achievable through the application of the BSER here is the cost to both manufacturers and consumers as well as any potential environmental impact of delaying production while wood heating devices with those systems are designed, tested, field evaluated and certified.

Section 111(b)(1)(B) of the CAA requires that the standards be effective upon promulgation of the NSPS. Given this statutory requirement, as discussed more fully in the **Federal Register** notice for the 2015 NSPS rulemaking (80 FR 13672), the EPA adopted the stepped (phased) approach for residential wood heaters, hydronic heaters and forced-air furnaces to provide sufficient implementation time for manufacturers and retailers to comply with the Step 2 limits. That is, for the 2015 NSPS rulemaking, the EPA determined that certain emission limits phased in over time reflect the degree of emission limitation achievable through the application of BSER.

B. Regulatory Background

Residential wood heaters were originally listed under CAA section 111(b) in February 18, 1987 (see 52 FR 5065). The NSPS for wood heaters (40 CFR part 60, subpart AAA) was proposed on February 18, 1987 (see 52 FR 4994) and promulgated on February 26, 1988 (see 53 FR 5859) (1988 Wood Heater NSPS). The NSPS was amended in 1998 to address an issue related to certification testing (see 63 FR 64869).

On February 3, 2014, the EPA proposed revisions to the NSPS (see 79 FR 6330) and published notice of its final rule making revisions on March 16, 2015 (see 80 FR 13672). The final 2015 NSPS updated the 1988 Wood Heater NSPS emission limits, eliminated exemptions over a broad suite of residential wood combustion devices, and updated test methods and the certification process. The 2015 NSPS also added a new subpart (40 CFR part 60, subpart QQQQ) that covers new wood burning residential hydronic heaters and new forced-air furnaces.

For this action, the term ''wood heaters'' refers to all appliances covered in 40 CFR part 60, subpart AAA, and the terms ''hydronic heaters'' and ''forced-air furnaces'' refer to appliances covered in 40 CFR part 60, subpart QQQQ. Also, for this action, the term ''wood heating devices'' refers to all units, collectively, regulated by the 2015 NSPS (40 CFR part 60, subparts AAA and QQQQ).

In promulgating the 2015 NSPS, the EPA took a ''stepped compliance approach'' in which certain ''Step 1''

[1] North American Industry Classification System.

standards would become effective in May 2015, and more stringent ''Step 2'' standards would become effective five years later, in May 2020. Considering that over 90 percent of wood heating device manufacturers and retailers are small businesses, the Agency adopted this two-phased implementation approach to try to provide manufacturers adequate lead time to develop, test, field evaluate and certify technologies across their product lines to meet the Step 2 emission limits.

The Step 1 standard reflected demonstrated wood heater technologies at the time. For wood heaters, the Step 1 limit was based on the Washington State standard that had been in effect since 1995 and had been met by most wood heater manufacturers. For hydronic heaters, the Step 1 emission limit was based on the 2010 Phase 2 Voluntary Hydronic Heater Program. The Step 1 standard for forced-air furnaces was what the EPA concluded would be immediately achievable based on a limited dataset (see 80 FR 13693).

For the Step 1 standards, the EPA provided a ''sell-through'' period of seven and a half months, until December 2015, to allow retailers additional time after the effective date of the rule to sell the non-compliant wood heaters and hydronic heaters remaining in inventory (see 80 FR 13685). Specifically, the 2015 NSPS allowed non-compliant wood heaters and hydronic heaters manufactured before May 15, 2015, to be imported and/or sold at retail through December 31, 2015 (see 40 CFR 60.532(a) and 60.5474(a)(1)).[2] For the Step 2 standards, the EPA did not provide a sell-through period following the May 2020 compliance date. The EPA concluded at the time that the 5-year period leading up to the May 2020 Step 2 compliance date would provide manufacturers with sufficient lead time to develop, test and certify Step 2-compliant wood heating devices (see 80 FR 13676). However, in light of concerns raised by manufacturers, in a separate rulemaking action, the Agency is proposing a 2-year sell-through period for certain types of wood heating devices that are manufactured before the May 2020 compliance date to be imported and/or sold at retail.

[2] The EPA did not provide any sell-through period for forced-air furnaces because the EPA determined that the requirements that became effective for these heaters in May 2015 (to revise the owner manuals, and training and marketing materials) could be accomplished without disrupting sales and creating undue burden on manufacturers or retailers (see 80 FR 13682 and 13685).

A major component of demonstrating compliance with both the Step 1 and Step 2 standards is a certification test, using an EPA-specified test method, for a given wood heating device. Among other requirements, the emissions from the certification test cannot exceed the emission limit for the standard for which it is certifying (either Step 1 or Step 2). It is worth noting that, because these certification test methods were developed outside of the 2015 NSPS, they have their own requirements independent of the 2015 NSPS, such as fuel requirements.

Another important point is that the EPA-specified test methods may not reflect how a typical consumer uses the device. Some test methods require the use of crib wood,[3] which is air-dried dimensional lumber, rather than typical cord wood,[4] or firewood. Additionally, the EPA-specified test methods direct the certification laboratory to target specific burn rate categories for performance assessment purposes.

III. Request for Comment

The EPA has worked with a wide array of stakeholders, including but not limited to industry, states, and non-governmental organizations, in implementing the 2015 NSPS and received feedback from these stakeholders on how to improve the 2015 NSPS. Based on this feedback, the EPA is soliciting comments on the following 10 topics:

A. Test Methods—Transition to Cord Wood

As discussed at 80 FR 13678, 13684 and 13690 in the 2015 NSPS, the EPA contemplated requiring ''real world'' cord wood test methods for the Step 2 standards in the final rule. However, the Agency determined that it was premature to require a cord wood based-Step 2 emission limit (except for forced-air furnaces for which CSA B415.1–10 already specified cord wood as the test fuel) because no cord wood test method for wood heaters was available at that time. Rather, the EPA based the Step 2 emission limit on crib wood test data but included a voluntary alternative cord wood compliance option and emission limit to encourage manufacturers to certify with cord wood as soon as possible to provide consumers with better information for actual in-home-use performance. Recently, the EPA approved the use of ASTM 3053–17, finalized in November 2017, through the EPA's Broadly Applicable Test Methods approval process. Broadly applicable test methods Alt-125 and Alt-127 (*https://www.epa.gov/emc/broadly-applicable-approved-alternative-test-methods*) are now available for manufacturers wishing to use this voluntary cord wood compliance option.

As the 2015 NSPS did not include a new test method intended to provide ''real world'' data through cord wood compliance testing, the EPA has received many informal comments and taken part in several discussions concerning the differences between the existing compliance test methods and ''real world'' cord wood compliance testing. These discussions have led the EPA to review existing wood appliance test methods and conduct research into the data sets provided by those test methods. In doing so, the Agency recognizes a need to better understand what compliance test procedures are necessary in order to provide a cord wood emissions test data set that serves both the compliance test benchmark (pass/fail) and ''real world'' data collection to support other regulatory needs. Our review of existing test methods has focused on two distinct facets of the testing procedures: (1) Particulate collection and measurement during the testing; and (2) operation and fueling of an appliance during the testing. Each of these two pathways is currently represented in our compliance testing paradigms by a separate test methodology. For example, ASTM E2515–11 serves as the particulate collection and measurement test method for all existing NSPS compliance test requirements, but this test method is always used in conjunction with any one of several different operation and fueling protocols, such as the EPA Method 28R for crib wood fuel testing of a wood heater or the EPA Method 28WHH for crib wood fuel testing of a hydronic heater. There is inherent variability in each facet of the testing, and the overall variability of the testing result combines the variability inherent to each facet. The EPA recognizes that moving away from a crib wood fuel compliance testing paradigm to a cord wood fuel compliance paradigm involves the introduction of the additional variability inherent to cord wood fuel including the use of various species of cord wood fuel across different regions of the U.S. and in different countries where compliance testing may occur. In that light, a review of test method processes and procedures is appropriate with respect to handling this additional and unknown variability,

[3] Crib wood fuel is air dried, dimensional cut Douglas fir lumber, arranged in the firebox per the EPA Method 28R.

[4] Cord wood fuel is traditional firewood cut to nominal commercial sale length and air dried.

and the Agency is seeking public comment regarding the direction and extent to which the EPA should undertake such evaluations of existing test methods, including the scope of test method, appropriateness of testing procedures, validation of test methodology, and revision and/or developing new compliance test methods not currently associated with the existing NSPS standards. To inform comments, the Agency would point out that the EPA has an existing guideline covering Validation and Peer Review of test methods: (*https://www.epa.gov/sites/production/files/2016-02/documents/chemical_method_guide_revised_020316.pdf*). While the EPA Methods 5H and 5G (both particulate test methods) underwent a similar review prior to their publication in the 1988 NSPS (see: R. Gay and J. Shah, Technical Support Document For Residential Wood Combustion, EPA–450/4–85–012, U.S. Environmental Protection Agency, Research Triangle Park, NC, February 1986), those are the only wood burning appliance test methods upon which the EPA has collected such data and done such analysis. The EPA Method 5G is closely related to the current ASTM E2515–11, which is required for measuring particulate throughout the 40 CFR part 60, subparts AAA and QQQQ, and so some understanding of this method variability of ASTM E2515–11 exists through our understanding of the EPA Method 5G. Beyond particulate measurement, the EPA's Method 28, Method 28R, Method 28WHH, Method 28WHH–PTS and all other operation and fueling protocols required by 40 CFR part 60, subparts AAA and QQQQ have not been individually validated or assessed through such a process.

In addition to the lack of information surrounding the validation of these operating and fueling protocols, the Agency recognizes the need to understand the variability introduced to a compliance test protocol through the combustion of various fuel species. Beyond this, the Agency seeks comment on the need to develop a thorough understanding of appliance use and emissions from typical appliance operations such as startup, refueling (adding logs) and other common modes of operation more representative of actual in-home use than the ''high burn, mid burn, and low burn'' modes currently required by Method 28R and/or similar operating conditions required by the various operating and fueling protocols throughout 40 CFR part 60, subparts AAA and QQQQ. The Agency realizes that ''real-world'' data collection stems from an understanding of the actual in-home use of the appliance, and any compliance test paradigm relies on consistent application of appliance fueling and operation during performance tests and, while our existing compliance paradigms provide some testing consistency, the Agency would like information supporting their use or specific information as to more appropriate compliance operation and fueling protocol direction for this program.

The EPA seeks comment on whether existing operation and fueling protocols are suited to deliver an appropriate compliance test result and if existing operation and fueling protocols are suited to deliver ''real world'' emissions data where such data are a necessary output of this program. The EPA also seeks comment on the need to validate existing operation and fueling protocols and/or expend time and resources to develop new validated operation and fueling protocol methods in support of cord wood fuel compliance testing and providing such ''real world'' emissions data from those tests. Relatedly, the EPA also seeks comment with respect to developing new emission standards to correspond with new test methods, if new test method development is found to be necessary. Commenters should provide relevant information and data to support their comments.

B. Feasibility of the Step 2 Compliance Date of May 15, 2020

While some manufacturers have begun manufacturing Step 2-compliant units, the EPA has learned of issues with compliance with these emission limits by the May 15, 2020, deadline. In the 2015 NSPS, the EPA concluded that the 5-year period leading up to the May 2020 Step 2 compliance date would provide manufacturers with sufficient lead time to develop, test and certify Step 2-compliant wood heating devices (see 80 FR 13676).[5]

The Step 1 emission standards reflected demonstrated wood heater technologies at that time. Step 2 standards were deemed to be reasonable levels of emission control five years after promulgation. As a part of the 2015 rulemaking, the EPA identified the percentage of wood heaters estimated to be meeting the Step 2 standards prior to promulgation of the 2015 NSPS as 70 percent of pellet stoves and 26 percent of wood stoves. Similarly, 18 percent of hydronic heaters were meeting the Step 2 standards prior to promulgation of the 2015 NSPS, while the limited dataset for forced-air furnaces showed no models meeting the Step 2 standards prior to promulgation of the 2015 NSPS. As of March 20, 2018, there were a total of 78 (44 pellet and 34 crib/cord wood) models that when certified for the Step 1 and Step 2 standards reported emission levels that met the Step 2 standard for wood heaters (as required under 40 CFR 60.532(b) or 60.532(c)). In addition, there are nine models that met the Step 2 standard for hydronic heaters (as required under 40 CFR 60.5474(a)(2) or (b)(3)) and one model that met the Step 2 standard for forced-air furnaces (as required under 40 CFR 60.5474(a)(6)) based on the Step 2 certification process. The inventory of certified models as of March 2018 is provided in the document titled: ''List of EPA certified Wood Heating Devices March 2018,'' which is available in the docket and at the website *https://www.epa.gov/compliance/wood-heater-compliance-monitoring-program.* The EPA requests comment and information regarding the percentage of models referenced above that the agency projects are meeting standards for each type of equipment.

Recently, some manufacturers have indicated that they need more time to develop, test, and certify wood heating devices that meet the Step 2 standard and that the costs of Step 2 compliance are beyond what the industry can bear. As a result of this input, the EPA is soliciting comment on whether it is feasible/practicable for manufacturers to meet the Step 2 emission limits by May 15, 2020. Commenters should discuss whether the Step 2 compliance date is achievable or not and should provide relevant information and data to support their position. For example, commenters may wish to address the following questions:

1. Are there other factors that have changed or that the Agency did not consider when issuing the 2015 NSPS that have influenced whether some manufacturers are able to comply, and others are not? Why are some manufacturers able to comply with the Step 2 emission limits by May 2020 and others cannot comply by then?

2. For manufacturers expecting to achieve Step 2 emission limits by May 2020, what is the time and cost to bring

[5] The EPA provided further explanation in the 2015 Response to Comments (RTC) document (Docket ID EPA–HQ–OAR–2009–0734–1775). On page 99 of the RTC, the EPA noted that the 5-year period from 2015 to 2020 ''matches the window of time many manufacturers noted they would require to conduct research and development (R&D) and bring a new model to market,'' and on page 231 of the RTC, the EPA concluded that the Step 2 standards provide ''appropriate lead times for manufacturers to redesign their model lines to accommodate the improved technology across multiple model lines and test, field evaluate, and certify new model lines.''

the model to market and how does this compare to the EPA's 2015 NSPS estimates? Were there other timing considerations associated with new state level requirements that were issued in the intervening time between 2015 NSPS promulgation and the May 2020 deadline that may have changed the design timeline? Do manufacturers, considering the size of their businesses, typically sell different models to meet differing state standards or do manufacturers typically have just one model for the nation? Does the manufacturer's business model and distribution chain affect their ability to comply by the compliance deadline? If so, please provide specific information on how this occurs. What is the typical engineering design cycle for small businesses and did five years provide enough time?

3. For manufacturers that do not expect to achieve the Step 2 emission limits by May 2020, what factors are preventing your model(s) from meeting the emission limits? Are there other factors that have changed or that the Agency did not consider when issuing the 2015 NSPS that have had an effect on meeting the May 2020 emission limits? Are there features of wood heating devices that make meeting Step 2 standards more challenging or more expensive? Does a lack of desirable consumer features lead to delays in replacing older dirty stoves or promote switching to other fuels?

The EPA is also soliciting comment on how much the compliance date should be extended, if at all. Commenters should provide relevant information and data to support any request for an extension of the compliance date. For example, commenters may wish to address the following questions:

1. What new factors resulted in the need for time beyond the five years of the 2015 NSPS? The Agency seeks comment and information explaining how cost affects meeting the Step 2 emission limits by May 2020, including why cost projections have changed since the 2015 NSPS, along with relevant data on the cost of research and development, certification testing, and bringing a model to market. Are there other cost considerations such as material costs, warranty costs, installation costs, or maintenance costs that were unexpected or different from what the Agency estimated in the 2015 NSPS? Have there been any other unforeseen impacts on costs for manufacturers due to changes in consumer preferences or attitudes towards the devices and products that would be needed to comply with Step 2? For example, would any of the new designs needed to meet the May 2020 standards impact the size of the unit, how much it would cost consumers to operate it, or change the maintenance frequency or cost?

2. If more time is needed to meet the Step 2 emission limits, the EPA seeks comment on the time and resources devoted to research and development of a Step 2 model since 2014. Commenters should include information regarding time spent on emissions testing, and the number of runs/tests passed versus the number failed. Both manufacturer-produced test data and certified laboratory test data are of interest to the EPA. The Agency is also interested in receiving information regarding emission reduction efforts and any other information outlining attempts to develop a Step 2-compliant model.

3. If more time is needed to meet the Step 2 emission limits, then how much additional time is needed? For example, the Agency solicits comments and detailed information regarding the timetable for conducting research and development, additional testing, developing saleable products, marketing, and any other relevant information and data that supports a request for a delayed compliance date.

The EPA also solicits comment on the environmental consequences and public health effects, if any, of delaying compliance.

C. Step 2 Emission Limit for Forced-Air Furnaces

At the time of the 2015 NSPS, the EPA expected most forced-air furnace manufacturers to transfer technology and knowledge from wood heaters and hydronic heaters to design Step 2-compliant forced-air furnaces by the 2020 compliance date; however, the EPA is only aware of one manufacturer that has received EPA certification as being Step 2 compliant, see website: *https://www.epa.gov/compliance/wood-heater-compliance-monitoring-program.* Prior to the 2015 NSPS, some small forced-air furnace manufacturers had already transferred technology from wood heaters to forced-air furnaces to achieve good performance as discussed at 80 FR 13687. Several manufacturers, however, question whether it is feasible to transfer technology from hydronic heaters. These manufacturers point to the fact that space limitations may affect their ability to adequately insulate models that may be installed in close proximity to combustibles. The Agency requests comment on the installation of cord wood-fired indoor hydronic heaters without large volumes of thermal insulation around the firebox, and whether this approach is feasible and cost effective for forced-air furnaces. The EPA also seeks comment on whether technology transfer is necessary for forced-air furnaces to meet the Step 2 emission limit, and on the technological feasibility and costs of alternatives to thermal insulation around the firebox. The EPA solicits comment on the feasibility of the Step 2 limit for forced-air furnaces and what factors the Agency should consider concerning the feasibility and costs of transferring technologies from other wood heater devices to forced-air furnaces. Comments should include information and data supporting their perspective.

Also, since promulgating the 2015 NSPS, the EPA has received feedback from some manufacturers that complying with the Step 2 emission limit is cost prohibitive. Therefore, the EPA is soliciting comment on whether, regardless of technical feasibility concerns, it is economically feasible to comply with the Step 2 emission limit for forced-air furnaces. Commenters should explain the issues regarding costs and the feasibility/practicability for achieving the Step 2 emission limit and whether changing the Step 2 emission limit would alleviate these issues, along with data supporting the position. The EPA is also soliciting comment on the environmental and public health effects, if any, of modifying the Step 2 emission limit for forced-air furnaces.

As noted earlier, the EPA is also soliciting comment on the feasibility of the Step 2 compliance date of May 15, 2020. The EPA is soliciting comment on whether to extend the Step 2 compliance date for forced-air furnaces. Commenters should provide relevant information and data to support any request for a delayed compliance date. The EPA is also soliciting comment on the environmental and public health effects, if any, of potential extensions of the Step 2 compliance date for forced-air furnaces.

D. Step 2 Emission Limit for Hydronic Heaters

For the 2015 NSPS, the EPA set the Step 2 emission limits based on its determination of the BSER, which takes into account the cost of achieving such reduction and any non-air quality health and environmental impact and energy requirements (See 80 FR 13687). Since promulgation, however, the EPA has received comments from industry representatives that the cost of compliance with Step 2 emission limits for hydronic heaters is exceeding the EPA's original estimation. The EPA

estimated a yearly cost of $46 million (2013$), that would be incurred from 2015 to 2020, for implementation of the 2015 NSPS. Details of how costs of the 2015 NSPS were estimated can be found in Chapter 5 of the Regulatory Impact Analysis for that standard.[6] Furthermore, these comments have indicated that the excess costs have made complying with the Step 2 emission limit cost prohibitive. Are there other cost considerations such as material costs, warranty costs, installation costs, maintenance costs, or other costs that were unexpected or different from what the Agency estimated in the 2015 NSPS? Have there been any other unforeseen impacts on costs for manufacturers due to changes in consumer preferences or attitudes towards the devices and products that would be needed to comply with Step 2? Therefore, the EPA is soliciting comment on the feasibility of complying with the Step 2 emission limit for hydronic heaters. Commenters should explain the issues regarding the practicability of achieving the Step 2 emission limits, whether the EPA's estimated costs are being exceeded[7] or if there are other aspects of the costs that the Agency had not previously considered, and whether changing the Step 2 emission limit will alleviate these issues. Commenters should provide relevant information and data to support their positions. The EPA is also soliciting comment regarding the potential environmental and public health effects, if any, of modifying the Step 2 emission limits for hydronic heaters.

As of March 20, 2018, there are nine models that meet the Step 2 standard for hydronic heaters (as required under 40 CFR 60.5474(a)(2) and 60.5474(b)(2) or (b)(3)), and one model that meets the Step 2 standard for forced-air furnaces (as required under 40 CFR 60.5474(a)(6) and 60.5474(b)(6)) based on the Step 2 certification process. These models are listed in the document titled ''List of EPA certified Wood Heating Devices March 2018,'' which is in the docket at EPA–HQ–OAR–2018–0196. Also see link *https://www.epa.gov/compliance/wood-heater-compliance-monitoring-program.*

The EPA is requesting comment regarding these models and models that have not met the Step 2 standard for hydronic heaters and what they demonstrate about achieving the standard at a reasonable cost. Specifically, for manufacturers expecting to be unable to design a hydronic heater to meet the Step 2 standard, the EPA is interested in whether the Step 2 standard applicable to your device is achievable at a reasonable cost by the May 2020 Step 2 compliance date. The Agency is also interested in receiving information regarding efforts undertaken to design hydronic heaters to meet the applicable Step 2 standard, including cost, and if one or more models are expected to be ready for certification by the May 2020 Step 2 compliance date, when you expect to submit your application(s) for certification to the EPA.

As noted earlier, the EPA is also soliciting comment on the feasibility of the Step 2 compliance date of May 15, 2020. The EPA is soliciting comment on whether to extend the Step 2 compliance date for hydronic heaters. Commenters should provide relevant information and data to support any request for a delayed compliance date. The EPA is also soliciting comment on the environmental and public health effects, if any, of potential extensions of the Step 2 compliance date for hydronic heaters.

E. Step 2 Emission Limit Based on Weighted Averages Versus Individual Burn Rates for Hydronic Heaters and Forced-Air Furnaces

For hydronic heaters, the 2015 NSPS retained the proposed Step 1 emission cap of 18 grams per hour (g/hr) for all burn rates. For forced-air furnaces, the 2015 NSPS does not require an emission cap for any burn rates for Step 1. The Step 2 requirements for hydronic heaters did not retain the g/hr cap. Instead, to balance industry's concern with the g/hr cap with concerns about very large emissions at individual burn rates, the Step 2 emission standards for hydronic heaters and forced-air furnaces require the devices to meet the emission limits for crib wood and cord wood, at each individual burn rate (see 80 CFR 13684 and 13690).

The emission limits for hydronic heaters reflect the data available for the 2015 NSPS rulemaking, when 18 percent of hydronic heaters in the EPA's Voluntary Hydronic Heater Program already met the Step 2 standard. For forced-air furnaces, the EPA determined that research and development would be needed in order to meet the Step 2 limits.[8]

In the 2014 NSPS proposal, the EPA proposed a weighted average approach for compliance. But, because of the large emissions that could potentially result from individual burn rates, along with the proposed weighted average approach, the EPA also proposed a g/hr cap for the certification test. Comments received from industry representatives in 2014 suggested that the g/hr emission cap would be too difficult to meet. To accommodate these concerns, and after considering other public comments, the EPA finalized the emission standards without a g/hr cap but required the devices to meet the emission limit at each individual burn rate to prevent large emission discharges.

Based on concerns raised since promulgating the 2015 NSPS, the EPA is soliciting comment on determining compliance with weighted averages instead of individual burn rates. Commenters should describe the relevant issues pertaining to compliance with the Step 2 emission limit with individual burn rates versus a weighted average and also include data to support their position. Commenters should also discuss and support with data how a weighted average would impact emissions and compliance costs.

F. Step 2 Emission Limit for Wood Heaters

As of March 20, 2018, there were a total of 78 models that when certified for the Step 1 and Step 2 standards reported emission levels that meet the Step 2 standard for wood heaters (as required under 40 CFR 60.532(b) or 60.532(c)). These models are listed in the document titled ''List of EPA certified Wood Heating Devices March 2018,'' which is in the docket at EPA–HQ–OAR–2018–0196. Also see link *https://www.epa.gov/compliance/wood-heater-compliance-monitoring-program.*

The EPA is requesting comment on all aspects of the costs associated with the Step 2 standards for wood heaters compared to the costs estimated by the EPA in the 2015 NSPS and whether Step 2 is achievable at a reasonable cost. The EPA requests comment on the potential cost difference for consumers to operate different types of wood heaters and, in particular, the cost of operating a pellet wood heater compared to the cost of operating a cord/crib wood heater.

If you are a manufacturer that has been unable to design a wood heater to

[6] U.S. Environmental Protection Agency. Regulatory Impact Analysis (RIA) for the Residential Wood Heaters NSPS Revision. Final Report. EPA–452/R–15–001. Available on the internet at *https://www3.epa.gov/ttn/ecas/docs/ria/wood-heaters_ria_final-nsps-revision_2015-02.pdf.*

[7] Memo to Gil Wood, USEPA, from EC/R Inc. Estimated Residential Wood Heater Manufacturer Cost Impacts. January 30, 2015. Available in Docket ID No. EPA–HQ–OAR–2009–0734.

[8] Memo to Gil Wood, USEPA, from EC/R Inc. Estimated Residential Wood Heater Manufacturer Cost Impacts. January 30, 2015. Available in Docket ID No. EPA–HQ–OAR–2009–0734.

meet the Step 2 standard, the EPA is interested in whether you think the Step 2 standard applicable to your device is achievable at a mean capital cost per model of $162,300 (for wood stoves and pellet stoves, in 2016 dollars) by the May 2020 Step 2 compliance date and whether this cost is reasonable.[9] The EPA is requesting comment on the technical feasibility of achieving the Step 2 standards for 40 CFR part 60, subpart AAA wood heaters including both pellet and cord/crib wood heaters and whether the Agency should consider creating separate source categories for these different wood heaters types.[10] Since more pellet stoves meet Step 2 than crib/cord wood stoves, the EPA is interested in hearing from manufacturers and the public on the concept of different emission standards for pellet-fired and crib/cord wood-fired heating devices. The Agency is also interested in receiving information regarding the efforts you have undertaken to design a wood heater, both for pellet and crib/cord wood heaters, to meet the applicable Step 2 standard, including the cost of your efforts to do so. In addition, the EPA requests information on how many models of pellet and crib/cord wood heaters you expect will be and will not be ready for certification by the May 2020 Step 2 compliance date, and when you expect to submit your application(s) for certification to the EPA.

Additionally, the EPA has received informal comments from several parties regarding emissions testing variability and, along with those discussions, issues have been raised regarding the units or format of the Step 2 emission limit in 40 CFR 60, subpart AAA. One issue raised is that the existing emission limit in units of grams per hour (g/hr) increases variability in that the duration of the performance test directly impacts the g/hr result, thus incentivizing longer test periods. The EPA is soliciting comments on this form of the standard (g/hr) and whether it is appropriate for the purpose of defining the compliance limit and, if not, what form of a standard would be more appropriate and reasons supporting those positions. Other possible unit options for the emission limit could be g/kg or lb/mmBtu. Commenters are asked to provide relevant information and data (where available) to support their comments.

G. The EPA Compliance Audit Testing

The EPA seeks comment with respect to the EPA compliance audit test provisions in the current rules (2015 NSPS), found at 40 CFR 60.533(n) (80 FR 13708) for wood heaters and at 40 CFR 60.5475(n) (80 FR 13721) for hydronic heaters and forced-air furnaces. Specifically, the Agency is seeking comment on whether revisions to the current compliance audit test provisions are necessary to ensure compliance. First, the Agency is seeking comment on 40 CFR 60.533 (n)(2)(i) and 40 CFR 60.5475(n)(2)(i) regarding if it is appropriate for the EPA to select a lab to perform the audit test from any approved test laboratory, and whether the EPA should also consider using a federal laboratory. Alternatively, the EPA seeks comment on whether audit tests should be performed by the same lab that did the certification test for a given wood heater appliance. If the audit test should be done by the certifying lab, the EPA seeks comment on how to handle situations where the original certifying lab is out of business or unable to accommodate the audit test. Commenters should include any relevant information and data that support their views and comments.

Second, as some variability is inherent in emissions testing, the Agency is seeking comment (and information) on whether and, if so, to what degree, the EPA should consider this variability when assessing the result of an audit test to determine if a wood burning appliance successfully passed the test, or not. Please provide relevant information and data to support your comments.

Third, the Agency is seeking comment on establishing (as well as how best to manage the regulatory cost of), through NSPS regulation, a program using ASTM E691–99 ''Standard Practice for Conducting an Interlaboratory Study to Determine the Precision of a Test Method.'' The intent of such a program would be to develop and establish wood heating device audit test acceptability criteria, and to provide data useful to the EPA in both refining wood heating device test methodology development and in aiding the regulatory data collection with respect to wood heater, forced-air furnace, and hydronic heater emissions and standards setting processes. The EPA is also requesting comment on the cost or any concerns with specifying a specific certification lab and any discussion of the use of a federal versus a private lab. For the 2015 NSPS, the EPA estimated a cost of $63,564 for each compliance audit conducted for each hydronic heater and forced-air furnace over the period of 2015 to 2017, an estimate documented in the Supporting Statement for the standard.[11]

H. ISO-Accredited Third-Party Review

In the 2015 NSPS, the EPA included a new feature to improve the process by which manufacturers of wood heating devices apply for certification (see 80 FR 13684, and the ISO-accredited third-party review at 80 FR 13706 and 80 FR 13719). The ISO-accredited third-party review was included in the 2015 NSPS to streamline and speed up the review process.

The EPA is seeking comment on whether third-party review has streamlined the process for manufacturers to submit their certification applications and/or what issues and problems stakeholders have experienced with third-party review process. The EPA also solicits suggestions for improving the third-party review and reducing regulatory burden, including what specific rule changes would be appropriate, and why. Commenters should provide relevant information and data to support their comments and suggestions.

The current process allows the EPA-approved certifying lab to also act as the third-party reviewer for a given appliance. Some external stakeholders have raised concerns about allowing a lab to act as both the certifying test lab and third-party reviewer for a given certification test. The EPA solicits comments as to whether an EPA-approved lab should be allowed to act

[9] Estimate is based on the mean capital cost per model in Table 5–1, p. 5–5 of that RIA, escalated to 2016 dollars from the original 2013 dollar estimate of $156,000. Escalation uses the annual value of GDP implicit price deflator, which is 1.04127 higher in 2016 than 2013.

[10] In the 2015 final rule, the EPA noted that it was ''making a single determination of BSER for catalytic, noncatalytic, hybrid, cord wood and pellet heaters and furnaces in order to not restrict open market competition.'' Furthermore, as noted in the Response to Comment document: ''It is up to manufacturers to decide what combustion technology/wood fuel to use to meet the emission limits and up to consumers to decide what types of heaters they wish to purchase that are certified to meet those limits.'' Performance standards may drive competition in the marketplace; however, maintaining just one source category for these wood heaters may distort the marketplace and raise costs for both manufacturers and consumers if only a limited number of wood heaters or predominantly one type of wood heater can meet the Step 2 standards. Pellet wood heaters may be more readily able to meet more stringent standards due to the consistent fuel type and continual operating mode compared to crib/cord wood heaters that may require more costly redesigns to meet the Step 2 standards. In addition, the agency did not consider the lifetime operating costs in the 2015 NSPS as the difference in fuel costs between operating a crib/cord wood and pellet wood heater could be considerable over the lifetime of the wood heater if consumer choice is limited to just pellet stoves due to the Step 2 standards.

[11] U.S. Environmental Protection Agency. NSPS for New Residential Hydronic Heaters and Forced-Air Furnaces (40 CFR part 60, subpart QQQQ) (Final Rule). January 2015. Pp. 11–12.

as both the certifying lab and third-party reviewer. Commenters should address whether this is a problem and provide available data to support their position.

I. Electronic Reporting Tool (ERT)

The EPA seeks comment on establishing electronic reporting for submitting the non-confidential business information (CBI) certification application, including the compliance test data, rather than via hard copy, to relieve manufacturer burden and enhance efficiencies. One possibility is the EPA's Electronic Reporting Tool (ERT). The ERT is a Microsoft Access® application that generates electronic versions of source test reports. Information on the ERT can be found at *https://www.epa.gov/electronic-reporting-air-emissions/electronic-reporting-tool-ert.* The EPA believes that using the ERT will relieve the burden on manufacturers in the certification application process by standardizing the reporting format by having specific data elements reported, thereby helping to ensure completeness and accuracy of the data submitted. As a result, the electronically submitted application with complete and accurate data will enable an efficient and timely review. In addition, because the ERT performs the required method calculations, certification test report errors will be reduced and the burden of performing these calculations manually will be eliminated for the manufacturers as well as for the third-party certifiers and the EPA reviewers. If the ERT were used, it would generate a non-CBI test report (in pdf format) along with the ERT-generated Access database (accdb) file that could be submitted to the EPA for certification and once certified, posted to the manufacturer's website. This ERT-generated test report would include a list of attachments in the ERT file but not the attachments themselves. The attachments would be contained in the ERT accdb file and if posted to the manufacturer's website would be available to the public. Posting the pdf will also address the version control concerns of the ERT-generated database file. These two components could satisfy the reporting requirements in 80 FR 13713 and 13725. The EPA seeks comment on whether to include the option of using the ERT to create a non-CBI and a CBI test report and certification package (pdf and .accdb file) that satisfies the reporting requirements in 40 CFR 60.537(f) and 60.5479(f), which requires the manufacturer to submit the results of a certification test within 60 days of completing each performance test. If the EPA changes the current provisions, the Agency expects that the manufacturers would still be required to post the full non-CBI test report (pdf with all attachments or ERT generated pdf with the Access database (accdb) file) on the manufacturer's website and submit the CBI test report separately to the EPA. Manufacturers, who claim that some of the information being submitted is CBI (*e.g.,* design drawings), could also utilize the same non-CBI test report generated by the ERT and add the design drawings as an attachment to be submitted to the EPA as CBI in order to satisfy the requirements under 40 CFR 60.537(f) and 60.5479(f). Similarly, the non-CBI report with no CBI information attached could be posted to the manufacturer's website within 30 days of receiving a certification of compliance to satisfy 40 CFR 60.537(g) and 60.5479(g). Please provide as much detailed information as possible to support your comments regarding this approach.

J. Warranty Requirements for Certified Appliances

The 2015 NSPS requires owners or operators to operate wood heating devices consistent with the owner's manual (see 40 CFR 60.532(f)(13) and (g) and 60.5474(f)(13) and (g)). The 2015 NSPS also requires manufacturers to provide an owner's manual that clearly states that operation in a manner inconsistent with the manual, such as burning prohibited material or pellets that do not meet the minimum requirements of the 2015 Rule, would void the warranty (see 80 FR 13751, appendix I to Part 60). The cost of this requirement to provide an owner's manual is an average of $3,750 per hydronic heater or forced-air furnace model over the time period of 2015 to 2017, according to the Supporting Statement for the 2015 NSPS.[12] Although numerous states expressed their support for these requirements as a mechanism to help enforce the 2015 NSPS, some stakeholders have questioned whether the EPA has the statutory authority to impose these requirements. Stakeholders have also raised other issues regarding the warranty requirements. The EPA is, therefore, soliciting comments regarding retention, revision, or elimination of the warranty requirements. For example, the EPA would be interested in hearing whether such requirements are necessary for the safe and efficient operation of the wood heater devices. Commenters supporting retention of the requirements should address whether any changes are recommended to the warranty requirements along with data, as appropriate, and an explanation to support their position. Commenters supporting elimination of the requirements should provide an explanation to support their position.

VII. Statutory and Executive Order Reviews

Under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993), this is a ''significant regulatory action.'' Accordingly, the EPA submitted this action to the Office of Management and Budget (OMB) for review under Executive Order 12866 and any changes made in response to OMB recommendations have been documented in the docket for this action. Because this action does not propose or impose any requirements, and instead seeks comments and suggestions for the Agency to consider in possibly developing a subsequent proposed rule, the various statutes and Executive Orders that normally apply to rulemaking do not apply in this case. Should the EPA subsequently determine to pursue a rulemaking, the EPA will address the statutes and Executive Orders as applicable to that rulemaking.

RIN 0648–XG608

Magnuson-Stevens Act Provisions; Fisheries of the Northeastern United States; Fisheries of the Northeastern United States; Atlantic Herring Fishery; Adjustment to Atlantic Herring Specifications and Sub-Annual Catch Limits for 2019

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: This action proposes an in-season adjustment to the Atlantic herring specifications and sub-annual catch limits for 2019. These adjustments are necessary to reduce 2018 herring catch limits that would otherwise remain in effect for 2019. This action is intended to prevent overfishing of the herring resource while minimizing negative social and economic impacts of reduced catch limits.

DATES: Public comments must be received by December 31, 2018.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2018–0131, by either of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2018-0131,* click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit written comments to Michael Pentony, Regional Administrator, 55 Great Republic Drive, Gloucester, MA 01930. Mark the outside of the envelope, ''Comments on Adjustments to Atlantic Herring Specifications for 2019.''

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by us. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. We will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

Copies of this action, including the Supplemental Environmental Assessment and the Regulatory Impact Review/Initial Regulatory Flexibility Analysis (SEA/RIR/IRFA) prepared in support of this action, are available from Thomas A. Nies, Executive Director, New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950. The supporting documents are also accessible via the internet at: *https://www.regulations.gov/.*

SUPPLEMENTARY INFORMATION:

Background

We implemented 2016–2018 Atlantic herring specifications on November 1, 2016 (81 FR 75731), as recommended by the New England Fishery Management Council. The specifications included an overfishing limit (OFL) of 111,000 mt for 2018. The acceptable biological catch (ABC) for 2018 was also set at 111,000 mt. The ABC was based on the Council's interim control rule, set equal to the OFL with at least a 50-percent probability of preventing overfishing, and consistent with the Council's Scientific and Statistical Committee's (SSC) advice. The annual catch limit (ACL) for 2018 was 104,800 mt.

In June 2018, a new Northeast Regional Stock Assessment Workshop (SAW) for herring, reviewed by the Stock Assessment Review Committee (SARC), was completed. The assessment concluded that although herring was not overfished and overfishing was not occurring in 2017, poor recruitment would likely result in a substantial decline in herring biomass. The stock assessment estimated that recruitment had been at historic lows during the most recent 5 years (2013–2017). The assessment projected that biomass could increase, after reaching a low in 2019, if recruitment returns to average levels, but that herring catch would need to be reduced, starting in 2018, to prevent overfishing and lower the risk of the stock becoming overfished. The final assessment summary report is available on the Northeast Fisheries Science Center (NEFSC) website (*www.nefsc.noaa.gov/publications/*).

The Atlantic Herring Fishery Management Plan (FMP) allows us to make in-season adjustments to the herring specifications and sub-ACLs, after consultation with the Council, consistent with the Herring FMP's objectives and other FMP provisions. In August 2018, at the request of the Council, we used an in-season adjustment to reduce the 2018 ACL from 104,800 mt to 49,900 mt to reduce the risk of overfishing (83 FR 42450, August 22, 2018). This ensured at least a 50-percent probability of preventing overfishing in 2018. However, assessment projections indicated that catch would need to be further reduced in 2019 to prevent overfishing and lower the risk of the stock becoming overfished.

By regulation, herring catch limits for 2018, as modified by the 2018 in-season adjustment, will remain in effect until replaced. At its September 2018 meeting, the Council adopted a new ABC control rule for the herring fishery developed in Amendment 8 to the Herring FMP and recommended we use an in-season adjustment to reduce 2018 herring catch limits for 2019 while it develops new specifications starting in 2020. The Council was scheduled to begin developing the 2019–2021 herring specifications at its September meeting and take final action on the new specifications at its December 2018 meeting. The Council planned for us to implement the new specifications during 2019, based on the new ABC control rule it adopted in Amendment 8. However, because of the time required for the Council to prepare the necessary documentation and for us to review and approve the control rule in Amendment 8 and implement final approved measures, the new specifications would not have been effective early enough to prevent catch from exceeding the lower catch limits required to prevent overfishing in 2019.

Proposed Adjustments to Herring Specifications

We are proposing to adjust the current herring specifications and sub-ACLs for 2019, consistent with the Herring FMP's objectives of preventing overfishing while maximizing social and economic benefits. We will strive to publish the final rule as close as possible to the start of the new fishing year in January 2019. The 2019 specifications and sub-ACLs proposed in this action, as well as the Council's recommendations for 2019, are shown in Table 1.

TABLE 1—2019 ATLANTIC HERRING SPECIFICATION AND SUB-ACL ALTERNATIVES (mt)

	Alternative 1—no action	Alternative 2—council-recommended	Alternative 3—proposed action
Overfishing Limit	111,000	30,688	30,688
Acceptable Biological Catch	111,000	21,266	30,688
Management Uncertainty	6,200	6,200	6,200
Optimum Yield/ACL	49,900 *	15,065 *	24,488 *

TABLE 1—2019 ATLANTIC HERRING SPECIFICATION AND SUB-ACL ALTERNATIVES (mt)—Continued

	Alternative 1—no action	Alternative 2—council-recommended	Alternative 3—proposed action
Domestic Annual Harvest	104,800	15,065	24,488
Border Transfer	4,000	0	0
Domestic Annual Processing	100,800	15,065	24,488
U.S. At-Sea Processing	0	0	0
Area 1A Sub-ACL	27,743* (55.6%)	4,354* (28.9%)	7,077* (28.9%)
Area 1B Sub-ACL	2,639 (5.3%)	647 (4.3%)	1,053 (4.3%)
Area 2 Sub-ACL	8,200 (16.4%)	4,188 (27.8%)	6,808 (27.8%)
Area 3 Sub-ACL	11,318 (22.7%)	5,876 (39%)	9,550 (39%)
Fixed Gear Set-Aside	295	39	64
Research Set-Aside	3% of sub-ACLs	3% of sub-ACLs	3% of sub-ACLs

*If New Brunswick weir fishery catch through October 1 is less than 4,000 mt, then 1,000 mt will be subtracted from the management uncertainty buffer and added to the ACL and Area 1A Sub-ACL.

We consulted with the Council on potential 2019 specifications during the Council's September 2018 meeting. At that meeting, the Council recommended that we:

- Use the most recent assessment and projections to develop the 2019 specifications.
- Use the ABC control rule approved by the Council in Amendment 8.
- Maintain the sub-annual catch limits for herring management areas based on the proportions allocated in the 2016–2018 specifications package.
  - Area 1A: 28.9 percent.
  - Area 1B: 4.3 percent.
  - Area 2: 27.8 percent.
  - Area 3: 39 percent.
- Proportionally reduce the fixed gear set-aside allocation which is based on a small weir fishery west of Cutler, ME.
- Set the border transfer (which allows U.S. vessels to transfer herring to Canadian vessels to be processed as food) at 0 mt.

Based on the best available science, we are proposing to reduce the OFL for 2019 to 30,688 mt. The Herring FMP specifies that the OFL must be equal to catch resulting from applying the maximum fishing mortality threshold to a current or projected estimate of stock size. When the stock is not overfished and overfishing is not occurring, this is usually the fishing rate supporting maximum sustainable yield. Catch that exceeds this amount would result in overfishing. An OFL of 30,388 mt would ensure at least a 50-percent probability of preventing overfishing in 2019. This OFL is based on projections by the SAW/SARC, as updated by NOAA's NEFSC staff using 2018 catch, and was recommended by both the SSC and the Council.

The Herring FMP specifies that the ABC may be equal to or less than the OFL depending on scientific uncertainty concerning stock size estimates, variability around recruitment estimates, and consideration of ecosystem issues. For the 2019 ABC reduction, we are proposing to continue applying the interim control rule that was used to set ABC in recent specifications (2016–2018). Our proposed ABC would have a 50-percent probability of preventing overfishing in 2019 and would be set equal to the OFL. In contrast, the SSC and Council recommended reducing the ABC for 2019 based on the new control rule the Council adopted in Amendment 8 that accounts for herring's role in the ecosystem. Our proposed ABC is 30,688 mt and the SSC/Council recommended ABC is 21,266 mt.

Our proposed ABC prevents overfishing and accounts for scientific uncertainty in the short-term until we are able to consider the Council's recommendation for addressing scientific uncertainty in a long-term control rule in Amendment 8. The approach to continue using the interim control rule for 2019 is independent of and involves different considerations than our consideration of the Council's recommended control rule in Amendment 8. We expect the Council to submit Amendment 8 to us for review and approval in late 2018. Additionally, while the 2018 assessment showed that the probability of the stock becoming overfished has increased since the last stock assessment, our proposed ABC is intended to reduce the risk of the stock becoming overfished.

We are proposing to maintain the current management uncertainty buffer (6,200 mt), as recommended by the Council, so the resulting ACL would be 24,488 mt. This ACL is almost 10,000 mt higher than the ACL that would result from the Council-recommended ABC (15,065 mt). Allowing this additional harvest helps to achieve optimum yield (OY) by accounting for social, economic, and ecological factors, specifically the need to conserve herring biomass while mitigating severe economic hardship on the herring industry. Because the majority of herring catch is bait for the lobster fishery, we expect this additional harvest to help minimize the negative economic impacts associated with bait shortages and higher bait prices on the lobster fishery. The management uncertainty buffer, in conjunction with low fishery closure thresholds (95 percent of the ACL and 92 percent of a sub-ACL), has prevented herring catch from ever exceeding the ABC, which further minimizes the probability of overfishing.

We are proposing to maintain the sub-ACL allocations used in the recent specifications (2016–2018) for 2019. This means that 28.9 percent of the ACL would be allocated to Area 1A, 4.3 percent allocated to Area 1B, 27.8 percent allocated to Area 2, and 39 percent allocated to Area 3. These sub-ACL allocations were recommended by the Council for past specifications, as well as for 2019, because they do not substantially impact one stock component (inshore versus offshore) more than the other while maximizing opportunities for the fishery to achieve OY. Adjusting the sub-ACL allocations for the herring management area may have impacts beyond those we considered in this action. For that reason, we are seeking public comment on the proposed sub-ACL allocation versus other possible sub-ACL allocations that would be consistent with the Herring FMP's objectives.

Based on the Council's recommendations, we are also proposing to reduce border transfer to 0 mt and reduce the fixed gear set-aside to 64 mt for 2019. Border transfer is a processing quota and is the maximum amount of herring that can be transshipped to Canada via Canadian carrier vessels for human consumption. Border transfer has been under-utilized in recent years, and there has been no border transfer since 2015. Reducing the border transfer to 0 mt for 2019 would

ensure all herring caught in U.S. waters are available to U.S. Federal dealers for lobster bait or human consumption. Additionally, we are proposing that the fixed gear set-aside be reduced proportionally to the Area 1A sub-ACL to 64 mt. The Herring FMP allows up to 500 mt of the Area 1A sub-ACL to be allocated for the fixed gear fisheries in Area 1A (weirs and stop seines) that occur west of 67°16.8′ W long (Cutler, Maine). This set-aside is available for harvest by fixed gear within the specified area until November 1 of each fishing year. Any portion of this allocation that has not been harvested by November 1 is transferred back to the sub-ACL allocation for Area 1A. The proposed reduction of the fixed gear set aside is intended to allow additional herring harvest to be available to both fixed and mobile gears in Area 1A to help ensure OY is achieved. Like border transfer, the fixed gear set-aside has been under-utilized in recent years. Fixed gear landings tracked against the set-aside have averaged less than 12 mt in the past 5 years.

The Herring FMP requires we adjust for catch overages and underages in a subsequent year. Total catch in 2017 did not reach or exceed any of the management area sub-ACLs, so typically we would carryover those underages, or a portion of the underages, to increase sub-ACLs in 2019. However, to help ensure catch does not exceed the ABC/OFL in 2019 and to help prevent overfishing, we are proposing to not increase any sub-ACLs in 2019 based on carryover from underages in 2017.

All other herring specifications for 2019, including the river herring and shad catch caps, would remain unchanged from 2018. While our proposed adjustments to the herring specifications in 2019 are generally consistent with the Council's recommendations, our proposed ABC and the resulting ACL and sub-ACLs are not as conservative as those recommended by the Council. However, the specifications proposed in this action are expected to prevent overfishing and reduce the risk of the stock becoming overfished. We expect that implementing an ABC lower than the 30,688 mt ABC proposed in this action would not increase the probability of preventing overfishing or the stock from becoming overfished enough to outweigh the increased financial hardship on the herring and lobster fisheries. If herring specifications are too low, they may preclude a viable fishery in 2019 and some businesses may not be sustainable and may fail. Our proposed specifications for 2019 are intended to balance preventing overfishing and maintaining a viable herring fishery to achieve OY, while we consider approval and implementation of a long-term ABC control rule in Amendment 8 to the Herring FMP.

Herring Research Set-Aside Announcement

We are soliciting public comment on the Herring Research Set-Aside (RSA) program awards for 2019–2021. The Herring RSA Program allocates up to 3 percent of each management area sub-ACL annually, as established by the Council in Amendment 1 to the Herring FMP (72 FR 11251, March 12, 2007). Exempted Fishing Permits (EFPs) exempting vessels from certain herring management regulations have been routinely approved since 2007 to support compensation fishing that funds herring-related research consistent with RSA priorities identified by the Council. By continuing to issue these EFPs we would facilitate compensation fishing in support of the projects funded under the 2019 Herring RSA Program. Herring RSA proposals for 2019 are currently under review with the NEFSC, with selections expected in late November or early December of this year. RSA compensation fishing may be allowed as early as January 2019.

Consistent with previous herring RSA compensation fishing EFPs, vessels would be authorized to harvest herring RSA after a herring management area sub-ACL had been caught and the directed herring fishery is limited to a 2,000 lb (907.2 kg) limit of herring per day/trip. It would also allow vessels to harvest RSA during times when the sub-ACLs were not seasonally available for harvest, specifically during January through May in Area 1A and January through April in Area 1B. RSA grant recipients would be required to meet all EFP application requirements prior to the issuance of the EFPs.

If approved, the EFP applicants may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be issued without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

Classification

The NMFS Assistant Administrator has determined that this proposed rule is consistent with the Herring FMP, national standards and other provisions of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), and other applicable law.

This proposed rule is exempt from review under Executive Order (E.O.) 12866 because this action contains no implementing regulations.

NMFS prepared an Initial Regulatory Flexibility Analysis (IRFA) for this proposed rule, as required by section 603 of the Regulatory Flexibility Act (RFA), 5 U.S.C. 603. The IRFA describes the economic impact that this proposed rule would have on small entities, including small businesses, and also determines ways to minimize these impacts. The IRFA includes this section of the preamble to this rule and analyses contained in the SEA/RIR/IRFA for this action. A copy of the full analysis is available from the Council (see **ADDRESSES**). A summary of the IRFA follows.

Description of the Reasons Why Action by the Agency Is Being Considered and Statement of the Objectives of, and Legal Basis for, the Proposed Rule

This action proposes in-season adjustments to the herring specifications and sub-ACLs for 2019. A complete description of the reasons why this action is being considered, and the objectives of and legal basis for this action, are contained in the preamble to this proposed rule and are not repeated here.

Description and Estimate of Number of Small Entities to Which This Proposed Rule Would Apply

The RFA recognizes three kinds of small entities: Small businesses, small organizations, and small governmental jurisdictions. For purposes of the RFA only, the small business criteria in the finfish fishing industry (NAICS 114111) is a firm that is independently owned and operated and not dominant in its field of operation, with gross annual receipts of $11 million or less. Small organizations and small governmental jurisdictions are not directly regulated by this action.

There are five permit categories in the herring fishery: (1) Limited access permit for all management areas (Category A); (2) limited access permit for access to Areas 2 and 3 only (Category B); (3) limited access incidental catch permit for 25 mt per trip (Category C); (4) an open access incidental catch permit for 3 mt per trip (Category D); and (5) an open access permit for limited access mackerel permit holders authorizing up to 9 mt per trip (Category E) in Areas 2 and 3.

In 2017 there were a total of 1,566 permitted herring vessels. Of those, 1,434 were exclusively Category D vessels. Of the remaining 132 permitted herring vessels, 22 belonged to large businesses. Every Category B permit was also authorized for Category C, and all but one Category E permitted vessel also carried a Category D authorization. We included Category E vessels that also have Category D authorization in the analysis. Table 2 presents the counts of permitted vessels by category along with their affiliated entity's small or large business status (the status of the company that holds the herring permit).

TABLE 2—NUMBER OF HERRING PERMITS BY CATEGORY, 2015–2017

Herring permit categories	Number of herring permits					
	2015		2016		2017	
	Large	Small	Large	Small	Large	Small
A	5	32	5	30	6	30
B/C	4	4	4	4	4	4
C (exclusive)	3	37	3	37	3	37
D (exclusive)	112	1222	115	1306	114	1320
E	9	39	9	40	9	39
Total	133	1334	136	1417	136	1430

Source: NMFS.

Table 3 refines the counts from Table 2 to include only those vessels that had revenue from herring at least once in the 3-year period of analysis. In 2017, there were 4 large businesses and 69 small that had revenue from herring.

TABLE 3—NUMBER OF HERRING PERMITS WITH HERRING REVENUE, 2015–2017

Herring permit categories	Number of herring permits					
	2015		2016		2017	
	Large	Small	Large	Small	Large	Small
A	4	20	4	19	4	19
B/C	0	2	0	2	0	3
C (exclusive)	0	11	0	9	0	12
D (exclusive)	0	27	0	29	0	31
E	0	4	0	1	0	4
Total	4	64	4	60	4	69

Source: NMFS

Finally, Table 4 defines the small entities affected by this proposed action—small businesses with a Herring Category A, B, C, or E permit and revenue from herring during the 2015–2017 period of analysis. There were 37, 31, and 38 such vessels in 2015, 2016, and 2017 respectively.

TABLE 4—AFFECTED SMALL ENTITIES, PERMITTED HERRING VESSELS WITH HERRING REVENUE, 2015–2017

Herring permit categories	Number of herring permits					
	2015		2016		2017	
	Large	Small	Large	Small	Large	Small
A	4	20	4	19	4	19
B/C	0	2	0	2	0	3
C (exclusive)	0	11	0	9	0	12
E	0	4	0	1	0	4
Total	4	37	4	31	4	38

Source: NMFS.

To better understand the impact of this action on the affected small businesses, we compared the revenue from herring fishing to total revenue brought in by the entity (business) that holds the herring permit. The 17 to 18 small entities with Category A permits show the most dependence on the herring fishery, with 49.75 percent to 62.03 percent of their revenue coming from herring landings. The 4 small Category E permitted entities have the least dependence on the herring fishery with less than one percent of total entity revenue coming from the herring fishery.

Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

This proposed rule does not introduce any new reporting, recordkeeping, or other compliance requirements.

Federal Rules Which May Duplicate, Overlap, or Conflict With the Proposed Rule

This action does not duplicate, overlap, or conflict with any other Federal rules.

Description of Significant Alternatives to the Proposed Action Which Accomplish the Stated Objectives of Applicable Statues and Which Minimize Any Significant Economic Impact on Small Entities

We are proposing to adjust the current herring specifications and sub-ACLs for 2019, consistent with the Herring FMP's objectives of preventing overfishing while maximizing social and economic benefits. Non-preferred alternatives would likely not accomplish these objectives for this action as well as the proposed action.

Alternative 1 would not achieve the stated objectives of the action because it has a less than 50-percent probability of preventing overfishing in 2019 and, thus, is inconsistent the Magnuson-Stevens Act. Additionally, Alternative 1 would negatively impact the herring stock by increasing the probability that it would become overfished. The primary difference between Alternative 2 (Council-recommended) and Alternative 3 (proposed action) are the proposed specifications for ABC and the resulting ACL for 2019. The ABC associated with the proposed action (30,688 mt) is higher than the ABC associated with Alternative 2 (21,266 mt). After applying the management uncertainty buffer (6,200 mt) to the ABC, the resulting ACL associated with the proposed action (24,488 mt) is almost 10,000 mt higher than the ACL associated with the Alternative 2 (15,065 mt).

We expect that implementing an ABC lower than 30,688 mt in 2019 would not increase the probability of preventing overfishing or the stock from becoming overfished enough to outweigh the increased financial hardship on the herring and lobster fisheries. If the ACL is too low, it may preclude a viable fishery in 2019 and some businesses may not be sustainable and may fail. The proposed ABC for 2019 is intended to balance preventing overfishing and maintaining a viable herring fishery to achieve OY, while we consider approval and implementation of a long-term ABC control rule in Amendment 8 the Herring FMP.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 27, 2018.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

Notices

Federal Register
Vol. 83, No. 231
Friday, November 30, 2018

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

November 27, 2018.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by December 31, 2018 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, 725 17th Street NW, Washington, DC 20502. Commenters are encouraged to submit their comments to OMB via email to: *OIRA_Submission@OMB.EOP.GOV* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Copies of the submission(s) may be obtained by calling (202) 720–8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Food Safety and Inspection Service

Title: Certificate of Medical Examination.

OMB Control Number: 0583–0167.

Summary of Collection: The Food Safety and Inspection Service (FSIS) has been delegated the authority to exercise the functions of the Secretary as provided in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 *et seq.*), the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451 *et seq.*), and the Egg products Inspection Act (EPIA) (21 U.S.C. 1031 *et seq.*). These statutes mandate that FSIS protect the public by ensuring that meat and poultry products are safe, wholesome, unadulterated, and properly labeled and packaged. FSIS will use a form FSIS 4339–1, Certificate of Medical Examination (with report of medical History) to collect information from applicant.

Need and Use of the Information: FSIS will use the information from FSIS 4339–1 form to determine whether an applicant for an FSIS Food Inspector, Consumer Safety Inspector, or Veterinary Medical Officer in-plant position meets the Office of Personnel Management-approved medical qualification standards for the position. The form will ensure accurate collection of the required data.

Description of Respondents: Individuals or households.

Number of Respondents: 500.

Frequency of Responses: Recordkeeping; Reporting: On occasion.

Total Burden Hours: 750.

Ruth Brown,

Departmental Information Collection Clearance Officer.

Animal and Plant Health Inspection Service

Title: Specimen Submission.

OMB Control Number: 0579–0090.

Summary of Collection: The Animal Health Protection Act of 2002 (AHPA) is the primary Federal law governing the protection of animal health. The law gives the Secretary of Agriculture broad authority to detect, control, or eradicate pests or diseases of livestock or poultry. Disease prevention is the most effective

method for maintaining a healthy animal population and for enhancing the United States' ability to globally compete in the trade of animals and animal products. VS Forms 10–4 and 10–4A, Specimen Submission are critical components of APHIS' disease surveillance mission. They are used routinely when specimens (such as blood, milk, tissue, or urine) from any animal (including cattle, swine, sheep, goats, horses, and poultry) are submitted to APHIS' National Veterinary Services Laboratories (NVSL) for disease testing. VS Form 5–38, Parasite Submission form, is completed by State veterinarians or other State representatives, accredited veterinarians, private laboratories, research institutions, and owners or producer.

Need and Use of the Information: Using the Specimen Submission Form and Continuation Sheet (APHIS VS 10–4 & 10–4A), State or Federal veterinarians, accredited veterinarians, or other State and Federal representatives will document the collection and submission of specimens for laboratory analysis. The form identifies the individual animal from which the specimen is taken as well as the animal's herd or flock; the type of specimen submitted, and the purpose of submitting the specimen. Occasionally the time pressures exerted by or field conditions existing during a disease outbreak leave submitters no time to find or fill out the 10–4; thus, a Nonconforming Submission using whatever scrap of paper is handy. The National Tick Surveillance Program is based on the information submitted on the Parasite Submission Form (VS 5–38), in addition to critical surveillance information needed for the Cattle Fever Tick Eradication Program. This information identifies the individual submitting the tick samples. Without the information APHIS would not have the critical information necessary to effectively operate a disease surveillance program.

Description of Respondents: State, Local or Tribal Government; Business or other for-profit.

Number of Respondents: 1,773.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 8,605.

Ruth Brown,

Departmental Information Collection Clearance Officer.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2010–0100]

Environmental Impact Statement; Cattle Fever Tick Control Barrier in South Texas: Record of Decision

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This notice advises the public of the Animal and Plant Health Inspection Service's record of decision for the final environmental impact statement titled ''Cattle Fever Tick Eradication Program—Tick Control Barrier: Maverick, Starr, Webb, and Zapata Counties, Texas.''

DATES: An official of the Animal and Plant Health Inspection Service-Veterinary Services signed the record of decision on July 12, 2018.

ADDRESSES: You may read the final environmental impact statement and record of decision in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming. The record of decision, final environmental impact statement, and supporting information may also be viewed at *http://www.regulations.gov/#!docketDetail;D=APHIS-2010-0100.* To obtain copies of the documents, contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

FOR FURTHER INFORMATION CONTACT: For questions related to the Cattle Fever Tick Eradication Program, contact Dr. Denise Bonilla, Entomologist, Cattle Fever Tick Eradication Program Manager, Surveillance, Preparedness and Response Services, VS, APHIS, Natural Resources Research Center, Building B, 2150 Centre Avenue, Fort Collins, CO 80526; (970) 494–7317. For questions related to the environmental impact statement, contact Ms. Michelle Gray, Environmental Protection Specialist, Environmental and Risk Analysis Services, PPD, APHIS, 4700 River Road Unit 149, Riverdale, MD 20737; (301) 851–3146.

SUPPLEMENTARY INFORMATION: On February 15, 2011, we published in the **Federal Register** (76 FR 8709–8710) a notice [1] of intent to prepare an environmental impact statement (EIS) for a proposed cattle fever tick control barrier in South Texas. This notice solicited comments from the public for additional alternatives and environmental impacts that should be examined further in the EIS and identified public meetings that the Animal and Plant Health Inspection Service (APHIS) would host concerning the scope of the EIS and other pertinent issues.

On July 24, 2013, we published a notice of availability in the **Federal Register** (78 FR 44521–44522) for the draft EIS and invited public comment through August 30, 2013. Responses to those comments are in the final EIS. On June 1, 2018, the U.S. Environmental Protection Agency published a notice of the availability of the final EIS in the **Federal Register** (83 FR 25451–25452, Docket No. ER–FRL–9039–6) and invited public comment through July 2, 2018.

The National Environmental Policy Act (NEPA) implementing regulations in 40 CFR 1506.10 require a minimum 30-day waiting period between the time a final EIS is published and the time an agency makes a decision on an action covered by the EIS. APHIS has reviewed the final EIS and comments received during the 30-day waiting period and has concluded that the final EIS fully analyzes the issues covered by the draft EIS and addresses the comments and suggestions submitted by commenters. This notice advises the public that the waiting period has elapsed, and APHIS has issued a record of decision (ROD) to implement the preferred alternative described in the final EIS.

The ROD has been prepared in accordance with: (1) NEPA, as amended (42 U.S.C. 4321 *et seq.*); (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508); (3) USDA regulations implementing NEPA (7 CFR part 1b); and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Done in Washington, DC, this 26th day of November 2018.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

CIVIL RIGHTS COMMISSION

Sunshine Act Meeting Notice

AGENCY: United States Commission on Civil Rights.

ACTION: Notice of Commission business meeting.

DATES: Friday, December 7, 2018, at 10 a.m. EST.

ADDRESSES: Place: National Place Building, 1331 Pennsylvania Ave. NW, 11th Floor, Suite 1150, Washington, DC 20245 (entrance on F Street NW).

FOR FURTHER INFORMATION CONTACT: Brian Walch; phone (202) 376–8371; TTY: (202) 376–8116; *publicaffairs@usccr.gov.*

SUPPLEMENTARY INFORMATION: This business meeting is open to the public. Public call-in (listen-only) information: Toll-free: 1–800–682–9934, Conference ID 7671081. Stay abreast of updates at *www.usccr.gov, https://twitter.com/USCCRgov,* and *https://www.facebook.com/USCCRgov/.* The event will also live-stream at *https://www.youtube.com/user/USCCR/videos.* (Streaming information is subject to change.) Persons with disabilities who need accommodation should contact Pamela Dunston at (202) 376–8105 or at *access@usccr.gov* at least seven (7) business days before the scheduled date of the meeting.

Meeting Agenda

I. Approval of Agenda
II. Business Meeting
- A. Presentation by Rhode Island Advisory Committee Chair on the Committee's recently released report, Payday Lending in Rhode Island
- B. Presentation by Connecticut Advisory Committee Chair on the Committee's recently released advisory memorandum, Solitary Confinement in Connecticut
- C. Presentation by Vermont Advisory Committee Chair on the Committee's recently released advisory memorandum, Housing Discrimination in Vermont: A Handshake and a Smile
- D. Discussion and vote on discovery plan, outline, and timeline for Commission project on Women in Prison
- E. Discussion and vote on briefing date for Commission project on Sexual Harassment in Federal Workplaces
- F. Management and Operations
- Staff Director's Report

III. Adjourn Meeting

Dated: November 28, 2018.

Brian Walch,

Director, Communications and Public Engagement.

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Michigan Advisory Committee

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the Michigan Advisory Committee (Committee) will hold a meeting on Friday, December 14, 2018, at 12:00 p.m. EST the purpose of the meeting is to continue discussing details for a 2019 briefing on voting rights.

DATES: The meeting will be held on Friday, December 14, 2018, at 12:00 p.m. EST.

Public Call Information: Dial: 877–260–1479; Conference ID: 3377560.

FOR FURTHER INFORMATION CONTACT: Ana Victoria Fortes, DFO, at *afortes@usccr.gov* or 213–894–3437.

SUPPLEMENTARY INFORMATION: Members of the public can listen to the discussion. This meeting is available to the public through the above toll-free call-in number. Any interested member of the public may call this number and listen to the meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. The conference call operator will ask callers to identify themselves, the organization they are affiliated with (if any), and an email address prior to placing callers into the conference room. Callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1–800–877–8339 and providing the Service with the conference call number and conference ID number.

Members of the public are also entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be mailed to the Regional Programs Unit Office, U.S. Commission on Civil Rights, 230 S. Dearborn St., Suite 2120, Chicago, IL 60604. They may also be faxed to the Commission at (312) 353–8324, or emailed to Carolyn Allen at *callen@usccr.gov.* Persons who desire additional information may contact the Regional Programs Office at (312) 353–8311.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Office, as they become available, both before and after the meeting. Records of the meeting will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Michigan Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Office at the above email or street address.

Agenda

I. Welcome and Roll Call
II. Approval of Minutes for November 14, 2018 Meeting
III. Planning Discussion
IV. Next Steps
V. Public Comment
VI. Adjournment

Dated: November 26, 2018.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Wyoming Advisory Committee

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act (FACA) that the meeting of the Wyoming Advisory Committee (Committee) to the Commission will be held at 1:00 p.m. (Mountain Time) Wednesday, December 12, 2018. The purpose of this meeting is for the Committee to discuss project topics and receive information on USCCR project process.

DATES: The meeting will be held on Wednesday, December 12, 2018 at 1:00 p.m. MT.

FOR FURTHER INFORMATION CONTACT: Ana Victoria Fortes (DFO) at *afortes@usccr.gov* or (213) 894–3437.

SUPPLEMENTARY INFORMATION:

Public Call Information: Dial: 877–260–1479; Conference ID: 2208701.

This meeting is available to the public through the following toll-free call-in number: 877–260–1479, conference ID number: 2208701. Any interested member of the public may call this number and listen to the meeting. Callers can expect to incur charges for calls they initiate over wireless lines, and the Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1–800–877–8339 and providing the Service with the conference call number and conference ID number.

Members of the public are entitled to make comments during the open period at the end of the meeting. Members of the public may also submit written comments; the comments must be received in the Regional Programs Unit within 30 days following the meeting. Written comments may be mailed to the Western Regional Office, U.S. Commission on Civil Rights, 300 North Los Angeles Street, Suite 2010, Los Angeles, CA 90012. They may be faxed to the Commission at (213) 894–0508, or emailed Ana Victoria Fortes at *afortes@usccr.gov.* Persons who desire additional information may contact the Regional Programs Unit at (213) 894–3437.

Records and documents discussed during the meeting will be available for public viewing prior to and after the meetings at *https://facadatabase.gov/committee/meetings.aspx?cid=283.*

Please click on the ''Meeting Details'' and ''Documents'' links. Records generated from these meetings may also be inspected and reproduced at the Regional Programs Unit, as they become available, both before and after the meetings. Persons interested in the work of this Committee are directed to the Commission's website, *https://www.usccr.gov,* or may contact the Regional Programs Unit at the above email or street address.

AGENDA

I. Welcome and Roll Call
II. USCCR Project Stages
III. Discuss Project Topics
IV. Vote on Project Topic
V. Next Steps

BILLING CODE P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–985]

Xanthan Gum From the People's Republic of China: Continuation of Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of the determinations by the Department of Commerce (Commerce) and the International Trade Commission (ITC) that revocation of the antidumping duty (AD) order on xanthan gum from the People's Republic of China (China) would likely lead to a continuation or recurrence of dumping and material injury to an industry in the United States, Commerce is publishing a notice of continuation of the AD duty order.

DATES: Applicable November 30, 2018.

FOR FURTHER INFORMATION CONTACT: Magd Zalok or Howard Smith, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4162 or (202) 482–5193, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 19, 2013, Commerce published in the **Federal Register** the AD order on xanthan gum from China.[1] On June 1, 2018, Commerce published the notice of initiation of this sunset review of the *Order,* pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).[2] Commerce conducted this sunset review on an expedited basis, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(*2*) because it received a complete timely, and adequate response from a domestic interested party [3] but no substantive responses from respondent interested parties. As a result of its review, Commerce determined pursuant to sections 751(c)(1) and 752(c) of the Act, that revocation of the *Order* would likely lead to a continuation or recurrence of dumping. Commerce also notified the ITC of the magnitude of the dumping margins likely to prevail should the *Order* be revoked.[4] On November 20, 2018, the ITC published its determination, pursuant to section 751(c) of the Act, that revocation of the AD duty order on xanthan gum from China would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.[5]

Scope of the Order

The merchandise covered by the scope of the *Order* includes dry xanthan gum, whether or not coated or blended with other products. Xanthan gum is included in this order regardless of physical form, including, but not limited to, solutions, slurries, dry powders of any particle size, or unground fiber.

Merchandise covered by the scope of the *Order* is classified in the Harmonized Tariff Schedule of the United States at subheading 3913.90.20.15. This tariff classification is provided for convenience and customs purposes; however, the written description of the scope is dispositive.[6]

Continuation of the Order

As a result of the determinations by Commerce and the ITC that revocation of the *Order* would likely lead to a continuation or recurrence of dumping and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act and 19 CFR 351.218(a), Commerce hereby orders the continuation of the AD order on

[1] *See Xanthan Gum from the People's Republic of China: Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order,* 78 FR 43143 (July 19, 2013) (*Order*).

[2] *See Initiation of Five-Year (Sunset) Reviews,* 83 FR 25436 (June 1, 2018).

[3] *See* Letter from ADM to Commerce re, ''Five-Year (''Sunset'') Review Of Antidumping Duty Order On Xanthan Gum From The People's Republic Of China/Domestic Industry Notice Of Intent To Participate In Sunset Review,'' dated June 15, 2018, and Letter from CP Kelco to Commerce re, ''Xanthan Gum from the People's Republic of China: CP Kelco U.S., Inc.'s Notice Of Intent To Participate,'' dated June 18, 2018.

[4] *See* Xanthan Gum from the People's Republic of China: Final Results of the Expedited First Sunset Review of the Antidumping Duty Order, 83 FR 48589 (September 26, 2018) (*Final Results*).

[5] *See* xanthan gum from China: First Review, Inv. No. 731–TA–1203, 83 FR 58592 (November 20, 2018).

[6] For complete description of the scope of the *Order, see* ''Issues and Decision Memorandum for the Expedited First Sunset Review of the Antidumping Duty Order on Xanthan Gum from the People's Republic of China,'' dated September 19, 2018.

xanthan gum from China. U.S. Customs and Border Protection will continue to collect AD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise. The effective date of the continuation of the *Order* will be the date of publication in the **Federal Register** of this notice of continuation. Pursuant to section 751(c)(2) of the Act and 19 CFR 351.218(c)(2), Commerce intends to initiate the next sunset review of the *Order* not later than 30 days prior to the fifth anniversary of the effective date of continuation.

This five-year sunset review and this notice are in accordance with section 751(c) and 751(d)(2) of the Act and published pursuant to section 777(i)(1) of the Act and 19 CFR 351.218(f)(4).

Dated: November 27, 2018.

Gary Taverman,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

National Oceanic and Atmospheric Administration

RIN 0648–XG513

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Pacific Coast Groundfish Fishery; Application for an Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments.

SUMMARY: NMFS announces the receipt of an exempted fishing permit application titled, ''*Year-round Coastwide Midwater Rockfish EFP: Monitoring and Minimizing Salmon Bycatch When Targeting Rockfish in the Shorebased IFQ Fishery.*'' The application, submitted by the West Coast Seafood Processors Association, Environmental Defense Fund, Oregon Trawl Commission, and Midwater Trawlers Cooperative, requests a permit to test whether removing certain gear, time, and area restrictions for vessels fishing under the Trawl Rationalization Program's Shorebased Individual Fishing Quota Program may impact the nature and extent of bycatch of prohibited species (*e.g.,* Chinook salmon). This exempted fishing permit would allow participating groundfish bottom and midwater trawl vessels more flexibility than allowed in current regulations to target pelagic rockfish species, such as widow, chilipepper, and yellowtail rockfish. Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed exempted fishing permits.

DATES: Comments must be received no later than 5 p.m., local time on December 17, 2018.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2018–0112, by any of the following methods:

- *Electronic Submissions:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2018-0112,* click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments. The EFP application will be available under ''Supporting Documents'' through the same link.
- *Mail:* Submit written comments to Lynn Massey, West Coast Region, NMFS, 501 W Ocean Blvd., Ste. 4200, Long Beach, CA 90802–4250.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and would generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender would be publicly accessible. NMFS would accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous). Attachments to electronic comments would be accepted in Microsoft Word, Excel, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT: Lynn Massey, West Coast Region, NMFS, at (562) 436–2462, *lynn.massey@noaa.gov.*

SUPPLEMENTARY INFORMATION: This action is authorized by the Pacific Coast Groundfish Fishery Management Plan (FMP) and implementing regulations at 50 CFR 600.745, which allow NMFS Regional Administrators to authorize exempted fishing permits (EFPs) to test fishing activities that would otherwise be prohibited.

In 2017, NMFS permitted 32 vessels to fish under the 2017 Trawl Gear EFP. The EFP exempted limited entry bottom and midwater trawl vessels from the minimum mesh size requirement, and exempted limited entry bottom trawl vessels from the requirement to use selective flatfish trawl gear shoreward of the Trawl Rockfish Conservation Area (RCA) north of 42° North latitude (N lat). The purpose of this EFP was to collect information on potential impacts to prohibited and protected species from modifying or eliminating certain gear and area regulations by allowing participants to configure their gear to re-establish a targeted rockfish fishery for widow, yellowtail, and chilipepper rockfish. From March 2017 to December 2017, a total of 11 limited entry groundfish bottom trawl vessels went on 63 EFP trips and landed 1,355 metric tons (mt) of groundfish, totaling $1,613,178 in revenue. Prohibited species bycatch included five Chinook salmon and no sturgeon.

To continue collecting information on the impacts of modifying or eliminating gear and area regulations, the Pacific Fishery Management Council (Council) recommended and NMFS issued, a 2018 Trawl Gear EFP that expanded on the 2017 Trawl Gear EFP. As with the 2017 EFP, the 2018 EFP was intended to collect data on if and how the removal of certain gear, time, and area restrictions for the Shorebased Individual Fishing Quota (IFQ) Program may impact the nature and extent of prohibited species bycatch. In addition to the exemptions provided by the 2017 Trawl Gear EFP (*i.e.,* required minimum mesh size and requirement to use a selective flatfish trawl shoreward of the Trawl RCA and north of 42° N lat.), the 2018 Trawl Gear EFP provided participating vessels exemptions from the following limited entry prohibitions:

- Fishing with midwater groundfish trawl gear north of 40°10′ N lat. in all areas (*i.e.,* seaward, within, and shoreward of the RCA) prior to May 15th each year;
- Fishing with midwater groundfish trawl gear south of 40°10′ N lat. within the boundaries of the Trawl RCA;
- Bringing a new haul onboard before a previous haul is stowed; and
- Carrying and fishing more than one type of groundfish trawl gear (midwater and bottom trawl gear) on the same trip.

The 2018 Trawl Gear EFP began on January 1, 2018. As of October 23, 2018, a total of 15 vessels (7 midwater-only trawlers, 4 bottom-only trawlers, and 4 that used both gears) have completed 289 EFP trips and landed approximately 9,000 mt of groundfish, totaling

approximately $7 million in revenue. Those vessels harvested 213 Chinook salmon and no sturgeon or coho salmon.

At the June 2018 Council meeting, the 2017 and 2018 Trawl Gear EFP applicants submitted a modified EFP application titled, ''*Year-round Coastwide Midwater Rockfish EFP: Monitoring and Minimizing Salmon Bycatch When Targeting Rockfish in the Shorebased IFQ Fishery*'' (herein referred to as the ''2019 Trawl Gear EFP''). At the September 2018 meeting, the Council recommended that NMFS implement this EFP for 2019, and made a preliminary determination to recommend the EFP to NMFS for 2020. Separately, NMFS has issued a proposed trawl gear rule that would incorporate some of the exemptions included in the 2017 and 2018 EFPs into the groundfish regulations (Proposed rule: 83 FR 45396, September 7, 2018; final rule expected to publish in late November/early December 2018). The exemptions authorized under this 2019 Trawl Gear EFP will be finalized following the publication of the trawl gear rule so that the EFP does not include exemptions from requirements which may be removed from regulations by the rule. The 2019 Trawl Gear EFP is anticipated to include, at a minimum, exemptions from the following limited entry restrictions:

- The requirement to use selective flatfish trawl gear, and the prohibition on using small footrope trawl gear, other than selective flatfish trawl gear, shoreward of the Trawl RCA between 42° N lat. and 40°10′ N lat.;
- The prohibition on fishing with midwater groundfish trawl gear north of 40°10′ N lat. in all areas (*i.e.,* seaward, within, and shoreward of the RCA) prior to May 15th each year;
- The prohibition on fishing with midwater groundfish trawl gear south of 40°10′ N lat. within the boundaries of the Trawl RCA; and
- The prohibition on retaining certain prohibited species.

If NMFS approves this EFP, vessels fishing on an EFP trip with limited entry bottom trawl gear would be permitted to use any small footrope gear that meets the definition in regulations at § 660.11 shoreward of the Trawl RCA and between 42° N lat. and 40°10′ N lat. Vessels fishing on an EFP trip with limited entry midwater trawl gear would be permitted to fish within all areas north of 40°10′ N lat. and within the boundaries and seaward of the Trawl RCA south of 40°10′ N lat. Midwater trawling will still be prohibited shoreward of the Trawl RCA south of 40°10′ N lat. Participating vessels would not be constrained to the Pacific whiting primary season dates in existing groundfish regulations (see CFR 660.131). Participating vessels would be required to carry observers or use a NMFS-approved electronic monitoring system on 100 percent of trips, as is currently required in the IFQ program. Participating vessels would also be required to retain all salmon (excluding salmon already sampled by the West Coast Groundfish Observer (WCGOP) program) until offloading.

A goal of this EFP is to collect information on the effects of lifting the restrictions described above on bycatch, including bycatch of Endangered Species Act (ESA)-listed species. Previous analyses suggest that bycatch rates of ESA-listed salmon and green sturgeon could increase as a result of the increased and changes in gear configurations resulting from this EFP. However, because a targeted fishery for chilipepper, widow, and yellowtail rockfish has not existed in more than a decade, and because the current groundfish trawl fishery has changed considerably in recent years, available data may have limited utility for predicting current impacts to protected and prohibited species in fisheries conducted with the exemptions that would be allowed under the EFP. NMFS staff worked with the applicants to develop an EFP that would increase the ability of fishery participants to target pelagic rockfish species while also minimizing bycatch to the extent practicable and collecting information about bycatch. To address potential increased protected and prohibited species encounters, the EFP applicants proposed gear-based Chinook salmon bycatch limits for midwater trawl and bottom trawl EFP vessels in 2019 (based on the Council Groundfish Management Team's recommendations at the September 2018 meeting; Agenda Item I.8.a). Under this proposal, if Chinook salmon catch on EFP trips for either gear type reaches the applicable bycatch limit, NMFS would revoke the EFP for that gear type for the remainder of the year.

During discussion at the September 2018 meeting, the Council recommended simplifying the EFP terms by proposing that the Chinook bycatch limits be based only on the 42° N lat. management line, rather than by gear type north and south of the 42° N lat. line. This recommendation would reduce unnecessary complexity while still providing adequate safeguards for limiting salmon bycatch under the EFP. If this EFP is approved, NMFS would set a bycatch limit of 1,000 Chinook salmon north of 42° N lat. and 100 Chinook salmon south of 42° N lat. for vessels declared into the EFP, regardless of gear type. If either of these bycatch limits are reached, NMFS would revoke the EFP for both gear types in the respective management area (*i.e.,* north or south of 42° N lat.).

The application includes a requirement to retain and land salmon bycatch on all EFP trips, consistent with current requirements for vessels participating in the shoreside Pacific whiting fishery. The intent of this provision is to provide a complete census of salmon bycatch for each EFP trip and maximize the amount of biological and genetic salmon samples. At the September 2018 meeting, the Council expressed a desire to provide state fish and wildlife agencies the opportunity to sample salmon bycatch. This sampling effort would be in addition to the salmon sampling already conducted by WCGOP. To address the request for additional sampling, the Council requested that NMFS work with NOAA's Office of Law Enforcement and state fish and wildlife agencies to establish proper chain-of-custody and sampling protocols in the event that salmon are landed. NMFS is supportive of making salmon bycatch available to state fish and wildlife agencies for additional sampling, however NMFS is confident that WCGOP's sampling approach is sufficient to collect the necessary scientific information for assessing salmon bycatch.

The EFP applicants have not proposed a specific list of participating vessels, but rather are proposing that NMFS publish a public notice to gauge interest from limited entry groundfish midwater and bottom trawl vessels. Depending on the amount of interest and where vessels may be fishing, NMFS may need to limit participation by time and area to mitigate potential impacts.

Information collected under the EFP would be used to support analysis for potential new gear regulations and modifications to existing gear regulations. Because many of the current gear regulations have been in place for more than ten years, it is difficult for NMFS, the Council, and industry to predict the impacts of removing these regulations. In the past ten years, the industry has changed significantly. Reduction in capacity, innovations in gear technologies, and changes in management have all contributed to these changes. This EFP would help demonstrate what potential impacts, if any, today's fleet may have if some of the current gear, area, and time regulations are modified from what is currently in regulation.

NMFS is proposing to approve the 2019 Trawl Gear EFP, covering all the exemptions stated above, following the conclusion of the public comment period and review of public comment. Pending approval, NMFS would issue the permits for the EFP to the vessel owner or designated representative as the ''EFP holder.'' NMFS intends to use an adaptive management approach in which NMFS may revise requirements and protocols to improve the program without issuing another **Federal Register** Notice, provided that the modifications fall within the scope of the original EFP. In addition, the applicants may request minor modifications and extensions to the EFP throughout the course of research. NMFS may grant EFP modifications and extensions without further public notice if the changes are essential to facilitate completing the proposed research and result in only a minimal change in the scope or impacts of the initially approved EFP request.

NMFS analyzed the potential effects of implementing the 2018 Trawl Gear EFP in an environmental assessment (EA), dated December 2017 (Available at: *http://www.westcoast.fisheries.noaa.gov*). In that EA, NMFS stated that it anticipated issuing additional, similar, one-year EFPs that would cover a portion or all of the components discussed in the EA. Those EFPs would be supported by the analyses in the EA, as long as there were not substantial changes to the affected environment (*e.g.,* status of the stock), components of the EFP (*i.e.,* gear, area, and time restrictions), or unanticipated effects on the environment from permitting fishing activities that were not discussed in the EA's analysis. Since the 2019 Trawl Gear EFP meets those criteria, NMFS does not anticipate any adverse environmental impacts from the 2019 Trawl Gear EFP beyond those analyzed in the EA for the 2018 Trawl Gear and future similar EFPs. NMFS welcomes public comment on the NEPA coverage for this EFP.

After publication of this document in the **Federal Register**, NMFS may approve and issue the EFP after the close of the public comment period. NMFS will consider comments submitted, as well as the Council's discussion at their September 2018 meeting, in deciding whether to approve the application as requested. NMFS may approve the application in its entirety or may make any alterations needed to achieve the goals of the EFP.

National Oceanic and Atmospheric Administration

RIN 0648–XG589

Fisheries of the Exclusive Economic Zone Off Alaska; Bering Sea and Aleutian Islands Management Area; Cost Recovery Programs

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of standard prices and fee percentages.

SUMMARY: NMFS publishes standard prices and fee percentages for cost recovery for the Amendment 80 Program, the American Fisheries Act (AFA) Program, the Aleutian Islands Pollock (AIP) Program, and the Western Alaska Community Development Quota (CDQ) groundfish and halibut Programs. The fee percentage for 2018 is 0.75 percent for the Amendment 80 Program, 0.24 percent for the AFA inshore cooperatives, 0.34 percent for the AFA mothership cooperative, 3.0 percent for the AIP program, and 0.66 percent for the CDQ groundfish and halibut Programs. This action is intended to provide the 2018 standard prices and fee percentages to calculate the required payment for cost recovery fees due by December 31, 2018.

DATES: The standard prices and fee percentages are valid on November 30, 2018.

FOR FURTHER INFORMATION CONTACT: Carl Greene, Fee Coordinator, 907–586–7105.

SUPPLEMENTARY INFORMATION:

Background

Section 304(d) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) authorizes and requires the collection of cost recovery fees for limited access privilege programs and the CDQ Program. Cost recovery fees recover the actual costs directly related to the management, data collection, and enforcement of the programs. Section 304(d) of the Magnuson-Stevens Act mandates that cost recovery fees not exceed three percent of the annual ex-vessel value of fish harvested by a program subject to a cost recovery fee, and that the fee be collected either at the time of landing, filing of a landing report, or sale of such fish during a fishing season or in the last quarter of the calendar year in which the fish is harvested.

NMFS manages the Amendment 80 Program, AFA Program, and AIP Program as limited access privilege programs. On January 5, 2016, NMFS published a final rule to implement cost recovery for these three limited access privilege programs and the CDQ groundfish and halibut programs (81 FR 150). The designated representative (for the purposes of cost recovery) for each program is responsible for submitting the fee payment to NMFS on or before the due date of December 31 of the year in which the landings were made. The total dollar amount of the fee due is determined by multiplying the NMFS published fee percentage by the ex-vessel value of all landings under the program made during the fishing year. NMFS publishes this notice of the fee percentages for the Amendment 80, AFA, AIP, and CDQ groundfish and halibut fisheries in the **Federal Register** by December 1 each year.

Standard Prices

The fee liability is based on the ex-vessel value of fish harvested in each program. For purposes of calculating cost recovery fees, NMFS calculates a standard ex-vessel price (standard price) for each species. A standard price is determined using information on landings purchased (volume) and ex-vessel value paid (value). For most groundfish species, NMFS annually summarizes volume and value information for landings of all fishery species subject to cost recovery in order to estimate a standard price for each species. The standard prices are described in U.S. dollars per pound for landings made during the year. The standard prices for all species in the Amendment 80, AFA, AIP, and CDQ groundfish and halibut programs are listed in Table 1. Each landing made under each program is multiplied by the appropriate standard price to arrive at an ex-vessel value for each landing. These values are summed together to arrive at the ex-vessel value of each program (fishery value).

Fee Percentage

NMFS calculates the fee percentage each year according to the factors and methods described in Federal regulations at 50 CFR 679.33(c)(2), 679.66(c)(2), 679.67(c)(2), and 679.95(c)(2). NMFS determines the fee percentage that applies to landings

made during the year by dividing the total costs directly related to the management, data collection, and enforcement of each program (direct program costs) during the year by the fishery value. NMFS captures direct program costs through an established accounting system that allows staff to track labor, travel, contracts, rent, and procurement. For 2018, the direct program costs were tracked from October 1, 2017, to September 30, 2018 (the end of the fiscal year). The individual 2018 fee percentages for the Amendment 80 Program, the American Fisheries Act (AFA) Program, the Aleutian Islands Pollock Program, and the Western Alaska Community Development Quota (CDQ) groundfish and halibut Programs are higher relative to percentages calculated for the programs in 2017. Although fishery values in each program rose in 2018 relative to 2017, direct program costs in 2018 also rose, and contributed to the higher percentages.

NMFS will provide an annual report that summarizes direct program costs for each of the programs in early 2019. NMFS calculates the fishery value as described under the section ''Standard Prices.''

Amendment 80 Program Standard Prices and Fee Percentage

The Amendment 80 Program allocates total allowable catches (TACs) of groundfish species, other than Bering Sea pollock, to identified trawl catcher/processors in the Bering Sea and Aleutian Islands (BSAI). The Amendment 80 Program allocates a portion of the BSAI TACs of six species: Atka mackerel, Pacific cod, flathead sole, rock sole, yellowfin sole, and Aleutian Islands Pacific ocean perch. Participants in the Amendment 80 sector have established cooperatives to harvest these allocations. Each Amendment 80 cooperative is responsible for payment of the cost recovery fee for fish landed under the Amendment 80 Program. Cost recovery requirements for the Amendment 80 Program are at 50 CFR 679.95.

For most Amendment 80 species, NMFS annually summarizes volume and value information for landings of all fishery species subject to cost recovery in order to estimate a standard price for each fishery species. Regulations specify that for rock sole, NMFS shall calculate a separate standard price for two periods—January 1 through March 31, and April 1 through October 31, which accounts for a substantial difference in estimated rock sole prices during the first quarter of the year relative to the remainder of the year. The volume and value information is obtained from the First Wholesale Volume and Value Report, and the Pacific Cod Ex-Vessel Volume and Value Report.

Using the fee percentage formula described above, the estimated percentage of direct program costs to fishery value for the 2018 calendar year is 0.75 percent for the Amendment 80 Program. For 2018, NMFS applied the fee percentage to each Amendment 80 species landing that was debited from an Amendment 80 cooperative quota allocation between January 1 and December 31 to calculate the Amendment 80 fee liability for each Amendment 80 cooperative. The 2018 fee payments must be submitted to NMFS on or before December 31, 2018. Payment must be made in accordance with the payment methods set forth in 50 CFR 679.95(a)(3)(iv).

AFA Standard Price and Fee Percentages

The AFA allocates the Bering Sea directed pollock fishery TAC to three sectors—catcher/processor, mothership, and inshore. Each sector has established cooperatives to harvest the sector's exclusive allocation. In 2018, the cooperatives for the mothership sector and the inshore sector are responsible for paying the fee for Bering Sea pollock landed under the AFA. Cost recovery requirements for the AFA sectors are at 50 CFR 679.66.

NMFS calculates the standard price for pollock using the most recent annual value information reported to the Alaska Department of Fish & Game for the Commercial Operator's Annual Report and compiled in the Alaska Commercial Fisheries Entry Commission Gross Earnings data for Bering Sea pollock. Due to the time required to compile the data, there is a one-year delay between the gross earnings data year and the fishing year to which it is applied. For example, NMFS used 2017 gross earnings data to calculate the standard price for 2018 pollock landings.

Under the fee percentage formula described above, the estimated percentage of direct program costs to fishery value for the 2018 calendar year is 0.24 percent for the AFA inshore sector, and 0.34 percent for the AFA mothership sector. To calculate the 2018 fee liabilities, NMFS applied the respective fee percentages to the landings of Bering Sea pollock debited from each cooperative's fishery allocation that occurred between January 1 and December 31. The 2018 fee payments must be submitted to NMFS on or before December 31, 2018. Payment must be made in accordance with the payment methods set forth in 50 CFR 679.66(a)(4)(iv).

AIP Program Standard Price and Fee Percentage

The AIP Program allocates the Aleutian Islands directed pollock fishery TAC to the Aleut Corporation, consistent with the Consolidated Appropriations Act of 2004 (Pub. L. 108–109), and its implementing regulations. Annually, prior to the start of the pollock season, the Aleut Corporation provides NMFS with the identity of its designated representative for harvesting the Aleutian Islands directed pollock fishery TAC. The same individual is responsible for the submission of all cost recovery fees for pollock landed under the AIP Program. Cost recovery requirements for the AIP Program are at 50 CFR 679.67.

NMFS calculates the standard price for pollock using the most recent annual value information reported to the Alaska Department of Fish & Game for the Commercial Operator's Annual Report and compiled in the Alaska Commercial Fisheries Entry Commission Gross Earnings data for Aleutian Islands pollock. Due to the time required to compile the data, there is a one-year delay between the gross earnings data year and the fishing year to which it is applied. For example, NMFS used 2017 gross earnings data to calculate the standard price for 2018 pollock landings.

For the 2018 fishing year, the Aleut Corporation selected participants to harvest or process the Aleutian Islands directed pollock fishery TAC. Some harvest occurred; however, the majority of that TAC was eventually reallocated to the Bering Sea directed pollock fishery TAC. Due to the small harvest, the estimated percentage of direct program costs to fishery value for the 2018 calendar year were disproportionately high and well above 3.0 percent. Pursuant to section 304(d)(2)(B) of the Magnuson-Stevens Act, the fee percentage amount must not exceed 3.0 percent. Therefore, the 2018 fee percentage is set at 3.0 percent. To calculate the 2018 fee liability, NMFS applied the respective fee percentage to the pollock landings attributed to the AIP Program that occurred between January 1 and December 31. The 2018 fee payments must be submitted to NMFS on or before December 31, 2018. Payment must be made in accordance with the payment methods set forth in 50 CFR 679.67(a)(3)(iv).

CDQ Standard Price and Fee Percentage

The CDQ Program was implemented in 1992 to provide access to BSAI

fishery resources to villages located in Western Alaska. Section 305(i) of the Magnuson-Stevens Act identifies sixty-five villages eligible to participate in the CDQ Program and the six CDQ groups to represent these villages. CDQ groups receive exclusive harvesting privileges of the TACs for a broad range of crab species, groundfish species, and halibut. NMFS implemented a CDQ cost recovery program for the BSAI crab fisheries in 2005 (70 FR 10174, March 2, 2005) and published the cost recovery fee percentage for the 2018/2019 crab fishing year on July 19, 2018 (83 FR 34119). This notice provides the cost recovery fee percentage for the CDQ groundfish and halibut programs. Each CDQ group is subject to cost recovery fee requirements for landed groundfish and halibut, and the designated representative of each CDQ group is responsible for submitting payment for their CDQ group. Cost recovery requirements for the CDQ Program are at 50 CFR 679.33.

For most CDQ groundfish species, NMFS annually summarizes volume and value information for landings of all fishery species subject to cost recovery in order to estimate a standard price for each fishery species. The volume and value information is obtained from the First Wholesale Volume and Value Report and the Pacific Cod Ex-Vessel Volume and Value Report. For CDQ halibut and fixed-gear sablefish, NMFS calculates the standard prices using information from the Individual Fishing Quota (IFQ) Ex-Vessel Volume and Value Report, which collects information on both IFQ and CDQ volume and value.

Using the fee percentage formula described above, the estimated percentage of direct program costs to fishery value for the 2018 calendar year is 0.66 percent for the CDQ groundfish and halibut programs. For 2018, NMFS applied the calculated CDQ fee percentage to all CDQ groundfish and halibut landings made between January 1 and December 31 to calculate the CDQ fee liability for each CDQ group. The 2018 fee payments must be submitted to NMFS on or before December 31, 2018. Payment must be made in accordance with the payment methods set forth in 50 CFR 679.33(a)(3)(iv).

TABLE 1—STANDARD EX-VESSEL PRICES BY SPECIES FOR THE 2018 FISHING YEAR

Species	Gear type	Reporting period	Standard ex-vessel price per pound ($)
Arrowtooth flounder	All	January 1, 2018–October 31, 2018	$0.22
Atka mackerel	All	January 1, 2018–October 31, 2018	0.32
Flathead sole	All	January 1, 2018–October 31, 2018	0.26
Greenland turbot	All	January 1, 2018–October 31, 2018	0.60
CDQ halibut	Fixed gear	October 1, 2017–September 30, 2018	4.95
Pacific cod	Fixed gear	January 1, 2018–October 31, 2018	0.41
	Trawl gear	January 1, 2018–October 31, 2018	0.38
Pacific ocean perch	All	January 1, 2018–October 31, 2018	0.22
Pollock	All	January 1, 2017–December 31, 2017	0.14
Rock sole	All	January 1, 2018–March 31, 2018	0.28
	All	April 1, 2018–October 31, 2018	0.20
Sablefish	Fixed gear	October 1, 2017–September 30, 2018	2.89
	Trawl gear	January 1, 2018–October 31, 2018	0.77
Yellowfin sole	All	January 1, 2018–October 31, 2018	0.20

SUPPLEMENTARY INFORMATION:

Additions

On 4/20/2018 (83 FR 77) and 10/19/2018 (83 FR 203), the Committee for Purchase From People Who Are Blind or Severely Disabled published notices of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the services and impact of the additions on the current or most recent contractors, the Committee has determined that the services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will provide the services to the Government.

2. The action will result in authorizing small entities to provide the services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the services proposed for addition to the Procurement List.

End of Certification

Accordingly, the following services are added to the Procurement List:

Services

Service Type: Custodial Service.
Mandatory for: U.S. Army, ACC Aberdeen, PEO Facilities, Fort Belvoir, VA.
Mandatory Source of Supply: Melwood Horticultural Training Center, Inc., Upper Marlboro, MD.
Contracting Activity: Dept of the Army, W6Qk ACC–APG.

Service Type: Sourcing, Warehousing, Assembly, and Kitting Service.
Mandatory for: USPFO Connecticut, National Guard Bureau, National Guard Armory, 360 Broad Street, Hartford, CT.
Mandatory Source of Supply: Industries for the Blind and Visually Impaired, Inc., West Allis, WI.
Contracting Activity: Dept of the Army, W7MZ USPFO Activity CT ARNG.

Deletions

On 10/19/2018 (83 FR 203) and 10/26/2018 (83 FR 208), the Committee for Purchase From People Who Are Blind or Severely Disabled published notices of proposed deletions from the Procurement List.

After consideration of the relevant matter presented, the Committee has determined that the products and services listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to furnish the products and services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the products and services deleted from the Procurement List.

End of Certification

Accordingly, the following products and services are deleted from the Procurement List:

Products

NSN(s)—Product Name(s):
7930–01–517–4178—Cleaner, Industrial, Multi-Purpose, SKILCRAFT Savvy Green, 32 oz.
7930–01–517–4171—Cleaner, Industrial, Multi-Purpose, SKILCRAFT Savvy Green, 1 GL
7930–01–517–4172—Cleaner, Industrial, Multi-Purpose, SKILCRAFT Savvy Green, 5 GL
7930–01–517–4177—Cleaner, Industrial, Multi-Purpose, SKILCRAFT Savvy Green, 55 GL
7930–01–517–2726—Cleaner, Heavy Duty, Industrial, Multi-Purpose, SKILCRAFT Savvy Green Plus, 32 oz.
7930–01–517–4186—Cleaner, Heavy Duty, Industrial, Multi-Purpose, SKILCRAFT Savvy Green Plus, 5 GL
7930–01–517–4185—Cleaner, Industrial, Multi-Purpose, SKILCRAFT Savvy Green, 1 gal
7930–01–517–4187—Cleaner, Heavy Duty, Industrial, Multi-Purpose, SKILCRAFT Savvy Green Plus, 55 GL
Mandatory Source of Supply: VisionCorps, Lancaster, PA
Contracting Activities: General Services Administration, Fort Worth, TX, Department of Veterans Affairs, Strategic Acquisition Center

NSN(s)—Product Name(s): 5330–00–884–4807—Gasket and Preformed Packing Set
Mandatory Source of Supply: Walterboro Vocational Rehabilitation Center, Walterboro, SC
Contracting Activity: Defense Logistics Agency Troop Support

NSN(s)—Product Name(s): 7240–00–889–3785—Pail, Utility, Plastic, 5-Pint
Mandatory Source of Supply: Community Enterprises of St Clair County, Port Huron, MI
Contracting Activity: GSA/FSS Greater Southwest Acquisition, Fort Worth, TX

Services

Service Type: Janitorial/Custodial Service
Mandatory for: U.S. Army Reserve Center: 2838–98 Woodhaven Road Philadelphia Memorial, Philadelphia, PA
Mandatory Source of Supply: The Chimes, Inc., Baltimore, MD
Contracting Activity: Dept of the Army, W40M NORTHEREGION Contract OFC

Service Type: Switchboard Operation Service
Mandatory for: Shaw Air Force Base, SC
Mandatory Source of Supply: Palmetto Goodwill Services, North Charleston, SC
Contracting Activity: DEPT OF THE AIR FORCE, FA4803 20 CONS LGCA

Service Type: Grounds Maintenance Service
Mandatory for:
U.S. Army Reserve Center: 2838–98 Woodhaven Road Philadelphia Memorial, Philadelphia, PA; U.S. Army Reserve Center: 2501 Ford Road, Bristol Veterans, Bristol, PA
Mandatory Source of Supply: The Chimes, Inc., Baltimore, MD
Contracting Activity: DEPT OF THE ARMY, W6QM MICC CTR–FT DIX (RC)

Service Type: Laundry Service
Mandatory for: Department of Homeland Security: Alien Detention & Removal (ADR)
Immigration & Customs Enforcement (IEC) and Custom, San Diego, CA
Mandatory Source of Supply: Job Options, Inc., San Diego, CA
Contracting Activity: U.S. Customs and Border Protection, Border Enforcement Contracting Division

Service Type: Janitorial/Custodial Service
Mandatory for: Veterans Affairs Medical Center: OI Services Center, Edward Hines Jr., 1st Avenue, Bldg. 20, Hines, IL
Mandatory Source of Supply: Jewish Vocational Service and Employment Center, Chicago, IL
Contracting Activity: Veterans Affairs, Department of, Acquisition Service—FREDERICK

Michael R. Jurkowski,

Business Management Specialist, Business Operations.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Deletions from the Procurement List.

SUMMARY: The Committee is proposing to delete a product and services from the Procurement List that was previously furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: *Comments must be received on or before:* December 30, 2018.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia, 22202–4149.

FOR FURTHER INFORMATION CONTACT: For further information or to submit comments contact: Michael R. Jurkowski, Telephone: (703) 603–2117, Fax: (703) 603–0655, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503 (a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Deletions

The following product and services are proposed for deletion from the Procurement List:

Product

NSN(s)—Product Name(s): 7520–00–286–1724—File, Sorter, Letter, 1–31, Blue
Mandatory Source of Supply: Exceptional Children's Foundation, Culver City, CA

Contracting Activity: GSA/FAS ADMIN SVCS ACQUISITION BR(2, New York, NY

Services

Service Type: Supply Room/Motor Vehicle Service
Mandatory for: Federal Aviation Administration: Great Lakes Region, Des Plaines, IL
Mandatory Source of Supply: Jewish Vocational Service and Employment Center, Chicago, IL
Contracting Activity: DEPARTMENT OF TRANSPORTATION
Service Type: Janitorial Service
Mandatory for: USDA Natural Resources Conservation Service Shiprock Field Office, Old Post Office Route 491 Shiprock, NM
Mandatory Source of Supply: Presbyterian Medical Services, Santa Fe, NM
Contracting Activity: NATURAL RESOURCES CONSERVATION SERVICE, AZ STATE OFFICE (NRCS)
Service Types: Trash Pick-up Service Cleaning Service
Mandatory for: Crane Division, Naval Surface Warfare Center, Crane, IN
Mandatory Source of Supply: Orange County Rehabilitative and Developmental Services, Inc., Paoli, IN
Contracting Activity: DEPT OF THE NAVY, U S FLEET FORCES COMMAND

BILLING CODE 6353–01–P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Withdrawal of the Notice of Intent To Prepare a Draft Environmental Impact Statement (DEIS) in Cooperation With the North Carolina Department of Transportation and South Carolina Department of Transportation for Extending SC 31 (Carolina Bays Parkway), in Horry County, South Carolina, To Connect to US 17, in Brunswick County, North Carolina

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice.

SUMMARY: The U.S. Army Corps of Engineers, Wilmington District, Wilmington Regulatory Division and the U.S. Army Corps of Engineers, Charleston District, Charleston Regulatory Division (collectively COE) are issuing this notice to advise the public that a State (North Carolina Department of Transportation [NCDOT] and South Carolina Department of Transportation [SCDOT]) funded Draft Environmental Impact Statement (DEIS) will no longer be prepared by the COE, while acting as lead federal agency, for improvements to SC 31 starting near Little River, Horry County, South Carolina and running northeast to US 17, in an area between Calabash and Shallotte, Brunswick County, North Carolina. On July 6, 2017 the COE issued a Notice of Intent to prepare a DEIS for the ''Carolina Bays Parkway Extension'', NCDOT Project 44604 and SCDOT Project P029554. Recent commitment of federal funds has altered various aspects of this project, including the designation of the lead federal agency. Due to these developments, the COE will no longer act in this capacity, but rather as a cooperating agency throughout the evaluation of the project. At the appropriate time, a separate notice will be issued within the **Federal Register** identifying the lead agency, describing the project, and detailing the evaluation process.

FOR FURTHER INFORMATION CONTACT: Questions about the COE's current role in this project can be directed to Mr. Brad Shaver, Regulatory Project Manager (Wilmington District), Wilmington Regulatory Field Office, 69 Darlington Avenue, Wilmington, NC 28403, by telephone: (910) 251–4611, or by email at *Brad.E.Shaver@USACE.army.mil* or Ms. Amanda Heath, Regulatory Project Manager (Charleston District), Charleston Regulatory Office, 69A Hagood Avenue, Charleston, SC 29403, by telephone: (843) 329–8025, or by email at *Amanda.L.Heath@usace.army.mil.*

Scott McLendon,

Chief, Regulatory Division, Wilmington District.

BILLING CODE 3720–58–P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Notice of Availability of the Record of Decision for the Final Missouri River Recovery Management Plan and Environmental Impact Statement

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice; availability of the Record of Decision.

SUMMARY: The U.S. Army Corps of Engineers (USACE) announces the availability of the Record of Decision (ROD) for the Final Missouri River Recovery Management Plan and Environmental Impact Statement (MRRMP–FEIS) published in the **Federal Register** on Friday, August 31, 2018. The USACE Northwestern Division Commander signed the ROD on November 20, 2018. Copies of the ROD along with the MRRMP–FEIS and other supporting documents are available for viewing on the Missouri River Recovery Program website at: *http://www.nwo.usace.army.mil/mrrp/mgmt-plan/.*

FOR FURTHER INFORMATION CONTACT: Tiffany Vanosdall, U.S. Army Corps of Engineers at (402) 995–2695 or by email at *tiffany.k.vanosdall@usace.army.mil.*

SUPPLEMENTARY INFORMATION: The USACE has developed the MRRMP–FEIS in cooperation with the U.S. Fish and Wildlife Service (USFWS). This document is the USACE Record of Decision for the MRRMP–FEIS dated August, 2018. The MRRMP–FEIS is a programmatic assessment of major federal actions necessary to avoid a finding of jeopardy for the pallid sturgeon (*Scaphirhynchus albus*), interior least tern (*Sterna antillarum*), and the Northern Great Plains piping plover (*Charadrius melodus*) caused by operation of the Missouri and Kansas River reservoir systems and operation and maintenance of the Missouri River Bank Stabilization and Navigation Project. After consultation with the USFWS, and extensive collaboration, analysis, and independent scientific review, USACE has identified Alternative 3 (Mechanical Construction Only) as the selected alternative. Alternative 3 will meet the species objectives and fulfill the purpose and need of the plan while avoiding and minimizing adverse impacts to stakeholders. Importantly, Alternative 3 would be implemented within an adaptive management framework detailed in the Science and Adaptive Management Plan (SAMP). The ROD documents why the USACE has chosen to implement Alternative 3 as described in the MRRMP–FEIS.

Brenda S. Bowen,

Army Federal Register Liaison Officer.

BILLING CODE 3720–58–P

DEPARTMENT OF EDUCATION

National Advisory Council on Indian Education; Meeting

AGENCY: National Advisory Council on Indian Education (NACIE), U.S. Department of Education.

ACTION: Announcement of a closed and open teleconference meeting.

SUMMARY: This notice sets forth the announcement of an upcoming meeting to be conducted by the National Advisory Council on Indian Education (NACIE). Notice of the meeting is required by section 10(a)(2) of the Federal Advisory Committee Act.

DATES: The NACIE teleconference meeting will be held on December 17, 2018 from 3:00 p.m.–5:00 p.m. (EST). The closed portion of the meeting will take place first from 3:00 p.m. to 3:45 p.m. The open portion of the meeting will take place from 4:00 p.m. to 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Tina Hunter, Designated Federal Official, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue SW, Washington, DC 20202. Telephone: 202–205–8527. Fax: 202–205–0310. Email: *tina.hunter@ed.gov.*

SUPPLEMENTARY INFORMATION:

NACIE's Statutory Authority and Function: The National Advisory Council on Indian Education is authorized by section 7141 of the Elementary and Secondary Education Act of 1965 (ESEA) as amended by the Every Student Succeeds Act (ESSA), 20 U.S.C. 7471. The Council is established within the Department of Education to advise the Secretary of Education on the funding and administration (including the development of regulations, and administrative policies and practices) of any program over which the Secretary has jurisdiction and includes Indian children or adults as participants or programs that may benefit Indian children or adults, including any program established under Title VII, Part A of the Elementary and Secondary Education Act. The Council submits to the Congress a report on its activities, including any recommendations the Council considers appropriate for the improvement of Federal education programs that include Indian children or adults as participants or that may benefit Indian children or adults and recommendations concerning the funding of any such program.

Meeting Agenda: The purpose of the closed portion of the meeting is to convene the Council to discuss the outcome of the subcommittee interviews of eligible applicants to fill the vacant Director position in the Office of Indian Education. In accordance with 41 CFR 102–3.155, this portion of the meeting will be closed due to the confidential nature of the information that will be discussed in evaluating each candidate's qualifications for the position of Director in the Office of the Indian Education. The open portion of the meeting will be a discussion of, and Council vote on, NACIE's Annual Report Subcommittee recommendations. There will be a conference line limit of 50 people on a first-come basis for the open portion of the meeting. The dial in information for the first 50 is as follows:

Dial-in Number: 202–991–0393

Conference ID: 61695881

Access to Records of the Meeting: The Department will post the official report of the open meeting on the OESE website at: *http://www2.ed.gov/about/offices/list/oese/index.html?src=oc* 21 days after the meeting. Pursuant to the FACA, the public may also inspect the materials at the Office of Indian Education, United States Department of Education, 400 Maryland Avenue SW, Washington, DC 20202, Monday–Friday, 8:30 a.m. to 5:00 p.m. Eastern Daylight Saving Time or by emailing *TribalConsultation@ed.gov* or by calling Terrie Nelson on (202) 401–0424 to schedule an appointment.

Electronic Access to this Document: The official version of this document is the document published in the **Federal Register**. Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the Adobe website. You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Authority: Section 7141 of the Elementary and Secondary Education Act of 1965 (ESEA) as amended by the Every Student Succeeds Act (ESSA), 20 U.S.C. 7471.

Frank Brogan,

Assistant Secretary for Elementary and Secondary Education.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Application for New Awards; Expanding Opportunity Through Quality Charter Schools Program (CSP)—Grants to Charter Management Organizations for the Replication and Expansion of High-Quality Charter Schools

AGENCY: Office of Innovation and Improvement, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for fiscal year (FY) 2019 for CSP—Grants to Charter Management Organizations for the Replication and Expansion of High-Quality Charter Schools, Catalog of Federal Domestic Assistance (CFDA) number 84.282M.

DATES:

Applications Available: November 30, 2018.

Date of Pre-Application Webinar: Thursday, December 6, 2018, 12:00 p.m., Washington, DC time.

Deadline for Transmittal of Applications: January 10, 2019.

Deadline for Intergovernmental Review: February 28, 2019.

Pre-Application Webinar Information: The Department will hold a pre-application meeting via webinar for prospective applicants on Thursday, December 6, 12:00 p.m., Washington, DC time. Individuals interested in attending this meeting are encouraged to pre-register by emailing their name, organization, and contact information with the subject heading ''CMO GRANTS PRE–APPLICATION MEETING'' to *charterschools@ed.gov.* There is no registration fee for attending this meeting.

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on February 12, 2018 (83 FR 6003) and available at *www.gpo.gov/fdsys/pkg/FR-2018-02-12/pdf/2018-02558.pdf.*

FOR FURTHER INFORMATION CONTACT: Eddie Moat, U.S. Department of Education, 400 Maryland Avenue SW,

Room 4W259, Washington, DC 20202–5970. Telephone: (202) 401–2266. *Email: charterschools@ed.gov.*

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The major purposes of the CSP are to expand opportunities for all students, particularly traditionally underserved students, to attend *charter schools* and meet challenging State academic standards; provide financial assistance for the planning, program design, and initial implementation of public *charter schools;* increase the number of *high-quality charter schools* [1] available to students across the United States; evaluate the impact of *charter schools* on student achievement, families, and communities; share best practices between *charter schools* and other public schools; encourage States to provide facilities support to *charter schools;* and support efforts to strengthen the *charter school* authorizing process. Through CSP Grants to Charter Management Organizations for the Replication and Expansion of High-Quality Charter Schools (CFDA number 84.282M) (also referred to as CMO [*i.e.,* Charter Management Organization] grants or the CMO grant program), the Department provides funds to *charter management organizations* (CMOs) on a competitive basis to enable them to *replicate* or *expand* one or more *high-quality charter schools.* Grant funds may be used to *expand* the enrollment of one or more existing *high-quality charter schools,* or to *replicate* one or more new *charter schools* that are based on an existing, *high-quality charter school* model.

Background: The CMO grant program is intended to support *high-quality charter schools* that are operated by high-performing *CMOs* seeking to broaden and increase their impact on student achievement. Since FY 2010, the Department has awarded almost 80 new CMO grants, resulting in a portfolio of high-quality *CMOs* using Federal funds to *replicate* and *expand* their successful *charter school* models to serve greater numbers of students, particularly *educationally disadvantaged students.*

We have published elsewhere in this issue of the **Federal Register** a notice of final priorities, requirements, definitions, and selection criteria (NFP) for use in this and future CMO competitions. The NFP aligns with the Elementary and Secondary Education Act of 1965, as amended by the Every Student Succeeds Act (ESEA), and clarifies key statutory provisions. In the FY 2019 CMO competition, we are using several priorities from the NFP and one priority from the Education Department General Administrative Regulations.

First, applicants must choose to submit their applications under one of two absolute priorities—*Absolute Priority 1—Rural Community* or *Absolute Priority 2—Low-Income Demographic.* A major purpose of this program is to *replicate* and *expand high-quality charter schools* that serve *educationally disadvantaged students.* Students living in *rural communities* often have few high-quality educational options and face unique challenges. Similarly, we believe it is critical to ensure that students who are *individuals from low-income families,* particularly such students who attend schools with high percentages of students who are *individuals from low-income families,* have access to multiple high-quality educational options. Accordingly, in order to receive a grant under this competition, applicants must demonstrate that they will *replicate* or *expand* one or more *high-quality charter schools* in a *rural community,* or operate or manage *charter schools* with student bodies that are comprised of at least 40 percent of students who are *individuals from low-income families.*

This competition also includes five competitive preference priorities. First, we encourage applicants to propose projects that focus on replicating or expanding *high-quality charter schools* with an intentional focus on racially and socioeconomically diverse student bodies, consistent with nondiscrimination requirements contained in the U.S. Constitution and Federal civil rights laws.

Second, we encourage applicants to propose to reopen one or more *academically poor-performing public schools* as *charter schools,* based on a successful *charter school* model. In order to receive points, an applicant must ensure that the replicated *high-quality charter school* maintains a student body population that is demographically similar to that of the *academically poor-performing public school,* consistent with nondiscrimination requirements in the U.S. Constitution and Federal civil rights laws. In accordance with the most recent version of the Department's Charter Schools Program Nonregulatory Guidance (issued in January 2014),[2] grantees may exempt from any admissions lotteries students who are enrolled in a public school, including an *academically poor-performing public school,* at the time it is reopened as a public *charter school,* as permissible under State law.

Third, we encourage applicants to propose to *replicate* or *expand* high-quality *charter schools* that serve high school students. To meet this priority, applicants must demonstrate that they will prepare students for postsecondary education and provide support for their graduates to enroll and persist in, and obtain a degree or certificate from, postsecondary education institutions. In addition, to meet this priority, applicants must propose one or more specific performance measures that will provide valid and reliable information on their students' progress to and through postsecondary education institutions.

Fourth, we encourage applications from eligible entities that would *replicate* or *expand high-quality charter schools* that are designed to meet the unique educational needs of *Native American* students, consistent with nondiscrimination requirements in the U.S. Constitution and Federal civil rights laws. In order to meet this priority, an applicant must submit a letter of support from an *Indian Tribe* or *Indian organization* in the community where the *charter school* will be located, meaningfully collaborate with such *Indian Tribe* or *Indian organization,* and propose to *replicate* or *expand* one or more high-quality *charter schools* with a mission and project focus that addresses the unique educational needs of *Native American* students, such as through the use of instruction that reflects and preserves *Native American language,* culture, and history.

Finally, we encourage *novice applicants* to apply.

Priorities: This notice includes two absolute priorities and five competitive preference priorities. The absolute priorities and Competitive Preference Priorities 1–4 are from the NFP for this program published elsewhere in this issue of the **Federal Register**. Competitive Preference Priority 5 is from 34 CFR 75.225.

Absolute Priorities: For FY 2019 and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are absolute priorities.

[1] Italicized terms are defined in the Definitions section of this notice.

[2] See: *http://www2.ed.gov/programs/charter/fy14cspnonregguidance.doc.*

Under 34 CFR 75.105(c)(3), we consider only applications that meet one of these priorities.

Each of these absolute priorities constitutes its own funding category. Applicants may propose projects that address both absolute priorities, but must clearly indicate under which absolute priority they are officially applying. The Secretary intends to award grants under each absolute priority for which applications of sufficient quality are submitted.

The priorities are:

Absolute Priority 1—Rural Community.

Under this priority, applicants must propose to *replicate* or *expand* one or more *high-quality charter schools* in a *rural community.*

Absolute Priority 2—Low-Income Demographic.

Under this priority, applicants must demonstrate that at least 40 percent of the students across all of the *charter schools* the applicant operates or manages are *individuals from low-income families,* and that the applicant will maintain the same, or a substantially similar, percentage of such students across all of its *charter schools* during the grant period.

Competitive Preference Priorities: These priorities are competitive preference priorities. Under 34 CFR 75.105(c)(2)(i), we will award up to an additional three points to an application that addresses Competitive Preference Priority 1, up to an additional three points to an application that addresses Competitive Preference Priority 2, up to an additional three points to an application that addresses Competitive Preference Priority 3, up to an additional three points to an application that addresses Competitive Preference Priority 4, and an additional three points to an application that meets Competitive Preference Priority 5. The maximum number of competitive preference priority points an application can receive for this competition is 15.

These priorities are:

Competitive Preference Priority 1—Promoting Diversity. (up to 3 points)

Under this priority, applicants must propose to *replicate* or *expand high-quality charter schools* that have an intentional focus on recruiting students from racially and socioeconomically diverse backgrounds and maintaining racially and socioeconomically diverse student bodies in those *charter schools,* consistent with nondiscrimination requirements contained in the U.S. Constitution and Federal civil rights laws.

Competitive Preference Priority 2—Reopening Academically Poor-performing Public Schools as Charter Schools. (up to 3 points)

Under this priority, applicants must—

(i) Demonstrate past success working with one or more *academically poor-performing public schools* or schools that previously were designated as persistently lowest-achieving schools or priority schools under the former School Improvement Grant program or in States that exercised ESEA flexibility, respectively, under the ESEA, as amended by the No Child Left Behind Act of 2001 (NCLB); and

(ii) Propose to use grant funds under this program to reopen one or more *academically poor-performing public schools* as *charter schools* during the project period by—

(A) Replicating one or more *high-quality charter schools* based on a successful *charter school* model for which the applicant has provided evidence of success; and

(B) Targeting a demographically similar student population in the replicated *charter schools* as was served by the *academically poor-performing public schools,* consistent with nondiscrimination requirements contained in the U.S. Constitution and Federal civil rights laws.

Competitive Preference Priority 3—High School Students. (up to 3 points)

Under this priority, applicants must propose to—

(i) *Replicate* or *expand high-quality charter schools* to serve high school students, including *educationally disadvantaged students*;

(ii) Prepare students, including *educationally disadvantaged students,* in those schools for enrollment in postsecondary education institutions through activities such as, but not limited to, accelerated learning programs (including Advanced Placement and International Baccalaureate courses and programs, dual or concurrent enrollment programs, and early college high schools), college counseling, career and technical education programs, career counseling, internships, work-based learning programs (such as apprenticeships), assisting students in the college admissions and financial aid application processes, and preparing students to take standardized college admissions tests;

(iii) Provide support for students, including *educationally disadvantaged students,* who graduate from those schools and enroll in postsecondary education institutions in persisting in, and attaining a degree or certificate from, such institutions, through activities such as, but not limited to, mentorships, ongoing assistance with the financial aid application process, and establishing or strengthening peer support systems for such students attending the same institution; and

(iv) Propose one or more project-specific performance measures, including aligned leading indicators or other interim milestones, that will provide valid and reliable information about the applicant's progress in preparing students, including *educationally disadvantaged students,* for enrollment in postsecondary education institutions and in supporting those students in persisting in and attaining a degree or certificate from such institutions. An applicant addressing this priority and receiving a CMO grant must provide data that are responsive to the measure(s), including performance targets, in its annual performance reports to the Department.

(v) For purposes of this priority, postsecondary education institutions include institutions of higher education, as defined in section 8101(29) of the ESEA, and one-year training programs that meet the requirements of section 101(b)(1) of the Higher Education Act of 1965, as amended (HEA).

Competitive Preference Priority 4—Replicating or Expanding High-quality Charter Schools to Serve Native American Students. (up to 3 points)

Under this priority, applicants must—

(i) Propose to *replicate* or *expand* one or more *high-quality charter schools* that—

(A) Utilize targeted outreach and recruitment in order to serve a *high proportion* of *Native American* students, consistent with nondiscrimination requirements contained in the U.S. Constitution and Federal civil rights laws;

(B) Have a mission and focus that will address the unique educational needs of *Native American* students, such as through the use of instructional programs and teaching methods that reflect and preserve *Native American language,* culture, and history; and

(C) Have a governing board with a substantial percentage of members who are members of *Indian Tribes* or *Indian organizations* located within the area to be served by the replicated or expanded *charter school*;

(ii) Submit a letter of support from at least one *Indian Tribe* or *Indian organization* located within the area to be served by the replicated or expanded *charter school*; and

(iii) Meaningfully collaborate with the *Indian Tribe(s)* or *Indian organization(s)* from which the applicant has received a letter of support in a timely, active, and ongoing manner with respect to the development and implementation of the

educational program at the *charter school*.

Competitive Preference Priority 5—Novice Applicants. (0 or 3 points)

This priority is for applications submitted by *novice applicants.*

Definitions:

The following definitions are from sections 4310 and 8101 of the ESEA, 34 CFR 75.225 and 77.1, and the NFP.

Academically poor-performing public school means:

(a) A school identified by the State for comprehensive support and improvement under section 1111(c)(4)(D)(i) of the ESEA; or

(b) A public school otherwise identified by the State or, in the case of a *charter school,* its authorized public chartering agency, as similarly academically poor-performing. (NFP)

Ambitious means promoting continued, meaningful improvement for program participants or for other individuals or entities affected by the grant, or representing a significant advancement in the field of education research, practices, or methodologies. When used to describe a performance target, whether a performance target is ambitious depends upon the context of the relevant performance measure and the baseline for that measure. (34 CFR 77.1)

Authorized public chartering agency means a State educational agency, local educational agency, or other public entity that has the authority pursuant to State law and approved by the Secretary to authorize or approve a *charter school*. (Section 4310(1) of the ESEA)

Baseline means the starting point from which performance is measured and targets are set. (34 CFR 77.1)

Charter management organization means a nonprofit organization that operates or manages a network of *charter schools* linked by centralized support, operations, and oversight. (Section 4310(3) of the ESEA)

Charter school means a public school that—

(i) In accordance with a specific State statute authorizing the granting of charters to schools, is exempt from significant State or local rules that inhibit the flexible operation and management of public schools, but not from any rules relating to the other requirements of this paragraph;

(ii) Is created by a developer as a public school, or is adapted by a developer from an existing public school, and is operated under public supervision and direction;

(iii) Operates in pursuit of a specific set of educational objectives determined by the school's developer and agreed to by the authorized public chartering agency;

(iv) Provides a program of elementary or secondary education, or both;

(v) Is nonsectarian in its programs, admissions policies, employment practices, and all other operations, and is not affiliated with a sectarian school or religious institution;

(vi) Does not charge tuition;

(vii) Complies with the Age Discrimination Act of 1975, title VI of the Civil Rights Act of 1964, title IX of the Education Amendments of 1972, section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et seq.*), section 444 of the General Education Provisions Act (20 U.S.C. 1232g) (commonly referred to as the ''Family Educational Rights and Privacy Act of 1974''), and part B of the Individuals with Disabilities Education Act;

(viii) Is a school to which parents choose to send their children, and that—

(A) Admits students on the basis of a lottery, consistent with section 4303(c)(3)(A), if more students apply for admission than can be accommodated; or

(B) In the case of a school that has an affiliated charter school (such as a school that is part of the same network of schools), automatically enrolls students who are enrolled in the immediate prior grade level of the affiliated charter school and, for any additional student openings or student openings created through regular attrition in student enrollment in the affiliated charter school and the enrolling school, admits students on the basis of a lottery as described in clause (A);

(ix) Agrees to comply with the same Federal and State audit requirements as do other elementary schools and secondary schools in the State, unless such State audit requirements are waived by the State;

(x) Meets all applicable Federal, State, and local health and safety requirements;

(xi) Operates in accordance with State law;

(xii) Has a written performance contract with the authorized public chartering agency in the State that includes a description of how student performance will be measured in charter schools pursuant to State assessments that are required of other schools and pursuant to any other assessments mutually agreeable to the authorized public chartering agency and the charter school; and

(xiii) May serve students in early childhood education programs or postsecondary students. (Section 4310(2) of the ESEA)

Child with a disability means—

(i) In general—

The term ''child with a disability'' means a child—

(A) With intellectual disabilities, hearing impairments (including deafness), speech or language impairments, visual impairments (including blindness), serious emotional disturbance (referred to in this chapter as ''emotional disturbance''), orthopedic impairments, autism, traumatic brain injury, other health impairments, or specific learning disabilities; and

(B) Who, by reason thereof, needs special education and related services.

(ii) Child aged 3 through 9.

The term ''child with a disability'' for a child aged 3 through 9 (or any subset of that age range, including ages 3 through 5), may, at the discretion of the State and the local educational agency, include a child—

(A) Experiencing developmental delays, as defined by the State and as measured by appropriate diagnostic instruments and procedures, in 1 or more of the following areas: Physical development; cognitive development; communication development; social or emotional development; or adaptive development; and

(B) Who, by reason thereof, needs special education and related services. (Section 8101(4) of the ESEA)

Educationally disadvantaged student means a student in one or more of the categories described in section 1115(c)(2) of the ESEA, which include children who are economically disadvantaged, students who are children with disabilities, migrant students, English learners, neglected or delinquent students, homeless students, and students who are in foster care. (NFP)

Expand, when used with respect to a *high-quality charter school,* means to significantly increase enrollment or add one or more grades to the *high-quality charter school*. (Section 4310(7) of the ESEA)

High proportion, when used to refer to *Native American* students, means a fact-specific, case-by-case determination based upon the unique circumstances of a particular *charter school* or proposed *charter school*. The Secretary considers ''high proportion'' to include a majority of *Native American* students. In addition, the Secretary may determine that less than a majority of *Native American* students constitutes a ''high proportion'' based on the unique circumstances of a particular *charter school* or proposed *charter school,* as

described in the application for funds. (NFP)

High-quality charter school means a *charter school* that—

(a) Shows evidence of strong academic results, which may include strong student academic growth, as determined by a State;

(b) Has no significant issues in the areas of student safety, financial and operational management, or statutory or regulatory compliance;

(c) Has demonstrated success in significantly increasing student academic achievement, including graduation rates where applicable, for all students served by the *charter school;* and

(d) Has demonstrated success in increasing student academic achievement, including graduation rates where applicable, for each of the subgroups of students, as defined in section 1111(c)(2), except that such demonstration is not required in a case in which the number of students in a group is insufficient to yield statistically reliable information or the results would reveal personally identifiable information about an individual student. (Section 4310(8) of the ESEA)

Indian organization means an organization that—

(a) Is legally established—

(i) By Tribal or inter-Tribal charter or in accordance with State or Tribal law; and

(ii) With appropriate constitution, by-laws, or articles of incorporation;

(b) Includes in its purposes the promotion of the education of Indians;

(c) Is controlled by a governing board, the majority of which is Indian;

(d) If located on an Indian reservation, operates with the sanction or by charter of the governing body of that reservation;

(e) Is neither an organization or subdivision of, nor under the direct control of, any institution of higher education; and

(f) Is not an agency of State or local government. (NFP)

Indian Tribe means a federally-recognized or a State-recognized Tribe. (NFP)

Individual from a low-income family means an individual who is determined by a State educational agency or local educational agency to be a child from a low-income family on the basis of (a) data used by the Secretary to determine allocations under section 1124 of the ESEA, (b) data on children eligible for free or reduced-price lunches under the Richard B. Russell National School Lunch Act, (c) data on children in families receiving assistance under part A of title IV of the Social Security Act, (d) data on children eligible to receive medical assistance under the Medicaid program under title XIX of the Social Security Act, or (e) an alternate method that combines or extrapolates from the data in items (a) through (d) of this definition. (NFP)

Institution of higher education means an educational institution in any State that—

(i) Admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, or persons who meet the requirements of section 484(d) of the HEA;

(ii) Is legally authorized within such State to provide a program of education beyond secondary education;

(iii) Provides an educational program for which the institution awards a bachelor's degree or provides not less than a 2-year program that is acceptable for full credit toward such a degree, or awards a degree that is acceptable for admission to a graduate or professional degree program, subject to review and approval by the Secretary;

(iv) Is a public or other nonprofit institution; and

(v) Is accredited by a nationally recognized accrediting agency or association, or if not so accredited, is an institution that has been granted preaccreditation status by such an agency or association that has been recognized by the Secretary for the granting of preaccreditation status, and the Secretary has determined that there is satisfactory assurance that the institution will meet the accreditation standards of such an agency or association within a reasonable time. (NFP)

Logic model (also referred to as theory of action) means a framework that identifies key project components of the proposed project (*i.e.,* the active ''ingredients'' that are hypothesized to be critical to achieving the relevant outcomes) and describes the theoretical and operational relationships among the key project components and relevant outcomes. (34 CFR 77.1)

Native American means an Indian (including an Alaska Native), Native Hawaiian, or Native American Pacific Islander. (NFP)

Native American language means the historical, traditional languages spoken by *Native Americans.* (NFP)

Novice applicant means—

(a) Any applicant for a grant from the Department that—

(i) Has never received a grant or subgrant under the program from which it seeks funding;

(ii) Has never been a member of a group application, submitted in accordance with 34 CFR 75.127–75.129, that received a grant under the program from which it seeks funding; and

(iii) Has not had an active discretionary grant from the Federal Government in the five years before the deadline date for applications for new awards under the program.

(b) In the case of a group application submitted in accordance with §§ 75.127–75.129, a group that includes only parties that meet the requirements of paragraph (a)(i) of this section. (34 CFR 75.225)

Performance measure means any quantitative indicator, statistic, or metric used to gauge program or project performance. (34 CFR 77.1)

Performance target means a level of performance that an applicant would seek to meet during the course of a project or as a result of a project. (34 CFR 77.1)

Replicate, when used with respect to a *high-quality charter school,* means to open a new *charter school,* or a new campus of a *high-quality charter school,* based on the educational model of an existing *high-quality charter school,* under an existing charter or an additional charter, if permitted or required by State law. (Section 4310(9) of the ESEA)

Rural community means a community that is served by a local educational agency that is eligible to apply for funds under the Small Rural School Achievement (SRSA) program or the Rural and Low-Income School (RLIS) program authorized under title V, part B of the ESEA. Applicants may determine whether a particular local educational agency is eligible for these programs by referring to information on the following Department websites. For the SRSA program: *www2.ed.gov/programs/reapsrsa/eligible16/index.html.* For the RLIS program: *www2.ed.gov/programs/reaprlisp/eligibility.html.* (NFP)

Application Requirements:

Applications for CSP CMO grant funds must address the following application requirements. These requirements are from the NFP and sections 4303 [3] and 4305 of the ESEA. The source of each requirement is provided in parentheses following each requirement. An applicant must respond to requirement (a) in a stand-alone section of the application or in an appendix. For all other application

[3] Per section 4305(c) of the ESEA, CMO grants shall have the same terms and conditions as grants awarded to State entities under section 4303. For clarity, the Department has replaced the term ''State entity'' with ''applicant'' in the requirements that derive from section 4303.

requirements, an applicant may choose to respond to each requirement separately or in the context of the applicant's responses to the selection criteria in section V.2 of this notice.

Applicants for funds under this program must—

(a) Describe the *applicant's* objectives in running a quality *charter school* program and how the program will be carried out, including—

(i) A description of how the applicant will ensure that *charter schools* receiving funds under this program meet the educational needs of their students, including children with disabilities and English learners. (Section 4303(f)(1)(A)(x) of the ESEA)

(ii) A description of how the applicant will ensure that each *charter school* receiving funds under this program has considered and planned for the transportation needs of the school's students. (Section 4303(f)(1)(E) of the ESEA)

(b) For each *charter school* currently operated or managed by the applicant, provide—

(i) Student assessment results for all students and for each subgroup of students described in section 1111(c)(2);

(ii) Attendance and student retention rates for the most recently completed school year and, if applicable, the most recent available four-year adjusted cohort graduation rates and extended-year adjusted cohort graduation rates; and

(iii) Information on any significant compliance and management issues encountered within the last three school years by any school operated or managed by the eligible entity, including in the areas of student safety and finance. (Section 4305(b)(3)(A) of the ESEA)

(c) Describe the educational program that the applicant will implement in each *charter school* receiving funding under this program, including—

(i) Information on how the program will enable all students to meet the challenging State academic standards;

(ii) The grade levels or ages of students who will be served; and

(iii) The instructional practices that will be used. (Section 4305(b)(3)(B)(ii) of the ESEA)

(d) Demonstrate that the applicant currently operates or manages more than one *charter school.* For purposes of this program, multiple *charter schools* are considered to be separate schools if each school—

(i) Meets each element of the definition of ''*charter school*'' under section 4310(2) of the ESEA; and

(ii) Is treated as a separate school by its *authorized public chartering agency* and the State in which the *charter school* is located, including for purposes of accountability and reporting under title I, part A of the ESEA. (NFP)

(e) Provide information regarding any compliance issues, and how they were resolved, for any *charter schools* operated or managed by the applicant that have—

(i) Closed;

(ii) Had their charter(s) revoked due to problems with statutory or regulatory compliance, including compliance with sections 4310(2)(G) and (J) of the ESEA; or

(iii) Had their affiliation with the applicant revoked or terminated, including through voluntary disaffiliation. (NFP)

(f) Provide a complete *logic model* for the grant project. The *logic model* must include the applicant's objectives for replicating or expanding one or more *high-quality charter schools* with funding under this program, including the number of *high-quality charter schools* the applicant proposes to *replicate* or *expand.* (NFP)

(g) If the applicant currently operates, or is proposing to *replicate* or *expand* a single-sex *charter school* or coeducational *charter school* that provides a single-sex class or extracurricular activity (collectively referred to as a ''single-sex educational program''), demonstrate that the existing or proposed single-sex educational program is in compliance with title IX of the Education Amendments of 1972 (20 U.S.C. 1681, *et seq.*) and its implementing regulations, including 34 CFR 106.34. (NFP)

(h) Describe how the applicant currently operates or manages the *high-quality charter schools* for which it has presented evidence of success and how the proposed *replicated* or *expanded charter schools* will be operated or managed, including the legal relationship between the applicant and its schools. If a legal entity other than the applicant has entered or will enter into a performance contract with an *authorized public chartering agency* to operate or manage one or more of the applicant's schools, the applicant must also describe its relationship with that entity. (NFP)

(i) Describe how the applicant will solicit and consider input from parents and other members of the community on the implementation and operation of each *replicated* or *expanded charter school,* including in the area of school governance. (NFP)

(j) Describe the lottery and enrollment procedures that will be used for each replicated or expanded *charter school* if more students apply for admission than can be accommodated, including how any proposed weighted lotteries comply with section 4303(c)(3)(A) of the ESEA. (NFP)

(k) Describe how the applicant will ensure that all eligible children with disabilities receive a free appropriate public education in accordance with Part B of the Individuals with Disabilities Education Act (IDEA). (NFP)

(l) Describe how the proposed project will assist *educationally disadvantaged students* in mastering challenging State academic standards. (NFP)

(m) Provide a budget narrative, aligned with the activities, target grant project outputs, and outcomes described in the *logic model,* that outlines how grant funds will be expended to carry out planned activities. (NFP)

(n) Provide the applicant's most recent independently audited financial statements prepared in accordance with generally accepted accounting principles. (NFP)

(o) Describe the applicant's policies and procedures to assist students enrolled in a *charter school* that closes or loses its charter to attend other high-quality schools. (NFP)

(p) Provide—

(i) A request and justification for waivers of any Federal statutory or regulatory provisions that the applicant believes are necessary for the successful operation of the *charter schools* to be *replicated* or *expanded;* and

(ii) A description of any State or local rules, generally applicable to public schools, that will be waived, or otherwise not apply, to such schools. (NFP)

Assurances.

Applications for CSP CMO grant funds must provide the following assurances. These assurances are from sections 4303 and 4305 of the ESEA. The source of each assurance is provided in parentheses following each assurance.

Applicants for funds under this program must provide assurances that—

(a) The grantee will support *charter schools* in meeting the educational needs of their students, as described in section 4303(f)(1)(A)(x) of the ESEA. (Section 4303(f)(2)(B) of the ESEA)

(b) The grantee will ensure that each *charter school* receiving funds under this program makes publicly available, consistent with the dissemination requirements of the annual State report card under section 1111(h) of the ESEA, including on the website of the school, information to help parents make informed decisions about the education options available to their children, including—

(i) Information on the educational program;

(ii) Student support services;

(iii) Parent contract requirements (as applicable), including any financial obligations or fees;

(iv) Enrollment criteria (as applicable); and

(v) Annual performance and enrollment data for each of the subgroups of students, as defined in section 1111(c)(2) of the ESEA, except that such disaggregation of performance and enrollment data shall not be required in a case in which the number of students in a group is insufficient to yield statistically reliable information or the results would reveal personally identifiable information about an individual student. (Section 4303(f)(2)(G) of the ESEA)

(c) The eligible entity has sufficient procedures in effect to ensure timely closure of low-performing or financially mismanaged *charter schools* and clear plans and procedures in effect for the students in such schools to attend other high-quality schools. (Section 4305(b)(3)(C) of the ESEA)

Program Authority: Title IV, Part C of the ESEA, as amended.

Applicable Regulations: (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 76, 77, 79, 81, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended in 2 CFR part 3474. (d) The NFP.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: $90,000,000.

Estimated Range of Awards: $250,000–$15,000,000 per year.

Estimated Average Size of Awards: $2,000,000 per year.

Maximum Award: See *Reasonable and Necessary Costs* in section III.4.(a) for information regarding the maximum amount of funds that may be awarded per new school seat and per new school.

Estimated Number of Awards: 20–30.

Note: The Department is not bound by any estimates in this notice. The estimated range and average size of awards are based on a single 12-month budget period. We may use available funds to support multiple 12-month budget periods for one or more grantees.

Project Period: Up to 60 months.

III. Eligibility Information

1. *Eligible Applicants: CMOs.* Eligible applicants may apply individually or as part of a group or consortium.

2. *Cost Sharing or Matching:* This competition does not require cost sharing or matching.

3. *Subgrantees:* A grantee under this program may not award subgrants.

4. *Other:* (a) *Reasonable and Necessary Costs:* The Secretary may elect to impose maximum limits on the amount of grant funds that may be awarded per *charter school replicated,* per *charter school expanded,* or per new school seat created.

For this competition, the maximum limit of grant funds that may be awarded per new or expanded *charter school* is $1,500,000.

Note: Applicants must ensure that all costs included in the proposed budget are authorized under the CSP and are reasonable and necessary in light of the goals and objectives of the proposed project. Any costs determined by the Secretary to be unauthorized, or otherwise unreasonable or unnecessary, will be removed from the final approved budget.

(b) *Other CSP Grants:* A *charter school* that previously has received CSP funds for replication or expansion under this program, or for opening or preparing to operate a new *charter school,* replication, or expansion under the CSP Grants to State Entities (State Entities) program (CFDA number 84.282A) or CSP Grants to Developers for the Opening of New Charter Schools and for the Replication and Expansion of High-quality Charter Schools (Developers) program (CFDA numbers 84.282B and 84.282E), may not use funds under this grant to carry out the same activities. However, such *charter school* may be eligible to receive funds under this competition to *expand* the *charter school* beyond the existing grade levels or student count.

Likewise, a *charter school* that receives funds under this competition is ineligible to receive funds to carry out the same activities under the State Entities program (CFDA number 84.282A) or Developers program (CFDA numbers 84.282B and 84.282E), including for opening or preparing to operate a new *charter school,* replication, or expansion.

(c) *Costs for Evaluation:* Consistent with 34 CFR 75.590, CMO grant funds may be used to cover post-award costs associated with an evaluation described in response to Selection Criterion (c) in this notice, provided that such costs are reasonable and necessary to meet the objectives of the approved project.

IV. Application and Submission Information

1. *Application Submission Instructions:* For information on how to submit an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on February 12, 2018 (83 FR 6003) and available at *www.gpo.gov/fdsys/pkg/FR-2018-02-12/pdf/2018-02558.pdf.*

2. *Submission of Proprietary Information:* Given the types of projects that may be proposed in applications for the CMO grant competition, your application may include business information that you consider proprietary. In 34 CFR 5.11, we define ''business information'' and describe the process we use in determining whether any of that information is proprietary and, thus, protected from disclosure under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552, as amended).

Because we plan to make successful applications available to the public, you may wish to request confidentiality of business information.

Consistent with Executive Order 12600, please designate in your application any information that you believe is exempt from disclosure under Exemption 4. In the appropriate Appendix section of your application, under ''Other Attachments Form,'' please list the page number or numbers on which we can find this information. For additional information please see 34 CFR 5.11(c).

3. *Intergovernmental Review:* This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this competition.

4. *Funding Restrictions:* Grantees under this program must use the grant funds to *replicate* or *expand* the *charter school* model or models for which the applicant has presented evidence of success. Specifically, grant funds must be used to carry out allowable activities, as described in section 4305(b)(1) of the ESEA. In addition, grant funds must be used to carry out one or more of the activities described in section 4303(h), which include—

(a) Preparing teachers, school leaders, and specialized instructional support personnel, including through paying costs associated with—

(i) Providing professional development; and

(ii) Hiring and compensating, during the applicant's planning period

specified in the application for funds, one or more of the following:

(A) Teachers,

(B) School leaders, and

(C) Specialized instructional support personnel.

(b) Acquiring supplies, training, equipment (including technology), and educational materials (including developing and acquiring instructional materials).

(c) Carrying out necessary renovations to ensure that a new school building complies with applicable statutes and regulations, and minor facilities repairs (excluding construction).

(d) Providing one-time, startup costs associated with providing transportation to students to and from the *charter school.*

(e) Carrying out community engagement activities, which may include paying the cost of student and staff recruitment.

(f) Providing for other appropriate, non-sustained costs related to the replication or expansion of *high-quality charter schools* when such costs cannot be met from other sources.

Further, under section 4305(b)(1) of the ESEA, CMO grant funds must be used to open and prepare for the operation of one or more replicated *high-quality charter schools* or to expand one or more *high-quality charter schools.* Within the context of opening and preparing for the operation of one or more replicated *high-quality charter schools* or expanding one or more *high-quality charter schools,* a portion of grant funds can be used for appropriate, non-sustained costs associated with the expansion or improvement of the grantee's oversight or management of its *charter schools,* provided that (i) the specific *charter schools* being replicated or expanded under the grant are the intended beneficiaries of such expansion or improvement; (ii) such expansion or improvement is intended to improve the grantee's ability to manage or oversee the *charter schools* being replicated or expanded under the grant; and (iii) the costs cannot be met from other sources. In order to use grant funds for this purpose, an applicant should describe how the proposed costs are necessary to meet the objectives of the project and reasonable in light of the overall cost of the project.

We reference additional regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

5. *Recommended Page Limit:* The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative to no more than 60 pages and (2) use the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The recommended page limit does not apply to Part I, the cover sheet; Part II, the budget section, including the narrative budget justification; Part IV, the assurances and certifications; or the one-page abstract, the resumes, the bibliography, or the letters of support. However, the recommended page limit does apply to all of the application narrative.

V. Application Review Information

1. *Selection Criteria.* The selection criteria are from the NFP and 34 CFR 75.210. The source of each selection factor is included in parentheses following each factor. The maximum possible score for addressing all of the criteria in this section is 100 points. The maximum possible score for addressing each criterion is indicated in parentheses following the criterion.

In evaluating an application, the Secretary considers the following criteria:

(a) *Quality of the eligible applicant* (45 points).

In determining the quality of the eligible applicant, the Secretary considers the following factors:

(i) The extent to which the academic achievement results (including annual student performance on statewide assessments and annual student attendance and retention rates and, where applicable and available, student academic growth, high school graduation rates, college attendance rates, and college persistence rates) for *educationally disadvantaged students* served by the *charter schools* operated or managed by the applicant have exceeded the average academic achievement results for such students served by other public schools in the State (15 points). (NFP)

(ii) The extent to which one or more *charter schools* operated or managed by the applicant have closed; have had a charter revoked due to noncompliance with statutory or regulatory requirements; or have had their affiliation with the applicant revoked or terminated, including through voluntary disaffiliation (15 points). (NFP)

(iii) The extent to which one or more *charter schools* operated or managed by the applicant have had any significant issues in the area of financial or operational management or student safety, or have otherwise experienced significant problems with statutory or regulatory compliance that could lead to revocation of the school's charter (15 points). (NFP)

(b) Significance of *contribution in assisting educationally disadvantaged students* (30 points).

In determining the significance of the contribution the proposed project will make in expanding educational opportunities for *educationally disadvantaged students* and enabling those students to meet challenging State academic standards, the Secretary considers the following factors:

(i) The extent to which *charter schools* currently operated or managed by the applicant serve *educationally disadvantaged students,* particularly students with disabilities [4] and English learners, at rates comparable to surrounding public schools or, in the case of virtual *charter schools,* at rates comparable to public schools in the State (15 points). (NFP)

(ii) The quality of the plan to ensure that the *charter schools* the applicant proposes to *replicate* or *expand* will recruit, enroll, and effectively serve *educationally disadvantaged students,* particularly students with disabilities and English learners (15 points). (NFP)

(c) *Quality of the evaluation plan for the proposed project* (10 points)

In determining the quality of the evaluation plan for the proposed project, the Secretary considers the extent to which the methods of evaluation include the use of objective performance measures that are clearly related to the intended outcomes of the proposed project, as described in the applicant's *logic model,* and that will produce quantitative and qualitative data by the end of the grant period. (NFP)

(d) *Quality of the management plan and personnel* (15 points).

In determining the quality of the applicant's management plan, the

[4] For purposes of this competition, ''students with disabilities'' or ''student with a disability'' has the same meaning as ''children with disabilities'' or ''child with a disability,'' respectively, as defined in section 8101(4) of the ESEA (and this NIA). Under section 8101(4), ''child with a disability,'' has the same meaning given that term in section 602 of the IDEA.

Secretary considers the following factors:

(i) The ability of the applicant to sustain the operation of the replicated or expanded *charter schools* after the grant has ended, as demonstrated by the multi-year financial and operating model required under section 4305(b)(3)(B)(iii) of the ESEA (5 points). (NFP)

(ii) The adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks (5 points). (34 CFR 75.210(g)(2)(i))

(iii) The qualifications, including relevant training and experience, of key project personnel (5 points). (34 CFR 75.210(e)(3)(ii))

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications under any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

3. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.205, before awarding grants under this competition the Department conducts a review of the risks posed by applicants. Under 2 CFR 3474.10, the Secretary may impose specific conditions and, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $150,000), under 2 CFR 200.205(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management, or SAM. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all other Federal funds you receive exceed $10,000,000.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

(c) Under 34 CFR 75.250(b), the Secretary may provide a grantee with additional funding for data collection analysis and reporting. In this case the Secretary establishes a data collection period.

5. *Performance Measures:* (a) The Secretary has two performance indicators to measure progress towards achieving the purposes of the program, which are discussed elsewhere in this notice. The performance indicators are: (1) The number of *charter schools* in operation around the Nation and (2) the percentage of fourth- and eighth-grade *charter school* students who are achieving at or above the proficient level on State assessments in mathematics and reading/language arts. Additionally, the Secretary has established the following measure to examine the efficiency of the CSP: The Federal cost per student in implementing a successful school (defined as a school in operation for three or more consecutive years).

(b) *Project-Specific Performance Measures.* Applicants must propose project-specific *performance measures* and *performance targets* consistent with the objectives of the proposed project. Applications must provide the following information as directed under 34 CFR 75.110(b) and (c):

(1) *Performance measures.* How each proposed *performance measure* would accurately measure the performance of the project and how the proposed *performance measure* would be consistent with the *performance measures* established for the program funding the competition.

(2) *Baseline data.* (i) Why each proposed *baseline* is valid; or (ii) if the applicant has determined that there are no established *baseline* data for a particular *performance measure,* an explanation of why there is no established *baseline* and of how and when, during the project period, the applicant would establish a valid *baseline* for the *performance measure.*

(3) *Performance targets.* Why each proposed *performance target* is *ambitious* yet achievable compared to the *baseline* for the *performance measure* and when, during the project period, the applicant would meet the *performance target(s).*

(4) *Data collection and reporting.* (i) The data collection and reporting methods the applicant would use and why those methods are likely to yield reliable, valid, and meaningful performance data; and (ii) the applicant's capacity to collect and report reliable, valid, and meaningful performance data, as evidenced by high-quality data collection, analysis, and reporting in other projects or research.

All grantees must submit an annual performance report with information that is responsive to these *performance measures.*

6. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things, whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, the *performance targets* in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

7. *Project Director's Meeting:* Applicants approved for funding under this competition must attend a two-day meeting for project directors at a location to be determined in the continental United States during each year of the project. Applicants may include the cost of attending this meeting as an administrative cost in their proposed budgets.

VII. Other Information

Accessible Format: Individuals with disabilities can obtain this document and a copy of the application package in an accessible format (*e.g.,* braille, large print, audiotape, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of the Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: November 27, 2018.

James C. Blew,

Acting Assistant Deputy Secretary for Innovation and Improvement.

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of orders.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy gives notice that during October 2018, it

issued orders granting authority to import and export natural gas, to import and export liquefied natural gas (LNG), and vacating prior authorization. These orders are summarized in the attached appendix and may be found on the FE website at *https://www.energy.gov/fe/listing-doefe-authorizationsorders-issued-2018-0.*

They are also available for inspection and copying in the U.S. Department of Energy (FE–34), Division of Natural Gas Regulation, Office of Regulation, Analysis, and Engagement, Office of Fossil Energy, Docket Room 3E–033, Forrestal Building, 1000 Independence Avenue SW, Washington, DC 20585, (202) 586–9478. The Docket Room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on November 27, 2018.

Amy Sweeney,

Director, Division of Natural Gas Regulation.

APPENDIX—DOE/FE ORDERS GRANTING IMPORT/EXPORT AUTHORIZATIONS

4278	10/16/18	18–149–NG	MPower Energy LLC	Order 4278 granting blanket authority to import/export natural gas from/to Canada.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP19–310–000]

Arena Energy, LP, Castex Offshore, Inc., EnVen Energy Ventures, LLC, Fieldwood Energy LLC, Walter Oil & Gas Corporation, W&T Offshore, Inc. v. High Point Gas Transmission, LLC; Notice of Complaint

Take notice that on November 21, 2018, 2018, pursuant to Rule 206 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.206 (2018), Arena Energy LP, Castex Offshore, Inc., EnVen Energy Ventures, LLC, Fieldwood Energy LLC, W&T Offshore, Inc., and Walter Oil & Gas Corporation (Complainants) filed a complaint against High Point Gas Transmission, LLC (Respondent), alleging that Respondent failed to adequately respond to a request for transportation service, is in violation of the Commission's open-access transportation policies, the Commission's policies with respect to an interstate pipeline acquiring off-system capacity, and Respondent's

FERC Gas Tariff., all as more fully explained in the complaint.

The Complainants certify that a copy of the complaint was served on Respondent's corporate representatives designated on the Commission's Corporate Officials List.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions, or protests must be filed on or before the comment date. The Respondent's answer, motions to intervene, and protests must be served on the Complainants.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the website that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5:00 p.m. Eastern Time on December 11, 2018.

Dated: November 23, 2018.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP19–16–000]

Chattanooga Gas Company; Notice of Application

Take notice that on November 9, 2018, Chattanooga Gas Company (CGC), 2207 Olan Mills Drive, Chattanooga, TN 37421, filed in Docket No. CP19–16–000, an application pursuant to section 7(f) of the Natural Gas Act (NGA) and the Commission's regulations requesting a service area determination allowing CGC to expand or enlarge its facilities, without further authorization from the Commission. CGC requests a service area determination with respect to its entire Tennessee local distribution company (LDC) service area as well as a few small geographic areas in Georgia into which CGC's mainline and service lines extend. CGC also requests: (i) A finding that CGC qualifies as an LDC for the purposes of section 311 of the Natural Gas Policy Act of 1978 (NGPA); (ii) a waiver of the Commission's accounting and reporting requirements and other regulatory requirements ordinarily applicable to natural gas companies under the NGA and the NGPA; and (iii) such further relief as the Commission may deem appropriate, all as more fully described in the application which is on file with the Commission and open to public inspection. The filing may also be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (866) 208–3676 or TTY, (202) 502–8659.

Any questions regarding this application should be directed to Elizabeth Wade, Senior Counsel, AGL Resources Inc., Ten Peachtree Place NE, Atlanta, GA 30309, by telephone at (404) 584–3160 or by email at *ewade@southernco.com* or Daniel P. Archuleta, Troutman Sanders LLP, 401 Ninth Street NW, Suite 1000, Washington, DC 20004, by telephone at (202) 274–2926 or by email at *daniel.archuleta@troutman.com.*

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 3 copies of filings made in the proceeding with the Commission and must provide a copy to the applicant and to every other party. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list and will be notified of any meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission and will not have the right to seek court review of the Commission's final order.

As of the February 27, 2018 date of the Commission's order in Docket No. CP16–4–001, the Commission will apply its revised practice concerning out-of-time motions to intervene in any new Natural Gas Act section 3 or section 7 proceeding.[1] Persons desiring to become a party to a certificate proceeding are to intervene in a timely manner. If seeking to intervene out-of-time, the movant is required to ''show good cause why the time limitation should be waived,'' and should provide justification by reference to factors set forth in Rule 214(d)(1) (18 CFR 385.214(d)(1)) of the Commission's Rules and Regulations.

The Commission strongly encourages electronic filings of comments, protests, and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 3 copies of the protest or intervention to the Federal Energy regulatory Commission, 888 First Street NE, Washington, DC 20426.

Comment Date: 5:00 p.m. Eastern time on December 14, 2018.

Dated: November 23, 2018.

Federal Energy Regulatory Commission

[Project No. 4202–024]

KEI (Maine) Power Management (II) LLC; Notice of Intent To File License Application, Filing of Pre-Application Document, and Approving Use of the Traditional Licensing Process

a. *Type of Filing:* Notice of Intent to File License Application and Request to Use the Traditional Licensing Process.

b. *Project No.:* 4202–024.

c. *Date Filed:* September 26, 2018.

d. *Submitted By:* KEI (Maine) Power Management (II) LLC (KEI Power).

e. *Name of Project:* Lowell Tannery Hydroelectric Project.

f. *Location:* On the Passadumkeag River, in Penobscot County, Maine. No federal lands are occupied by the project works or located within the project boundary.

g. *Filed Pursuant to:* 18 CFR 5.3 and 5.5 of the Commission's regulations.

h. Potential *Applicant Contact:* Lewis C. Loon, KEI (USA) Power Management Inc., 423 Brunswick Avenue, Gardiner, Maine 04345; (207) 203–3027; email—*Lewis.Loon@kruger.com.*

i. *FERC Contact:* Dr. Nicholas Palso at (202) 502–8854; or email at *nicholas.palso@ferc.gov.*

j. KEI Power filed its request to use the Traditional Licensing Process on September 26, 2018. KEI Power provided public notice of its request on September 24, 2018. In a letter dated November 23, 2018, the Director of the Division of Hydropower Licensing approved KEI Power's request to use the Traditional Licensing Process.

k. With this notice, we are initiating informal consultation with the U.S. Fish and Wildlife Service and/or NOAA Fisheries under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR part 402; and NOAA Fisheries under section 305(b) of the Magnuson-Stevens Fishery Conservation and Management Act and implementing regulations at 50 CFR 600.920. We are also initiating consultation with the Maine State Historic Preservation Officer, as required by section 106 of the National Historic Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

l. With this notice, we are designating KEI Power as the Commission's non-federal representative for carrying out informal consultation pursuant to section 7 of the Endangered Species Act and section 305(b) of the Magnuson-Stevens Fishery Conservation and Management Act; and consultation pursuant to section 106 of the National Historic Preservation Act.

m. KEI Power filed a Pre-Application Document (PAD; including a proposed process plan and schedule) with the Commission, pursuant to 18 CFR 5.6 of the Commission's regulations.

n. A copy of the PAD is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's website (*http://www.ferc.gov*), using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). A copy is also available for inspection and reproduction at the address in paragraph h.

o. The licensee states its unequivocal intent to submit an application for a subsequent license for Project No. 4202. Pursuant to 18 CFR 16.20, each application for a subsequent license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by September 30, 2021.

p. Register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

Dated: November 23, 2018.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP19–15–000]

Atlanta Gas Light Company; Notice of Application

Take notice that on November 9, 2018, Atlanta Gas Light Company (AGL), Ten Peachtree Place NE, Atlanta, GA 30309, filed in Docket No. CP19–15–000, an application pursuant to section 7(f) of the Natural Gas Act (NGA) and the Commission's regulations requesting a service area determination allowing AGL to expand or enlarge its facilities, without further authorization from the Commission. AGL requests a service area determination with respect to its entire Georgia local distribution company (LDC) service area as well as a few small geographic areas in Tennessee into which AGL's mainline and service lines extend. AGL also requests: (i) A finding that AGL qualifies as an LDC for the purposes of section 311 of the Natural Gas Policy Act of 1978 (NGPA); (ii) a waiver of the Commission's accounting and reporting requirements and other regulatory requirements ordinarily applicable to natural gas companies under the NGA and the NGPA; and (iii) such further relief as the Commission may deem appropriate, all as more fully described in the application which is on file with the Commission and open to public inspection. The filing may also be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (866) 208–3676 or TTY, (202) 502–8659.

Any questions regarding this application should be directed to Elizabeth Wade, Senior Counsel, AGL Resources Inc., Ten Peachtree Place NE, Atlanta, GA 30309, by telephone at (404) 584–3160 or by email at *ewade@southernco.com* or Daniel P. Archuleta, Troutman Sanders LLP, 401 Ninth Street NW, Suite 1000, Washington, DC 20004, by telephone at (202) 274–2926 or by email at *daniel.archuleta@troutman.com.*

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to

obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 3 copies of filings made in the proceeding with the Commission and must provide a copy to the applicant and to every other party. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list and will be notified of any meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission and will not have the right to seek court review of the Commission's final order.

As of the February 27, 2018 date of the Commission's order in Docket No. CP16–4–001, the Commission will apply its revised practice concerning out-of-time motions to intervene in any new Natural Gas Act section 3 or section 7 proceeding.[1] Persons desiring to become a party to a certificate proceeding are to intervene in a timely manner. If seeking to intervene out-of-time, the movant is required to ''show good cause why the time limitation should be waived,'' and should provide justification by reference to factors set forth in Rule 214(d)(1) (18 CFR 385.214(d)(1)) of the Commission's Rules and Regulations.

The Commission strongly encourages electronic filings of comments, protests, and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 3 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

Comment Date: 5:00 p.m. Eastern Time on December 14, 2018.

Dated: November 23, 2018.

Kimberly D. Bose,

Secretary.

[FR Doc. 2018–25984 Filed 11–29–18; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP19–17–000]

Notice of Amendment: Midship Pipeline Company, LLC

Take notice that on November 14, 2018, Midship Pipeline Company, LLC (Midship), 700 Milam Street, Suite 1900, Houston, Texas 77002, filed an application pursuant to section 7(c) of the Natural Gas Act and Parts 157 and 284 of the Commission's regulations requesting authorization to amend its Certificate of Public Convenience and Necessity issued on August 13, 2018, in Docket No. CP17–458–000 [1] in order to allow for a minor re-route on its Midcontinent Supply Header Interstate Pipeline Project (MIDSHIP Project). Specifically, Midship requests an estimated 0.8-mile pipeline reroute in Bryan County, Oklahoma, located approximately 400-feet southwest of the certificated pipeline route to avoid a sensitive feature and mitigate stakeholder concerns. Midship states that the proposed route modification would not result in any changes to the estimated project costs of the MIDSHIP Project and that no shippers would be adversely affected, all as more fully set forth in the application, which is on file with the Commission and open to public inspection.

The filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's website web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Any questions regarding the proposed amendment should be directed to Karri Mahmoud, Director, Regulatory Project Development, 700 Milam Street, Suite 1900, Houston, Texas 77002, by telephone at (713) 375–5000, or by email at *karri.mahmoud@cheniere.com.*

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice, the Commission staff will either: Complete its environmental analysis (EA) and place it into the Commission's public record (eLibrary) for this proceeding, or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 3 copies of filings made with the Commission and must provide a copy to the applicant and to every other party in

[1] *Tennessee Gas Pipeline Company, L.L.C.,* 162 FERC ¶ 61,167 at P 50 (2018).

[1] *Midship Pipeline Company, LLC,* 164 FERC ¶ 61,103 (2018).

the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list and will be notified of any meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission and will not have the right to seek court review of the Commission's final order.

As of the February 27, 2018 date of the Commission's order in Docket No. CP16–4–001, the Commission will apply its revised practice concerning out-of-time motions to intervene in any new Natural Gas Act section 3 or section 7 proceeding.[2] Persons desiring to become a party to a certificate proceeding are to intervene in a timely manner. If seeking to intervene out-of-time, the movant is required to ''show good cause why the time limitation should be waived,'' and should provide justification by reference to factors set forth in Rule 214(d)(1) of the Commission's Rules and Regulations.[3]

The Commission strongly encourages electronic filings of comments, protests, and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 3 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

Comment Date: 5:00 p.m. Eastern Time on December 14, 2018.

Dated: November 23, 2018.

[3] 18 CFR 385.214(d)(1).

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP19–17–000]

Midship Pipeline Company, LLC; Notice of Intent To Prepare an Environmental Assessment for a Proposed Amendment of the Midcontinent Supply Header Interstate Pipeline Project and Request for Comments on Environmental Issues

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of a proposed amendment (0.8-mile reroute) of Midship Pipeline Company, LLC's (Midship Pipeline) Midcontinent Supply Header Interstate Pipeline Project (MIDSHIP Project) in Bryan County, Oklahoma.[1] The Commission will use this EA in its decision-making process to determine whether the amendment is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies about issues regarding the amendment/reroute. The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from its action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires the Commission to discover concerns the public may have about proposals. This process is referred to as ''scoping.'' The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this notice, the Commission requests public comments on the scope of the issues to address in the EA. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on December 24, 2018.

You can make a difference by submitting your specific comments or concerns about the reroute. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues they need to evaluate in the EA. Commission staff will consider all filed comments during the preparation of the EA.

If you sent comments on this project to the Commission before the opening of this docket on November 14, 2018, you will need to file those comments in Docket No. CP19–17–000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission's current environmental mailing list for this amendment. State and local government representatives should notify their constituents of this proposed amendment and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable easement agreement. You are not required to enter into an agreement. However, if the Commission approves the amendment, that approval conveys with it the right of eminent domain. Therefore, if you and the company do not reach an easement agreement, the pipeline company could initiate condemnation proceedings in court. In such instances, compensation would be determined by a judge in accordance with state law.

Midship Pipeline provided landowners with a fact sheet prepared by FERC entitled ''An Interstate Natural Gas Facility On My Land? What Do I Need To Know?'' This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is also available for viewing on the FERC website (*www.ferc.gov*) at *https://www.ferc.gov/resources/guides/gas/gas.pdf.*

Public Participation

The Commission offers a free service called eSubscription which makes it easy to stay informed of all issuances and submittals regarding the dockets/projects to which you subscribe. These instant email notifications are the fastest

[1] On August 13, 2018, the Commission issued a Certificate of Public Convenience and Necessity for the 234.1-mile-long MIDSHIP Project under Docket No. CP17–458–000.

way to receive notification and provide a link to the document files which can reduce the amount of time you spend researching proceedings. To sign up go to *www.ferc.gov/docs-filing/esubscription.asp.*

For your convenience, there are three methods you can use to submit your comments to the Commission. The Commission encourages electronic filing of comments and has staff available to assist you at (866) 208–3676 or *FercOnlineSupport@ferc.gov.* Please carefully follow these instructions so that your comments are properly recorded.

(1) You can file your comments electronically using the *eComment* feature, which is located on the Commission's website (*www.ferc.gov*) under the link to *Documents and Filings.* Using eComment is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the *eFiling* feature, which is located on the Commission's website (*www.ferc.gov*) under the link to *Documents and Filings.* With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''*eRegister.*'' You will be asked to select the type of filing you are making; a comment on a particular project is considered a ''Comment on a Filing''; or

(3) You can file a paper copy of your comments by mailing them to the following address. Be sure to reference the project docket number (CP19–17–000) with your submission: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426.

Summary of the Proposed Project

Midship Pipeline proposes a 0.8-mile reroute between mileposts 195.2 to 195.9 of the MIDSHIP Project in Bryan County, Oklahoma. This reroute would shift the pipeline about 400 feet west and south of the certificated pipeline route. The general location of the reroute is shown in appendix 1.[2]

Land Requirements for Construction

Construction of the proposed reroute would disturb about 12.5 acres of land. Following construction, Midship Pipeline would maintain about 5.3 acres for permanent operation of the project; the remaining acreage would be restored and revert to former uses. This represents an increase from the certificated route of about 1.2 acres during construction and 0.5 acre during operation.

The EA Process

The EA will discuss impacts that could occur as a result of the proposed amendment under these general headings:

- Geology and soils;
- water resources and wetlands;
- vegetation and wildlife;
- threatened and endangered species;
- cultural resources;
- land use;
- air quality and noise;
- public safety; and
- cumulative impacts.

Commission staff will also evaluate reasonable alternatives to the proposed amendment, and make recommendations on how to lessen or avoid impacts on the various resource areas as applicable.

The EA will present Commission staffs' independent analysis of the issues. The EA will be available in electronic format in the public record through eLibrary [3] and the Commission's website (*https://www.ferc.gov/industries/gas/enviro/eis.asp*). If eSubscribed, you will receive instant email notification when the EA is issued. The EA may be issued for an allotted public comment period. Commission staff will consider all comments on the EA before making recommendations to the Commission. To ensure Commission staff have the opportunity to address your comments, please carefully follow the instructions in the Public Participation section, beginning on page 2.

With this notice, the Commission is asking agencies with jurisdiction by law and/or special expertise with respect to the environmental issues of this project to formally cooperate in the preparation of the EA.[4] Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the Public Participation section of this notice.

Consultation Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation's implementing regulations for section 106 of the National Historic Preservation Act, the Commission is using this notice to initiate consultation with the applicable State Historic Preservation Office (SHPO), and to solicit their views and those of other government agencies, interested Indian tribes, and the public on the project's potential effects on historic properties.[5] Commission staff will define the project-specific Area of Potential Effects (APE) in consultation with the SHPO as the project develops. On natural gas facility projects, the APE at a minimum encompasses all areas subject to ground disturbance (examples include construction right-of-way, contractor/pipe storage yards, compressor stations, and access roads). The EA for this project will document findings on the impacts on historic properties and summarize the status of consultations under section 106.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, and anyone who submits comments on the project. Commission staff will update the environmental mailing list as the analysis proceeds to ensure that Commission notices related to this environmental review are sent to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed amendment.

If the Commission issues the EA for an allotted public comment period, a *Notice of Availability* of the EA will be sent to the environmental mailing list and will provide instructions to access the electronic document on the FERC's website (*www.ferc.gov*). If you need to make changes to your name/address, or if you would like to remove your name from the mailing list, please return the attached ''Mailing List Update Form'' (appendix 2).

[2] The appendices referenced in this notice will not appear in the **Federal Register**. Copies of appendices were sent to all those receiving this notice in the mail and are available at *www.ferc.gov* using the link called ''eLibrary'' or from the Commission's Public Reference Room, 888 First Street NE, Washington, DC 20426, or call (202) 502–8371. For instructions on connecting to eLibrary, refer to the last page of this notice.

[3] For instructions on connecting to eLibrary, refer to page 5 of this notice.

[4] The Council on Environmental Quality regulations addressing cooperating agency responsibilities are at Title 40, Code of Federal Regulations, Part 1501.6.

[5] The Advisory Council on Historic Preservation's regulations are at Title 36, Code of Federal Regulations, Part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places.

Additional Information

Additional information about the amendment/reroute is available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website at *www.ferc.gov* using the eLibrary link. Click on the eLibrary link, click on ''General Search'' and enter the docket number in the ''Docket Number'' field, excluding the last three digits (*i.e.,* CP19–17). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at *FercOnlineSupport@ferc.gov* or (866) 208–3676, or for TTY, contact (202) 502–8659. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

Dated: November 23, 2018.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OECA–2014–0097 FRL–9986–26–OEI]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Plating and Polishing Area Sources (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Plating and Polishing Area Sources (EPA ICR Number 2294.05, OMB Control Number 2060–0623), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2018. Public comments were previously requested, via the **Federal Register**, on June 29, 2017 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before December 31, 2018.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OECA–2014–0097 to: (1) EPA online using *www.regulations.gov* (our preferred method), or by email to *docket.oeca@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460; and (2) OMB via email to *oira_submission@omb.eop.gov.* Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564–2970; fax number: (202) 564–0050; email address: *yellin.patrick@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov,* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit: *http://www.epa.gov/dockets.*

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Plating and Polishing Area Sources (40 CFR part 63, subpart WWWWWW) apply to both existing and new plating and polishing facilities that are an area source of hazardous air pollutant (HAP) emissions and that use one or more of the following metal HAP: Cadmium, chromium, lead manganese, or nickel (hereafter referred to as the plating and polishing metal HAP). A plating and polishing facility is a plant site that is engaged in any of the following processes: Non-chromium electroplating; electroless or non-electrolytic plating; other non-electrolytic metal coating processes such as chromate conversion coating, nickel acetate sealing, sodium dichromate sealing, and manganese phosphate coating, and thermal spraying; dry mechanical polishing of finished metals and formed products after plating or thermal spraying; electroforming; and electro-polishing. New facilities include those that commenced construction, modification, or reconstruction after the date of proposal. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 63, subpart WWWWWW.

Form Numbers: None.

Respondents/affected entities: Plating and polishing area source facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart WWWWWW).

Estimated number of respondents: 2,900 (total).

Frequency of response: Initially and annually.

Total estimated burden: 67,700 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $7,410,000 (per year), which includes no annualized capital/startup or operation & maintenance costs.

Changes in the estimates: There is an increase in the total estimated burden and number of responses from the most-recently approved ICR due to several adjustments. First, burden hours were added to allow each facility to refamiliarize themselves with the regulatory requirements each year. Second, the number of sources that complete but do not submit annual compliance certifications was left out of the response count in the previous renewal and this has been corrected.

There is a decrease in the annualized capital or operation & maintenance costs since the previous renewal due to an adjustment. There are no ongoing monitoring requirements in the rule and no new sources are expected to incur capital/startup costs. Therefore, the capital/startup costs were reduced to zero since those costs have already been incurred when the existing sources became subject to the rule.

Courtney Kerwin,

Director, Regulatory Support Division.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPPT–2018–0604; FRL–9983–08]

TSCA Science Advisory Committee on Chemicals (SACC); Notice of Public Meetings

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the peer review of the draft Risk Evaluation for Colour Index (C.I.) Pigment Violet 29 (PV29) and associated documents developed under EPA's existing chemical substance process under the Toxic Substances Control Act (TSCA). The peer review panel deliberations will be conducted during a 4-day, in-person, public meeting of the TSCA Science Advisory Committee on Chemicals (SACC). This in-person meeting will also include a general TSCA orientation for the TSCA SACC. A portion of the in-person meeting will be closed to the public for the committee's discussion of information claimed as confidential business information (CBI). Prior to the in-person meeting, there will be a public, 2-hour preparatory virtual meeting to consider the scope and clarity of the draft charge questions for this peer review. During these upcoming meetings, the public is invited to provide oral comments for the peer review on the draft risk evaluation for PV29 and related documents. Comments on the draft charge questions will be accepted prior to and during the 2-hour preparatory virtual meeting. The TSCA SACC peer review panel will consider these comments during their discussions.

DATES:

Meetings: The preparatory virtual meeting will be held on January 8, 2019, from 2 p.m. to approximately 4 p.m. (EST). The 4-day in-person meeting will be held from 1 p.m. (EST) to approximately 5:30 p.m. on January 29, 2019 and from 9 a.m. to approximately 5:30 p.m. on January 30, 31, and February 1, 2019.

Oral comments: Requests to make oral comments during the preparatory virtual meeting should be submitted on or before 12:00 p.m. (EST) on January 4, 2019. In order to be included on the meeting agenda, requests to make oral comments during the in-person 4-day peer review meeting should be submitted on or before January 14, 2019. Otherwise, requests to present oral comments during the in-person 4-day peer review meeting will be accepted until and possibly during the in-person meeting. Direct your requests to make oral comments to the Designated Federal Officer (DFO) listed under **FOR FURTHER INFORMATION CONTACT**.

For additional instructions, see Unit I.C. and Unit I.D. of the **SUPPLEMENTARY INFORMATION**.

Written comments: Written comments on the scope and clarity of the draft charge questions for the preparatory virtual meeting should be submitted on or before January 7, 2019. Written comments on the draft risk evaluation that are submitted on or before January 14, 2019 (see 83 FR 57473, November 15, 2018) (FRL–9986–45) will be provided to the peer review panel members before the meeting. You may also submit written comments on the first date of the in-person 4-day peer review meeting by providing 30 copies of your written comments to the DFO at the start of the meeting for the DFO to distribute to the panel members. The TSCA SACC will consider written comments during their discussions.

Special accommodations: For information on access or services for individuals with disabilities, and to request accommodation of a disability, please contact the DFO listed under **FOR FURTHER INFORMATION CONTACT** at least 10 days prior to the meeting to give EPA as much time as possible to process your request.

ADDRESSES:

Preparatory Virtual Meeting: The January 8, 2019 preparatory virtual meeting is open to the public and will be conducted via webcast using Adobe Connect and telephone. Registration is required to participate by listening or presenting oral comments during the preparatory virtual meeting. Please visit *https://www.epa.gov/tsca-peer-review* website for additional information including how to register.

In-Person Meeting: The location of the January 29 to February 1, 2019 in-person meeting will be announced on the TSCA SACC website (*https://www.epa.gov/tsca-peer-review*) by mid-December 2018. The January 29 to February 1, 2019 in-person meeting may also be webcast. Please refer to the TSCA SACC website at *https://www.epa.gov/tsca-peer-review* for information on how to access the webcast. Please note that for the in-person meeting, the webcast is a supplementary public process provided only for convenience. If difficulties arise resulting in webcasting outages, the in-person meeting will continue as planned.

Comments for the peer review: Submit your written comments for the peer review, identified by docket identification (ID) number EPA–HQ–OPPT–2018–0604, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* OPPT Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

Requests to present oral comments, and requests for special accommodations. Submit requests to present oral comments or for special accommodations, to the DFO listed under **FOR FURTHER INFORMATION CONTACT**.

FOR FURTHER INFORMATION CONTACT: Dr. Todd Peterson, DFO, Office of Science Coordination and Policy (7201M), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 564–6428; email address: *peterson.todd@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general. This action may be of interest to persons who are interested in risk evaluations of chemical substances under the Toxic Substances Control Act (TSCA). Since other entities may also be interested in this risk evaluation, the Agency has not attempted to describe all the specific entities that may be affected by this action.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit CBI information to EPA through *regulations.gov* or via email. If your comments contain any information that you consider to be CBI or otherwise protected, please contact the DFO listed under **FOR FURTHER INFORMATION CONTACT** to obtain special instructions before submitting your comments.

2. *Tips for preparing your comments.* When preparing and submitting your

comments, see the commenting tips at *http://www.epa.gov/dockets/comments.html.*

C. How may I participate in the preparatory virtual meeting?

1. Register. Registration for the January 8, 2019, preparatory virtual meeting is required. To participate by listening or making oral comments during this meeting please visit *https://www.epa.gov/tsca-peer-review* to register. Registration online will be confirmed by email that will include the webcast meeting Adobe Connect link and audio teleconference information.

2. Submit written comments. Written comments for the preparatory virtual meeting should be submitted, using the instructions in **ADDRESSES** and Unit I.B., on or before January 7, 2019. Written comments should focus on the scope and clarity of the draft charge questions and the TSCA SACC will consider those comments during their discussions.

3. Provide oral comments. To provide oral comments at the virtual meeting, please follow the applicable instructions to register on or before 12:00 p.m. (EST) on January 4, 2019. Oral comments to the TSCA SACC panel during the preparatory virtual meeting are limited to approximately 5 minutes due to the time limit of this meeting. Oral comments should focus on the scope and clarity of the draft charge questions and the panel will consider those comments during their discussions.

4. Participate in the virtual meeting. Follow the instructions in Unit I.C.1. to register for the January 8, 2019 preparatory meeting. Your confirmation will include the webcast meeting Adobe Connect link and audio teleconference information.

D. How may I participate in the in-person meeting?

You may participate in the in-person peer review meeting by following the instructions in this unit. To ensure proper receipt by EPA, it is imperative that you identify docket ID number EPA–HQ–OPPT–2018–0604 in the subject line on the first page of your request.

1. *Provide oral comments for the peer review.* The Agency encourages each individual or group wishing to make brief oral comments to the TSCA SACC during the in-person meeting to submit their request to the DFO listed under **FOR FURTHER INFORMATION CONTACT** on or before January 14, 2019, in order to be included on the meeting agenda. Requests to present oral comments for the peer review will be accepted until the date of the in-person meeting and, to the extent that time permits, the Chair of the TSCA SACC may permit the presentation of oral comments at the in-person meeting by interested persons who have not previously requested time.

Requests to make oral comments at the in-person meeting should identify the name of the individual making the presentation, the organization (if any) the individual will represent, and any requirements for audiovisual equipment. Oral comments before the TSCA SACC during the in-person meeting are limited to approximately 5 minutes unless prior arrangements have been made. In addition, each speaker should bring 30 copies of the comments and presentation for the DFO to distribute to the TSCA SACC at the meeting. The TSCA SACC will consider oral comments during their discussions.

2. *Provide written comments.* Follow the instructions in **ADDRESSES** and Unit I.B., to provide written comments on the draft risk evaluation.

3. *Attend the meeting.* Seating at the meeting will be open and on a first-come basis.

II. Background

A. Purpose of the TSCA SACC

The Science Advisory Committee on Chemicals (SACC) was established by EPA in 2016 under the authority of the Frank R. Lautenberg Chemical Safety for the 21st Century Act, Public Law 114–182, 140 Stat. 448 (2016), and operates in accordance with the Federal Advisory Committee Act (FACA), 5 U.S.C. App. 2. The SACC supports activities under the Toxic Substances Control Act (TSCA), 15 U.S.C. 2601 *et seq.,* the Pollution Prevention Act (PPA), 42 U.S.C. 13101 *et seq.,* and other applicable statutes. The SACC provides expert independent scientific advice and recommendations to the EPA on the scientific and technical aspects of risk assessments, methodologies, and pollution prevention measures and approaches for chemicals regulated under TSCA.

The SACC is comprised of experts in: Toxicology; human health and environmental risk assessment; exposure assessment; and related sciences (*e.g.,* synthetic biology, pharmacology, biotechnology, nanotechnology, biochemistry, biostatistics, PBPK modeling, computational toxicology, epidemiology, environmental fate, and environmental engineering and sustainability). The SACC currently consists of 26 members. When needed, the committee will be assisted in their reviews by ad hoc participants with specific expertise in the topics under consideration.

B. In-Person Meeting

The focus of the TSCA SACC in-person meeting is to peer review the Agency's draft risk evaluation of C.I. Pigment Violet 29, which was developed under EPA's existing chemical substance process. C.I. Pigment Violet 29 is an organic pigment that has a low solubility, low volatility, is expected to be highly persistent, and has low bioaccumulation potential in fish and other animals. The pigment is utilized as an intermediate to create or adjust the color of other pigments, as well as in commercial paints, coatings, plastics, and rubber products.

Under TSCA, the purpose of the risk evaluation is to determine whether a chemical substance presents an unreasonable risk to health or the environment under the conditions of use, including an unreasonable risk to a relevant potentially exposed or susceptible subpopulation. EPA released the draft risk evaluation for C.I. Pigment Violet 29 for public review and comment on November 15, 2018 (83 FR 57473; FRL–9986–45), and is submitting the same materials to the TSCA SACC for peer review.

After the peer review process, EPA will consider reviewer comments and recommendations, and public comments, to finalize the risk evaluation.

Approximately one hour of the TSCA SACC's in-person meeting will be closed to the public for the TSCA SACC to consider and discuss material that has been claimed as CBI and provided to the Committee as background for the draft risk evaluation for PV29. In accordance with FACA section 10(d), and section (c)(4) of the Government in the Sunshine Act, 5 U.S.C. 552b, this approximately one-hour session of the TSCA SACC will be closed to the public to avoid the potential disclosure of CBI, which is protected from disclosure by statute. See the Administrator's determination for a closed meeting available in the docket identified by Docket ID No. EPA–HQ–OPPT–2018–0604 at *http://www.regulations.gov.*

C. TSCA SACC Documents and Meeting Minutes

EPA's background paper, related supporting materials, and draft charge/questions to the TSCA SACC are available on the TSCA SACC website and in docket. In addition, the Agency will provide additional background documents (*e.g.,* a list of the SACC Members participating in this meeting and the meeting agenda) as those

materials become available. You may obtain electronic copies of these documents, and certain other related documents that might be available at *http://www.regulations.gov* and the TSCA SACC website at *https://www.epa.gov/tsca-peer-review.*

TSCA SACC will prepare meeting minutes and final report summarizing its recommendations to the Agency no later than 90 days after the meeting. The meeting minutes and final report will be posted on the TSCA SACC website and in the docket.

Authority: 15 U.S.C. 2625(o) *et seq.;* 5 U.S.C. Appendix 2 *et seq.*

Dated: November 21, 2018.

Stanley Barone, Jr.,

Acting Director, Office of Science Coordination and Policy.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OECA–2013–0352; FRL–9984–08–OEI]

Information Collection Request Submitted To OMB for Review and Approval; Comment Request; NESHAP for Industrial, Commercial, and Institutional Boilers and Process Heaters (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Industrial, Commercial, and Institutional Boilers and Process Heaters (EPA ICR No. 2028.09, OMB Control No. 2060–0551), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2018. Public comments were previously requested, via the **Federal Register**, on June 29, 2017, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before December 31, 2018.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OECA–2014–0078, to: (1) EPA online using *www.regulations.gov* (our preferred method), or by email to *docket.oeca@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460; and (2) OMB via email to *oira_submission@omb.eop.gov.* Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564–2970; fax number: (202) 564–0050; email address: *yellin.patrick@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed either online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit: *http://www.epa.gov/dockets.*

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Industrial, Commercial, and Institutional Boilers and Process Heaters apply to existing and new industrial, commercial, and institutional boilers and process heaters located at major sources of HAP. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 63, DDDDD.

Form Numbers: None.

Respondents/affected entities: Industrial, commercial, and institutional boilers and process heaters.

Respondent's obligation to respond: Mandatory (40 CFR 63, subpart DDDDD).

Estimated number of respondents: 2,012 (total).

Frequency of response: Initially, semi-annually, annually, biennially, and every five years.

Total estimated burden: 597,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $196,000,000 (per year), which includes $131,000,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in burden and cost estimates occurred because there is continued growth for certain subcategories of equipment subject to the standard. In addition, the standards have been in effect for more than three years and the requirements are different during initial compliance (new facilities) as compared to on-going compliance (existing facilities). The previous ICR reflected those burdens and costs associated with the initial activities for subject facilities and provided for the timeframe for existing facilities to come into compliance prior to January 31, 2016. This included purchasing monitoring equipment, conducting initial performance tests, and establishing recordkeeping systems. This ICR reflects the on-going burden and costs for existing facilities. Activities for existing sources include annual testing, continuous monitoring of pollutants, and the submission of semiannual, biennial, or five-year reports, as determined for each subcategory.

There is an adjustment decrease in the number of responses as compared with the previous ICR. This decrease is a result of removing some of the one-time response requirements for existing sources that have already met the initial compliance requirements. There is an overall increase in the total capital/startup and annual operation and maintenance costs compared with the previous ICR. These changes assume all existing sources have met the initial requirements of the rule. In addition, there are a small number of new

facilities that are in the initial compliance phase described above.

Courtney Kerwin,

Director, Regulatory Support Division.

Registration Review; Draft Human Health and/or Ecological Risk Assessments for Several Pesticides; Notice of Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of EPA's draft human health and ecological risk assessments for the registration review of amitraz, bispyribac-sodium, bromoxynil, captan, chloropicrin, dazomet, diclosulam, florasulam, flucarbazone-sodium, fluroxypyr, formetanate, imazalil, imazamox, imazapic, imazaquin, imazethapyr, MCPA, metam sodium, metam potassium, methyl isothiocyanate (MITC), o-benzyl-p-chlorophenol, starlicide, tri-n butyl tetradecyl phosphonium chloride (TTPC), triphenyltin hydroxide (TPTH), and zinc salts. This notice also announces the availability of EPA's draft human health risk assessments for the registration review of *para*-dichlorobenzene and penoxsulam.

DATES: Comments must be received on or before January 29, 2019.

ADDRESSES: Submit your comments, to the docket identification (ID) number for the specific pesticide of interest provided in the Table in Unit IV, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, are available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT:

For pesticide specific information contact: The Chemical Review Manager for the pesticide of interest identified in the Table in Unit IV.

For general questions on the registration review program, contact: Dana Friedman, Pesticide Re-Evaluation Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (703) 347–8827; email address: *friedman.dana@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, farm worker, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the Chemical Review Manager identified in the Table in Unit IV.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through *regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at

http://www.epa.gov/dockets/comments.html.

3. *Environmental justice.* EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticides discussed in this document, compared to the general population.

II. Background

Registration review is EPA's periodic review of pesticide registrations to ensure that each pesticide continues to satisfy the statutory standard for registration, that is, the pesticide can perform its intended function without unreasonable adverse effects on human health or the environment. As part of the registration review process, the Agency has completed comprehensive draft human health and/or ecological risk assessments for all pesticides listed in the Table in Unit IV. After reviewing comments received during the public comment period, EPA may issue a revised risk assessment, explain any changes to the draft risk assessment, and respond to comments and may request public input on risk mitigation before completing a proposed registration review decision for the pesticides listed in the Table in Unit IV. Through this program, EPA is ensuring that each pesticide's registration is based on current scientific and other knowledge, including its effects on human health and the environment.

III. Authority

EPA is conducting its registration review of the chemicals listed in the Table in Unit IV pursuant to section 3(g) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Procedural Regulations for Registration Review at 40 CFR part 155, subpart C. Section 3(g) of FIFRA provides, among other things, that the registrations of pesticides are to be reviewed every 15 years. Under FIFRA, a pesticide product may be registered or remain registered only if it meets the statutory standard for registration given in FIFRA section 3(c)(5) (7 U.S.C. 136a(c)(5)). When used in accordance with widespread and commonly recognized practice, the pesticide product must perform its intended function without unreasonable adverse effects on the environment; that is, without any unreasonable risk to man or the environment, or a human dietary risk from residues that result from the use of a pesticide in or on food.

IV. What action is the Agency taking?

Pursuant to 40 CFR 155.58, this notice announces the availability of EPA's human health and/or ecological risk assessments for the pesticides shown in the following table, and opens a 60-day public comment period on the risk assessments.

TABLE—DRAFT RISK ASSESSMENTS BEING MADE AVAILABLE FOR PUBLIC COMMENT

Registration review case name and No.	Docket ID No.	Chemical review manager and contact information
Amitraz, Case 0234	EPA–HQ–OPP–2009–1015	Veronica Dutch, *dutch.veronica@epa.gov*, 703–308–8585.
Bispyribac-sodium, Case 7258	EPA–HQ–OPP–2014–0074	Moana Appleyard, *appleyard.moana@epa.gov*, 703–308–8175.
Bromoxynil, Case 2070	EPA–HQ–OPP–2012–0896	Michelle Nolan, *nolan.michelle@epa.gov*, 703–347–0258.
Captan, Case 0120	EPA–HQ–OPP–2013–0296	Christina Scheltema, *scheltema.christina@epa.gov*, 703–308–2201.
Chloropicrin, Case 0040	EPA–HQ–OPP–2013–0153	Lauren Bailey, *bailey.lauren@epa.gov*, 703–347–0374.
Dazomet, Case 2135	EPA–HQ–OPP–2013–0080	Katherine St. Clair, *stclair.katherine@epa.gov*, 703–347–8778.
Diclosulam, Case 7249	EPA–HQ–OPP–2015–0285	Susan Bartow, *bartow.susan@epa.gov*, 703–603–0065.
Florasulam, Case 7274	EPA–HQ–OPP–2015–0548	Moana Appleyard, *appleyard.moana@epa.gov*, 703–308–8175.
Flucarbazone-sodium, Case 7251	EPA–HQ–OPP–2013–0283	Veronica Dutch, *dutch.veronica@epa.gov*, 703–308–8585.
Fluroxypyr, Case 7248	EPA–HQ–OPP–2014–0570	Caitlin Newcamp, *newcamp.caitlin@epa.gov*, 703–347–0325.
Formetanate HCl, Case 0091	EPA–HQ–OPP–2010–0939	Patricia Biggio, *biggio.patricia@epa.gov*, 703–347–0547.
Imazalil, Case 2325	EPA–HQ–OPP–2013–0305	Michelle Nolan, *nolan.michelle@epa.gov*, 703–347–0258.
Imazamox, Case 7238	EPA–HQ–OPP–2014–0395	Patricia Biggio, *biggio.patricia@epa.gov*, 703–347–0547.
Imazapic, Case 7234	EPA–HQ–OPP–2014–0279	Eric Fox, *fox.ericm@epa.gov*, 703–347–0104.
Imazaquin, Case 7204	EPA–HQ–OPP–2014–0224	Matthew Manupella, *manupella.Matthew@epa.gov*, 703–347–0411.
Imazethapyr, Case 7208	EPA–HQ–OPP–2013–0774	Katherine St. Clair, *stclair.katherine@epa.gov*, 703–347–8778.
MCPA, Case 0017	EPA–HQ–OPP–2014–0180	Julie Javier, *javier.julie@epa.gov*, 703–347–0790.
Metam Sodium and Metam Potassium, Case 2390.	EPA–HQ–OPP–2013–0140	Leigh Rimmer, *rimmer.leigh@epa.gov*, 703–347–0553.
Methyl isothiocyanate (MITC), Case 2405.	EPA–HQ–OPP–2013–0242	Megan Snyderman, *snyderman.megan@epa.gov*, 703–347–0671.
o-Benzyl-p-Chlorophenol, Case 2045	EPA–HQ–OPP–2011–0423	Erin Dandridge, *dandridge.erin@epa.gov*, 703–347–0185.
para-Dichlorobenzene, Case 3058	EPA–HQ–OPP–2016–0117	Linsey Walsh, *walsh.linsey@epa.gov*, 703–347–8030.
Penoxsulam, Case 7265	EPA–HQ–OPP–2015–0303	Samantha Thomas, *thomas.samantha@epa.gov*, 703–347–0514.
Starlicide, Case 2610	EPA–HQ–OPP–2011–0696	Linsey Walsh, *walsh.linsey@epa.gov*, 703–347–8030.
Tri-n butyl tetradecyl phosphonium chloride (TTPC), Case 5111.	EPA–HQ–OPP–2011–0952	Daniel Halpert, *halpert.daniel@epa.gov*, 703–347–0133.
Triphenyltin Hydroxide (TPTH), Case 0099.	EPA–HQ–OPP–2012–0413	Katherine St. Clair, *stclair.katherine@epa.gov*, 703–347–8778.
Zinc and Zinc Salts, Case 4099	EPA–HQ–OPP–2009–0011	Kimberly Wilson, *wilson.kimberly@epa.gov*, 703–347–0495.

Pursuant to 40 CFR 155.53(c), EPA is providing an opportunity, through this notice of availability, for interested parties to provide comments and input concerning the Agency's draft human health and/or ecological risk assessments for the pesticides listed in the Table in Unit IV. The Agency will consider all comments received during the public comment period and make changes, as appropriate, to a draft human health and/or ecological risk assessment. EPA may then issue a revised risk assessment, explain any changes to the draft risk assessment, and respond to comments.

Information submission requirements. Anyone may submit data or information in response to this document. To be considered during a pesticide's registration review, the submitted data or information must meet the following requirements:

- To ensure that EPA will consider data or information submitted, interested persons must submit the data or information during the comment period. The Agency may, at its discretion, consider data or information submitted at a later date.
- The data or information submitted must be presented in a legible and useable form. For example, an English translation must accompany any material that is not in English and a written transcript must accompany any information submitted as an audiographic or videographic record. Written material may be submitted in paper or electronic form.
- Submitters must clearly identify the source of any submitted data or information.
- Submitters may request the Agency to reconsider data or information that the Agency rejected in a previous review. However, submitters must explain why they believe the Agency should reconsider the data or information in the pesticide's registration review.

As provided in 40 CFR 155.58, the registration review docket for each pesticide case will remain publicly accessible through the duration of the registration review process; that is, until all actions required in the final decision on the registration review case have been completed.

Authority: 7 U.S.C. 136 *et seq.*

Dated: October 25, 2018.

Yu-Ting Guilaran,

Director, Pesticide Re-Evaluation Division, Office of Pesticide Programs.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OECA–2014–0085; FRL–9974–64–OEI]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Friction Materials Manufacturing (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR)—NESHAP for Friction Materials Manufacturing (EPA ICR Number 2025.07, OMB Control Number 2060–0481) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through August 31, 2018. Public comments were requested previously, via the **Federal Register** on June 29, 2017 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before December 31, 2018.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OECA–2014–0085, to: (1) EPA online using *www.regulations.gov* (our preferred method), or by email to *docket.oeca@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460; and (2) OMB via email to *oira_submission@omb.eop.gov.* Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564–2970; fax number: (202) 564–0050; email address: *yellin.patrick@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit: *http://www.epa.gov/dockets.*

Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the general provisions of 40 CFR part 63, subpart A, as well as the specific requirements at 40 CFR part 63, subpart QQQQQ. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Friction materials manufacturing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart QQQQQ).

Estimated number of respondents: 2 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 659 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $69,700 (per year), which includes $544 in either annualized capital/start up and/or operation & maintenance costs.

Changes in the estimates: There is an adjustment decrease in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This decrease is not due to any program changes. The change in the burden occurred due to a decrease in the respondent universe.

Courtney Kerwin,

Director, Regulatory Support Division.

BILLING CODE 6560–50–P

FEDERAL RESERVE SYSTEM

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice, request for comment.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) invites comment on a proposal to extend for three years, with revision, the Application to Become a Savings and Loan Holding Company or to Acquire a Savings Association or Savings and Loan Holding Company (FR LL–10(e); OMB No. 7100–0336).

DATES: Comments must be submitted on or before January 29, 2019.

ADDRESSES: You may submit comments, identified by *FR LL–10(e),* by any of the following methods:

- *Agency website: http://www.federalreserve.gov.* Follow the instructions for submitting comments at *http://www.federalreserve.gov/apps/foia/proposedregs.aspx.*
- *Email: regs.comments@federalreserve.gov.* Include OMB number in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Ann E. Misback, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

All public comments are available from the Board's website at *http://www.federalreserve.gov/apps/foia/proposedregs.aspx* as submitted, unless modified for technical reasons. Accordingly, your comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper form in Room 3515, 1801 K Street NW (between 18th and 19th Streets NW), Washington, DC 20006 between 9 a.m. and 5 p.m. on weekdays. For security reasons, the Board requires that visitors make an appointment to inspect comments. You may do so by calling (202) 452–3684. Upon arrival, visitors will be required to present valid government-issued photo identification and to submit to security screening in order to inspect and photocopy comments.

Additionally, commenters may send a copy of their comments to the OMB Desk Officer—Shagufta Ahmed—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

FOR FURTHER INFORMATION CONTACT: A copy of the PRA OMB submission, including the proposed reporting form and instructions, supporting statement, and other documentation will be placed into OMB's public docket files, if approved. These documents will also be made available on the Board's public website at *http://www.federalreserve.gov/apps/reportforms/review.aspx* or may be requested from the agency clearance officer, whose name appears below.

Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452–3829. Telecommunications Device for the Deaf (TDD) users may contact (202) 263–4869, Board of Governors of the Federal Reserve System, Washington, DC, 20551.

SUPPLEMENTARY INFORMATION: On June 15, 1984, the Office of Management and Budget (OMB) delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve and assign OMB control numbers to collection of information requests and requirements conducted or sponsored by the Board. In exercising this delegated authority, the Board is directed to take every reasonable step to solicit comment. In determining whether to approve a collection of information, the Board will consider all comments received from the public and other agencies.

Request for Comment on Information Collection Proposal

The Board invites public comment on the following information collection, which is being reviewed under authority delegated by the OMB under the PRA. Comments are invited on the following:

a. Whether the proposed collection of information is necessary for the proper performance of the Board's functions, including whether the information has practical utility;

b. The accuracy of the Board's estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the Board should modify the proposal.

Proposal Under OMB Delegated Authority To Extend for Three Years, With Revision, the Following Information Collection

Report title: Application to Become a Savings and Loan Holding Company or to Acquire a Savings Association or Savings and Loan Holding Company.

Agency form number: FR LL–10(e).

OMB control number: 7100–0336.

Frequency: Event generated.

Respondents: Entities seeking prior approval to become or acquire a savings and loan holding company (SLHC).

Estimated number of respondents: 15.

Estimated average hours per response: 60.

Estimated annual burden hours: 900.

General description of report: This collection of information consists of information that must be filed in connection with certain proposals involving the formation, acquisition, or merger of an SLHC. The Board requires the submission of this filing from an applicant for regulatory and supervisory purposes and to allow the Board to fulfill its statutory obligations to review these transactions under section 10(e) of the Home Owners' Loan Act (HOLA) and the Board's Regulation LL—Savings and Loan Holding Companies. The Board uses the information submitted by applicants to evaluate these transactions with respect to the financial and managerial resources and future prospects of the company(ies) and savings association(s) involved, the effect of the acquisition on the savings association(s), the insurance risk to the Deposit Insurance Fund, the convenience and needs of communities to be served, and competitive effects.[1]

Proposed revisions: The Board proposes to change the name and title of its current Form H-(e), which the Board inherited from the Office of Thrift Supervision (OTS) when the OTS's supervisory authority over SLHCs was transferred to the Board, to Application to Become a Savings and Loan Holding Company or to Acquire a Savings Association or Savings and Loan Holding Company (FR LL–10(e)), and to make numerous other revisions to this collection of information. These changes would make the form consistent with

[1] *See* 12 U.S.C. 1467a(e)(2).

the format of other Board forms; incorporate information on the Board's policies and procedures for processing applications; improve the clarity of the information requests; reflect the impact of new laws, regulations, capital requirements, and accounting rules; and delete information requests that are not typically useful for the analysis of a proposed transaction. The revisions also are intended to increase transparency by ensuring that initial filings include the information that the Federal Reserve System requires to evaluate a transaction and thereby reducing the need for subsequent information requests, which may delay the Board's consideration of a filing and create additional burden for filers.

Legal authorization and confidentiality: The FR LL–10(e) is authorized pursuant to Section 10(b)(2) of the Home Owners' Loan Act (12 U.S.C. 1467a(b)) and is mandatory. The information on the FR LL–10(e) is not considered confidential unless the applicant requests confidential treatment pursuant to exemption 4 (confidential business information) or 6 (confidential personal information) of the Freedom of Information Act, 5 U.S.C. 552(b)(4) and (b)(6). All such requests for confidential treatment would be reviewed on a case-by-case basis.

Board of Governors of the Federal Reserve System, November 27, 2018.

Michele Taylor Fennell,

Assistant Secretary of the Board.

FEDERAL RESERVE SYSTEM

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice, request for comment.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) invites comment on a proposal to extend for three years, without revision, the *Domestic Branch Notification* (*FR 4001;* OMB No. 7100–0097).

DATES: Comments must be submitted on or before January 29, 2019.

ADDRESSES: You may submit comments, identified by *FR 4001,* by any of the following methods:

- *Agency website: http://www.federalreserve.gov.* Follow the instructions for submitting comments at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx.*
- *Email: regs.comments@federalreserve.gov.* Include OMB number in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Ann E. Misback, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

All public comments are available from the Board's website at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx* as submitted, unless modified for technical reasons or to remove sensitive PII (personally identifiable information) at the commenter's request. Public comments may also be viewed electronically or in paper form in Room 3515, 1801 K Street NW. (between 18th and 19th Streets NW), Washington, DC 20006 between 9 a.m. and 5 p.m. on weekdays. For security reasons, the Board requires that visitors make an appointment to inspect comments. You may do so by calling (202) 452–3684. Upon arrival, visitors will be required to present valid government-issued photo identification and to submit to security screening in order to inspect and photocopy comments.

Additionally, commenters may send a copy of their comments to the OMB Desk Officer—Shagufta Ahmed—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–6974.

FOR FURTHER INFORMATION CONTACT: A copy of the PRA OMB submission, including the proposed reporting form and instructions, supporting statement, and other documentation will be placed into OMB's public docket files, once approved. These documents will also be made available on the Board's public website at: *http://www.federalreserve.gov/apps/reportforms/review.aspx* or may be requested from the agency clearance officer, whose name appears below.

Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202) 452–3829. Telecommunications Device for the Deaf (TDD) users may contact (202) 263–4869, Board of Governors of the Federal Reserve System, Washington, DC 20551.

SUPPLEMENTARY INFORMATION: On June 15, 1984, the Office of Management and Budget (OMB) delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve of and assign OMB control numbers to collection of information requests and requirements conducted or sponsored by the Board. In exercising this delegated authority, the Board is directed to take every reasonable step to solicit comment. In determining whether to approve a collection of information, the Board will consider all comments received from the public and other agencies.

Request for Comment on Information Collection Proposal

The Board invites public comment on the following information collection, which is being reviewed under authority delegated by the OMB under the PRA. Comments are invited on the following:

a. Whether the proposed collection of information is necessary for the proper performance of the Board's functions; including whether the information has practical utility;

b. The accuracy of the Board's estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the Board should modify the proposal prior.

Proposal To Approve Under OMB Delegated Authority the Extension for Three Years, Without Revision, of the Following Report

Report title: Domestic Branch Notification.

Agency form number: FR 4001.

OMB control number: 7100–0097.

Frequency: On Occasion.

Respondents: State member banks (SMBs).

Estimated number of respondents: 320.

Estimated average hours per response: Expedited notifications, 1.5 hours; and nonexpedited notifications, 2 hours.

Estimated annual burden hours: Expedited notifications, 98 hours; and nonexpedited notifications, 510 hours.

General description of report: The Federal Reserve Act and the Board's

Regulation H require a state member bank to seek prior approval of the Federal Reserve System before establishing or acquiring a domestic branch. Such requests for approval must be filed as applications at the appropriate Reserve Bank for the state member bank. Due to the limited information that a state member bank generally has to provide for branch proposals, there is no formal reporting form for a domestic branch application. A state member bank is required to notify the Federal Reserve by letter of its intent to establish one or more new branches and provide with the letter evidence that public notice of the proposed branch(es) has been published by the state member bank in the appropriate newspaper(s).[1] The Federal Reserve uses the information provided to fulfill its statutory obligation to review branch applications before acting on the proposals and otherwise to supervise state member banks.

Legal authorization and confidentiality: The Board's filing requirements associated with Domestic Branch Notification are authorized under section 9(3) of the Federal Reserve Act (12 U.S.C. 321), which requires state member banks to obtain Board approval before establishing a domestic branch (Board's Regulation H (12 CFR 208.6)). The obligation of state member banks to request prior approval from the Federal Reserve to establish a domestic branch is mandatory. The information contained in a state member bank's Domestic Branch Notification is considered public. A state member bank's request that any portion(s) of a Domestic Branch Notification be kept confidential pursuant to exemption 4 of the Freedom of Information Act (5 U.S.C. 552(b)(4)) must be submitted in accordance with section 261.15 of the Board's Rules Regarding Availability of Information (12 CFR 261.15).

Board of Governors of the Federal Reserve System, November 27, 2018.

Michele Taylor Fennell,

Assistant Secretary of the Board.

[FR Doc. 2018–26087 Filed 11–29–18; 8:45 am]

BILLING CODE 6210–01–P

[1] Per Rules of Procedure (12 CFR 262), Board regulations require the use of newspaper for public notifications. For the purposes of FR 4001, the newspaper used must be in the general circulation of the community or communities in which the head office of the bank and the proposed branch are located.

FEDERAL RESERVE SYSTEM

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice, request for comment.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) invites comment on a proposal to extend for three years, without revision, the Recordkeeping Provisions Associated with the Guidance on Sound Incentive Compensation Policies (FR 4027; OMB No. 7100–0327).

DATES: Comments must be submitted on or before January 29, 2019.

ADDRESSES: You may submit comments, identified by *FR 4027,* by any of the following methods:

- *Agency website: http://www.federalreserve.gov*. Follow the instructions for submitting comments at *http://www.federalreserve.gov/apps/foia/proposedregs.aspx*.
- *Email: regs.comments@federalreserve.gov*. Include OMB number in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Ann E. Misback, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

All public comments are available from the Board's website at *http://www.federalreserve.gov/apps/foia/proposedregs.aspx* as submitted, unless modified for technical reasons. Accordingly, your comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper form in Room 3515, 1801 K Street NW (between 18th and 19th Streets NW), Washington, DC 20006 between 9 a.m. and 5 p.m. on weekdays. For security reasons, the Board requires that visitors make an appointment to inspect comments. You may do so by calling (202) 452–3684. Upon arrival, visitors will be required to present valid government-issued photo identification and to submit to security screening in order to inspect and photocopy comments.

Additionally, commenters may send a copy of their comments to the OMB Desk Officer—Shagufta Ahmed—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

FOR FURTHER INFORMATION CONTACT: A copy of the PRA OMB submission, including the proposed reporting form and instructions, supporting statement, and other documentation will be placed into OMB's public docket files, if approved. These documents will also be made available on the Board's public website at *http://www.federalreserve.gov/apps/reportforms/review.aspx* or may be requested from the agency clearance officer, whose name appears below.

Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452–3829. Telecommunications Device for the Deaf (TDD) users may contact (202) 263–4869, Board of Governors of the Federal Reserve System, Washington, DC 20551.

SUPPLEMENTARY INFORMATION: On June 15, 1984, the Office of Management and Budget (OMB) delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve and assign OMB control numbers to collection of information requests and requirements conducted or sponsored by the Board. In exercising this delegated authority, the Board is directed to take every reasonable step to solicit comment. In determining whether to approve a collection of information, the Board will consider all comments received from the public and other agencies.

Request for Comment on Information Collection Proposal

The Board invites public comment on the following information collection, which is being reviewed under authority delegated by the OMB under the PRA. Comments are invited on the following:

a. Whether the proposed collection of information is necessary for the proper performance of the Board's functions, including whether the information has practical utility;

b. The accuracy of the Board's estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance,

and purchase of services to provide information.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the Board should modify the proposal.

Proposal Under OMB Delegated Authority To Extend for Three Years, Without Revision, the Following Information Collection

Report title: Recordkeeping Provisions Associated with the Guidance on Sound Incentive Compensation Policies.

Agency form number: FR 4027.

OMB control number: 7100–0327.

Frequency: Annual.

Respondents: Banking organizations.

Estimated number of respondents: One-time implementation for large institutions: 1; one-time implementation for small institutions: 1; ongoing maintenance: 5,503.

Estimated average hours per response: One-time implementation for large institutions: 480; one-time implementation for small institutions: 80; ongoing maintenance: 40.

Estimated annual burden hours: 228,960.

General description of report:

Compatibility With Effective Controls and Risk Management

Pursuant to Principle 2 of the Guidance, a banking organization's risk-management processes and internal controls should reinforce and support the development and maintenance of balanced incentive compensation arrangements. Principle 2 states that banking organizations should create and maintain sufficient documentation to permit an audit of the organization's processes for establishing, modifying, and monitoring incentive compensation arrangements. Additionally, large banking organizations should maintain policies and procedures that (i) identify and describe the role(s) of the personnel, business units, and control units authorized to be involved in the design, implementation, and monitoring of incentive compensation arrangements; (ii) identify the source of significant risk-related inputs into these processes and establish appropriate controls governing the development and approval of these inputs to help ensure their integrity; and (iii) identify the individual(s) and control unit(s) whose approval is necessary for the establishment of new incentive compensation arrangements or modification of existing arrangements.

Strong Corporate Governance

Pursuant to Principle 3 of the Guidance, banking organizations should have strong and effective corporate governance to help ensure sound compensation practices. The Guidance states that a banking organization's board of directors should approve and document any material exceptions or adjustments to the organization's incentive compensation arrangements established for senior executives.

Legal authorization and confidentiality: The recordkeeping provisions of the Guidance are authorized pursuant to sections 9, 11(a), 25, and 25A of the Federal Reserve Act (12 U.S.C. 248(a), 325, 602, and 625); section 5 of the Bank Holding Company Act (12 U.S.C. 1844); section 10(b)(2) of the Home Owners' Loan Act (12 U.S.C. 1467a(b)(2)); section 7(c) of the International Banking Act (12 U.S.C. 3105(c)); and section 39 of the Federal Deposit Insurance Act (12 U.S.C. 1831p–1(c)).

Because the recordkeeping provisions are contained within guidance, which is nonbinding, they are voluntary. There are no reporting forms associated with this information collection.

Because the incentive compensation records would be maintained at each banking organization, the Freedom of Information Act (''FOIA'') would only be implicated if the Board obtained such records as part of the examination or supervision of a banking organization. In the event the records are obtained by the Board as part of an examination or supervision of a financial institution, this information is considered confidential pursuant to exemption 8 of the FOIA, which protects information contained in ''examination, operating, or condition reports'' obtained in the bank supervisory process (5 U.S.C. 552(b)(8)). In addition, the information may also be kept confidential under exemption 4 for the FOIA, which protects commercial or financial information obtained from a person that is privileged or confidential (5 U.S.C. 552(b)(4)).

Consultation outside the agency: The Board has consulted with the OCC and FDIC to confirm that there will be no revisions to the Guidance, and that the one-time implementation burden should be reduced, as these agencies do not expect any banking organizations to newly implement the recordkeeping requirements associated with the Guidance. Each agency may update their respective respondent count if needed.

Board of Governors of the Federal Reserve System, November 27, 2018.

Michele Taylor Fennell,

Assistant Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier CMS–10691]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by January 29, 2019.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following

address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number ____, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' website address at website address at *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html.*

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov.*

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786–1326.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10691 Data Request and Attestation for PDP Sponsors

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

Type of Information Collection Request: New collection (request for a new OMB control number); *Title of Information Collection:* Data Request and Attestation for PDP Sponsors; *Use:* Section 50354 of the Bipartisan Budget Act of 2018 (BBA) provides that the Secretary shall establish a process under which the sponsor of a Prescription Drug Plan (PDP) that provide prescription drug benefits under Medicare Part D may request, beginning in plan year 2020, that the Secretary provide on a periodic basis and in an electronic format standardized extracts of Medicare claims about its plan enrollees. Section 50354 of the BBA further specifies that PDP sponsors receiving such Medicare claims data for their corresponding PDP plan enrollees may use the data for: (1) Optimizing therapeutic outcomes through improved medication use, (2) improving care coordination so as to prevent adverse healthcare outcomes, such as preventable emergency department visits and hospital readmissions, and (3) for any other purposes determined appropriate by the Secretary. Section 50354 also states that the PDP sponsor may not use the data: (1) To inform coverage determinations under Part D, (2) to conduct retroactive review of medically accepted conditions, (3) to facilitate enrollment changes to a different PDP or a MA–PD plan offered by the same parent organization, (4) to inform marketing benefits; and (5) for any other purpose the Secretary determines is necessary to include in order to protect the identity of individuals entitled to or enrolled in Medicare, and to protect the security of personal health information. This proposed information collection request would allow the PDP sponsor to submit a request to CMS for claims data for its enrollees and to attest that it will adhere to the permitted uses and limitations on the use of the Medicare claims data that are listed in 42 CFR 423.153. *Form Number:* CMS–10691 (OMB control number: 0938–TBD); *Frequency:* Occasionally; *Affected Public:* Private sector; *Number of Respondents:* 63; *Total Annual Responses:* 68; *Total Annual Hours:* 1.36. (For policy questions regarding this collection contact Kari Gaare at 410–786–8612.)

Dated: November 27, 2018.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–3374–N]

Medicare Program; Request for Nominations for Members for the Medicare Evidence Development & Coverage Advisory Committee

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: This notice announces the request for nominations for membership on the Medicare Evidence Development & Coverage Advisory Committee (MEDCAC). Among other duties, the MEDCAC provides advice and guidance to the Secretary of the Department of Health and Human Services (the Secretary) and the Administrator of the Centers for Medicare & Medicaid Services (CMS) concerning the adequacy of scientific evidence available to CMS in making coverage determinations under the Medicare program.

The MEDCACs fundamental purpose is to support the principles of an evidence-based determination process for Medicare's coverage policies. MEDCAC panels provide advice to CMS on the strength of the evidence available for specific medical treatments and technologies through a public, participatory, and accountable process.

DATES: Nominations must be received by Monday, January 7, 2019.

ADDRESSES: You may mail nominations for membership to the following address: Centers for Medicare & Medicaid Services, Center for Clinical Standards and Quality, Attention: Leah Cromwell or Maria Ellis, 7500 Security Boulevard, Mail Stop: S3–02–01, Baltimore, MD 21244 or send via email to *MEDCACnomination@cms.hhs.gov.*

FOR FURTHER INFORMATION CONTACT: Maria Ellis, Executive Secretary for the MEDCAC, Centers for Medicare & Medicaid Services, Center for Clinical Standards and Quality, Coverage and Analysis Group, S3–02–01, 7500 Security Boulevard, Baltimore, MD 21244 or contact Ms. Ellis by phone (410–786–0309) or via email at *Maria.Ellis@cms.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

The Secretary signed the initial charter for the Medicare Coverage Advisory Committee (MCAC) on November 24, 1998. A notice in the

Federal Register (63 FR 68780) announcing establishment of the MCAC was published on December 14, 1998. The MCAC name was updated to more accurately reflect the purpose of the committee and on January 26, 2007, the Secretary published a notice in the **Federal Register** (72 FR 3853), announcing that the Committee's name changed to the Medicare Evidence Development & Coverage Advisory Committee (MEDCAC). The current Secretary's Charter for the MEDCAC is available on the CMS website at: *http://www.cms.hhs.gov/FACA/Downloads/medcaccharter.pdf,* or you may obtain a copy of the charter by submitting a request to the contact listed in the **FOR FURTHER INFORMATION** section of this notice.

The MEDCAC is governed by provisions of the Federal Advisory Committee Act, Public Law 92–463, as amended (5 U.S.C. App. 2), which sets forth standards for the formulation and use of advisory committees, and is authorized by section 222 of the Public Health Service Act as amended (42 U.S.C. 217A).

We are requesting nominations for candidates to serve on the MEDCAC. Nominees are selected based upon their individual qualifications and not solely as representatives of professional associations or societies. We wish to ensure adequate representation of the interests of both women and men, members of all ethnic groups, and physically challenged individuals. Therefore, we encourage nominations of qualified candidates who can represent these interests.

The MEDCAC consists of a pool of 100 appointed members including: 90 at-large standing members (10 of whom are patient advocates), and 10 representatives of industry interests. Members generally are recognized authorities in clinical medicine including subspecialties, administrative medicine, public health, biological and physical sciences, epidemiology and biostatistics, clinical trial design, health care data management and analysis, patient advocacy, health care economics, medical ethics or other relevant professions.

The MEDCAC works from an agenda provided by the Designated Federal Official. The MEDCAC reviews and evaluates medical literature and technology assessments, and hears public testimony on the evidence available to address the impact of medical items and services on health outcomes of Medicare beneficiaries. The MEDCAC may also advise the Centers for Medicare & Medicaid Services (CMS) as part of Medicare's ''coverage with evidence development'' initiative.

II. Provisions of the Notice

As of June 2019, there will be 20 membership terms expiring. Of the 20 memberships expiring, 1 is an industry representative and the remaining 19 membership openings are for the at-large standing MEDCAC membership.

All nominations must be accompanied by curricula vitae. Nomination packages should be sent to Leah Cromwell or Maria Ellis at the address listed in the **ADDRESSES** section of this notice. Nominees are selected based upon their individual qualifications. Nominees for membership must have expertise and experience in one or more of the following fields:

- Clinical medicine including subspecialties
- Administrative medicine
- Public health
- Biological and physical sciences
- Epidemiology and biostatistics
- Clinical trial design
- Health care data management and analysis
- Patient advocacy
- Health care economics
- Medical ethics
- Other relevant professions

We are looking particularly for experts in a number of fields. These include cancer screening, genetic testing, clinical epidemiology, psychopharmacology, screening and diagnostic testing analysis, and vascular surgery. We also need experts in biostatistics in clinical settings, dementia treatment, minority health, observational research design, stroke epidemiology, and women's health.

The nomination letter must include a statement that the nominee is willing to serve as a member of the MEDCAC and appears to have no conflict of interest that would preclude membership. We are requesting that all curricula vitae include the following:

- Date of birth
- Place of birth
- Social security number
- Title and current position
- Professional affiliation
- Home and business address
- Telephone and fax numbers
- Email address
- List of areas of expertise

In the nomination letter, we are requesting that nominees specify whether they are applying for a patient advocate position, for an at-large standing position, or as an industry representative. Potential candidates will be asked to provide detailed information concerning such matters as financial holdings, consultancies, and research grants or contracts in order to permit evaluation of possible sources of financial conflict of interest. Department policy prohibits multiple committee memberships. A federal advisory committee member may not serve on more than one committee within an agency at the same time.

Members are invited to serve for overlapping 2-year terms. A member may continue to serve after the expiration of the member's term until a successor is named. Any interested person may nominate one or more qualified persons. Self-nominations are also accepted. Individuals interested in the representative positions must include a letter of support from the organization or interest group they would represent.

III. Collection of Information

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Dated: November 21, 2018.

Kate Goodrich,

Director, Center for Clinical Standards and Quality, Chief Medical Officer, Centers for Medicare & Medicaid Services.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2013–D–1446]

Self-Monitoring Blood Glucose Test Systems for Over-the-Counter Use; Draft Guidance for Industry and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of the draft guidance for industry and FDA staff entitled ''Self-Monitoring Blood Glucose Test Systems for Over-the-Counter Use.'' This draft guidance document describes studies and information that FDA recommends be used when submitting premarket notifications (510(k)s) for self-monitoring blood glucose test

systems (SMBGs) that are for over-the-counter (OTC) home use by lay users. This guidance is not meant to address blood glucose monitoring test systems (BGMS) that are intended for prescription point-of-care use in professional healthcare settings (*e.g.,* hospitals, physician offices, and long-term care facilities). This draft guidance is not final nor is it in effect at this time.

DATES: Submit either electronic or written comments on the draft guidance by February 28, 2019 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2013–D–1446 for ''Self-Monitoring Blood Glucose Test Systems for Over-the-Counter Use.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

An electronic copy of the draft guidance document is available for download from the internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the draft guidance. Submit written requests for a single hard copy of the draft guidance document entitled ''Self-Monitoring Blood Glucose Test Systems for Over-the-Counter Use'' to the Office of the Center Director, Guidance and Policy Development, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request.

FOR FURTHER INFORMATION CONTACT: Leslie Landree, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 4623, Silver Spring, MD 20993–0002, 301–796–6147.

SUPPLEMENTARY INFORMATION:

I. Background

On October 11, 2016, FDA published a final guidance entitled ''Self-Monitoring Blood Glucose Test Systems for Over-the-Counter Use.'' This guidance document described studies and information that FDA recommends be used when submitting 510(k)s for SMBGs that are for OTC home use by lay users. FDA is now proposing to make modifications to the final guidance based on feedback received from stakeholders, which the Agency believes will better align with the evolving understanding and development of these types of devices. When finalized, this draft guidance will replace the final guidance of the same title issued on October 11, 2016.

This draft guidance is not meant to address BGMS that are intended for prescription point-of-care use in professional healthcare settings (*e.g.,* hospitals, physician offices, and long term-care facilities). FDA addresses those device types in another guidance entitled, ''Blood Glucose Monitoring Test Systems for Prescription Point-of-Care Use.''

II. Significance of Guidance

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on ''Self-Monitoring Blood Glucose Test Systems for Over-the-Counter Use.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

III. Electronic Access

Persons interested in obtaining a copy of the draft guidance may do so by downloading an electronic copy from the internet. A search capability for all Center for Devices and Radiological

Health guidance documents is available at *https://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/default.htm.* This draft guidance document is also available at *https://www.regulations.gov.* Persons unable to download an electronic copy of ''Self-Monitoring Blood Glucose Test Systems for Over-the-Counter Use'' may send an email request to *CDRH-Guidance@fda.hhs.gov* to receive an electronic copy of the document. Please use the document number GUD 1756 to identify the guidance you are requesting.

IV. Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in the following FDA guidance and regulations have been approved by OMB as listed in the following table:

21 CFR part or guidance	Topic	OMB control no.
807, subpart E	Premarket Notification	0910–0120
''Requests for Feedback on Medical Device Submissions: The Pre-Submission Program and Meetings with Food and Drug Administration Staff''.	Q-Submissions	0910–0756
800, 801, and 809	Medical Device Labeling Regulations	0910–0485
820	Current Good Manufacturing Practice (CGMP); Quality System (QS) Regulation.	0910–0073

Dated: November 26, 2018.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2018–N–4282]

Endocrinologic and Metabolic Drugs Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; establishment of a public docket; request for comments.

SUMMARY: The Food and Drug Administration (FDA) announces a forthcoming public advisory committee meeting of the Endocrinologic and Metabolic Drugs Advisory Committee (the Committee). The general function of the Committee is to provide advice and recommendations to FDA on regulatory issues. The meeting will be open to the public. FDA is establishing a docket for public comment on this document.

DATES: The meeting will be held on January 17, 2019, from 8 a.m. to 5 p.m.

ADDRESSES: FDA White Oak Campus, 10903 New Hampshire Ave., Bldg. 31 Conference Center, the Great Room (Rm. 1503), Silver Spring, MD 20993–0002. Answers to commonly asked questions including information regarding special accommodations due to a disability, visitor parking, and transportation may be accessed at: *https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm408555.htm.*

FDA is establishing a docket for public comment on this meeting. The docket number is FDA–2018–N–4282. The docket will close on January 16, 2019. Submit either electronic or written comments on this public meeting by January 16, 2019. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 16, 2019. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 16, 2019. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Comments received on or before January 3, 2019, will be provided to the Committee. Comments received after that date will be taken into consideration by FDA.

You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2018–N–4282 for ''Endocrinologic and Metabolic Drugs Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your

comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' FDA will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify the information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: LaToya Bonner, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 31, Rm. 2417, Silver Spring, MD 20993–0002, 301–796–9001, Fax: 301–847–8533, email: *EMDAC@fda.hhs.gov,* or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area). A notice in the **Federal Register** about last minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check the FDA's website at *https://www.fda.gov/AdvisoryCommittees/default.htm* and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before coming to the meeting.

SUPPLEMENTARY INFORMATION:

Agenda: The Committee will discuss new drug application 210934 for sotagliflozin oral tablet, sponsored by Sanofi-Aventis U.S. LLC, for the proposed indication: Adjunct to insulin therapy to improve glycemic control in adults with type 1 diabetes mellitus.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its website prior to the meeting, the background material will be made publicly available at the location of the advisory committee meeting, and the background material will be posted on FDA's website after the meeting. Background material is available at *https://www.fda.gov/AdvisoryCommittees/Calendar/default.htm.* Scroll down to the appropriate advisory committee meeting link.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the Committee. All electronic and written submissions submitted to the Docket (see **ADDRESSES**) on or before January 3, 2019, will be provided to the Committee. Oral presentations from the public will be scheduled between approximately 1 p.m. to 2 p.m. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before December 27, 2018. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by December 28, 2018.

Persons attending FDA's advisory committee meetings are advised that FDA is not responsible for providing access to electrical outlets.

For press inquiries, please contact the Office of Media Affairs at *fdaoma@fda.hhs.gov* or 301–796–4540.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require accommodations due to a disability, please contact LaToya Bonner (see **FOR FURTHER INFORMATION CONTACT**) at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our website at *https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm* for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: November 26, 2018.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket Nos. FDA–2017–E–6603 and FDA–2017–E–6604]

Determination of Regulatory Review Period for Purposes of Patent Extension; KEVZARA

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) has determined the regulatory review period for KEVZARA and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of applications to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human biological product.

DATES: Anyone with knowledge that any of the dates as published (see the **SUPPLEMENTARY INFORMATION** section) are incorrect may submit either electronic or written comments and ask for a redetermination by January 29, 2019. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by May 29, 2019. See ''Petitions'' in the **SUPPLEMENTARY INFORMATION** section for more information.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 29, 2019. The *https://www.regulations.gov*

electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 29, 2019. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket Nos. FDA–2017–E–6603 and FDA–2017–E–6604 for ''Determination of Regulatory Review Period for Purposes of Patent Extension; KEVZARA.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with § 10.20 (21 CFR 10.20) and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6250, Silver Spring, MD 20993, 301–796–3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human biological products, the testing phase begins when the exemption to permit the clinical investigations of the biological product becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human biological product and continues until FDA grants permission to market the biological product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human biological product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human biologic product KEVZARA (sarilumab). KEVZARA is indicated for treatment of adult patients with moderately to severely active rheumatoid arthritis who have had an inadequate response or intolerance to one or more disease-modifying antirheumatic drugs. Subsequent to this approval, the USPTO received patent term restoration applications for KEVZARA (U.S. Patent Nos. 7,582,298 and 8,568,721) from Regeneron Pharmaceuticals, Inc., and the USPTO requested FDA's assistance in determining the patents' eligibility for patent term restoration. In a letter dated February 6, 2018 (revised), FDA advised the USPTO that this human biological product had undergone a regulatory review period and that the approval of KEVZARA represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for KEVZARA is 3,478 days. Of this time, 2,907 days occurred during the testing phase of the regulatory review period, while 571 days occurred during the

approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(i)) became effective:* November 15, 2007. FDA has verified the applicant's claim that the date the investigational new drug application became effective was on November 15, 2007.

2. *The date the application was initially submitted with respect to the human biological product under section 351 of the Public Health Service Act (42 U.S.C. 262):* October 30, 2015. FDA has verified the applicant's claim that the biologics license application (BLA) for KEVZARA (BLA 761037) was initially submitted on October 30, 2015.

3. *The date the application was approved:* May 22, 2017. FDA has verified the applicant's claim that BLA 761037 was approved on May 22, 2017.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its applications for patent extension, this applicant seeks 1,234 or 937 days of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and, under 21 CFR 60.24, ask for a redetermination (see **DATES**). Furthermore, as specified in § 60.30 (21 CFR 60.30), any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must comply with all the requirements of § 60.30, including but not limited to: Must be timely (see **DATES**), must be filed in accordance with § 10.20, must contain sufficient facts to merit an FDA investigation, and must certify that a true and complete copy of the petition has been served upon the patent applicant. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to *https://www.regulations.gov* at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: November 26, 2018.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–E–3305]

Determination of Regulatory Review Period for Purposes of Patent Extension; PROVAYBLUE

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) has determined the regulatory review period for PROVAYBLUE and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human drug product.

DATES: Anyone with knowledge that any of the dates as published (see the **SUPPLEMENTARY INFORMATION** section) are incorrect may submit either electronic or written comments and ask for a redetermination by January 29, 2019. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by May 29, 2019. See ''Petitions'' in the **SUPPLEMENTARY INFORMATION** section for more information.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 29, 2019. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 29, 2019. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2016–E–3305 for ''Determination of Regulatory Review Period for Purposes of Patent Extension; PROVAYBLUE.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in

its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with § 10.20 (21 CFR 10.20) and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6250, Silver Spring, MD 20993, 301–796–3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human drug product, PROVAYBLUE (methylene blue) indicated for the treatment of pediatric and adult patients with acquired methemoglobinemia. Subsequent to this approval, the USPTO received a patent term restoration application for PROVAYBLUE (U.S. Patent No. 8,765,942) from Provepharm S.A.S. and the USPTO requested FDA's assistance in determining the patent's eligibility for patent term restoration. In a letter dated February 6, 2018, FDA advised the USPTO that this human drug product had undergone a regulatory review period and that the approval of PROVAYBLUE represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for PROVAYBLUE is 415 days. Of this time, 232 days occurred during the testing phase of the regulatory review period, while 183 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355(i)) became effective:* February 20, 2015. FDA has verified the applicant's claim that the date the investigational new drug application became effective was February 20, 2015.

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the FD&C Act:* October 9, 2015. FDA has verified the applicant's claim that the new drug application (NDA) for PROVAYBLUE (NDA 204630) was initially submitted on October 9, 2015.

3. *The date the application was approved:* April 8, 2016. FDA has verified the applicant's claim that NDA 204630 was approved on April 8, 2016.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 298 days of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and, under 21 CFR 60.24, ask for a redetermination (see **DATES**). Furthermore, as specified in § 60.30 (21 CFR 60.30), any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must comply with all the requirements of § 60.30, including but not limited to: Must be timely (see **DATES**), must be filed in accordance with § 10.20, must contain sufficient facts to merit an FDA investigation, and must certify that a true and complete copy of the petition has been served upon the patent applicant. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to *https://www.regulations.gov* at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: November 26, 2018.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2011–D–0597]

Agency Information Collection Activities; Proposed Collection; Comment Request; Oversight of Clinical Investigations: A Risk-Based Approach to Monitoring

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity for public

comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on information collection associated with oversight of clinical investigations, a risk-based approach to monitoring.

DATES: Submit either electronic or written comments on the collection of information by January 29, 2019.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 29, 2019. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 29, 2019. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2011–D–0597 for ''Agency Information Collection Activities; Proposed Collection; Comment Request; Oversight of Clinical Investigations: A Risk-Based Approach to Monitoring.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Domini Bean, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–5733, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Oversight of Clinical Investigations: A Risk-Based Approach to Monitoring—21 CFR Parts 312 and 812

OMB Control Number 0910–0733—Extension

This information collection supports reporting and recordkeeping found in Agency guidance. Under parts 312 and 812 (21 CFR parts 312 and 812), sponsors are required to provide

appropriate oversight of their clinical investigations to ensure adequate protection of the rights, welfare, and safety of human subjects and to ensure the quality and integrity of the resulting data submitted to FDA. As part of this oversight, sponsors of clinical investigations are required to monitor the conduct and progress of their clinical investigations. The regulations do not specify how sponsors are to conduct monitoring of clinical investigations and are, therefore, compatible with a range of approaches to monitoring.

Accordingly, we developed the guidance document entitled, ''Guidance for Industry—Oversight of Clinical Investigations: A Risk-Based Approach to Monitoring.'' The guidance is intended to assist sponsors of clinical investigations in developing strategies for risk-based monitoring and plans for clinical investigations of human drug and biological products, medical devices, and combinations thereof. The guidance describes strategies for monitoring activities performed by sponsors or by contract research organizations (CROs) that focus on the conduct, oversight, and reporting of findings of an investigation by clinical investigators. The guidance also recommends strategies that reflect a risk-based approach to monitoring that focuses on critical study parameters and relies on a combination of monitoring activities to oversee a study effectively. Finally, the guidance specifically encourages greater reliance on centralized monitoring methods where appropriate.

Information collections for reports and records associated with clinical investigations under parts 312 and 812 are currently approved under OMB control numbers 0910–0014 and 0910–0078 respectively. These reporting and recordkeeping provisions cover general elements. The guidance discusses other elements sponsors and investigators should consider and include in developing a monitoring plan. As explained in the guidance, documentation of monitoring should include sufficient detail to allow verification that the monitoring plan was followed. The plan should provide adequate information to those involved with monitoring to effectively carry out their duties. All sponsor and CRO personnel who may be involved with monitoring (including those who review appropriate action, determine appropriate action, or both) regarding potential issues identified through monitoring should review the monitoring plan.

We estimate the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL RECORDKEEPING BURDEN [1]

Activity	Number of recordkeepers	Number of records per recordkeeper	Total Annual Records	Average burden per recordkeeping	Total hours
Documentation included in comprehensive monitoring plan	88	1.5	132	4	528

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Based on a review of the information collection, we have made no adjustments to our burden estimate. We estimate 88 sponsors will develop 132 comprehensive monitoring plans in accordance with the guidance. We believe the associated burden for each plan is approximately 4 hours and includes the time necessary to develop, and amend as appropriate, the monitoring plan.

Dated: November 26, 2018.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2013–D–1445]

Blood Glucose Monitoring Test Systems for Prescription Point-of-Care Use; Draft Guidance for Industry and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of the draft guidance for industry and FDA staff entitled ''Blood Glucose Monitoring Test Systems for Prescription Point-of-Care Use.'' This draft guidance document describes studies and criteria that FDA recommends be used when submitting premarket notifications (510(k)s) for blood glucose monitoring systems (BGMSs) that are for prescription point-of-care use. This draft guidance is not final nor is it in effect at this time.

DATES: Submit either electronic or written comments on the draft guidance by February 28, 2019 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for

information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2013–D–1445 for ''Blood Glucose Monitoring Test Systems for Prescription Point-of-Care Use.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

An electronic copy of the draft guidance document is available for download from the internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the draft guidance. Submit written requests for a single hard copy of the draft guidance document entitled ''Blood Glucose Monitoring Test Systems for Prescription Point-of-Care Use'' to the Office of the Center Director, Guidance and Policy Development, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request.

FOR FURTHER INFORMATION CONTACT: Leslie Landree, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 4623, Silver Spring, MD 20993–0002, 301–796–6147.

SUPPLEMENTARY INFORMATION:

I. Background

On October 11, 2016, FDA published a final guidance entitled, ''Blood Glucose Monitoring Test Systems for Prescription Point-of-Care Use.'' That guidance document described studies and information that FDA recommends be used when submitting 510(k)s for BGMSs that are for prescription point-of-care use. FDA is now proposing to make modifications to the guidance based on feedback received from stakeholders, which the Agency believes will better align with the evolving understanding and development of these types of devices. When finalized, this draft guidance will replace the final guidance of the same title issued on October 11, 2016.

II. Significance of Guidance

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on ''Blood Glucose Monitoring Test Systems for Prescription Point-of-Care Use.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

III. Electronic Access

Persons interested in obtaining a copy of the draft guidance may do so by downloading an electronic copy from the internet. A search capability for all Center for Devices and Radiological Health guidance documents is available at *https://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/default.htm.* This draft guidance document is also available at *https://www.regulations.gov.* Persons unable to download an electronic copy of ''Blood Glucose Monitoring Test Systems for Prescription Point-of-Care Use'' may send an email request to *CDRH-Guidance@fda.hhs.gov* to receive an electronic copy of the document. Please use the document number GUD 1755 to identify the guidance you are requesting.

IV. Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in the following FDA guidances and regulations have been approved by OMB as listed in the following table:

21 CFR part or guidance	Topic	OMB Control No.
807, subpart E	Premarket Notification	0910–0120
''Requests for Feedback on Medical Device Submissions: The Pre-Submission Program and Meetings with Food and Drug Administration Staff''.	Q-Submissions	0910–0756
800, 801, and 809	Medical Device Labeling Regulations	0910–0485
820	Current Good Manufacturing Practice (CGMP); Quality System (QS) Regulation.	0910–0073
Recommendations for Clinical Laboratory Improvement Amendments of 1988 (CLIA) Waiver Applications for Manufacturers of In Vitro Diagnostic Devices—Guidance for Industry and Food and Drug Administration Staff.	CLIA Waiver Applications	0910–0598

21 CFR part or guidance	Topic	OMB Control No.
Administrative Procedures for CLIA Categorization—Guidance for Industry and Food and Drug Administration Staff.	Administrative Procedures for Clinical Laboratory Improvement Amendments of 1988 Categorization (42 CFR 493.17).	0910–0607

Dated: November 26, 2018.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2018–N–4116]

Bone, Reproductive and Urologic Drugs Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; establishment of a public docket; request for comments.

SUMMARY: The Food and Drug Administration (FDA) announces a forthcoming public advisory committee meeting of the Bone, Reproductive and Urologic Drugs Advisory Committee. The general function of the committee is to provide advice and recommendations to FDA on regulatory issues. The meeting will be open to the public. FDA is establishing a docket for public comment on this document.

DATES: The meeting will be held on January 16, 2019, from 8:15 a.m. to 5 p.m.

ADDRESSES: FDA White Oak Campus, 10903 New Hampshire Ave., Bldg. 31 Conference Center, the Great Room (Rm. 1503), Silver Spring, MD 20993–0002. Answers to commonly asked questions including information regarding special accommodations due to a disability, visitor parking, and transportation may be accessed at: *https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm408555.htm.*

FDA is establishing a docket for public comment on this meeting. The docket number is FDA–2018–N–4116. The docket will close on January 14, 2019. Submit either electronic or written comments on this public meeting by January 14, 2019. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 14, 2019. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 14, 2019. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Comments received on or before December 31, 2018, will be provided to the committee. Comments received after that date will be taken into consideration by FDA.

You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2018–N–4116 for ''Bone, Reproductive and Urologic Drugs Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' FDA will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify the information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management

Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Kalyani Bhatt, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 31, Rm. 2417, Silver Spring, MD 20993–0002, 301–796–9001, Fax: 301–847–8533, email: *BRUDAC@fda.hhs.gov,* or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area). A notice in the **Federal Register** about last minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check the FDA's website at *https://www.fda.gov/AdvisoryCommittees/default.htm* and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before coming to the meeting.

SUPPLEMENTARY INFORMATION:

Agenda: The committee will discuss biologics license application 761062, romosozumab injection, submitted by Amgen, for the proposed indication of treatment of osteoporosis in postmenopausal women at high risk for fracture, defined as a history of osteoporotic fracture, or multiple risk factors for fracture; or patients who have failed or are intolerant of other available osteoporosis therapy.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its website prior to the meeting, the background material will be made publicly available at the location of the advisory committee meeting, and the background material will be posted on FDA's website after the meeting. Background material is available at *https://www.fda.gov/AdvisoryCommittees/Calendar/default.htm.* Scroll down to the appropriate advisory committee meeting link.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. All electronic and written submissions submitted to the Docket (see **ADDRESSES**) on or before December 31, 2018, will be provided to the committee. Oral presentations from the public will be scheduled between approximately 1 p.m. and 2 p.m. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before December 20, 2018. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by December 21, 2018.

Persons attending FDA's advisory committee meetings are advised that FDA is not responsible for providing access to electrical outlets.

For press inquiries, please contact the Office of Media Affairs at *fdaoma@fda.hhs.gov* or 301–796–4540.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require accommodations due to a disability, please contact Kalyani Bhatt (see **FOR FURTHER INFORMATION CONTACT**) at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our website at *https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm* for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: November 26, 2018.

Leslie Kux,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2018–N–4227]

Joint Meeting of the Arthritis Advisory Committee and the Drug Safety and Risk Management Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; establishment of a public docket; request for comments.

SUMMARY: The Food and Drug Administration (FDA) announces a forthcoming public advisory committee meeting of the Arthritis Advisory Committee and the Drug Safety and Risk Management Advisory Committee. The general function of the committees is to provide advice and recommendations to FDA on regulatory issues. The meeting will be open to the public. FDA is establishing a docket for public comment on this document.

DATES: The meeting will be held on January 11, 2019, from 8 a.m. to 5 p.m.

ADDRESSES: College Park Marriott Hotel and Conference Center, General Vessey Ballroom, 3501 University Blvd. East, Hyattsville, MD 20783. The conference center's telephone number is 301–985–7300. Answers to commonly asked questions about FDA Advisory Committee meetings may be accessed at: *https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm408555.htm.* Information about the College Park Marriott Hotel and Conference Center can be accessed at: *https://www.marriott.com/hotels/travel/wasum-college-park-marriott-hotel-and-conference-center/.*

FDA is establishing a docket for public comment on this meeting. The docket number is FDA–2018–N–4227. The docket will close on January 10, 2019. Submit either electronic or written comments on this public meeting by January 10, 2019. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 10, 2019. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 10, 2019. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Comments received on or before December 27, 2018, will be provided to the committees. Comments received after that date will be taken into consideration by FDA.

You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- Federal eRulemaking Portal: *https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to

the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• Mail/Hand delivery/Courier (for written/paper submissions): Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2018–N–4227 for ''Joint Meeting of the Arthritis Advisory Committee and the Drug Safety and Risk Management Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' FDA will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify the information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Yinghua S. Wang, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 31, Rm. 2417, Silver Spring, MD 20993–0002, 301–796–9001, Fax: 301–847–8533, email: *AAC@fda.hhs.gov,* or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area). A notice in the **Federal Register** about last minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check the FDA's website at *https://www.fda.gov/AdvisoryCommittees/default.htm* and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before coming to the meeting.

SUPPLEMENTARY INFORMATION:

Agenda: The committees will discuss supplemental new drug application (sNDA) 021–856, ULORIC (febuxostat) tablets, sponsored by Takeda Pharmaceuticals, which includes the results from the postmarketing safety trial required by FDA to evaluate the cardiovascular safety of febuxostat, entitled ''Cardiovascular Safety of Febuxostat and Allopurinol in Patients with Gout and Cardiovascular Morbidities (CARES).'' Febuxostat is a xanthine oxidase inhibitor indicated for the chronic management of hyperuricemia in patients with gout. The committees' discussion will include the results from the CARES trial, the benefit risk assessment of febuxostat, and potential regulatory actions.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its website prior to the meeting, the background material will be made publicly available at the location of the advisory committee meeting, and the background material will be posted on FDA's website after the meeting. Background material is available at *https://www.fda.gov/AdvisoryCommittees/Calendar/default.htm.* Scroll down to the appropriate advisory committee meeting link.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committees. Written submissions may be made to the contact person on or before December 27, 2018. Oral presentations from the public will be scheduled between approximately 1 p.m. and 2 p.m. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before December 18, 2018. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by December 19, 2018.

Persons attending FDA's advisory committee meetings are advised that FDA is not responsible for providing access to electrical outlets.

For press inquiries, please contact the Office of Media Affairs at *fdaoma@fda.hhs.gov* or 301–796–4540.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require accommodations due to a disability, please contact Yinghua S. Wang (see **FOR FURTHER INFORMATION**

CONTACT) at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our website at *https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm* for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: November 26, 2018.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2018–N–4131]

Agency Information Collection Activities; Proposed Collection; Comment Request; Food and Drug Administration Adverse Event Reports; Electronic Submissions

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA, Agency, or we) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the use of the FDA Electronic Submission Gateway (ESG) and the Safety Reporting Portal (SRP) to collect adverse event reports and other safety information for FDA-regulated products.

DATES: Submit either electronic or written comments on the collection of information by January 29, 2019.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 29, 2019. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 29, 2019. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2018–N–4131 for ''Agency Information Collection Activities; Proposed Collection; Comment Request; FDA Adverse Event Reports; Electronic Submissions.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.gpo.gov/fdsys/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Domini Bean, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–5733, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party.

Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

FDA Adverse Event Reports; Electronic Submissions—21 CFR 310.305, 314.80, 314.98, 314.540, 514.80, 600.80, 1271.350, and Part 803

OMB Control Number 0910–0645—Extension

The SRP and the ESG are the Agency's electronic systems for collecting, submitting, and processing adverse event reports, product problem reports, and other safety information for FDA-regulated products. To ensure the safety and identify any risks, harms, or other dangers to health for all FDA-regulated human and animal products, the Agency needs to be informed whenever an adverse event, product quality problem, or product use error occurs. This risk identification process is the first necessary step that allows the Agency to gather the information necessary to be able to evaluate the risk associated with the product and take whatever action is necessary to mitigate or eliminate the public's exposure to the risk.

Some adverse event reports are required to be submitted to FDA (mandatory reporting) and some adverse event reports are submitted voluntarily (voluntary reporting). Requirements regarding mandatory reporting of adverse events or product problems have been codified in 21 CFR parts 310, 314, 514, 600, 803, and 1271, specifically §§ 310.305, 314.80, 314.98, 314.540, 329.100, 514.80, 600.80, 803.30, 803.40, 803.50, 803.53, 803.56, and 1271.350(a) (21 CFR 310.305, 314.80, 314.98, 314.540, 329.100, 514.80, 600.80, 803.30, 803.40, 803.50, 803.53, 803.56, and 1271.350(a)). While adverse event reports submitted to FDA in paper format using Forms FDA 3500, 3500A, 1932, and 1932a are approved under OMB control numbers 0910–0284 and 0910–0291, this notice solicits comments on adverse event reports filed electronically via the SRP and the ESG, and currently approved under OMB control number 0910–0645.

II. The FDA Safety Reporting Portal Rational Questionnaires

FDA currently has OMB approval to receive several types of adverse event reports electronically via the SRP using rational questionnaires. In this notice, FDA seeks comments on the extension of OMB approval for these existing rational questionnaires and the proposed revision of the existing rational questionnaire for tobacco products.

A. Reportable Food Registry Reports

The Food and Drug Administration Amendments Act of 2007 (Pub. L. 110–085) (FDAAA) amended the Federal Food, Drug, and Cosmetic Act (FD&C Act) by creating section 417 (21 U.S.C. 350f), Reportable Food Registry (RFR). Section 417 of the FD&C Act defines ''reportable food'' as an article of food (other than infant formula) for which there is a ''reasonable probability that the use of, or exposure to, such article of food will cause serious adverse health consequences or death to humans or animals.'' (See section 417(a)(2) of the FD&C Act.) The Secretary of Health and Human Services (the Secretary) has delegated to the FDA Commissioner the responsibility for administering the FD&C Act, including section 417. The purpose of the RFR is to enable the Agency to track patterns of adulteration in food to support its efforts to target limited inspection resources to protect the public health. We designed the RFR report rational questionnaire to enable FDA to quickly identify, track, and remove from commerce an article of food (other than infant formula and dietary supplements) for which there is a reasonable probability that the use of, or exposure to, such article of food will cause serious adverse health consequences or death to humans or animals. FDA's Center for Food Safety and Applied Nutrition (CFSAN) uses the information collected to help ensure that such products are quickly and efficiently removed from the market to prevent foodborne illnesses. The data elements for RFR reports remain unchanged in this request for extension of OMB approval.

B. Reports Concerning Experience With Approved New Animal Drugs

Section 512(l) of the FD&C Act (21 U.S.C. 360b(l)) and § 514.80(b) of FDA's regulations require applicants of approved new animal drug applications (NADAs) and approved abbreviated new animal drug applications (ANADAs) to report adverse drug experiences and product/manufacturing defects to the Center for Veterinary Medicine (CVM). This continuous monitoring of approved NADAs and ANADAs affords the primary means by which FDA obtains information regarding potential problems with the safety and efficacy of marketed approved new animal drugs as well as potential product/manufacturing problems. Postapproval marketing surveillance is important because data previously submitted to FDA may no longer be adequate, as animal drug effects can change over time and less apparent effects may take years to manifest.

If an applicant must report adverse drug experiences and product/manufacturing defects and chooses to do so using the Agency's paper forms, the applicant is required to use Form FDA 1932, ''Veterinary Adverse Drug Reaction, Lack of Effectiveness, Product Defect Report.'' Periodic drug experience reports and special drug experience reports must be accompanied by a completed Form FDA 2301, ''Transmittal of Periodic Reports and Promotional Material for New Animal Drugs'' (see § 514.80(d)). Form FDA 1932a, ''Veterinary Adverse Drug Reaction, Lack of Effectiveness or Product Defect Report'' allows for voluntary reporting of adverse drug experiences or product/manufacturing defects by veterinarians and the general public. Collection of information using existing paper Forms FDA 2301, 1932, and 1932a is approved under OMB control number 0910–0284.

Alternatively, an applicant may choose to report adverse drug experiences and product/manufacturing defects electronically. The electronic submission data elements to report adverse drug experiences and product/manufacturing defects electronically remain unchanged in this request for extension of OMB approval.

C. Animal Food Adverse Event and Product Problem Reports

Section 1002(b) of FDAAA directed the Secretary to establish an early warning and surveillance system to

identify adulteration of the pet food supply and outbreaks of illness associated with pet food. As part of the effort to fulfill that directive, the Secretary tasked FDA with developing the instrument that would allow consumers to report voluntarily adverse events associated with pet food. We developed the Pet Food Early Warning System rational questionnaire as a user-friendly data collection tool, to make it easy for the public to report a safety problem with pet food. Subsequently, we developed a questionnaire for collecting voluntary adverse event reports associated with livestock food from interested parties such as livestock owners, managers, veterinary staff or other professionals, and concerned citizens. Information collected in these voluntary adverse event reports contribute to CVM's ability to identify adulteration of the livestock food supply and outbreaks of illness associated with livestock food. The Pet Food Early Warning System and the Livestock Food Reports are designed to identify adulteration of the animal food supply and outbreaks of illness associated with animal food to enable us to quickly identify, track, and remove from commerce such articles of food. We use the information collected to help ensure that such products are quickly and efficiently removed from the market to prevent foodborne illnesses. The electronic submission data elements to report adverse events associated with animal food remain unchanged in this request for extension of OMB approval.

D. Voluntary Tobacco Product Adverse Event and Product Problem Reports

As noted, this notice seeks comments on a revision to the existing rational questionnaire utilized by consumers and concerned citizens to report tobacco product adverse event or product problems.

FDA has broad legal authority under the FD&C Act to protect the public health, including protecting Americans from tobacco-related death and disease by regulating the manufacture, distribution, and marketing of tobacco products and by educating the public, especially young people, about tobacco products and the dangers their use poses to themselves and others. The Family Smoking Prevention and Tobacco Control Act (Pub. L. 111–31) amended the FD&C Act by creating a new section 909 (21 U.S.C. 387i, Records and Reports on Tobacco Products). Section 909(a) of the FD&C Act authorizes FDA to establish regulations with respect to mandatory adverse event reports associated with the use of a tobacco product. FDA collects voluntary adverse event reports associated with the use of tobacco products from interested parties such as healthcare providers, researchers, consumers, and other users of tobacco products. Information collected in voluntary adverse event reports contributes to the Center for Tobacco Product's (CTP's) ability to be informed of, and assess the real consequences of, tobacco product use.

The need for this collection of information derives from our responsibility to obtain current, timely, and policy-relevant information to carry out our statutory functions. FDA's Commissioner is authorized to undertake this collection as specified in section 1003(d)(2) of the FD&C Act (21 U.S.C. 393(d)(2)). FDA's CTP has been receiving adverse event and product problem reports through the Safety Reporting Portal since January 2014, when the SRP for tobacco products first became available to the public. CTP also receives adverse event and product problem reports via paper forms, as approved under OMB control number 0910–0291. We are revising the questionnaire with non-substantive changes. The changes are made to make the questions more understandable and specific. In some instances, alterations were made to the list of values to choose from by the end user to include values more pertinent to CTP's current and future data collection needs. In one instance, a question was added about the event location: ''In what setting(s) did this problem occur?'' In still other instances, questions were removed altogether to streamline the questionnaire and make it more user-friendly. All changes were made with the goal of providing FDA more pertinent information while minimizing the burden on the respondent. Finally, we note that respondents unable to submit reports using the electronic system will still be able to provide their information by paper form (by mail or Fax) or telephone.

CTP has two voluntary rational questionnaires on the SRP. The first is utilized by consumers and concerned citizens to report tobacco product adverse event or product problems. A second rational questionnaire is used by tobacco product investigators in clinical trials with investigational tobacco products. In addition to the information collected by the first rational questionnaire for tobacco products, the second rational questionnaire collects identifying information specific to the clinical trial or investigational product such as clinical protocol numbers or other identifying features to pinpoint under which test or protocol the adverse event occurred.

Both CTP voluntary rational questionnaires capture tobacco-specific adverse event and product problem information from reporting entities such as healthcare providers, researchers, consumers, and other users of tobacco products. To carry out its responsibilities, FDA needs to be informed when an adverse event, product problem, or error with use is suspected or identified. FDA uses tobacco-specific adverse event and product problem information to assess and evaluate the risk associated with the product and to take whatever action is necessary to reduce, mitigate, or eliminate the public's exposure to the risk through regulatory and public health interventions. The burden for CTP remains unchanged. We seek approval of the revised rational questionnaire in this request for extension of OMB approval.

E. Dietary Supplement Adverse Event Reports

The Dietary Supplement and Nonprescription Drug Consumer Protection Act (DSNDCPA) (Pub. L. 109–462, 120 Stat. 3469) amended the FD&C Act with respect to serious adverse event reporting and recordkeeping for dietary supplements and nonprescription drugs marketed without an approved application.

Section 761(b)(1) of the FD&C Act (21 U.S.C. 379aa–1(b)(1)) requires the manufacturer, packer, or distributor whose name (under section 403(e)(1) of the FD&C Act (21 U.S.C. 343(e)(1)) appears on the label of a dietary supplement marketed in the United States to submit to FDA all serious adverse event reports associated with the use of a dietary supplement, accompanied by a copy of the product label. The manufacturer, packer, or distributor of a dietary supplement is required by the DSNDCPA to use the MedWatch form (Form FDA 3500A) when submitting a serious adverse event report to FDA. In addition, under section 761(c)(2) of the FD&C Act, the submitter of the serious adverse event report (referred to in the statute as the ''responsible person'') is required to submit to FDA a followup report of any related new medical information the responsible person receives within 1 year of the initial report.

As required by section 3(d)(3) of the DSNDCPA, FDA issued guidance to describe the minimum data elements for serious adverse event reports for dietary supplements. The guidance document entitled ''Guidance for Industry: Questions and Answers Regarding

Adverse Event Reporting and Recordkeeping for Dietary Supplements as Required by the Dietary Supplement and Nonprescription Drug Consumer Protection Act,'' discusses how, when, and where to submit serious adverse event reports for dietary supplements and followup reports. The guidance also provides FDA's recommendation on records maintenance and access for serious and non-serious adverse event reports and related documents.

Reporting of serious adverse events for dietary supplements to FDA serves as an early warning sign of potential public health issues associated with such products. Without notification of all serious adverse events associated with dietary supplements, FDA would be unable to investigate and followup promptly, which in turn could cause delays in alerting the public when safety problems are found. In addition, the information received provides a reliable mechanism to track patterns of adulteration in food that supports efforts by FDA to target limited inspection resources to protect the public health. FDA uses the information collected to help ensure that such products are quickly and efficiently removed from the market to prevent foodborne illnesses.

Paper mandatory dietary supplement adverse event reports are submitted to FDA on the MedWatch form, Form FDA 3500A, and paper voluntary reports are submitted on Form FDA 3500. Forms FDA 3500 and 3500A are available as fillable PDF forms. Dietary supplement adverse event reports may be electronically submitted to the Agency via the SRP. This method of submission is voluntary. A manufacturer, packer, or distributor of a dietary supplement who is unable to or chooses not to submit reports using the electronic system will still be able to provide their information by paper MedWatch form, Form FDA 3500A (by mail or Fax). There is no change to the mandatory information previously required on the MedWatch form. CFSAN is making available the option to submit the same information via electronic means.

The reporting and recordkeeping requirements of the FD&C Act for dietary supplement adverse event reports and the recommendations of the guidance document were first approved in 2009 under OMB control number 0910–0635. OMB approved the extension of the 0910–0635 collection of information in March 2016. OMB approved the electronic submission of dietary supplement adverse event reports via the SRP under OMB control number 0910–0645 in June 2013. Burden hours are also reported under OMB control number 0910–0291, reflecting the submission of dietary supplement adverse event reports on the paper MedWatch form, Form FDA 3500A.

The electronic submission data elements to report adverse events associated with dietary supplement products remain unchanged in this request for extension of OMB approval.

F. Food, Infant Formula, and Cosmetic Adverse Event Reports

We continue to work on proposed new rational questionnaire functionality that will be used for food, infant formula, and cosmetic adverse event reports over the SRP. Currently, voluntary adverse event reports for such products are submitted on Form FDA 3500, which is available as a fillable PDF form. However, we have not developed rational questionnaires by which these reports may be electronically submitted to us via the SRP. In addition, MedWatch forms, although recently updated with field labels and descriptions to better clarify for reporters the range of reportable products, do not specifically include questions relevant for the analysis of adverse events related to food, infant formula, and cosmetics. The proposed food, infant formula, and cosmetics rational questionnaire functionality will operate in a manner similar to the dietary supplement rational questionnaire and will include specific questions relevant for the analysis of adverse events related to food, infant formula, and cosmetics. The electronic submission data elements to report adverse events associated with food, infant formula, and cosmetics products remain unchanged in this request for extension of OMB approval.

III. Information Collection Burden Estimate

Description of respondents: The respondents to this collection of information include all persons submitting mandatory or voluntary adverse event reports electronically to FDA via the ESG or the SRP regarding FDA-regulated products.

We estimate the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Voluntary Adverse Event Report via the SRP (Other than RFR Reports).	1,800	1	1,800	0.6 (36 minutes)	1,080
Mandatory Adverse Event Report via the SRP (Other than RFR Reports).	3,360	1	3,360	1	3,360
Mandatory Adverse Event Report via the ESG (Gateway-to-Gateway transmission).	3,007,000	1	3,007,000	0.6 (36 minutes)	1,804,200
Mandatory and Voluntary RFR Reports via the SRP	1,260	1	1,260	0.6 (36 minutes)	756
Total	.....	.....	3,013,420	.....	1,809,396

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

The Agency's estimate of the number of respondents and the total annual responses in table 1 is based primarily on mandatory and voluntary adverse event reports electronically submitted to the Agency. The estimated total annual responses are based on initial reports. Followup reports, if any, are not counted as new reports. Based on its experience with adverse event reporting, FDA estimates that it will take a respondent 0.6 hour to submit a voluntary adverse event report via the SRP, 1 hour to submit a mandatory adverse event report via the SRP, and 0.6 hour to submit a mandatory adverse event report via the ESG (gateway-to-gateway transmission). Both mandatory and voluntary RFR reports must be submitted via the SRP. FDA estimates that it will take a respondent 0.6 hour to submit a RFR report, whether the submission is mandatory or voluntary.

The burden hours required to complete paper FDA reporting forms (Forms FDA 3500, 3500A, 1932, and 1932a) are reported under OMB control numbers 0910–0284 and 0910–0291. While FDA does not charge for the use of the ESG, the Agency requires respondents to obtain a public key infrastructure certificate to set up the account. This can be obtained in-house or outsourced by purchasing a public key certificate that is valid for 1 year to 3 years. The certificate typically costs from $20 to $30.

Our estimated burden for the information collection reflects an overall increase of 688,547 hours and a corresponding increase of 1,145,763 responses. We attribute this adjustment to an increase in the number of submissions we received over the last few years.

Dated: November 26, 2018.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Meeting of the Advisory Commission on Childhood Vaccines

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Advisory Commission on Childhood Vaccines (ACCV) has scheduled a public meeting. Information about the ACCV and the agenda for this meeting can be found on the ACCV website at: *http://www.hrsa.gov/advisorycommittees/childhoodvaccines/index.html.* This notice is being published less than 15 days prior to the meeting date due to unexpected administrative delays.

DATES: December 6, 2018, at 10:00 a.m. ET.

ADDRESSES: This meeting will be held by teleconference and Adobe Connect webinar. The public can join the meeting by:

1. (Audio Portion) Calling the conference phone number 800–988–0218 and providing the following information: Leader Name: Dr. Narayan Nair, Password: 9302948.

2. (Visual Portion) Connect to the ACCV Adobe Connect Meeting using the following URL: *https://hrsa.connectsolutions.com/accv/.* Participants should call and connect 15 minutes before the meeting starts for logistics to be set up. If you have never attended an Adobe Connect meeting, please test your connection using the following URL: *https://hrsa.connectsolutions.com/common/help/en/support/meeting_test.htm* Get a quick overview at the following URL: *http://www.adobe.com/go/connectpro_overview.*

FOR FURTHER INFORMATION CONTACT: Annie Herzog, Program Analyst, Division of Injury Compensation Programs (DICP), HRSA, 5600 Fishers Lane, 08N146B, Rockville, Maryland 20857; 301–443–6593; or *aherzog@hrsa.gov.*

SUPPLEMENTARY INFORMATION: The ACCV was established by section 2119 of the Public Health Service (PHS) Act (42 U.S.C. 300aa–19), as enacted by Public Law (Pub. L.) 99–660, and as subsequently amended, and advises the Secretary of HHS (the Secretary) on issues related to implementation of the National Vaccine Injury Compensation Program (VICP). During the December 6, 2018, meeting, agenda items will include, but are not limited to, updates from the DICP, Department of Justice (DOJ), National Vaccine Program Office (NVPO), Immunization Safety Office (Centers for Disease Control and Prevention), National Institute of Allergy and Infectious Diseases (National Institutes of Health) and Center for Biologics, Evaluation and Research (Food and Drug Administration). Agenda items are subject to change as priorities dictate. Refer to the ACCV website listed above for any updated information concerning the meeting to include a draft agenda and additional meeting materials that will be posted before the meeting.

Members of the public will have the opportunity to provide comments. Public participants may submit written statements in advance of the scheduled meeting. Oral comments will be honored in the order they are requested and may be limited as time allows. Requests to submit a written statement or make oral comments to the ACCV should be sent to Annie Herzog using the contact information above by Wednesday, December 5, 2018.

Individuals who need special assistance or another reasonable accommodation should notify Annie Herzog at the address and phone number listed above at least 3 business days before the meeting.

Amy P. McNulty,

Acting Director, Division of the Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Meetings Announcement for the Physician-Focused Payment Model Technical Advisory Committee Required by the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA); Correction

ACTION: Notice of public meetings; correction.

SUMMARY: The Department of Health and Human Services published a document in the **Federal Register** of February 05, 2018 detailing the 2018 PTAC meeting dates and the link that connects to the meeting registration website. The December meeting date has been shortened to a one day meeting and the registration link has been updated.

FOR FURTHER INFORMATION CONTACT: Sarah Selenich, Designated Federal Official, at the Office of Health Policy, Assistant Secretary for Planning and Evaluation, U.S. Department of Health and Human Services, 200 Independence Ave. SW, Washington, DC 20201, (202) 690–6870.

SUPPLEMENTARY INFORMATION:

Correction

In the **Federal Register** of February 5, 2018, in FR Doc. 2018–02211, on page 5109, in the first column, correct the ''Dates'' caption to read:

DATES: The 2018 PTAC meetings will occur on the following dates:

- Monday–Tuesday, March 26–27, 2018, from 9:00 a.m. to 5:00 p.m. ET
- Thursday–Friday, June 14–15, 2018, from 9:00 a.m. to 5:00 p.m. ET
- Thursday–Friday, September 6–7, 2018, from 9:00 a.m. to 5:00 p.m. ET
- Monday, December 10, 2018, from 12:30 p.m. to 5:00 p.m. ET

Please note that times are subject to change. If the times change, registrants will be notified directly via email.

Correction

In the **Federal Register** of February 5, 2018, in FR Doc. 2018–02211, on page 5109, in the second column, correct the ''Meeting Registration'' caption to read:

Meeting Registration:

The public may attend the meetings in-person or participate by phone via

audio teleconference. Space is limited and registration is preferred in order to attend in-person or by phone. Registration may be completed online at *http://www.cvent.com/d/gbq2tg.*

The following information is submitted when registering:

Name:

Company/organization name:

Postal address:

Email address:

Persons wishing to attend a PTAC meeting must register by following the instructions in the ''Meeting Registration'' section of this notice. A confirmation email will be sent to registrants shortly after completing the registration process.

Dated: November 14, 2018.

Brenda Destro,

Deputy Assistant Secretary for Planning and Evaluation (HSP).

BILLING CODE 4150–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Cancer Institute; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The purpose of this meeting is to evaluate requests for preclinical development resources for potential new therapeutics for the treatment of cancer. The outcome of the evaluation will provide information to internal NCI committees that will decide whether NCI should support requests and make available contract resources for development of the potential therapeutic to improve the treatment of various forms of cancer. The research proposals and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the proposed research projects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Cancer Institute Special Emphasis Panel, OCT2018 Cycle 30 NExT SEP Committee Meeting.

Date: December 12, 2018.

Time: 9:00 a.m. to 3:00 p.m.

Agenda: To evaluate the NCI Experimental Therapeutics Program Portfolio.

Place: National Institutes of Health, 9000 Rockville Pike, Building 1, Wilson Hall, Bethesda, MD 20892.

Contact Persons: Barbara Mroczkowski, Ph.D., Executive Secretary, Discovery Experimental Therapeutics Program, National Cancer Institute, NIH 31 Center Drive, Room 3A44, Bethesda, MD 20817, (301) 496–4291, *mroczkoskib@mail.nih.gov.*

Toby Hecht, Ph.D., Executive Secretary, Development Experimental Therapeutics Program, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 3W110, Rockville, MD 20850, (240) 276–5683, *toby.hecht2@nih.gov.*

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospective Grant of an Exclusive Patent License: Agonist/Antagonist Compositions and Methods of Use

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The National Cancer Institute, an institute of the National Institutes of Health, Department of Health and Human Services, is contemplating the grant of an Exclusive Patent License to practice the inventions embodied in the Patents and Patent Applications listed in the Supplementary Information section of this notice to Bull Run Capital, Inc. located in Vancouver, BC, Canada.

DATES: Only written comments and/or applications for a license which are received by the National Cancer Institute's Technology Transfer Center on or before December 17, 2018 will be considered.

ADDRESSES: Requests for copies of the patent application, inquiries, and comments relating to the contemplated an Exclusive Patent License should be directed to: Jaime M. Greene, Senior Licensing and Patenting Manager, NCI Technology Transfer Center, 9609 Medical Center Drive, RM 1E530 MSC 9702, Bethesda, MD 20892–9702 (for business mail), Rockville, MD 20850–9702; Telephone: (240) 276–5530; Facsimile: (240) 276–5504; Email: *greenejaime@mail.nih.gov.*

SUPPLEMENTARY INFORMATION:

Intellectual Property

U.S. Provisional Patent Application No. 61/340,063, filed March 12, 2018, now abandoned, titled ''Agonist/Antagonist Compositions and Methods of Use'', HHS Ref. No.: E–048–2010–0–US–01;

PCT Patent Application Serial No. PCT/US2011/028132, filed March 11, 2011, now abandoned, HHS Reference Number E–048–2010–0–PCT–02 titled ''Agonist/antagonist compositions and methods of use'';

U.S. Patent 9,277,748 (Application No. 13/634,447) filed March 11, 2011, issued March 8, 2016, titled ''Agonist/antagonist compositions and methods of use'', HHS Ref. No.: E–048–2010–0–US–04;

Canada Patent Application Serial No. 2,792,878, filed March 11, 2011, HHS Reference Number E–048–2010–0–CA–03 titled ''Agonist/antagonist compositions and methods of use''; and

U.S. Patent Application Serial No 15/010,830, filed January 29, 2016, HHS Reference Number E–048–2010–0–US–05, titled ''Agonist/antagonist compositions and methods of use''.

The patent rights in these inventions have been assigned and/or exclusively licensed to the government of the United States of America.

The prospective exclusive license territory may be worldwide and the field of use may be limited to: ''Use of the TRVP1 antagonists BCTC, AMG9810, JYL–827, Capsazepine or IodoRTX combined with a TRVP1 agonist in a composition for the temporary incapacitation of a subject.''

This technology discloses novel compositions comprising a transient receptor potential cation channel subfamily V member 1 (TRPV1) receptor agonist and an antagonist in certain ratios which allow for the onset of agonist action followed by alleviation by antagonist action, and methods of use in personal defense and law enforcement.

Non-lethal means of temporarily incapacitating a person are needed for law enforcement and for personal protection. A common approach currently is to use pepper spray. Although current pepper sprays are effective, and relatively safe, for most individuals, they can be life threatening for people who suffer from asthma and have hypersensitive airways.

In order to reduce the length of time the pepper spray can cause the adverse effects that could result from extended exposure, inventors at NCI have created a composition comprising both an incapacitating pepper spray TRPV1 receptor agonist compound and a slower-acting TRPV1 receptor antagonist compound that reverses the effects of the agonist. The agonist/antagonist composition is intended to be used as an aerosol or spray, that, when administered, causes a painful stimulation and incapacitates a person for only a short period of time. This technology may fill a public health need by improving safety over currently available pepper sprays.

This notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license will be royalty bearing, and the prospective exclusive license may be granted unless within fifteen (15) days from the date of this published notice, the National Cancer Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a license application, will not be treated confidentially, and may be made publicly available.

License applications submitted in response to this Notice will be presumed to contain business confidential information and any release of information in these license applications will be made only as required and upon a request under the Freedom of Information Act, 5 U.S.C. 552.

Dated: November 9, 2018.

Richard U. Rodriguez,

Associate Director, Technology Transfer Center, National Cancer Institute.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2018–0002]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: New or modified Base (1-percent annual chance) Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, and/or regulatory floodways (hereinafter referred to as flood hazard determinations) as shown on the

indicated Letter of Map Revision (LOMR) for each of the communities listed in the table below are finalized. Each LOMR revises the Flood Insurance Rate Maps (FIRMs), and in some cases the Flood Insurance Study (FIS) reports, currently in effect for the listed communities. The flood hazard determinations modified by each LOMR will be used to calculate flood insurance premium rates for new buildings and their contents.

DATES: Each LOMR was finalized as in the table below.

ADDRESSES: Each LOMR is available for inspection at both the respective Community Map Repository address listed in the table below and online through the FEMA Map Service Center at *https://msc.fema.gov.*

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *https://www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final flood hazard determinations as shown in the LOMRs for each community listed in the table below. Notice of these modified flood hazard determinations has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

The modified flood hazard determinations are made pursuant to section 206 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.,* and with 44 CFR part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The new or modified flood hazard information is the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to remain qualified for participation in the National Flood Insurance Program (NFIP).

This new or modified flood hazard information, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities.

This new or modified flood hazard determinations are used to meet the floodplain management requirements of the NFIP and are used to calculate the appropriate flood insurance premium rates for new buildings, and for the contents in those buildings. The changes in flood hazard determinations are in accordance with 44 CFR 65.4.

Interested lessees and owners of real property are encouraged to review the final flood hazard information available at the address cited below for each community or online through the FEMA Map Service Center at *https://msc.fema.gov.*

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2018–0002]

Final Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: Flood hazard determinations, which may include additions or modifications of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or regulatory floodways on the Flood Insurance Rate Maps (FIRMs) and where applicable, in the supporting Flood Insurance Study (FIS) reports have been made final for the communities listed in the table below.

The FIRM and FIS report are the basis of the floodplain management measures that a community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report are used by insurance agents and others to calculate appropriate flood insurance premium rates for buildings and the contents of those buildings.

DATES: The date of February 15, 2019 has been established for the FIRM and, where applicable, the supporting FIS report showing the new or modified flood hazard information for each community.

ADDRESSES: The FIRM, and if applicable, the FIS report containing the final flood hazard information for each community is available for inspection at the respective Community Map Repository address listed in the tables below and will be available online through the FEMA Map Service Center at *https://msc.fema.gov* by the date indicated above.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *https://www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the new or modified flood hazard information for each community listed. Notification of these changes has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

This final notice is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the new or revised FIRM and FIS report available at the address cited below for each community or online through the FEMA Map Service Center at *https://msc.fema.gov.* The flood hazard determinations are made final in the watersheds and/or communities listed in the table below.

(Catalog of Federal Domestic Assistance No. 97.022, ''Flood Insurance.'')

David I. Maurstad,

Deputy Associate Administrator for Insurance and Mitigation, Department of Homeland Security, Federal Emergency Management Agency.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4401–DR; Docket ID FEMA–2018–0001]

Virginia; Amendment No. 3 to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster declaration for the Commonwealth of Virginia (FEMA–4401–DR), dated October 15, 2018, and related determinations.

DATES: This amendment was issued November 15, 2018.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: The notice of a major disaster declaration for the Commonwealth of Virginia is hereby amended to include the following areas among those areas determined to have been adversely affected by the event declared a major disaster by the President in his declaration of October 15, 2018.

The counties of Botetourt, Chesterfield, Franklin, Lunenburg, Mathews, Mecklenburg, Nottoway, Pulaski, and Roanoke and the independent cities of Bristol, Danville, and Martinsville for Public Assistance.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050 Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Brock Long,

Administrator, Federal Emergency Management Agency.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–R1–ES–2018–0095; FXES11140100000–190–FF01E00000]

Draft Environmental Impact Statement and Draft Habitat Conservation Plan; Receipt of an Application for an Incidental Take Permit for Marbled Murrelets, Bald Eagles, and Golden Eagles; Skookumchuck Wind Energy Project, Lewis and Thurston Counties, Washington

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: In accordance with the Endangered Species Act (ESA) and the National Environmental Policy Act, we, the U.S. Fish and Wildlife Service (Service), announce the availability of a draft habitat conservation plan (HCP) in support of an application from Skookumchuck Wind Energy Project, LLC, an affiliate of Renewable Energy Services (applicant), for an incidental take permit (ITP) for the marbled murrelet, listed as threatened under the ESA, and the bald eagle and golden eagle, both of which are protected under the Bald and Golden Eagle Protection Act. Incidental take is expected to result from the operation of 38 commercial wind turbines and associated infrastructure located near Centralia, Washington, in Lewis and Thurston Counties. Also available for review is the Service's draft environmental impact statement (DEIS), which was prepared in response to the application. We are seeking public comments on the draft HCP and DEIS.

DATES: We will accept hardcopy comments received or postmarked on or before January 14, 2019. Comments submitted online at *https://www.regulations.gov/* (see **ADDRESSES**) must be received by 11:59 p.m. Eastern Time on January 14, 2019.

Public Meetings: The Service will host two open house public meetings at the following times during the public comment and review period:

- Chehalis, WA: Wednesday, December 5, 2018, from 6 to 8 p.m.
- Lacey, WA: Monday, December 10, 2018, from 6 to 8 p.m.

ADDRESSES: *Obtaining Documents for Review:* The documents this notice announces, as well as any comments and other material that we receive, will be available for public inspection online in Docket No. FWS–R1–ES–2018–0095 at *http://www.regulations.gov/.*

Submitting Comments: You may submit comments by one of the following methods:

- *Online: http://www.regulations.gov.* Follow instructions for submitting comments on Docket No. FWS–R1–ES–2018–0095.
- *U.S. mail or hand-delivery:* U.S. Fish and Wildlife Service, c/o Tim Romanski, 510 Desmond Dr. SE, Suite 102, Lacey, WA 98503.
- *Public meetings:* You may also submit written comments during public meetings. The meetings will be held at the following locations:
- 100 SW Veterans Way, Chehalis, WA 98532
- 4220 6th Avenue SE, Room 194, Lacey, WA 98503

We will post all comments on *http://www.regulations.gov.* This generally means that we will post online any personal information that you provide (see Public Availability of Comments under **SUPPLEMENTARY INFORMATION**). We request that you send comments by only the methods described above.

Reviewing U.S. Environmental Protection Agency (EPA) comments on the draft HCP and DEIS: See EPA's Role in the EIS Process under **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Tim Romanski, by telephone at 360–753–5823, or by email at *tim_romanski@fws.gov.* Hearing or speech impaired individuals may call the Federal Relay Service at 800–877–8339 for TTY assistance.

SUPPLEMENTARY INFORMATION: The Service received an incidental take permit (ITP) application from the Skookumchuck Wind Energy Project, LLC (applicant) in accordance with the requirements of the Endangered Species Act, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The applicant prepared a draft habitat conservation plan (HCP) in support of the ITP application and is seeking authorization for take of the marbled murrelet (*Brachyamphus marmoratus*), listed as threatened under the ESA, and the bald eagle (*Haliaeetus leucocephalus*) and golden eagle (*Aquila chrysaetos*), which are not listed species under the ESA but are protected by the Bald and Golden Eagle Protection Act (BGEPA; 16 U.S.C. 668–668d). Hereafter, the marbled murrelet, bald eagle, and golden eagle are collectively referred to as the ''covered species.''

The ITP, if issued, would authorize incidental take of the covered species that may occur as a result of the operation and maintenance of the 38 commercial wind turbines over the 30-year permit term. This includes, without limitation, ITP coverage for covered species colliding with both stationary and operating project structures during the permit term. In contrast, the applicant does not seek ITP coverage for the construction phase of the wind project, which would include, without limitation, constructing roads and turbine pads, and erecting wind turbines. Nor does the applicant seek ITP coverage for the facility-decommissioning phase of the project. The applicant anticipates undertaking phased construction over a 9- to 12-month period beginning in mid-2019.

The draft HCP describes how impacts to covered species would be minimized and mitigated. The draft HCP also describes the covered species' life history and ecology, as well as biological goals and objectives of the HCP, the estimated take and its potential impact on covered species' populations, adaptive management, monitoring, and mitigation measures.

The Service prepared a draft environmental impact statement (DEIS) in response to the ITP application in accordance with the requirements of the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*). We are making the draft HCP and DEIS available for public review and comment.

Background

Skookumchuck Wind Energy Project, LLC, intends to initiate construction of a wind turbine facility in 2019, and commence wind turbine operations as soon as possible. Detailed descriptions of the project are found in section 2.0 of the HCP. The majority of the wind project, including all of the 38 turbines, is located in Lewis County, Washington, with some supporting infrastructure located in Thurston County, Washington. The wind turbines are proposed to be constructed on a prominent ridgeline on the Weyerhaeuser Vail Tree Farm, approximately 18 miles east of Centralia, Washington.

The project consists of a maximum of 38 wind turbines, with an expected output of 137 megawatts (MW); a maximum wind turbine height of 492 feet (from ground to vertical blade tip); a maximum rotor diameter of 446 feet; approximately 36.5 miles of existing roads that will be upgraded; approximately 3.9 miles of new road that will be constructed; 17 miles of buried medium-voltage collection cable that will transport power to a substation along the ridgeline; and 15 miles of transmission line that will transport power to the Tono Substation.

The applicant has proposed a conservation program to avoid, minimize, and mitigate for impacts to covered species. Avoidance and minimization measures to benefit the marbled murrelet include project design and planning efforts, and operational practices including seasonal curtailment of turbine blades, installation of transmission and distribution line flight diverters, shielding of artificial light sources, measures to reduce murrelet collisions with vehicles on the project site, and measures to prevent the artificial increase of potential nest predators in the project area. Mitigation measures intended to benefit the marbled murrelet include acquisition and management of conservation lands to promote the preservation and enhancement of suitable nesting habitat for the species, and funding the removal of abandoned or derelict fishing nets in the Salish Sea.

Avoidance and minimization measures to benefit the bald eagle and the golden eagle include project design and planning efforts, a mammal carrion reporting program to reduce scavenging by eagles on the project site, efforts that minimize creating cover for prey animals such as rabbits to reduce eagle use near the wind project, and 2 years of IdentiFlight® technology testing intended to reduce eagle collisions with operating turbine blades. Mitigation measures intended to benefit bald eagles and golden eagles consist of retrofitting power poles to reduce probability of collision and electrocution.

Proposed Action

We propose to issue a 30-year permit for incidental take of marbled murrelet, bald eagle, and golden eagle if the Skookumchuck Wind Energy Project HCP meets all section 10(a)(1)(B) permit issuance criteria and, with respect to bald eagles and golden eagles, all BGEPA permit issuance criteria identified in 50 CFR 22.26 . The permit would authorize take of each of the covered species incidental to the operation and maintenance of the wind energy project.

Endangered Species Act

Section 9 of the ESA and its implementing regulations prohibit ''take'' of fish and wildlife species listed as endangered. The ESA implementing regulations extend, under certain circumstances, the prohibition of take to threatened species (50 CFR 17.31). Under section 3 of the ESA, the term ''take'' means to ''harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to engage in any such conduct'' (16 U.S.C. 1538). Under section 10(a) of the ESA, the Service may issue permits to authorize

incidental take of listed fish and wildlife species. ''Incidental take'' is defined by the ESA as take that is incidental to, and not the purpose of, carrying out an otherwise lawful activity. Section 10(a)(1)(B) of the ESA contains provisions for issuing ITPs to non-Federal entities for the take of endangered and threatened species, provided the following criteria are met:

1. The taking will be incidental;
2. The applicant will, to the maximum extent practicable, minimize and mitigate the impact of such taking;
3. The applicant will ensure that adequate funding for the plan will be provided;
4. The taking will not appreciably reduce the likelihood of the survival and recovery of the species in the wild; and
5. The applicant will carry out any other measures that the Service may require as being necessary or appropriate for the purposes of the HCP.

Bald and Golden Eagle Protection Act

Though the applicant is requesting incidental take for bald and golden eagles under section 10(a)(1)(B) of the ESA, consistency with the requirements of BGEPA (16 U.S.C. 668–668d) is also necessary. The BGEPA prohibits take of eagles where ''take'' is defined as ''pursue, shoot, shoot at, poison, wound, kill, capture, trap, collect, destroy, molest, or disturb'' and where ''disturb'' is further defined as ''to agitate or bother'' a bald or golden eagle to a degree that causes, or is likely to cause, based on the best scientific information available: (1) Injury to an eagle; (2) a decrease in its productivity, by substantially interfering with normal breeding, feeding, or sheltering behavior; or (3) nest abandonment, by substantially interfering with normal breeding, feeding, or sheltering behavior (50 CFR 22.3).

Under 50 CFR 22.26, the Service has the authority to authorize take of bald and golden eagles (generally, disturbance, injury, or killing) that occurs incidental to an otherwise lawful activity. For the Service to issue such a permit, the following required determinations must be met (see 50 CFR 22.26(f)):

1. The taking will be compatible with the preservation of the bald or golden eagle (further defined by the Service to mean ''consistent with the goals of maintaining stable or increasing breeding populations in all eagle management units and the persistence of local populations throughout the geographic range of each species'');
2. The taking will protect an interest in a particular locality;
3. The taking will be associated with, but not the purpose of, the activity;
4. The taking will be avoided and minimized by the applicant to the extent practicable;
5. The applicant will have applied all appropriate and practical compensatory mitigation measures, when required pursuant to 50 CFR 22.26(c);
6. Issuance of the permit will not preclude issuance of another permit necessary to protect an interest of higher priority as set forth in 50 CFR 22.26(e)(7); and
7. Issuance of the permit will not interfere with ongoing civil or criminal action concerning unpermitted past eagle take at the project.

The Service can provide eagle take authorization through an ITP for an HCP, which confers take authorization under the BGEPA without the need for a separate permit, as long as the permit issuance criteria under both ESA and BGEPA will be met by the conservation measures included in the applicant's HCP. *See* 50 CFR 22.11(a).

National Environmental Policy Act

In compliance with NEPA (42 U.S.C. 4321 *et seq.*), the Service prepared a DEIS, in which we analyze the proposed action and a reasonable range of alternatives to the proposed action. Four alternatives are analyzed in the DEIS.

- *No-action Alternative (Options A and B):* No permit would be issued, and the applicant's HCP would not be implemented. The No Action consists of two options: Option A—No Project Operations and Option B—No Project. Option A assumes the applicant would construct the project before the Service makes a final permit decision, but would not operate the project without an ITP. Option A is included in the DEIS because the Applicant informed the Service that it may initiate and complete construction before the Service makes a decision on the ITP application. Option B assumes that the applicant would not construct the project without an ITP. Under this option, nothing would change from current conditions and no impacts would result from the project.
- *The Proposed Alternative:* Issuance of the requested permit and implementation of the conservation program described in the applicant's HCP.
- *Alternative 2:* Under the Modified Project Site Design Alternative, the project would not operate the five wind turbine generators (WTGs) closest to documented marbled murrelet nest locations for the duration of the ITP. The Service would issue an ITP authorizing the level of incidental take expected to result from operation and maintenance of the remaining 33 WTGs.
- *Alternative 3:* Under the Enhanced Curtailment Alternative, all 38 WTGs would operate under an expanded set of curtailment measures intended to minimize the potential for take of the Covered Species. The Service would issue an ITP authorizing the level of incidental take expected to result from operation and maintenance of the project in accordance with the additional curtailment measures.

The environmental consequences of each alternative were analyzed to determine if significant environmental impacts would occur.

EPA's Role in the EIS Process

The EPA is charged with reviewing all Federal agencies' EISs and commenting on the adequacy and acceptability of the environmental impacts of proposed actions in EISs. Therefore, EPA is publishing a notice in the **Federal Register** announcing this EIS, as required under section 309 of the Clean Air Act. The publication date of EPA's notice of availability is the official beginning of the public comment period. EPA's notices are published on Fridays.

EPA serves as the repository (EIS database) for EISs prepared by Federal agencies. All EISs must be filed with EPA. You may search for EPA comments on EISs, along with EISs themselves, at *https://cdxnodengn.epa.gov/cdx-enepa-public/action/eis/search.*

Public Comments

You may submit your comments and materials by one of the methods in **ADDRESSES**. We will also accept written comments at the public meetings. We specifically request information on the following:

1. The identification and evaluation of archaeological and historic resources that the proposed project may affect;
2. The proposed adaptive management framework for marbled murrelets and for bald and golden eagles;
3. Potential impacts to the human environment that may occur during the construction or decommissioning phases of the project (*e.g.,* through collisions with construction equipment, stationary wind turbines, or associated infrastructure);
4. Biological information and relevant data concerning the covered species and other wildlife;
5. Information on bald eagle, golden eagle, and marbled murrelet collisions with both stationary and moving objects such as wind turbines in the terrestrial

environment, particularly in a forested environment;

6. Potential direct, indirect, and cumulative impacts that implementation of the proposed wind project and mitigation/minimization measures could have on the covered species; and other endangered or threatened species, and their associated ecological communities or habitats; and other aspects of the human environment;

7. Whether there are additional connected, similar, or reasonably foreseeable cumulative actions and their possible impacts on the human environment including, without limitation, marbled murrelet, bald eagle, and golden eagle, which were not identified in the DEIS;

8. Other possible reasonable alternatives to the proposed permit action that the Service should consider, including additional or alternative avoidance, minimization, and mitigation measures; and

9. Other information relevant to the proposed wind project and impacts to the human environment.

Public Availability of Comments

We will post on *http://regulations.gov* all public comments and information received electronically or via hardcopy. Written comments we receive become part of the administrative record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request in your comment that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Reasonable Accommodations

Persons needing reasonable accommodations in order to attend and participate in the public meetings should contact the Service's Washington Fish and Wildlife Office, using one of the methods listed in **ADDRESSES** as soon as possible. In order to allow sufficient time to process requests, please make contact no later than one week before the public meetings. Information regarding this proposed action is available in alternative formats upon request.

Authority: We provide this notice in accordance with the requirements of section 10 of the ESA (16 U.S.C. 1531 *et seq.*) and NEPA regulations (40 CFR 1501.7, 40 CFR 1506.5, 1506.6, and 1508.22).

Katherine B. Hollar,

Acting Deputy Regional Director, Pacific Region, U.S. Fish and Wildlife Service.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–HQ–FAC–2018–N135; FXFR13360900000–FF09F14000–189]

Aquatic Nuisance Species Task Force Meeting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of meeting.

SUMMARY: We, the U.S. Fish and Wildlife Service, announce a public meeting of the Aquatic Nuisance Species (ANS) Task Force, in accordance with the Federal Advisory Committee Act. The ANS Task Force's purpose is to develop and implement a program for U.S. waters to prevent introduction and dispersal of aquatic invasive species; to monitor, control, and study such species; and to disseminate related information.

DATES: The ANS Task Force will meet Wednesday and Thursday, December 12–13, 2018, from 8 a.m. to 5 p.m. each day. The meeting is open to the public; for security purposes, signup is required. For more information, contact the ANS Task Force Executive Secretary (see **FOR FURTHER INFORMATION CONTACT**). This notice is being published less than 15 days prior to the meeting date due to unexpected administrative delays.

ADDRESSES: *Meeting location:* The ANS Task Force meeting will take place at the U.S. Fish and Wildlife Headquarters, 5275 Leesburg Pike, Falls Church, VA 22041.

Comment submission: You may submit written comments in advance of the meeting by emailing them to the ANS Task Force Executive Secretary (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Susan Pasko, ANS Task Force Executive Secretary, by telephone at (703) 358–2466, or by email at *Susan_Pasko@fws.gov.*

Accessibility: The U.S. Fish and Wildlife Service is committed to providing access to this meeting for all participants. Please direct all requests for sign language interpreting services, closed captioning, or other accommodation needs to the ANS Task Force Executive Secretary, by using the contact information above or via TTY at 800–877–8339, by close of business on December 5, 2018.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), announce a public meeting of the Aquatic Nuisance Species (ANS) Task Force, in accordance with the Federal Advisory Committee Act (5 U.S.C. Appendix 2). The ANS Task Force was established by the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990, as amended (NANPCA; 16 U.S.C. 4701 *et seq.*), is composed of 13 Federal and 15 ex-officio members, and is co-chaired by the U.S. Fish and Wildlife Service and the National Oceanic and Atmospheric Administration. The ANS Task Force's purpose is to develop and implement a program for U.S. waters to prevent introduction and dispersal of aquatic invasive species; to monitor, control, and study such species; and to disseminate related information.

Meeting Agenda

- Discuss the content of the draft ANS Task Force Strategic Plan for 2019–2024.
- Review and discuss the draft ANS Task Force Report to Congress for 2016–2017.
- Respond to recommendations from the ANS Task Force regional panels.

The final agenda and other related meeting information will be posted on the Task Force website at *http://anstaskforce.gov.* Summary minutes of the meeting will be maintained by the Executive Secretary and will be available for public inspection within 90 days after the meeting at *http://anstaskforce.gov.*

Public Input

If you comment, before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 5 U.S.C. Appendix 2.

David Hoskins,

Co-Chair, Aquatic Nuisance Species Task Force, Assistant Director for Fish and Aquatic Conservation.

[FR Doc. 2018–26019 Filed 11–27–18; 11:15 am]

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Geological Survey

[GX18LR000F60100; OMB Control Number 1028–0062]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Industrial Minerals Surveys

AGENCY: U.S. Geological Survey (USGS), Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the U.S. Geological Survey is proposing to renew an information collection.

DATES: Interested persons are invited to submit comments on or before December 31, 2018.

ADDRESSES: Send written comments on this information collection request (ICR) to the Office of Management and Budget's Desk Officer for the Department of the Interior by email at *OIRA_Submission@omb.eop.gov;* or via facsimile to (202) 395–5806. Please provide a copy of your comments to U.S. Geological Survey, Information Collections Officer, 12201 Sunrise Valley Drive MS 159, Reston, VA 20192; or by email to *gs-info_collections@usgs.gov.* Please reference OMB Control Number 1028–0062 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Elizabeth S. Sangine by email at *escottsangine@usgs.gov,* or by telephone at 703–648–7720. You may also view the ICR at *http://www.reginfo.gov/public/do/PRAMain.*

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995, we provide the general public and other Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on July 9, 2018, 83 FR 31767. We did not receive any public comments in response to that notice.

We are again soliciting comments on the proposed ICR that is described below. We are especially interested in public comment addressing the following issues: (1) Is the collection necessary for the USGS to perform its duties, including whether the information is useful; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, usefulness, and clarity of the information to be collected; and (4) how to minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Abstract: Respondents to these forms supply the USGS with domestic production and consumption data of industrial mineral commodities, some of which are considered strategic and critical to assist in determining National Defense Stockpile goals. These data and derived information will be published as chapters in Minerals Yearbooks, monthly Mineral Industry Surveys, annual Mineral Commodity Summaries, and special publications, for use by Government agencies, industry education programs, and the general public.

Title of Collection: Industrial Minerals Surveys.

OMB Control Number: 1028–0062.

Form Number: Various, 38 forms.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Business or Other-For-Profit Institutions: U.S. nonfuel minerals producers and consumers of industrial minerals. Public sector: State and local governments.

Total Estimated Number of Annual Responses: 17,533.

Total Estimated Number of Annual Burden Hours: 12,055 hours.

Total Estimated Number of Annual Respondents: 14,957.

Estimated Completion Time per Response: 10 minutes to 5 hours.

Respondent's Obligation: Voluntary.

Frequency of Collection: Monthly, Quarterly, Semiannually, or Annually.

Total Estimated Annual Nonhour Burden Cost: There are no ''nonhour cost'' burdens associated with this IC.

The authorities for this action are the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*), the National Materials and Minerals Policy, Research and Development Act of 1980 (30 U.S.C. 1601 *et seq.*), and the National Mining and Minerals Policy Act of 1970 (30 U.S.C. 21(a)).

Michael Magyar,

Associate Director, National Minerals Information Center.

[FR Doc. 2018–26053 Filed 11–29–18; 8:45 am]

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLUTW02000–L51010000–ER0000–LVRWJ18J5120–18X—UTU–90095]

Notice of Availability of the Draft Environmental Impact Statement for the Sevier Playa Potash Project, Utah

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act (NEPA) of 1969, as amended, the Federal Land Policy and Management Act of 1976, as amended, the Mineral Leasing Act of 1920, as amended, and Secretarial Order 3355, the Bureau of Land Management (BLM) is releasing the Draft Environmental Impact Statement (EIS) for Crystal Peak Minerals Inc.'s (CPM) Sevier Playa Potash Project (Project), and by this notice is announcing the opening of the comment period.

DATES: To ensure comments will be considered, the BLM must receive written comments on the Project Draft EIS within 45 days following the date the Environmental Protection Agency publishes its Notice of Availability in the **Federal Register**. The BLM will

announce future meetings or hearings and any other public involvement activities at least 15 days in advance through public notices, media releases, and/or mailings.

ADDRESSES: You may submit comments related to the Draft EIS for the Project by any of the following methods:

- *Email: blm_ut_fm_sevier_playa_potash_project@blm.gov.*
- *Fax:* (435) 743–3136.
- *Mail:* Bureau of Land Management Fillmore Field Office, Attn: Clara Stevens—Sevier Playa Potash Project Comments, 95 East 500 North, Fillmore, UT 84631.

Electronic versions of the Project Draft EIS, appendices, and supporting documents can be downloaded from ePlanning at *https://bit.ly/2CZPeWy.* Paper and digital copies of the Project Draft EIS and supporting documents are available for review at:

(1) The BLM Fillmore Field Office at the above address;

(2) The BLM West Desert District Office at 2370 South Decker Lake Blvd., West Valley City, UT;

(3) The Fillmore City Library at 75 West Center, Fillmore, UT; and

(4) The Delta City Library at 76 North 200 West, Delta, UT.

FOR FURTHER INFORMATION CONTACT: Clara Stevens, Project Manager, telephone (435) 743–3119; address 95 East 500 North, Fillmore, UT 84631; email *clsteven@blm.gov.* Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: On March 12, 2014, the BLM published a Notice of Intent to Prepare an EIS in the **Federal Register** (79 FR 14078).

The Project would be located in central Millard County in southwestern Utah. The Sevier Playa is a large terminal playa that is normally dry on the surface and contains subsurface potassium-bearing saline brines. The playa is approximately 26 miles long and averages 8 miles wide.

CPM holds or through agreement controls the rights to develop and operate potassium mineral leases on 117,814 acres of Federal lands administered by the BLM and an additional 6,409 acres of state lands. CPM proposes to exercise their lease rights by constructing and operating the Project, which would produce at its peak approximately 372,000 tons per year of potassium sulfate (K_2SO_4), also known as sulfate of potash (SOP), and related minerals over the 32-year lifetime of the Project.

The Project is a potash mine proposed on 124,223 acres of Federal and State mineral leases. The proposal includes mining facilities located on-lease with off-lease supporting infrastructure. On-lease facilities include evaporation ponds; a brine extraction system (trenches, wells, and conveyance canals); a recharge system (trenches, canals, and Sevier River diversion); a waste product storage area (purge brine and tailings); access roads, and processing facilities. The off-lease ROW facilities, proposed on approximately 4,135 acres, include power and communication lines, a natural gas pipeline, a rail loadout facility and rail spur; water supply wells; communication towers; preconcentration ponds; segments of recharge canals and the playa perimeter road; and access roads. Three gravel pits would also be developed.

Potassium-bearing brines would be extracted from trenches and wells on the Sevier Playa, and routed through a series of ponds, using solar evaporation to concentrate the brine. The preconcentration ponds would concentrate the brine causing halite (NaCl, table salt) and other non-commercial salts to precipitate. These salts would be stored in the preconcentration ponds. The saturated brine would be transferred to the production ponds for further evaporation, causing potassium-rich salts to precipitate. The production ponds would be harvested year-round, with the potassium-rich salts moved directly to a facility for processing into SOP. The SOP would be trucked to the rail loadout facility for distribution. Purge brine containing primarily magnesium chloride ($MgCl_2$) would be removed from the production ponds before harvesting begins and would be piped to an on-playa purge brine storage pond. Process by-products (solid tailings) from the processing facility would be trucked to the on-playa tailings storage area.

The Draft EIS analyzes CPM's Mining Plan, prepared for development of Federal potassium mineral leases acquired in 2011 and potash mineral leases acquired on State lands. These leases were amalgamated under BLM casefile number UTU–88387. In addition, the Draft EIS analyzes CPM's request for rights-of-way (ROWs) to construct various ancillary facilities on public lands in the vicinity of the mineral leases, but outside the lease boundary. CPM prepared a Plan of Development (POD) for the ROWs that they have requested. The Draft EIS also analyzes CPM's request to purchase mineral materials for gravel to support construction and operation of the Project. Although the BLM may only make decisions pertaining to public lands managed by the BLM, the EIS analyzes the complete Project including portions located on state and private lands.

This Draft EIS evaluates, in detail, the no action alternative, the proposed action, and five action alternatives. Alternative 1 would route a cross-country segment of the off-lease 69-kV power and communication line to an alignment along existing roads, including SR 257 and SR–257 Cutoff Road. Alternative 2 would route a cross-country segment of the off-lease 69-kV power and communication line to a more southern orientation along existing roads, including Crystal Peak Road and Crystal Peak Spur Road. Alternative 3 would route a segment of the off-lease natural gas pipeline entirely on BLM land to avoid crossing private lands. Alternative 4 would route a cross-country segment of the off-lease natural gas pipeline to a similar alignment as Alternative 2 along existing roads, including Crystal Peak Road and Crystal Peak Spur Road. Alternative 5 is an alternative method of diverting flows from the Sevier River into the recharge system. This alternative would relocate the on-lease Sevier River diversion facilities, including diversion channel, recharge canal, diversion culvert and sump, and perimeter and access roads slightly to the west, within the boundary of the playa.

Based on public scoping and internal review, the principal issues analyzed in the Draft EIS include: (1) Impacts to water resources and water quality including adverse effects to surface water and groundwater basins, as well as impacts to existing water rights holders; (2) adverse effects to air quality in the form of fugitive dust produced during construction and operation of the mine facilities; (3) impacts to cultural resources and historic properties, including rock art and subsurface features; (4) impacts to migratory bird populations; and (5) the socioeconomic effects of water right acquisition for recharge water. Analysis also includes impacts to the following resources: Visual, wildlife, access, range management, recreation, and soils.

The BLM published a Notice of Intent for the Project on March 12, 2014. Scoping was extended through August 31, 2015, due to Project delays. A public scoping meeting was held in Delta, Utah, on August 5, 2015. The public

was offered the opportunity to provide written comments throughout the scoping process.

In 2015, pursuant to Executive Order 13175, the BLM initiated government-to-government consultation with interested tribes, including the Confederated Tribes of the Goshute Reservation, the Hopi Tribe, the Kaibab Band of Paiute Indians, the Kanosh Band of Paiute Indians, the Navajo Nation, the Paiute Indian Tribe of Utah, the Skull Valley Band of Goshute, and the Ute Indian Tribe. Beginning in 2015, the BLM coordinated with the Utah State Historic Preservation Office and seven other consulting parties that requested to participate in the Section 106 process, to develop a Programmatic Agreement to outline a process to be used to avoid, mitigate, or treat adverse effects to historic properties.

In August 2015, the BLM invited agencies to participate as Cooperating Agencies in the Project. The following agencies accepted the invitation: The U.S. Department of Defense (Utah Test and Training Range), the U.S. Environmental Protection Agency, the U.S. Fish and Wildlife Service, the State of Utah, and Millard and Beaver Counties. These agencies and governments reviewed the Draft EIS before it was available to the public and their comments have been incorporated into the document.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 40 CFR 1506.6, 40 CFR 1506.10.

Anita Bilbao,

Associate State Director.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[18XL LLIDI00000.L71220000.EO0000. LVTFDX402300 241A 4500129252]

Notice of Availability of the Draft Environmental Impact Statement for the Proposed Caldwell Canyon Mine Project, Caribou County, Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended, the Bureau of Land Management (BLM) has prepared a Draft Environmental Impact Statement (EIS) for the proposed Caldwell Canyon Mine Project, and by this notice is announcing the opening of the comment period.

DATES: To ensure the BLM considers all comments, the BLM must receive written comments on the Draft EIS for the proposed Caldwell Canyon Mine Project within 45 days following the date the Environmental Protection Agency publishes this Notice of Availability in the **Federal Register**. The BLM will announce public comment meetings at least 15 days in advance through public notices, media release, and/or mailings. To assist the BLM in identifying issues and concerns related to this project and the Draft EIS, comments should be as specific as possible.

ADDRESSES: You may submit comments related to the Caldwell Canyon Mine Project Draft EIS by any of the following methods:

- *Website: https://bit.ly/2SaxWcO.*
- *Email: blm_id_caldwell_canyon_mine_eis@blm.gov.*
- *Mail:* Caldwell Canyon Mine EIS, c/o Tetra Tech, 2525 Palmer Street, Suite 2, Missoula, MT 59808.

Please reference ''Caldwell Canyon Mine Draft EIS'' on all correspondence. The BLM has made CD–ROM and print copies of the Caldwell Canyon Mine Draft EIS available in the BLM Pocatello Field Office at the following address: 4350 Cliffs Drive, Pocatello, ID 83204. In addition, the BLM has made an electronic copy of the Draft EIS available online at the BLM Land Use Planning and NEPA Register website: *http://bit.ly/2zuZ8Mn.*

FOR FURTHER INFORMATION CONTACT: For further information contact Bill Volk, Planning and NEPA Specialist, phone (208) 236–7503; address, BLM Pocatello Field Office, 4350 Cliffs Drive, Pocatello, ID 83204; email, *wvolk@blm.gov*; and fax, (208) 478–6376. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FRS) at (800) 877–8339 to contact Mr. Volk. The FRS is available 24 hours a day, 7 days a week, to leave a message or question for Mr. Volk. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The BLM, as the Federal lease administrator, is the lead agency. The Idaho Department of Environmental Quality, Idaho Department of Lands, the U.S. Army Corps of Engineers, and the Idaho Governor's Office of Energy and Mineral Resources are cooperating agencies.

P4 Production, LLC (P4), a subsidiary of Bayer AG, developed and submitted a Mine and Reclamation Plan (M&RP), the Proposed Action, for the Caldwell Canyon Mine. The Proposed Action consists of mining Federal Phosphate Leases IDI–02, IDI–014080, and IDI–13738 and State of Idaho Mineral Lease E07959. Portions of the mine's waste rock would be placed into the nearby inactive Dry Valley Mine on Federal Phosphate Lease IDI–014184. P4 will request modifications to enlarge the phosphate lease boundaries for the Caldwell Canyon leases, and obtain authorization for a haul road across BLM public land as outlined in the Draft EIS. The BLM has fully evaluated alternatives to the Proposed Action, including a No Action Alternative, in the Draft EIS and addressed issues identified during scoping and analysis.

The BLM will make decisions to either approve, approve with modifications, or deny the Caldwell Canyon Mine M&RP and modification of the Dry Valley Mine M&RP. In addition, the BLM will determine whether to modify the lease boundaries, and whether to issue a right-of-way or phosphate use permit for a haul road on BLM lands. These decisions will consider public and agency input received on the Draft and Final EISs.

The BLM published a Notice of Intent (NOI) to prepare this EIS in the **Federal Register** on March 22, 2017, initiating a 30-day public scoping period for the Proposed Action during which the BLM accepted written comments. Public scoping identified concerns related to the following topics: The potential impacts to water quantity from dewatering; potential impacts to water quality from elevated levels of selenium and other constituents of concern; potential effects of increased noise on wildlife, safety, and socioeconomics; effects to tribal interests; cultural resources; wildlife; vegetation, visual quality; reclamation and financial assurance; and mitigation and monitoring of mine operations.

Before including your phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authorities: 42 U.S.C. 4321 *et seq.;* 40 CFR 1500 through 1508; 43 CFR 46; 43 U.S.C. 1701; 43 CFR 3590.

Peter J. Ditton,

BLM Idaho State Director, Acting.

BILLING CODE 4310–GG–P

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

Notice of Availability of the Western Energy Company's Rosebud Mine Area F Final Environmental Impact Statement; S1D1S SS08011000 SX064A000 190S180110; S2D2S SS08011000 SX064A000 19XS501520

AGENCY: Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act (NEPA) of 1969, as amended, the Office of Surface Mining Reclamation and Enforcement (OSMRE) has prepared a Final Environmental Impact Statement (EIS) for the Western Energy Company's Rosebud Mine Area F (Project) in southeastern Montana. This notice is announcing its availability. The Montana Department of Environmental Quality (DEQ) is a co-lead on this EIS process.

DATES: The OSMRE will not issue a final decision on the Proposed Action and Alternatives for a minimum of 30 days from the date that the U.S. Environmental Protection Agency (USEPA) publishes this notice in the **Federal Register**.

ADDRESSES: The Final EIS is available for review at: *https://www.wrcc.osmre.gov/initiatives/westernEnergy/documentLibrary.shtm.* Paper and computer compact disk (CD) copies of the Final EIS are available for review at the OSMRE Western Region Office, 1999 Broadway Street, Suite 3320, Denver, Colorado 80202. In addition, a paper and CD copy of the Final EIS are available for review at each of the following locations:

Rosebud County Library, 201 North 9th Avenue, Forsyth, MT 59327, Between the hours of 11:00 a.m. and 7:00 p.m. Monday through Thursday; 11:00 a.m. to 5:00 p.m. Friday; 10:00 a.m. to 1:00 p.m. Saturday (Closed Sunday).

Montana DEQ Headquarters (Lee Metcalf Building), 1520 East 6th Avenue, Helena, MT 59620, Between the hours of 8:00 a.m. and 5:00 p.m. Monday through Friday (Closed Saturday and Sunday).

BLM Miles City Field Office, 111 Garryowen Road, Miles City, MT 59301, Between the hours of 7:45 a.m. and 4:30 p.m. Monday through Friday (Closed Saturday and Sunday).

BLM State Office, Billings, MT, 5001 Southgate Drive, Billings, MT 59101, Between the hours of 8:00 a.m. and 4:00 p.m. Monday through Friday (Closed Saturday and Sunday).

FOR FURTHER INFORMATION CONTACT: Logan Sholar, OSMRE Project Coordinator; Telephone: 303–293–5036; Address: 1999 Broadway Street, Suite 3320, Denver, Colorado 80202–3050; email: *lsholar@osmre.gov.*

SUPPLEMENTARY INFORMATION:

I. Project Purpose

The purpose of the Project is to consider continued operations at the Rosebud Mine by permitting and developing a new surface mine permit area, known as permit Area F. Western Energy submitted a permit application package to DEQ for the proposed 6,746-acre permit Area F (also referred to as the project area) at the Rosebud Mine, which is an existing 25,455-acre surface coal mine annually producing 8.0 to 10.25 million tons of low-sulfur subbituminous coal. DEQ is the regulatory authority for permitting actions involving federal coal in Montana. 30 CFR 926.10. If DEQ approves the permit and a Federal mining plan for the Project is approved as proposed, at the current rate of production, the operational life of the Rosebud Mine would be extended by 8 years. Mining operations in the project area, which would commence after all permits and approvals have been secured and a reclamation and performance bond has been posted, would last 19 years. Western Energy estimates that 70.8 million tons of recoverable coal reserves exist in the project area and would be removed during the 19-year operations period. As with other permit areas of the Rosebud Mine, all coal would be combusted locally at the Colstrip and Rosebud Power Plants.

Western Energy is required to obtain a surface coal mine operating permit from DEQ (pursuant to the Montana Strip and Underground Mine Reclamation Act (MSUMRA), Section 82–4–221 *et seq.,* Montana Code Annotated) and federal approval of the mining plan to mine leased federal coal in accordance with the Mineral Leasing Act of 1920 as Amended for the proposed project area to access additional coal reserves in Federal coal lease M82186 and in privately held leases G–002 and G–002–A.The OSMRE's purpose for the Project is to review the mining plan and make a recommendation to the Assistant Secretary for Land and Minerals Management (ASLM) in the form of a mining plan decision document to approve, disapprove, or approve with conditions, the proposed mining plan for the Project (30 CFR 746) . The ASLM will decide whether the mining plan is approved, disapproved, or approved with conditions.

The DEQ's purpose for the Project is to review and make a decision on Western Energy's surface mine operating permit application under MSUMRA and to review and make decisions on the following related permits: (1) An application for a new Montana Pollutant Discharge Elimination System (MPDES) permit, and (2) an application to modify Montana Air Quality Permit #1570*07 to include the project area. The Bureau of Land Management (BLM) is a cooperating agency on the Final EIS.

The Final EIS considers three alternatives and evaluates the direct, indirect, and cumulative effects of the Proposed Action and the other two alternatives on the environment.

OSMRE is complying with Section 106 of the National Historic Preservation Act (NHPA Section 106) (16 U.S.C. 470f), as provided in 36 CFR 800.2(d)(3), concurrently with the NEPA process, including public involvement requirements and consultation with the State Historic Preservation Officer and Historic Preservation Officers with Tribal nations. Native American Tribal consultations are ongoing and have been conducted in accordance with applicable laws, regulations, and U.S. Department of the Interior (DOI) policy. Federal, Tribal, State, and local agencies, along with other stakeholders that may be interested in or affected by the Federal agencies' decisions on the Project, are invited to submit comments on the Final EIS.

As part of its consideration of the proposed Project's impacts on threatened and endangered species, OSMRE conducted informal consultation as well as streamlined consultation per the final 4(d) rule for the northern long-eared bat with the U.S. Fish and Wildlife Service pursuant to Section 7 of the Endangered Species Act (ESA) (16 U.S.C. 1536), and its implementing regulations, as provided in 50 CFR 400. The Section 7 consultation considered direct and indirect impacts from the proposed Project, including mining and related operations in the project area and continued operation of the Colstrip and Rosebud Power Plants.

In addition to compliance with NEPA, NHPA Section 106, and ESA Section 7, all Federal actions will be in compliance with applicable requirements of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1021–1328), the Clean Water Act (33 U.S.C. 1251–1387), the Clean Air Act (42 U.S.C. 7401–7671q), and Executive Orders relating to environmental justice, tribal consultation, and other applicable laws and regulations.

II. Background on the Rosebud Mine

Coal has been mined at Colstrip, MT for more than 90 years. The Norther Pacific Railway established the city of Colstrip and its associated mine in the 1920s to access coal from the Fort Union Formation. Coal mining began in 1924, providing fuel for the railway's steam locomotive trains. During the initial 34 years of mining, 44 million tons of coal were mined. By 1958, diesel-powered locomotives replaced steam engines and mining ceased in the Colstrip area.

In 1959, the Montana Power Company purchased rights to the Rosebud Mine in the city of Colstrip with plans to build power generation facilities. The Rosebud Mine operation began production in 1968. In 2001, Westmoreland purchased the Rosebud Mine; its subsidiary, Western Energy, continues to operate the mine today. Although the Rosebud Mine has shipped coal by rail as recently as 2010, all coal currently produced by the mine is consumed locally at the Colstrip and Rosebud Power Plants.

III. Background on the Western Energy Proposed Permit Area F

Western Energy proposes to conduct surface coal mining and reclamation operations within the 6,746-acre proposed permit Area F of the Rosebud Mine. The project area would be adjacent to the western boundary of Area C, 12 miles west of Colstrip. Western Energy proposes to conduct surface coal mining operations on an approximately 2,159-acre portion of the project area, with a total disturbance footprint, including soil storage, scoria pits, and haul roads, of approximately 4,260 acres. The project area would, in conjunction with the mining of any reserves remaining within existing permit areas A, B, and C of the Rosebud Mine, supply low-sulfur coal to the Colstrip Power Plant (Units 3 and 4) at a rate of between 7.7 and 9.95 million tons annually. In addition, coal from the Rosebud Mine with higher sulfur content would be supplied to the Rosebud Power Plant at a rate of approximately 300,000 tons annually.

Approval of the proposed permit Area F is expected to require several other agency actions, including:

- Findings and recommendations by BLM with respect to Western Energy's Resource Recovery and Protection Plan and other requirements of Western Energy's lease.
- Approval by DEQ of Western Energy's Montana Air Quality Permit #1570–07 to allow expansion of the geographic extent of the mine to include the proposed permit Area F; and
- Approval by DEQ of a new MPDES permit.

IV. Alternatives

Alternatives carried forward in the Final EIS include the No Action Alternative (Alternative 1), the Proposed Action Alternative (Alternative 2), and the Proposed Action Plus Additional Environmental Protection Measures Alternative (Alternative 3). Several other alternatives were considered but dismissed from further consideration.

V. Revisions to the Draft EIS

In accordance with the CEQ's regulations for implementing NEPA and the DOI's NEPA regulations, OSMRE solicited public comments on the Draft EIS. OSMRE responses to comments are included in Appendix F of the FEIS. The agencies considered comments received from the public on the Draft EIS and incorporated them, as appropriate, into the FEIS. The changes between the Draft EIS and Final EIS are a result of responding to comments received during the public comment period and generally consist of revisions to the text to clarify the analysis of resource-specific potential impacts under each alternative. No new analyses were completed and no new or additional data were used to support the existing analyses.

In addition, the FEIS includes updates based on evolving regulatory guidance and completion of the NHPA Section 106 and ESA Section 7 consultation processes.

Authority: 40 CFR 1506.6, 40 CFR 1506.1

Dated: November 16, 2018.

David Berry,

Regional Director, Western Region.

BILLING CODE 4310–05–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–602 and 731–TA–1412 (Final)]

Steel Wheels From China; Scheduling of the Final Phase of Countervailing Duty and Antidumping Duty Investigations

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the scheduling of the final phase of antidumping and countervailing duty investigation Nos. 701–TA–602 and 731–TA–1412 (Final) pursuant to the Tariff Act of 1930 (''the Act'') to determine whether an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of steel wheels from China, provided for in subheadings 8708.70.45, 8708.70.60, and 8716.90.50 of the Harmonized Tariff Schedule of the United States, preliminarily determined by the Department of Commerce (''Commerce'') to be subsidized and sold at less-than-fair-value.

DATES: October 23, 2018.

FOR FURTHER INFORMATION CONTACT: Jordan Harriman (202–205–2610), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Scope.— For purposes of these investigations, Commerce has defined the subject merchandise as ''. . .certain on-the-road steel wheels, discs, and rims for tubeless tires, with a nominal rim diameter of 22.5 inches and 24.5 inches, regardless of width. Certain on-the-road steel wheels with a nominal wheel diameter of 22.5 inches and 24.5 inches are generally for Class 6, 7, and 8 commercial vehicles (as classified by the Federal Highway Administration

Gross Vehicle Weight Rating system), including tractors, semitrailers, dump trucks, garbage trucks, concrete mixers, and buses, and are the current standard wheel diameters for such applications. The standard widths of certain on-the-road steel wheels are 7.5 inches, 8.25 inches, and 9.0 inches, but all certain on-the-road steel wheels, regardless of width, are covered by the scope. While 22.5 inches and 24.5 inches are standard wheel sizes used by Class 6, 7, and 8 commercial vehicles, the scope covers sizes that may be adopted in the future for Class 6, 7, and 8 commercial vehicles. The scope includes certain on-the-road steel wheels with either a ''hub-piloted'' or ''stud-piloted'' mounting configuration, and includes rims and discs for such wheels, whether imported as an assembly or separately. The scope includes certain on-the-road steel wheels, discs, and rims, of carbon and/or alloy steel composition, whether cladded or not cladded, whether finished or not finished, and whether coated or uncoated. All on-the-road wheels sold in the United States are subject to the requirements of the National Highway Traffic Safety Administration and bear markings, such as the ''DOT'' symbol, indicating compliance with applicable motor vehicle standards. See 49 CFR 571.120. The scope includes certain on-the-road steel wheels imported with or without the required markings. Certain on-the-road steel wheels imported as an assembly with a tire mounted on the wheel and/or with a valve stem attached are included. However, if the certain on-the-road steel wheel is imported as an assembly with a tire mounted on the wheel and/or with a valve stem attached, the certain on-the-road steel wheel is covered by the scope, but the tire and/or valve stem is not covered by the scope. Excluded from the scope are: (1) Steel wheels for tube-type tires that require a removable side ring; (2) aluminum wheels; (3) wheels where steel represents less than fifty percent of the product by weight; and (4) steel wheels that do not meet National Highway Traffic Safety Administration requirements, other than the rim marking requirements found in 49 CFR 571.120S5.2.''

Background.—The final phase of these investigations is being scheduled pursuant to sections 705(b) and 731(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b) and 1673d(b)), as a result of affirmative preliminary determinations by the Commerce that certain benefits which constitute subsidies within the meaning of section 703 of the Act (19 U.S.C. 1671b) are being provided to manufacturers, producers, or exporters in China of steel wheels, and that such products are being sold in the United States at less than fair value within the meaning of section 733 of the Act (19 U.S.C. 1673b). The investigations were requested in petitions filed on March 27, 2018, by Accuride Corporation, Evansville, Indiana, and Maxion Wheels Akron LLC, Akron, Ohio.

For further information concerning the conduct of this phase of the investigations, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

Participation in the investigations and public service list.—Persons, including industrial users of the subject merchandise and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the final phase of these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in section 201.11 of the Commission's rules, no later than 21 days prior to the hearing date specified in this notice. A party that filed a notice of appearance during the preliminary phase of the investigations need not file an additional notice of appearance during this final phase. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in the final phase of these investigations available to authorized applicants under the APO issued in the investigations, provided that the application is made no later than 21 days prior to the hearing date specified in this notice. Authorized applicants must represent interested parties, as defined by 19 U.S.C. 1677(9), who are parties to the investigations. A party granted access to BPI in the preliminary phase of the investigations need not reapply for such access. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff report.—The prehearing staff report in the final phase of these investigations will be placed in the nonpublic record on December 21, 2018, and a public version will be issued thereafter, pursuant to section 207.22 of the Commission's rules.

Hearing.—The Commission will hold a hearing in connection with the final phase of these investigations beginning at 9:30 a.m. on Tuesday, January 8, 2019, at the U.S. International Trade Commission Building. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before January 3, 2019. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should participate in a prehearing conference to be held on January 7, 2019, at the U.S. International Trade Commission Building, if deemed necessary. Oral testimony and written materials to be submitted at the public hearing are governed by sections 201.6(b)(2), 201.13(f), and 207.24 of the Commission's rules. Parties must submit any request to present a portion of their hearing testimony *in camera* no later than 7 business days prior to the date of the hearing.

Written submissions.—Each party who is an interested party shall submit a prehearing brief to the Commission. Prehearing briefs must conform with the provisions of section 207.23 of the Commission's rules; the deadline for filing is January 2, 2019. Parties may also file written testimony in connection with their presentation at the hearing, as provided in section 207.24 of the Commission's rules, and posthearing briefs, which must conform with the provisions of section 207.25 of the Commission's rules. The deadline for filing posthearing briefs is January 15, 2019. In addition, any person who has not entered an appearance as a party to the investigations may submit a written statement of information pertinent to the subject of the investigations, including statements of support or opposition to the petition, on or before January 15, 2019. On January 31, 2019, the Commission will make available to parties all information on which they have not had an opportunity to comment. Parties may submit final comments on this information on or before February 4, 2019, but such final comments must not contain new factual information and must otherwise comply with section 207.30 of the Commission's rules. All written submissions must conform with the provisions of section 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on E-Filing,* available on the

Commission's website at *https://edis.usitc.gov,* elaborates upon the Commission's rules with respect to electronic filing.

Additional written submissions to the Commission, including requests pursuant to section 201.12 of the Commission's rules, shall not be accepted unless good cause is shown for accepting such submissions, or unless the submission is pursuant to a specific request by a Commissioner or Commission staff.

In accordance with sections 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.21 of the Commission's rules.

By order of the Commission.

Issued: November 26, 2018.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2018–26011 Filed 11–29–18; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–556 and 731–TA–1311 (Final) (Remand)]

Truck and Bus Tires From China

AGENCY: United States International Trade Commission.

ACTION: Notice of remand proceedings.

SUMMARY: The U.S. International Trade Commission (''Commission'') hereby gives notice of the procedures it intends to follow to comply with the court-ordered remand of its final determinations in the antidumping and countervailing duty investigations of truck and bus tires (''TBTs'') from China. For further information concerning the conduct of these remand proceedings and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subpart A (19 CFR part 207).

DATES: November 26, 2018.

FOR FURTHER INFORMATION CONTACT: Nate Comly (202–205–3174), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record of Investigation Nos. 701–TA–482–484 and 731–TA–1191–1194 (Final) may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—In March 2017, the Commission determined that an industry in the United States was not materially injured or threatened with material injury by reason of imports of TBTs from China that were sold in the United States at less than fair value and that were subsidized by the Government of China. *Truck and Bus Tires from China,* Inv. Nos. 701–TA–556 and 731–TA–1311 (Final), USITC Pub. 4673 (March 2017). Petitioner contested the Commission's determinations before the U.S. Court of International Trade (''CIT''). The CIT sustained certain challenged aspects of the Commission's negative determinations, but remanded for reconsideration of the Commission's analysis of price effects and likely prices effects, and of the nature of the countervailable subsidies for purposes of the threat of material injury analysis. *United Steel, Paper and Forestry, Rubber, Mfg., Energy, Allied Indus. and Serv. Workers Int'l Union* v. *United States,* Slip Op. 18–151 (Ct. Int'l Trade, Nov. 1, 2018).

Participation in the remand proceedings.—Only those persons who were interested parties that participated in the investigations (*i.e.,* persons listed on the Commission Secretary's service list) and also parties to the appeal may participate in the remand proceedings. Such persons need not file any additional appearances with the Commission to participate in the remand proceedings, unless they are adding new individuals to the list of persons entitled to receive business proprietary information (''BPI'') under administrative protective order. BPI referred to during the remand proceedings will be governed, as appropriate, by the administrative protective order issued in the investigations. The Secretary will maintain a service list containing the names and addresses of all persons or their representatives who are parties to the remand proceedings, and the Secretary will maintain a separate list of those authorized to receive BPI under the administrative protective order during the remand proceedings.

Written Submissions.—The Commission is not reopening the record and will not accept the submission of new factual information for the record. The Commission will permit the parties to file comments concerning how the Commission could best comply with the Court's remand instructions.

The comments must be based solely on the information in the Commission's record. The Commission will reject submissions containing additional factual information or arguments pertaining to issues other than those on which the Court has remanded this matter. The deadline for filing comments is December 11, 2018. Comments must be limited to no more than ten (10) double-spaced and single-sided pages of textual material.

Parties are advised to consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subpart A (19 CFR part 207) for provisions of general applicability concerning written submissions to the Commission. All written submissions must conform to the provisions of section 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on E-Filing,* available on the Commission's website at *https://edis.usitc.gov,* elaborates upon the Commission's rules with respect to electronic filing.

Additional written submissions to the Commission, including requests pursuant to section 201.12 of the Commission's rules, will not be accepted unless good cause is shown for accepting such submissions or unless the submission is pursuant to a specific request by a Commissioner or Commission staff.

In accordance with sections 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

By order of the Commission.

Issued: November 26, 2018.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2018–26020 Filed 11–29–18; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Bureau of Alcohol, Tobacco, Firearms and Explosives

[OMB Number 1140–NEW]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Forensic Firearm Training Request for Non-ATF Employees—ATF Form 7110.15

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will submit the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: The proposed information collection was previously published in the **Federal Register**, on September 21, 2018, allowing for a 60-day comment period. Comments are encouraged and will be accepted for an additional 30 days until December 31, 2018.

FOR FURTHER INFORMATION CONTACT: If you have additional comments, particularly with respect to the estimated public burden or associated response time, have suggestions, need a copy of the proposed information collection instrument with instructions, or desire any other additional information, please contact: Sheila Hopkins, National Laboratory Center either by mail at 6000 Ammendale Road, Ammendale, MD 20705, by email at *Sheila.hopkins@atf.gov,* or by telephone at 202–648–6061. Written comments and/or suggestions can also be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20503 or sent to *OIRA_submissions@omb.eop.gov.*

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of this information collection:

(1) *Type of Information Collection:* New Collection.

(2) *The Title of the Form/Collection:* Forensic Firearm Training Request for Non-ATF Employees.

(3) *The agency form number, if any, and the applicable component of the Department sponsoring the collection:*

Form number: ATF Form 7110.15.

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:*

Primary: Federal Government.

Other: State, Local, or Tribal Government.

Abstract: The Forensic Firearm Training Request for Non-ATF Employees (ATF F 7110.15) will be used to obtain information from Federal, State and local, and international law enforcement personnel to register, obtain course information, and/or evaluate ATF forensic firearms investigative techniques training. The information collected on the form will assist ATF to determine the applicant's eligibility to attend this training.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 75 respondents will utilize the form associated with this information collection (IC), and it will take each respondent approximately 6 minutes to complete the form.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The estimated annual public burden associated with this collection is 7.5 hours, which is equal to 75 (# of respondents) * 1 (# of responses per respondents) * .1 (6 minutes).

If additional information is required contact: Melody Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 3E.405A, Washington, DC 20530.

Dated: November 26, 2018.

Melody Braswell,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–14–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 2018–27]

Steve Fanto, M.D.; Decision and Order

On April 4, 2018, the Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, DEA or Government), issued an Order to Show Cause to Steve Fanto, M.D. (hereinafter, Respondent), of Scottsdale, Arizona. Order to Show Cause (hereinafter, OSC), at 1. The OSC proposes the revocation of Respondent's Certificate of Registration (hereinafter, COR) on the ground that he is without authority to handle controlled substances in Arizona, the State in which he is registered with the DEA. *Id.* The OSC cites the operative statutory provisions that spell out the requirements for registration upon which the DEA alleges that Respondent is deficient, and the DEA's alleged authority to revoke his registration. 21 U.S.C. 823(f) and 824(a)(3). *Id.* at 1–2.

Jurisdiction

This Agency has jurisdiction to decide this case based upon the OSC allegation that Respondent holds a DEA Certificate of Registration (No. BF3649312) at the registered address of 7320 Deer Valley Road, J100, Scottsdale, Arizona 85255. *Id.* at 1. That registration authorizes Respondent, as a practitioner, to dispense controlled substances in schedules II through V. Although Respondent's COR reflects an expiration date of September 30, 2017, the OSC alleges that Respondent's COR is current by virtue of his having submitted a timely application for renewal of this COR on September 21, 2017. *Id.*

Substantive Ground for Revocation of COR Alleged in OSC

The substantive ground for the proceeding, as alleged in the OSC, is that Respondent is ''prohibited from practicing medicine in the state in which . . . [he is] registered with the DEA.'' *Id.* at 2. Specifically, the OSC alleges that, according to Arizona Medical Board (hereinafter, AMB) records, Respondent ''engaged in medical practices (including the prescribing of controlled substances) that constitute[ ] 'significant deviations from the standard of care.' '' *Id.* at 1, quoting AMB Interim Consent Agreement for Practice Restriction (hereinafter, Interim Consent Agreement) (ellipse omitted). As a result, according to the OSC, Respondent entered into an Interim Consent Agreement whereby he is ''prohibited from engaging in the practice of medicine in the State of Arizona'' until he applies to the AMB and receives permission to do so. *Id.* at 1–2. Registrant signed the Interim Consent Agreement on July 11, 2017. *Id.* at 1. The OSC states that since Respondent is not licensed to dispense controlled substances in Arizona, his DEA COR must be revoked pursuant to 21 U.S.C. 823(f) and 824(a)(3). *Id.* at 2.

The OSC notified Respondent of his right to request a hearing on the allegations or to submit a written statement if he chooses to waive his right to a hearing. *Id.* at 2. The OSC explained the procedures for electing each option, the consequences for failing to elect one of those options, and the regulations that govern the rules for responding to the OSC (21 CFR 1301.43). *Id.* at 2. The OSC also notified Respondent of the opportunity to submit a corrective action plan, the specific procedures for filing a corrective action plan, and the statutory provision that governs such a plan. *Id.* at 2–3 (citing 21 U.S.C. 824(c)(2)(C)).

Adequacy of Service

In his April 30, 2018, Request for Extension/Hearing, Respondent acknowledged receipt of the OSC ''on or after April 4, 2018.'' [1] Request for Extension/Hearing, at 1. Since the OSC was issued on April 4, 2018 and Respondent admitted receiving the OSC ''on or after April 4, 2018,'' I find that the Government's service of the OSC was legally sufficient and that Respondent's request for a hearing was timely. OSC, at 1; Request for Extension/Hearing, at 1.

Respondent's Request for Extension of Time

Respondent argued in his Request for Extension/Hearing that he should be allowed an extension of time to request a hearing ''pending the resolution of . . . [AMB] actions regarding his Arizona medical license.'' Request for Extension/Hearing, at 1. The gravamen of his argument is that an extension should be allowed, because if Respondent is successful before the AMB, his medical license will be returned to him. *Id.* The request for extension asked in the alternative for a hearing if the request for extension of time is not granted.

CALJ Denial of Request for Extension of Time

The Office of Administrative Law Judges put the matter on the docket and assigned it to the Chief Administrative Law Judge, John J. Mulrooney, II (hereinafter, CALJ). On May 4, 2018, the CALJ denied the request for an extension of time, stating that ''[a]n extension of time that has the potential to exist in perpetuity, at least on the present record, will not serve the interests of justice.'' Order Denying the Respondent's Request for Extension and Directing the Filing of Government Evidence of Lack of State Authority Allegation and Briefing Schedule dated May 4, 2018 (hereinafter, Order Denying Extension), at 2. In the Order Denying Extension, the CALJ ordered the DEA to file evidence in support of its allegation that Respondent lacks State authority to handle controlled substances. *Id.* The CALJ further established a briefing schedule for any Government motion for summary disposition based upon its allegation that Respondent lacks State authority to handle controlled substances. *Id.*

Government Motion for Summary Disposition

On May 16, 2018, the Government filed a motion for summary disposition. The motion by the Government alleged, in pertinent part, that Respondent lacks authority to handle controlled substances in Arizona and, therefore, pursuant to 21 U.S.C. 823(f) and 824(a)(3), Respondent's DEA COR should be revoked. Government's Motion for Summary Disposition and Argument in Support of Finding that Respondent Lacks State Authorization to Handle Controlled Substances (hereinafter, Summary Disposition Motion), at 4.

Respondent's Motion for Extension of Time To File Response

By motion dated May 25, 2018, Respondent requested an extension of time until December 3, 2018 to respond to the Government's motion for summary disposition. The essence of Respondent's argument was that the AMB ''is expected to have acted on and reinstated . . . [Respondent's] authority to practice medicine by such date. Motion for Extension of Time to File Response to Government's Motion for Summary Disposition and Argument in Support of Finding that Respondent Lacks State Authorization to Handle Controlled Substances and Response to Government's Motion for Summary Disposition, at 1 (hereinafter, Respondent's Motion). Respondent alleged that he entered into the Interim Consent Agreement with the AMB, wherein he agreed to be prohibited from engaging in the practice of medicine in the State of Arizona until he applies to the Board and receives permission to do so, ''based on coercive assertions'' by the AMB at a time when he was unrepresented by counsel. *Id.* at 2.

CALJ Order Denying Respondent's Request for an Extension and Granting the Government's Motion for Summary Disposition

On May 31, 2018, the CALJ issued an Order (hereinafter, R.D.) denying Respondent's request for an extension and granting the Government's motion for summary disposition.

Findings of Fact

Respondent's DEA Registration

Respondent is the holder of DEA Certificate of Registration No. BF3649312, pursuant to which he is authorized to dispense controlled substances in schedules II through V as a practitioner, at the registered address of 7320 Deer Valley Road, J100, Scottsdale, Arizona 85255. Summary Disposition Motion, Attachment 1, at 1.

The Status of Respondent's State License

The AMB and Respondent entered into an Interim Consent Agreement. Summary Disposition Motion, Attachment 2. The effective date of the Interim Consent Agreement is July 12, 2017. *Id.* at 7, 10. According to its terms, Respondent ''elect[ed] to permanently waive any right to a hearing and appeal with respect to this Interim Consent Agreement for Practice Restriction'' and is ''prohibited from engaging in the practice of medicine in the State of Arizona . . . until he applies to the . . .

[1] Respondent's April 30, 2018, Request for Extension/Hearing is stamped ''received'' by the Office of Administrative Law Judges on May 1, 2018.

[AMB] and receives permission to do [so].'' *Id.* at 1, 7.

On May 8, 2018, a DEA Diversion Investigator (hereinafter, DI) contacted an AMB Investigator who informed the DI that Respondent's medical license remains under practice restriction. Summary Disposition Motion, Attachment 4, at 2. The DI averred that ''the result of DEA's investigation has shown that . . . [Respondent] remains currently prohibited from practicing medicine in the State of Arizona.'' *Id.* at 3.

There is no evidence in the record that the AMB lifted the Practice Restriction on Respondent's medical license. Further, according to the online records of the State of Arizona, of which I take official notice, I find that the Interim Consent Agreement is still in effect today.[2] Arizona Medical Board Licensee Search, *https://www.azmd.gov* (last visited November 19, 2018).

Accordingly, based on all of the evidence in the record before me, I find that Respondent currently is without authority to practice medicine in Arizona, the State in which he is registered.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the Controlled Substances Act (hereinafter, CSA), ''upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.'' With respect to a practitioner, the DEA has also long held that the possession of authority to dispense controlled substances under the laws of the State in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner's registration. *See, e.g., James L. Hooper, M.D.,* 76 FR 71,371 (2011), *pet. for rev. denied,* 481 Fed. Appx. 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.,* 43 FR 27,616, 27,617 (1978).

This rule derives from the text of two provisions of the CSA. First, Congress defined the term ''practitioner'' to mean ''a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.'' 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner's registration, Congress directed that ''[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.'' 21 U.S.C. 823(f). Because Congress has clearly mandated that a practitioner possess State authority in order to be deemed a practitioner under the CSA, the DEA has held repeatedly that revocation of a practitioner's registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the State in which he practices. *See, e.g., Hooper, supra,* 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.,* 71 FR 39,130, 39,131 (2006); *Dominick A. Ricci, M.D.,* 58 FR 51,104, 51,105 (1993); *Bobby Watts, M.D.,* 53 FR 11,919, 11,920 (1988); *Blanton, supra,* 43 FR at 27,617.

Section 32–1401(22) of the Arizona Revised Statutes, cited in the ''Interim Consent Agreement for Practice Restriction,'' in pertinent part, defines the ''practice of medicine'' as the diagnosis or treatment of any and all human diseases, injuries, ailments, infirmities, or deformities, whether they be physical or mental, ''by any means, methods, devices or instrumentalities.'' Ariz. Rev. Stat. Ann. § 32–1401(22) (Westlaw, current through the First Special and Second Regular Session of the Fifty-Third Legislature (2018)). ''Medicine'' means ''allopathic medicine as practiced by the recipient of a degree of doctor of medicine.'' Ariz. Rev. Stat. Ann. § 32–1401(19) (Westlaw, current through the First Special and Second Regular Session of the Fifty-Third Legislature (2018)). Under Arizona law, a ''doctor of medicine'' is a ''natural person holding a license, registration or permit to practice medicine pursuant to this chapter.'' Ariz. Rev. Stat. Ann. § 32–1401(10) (Westlaw, current through the First Special and Second Regular Session of the Fifty-Third Legislature (2018)). *See also* Ariz. Rev. Stat. Ann. § 32–1401(21) (Westlaw, current through the First Special and Second Regular Session of the Fifty-Third Legislature (2018)) (A physician is a ''doctor of medicine who is licensed pursuant to this chapter.''). Further, a physician who ''wishes to dispense a controlled substance . . . shall be currently licensed to practice medicine in Arizona.'' Ariz. Admin. Code § R4–16–301 (Westlaw, current through rules published in Arizona Administrative Register Volume 24, Issue 43, Oct. 26, 2018). ''Dispense,'' under Arizona law, means ''the delivery by a doctor of medicine of a prescription drug or device to a patient . . . and includes the prescribing, administering, packaging, labeling and security necessary to prepare and safeguard the drug or device for delivery.'' Ariz. Rev. Stat. Ann. § 32–1401(9) (Westlaw, current through the First Special and Second Regular Session of the Fifty-Third Legislature (2018)).

As already discussed, the AMB and Respondent entered into an ''Interim Consent Agreement for Practice Restriction.'' ''Restrict,'' in the context of this Interim Consent Agreement, means ''taking a disciplinary action that alters the physician's practice or professional activities if the board determines that there is evidence that the physician is or may be medically incompetent or guilty of unprofessional conduct.'' Ariz. Rev. Stat. Ann. § 32–1401(23) (Westlaw, current through the First Special and Second Regular Session of the Fifty-Third Legislature (2018)).

The conclusory language in Respondent's Motion that he imprudently entered into the Interim Consent Agreement based upon coercive assertions by the AMB at a time when he was unrepresented by counsel was not accompanied by specific facts indicating what was said that Respondent considered coercive. The legitimacy of the claim is undermined by the notable fact that Respondent did not submit any documentation indicating an effort by Respondent to bring the validity of the Interim Consent Agreement before the AMB, which, initially, would be the proper forum in which to raise that issue. Regardless, as pointed out by the CALJ citing long-standing Agency precedent, the controlling question is not the merits of Respondent's claim before the AMB, but rather, whether Respondent is currently authorized to handle controlled substances in the State of registration. R.D., at 3. In that regard, I adopt the following portion of the R.D. and agree with the CALJ's denial of Respondent's request for an extension of time/stay of proceedings. R.D., at 4.

[2] Under the Administrative Procedure Act, an agency ''may take official notice of facts at any stage in a proceeding—even in the final decision.'' United States Department of Justice, Attorney General's Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), ''[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.'' Accordingly, Respondent may dispute my finding by filing a properly supported motion for reconsideration within 20 calendar days of the date of this Order. Any such motion shall be filed with the Office of the Administrator and a copy shall be served on the Government; in the event Respondent files a motion, the Government shall have 20 calendar days to file a response.

Where a registrant has lost state authority to handle controlled substances, the Agency has repeatedly taken the position that ''revocation is warranted even where a practitioner's state authority has been summarily suspended and the State has yet to provide the practitioner with a hearing to challenge the State's action and at which he . . . may ultimately prevail.'' *Kamal Tiwari, M.D.,* 76 FR 71604, 71606 (2011) (citations omitted); *see also Anne Lazar Thorn, M.D.,* 62 FR 12847, 12848 (1997) (''[T]he controlling question is not whether a practitioner's license to practice medicine in the state is suspended or revoked; rather, it is whether the Respondent is currently authorized to handle controlled substances in the [state of registration].''). Even when the Respondent is actively engaged in appealing a state decision, the Agency has noted that ''[i]t is not DEA's policy to stay [administrative] proceedings . . . while registrants litigate in other forums.'' *Newcare Home Health Servs.,* 72 FR 42126, 42127 n.2 (2007). Agency precedent has consistently affirmed recommended decisions where a respondent's request for a stay due to state medical board proceedings were denied by the Administrative Law Judge. *See, e.g., Irwin August, D.O.,* 81 FR 3158, 3159 (2016); *Pedro E. Lopez, M.D.,* 80 FR 46324, 46325–26 (2015). The Agency has stated in recent final orders that a stay in administrative enforcement proceedings is ''unlikely to ever be justified'' due to ancillary proceedings involving the Respondent. *Grider Drug #1 & Grider Drug #2,* 77 FR 44070, 44104 n.97 (2012).

Even if the Agency's precedent were not fixed firmly against the granting of such a delay in principle, the Respondent here is unable to point to a reliably fixed date where state proceedings would reasonably be concluded. The Respondent's Motion includes a Declaration from the Respondent's counsel (Respondent's Board Counsel) in his Arizona Board proceedings. . . . [Respondent's Motion,] Attachment 1. In the Respondent's Board Counsel's declaration, the decisional timeframe is couched in the following tenuous terms:

As for when the [Arizona Board] *might* take action, *my best guess* is that it will be at its August 20, 2018 meeting, although *I would not be surprised* if [the Respondent's] matter is not heard until the October 22 meeting, which is the next regularly scheduled meeting of the [Arizona Board].

Id. at 2–3 (emphasis supplied). The Respondent's Board Counsel further explained that the state process involves the actions and recommendations of an internal committee, and avers that he and the Respondent ''are *hopeful* that [the internal committee] will make those recommendations and share them with us *in the not-too-distant future* and if that occurs then the matter *should be* heard at the August 20 meeting.'' *Id.* at 3 (emphasis supplied). While the candor of the Respondent's Board Counsel is commendable, the language strikes as too aspirational and amorphous to be particularly supportive of the delay sought by the Respondent here—even if the Agency's precedent were not squarely opposed to the relief—which it is.

R.D., at 3–4.

It is undisputed that Respondent is not currently authorized to practice medicine in Arizona due to the Interim Consent Agreement. Thus, according to Arizona law, Respondent does not have authority to handle controlled substances in Arizona, the State in which he is registered with the DEA. As already discussed, the practice restriction on Respondent's medical license is currently in effect. DEA has ''long and consistently interpreted the CSA as mandating the possession of authority under state law to handle controlled substances as a fundamental condition for obtaining and maintaining a registration.'' *Hooper, supra,* 76 FR at 71,371. That is the controlling question. *Thorn, supra,* 62 FR at 12,848. The CSA has consistently been interpreted to mean that ''DEA does not have statutory authority . . . to maintain a registration if the registrant is without state authority to handle controlled substances in the state in which he practices.'' *Yeates, supra,* 71 FR at 39,131. As succinctly explained by the CALJ, ''The DEA has long held that possession of authority under state law to dispense controlled substances is not only a prerequisite to obtaining a DEA registration, but also an essential condition for maintaining it.'' R.D., at 5 (citations omitted). I agree with the CALJ's conclusion that ''as a matter of law, a DEA registration may not be granted or maintained where an applicant/registrant no longer falls within the CSA's definition of a practitioner.'' *Id.* Very simply, since Respondent is not authorized to handle controlled substances in Arizona, he is not eligible for a DEA registration. As such, I will order that Respondent's DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority thus vested in me by 21 U.S.C. 824(a), I order that DEA Certificate of Registration No. BF3649312 issued to Steve Fanto, M.D., be, and it hereby is, revoked. Pursuant to 28 CFR 0.100(b) and the authority thus vested in me by 21 U.S.C. 823(f), I further order that any pending application of Steve Fanto, M.D., to renew or modify this registration, as well as any other pending application by him for registration in the State of Arizona, be, and it hereby is, denied. This order is effective December 31, 2018.

Dated: November 19, 2018.

Uttam Dhillon,

Acting Administrator.

[FR Doc. 2018–26046 Filed 11–29–18; 8:45 am]

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 18–32]

Narciso A. Reyes, M.D.; Decision and Order

On April 19, 2018, the Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, DEA or Government), issued an Order to Show Cause to Narciso A. Reyes, M.D. (hereinafter, Respondent), of Luquillo, Puerto Rico. Order to Show Cause (hereinafter, OSC), at 1. The Show Cause Order proposes the revocation of Respondent's DEA Certificate of Registration on the grounds that he materially falsified applications he submitted to DEA and that he has been excluded from participation in a program pursuant to 42 U.S.C. 1320a–7(a). *Id.* (citing 21 U.S.C. 824(a)(1) and (5)). It also proposes the denial of ''any applications for renewal or modification of such registration and any applications for any other DEA registration.'' OSC, at 1 (citing 21 U.S.C. 824(a)(1) and (5)).

Regarding jurisdiction, the Show Cause Order alleges that Respondent holds DEA Certificate of Registration No. FR4900305 at the registered address of Calle Fernandez Garcia 306, Luquillo, Puerto Rico 00773, with a mailing address of P.O. Box 247, Luquillo, PR 00773. OSC, at 2. This registration, the OSC alleges, authorizes Respondent to dispense controlled substances in schedules II through V as a practitioner. *Id.* The Show Cause Order alleges that this registration expires on April 30, 2020. *Id.*

Regarding the substantive grounds for the proceeding, the Show Cause Order alleges that, on October 20, 2009, the U.S. Department of Health and Human Services, Office of Inspector General (hereinafter, HHS/OIG), mandatorily excluded Respondent from participating in all Federal health care programs due to his conviction in U.S. District Court for conspiracy to commit health care fraud. *Id.* at 2 (citing 42 U.S.C. 1320a–7(a)(1)). According to the OSC, Respondent's ''mandatory exclusion from Medicare, Medicaid and all Federal health care programs warrants revocation of . . . [his] registration.'' OSC, at 2 (citing 21 U.S.C. 824(a)(5)).

The Show Cause Order further alleges that Respondent provided false answers to two ''yes'' or ''no'' liability questions when he applied for a DEA registration on October 16, 2014 and when he filed a renewal application on April 17, 2017. OSC, at 2–3. Specifically, the Show

Cause Order alleges that Respondent twice answered that he had never been excluded from participation in a Medicare or state health care program when, in fact, he had been. *Id.* at 2–3. The Show Cause Order also alleges that Respondent twice answered that he had never surrendered (for cause) a Federal controlled substance registration when, in fact, he had. *Id.* at 3. According to the OSC, Respondent's answers to these liability questions are ''material falsifications'' that warrant revocation of his registration. *Id.*

The Show Cause Order notifies Respondent of his right to request a hearing on the allegations or to submit a written statement while waiving his right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* at 3–4 (citing 21 CFR 1301.43). The Show Cause Order also notifies Respondent of the opportunity to submit a corrective action plan. OSC, at 4–5 (citing 21 U.S.C. 824(c)(2)(C)).

Respondent timely requested a hearing on May 21, 2018.[1] Hearing Request, at 1. In his Hearing Request, Respondent states that, ''It was not my intention to fail to declare a material fact in the request for renewal . . . . I do not master the English language well and this may have contributed to these errors.'' *Id.* He also states in his Hearing Request that, ''My inclusion of the word N in the renewal request was in my estimate to indicate that it did not apply since I had reached an agreement with the US Attorney's Office in Puerto Rico. Clearly my mistake.'' *Id.*

The Office of Administrative Law Judges (hereinafter, OALJ) put the matter on the docket and assigned it to Administrative Law Judge Charles Wm. Dorman (hereinafter, ALJ). I adopt the following statement of procedural history from the ALJ's Order Granting the Government's Motion for Summary Disposition and Recommended Rulings, Findings of Fact, Conclusions of Law, and Decision dated June 22, 2018 (hereinafter, R.D.).

On May 31, 2018, the Government filed a Motion for Summary Disposition (''Government's Motion''). The Government's Motion argued that there is no issue of material fact in this case to warrant an adversarial hearing. The Government's Motion further requested that I summarily dispose of this matter without a hearing and recommend to the Acting Administrator that . . . [Respondent's] DEA registration be revoked. On the same day, I issued an Order affording . . . [Respondent] the opportunity to respond to the Government's Motion by June 14, 2018. I explained that if . . . [Respondent] disagreed with any of the Government's statements of undisputed material facts as outlined in its motion for summary disposition, he should provide copies of documentary evidence refuting the Government's statement(s). I further directed . . . [Respondent] to identify the material fact(s) which justify an evidentiary hearing in this case. . . . [Respondent] failed to respond to the Government's Motion by the deadline on June 14, 2018.

On June 15, 2018, the day after . . . [Respondent's] Response was due, chambers staff emailed . . . [Respondent's] counsel notifying him that the OALJ had not received a response from him and asking whether he intended to submit a late filing. . . . [Respondent's] counsel replied by email on June 17, 2018, with the following statement: ''There are no allegations on behalf of . . . [Respondent]. The documents are self [e]xplanatory.''

Then, on June 21, 2018, the OALJ received a filing from . . . [Respondent's] counsel titled ''Statement of Narciso A. Reyes, M.D.'' The filing states that . . . [Respondent] ''will not make any statement regarding this administrative action'' and that ''[t]he issue is hereby submitted for final ruling.''

R.D., at 2–3, 7.

The ALJ correctly concluded that Respondent's choice not to refute, challenge, or even address any of the Government's reliable and probative evidence and legal arguments ''strongly indicates that he no longer wishes to proceed to hearing.'' *Id.* at 10. After analyzing the Government's evidence and legal argument, the ALJ granted the Government's Motion for Summary Disposition and recommended that I revoke Respondent's registration and deny any pending applications for renewal or modification. *Id.* at 10, 18.

By letter dated July 16, 2018, the ALJ certified and transmitted the record to me for final Agency action. In that letter, the ALJ advised that neither party filed exceptions and that the time period to do so had expired.

I issue this Decision and Order based on the entire record before me. 21 CFR 1301.43(e). I make the following findings of fact.

Findings of Fact

Respondent's Criminal Conviction and Ensuing Mandatory Exclusion

On November 3, 2008, Respondent pled guilty in Federal District Court to one count of conspiracy to commit health care fraud. Government's Motion, GE–2 (Plea Agreement, *United States* v. *Reyes Carrillo*, No. 08–cr–168 (D. P.R. Nov. 3, 2008)), at 1. According to the facts submitted by the Assistant United States Attorney and explicitly adopted by Respondent, Respondent signed blank or previously completed false Certificates of Medical Necessity for durable medical equipment for Medicare beneficiaries whom he had never seen. *Id.* at 9. The Federal District Judge entered judgment against Respondent on March 13, 2009. Government's Motion, GE–3 (Judgment, *United States* v. *Reyes Carrillo*, No. 08–cr–168–03 (D. P.R. March 13, 2009)), at 1.

Based on Respondent's conviction for conspiracy to commit health care fraud, the HHS/OIG notified Respondent of his mandatory exclusion from participation in any capacity in Medicare, Medicaid, and all Federal health care programs for the minimum statutory period of five years effective October 20, 2009. Government's Motion, GE–4 (HHS/OIG Exclusion Letter), at 1 (citing 42 U.S.C. 1320a–7(a)); Government's Motion, GE–5 (HHS/OIG Exclusions Search Results: Verify), at 1. The HHS/OIG Exclusion Letter advised Respondent that reinstatement of eligibility to participate in these programs is not automatic. Government's Motion, GE–4, at 2. Respondent is still excluded from participation in these programs. Government's Motion, GE–5, at 1.

Respondent's DEA Registration History and Current Registration Status

On January 31, 2013, Respondent voluntarily surrendered for cause DEA registration No. BR3465944. Government's Motion, GE–8 (Respondent's DEA–104 Voluntary Surrender of Controlled Substances Privileges), at 1; Government's Motion, GE–9 (Certification of Registration History), at 1. Neither the DEA–104 nor any other evidence in the record explains the context of this voluntary surrender. DEA retired registration No. BR3465944 on February 4, 2013. Government's Motion, GE–9, at 1.

On October 16, 2014, Respondent submitted an application for a new DEA registration. Government's Motion, GE–10 (Respondent's DEA Form 224 submitted on October 16, 2014), at 1. The application Respondent completed includes ''yes'' or ''no'' liability questions that an applicant must answer to advance to the next page of the online DEA application. Government's Motion, GE–l (Certification of Registration Status), at 2; Government's Motion, GE–10, at 1.

The first liability question that Respondent answered on his online DEA application for a registration asks: ''Has the applicant ever been convicted

[1] Attached to the Government's Notice of Service of Order to Show Cause is a DEA–12 (Receipt for Cash or Other Items) that, according to the Government's allegations, Respondent executed when the Government served the OSC on April 23, 2018. Respondent did challenge the Government's service-related allegations. Thus, I find that Respondent's Hearing Request was timely since it was filed within 30 days of service of the OSC. 21 CFR 1301.43(a).

of a crime in connection with controlled substance(s) under state or federal law, or been excluded or directed to be excluded from participation in a medicare or state health care program, or [is] any such action pending?'' Government's Motion, GE–1, at 2; Government's Motion, GE–10, at 1. Respondent answered ''no'' to this question. Government's Motion, GE–1, at 2; Government's Motion, GE–10, at 1. The HHS/OIG Exclusion letter makes it clear that Respondent knew or should have known that his ''no'' response to this question was false. Government's Motion, GE–4, at 1–2.

The second liability question that Respondent answered on his online DEA application for a registration asks: ''Has the applicant ever surrendered (for cause) or had a federal controlled substance registration revoked, suspended, restricted or denied, or is any such action pending?'' Government's Motion, GE–l, at 2; Government's Motion, GE–10, at 1. Respondent answered ''no'' to this question. Government's Motion, GE–1, at 2; Government's Motion, GE–10, at 1. The DEA–104 Voluntary Surrender of Controlled Substances Privileges form that Respondent signed, however, makes it clear that Respondent knew or should have known that his ''no'' response to this question was false. Government's Motion, GE–8, at 1.

DEA approved Respondent's application and, on October 17, 2014, assigned DEA Certificate of Registration No. FR4900305 to him. Government's Motion, GE–1, at 1.

On April 17, 2017, Respondent submitted an online DEA renewal application for his DEA registration No. FR4900305. Government's Motion, GE–1, at 1; Government's Motion, GE–11 (Respondent's DEA Form 224A submitted on April 17, 2017), at 1. The online DEA renewal application Respondent submitted includes ''yes'' or ''no'' liability questions that an applicant must answer to advance to the next page of the online DEA renewal application. Government's Motion, GE–l, at 1; Government's Motion, GE–11, at 1.

The first liability question that Respondent answered on his online DEA renewal application asks: ''Has the applicant ever been convicted of a crime in connection with controlled substance(s) under state or federal law, or been excluded or directed to be excluded from participation in a medicare or state health care program, or [is] any such action pending?'' Government's Motion, GE–1, at 1; Government's Motion, GE–11, at 1. Respondent answered ''no'' to this question. Government's Motion, GE–1, at 1; Government's Motion, GE–11, at 1. Again, the HHS/OIG Exclusion letter makes it clear that Respondent knew or should have known that his ''no'' response to this question was false. Government's Motion, GE–4, at 1–2.

The second liability question that Respondent answered on his online DEA renewal application asks: ''Has the applicant ever surrendered (for cause) or had a federal controlled substance registration revoked, suspended, restricted or denied, or is any such action pending?'' Government's Motion, GE–l, at 1; Government's Motion, GE–11, at 1. Respondent answered ''no'' to this question. Government's Motion, GE–1, at 1; Government's Motion, GE–11, at 1. Again, the DEA–104 Voluntary Surrender of Controlled Substances Privileges form that Respondent signed makes it clear that Respondent knew or should have known that his ''no'' response to this question was false. Government's Motion, GE–8, at 1.

DEA approved Respondent's renewal application on April 19, 2017. Government's Motion, GE–1, at 1.

In sum, Respondent is currently registered as a practitioner in schedules II through V under DEA Certificate of Registration FR4900305 at Calle Fernandez Garcia 306, Luquillo, Puerto Rico 00773. Government's Motion, GE–1, at 1. Respondent's registration expires on April 30, 2020. *Id.*

Discussion

The Material Falsification Allegation

Pursuant to 21 U.S.C. 824(a)(1), the Attorney General may suspend or revoke a registration issued under section 823 of Title 21, ''upon a finding that the registrant . . . has materially falsified any application filed pursuant to or required by this subchapter.'' According to Agency precedent, the Government must show that a respondent ''knew or should have known'' that his response to a liability question was false. *Samuel S. Jackson, D.D.S.,* 72 FR 23,848, 23,852 (2007). Also according to Agency precedent, a respondent's claim that he misunderstood a liability question is not a defense. *Alvin Darby, M.D.,* 75 FR 26,993, 26,999 (2010).

According to the Supreme Court, Federal courts' ''most common formulation'' of the concept of ''materiality'' is that ''a concealment or misrepresentation is material if it 'has a natural tendency to influence, or was capable of influencing, the decision of' the decisionmaking body to which it was addressed.'' *Kungys* v. *United States,* 485 U.S. 759, 770 (1988) (quoting *Weinstock* v. *United States,* 231 F.2d 699, 701–02 (D.C. Cir. 1956) (other citation omitted)). The Court explicitly addressed what has ''never been the test of materiality[—] that the misrepresentation or concealment would *more likely than not* have produced an erroneous decision, or even that it would *more likely than not* have triggered an investigation.'' *Kungys, supra,* 485 U.S. at 771 (emphasis in original). Instead, the Court articulated the specific test as ''whether the misrepresentation or concealment was predictably capable of affecting, *i.e.,* had a natural tendency to affect, the official decision.'' *Id.*

As already discussed, when Respondent submitted an online DEA application for a registration and an online DEA renewal application, he answered ''no'' to whether he had ever been excluded from participation in Medicare and to whether he had ever surrendered a registration for cause. As I already found above, Respondent's four answers were false and he ''knew or should have known'' that they were false.

I next determine the ''materiality'' of Respondent's four answers. 21 U.S.C. 824(a)(1). Concerning Respondent's false statements about his voluntary surrender of DEA registration No. BR3465944, the DEA–104 that Respondent executed does not indicate the underlying reason(s) for Respondent's ''alleged failure to comply with the Federal requirements pertaining to controlled substances.'' Government's Motion, GE–8, at 1. Further, as the ALJ noted, the DEA–104 reveals nothing about whether Respondent's ''alleged failure'' ''had a natural tendency to affect'' an Agency decision. R.D., at 13–14 (quoting *Michel P. Toret, M.D.,* 82 FR 60,041, 60,043 (2017) quoting *Kungys, supra,* 485 U.S. at 771). I found no evidence in the record concerning the materiality of Respondent's two false answers about his voluntary surrender. Thus, I agree with the ALJ that the record does not support a finding that Respondent's two false answers about his voluntary surrender of registration No. BR3465944 were ''materially'' false. 21 U.S.C. 824(a)(1).

Concerning Respondent's false statements regarding his mandatory exclusion, the Agency has never before considered the materiality of a respondent's false answers about his mandatory exclusion as that question is posed in this case. I find the ALJ's analysis persuasive: ''Considering that exclusion from a federal health care program under 42 U.S.C. 1320a–7(a) is an independent basis for revoking [a]

registration . . ., it is reasonable to conclude that information regarding an applicant's mandatory exclusion by HHS would be 'capable of influencing the [DEA's] decision.' '' R.D., at 13 (citations omitted). I agree with the ALJ. I find that Respondent's failure to disclose his mandatory exclusion from a Federal health care program is material. *Id.* Thus, I find that there is substantial evidence in the record that Respondent materially falsified a DEA registration application and a DEA registration renewal application concerning his mandatory exclusion. 21 U.S.C. 824(a)(1).

The Allegation of Mandatory Exclusion From a Federal Health Care Program

Pursuant to 21 U.S.C. 824(a)(5), the Attorney General may suspend or revoke a registration issued under section 823 of Title 21, ''upon a finding that the registrant . . . has been excluded . . . from participation in a program pursuant to section 1320a–7(a) of Title 42.'' Agency precedent makes clear that revocation under 21 U.S.C. 824(a)(5) may be appropriate regardless of whether or not the misconduct that led to the mandatory exclusion involved controlled substances. *KK Pharmacy,* 64 FR 49,507, 49,510 (1999) (collecting cases) (The Agency ''has previously held that misconduct which does not involve controlled substances may constitute grounds, under 21 U.S.C. 824(a)(5), for the revocation of a DEA Certificate of Registration.''); *Melvin N. Seglin, M.D.,* 63 FR 70,431, 70,433 (1998) (''[M]isconduct which does not involve controlled substances may constitute grounds for the revocation of a DEA registration pursuant to 21 U.S.C. 824(a)(5).''); *Stanley Dubin, D.D.S.,* 61 FR 60,727, 60,728 (1996) (Registration revoked and pending applications for renewal denied when registrant's ''actions cast substantial doubt on . . . [his] integrity.''); *George D. Osafo, M.D.,* 58 FR 37,508, 37,509 (1993) (Submission of fraudulent medical claims and larceny convictions indicated that registrant ''placed monetary gain above the welfare of his patients, and in so doing, endangered the public health and safety.'').

Under 42 U.S.C. 1320a–7(a)(1), the HHS OIG is required to exclude from participation in any Federal health care program any individual who has been convicted of a criminal offense ''related to the delivery of an item or service under . . . [42 U.S.C. 1395 *et seq.*] or under any State health care program.'' Based on the uncontroverted evidence in the record, as already discussed, I found that Respondent has been excluded from participation in any capacity in Medicare, Medicaid, and all Federal health care programs and that Respondent is still excluded from participation in these programs. Accordingly, I find that the evidence in the record satisfies the Government's *prima facie* burden to support the revocation of Respondent's registration under 21 U.S.C. 824(a)(5).

Sanction

Where, as here, the Government has met its *prima facie* burden, the burden shifts to Respondent to show why he can be entrusted with a registration. Respondent, however, did not submit evidence for the record. Instead, he stated that the documents are self-explanatory, that he ''will not make any statement regarding this administrative action,'' and that ''[t]he issue is hereby submitted for final ruling.'' R.D., at 7. Thus, the question now is whether revocation is the appropriate sanction under the facts I have found: Two separate violations whose statutory sanctions include revocation. 21 U.S.C. 824(a)(1) and (5).

I agree with the ALJ's analysis and conclude that revocation is independently the appropriate sanction for each of the separate violations the facts support. In particular, I agree with the ALJ's analysis that, even though the underlying misconduct which led to Respondent's conviction and mandatory exclusion did not involve controlled substances, it did involve the unlawful use of Respondent's prescribing authority. R.D., at 17. As the ALJ stated, ''This type of fraudulent behavior does not inspire confidence that . . . [Respondent] can be trusted with a prescription pad bearing a DEA registration number.'' *Id.* After all, if Respondent signed blank certificates of medical necessity for durable medical equipment that was not medically necessary, ''it is doubtful that DEA can expect . . . [Respondent] to honestly prescribe controlled substances for only legitimate medical purposes.'' *Id.*

Further, Respondent materially falsified two DEA applications. One such falsification, alone, is sufficient, without proof of any other misconduct, to revoke a registration. *Toret, supra,* 82 FR at 60,043. As the ALJ stated, ''[N]ot only has the Government proven two independent bases for revoking . . . [Respondent's] registration . . ., but . . . [Respondent] has not advanced any evidence that he 'can be trusted to responsibly discharge his obligations as a registrant.' '' R.D., at 17–18 (citation omitted).

Accordingly, based on the evidence in the record supporting two independent bases for revocation, I shall order that Respondent's DEA registration be revoked and that any pending application of Respondent to renew or to modify that registration be denied.

Order

Pursuant to 28 CFR 0.100(b) and the authority thus vested in me by 21 U.S.C. 824(a), I order that DEA Certificate of Registration No. FR4900305 issued to Narciso A. Reyes, M.D., be, and it hereby is, revoked. Pursuant to 28 CFR 0.100(b) and the authority thus vested in me by 21 U.S.C. 823(f), I further order that any pending application of Narciso A. Reyes, M.D., to renew or to modify this registration, be, and it hereby is, denied. This Order is effective December 31, 2018.

Dated: November 19, 2018.

Uttam Dhillon,

Acting Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Office of Justice Programs

[OJP (OJJDP) Docket No. 1752]

Meeting of the Coordinating Council on Juvenile Justice and Delinquency Prevention

AGENCY: Coordinating Council on Juvenile Justice and Delinquency Prevention, Office of Justice Programs, Department of Justice.

ACTION: Notice of meeting.

SUMMARY: The Coordinating Council on Juvenile Justice and Delinquency Prevention announces its next meeting.

DATES: Wednesday, December 19, 2018 at 10 a.m. EST.

ADDRESSES: The meeting will take place in the third floor main conference room at the U.S. Department of Justice, Office of Justice Programs, 810 7th St. NW, Washington, DC 20531.

FOR FURTHER INFORMATION CONTACT: Visit the website for the Coordinating Council at *www.juvenilecouncil.gov* or contact Jeff Slowikowski, Designated Federal Official (DFO), OJJDP, by telephone at (202) 616–3646, email at *jeff.slowikowski@usdoj.gov,* or fax at (202) 353–9093; or Sarah Wisniewski, Senior Program Manager/Federal Contractor, by telephone (202) 305–9017, email at *sarah.wisniewski@usdoj.gov,* or fax at (866) 854–6619. Please note that the above phone/fax numbers are not toll free.

SUPPLEMENTARY INFORMATION: The Coordinating Council on Juvenile Justice and Delinquency Prevention

(''Council''), established by statute in the Juvenile and Delinquency Prevention Act of 1974 section 206(a) (42 U.S.C. 5616(a)), will meet to carry out its advisory functions. Information regarding this meeting will be available on the Council's web page at *www.juvenilecouncil.gov.* The meeting is open to the public, and available via online video conference, but prior registration is required (see below). In addition, meeting documents will be viewable via this website including meeting announcements, agendas, minutes and reports.

Although designated agency representatives may attend in lieu of members, the Council's formal membership consists of the following secretaries and/or agency officials; Attorney General (Chair), Administrator of the Office of Juvenile Justice and Delinquency Prevention (Vice Chair), Secretary of Health and Human Services (HHS), Secretary of Labor (DOL), Secretary of Education (DOE), Secretary of Housing and Urban Development (HUD), Director of the Office of National Drug Control Policy, Chief Executive Officer of the Corporation for National and Community Service and the Assistant Secretary of Homeland Security for the U.S. Immigration and Customs Enforcement. Nine additional members are appointed by the Speaker of the U.S. House of Representatives, the U.S. Senate Majority Leader and the President of the United States. Further agencies that take part in Council activities include, the Departments of Agriculture, Defense, Interior and the Substance and Mental Health Services Administration of HHS.

Council meeting agendas are available on *www.juvenilecouncil.gov*. Agendas will generally include: (a) Opening remarks and introductions; (b) Presentations and discussion of agency work; and (c) Council member announcements.

For security purposes and because space is limited, members of the public who wish to attend must register in advance of the meeting online at *www.juvenilecouncil.gov,* no later than Friday December 14, 2018. Should issues arise with online registration, or to register by fax or email, the public should contact Sarah Wisniewski, Senior Program Manager/Federal Contractor (see above for contact information). If submitting registrations via fax or email, attendees should include all of the following: Name, Title, Organization/Affiliation, Full Address, Phone Number, Fax and Email. The meeting will also be available to join online via Webex, a video conferencing platform. Registration for this is also found online at *www.juvenilecouncil.gov*.

Note: Photo identification will be required to attend the meeting at the OJP 810 7th Street Building.

Interested parties may submit written comments and questions in advance to Jeff Slowikowski (DFO) for the Council, at the contact information above. If faxing, please follow up with Sarah Wisniewski, Senior Program Manager/Federal Contractor (contact information above) in order to assure receipt of submissions. All comments and questions should be submitted no later than 5:00 p.m. EST on Friday December 14, 2018. The Council will limit public statements if they are found to be duplicative. Written questions submitted by the public while in attendance will also be considered by the Council.

Jeffrey Slowikowski,

Senior Advisor, Office of Juvenile Justice and Delinquency Prevention.

BILLING CODE 4410–18–P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Form ETA–9142–B–CAA–2, Attestation for Employers Seeking To Employ H–2B Nonimmigrant Workers Under Section 205 of Division M of the Consolidated Appropriations Act, 2018 Public Law 115–141

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL or Department) is submitting the Employment and Training Administration (ETA) sponsored Information Collection Request (ICR), titled, ''Attestation for Employers Seeking to Employ H–2B Nonimmigrant Workers Under Section 205 of Division M of the Consolidated Appropriations Act, 2018 Public Law 115–141 (March 23, 2018),'' to the Office of Management and Budget (OMB) for review and approval for continued use in accordance with the Paperwork Reduction Act (PRA) of 1995. Public comments on the ICR are invited.

DATES: The OMB will consider all written comments it receives on or before December 31, 2018.

ADDRESSES: A copy of this ICR with applicable supporting documentation, including a description of the likely respondents, proposed frequency of response, and estimated total burden, may be obtained free of charge from the *RegInfo.gov* website at: *http://www.reginfo.gov/public/do/PRAViewICR?ref_201811-1205-003* (this link will only become active on the day following publication of this notice); by contacting Michel Smyth at 202–693–4129/TTY 202–693–8064 (these are not toll-free numbers); or by sending an email to: *DOL_PRA_PUBLIC@dol.gov.*

Submit comments about this request by mail to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL–ETA, Office of Management and Budget, Room 10235, 725 17th Street NW, Washington, DC 20503; by Fax: 202–395–6881 (this is not a toll-free number); or by email: *OIRA_submission@omb.eop.gov.* Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor—OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW, Washington, DC 20210; or by email: *DOL_PRA_PUBLIC@dol.gov.*

FOR FURTHER INFORMATION CONTACT: Michel Smyth by telephone at 202–693–4129/TTY 202–693–8064 (these are not toll-free numbers) or by sending an email to: *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: This ICR seeks approval under the PRA for revisions to the Attestation for Employers Seeking to Employ H–2B Nonimmigrant Workers Under Section 205 of Division M of the Consolidated Appropriations Act, 2018 Public Law 115–141 (March 23, 2018) information collection. On March 23, 2018, the President signed the Consolidated Appropriations Act, 2018. Division M, Section 205 of the Act authorized the Secretary of Homeland Security, in consultation with the Secretary of Labor, to increase the number of H–2B visas available to U.S. employers, notwithstanding the otherwise established statutory numerical limitation. This collection of information was required by the regulations that went into effect on May 31, 2018, implementing Section 205. The Secretary of Homeland Security increased the H–2B cap for Fiscal Year 2018 by up to 15,000 additional visas for American businesses that were likely to suffer irreparable harm (that is, permanent and severe financial loss) without the ability to employ before the end of FY 2018 the H–2B workers requested on their petition.

The exigency created by the Consolidated Appropriations Act to meet the high demand by American businesses for H–2B workers, and the short period of time remaining in the fiscal year for U.S. employers to avoid the economic harm this legislation was intended to prevent, required initial clearance of this information collection using expedited processes. As a result, initial clearance for this information collection was sought using Paperwork Reduction Act emergency procedures outlined in regulations at 5 CFR 1320.13, and the Department received a six-month approval. Subsequently, the Department has sought public comment to revise this information collection through the notice and comment process. Specifically, the Department proposes: to revise this collection to eliminate the now expired provisions for completing and submitting Form ETA–9142–B–CAA–2, *Attestation for Employers Seeking to Employ H–2B Nonimmigrant Workers Under Section 205 of Division M of the Consolidated Appropriations Act, 2018 Public Law 115–141* (March 23, 2018). In accordance with the applicable regulations, the ICR would continue to require employers to retain the required supporting documentation for three years from the date the certification was issued.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6. The Department obtains OMB approval for this information collection under Control Number 1205–0531. The current approval is scheduled to expire on November 30, 2018; however, the DOL notes that remaining information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on August 30, 2018, 83 FR 44305.

• Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs, at the address shown in the **ADDRESSES** section within thirty (30) days of the publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1205–0531. The OMB is particularly interested in comments that

• Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

• Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

• Enhance the quality, utility, and clarity of the information to be collected; and

• Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: DOL–ETA.

Title of the Collection: Attestation for Employers Seeking to Employ H–2B Nonimmigrant Workers Under Section 205 of Division M of the Consolidated Appropriations Act, 2018 Public Law 115–141 (March 23, 2018).

OMB Control Number: 1205–0531.

Affected Public: Private Sector (businesses or other for-profits and not-for-profit institutions) and State, Local, and Tribal Governments.

Total Estimated Annual Respondents: 5,177.

Total Estimated Annual Responses: 5,177.

Total Estimated Average Time per Response: 1 hour.

Total Estimated Annual Time Burden: 5,177 hours.

Total Estimated Annual Other Cost Burden: $0.

Authority: 44 U.S.C. 3507(a)(1)(D).

Dated: November 26, 2018.

Michel Smyth,

Departmental Clearance Officer.

[FR Doc. 2018–26078 Filed 11–29–18; 8:45 am]

BILLING CODE 4510–FP–P

LIBRARY OF CONGRESS

Copyright Royalty Board

[Docket 14–CRB–0010–CD/SD (2010–13)]

Distribution of Cable Royalty Funds; Distribution of Satellite Royalty Funds

AGENCY: Copyright Royalty Board, Library of Congress.

ACTION: Final distribution determination.

SUMMARY: The Copyright Royalty Judges (Judges) announce the final distribution of cable and satellite royalty funds for the years 2010, 2011, 2012, and 2013. The determination is a result of agreement among the participants that claim shares of the cable and satellite royalty funds to be allocated to the Program Suppliers Claimant category. The Judges issued their allocation determination relating to cable royalty funds for the relevant years to the participants on October 18, 2018. Allocation of satellite royalty funds is not yet determined.

DATES: *Applicable date:* November 30, 2018.

ADDRESSES: The final distribution order is also published in eCRB at *https://app.crb.gov/.*

Docket: For access to the docket to read submitted background documents, go to eCRB, the Copyright Royalty Board's electronic filing and case management system, at *https://app.crb.gov/* and search for docket number 14–CRB–0010–CD/SD (2010–13).

FOR FURTHER INFORMATION CONTACT: Anita Blaine, CRB Program Specialist, by telephone at (202) 707–7658 or email at *crb@loc.gov.*

SUPPLEMENTARY INFORMATION: The Copyright Royalty Judges (Judges) received a joint motion of MPAA-represented Program Suppliers (MPAA) and Multigroup Claimants (MGC) for entry of a consent order adopting the distribution shares proposed by the MPAA and ordering a final distribution in conformity with those agreed shares of cable and satellite television royalty funds to be allocated to the Program Suppliers category for the 2010–13 cable and satellite royalty years.

The Judges find that the parties' agreement as to the final percentage distribution has ended any remaining controversy with regard to the subject funds over which the Judges have jurisdiction and that neither party now has a significant interest related to this proceeding as to the 2010–13 cable and satellite royalty funds. Accordingly, good cause exists for entry of a final distribution determination relating to the subject funds.

Distribution of funds allocated to all other program categories, except the Devotional Programming category, was without controversy. Parties to the controversy relating to the Devotional category resolved that controversy by agreement and the Judges entered a final order with regard to the Devotional

category on July 18, 2018. *See* 83 FR 38326. Resolution of the present controversy means that when category allocation is final for both cable and satellite royalty deposits, the Judges may order distribution of the subject funds and close the proceeding.

The Judges therefore *order* that the royalty shares proposed in the MPAA's Written Direct Statements (Dec. 29, 2017) are adopted for the 2010–13 cable and satellite royalty years and that final distribution of the cable and satellite royalty funds allocated to the Program Suppliers category shall be in accordance with the following relative shares.

PROGRAM SUPPLIERS CATEGORY

	MPAA (%)	MGC (%)
Cable Royalty Year:		
2010	99.37	0.63
2011	99.47	0.53
2012	99.45	0.55
2013	99.50	0.50
Satellite Royalty Year:		
2010	99.52	0.48
2011	99.82	0.18
2012	99.82	0.18
2013	99.89	0.11

The Judges *further order* that, as the parties have presented this as an agreed determination, they have waived their rights to seek rehearing.

The Judges *further order* that this final distribution determination is without prejudice to the parties' right to appeal the Judges' interlocutory ruling in this consolidated proceeding with regard to both cable and satellite claims issues.

Upon issuance of this final determination, the Register of Copyrights (''Register'') shall have 60 days to conduct a statutory review. The Librarian of Congress shall review and cause this final determination, and any correction thereto by the Register, to be published in the **Federal Register** no later than the conclusion of the 60-day review period.

October 1, 2018.

So ordered.

Suzanne M. Barnett,
Chief United States Copyright Royalty Judge.

David R. Strickler,

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (18–096)]

NASA International Space Station Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, as amended, the National Aeronautics and Space Administration announces a meeting of the NASA International Space Station (ISS) Advisory Committee. The purpose of the meeting is to review all aspects related to the safety and operational readiness of the ISS, and to assess the possibilities for using the ISS for future space exploration.

DATES: Friday, December 21, 2018, 2–3 p.m., Eastern Time.

ADDRESSES: NASA Headquarters, Glennan Conference Room (1Q39), 300 E Street SW, Washington, DC 20546. Note: 1Q39 is located on the first floor of NASA Headquarters.

FOR FURTHER INFORMATION CONTACT: Mr. Patrick Finley, Designated Federal Officer, Office of International and Interagency Relations, (202) 358–5684, NASA Headquarters, Washington, DC 20546–0001.

SUPPLEMENTARY INFORMATION: This meeting will be open to the public up to the seating capacity of the room. This meeting is also accessible via teleconference. To participate telephonically, please contact Mr. Finley by telephone at (202) 358–5684 before 4:30 p.m., Eastern Time, on December 18, 2018. You will need to provide your name, affiliation, and phone number. Attendees will be requested to sign a register and to comply with NASA security requirements, including the presentation of a valid picture ID to Security before access to NASA Headquarters. Foreign nationals attending this meeting will be required to provide a copy of their passport and visa in addition to providing the following information no less than 10 working days prior to the meeting: Full name; gender; date/place of birth; citizenship; visa information (number, type, expiration date); passport information (number, country, expiration date); employer/affiliation information (name of institution, address, country, telephone); title/position of attendee; and home address to Mr. Finley via email at *patrick.t.finley@nasa.gov* or by telephone at (202) 358–5684. U.S. citizens and permanent residents (green card holders) are requested to submit their name and affiliation no less than 3 working days prior to the meeting to Mr. Finley. It is imperative that the meeting be held on this date to accommodate the scheduling priorities of the key participants.

Patricia Rausch,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

NATIONAL SCIENCE FOUNDATION

Alan T. Waterman Award Committee; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following meeting:

NAME AND COMMITTEE CODE: Alan T. Waterman Award Committee (#1172).

DATE AND TIME: January 16, 2019; 9 a.m. to 2 p.m.

PLACE: National Science Foundation, 2415 Eisenhower Avenue, Suite W19000, Alexandria, Virginia 22314.

TYPE OF MEETING: Closed.

CONTACT PERSON: Sherrie B. Green, Program Manager, OD/OIA, Suite W17126, National Science Foundation, 2415 Eisenhower Ave., Alexandria, VA 22314; Telephone: (703) 292–8040.

PURPOSE OF MEETING: To provide advice and recommendations in the selection of the Alan T. Waterman Award recipient.

AGENDA: To review and evaluate nominations as part of the selection process for awards.

REASON FOR CLOSING: The nominations being reviewed include information of a personal nature where disclosure would constitute unwarranted invasions of personal privacy. These matters are exempt under 5 U.S.C. 552b(c), (6) of the Government in the Sunshine Act.

Dated: November 27, 2018.

Crystal Robinson,

Committee Management Officer.

NATIONAL SCIENCE FOUNDATION

Proposal Review; Notice of Meetings

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces its intent to hold proposal review meetings throughout the year. The purpose of these meetings is to provide advice and recommendations concerning proposals submitted to the NSF for financial support. The agenda for each of these meetings is to review and evaluate proposals as part of the selection process for awards. The review and evaluation may also include assessment of the progress of awarded proposals. These meetings will primarily take place at NSF's headquarters, 2415 Eisenhower Avenue, Alexandria, VA 22314.

These meetings will be closed to the public. The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act. NSF will continue to review the agenda and merits of each meeting for overall compliance of the Federal Advisory Committee Act.

These closed proposal review meetings will not be announced on an individual basis in the **Federal Register**. NSF intends to publish a notice similar to this on a quarterly basis. For an advance listing of the closed proposal review meetings that include the names of the proposal review panel and the time, date, place, and any information on changes, corrections, or cancellations, please visit the NSF website: *https://www.nsf.gov/events/advisory.jsp.* This information may also be requested by telephoning, 703/292–8687.

Dated: November 26, 2018.

Crystal Robinson,

Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[NRC–2018–0219]

Performance Review Boards for Senior Executive Service; Revision

AGENCY: Nuclear Regulatory Commission.

ACTION: Appointments; revision.

SUMMARY: On October 19, 2018, the U.S. Nuclear Regulatory Commission (NRC) announced appointments to the NRC Performance Review Board (PRB) responsible for making recommendations on performance appraisal ratings and performance awards for NRC Senior Executives and Senior Level System employees and appointments to the NRC PRB Panel responsible for making recommendations to the appointing and awarding authorities for NRC PRB members. Since then, the NRC has made revisions to the list of PRB member appointees.

DATES: November 30, 2018.

ADDRESSES: Please refer to Docket ID NRC–2018–0219 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking website:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2018–0219. Address questions about Docket IDs in *Regulations.gov* to Jennifer Borges; telephone: 301–287–9127; email: *Jennifer.Borges@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.*
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Miriam L. Cohen, Executive Resources Board, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–287–0747, email: *Miriam.Cohen@nrc.gov.*

SUPPLEMENTARY INFORMATION: On October 19, 2018 (83 FR 53118), the NRC announced appointments to the NRC PRB membership. The following revision has been made to the list of NRC PRB members. Catherine A. Haney, Regional Administrator, Region II, will replace Frederick D. Brown, Director, Office of New Reactors. The revised list of NRC PRB members that are responsible for making recommendations to the appointing and awarding authorities on performance appraisal ratings and performance awards for Senior Executives and Senior Level System employees read as follows:

Margaret M. Doane, Executive Director for Operations;

Marian L. Zobler, General Counsel;

Daniel H. Dorman, Deputy Executive Director for Materials, Waste, Research, State, Tribal, Compliance, Administration, and Human Capital Programs, Office of the Executive Director for Operations;

Michael R. Johnson, Deputy Executive Director for Reactor and Preparedness Programs, Office of the Executive Director for Operations;

Marc L. Dapas, Director, Office of Nuclear Material Safety and Safeguards;

Catherine A. Haney, Regional Administrator, Region II;

Brian E. Holian, Director, Office of Nuclear Security and Incident Response;

Nader L. Mamish, Director, Office of International Programs;

Mary C. Muessle, Director, Office of Administration;

K. Steven West, Regional Administrator, Region III; and

Maureen E. Wylie, Chief Financial Officer.

The following individuals will serve as members of the NRC PRB Panel that was established to review appraisals and make recommendations to the appointing and awarding authorities for NRC PRB members:

Anne T. Boland, Director, Office of Enforcement;

Brooke P. Clark, Deputy General Counsel for Hearings and Administration; and

Andrea D. Veil, Executive Director, Advisory Committee on Reactor Safeguards.

All appointments are made pursuant to Section 4314 of Chapter 43 of Title 5 of the United States Code.

Dated at Rockville, Maryland, on November 20, 2018.

For the Nuclear Regulatory Commission.

Miriam L. Cohen,

Secretary, Executive Resources Board.

BILLING CODE 7590–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–84652; File No. SR–CboeBYX–2018–024]

Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to the Modification of Certain Routing Fees

November 26, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 13, 2018, Cboe BYX Exchange, Inc. (the ''Exchange'' or ''BYX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BYX Exchange, Inc. (the ''Exchange'' or ''BYX'') is filing with the Securities and Exchange Commission (''Commission'') a proposed rule change to modify certain Routing Fees.

The text of the proposed rule change is also available on the Exchange's website (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule to amend pricing for orders routed to Cboe EDGA Exchange, Inc., (''EDGA''), which yield fee codes AA, BJ, and RA.[3] Particularly, as of November 1, 2018, EDGA implemented pricing changes for transactions that add and remove liquidity.[4] The filing generally proposes that orders that add liquidity will be assessed a fee of $0.00300 per share and orders that remove liquidity will be provided a rebate of $0.00240 per share. Based on the changes in pricing at EDGA, the Exchange proposes the pricing changes described below.

First, the Exchange notes that orders routed to EDGA using ALLB routing strategy (which yield fee code AA) and orders routed to EDGA using a Destination Specific, TRIM or TRIM2 routing strategy (which yield fee code BJ) are currently assessed $0.00030 per share. The Exchange proposes to eliminate this fee and instead provide a rebate of $0.00240 per share for these orders. Next, the Exchange notes that orders routed to EDGA that add liquidity (which yield fee code RA) are assessed $0.00030 per share. The Exchange proposes to increase the rate from $0.00030 per share to $0.00300 per share.

2. Statutory Basis

The Exchange also believes the proposed rule change is consistent with Section 6(b)(4) of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its members and other persons using its facilities.

The Exchange believes the proposed changes are reasonable because they reflect a pass-through of the pricing changes by EDGA described above. The Exchange further believes the proposed fee change is non-discriminatory because it applies uniformly to all Members. The Exchange lastly notes that routing through the Exchange is voluntary and that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues or providers of routing services if they deem fee levels to be excessive.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes the proposed routing fee changes will not impose an undue burden on competition because the Exchange will uniformly assess the affected routing fees on all Members. Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value or if they view the proposed fee as excessive. The Exchange also notes the proposed changes to the EDGA-related routing fees are meant to pass through the fees and rebates associated with executing orders on that market, and is therefore not designed to have any significant impact on competition. Further, excessive fees for participation would serve to impair an exchange's ability to compete for order flow and members rather than burdening competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[5] and paragraph (f) of Rule 19b–4[6] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The Exchange initially filed the proposed fee changes on November 1, 2018 (SR–CboeBYX–2018–023). On business date November 13, 2018, the Exchange withdrew that filing and submitted this filing.

[6] 17 CFR 240.19b–4(f).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml);* or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–CboeBYX–2018–024 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–CboeBYX–2018–024. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CboeBYX–2018–024 and should be submitted on or before December 21, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[7]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–84651; File No. SR–PEARL–2018–19]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Withdrawal of a Proposed Rule Change To Amend the Fee Schedule Regarding Connectivity Fees for Members and Non-Members

November 26, 2018.

On September 18, 2018, MIAX PEARL, LLC (''MIAX PEARL'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend the MIAX PEARL Fee Schedule to increase certain connectivity fees. The proposed rule change was immediately effective upon filing with the Commission pursuant to Section 19(b)(3)(A) of the Act.[3] On October 10, 2018 the proposed rule change was published for comment in the **Federal Register** and, pursuant to Section 19(b)(3)(C) of the Act, the Commission: (1) Temporarily suspended the proposed rule change; and (2) instituted proceedings to determine whether to approve or disapprove the proposal.[4]

The Commission received one comment letter on the proposal.[5] On November 23, 2018, the Exchange withdrew the proposed rule change (SR–PEARL–2018–19).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[6]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–84647; File No. SR–NYSEArca–2018–84]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Amend Rule 6.4–O, Series of Options Open for Trading

November 26, 2018.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on November 19, 2018, NYSE Arca, Inc. (''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 6.4–O. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to amend Rule 6.4–O, Series of Options Open for Trading, to permit the listing and trading of up to ten expiration months for long term options on the SPDR® S&P

[1] 15 U.S.C.78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

500® Exchange-Traded Fund (the ''SPY ETF'').

Rule 6.4–O(d) provides that the Exchange may list, with respect to any class of stock or Exchange-Traded Fund Share options series, options having from twelve up to thirty-nine months from the time they are listed until expiration (''LEAPS''). Under the current Rule, the Exchange may list up to six LEAPS expiration months.[4] The Exchange proposes to amend Rule 6.4–O(d) to permit up to ten LEAPS expiration months for options on the SPY ETF.[5] This proposal, which is substantially the same as a recent rule amendment submitted by Nasdaq PHLX LLC (''PHLX'') and driven by customer demand,[6] would add liquidity to the SPY ETF options market by allowing market participants to hedge risks relating to SPY ETF positions over a potentially longer time period with a known and limited cost.

The SPY ETF options market today is characterized by its tremendous daily and annual liquidity. As a consequence the Exchange believes that the listing of additional SPY ETF LEAPS expiration months would be well received by investors. This proposal to expand the number of permitted SPY ETF LEAPS would not apply to LEAPS on any other class of stock or Exchange-Traded Fund Share options.[7]

2. Statutory Basis

The proposed rule change is consistent with Section 6(b)[8] of the Securities Exchange Act of 1934 (the ''Act''), in general, and furthers the objectives of Section 6(b)(5),[9] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by offering market participants additional LEAPS on SPY options for their investment and risk management purposes. The proposal is intended simply to provide additional trading opportunities which have been requested by customers, thereby facilitating transactions in options and contributing to the protection of investors and the maintenance of fair and orderly markets. The proposed rule change responds to the continuing needs of market participants, particularly portfolio managers and other institutional customers, by providing protection from long-term market moves and by offering an alternative to hedging portfolios with futures positions or off-exchange customized derivative instruments.

The Exchange believes that the addition today of four additional expiration months for SPY ETF LEAPS does not represent a proliferation of expiration months, but is instead a very modest expansion of LEAPS options in response to stated customer demand. Significantly, the proposal would feature new LEAPS expiration months in only a single class of options—the SPY ETF—that are very liquid and heavily traded, as discussed above. Additionally, the Exchange notes that ten expiration months are already permitted for stock index LEAPS options on the Exchange as well as on other markets.[10] Further, the Exchange has the necessary systems capacity to support the new SPY ETF LEAPS expiration months.

The Exchange notes that this proposal is substantially the same as a recent rule amendment submitted by PHLX.[11]

The Exchange respectfully requests that the Commission waive the 30-day operative delay so that the proposed rule change may become effective and operative upon filing with the Commission pursuant to Section 19(b)(3)(A) of the Act[12] and paragraph (f)(6) of Rule 19b–4 thereunder.[13] The Exchange believes that waiving the operative delay would be consistent with the protection of investors and the public interest because the proposed rule change would allow the Exchange to implement the modified rule, which aligns with the rules of another options exchange, without delay.[14]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposal merely provides investors additional investment and risk management opportunities by providing flexibility to the Exchange to list additional long term options expiration series, expanding the number of SPY ETF LEAPS offered on the Exchange from six expiration months to ten expiration months.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[15] and Rule 19b–4(f)(6) thereunder.[16]

A proposed rule change filed under Rule 19b–4(f)(6)[17] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[18] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative upon filing. The Exchange's proposal would eliminate an internal inconsistency in the Exchange's rules and also conform the Exchange's rules relating to the permitted number

[4] Strike price interval, bid/ask differential and continuity rules shall not apply to equity options or Exchange-Traded Fund Shares options until the time to expiration is less than nine months. *See* Rule 6.4–O(d).

[5] *See* proposed Rule 6.4–O(d) (providing in relevant part, that ''[t]he Exchange may open for trading up to ten expiration months for options on the [SPY ETF] and up to six extended far term expiration months for options on any Exchange-Trade Fund Share or equity option class'').

[6] *See also* Securities Exchange Act Release No. 84449 (October 18, 2018), 83 FR 53699 (October 24, 2018) (SR–Phlx–2018–64) (''PHLX Rule Change''). Rule 5.19–O(b)(1) likewise provides for up to ten expirations months in LEAPS on index options. Thus, the Exchange proposes to delete reference [sic] to index options in proposed Rule 6.4–O to enhance internal consistency and reduced [sic] as relates to the number of expiration months (*i.e.,* ten) allowed for index options. *See* proposed Rule 6.4–O(d).

[7] Historically, SPY is the largest and most actively traded ETF in the United States as measured by its assets under management and the value of shares traded.

[8] 15 U.S.C. 78f(b).

[9] 15 U.S.C. 78f(b)(5).

[10] *See* Rule 5.19–O(b)(1) and PHLX Rule 1101A(b)(iii).

[11] *See* PHLX Rule Change, *supra* note 6.

[12] 15 U.S.C. 78s(b)(3)(A).

[13] 17 CFR 240.19b–4(f)(6).

[14] *See* Phlx Rule Change, *supra* note 6.

[15] 15 U.S.C. 78s(b)(3)(A).

[16] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[17] *Id.*

[18] 17 CFR 240.19b–4(f)(6)(iii).

of SPY ETF LEAPS expiration months to those of PHLX.[19] Accordingly, the Commission believes that the proposal raises no new or novel regulatory issues, and waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. The Commission therefore waives the 30-day operative delay and designates the proposal operative upon filing.[20]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2018–84 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2018–84. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2018–84 and should be submitted on or before December 21, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[21]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–84646; File No. SR–FINRA–2018–039]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing of a Proposed Rule Change Relating to FINRA Rule 4570 (Custodian of Books and Records)

November 26, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''SEA,'' ''Act'' or ''Exchange Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 15, 2018, Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by FINRA. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

FINRA is proposing to amend FINRA Rule 4570 (Custodian of Books and Records) to: (1) Provide a member that is filing a Form BDW (Uniform Request for Broker-Dealer Withdrawal) the option of designating another FINRA member as the custodian of its books and records on the form; (2) clarify the obligations of the designated custodian; and (3) require the designated custodian to consent to act in such a capacity.

The text of the proposed rule change is available on FINRA's website at *http://www.finra.org,* at the principal office of FINRA and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

SEA Rule 17a–4 (Records to be Preserved by Certain Exchange Members, Brokers and Dealers)[3] requires broker-dealers to retain their books and records for specified retention periods.[4] Pursuant to SEA Rule 17a–4(g),[5] a firm that stops doing business as a registered broker-dealer has a continuing obligation to retain its required books and records for the remainder of the specified retention periods. Form BDW requires that a firm that is withdrawing its registration identify and provide the contact information of the person who will have custody of the firm's books and records after the firm has discontinued its business operations. Form BDW also requires that the firm provide the address where the books and records will be located, if different than the custodian's address. In addition, the Form BDW provides that the firm and person signing the form on behalf of the firm must certify that the firm's books and records will be preserved and made available for inspection.

FINRA Rule 4570 currently requires a member to designate as the custodian of its required books and records on the

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 17 CFR 240.17a–4.

[4] *See also* FINRA Rule 4511 (General Requirements).

[5] 17 CFR 240.17a–4(g).

Form BDW a person who is associated with the member at the time the Form BDW is filed.[6] The rule is intended to enhance the ability of FINRA to obtain a firm's required books and records upon dissolution of the firm.[7]

Permitting Another Member To Act as the Designated Custodian

FINRA understands that some members have had difficulty in identifying and designating an associated person as the books and records custodian on their Form BDWs when they are in the process of winding down. These members have indicated that other members are willing to function as custodians for purposes of FINRA Rule 4570, but they cannot do so currently because of the limitations in the rule.

To provide greater flexibility to members, FINRA is proposing to amend Rule 4570 to provide a member that is filing a Form BDW the option of designating another FINRA member as the custodian of its books and records on the Form BDW. The proposed rule change would not require members to designate another FINRA member as the custodian of their books and records, but would give them the option to do so, at their discretion. Firms would continue to have the option of designating an associated person as the custodian of their books and records. Further, the proposed rule change would preserve FINRA's ability to obtain the books and records of a former member because FINRA would continue to have jurisdiction over, and the ability to obtain information from, the member that has agreed to act as custodian.

Clarifying the Obligations of the Designated Custodian

In addition to permitting another member to act as the designated custodian, FINRA is proposing to amend Rule 4570 to clarify the obligations of the designated custodian. Specifically, the proposed rule change would clarify that the custodian designated on the Form BDW, which would be either an associated person or another member, must preserve the books and records on behalf of the member that filed the Form BDW for the remainder of the applicable retention periods and make them available for inspection by FINRA upon request. For example, if a custodian receives a record from a firm that is going out of business that had an original retention period of six years, four years of which have already passed, the custodian must retain that record for the remaining two years and provide it to FINRA upon request.

Further, the proposed rule change would clarify that a custodian is required to preserve and produce a former member's books and records in the same manner in which they were received. This provision is intended to ensure that the custodian does not alter the records after taking possession of them. However, the proposed rule change would provide that a custodian would not be precluded from converting the books and records in its possession into another format acceptable under the Exchange Act (*e.g.,* convert from paper format to an electronic storage media), so long as such records are not altered or deleted during the conversion process.

In addition, the proposed rule change would provide that where a member is acting as custodian, such member would not be required to verify the completeness or accuracy of the books and records that it receives. This exception is limited to members that are acting as custodians because their function is more akin to that of a recordkeeping service. However, FINRA believes that an associated person who is acting as custodian of a member's books and records is in a position to verify the completeness and accuracy of the member's books and records based on his or her existing relationship with the member.

Finally, FINRA is proposing to amend Rule 4570 to require that where a FINRA member has agreed to act as custodian of the books and records of another member that has filed a Form BDW, the member acting as custodian must: (1) Treat such books and records as if they were its own books and records; and (2) arrange upon its dissolution for such books and records to continue to be retained for the remainder of the applicable retention periods under FINRA and Exchange Act rules in the same manner as its own books and records consistent with Rule 4570. FINRA believes that by clarifying the obligations of the custodian, the proposed rule change would facilitate compliance with the obligations under SEA Rule 17a–4(g) and Form BDW.

Requiring the Consent of the Designated Custodian

FINRA has become aware of situations where the person named as the custodian on the Form BDW was not aware that the member was designating the person as a custodian. To address this issue, the proposed rule change would require a member to obtain the affirmative, written or verbal, consent of the custodian of books and records identified on the firm's Form BDW. In addition, the proposed rule change would require a member that is withdrawing its registration to inform its custodian of the obligations under FINRA and Exchange Act rules, including FINRA Rule 4570, prior to obtaining the custodian's consent.

The proposed rule change would also require the designated custodian to represent to FINRA, in a method prescribed by FINRA, that the custodian: (1) Has consented to act in the capacity of a custodian; (2) understands the responsibilities of a custodian; and (3) agrees to provide the books and records of the member for which it is acting as custodian to FINRA upon request during the course of the required retention periods.

The proposed rule change would impact all members, including members that have elected to be treated as capital acquisition brokers (''CABs'') and are subject to the CAB Rules. CAB Rule 457 subjects all CABs to FINRA Rule 4570. Accordingly, the proposed rule change to FINRA Rule 4570 would also impact CABs.

If the Commission approves the proposed rule change, FINRA will announce the effective date of the proposed rule change in a *Regulatory Notice* to be published no later than 60 days following Commission approval. The effective date will be no later than 120 days following publication of the *Regulatory Notice* announcing Commission approval.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,[8] which requires, among other things, that FINRA rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. FINRA believes that the proposed rule change would facilitate compliance with FINRA and SEC recordkeeping requirements. Specifically, the proposed rule change

[6] For purposes of Rule 4570, an associated person is a natural person. *See* FINRA By-Laws, Article I, paragraph (rr).

[7] FINRA has jurisdiction over, and has the ability to obtain information from, a former associated person of a member for generally two years after: (1) The effective date of the person's termination of registration; (2) the effective date of revocation or cancellation of the person's registration; or (3) in the case of an unregistered person, the date upon which such person ceased to be associated with the member. *See* FINRA By-Laws, Article V, Section 4 (Retention of Jurisdiction) and FINRA Rule 8210 (Provision of Information and Testimony and Inspection and Copying of Books).

[8] 15 U.S.C. 78*o*–3(b)(6).

would provide a member the flexibility to select another member as its custodian, which would enhance FINRA's ability to obtain the member's required books and records upon the member's dissolution. This is because FINRA's jurisdiction over former associated persons is more limited than its jurisdiction over current members. The proposed rule change would also clarify the obligations of the designated custodian and require the designated custodian's consent, which would enhance the ability of designated custodians to carry out their recordkeeping responsibilities.

B. Self-Regulatory Organization's Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Economic Impact Assessment

FINRA has undertaken an economic impact assessment, as set forth below, to further analyze the regulatory need for the proposed rule change, its potential economic impacts, including anticipated costs, benefits, and distributional and competitive effects, relative to the current baseline, and the alternatives FINRA considered in assessing how best to meet its regulatory objective.

Regulatory Need

FINRA Rule 4570 is intended to ensure that a firm's books and records are properly retained and accessible for the remainder of the applicable retention periods after the firm withdraws its registration with FINRA. However, certain aspects of the rule as currently written limit a firm's ability to identify a willing custodian and reduce the likelihood that books and records are properly retained and accessible following a firm's termination of registration.

Economic Baseline

The economic baseline for the proposed rule change is the number of firms that withdraw from the industry and thus file a Form BDW, and would therefore have to identify a custodian. In the past five years, approximately 1,100 firms filed a Form BDW, terminating their registration with FINRA. The firms had a median age of 14 years, and a median firm size of five associated persons and $240,000 in total assets, at the time they filed their Form BDW. The number of firms filing a Form BDW annually has largely remained constant over the last five years.[9]

Economic Impact

The proposed rule change would primarily affect firms filing a Form BDW, customers of those firms, designated custodians, and investors generally.

Benefits

Currently, firms that file a Form BDW may only designate an associated person as the custodian of their books and records. By allowing such firms to designate another member as their custodian, the proposed rule change may reduce search costs associated with identifying a willing custodian. Search costs can be significant for firms filing a Form BDW as there are many other obligations that must also be addressed as a firm prepares to leave the industry. These obligations can make it difficult for a firm to identify an associated person who is willing, and able, to carry out the custodial responsibilities as the firm is in the process of winding down.

FINRA believes that introducing-only firms with established relationships with clearing firms may be most likely to benefit from the additional flexibility provided in the proposed rule change.[10] The clearing firm will already have possession of at least part of the introducing firm's books and records and, if willing to act in such a capacity, could therefore more easily maintain custody of all of the introducing firm's records along with its own books and records. The value of this flexibility would depend upon the willingness of the clearing firm to take on these custodial obligations after the introducing firm has left the industry. Any factor impacting the provision of clearing services more generally would likely also impact the likelihood that a clearing firm would be willing to take on the custodial responsibilities. Currently, there are approximately 1,479 active introducing-only firms and 112 active clearing firms.[11]

FINRA also believes that if a firm that is filing a Form BDW chooses another member as its custodian, it would enhance the ability of FINRA to obtain the books and records of the firm. This is because FINRA's jurisdiction over former associated persons is more limited than its jurisdiction over current members.[12] As noted below, FINRA's ability to obtain the books and records of a former firm more easily and readily would also benefit customers of the firm and investors more generally.

FINRA has become aware of situations where a document request was made to a custodian only to find that the custodian had stopped paying for the document storage or otherwise no longer had access to the books and records of the former firm. This makes books and records unavailable for use by FINRA staff, may inhibit the ability of FINRA staff to conduct its work and could lead to the imposition of sanctions on the custodian. Further, without access to the books and records of a former firm, customers who bring a claim against the firm may be limited in their ability to obtain restitution. Finally, FINRA and other regulators may be more limited in their ability to pursue a disciplinary action against the former firm or an associated person of the firm, possibly increasing risk to investors generally. By clarifying custodians' obligations, the proposed rule change aims to improve custodians' understanding of the time and monetary commitment and the potential sanctions that could be imposed on them should they not comply with their obligations.

Further, FINRA has come across instances where the custodian was unaware that they were named as the custodian of a former firm's books and records and did not have access to them. By requiring the custodian's affirmative consent and representation to FINRA, the proposed rule change would eliminate such situations. Similar to the benefits associated with clarifying the obligations of custodians, the custodian's consent and representation to FINRA would also increase the likelihood that a former firm's books and records would be properly retained and accessible.

Costs

The costs associated with the proposed rule change would likely depend on whether the designated custodian is an associated person or another member. The proposed rule change would give a firm that is filing a Form BDW the additional option of designating another member, rather than

[9] Annually since 2013, FINRA has received a low of 212 withdrawal requests (2014) and a high of 234 withdrawal requests (2013), and an average of 220 withdrawal requests per year.

[10] Note that there are many firms that use clearing firms for some but not all of their transactions. The value of the additional flexibility decreases as the percentage of an introducing firm's records with any one clearing firm decreases.

[11] Of the 1,100 firms that withdrew from the industry over the last five years, we can affirmatively identify that 432 (39%) were introducing-only firms.

[12] FINRA has jurisdiction over, and has the ability to obtain information from, a former associated person generally for two years. *See* FINRA By-Laws, Article V, Section 4 (Retention of Jurisdiction) and FINRA Rule 8210 (Provision of Information and Testimony and Inspection and Copying of Books).

an associated person, as its custodian. Therefore, the expansion of the categories of eligible custodians should impose no new burdens on firms that continue to designate associated persons as their custodians. Introducing firms that designate their clearing firms as custodians, subject to their consent, may incur additional costs associated with clearing services.

Firms that designate members as their custodians, subject to their consent, may incur costs associated with record-keeping services provided by such members. For instance, a member that agrees to act as custodian is likely to incur operational and technology costs associated with integrating the former member's books and records into its record-keeping systems. Moreover, the proposed rule change could result in a change in how custodianship of books and records by firms leaving the industry is paid for and managed. For instance, clearing firms might adapt their business models to integrate the costs of custodial services into clearing agreements at the outset of the clearing relationship. This would potentially lead to an industry-wide increase in the costs of clearing agreements, regardless of any custodial undertaking by the clearing firms. However, considering the small number of firms that file Form BDW per year, FINRA believes that this is a low probability outcome.[13] Further, the competitive dynamics of procuring clearing services may preclude this outcome, as firms that raise their fees may lose clients.

The clarification of a custodian's obligations does not add any new direct burdens, but it could make it harder for firms to identify a custodian willing to agree to the obligations. Likewise, the affirmative consent requirement and the requirement to provide a representation to FINRA may make it more difficult for firms to find a willing custodian. However, given the importance to FINRA and investors of proper custody of books and records, FINRA believes that these additional burdens are warranted.

Alternatives Considered

FINRA considered whether to amend Rule 4570 to require a firm that is going out of business to be only able to designate another member as its custodian. While such a requirement would further enhance FINRA's ability to obtain the books and records of former firms, FINRA determined that a firm that is leaving the industry and that is experiencing financial or operational difficulties may find it difficult to find another member that is willing to act as custodian. Further, FINRA continues to evaluate the viability that FINRA make itself available as an alternative custodian for members' records after withdrawal.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–FINRA–2018–039 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–FINRA–2018–039. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of FINRA. All comments received will be posted without change.

Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–FINRA–2018–039 and should be submitted on or before December 21, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

Eduardo A. Aleman,

Assistant Secretary.

[FR Doc. 2018–26000 Filed 11–29–18; 8:45 am]

BILLING CODE 8011–01–P

[13] On average, 220 firms have filed a Form BDW each year over the last five years. This represents about five percent of all active firms.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–84648; File No. SR–NYSEArca–2018–85]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Certificate of Incorporation, Bylaws and Rule 3.3

November 26, 2018.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on November 20, 2018, NYSE Arca, Inc. (''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its certificate of incorporation, bylaws and Rule 3.3(a)(1)(B) to (1) harmonize certain provisions thereunder with similar provisions in the governing documents of the Exchange's national securities exchange affiliates and parent companies; and (2) make clarifying and updating changes. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Certificate of Incorporation of the Exchange (''Exchange Certificate''), Amended and Restated Bylaws of the Exchange (''Exchange Bylaws''), and Rule 3.3(a)(1)(B) to (1) harmonize certain provisions thereunder with similar provisions in the governing documents of the Exchange's national securities exchange affiliates [4] and parent companies; and (2) make clarifying and updating changes.

The Exchange is owned by the Holding Member, which in turn is indirectly wholly owned by NYSE Holdings LLC (''NYSE Holdings''). NYSE Holdings is a wholly owned subsidiary of Intercontinental Holdings, Inc. (''ICE Holdings''), which is in turn wholly owned by the Intercontinental Exchange, Inc. (''ICE'').[5]

The Exchange operates as a separate self-regulatory organization and has rules, membership rosters and listings distinct from the rules, membership rosters and listings of the other NYSE Group Exchanges. At the same time, however, the Exchange believes it is important for each of the NYSE Group Exchanges to have a consistent approach to corporate governance in certain matters, to simplify complexity and create greater consistency among the NYSE Group Exchanges.[6]

Because the Exchange is a Delaware non-stock corporation, most of the proposed changes are based on the governing documents of CHX and NYSE National, which are Delaware corporations, as the most comparable NYSE Group Exchanges.[7] The proposed Exchange Certificate and Exchange Bylaws reflect the expectation that the Exchange will continue to be operated with a governance structure substantially similar to that of other NYSE Group Exchanges, primarily CHX and NYSE National.

The changes described herein would become operative upon the Exchange Certificate becoming effective pursuant to its filing with the Secretary of State of the State of Delaware.

The proposed amendments described below are primarily based on the Second Amended and Restated Certificate of Incorporation of Chicago Stock Exchange, Inc. (''NYSE Chicago Certificate''); Second Amended and Restated By-Laws of NYSE Chicago, Inc. (''NYSE Chicago Bylaws'') [8]; Amended and Restated Certificate of Incorporation of NYSE National, Inc. (''NYSE National Certificate''); Fifth Amended and Restated Bylaws of NYSE National, Inc. (''NYSE National Bylaws'') [9]; and Sixth Amended and Restated Certificate of Incorporation of NYSE Group, Inc. (''NYSE Group Certificate). In addition, the amendments to the indemnification provisions are based on the Eighth Amended and Restated Bylaws of Intercontinental Exchange, Inc. (''ICE Bylaws'') and the Sixth Amended and Restated Bylaws of Intercontinental Exchange Holdings, Inc. (''ICE Holdings Bylaws'').

Proposed Amendments to the Exchange Certificate

The Exchange proposes to amend the Exchange Certificate as follows.

Title and Introductory Paragraphs

The Exchange proposes to amend the title to reflect that the proposed Exchange Certificate is the ''Amended and Restated Certificate of Incorporation of NYSE Arca, Inc.'' [10] In addition, it proposes to adopt introductory paragraphs stating the Exchange's name and stating that the Exchange Certificate was adopted and amended in accordance with specific provisions of the General Corporation Law of the State of Delaware (''DGCL''). The introductory paragraphs are substantially similar to the introductory paragraphs of the NYSE Chicago Certificate.

Article 1

In a non-substantive change, the Exchange proposes to replace ''NYSE ARCA, INC.'' with ''NYSE Arca, Inc.'' in Article 1, to reflect that the legal name of the Exchange is not entirely in capital letters. Proposed Article 1 is substantially similar to Article 1 of the NYSE Chicago Certificate and Article

[4] The Exchange has four registered national securities exchange affiliates: NYSE National, Inc. (''NYSE National''), New York Stock Exchange LLC (''NYSE''), NYSE America [sic] LLC (''NYSE American''), and Chicago Stock Exchange, Inc. (''CHX'' and together with the Exchange, NYSE National, NYSE American, and NYSE, the ''NYSE Group Exchanges''). CHX has filed to change its name to NYSE Chicago, Inc. *See* Exchange Act Release No. 84494 (October 26, 2018), 83 FR 54953 (November 1, 2018) (SR–CHX–2018–05) (''NYSE Chicago Release'') (notice of filing and immediate effectiveness of proposal to reflect name changes of the Exchange and its direct parent company and to amend certain corporate governance provisions). The rule changes set forth in the NYSE Chicago Release will become operative upon the Second Amended and Restated Certificate of Incorporation of Chicago Stock Exchange, Inc. (''NYSE Chicago Certificate'') becoming effective pursuant to its filing with the Secretary of State of the State of Delaware.

[5] *See* Exchange Act Release No. 82638 (February 6, 2018), 83 FR 6072 (February 12, 2018) (SR–NYSE Arca–2018–09) (notice of filing and immediate effectiveness of proposed rule change to amend certain of the governing documents of the Exchange's intermediate parent companies).

[6] *See* NYSE Chicago Release, *supra* note 4, at 54953.

[7] The other NYSE Group Exchanges, NYSE and NYSE American, are limited liability companies organized under New York and Delaware limited liability company law, respectively.

[8] The NYSE Chicago Certificate and NYSE Chicago Bylaws will become operative when the NYSE Chicago Certificate becomes effective pursuant to its filing with the Secretary of State of the State of Delaware. *Id.*

[9] The Exchange notes that, concurrent with this filing, NYSE National is filing changes to the NYSE National Certificate and Bylaws. *See* SR–NYSENat–2018–24. References to such documents in this filing are to the NYSE National Certificate and Bylaws currently in effect. The Exchange governing documents use ''member,'' ''Exchange'' and ''Board'' instead of ''stockholder,'' ''Corporation,'' and ''Board of Directors,'' which are used by CHX and NYSE National in their governing documents. When comparing a proposed change to the provision it is based on, the below descriptions do not note when such terms differ, as they are not substantive differences.

[10] *See* Exhibit B [sic] to Amendment No. 2, SR–PCX–2006–24 (March 6, 2006); *see also* Exchange Act Release No. 53615 (April 7, 2006), 71 FR 19226 (April 13, 2006) (SR–PCX–2006–24) (notice of filing and immediate effectiveness of proposed rule change and Amendments No. 1 and 2 thereto to change the names of the Pacific Exchange, Inc., PCX Equities, Inc., PCX Holdings, Inc., and the Archipelago Exchange, L.L.C.).

FIRST of the NYSE National Certificate, provided that the Exchange Certificate provision defines ''Exchange.''

Article 2 and Certificate of Change of Registered Agent and/or Registered Office

In a non-substantive change, the Exchange proposes to update the address of the registered office and name of the registered agent, as previously filed. The Exchange also proposes to delete the ''Certificate of Change of Registered Agent and/or Registered Office.'' [11]

Article 9

Article 9 permits the Exchange to enter into a compromise with its creditors in certain circumstances. The Exchange proposes to amend current Article 9 to be consistent with the relevant provision of the DGCL, including the use of ''corporation'' instead of ''Exchange.'' [12] The proposed article would be substantially similar to Article TENTH of the NYSE Chicago Certificate and Article TENTH of the NYSE National Certificate.

Article 10

In a non-substantive change, the Exchange proposes to correct a reference to ''this Article 11'' to reference Article 10.

Article 12

Article 12 addresses indemnification. The Exchange proposes to delete Article 12 in its entirety, as the indemnification provision is set forth in Article VII, Section 7.01 of the Exchange Bylaws, making this provision redundant. Subsequent articles would be renumbered accordingly. NYSE Chicago made a similar change, deleting Article EIGHTH(a) of its Certificate.[13]

Article 13

Current Article 13 (proposed Article 12) states that the approval of a majority of the members of the Board and a majority of the existing Corporate Members shall be required to amend or repeal any provision of the Exchange Certificate, and that any change to the Exchange Certificate or Bylaws that is required to be approved by or filed with the Commission before it may become effective shall not become effective until the required Commission procedures have been satisfied.

The Exchange proposes to amend the provision to state that the Exchange reserves the right to amend the Exchange Certificate and to change or repeal any provision thereof, provided that any amendment must be approved by a majority of the members of the Board present at the relevant meeting and by a majority of the existing Corporate Members. In addition, the Exchange proposes to add a sentence providing that before any amendment to, alteration or repeal of any provision of the Exchange Certificate shall be effective, those changes shall be submitted to the Board and, if required, the proposed changes shall not become effective until filed with or filed with and approved by the Commission, as the case may be. The revised provision would read as follows (deletions bracketed; new text italicized):

The approval of either a majority of the Board of Directors or the affirmative vote of a majority of the existing Corporate Members, shall be required to adopt, amend or repeal any provision of the bylaws of the Exchange. The [approval of]*Exchange reserves the right to amend this certificate of incorporation, and to change or repeal any provision of the certificate of incorporation, and all rights conferred upon Corporate Members by such certificate of incorporation are granted subject to this reservation; provided, however, that any amendment to this certificate of incorporation must be approved by* a majority of *the members of* the Board of Directors *who are present at the meeting at which the amendment is proposed* and *by* a majority of the existing Corporate Members [shall be required to amend or repeal any provision of this Certificate of Incorporation]. Any change to the Certificate of Incorporation or bylaws that is required to be approved by or filed with the United States Securities and Exchange Commission (the ''Commission'') before it may become effective shall not become effective until the procedures of the Commission necessary to make it effective shall have been satisfied. *Before any amendment to, or repeal of, any provision of this Certificate of Incorporation shall be effective, those changes shall be submitted to the Board of Directors of the Exchange and if such amendment or repeal must be filed with or filed with and approved by the Commission, then the proposed changes to this Certificate of Incorporation shall not become effective until filed with or filed with and approved by the Commission, as the case may be.*

The proposed new text would be substantially similar to Article ELEVENTH of the NYSE Chicago Certificate. In addition, the proposed final sentence is consistent with the final sentence of Article ELEVENTH of the NYSE National Certificate.

Article 14

Article 14 sets forth the name and mailing address of each of the incorporators. In a non-substantive change, the Exchange proposes to delete current Article 14 in its entirety, as it is obsolete.[14] Neither NYSE Chicago nor NYSE National have a similar provision in their respective certificates.[15]

Proposed Article 13 and Signature Block

In an administrative change, the Exchange proposes to add a statement in proposed Article 13 setting forth the date and time that the Exchange Certificate shall be effective, as well as to add a signature block with the date of execution. The proposed change would be consistent with Article XIV and signature block of the NYSE Group Certificate.

Proposed Amendments to the Exchange Bylaws

The Exchange proposes to amend the Exchange Bylaws as follows.

Article I (Offices)

Article I contains a provision stating that the Exchange shall have a registered office in Delaware as required by law, and elsewhere as determined by the Board. The Exchange proposes to (a) amend the title and number to the provision in Article I, and (b) add a sentence that states that the Exchange's Delaware registered agent shall be such person or entity determined by the Board. The proposed title and final sentence would be consistent with the final sentence of Article I, Section 1 of the NYSE Chicago Bylaws and of Article II, Section 2.1 of the NYSE National Bylaws.[16]

Article II (Members)

The Exchange proposes to delete Sections 2.02, 2.04, and 2.05, which are marked ''Reserved,'' and renumber the remaining sections of Article II accordingly.

Proposed Article 2.03 (Dividends; Regulatory Fees and Penalties: Current Section 2.06 states that ''revenues received by the Exchange from regulatory fees or regulatory penalties will be applied to fund the legal,

[11] *See* Exchange Act Release No. 82924 (March 22, 2018), 83 FR 13163 (March 27, 2018) (SR–NYSEArca–2018–18).

[12] *See* Del. Code tit. 8, § 102(b)(2)(ii).

[13] *See* NYSE Chicago Release, *supra* note 4, at 54956.

[14] *See* Del. Code tit. 8, § 242(a)(7)(a).

[15] The Exchange notes that the certificates of incorporation of NYSE Group, ICE Holdings and ICE also do not have similar provisions.

[16] *See* NYSE Chicago Release, *supra* note 4, at 54957.

regulatory and surveillance operations of the Exchange and will not be used to pay dividends.''

The Exchange proposes to maintain the substance of current Section 2.06, renumbering it as Article 2.03, but substantially conforming the provision to the governing documents of the other NYSE Group Exchanges.[17] The proposed language would expand the scope of the provision to include regulatory assets and fines as well as fees or penalties collected by the Exchange's regulatory staff, and would add a prohibition on the payment of distributions to other entities. The Exchange would also revise the title and add subparagraphs. Proposed Section 2.03 provides as follows (deletions bracketed; new text italicized):

(b) Any [revenues received by the Exchange from]*regulatory assets or any* regulatory fees*, fines* or [regulatory] penalties *collected by the Exchange's regulatory staff* will be applied to fund the legal, regulatory and surveillance operations of the Exchange*, and the Exchange shall not distribute such assets, fees, fines or penalties* [and will not be used] to pay dividends *or be distributed to any other entity.* For purposes of this Section, regulatory penalties shall include restitution and disgorgement of funds intended for customers.

Article III (Board of Directors)

Section 3.03 (Vacancies): Section 3.03 provides that any vacancy on the Board may be filled by the Chairman of the Board, subject to the approval by a majority of the directors.

In an administrative change, the Exchange proposes to add text stating that (a) such approval must be made by a majority of the directors then in office, as opposed to total number of seats on the Board; and (b) the Holding Member may also fill any vacancy, and those vacancies resulting from removal from office by a vote of the Holding Member for cause may be filled by a vote of the Holding Member at the same meeting at which such removal occurs. The first sentence of the amended paragraph would be as follows (additions italicized):

Whenever between meetings of the Exchange any vacancy exists on the Board of Directors by reason of death, resignation, removal or increase in the authorized number of directors or otherwise, it may be filled *(i)* by the Chairman of the Board, subject to approval by a majority of the Board of Directors *then in office, or (ii) by action taken by the Holding Member, and those vacancies resulting from removal from office by a vote of the Holding Member for cause may be filled by a vote of the Holding Member at the same meeting at which such removal occurs.*

The change would be consistent with clause (ii) of Article II, Section 5 of the NYSE Chicago Bylaws, which was amended at the time of its acquisition by ICE.[18]

Section 3.04 (Place of Meetings): Section 3.04 provides that any meeting of the Board may be held within or without the State of Delaware.

In an administrative change, the Exchange proposes to amend the provision to state that the meeting shall be at the place designated in the notice of the meeting, but that if no designation is made, the meeting will be at the principal office of the Exchange. The change would be consistent with the first sentence of NYSE National Bylaws Article III, Section 3.8 and NYSE Chicago Bylaws, Article II, Section 7.[19]

Sections 3.07 (Quorum): Section 3.07 (Quorum) provides that the presence of a majority of the number of directors on the Board is necessary to constitute a quorum, and adds that, if less than a quorum is present at a Board meeting, the directors present may adjourn the meeting to another time or place until a quorum is present.

The Exchange proposes to revise the quorum requirement to state that ''Except as otherwise required by law, at all meetings of the Board, the presence of a majority of the number of directors then in office shall constitute a quorum for the transaction of business.'' In addition, it proposes to replace the sentence regarding procedures if less than a quorum is present with the statement that, if a quorum is not present, ''a majority of the directors present at the meeting may adjourn the meeting, without notice other than announcement at the meeting, until a quorum shall be present.''

Changing the quorum requirement to a majority of the directors then in office would be consistent with the quorum provisions of the other NYSE Group Exchanges.[20] The proposed text is substantially similar to the second and fourth sentences of NYSE Chicago Bylaws Article II, Section 10. [21]

Section 3.08 (Vote): Pursuant to Section 3.08, the act of a majority of the directors present at any meeting at which there is a quorum shall be the act of the Board, except as may be otherwise specifically provided by law, the Exchange Certificate, the Exchange Bylaws or the Rules.

The Exchange proposes to add a sentence stating that each director shall be entitled to one vote. The revised provision is substantially similar to the first and third sentences of NYSE Chicago Bylaws Article II, Section 10. [22]

Section 3.09 (Action in Lieu of a Meeting): Section 3.09 provides that, unless otherwise restricted by the Exchange Certificate, Exchange By-Laws, or Exchange Rules, action may be taken without a meeting if certain procedural requirements are met.

In an administrative change, the Exchange proposes to replace ''Unless otherwise restricted by'' with ''Unless otherwise provided by law.'' The proposed change would allow the provision to be consistent with both applicable law and the Exchange governing documents and rules, should applicable law set forth specific requirements that differ from such documents. The change would be consistent with NYSE Chicago Bylaws Article II, Section 13.

Article V (Officers)

Section 5.01 (General): Section 5.01 provides that officers of the Exchange must include a Secretary and may include a President, Chief Executive Officer (''CEO'') and, upon the CEO's recommendation, any other officers deemed desirable for the conduct of business. In addition, it states that any two or more offices may be held by the same person.

In an administrative change, the Exchange proposes to amend Section 5.01 to provide that the Board shall elect officers of the Exchange as it deems appropriate. The statement that two or more offices may be held by the same person would be revised to exclude the Chief Regulatory Officer and the Secretary from holding the office of CEO or President. The revised provision would be substantially similar to Article VI, Section 6.1 of the NYSE National

[17] *See* NYSE Chicago Bylaws, Article IX, Section 5; NYSE National Bylaws, Article X, Section 10.4; NYSE Operating Agreement, Article IV, Section 4.05; and NYSE American Operating Agreement, Article IV, Section 4.05.

[18] *See* Exchange Act Release No. 83635 (July 13, 2018), 83 FR 34182 (July 19, 2018) (SR–CHX–2018–004), and Partial Amendment No. 2 to SR–CHX–2018–004 (June 11, 2018).

[19] The remaining text of the NYSE National and NYSE Chicago provisions address conference call meetings, which are covered in Article III, Section 3.10 of the Exchange Bylaws.

[20] *See* NYSE Chicago Bylaws Article II, Section 10; NYSE National Bylaws Article III, Section 3.11; NYSE Operating Agreement, Article II, Section 2.03(d); and NYSE American Operating Agreement, Article II, Section 2.03(d). *See also* DCGL Section 141(b).

[21] *See* NYSE Chicago Release, *supra* note 4, at 54958–54959.

[22] *See id. See also* NYSE National Bylaws Article III, Section 3.11.

Bylaws and Article V, Section 1 of the NYSE Chicago Bylaws.[23]

Section 5.02 (Privileges): In a non-substantive change, the Exchange proposes to revise the name of Section 5.02 to ''Powers and Duties,'' as it is more indicative of the content of the Section, which sets forth the powers and duties of officers. The Exchange does not propose to amend the text of Section 5.02. The revised title would be the same as the title of Article VI, Section 6.4 of the NYSE National Bylaws and Article V, Section 3 of the NYSE Chicago Bylaws.

Section 5.03 (Term of Office; Removal and Vacancy): The first sentence of Section 5.03 provides that ''[e]ach officer shall hold office until his or her successor is elected and qualified or until his or her earlier resignation or removal.''

The Exchange proposes to add death and retirement as events that would cause an officer to no longer hold office. The proposed change would be consistent with Article V, Section 2(a) of the NYSE Chicago Bylaws.[24]

Section 5.04 (Chief Executive Officer): The second sentence of Section 5.04 states that ''[s]ubject to the control of the Board of Directors, the Chief Executive Officer, or such other officer or officers as may be designated by the Board, shall have general executive charge, management and control of the properties, business and operations of the Exchange with all such powers as may be reasonably incident to such responsibilities; may agree upon and execute all leases, contracts, evidences of indebtedness and other obligations in the name of the Exchange; and shall have such other powers and duties as designated in accordance with these Bylaws and as from time to time may be assigned by the Board of Directors.''

The Exchange proposes to delete the second sentence of Section 5.04, as Section 5.02 already provides that the any officer of the Exchange, including the CEO, shall, unless otherwise ordered by the Board, have such powers and duties as generally pertain to their office as well as such powers and duties as from time to time may be conferred by the Board. The Exchange notes that Article VI of the NYSE National Bylaws similarly does not have a separate provision regarding the powers of its chief executive officer.[25]

Article VI (Miscellaneous)

Section 6.05 (Affiliate Transaction): Section 6.05 sets forth a list of transactions that the Exchange may not enter into with any affiliate of the Exchange unless such transaction shall have been first approved by a majority vote of the disinterested directors of the Exchange who are also public directors, and sets our related definitions and requirements.

The Exchange proposes to delete Section 6.05 in its entirety. Section 6.05 of the Exchange Bylaws dates to the demutualization of the Exchange (then ''Pacific Exchange, Inc.''), when its ownership structure was materially different.[26] The Exchange believes that Section 6.05 is no longer necessary given the corporate structure of ICE and the Exchange, as reflected by the fact that no other NYSE Group Exchange has a similar provision in its governing documents.[27]

Article VII (Indemnification)

Section 7.01 (Indemnification): Section 7.01 sets forth provisions related to indemnification by the Exchange. As a wholly-owned subsidiary of ICE, the Exchange believes it appropriate to harmonize the Exchange's indemnification provisions with those of ICE and the Exchange's intermediate holding company, ICE Holdings.[28] The same change was made to Article VI of the NYSE Chicago Bylaws.[29]

Accordingly, the Exchange proposes to delete the text of Section 7.01 (Indemnification) in its entirety and replace it with proposed text that is substantially similar to the CHX, ICE and ICE Holdings provisions, with the exception of changes to be consistent with the Exchange Bylaws' terminology.[30] The proposed text follows:

(a) The Exchange shall, to the fullest extent permitted by law, as those laws may be amended and supplemented from time to time, indemnify any director or officer made, or threatened to be made, a party to any action, suit or proceeding, whether criminal, civil, administrative or investigative, by reason of being a director or officer of the Exchange or a predecessor corporation or, at the Exchange's request, a director, officer, partner, member, employee or agent of another corporation or other entity; provided, however, that the Exchange shall indemnify any director or officer in connection with a proceeding initiated by such person only if such proceeding was authorized in advance by the Board of Directors of the Exchange. The indemnification provided for in this Section 7.01 shall: (i) Not be deemed exclusive of any other rights to which those indemnified may be entitled under any bylaw, agreement or vote of stockholders or disinterested directors or otherwise, both as to action in their official capacities and as to action in another capacity while holding such office; (ii) continue as to a person who has ceased to be a director or officer; and (iii) inure to the benefit of the heirs, executors and administrators of an indemnified person.

(b) Expenses incurred by any such person in defending a civil or criminal action, suit or proceeding by reason of the fact that he is or was a director or officer of the Exchange (or was serving at the Exchange's request as a director, officer, partner, member, employee or agent of another corporation or other entity) shall be paid by the Exchange in advance of the final disposition of such action, suit or proceeding upon receipt of an undertaking by or on behalf of such director or officer to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by the Exchange as authorized by law. Notwithstanding the foregoing, the Exchange shall not be required to advance such expenses to a person who is a party to an action, suit or proceeding brought by the Exchange and approved by a majority of the Board of Directors of the Exchange that alleges willful misappropriation of corporate assets by such person, disclosure of confidential information in violation of such person's fiduciary or contractual

[26] *See* Exchange Act Release No. 49718 (May 17, 2004), 69 FR 29611 (May 24, 2004) (SR–PCX–2004–08) (order approving proposed rule change and notice of filing and order granting accelerated approval of Amendment No. 1 thereto relating to the demutualization of the Pacific Exchange, Inc.); *see also* Article VI, Section 6.05 of Exhibit E to SR–PCX–2004–08 (February 10, 2004).

[27] The Exchange notes that it has not found a similar provision in the bylaws of other incorporated self-regulatory organizations. *See* Tenth Amended and Restated Bylaws of CBOE Exchange, Inc. [sic]; Ninth Amended and Restated Bylaws of CBOE EDGA Exchange, Inc.; Ninth Amended and Restated Bylaws of CBOE EDGX Exchange, Inc.; Eighth Amended And Restated Bylaws of CBOE BYX Exchange, Inc.; and By-Laws Of Nasdaq BX, Inc. *See also* By-Laws of The Nasdaq Stock Market LLC; By-Laws Of Nasdaq ISE, LLC; and the Second Amended and Restated Operating Agreement of Investors' Exchange LLC.

[28] *See* ICE Bylaws, Article X, Section 10.6, and ICE Holdings Bylaws, Article X, Section 10.6.

[29] *See* NYSE Chicago Release, *supra* note 4, at 54962–54963. The Exchange understands that NYSE, NYSE American, and NYSE National propose to file similar changes to their respective indemnification provisions.

[30] For example, proposed Section 7.01 uses ''officer'' instead of ''Senior Officers,'' ''Exchange'' instead of ''Corporation,'' and ''Section 7.01'' instead of ''Section 10.6.''

obligations to the Exchange or any other willful and deliberate breach in bad faith of such person's duty to the Exchange or its stockholders.

(c) The foregoing provisions of this Section 7.01 shall be deemed to be a contract between the Exchange and each director or officer who serves in such capacity at any time while this bylaw is in effect, and any repeal or modification thereof shall not affect any rights or obligations then existing with respect to any state of facts then or theretofore existing or any action, suit or proceeding theretofore or thereafter brought based in whole or in part upon any such state of facts. The rights provided to any person by this bylaw shall be enforceable against the Exchange by such person, who shall be presumed to have relied upon it in serving or continuing to serve as a director or officer or in such other capacity as provided above.

(d) The Board of Directors in its discretion shall have power on behalf of the Exchange to indemnify any person, other than a director or officer, made or threatened to be made a party to any action, suit or proceeding, whether criminal, civil, administrative or investigative, by reason of the fact that such person, or his or her testator or intestate, is or was an officer, employee or agent of the Exchange or, at the Exchange's request, is or was serving as a director, officer, partner, member, employee or agent of another corporation or other entity.

(e) To assure indemnification under this Section 7.01 of all directors, officers, employees and agents who are determined by the Exchange or otherwise to be or to have been ''fiduciaries'' of any employee benefit plan of the Exchange that may exist from time to time, Section 145 of the Delaware General Corporation Law shall, for the purposes of this Section 7.01, be interpreted as follows: An ''other enterprise'' shall be deemed to include such an employee benefit plan, including without limitation, any plan of the Exchange that is governed by the Act of Congress entitled ''Employee Retirement Income Security Act of 1974,'' as amended from time to time; the Exchange shall be deemed to have requested a person to serve an employee benefit plan where the performance by such person of his duties to the Exchange also imposes duties on, or otherwise involves services by, such person to the plan or participants or beneficiaries of the plan; excise taxes assessed on a person with respect to an employee benefit plan pursuant to such Act of Congress shall be deemed ''fines.''

Article IX (Amendment)

In a conforming change, the Exchange proposes to add a section number before the word ''Amendment.''

Proposed Amendments to Rule 3.3(a)(1)(B)

Rule 3.3(a)(1)(B) establishes the composition of the Exchange Regulatory Oversight Committee (''ROC''), and is substantially the same as the related provisions in the governing documents of the other NYSE Group Exchanges.[31] Among other things, the provision states that ''[t]he Board may, on affirmative vote of a majority of directors, at any time remove a member of the ROC for cause.'' The Exchange proposes to add language clarifying that the majority affirmative vote requirement is based on the ''directors then in office,'' as opposed to total number of seats on the Board. The change would be consistent with Article IV, Section 6 of the NYSE Chicago Bylaws.[32]

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Exchange Act,[33] in general, and furthers the objectives of Section 6(b)(1) [34] in particular, in that it enables the Exchange to be so organized as to have the capacity to be able to carry out the purposes of the Exchange Act and to comply, and to enforce compliance by its exchange members and persons associated with its exchange members, with the provisions of the Exchange Act, the rules and regulations thereunder, and the rules of the Exchange. The Exchange also believes that the proposed rule change is consistent with Section 6(b)(5) of the Exchange Act,[35] in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

The Exchange believes that the proposed amendments to the Exchange Bylaws, Certificate and Rule 3.3(a) would enable the Exchange to be so organized as to have the capacity to be able to carry out the purposes of the Exchange Act and to comply, and to enforce compliance by its exchange members and persons associated with its exchange members, with the provisions of the Exchange Act, the rules and regulations thereunder, and the rules of the Exchange, because such amendments would add or expand upon existing provisions to protect and maintain the independence and integrity of the Exchange and its regulatory function and reinforce the notion that the Exchange is not solely a commercial enterprise, but a national securities exchange subject to the obligations imposed by the Exchange Act. Such provisions include ensuring that regulatory assets, fees, fines, and penalties may only be used to fund legal, regulatory and surveillance operations; and providing that any amendments to the Exchange Certificate must be submitted to the Board and, as applicable, shall not be effective until filed with or filed with and approved by the Commission. The Exchange believes that such provisions are consistent with and will facilitate a governance structure that will provide the Commission with appropriate oversight tools to ensure that the Commission will have the ability to enforce the Exchange Act with respect to the Exchange. The Exchange also believes that such amendments would act to insulate the Exchange's regulatory functions from its market and other commercial interests so that the Exchange can carry out its regulatory obligations and that, in general, the Exchange is administered in a way that is equitable to all those who trade on its market or through its facilities. Therefore, the Exchange believes that the proposed rule change would prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, foster cooperation and coordination with persons engaged in facilitating transactions in securities, remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors and the public interest.

The Exchange believes that the proposed amendments to harmonize certain provisions of the Exchange Bylaws, Certificate and Rule 3.3(a) with similar provisions of the governing documents of other NYSE Group Exchanges, ICE and ICE Holdings would contribute to the orderly operation of the Exchange and would enable the

[31] *See* NYSE National Bylaws, Article V, Section 5.6; NYSE Operating Agreement, Article II, Section 2.03(h)(ii); NYSE American Operating Agreement, Article II, Section 2.03(h)(ii); and NYSE Chicago Bylaws, Article IV, Section 6.

[32] *See* NYSE Chicago Release, *supra* note 4, at 54961. The Exchange understands that NYSE, NYSE American, and NYSE National propose to file similar changes to their respective ROC provisions.

[33] 15 U.S.C. 78f(b).

[34] 15 U.S.C. 78f(b)(1).

[35] 15 U.S.C. 78f(b)(5).

Exchange to be so organized as to have the capacity to carry out the purposes of the Exchange Act and comply with the provisions of the Exchange Act by its members and persons associated with members. For example, the proposed changes would create greater conformity between the Exchange's provisions relating to officers, committees, and indemnification and those of its affiliates, particularly NYSE National and CHX. The Exchange believes that such conformity would streamline the NYSE Group Exchanges' corporate processes, create more equivalent governance processes among them, and also provide clarity to the Exchange's members, which is beneficial to both investors and the public interest. At the same time, the Exchange will continue to operate as a separate self-regulatory organization and to have rules, membership rosters and listings distinct from the rules, membership rosters and listings of the other NYSE Group Exchanges.

The Exchange also believes that the greater consistency among the governing documents of the NYSE Group Exchanges, ICE and ICE Holdings would promote the maintenance of a fair and orderly market, the protection of investors and the protection of the public interest. Indeed, the proposed amendments would make the corporate requirements and administrative processes relating to the Board, Board committees, officers, and other corporate matters more similar to those of the NYSE Group Exchanges, in particular NYSE National and CHX, which have been established as fair and designed to protect investors and the public interest.[36]

The Exchange believes that the deletion of Article VI, Section 6.05 of the Exchange Bylaws would be consistent with the orderly operation of the Exchange and would enable the Exchange to be so organized as to have the capacity to carry out the purposes of the Exchange Act and comply with the provisions of the Exchange Act by its members and persons associated with members. Section 6.05 does not relate to the operations of the Exchange's markets, but rather to potential transactions with affiliates of the Exchange. Section 6.05 dates to the demutualization of the Exchange, when its ownership structure was materially different.[37] The Exchange believes that Section 6.05 is no longer necessary given the corporate structure of ICE and the Exchange, as reflected by the fact that no other NYSE Group Exchange has a similar provision in its governing documents.[38] For the same reasons, the Exchange believes that the proposed deletion would be consistent with the promotion of the maintenance of a fair and orderly market, the protection of investors and the protection of the public interest.

The proposed amendments to clarify the meaning of certain provisions of the Exchange Bylaws, Certificate and Rule 3.3(a), to better comport certain provisions with the DGCL and to effect non-substantive changes would facilitate the Exchange's continued compliance with the Exchange Certificate and Bylaws and applicable law, which would further enable the Exchange to be so organized as to have the capacity to be able to carry out the purposes of the Exchange Act and to comply, and to enforce compliance by its exchange members and persons associated with its exchange members, with the provisions of the Exchange Act, the rules and regulations thereunder, and the rules of the Exchange. Such amendments would also remove impediments to and perfects the mechanism of a free and open market by removing confusion that may result from corporate governance provisions that are either unclear or inconsistent with the governing law.

The Exchange also believes that the proposed amendments would remove impediments to and perfect the mechanism of a free and open market by ensuring that persons subject to the Exchange's jurisdiction, regulators, and the investing public can more easily navigate and understand the governing documents. The Exchange further believes that the proposed amendments would not be inconsistent with the public interest and the protection of investors because investors will not be harmed and in fact would benefit from increased transparency and clarity, thereby reducing potential confusion.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act. The proposed rule change is not intended to address competitive issues but rather is concerned solely with the corporate governance and administration of the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[39] and Rule 19b–4(f)(6) thereunder.[40] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[41] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2018–85. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All ubmissions should refer to File Number SR–NYSEArca–2018–85 and should be submitted on or before December 21, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[42]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–84653; File No. SR–CboeBZX–2018–083]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating To the Modification of Certain Routing Fees

November 26, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 13, 2018, Cboe BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') is filing with the Securities and Exchange Commission (''Commission'') a proposed rule change to modify certain Routing Fees.

The text of the proposed rule change is also available on the Exchange's website (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule to amend pricing for orders routed to Cboe EDGA Exchange, Inc., (''EDGA''), which yield fee codes AA, BJ, and RA.[3] Particularly, as of November 1, 2018, EDGA implemented pricing changes for transactions that add and remove liquidity.[4] The filing generally proposes that orders that add liquidity will be assessed a fee of $0.00300 per share and orders that remove liquidity will be provided a rebate of $0.00240 per share. Based on the changes in pricing at EDGA, the Exchange proposes the pricing changes described below.

First, the Exchange notes that orders routed to EDGA using ALLB routing strategy (which yield fee code AA) and orders routed to EDGA using a TRIM or TRIM2 routing strategy (which yield fee code BJ) are currently assessed $0.00030 per share. The Exchange proposes to eliminate this fee and instead provide a rebate of $0.00240 per share for these orders. Next, the Exchange notes that orders routed to EDGA that add liquidity (which yield fee code RA) are assessed $0.00030 per share. The Exchange proposes to increase the rate from $0.00030 per share to $0.00300 per share.

2. Statutory Basis

The Exchange also believes the proposed rule change is consistent with Section 6(b)(4) of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its members and other persons using its facilities.

The Exchange believes the proposed changes are reasonable because they reflect a pass-through of the pricing changes by EDGA described above. The Exchange further believes the proposed fee change is non-discriminatory because it applies uniformly to all Members. The Exchange lastly notes that routing through the Exchange is voluntary and that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues or providers of routing services if they deem fee levels to be excessive.

[3] The Exchange initially filed the proposed fee changes on November 1, 2018 (SR-CboeBZX–2018–080). On business date November 13, 2018, the Exchange withdrew that filing and submitted this filing.

[4] *See* SR-CboeEDGA–2018–017.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes the proposed routing fee changes will not impose an undue burden on competition because the Exchange will uniformly assess the affected routing fees on all Members. Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value or if they view the proposed fee as excessive. The Exchange also notes the proposed changes to the EDGA-related routing fees are meant to pass through the fees and rebates associated with executing orders on that market, and is therefore not designed to have any significant impact on competition. Further, excessive fees for participation would serve to impair an exchange's ability to compete for order flow and members rather than burdening competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [5] and paragraph (f) of Rule 19b–4 [6] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml);* or
- Send an email to *rule-comments@sec.gov. Please include File Number SR-CboeBZX–2018–083 on the subject line.*

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–CboeBZX–2018–083. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CboeBZX–2018–083 and should be submitted on or before December 21, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[7]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–84645; File No. SR–Phlx–2018–73]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Exchange's Provisions for Excluding Days for Purposes of Pricing Tiers

November 26, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1], and Rule 19b–4 thereunder,[2] notice is hereby given that on November 14, 2018, Nasdaq PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's provisions for excluding a day from its volume calculations for purposes of determining pricing tiers.

The text of the proposed rule change is available on the Exchange's website at *http://nasdaqphlx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the Exchange's

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

provisions for excluding a day from its volume calculations for purposes of determining pricing tiers, as further discussed below.

Background

To avoid penalizing members when aberrant low volume days result from systems or other issues at the Exchange, or where the Exchange closes early for holiday observance, the Exchange currently has language in its Pricing Schedule allowing it to exclude certain days from its average daily volume (''ADV'') calculations or calculations that are based on a percentage of industry volume. Currently, Section 1(b) of the Exchange's Pricing Schedule provides that for Phlx options, any day that the market is not open for the entire trading day or the Exchange instructs members in writing to route their orders to other markets may be excluded from the ADV calculation or calculation based on a percentage of industry volume; provided that the Exchange will only remove the day for members that would have a lower ADV or percentage of industry volume with the day included. If a day is removed from a calculation based on a percentage of monthly industry volume, volume executed that day will be removed from both the numerator and the denominator of the calculation.[3] The proviso language in Section 1(b) (hereinafter, the ''better of rule'') ensures that members would only have the day removed when doing so is beneficial for the member. As such, the Exchange only applies the better of rule to ADV calculations and calculations based on a percentage of industry volume, and not for other volume-based pricing where members would not benefit from having the day excluded (*e.g.,* straight volume accumulations).

In a recent review of the rule, the Exchange determined that it would be beneficial to further expand upon and provide additional detail regarding how the Exchange applies this rule.

Proposal

The Exchange first proposes to delete the lead-in ''For Phlx Options'' in Section 1(b) of Options 7, and retitle this section as ''Removal of Days for Purposes of Pricing Tiers.'' The fees for Phlx options and PSX equities are no longer included in the same pricing schedule, and the Exchange therefore believes that the current clarifying lead-in is no longer necessary.[4] The Exchange also proposes to adopt the following language to replace current rule text in Section 1(b):

(1)(A) Any day that the Exchange announces in advance that it will not be open for trading will be excluded from the options tier calculations set forth in its Pricing Schedule; and (B) any day with a scheduled early market close (''Scheduled Early Close'') may be excluded from the options tier calculations only pursuant to paragraph (3) below.

(2) The Exchange may exclude the following days (''Unanticipated Events'') from the options tier calculations only pursuant to paragraph (3) below, specifically any day that: (A) the market is not open for the entire trading day, (B) the Exchange instructs members in writing to route their orders to other markets, (C) the Exchange is inaccessible to members during the 30-minute period before the opening of trade due to an Exchange system disruption, or (D) the Exchange's system experiences a disruption that lasts for more than 60 minutes during regular trading hours.

(3) If a day is to be excluded as a result of paragraph (1)(B) or (2) above, the Exchange will exclude the day from any member's monthly options tier calculations as follows:

(A) the Exchange may exclude from the ADV calculation any Scheduled Early Close or Unanticipated Event;

(B) the Exchange may exclude from the calculation based on a percentage of industry volume any Scheduled Early Close or Unanticipated Event; and

(C) the Exchange may exclude from any other applicable options tier calculation provided for in its Schedule of Fees (together with (3)(A) and (3)(B), ''Tier Calculations'') any Scheduled Early Close or Unanticipated Event; provided, in each case, that the Exchange will only remove the day for members that would have a lower Tier Calculation with the day included. If a day is removed from a calculation based on a percentage of monthly industry volume, volume executed that day will be removed from both the numerator and the denominator of the calculation.

The proposed rule change: (i) Expands upon the existing scenarios where the Exchange may remove a day to adopt two additional situations related to Exchange systems disruptions, (ii) categorizes the scenarios into days that are known in advance (*i.e.,* days in proposed paragraph (1), including Scheduled Early Closes) and days that are not (*i.e.,* Unanticipated Events in proposed paragraph (2)), (iii) clarifies how each scenario would apply to the options tier calculations in the Pricing Schedule, (iv) adds a ''catch-all'' provision for other volume based options tier calculations set forth in its Pricing Schedule, but are not specified within paragraphs (3)(A) and (3)(B), to clarify how the Exchange would exclude days for other such Tier Calculations going forward, and (v) generally adds more detail to clarify the application of the better of rule. As it relates to Unanticipated Events, the Exchange will inform all members if any such day will be excluded from its Tier Calculations through a publicly published alert. The Exchange notes that it is not proposing any changes to the existing rebates or to the current tier calculation thresholds required to achieve each rebate tier.

Exchange Systems Disruptions

The Exchange proposes to adopt two additional scenarios as ''Unanticipated Events'' that the Exchange may determine to exclude from its Tier Calculations. First, the Exchange proposes to exclude days where the Exchange is inaccessible to members during the 30-minute period before the opening of trade (*i.e.,* between 9:00 a.m. to 9:30 a.m. Eastern Time) due to an Exchange system disruption, even if the Exchange does not instruct members to route away to other markets. As discussed above, the Exchange's current ability to remove days from its calculations of ADV and industry volume percentages is limited to days where the market is not open for the entire trading day, and where the Exchange instructs members to route away to other markets. This allows the Exchange to exclude days, for example, where the Exchange honors a market-wide trading halt declared by another market, closes early for holiday observance, or instructs members to route away to other markets because of a systems issue in the morning, which ultimately does not carry over into the trading day. The Exchange notes, however, that it may not always instruct members to route away. For instance, the Exchange may be inaccessible to members in the morning due to a systems disruption but the Exchange resolves the issue shortly before 9:30 a.m. and as a result, the Exchange does not instruct members to route away. In such cases, the Exchange is not permitted to exclude the day from its ADV calculation or calculation based on a percentage of industry volume. The Exchange generally experiences a high

[3] The Exchange removes the day from both the numerator and denominator to ensure that members benefit from this rule as removing the day from the numerator only (*i.e.,* the member's volume) without removing it from the denominator (*i.e.,* industry volume) would penalize the member.

[4] *See* Securities Exchange Act Release No. 84495 (October 29, 2018), 83 FR 55210 (November 2, 2018) (SR–Phlx–2018–66).

volume of member participation within the 30-minute window leading up to the opening of trade from members who submit eligible interest be included in the Exchange's opening process. As a result, days where members are precluded from submitting eligible interest during this 30-minute time period due to an Exchange systems disruption, even if the issue is ultimately resolved by the Exchange before the market opens (and members therefore are not instructed to route away), are likely to have lower trading volume. Including such days in calculations of ADV or percentage of industry volume will therefore make it more difficult for members to achieve particular pricing tiers for that month. Accordingly, excluding such days from the monthly tier calculations will diminish the likelihood of a cost increase occurring because a member is not able to reach a pricing tier on that date that it would reach on other trading days during the month.

Second, the Exchange proposes to exclude days where there is an Exchange system disruption that lasts for more than 60 minutes during regular trading hours (*i.e.,* 9:30 a.m. to 4:00 p.m. Eastern Time), even if such disruption would not be categorized as a complete outage of the Exchange's system. Such a disruption may occur where a certain options series traded on the Exchange is unavailable for trading due to an Exchange systems issue, or where the Exchange may be able to perform certain functions with respect to accepting and processing orders, but may have a failure to another significant process, such as routing to other market centers, that would lead members who rely on such processes to avoid using the Exchange until the Exchange's entire system was operational. The Exchange believes that certain system disruptions that are not complete system outages could preclude some members from submitting orders to the Exchange. The Exchange notes that this proposal is consistent with the rules of other options exchanges.[5]

The Exchange believes that the two scenarios proposed above are reasonable and equitable because the intent of the current rule has always been to avoid penalizing members that might otherwise qualify for certain tiered pricing but that because of aberrant low volume days resulting, for instance, from Exchange systems disruptions, did not participate on the Exchange to the extent they might have otherwise participated.

In addition, to avoid penalizing members that step up and trade on a day with artificially low volume, the Exchange currently only removes days for members that would have a lower ADV calculation or calculation based on a percentage of industry volume with the day included (*i.e.,* the better of rule). The Exchange believes that applying the better of rule to the proposed system disruption-related scenarios would be similarly helpful as it would ensure that members that continue to execute a large volume of contracts on such days are not inadvertently disadvantaged when the Exchange removes a systems disruption-related day from its calculations of ADV or industry volume percentages.

The Exchange also proposes that if a systems disruption-related day is removed from a calculation based on a percentage of monthly industry volume, volume executed that day will be removed from both the numerator and denominator of the calculation. Removing the day from both the numerator and denominator of the calculation will ensure that members benefit from this rule as removing the day from the numerator only (*i.e.,* the member's volume) without removing it from the denominator (*i.e.,* industry volume) would penalize the member. The Exchange takes the same approach for removing days from such calculations under the current rule.

Categories of Excluded Days

In light of the foregoing proposal to adopt two additional situations that the Exchange may exclude from its pricing tier calculations, the Exchange seeks to restructure the existing rule by separating out the different scenarios between days that are known in paragraph (1) and days that are not in paragraph (2), and define the latter as Unanticipated Events.

For planned days, the Exchange proposes to further distinguish between days that the Exchange announces in advance that it will not be open for trading in paragraph (1)(A) (*e.g.,* Thanksgiving), and Scheduled Early Closes in paragraph (1)(B) (*e.g.,* the trading day after Thanksgiving). The Exchange notes that it currently considers Scheduled Early Closes as a subset of days that the market is not open for the entire trading day. The Exchange believes it would be more clear to distinguish Scheduled Early Closes in paragraph (1) as a day that is planned for in advance, and separately consider days that are not open for the entire trading day as Unanticipated Events in paragraph (2)(A). As proposed, (2)(A) would continue to cover unplanned days where the Exchange declares a trading halt in all securities or honors a market-wide trading halt declared by another market. The other scenarios that will be categorized as Unanticipated Events in paragraph (2) are the two systems-related disruptions proposed above, and days that the Exchange instructs members in writing to route their orders to other markets, which is an existing scenario covered under the current rule as described above.

Exclusion of Days by Tier Calculation

The Exchange proposes to further amend the existing rule to specify how the days in paragraphs (1) and (2) will be excluded from its tier calculations. As discussed above, the Exchange currently removes the days set forth in paragraphs (1)(B), (2)(A), and (2)(B) from its calculations of ADV and industry volume percentages only for members that would have a lower ADV or percentage of industry volume with the day included. The Exchange is not changing how it currently excludes these days from these calculations. And as further discussed above, the Exchange is proposing to adopt the same principle-based approach for excluding the system disruption-related days in paragraphs (2)(C) and (2)(D). As such, proposed paragraph (3) will specify for the ADV calculation and calculation based on a percentage of industry volume that the Exchange may exclude any Scheduled Early Close or Unanticipated Event, subject, in each case, to the better of rule.

As it relates to days where the Exchange announces in advance that it will not be open for trading, the Exchange notes that it will exclude those days from all options tier calculations set forth in its Pricing Schedule. This is also the case today since no trading activity occurs on those days, and the Exchange is only clarifying its current practice within the proposed rule text in paragraph (1)(A).

Catch-All Provision

The proposal also adds a ''catch-all'' provision in paragraph (3)(C) that would apply to other applicable options tier calculations that are set forth in its Pricing Schedule (''Tier Calculations''), but are not specified within paragraphs (3)(A) and (3)(B) (*i.e.,* not an ADV calculation or calculation based on a percentage of industry volume). This

[5] *See, e.g.,* BATS BZX Options Exchange Fee Schedule (defining an ''Exchange System Disruption'' as any day that the exchange's system experiences a disruption that lasts for more than 60 minutes during regular trading hours); and NYSE Arca Options Fee Schedule (defining an ''Exchange System Disruption'' as a disruption affects an Exchange system that lasts for more than 60 minutes during regular trading hours).

catch-all provision is to provide the Exchange with flexibility to apply the better of rule going forward to all pricing programs administered by the Exchange that are based on volume calculations.[6] Specifically, the Exchange may exclude any Scheduled Early Close or Unanticipated Event from such other Tier Calculations only if the member will have a lower Tier Calculation with the day included. This is the same principle-based approach that the Exchange currently takes for its ADV calculation and calculation based on a percentage of industry volume, and is similarly intended to ensure that days are removed from a member's volume calculations only if doing so would be beneficial for the member.

Clarifying Changes

The Exchange proposes to add further detail throughout the rule text to bring greater transparency as to how the Exchange will apply the better of rule when removing days from its tier calculations. The Exchange proposes to make clear that it will only remove days pursuant to the better of rule by specifying in paragraphs (1)(B) and (2) that such days may be excluded from the Tier Calculations only pursuant to paragraph (3). Paragraph (3) will then provide that if a day is to be excluded as a result of paragraph (1)(B) or (2), the Exchange will be required to exclude the day from any member's monthly options tier calculations as detailed within paragraph (3) (*i.e.,* excluding a Scheduled Early Close or Unanticipated Event from a specified tier calculation only for members that would have a lower tier calculation with the day included). With the proposed changes, the Exchange seeks to clarify current practice by expressing that it will exclude days from any member's tier calculations in a uniform manner to ensure that days are removed only in situations where the member benefits. Currently, the Exchange looks at each potential excluded day in a month and calculates for every member their ADV or industry volume percentage based on their trading volume on that day. If any member would have a lower ADV or percentage of industry volume with the particular day included, the Exchange will exclude that day for that member. As such, the proposed changes specify that the Exchange will apply the better of rule in a uniform manner for all members, and that there is no arbitrary selection of ''winners'' or ''losers'' when the Exchange excludes days. Lastly, the Exchange proposes to make two technical changes within the better of rule; first, to clarify that the rule applies in each case of the tier calculations specified in paragraph (3), and second, to use the defined term ''Tier Calculations'' instead of ''ADV or percentage of industry volume'' to reflect the changes proposed herein.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[8] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the proposed rule change is reasonable and equitable as it provides a framework for removing days from the Exchange's volume calculations that the Exchange believes is beneficial to members. The proposed rule change would permit the Exchange to remove a day from its Tier Calculations in more circumstances, and ensures that the Exchange will only do so in circumstances where beneficial for the member due to the member executing a lower ADV or percentage of industry volume during the excluded day. The Exchange believes it is reasonable and equitable to exclude a day from its tier calculations when the Exchange's system experiences a disruption during the 30-minute period prior to the opening of trade that renders the Exchange inaccessible to members as this preserves the Exchange's intent behind adopting volume-based pricing. Without this change, members that are precluded from submitting eligible interest during the 30-minute window before the opening of trade may be negatively impacted, even if the Exchange resolves the issue before the market opens and as a result, does not instruct members to route away. The proposed change to exclude such days will diminish the likelihood of a cost increase occurring because a member is not able to reach a volume tier calculation on that date that it would reach on other trading days during the month. Furthermore, while the Exchange may have resolved the systems disruption from its perspective prior to the opening of trade, a member may now have issues managing their orders with the Exchange as a result of the original disruption, causing a downstream ripple effect.

Similarly, excluding a day where the Exchange's system experiences a disruption that lasts for more than 60 minutes intra-day is reasonable and equitable because the proposal seeks to avoid penalizing members that might otherwise qualify for certain tiered pricing but that, because of an Exchange systems disruption, did not participate on the Exchange to the extent they might have otherwise participated. The Exchange believes that certain systems disruptions could preclude some members from submitting orders to the Exchange even if such issue is not actually a complete systems outage. Other options exchanges similarly exclude exchange systems disruptions from their pricing tiers.[9]

In addition, the Exchange believes that it is reasonable and equitable to apply the better of rule to both systems disruption-related scenarios. Without these changes, members that step up and trade significant volume on excluded trading days may be negatively impacted, resulting in an effective cost increase for those members. The proposal would align the Exchange's approach to how it applies this rule today for days where the market is not open for the entire trading day or where the Exchange instructs members to route away. Furthermore, removing the proposed days from both the numerator and denominator of a calculation based on a percentage of industry volume is reasonable and equitable as this treatment ensures that the member actually benefits from having the day removed. Again, this would align the Exchange's current approach to how it removes days from such calculations.

In light of the Exchange's proposal to adopt the two additional scenarios related to systems disruptions, the Exchange is making related, restructuring changes to the existing language in Options 7, Section 1(b) to bring greater transparency to the application of its rule. Specifically, the Exchange is distinguishing between planned and unplanned days in paragraphs (1) and (2), defining the latter as Unanticipated Events, and stipulating how the Exchange will exclude such days pursuant to this rule. Categorizing days in this manner will clarify the application of its rule in light of the Exchange's proposal to expand the rule to adopt additional days that

[6] As such, the proposed language will not apply to straight volume accumulations, and the Exchange will continue to not exclude days from such calculations, as is current practice, since members do not benefit when a day is removed from straight volume accumulations.

[7] 15 U.S.C. 78f(b).

[8] 15 U.S.C. 78f(b)(4) and (5).

[9] *See* footnote 5 above.

may be excluded from its tier calculations. Similarly, the Exchange believes that the proposed changes to specify how each of the days in paragraphs (1) and (2) will be excluded from its tier calculations will bring greater transparency to the application of the rule by clearly delineating the various circumstances in which the rule will apply. Providing in paragraph (1)(A) that the Exchange will always exclude from its tier calculations days that it announces in advance it will not be open for trading will clarify current practice. Providing in paragraph (3) that the Exchange may exclude any Scheduled Early Close or Unanticipated Event from the specified tier calculations, subject to the better of rule, will make clear that the Exchange will take a consistent approach when excluding days for purposes of its volume based pricing tiers. Furthermore, the clean-up changes specifying that the days in paragraphs (1)(B) and (2) may be excluded only pursuant to paragraph (3), and requiring the Exchange to exclude such days pursuant to the specifications in paragraph (3) will likewise make clear that the Exchange will take a consistent approach with respect to excluding days from its tier calculations. As discussed above, these modifications will clarify that the Exchange will apply the better of rule in a uniform manner to all members, and that there is no arbitrary selection of ''winners'' or ''losers.'' The Exchange also believes that the two technical changes proposed in the better of rule to reflect the changes proposed herein will likewise bring greater clarity to its rule. For the foregoing reasons, the Exchange believes that the proposed changes to clarify and restructure its existing rule are reasonable and equitable.

Furthermore, the Exchange believes that the proposed changes to adopt a catch-all provision in paragraph (3)(C) to other Tier Calculations not already specified in the rule to allow the Exchange to apply the better of rule going forward to all pricing programs based on other volume calculations is reasonable and equitable for the same reasons as allowing the Exchange to apply the better of rule for calculations based on ADV and industry volume percentages. The Exchange notes that aberrant low volume days resulting from, for instance, an Unanticipated Event, impacts all volume-based calculations, and allowing the Exchange to exclude such days from any volume-based tier calculation if the member would have a lower tier calculation with the day excluded will further protect members from being inadvertently penalized.

Finally, the Exchange further believes that the proposed rule change is not unfairly discriminatory because it will apply equally to all members. While the Exchange currently has rules in place for removing a day from its pricing, the Exchange believes that the proposed changes will benefit all members by providing more circumstances to remove a day, and ensuring that days are removed only in situations where the member benefits.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is designed to protect members from the possibility of a cost increase by excluding days when overall member participation might be significantly lower than a typical trading day. The Exchange believes that the proposed modifications to its tier calculations are pro-competitive and will result in lower total costs to end users, a positive outcome of competitive markets. The Exchange operates in a highly competitive market in which market participants can readily direct their order flow to competing venues. In such an environment, the Exchange must continually review, and consider adjusting, its fees and rebates to remain competitive with other exchanges. For the reasons described above, the Exchange believes that the proposed fee changes reflect this competitive environment.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and paragraph (f) of Rule 19b–4 thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–Phlx–2018–73 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–Phlx–2018–73. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Phlx–2018–73, and should be submitted on or before December 21, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[10]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–84650; File No. SR–MIAX–2018–25]

Self-Regulatory Organizations; Miami International Securities Exchange LLC; Notice of Withdrawal of a Proposed Rule Change To Amend the Fee Schedule Regarding Connectivity Fees for Members and Non-Members

November 26, 2018.

On September 18, 2018, Miami International Securities Exchange LLC (''MIAX'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend the MIAX Fee Schedule to increase certain connectivity fees. The proposed rule change was immediately effective upon filing with the Commission pursuant to Section 19(b)(3)(A) of the Act.[3] On October 10, 2018 the proposed rule change was published for comment in the **Federal Register** and, pursuant to Section 19(b)(3)(C) of the Act, the Commission: (1) Temporarily suspended the proposed rule change; and (2) instituted proceedings to determine whether to approve or disapprove the proposal.[4] The Commission received one comment letter on the proposal.[5] On November 23, 2018, the Exchange withdrew the proposed rule change (SR–MIAX–2018–25).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–84649; File No. SR–NYSEAMER–2018–51]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 903, Series of Options Open for Trading

November 26, 2018.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on November 19, 2018, NYSE American LLC (''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 903. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

[6] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C.78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to amend Rule 903, Series of Options Open for Trading, to permit the listing and trading of up to ten expiration months for long term options on the SPDR® S&P 500® Exchange-Traded Fund (the ''SPY ETF'').

Commentary .03(a) of Rule 903 (''Commentary .03'') provides that the Exchange may list, with respect to any class of stock or Exchange-Traded Fund Share options series, options having from twelve up to thirty-nine months from the time they are listed until expiration (''LEAPS''). Under the current Rule, the Exchange may list up to six LEAPS expiration months.[4] The Exchange proposes to amend Commentary .03 to permit up to ten LEAPS expiration months for options on the SPY ETF.[5] This proposal, which is substantially the same as a recent rule amendment submitted by Nasdaq PHLX LLC (''PHLX'') and driven by customer demand,[6] would add liquidity to the SPY ETF options market by allowing market participants to hedge risks relating to SPY ETF positions over a potentially longer time period with a known and limited cost.

The SPY ETF options market today is characterized by its tremendous daily and annual liquidity. As a consequence, the Exchange believes that the listing of additional SPY ETF LEAPS expiration months would be well received by investors. This proposal to expand the number of permitted SPY ETF LEAPS would not apply to LEAPS on any other

[4] Strike price interval, bid/ask differential and continuity rules shall not apply to such options series until the time to expiration is less than nine months. *See* Commentary .03(a) of Rule 903.

[5] *See* proposed Commentary .03(a) of Rule 903 (providing in relevant part, that ''[t]here may be up to ten expiration months for options on the [SPY ETF] and up to six extended far term expiration months for options on any other index, Exchange-Trade Fund Share, or equity option class''). The Exchange also proposes a technical change to remove the errant period that appears after ''(LEAPS)'' in the title of Commentary .03, which would add clarity and consistency to Exchange rules. *See* proposed Commentary .03 of Rule 903.

[6] *See also* Securities Exchange Act Release No. 84449 (October 18, 2018), 83 FR 53699 (October 24, 2018) (SR–Phlx–2018–64) (''PHLX Rule Change''). The Exchange notes that the PHLX Rule Change does not apply to LEAPS on index options, as PHLX already provided for up to ten expirations in LEAPS on index options in PHLX Rule 1101A(b)(iii). Because Commentary .03 includes index options, this proposal is consistent with both the PHLX Rule Change and PHLX Rule 1101A(b)(iii).

class of stock or Exchange-Traded Fund Share options.[7]

2. Statutory Basis

The proposed rule change is consistent with Section 6(b)[8] of the Securities Exchange Act of 1934 (the ''Act''), in general, and furthers the objectives of Section 6(b)(5),[9] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by offering market participants additional LEAPS on SPY options for their investment and risk management purposes. The proposal is intended simply to provide additional trading opportunities which have been requested by customers, thereby facilitating transactions in options and contributing to the protection of investors and the maintenance of fair and orderly markets. The proposed rule change responds to the continuing needs of market participants, particularly portfolio managers and other institutional customers, by providing protection from long-term market moves and by offering an alternative to hedging portfolios with futures positions or off-exchange customized derivative instruments.

The Exchange believes that the addition today of four additional expiration months for SPY ETF LEAPS does not represent a proliferation of expiration months, but is instead a very modest expansion of LEAPS options in response to stated customer demand. Significantly, the proposal would feature new LEAPS expiration months in only a single class of options—the SPY ETF—that are very liquid and heavily traded, as discussed above. Additionally, the Exchange notes by way of precedent that ten expiration months are already permitted for stock index LEAPS options on other markets.[10] Further, the Exchange has the necessary systems capacity to support the new SPY ETF LEAPS expiration months.

The Exchange notes that this proposal is substantially the same as a recent rule amendment submitted by PHLX.[11]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposal merely provides investors additional investment and risk management opportunities by providing flexibility to the Exchange to list additional long term options expiration series, expanding the number of SPY LEAPS offered on the Exchange from six expiration months to ten expiration months.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[12] and Rule 19b–4(f)(6) thereunder.[13]

A proposed rule change filed under Rule 19b–4(f)(6)[14] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b4(f)(6)(iii),[15] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange's proposal would conform the Exchange's rules relating to the permitted number of SPY ETF LEAPS expiration months to those of PHLX.[16] Accordingly, the Commission believes that the proposal raises no new or novel regulatory issues, and waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. The Commission therefore waives the 30-day operative delay and designates the proposal operative upon filing.[17]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEAMER–2018–51 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEAMER–2018–51. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street, NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal

[7] Historically, SPY is the largest and most actively traded ETF in the United States as measured by its assets under management and the value of shares traded.

SURFACE TRANSPORTATION BOARD

Office of Environmental Analysis

[Finance Docket 36095]

Notice of Availability of the Draft Environmental Assessment (Draft EA) for Palmetto Railways Camp Hall Rail Line

AGENCY: Surface Transportation Board (Board) Office of Environmental Analysis (OEA), U.S. Army Corps of Engineers (Corps), joint lead agencies; U.S. Coast Guard (Coast Guard), Federal Railroad Administration (FRA), cooperating agencies.

ACTION: Notice of Availability of the Draft EA on November 30, 2018 and request for comments.

SUMMARY: On August 3, 2017, Palmetto Railways (Applicant) filed an exemption petition with the Board pursuant to 49 U.S.C. 10502 to construct and operate approximately 28 miles of new rail line between the Cross Subdivision of CSX Transportation, Inc. (CSXT) rail network near the Santee Cooper Cross Generating Station and the Camp Hall Commerce Park in Berkeley County, South Carolina. Implementation of the proposed rail line would bring industrial rail service to the Volvo Cars facility, as well as areas being developed by Santee Cooper. FRA and the Coast Guard are cooperating agencies in the preparation of this Draft EA pursuant to CEQ NEPA implementing regulations (40 CFR 1501.6).

The purpose of this Notice of Availability (NOA) is to notify individuals and agencies interested in or affected by the proposed action of the availability of the Draft EA for review and comment on November 30, 2018. The Draft EA analyzes the potential environmental impacts of the proposed action and alternatives, including the no-action alternative. The Draft EA addresses environmental issues and concerns identified during the scoping process. It also contains OEA's preliminary recommendations for environmental mitigation measures, and Palmetto Railways' voluntary mitigation measures.

The Draft EA will be available on November 30, 2018 through the Board's website at *http://www.stb.gov* by following the decisions link, through the project website at *http://www.CampHallRailNEPA.com,* and at all public libraries in Berkeley County, South Carolina.

Next Steps: Following the close of the 30-day comment period on December 30, 2018 of the Draft EA, OEA, the Corps, and the cooperating agencies will issue a Final EA that considers comments on the Draft EA. The Board will then issue a final decision based on the Draft and Final EAs and all public and agency comments in the public record for this proceeding. The final decision will address the transportation merits of the proposed project and the entire environmental record. That final decision will take one of three actions: Approve the proposed project, deny it, or approve it with mitigation conditions, including environmental conditions.

Written Comments: Any interested party may submit written comments on the Draft EA. The procedures for submitting written comments are outlined below:

ADDRESSES: Please mail written comments on the Draft EA and the recommended environmental mitigation to: Ms. Diana Wood, Surface Transportation Board, Docket No. FD 36095, c/o ICF, 9300 Lee Highway, Fairfax, VA 22031. Electronic comments on this Draft EA may also be submitted electronically on the joint lead agencies' project website (*http://www.CampHallRailNepa.com*) or emailed to *CampHallRailLineNEPA@icf.com.* Please refer to Docket No. FD 36095 in all correspondence, including electronic, addressed to the joint lead agencies.

DATES: The EA will be available for public review and comment on November 30, 2018. Mailed comments must be postmarked by December 30, 2018. Electronic comments must be received by December 30, 2018.

FOR FURTHER INFORMATION CONTACT: Diana Wood, Surface Transportation Board, Docket No. FD 36095, c/o ICF, 9300 Lee Highway, Fairfax, VA 22031.

Dated: November 15, 2018.

By the Board, Victoria Ruston, Director, Office of Environmental Analysis.

Jeffrey Herzig,

Clearance Clerk.

BILLING CODE 4915–01–P

TENNESSEE VALLEY AUTHORITY

Meeting of the Regional Energy Resource Council

AGENCY: Tennessee Valley Authority (TVA).

ACTION: Notice of meeting.

SUMMARY: The TVA Regional Energy Resource Council (RERC) will hold a meeting on Tuesday, December 18, 2018, to discuss the metrics and evaluation criteria that TVA is establishing for the 2019 Integrated Resource Plan (IRP). The RERC was established to advise TVA on its energy resource activities and the priority to be placed among competing objectives and values. Notice of this meeting is given under the Federal Advisory Committee Act (FACA).

DATES: The public meeting will be held on Tuesday, December 18, 2018, from 9:00 a.m. to 4:00 p.m., EST.

ADDRESSES: The meeting will be held at the Hilton Downtown Knoxville, 501 Church Street, Knoxville, Tennessee 37902, and will be open to the public. Anyone needing special access or accommodations should let the contact below know at least a week in advance.

FOR FURTHER INFORMATION CONTACT: Liz Upchurch, 865–632–8305, *efupchurch@tva.gov.*

SUPPLEMENTARY INFORMATION: The meeting agenda includes the following:

1. Introductions
2. Overview of the 2019 Integrated Resource Plan and Supplemental Environmental Impact Statement Status
3. Overview of the Metrics and Scorecard Identified for the 2019 IRP
4. Public Comments
5. Council Discussion and Advice

The RERC will hear opinions and views of citizens by providing a public comment session starting at 10:00 a.m., EST, lasting up to one hour, on Tuesday, December 18, 2018. Persons wishing to speak are requested to register at the door between 9:00 a.m. and 10:00 a.m., EST, on Tuesday, December 18, 2018, and will be called

[18] 17 CFR 200.30–3(a)(12).

on during the public comment period. TVA will set time limits for providing oral comments, once registered. Handout materials should be limited to one printed page. Written comments are also invited and may be mailed to the Regional Energy Resource Council, Tennessee Valley Authority, 400 West Summit Hill Drive, WT–9–D, Knoxville, Tennessee 37902.

Dated: November 8, 2018.

Joseph J. Hoagland,

Vice President, Enterprise Relations and Innovation, Tennessee Valley Authority.

BILLING CODE 8120–08–P

TENNESSEE VALLEY AUTHORITY

Environmental Impact Statement for Allen Fossil Plant Ash Impoundment Closures

AGENCY: Tennessee Valley Authority.

ACTION: Notice of intent.

SUMMARY: The Tennessee Valley Authority (TVA) intends to prepare an Environmental Impact Statement (EIS) to address the potential environmental effects associated with the future management of coal combustion residual (CCR) material at the Allen Fossil Plant (ALF) located in Shelby County, Tennessee, southwest of the City of Memphis. The purpose of this EIS is to support the implementation of TVA's goal to eliminate all wet CCR storage at its coal plants by closing CCR surface impoundments across the TVA system, and to assist TVA in complying with the Environmental Protection Agency's (EPA) CCR Rule. In addition, the proposed actions would make the ALF closure area land available for future economic development projects in the greater Memphis area.

TVA will evaluate closure of the East Ash Pond Complex, the West Ash Pond, and the Metal Cleaning Pond. In addition to these closures, TVA will analyze potential location requirements and associated environmental impacts associated with construction and utilization of a proposed beneficial re-use facility to process CCR materials. TVA will also evaluate potential impacts associated with actions requiring use of permitted borrow sites and the disposal of CCR at existing offsite permitted landfills. TVA will develop and evaluate various alternatives to these actions, including the No Action Alternative. Public comments are invited concerning both the scope of the review and environmental issues that should be addressed.

DATES: Comments on the scope of the EIS must be received on or before January 4, 2019.

ADDRESSES: Written comments should be sent to Ashley Farless, NEPA Compliance Specialist, 1101 Market Street, BR4A–C, Chattanooga, TN 37402. Comments also may be submitted online at: *https://www.tva.gov/nepa* or by email to *arfarless@tva.gov.*

FOR FURTHER INFORMATION CONTACT: Other related questions should be sent to Ashley Farless, NEPA Compliance Specialist, Tennessee Valley Authority, at 423–751–2361 or *arfarless@tva.gov.*

SUPPLEMENTARY INFORMATION: This notice is provided in accordance with the Council on Environmental Quality's regulations (40 CFR parts 1500 to 1508) and TVA's procedures for implementing the National Environmental Policy Act (NEPA) and Section 106 of the National Historic Preservation Act (NHPA) and its implementing regulations (36 CFR part 800).

TVA Power System and CCR Management

TVA is a corporate agency and instrumentality of the United States created by and existing pursuant to the TVA Act of 1933 that provides electricity for business customers and local power distributors. TVA serves more than 9 million people in parts of seven southeastern states. TVA receives no taxpayer funding, deriving virtually all of its revenues from sales of electricity. In addition to operating and investing its revenues in its electric system, TVA provides flood control, navigation and land management for the Tennessee River system and assists local power companies and state and local governments with economic development and job creation.

Historically, TVA has managed its CCRs in wet impoundments or dry landfills. On March 31, 2018, ALF's three coal-fired units were retired. While in operation, ALF consumed approximately 7,200 tons of coal a day and produced approximately 5,160 million kilowatt-hours of electricity a year. CCR produced by the collective units included approximately 85,000 dry tons of slag and fly ash that was wet-sluiced to the East Ash Pond Complex every year.

It is estimated that approximately 250,000 cubic yards (yd^3) of CCR material remains in the West Ash Pond and approximately 2.7 million cubic yards (yd^3) of CCR material remains in the East Ash Pond Complex. There are approximately 193,000 cubic yards of CCR in the area surrounding the Metal Cleaning Pond.

In July 2009, the TVA Board of Directors passed a resolution for staff to review TVA practices for storing CCRs at its generating facilities, including ALF, which resulted in a recommendation to convert the wet ash management system at ALF to a dry storage system. On April 17, 2015, the EPA published the final Disposal of CCRs from Electric Utilities rule, also known as the CCR Rule.

In June 2016, TVA issued a Final Programmatic Environmental Impact Statement (PEIS) that analyzed methods for closing CCR impoundments at TVA fossil plants and identified specific screening and evaluation factors to help frame its evaluation of closures at its other facilities. A Record of Decision was released in July 2016 that would allow future environmental reviews of qualifying CCR impoundment closures to tier from the PEIS. This EIS is intended to tier from the 2016 PEIS to evaluate the closure alternatives for the CCR Ash Impoundments at ALF.

Alternatives

In addition to a No Action Alternative, this EIS will address alternatives that meet the purpose and need for the project. TVA plans to consider the following: (1) No Action, (2) closure of the Metal Cleaning Pond and closure-by-removal of the East Ash Pond Complex, the West Ash Pond and the CCR surrounding the Metal Cleaning Pond to an offsite landfill location (note that the Metal Cleaning Pond would be removed by default while removing the CCR material surrounding it), (3) closure of the Metal Cleaning Pond and closure-by-removal of the East Ash Pond Complex, the West Ash Pond and the CCR surrounding the Metal Cleaning Pond to a beneficial re-use facility & offsite landfill location (see note above in #2), and (4) closure of the Metal Cleaning Pond and closure-in-place of all CCR in the East Ash Pond Complex, the West Ash Pond and CCR surrounding the Metal Cleaning Pond.

Proposed Resources and Issues To Be Considered

This EIS will identify the purpose and need of the project and will contain descriptions of the existing environmental and socioeconomic resources within the area that could be affected by the management of CCR at ALF. Evaluation of potential environmental impacts to these resources will include, but not be limited to, water quality, aquatic and terrestrial ecology, threatened and endangered species, wetlands, land use, historic and archaeological resources, as well as solid and hazardous waste,

safety, socioeconomic and environmental justice issues. The final range of issues to be addressed in the environmental review will be determined, in part, from scoping comments received. The preliminary identification of reasonable alternatives and environmental issues in this notice is not meant to be exhaustive or final.

Public Participation

TVA is interested in an open process and wants input from the community. The public is invited to submit comments on the scope of this EIS no later than the date identified in the ''Dates'' section of this notice. Federal, state and local agencies and Native American Tribes are also invited to provide comments.

After consideration of comments received during the scoping period, TVA will develop and distribute a scoping document that will summarize public and agency comments that were received and identify the schedule for completing the EIS process. Following analysis of the issues, TVA will prepare a draft EIS for public review and comment. In making its final decision, TVA will consider the analyses in this EIS and substantive comments that it receives. A final decision on proceeding with the management and final disposal of CCR and closure of the surface impoundments will depend on a number of factors. These include results of the EIS, requirements of the CCR Rule, relevant state law requirements, engineering and risk evaluations, and financial considerations.

TVA anticipates holding a community meeting near ALF after releasing the Draft EIS. Meeting details will be posted on TVA's website. TVA expects to release the Draft EIS in the Fall of 2019.

Authority: 40 CFR 1501.7.

M. Susan Smelley,

Director, Environmental Compliance and Operations.

BILLING CODE 8120–08–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Office of Commercial Space Transportation: Notice of Availability and Request for Comment on the Draft Environmental Assessment for Issuing SpaceX a Launch License for an In-Flight Dragon Abort Test, Kennedy Space Center, Brevard County, Florida

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of availability and request for comment.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended (NEPA), Council on Environmental Quality NEPA implementing regulations, and FAA Order 1050.1F, *Environmental Impacts: Policies and Procedures,* the FAA is announcing the availability of and requesting comment on the Draft Environmental Assessment for Issuing SpaceX a Launch License for an In-flight Dragon Abort Test, Kennedy Space Center, Brevard County, Florida (Draft EA).

DATES: Comments must be received on or before December 31, 2018.

ADDRESSES: Comments should be mailed to Daniel Czelusniak, Environmental Protection Specialist, Federal Aviation Administration, 800 Independence Avenue SW, Suite 325, Washington, DC 20591. Comments may also be submitted by email to *SpaceXDragonAbortEA@icf.com.*

FOR FURTHER INFORMATION CONTACT: Daniel Czelusniak, Environmental Protection Specialist, Federal Aviation Administration, 800 Independence Avenue SW, Suite 325, Washington, DC 20591; phone (202) 267–5924; email *SpaceXDragonAbortEA@icf.com.*

SUPPLEMENTARY INFORMATION: The FAA is evaluating SpaceX's proposal to conduct a one-time in-flight Dragon abort test at Kennedy Space Center's Launch Complex 39A, which would require the FAA to issue a launch license. Issuing a launch license is considered a Federal action subject to environmental review under NEPA. Under the Proposed Action, the FAA would issue a license to SpaceX, which would authorize SpaceX to conduct the abort test using a Falcon 9 launch vehicle and a Dragon-2 (*i.e.,* SpaceX's crew version of Dragon). Dragon-2 was developed with the intent to carry astronauts. The proposed abort test is part of SpaceX's commercial crew certification process with the National Aeronautics and Space Administration (NASA). The abort test is scheduled to occur in 2019.

Alternatives under consideration include the Proposed Action and the No Action Alternative. Under the No Action Alternative, the FAA would not issue a license to SpaceX to conduct the abort test, and therefore SpaceX would not conduct the abort test.

The Draft EA evaluates the potential environmental impacts from the Proposed Action and No Action Alternative on visual effects (including light emissions); coastal resources; air quality; climate; noise and noise-compatible land use; biological resources; water resources (surface waters); hazardous materials, solid waste, and pollution prevention; and historical, architectural, archeological, and cultural resources. Potential cumulative impacts are also addressed in the Draft EA.

The FAA has posted the Draft EA on the FAA Office of Commercial Space Transportation website: *https://www.faa.gov/about/office_org/headquarters_offices/ast/environmental/nepa_docs/review/launch/.*

The FAA encourages all interested parties to provide comments concerning the scope and content of the Draft EA. Before including your address, phone number, email address, or other personal identifying information in your comment, be advised that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask the FAA in your comment to withhold from public review your personal identifying information, the FAA cannot guarantee that we will be able to do so.

Issued in Washington, DC, on November 15, 2018.

Daniel Murray,

Manager, Space Transportation Development Division.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Notice Rescinding Eight Notices of Intent To Prepare Environmental Impact Statements

AGENCY: Federal Railroad Administration (FRA), U.S. Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: The Federal Railroad Administration (FRA) is issuing this notice to advise the public that FRA is rescinding the Notices of Intent (NOI) for the following Environmental Impact Statements (EIS): The Pennsylvania Maglev Proposal; the Tupelo Railroad Relocation Planning and Environmental Study; the Tier 2 EIS for the Chicago to Joliet High-Speed Rail (HSR) Project; the Tier 2 EIS for the HSR Project between Granite City, IL to St. Louis, MO HSR Project; EIS for the ACEforward Program; EIS for the Milwaukee, WI to Minneapolis, MN Rail Corridor; 7) the Los Angeles to San Louis Obispo North

(LOSSAN) Rail Corridor Project; and 8) the Chicago to Detroit/Pontiac Corridor Investment Program.

FOR FURTHER INFORMATION CONTACT: For additional information please contact Michael Johnsen, Supervisory Environmental Protection Specialist, at the Federal Railroad Administration, 1200 New Jersey Avenue SE, Washington, DC 20590; telephone: 202–493–0845; or email: *Michael.Johnsen@dot.gov.*

SUPPLEMENTARY INFORMATION: FRA has identified several projects that, for various reasons, are no longer advancing through FRA environmental review and has therefore determined it is appropriate to rescind the applicable NOI to prepare an EIS. The following NOIs are being rescinded:

- Pennsylvania Maglev Proposal: FRA published the NOI on July 19, 2001. The purpose of the EIS was to further explore the feasibility of a magnetic levitation train system linking Pittsburgh International Airport to Pittsburgh and its eastern suburbs in Allegheny and Westmoreland Counties. However, the project sponsor has since decided not to pursue a maglev project in this corridor.
- Relocation or Reconstruction of Rail Lines in Tupelo, MS: FRA published the NOI on June 29, 2006 to study the potential relocation or reconstruction of rail lines in the Tupelo, MS central business district. However, the project sponsor has not advanced the environmental review and has not identified current or foreseeable funding for the project.
- Chicago to Joliet High-Speed Rail (HSR) Project: FRA published the NOI on February 18, 2014 to study potential HSR service along the Rock Island District Railroad corridor between Chicago and Joliet, IL. The project sponsor has informed FRA that it does not intend to pursue the environmental review for the project at this time.
- HSR Project between Granite City, Illinois to St. Louis, Missouri: FRA published this NOI on February 18, 2014 to study the increase of rail capacity associated with the Mississippi River crossings in the Granite City to St. Louis Tier 2 EIS. However, the project sponsor has informed FRA that it does not intend to pursue the environmental review for the project at this time.
- ACEforward Program: FRA published the NOI on September 18, 2013. The purpose of the EIS was to study the expansion of existing rail service between Stockton and San Jose, CA and extension of new rail service to Modesto and Merced, CA. However, the project sponsor has determined that the orginial scope for the ACEforward EIS is no longer consistent with regional planning efforts for improved rail service throughout the corridor.
- Milwaukee, WI to Minneapolis, MN Rail Corridor: FRA published a revised NOI on May 24, 2013. The purpose of the EIS is to evaluate ways to improve passenger rail service from the Twin Cities, MN to Milwaukee, WI. The project sponsor has informed FRA that it does not wish to pursue the environmental review for the project at this time.
- LOSSAN Rail Corridor Project: FRA published the NOI for this project on January 1, 2011. The purpose of the EIS was to study ways to improve passenger rail service from Los Angeles through San Louis Obispo. The NOI is being rescinded as the service options on this corridor have been reevaluated in the updated California State Rail Plan.
- Chicago to Detroit/Pontiac Corridor Investment Program: FRA published the NOI on August 31, 2012. The purpose of the EIS was to study potential service options and corresponding infrastructure improvements between Chicago, IL, and Pontiac, MI. The project sponsor and FRA have agreed to rescind the NOI, however the associated alternatives analysis and service development plan may be used for further environmental reviews, where necessary.

Issued in Washington, DC.

Jamie Rennert,

Office Director, Office of Program Delivery.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2018–0013; Notice 1]

Notice of Receipt of Petition for Decision that Nonconforming Model Year 2015 Bentley Continental Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Receipt of petition.

SUMMARY: This document announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a decision that certain model year (MY) 2015 Bentley Continental passenger cars (PCs) that were not originally manufactured to comply with all applicable Federal motor vehicle safety standards (FMVSS) are eligible for importation into the United States because they are substantially similar to vehicles that were originally manufactured for sale in the United States and were certified by their manufacturer as complying with the safety standards (the U.S.-certified version of the MY 2015 Bentley Continental PCs) and are capable of being readily altered to conform to the standards.

DATES: The closing date for comments on the petition is December 31, 2018.

ADDRESSES: Interested persons are invited to submit written data, views, and arguments on this petition. Comments must refer to the docket and notice number cited in the title of this notice and must be submitted by any of the following methods:

- *Mail:* Send comments by mail addressed to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver comments by hand to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590. The Docket Section is open on weekdays from 10 a.m. to 5 p.m. except for Federal Holidays.
- *Electronically:* Submit comments electronically by logging onto the Federal Docket Management System (FDMS) website at *https://www.regulations.gov/.* Follow the online instructions for submitting comments.
- Comments may also be faxed to (202) 493–2251.

Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are provided. If you wish to receive confirmation that comments you have submitted by mail were received, please enclose a stamped, self-addressed postcard with the comments. Note that all comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided.

All comments, background documentation, and supporting materials submitted to the docket may be viewed by anyone at the address and times given above. The documents may also be viewed on the internet at *https://www.regulations.gov* by following the online instructions for accessing the

dockets. The docket ID number for this petition is shown in the heading of this notice.

DOT's complete Privacy Act Statement is available for review in a **Federal Register** notice published on April 11, 2000, (65 FR 19477–78).

FOR FURTHER INFORMATION CONTACT: Neil Thurgood, Office of Vehicle Safety Compliance, NHTSA, telephone (202) 366–0712.

SUPPLEMENTARY INFORMATION:

I. History: Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable FMVSS (49 CFR 571) shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable FMVSS.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA, pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, *Processing of Petitions,* NHTSA publishes notices in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

II. Summary of Petition: Wallace Environmental Testing Laboratories (WETL), of Houston, Texas (Registered Importer R–90–005) has petitioned NHTSA to decide whether nonconforming MY 2015 Bentley Continental PCs are eligible for importation into the United States. The vehicles that WETL believes are substantially similar are MY 2015 Bentley Continental PCs manufactured for sale in the United States, and certified by their manufacturer as conforming to all applicable FMVSS.

The petitioner submitted information with its petition intended to demonstrate that the subject non-U.S.-certified vehicles, as originally manufactured, conform to many applicable FMVSS in the same manner as their U.S.-certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that the non-U.S.-certified MY 2015 Bentley Continental PCs, as originally manufactured, conforms to: Standard Nos. 102 *Transmission Shift Position Sequence, Starter Interlock, and Transmission Braking Effect,* 103 *Windshield Defrosting and Defogging Systems,* 104 *Windshield Wiping and Washing Systems,* 106 *Brake Hoses,* 110 *Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information for Motor Vehicles with a GVWR of 4,536 Kilograms (10,000 Pounds) or Less,* 113 *Hood Latch System,* 116 *Motor Vehicle Brake Fluids,* 118 *Power-Operated Window, Partition, and Roof Panel Systems,* 124 *Accelerator Control Systems,* 126 *Electronic Stability Control Systems for Light Vehicles,* 135 *Light Vehicle Brake Systems,* 138 *Tire Pressure Monitoring Systems,* 201 *Occupant Protection in Interior Impact,* 202a *Head Restraints; Mandatory Applicability Begins on September 1, 2009,* 204 *Steering Control Rearward Displacement,* 205 *Glazing Materials,* 206 *Door Locks and Door Retention Components,* 207 *Seating Systems,* 209 *Seat Belt Assemblies,* 210 *Seat Belt Assembly Anchorages,* 212 *Windshield Mounting,* 214 *Side Impact Protection,* 216 *Roof Crush Resistance; Applicable unless a Vehicle is Certified to § 571.216a,* 219 *Windshield Zone Intrusion,* 225 *Child Restraint Anchorage Systems,* 301 *Fuel System Integrity,* and 302 *Flammability of Interior Materials.*

The petitioner also contends that the subject non-U.S.-certified passenger cars are capable of being readily altered to meet the following standards in the manners indicated:

Standard No. 101 *Controls and Displays:* The brake warning telltale must be modified to show the word ''BRAKE'' when activated.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment:* Installation of the front and rear side-mounted reflex reflectors with U.S.-conforming components.

Standard No. 111 *Rear Visibility:* Replacement of the passenger side mirror with the U.S.-model or inscription of the required warning statement on the face of the existing mirror.

Standard No. 114 *Theft Protection and Rollaway Prevention:* Installation of a supplemental key warning buzzer or activation of the U.S.-version software to meet the requirements of this standard.

Standard No. 208 *Occupant Crash Protection:* Inspection to ascertain if the software and firmware installed in the vehicle are the same as the most up-to-date versions installed in the U.S.-conforming version of the vehicle. Replacement of any software or firmware found not to be the most recent versions. Replacement of sun visors with U.S.-model components to meet the labeling requirements of FMVSS No. 208.

Standard No. 401 *Interior Trunk Release:* Installation of U.S.-model trunk release components to meet the requirements of this standard.

The petitioner further states that labels will be affixed to conform the vehicle to the requirements of 49 CFR parts 565 and 567, VIN *Content* and *Certification,* respectively.

III. Comments: All comments and supporting materials received before the close of business on the closing date indicated above will be filed in the docket and considered. Comments filed after the closing date will also be considered to the fullest extent possible and available for examination in the docket at the above addresses.

Once the petition is granted or denied, notice of the decision will be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

This notice of receipt of the subject petition does not represent any agency decision or other exercise of judgment concerning the merits of the petition. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A), (a)(1)(B), and (b)(1); 49 CFR 593.7; delegation of authority at 49 CFR 1.95 and 501.8.

FOR FURTHER INFORMATION CONTACT: Neil Thurgood, Office of Vehicle Safety Compliance, NHTSA, telephone (202) 366–0712.

SUPPLEMENTARY INFORMATION:

I. History

Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable FMVSS (49 CFR 571) shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable FMVSS.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, *Processing of Petitions,* NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

II. Summary of Petition

Wallace Environmental Testing Laboratories (WETL), of Houston, Texas (Registered Importer R–90–005) has petitioned NHTSA to decide whether nonconforming MY 2005 Chevrolet Corvette PCs are eligible for importation into the United States. The vehicles that WETL believes are substantially similar are MY 2005 Chevrolet Corvette PCs, manufactured for sale in the United States and certified by their manufacturer as conforming to all applicable FMVSS.

The petitioner submitted information with its petition intended to demonstrate that the subject non-U.S.-certified vehicles as originally manufactured, conform to many applicable FMVSS in the same manner as their U.S.-certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that the non-U.S.-certified MY 2005 Chevrolet Corvette PCs, as originally manufactured, conforms to: Standard Nos. 102 *Transmission Shift Position Sequence, Starter Interlock, and Transmission Braking Effect,* 103 *Windshield Defrosting and Defogging Systems,* 104 *Windshield Wiping and Washing Systems,* 106 *Brake Hoses,* 108 *Lamps, Reflective Devices and Associated Equipment,* 110 *Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information for Motor Vehicles with a GVWR of 4,536 Kilograms (10,000 Pounds) or Less,* 111 *Rearview Mirrors,* 113 *Hood Latch System,* 114 *Theft Protection,* 116 *Motor Vehicle Brake Fluids,* 118 *Power-Operated Window, Partition, and Roof Panel Systems,* 124 *Accelerator Control Systems,* 135 *Light Vehicle Brake Systems,* 138 *Tire Pressure Monitoring Systems,* 201 *Occupant Protection in Interior Impact,* 202a *Head Restraints; Mandatory Applicability Begins on September 1, 2008,* 204 *Steering Control Rearward Displacement,* 205 *Glazing Materials,* 206 *Door Locks and Door Retention Components,* 207 *Seating Systems,* 209 *Seat Belt Assemblies,* 210 *Seat Belt Assembly Anchorages,* 212 *Windshield Mounting,* 214 *Side Impact Protection,* 216 *Roof Crush Resistance,* 219 *Windshield Zone Intrusion,* 225 *Child Restraint Anchorage Systems,* 301 *Fuel System Integrity,* 302 *Flammability of Interior Materials* and 401 *Interior Trunk Release.*

The petitioner also contends that the subject non-U.S.-certified passenger cars are capable of being readily altered to meet the following standards in the manners indicated:

Standard No. 101 *Controls and Displays:* The brake warning telltale must be modified to show the word ''BRAKE'' when activated.

Standard No. 208 *Occupant Crash Protection:* Inspection to ascertain if the software and firmware installed in the vehicle are the same as the most up-to-date versions installed in the U.S.-conforming version of the vehicle. Replacement of any software or firmware found not to be the most recent versions. Replacement of sun visors with U.S.-model components to meet the labeling requirements of FMVSS No. 208.

The petitioner additionally states that a vehicle identification plate must be

affixed to the vehicle near the left windshield pillar to meet the requirements of 49 CFR part 565.

III. Comments

All comments and supporting materials received before the close of business on the closing date indicated above will be filed in the docket and considered. Comments filed after the closing date will also be considered to the fullest extent possible and available for examination in the docket at the above addresses.

Once the petition is granted or denied, notice of the decision will be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

This notice of receipt of the subject petition does not represent any agency decision or other exercise of judgment concerning the merits of the petition. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A), (a)(1)(B), and (b)(1); 49 CFR 593.7; delegation of authority at 49 CFR 1.95 and 501.8.

FOR FURTHER INFORMATION CONTACT: Neil Thurgood, Office of Vehicle Safety Compliance, NHTSA (202–366–0712).

SUPPLEMENTARY INFORMATION:

I. History: Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable FMVSS shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable FMVSS.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

II. Summary of Petition: Wallace Environmental Testing Laboratories (WETL), of Houston, Texas (Registered Importer R–90–005) has petitioned NHTSA to decide whether nonconforming MY 2016 Chevrolet Equinox MPVs are eligible for importation into the United States. The vehicles which WETL believes are substantially similar are MY 2016 Chevrolet Equinox MPVs sold in the United States and certified by their manufacturer as conforming to all applicable FMVSS.

The petitioner claims that it compared non-U.S.-certified MY 2016 Chevrolet Equinox MPVs to their U.S.-certified counterparts, and found the vehicles to be substantially similar with respect to compliance with most FMVSS.

The petitioner submitted information with its petition intended to demonstrate that the subject non-U.S.-certified vehicles, as originally manufactured, conform to many applicable FMVSS in the same manner as their U.S.-certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that the non-U.S.-certified MY 2016 Chevrolet Equinox MPVs, as originally manufactured, conforms to: Standard

Nos. 102 *Transmission Shift position Sequence, Starter Interlock, and Transmission Braking Effect,* 103 *Windshield Defrosting and Defogging Systems,* 104 *Windshield Wiping and Washing Systems,* 106 *Brake Hoses,* 110 *Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information for Motor Vehicles with a GVWR of 4,536 Kilograms (10,000 pounds) or Less,* 111 *Rear Visibility,* 113 *Hood Latch System,* 114 *Theft Protection and Rollaway Prevention,* 116 *Motor Vehicle Brake Fluids,* 118 *Power-Operated Window, Partition, and Roof Panel Systems,* 124 *Accelerator Control Systems,* 126 *Electronic Stability Control Systems for Light Vehicles,* 135 *Light Vehicle Brake Systems,* 138 *Tire Pressure Monitoring Systems,* 202a *Head Restraints; Mandatory Applicability Begins on September 1, 2009,* 203 *Impact Protection for the Driver from the Steering Control System,* 204 *Steering Control Rearward Displacement,* 205 *Glazing Materials,* 206 *Door Locks and Door Retention Components,* 207 *Seating Systems,* 209 *Seat Belt Assemblies,* 210 *Seat Belt Assembly Anchorages,* 212 *Windshield Mounting,* 214 *Side Impact Protection,* 216 *Roof Crush Resistance, Applicable unless a Vehicle is Certified to § 571.216a,* 219 *Windshield Zone Intrusion,* 225 *Child Restraint Anchorage Systems,* 226 *Ejection Mitigation,* 301 *Fuel System Integrity,* and 302 *Flammability of Interior Materials.*

The petitioner also contends that the subject non-U.S.-certified MPVs are capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays:* The brake warning telltale must be modified to show the word ''BRAKE'' when activated.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment:* Inspection to ascertain if the software and firmware installed in the vehicle are the same as the most up-to-date versions installed in the U.S.-conforming version of the vehicle. Replacement of any software or firmware found not to be the most recent version.

Standard No. *201 Occupant Protection in Interior Impact:* Replacement of sun visors with U.S.-model components to meet the labeling requirements of FMVSS No. 208 and to continue to meet the requirements of FMVSS No. 201.

Standard No. 208 *Occupant Crash Protection:* Inspection to ascertain if the software and firmware installed in the vehicle are the same as the most up-to-date versions installed in the U.S.-conforming version of the vehicle. Replacement of any software or firmware found not to be the most recent version. Replacement of sun visors with U.S.-model components to meet the labeling requirements of FMVSS No. 208.

The petitioner further states that labels will be affixed to conform the vehicle to the requirements of 49 CFR parts 565 and 567, VIN *Content* and *Certification,* respectively.

III. Comments: All comments and supporting materials received before the close of business on the closing date indicated above will be filed in the docket and considered. Comments filed after the closing date will also be considered to the fullest extent possible and available for examination in the docket at the above **ADDRESSES**.

Once the petition is granted or denied, notice of the decision will be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

This notice of receipt of the subject petition does not represent any agency decision or other exercise of judgment concerning the merits of the petition Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A), (a)(1)(B), and (b)(1); 49 CFR 593.7; delegation of authority at 49 CFR 1.95 and 501.8.

National Highway Traffic Safety Administration

[Docket No. NHTSA–2018–0029; Notice 1]

Notice of Receipt of Petition for Decision That Nonconforming Model Year 2015 Chevrolet Silverado Trucks Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Receipt of petition.

SUMMARY: This document announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a decision that certain model year (MY) 2015 Chevrolet Silverado trucks that were not originally manufactured to comply with all applicable Federal motor vehicle safety standards (FMVSS), are eligible for importation into the United States because they are substantially similar to vehicles that were originally manufactured for sale in the United States and were certified by their manufacturer as complying with the safety standards (the U.S.-certified 2015 Chevrolet Silverado trucks) and are capable of being readily altered to conform to the standards.

DATES: The closing date for comments on the petition is December 31, 2018.

ADDRESSES: Interested persons are invited to submit written data, views, and arguments on this petition. Comments must refer to the docket number cited in the title of this notice and must be submitted by any of the following methods:

- *Mail:* Send comments by mail addressed to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver comments by hand to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590. The Docket Section is open on weekdays from 10 a.m. to 5 p.m. except Federal Holidays.
- *Electronically:* Submit comments electronically by logging onto the Federal Docket Management System (FDMS) website at *https://www.regulations.gov/.* Follow the online instructions for submitting comments.
- Comments may also be faxed to (202) 493–2251.

Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are provided. If you wish to receive confirmation that comments you have submitted by mail were received, please enclose a stamped, self-addressed postcard with the comments. Note that all comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided.

All comments, background documentation, and supporting materials submitted to the docket may be viewed by anyone at the address and times given above. The documents may also be viewed on the internet at *https://www.regulations.gov* by following the online instructions for accessing the dockets. The docket ID number for this

petition is shown in the heading of this notice.

DOT's complete Privacy Act Statement is available for review in a **Federal Register** notice published on April 11, 2000, (65 FR 19477–78).

FOR FURTHER INFORMATION CONTACT: Neil Thurgood, Office of Vehicle Safety Compliance, NHTSA (202–366–0712).

SUPPLEMENTARY INFORMATION:

I. History: Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable FMVSS shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable FMVSS.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition it receives and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

II. Summary of Petition: Wallace Environmental Testing Laboratories (WETL), of Houston, Texas (Registered Importer R–90–005) has petitioned NHTSA to decide whether nonconforming MY 2015 Chevrolet Silverado trucks are eligible for importation into the United States. The vehicles which WETL believes are substantially similar are MY 2015 Chevrolet Silverado trucks sold in the United States and certified by their manufacturer as conforming to all applicable FMVSS.

The petitioner claims that it compared non-U.S.-certified MY 2015 Chevrolet Silverado trucks to their U.S.-certified counterparts, and found the vehicles to be substantially similar with respect to compliance with most FMVSS.

The petitioner submitted information with its petition intended to demonstrate that the subject non-U.S.-certified vehicles as originally manufactured, conform to many applicable FMVSS in the same manner as their U.S.-certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that the non-U.S.-certified MY 2015 Chevrolet Silverado trucks, as originally manufactured, conforms to: Standard Nos. 102 *Transmission Shift position Sequence, starter interlock, and transmission braking effect,* 103 *Windshield Defrosting and Defogging Systems,* 104 *Windshield Wiping and Washing Systems,* 106 *Brake Hoses,* 108 *Lamps, Reflective Devices, and Associated Equipment,* 110 *Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information for Motor Vehicles with a GVWR of 4,536 Kilograms (10,000 pounds) or Less,* 111 *Rear visibility,* 113 *Hood Latch System,* 114 *Theft Protection and Rollaway Prevention,* 116 *Motor Vehicle Brake Fluids,* 118 *Power-Operated Window, Partition, and Roof Panel Systems,* 124 *Accelerator Control Systems,* 126 *Electronic Stability Control Systems for Light Vehicles,* 135 *Light Vehicle Brake Systems,* 138 *Tire Pressure Monitoring Systems,* 201 *Occupant Protection in Interior Impact,* 202a *Head Restraints; Mandatory Applicability Begins on September 1, 2009,* 205 *Glazing Materials,* 206 *Door Locks and Door Retention Components,* 207 *Seating Systems,* 209 *Seat Belt Assemblies,* 210 *Seat Belt Assembly Anchorages,* 212 *Windshield Mounting,* 214 *Side Impact Protection,* 216 *Roof Crush Resistance, Applicable unless a Vehicle is Certified to § 571.216a,* 219 *Windshield Zone Intrusion,* 225 *Child Restraint Anchorage Systems,* 301 *Fuel System Integrity,* and *302 Flammability of Interior Materials.*

The petitioner also contends that the subject non-U.S.-certified trucks are capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays:* The brake warning telltale must be modified to show the word ''BRAKE'' when activated.

Standard No. 208 *Occupant Crash Protection:* Inspection to ascertain if the software and firmware installed in the vehicle are the same as the most up-to-date versions installed in the U.S.-conforming version of the vehicle. Replacement of any software or firmware found not to be the most recent versions. Replacement of sun visors with U.S.-model components to meet the labeling requirements of FMVSS No. 208.

The petitioner further states that labels will be affixed to conform the vehicle to the requirements of 49 CFR parts 565 and 567, VIN *Content* and *Certification,* respectively.

III. Comments: All comments and supporting materials received before the close of business on the closing date indicated above will be filed in the docket and considered. Comments filed after the closing date will also be considered to the fullest extent possible and available for examination in the docket at the above addresses.

Once the petition is granted or denied, notice of the decision will be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

This notice of receipt of the subject petition does not represent any agency decision or other exercise of judgment concerning the merits of the petition. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A), (a)(1)(B), and (b)(1); 49 CFR 593.7; delegation of authority at 49 CFR 1.95 and 501.8.

Michael A. Cole,

Acting Director, Office of Vehicle Safety Compliance.

DOT's complete Privacy Act Statement is available for review in a **Federal Register** notice published on April 11, 2000, (65 FR 19477–78).

FOR FURTHER INFORMATION CONTACT: Neil Thurgood, Office of Vehicle Safety Compliance, NHTSA (202–366–0712).

SUPPLEMENTARY INFORMATION:

I. History: Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable FMVSS shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable FMVSS.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notices in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

II. Summary of Petition: Wallace Environmental Testing Laboratories (WETL), of Houston, Texas (Registered Importer R–90–005) has petitioned NHTSA to decide whether nonconforming MY 2008 Jeep Grand Cherokee MPVs are eligible for importation into the United States. The vehicles which WETL believes are substantially similar are MY 2008 Jeep Grand Cherokee MPVs sold in the United States and certified by their manufacturer as conforming to all applicable FMVSS.

The petitioner claims that it compared non-U.S.-certified MY 2008 Jeep Grand Cherokee MPVs to their U.S.-certified counterparts, and found the vehicles to be substantially similar with respect to compliance with most FMVSS.

The petitioner submitted information with its petition intended to demonstrate that the subject non-U.S.-certified vehicles as originally manufactured, conform to many applicable FMVSS in the same manner as their U.S.-certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that the non-U.S.-certified MY 2008 Jeep Grand Cherokee MPVs, as originally manufactured, conforms to: Standard Nos. 102 *Transmission Shift position Sequence, Starter interlock, and transmission braking effect,* 103 *Windshield Defrosting and Defogging Systems,* 104 *Windshield Wiping and Washing Systems,* 106 *Brake Hoses,* 110 *Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information for Motor Vehicles with a GVWR of 4,536 Kilograms (10,000 pounds) or Less,* 111 *Rearview Mirrors,* 113 *Hood Latch System,* 116 *Motor Vehicle Brake Fluids,* 118 *Power-Operated Window, Partition, and Roof Panel Systems,* 124 *Accelerator Control Systems,* 126 *Electronic Stability Control Systems,* 135 *Light Vehicle Brake Systems,* 138 *Tire Pressure Monitoring Systems,* 201 *Occupant Protection in Interior Impact,* 202a *Head Restraints; Mandatory Applicability begins on September 1, 2008,* 204 *Steering Control Rearward Displacement,* 205 *Glazing Materials,* 206 *Door Locks and Door Retention Components,* 207 *Seating Systems,* 209 *Seat Belt Assemblies,* 210 *Seat Belt Assembly Anchorages,* 212 *Windshield Mounting,* 214 *Side Impact Protection,* 216 *Roof Crush Resistance,* 219 *Windshield Zone Intrusion,* 225 *Child Restraint Anchorage Systems,* 301 *Fuel System Integrity,* and 302 *Flammability of Interior Materials.*

The petitioner also contends that the subject non-U.S.-certified MPVs are capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays:* The brake warning telltale must be modified to show the word ''BRAKE'' when activated.

Standard No. 108 *Lamps Reflective Devices and Associated Equipment:* Installation of the front and rear side mounted reflex reflectors with U.S.-conforming components.

Standard No. 114 *Theft Protection and Rollaway Prevention:* Installation of a supplemental key warning buzzer, or activation of the U.S.-version software to meet the requirements of this standard.

Standard No. 208 *Occupant Crash Protection:* Inspection to ascertain if the software and firmware installed in the vehicle are the same as the most up-to-date versions installed in the U.S.-conforming version of the vehicle. Replacement of any software or firmware found not to be the most recent versions. Replacement of sun visors with U.S.-model components to meet the labeling requirements of FMVSS No. 208.

The petitioner further states that labels will be affixed to conform the vehicle to the requirements of 49 CFR parts 565 and 567, VIN *Content* and *Certification,* respectively.

III. Comments: All comments and supporting materials received before the close of business on the closing date indicated above will be filed in the docket and considered. Comments filed

after the closing date will also be considered to the fullest extent possible and available for examination in the docket at the above addresses.

Once the petition is granted or denied, notice of the decision will be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

This notice of receipt of the subject petition does not represent any agency decision or other exercise of judgment concerning the merits of the petition. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

FOR FURTHER INFORMATION CONTACT: Neil Thurgood, Office of Vehicle Safety Compliance, NHTSA, telephone (202) 366–0712.

SUPPLEMENTARY INFORMATION:

I. *History:* Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable FMVSS (49 CFR 571) shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable FMVSS.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA, pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, *Processing of Petitions,* NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

II. *Summary of Petition:* J.K. Technologies, LLC (JK), of Baltimore, Maryland (Registered Importer R–90–006) has petitioned NHTSA to decide whether nonconforming MY 2015 Ferrari 458 Speciale Aperta PCs are eligible for importation into the United States. The vehicles that JK believes are substantially similar are MY 2015 Ferrari 458 Speciale Aperta PCs manufactured for sale in the United States, and certified by their manufacturer as conforming to all applicable FMVSS.

The petitioner submitted information with its petition intended to demonstrate that the subject non-U.S.-certified vehicles, as originally manufactured, conform to many applicable FMVSS in the same manner as their U.S.-certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that the non-U.S.-certified MY 2015 Ferrari 458 Speciale Aperta PCs, as originally manufactured, conform to: Standard Nos. 102 *Transmission Shift Position Sequence, Starter Interlock, and Transmission Braking Effect,* 103 *Windshield Defrosting and Defogging Systems,* 104 *Windshield Wiping and Washing Systems,* 106 *Brake Hoses,* 113 *Hood Latch System,* 114 *Theft Protection and Rollaway Prevention,* 116 *Motor Vehicle Brake Fluids,* 118 *Power-Operated Window, Partition, and Roof Panel Systems,* 124 *Accelerator Control Systems,* 126 *Electronic Stability Control Systems for Light Vehicles,* 135 *Light Vehicle Brake*

Systems, 138 *Tire Pressure Monitoring Systems,* 201 *Occupant Protection in Interior Impact,* 202 *Head Restraints,* 204 *Steering Control Rearward Displacement,* 205 *Glazing Materials,* 206 *Door Locks and Door Retention Components,* 207 *Seating Systems,* 209 *Seat Belt Assemblies,* 210 *Seat Belt Assembly Anchorages,* 212 *Windshield Mounting,* 214 *Side Impact Protection,* 216 *Roof Crush Resistance; Applicable unless a Vehicle is Certified to § 571.216a,* 219 *Windshield Zone Intrusion,* 301 *Fuel System Integrity,* and 302 *Flammability of Interior Materials.*

The petitioner also contends that the subject non-U.S.-certified vehicles are capable of being readily altered to meet the following standards in the manner indicated:

Standard No. 101 *Controls and Displays:* Replacement of the instrument cluster with the U.S.-model component and reprogramming of its software as described in the petition.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment:* Installation of wiring and programming to activate the required side marker lights.

Standard No. 110 *Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information for Motor Vehicles with a GVWR of 4,536 Kilograms (10,000 Pounds) or Less:* Installation of the required tire information placard.

Standard No. 111 *Rear Visibility:* Replacement of the passenger side mirror with the U.S.-model Component, or inscription of the required warning statement on the face of the existing mirror.

Standard No. 208 *Occupant Crash Protection:* Replacement of several components as described in the petition. Replacement of the sensor mat in the passenger-side seat cushion, and activation of the SRS airbag control module. Replacement of sun visors with U.S.-model components to meet the labeling requirements of FMVSS No. 208.

The petitioner further states that labels will be affixed to bring the vehicle into conformity with the requirements of 49 CFR parts 565 and 567, VIN *Content* and *Certification,* respectively.

III. *Comments:* All comments and supporting materials received before the close of business on the closing date indicated above will be filed in the docket and considered. Comments filed after the closing date will also be considered to the fullest extent possible and available for examination in the docket at the above addresses.

Once the petition is granted or denied, notice of the decision will be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

This notice of receipt of the subject petition does not represent any agency decision or other exercise of judgment concerning the merits of the petition. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A), (a)(1)(B), and (b)(1); 49 CFR 593.7; delegation of authority at 49 CFR 1.95 and 501.8.

Notice of Receipt of Petition for Decision That Certain Nonconforming Model Year 2011 Mercedes-Benz GL550 Multipurpose Passenger Vehicles Originally Certified to the Canadian Motor Vehicle Safety Standards Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Receipt of petition.

SUMMARY: This document announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a decision that certain model year (MY) 2011 Mercedes-Benz GL550 multipurpose passenger vehicles (MPVs) that were not originally manufactured to comply with all applicable Federal motor vehicle safety standards (FMVSS), but that are certified by their original manufacturer as complying with all applicable Canadian motor vehicle safety standards (CMVSS), are eligible for importation into the United States because they are substantially similar to vehicles that were originally manufactured for sale in the United States and that were certified by their manufacturer as complying with the safety standards (the U.S.-certified 2011 Mercedes-Benz GL550 MPVs and are capable of being readily altered to conform to the standards.

DATES: The closing date for comments on the petition is December 31, 2018.

ADDRESSES: Interested persons are invited to submit written data, views, and arguments on this petition. Comments must refer to the docket number cited in the title of this notice and submitted by any of the following methods:

- *Mail:* Send comments by mail addressed to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver comments by hand to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590. The Docket Section is open on weekdays from 10 a.m. to 5 p.m. except for Federal Holidays.
- *Electronically:* Submit comments electronically by logging onto the Federal Docket Management System (FDMS) website at *https://www.regulations.gov/.* Follow the online instructions for submitting comments.
- Comments may also be faxed to (202) 493–2251.

Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are provided. If you wish to receive confirmation that comments you have submitted by mail were received, please enclose a stamped, self-addressed postcard with the comments. Note that all comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided.

All comments, background documentation, and supporting materials submitted to the docket may be viewed by anyone at the address and times given above. The documents may also be viewed on the internet at *https://www.regulations.gov* by following the online instructions for accessing the dockets. The docket ID number for this petition is shown in the heading of this notice.

DOT's complete Privacy Act Statement is available for review in a **Federal Register** notice published on April 11, 2000, (65 FR 19477–78).

SUPPLEMENTARY INFORMATION:

I. History

Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally

manufactured to conform to all applicable FMVSS shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable FMVSS.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

II. Summary of Petition

J.K. Technologies, LLC (JK), of Baltimore, Maryland (Registered Importer R–90–006) has petitioned NHTSA to decide whether nonconforming MY 2011 Mercedes-Benz GL550 CMVSS-certified MPVs are eligible for importation into the United States. The vehicles which JK believes are substantially similar are MY 2011 Mercedes-Benz GL550 MPVs sold in the United States and certified by their manufacturer as conforming to all applicable FMVSS.

The petitioner claims that it compared the CMVSS-certified MY 2011 Mercedes-Benz GL550 CMVSS certified MPVs to their U.S.-certified counterparts, and found the vehicles to be substantially similar with respect to compliance with most FMVSS.

The petitioner submitted information with its petition intended to demonstrate that the subject non-U.S.-certified vehicles as, originally manufactured, conform to many applicable FMVSS in the same manner as their U.S.-certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that the non-U.S.-certified MY 2011 Mercedes-Benz GL550 CMVSS certified MPVs, as originally manufactured, conform to: Standard Nos. 102 *Transmission Shift Position Sequence,* Starter *Interlock, and Transmission Braking Effect,* 103 *Windshield Defrosting and Defogging Systems,* 104 *Windshield Wiping and Washing Systems,* 106 *Brake Hoses,* 108 *Lamps, Reflective Devices and Associated Equipment,* 110 *Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information for Motor Vehicles with a GVWR of 4,536 Kilograms (10,000 pounds) or Less,* 111 *Rearview Mirrors,* 113 *Hood Latch System,* 114 *Theft Protection and Rollaway Prevention,* 116 *Motor Vehicle Brake Fluids,* 118 *Power-Operated Window, Partition, and Roof Panel Systems,* 124 *Accelerator Control Systems,* 126 *Electronic Stability Control Systems,* 135 *Light Vehicle Brake Systems,* 201 *Occupant Protection in Interior Impact,* 202a *Head Restraints; Mandatory Applicability Begins on September 1, 2009,* 203 *Impact Protection for the Driver from the Steering Control System,* 204 *Steering Control Rearward Displacement,* 205 *Glazing Materials,* 206 *Door Locks and Door Retention Components,* 207 *Seating Systems,* 208 *Occupant Crash Protection,* 209 *Seat Belt Assemblies,* 210 *Seat Belt Assembly Anchorages,* 212 *Windshield Mounting,* 214 *Side Impact Protection,* 216 *Roof Crush Resistance; Applicable unless a Vehicle is Certified to § 571.216a,* 219 *Windshield Zone Intrusion,* 225 *Child Restraint Anchorage Systems,* 301 *Fuel System Integrity,* and 302 *Flammability of Interior Materials.*

The petitioner also contends that the subject non-U.S.-certified passenger cars are capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays:* Replacement of the instrument cluster with the U.S.-model component and reprogramming of its software as described in the petition. In addition, replacement of the engine start control push button switch with the U.S.-model component to correct the labeling to meet the requirements of the standard.

Standard No. 138 *Tire Pressure Monitoring Systems:* Replacement or addition of U.S.-model TPMS components and the wiring harness, and then reprogramming of the vehicle ECUs as necessary to meet the requirements of the standard as described in the petition and shown in its attachments. The certifying manufacturer, Mercedes Benz, stated in a letter provided by the petitioner that they do not provide a retrofit or conversion to render this vehicle compliant with this specific standard. NHTSA is, therefore, specifically seeking public comment on whether the petitioner's proposed approach to conforming the subject vehicles to FMVSS No. 138 is capable of achieving conformity.

The petitioner further states that labels will be affixed to conform the vehicle to the requirements of 49 CFR parts 565 and 567, *VIN Content* and *Certification,* respectively.

III. Comments

All comments and supporting materials received before the close of business on the closing date indicated above will be filed in the docket and considered. Comments filed after the closing date will also be considered to the fullest extent possible and available for examination in the docket at the above addresses.

Once the petition is granted or denied, notice of the decision will be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

This notice of receipt of the subject petition does not represent any agency decision or other exercise of judgment concerning the merits of the petition. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A), (a)(1)(B), and (b)(1); 49 CFR 593.7; delegation of authority at 49 CFR 1.95 and 501.8.

Claudia W. Covell,

Acting Director, Office of Vehicle Safety Compliance.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2018–0007; Notice 1]

Notice of Receipt of Petition for Decision That Nonconforming Model Year 2016 Mercedes-Benz GL500 Multipurpose Passenger Vehicles Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Receipt of petition.

SUMMARY: This document announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a decision that certain model year (MY) 2016 Mercedes-Benz GL500 multipurpose passenger vehicles (MPVs) that were not originally manufactured to comply with all applicable Federal motor vehicle safety standards (FMVSS), are eligible for importation into the United States because they are substantially similar to

vehicles that were originally manufactured for sale in the United States and were certified by their manufacturer as complying with the safety standards (the U.S.-certified 2016 Mercedes-Benz GL550 MPV) and are capable of being readily altered to conform to the standards.

DATES: The closing date for comments on the petition is December 31, 2018.

ADDRESSES: Interested persons are invited to submit written data, views, and arguments on this petition. Comments must refer to the docket number cited in the title of this notice and must be submitted by any of the following methods:

- *Mail:* Send comments by mail addressed to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver comments by hand to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590. The Docket Section is open on weekdays from 10 a.m. to 5 p.m. except for Federal Holidays.
- *Electronically:* Submit comments electronically by logging onto the Federal Docket Management System (FDMS) website at *https://www.regulations.gov/.* Follow the online instructions for submitting comments.
- Comments may also be faxed to (202) 493–2251.

Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are provided. If you wish to receive confirmation that comments you have submitted by mail were received, please enclose a stamped, self-addressed postcard with the comments. Note that all comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided.

All comments, background documentation, and supporting materials submitted to the docket may be viewed by anyone at the address and times given above. The documents may also be viewed on the internet at *https://www.regulations.gov* by following the online instructions for accessing the dockets. The docket ID number for this petition is shown in the heading of this notice.

DOT's complete Privacy Act Statement is available for review in a **Federal Register** notice published on April 11, 2000, (65 FR 19477–78).

FOR FURTHER INFORMATION CONTACT: Neil Thurgood, Office of Vehicle Safety Compliance, NHTSA (202–366–0712).

SUPPLEMENTARY INFORMATION:

I. History: Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable FMVSS shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable FMVSS.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

II. Summary of Petition: Wallace Environmental Testing Laboratories (WETL), of Houston, Texas (Registered Importer R–90–005) has petitioned NHTSA to decide whether nonconforming MY 2016 Mercedes-Benz GL500 MPVs are eligible for importation into the United States. The vehicles which WETL believes are substantially similar are MY 2016 Mercedes-Benz GL550 MPV sold in the United States and certified by their manufacturer as conforming to all applicable FMVSS.

The petitioner claims that it compared non-U.S.-certified MY 2016 Mercedes-Benz GL500 MPVs to their U.S.-certified counterparts, and found the vehicles to be substantially similar with respect to compliance with most FMVSS.

The petitioner submitted information with its petition intended to demonstrate that the subject non-U.S.-certified vehicles, as originally manufactured, conform to many applicable FMVSS in the same manner as their U.S.-certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that the non-U.S.-certified MY 2016 Mercedes-Benz GL500 MPVs, as originally manufactured, conforms to: Standard Nos. 102 *Transmission Shift Position Sequence, Starter Interlock, and Transmission Braking Effect,* 103 *Windshield Defrosting and Defogging Systems,* 104 *Windshield Wiping and Washing Systems,* 106 *Brake Hoses, 110 Tire Selection and Rims and Motor Home/Recreation Vehicle Trailer Load Carrying Capacity Information for Motor Vehicles with a GVWR of 4,536 kilograms (10,000 pounds) or Less,* 113 *Hood Latch System,* 116 *Motor Vehicle Brake Fluids,* 118 *Power-Operated Window, Partition, and Roof Panel Systems,* 124 *Accelerator Control Systems,* 126 *Electronic Stability Control Systems for Light Vehicles,* 135 *Light Vehicle Brake Systems,* 138 *Tire Pressure Monitoring Systems,* 201 *Occupant Protection in Interior Impact,* 202a *Head Restraints; Mandatory Applicability Begins on September 1, 2009,* 203 *Impact Protection for the Driver from the Steering Control System,* 204 *Steering Control Rearward Displacement,* 205 *Glazing Materials,* 206 *Door Locks and Door Retention Components,* 207 *Seating Systems,* 209 *Seat Belt Assemblies,* 210 *Seat Belt Assembly Anchorages,* 212 *Windshield Mounting,* 214 *Side Impact Protection,* 216 *Roof Crush Resistance, Applicable unless a Vehicle is Certified to § 571.216a,* 219 *Windshield Zone Intrusion,* 225 *Child Restraint Anchorage Systems,* 301 *Fuel System Integrity,* and 302 *Flammability of Interior Materials.*

The petitioner also contends that the subject non-U.S.-certified MPVs are capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays:* The brake warning telltale must be modified to show the word ''BRAKE'' when activated.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment:* The headlamps and front side marker lamps must be removed and replaced with conforming lamps.

Standard No. 111 *Rearview Mirrors:* The passenger side mirror must be replaced with a U.S.-model that includes the required warning label.

Standard No. 114 *Theft Protection and Rollaway Prevention:* Installation of the U.S.-model anti-theft system to activate the key warning, audible alarm.

Standard No. 208 *Occupant Crash Protection:* Inspection to ascertain if the software and firmware installed in the vehicle are the same as the most up-to-date versions installed in the U.S.-conforming version of the vehicle. Replacement of any software or

firmware found not to be the most recent version.

The petitioner further states that labels will be affixed to conform the vehicle to the requirements of 49 CFR parts 565 and 567, VIN *Content* and *Certification,* respectively.

III. Comments: All comments and supporting materials received before the close of business on the closing date indicated above will be filed in the docket and considered. Comments filed after the closing date will also be considered to the fullest extent possible and available for examination in the docket at the above **ADDRESSES**.

Once the petition is granted or denied, notice of the decision will be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

This notice of receipt of the subject petition does not represent any agency decision or other exercise of judgment concerning the merits of the petition. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A), (a)(1)(B), and (b)(1); 49 CFR 593.7; delegation of authority at 49 CFR 1.95 and 501.8.

Michael A. Cole,

Acting Director, Office of Vehicle Safety Compliance.

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Actions

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: See **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: *OFAC:* Associate Director for Global Targeting, tel.: 202–622–2420; Assistant Director for Licensing, tel.: 202–622–2480; Assistant Director for Sanctions Compliance & Evaluation, tel.: 202–622–2490; Assistant Director for Regulatory Affairs, tel. 202–622–4855; or the Department of the Treasury's Office of the General Counsel: Office of the Chief Counsel (Foreign Assets Control), tel.: 202–622–2410.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The Specially Designated Nationals and Blocked Persons List and additional information concerning OFAC sanctions programs are available on OFAC's website (*http://www.treasury.gov/ofac*).

Notice of OFAC Actions

On November 20, 2018, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authorities listed below.

Individuals

1. ALCHWIKI, Mhd Amer (a.k.a. AL CHWIKI, Mohamad Amer Mohamad Akram; a.k.a. ALCHWIKI, Amer; a.k.a. ALCHWIKI, Amer Mhd; a.k.a. ALCHWIKI, Mohamad Amer; a.k.a. DEPARTMENT OF THE TREASURY

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Multiple IRS Information Collection Requests

AGENCY: Departmental Offices, U.S. Department of the Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury will submit the following information collection requests to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The public is invited to submit comments on these requests.

DATES: Comments should be received on or before December 31, 2018 to be assured of consideration.

ADDRESSES: Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to (1) Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Treasury, New Executive Office Building, Room 10235, Washington, DC 20503, or email at *OIRA_Submission@OMB.EOP.gov* and (2) Treasury PRA Clearance Officer, 1750 Pennsylvania Ave. NW, Suite 8142, Washington, DC 20220, or email at *PRA@treasury.gov.*

FOR FURTHER INFORMATION CONTACT: Copies of the submissions may be obtained from Jennifer Leonard by emailing *PRA@treasury.gov,* calling (202) 622–0489, or viewing the entire information collection request at *www.reginfo.gov.*

SUPPLEMENTARY INFORMATION:

Internal Revenue Service (IRS)

Title: Notice Concerning Fiduciary Relationship/Notice Concerning Fiduciary Relationship of Financial Institution.

OMB Control Number: 1545–0013.

Type of Review: Extension without change of a currently approved collection.

Description: Form 56 is used to inform the IRS that a person in acting for another person in a fiduciary capacity so that the IRS may mail tax notices to the fiduciary concerning the person for whom he/she is acting. The data is used to ensure that the fiduciary relationship is established or terminated and to mail or discontinue mailing designated tax notices to the fiduciary. The filing of Form 56–F by a fiduciary (FDIC or other federal agency acting as a receiver or conservator of a failed financial institution (bank or thrift) gives the IRS the necessary information to submit send letters, notices, and notices of tax liability to the federal fiduciary now in charge of the financial institution rather than sending the notice, etc. to the institution's last known address.

Form: 56, 56–F.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 25,000.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 173,944.

Estimated Time per Response: 2.01 hours.

Estimated Total Annual Burden Hours: 349,786.

Title: Annual Summary and Transmittal of U.S. Information Returns.

OMB Control Number: 1545–0108.

Type of Review: Extension without change of a currently approved collection.

Description: Sections 408(i), 6041 through 6045, 6047, 6049, 6050A, 6050B, 6050D, 6050E, 6050H, 6050J, 6050N, and 6050P of the Internal Revenue Code (IRC), provide for the filing of information returns to report the payment of certain types of income, mortgage interest, and IRA contributions. Regulation section 1.6041–1(a)(2) provides that the transmittal of paper Form 1097, 1098, 1098–F, 1099, 1099–LS, 1099–SB, 3921, 3922, 5498, and W–2G shall be made with Form 1096, Annual Summary and Transmittal of U.S. Information Returns.

Form: 1096.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 5,640,300.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 5,640,300.

Estimated Time per Response: .23 hours.

Estimated Total Annual Burden Hours: 1,297,269.

Title: Certain Government Payments.

OMB Control Number: 1545–0120.

Type of Review: Extension without change of a currently approved collection.

Description: Form 1099–G is used by governments (primarily state and local) to report to the IRS (and notify recipients of) certain payments (*e.g.,* unemployment compensation and income tax refunds). IRS uses the information to insure that the income is being properly reported by the recipients on their returns.

Form: 1099–G.

Affected Public: State, Local, and Tribal Governments.

Estimated Number of Respondents: 1,900.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 82,364,600.

Estimated Time per Response: .30 hours.

Estimated Total Annual Burden Hours: 24,709,380.

Title: Form W–2G—Certain Gambling Winnings.

OMB Control Number: 1545–0238.

Type of Review: Revision of a currently approved collection.

Description: Section 6041 of the Internal Revenue Code requires payers of certain gambling winnings to report them to IRS. If applicable, section 3402(g) and section 3406 require tax withholding on these winnings. We use the information to ensure taxpayers' reporting compliance.

Form: W–2G, W–2.

Affected Public: Individuals or Households.

Estimated Number of Respondents: 15,349,567.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 15,349,567.

Estimated Time per Response: .41 hours.

Estimated Total Annual Burden Hours: 6,293,323.

Title: Returns Required on Magnetic Media.

OMB Control Number: 1545–0957.

Type of Review: Extension without change of a currently approved collection.

Description: Certain filers of information returns are required by law to file on magnetic media. In some instances, waivers from this requirement are necessary and justified. Form 8508 is submitted by the filer and provides information on which IRS will base its waiver determination.

Form: 8508.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 1,000.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 1,000.

Estimated Time per Response: Time per response.

Estimated Total Annual Burden Hours: 750.

Title: Form 1099–S—Proceeds From Real Estate Transactions.

OMB Control Number: 1545–0997.

Type of Review: Extension without change of a currently approved collection.

Description: Form 1099–S is used by the real estate reporting person to report proceeds from a real estate transaction to the IRS.

Form: 1099–S.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 75,000.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 2,573,400.

Estimated Time per Response: .16 hours.

Estimated Total Annual Burden Hours: 411,744.

Title: Form 8693—Low-Income Housing Credit Disposition Bond or Treasury Direct Account Application.

OMB Control Number: 1545–1029.

Type of Review: Extension without change of a currently approved collection.

Description: Form 8693 is needed per IRC section 42(j)(6) to post bond or establish a Treasury Direct Account and waive the recapture requirements under section 42(j) for certain disposition of a building on which the low-income housing credit was claimed. Internal Revenue regulations section 301.7101–1 requires that the posting of a bond must be done on the appropriate form as determined by the Internal Revenue Service.

Form: 8693.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 1,000.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 667.

Estimated Time per Response: 5.38 hours.

Estimated Total Annual Burden Hours: 3,589.

Title: TD 8316 Cooperative Housing Corporations.

OMB Control Number: 1545–1041.

Type of Review: Extension without change of a currently approved collection.

Description: This document contains previously approved amendments to the Income Tax Regulations under section 216 of the Internal Revenue Code of 1986, relating to cooperative housing corporations. Section 216 of the Code was amended by the Tax Reform Act of 1986. The regulations provide cooperative housing corporations and tenant-stockholders with guidance needed to comply with the law.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 2,500.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 2,500.

Estimated Time per Response: .5 hours.

Estimated Total Annual Burden Hours: 1,250.

Title: Notice of Plan Merger or Consolidation, Spinoff, or Transfer of Plan Assets or Liabilities; Notice of Qualified Separate Lines of Business.

OMB Control Number: 1545–1225.

Type of Review: Revision of a currently approved collection.

Description: Plan administrators are required to notify IRS of any plan mergers, consolidations, spinoffs, or transfers of plan assets or liabilities to another plan. Employers are required to notify IRS of separate lines of business for their deferred compensation plans. Form 5310–A is used to make these notifications.

Form: 5310–A.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 694.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 694.

Estimated Time per Response: 10.59 hours.

Estimated Total Annual Burden Hours: 7,347.

Title: Tax Treatment of Salvage and Reinsurance.

OMB Control Number: 1545–1227.

Type of Review: Extension without change of a currently approved collection.

Description: The regulation provides a disclosure requirement for an insurance company that increases losses shown on its annual statement by the amount of estimated salvage recoverable taken into account.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 2,500.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 2,500.

Estimated Time per Response: 2 hours.

Estimated Total Annual Burden Hours: 5,000.

Title: TD 8825 (Final)—Regulations Under Section 382 of the Internal Revenue Code of 1986; Application of Section 382 in Short Taxable Years and With Respect to Controlled Groups.

OMB Control Number: 1545–1434.

Type of Review: Extension without change of a currently approved collection.

Description: Section 382 limits the amount of income that can be offset by loss carryovers after an ownership change. These previously approved regulations provide rules for applying section 382 in the case of short taxable years and with respect to controlled groups.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 3,500.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 3,500.

Estimated Time per Response: .25 hours.

Estimated Total Annual Burden Hours: 875.

Title: Requirements Respecting the Adoption or Change of Accounting Method, Extensions of Time to Make Elections.

OMB Control Number: 1545–1488.

Type of Review: Extension without change of a currently approved collection.

Description: This document contains previously approved final regulations providing the procedures for requesting an extension of time to make certain elections under the Internal Revenue Code. In addition, the regulations provide the standards that the Commissioner will use in determining whether to grant taxpayers extensions of time to make certain elections including changes in accounting method and accounting period.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 500.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 500.

Estimated Time per Response: 10 hours.

Estimated Total Annual Burden Hours: 5,000.

Title: Form 8850—Pre-Screening Notice and Certification Request for the Work Opportunity and Welfare-to-Work Credits.

OMB Control Number: 1545–1500.

Type of Review: Extension without change of a currently approved collection.

Description: Employers use Form 8850 as part of a written request to a state employment security agency to certify an employee as a member of a targeted group for purposes of qualifying for the work opportunity credit. The work opportunity credit covers individuals who begin work for the employer before July 1, 1999.

Form: 8850.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 440,000.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 440,000.

Estimated Time per Response: 7.37 hours.

Estimated Total Annual Burden Hours: 3,242,800.

Title: Long-Term Care and Accelerated Death Benefits.

OMB Control Number: 1545–1519.

Type of Review: Revision of a currently approved collection.

Description: Under the terms of IRC sections 7702B and 101g, qualified long-term care and accelerated death benefits paid to chronically ill individuals are treated as amounts received for expenses incurred for medical care. Amounts received on a per diem basis in excess of $175 per day are taxable. Section 6050Q requires all such amounts to be reported. Form 1099–LTC is used if any long-term care benefits, including accelerated death benefits are paid. Payers include insurance companies, governmental units, and viatical settlement providers.

Form: 1099 LTC.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 3,000.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 377,467.

Estimated Time per Response: .23 hours.

Estimated Total Annual Burden Hours: 88,818.

Title: REG–209823–96 (TD 8791)—Guidance Regarding Charitable Remainder Trusts and Special Valuation Rules for Transfer of Interests in Trusts.

OMB Control Number: 1545–1536.

Type of Review: Extension without change of a currently approved collection.

Description: A charitable remainder trust provides for a specified periodic distribution to one or more beneficiaries for life or for a term of years with an irrevocable remainder interest held for the benefit of charity. A contribution to a charitable remainder trust generally qualifies for a charitable deduction. Regulation REG–209823–96 provides an alternative method and guidance, allowing a taxpayer to use a current qualified appraisal (as defined in § 1.170A–13(c)(3)) from a qualified appraiser (as defined in § 1.170A–13(c)(5)) for valuing a trust's difficult-to-value assets, which may reduce cost to taxpayer and offer be less burdensome. Likely respondents are business or other for profits.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 150.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 150.

Estimated Time per Response: .5 hours.

Estimated Total Annual Burden Hours: 75.

Title: Rev. Proc. 99–17—Mark to Market Election for Commodities Dealers and Securities and Commodities Traders.

OMB Control Number: 1545–1641.

Type of Review: Extension without change of a currently approved collection.

Description: The revenue procedure prescribes the time and manner for dealers in commodities and traders in securities or commodities to elect to use the mark-to-market method of accounting under Sec. 475(e) or (f) of the Internal Revenue Code. The collections of information of this revenue procedure are required by the IRS in order to facilitate monitoring taxpayers changing accounting methods resulting from making the elections under Sec. 475(e) or (f).

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 1,000.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 1,000.

Estimated Time per Response: .5 hours.

Estimated Total Annual Burden Hours: 500.

Title: Form 8717 and 8717–A—User Fee for Employee Plan Determination Letter Request.

OMB Control Number: 1545–1772.

Type of Review: Revision of a currently approved collection.

Description: The Omnibus Reconciliation Act of 1990 requires payment of a ''user fee'' with each application for a determination letter. Because of this requirement, the Form 8717 was created to provide filers the means to make payment and indicate the type of request.

Form: 8717, 8717–A.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 40,000.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 40,000.

Estimated Time per Response: 11.23 hours.

Estimated Total Annual Burden Hours: 449,340.

Title: User Fee for Exempt Organization Determination Letter Request.

OMB Control Number: 1545–1798.

Type of Review: Extension without change of a currently approved collection.

Description: Section 7528 of the Code directs the Secretary of the Treasury or delegate (the ''Secretary'') to establish a program requiring the payment of user fees for requests to the Service for letter rulings, opinion letters, determination letters, and similar requests. Form 8718, User Fee for Exempt Organization Determination Letter Request, was created as a result of The Omnibus Reconciliation Act of 1990 which requires payment of a ''user fee'' with each application for a determination letter. Form 8718 provides filers with the means to enclose their user fee payment and indicate what type of request they are making.

Form: 8718.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 14,376.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 14,376.

Estimated Time per Response: .05 hours.

Estimated Total Annual Burden Hours: 719.

Title: Interest Rates and Appropriate Foreign Loss Payment Patterns For Determining the Qualified Insurance Income of Certain Controlled Corporations under Section 954(f).

OMB Control Number: 1545–1799.

Type of Review: Extension without change of a currently approved collection.

Description: This notice provide guidance on how to determine the foreign loss payment patterns of a foreign insurance company owned by U.S. shareholder for purposes of determining the amount of investment income earned by the insurance company that is not treated as Subpart F income under section 954(i).

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 300.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 300.

Estimated Time per Response: 1 hour.

Estimated Total Annual Burden Hours: 300.

Title: Repayment of a Federal Government Buyout and Possible Suspension of Severance Pay.

OMB Control Number: 1545–1920.

Type of Review: Extension without change of a currently approved collection.

Description: Form 12311 outlines the regulations requiring those employees being rehired by the government and received a buyout from their previous job to make repayment of the buyout before they will be hired again.

Form: 12311.

Affected Public: Individuals or Households.

Estimated Number of Respondents: 6,624.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 6,624.

Estimated Time per Response: .08 hours.

Estimated Total Annual Burden Hours: 530.

Title: TD 9360 (Final)—Guidance on Passive Foreign Company (PFIC) Purging Elections.

OMB Control Number: 1545–1965.

Type of Review: Extension without change of a currently approved collection.

Description: The IRS needs the information to substantiate the taxpayer's computation of the taxpayer's share of the PFIC's post-1986 earning and profits.

Form: None.

Affected Public: Individuals or Households.

Estimated Number of Respondents: 250.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 250.

Estimated Time per Response: 1 hour.

Estimated Total Annual Burden Hours: 250.

Title: Form 8932—Credit for Employer Differential Wage Payments.

OMB Control Number: 1545–2126.

Type of Review: Extension without change of a currently approved collection.

Description: Qualified employers will file Form 8932 to claim the credit for qualified differential wage payments paid to qualified employees after June 17, 2008, and before January 1, 2010. Authorized under I.R.C. section 45P.

Form: 8932.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 21,100.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 21,100.

Estimated Time per Response: 2.96 hours.

Estimated Total Annual Burden Hours: 62,456.

Title: Form 5884–C—Work Opportunity Credit for Qualified Tax-Exempt Organizations Hiring Qualified Veterans.

OMB Control Number: 1545–2226.

Type of Review: Extension without change of a currently approved collection.

Description: Form 5884–C, Work Opportunity Credit for Qualified Tax-

Exempt Organizations Hiring Qualified Veterans, was developed as a result of VOW to Hire Heroes Act of 2011, Public Law 112–56. Section 261 of Public Law 112–56 expanded the Work Opportunity Credit to tax-exempt organizations that hire unemployed veterans. The tax credit is a reduction in payroll taxes paid by the tax-exempt organization. Form 5884–C allows a tax-exempt organization a way to claim the credit and provides the IRS the information to process the tax credit.

Form: 5884–C.

Affected Public: Not-for-profit institutions.

Estimated Number of Respondents: 60,530.

Frequency of Response: Annually and On occasion.

Estimated Total Number of Annual Responses: 60,530.

Estimated Time per Response: 6.57 hours.

Estimated Total Annual Burden Hours: 397,683.

Title: Form 8957—Foreign Account Tax Compliance Act (FATCA) Registration, Form 8966—FATCA Report, 8966–C, Cover Sheet for Form 8966 Paper Submissions, Form 8809–I—Application for Extension of Time to File.

OMB Control Number: 1545–2246.

Type of Review: Revision of a currently approved collection.

Description: Form 8957 is to be used by a foreign financial institution to apply for status as a foreign financial institution as defined in IRC 1471(b)(2). Form 8966 is for reporting purposes and is to be filed by foreign financial institutions to report foreign reportable amounts paid to their current account holders that are nonparticipating FFIs. Form 8966 is further to be filed by a withholding agent to report US owners of certain foreign entities regarding withhold-able payments made to these entities. Form 8809–I is an application for an extension of time to file Form 8966. Form 8508–I is a request for a waiver from filing Form 8966 electronically. Form 8966–C is a cover sheet for those submitting a paper version of Form 8966.

Form: 8957, 8966, 8966–C, 8809–I, 8508 I.

Affected Public: Businesses or other for profits.

Estimated Number of Respondents: 5,561,180.

Frequency of Response: Annually.

Estimated Total Number of Annual Responses: 5,561,180.

Estimated Time per Response: Form 8957: 8.14 hours; Form 8966: .42 hours; Form 8966–C: .12 hours; Form 8809–I: 3.36 hours; Form 8508 I: 4.29 hours.

Estimated Total Annual Burden Hours: 2,912,282 hours.

Authority: 44 U.S.C. 3501 *et seq.*

Dated: November 27, 2018.

Updated Disclosure Requirements and Summary Prospectus for Variable Annuity and Variable Life Insurance Contracts

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule.

SUMMARY: The Securities and Exchange Commission is proposing rule and form amendments that are intended to help investors make informed investment decisions regarding variable annuity and variable life insurance contracts. The proposal would modernize disclosures by using a layered disclosure approach designed to provide investors with key information relating to the contract's terms, benefits, and risks in a concise and more reader-friendly presentation, with access to more detailed information available online and electronically or in paper format on request. The proposed new rule would permit a person to satisfy its prospectus delivery obligations under the Securities Act of 1933 for a variable annuity or variable life insurance contract by sending or giving a summary prospectus to investors and making the statutory prospectus available online. The proposed rule also would consider a person to have met its prospectus delivery obligations for any portfolio companies associated with a variable annuity or variable life insurance contract if the portfolio company prospectuses are posted online. In addition, we are proposing amendments to the registration forms for variable annuity and variable life insurance contracts to update and enhance the disclosures to investors in these contracts, and to implement the proposed summary prospectus framework. We are further proposing to require variable contracts to use the Inline eXtensible Business Reporting Language (''Inline XBRL'') format for the submission of certain required disclosures in the variable contract statutory prospectus. We are also proposing certain technical and conforming amendments to our rules and forms, including amendments to rules relating to variable life insurance contracts, as well as rescission of certain related rules and forms. Lastly, we are seeking comments regarding parallel amendments to rules governing mutual fund summary prospectuses and registration forms applicable to other types of registered investment companies.

DATES: Comments should be submitted on or before February 15, 2019.

ADDRESSES: Comments may be submitted by any of the following methods:

Electronic Comments

- Send an email to *rule-comments@sec.gov.* Please include File No. S7–23–18 on the subject line.

Paper Comments

- Send paper comments to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number S7–23–18. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's website (*http://www.sec.gov/rules/proposed.shtml*). Comments are also available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Room 1580, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information you wish to make available publicly. Investors wishing to provide comments regarding the proposed summary prospectus may wish to submit our Feedback Flier, available at Appendix C.

Studies, memoranda, or other substantive items may be added by the Commission or staff to the comment file during this rulemaking. A notification of the inclusion in the comment file of any such materials will be made available on the Commission's website. To ensure direct electronic receipt of such notifications, sign up through the ''Stay Connected'' option at *www.sec.gov* to receive notifications by email.

FOR FURTHER INFORMATION CONTACT: Daniel K. Chang, James Maclean, Amy Miller, Senior Counsels; Amanda Hollander Wagner, Branch Chief; Michael C. Pawluk, Senior Special Counsel, Investment Company Regulation Office, at (202) 551–6792; Keith Carpenter or Michael Kosoff, Senior Special Counsels, Disclosure and Review Office, at (202) 551–6921, Division of Investment Management, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–8549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission (''Commission'') is proposing new rule 498A [proposed rule 17 CFR 230.498A] under the Securities Act. The Commission is also proposing amendments to the following rules:

Commission reference	CFR citation (17 CFR)
Regulation S–T [17 CFR 232.10 through 232.903]:	
Rule 11	§ 232.11.
Rule 405	§ 232.405.
Securities Act of 1933 (''Securities Act''): [1]	
Rule 159A	§ 230.159A.
Rule 421	§ 230.421.
Rule 431	§ 230.431.
Rule 482	§ 230.482.
Rule 485	§ 230.485.
Rule 497	§ 230.497.
Rule 498	§ 230.498.

Form N–27I–2	§ 274.303.
Securities Act and Investment Company Act:	
Form N–1	§ 239.15 and 274.11.

Table of Contents

I. Introduction and Background

To meet life insurance needs and other financial goals, investors may consider variable annuity and variable life insurance contracts (together, ''variable contracts'' or ''contracts'') as a way of combining insurance guarantees with the potential for long-term investment appreciation.[4] Variable contracts are generally more complex than other retail investment products, such as mutual funds, in a variety of ways. These investment products combine both investment and insurance features. They frequently offer a menu of optional benefits that an investor may select to customize the contract to meet his or her individual needs. In addition, most have two-level fee structures, where fees are assessed at both the contract level by the issuer (including any additional charges for optional benefits selected by the investor) and at the underlying investment option level. Further transactional charges may also apply, some of which could be substantial, for example, in the case of withdrawals made from a contract prior to a specified number of years.[5] Special tax rules also apply to variable products, with both tax advantages and potential

[2] 15 U.S.C. 78a *et seq.*

[3] 15 U.S.C. 80a *et seq.*

[4] For an overview of variable annuities and variable life insurance contracts, *see infra* section I.A.

[5] A contract may impose a ''surrender charge'' if, after purchase payments are made, an investor withdraws money from the contract during a stated period typically ranging from six to ten (or even more) years.

adverse tax impacts in certain circumstances.[6]

Investors should understand the features, risks, and charges associated with any potential investment. Providing investors with key information is particularly important in the context of variable contracts, since their structure is typically more complex than other types of investment products. The operation and terminology associated with these products can be difficult for investors to understand. Moreover, variable contract prospectuses are often quite lengthy (frequently more than a hundred pages), particularly in the case of products that include optional benefits. It is also common for insurers to describe different versions of the contract in one prospectus, some of which may no longer be available to new investors, leaving investors to wade through a lengthy document to find disclosures relevant to the particular contract that they purchased or are considering purchasing.

In addition, variable contract investors generally allocate their purchase payments to a range of investment options. For most variable contracts, these investment options typically are mutual funds, which are separately registered and have their own prospectuses.[7] Because insurers issuing variable contracts typically bundle prospectuses for the underlying portfolio companies together with the variable contract prospectus, the disclosures that investors receive at the time of the initial purchase and on an annual basis thereafter can be voluminous.[8]

We are concerned that the volume, format, and content of disclosures in the variable contract context may make it difficult for some investors to find and understand key information that they need to make an informed investment decision. To improve the current disclosure framework and update the manner in which variable contract investors receive and review prospectuses and related information, we are proposing new rule 498A under the Securities Act that permits the use of a summary prospectus to satisfy statutory prospectus delivery obligations, along with other rule and form amendments intended to implement the summary prospectus framework. Investors would continue to have access to the contract statutory prospectus and other information about the contract online (and could receive paper or electronic copies upon request), which would continue to provide more-detailed information about the contract.

Specifically, the approach under the proposed new rule contemplates the use of two types of summary prospectuses: An ''initial summary prospectus'' to be provided to new investors, and an ''updating summary prospectus'' to be provided to existing investors. To help investors make an informed investment decision, each type of summary prospectus uses a layered disclosure approach designed to provide investors with key information relating to the contract's terms, benefits, and risks in a concise and more reader-friendly presentation, with website addresses or hyperlinks to more detailed information posted online and delivered electronically or in paper format on request. In proposing new rule 498A, we are considering approaches that could affect, and raise the possibility of future amendments to, certain parallel provisions of rule 498 and certain of our registration forms applicable to other types of registered investment companies.

A. Overview of Variable Annuities and Variable Life Insurance Products

Variable contracts are contracts between an investor and an insurance company that provide investors with exposure to the securities markets while also offering certain insurance protections, such as protection against market losses, protection against outliving their assets, or assurances that their beneficiaries will receive a certain amount upon death.[9] Unlike traditional annuities and life insurance contracts, variable contracts have an investment component that allows investors the possibility of increasing their potential benefits.[10] Variable contracts also offer tax benefits such as tax-deferral on investment earnings until distribution. This combination of insurance guarantees and tax-deferred investment may be appealing to investors.

When an investor purchases a variable contract, he or she makes a purchase payment (in either a lump sum or a series of payments), and in return, the insurance company promises to pay a stream of periodic income payments, either immediately or at some future date. Variable annuities allow investors to receive periodic payments for either a definite period (*e.g.,* 20 years), or for an indefinite period (*e.g.,* the life of the investor), and also provide a basic death benefit to protect the investor's beneficiaries. The investor may allocate the cash value of the purchase payments to a range of investment options available under the contract, including to portfolio companies and, in some cases, to a fixed account option that pays a fixed or minimum rate of interest. The investor's account value changes depending on the performance of the investment options the investor has selected.

Similar to variable annuities, variable life insurance contracts offer a death benefit to the investor, as well as the ability to accumulate cash value.[11] Also

---

6 For example, assets within a variable contract grow tax-deferred, and transfers between investment options under the contract are not taxable events. However, investors may face a 10% federal income tax penalty if money is withdrawn before the investor reaches 59½ years old. For these and other reasons, a variable contract generally is sold as a long-term investment.

7 For purposes of this release, we refer to these entities as ''portfolio companies.''

8 For example, variable annuity contracts offer an average of 59 investment options, with some contracts offering more than 250 investment options. *See* Insured Retirement Institute, *IRI Fact Book 2018* (''IRI Fact Book''), at 170. Furthermore, variable life insurance contracts offer an average of 64 investment options, with some contracts offering more than 300 investment options. These variable life figures are based on June 2018 data obtained from Morningstar Direct.

9 The average contract value for individual variable annuities is approximately $106,187. *See* IRI Fact Book, *supra* note 8, at 170. Americans who own annuities have a median annual household income of $64,000 (80% have total annual household incomes below $100,000). Most individual annuity owners are retired. Although the average age of an annuity owner is 70, the average age at which owners purchased their first annuity is 51. *See* The Gallup Organization and Mathew Greenwald & Associates for The Committee of Annuity Insurers, *Survey of Owners of Individual Annuity Contracts* (2013) (''Gallup Survey''), at 8–9. There is limited data available regarding variable life insurance contracts, but based upon the data that is available, the Commission believes that the demographics of investors for those products are likely comparable.

10 Variable contracts generally are treated as annuity or insurance contracts under state insurance laws and securities under the federal securities laws. Although section 3(a)(8) of the Securities Act exempts from the Act any insurance or endowment policy or annuity contract issued by a corporation subject to the supervision of the insurance commissioner of any State or Territory of the United States or the District of Columbia, we have determined, and the courts have held, that variable annuities are securities under the federal securities laws and are not, therefore, entitled to this exemption. *See, e.g., SEC* v. *Variable Annuity Life Ins. Co. of Am.,* 359 U.S. 65 (1959) (variable annuity contracts are securities, and not insurance policies or annuity contracts within the meaning of the Act's exemption because the issuer of a variable annuity contract has no element of fixed return and does not assume any investment risk, which is inherent in the concepts of insurance and annuity contracts); *see also* Adoption of Rule 3c–4 Under the Investment Company Act of 1940, Investment Company Act Release No. 7644, 1 SEC Docket 17 (Jan. 31, 1973) (because the contract holder participates directly in the investment experience of the separate account and bears an investment risk, a variable life insurance contract is a security, not entitled to the exemption set forth in section 3(a)(8) of the Securities Act).

11 Unlike other types of life insurance, variable life insurance exposes the investor to greater market risk (the cash value can decrease), but also offers

like variable annuities, a variable life insurance contract permits the investor to allocate insurance premiums to a variety of portfolio companies, and may also offer a fixed account investment option. Because an investor will generally allocate the insurance premiums to portfolio companies, the cash value (and in some cases, the death benefit [12]) will vary with the performance of these investments.

Investors bear a number of ongoing fees, expenses, and other charges when investing in a variable contract, including mortality and expense risk charges,[13] administrative fees, fees for optional benefits selected by the investor, and portfolio company fees and expenses.[14] Investors may also bear certain transaction-based charges, including surrender charges.[15] Variable life insurance contracts also impose an additional insurance charge to cover the cost of the death benefit.[16]

Variable contracts commonly offer optional benefit features as riders to the contract with their own terms and conditions. Riders commonly provide enhanced death benefits, as well as ''living benefits'' that may be designed to provide protection against investment losses or longevity risk, or to cover financial losses that result from illness, incapacity, or injury. These optional riders have become increasingly popular with variable contract investors.[17] Typically, there is a separate charge for each rider.

B. Prospectus Disclosure and Delivery

1. Requirements for Variable Contract Prospectus Disclosure and Delivery

The prospectus delivery requirements for variable contracts arise from the legal structure of these products. The ''separate account'' [18] established by the sponsoring insurance company is the legal entity that registers its securities. The separate account is an account that is owned by the insurance company.[19] Separate accounts are typically registered as investment companies under the Investment Company Act [20] and also register their securities under the Securities Act by filing a registration statement with the Commission.

Separate accounts may be organized either as management companies [21] or unit investment trusts (''UITs'').[22] Variable annuity separate accounts that are management companies file registration statements on Form N–3,[23] while those that are UITs file registration statements on Form N–4. Most variable annuity contracts sold today are offered by Form N–4 registrants.[24] Variable life separate accounts, which also are typically organized as UITs, file registration statements on Form N–6.[25]

Form N–4 (variable annuity) and N–6 (variable life) registrants are sometimes referred to as ''two-tier'' investment company structures. The top tier, which is the separate account established by the insurer and registered with the Commission as a UIT, is itself divided into ''subaccounts,'' each of which invests in the shares of an underlying portfolio company (*e.g.,* a mutual fund or exchange-traded fund (''ETF'')) that serves as an investment option under the variable contract. In this structure, the insurer's separate account, not the variable contract investor, is the legal owner of the underlying fund shares.[26]

Section 5(b)(2) of the Securities Act makes it unlawful to carry or cause to be carried a security for purposes of sale or for delivery after sale ''unless accompanied or preceded'' by a prospectus that meets the requirements of section 10(a) of the Act.[27] For purposes of section 5 of the Securities Act, each additional purchase payment under a variable contract is considered a ''sale'' requiring delivery of a current prospectus.[28]

---

the potential for long-term returns that can grow the cash value. An investor may access the cash value of his or her contract by taking out loans (or withdrawals), which may be subject to surrender charges and are taxable under certain circumstances. Taking a loan or withdrawal reduces the policy's cash value and death benefit, and may require additional premium payments to keep the policy in force.

[12] The death benefit can vary based on optional benefit features that the contract investor selects. *See infra* paragraph accompanying note 17.

[13] The mortality and expense (''M&E'') risk charge, which is based on an investor's account value, compensates the insurance company for offering certain contract features (*e.g.,* death benefit or annuitization) and is sometimes used to pay the insurance company's costs to sell the contract (*e.g.,* commissions). Typical M&E charges are approximately 1.25% of account value per year for variable annuities, and 0.90% for variable life insurance. *See* IRI Fact Book, *supra* note 8, at 55.

[14] Investors indirectly bear the operating fees and expenses of the portfolio companies they select as the underlying investments in their variable contracts.

[15] *See supra* note 5.

[16] These additional insurance charges are determined at the time of the contract is written and vary based on the insured's personal characteristics, such as age and health. These charges are in addition to the M&E risk charge discussed above. *See supra* note 13.

[17] *See, e.g.,* IRI Fact Book, *supra* note 8, at 83 (''Just under $2 trillion of VA assets were held by insurance companies as of the fourth quarter of 2017, with an estimated $800 billion having a living benefit.''); Gallup Survey, *supra* note 9, at 21 (stating that ''[n]early eight in ten annuity owners (79%) who own a variable annuity report that their contract has a guaranteed lifetime withdrawal benefit.'').

[18] *See* section 2(a)(37) of the Investment Company Act (defining ''separate account'' to mean an account established and maintained by an insurance company pursuant to state law under which income, gains and losses from assets allocated to that account are credited against the account without regard to other income, gains or losses of the insurance company). In addition to directing all or part of their purchase payments to the investment options (typically mutual funds) available under the separate account, investors may also direct their purchase payments to a fixed account that pays a fixed, or minimum, rate of interest. The fixed account is part of the insurance company's general account, which, unlike the separate account, is subject to the insurance company's claims-paying ability and creditor reach.

[19] The assets of the separate account are segregated from the other assets of the insurance company (such as the insurance company's general account) and are therefore insulated from the claims of the insurance company's creditors. *See* rule 26a–2 under the Investment Company Act (providing exemptions from certain provisions of the Act to permit the insurance company that sponsors a separate account to hold the assets of the separate account).

[20] In general, an insurance company's separate account is an investment company under the Investment Company Act. *See Prudential Ins. Co.* v. *SEC,* 326 F.2d 383, 388 (3d Cir. 1964) (concluding that the insurer's separate account, which was a completely segregated account devoted to investing in securities, the cash for which was derived from payments made by the purchaser of the variable annuity contract, and the proceeds from which were held for the sole benefit of the annuitant, was separable from the insurance company and should be deemed the ''investment company'' for purposes of the Act). Not all variable contract separate accounts are investment companies; exclusions may apply to certain separate accounts that rely, for example, on sections 3(c)(1), (7), or (11) of the Investment Company Act.

[21] *See* section 4(3) of the Investment Company Act (defining ''management company'' to mean any investment company other than a face-amount certificate company or a unit investment trust).

[22] *See* section 4(2) of the Investment Company Act (defining ''unit investment trust'' to include an investment company that is organized under a trust indenture, does not have a board of directors, and only issues redeemable securities, each of which represents an undivided interest in a unit of specified securities).

[23] Form N–3 filers register as management investment companies because the active management of the investment portfolio occurs at the separate account level. During the early years of variable product history, this was the predominant type of separate account. However, by 2017, only five variable annuity separate accounts were registered as management investment companies on Form N–3.

[24] In 2017, 435 variable annuity separate accounts registered as UITs on Form N–4.

[25] In 2017, 238 variable life insurance separate accounts registered as UITs on Form N–6.

[26] Variable contract investors do not hold legal title to the assets of the insurance company's separate account. *See supra* note 19. However, certain legal rights, such as voting rights, generally pass through to variable contract investors.

[27] *See* section 10(a) of the Securities Act (generally requiring a prospectus relating to a security to contain the information contained in the registration statement). For purposes of this release, a prospectus meeting the requirements of a section 10(a) prospectus is referred to as a ''statutory prospectus.''

[28] *See* Registration Forms for Insurance Company Separate Accounts that Offer Variable Annuity Contracts, Investment Company Act Release No. 14575 (June 14, 1985) [50 FR 26145 (June 25, 1985)]

Continued

Variable contract issuers generally maintain current prospectuses for their products through the filing of annual post-effective amendments to their registration statement and, as necessary, supplementing or ''stickering'' the contract prospectus or statement of additional information (''SAI'').[29] Rather than bearing the expense of sending a prospectus with each confirmation of an investor's purchase of additional shares, which often occurs on a periodic basis (*e.g.,* monthly), most registrants instead send copies of the new prospectus to all investors each time it is updated. It is our understanding that this practice is similar to that followed by most mutual funds.

We understand that an insurer or the financial intermediary distributing the variable contact will typically deliver the variable contract prospectus upon issuance of the contract, in order to comply with the requirements of section 5(b)(2).[30] However, we also understand that many insurers make it a practice to provide the variable contract prospectus to potential investors, often as part of the application package.

The Commission has interpreted section 5(b)(2) of the Securities Act to require delivery of a portfolio company prospectus to an investor in a variable contract who has allocated his or her purchase payments to that portfolio company.[31] We understand that today most investors receive summary prospectuses (as opposed to statutory prospectuses) for the underlying portfolio companies at the same time they receive the statutory prospectus for the variable contract. Since variable contracts generally offer exchange privileges permitting an investor to reallocate all or a portion of his or her investment from one underlying portfolio company to another, many insurance companies deliver prospectuses for all underlying portfolio companies to simplify the administrative task of tracking whether it delivered the appropriate current prospectus. Other insurers have invested in systems that enable the insurer to customize the delivery of underlying portfolio company prospectuses such that investors only receive prospectuses for the portfolio companies to which they have allocated purchase payments.

Although paper is the default format for delivery of contract prospectuses, portfolio company prospectuses, and certain other required disclosures, we understand that most insurers offer investors the option to elect electronic delivery of these documents. The Commission has provided guidance noting that electronic delivery may be used to satisfy prospectus delivery requirements if: (1) The investor has notice of the availability of the information; (2) the use of the medium is not so burdensome that intended recipients cannot effectively access the information being provided; and (3) the issuer has evidence of delivery.[32] Issuers relying on this guidance have typically satisfied the ''evidence of delivery'' requirement by obtaining informed consent to electronic delivery. Investors that have elected electronic delivery of materials associated with their variable contract typically receive an email that contains a link to the website where the materials are available.

2. Evolution of Layered Disclosure and Delivery of Information to Investors

Our proposal builds on our experience with both layered disclosure (under the mutual fund summary prospectus)[33] and integrated disclosure (enhanced over a decade ago with securities offering reform for corporate issuers).[34] It also draws on more than twenty years of experience with the use of the internet as a medium to provide information to investors.[35]

Through each of these sets of reforms, ''omitting prospectuses'' as permitted by section 10(b) of the Securities Act have become a central feature of various parts of our securities offering and disclosure regime.[36] In particular, our proposed approach for satisfying prospectus

(''Forms N–3 and N–4 Adopting Release'') at n.14 and accompanying text.

[29] In addition to updating the registration statement for the variable contract annually to include updated financial statements, variable contract issuers also make amendments to the contract registration statement (generally as part of this annual update process), as necessary to reflect material or other changes to the information disclosed. *See* section 10(a)(3) of the Securities Act (requiring, among other things, that a prospectus used more than nine months after the effective date of a registration statement be updated so that the information contained therein shall not be more than 16 months old). *But see infra* section II.C (discussing circumstances in which certain variable contract issuers provide alternative disclosures instead of the contract statutory prospectus, as described in certain staff no-action letters). *See also* section 11 of the Securities Act (providing a civil remedy for a registration statement that contains ''an untrue statement of a material fact or omits to state a material fact required to be stated therein or necessary to make the statements therein not misleading.''); rule 408 under the Securities Act [17 CFR 230.408(a)] (requiring registrants to include, in addition to the information expressly required to be included in a registration statement, such further material information, if any, as may be necessary to make the required statements, in the light of the circumstances under which they are made, not misleading.).

Additionally, portfolio companies may supplement or ''sticker'' their prospectus or SAI. *See generally* rule 497 under the Securities Act.

[30] Because the requirements of section 5(b)(2) of the Securities Act are applicable to ''any person,'' its obligations are applicable to financial intermediaries through whom variable contracts are sold, as well as variable contract issuers.

[31] *See* Forms N–3 and N–4 Adopting Release, *supra* note 28, at n.49 and accompanying text (''Of course, delivery of a prospectus of an underlying company in which a contractowner actually invests will be required pursuant to section 5(b)(2) under the 1933 Act (15 U.S.C. 77e(b)(2)).'').

[32] *See* Use of Electronic Media for Delivery Purposes, Investment Company Act Release No. 21399 (Oct. 6, 1995) [60 FR 53458 (Oct. 13, 1995)] (''1995 Release''); Use of Electronic Media by Broker-Dealers, Transfer Agents, and Investment Advisers for Delivery of Information; Additional Examples Under the Securities Act of 1933, Securities Exchange Act of 1934, and Investment Company Act of 1940, Investment Company Act Release No. 21945 (May 9, 1996) ([61 FR 24644 (May 15, 1996]) (''1996 Release''); Use of Electronic Media, Investment Company Act Release No. 24426 (Apr. 28, 2000) [65 FR 25843 (May 4, 2000)] (''2000 Release'').

[33] Enhanced Disclosure and New Prospectus Delivery Option for Registered Open-End Management Investment Companies, Investment Company Act Release No. 28584 (Jan. 13, 2009) [74 FR 4546 (Jan. 26, 2009)] (''2009 Summary Prospectus Adopting Release'') (permitting the use of a summary prospectus by registered open-end management investment companies).

[34] Securities Offering Reform, Securities Act Release No. 8591 (July 19, 2005) [70 FR 44722 (Aug. 3, 2005)] (''Securities Offering Reform'') at n.202 and accompanying text (allowing the use of free writing prospectuses to provide information to investors and stating that a free writing prospectus is a permitted prospectus for purposes of section 10(b) of the Securities Act and, as such, can be used without violating section 5(b)(1) of the Securities Act). Additionally, Congress recently required the Commission to extend securities offering reform to closed-end funds (*see* section 509 of the Economic Growth, Recovery Relief, and Consumer Protection Act, S. 2155, 115th Cong. (2017–2018)), and to business development companies (*see* section 3 of the Small Business Credit Availability Act, S. 2324, 115th Cong. (2017–2018)).

[35] *See, e.g.,* 1995 Release, *supra* note 32 (providing Commission views on the use of electronic media to deliver information to investors, with a focus on electronic delivery of prospectuses, annual reports, and proxy solicitation materials); 1996 Release, *supra* note 32 (providing Commission views on electronic delivery of required information by broker-dealers, transfer agents, and investment advisers); 2000 Release, *supra* note 32 (providing updated interpretive guidance on the use of electronic media to deliver documents on matters such as telephonic and global consent, issuer liability for website content, and legal principles that should be considered in conducting online offerings).

See also Securities Offering Reform, *supra* note 34 (adopting rule 172 under the Securities Act providing an ''access equals delivery'' framework under which issuers and intermediaries can satisfy their final prospectus delivery obligations); Shareholder Choice Regarding Proxy Materials, Investment Company Act Release No. 27911 (July 26, 2007) [72 FR 42222 (Aug. 1, 2007)] (''Shareholder Choice Regarding Proxy Materials'') (adopting rule amendments requiring issuers to post their proxy materials on a specified website and provide shareholders with a notice of internet availability of the materials).

[36] *See infra* note 93 and accompanying text (discussing omitting prospectuses as permitted by section 10(b) of the Securities Act).

delivery obligations for variable contract prospectuses is generally modeled on the Commission's mutual fund summary prospectus framework, with some modifications that reflect the unique structure, features, and risks of variable contracts. Likewise, our proposed approach for satisfying portfolio company prospectus delivery requirements incorporates aspects of the ''access equals delivery'' framework we adopted in 2005, in instances where certain information has already been provided to investors,[37] as well as certain website posting requirements from the mutual fund summary prospectus rule.

Our proposal also draws on the Commission's investor testing efforts, outreach, and other empirical research concerning investors' preferences. This included information about summary content and layered disclosure approaches as well as methods of delivery for required disclosures and use of the internet for financial and other purposes generally.[38] Most recently, the Commission released a request for comment on many of these same issues.[39] Certain comments that the Commission has received on its recent Form CRS Relationship Summary proposal[40] also reflect support for a disclosure regime that leverages the benefits of layered disclosure.[41]

Moreover, certain observations by the staff of the Commission's Office of Investor Education and Advocacy as part of its 2012 Financial Literacy Study show that investors generally favor a layered approach to disclosure and, wherever possible, the use of a summary containing key information about an investment product or service.[42] Investors may have a preference for certain efficiencies afforded by more concise information, as research shows the introduction of a shorter and simplified summary prospectus may allow investors to spend less time and effort to arrive at the same portfolio decision they would have come to after reading the statutory prospectus.[43] For these same reasons, we believe that variable contract investors would benefit from the summary disclosures and layered approach contemplated by our proposal, especially given the fact that variable contracts are typically more complex than other types of investment products, in part due to the two-tier structure that most use.

Based upon the foregoing, we believe that a summary prospectus framework for variable contracts would benefit investors. The mutual fund industry has widely adopted the use of summary prospectuses.[44] We believe our proposed prospectus delivery approach would be similarly widely adopted by issuers of variable contracts.[45]

C. Rulemaking Proposal Overview

We are proposing a new disclosure framework that, among other things, would permit the use of summary prospectuses for variable contracts, with additional information available to investors online. To help investors make an informed investment decision, this proposal uses a layered disclosure approach designed to provide investors with key information relating to the contract's terms, benefits, and risks in a concise and more reader-friendly presentation, with access to more detailed information available online, or delivered in paper or electronic format on request. We anticipate that the proposed framework would improve investor understanding of variable contracts.

The proposed rule builds upon our experience creating a summary prospectus option for mutual funds in 2009, but with certain differences intended to reflect the nature of variable contracts.[46] Like the Commission's mutual fund summary prospectus rule, the summary prospectus that the proposed rule contemplates is meant to highlight key information of variable contracts that we believe would help an

[37] Securities Offering Reform contemplated delivery of a preliminary prospectus to investors purchasing during an initial public offering, while our proposal would require delivery of variable contract summary prospectuses, which would accompany or precede delivery of the variable contract security and which would contain certain key information about portfolio companies. *See, e.g.,* Securities Offering Reform, *supra* note 34; *infra* notes 120 and 192 and accompanying text (outlining certain portfolio company information which would be disclosed in variable contract summary prospectuses).

[38] For example, in 2007, the Commission engaged a consultant to conduct focus group interviews and a telephone survey concerning investors' views and opinions about various disclosure documents filed by companies, including mutual funds. The consultant's report concerning the focus group testing and related transcripts are in the comment file for this rule (*available at https://www.sec.gov/comments/s7-08-15/s70815-1.pdf*). The consultant's report concerning the telephone survey is available at *http://www.sec.gov/pdf/disclosuredocs.pdf* (approximately 60% of investors believed mutual fund prospectuses contained too much information and 56% of investors who received mutual fund prospectuses but rarely, very rarely, or never read them indicated that was because the prospectuses were too complicated or hard to understand, or too long and too wordy).

In addition, in 2011, the Commission engaged a consultant to conduct investor testing regarding shareholder reports. The consultant's report concerning that testing (''Investor Testing of Mutual Fund Shareholder Reports'') is in the comment file for this rule (*available at https://www.sec.gov/comments/s7-08-15/s70815-3.pdf*). Separately, in 2012, Commission staff prepared a study of investor financial literacy pursuant to section 917 of the Dodd-Frank Act. *See* SEC Staff, Study Regarding Financial Literacy Among Investors (Aug. 2012) (''2012 Financial Literacy Study''). Materials relating to this study, including the staff's report, are available at *http://www.investor.gov/publications-research-studies/sec-research.*

[39] *See* Request for Comment on Fund Retail Investor Experience and Disclosure, Investment Company Act Release No. 33113 (June 5, 2018) [83 FR 26891 (June 11, 2018)] (''Request for Comment on Fund Retail Investor Experience''). The comment file for this request for comment is available at *https://www.sec.gov/comments/s7-12-18/s71218.htm.* Multiple comment letters that the Commission has received to date on this request for comment reflect a preference for shorter summary disclosures, with additional information available online or upon request. *See, e.g.,* Comment Letter of Carol Palmer, File No. S7–12–18 (June 5, 2018); Comment Letter of Perry Balke, File No. S7–12–18 (June 5, 2018); Comment Letter of Sara Karlidag, File No. S7–12–18 (June 6, 2018); Comment Letter of Harold Thomas, File No. S7–12–18 (June 8, 2018); Comment Letter of Carla Rojas, File No. S7–12–18 (June 9, 2018).

[40] *See* Form CRS Relationship Summary; Amendments to Form ADV; Required Disclosures in Retail Communications and Restrictions on the Use of Certain Names or Titles, Investment Advisers Act Release No. 4888 (Apr. 18, 2018) [83 FR 21416 (May 9, 2018)]. The comment file for this proposal is available at *https://www.sec.gov/comments/s7-08-18/s70818.htm.*

[41] *See, e.g.,* Comment Letter of the Insured Retirement Institute, File No. S7–08–18 (Aug. 7, 2018); Comment Letter of Massachusetts Mutual Life Insurance Company, File No. S7–08–18 (Aug. 7, 2018).

[42] *See* 2012 Financial Literacy Study, *supra* note 38, at v-xix. The key information that investors found useful and relevant before purchasing an investment product includes information on fees and expenses, investment performance, principal risks, and investment objectives. With respect to the presentation of disclosure, the 2012 Financial Literacy Study indicates that investors preferred disclosures being ''written in clear, concise, understandable language, using bullet points, tables, charts, and/or graphs.'' *See id.* at iv.

[43] *See* John Beshears et al., *How Does Simplified Disclosure Affect Individuals' Mutual Funds Choices?,* Explorations in the Economics of Aging, 75, 76 (David A. Wise ed., 2011) (''Beshears Paper''), *available at https://scholar.harvard.edu/laibson/publications/how-does-simplified-disclosure-affect-individuals-mutual-fund-choices.*

[44] We estimate that as of December 31, 2017, approximately 95% of mutual funds and ETFs use summary prospectuses. This estimate is based on EDGAR data for the number of mutual funds and ETFs that filed a summary prospectus in 2017 (10,686) and the Investment Company Institute's estimated number of mutual funds and ETFs as of 12/31/2017 (11,253). *See* Investment Company Institute, 2018 Investment Company Fact Book, at 52, *available at https://www.ici.org/pdf/2018_factbook.pdf.*

[45] *See infra* section III.C (stating that we expect a vast majority of insurers will choose to use summary prospectuses).

[46] However, the proposed rule departs from rule 498 in requiring two separate types of summary prospectuses. *See infra* sections II.A.1 and II.A.2. We designed this framework to distinguish the information we believe new and existing investors need, and to highlight the particular contract features and risks that are particularly relevant to these two groups of investors, taking into account information that we understand these investors may receive through other channels (*e.g.,* as a result of state insurance law, other regulatory requirements, and industry practice).

investor make an informed investment decision.[47]

Because variable contracts typically include a number of optional benefits and underlying investment options, a summary could not, by its nature, include all relevant aspects and details regarding each of these contract features. The variable contract summary prospectus is designed to be a succinct summary of the contract's key terms and benefits and most significant risks, making it easier to read and more understandable for investors. This summary prospectus would serve as the cornerstone of a layered disclosure framework that would alert investors to the availability of more detailed information in the statutory prospectus and in other locations, and would be tailored to the unique aspects of these products. As a result, investors would have ready access to key information in connection with an investment decision.

The main elements of the new disclosure framework include:

• *Option to use summary prospectus.*[48] Proposed new rule 498A would permit the use of two distinct types of contract summary prospectuses: (1) Initial summary prospectuses covering variable contracts currently offered to new investors; and (2) updating summary prospectuses for existing investors. The initial summary prospectus would include certain key information about the contract's most salient features, benefits, and risks, presented in plain English in a standardized order. The updating summary prospectus would include a brief description of certain changes to the contract that occurred during the previous year, as well as a subset of the information required to be in the initial summary prospectus. Certain key information about the portfolio companies would be provided in both the initial summary prospectus and updating summary prospectus.

• *Availability of variable contract statutory prospectus and other materials.*[49] The proposed rule would require the variable contract statutory prospectus, as well as the contract's SAI, to be publicly accessible, free of charge, at a website address specified on or hyperlinked in the cover of the summary prospectus. An investor who receives a contract summary prospectus would be able to request the contract statutory prospectus and SAI to be sent in paper or electronically, at no cost to the investor.

• *Optional method to satisfy portfolio company prospectus delivery requirements.*[50] The proposed rule would provide an optional method for satisfying portfolio company prospectus delivery obligations by making portfolio company summary and statutory prospectuses available online at the website address specified on or hyperlinked in the variable contract summary prospectus, with certain key information about the portfolio companies provided in the variable contract's summary prospectus.[51] Investors would also be able to request and receive those disclosures in paper or electronically at no cost. This new option for satisfying portfolio company prospectus delivery requirements would only be available for portfolio companies available as investment options through variable contracts that use contract summary prospectuses.

• *Discontinued Variable Contracts.*[52] In proposing the new variable contract summary prospectus disclosure framework, we acknowledge the industry practice of providing alternative disclosures under the specific circumstances described in certain staff no-action letters. In light of this proposal, we believe that it is useful to consider the appropriate disclosure framework for the types of contracts that were the subject of the staff no-action letters.

• *Form amendments.*[53] We are also proposing to amend Forms N–3, N–4, and N–6—the registration forms for variable contracts—to update and enhance the disclosure regime for these investment products.[54] The proposed amendments are intended to consolidate certain summary information in a condensed presentation, reflect industry developments (*e.g.,* the prevalence of optional benefits in today's variable contracts), and otherwise improve disclosures provided to variable contract investors.

• *Inline XBRL.*[55] Registrants would be required to use the Inline XBRL format for the submission of certain variable contract information. This requirement is intended to harness technology to provide a mechanism for allowing investors, their investment professionals, data aggregators, and other data users to efficiently analyze and compare the available information about variable contracts, as required by their particular needs and circumstances.

• *Other Amendments.*[56] We are proposing certain technical and conforming amendments to our rules to reflect the proposed new regime for variable contract summary prospectuses. We are also proposing certain technical amendments to rules relating to variable life insurance contracts, as well as rescission of certain rules and forms.

Table 1 summarizes the various requirements—under the current prospectus delivery regime, and under the proposed summary prospectus regime—for information to either be (1) delivered to all investors, (2) made available online, or (3) delivered to those investors who so request:

TABLE 1—INFORMATION AVAILABLE TO VARIABLE CONTRACT INVESTORS

	Current prospectus delivery regime[57]	Optional proposed summary prospectus regime
Contract Statutory Prospectus.	Delivered to all investors	Required to be available online and delivered (in paper or electronic format) upon request.
Contract SAI	Available upon request	Required to be available online and delivered (in paper or electronic format) upon request.
Contract Part C Information	Not delivered to investors or required to be available online, but is filed with registration statement (available on EDGAR).	Not delivered to investors or required to be available online, but is filed with registration statement (available on EDGAR).
Initial Summary Prospectus	N/A	Delivered to new investors.
Updating Summary Prospectus.	N/A	Delivered to existing investors.

[47] The mutual fund summary prospectus rule is designed to provide investors with ''streamlined and user friendly information that is key to an investment decision.'' *See* Enhanced Disclosure and New Prospectus Delivery Option for Registered Open-End Management Investment Companies, Investment Company Act Release No. 28064 (Nov. 21, 2007) [72 FR 67790 (Nov. 30, 2007)] (''2007 Summary Prospectus Proposing Release''), at section I; *see also* Richard J. Wirth, *What's Puzzling You . . . Is the Nature of Variable Annuity Prospectuses,* 34 Western New England Law Review 127 (2012) (''Informed decision-making demands that consumers have enough of an understanding of what's for sale and what trade-offs are being asked of them in order to make an informed decision about whether or not to buy a product.'').

TABLE 1—INFORMATION AVAILABLE TO VARIABLE CONTRACT INVESTORS—Continued

	Current prospectus delivery regime [57]	Optional proposed summary prospectus regime
Portfolio Company Prospectuses.	Delivered to all investors	Delivered to investors, or, if the new option to satisfy portfolio company prospectus delivery is relied-upon,[58] required to be available online and delivered (in paper or electronic format) upon request.[59]

Under proposed rule 498A, use of the summary prospectus to satisfy a registrant's section 5(b)(2) obligation would be voluntary. We have designed the proposal to permit, but not require, registrants to use a summary prospectus coupled with the internet availability of variable contract disclosures to make the delivery process more convenient and efficient. While we believe the summary prospectus regime will benefit investors, we are proposing that the approach be optional in light of the novel nature of this disclosure approach for variable contracts (including its use of layered disclosure), and because of the diversity of variable contracts (and corresponding diversity of disclosure for variable contracts).

We believe that optionality not only would give market participants time to adjust to the new layered disclosure approach, but also give the Commission and its staff the opportunity to assess the benefits to investors and insurers. While approximately 95% of mutual funds currently use a summary prospectus,[60] it took nearly eight years after the adoption of the mutual fund summary prospectus framework for the industry to reach that threshold.[61]

Given the current widespread use of summary prospectuses by mutual funds, we believe investors and other market participants have generally become comfortable with the use of a summary prospectus. However, the proposed variable contract summary prospectus regime would differ from the mutual fund summary prospectus framework in several key ways (*e.g.,* the use of an initial and an updating summary prospectus, and the new layered disclosure approach to satisfying portfolio company prospectus delivery obligations). Therefore, we intend to review the use of the summary prospectus by investors in variable contracts that voluntarily adopt the summary prospectus and then reconsider whether use of the summary prospectus for variable contracts should be mandated in the future.[62]

We believe that the diversity of variable contracts (and the corresponding diversity regarding variable contracts' approach to prospectus disclosure) also supports permitting, but not requiring, insurers to use the variable contract summary prospectus regime. We have observed that some variable contracts are fairly basic, offering few (or no) optional benefits and few investment options. Because these contracts have fairly straightforward disclosure documents, the summary prospectus regime may be less compelling for these products, as compared to more complex variable products with numerous optional benefits and investment options (which tend to have longer and more complicated prospectuses). Registrants will likely assess the relative benefit of using a summary prospectus based on the types of products they offer and the length of their current prospectuses—as well as the benefit of more concise disclosure to investors—when evaluating whether to opt into the new layered disclosure regime.[63] An optional approach would also preserve flexibility for registrants that may not wish to undertake the costs of the transition to a summary prospectus regime.

II. Discussion

A. New Option To Use a Summary Prospectus for Variable Contracts

We are proposing new rule 498A, which would provide a new option for a person to satisfy its prospectus delivery obligations for variable contracts under section 5(b)(2) of the Securities Act by: (1) Sending or giving to new investors key information contained in a variable contract statutory prospectus in the form of an initial summary prospectus; (2) sending or giving to existing investors each year a brief description of certain changes to the contract, and a subset of the information in the initial summary prospectus, in the form of an updating summary prospectus; and (3) providing the statutory prospectus and other materials online. In addition, the new rule would require a registrant (or the financial intermediary distributing the variable contact) to send the variable contract statutory prospectus and other materials to the investor in paper or electronic format upon request.

1. Initial Summary Prospectus

a. Overview

The proposed rule would require a person relying on the rule to send or give an initial summary prospectus in connection with sales of variable contracts to new investors.[64] We have designed the initial summary prospectus to use a layered disclosure approach that would provide investors with key information relating to the contract's terms, benefits, and risks in a concise and more reader-friendly presentation, with access to more detailed information available online and electronically or in paper format on request. Simplicity and clarity are of heightened importance in a prospectus in connection with an initial purchase decision for a variable contract because of the long-term nature and complexity of these products. In addition, these considerations are important because, unlike with other investment products, typically variable contract investors have a state-mandated ''free look'' opportunity to return the contract for a full refund of premium within a limited number of days following contract issuance.[65]

[57] This column assumes that the contract at issue is not providing alternative disclosures to investors in lieu of the statutory prospectus, as described in certain staff no-action letters discussed below in section II.C.

[58] *See infra* section II.B.2.

[59] Additionally, summary information about portfolio companies would be available in the initial summary prospectus and updating summary prospectus. *See infra* sections II.A.1.c.ii(*i*) and II.A.2.c.ii(c).

[60] *See supra* note 44.

[61] Estimates are based on EDGAR filings.

[62] *See* 2009 Summary Prospectus Adopting Release, *supra* note 33, at 66–67 (similarly noting the Commission's intent to review the use of the mutual fund summary prospectus by investors in funds that voluntarily adopt the summary prospectus).

[63] *See infra* section III.C.1.

[64] Proposed rule 498A(f)(1). For an initial purchase of a variable contract, the initial summary prospectus must be ''sent or given no later than the time of the carrying or delivery of the contract security.'' *See infra* section II.A.3.

[65] State insurance law requirements typically require that variable contracts have free look provisions that permit investors to return the contract for a refund within a stated number of days of receiving it (usually between ten and twenty days). The amount of the refund may differ between variable annuity contracts and variable life

Continued

One unique aspect of variable contract disclosure practices is the wide variety of information about the contract that we understand investors commonly receive throughout the lifecycle of the contract. During the sales process, potential investors typically receive informational materials provided by the insurer, such as marketing brochures, investment option guides, and other explanatory materials that focus on key features of the particular contract or variable contracts generally. They may also receive disclosures required under state law, such as a ''Buyer's Guide'' that generally describes how variable contracts work.[66] Each investor also typically completes an application, along with certain assessment forms, in order to determine whether a variable contract may be appropriate for the investor.[67]

Once the application is approved, the investor receives the contract, which sets forth in detail the investor-specific contract terms and is accompanied by the contract statutory prospectus. In addition to receiving an updated contract statutory prospectus and the prospectuses of the portfolio companies at least annually,[68] investors also receive other information during the lifecycle of a variable contract. This includes, for example, information required under federal law (such as purchase and sale confirmations, and annual and semi-annual reports for the portfolio companies to which the investor has allocated contract value). This also includes notices that insurers may choose to send to investors alerting them to key events (such as required minimum distributions, withdrawals, annuitization, ability to exercise an optional benefit, and loan confirmations).[69] We have designed the initial summary prospectus to complement current disclosure practices by not unnecessarily duplicating other disclosures, and by highlighting aspects of the contract that may not be described in detail elsewhere.

b. Scope of Disclosure To Be Included in Initial Summary Prospectus

The proposed rule requires that the initial summary prospectus may only describe a single contract that the registrant currently offers for sale.[70] We understand that industry practice is to combine multiple contract prospectuses into a single registration statement on Form N–3, N–4, or N–6 when those prospectuses describe variable contracts that are ''essentially identical.'' [71] We also understand that certain contract prospectuses include disclosure about contract features and options that the registrant may no longer offer to new investors.

Aggregating disclosures for multiple contracts, or currently-offered and no-longer-offered features and options of a single contract, can hinder investors from distinguishing between contract features and options that apply to them and those that do not. Therefore, the proposed rule limits the initial summary prospectus to describing only a single contract that the registrant offers under the statutory prospectus to which the initial summary prospectus relates. While the initial summary prospectus could only describe one contract, the proposed rule nonetheless would permit it to describe more than one class of a currently-offered contract.[72]

Although the content requirements for the initial summary prospectus cross-reference items of Forms N–3, N–4, and N–6, we anticipate that the proposed rule's scope provisions may cause registrants to vary certain disclosures that appear in the statutory prospectus when the same disclosure topics appear in the initial summary prospectus. This may occur even if both disclosures respond to the same form item requirement.[73] For example, a registrant that describes several currently- and previously-offered optional benefits in response to Item 11 of Form N–4 in its statutory prospectus would not be permitted to describe optional benefits that it no longer currently offers in its initial summary prospectus.

We request comment generally on the proposed scope requirements for the initial summary prospectus, and specifically on the following issues:

- Should the initial summary prospectus be limited to describing a single contract that the registrant currently offers for sale? Would this reduce the initial summary prospectus' complexity and minimize confusion to investors? Would this requirement be burdensome in any way for registrants to interpret, administer, or manage operationally, and if so, how? Should the proposed rule instead frame this requirement of one summary prospectus-per-contract in another manner, for clarity or for any other reason?
- Should we allow an initial summary prospectus to describe multiple contracts if the registrant currently offers multiple contracts through the related registration statement? Would the answer change if the multiple contracts were offered on a single prospectus versus multiple separate prospectuses? Would this make the initial summary prospectus substantially longer or confusing to investors, and would it decrease the likelihood that investors would read an initial summary prospectus?
- Should we restrict the number of contract classes that may be included in an initial summary prospectus?

c. Preparation of the Initial Summary Prospectus

The following chart outlines the information that the proposed rule would require to appear in an initial summary prospectus. Along with specifying required introductory disclosures on the outside front cover page or the beginning of the initial

insurance contracts and also may vary among the states.

See also NAIC, *Annuity Disclosure Model Regulations* (2nd Quarter, 2015) (''2015 NAIC Annuity Disclosure Model Regulations''), *available at http://www.naic.org/store/free/MDL-245.pdf* (''Where the Buyer's Guide and disclosure document are not provided at or before the time of application, a free look period of no less than fifteen (15) days shall be provided for the applicant to return the annuity contract without penalty. This free look shall run concurrently with any other free look provided by state law or regulation.''); NAIC, *Life Insurance Disclosure Model Regulations,* (3rd Quarter, 2018), *available at http://www.naic.org/store/free/MDL-580.pdf* (''[I]f the policy for which application is made contains an unconditional refund provision of at least ten (10) days, the Buyer's Guide may be delivered with the policy or prior to delivery of the policy.'').

[66] Some states have adopted model regulations that require insurers to provide certain disclosure documents to annuity investors either at or before the time of application. For example, the ''Buyer's Guide'' describes in plain English how variable contracts work, what certain technical terms mean, tax implications, and fees. *See* NAIC, Buyer's Guide for Deferred Annuities Variable (2013), *available at http://www.naic.org/documents/prod_serv_consumer_anb_lv_2013.pdf;* NAIC, Life Insurance Buyer's Guide, (2007), *available at http://naic.org/documents/consumer_guide_life.pdf.*

[67] *See, e.g.,* FINRA Rule 2330 (Members' Responsibilities Regarding Deferred Variable Annuities) (establishing sales practice standards, including suitability standards, regarding recommended purchases and exchanges of variable annuities).

[68] *See supra* note 31 and accompanying text; *see also infra s*ection II.C (discussing circumstances under which certain variable contract issuers provide alternative disclosures instead of the contract statutory prospectus, as described in certain staff no-action letters).

[69] Additionally, to the extent that a variable contract investor meets periodically with a sales agent, the sales agent may also provide additional supplemental information about the contract or the portfolio companies.

[70] Proposed rule 498A(b)(1).

[71] *See* General Guidance to Variable Annuity, Variable Life, and Other Insurance Company Investment Contract Registrants, SEC Staff No-Action Letter (Nov. 3, 1995), at section I.4 (discussing industry practice); *see also infra* section II.D.1 (discussing our proposed form instructions that would incorporate this existing staff guidance).

[72] Proposed rule 498A(b)(1). Similarly, a mutual fund summary prospectus ''may describe only one Fund, but may describe more than one Class of a Fund.'' *See* rule 498(b)(4).

[73] *See infra* section II.A.7.c. (discussing potential section 11 liability considerations to the extent that the language in the summary prospectus is not identical in substance to the same sections of the statutory prospectus).

summary prospectus, the proposed rule references particular disclosure items from Forms N–3, N–4, and N–6 (as proposed to be amended).[74] The information would be required to appear in the same order, and under the relevant corresponding headings, as the proposed rule specifies.[75] We propose a standardized presentation to require certain disclosure items that we believe would be most relevant to investors (such as the proposed contract overview section and proposed table that includes key information about the contract), to appear at the beginning of the initial summary prospectus, with supplemental information appearing further in. The required presentation could also facilitate comparison of different variable contracts.[76]

i. Cover Page and Table of Contents

Identifying Information. Under the proposed rule, the following information would be required to appear on the front cover page or the beginning of the initial summary prospectus:

- The depositor's name;
- the registrant's name;
- the name of the contract, and the class or classes if any, to which the initial summary prospectus relates;
- a statement identifying the initial summary prospectus as a ''Summary Prospectus for New Investors''; and
- the approximate date of the first use of the initial summary prospectus.[78]

Legends. The cover page or beginning of the initial summary prospectus would also be required to include the following legends:

This Summary Prospectus summarizes key features of the [name of Contract]. You should read this Summary Prospectus carefully, particularly the section titled Important Information You Should Consider About the [Contract].

Before you invest, you should review the prospectus for the [name of Contract], which contains more information about the [Contract], including its features, benefits, and risks. You can find the prospectus and other information about the [Contract] online at [____]. You can also obtain this information at no cost by calling [____] or by sending an email request to [____].[79]

You may cancel your [Contract] within 10 days of receiving it without paying fees or penalties. In some states, this cancellation period may be longer. Upon cancellation, you will receive either a full refund of the amount you paid with your application or your total contract value. You should review the prospectus, or consult with your investment professional, for additional information about the specific cancellation terms that apply.

Additional general information about certain investment products, including [variable annuities/variable life insurance contracts], has been prepared by the Securities and Exchange Commission's staff and is available at *Investor.gov*.[80]

These proposed legends are designed to provide identifying information about the variable contract to which the initial

[74] To the extent we have proposed amendments to Forms N–3, N–4, and N–6 that would facilitate the proposed summary prospectus content requirements, as well as amend the content requirements for the statutory prospectus, we generally discuss these amendments in more detail in section II.D below. However, in order to better explain the initial summary prospectus, we have elected to discuss new or amended items that we propose to include in the statutory prospectus, to the extent they would also appear in the initial summary prospectus, in this section II.A.1.

[75] Proposed rule 498A(b)(5).

[76] We understand that many investors purchase variable contracts through an intermediary and often do not directly compare competing products. A standardized order may nonetheless be useful for investment professionals to compare the products they ultimately recommend to investors with other products, as well as investors considering whether to purchase a new annuity contract to replace an existing one. *See infra* note 160 and accompanying text. Having a more comparable document may ultimately promote greater comparability across products, registrants, and insurance institutions, which could lead to better investor understanding and increased competition.

As discussed below in Section II.E, we are also proposing to require the use of Inline XBRL format for the submission of certain required disclosures in the variable contract statutory prospectus. The structured data format would allow investors, financial intermediaries, third-party analysts, and others to more efficiently analyze and compare these products.

[77] Registrants on Form N–3 could omit the appendix specified by proposed Item 19 of Form N–3, and instead provide the more detailed disclosures about the investment options offered under the contract required by proposed Item 20 of Form N–3. *See infra* note 517 and accompanying text.

[78] Proposed rule 498A(b)(2)(i) through (v).

[79] The legend would be required to provide an internet address, other than the address of the Commission's electronic filing system, toll-free telephone number, and email address that investors can use to obtain the statutory prospectus and other information, request other information about the variable contract, and to make investor inquiries. Proposed rule 498A(b)(2)(vi)(B).

The website address would be required to be specific enough to lead investors to a direct link to the statutory prospectus and other required information, rather than to the home page or another part of the website. The website could host other relevant disclosure documents with prominent links to each required document. *Id.*

The legend could indicate, if applicable, that the statutory prospectus and other information are available from a financial intermediary (such as a broker-dealer) through which the contract may be purchased or sold. *Id.*

For purposes of this proposed requirement, documents available on the website address would be required to be publicly accessible and free of charge. *See* proposed rule 498A(h)(1); *see also infra* section II.A.4.

[80] Proposed rule 498A(b)(2)(vi).

summary prospectus relates, as well as certain general information that would be applicable to all variable contracts.[81] While the proposed legend describing how to obtain further information about the contract generally parallels the legend on the cover page of mutual fund summary prospectuses,[82] we have proposed several additional legends that we believe are appropriate in the context of variable contracts. These additional legends notify investors that: (1) The initial summary prospectus is a summary that should be read carefully (and that investors should particularly focus on the ''Important Information You Should Consider About the [Contract]'' section of the summary prospectus); (2) they may cancel the variable contract within a limited amount of time after receiving it (that is, alerting investors to the existence of the free look period); [83] and (3) additional general information about certain investment products, including variable contracts, is available at *Investor.gov.*[84]

If any information is incorporated by reference into the initial summary prospectus, the proposed rule would require that the legend include certain disclosures related to that information.[85] These requirements are described below in section II.A.6. The cover page would also be required to include a legend indicating that the Securities and Exchange Commission has not approved or disapproved of the contract or passed upon the accuracy or adequacy of the disclosure in the summary prospectus and that any contrary representation is a criminal offense.[86]

EDGAR Contract Identifier. We are also proposing to require that the contract's EDGAR contract identifier be included on the bottom of the back cover page or last page of the initial summary prospectus in a type size smaller than that generally used in the prospectus (*e.g.,* 8-point modern type).[87] This requirement is intended to enable Commission staff and others to more easily link the initial summary prospectus with other filings associated with the contract.

Table of Contents. The proposed rule would permit an initial summary prospectus to include a table of contents.[88] A table of contents must show the page number of the various sections or subdivisions of the summary prospectus, and immediately follow the cover page in any prospectus delivered electronically.[89]

We request comment generally on the proposed requirements for the cover page and table of contents of the initial summary prospectus, and specifically on the following issues:

- Should we include any additional information or eliminate any of the information that we have proposed to include in these parts of the initial summary prospectus? For example, for prospectuses filed on Form S–11, which is used for registration under the Securities Act of securities of certain real estate companies, the cover page must include a prominent cross-reference to the risk factors section of the prospectus, including the page number where it appears, as well as certain disclosures, if applicable, regarding limitations on transferability of the securities being registered and the absence of a market for securities of the same class as those being registered.[90] Would it be helpful for the cover page of the initial summary prospectus to contain similar disclosures relevant to variable contracts? For example, in addition to stating that investors should particularly focus on the ''Important Information You Should Consider About the [Contract]'' section of the initial summary prospectus, should the cover page include disclosures regarding surrender charges or other items relating to the contract, a cross-reference to the risk factors section or other sections of the statutory prospectus, or other disclosures?
- Are the proposed legends sufficient to notify investors of the availability and significance of the contract statutory prospectus and other information about the variable contract and how to obtain this information? Should the legends include greater detail about the information that is available?
- Will the proposed legends adequately inform investors of the various means for obtaining additional information about a variable contract? Are the proposed requirements for the website address where additional information is available adequate to ensure that the website and the additional information will be easy to locate?
- Would the proposed legend on the cover page or beginning of the initial summary prospectus with information on the free look period help alert investors that they may cancel their contracts without fees or penalties within a limited time after the sale? Should this legend be more prominently displayed (*e.g.,* larger font size, boxed, or bolded) relative to the other legends?
- As proposed, should registrants be permitted to modify the required legends, provided the modified legends provide comparable information?
- Should the legends include a reference to the *Investor.gov* website? Why or why not? If so, what specific information about variable contracts would be most helpful to investors for the staff to provide on this website?
- Should the proposed requirement to include the contract's EDGAR contract identifier on the bottom of the back cover page or last page of the initial summary prospectus instead require that another identifier be provided? If so, what identifier should be listed, and why?
- Should registrants be permitted to include a table of contents in the initial summary prospectus? Instead, should a table of contents be required? Does rule 481(c) under the Securities Act provide appropriate requirements for a table of contents included in an initial summary prospectus?

ii. Content of the Initial Summary Prospectus

Proposed rule 498A specifies the content and order thereof required in an initial summary prospectus.[91] An initial summary prospectus must contain the information required by the proposed rule, and only that information, in the order specified by the rule.[92] Adhering to these content requirements is one condition that an initial summary prospectus must satisfy in order to be deemed to be a prospectus that is permitted under section 10(b) of the Securities Act and section 24(g) of the

[81] A registrant would be able to modify the proposed legends so long as the modified statements contain comparable information. Proposed rule 498A(b)(2)(vi)(A).

[82] *See* rule 498(b)(1)(v).

[83] Many investors may not be familiar with the free look period, and the proposed legend is intended to alert them of its existence and explain where they may obtain additional information about its operation. This is particularly important because the free look period may be the only time the investor may cancel the contract without paying significant surrender fees or tax penalties.

[84] The Commission's Office of Investor Education and Advocacy maintains the website as an online resource to help investors make sound investment decisions and avoid fraud. The website includes investment bulletins, alerts, guidance and tools designed to assist investors, including those considering variable contracts, in obtaining additional information and resources on understanding and managing their investments. *See, e.g.,* Updated Investor Bulletin: Variable Annuities (Oct. 30, 2018), *available at https://www.investor.gov/additional-resources/news-alerts/alerts-bulletins/updated-investor-bulletin-variable-annuities;* Investor Bulletin: Variable Life Insurance; Investor Bulletin: Variable Life Insurance (Oct. 30, 2018), *available at https://www.investor.gov/additional-resources/news-alerts/alerts-bulletins/investor-bulletin-variable-life-insurance.*

[85] Proposed rule 498A(b)(2)(vi)(C).

[86] Proposed rule 498A(b)(2)(vii); *cf.* rule 481(b)(1) under the Securities Act.

[87] Proposed rule 498A(b)(3). An EDGAR contract identifier is issued by the Commission, is ten characters in length (nine numbers preceded by a ''C''), and uniquely, and persistently, identifies each contract. These identifiers are available to the public. Information filed with the Commission containing these identifiers is searchable by the public and our staff using the contract identifiers and also using the contract names without the need to reference the registrant issuing the contract. *See* Rulemaking for EDGAR System, Investment Company Act Release No. 26990 (July 18, 2005) [70 FR 43558 (July 27, 2005)] at text following n.29.

[88] Proposed rule 498A(b)(4).

[89] Rule 481(c).

[90] *See* Item 1 of Form S–11 (requiring certain disclosures and also referencing Item 501 of Regulation S–K); *see also* Item 501 of Regulation S–K [17 CFR 229.501].

[91] Proposed rule 498A(b)(5).

[92] *Id.*

Investment Company Act for the purposes of section 5(b)(1) of the Securities Act.[93] To aid market participants in understanding the types of disclosures we propose to require, Appendix A to this release contains a hypothetical initial summary prospectus for a variable annuity separate account with a registration statement filed on Form N–4. This hypothetical initial summary prospectus is provided solely for illustrative purposes and is not intended to imply that it would reflect a ''typical'' initial summary prospectus.

(a) Overview of the Contract

The initial summary prospectus would begin with a section including certain basic and introductory information about the contract and its benefits, under the heading ''Overview of the [Variable Annuity/Life Insurance] Contract.'' [94] This section would appear at the beginning of the initial summary prospectus because it is designed to provide basic information about how the variable contract functions. We believe that investors of different levels of financial sophistication may benefit from receiving this information early in the initial summary prospectus. This would provide a contextual baseline to help inform investors' understanding of disclosure about more detailed aspects of the variable contract that are described later in the initial summary prospectus.

Specifically, this section would be required to include a concise description of the following:

Purpose of Contract. The proposed requirement to briefly describe the purpose(s) of the contract in general terms [95] is intended to provide the reader with information on what financial objectives that contract could help the investor achieve, as well as the profile of an investor for whom the contract may be appropriate (*e.g.,* by discussing a representative investor's time horizon, liquidity needs, and financial goals). This requirement could be satisfied, for example, by stating that the contract is meant to help the investor accumulate assets through an investment portfolio, to provide or supplement the investor's retirement income, or to provide death benefits and/or other benefits, and that the contract may not be appropriate for an investor that intends to access his or her invested funds within a short-term timeframe.

Phases of Contract (for Variable Annuity Contracts). The proposed requirement to include a brief description of the accumulation (savings) phase and annuity (income) phases of the contract [96] is meant to provide basic information about how the variable annuity contract functions, which in turn would help highlight how the contract differs from other types of investment products. It also is designed to address common areas of confusion among variable annuity investors. For example, it would highlight the effect of annuitization on the ability to make withdrawals and the continuation of contract benefits.

This discussion would require a brief overview of the investment options available under the contract (that is, portfolio companies and any general or fixed account option).[97] The registrant also would be required to prominently disclose that additional information on the portfolio companies is provided in an appendix to the summary prospectus (or elsewhere in the case of registrants on Form N–3 that chose to omit the appendix from the initial summary prospectus in favor of more detailed information about investment options as required by proposed Item 20 of Form N–3),[98] and provide a cross-reference or link to the relevant appendix.[99] Finally, the registrant would be required to state, if applicable, that if an investor annuitizes, he or she will receive a stream of income payments, but he or she will be unable to make withdrawals, and death benefits and living benefits will terminate.[100]

Premiums (for Variable Life Insurance Contracts). Instead of requiring a description of the phases of the contract as with variable annuities, Form N–6 would require the ''Overview'' section to briefly describe the payment of premiums under the variable life insurance contract. This description of premiums would include: (1) Whether premiums may vary in timing and amount (*e.g.,* flexible premiums); (2) whether restrictions may be imposed on premium payments (*e.g.,* by age of insured, or by amount); (3) how premiums may be allocated (this discussion would include a brief overview of the investment options available under the contract, as well as any general (fixed) account options); and (4) a statement that payment of insufficient premiums may result in a lapse of the contract.[101]

Unlike variable annuities, variable life insurance requires the investor to make continuous premium payments in order to avoid a lapse of the contract. We therefore believe the ''Overview'' section should prominently explain the role of premium payments in the contract, and highlight for investors a key risk that non-payment (or insufficient payment) of premiums could result in contract lapse.

Contract Features. Finally, this section would include a summary of the contract's primary features, including death benefits, withdrawal options, loan provisions, and any available optional benefits.[102] If applicable, the registrant would be required to state that the investor will incur an additional fee for selecting a particular benefit.[103] Because registrants would discuss many of these subjects in other sections of the initial summary prospectus in greater detail (and would discuss each of these subjects in more detail in the contract statutory prospectus), this paragraph is intended to be summary in nature.

We request comment generally on the ''Overview'' section that we propose would appear in the initial summary prospectus, and specifically on the following issues:

---

[93] Proposed rule 498A(b); *see also infra* section II.A.3.

Section 10(b) of the Securities Act authorizes the Commission to adopt rules deemed necessary or appropriate in the public interest or for the protection of investors that permit the use of an ''omitting prospectus'' for the purposes of section 5(b)(1) that omits or summarizes information contained in the statutory prospectus. Section 24(g) of the Investment Company Act authorizes the Commission to permit the use of a prospectus under section 10(b) of the Securities Act to include information the substance of which is not included in the statutory prospectus. 15 U.S.C. 77j(b); 15 U.S.C. 77e(b)(1); 15 U.S.C. 80a–24(g); *see also* 2009 Summary Prospectus Adopting Release, *supra* note 33, at n.70.

[94] *See* proposed rule 498A(b)(5)(i); *see also* proposed Item 2 of Forms N–3, N–4, and N–6; *infra* section II.D.2.b.

[95] *See* proposed rule 498A(b)(5)(i); *see also* proposed Item 2(a) of Forms N–3, N–4, and N–6.

[96] *See* proposed rule 498A(b)(5)(i); *see also* proposed Item 2(b) of Forms N–3 and N–4.

[97] However, a detailed explanation of the separate account, sub-accounts, and portfolio companies is not required. *See* Instruction 2 to proposed Item 2(b)(1) of Forms N–3 and N–4.

The registrant thus would not list the names of each portfolio company available under the contract, as this would be duplicative of information available in the appendix that would accompany the summary prospectus. *See infra* section II.A.1.c.ii(*i*).

[98] *See infra* note 517 and accompanying text.

[99] *See* proposed rule 498A(b)(5)(i); *see also* Instruction 1 to proposed Item 2(b)(1) of Forms N–3 and N–4.

[100] *See* proposed rule 498A(b)(5)(i); *see also* proposed Item 2(b)(2) of Forms N–3 and N–4.

[101] *See* proposed rule 498A(b)(5)(i); *see also* proposed Item 2(b) of Form N–6. The proposed instructions to this requirement would require the registrant to disclose that additional information on the portfolio companies is provided in an appendix to the summary prospectus, and provide a cross-reference to the relevant appendix. *See* proposed rule 498A(b)(5)(i); *see also* Instruction 1 to proposed Item 2(b)(3) of Form N–6.

[102] *See* proposed rule 498A(b)(5)(i); *see also* proposed Item 2(c) of Forms N–3, N–4, and N–6.

[103] *Id.*

• Are the requirements of the proposed section clear and appropriate in light of the goals of the initial summary prospectus, and would the information disclosed to investors be helpful to investors in light of these goals? Is this the most useful information for the beginning of the initial summary prospectus? Would it provide investors with context to better understand the remainder of the initial summary prospectus? Why or why not? Would the information provided in the proposed section be unnecessarily duplicative with other information that would appear in the initial summary prospectus?

• Should we impose word or page limits on the proposed section? If so, what should the word or page limits be (*e.g.,* no more than one page)?

• Are there additional disclosure topics that should be required to be included in the proposed ''Overview'' section? Instead, should we provide flexibility to registrants in preparing this section as to topics, etc.?

(b) Key Information

The initial summary prospectus would next include a table (the ''Key Information Table'') that would provide a brief description of key facts about the variable contract in a specific sequence and in a standardized presentation that is designed to be easy to read and navigate.[104] Specifically, it would include a summary of five topic areas: (1) Fees and expenses; (2) risks; (3) restrictions; (4) taxes; and (5) conflicts of interest. This is intended to highlight, in a consolidated location, important considerations related to these products, including certain unique aspects of the variable contract that might be unfamiliar to investors who have experience with mutual funds or other types of investment products.[105]

The Key Information Table includes a number of prescribed disclosures and is designed to complement the ''Overview'' section. We have proposed placing these two disclosure sections at the beginning of the initial summary prospectus because we believe they contain certain basic information that is critical for variable contract investors to read. We are also proposing that this information be provided in a standardized tabular presentation because we believe that, as compared to the narrative-type presentation of corresponding disclosures in the statutory prospectus, a summary tabular presentation would be easier to read and better convey the importance of the information to investors.[106] This presentation may also facilitate comparisons of certain disclosure topics among variable contract prospectuses.

We propose requiring that a registrant provide the Key Information Table under the heading ''Important Information You Should Consider About the [Contract].'' [107] There would be specified headings for each of the five topic areas that the table would include, and under each heading would be two columns. The left column would list the required disclosure line-items for each of the five topic areas, and the right column would provide a brief description for each corresponding line-item, according to the respective instructions for each proposed line-item.[108]

(i) Fees and Expenses

Variable contracts typically have multiple layers of fees, expenses, and charges that can be confusing to investors. While the Fee Table currently required in variable contract prospectuses provides comprehensive fee and expense information,[109] that information is frequently presented over a span of two or more pages when a prospectus is printed on paper. We believe that investors may benefit from a shorter, more tailored discussion in the Key Information Table that is intended to convey the importance of a contract's fee and expense structure. As discussed below, we are proposing to require that the initial summary prospectus also include the Fee Table from the statutory prospectus.[110] This framework would allow an investor to determine the level of fee information that best suits his or her informational needs.

Surrender Charges. We believe that it is important that investors understand that if they make a withdrawal in the first several years of their contract, they may pay a significant charge that will reduce the value of their investment. We believe, however, that investors frequently do not understand, or may be surprised by, surrender charges associated with early withdrawals.[111]

The proposed Key Information Table would require certain information intended to alert investors about the potential impact of surrender charges imposed on early withdrawals. The first line-item in the proposed table, ''Surrender Charge (charges for early withdrawals),'' would require a statement that if the investor withdraws money from the contract within [x] years following his or her last premium payment, he or she will be assessed a surrender charge. This statement would include the maximum surrender charge, and the maximum number of years that a surrender charge may be assessed since the last payment was made under the contract.[112]

In addition, we are proposing to require an example of the maximum surrender charge an investor could pay (in dollars) under the contract assuming a $100,000 investment (*e.g.,* ''[i]f you make an early withdrawal, you could pay a surrender charge of up to $9,000 on a $100,000 investment.'').[113] We

[104] *See* proposed rule 498A(b)(5)(ii); proposed Item 3 of Forms N–3, N–4, and N–6.

[105] In determining these proposed topic areas, we considered investor complaints received by the Commission's Office of Investor Education and Advocacy and the results of the 2012 Financial Literacy Study. *See* text accompanying note 667 (regarding investor complaints); 2012 Financial Literacy Study, *supra* note 39. We also considered various regulatory and industry sources. *See, e.g.,* FINRA Rule 2330(b)(1)(A)(i) (variable annuity investors must be informed, ''in general terms, of various features of deferred variable annuities, such as the potential surrender period and surrender charge; potential tax penalty if consumers sell or redeem deferred variable annuities before reaching the age of 59½; mortality and expense fees; investment advisory fees; potential charges for and features of riders; the insurance and investment components of deferred variable annuities; and market risk'').

[106] We considered mutual fund disclosure research that supported the view that a tabular presentation would be an effective disclosure delivery method. *See, e.g.,* John Kozup, Elizabeth Howlett, and Michael Pagano, *The Effects of Summary Information on Consumer Perceptions of Mutual Fund Characteristics,* The Journal of Consumer Affairs 42, 37–59 (2008) (concluding that summary information, particularly using graphical presentation, is an effective way to facilitate the processing of information for investors evaluating mutual funds).

Experts in disclosure effectiveness for consumer-facing communications also have encouraged the use of a ''strong design grid'' (such as the tabular presentation we propose) to clarify concepts to consumers and to organize disclosure elements. *See, e.g.,* Susan Kleimann, *Making Disclosures Work for Consumers,* Presentation to the SEC's Investor Advisory Committee (June 14, 2018), *available at https://www.sec.gov/spotlight/investor-advisory-committee-2012/iac061418-slides-by-susan-kleimann.pdf* (''Kleimann Presentation'').

[107] Immediately following this heading would be the statement: ''An investment in the Contract is subject to fees, risks, and other important considerations, some of which are briefly summarized in the following table. You should review the prospectus for additional information about these topics.''

[108] The table also could include a third column, which would include cross-references to the locations in the statutory prospectus where the subject matter that each line-item requires is described in greater detail, or would otherwise cross-reference that information. *See infra* note 162 and accompanying text.

[109] *See* Item 3 of current Forms N–3, N–4, and N–6 (''Fee Table'').

[110] *See infra* section II.A.1.c.ii(h).

[111] The Commission's Office of Investor Education and Advocacy frequently receives investor inquiries about variable contract surrender charges, suggesting that many investors may be confused about how surrender charges work.

[112] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 2(a) to proposed Item 3 of Forms N–3, N–4, and N–6. The maximum surrender charge would be expressed as a percentage of the contribution or premium or the amount surrendered, whichever is applicable.

[113] We propose to use $100,000 as the basis for the surrender charge example because the value of the average variable annuity contract has recently exceeded $100,000. *See* IRI Fact Book, *supra* note

believe that for purposes of the Key Information Table, providing a dollar figure may better communicate to investors the impact of surrender charges than a surrender charge schedule that shows the applicable surrender charge per year as a percentage.[114]

Transaction Charges. The second line-item in the ''Fees and Expenses'' section of the proposed table, ''Transaction Charges (charges for certain transactions),'' would require a statement that, in addition to surrender charges, the investor may also be charged for other transactions. This statement would be required to include a brief description of the types of such charges (*e.g.,* front-end loads, charges for transferring cash value between investment options, charges for wire transfers, etc.).[115] We are not proposing to require registrants to disclose the amount of each transaction charge in the Key Information Table because we understand the costs associated with most transaction charges to be relatively small, as a percentage of average account size (unlike surrender charges). Moreover, the Fee Table would require more detailed information about each of these charges (including the amount of each charge).[116] The line-item for Transaction Charges in the Key Information Table is designed to provide a simple narrative description to alert investors that surrender charges are not the only transaction charges they could pay.

Ongoing Fees and Expenses. The third line-item in the ''Fees and Expenses'' section, ''Ongoing Fees and Expenses (annual expenses),'' is designed to alert investors that they also will bear recurring fees on an annual basis.[117] In Form N–3 and N–4, the disclosure in this line-item would begin with the legend ''The table below describes the fees and expenses that you may pay *each year,* depending on the options you choose.'' [118]

Form N–4 registrants would disclose, in a tabular presentation in the order specified, the minimum and maximum annual fees for: (1) Base contract expenses; [119] (2) investment options (*e.g.,* portfolio company fees and expenses); [120] and (3) optional benefits.[121] Since Form N–3 registrants have a single-tier structure and consolidate fees and expenses for investment options into base contract expenses, Form N–3 registrants would disclose the same information as Form N–4 registrants except fees for base contract expenses and investment options would be consolidated into a single entry labeled ''annual contract expenses.'' [122] The minimum annual fee column would show the lowest available current fee for each annual fee category (*i.e.,* the least expensive contract class, the lowest total annual portfolio company operating expense, lowest annual contract expenses, and the least expensive optional benefit available for an additional charge).[123] The maximum annual fee column would show the highest fees for these categories. Additionally, a legend preceding the minimum and maximum annual fee table would refer investors to their contract specifications page for information about the specific fees they would pay each year based on the options elected.[124]

This presentation would consolidate the more detailed information in the Fee Table, in an effort to minimize the need for investors to perform complex calculations to understand the fees they will pay.[125] For example, like the proposed ''Ongoing Fees and Expenses'' line-item in the Key Information Table, the Fee Table would also include information about the contract's base contract fee, portfolio company fees and expenses, and optional benefits.[126] However, the Fee Table would be required to include a separate response for each contract form that the prospectus offers that has different fees, and also a separate response for each contract class.[127] In order to condense this information, the parallel disclosure in the Key Information Table would be presented as fee ranges.

We have also designed an example in Forms N–3 and N–4 to provide a high-level cost illustration that would give an investor a tool to understand the basic cost framework of the contract. To emphasize that an investor's choices have a significant impact on the costs associated with his or her investment, we propose to require a two-column tabular presentation in the order specified reflecting the lowest and highest current annual cost estimates for the variable contract.[128] The following legend would precede this table: ''Because your contract is customizable, the choices you make affect how much you will pay. To help you understand the cost of owning your contract, the

8, at 170. Using this figure would result in cost estimates that more closely mirror the actual experience of many variable contract investors. *See infra* note 130 and accompanying text.

[114] Registrants would continue to disclose the surrender fee in the Fee Table as a line-item in the ''Transaction Expenses'' table. They also would continue to reflect the consequence of any surrender fee in the ''Example'' to the Fee Table that would show the investor's contract costs if he or she were to surrender the contract after 1 year, 3 years, 5 years, and 10 years. *See* Item 3 of Forms N–3, N–4, and N–6.

[115] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 2(b) to proposed Item 3 of Forms N–3, N–4, and N–6. Although surrender charges are a type of transaction charge, we are proposing to require surrender charges be separately disclosed in the Key Information Table to highlight to investors the significant costs associated with early withdrawals.

[116] *See* proposed Item 4 of Forms N–3, N–4, and N–6 (requiring disclosure of transaction expenses).

[117] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 2(c) to proposed Item 3 of Forms N–3, N–4, and N–6.

[118] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 2(c)(i)(A) to proposed Item 3 of Forms N–3 and N–4.

[119] Minimum and maximum annual fees for base contract expenses would not be required on Form N–6 because life insurance charges are based on underwriting and can vary significantly from one insured person to another depending on various demographic characteristics. This could lead to significant variations between these amounts, which we do not expect would be helpful, and may be confusing, to investors.

[120] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 2(c)(i)(D) to proposed Item 3 of Form N–4. Registrants would use the gross expense ratio disclosed in the Fee Table of a portfolio company's current prospectus, which is the same basis for calculating portfolio company expense ratios as Items 4 (Fee Table) and 18 ([Portfolio Companies] Available Under the Contract) of Form N–4.

[121] The disclosure would also require, in a parenthetical or footnote to the table or each caption, an explanation of the basis for each percentage (*e.g.,* as a percentage of separate account value or benefit base, or % of net asset value). *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 2(c)(i)(C) to proposed Item 3 of Form N–4 (% of net asset value).

[122] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 2(c)(i)(B) to proposed Item 3 of Form N–3.

[123] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 2(c)(i) to proposed Item 3 of Form N–3; Instruction 2(c)(i) to proposed Item 3 of Form N–4.

Because the table showing minimum and maximum annual fees is intended to inform investors about the types and ranges of fees associated with a variable contract, we are excluding certain assumptions from the calculations. For example, although we know that some registrants do not charge extra for certain optional benefits, we want to alert investors to the costs associated with optional benefits that are available for an additional charge. Accordingly, the disclosure should reflect the minimum cost associated with an optional benefit that has a fee.

[124] Instruction 2(c)(i)(A) to proposed Item 3 of Forms N–3 and N–4. Many states require a contract specifications page that contains information about the premiums, fees, annuitization date and other information specific to an investor's variable annuity contract. *See, e.g.,* the Insurance Compact's Individual Deferred Variable Annuity Contract Standards, *available at https://www.insurancecompact.org/rulemaking_records/080911_stds_annuity_individual_deferred_variable.pdf.*

[125] This reflects the principle, which experts in disclosure effectiveness for consumer-facing communications have encouraged, of ''eliminat[ing] most complex calculations'' for consumers. *See* Kleimann Presentation, *supra* note 106.

[126] *See* proposed Item 4 of Forms N–3 and N–4.

[127] *See* Instructions 6 and 7 to proposed Item 4 of Forms N–3 and N–4.

[128] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 2(c)(ii) to proposed Item 3 of Forms N–3 and N–4.

following table shows the lowest and highest cost you could pay *each year.* This estimate assumes that you do not take withdrawals from the contract, which could add surrender charges that substantially increase costs.'' [129]

The lowest and highest annual dollar costs in this table would be based on certain prescribed assumptions (*i.e.,* a $100,000 investment) [130] with no additional contributions, transfers, or withdrawals, no sales charges, and a 5% annual return over a hypothetical 10-year period.[131] The lowest annual cost estimate would be based on the least expensive combination of contract classes and portfolio company charges, excluding optional benefits, and the highest annual cost estimate would reflect the most expensive combination of these items.[132] Excluding optional benefits from the lowest annual cost estimate, and including them in the highest annual cost estimate, would illustrate the cost impact of adding optional benefits to a contract.[133] With this information, the investor would be able to roughly estimate further costs,[134] and could obtain additional information about costs in the statutory prospectus if needed. [135]

In Form N–6, we have proposed that registrants provide disclosure in the ''Ongoing Fees and Expenses'' section of the table that primarily uses a narrative presentation, rather than the approach taken in Forms N–3 and N–4, due to the fact that maximum expenses could potentially exceed 100% of contract value based on the underwriting of the variable life insurance contract and therefore potentially be misleading to investors. This section of the table would require: (1) A brief statement that investment in a variable life insurance contract is subject to certain ongoing fees and expenses that are set based on characteristics of the insured; and (2) the minimum and maximum annual fees for the investment options in a tabular presentation.[136]

(ii) Risks

The proposed Key Information Table also would include a condensed discussion of contract risks. Current risk disclosures in variable contract statutory prospectuses typically span multiple pages. While this level of disclosure may be appropriate for a statutory prospectus, we believe that a more-concise overview presentation of contract risks is better suited for the Key Information Table in light of the goals of the summary prospectus. Like the summary of fee and expense information that would appear in the proposed Key Information Table, these risk summaries are intended to provide a concise overview, with additional information available for an investor who desires or requires additional details.

Specifically, the table would include four line-items under the heading ''Risks,'' each of which would include disclosure about a risk that we believe investors should be alerted to: (1) Risk of loss; (2) risks that could occur if an investor believes a variable annuity is a short-term investment; (3) risks associated with the contract's investment options; and (4) insurance company risks.[137] Each of these line-items would include succinct descriptions of the respective risk.

The first line-item is intended to convey the concept that although variable contracts have elements of insurance, unlike most traditional forms of insurance, these products are subject to the risk of investment loss.[138] This could help prevent any misunderstanding if, for example, an investor confused a variable annuity contract and a fixed annuity contract and did not understand that the contract value in a variable annuity could decline.

The second line-item is intended to emphasize to investors that variable contracts are generally long-term investments and not appropriate for an investor who needs ready access to cash, particularly in view of the impact of surrender charges and/or tax penalties for early withdrawals.[139] The third line-item is intended to focus on the general risk of poor investment performance (as opposed to the details of the specific risks associated with each of the particular investment options available under the contract).[140]

The fourth line-item is meant to alert investors that any obligations, guarantees, or benefits under the contract that may be subject to the claims-paying ability of the insurance company (as opposed to the separate account, which is insulated from the claims of the insurance company's creditors) will depend on the financial

[129] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 2(c)(ii)(A) to proposed Item 3 of Forms N–3 and N–4.

[130] While the example in the Fee Table in current Forms N–3 and N–4 uses $10,000 as the basis for calculating assumptions relating to the costs of investing in a contract, we propose to use $100,000 as the basis for the cost assumption in the ''Key Information'' table because the value of the average variable annuity contract has recently exceeded $100,000. *See* IRI Fact Book, *supra* note 8, at 170. Using this figure would result in costs estimates that more closely mirror the actual experience of many variable contract investors. For that reason, we are also proposing to amend the Forms to use $100,000 as the base assumption for similar examples used in the Forms, as discussed below.

[131] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 2(c)(ii)(C)(a) to proposed Item 3 of Forms N–3 and N–4.

The prescribed assumptions largely mirror the Fee Table, with the exception of the sales load, which is not reflected because we are seeking to highlight the contract's ongoing expenses. Because registrants may charge different fees in different years (which may have the effect of making fees appear small under certain circumstances), we propose to base the cost estimate on the average cost of a contract over a 10-year period to level-set the calculation. *See* Instruction 2(c)(ii)(C)(a) to proposed Item 3 of Forms N–3 and N–4.

[132] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 2(c)(ii)(C)(a) to proposed Item 3 of Forms N–3 and N–4. Instruction 2(c)(ii)(C)(e) to proposed Item 3 of Forms N–3 and N–4 would direct that, unless otherwise stated, the least and most expensive combination of annual contract expenses and optional benefits available for an additional charge should be based on the disclosures provided in the Example in Item 4 (Fee Table), and that if a different combination of these items would result in different maximum or minimum fees in different years, the registrant must use the least or most expensive combination of these items each year.

[133] While the example in the Fee Table would include a similar cost estimate, it would reflect the most expensive combination of portfolio company operating expenses and optional benefits available for each contract class available under the contract. The Fee Table example also includes estimated costs for 1-, 3-, 5- and 10-year periods (not just for one year), and reflects different scenarios based on whether the contract is surrendered or annuitized. *See* proposed Item 4 of Forms N–3 and N–4.

[134] For example, since he or she would know the range of costs to be paid over one year, he or she could estimate the costs to be paid over five years.

[135] We would also encourage registrants to use design features (*e.g.,* multiple colors or shading patterns) that visually distinguish minimum and maximum fees, and lowest and highest annual cost estimates.

[136] Instruction 2(c) to proposed Item 3 of Form N–6.

[137] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 3 to proposed Item 3 of Forms N–3, N–4, and N–6.

[138] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 3(a) to proposed Item 3 of Forms N–3, N–4, and N–6 (''State that a contractowner can lose money by investing in the Contract.'').

[139] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 3(b) to proposed Item 3 of Forms N–3, N–4, and N–6 (''State that a Contract is not a short-term investment vehicle and is not appropriate for an investor who needs ready access to cash, accompanied by a brief explanation.'').

[140] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 3(c) to proposed Item 3 of Forms N–3, N–4, and N–6 (*e.g.,* from Form N–4, ''State that an investment in the Contract is subject to the risk of poor investment performance and can vary depending on the performance of the investment options available under the Contract (*e.g.,* Portfolio Companies and any fixed account investment options), that each investment option will have its own unique risks, and that the contractowner should review a Portfolio Company's prospectus before making an investment decision.'').

Because most variable annuity contracts typically offer fifty or more portfolio companies to which investors can allocate their purchase payments, we are not requiring that the Key Information Table include risk information specific to each portfolio company, as to do so would undermine the goal of brevity for this disclosure item.

solvency of the insurance company.[141] As part of these disclosures, the registrant would be required to state, if applicable, that additional information about the insurance company, including its financial strength ratings, may be obtained from the registrant.[142] In lieu of providing this statement, a registrant could include the insurance company's financial strength rating(s).[143]

A fifth line-item, which would only appear in the ''Risks'' section for variable life insurance contracts, is meant to focus on contract lapse, which is a key risk for variable life insurance investors (but not relevant to variable annuity contracts).[144] For example, a variable life insurance contract may lapse when sufficient premium payments are not made by the investor. Since inadvertent contract lapse could negate the insurance benefit of the variable life insurance contract, we believe this risk should be included in the Key Information Table.

Because the registrant may provide additional details about these and other risks in the statutory prospectus, we are also proposing a new requirement in Forms N–3 and N–4 that, like the current parallel requirement in Form N–6, would require the registrant to summarize the principal risks of purchasing a contract in a consolidated risk section within the statutory prospectus.[145] Registrants would have the flexibility to discuss any principal risks, and would not be limited to the risk topics, or the level of disclosure, when responding to this requirement.

(iii) Restrictions

The proposed Key Information Table also would require registrants to briefly disclose those features of a variable contract that commonly include restrictions or limitations, namely the investment options and optional benefits that the contract offers. We have designed this section of the table to include separate line-items for each of these topics under the heading ''Restrictions.'' [146] For example, many variable annuity contracts have optional benefits that restrict the percentage of assets that investors can allocate to certain investment options, such as more volatile categories of equity funds, in order to facilitate the insurance company's ability to reserve for the guarantees under the benefit.

The ''Investment Options'' line-item would require registrants to disclose whether there are any restrictions that may limit the investment options that an investor may choose and/or limitations on the transfer of contract value among portfolio companies, and if applicable, that the insurer reserves the right to remove or substitute portfolio companies as investment options.[147] The ''Optional Benefits'' line-item would require registrants to disclose whether there are any restrictions or limitations relating to optional benefits, as well as whether the registrant may modify or terminate an optional benefit.[148]

We are proposing to include these line-items in the Key Information Table to put investors on notice of restrictions and limitations associated with different options that are available under the contract. We are not proposing to require a description of the specific restrictions and limitations associated with each of the available investment options and optional benefits. Doing so would likely add significant length to the table. Instead, this information will be provided in other parts of the initial summary prospectus, as well as the statutory prospectus.[149]

(iv) Taxes

Because variable contracts are subject to a special tax regime, with both tax advantages and potential tax impacts in certain circumstances, we are proposing to require that the Key Information Table include tax-related disclosures. The ''Tax Implications'' line-item of the table, which would appear under the heading ''Taxes,'' would require a statement that investors should consult with a tax professional to determine the tax implications of an investment in, and payments received under, the variable contract.[150] A registrant also would be required to state that there is no additional tax benefit to the investor if the contract is purchased through a tax-qualified plan or individual retirement account (IRA), and that withdrawals will be subject to ordinary income tax and may be subject to tax penalties.[151]

The tax disclosure in the proposed Key Information Table is meant to alert investors to tax implications of their investment in a location and using a presentation we believe investors are most likely to see and understand. Similar to the other line-items in the proposed Key Information Table, additional detail about the tax implications of an investment in a variable contract would also be available in the statutory prospectus.[152]

[141] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 3(d) to proposed Item 3 of Forms N–3, N–4, and N–6 (*e.g.,* from Form N–4, ''State that an investment in the Contract is subject to the risks related to the Depositor, including the extent to which any obligations, guarantees, or benefits are subject to the claims-paying ability of the Depositor.'').

[142] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 3(d) to proposed Item 3 of Forms N–3, N–4, and N–6 (*e.g.,* from Form N–4, ''If applicable, further state that more information about the Depositor, including its financial strength ratings, is available upon request from the Registrant'').

[143] *See* Instruction to Instruction 3(d) to proposed Item 3 of Forms N–3, N–4, and N–6.

[144] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 3(e) to proposed Item 3 of Form N–6 (''Briefly state (1) the circumstances under which the Contract may lapse (*e.g.,* insufficient premium payments, poor investment performance, withdrawals, unpaid loans or loan interest), (2) whether there is a cost associated with reinstating a lapsed Contract, and (3) that death benefits will not be paid if the Contract has lapsed.'').

[145] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 1(c) to proposed Item 3; proposed Item 5 of Forms N–3, N–4, and N–6. While we understand that variable annuity statutory prospectuses today commonly discuss contract risks (although Form N–3 and Form N–4 do not currently require them to do so), this discussion can be dispersed throughout the prospectus.

[146] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 4 to proposed Item 3 of Forms N–3, N–4, and N–6. We recognize that there may be overlap between the proposed line-items for ''Investment Options'' and ''Optional Benefits,'' since many optional benefits limit the investment options available to investors.

[147] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 4(a) to proposed Item 3 of Forms N–3, N–4, and N–6 (''State whether there are any restrictions that may limit the investment options that a contractowner may choose, and/or whether there are any limitations on the transfer of Contract value among Portfolio Companies. If applicable, state that the insurer reserves the right to remove or substitute Portfolio Companies as investment options'').

[148] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 4(b) to proposed Item 3 of Forms N–3, N–4, and N–6 (''State whether there are any restrictions or limitations relating to optional benefits, and/or whether an optional benefit may be modified or terminated by the Registrant. If applicable, state that withdrawals may affect the availability of optional benefits by reducing the benefit by an amount greater than the value withdrawn, and/or could terminate a benefit.'').

[149] *See, e.g.,* proposed rule 498A(b)(5)(iv), proposed Item 12(a) of Form N–3, and proposed Item 11(a) of Forms N–4 and N–6 (all referencing the requirement that the table summarizing certain benefits available under the contract, which would appear in both the initial summary prospectus and the statutory prospectus, would be required to include a brief description of restrictions/limitations associated with each benefit); *see also* proposed rule 498A(b)(5)(ix), proposed Item 19 of Form N–3, and proposed Item 18 of Forms N–4 and N–6 (all referencing the requirement that, if the availability of one or more portfolio company varies by benefit offered under the contract, the appendix that would appear in the initial summary prospectus, updating summary prospectus, and statutory prospectus would be required to include a separate table indicating which portfolio companies are available under each of the benefits offered under the contract).

[150] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 5 to proposed Item 3 of Forms N–3, N–4, and N–6.

[151] *Id.*

[152] *See, e.g.,* proposed Item 16 of Form N–3, proposed Item 15 of Forms N–4 and N–6.

(v) Conflicts of Interest

The proposed Key Information Table would also include, if applicable,[153] line-items regarding conflicts of interest that may arise in the context of variable contracts, specifically with regards to investment professional compensation and exchanges. The ''Investment Professional Compensation'' line-item would require registrants to disclose, if applicable, that an investment professional may be paid for selling the contract to investors.[154] A registrant would be required to describe the basis upon which such compensation is typically paid (*e.g.,* commissions, revenue sharing, compensation from affiliates and third parties).[155] A registrant providing the required disclosure would be required to further state that investment professionals may have a financial incentive to offer or recommend the contract over another investment for which the investment professional is not compensated (or compensated less).[156] This proposed requirement reflects analogous disclosure that appears in mutual fund summary prospectuses [157] and is designed to address similar concerns, namely to alert investors to the existence of compensation arrangements for investment professionals and the potential conflicts of interest arising from these arrangements.

The ''Exchanges'' line-item would require the registrant to state, if applicable, that some investment professionals may have a financial incentive to offer a new contract in place of the one owned by the investor.[158] A registrant would further be required to state that investors should only exchange their contract if they determine, after comparing the features, fees, and risks of both contracts, that it is preferable for them to purchase the new contract rather than continue to own the existing contract.[159] When a contract owner purchases a new annuity contract to replace an existing one, the new contract is referred to as a replacement contract.[160] We understand that a significant proportion of variable contract sales stem from exchanges, and these disclosures are intended to alert investors to potential conflicts of interest that may arise in that context.

(vi) General Instructions

In addition to the proposed instructions specific to each line-item in the Key Information Table, the table would be subject to a set of general instructions. To streamline the disclosure and encourage registrants to use plain-English, investor-friendly principles when drafting the disclosures, the proposed general instructions would require registrants to disclose the required information in the tabular presentation reflected in the form, in the order specified. However, registrants would be permitted to exclude any disclosures that are not applicable or modify any of the statements that would be required to appear in the table so long as the modified statement contains comparable information.[161]

The proposed general instructions would also require registrants to provide cross-references or links to the location in the statutory prospectus where the subject matter required by the line-item is described in greater detail.[162] The cross-reference or link would not necessarily need to be a page number or page range; instead, a registrant could cross-reference or link a particular section or sub-section, or heading or sub-heading, in the statutory prospectus. As discussed below, we are separately proposing that any cross-reference that is included in an electronic version of a summary prospectus must be an active hyperlink.[163]

We believe that providing cross-references and links would help investors who seek additional information quickly find more detailed information that may be important to them. We recognize that certain line-items in the Key Information Table may more readily lend themselves to the inclusion of a single cross-reference or link because the information may be found in one location in the statutory prospectus.[164] On the other hand, other line-items may aggregate information that appears in multiple locations in the statutory prospectus, and therefore a registrant would need to include multiple cross-references or links as appropriate.[165]

Finally, in keeping with our goal of providing a brief tabular presentation of key facts that can be easily digested by investors, the proposed instructions provide that all disclosures in the Key Information Table should be short and succinct, consistent with the limitations of a tabular presentation.[166]

(vii) Requests for Comment on Key Information Table

We request comment generally on the Key Information Table that we propose would appear in the initial summary prospectus, and specifically on the following issues. We request specific comment about the table as it would appear in the updating summary prospectus and the statutory prospectus later in this release.

- Should we require the proposed Key Information Table to be included in the initial summary prospectus? Would this table provide a succinct summary of the contract's key terms and benefits and most significant risks, in a presentation that would improve readability and increase readership?
- Would the topics of the line-items that we propose to include in the Key Information Table be appropriate or useful for investors making an initial purchase of a variable contract? If not, why not? Should we require the table to include additional or different topics? Should we limit the topics and related disclosures to those that are required, or should we permit registrants to include additional topics at their discretion? Could this open the door to lengthy disclosure that might undermine the goal of a succinct presentation?
- Is the proposed tabular presentation useful and likely to facilitate investor

[153] A registrant may omit these line-items if neither the registrant nor any of its related companies pay financial intermediaries for the sale of the contract or related services. *See* Instruction to Instruction 6 to proposed Item 3 of Forms N–3, N–4, and N–6.

[154] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 6(a) to proposed Item 3 of Forms N–3, N–4, and N–6.

[155] *Id.*

[156] *Id.*

[157] *See* Item 8 of Form N–1A (requiring disclosure alerting investors who purchase a fund through a broker-dealer or other financial intermediary (such as a bank) that the fund and its related companies may pay the intermediary for the sale of fund shares and related services, and such payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the fund over another investment).

[158] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 6(b) to proposed Item 3 of Forms N–3, N–4, and N–6.

[159] *Id.*

[160] Replacement contracts usually occur in connection with a tax-free exchange of non-qualified contracts under section 1035 of the Internal Revenue Code, or because of a rollover or direct transfer of a qualified plan contract (*e.g.,* an individual retirement annuity) from one life insurance company to another. *See* 26 U.S.C. 1035; *see also* 26 CFR 1.1035–1.

[161] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 1(a) to proposed Item 3 of Forms N–3, N–4, and N–6.

[162] *See* proposed rule 498A(b)(5)(ii); *see also* General Instruction 1(b) to proposed Item 3 of Forms N–3, N–4, and N–6. The proposed instruction specifies that the cross-reference should be adjacent to the relevant disclosure, either within the table row, or presented in an additional table column.

[163] *See* proposed rule 498A(a)(i)(4); *see also infra* section II.A.5.

[164] For example, a more detailed description of the contract's fees and expenses would appear in the Fee Table section of the contract statutory prospectus. *See infra* section II.D.2.d.

[165] For example, it may not always be possible to provide a single cross-reference for the ''Restrictions'' line-items as they may be discussed in multiple sections of the statutory prospectus. *See supra* note 149.

[166] *See* proposed rule 498A(b)(5)(ii); *see also* Instruction 1(c) to proposed Item 3 of Forms N–3, N–4, and N–6.

understanding of key information about variable contracts? Would another presentation be better? If so, why, and what would a better alternate presentation be? Would the two-column presentation be effective for investors reading an electronic version of the initial summary prospectus? Should the form of presentation be required, or should it be left to the discretion of registrants? Would a standardized presentation facilitate comparison of different variable contracts?

- Should we require cross-references to the location (section or sub-section, or heading or sub-heading) in the statutory prospectus where the information provided in response to each line-item of the Key Information Table is discussed in greater detail? Instead of cross-referencing to the relevant location in the statutory prospectus, should we instead require the cross-reference to include a specific page number in the statutory prospectus where an investor could find the information? Would it confuse investors who receive the summary prospectus to see cross-references to the statutory prospectus? If so, should the table in the summary prospectus not include cross-references, or should we consider some other approach?
- If we require cross-references, should electronic versions of the summary prospectus be required to link directly to the relevant location in the statutory prospectus, as would be required by proposed rule 498A? If not, why not? Would requiring a cross-reference (or link) pose any particular technical, legal, or other challenges for registrants? If so, what would these challenges be, and how could we modify the proposed rule or provide guidance to mitigate these challenges? Instead of hyperlinks, are there other technological tools that would better help an investor find information that is cross-referenced in the Key Information Table, such as QR codes or similar technological tools? [167]
- Is the level of detail of the disclosure that we propose in each line-item of the Key Information Table appropriate, and does it strike the right balance between providing enough information to alert an investor to the most salient facts (including fees, expenses, and risks) of the variable annuity contract, but not too much, or too detailed information? If not, how should we modify the table?
- Should we impose a word or page limit on the proposed Key Information Table (*e.g.,* no more than two or three pages)? If so, what should the word limit or page limit be?
- Would the disclosure that a registrant would provide in response to the proposed ''Fees and Expenses'' line-items convey the appropriate amount of information to investors and concisely alert investors to the most important fees and expenses associated with the variable annuity contract? Are there any additional charges that should be included in these line-items? For example, we understand that in some instances an investment professional may charge fees for providing additional services that are directly deducted from the value of the investor's contract and which may be treated as a withdrawal from the contract, reduce the contract's benefits, and be subject to surrender charges. How common are such arrangements, and what disclosures, if any, would be appropriate to be included in the Key Information Table or elsewhere, such as in the fee table?
- Would the ''Surrender Charge'' line-item, as proposed, convey sufficient information for investors to understand the dollar amount that they could pay as a surrender charge if they make withdrawals in the first several years of their contract, and if not, how should we modify this line-item?
- Would the Minimum and Maximum Annual Fee and Lowest and Highest Cost tables convey information in a way that investors are likely to easily understand? Would these tables assist investors in understanding the costs of their investment and helping them compare the costs of investing in the variable annuity with the costs of investing in another product? Are the assumptions underpinning those tables appropriate? If not, why not? Are there any revisions that we should consider? Is $100,000 an appropriate figure to use as the basis for the cost example in the proposed table? Should we require that registrants use a different figure instead? If so, why? Should we require additional information to accompany the tables? For example, should the legend accompanying the tables inform investors that it is possible that the total fees associated with the contract may exceed the accumulated gains from the investment options selected by the investor? Should the Lowest and Highest Cost table include additional information such the hypothetical value of the contract (*e.g.,* in year 1 and year 10), the expenses incurred per year, and the value of the contract (*e.g.,* in year 1 and year 10) after expenses?
- Should we require registrants creating an electronic version of the initial summary prospectus to provide an interactive calculator for investors to determine how fees and expenses would affect their specific investments? If so, should the calculator include transaction charges?
- Should variable life insurance contracts also be required to show the lowest and highest possible combination of charges in the Form N–6 Key Information Table? Cost of insurance is often an important component of expenses for variable life insurance contracts (unlike variable annuities), and can vary significantly from one insured person to another depending on various demographic characteristics (*e.g.,* age, gender, health, smoking status). If the lowest and highest possible combinations of charges are shown, how should variations in cost of insurance be reflected?
- Would the disclosure that a registrant would provide in response to the proposed ''Risks'' line-items adequately convey an overview of the risks of investing in a variable contract? Are there other risks that we should require a registrant to disclose in the proposed Key Information Table? Should we revise or remove any of the proposed ''Risks'' line-items? For example, is it appropriate to allow registrants to include the insurance company's financial strength rating(s) in the line-item regarding the claims-paying ability of the insurance company? Should we revise the instructions associated with these proposed line-items to require different disclosures? Should we require a line-item for ''Other Principal Risks'' to provide registrants an opportunity to disclose risks related to investing in the contract that they would not otherwise be required to disclose in the Key Information Table? Should we instead provide flexibility by permitting registrants to disclose other risks at their discretion? Why or why not?
- Would the disclosure that a registrant would provide in response to the proposed ''Restrictions'' line-items appropriately convey the appropriate amount of information about certain restrictions that various contract options may entail, in light of the goals of the proposed Key Information Table? Should a registrant be required to disclose information about restrictions in the Key Information Table other than those associated with the contract's investment options and optional benefits? If so, what? Instead, should we provide flexibility by permitting registrants to disclose other restrictions at their discretion?
- Is the disclosure that a registrant would be required to provide in response to the proposed ''Tax Implications'' line-item appropriate, in light of the goals of the proposed Key Information Table? Should a registrant be required to emphasize more prominently that withdrawals will be subject to ordinary income tax, and not the capital gains rates? Should the line-item require disclosure of the specific tax penalties and requirements that variable contract investors may incur (*e.g.,* penalties for withdrawal before age 59½, or that purchases through a tax-qualified plan may be subject to required minimum distribution each year beginning at age 70½)?
- Are the disclosures that a registrant would be required to provide in response to the proposed ''Investment Professional Compensation'' line-items appropriate, in light of the goals of the proposed Key Information Table? Would these disclosures adequately apprise investors of the potential conflicts that arise when their investment professional is compensated for recommending an investment into a new or an exchange from an existing variable contract, and are these disclosures appropriately balanced? Should we revise these proposed disclosure requirements, and if so, how? Is it appropriate that these line-items appear under the heading ''Conflicts of Interest''? Is there another way that the summary prospectus could highlight the implications for investors of exchanges?
- Do the instructions associated with each of the proposed line-items clearly explain what a registrant would be required to disclose? In keeping with the structured format of a tabular presentation, we sought to promote concise disclosure by largely directing registrants to state, rather than to explain, certain information in response to the required line-items. Should the

[167] A QR code is a two-dimensional barcode capable of encoding information such as a website address, text information, or contact information. For example, when included on print materials, these codes can be read using the camera on a smartphone to take the user directly to a specific website address.

instructions prescribe specific language or should registrants have flexibility in drafting their responses? Are there any particular instructions that we should include or modify in any way, for clarity or for any other reason?

(c) Standard Death Benefit

The initial summary prospectus would be required to briefly describe the standard death benefit that the contract provides, under the heading ''Standard Death Benefit.'' [168] It would briefly describe the operation of the benefit.[169] Including this disclosure in the initial summary prospectus would highlight to investors important information about this benefit, such as information about the potential limitations on the standard death benefit and the possibility of its termination, that they might not otherwise receive through marketing materials and similar channels during the sales process.

Under the proposed registration form amendments, a registrant would include in the statutory prospectus these disclosures, as well as additional disclosures relating to when the death benefit is calculated and payable or the forms the benefit may take.[170] While this additional information provides detail that may help an investor who wants to understand the mechanics of how the standard death benefit operates later in the contract lifecycle, we are not requiring that it be included in the initial summary prospectus because we believe it would not be as critical to a basic initial understanding of the benefit, including any risks and limitations.

We request comment generally on the disclosure on the standard death benefit that we propose would appear in the initial summary prospectus, and specifically on the following issues:

- Are the proposed disclosure requirements in the initial summary prospectus under the ''Standard Death Benefit'' heading clear and appropriate in light of the goals of the initial summary prospectus?
- Would this disclosure be useful to investors in connection with an initial purchase of a variable contract? Should this proposed content requirement include any additional, or any different, disclosure about the standard death benefit? For example, would including one or more of the other disclosures required to be included in the statutory prospectus better assist investors in gaining a basic initial understanding of the standard death benefit?

(d) Other Benefits Available Under the Contract

Following the discussion of the standard death benefit, the initial summary prospectus would be required to summarize additional standard or optional benefits available to the investor under the variable contract. We understand that insurers commonly consider these types of benefits to be primary features of variable contracts.[171] These benefits are also often key differentiators between competing products, and we propose requiring specific disclosures in both the statutory prospectus and the initial summary prospectus. This information would appear in tabular form, under the heading ''Other Benefits Available Under the Contract.'' [172] This summary table would include information about any optional death benefits, as well as any optional or standard living benefits, that the contract offers.

Specifically, the summary table would include the name of each benefit, its purpose, whether the benefit is standard or optional, associated fees (as a stated percentage of contract value, benefit base, etc.), and a brief description of limitations or restrictions.[173] The table items include key factors investors may wish to consider when assessing these benefits. We also have designed the proposed table to include information that investors may be less likely to receive through other channels, such as concise disclosure about the restrictions and limitations associated with these benefits. The terms of optional benefits can be complex. Providing the required information in a uniform tabular presentation is designed to make these important disclosures easier for investors to read, understand, and compare.

Under the proposed form amendments, a registrant would include in the statutory prospectus the summary table, as well as additional disclosures in narrative form relating to optional benefits, such as further additional description of each benefit, and descriptions of benefits' limitations, restrictions and risks, and one or more examples illustrating the operation of each benefit.[174] We believe that requiring the initial summary prospectus to include only the summary table and not the additional narrative disclosures is appropriate for the scope of the initial summary prospectus.[175] Consistent with the layered disclosure approach, investors who want more information about optional benefits may refer to the more extensive narrative disclosures in the contract statutory prospectus.

We are also proposing instructions to allow registrants that offer multiple benefits of the same type (*e.g.,* death benefit, accumulation benefit, withdrawal benefit, long-term care benefit, etc.) to use multiple tables to provide the required information, if doing so might better permit comparisons of those benefits.[176] Registrants may also include appropriate titles, headings, or other information that might promote clarity and facilitate understanding of the table(s).[177] For example, if certain optional benefits are only available to certain investors, or are mutually exclusive, the table could include footnotes or headings to identify which optional benefits are affected and to whom they are available.[178] These instructions are designed to accommodate the variety of benefits currently offered or that might be offered in the future, and provide registrants flexibility in presenting this information.

We request comment generally on the disclosure relating to other benefits available under the contract that we propose would appear in the initial summary prospectus, and specifically on the following issues:

- Are the proposed initial summary prospectus disclosure requirements

[168] Proposed rule 498A(b)(5)(iii); *see also* proposed Item 11(a) of Form N–3; proposed Item 10(a) of Form N–4; proposed Item 10(a) of Form N–6.

[169] *Id.* For a discussion of the proposed disclosure requirements, *see infra* section II.D.2.j.

[170] *See* proposed Items 11(b) and (c) of Form N–3; proposed Items 10(b) and (c) of Form N–4; proposed Item 10(b) of Form N–6.

[171] *See supra* paragraph accompanying note 17 (regarding the prevalence of optional benefits).

[172] *See* proposed rule 498A(b)(5)(iv); *see also* proposed Item 12(a) of Form N–3; proposed Item 11(a) of Form N–4; proposed Item 11(a) of Form N–6.

[173] For example, the description of limitations or restrictions could include statements like ''benefit limits investment options available'' or ''withdrawals could terminate benefit.'' *See* Instruction 6 to proposed Item 12(a) of Form N–3; Instruction 6 to proposed Item 11(a) of Form N–4; Instruction 6 to proposed Item 11(a) of Form N–6.

[174] *See* proposed Item 12(b) and (c) of Form N–3 and Instruction to proposed Item 12(b) and (c); proposed Item 11(b) and (c) of Form N–4 and Instruction to proposed Item 11(b) and (c); proposed Item 11(b) and (c) of Form N–6 and Instruction to proposed Item 11(b) and (c).

[175] Registrants may, but would not be required to, provide in the initial summary prospectus cross-references or links to these additional narrative disclosures in the contract statutory prospectus.

[176] *See* Instruction 1(b) to proposed Item 12(a) of Form N–3; Instruction 1(b) to proposed Item 11(a) of Form N–4; Instruction 1(b) to proposed Item 11(a) of Form N–6.

[177] *See* Instruction 1(c) to proposed Item 12(a) of Form N–3; Instruction 1(c) to proposed Item 11(a) of Form N–4; Instruction 1(c) to proposed Item 11(a) of Form N–6.

[178] *Id.*

under the heading ''Other Benefits Available Under the Contract'' clear and appropriate in light of the goals of the initial summary prospectus?

• Are the proposed disclosure items in that table useful and appropriate for consideration by investors in connection with the initial purchase of a variable contract, or should we revise, supplement, or replace those items? Should the proposed summary table include any additional, or any different, disclosure about the standard death benefit or any other benefit? For example, should it include one or more of the other disclosures required to be included in the statutory prospectus? Or should we require that registrants add links or cross-references to these other disclosures? For the associated fee of each optional benefit, should the summary table permit a range of fees?

• Would investors find the proposed tabular presentation useful? Alternatively, would a different tabular presentation, a narrative presentation, or no presentation requirement for disclosure about any optional death benefits, as well as any optional or standard living benefits, be preferable?

• Are the proposed instructions clear, or should we modify them in any way? For example, should we require specific standardized disclosures in situations where certain optional benefits are only available to certain investors (*e.g.,* an additional column indicating any restrictions related to investors who invested during specific time periods), as opposed to permitting registrants to address this issue as they see fit?

(e) Buying the Contract (for Variable Annuity Contracts) and Premiums (for Variable Life Insurance Contracts)

The initial summary prospectus would be required to include a brief description of the procedures for purchasing the variable contract (and premiums, in the case of variable life insurance contracts), under the heading ''Buying the Contract'' for variable annuity contracts and ''Premiums'' for variable life insurance contracts.[179] For variable annuity contracts, this would include a concise explanation of the minimum initial and subsequent purchase payments required, any limitations on the amount of purchase payments (such as when the selection of certain optional benefits may limit additional purchase payments), as well as a statement of when such payments are credited.[180] For variable life insurance contracts this would include a description of the purchase procedures (including, among other things, the minimum initial and subsequent premium payments required, any limitations on the amount of such premium payments, and how to avoid contract lapse), premium amount, premium payment plans, premium due dates, and automatic premium loans.[181]

We believe this information should be included in the initial summary prospectus so investors have a clear understanding of how they can purchase the variable contract.[182] Additional information on purchases and premiums would appear in the statutory prospectus. For example, the statutory prospectus would also include information on the manner in which purchase or premium payments are credited, and the identity of each principal underwriter.[183]

We request comment generally on the disclosure on contract purchases that we propose would appear in the initial summary prospectus, and specifically on the following issues:

• Are the proposed disclosure requirements in the initial summary prospectus under the headings ''Buying the Contract'' (for variable annuity contracts) and ''Premiums'' (for variable life insurance contracts) clear and appropriate in light of the goals of the initial summary prospectus?

• Would this disclosure be useful to investors in connection with an initial purchase of a variable contract? Should this requirement include any additional, or any different, disclosure about purchases of variable contracts? For example, should it include one or more of the other disclosures required to be included in the statutory prospectus (*e.g.,* in the case of variable annuity contracts, explanations of the manner in which purchase payments are credited and how accumulation unit value is determined, or in the case of variable life insurance contracts, sub-account valuation and determination of risk classification)?

(f) Contract Lapse (for Variable Life Insurance Contracts)

The initial summary prospectus for a variable life insurance contract would be required to include certain information about the possibility of contract lapse, under the heading ''How Your Contract Can Lapse.'' [184] Specifically, the initial summary prospectus would briefly describe when and under what circumstances a variable life insurance contract will lapse, any lapse options, the effect of the lapse and under what circumstances such a contract may be reinstated. Because inadvertent contract lapse could negate the insurance benefit of a policy to an investor, possibly at significant cost,[185] understanding the risk of contract lapse is important when deciding to invest in a variable life insurance contract. This disclosure would include the same information on contract lapse that would appear in the contract statutory prospectus.

We request comment generally on the disclosure on contract lapse that we propose would appear in the initial summary prospectus, and specifically on the following issues:

• Are the proposed requirements in the initial summary prospectus under the heading ''How Your Contract Can Lapse'' clear and appropriate in light of the goals of the initial summary prospectus?

• Would this disclosure be useful to investors in connection with an initial purchase of a variable life insurance contract? Should this proposed content requirement include any additional, or any different, disclosure about the possibility of contract lapse?

(g) Surrenders or Withdrawals

The initial summary prospectus would be required to include certain information about contract surrenders or withdrawals, under the heading ''Surrendering Your Contract or Making Withdrawals: Accessing the Money in Your Contract.'' [186] This would include

[179] *See* proposed rule 498A(b)(5)(v); *see also* Item 11(a)(i) and (ii) of current Form N–3; proposed Item 13(a) of Form N–3; Item 10(a)(i) and (ii) of current Form N–4; proposed Item 12(a) of Form N–4. Although we have proposed renumbering certain provisions of this item, we have not proposed any substantive changes to this item in Forms N–3 and N–4.

[180] *Id.*

[181] *See* proposed rule 498A(b)(5)(v); *see also* Item 7(a) through (e) of current Form N–6; proposed Item 9(a) through (e) of Form N–6. We have not proposed any changes to this item in Form N–6.

Sub-accounts refer to the investment options, such as portfolio companies, available under the contract.

[182] This section of the summary prospectus for variable contracts is similar to the disclosure on purchasing fund shares that appears in mutual fund summary prospectuses. *See* rule 498(b)(2); Item 6 of Form N–1A.

[183] *See* proposed Item 13(b) through (f) of Form N–3; proposed Item 12(b) through (e) of Form N–4.

[184] *See* proposed rule 498A(b)(5)(vi); *see also* Item 11 of current Form N–6; proposed Item 14 of Form N–6. We have not proposed any changes to this item in Form N–6.

[185] For example, costs could occur in the form of premium payments that the investor previously paid into the policy, and which the investor cannot retrieve following contract lapse.

[186] *See* proposed rule 498A(b)(5)(vii); *see also* Item 12 of current Form N–3; proposed Item 14(a) of Form N–3; Item 11 of current Form N–4; proposed Item 13(a) of Form N–4; Item 9 of current Form N–6; proposed Item 12(a) of Form N–6. We have proposed certain changes to this item in Forms N–3 and N–4 to harmonize the requirements with

Continued

a brief summary on how to surrender (or partially surrender or make withdrawals from) a variable contract, including any limits on the ability to surrender, how withdrawal and surrender proceeds are calculated, and when they are payable. Given that variable contracts are long-term investments that may entail high surrender fees, it is important to clearly explain the withdrawal and surrender terms to new variable contract investors. Additional information on surrenders and withdrawals would appear in the statutory prospectus. For example, the statutory prospectus would also include more detailed information on partial surrenders and withdrawals, sub-account allocation, involuntary redemptions, and revocation rights (free look period).[187]

We request comment generally on the disclosure on surrenders and withdrawals that we propose would appear in the initial summary prospectus, and specifically on the following issues:

- Are the proposed requirements in the initial summary prospectus under the heading ''Surrendering Your Contract or Making Withdrawals: Accessing the Money in Your Contract'' clear and appropriate in light of the goals of the initial summary prospectus?
- Would this disclosure be useful to investors in connection with an initial purchase of a variable contract? Should this proposed content requirement include any additional, or any different, disclosure about making contract surrenders and withdrawals? For example, should it include one or more of the other disclosures required to be included in the statutory prospectus (*e.g.,* information on partial surrenders and withdrawals and revocation rights)?

(h) Additional Information About Fees

The proposed rule would require the initial summary prospectus to include the full Fee Table (including, for variable annuity contracts, the expense example), that would appear in the statutory prospectus, under the heading ''Additional Information About Fees.'' [188] The Fee Table provides detailed information on the fees and expenses investors will pay when buying, owning, and surrendering the contract, as well as those paid each year during the time the investor owns the contract.[189] We are proposing certain amendments to the Fee Table for each type of variable contract as discussed below in section II.D.2.d.

We are proposing to include the Fee Table in both the statutory prospectus and the initial summary prospectus because investor understanding of variable contract fees is particularly important given these products' layered fee structure and typically higher costs relative to other investment products. The Fee Table is intended to complement and build upon the high-level summary of contract fees and expenses in the Key Information Table by providing additional detail for those investors who may wish to review more comprehensive fee and expense information.[190]

We understand that some registrants currently prepare supplements to the contract prospectus that detail and modify certain fees and rates under the variable contract applicable to new investors (''rate sheets''). Current fees, withdrawal rates, and crediting rates associated with various contract benefits (for new sales) can change so frequently as to make filing of post-effective amendments to the registration statement with each change impractical. Instead, updated disclosure of current levels of these fees and rates is accomplished by filing a rate sheet as a supplement under rule 497 under the Securities Act. We do not believe that the proposed summary prospectus framework will affect the current practice of using rate sheets.[191]

We request comment generally on the Fee Table that we propose would appear in the initial summary prospectus, and specifically on the following issues:

- Are the proposed requirements in the initial summary prospectus under the heading ''Additional Information About Fees'' clear and appropriate in light of the goals of the initial summary prospectus?
- Would this disclosure be useful to investors in connection with an initial purchase of a variable contract? Would including the full Fee Table be consistent with the goal of providing a succinct summary of the contract's key terms and benefits and most significant risks, in a presentation that would improve readability and increase readership? Are there any particular line-items of the Fee Table, for either variable annuities or variable life insurance that could be omitted? Would only including summary information of the type that we propose to appear in the Key Information Table, either with or without a cross-reference or link to the full Fee Table, be more useful or appropriate for investors? Alternatively, would including only the full Fee Table, and not also the summary fee information in the Key Information Table, be more useful or appropriate for investors?
- Would registrants who elect to use the initial summary prospectus continue to prepare rate sheets? Would there be any additional burdens preparing rate sheets in this context? Should the staff guidance be modified in any way to accommodate the summary prospectus framework?

(i) Appendix: Portfolio Companies/ Investment Options Available Under the Contract

Finally, an initial summary prospectus would be required to include an appendix, under the heading ''Appendix: [Portfolio Companies/ Investment Options] Available Under the [Contract],'' that provides summary information in a tabular form about the portfolio companies or investment options offered under the contract.[192]

The appendix would include separate columns for each portfolio company's type (*e.g.,* money market fund, bond fund, balanced fund, etc.) or investment objective, the name of the portfolio company and its adviser or subadviser (as applicable), the portfolio company's expense ratio (expenses/average assets and, in the case of Form N–3, explicitly excluding optional benefit expenses), and its average annual total returns over the past 1-year, 5-year, and 10-year periods (in the case of Form N–3, explicitly excluding optional benefit

---

those of Form N–6. We have not proposed any changes to this item in Form N–6.

This proposed requirement is similar to the requirement for mutual fund summary prospectuses to include disclosure on procedures for redeeming shares. *See* rule 498(b)(2); Item 6 of Form N–1A.

[187] *See* proposed Item 14(b) through (f) of Form N–3; proposed Item 13(b) through (f) of Form N–4; proposed Item 12(b) through (e) of Form N–6.

[188] *See* proposed rule 498A(b)(5)(viii); *see also* Item 3 of Forms N–3, N–4, and N–6; proposed Item 4 of Forms N–3, N–4, and N–6.

The initial summary prospectus fee information would be the same as the Fee Table included in the contract statutory prospectus, modified as necessary to describe only a single contract that the registrant currently offers for sale. *See infra* section II.A.1.b.

[189] In addition, the Fee Table details the minimum and maximum total operating expenses the portfolio companies charge periodically, as well as an example intended to help the investor compare the cost of investing in different variable contracts.

[190] *See supra* section II.A.1.c.ii(b).

[191] For example, if the rate sheet is updating information in a summary prospectus or the statutory prospectus, the document should describe how the rate sheet works and the rate sheet itself should be affixed to the front of the document. The current rates should also be readily available on the website as part of the documents required to be posted online under proposed rule 498A and, as a best practice, separately on the website.

[192] *See* proposed rule 498A(b)(5)(ix); *see also* proposed Item 19 of Form N–3; proposed Item 18 of Form N–4; proposed Item 18 of Form N–6. Although these proposed Items would be new to Forms N–3, N–4, and N–6, each form currently requires disclosure of similar information.

expenses).[193] Registrants would be instructed to only include portfolio companies that are currently offered under the contract.[194] Additionally, if the availability of one or more portfolio companies varies by benefit offered under the contract, registrants would be required to include as another appendix a separate table indicating which portfolio companies were available under each of those benefits.[195]

A legend would precede the table. The first paragraph of the legend would state: ''The following is a list of [Investment Options/Portfolio Companies] currently available under the [Contract], which is subject to change as discussed in the [Statutory Prospectus for the Contract].'' [196] For registrants on Forms N–4 and N–6, the legend would also provide an internet address to a landing page, toll-free telephone number, and email address that investors could use to obtain portfolio company statutory and summary prospectuses.[197] For registrants on Form N–3, the legend would direct investors to the cover page of the initial summary prospectus to request the statutory prospectus for the registrant containing more information about the investment options.[198] The legend also could indicate, if applicable, that prospectuses and other information are available from a financial intermediary (such as an insurance agent or broker-dealer) distributing the contract.[199]

The second paragraph of the legend for variable contracts registered on Forms N–4 and N–6 would read as follows:

> The performance information below reflects fees and expenses of the [Portfolio Companies], but does not reflect the other fees and expenses that your contract may charge. Performance would be lower if these charges were included. Each [Portfolio Company's] past performance is not necessarily an indication of future performance.[200]

In contrast, because insurance charges are already reflected in the performance of the investment options for contracts registered on Form N–3, the second paragraph of the legend for variable annuities registered on Form N–3 would state:

> The performance information below reflects contract fees and expenses that are paid by each investor. Each [Investment Option's] past performance is not necessarily an indication of future performance. [201]

Because the investment experience of a variable contract investor will largely depend on his or her selection of portfolio companies (or investment options in the case of a variable annuity registered on Form N–3), we believe it is important for investors to receive an overview of the portfolio companies and investment options available under the contract in a uniform tabular presentation that promotes comparison.[202]

Investors in contracts registered on Forms N–4 and N–6 currently receive portfolio company prospectuses at or shortly after the point of sale, as well as each portfolio company's updated prospectus each year. As discussed below, we are proposing an optional delivery method, which would permit satisfaction of any portfolio company prospectus delivery obligations if the portfolio company summary and statutory prospectuses are posted at the website address specified on the variable contract summary prospectus.[203] The appendix is designed to complement the portfolio company prospectuses in a layered disclosure approach to provide the investor with an ability to choose the amount and type of information he or she prefers to review.

Alternatively, for variable contracts registered on Form N–3, registrants could omit the required appendix and instead provide more detailed disclosures for the investment options offered under the contract that would be required by proposed Item 20 of Form N–3.[204] Proposed Item 20 would require narrative disclosure for each investment option regarding its investment objectives and principal investment strategies, principal risks of investing in the investment option, and a bar chart and table showing the performance of the investment option modeled after the risk/return bar chart and table that Form N–1A currently requires.[205]

We request comment generally on the appendix that we propose would appear in the initial summary prospectus, and specifically on the following issues:

- Are the requirements of the proposed appendix, and the associated proposed instructions, clear and appropriate in light of the goals of the initial summary prospectus? Should we modify them in any way?
- Would the information included in the appendix and its proposed tabular presentation be useful to investors in connection with the initial purchase of a variable contract? Would other or additional information, or a different presentation, be more useful to investors?
- Are the particular disclosure items that we have proposed for inclusion in the appendix useful and appropriate for consideration by investors, or should we revise, supplement, or replace those items? Alternatively, or in addition, should we require any other disclosures contemplated by rule 482 (*e.g.,* a legend providing certain statements about the performance data and certain information about sales loads or performance fees)? [206]

---

[193] *See* Instructions 2–5 to proposed Item 19 of Form N–3; Instructions 2–5 to proposed Item 18 of Form N–4; Instructions 2–5 to proposed Item 18 of Form N–6.

For purposes of this discussion, we use the term ''portfolio company'' throughout, even though the appendix for Form N–3 registrants would use the term ''investment option.''

[194] *See* Instruction 1(b) to proposed Item 19 of Form N–3; Instruction 1(a) to proposed Item 18 of Form N–4; Instruction 1(a) to proposed Item 18 of Form N–6.

[195] *See* Instruction 1(c) to proposed Item 19 of Form N–3; Instruction 1(c) to proposed Item 18 of Form N–4; Instruction 1(c) to proposed Item 18 of Form N–6.

[196] *See* proposed Item 19 of Form N–3; proposed Item 18 of Form N–4; proposed Item 18 of Form N–6; proposed rule 498A(b)(5)(ix).

[197] For registrants on Forms N–4 and N–6, the legend would read as follows:

''Before you invest, you should review the prospectuses for the [Portfolio Companies]. These prospectuses contain more information about the [Portfolio Companies] and their risks and may be amended from time to time. You can find the prospectuses and other information about the [Portfolio Companies] online at [____]. You can request this information at no cost by calling [____] or by sending an email request to [____].''

See Instruction 1(b) to proposed Item 18 of Forms N–4 and N–6. Registrants on Forms N–4 and N–6 not relying upon rule 498A(j) with respect to the portfolio companies that are offered under the contract may, but would not be required to, provide the next-to-last sentence of the first paragraph of the introductory legend to the table regarding online availability of the prospectuses.

[198] For registrants on Form N–3, the legend would read as follows:

''More information about the [Investment Options] is available in [the Statutory Prospectus for the Contract], which can be requested at no cost by following the instructions on [the front cover page or beginning of the Summary Prospectus].''

See proposed rule 498A(b)(5)(ix).

[199] *See* Instruction 1(b) to proposed Item 18 of Forms N–4 and N–6; proposed rule 498A(b)(5)(ix).

[200] *See* proposed Item 18 of Form N–4; proposed Item 18 of Form N–6.

[201] *See* proposed Item 19 of Form N–3.

[202] In the context of participant-directed individual account plans under the Employee Retirement Income Security Act of 1974 (which, similar to variable contracts, are long-term, tax-advantaged investment vehicles whereby the investor may direct his or her investment among investment alternatives), a similar disclosure requirement applies. *See* 29 CFR 2550.404a 5(d).

[203] *See infra* section II.B.

[204] *See* proposed rule 498A(b)(5)(ix).

[205] *See* text following note 525 (discussing proposed Item 20 of Form N–3); *see also* Item 4(b)(2) of Form N–1A.

[206] *See* rule 482(b)(3) (requiring, among other things: (1) A legend disclosing that the performance data quoted represents past performance; that past performance does not guarantee future results; that the investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less

Continued

• The proposed instructions would provide that if the availability of one or more portfolio companies varies by benefit offered under the contract, registrants must include as another appendix a separate table indicating which portfolio companies were available under each of those benefits. Should this information be provided in a separate table? Why or why not? Are there ways to present this information in a more streamlined and comprehensible manner for investors? If so, how?

• Under our proposal, an initial summary prospectus for a contract registered on Form N–3 could omit the appendix and instead include the more detailed disclosures about the investment options offered under the contract that would be required by proposed Item 20 of Form N–3. Alternatively, in order to increase comparability between initial summary prospectuses, should the appendix be required to be included in all initial summary prospectuses for contracts registered on Form N–3? Conversely, should the initial summary prospectus be required to contain the more detailed disclosures that would be required by proposed Item 20 of Form N–3?

d. General Requests for Comment on the Initial Summary Prospectus

In addition to the specific requests for comment above on the proposed scope and content requirements of the initial summary prospectus, we also request comment generally on the initial summary prospectus, and specifically on the following issues:

• Is an initial summary prospectus an appropriate vehicle to highlight the importance of key terms, benefits, and risks of a variable contract? What are the key considerations for an initial investment in the contract? Does the proposed initial summary prospectus capture key considerations that a typical contract investor would find salient? Should an initial summary prospectus include additional information an investor would need in order to make an informed investment decision, and if so, what would this information be? Would this defeat our goal of providing investors a succinct summary?

• Should we exclude any of the proposed initial summary prospectus disclosure? Should we require any additional information to appear in the initial summary prospectus, such as from the contract's statutory prospectus, SAI, or Part C (''Other Information'') of the registration statement?

• We are proposing to require an initial summary prospectus to contain the information required by the proposed rule, and only that information, in a specified order to facilitate comparability (similar to the mutual fund summary prospectus model). Should all items in the initial summary prospectus be presented in the same order, under the headings that the proposed rule specifies? Would this promote comparability across products, and is comparability as feasible for variable products as it is mutual funds? Why or why not? If the items are not listed in the same order, could investors or investment professionals still easily compare different variable contracts? Is the proposed order appropriate, or should we consider a different order? Should the rule require ordered navigation links for electronic versions of the summary prospectus?

• Should we, as proposed, limit the information to be included in the initial summary prospectus, or should we allow registrants to include other information that is not specifically called for? We recognize that variable contracts are complex investment products, and some may have product features that are not contemplated by the current disclosure items. Should we permit registrants to disclose information not specifically required by the proposed rule to provide sufficient flexibility for the disclosure of future product developments or otherwise enhance disclosures to investors? Would that undermine the goal of comparability, or contribute to investor confusion? Are there other ways we could provide this flexibility?

• Should we impose any page or word limits on the initial summary prospectus (*e.g.,* 10 pages or 2,500 words)? If so, what should the page or word limits be (*e.g.,* how many pages or words, and should these limits apply to the whole initial summary prospectus or include or exclude certain sections of it)? Would page or word limits disadvantage certain types of registrants (*e.g.,* variable contracts that offer a relatively high number of optional benefits) over others, or unduly limit investors' ability to receive important disclosure information? Are there other ways we could encourage concise and investor-friendly disclosure?

• Is the information that we propose to require in the body or appendix of the initial summary prospectus appropriate? Should we include any additional information or eliminate any of the information that we have proposed to include? Should any information in the body (*e.g.,* the ''Additional Information About Fees'' section) be moved from the body to an appendix or vice versa?

• Would investors be more likely to read an initial summary prospectus if we required the use of certain design elements—such as larger font sizes or greater use of white space, colors, or visuals—or provided additional guidance on such design elements? If so, what should this disclosure requirement be? Would any of the proposed content requirements particularly benefit from the use of such design elements?

• Should registrants creating electronic versions of the initial summary prospectus be required to include active hyperlinks for website addresses referenced in the electronic version, as would be required under our proposal? What concerns would be raised, if any, if those website addresses were third-party websites? Should registrants creating electronic versions of the initial summary prospectus be required to include active hyperlinks for any cross-references, as would be required under our proposal?

• Should registrants creating electronic versions of the initial summary prospectus be allowed to use alternatives to any tabular presentations, such as the table(s) included in Appendix: Portfolio Companies/Investment Options Available Under the Contract, provided the information is presented in an easy to read and comparable manner? If so, should there be additional conditions on the use of these alternatives? What should those conditions be?

• Should we offer registrants greater flexibility to design summary prospectuses that can be viewed on mobile devices, are interactive, have audio or video features, or otherwise make use of technology and research about effective disclosure methods? If so, how can we allow flexibility while ensuring that investors receive the information they need to make their investment decisions?

• To what extent is the information proposed to be required in the initial summary prospectus duplicative of information provided in other point-of-sale disclosure documents (including those required under other regulatory regimes)?

• Would the initial summary prospectus, as proposed, appropriately complement current disclosure practices by not unnecessarily duplicating disclosure topics investors receive through other channels, and

than their original cost; that current performance may be lower or higher than the performance data quoted; and (2) if a sales load or any other nonrecurring fee is charged, the maximum amount of the load or fee, and if the sales load or fee is not reflected, a statement that the performance data does not reflect the deduction of the sales load or fee, and that, if reflected, the load or fee would reduce the performance quoted).

highlighting key risks that investors may not learn about through other channels?

• Are there any aspects of the initial summary prospectus that should be made to conform to parallel provisions in the updating summary prospectus or potential changes to those proposed parallel provisions? Conversely, are there any potential changes to the proposed updating summary prospectus that should not be made to the proposed initial summary prospectus?

• Is the hypothetical initial summary prospectus in Appendix A useful and illustrative of the proposed requirements? Does it appropriately show the level of detail that firms might provide, and are any of the design elements that the hypothetical initial summary prospectus uses particularly effective (or if they could be made more effective, how so)?

2. Updating Summary Prospectus

a. Overview

Today, variable contract investors are typically sent a copy of the updated current contract statutory prospectus each year.[207] Proposed rule 498A would permit a person to satisfy contract prospectus delivery obligations with respect to existing investors by sending or giving an updating summary prospectus in lieu of the statutory prospectus.[208]

We are not proposing that registrants send an updated initial summary prospectus to investors each year, due in part to the cost to maintain and update separate initial summary prospectuses for currently-offered variable contracts and those no longer offered. Additionally, we believe that existing investors would benefit more from a brief summary of the changes to the contract reflected in the statutory prospectus than to the disclosures in the initial summary prospectus, which is designed for someone making an initial investment decision.

We have therefore designed the updating summary prospectus to provide a brief description of any important changes with respect to the contract that occurred within the prior year, which will allow investors to better focus their attention on new or updated information relating to the contract. Additionally, the updating summary prospectus would include certain of the information required in the initial summary prospectus that we consider most relevant to investors when making additional investment decisions or otherwise monitoring their contract.

Finally, a registrant may only use an updating summary prospectus if it uses an initial summary prospectus for each currently offered contract described under the contract statutory prospectus to which the updating summary prospectus relates.[209] We believe that making the use of the updating summary prospectus contingent on use of the initial summary prospectus for each currently offered contract will encourage registrants to utilize the summary prospectus framework and provide a more consistent disclosure experience to investors.

b. Scope of Disclosure To Be Included in Updating Summary Prospectus

The proposed rule would permit the updating summary prospectus to describe one or more contracts covered in the statutory prospectus to which the updating summary prospectus relates.[210] This scope is different than the initial summary prospectus, which the proposed rule would limit to only describing a single contract that the registrant currently offers for sale.[211] Similar to the initial summary prospectus, however, the proposed rule also would permit an updating summary prospectus to describe more than one class of a contract.[212]

Given the limited subset of information provided in the updating summary prospectus, we believe permitting registrants to combine multiple contracts would not cause investor confusion in the same way that combining disclosure about multiple contracts in the initial summary prospectus might. Furthermore, we understand that there are generally not a significant number of changes that occur to an individual contract year-over-year, and many of those changes (such as changes to the available portfolio companies or the addition of new optional benefits) typically apply across multiple contracts described in the same prospectus. We therefore believe the section describing contract changes, even if changes to multiple contracts are included, would not be overly lengthy, and would not prevent investors from reading or understanding the applicable disclosures.[213] Finally, combining multiple contracts could make the updating summary prospectus significantly more efficient for registrants to produce and distribute.[214]

We request comment generally on the proposed scope requirements for the updating summary prospectus, and specifically on the following issues:

• Is it appropriate to permit the updating summary prospectus to include multiple contracts under the statutory prospectus to which the updating summary prospectus relates? Would this approach promote operational efficiency? What other benefits would this approach entail? What drawbacks would this approach entail? Would this approach discourage investors from reading the updating summary prospectus? Would it confuse investors, and if so, should the proposed rule incorporate any additional provisions (or should we issue guidance) to help mitigate potential confusion? Would it prevent investors from reading or understanding the disclosures, and if so, what additional rule provisions or guidance could help mitigate this? Would the proposed disclosure requirement make clear to an investor whether a particular disclosure about year-over-year changes applies to that investor's contract? Should we require that an updating summary prospectus that includes disclosure about multiple contracts be formatted or presented in a certain way to help promote clarity to investors regarding whether a particular disclosure in the document concerns an investor's particular contract? Are there any other additions to the updating summary prospectus that would help promote clarity to investors on this point?

• Alternatively, what would be the benefits of requiring registrants to create a separate updating summary prospectus for each contract, similar to the requirement for the initial summary prospectus? Would this alternate approach be operationally burdensome, and if so, why? Would it enhance investor understanding? Would it reduce investor confusion?

• Should we restrict the number of contract classes that may be described in an updating summary prospectus? Why or why not?

c. Preparation of the Updating Summary Prospectus

The following chart outlines the information that would be required in an updating summary prospectus under proposed rule 498A. Along with specifying required cover page

[207] As discussed above, investors generally must be provided with a prospectus when they make additional purchase payments or reallocate variable contract value. *See supra* notes 27 through 29 and accompanying text. We are proposing to provide that an updating summary prospectus that complies with the rule will be deemed to be a prospectus that is permitted under section 10(b) of the Securities Act and section 24(g) of the Investment Company Act for the purposes of section 5(b)(1) of the Securities Act.

[208] Proposed rule 498A(c).

[209] Proposed rule 498A(c)(1).

[210] Proposed rule 498A(c)(2).

[211] *See supra* section II.A.1.b.

[212] Proposed rule 498A(c)(2); *see also supra* section II.A.1.b (an initial summary prospectus also can describe more than one class of a currently-offered contract).

[213] A registrant generally should indicate in this section, to the extent appropriate, whether certain described contract changes are only applicable to certain contracts in the statutory prospectus.

[214] Multiple updating summary prospectuses (with very similar sounding names) could also make it difficult for investors to locate their specific updating summary prospectus on the insurer's website.

disclosures, the proposed rule references particular disclosure items from Forms N–3, N–4, and N–6 (as proposed to be amended). The information would be required to appear in the same order, and under the relevant corresponding headings, as the proposed rule specifies.[215]

TABLE 3—OUTLINE OF THE UPDATING SUMMARY PROSPECTUS

Heading in updating Summary prospectus	Proposed item of Form N–3	Proposed item of Form N–4	Proposed item of Form N–6
Cover Page:			
Identifying Information			
Legends			
EDGAR Contract Identifier			
Table of Contents (optional)			
Content:			
Updated Information About Your Contract			
Important Information You Should Consider About the [Contract]	3	3	3
Appendix: Portfolio Companies Available Under the Contract	19 or 20[216]	18	18

i. Cover Page and Table of Contents

Identifying Information. Under the proposed rule, the following information would be required to appear on the front cover page or at the beginning of the updating summary prospectus:

- The depositor's name;
- the registrant's name;
- the name of the contract(s), and the class or classes, if any, to which the updating summary prospectus relates;
- a statement identifying the document as an ''Updating Summary Prospectus''; and
- the approximate date of the first use of the updating summary prospectus.[217]

Legend. The cover page or beginning of the updating summary prospectus would be required to include the following legend:

You should read this Summary Prospectus carefully, particularly the section titled Important Information You Should Consider About the [Contract].

An updated prospectus for the [name of Contract] is currently available online, which contains more information about the [Contract], including its features, benefits, and risks. You can find the prospectus and other information about the [Contract] online at [____]. You can also obtain this information at no cost by calling [____] or by sending an email request to [____].[218]

Additional general information about certain investment products, including [variable annuities/variable life insurance contracts], has been prepared by the Securities and Exchange Commission's staff and is available at *Investor.gov*.[219]

Like the cover page or beginning of the initial summary prospectus, the cover page or beginning of the updating summary prospectus would be required to include identifying information about the variable contract, as well as a legend including certain general information that would be applicable to all variable contracts. The portions of the proposed legend that describe how to obtain further information about the contract, as well as the *Investor.gov* website, are identical to the parallel portions of the legend that would appear on the cover page or beginning of the initial summary prospectus.[220] As with the initial summary prospectus, a registrant could modify this required legend so long as the modified legend includes comparable information.[221] Similar to the initial summary prospectus, if a registrant incorporates any information by reference into the updating summary prospectus, the proposed rule would require the registrant to include in the legend certain information about the document(s) from which the information was incorporated.[222] Like the initial summary prospectus, the cover page for the updating summary prospectus would also be required to include a legend indicating that the Securities and Exchange Commission has not approved or disapproved of the contract or the summary prospectus.[223]

We do not believe that the free look period legend that would appear on the cover page or beginning of the initial summary prospectus would be appropriate in the context of the updating summary prospectus, because the free look period is not applicable to additional investments after the initial purchase.

EDGAR Contract Identifier. We are also proposing to require that the EDGAR contract identifier for each contract covered by the updating summary prospectus be included on the bottom of the back cover page or last page of the updating summary prospectus in a type size smaller than that generally used in the prospectus (*e.g.,* 8-point modern type).[224]

Table of Contents. The proposed rule would permit an updating summary prospectus, like the initial summary prospectus, to include a table of contents.[225] A table of contents must show the page number of the various sections or subdivisions of the prospectus and must immediately follow the cover page in any prospectus delivered electronically.[226]

We request comment generally on the proposed requirements for the cover page of the updating summary prospectus, and specifically on the following issues:

- Is the information that we propose to require on the cover page or beginning of the updating summary prospectus appropriate? Should we include any additional information or eliminate any of the information that we have proposed to include in these parts of the updating summary prospectus?
- Is the proposed legend sufficient to notify investors of the availability and significance of the contract statutory prospectus and other information about the variable contract and how to obtain this information? For example, should the legend

[215] Proposed rule 498A(c)(6).

[216] Registrants on Form N–3 could omit the appendix specified by proposed Item 19 of Form N–3, and instead provide the more detailed disclosures about the investment options offered under the contract required by proposed Item 20 of Form N–3. *See infra* note 517 and accompanying text.

[217] Proposed rule 498A(c)(3)(i) through (v).

[218] *See supra* note 79 (discussing requirements of the registrant's internet address and contact information).

[219] Proposed rule 498A(c)(3)(vi).

[220] Proposed rule 498A(b)(2)(vi); *see also supra* note 79. The legend in the updating summary prospectus would note that ''an updated prospectus'' is available online, whereas the initial summary prospectus would note that it summarizes key features of the contract.

[221] Proposed rule 498A(c)(3)(vi); *see also* proposed rule 498A(b)(2)(vi)(A).

[222] *See infra* section II.A.6.

[223] Proposed rule 498A(c)(3)(vii); *see also supra* note 86.

[224] Proposed rule 498A(c)(4). As in the case of the initial summary prospectus, this requirement is intended to enable Commission staff and others to more easily link the updating summary prospectus with other filings associated with the contract.

[225] Proposed rule 498A(c)(5).

[226] Rule 481(c).

include greater detail about the information that is available?

- Does the proposed legend adequately inform investors of the various means for obtaining additional information about a variable contract? For example, are the proposed requirements for the website address where additional information is available adequate to ensure that the website and the additional information will be easy to locate?
- As proposed, should we permit registrants to modify the required legend, provided the modified legend includes comparable information?
- Should the requirement in proposed rule 498A to include the EDGAR contract identifier for each contract covered by the updating summary prospectus on the bottom of the back cover page or last page of the updating summary prospectus be revised to list another identifier? If so, what identifier should be listed, and why?
- Should registrants be permitted to include a table of contents in the updating summary prospectus? Instead, should a table of contents be required for any updating summary prospectus? Does rule 481(c) under the Securities Act provide appropriate requirements for a table of contents included in an updating summary prospectus?

ii. Content of the Updating Summary Prospectus

Proposed rule 498A specifies the content and order thereof required in an updating summary prospectus.[227] An updating summary prospectus must contain the information required by the proposed rule in the specific order detailed in section II.A.2.c. Similar to the initial summary prospectus and the summary prospectus for mutual funds, adhering to these content requirements is one condition that an updating summary prospectus must satisfy in order to be deemed to be a prospectus that is permitted under section 10(b) of the Securities Act and section 24(g) of the Investment Company Act for the purposes of section 5(b)(1) of the Securities Act.[228] To aid market participants in understanding the types of disclosures we propose to require, Appendix B to this release contains a hypothetical updating summary prospectus for a variable annuity separate account with a registration statement filed on Form N–4. This hypothetical updating summary prospectus is provided solely for illustrative purposes and is not intended to imply that it reflects a ''typical'' updating summary prospectus.

(a) Description of Changes to the Contract

The updating summary prospectus would be required to include a concise description of any change with respect to the contract made after the most recent updating summary prospectus or statutory prospectus was sent or given to investors that has affected the availability of portfolio companies (or investment options under a variable annuity registered on Form N–3) under the contract,[229] or the statutory prospectus disclosure relating to the Fee Table,[230] the standard death benefit,[231] and the other benefits available under the contract.[232] The updating summary prospectus also could include a concise description of any other changes to the contract that the registrant wishes to disclose, provided they occurred within the same time period.[233]

These contract changes would be described under the heading ''Updated Information About Your [Contract].'' [234] This legend would be required to follow the heading:

> The information in this [Updating Summary Prospectus] is a summary of certain [Contract] features that have changed since the [Updating Summary Prospectus] dated [date]. This may not reflect all of the changes that have occurred since you entered into your Contract.[235]

We designed this disclosure requirement in light of the fact that disclosures in a contract statutory prospectus do not change frequently, and we believe providing investors with notice and a brief description of any changes that do occur may be more informative than repeating all the disclosures year-over-year. We believe that notice of these changes is particularly helpful, given that currently investors must determine which, if any, disclosures relevant to their particular contract have changed each year they receive the contract statutory prospectus. After receiving notice and a brief description of certain changes, an investor who then wishes to obtain more information on specific changes can consult the contract statutory prospectus to review related disclosures in more detail. We believe that highlighting certain key changes with respect to the contract in the updating summary prospectus will provide important information to investors that they can use in considering whether to continue making additional purchase payments or reallocate contract value.

We would require the disclosure of changes with respect to these particular disclosure topics (Fee Table, the standard death benefit, other benefits available under the contract, and portfolio companies available under the contract) because these are the areas where we understand contract-related changes are most likely to occur, and that may be of most interest to investors. We believe that permitting—but not requiring—a concise description of any additional changes will provide flexibility to registrants to highlight for investors any additional changes. The requirement to disclose contract-related changes to investors is particularly relevant for variable contracts, since the length of statutory prospectus disclosure may hinder investors in identifying important year-over-year changes to contract features.

In providing a concise description of a contract-related change in the updating summary prospectus, registrants must provide enough detail to allow investors to understand the change and how it will affect them.[236] For example, this could include stating that a fee has changed from 1.5% to 1.7%, rather than stating that the fee has changed or increased, or specifically identifying each optional benefit that has changed (with a brief explanation of how), rather than generically stating that certain optional benefits are new or no longer available. As another example, if a portfolio company's expense ratio has changed, a registrant generally should describe this in the body of the updating summary prospectus even though expense ratio information would also appear in the required appendix to the updating summary prospectus, in order to highlight this change to investors.

We request comment generally on the brief description of certain contract-related changes that we propose would appear in the updating summary prospectus, and specifically on the following issues:

- Would this proposed disclosure requirement be useful to investors? Would understanding the information that would appear in an updating summary prospectus in response to the proposed requirement be

[227] Proposed rule 498A(c)(6).

[228] *See supra* note 93.

[229] Proposed rule 498A(c)(6)(i). A change that has affected availability of portfolio companies (or investment options) would include changes in the portfolio companies (or investment options) offered under the contract or available in connection with any optional benefit. *See also* proposed Item 19 of Form N–3, and proposed Item 18 of Forms N–4 and N–6.

[230] Proposed rule 498A(c)(6)(i); *see also* proposed Item 4 of Forms N–3, N–4, and N–6.

[231] Proposed rule 498A(c)(6)(i); *see also* proposed Item 11 of Forms N–3; proposed Item 10 of Forms N–4 and N–6.

[232] Proposed rule 498A(c)(6)(i); *see also* proposed Item 12 of Forms N–3; proposed Item 11 of Forms N–4 and N–6.

[233] Proposed rule 498A(c)(6)(ii). Any additional information included should not, by its nature, quantity, or manner of presentation, obscure or impede understanding of the information that the proposed rule would require.

[234] Proposed rule 498A(c)(6)(i).

[235] Proposed rule 498A(c)(6)(i)(A).

[236] Proposed rule 498A(c)(6)(i)(B).

relevant and helpful to an investor who is considering whether to continue making additional purchase payments, or reallocate contract value? Would disclosure of changes to multiple contracts confuse the reader or discourage reading the document, and if so, what additional rule provisions or guidance could help mitigate this?

- Is the scope of changes that a registrant may discuss in the updating summary prospectus appropriate? Are there other topics that should be described in the updating summary prospectus (*e.g.,* changes that affect the contract's risks or potential conflicts of interest)? Should the proposed rule instead require a registrant to provide a concise description of ''significant changes,'' ''material changes,'' or some other standard instead of prescribing specific disclosure topics? Is there a better way of identifying these specific disclosure topics, and if so, what would this be?
- Is it appropriate to allow registrants to discuss any other changes that have been made to the contract during the same time period in this section? Should registrants also be allowed to discuss matters that do not directly involve the contract (*e.g.,* upcoming tax law changes or merger and acquisition activity involving the registrant)? Why or why not?
- Is the proposed requirement that a registrant include a ''concise description'' of each change clear and appropriate? Would registrants understand what level of disclosure they should include? Would any additional clarification in the rule text or Commission guidance be helpful?

(b) Key Information

The updating summary prospectus also would be required to include the same Key Information Table that would appear in the initial summary prospectus.[237] As discussed above, this table would streamline certain important concepts about the variable contract in a presentation that is designed to be easy to read and navigate.[238]

Because investors may make additional investments in the variable contract, we propose to require this disclosure in the updating summary prospectus to remind them of the contract's fees and expenses, risks, restrictions, tax implications, and investment professional compensation. Furthermore, we believe that an investor who continues to make investments in the variable contract (or to reallocate contract value)—not just an initial investor in the contract—should receive the benefit of this disclosure in a presentation that is intended to improve readability and readership.

Besides the brief description of contract-related changes and portfolio company/investment option appendix discussed below, an updating summary prospectus would include only this Key Information Table as summary disclosure about the contract's key information, and would not also include the additional disclosure that the initial summary prospectus would include (for example, additional information about standard and optional contract benefits, or the contract Fee Table). We believe this is appropriate in the context of an updating summary prospectus for several reasons.

First, unless the investor invested prior to the registrant relying on rule 498A, the investor already will have received the initial summary prospectus (and have had access to the statutory prospectus), which includes this extra detail. Additionally, the updating summary prospectus draws on layered disclosure concepts, where the investor can access the more detailed statutory prospectus electronically (or in paper format on request) to complement the disclosure included in the updating summary prospectus.

An updating summary prospectus that describes multiple contracts could contain a separate Key Information Table for each of the contracts, or use a different presentation approach that consistently discloses the required information for each contract in the required order. For example, if the only Key Information Table disclosure that would vary by contract were the fee information, a prospectus that describes multiple contracts could include a single Key Information Table that discloses separate fee information in the ''Fees and Expenses'' line-items for each contract.

We request comment generally on including the Key Information Table in the updating summary prospectus, and specifically on the following issues:

- Should we require including the proposed Key Information Table in the updating summary prospectus? Would this table provide a succinct summary of the contract's key information for investors who make ongoing purchase payments, or who reallocate contract value? If not, why not?
- Is the location of the proposed Key Information Table within the updating summary prospectus appropriate? If not, where should it be located?
- Should the table include, as proposed, the same line-items as the Key Information Table that would appear in the initial summary prospectus? Instead should we require a modified version of the table in the updating summary prospectus, and if so, how should we modify the table? For example, is it appropriate or necessary for the table that appears in the updating summary prospectus to include a line-item on investment professional compensation? Is it important to require the disclosure that investors should only exchange their contract if they determine, after comparing the features, fees, and risks of both contracts, that it is preferable for them to purchase the new contract rather than continue to own the existing contract?
- Should the presentation of the proposed table in the updating summary prospectus differ from the proposed presentation for the initial updating prospectus? If so, why, and what would be a better alternate presentation?
- Should we mirror the approach taken with the initial summary prospectus where cross-references in the Key Information Table for electronic versions of the updating summary prospectus would link directly to the location in the statutory prospectus where the subject matter is discussed in greater detail? If so, why? What would be a better approach?
- Are there any particular instructions for the Key Information Table that we should modify for the updating summary prospectus?

(c) Appendix: Portfolio Companies Available Under the Contract

Finally, the updating summary prospectus would be required to include an appendix, under the heading ''Appendix: [Portfolio Companies/Investment Options] Available Under the [Contract],'' that provides summary information about the portfolio companies offered under the contract.[239] This requirement for the appendix would be identical to the requirement for the appendix in the initial summary prospectus.[240] Like the proposed requirement for the initial summary prospectus appendix, Form N–3 registrants could omit this appendix and instead provide the more detailed disclosures about the investment options offered under the contract that would be required by proposed Item 20 of Form N–3.[241]

Because the selection of portfolio companies or investment options will directly affect the performance, and

[237] Proposed rule 498A(c)(6)(iii). This disclosure would be the same information required by Item 3 of Forms N–3, N–4, and N–6.

[238] *See supra* section II.A.1.c.ii.*(b).*

[239] Proposed rule 498A(c)(6)(iv). This information on portfolio companies or investment options would be the same information required by proposed Item 19 of Form N–3 and proposed Item 18 of Forms N–4 and N–6.

[240] Paralleling a similar requirement for the initial summary prospectus, if the appendix includes the information required by Item 19 of Form N–3, the appendix would also include the following introductory legend: ''The following is a list of [Investment Options] currently available under the [Contract], which is subject to change as discussed in the [Statutory Prospectus for the Contract]. More information about the [Investment Options] is available in [the Contract Statutory Prospectus], which can be requested at no cost by following the instructions on [the front cover page or beginning of the Summary Prospectus].'' *See* proposed Item 19 of Form N–3; proposed rule 498A(c)(6)(iv).

[241] *See* proposed rule 498A(c)(6)(iv); *see also* text following note 525 (discussing proposed Item 20 of Form N–3).

often the available optional benefits, of the contract, we believe that it is necessary to provide basic information about the portfolio companies to ongoing investors in variable contracts. This disclosure is intended to remind investors of one of the most important decisions they face during the life cycle of a contract—that is, whether and where to allocate additional purchase payments and reallocate contract value among the portfolio companies or investment options available to them.

We request comment generally on the appendix that we propose to require in the updating summary prospectus, and specifically on the following issues:

- Are the requirements of the proposed appendix clear and appropriate in light of the goals of the updating summary prospectus?
- Would the information that would be included in this appendix be useful to an investor who is considering whether to continue making additional purchase payments, or reallocate contract value? Would other or additional information be more useful to investors? For example, should the appendix identify portfolio companies that have been added, or portfolio companies that have been removed or closed to additional investment, during the period covered by the update?
- Should we, as proposed, permit a Form N–3 registrant to omit the appendix and instead include the more detailed disclosures about the investment options offered under the contract that would be required by proposed Item 20 of Form N–3? Are the considerations regarding the inclusion of the appendix in a Form N–3 registrant's updating summary prospectus the same or different as in the context of the initial summary prospectus?

d. General Requests for Comment on the Updating Summary Prospectus

In addition to the specific requests for comment above on the proposed content requirements and scope of the updating summary prospectus, we also request comment generally on the updating summary prospectus, and specifically on the following issues:

- Should we consider any alternative approaches to the proposed framework of two distinct summary prospectuses (the initial summary prospectus and the updating summary prospectus)? For example, should all variable contract investors receive a summary prospectus with identical content? As another example, should the proposed rule provide that only initial contract purchasers would receive a summary prospectus, and afterwards, investors who make additional purchase payments, or who reallocate contract value, would receive no summary prospectus (or receive only a notice that the statutory prospectus is available online)?
- Should we permit the use of an updating summary prospectus if a registrant does not use an initial summary prospectus for each currently offered contract described under the contract statutory prospectus to which the updating summary prospectus relates?
- Does the information in the proposed updating summary prospectus capture the information that is most likely to change from year to year, and that is most important for investors when considering whether to make additional purchase payments, or reallocate contract value? Should any of the information that we propose to require in the updating summary prospectus not be required? Should we require disclosure of any additional information (such as additional information that we propose to include in the initial summary prospectus) in the updating summary prospectus?
- Should we consider changing the proposed order in which the disclosure items would appear in the updating summary prospectus?
- Should we impose any page or word limits on the updating summary prospectus (*e.g.,* 10 pages or 2,500 words)? If so, what should the page or word limits be (*e.g.,* how many pages or words, and should these limits be on the whole updating summary prospectus or certain sections of it)? Are there other ways we could encourage concise and investor-friendly disclosure?
- Is the information that we propose to require in the body and appendix of the updating summary prospectus appropriate? Should we include any additional content requirements or modify or eliminate any of the content requirements? Should any information in the body be moved to an appendix, or vice versa?
- Would investors be more likely to read an updating summary prospectus if we required the use of certain design elements—such as larger font sizes or greater use of white space, colors, or visuals—or provided additional guidance on such design elements? Would any of the proposed content requirements particularly benefit from the use of such design elements?
- Would the updating summary prospectus, as proposed, appropriately complement current disclosure practices by not unnecessarily duplicating disclosure topics investors receive through other channels, and highlighting key risks that investors may not learn about through other channels?
- Should registrants creating electronic versions of the updating summary prospectus be required to include active hyperlinks for website addresses referenced in the electronic version, as would be required under our proposal? What concerns would be raised, if any, if those website addresses were third-party websites? Should registrants creating electronic versions of the initial summary prospectus be required to include active hyperlinks for any cross-references, as would be required under our proposal?
- Should we offer registrants greater flexibility to design summary prospectuses that can be viewed on mobile devices, are interactive, have audio or video features, or otherwise make use of technology and research about effective disclosure methods? If so, how can we allow such flexibility while still ensuring that investors receive the information they need to make their investment decisions?
- Are there any aspects of the updating summary prospectus that should be made to conform to parallel provisions in the initial summary prospectus or potential changes to those proposed parallel provisions? Conversely, are there any potential changes to the proposed initial summary prospectus that should not be made to the proposed updating summary prospectus?
- Is the hypothetical updating summary prospectus in Appendix B useful and illustrative of the proposed requirements? Does it appropriately show the level of detail that firms might provide?

3. Legal Effect of Use of Summary Prospectus for Variable Contracts

Section 5(b)(2) of the Securities Act makes it unlawful to carry or cause to be carried a security for purposes of sale or for delivery after sale ''unless accompanied or preceded'' by a statutory prospectus.[242] Proposed rule 498A would provide that, for variable contract securities in an offering registered on Forms N–3, N–4, or N–6, the use of a summary prospectus could satisfy this section 5(b)(2) obligation under certain conditions. As under rule 498, use of the summary prospectus to satisfy a registrant's section 5(b) obligation would be voluntary.[243]

First, a person relying on the proposed rule would be required to send or give a summary prospectus to an investor no later than the time of the ''carrying or delivery'' of the contract security.[244] This summary prospectus would be an initial summary prospectus in the case of an initial purchase of a variable contract, or an updating summary prospectus in the case of additional investments in a variable contract previously purchased.[245]

Second, the summary prospectus could not be bound together with any other materials, except that we are permitting portfolio company summary and statutory prospectuses to be bound together with the contract summary

[242] 15 U.S.C. 77e(b)(2) (stating that it shall be unlawful for any person to carry or cause to be carried through the mails or in interstate commerce any such security for the purpose of sale or for delivery after sale, unless accompanied or preceded by a prospectus that meets the requirements of Securities Act section 10(a)); *see also supra* note 27 (noting that the term ''statutory prospectus'' means a prospectus that meets the requirements of section 10(a) of the Securities Act).

Because the requirements of section 5(b)(2) of the Securities Act are applicable to ''any person,'' its obligations are applicable to financial intermediaries through whom variable contracts are sold, as well as variable contract issuers.

[243] *See supra* notes 60 through 63 and accompanying text.

[244] *See supra* note 242 (discussing the prohibition against carrying or delivering a security without otherwise accompanying it or preceding it with a statutory prospectus).

[245] Proposed rule 498A(f)(1); *see also supra* note 207 and accompanying text.

prospectus,[246] subject to certain conditions.[247] Third, the summary prospectus also would be required to meet the proposed rule's content requirements for an initial summary prospectus or updating summary prospectus (as appropriate).[248] Finally, the initial summary prospectus, updating summary prospectus, contract statutory prospectus, and contract SAI must be publicly accessible, free of charge, on a website in the manner that the proposed rule specifies.[249] Failure to comply with any of these requirements would prevent a person from relying upon the proposed rule to meet its section 5(b)(2) prospectus delivery obligations. Absent satisfaction of the section 5(b)(2) obligation by other available means, a section 5(b)(2) violation would result.[250]

The proposed rule also would provide that a communication relating to an offering registered on Forms N–3, N–4, or N–6 that a person sends or gives after the effective date of a variable contract's registration statement (other than a prospectus that section 10 of the Securities Act permits or requires) would not be deemed a prospectus under section 2(a)(10) of the Securities Act if:

(1) It is proved that prior to or at the same time with such communication a summary prospectus was sent or given to the person to whom the communication was made;

(2) the summary prospectus meets the same binding requirements that we discuss in the immediately-preceding paragraph;

(3) the summary prospectus that was sent or given satisfies the requirements for the initial summary prospectus or the updating summary prospectus, as applicable; and

(4) the initial summary prospectus, updating summary prospectus, contract statutory prospectus, and contract SAI are publicly accessible, free of charge, on a website in the manner that the proposed rule specifies.[251]

Section 2(a)(10) of the Securities Act provides that certain communications accompanied or preceded by a statutory prospectus are not deemed to be ''prospectuses'' for purposes of the Securities Act.[252] This provision of the proposed rule, which is modeled on a corresponding provision of rule 498,[253] extends similar treatment to communications accompanied or preceded by a summary prospectus if all the provision's conditions are met. These communications remain subject to the general antifraud provisions of the federal securities laws.[254]

Because we believe that all investors should receive the benefit of the succinct, investor-friendly disclosure that is included in the variable contract summary prospectus, all of the disclosure items that would appear in the summary prospectus also would be required to appear in the statutory prospectus. In that respect, all variable contract investors, regardless of whether the product they choose has a summary prospectus, would have the benefit of improved disclosures in the statutory prospectus.

We request comment generally on the proposal to permit a new option for prospectus delivery for variable contracts, and specifically on the following issues (in addition, we are requesting comment on certain parallel provisions of rule 498):

- Should we permit a person to satisfy its prospectus delivery obligations under the Securities Act with respect to variable contracts in the manner provided in the proposed rule? Would this approach provide investors with material information about the variable contract while providing adequate protections?
- Are there other delivery approaches that would be more effective than the proposed approach? For example, should we permit a person to satisfy its prospectus delivery obligations by filing a statutory prospectus with the Commission and by posting it online without using a summary prospectus?
- Is the proposed approach appropriate given the current demographics of variable contract investors? For example, does the proposed approach adequately protect investors who have no internet access or limited internet access or who prefer not to receive information about their variable contract investments over the internet? As another example, given the high percentage of investors who use an investment professional when purchasing a variable contract (and who might learn about the contract through discussions with investment professionals), is there another approach that would be more effective? Should we make any other changes with respect to prospectus delivery obligations? Does the proposed approach appropriately balance the objectives of the proposed summary prospectus framework with protecting investors who have no or limited access to the internet?
- Should investors have the ability to opt out of the rule permanently and thereafter receive a paper copy of any statutory prospectus? How could this be implemented in practice? For example, how would a registrant that had no prior relationship with an investor be apprised of the investor's decision to opt out?
- The proposed rule would not permit the summary prospectus to be bound together with any materials other than prospectuses for the portfolio companies that are available under the contract. This approach is modeled on rule 498(c). Do registrants currently rely on rule 498(c) to bind the variable contract's statutory prospectus with the prospectuses or summary prospectuses for the underlying portfolio companies? Since reliance on the proposed rule would be optional, should we continue to permit binding to be consistent with rule 498(c)? Since we anticipate that most registrants will rely on the optional delivery method for portfolio company prospectuses as described in section II.B below, should the rule permit a variable contract summary prospectus to be bound with prospectuses and summary prospectuses of portfolio companies, or is such a provision unnecessary?
- Under proposed rule 498A, use of the summary prospectus would be voluntary. Should we make use of the summary prospectus regime mandatory for all variable contract registrants? If so, why? Would inconsistent use of the summary prospectus create confusion, or make comparison of variable contract products more difficult for investors? Would a mandatory approach adequately protect investors who have no or limited internet access or who prefer not to receive information about their investments over the internet? Should we first adopt the voluntary summary prospectus regime and consider whether the summary prospectus should be mandated in the future, and if so, what methods or approaches should we consider? What would be registrants' primary considerations in determining whether to adopt the proposed voluntary summary prospectus regime? Would registrants be more likely to adopt the regime if the portions of the statutory prospectus that are also summary prospectus disclosures were segregated and placed at the beginning of the statutory prospectus?
- If we were to adopt a summary prospectus framework for variable contracts,

[246] Proposed rule 498A(f)(2).

[247] Proposed rule 498A(f)(2)(i) and (ii). The rule would permit binding these materials together so long as: (1) All of the underlying portfolio companies whose prospectuses are bundled together are available to the investor to whom they are sent or given; and (2) a table of contents identifying each portfolio company summary and/or statutory prospectus that is bound together (and the page number on which each document is found), is included at the beginning or immediately following a cover page of the bound materials.

[248] Proposed rule 498A(f)(3).

[249] Proposed rule 498A(f)(4) (in addition, a Form N–3 registrant would also be required to post its most recent annual and semi-annual reports to shareholders to the website); *see also infra* section II.A.4.

[250] As discussed below, the proposed rule also includes additional requirements (such as the requirement to send a copy of the contract statutory prospectus upon request) whose violation would result in a violation of the proposed rule, but would not result in a violation of section 5(b)(2). *See infra* note 298 and accompanying text.

[251] Proposed rule 498A(g).

[252] Section 2(a)(10) of the Securities Act [15 U.S.C. 77b(a)(10)(a)] provides that a communication sent or given after the effective date of the registration statement (other than a prospectus permitted under subsection (b) of section 10) shall not be deemed a prospectus if it is proved that prior to or at the same time with the communication a written prospectus meeting the requirements for a statutory prospectus at the time of the communication was sent or given to the person to whom the communication was made.

[253] *See* rule 498(d).

[254] *See, e.g.,* section 17(a) of the Securities Act [15 U.S.C. 77q(a)]; section 10(b) of the Exchange Act [15 U.S.C. 78j(b)]; section 34(b) of the Investment Company Act [15 U.S.C. 80a-33(b)].

how should we evaluate the effectiveness of the new framework? What methods or approaches should we use to evaluate the rule, and what areas of the new framework should we focus on in any such review?

- Should registrants that elect to rely on rule 498A be required to send current investors a notice explaining the new delivery approach before sending the first updating summary prospectus? Would investors benefit from receiving such a notice? If so, should investors receive a separate notice about the transition, or should different methods of notifying investors be permitted? For example, should registrants be permitted to add the notice as an insert or legend to other documents they are already sending investors?

4. Online Accessibility of Contract Statutory Prospectus and Certain Other Documents Relating to the Contract

The proposed rule would permit investors who receive a succinct, user-friendly initial or updating summary prospectus to access more detailed information about the variable contract, either by reviewing the information online, or by requesting the information to be sent in paper or electronically. These provisions parallel provisions in the rule governing the use of mutual fund summary prospectuses.[255] In our experience, layered disclosure for mutual funds has benefitted both investors and registrants, and we are proposing a similar framework for variable contracts. We believe that permitting variable contract investors to access the contract statutory prospectus in several ways (online and by physical or electronic delivery) maximizes the accessibility and usability of the information, as indicated by investors' preference for access to both online and paper resources.[256]

a. Required Online Contract Documents

Under the proposal, a variable contract's current initial summary prospectus, updating summary prospectus, statutory prospectus, and SAI, and, in the case of a registrant on Form N–3, the registrant's most recent annual and semi-annual reports to shareholders under rule 30e–1 under the Investment Company Act (together, the ''required online contract documents''), would be required to be available online. This approach operationalizes the layered disclosure framework that undergirds the proposed rule, with the summary prospectus provided in paper (or electronically) to investors, and additional information about the contract securities available online. The required online contract documents generally comprise the same set of documents that the mutual fund summary prospectus rules require to be posted online, and provide additional important detail about the contract that investors can access if they wish. The required online contract documents only reference the registrant's annual and semi-annual shareholder reports for Form N–3 registrants because Form N–4 and Form N–6 registrants do not have their own shareholder reports, but instead transmit the portfolio companies' annual and semi-annual shareholder reports to the investors in their trust accounts.

As with similar provisions in the mutual fund summary prospectus rule, these required online contract documents would be required to be publicly accessible, free of charge, at the website address that the cover page of the summary prospectus specifies, on or before the time that the person relying on the proposed rule provides the summary prospectus to investors.[257] Moreover, a current version of each of the required online contract documents would be required to remain on that website for at least 90 days following either:

- The time of the ''carrying or delivery'' of the contract security if a person is relying on the proposed rule to satisfy its section 5(b)(2) prospectus delivery obligations; or
- If a person is relying on the proposed rule to send communications that will not be deemed to be prospectuses, the time that the person sends or gives the communication to investors.[258]

This requirement is designed to provide continuous access to the information from the time the summary prospectus is sent or given until at least 90 days after the date of delivery of a security or communication in reliance on the proposed rule. This is the timeframe for the availability of online information under the mutual fund summary prospectus rule, and we are proposing that it be the same in the proposed rule because of market participants' familiarity with this timeframe, and because there may be operational efficiencies for certain registrants in having the timeframe be the same under both summary prospectus frameworks. Moreover, we believe this proposed timeframe appropriately balances the costs of maintaining information online with investors' interests in having the flexibility to access this online information after receiving the summary prospectus (for example, if they would like to review a topic presented therein in more detail in the statutory prospectus that is available online, after they have had the opportunity to read and digest the summary prospectus).

b. Formatting Requirements for Required Online Contract Documents

The proposed rule would direct that the required online contract documents be presented in a manner that is human-readable and capable of being printed on paper in human-readable format.[259] This formatting requirement is a condition to reliance on the rule to satisfy a person's delivery obligations under section 5(b)(2) of the Securities Act and the provision that a communication shall not be deemed a prospectus under section 2(a)(1) of the Securities Act. The rule governing mutual fund summary prospectuses also requires this formatting approach.[260] The ''human-readable'' presentation requirement is designed to impose a minimum standard of usability comparable to that of a paper document, although we understand that the electronic version could include additional features that might enhance the usability of the electronic version relative to the paper version.[261] For example, regarding usability, all portions of the document should be human-readable such that when an investor views the document on an internet browser, the text does not get cut off based on the screen size.

In addition, the proposed rule would mandate that the online materials be presented in a format that is convenient for both reading online and printing on paper.[262] The failure to comply with these ''convenient for reading and printing'' formatting requirements would not, however, be a condition of reliance on the rule, because whether a particular format is convenient for

[255] *See* rule 498(c)(4), (d)(4), (e), and (f).

[256] *See* 2012 Financial Literacy Study, *supra* note 39, at iv, xix.

[257] Proposed rule 498A(h)(1); *see also* rule 498(e)(1).

[258] Proposed rule 498A(h)(1).

[259] Proposed rule 498A(h)(2)(i).

[260] Rule 498(e)(2)(i).

[261] As in the parallel provisions of the rule governing mutual fund summary prospectuses, the ''human-readable'' condition is intended to make clear that posted information must be presented in human-readable text, rather than machine-readable software code, when accessed through an internet browser and that it must be printable in human-readable text. This condition does not impose any further requirements relating to user-friendliness of the presentation. *See* 2009 Summary Prospectus Adopting Release, *supra* note 33, at 85; *see also infra* note 274 and accompanying and following text (discussing provisions that are meant to enhance investors' understanding of special terms when they view the summary prospectus online, as well as other technological tools associated with online disclosure (*e.g.,* fee calculators, pop-up explanations) that would present further opportunities to promote investor understanding).

[262] Proposed rule 498A(i)(3); *see also* rule 498(f)(3) (parallel provision in the rule governing the use of mutual fund summary prospectuses).

reading online and printing depends on a number of factors and must be decided on a case-by-case basis.[263] In order to provide certainty to market participants, we are therefore not proposing that this requirement be a condition of reliance on the rule, and thus the failure to comply with this requirement would not negate a person's ability to rely on the rule in order to satisfy a person's delivery obligations under section 5(b)(2) of the Securities Act.[264] Such a failure could, however, constitute a violation of Commission rules.

c. Linking Within and Between Documents

The proposed rule also includes requirements for linking within the electronic versions of the contract statutory prospectus and SAI that are available online, and also for linking between electronic versions of contract summary and statutory prospectuses that are available online.[265] The proposed requirements, which are substantively identical to parallel provisions in the rule governing mutual fund summary prospectuses,[266] are designed to promote the usability of the information that appears in these documents.

The first linking requirement would allow the reader to move directly between a table of contents of the contract statutory prospectus or SAI and the related sections of that document, by a single mouse click or mobile-device tap.[267] The second linking requirement would allow the reader to move back and forth between each section of the summary prospectus and any related section of the contract statutory prospectus and contract SAI that provides additional detail.[268] This back-and-forth movement could occur either directly from the summary prospectus to the relevant section of the statutory prospectus or SAI, or indirectly by linking from the summary prospectus to a table of contents in the statutory prospectus or SAI, in which case two mouse clicks or mobile-device taps would be required.[269]

d. Definitions of Special Terms, and Online Viewing of Special Terms

The summary prospectus content requirements reference information that is required to appear in the contract statutory prospectus, which in turn must be written using plain English principles.[270] We recognize, however, that it may be particularly challenging to accurately describe a variable contract without using certain terms that, while technically accurate, may be confusing or unfamiliar to retail investors.

Accordingly, the proposed rule would require a summary prospectus to define any ''special terms'' elected by the registrant, using any presentation that clearly conveys their meaning to investors.[271] This requirement reflects the proposed instructions in Forms N–3, N–4, and N–6 (as well as current, similar instructions in these forms to define ''special terms'' in a glossary or index).[272] The registrant would determine which terms would constitute special terms. We generally believe that a special term is a term with which a new contract investor typically may not be familiar, and that would be important for the investor to understand key features of the contract.

We believe the proposed requirement for special terms in the contract summary prospectus, like the current and proposed requirements for special terms in the contract statutory prospectus, is appropriate in the context of variable contracts, as variable contract disclosure documents tend to include industry-specific language in order to describe the sometimes complex features of these products.[273] Glossaries or other means of defining these terms could help a retail investor better understand these products' terms and features, as discussed further below.

In order to leverage technology to help investors understand the variable contract, the proposed rule includes provisions that are meant to enhance investors' understanding of special terms when they view the summary prospectus online. Specifically, the proposed rule would require that investors either be able to view the definition of each special term used in an online summary prospectus upon command,[274] or to move directly back and forth between each special term and the corresponding entry in any glossary or list of definitions that the summary prospectus includes.[275] This approach, which today is a common convention for many electronically-available documents, is an example of how technology can enhance our layered approach to disclosure and help investors who access the document online grasp the complexities of variable contract features. Registrants may wish

---

[263] *See* 2009 Summary Prospectus Adopting Release, *supra* note 33, at nn.272 and 273 and accompanying text (relevant factors include the manner in which the online version renders charts, tables, and other graphics; the extent to which the online materials include search and other capabilities of the internet to enhance investors' access to information and include access to any software necessary to view the online version; and the time required to download the online materials).

[264] Proposed rule 498A(i)(4); *see also* rule 498(f)(5) (parallel provision in the rule governing the use of mutual fund summary prospectuses).

[265] Proposed rule 498A(h)(2)(ii) and (iii).

[266] *See* rule 498(e)(2)(ii) and (iii). As discussed below, the parallel provisions of proposed rule 498A also include similar linking requirements for the portfolio company documents that the proposed rule would require to appear online if a person were to rely on the rule's new delivery option for portfolio company prospectuses.

In this release, the term ''substantively identical'' is meant to refer to sets of provisions that do not include the same words verbatim, but where the only differences between the provisions are those that do not affect the substance of the requirement at issue. For example, parallel provisions in rule 498 and 498A where only the internal cross-references differ.

[267] Proposed rule 498A(h)(2)(ii). The linked table of contents may be outside the document (*e.g.,* in a separate section or panel of the screen), and need not be the table of contents that is contained within the document itself, as long as the linked table of contents for the statutory prospectus conforms to our rules' requirements for the table of contents that would be required to appear within the document). *See* rule 481(c) under the Securities Act.

Mutual funds commonly implement this feature using a left navigation or ''bookmark'' design style. While such design styles continue to be popular (and we anticipate that some insurers relying on proposed rule 498A might also employ this design style), the increased use of mobile devices and applications has led to the development of new and evolving design styles. Any navigation style should provide the functionality that is required by the rule.

[268] Proposed rule 498A(h)(2)(iii).

[269] *Id.* Under the latter option, links would either have to be available at both the beginning and end of the summary prospectus, or would be required to remain continuously visible to persons accessing the summary prospectus. This requirement is designed to promote the links' prominence and accessibility to investors.

[270] Rule 421(d) of the Securities Act; *see also* proposed General Instruction B.4(c) to Form N–3; proposed General Instruction B.4(c) to Form N–4; proposed General Instruction B.4(c) of Form N–6.

[271] Proposed rule 498A(e). For example, the summary prospectus could include a glossary or a list of definitions of special terms that appear throughout the document. Or, as another example, if a special term appears in only one section of the summary prospectus, the summary prospectus could include a definition for this term on the page, or in the section, where this term appear (for example, in a box to the side of the main text, or at the bottom of the page). Additionally, there are certain technological solutions that are available for electronic versions of the summary prospectus, such as moving or ''hovering'' the computer's pointer or mouse over the term, or linking directly back and forth between each special term and the corresponding entry in a glossary or list of definitions. *See infra* note 274 and accompanying and following text.

[272] *See* proposed General Instruction C.3(d) to Form N–3; proposed General Instruction C.3(d) of Form N–4; proposed General Instruction C.3(d) to Form N–6; *see also* Item 2 of current Forms N–3 and N–4.

[273] Because variable contract prospectuses must describe the products' insurance and investment features, they generally contain more technical terms than mutual fund disclosure documents, which only describe investment features.

[274] For example, investors could view the definitions of special terms by moving or ''hovering'' the computer's pointer or mouse over the term, or selecting the term on a mobile device.

[275] Proposed rule 498A(h)(2)(iv).

to consider whether other technological tools associated with their online disclosure (*e.g.,* fee calculators, pop-up explanations) would present further opportunities to promote investor understanding.

e. Ability To Retain Documents

The proposed rule also would require that persons accessing the website that appears on the summary prospectus cover page be able to permanently retain, free of charge, an electronic version of each of the required online contract documents. Like the online version of these documents, the retainable version of the documents must be in a format that is: (1) Human-readable and capable of being printed on paper in human-readable format; and (2) permits persons accessing the downloaded documents to move directly back and forth between each section heading in a table of contents of that document and the section of the document referenced in that section heading.[276] The permanently retained document does not have to be in a format that allows an investor to move back and forth between the summary prospectus and the statutory prospectus and SAI, because of possible technical difficulties associated with maintaining links between multiple downloaded documents. These proposed conditions are substantively identical to parallel provisions in the rule governing mutual fund summary prospectuses.[277]

In addition, the proposed rule would mandate that the electronic versions of the documents that may be permanently retained must be in a format that is convenient for both reading online and printing on paper.[278] Like the ''convenient for reading and printing'' online formatting requirements,[279] the failure to comply with these formatting requirements for retained electronic documents would not be a condition for reliance on the rule.[280] Since the convenience of these formatting requirements must be decided on a case-by-case basis, we believe this proposed approach would help provide certainty to market participants who seek to rely on the proposed rule to satisfy prospectus delivery obligations.[281]

f. Safe Harbor for Temporary Noncompliance

Compliance with the conditions in the proposed rule regarding the online availability of the required online contract documents (including the formatting and linking requirements for these documents, the requirements associated with the use of special terms in these documents, and the ability to retain these documents permanently) is generally required in order to rely on the proposed rule to meet prospectus delivery obligations under section 5(b)(2) of the Securities Act.[282] Such a failure to comply with any of these conditions could result in a violation of section 5(b)(2) unless the contract statutory prospectus is delivered by means other than reliance on the rule.

We recognize, however, that there may be times when, due to events beyond a person's control, the person may temporarily not be in compliance with the proposed rule's conditions regarding the availability of the required online contract documents.[283] The proposed rule therefore contains a safe harbor provision for temporary noncompliance, which is substantively identical to a parallel provision in the rule governing mutual fund summary prospectuses.[284]

This provision provides that the conditions regarding the availability of the required online contract documents will be deemed to be met, even if the required online contract documents are temporarily unavailable, provided that the person has reasonable procedures in place to ensure that those materials are available in the required manner. A person relying on the proposed rule to satisfy prospectus delivery obligations would be required to take prompt action to ensure that those materials become available in the manner required as soon as practicable following the earlier of the time when the person knows, or reasonably should have known, that the documents were not available in the manner required.[285]

We request comment generally on the conditions in the proposed rule regarding the availability of the required online contract documents, and specifically on the following issues:

- Should we require the online posting of the required online contract documents in the manner that the proposed rule specifies? Should we require that the required online contract documents be available on the insurance company's website as opposed to a third-party website? Should the website include an archive of older versions of these documents (not just the current versions)? If so, what information should be in the archive, and how long should such materials be required to be archived online?
- Should we require, as proposed, that persons accessing this website be able to permanently retain, through downloading or otherwise, free of charge, an electronic version of such documents? Should we require that downloaded documents retain links that enable a user to move readily between related passages of multiple documents? Would these requirements pose any technological, financial, or other challenges for persons relying on the proposed rule?
- Does the proposed 90-day timeframe for the availability of online information appropriately balance the costs of maintaining information online with investors' interests in having the flexibility to access this online information after receiving the summary prospectus? Would there be operational efficiencies for certain registrants in having the timeframe be the same under the variable contract summary prospectus framework and the mutual fund summary prospectus framework? How long do registrants typically maintain information online that is required under the mutual fund summary prospectus rules? As a matter of practice, is information generally maintained for a full year from the date of the summary prospectus?
- Should we provide additional guidance regarding what might constitute a ''human-readable'' format for providing the required online contract documents, as well as a ''convenient'' format for both reading these documents online and printing them on paper? [286] Or should persons relying on the proposed rule have the flexibility to determine how best to comply with this or other technological requirements that the proposed rule contemplates? Is it necessary for the proposed rule to include separate provisions regarding the ''human-readable'' website presentation of the required online contract documents, as well as the ''convenient for reading and printing'' presentation? Is it appropriate that, of these two provisions, the former should be a condition to relying on the rule to satisfy section 5(b)(2) prospectus delivery requirements, whereas the latter should not? If we were to modify these provisions, should we also propose to modify the parallel provisions in the rule governing mutual fund summary prospectuses? Should we instead retain one of these provisions, and if so which? If the final rule retains only one of these provisions, should we propose to modify rule 498 to similarly only retain just that provision?
- Although the proposed rule specifies that the materials posted online must be in

[276] Proposed rule 498A(h)(3).

[277] *See* rule 498(e)(3).

[278] Proposed rule 498A(i)(3).

[279] *See supra* note 262 and accompanying text.

[280] Proposed rule 498A(i)(4).

[281] *See supra* notes 263 and 264 and accompanying text.

[282] Proposed rule 498A(f)(4) (section 5(b)(2) transfer of the contract security is satisfied if, among other things, the conditions in proposed rule 498A(h) are satisfied).

[283] Such events might, for example, include system outages or other technological issues, natural disasters, acts of terrorism, or pandemic illnesses.

[284] Proposed rule 498A(h)(4); *see also* rule 498(e)(4).

[285] *Id.; see also* 2009 Summary Prospectus Adopting Release, *supra* note 33, at nn.92 and 93. This safe harbor generally would not be available to a registrant that repeatedly fails to comply with the rule's website posting requirements or that is not in compliance with the requirements over a prolonged period. *Id.* at n.293.

[286] *See supra* notes 261 and 263 and accompanying text.

a human-readable format, should we also require that the materials be posted online in a machine-readable format to promote the gathering and dissemination of information by data aggregators, or to facilitate the review, analysis, and comparison by investors and other data users? For example, should we require the materials to be posted online to use Inline XBRL, as we are proposing to require for certain disclosures in statutory prospectuses that are filed with the Commission?[287] Why or why not?

- Are the proposed linking requirements appropriate and useful? Will these requirements help investors to navigate effectively within and between these documents? If not, why not? Are there other ways we can improve the usability of these documents? What are some options for enabling the linking requirements? Are the proposed linking requirements sufficiently technology-neutral and flexible enough to accommodate future technological developments?
- Should persons accessing the summary prospectus be able to view the definition of special terms upon command? Is the term ''special terms'' sufficiently clear, and is the proposed requirement that the document permit a person to ''view the definition of each special term . . . upon command'' sufficiently clear? Are the examples in the proposed rule text of what it means to view a term upon command (*e.g.,* by moving or ''hovering'' the computer's pointer or mouse over the term, or selecting the term on a mobile device) helpful? What are some options for enabling the 'upon command' features? Are there other examples we should include?
- Should we require both the initial summary prospectus and the updating summary prospectus to define special terms? Should the updating summary prospectus, for example, be exempt from this requirement given that such documents are likely to be relatively brief and may only include a few defined terms? Are there other considerations that would create operational complications to requiring the updating summary prospectus to define special terms, such as any burden associated with updating definitions from year to year?
- Should we require registrants to electronically format the summary prospectus to allow investors to move directly back and forth between each defined term and the corresponding entry in a ''glossary'' section, if any? Should we extend this requirement to the contract statutory prospectus, or other required online contract documents? Is this functionality appropriate and useful? Is there a reason we should permit this capability, but not require it? What are some technology options that would enable investors to move directly back and forth between each term and the glossary?
- How can we encourage insurers to make fuller use of innovative technology to enable more interactive, user-friendly summary prospectus disclosure, while still creating a short, easy-to-read document that includes the proposed content? Are there potential tools that we should encourage or require insurers to use in order to make their disclosures more interactive and understandable? Should the proposed rule incorporate any additional requirements for technological tools to promote further investor understanding? For example, should we require that the required online contract documents be accompanied with any other technological tools (*e.g.,* additional embedded hyperlinks, fee calculators, pop-up explanations, tools to sort or compare optional benefits or portfolio companies) that encourage interactivity and could help investors understand the features and risks of their contracts?
- Should we mandate that the required online contract documents be available in formats that are compatible with mobile devices such as smartphones and tablets, or that are optimized for use with these types of technology platforms? Is the language of the proposed rule broad enough to contemplate current and future technology platforms? Should we incorporate any special provisions in the proposed rule, or provide guidance, regarding design features that could promote investor understanding of information that investors view on smartphones and tablets—for example, placement and prominence of certain disclosure (*e.g.,* in terms of size, color, and graphic treatment), designing disclosure so that ''scrolling'' is not necessary in order to find certain disclosure elements, and including certain explicit instructions on disclosure that appears online and on mobile device platforms (*e.g.,* ''click here'' or ''see below'') to assist investors in navigating the required online contract documents? Should we require persons relying on the proposed rule to make available the information in formats that serve individuals that may be visually impaired, or other formats that promote accessibility, including alternatives that use languages other than English? Should we consider other ways to provide for greater accessibility, portability, and utility of the required online contract documents?
- Does the proposed rule appropriately provide a safe harbor to address the possibility of inadvertent technological problems? Should persons relying on the proposed rule who have technological issues that prevent them from complying with the online posting requirements of the rule for a period of time be required to disclose on the website that the information was not available for a time in the manner required and explain the reasons for the failure to comply? If not, why not?
- Are those aspects of the proposed rule that mirror the approaches taken in the rule governing the use of mutual fund summary prospectuses (*e.g.,* required online documents, formatting requirements, linking, ability to retain online documents, safe harbor for temporary noncompliance) appropriate in the context of variable contract disclosure? Are there differences between the respective disclosure frameworks for mutual funds versus variable contracts, or operational aspects associated with these different types of investment products, that warrant a different approach? If so, what modifications should we consider?
- How else could we modify the proposed summary prospectus regime to take greater advantage of modern technology to modernize current disclosure practices for variable contracts? For example, should insurers consider employing technology to require a retail investor to scroll through the entirety of the summary prospectus before entering the next stage in the sales process, accessing a different part of the insurer's website to obtain more information, or checking a box to submit the application to purchase a variable contract? Are there other ways that technology could be used to encourage investors to read the summary prospectus?
- Does the proposal sufficiently encourage electronic design and delivery? Are there other ways we can modify the requirements to make clear that paper-based delivery is not the only permissible or desired delivery format?
- Are there other requirements that we should consider for insurers that are offering variable contracts to retail investors? Should we require that certain disclosures be presented in a manner reasonably calculated to draw retail investor attention to it? Are there other ways to ensure that retail investors receive the information they need to clearly understand the features, costs and risks of the variable contract they are considering?

5. Other Requirements for Summary Prospectus and Other Contract Documents

Under the proposed rule, an investor who receives a contract summary prospectus and who would also like to review the required online contract documents would be able to choose whether to review these documents online or to receive that information directly, in paper or electronic format as requested by the investor. Accordingly, the proposed rule would require a registrant (or financial intermediary distributing the contract) to send a paper or electronic copy of the required online contract documents to any person requesting such a copy.[288] The person must send requested paper documents at no cost to the requestor, by U.S. first class mail or other reasonably prompt means, within three business days after receiving the request. The proposed rule also would require a registrant or intermediary to send electronic copies of these documents upon request within three business days.[289] The proposed rule

[287] *See infra* section II.E.

[288] Proposed rule 498A(i)(1) (permitting an investor to request either a paper copy of the required online contract documents, or an electronic copy of such documents); *see also* rule 498(f)(1) (parallel provision in the rule governing the use of mutual fund summary prospectuses); proposed Item 1(b)(1) of Forms N–3, N–4, and N–6 (requiring the prospectus to provide a toll-free telephone number for investors to call to request the SAI, to request other information about the contract, and to make investor inquiries).

[289] Proposed rule 498A(i)(1).

would also provide that the requirement to send an electronic copy of a document may be satisfied by sending a direct link to the online document; provided that a current version of the document is directly accessible through the link from the time that the email is sent through the date that is six months after the date that the email is sent and the email explains both how long the link will remain useable and that, if the recipient desires to retain a copy of the document, he or she should access and save the document.[290]

Collectively, these requirements are intended to ensure that an investor has prompt access to the required information in a format that he or she prefers. The three-business-day time period for sending the required online contract documents mirrors the parallel provision of the mutual fund summary prospectus rule.[291]

Under the proposed approach, investors who prefer paper copies of prospectuses but do not have ready access to the internet (or the ability to print out the statutory prospectus that is made available online) would not be able to elect in advance to receive paper copies of all future statutory prospectuses unless a registrant chose to give investors that option. Assuming no such accommodation, investors would need to follow the summary prospectus legend's instruction on how to request paper delivery each time a summary prospectus is available. Those that do not take the additional step of requesting paper delivery would not receive the statutory prospectus in their preferred format. While we recognize that this could provide a challenge for these investors, we nonetheless believe that the proposed approach appropriately balances the interests of the number of variable contract investors whom we believe would benefit from the convenience of online documents against the number of those whom we believe prefer paper.

In addition to the requirement to provide certain documents upon request in paper or electronically, the proposed rule also requires that a contract summary prospectus must be given greater prominence than any materials that accompany the summary prospectus.[292] We believe that this requirement is important to prevent any accompanying sales or other materials from obscuring the contract summary prospectus, and to highlight for investors the concise presentation of the summary prospectus, and the salience of the information included therein.[293] Generally, we believe that the greater prominence requirement would be satisfied if the placement of the contract summary prospectus makes it more conspicuous than any accompanying materials (*e.g.,* the summary prospectus is on top of a group of papers that are provided together, or listed first if presented on a website together with other materials related to the contract).[294]

The proposed rule would also require any website address or cross-reference that is included in an electronic version of the summary prospectus (*i.e.,* electronic versions sent to investors or available online) to be an active hyperlink.[295] This instruction is intended to ensure that investors viewing electronic versions of the prospectus are able to easily access website addresses and cross-referenced materials that are referenced in the prospectus. This requirement would not apply to summary prospectuses that are filed on the EDGAR system.[296]

The failure to comply with each of these additional requirements would not be a condition of reliance on the rule, in order to provide greater certainty to market participants who seek to rely on the rule. For example, market participants could be concerned that the three-business-day requirement could be violated on account of weather issues or other forces outside of the control of a person seeking to rely on the rule. Similarly, market participants could be concerned if compliance with the greater prominence requirement were a condition to rely on the proposed rule, because whether one is in compliance with this requirement could entail a certain degree of subjectivity.[297] Thus, we are proposing that the failure to comply with either requirement would not negate a person's ability to rely on the rule to satisfy a person's delivery obligations under section 5(b)(2) of the Securities Act.[298] This failure would, however, constitute a violation of Commission rules.

We request comment generally on the requirements we discuss in this section, and specifically on the following issues:

- Should persons relying on the proposed rule be required to send the required online contract documents to any person requesting such documents within three business days after receiving such a request? Would a different period be appropriate? Should compliance with this requirement be a condition to reliance on the proposed rule? If not, why not?
- Does the proposed rule effectively promote investors' ability to request paper copies of the required online contract documents? Are there any changes to the proposed rule that we should consider to make the process for requesting paper copies of such documents more convenient for investors? Should we require registrants to make available to investors a way to opt into the automatic annual delivery of future statutory prospectuses in a paper format without having to specifically request the documents each year? What would be the operational challenges of this approach to registrants? Should we allow registrants to give investors the option of automatic delivery of future statutory prospectuses in paper?
- Should the rule require that the summary prospectus be given greater prominence that any materials that accompany the summary prospectus? If not, why not? Does this requirement pose any challenges to registrants? How might a summary prospectus be given greater prominence than any materials that accompany the summary prospectus when being delivered or made available electronically?
- Should compliance with any or all of the proposed requirements discussed in this

[290] *Id.*

[291] *See* rule 498(f)(1). We understand that persons relying on rule 498 have effective processes in place to handle requests for paper or electronic delivery of mutual fund materials that are available online, within the three-business-day time period that the rule specifies. *See* Comment Letter of the Investment Company Institute on Investment Company Reporting Modernization, File No. S7–08–15 (Mar. 14, 2016) (stating that fund firms have ''specific, highly effective processes in place to handle requests under Rule 498''); *see also* Investment Company Reporting Modernization, Investment Company Act Release No. 31610 (May 20, 2015) [80 FR 33590 (June 12, 2015)] (''Investment Company Reporting Modernization Proposing Release'').

[292] Proposed rule 498A(i)(2); *see also* rule 498(f)(2) (parallel provision in the rule governing the use of mutual fund summary prospectuses).

[293] The Commission's rationale was similar for the parallel provision in the rule governing mutual fund summary prospectuses. *See* 2009 Summary Prospectus Adopting Release, *supra* note 33, at n.217 and accompanying text.

[294] *See* similar discussion in 2009 Summary Prospectus Adopting Release, *supra* note 33, at n.220 and accompanying text.

[295] *See* proposed rule 498A(i)(4). A parallel requirement would also apply to statutory prospectuses. *See* proposed General Instruction C.3.(i) to Forms N–3, N–4, and N–6.

[296] *Id.; see also* rule 105 of Regulation S–T [17 CFR 232.105] (prohibiting hyperlinking to websites, locations, or other documents that are outside of the EDGAR system).

[297] Commenters expressed this concern about the parallel requirement in the rule governing mutual fund summary prospectuses, when it was proposed. *See* Comment Letter of the Investment Company Institute on Enhanced Disclosure and New Prospectus Delivery Option for Registered Open-End Management Investment Companies, File No. S7–28–07 (Feb. 28, 2008).

[298] Proposed rule 498A(i)(5); *see also* rule 498(f)(5) (parallel provision in the rule governing the use of mutual fund summary prospectuses). The proposed rule's requirements would mandate that (1) the required online documents be presented in a format that is convenient for reading and printing, and (2) a person be able to retain electronic versions of these documents in a format that is convenient for reading and printing, also are not conditions to relying on the rule to satisfy prospectus delivery obligations. *See supra* notes 262 and 278 and accompanying text.

section be a condition of reliance on the rule? That is, should failure to comply with these requirements result in a violation of section 5(b)(2) of the Securities Act? Alternatively, should the failure to comply with these requirements be a violation of Commission rules that does not result in an inability to rely on the rule or a violation of section 5(b)(2)?

- The proposed rule would require any website address or cross-reference that is included in an electronic version of the summary prospectus (*i.e.,* electronic versions sent to investors or available online) to be an active hyperlink. To what extent, if any, would this requirement present challenges or add costs or burdens with respect to the use of summary prospectuses, given that active links are not required in EDGAR filings (and active links to websites, locations, and documents outside of the EDGAR system are expressly prohibited pursuant to rule 105 of Regulation S–T [17 CFR 232.105])?

6. Incorporation by Reference

a. Permissible Incorporation by Reference

The proposed rule would permit a registrant to incorporate by reference into the summary prospectus information contained in the contract statutory prospectus and SAI, subject to certain conditions.[299] Much like with the mutual fund summary prospectus, we do not intend the variable contract summary prospectus to be a self-contained disclosure vehicle, but rather one element in a layered disclosure regime.[300] Any information incorporated by reference would be separately made available to investors, either electronically or in paper. A Form N–3 registrant also could incorporate by reference into the summary prospectus information from its reports to shareholders that the registrant has incorporated by reference into its statutory prospectus.[301] A registrant would not be permitted to incorporate by reference into the summary prospectus information from any other source. Moreover, a registrant could not incorporate by reference any information that would be required to appear in the contents of the initial summary prospectus or the updating summary prospectus.[302]

Information could be incorporated by reference into the summary prospectus only by reference to the specific document that contains the information, and not by reference to another document that incorporates the information by reference.[303] For example, if a contract statutory prospectus were to incorporate the contract SAI by reference, the summary prospectus could not incorporate information in the SAI simply by referencing the statutory prospectus but would be required to reference the SAI directly.[304]

The proposed rule would permit incorporation by reference only if the registrant satisfies the rule's conditions that prescribe the means by which the required online contract documents must be made available to investors.[305] In addition, if a registrant incorporates information by reference into a summary prospectus, the summary prospectus legend must specify the type of document (*e.g.,* statutory prospectus) that contains the incorporated information and the date of the document.[306] If a registrant incorporates a part of a document by reference into the summary prospectus, the summary prospectus legend must clearly identify the part by page, paragraph, caption, or otherwise.[307] The legend would also explain that the incorporated information may be obtained, free of charge, in the same manner as the contract statutory prospectus.[308]

The conditions on the availability of information that is incorporated by reference into the contract summary prospectus, and on identifying the information that is incorporated by reference, are intended to facilitate access to this information. Parallel conditions exist in the rule governing mutual fund summary prospectuses. Based on our experience, we believe that investors have found this approach to be useful. Therefore, we are proposing similar conditions for incorporation by reference for variable contract summary prospectuses.[309]

A registrant that fails to comply with any of the above conditions is not permitted to incorporate information by reference into its summary prospectus. A registrant that does comply with these conditions, however, including the conditions for providing the documents that include the incorporated information online, would not also be required to send or give the incorporated information to investors together with the summary prospectus.[310] The contract summary prospectus, together with information incorporated therein by reference, would be subject to liability under sections 12(a)(2) and 17(a)(2) of the Securities Act.

[299] Proposed rule 498A(d)(2); *see also* rule 498(b)(3)(ii).

[300] *See* 2009 Summary Prospectus Adopting Release, *supra* note 33, at paragraph accompanying n.327.

[301] Proposed rule 498A(d)(2) references rule 30e–1, which applies only to management companies (Form N–3 registrants). While Form N–4 and Form N–6 registrants must transmit the portfolio companies' annual and semi-annual shareholder reports to the investors in their trust accounts (*see* rule 30e–2 under the Investment Company Act), we would not expect a registrant would wish to incorporate by reference information from a portfolio company shareholder report into the contract prospectus even if such information by reference was permissible. Accordingly, we do not reference rule 30e–2 in the proposed rule.

[302] Proposed rule 498A(d)(2)(ii); *see also supra* sections II.A.1 (describing proposed content requirements for the initial summary prospectus) and II.A.2 (describing proposed content requirements for the updating summary prospectus).

[303] Proposed rule 498A(d)(2)(iii).

[304] *Cf.* Item 10(d) of Reg. S–K [17 CFR 229.10(d)] (''Except where a registrant or issuer is expressly required to incorporate a document or documents by reference . . . reference may not be made to any document which incorporates another document by reference if the pertinent portion of the document containing the information or financial statements to be incorporated by reference includes an incorporation by reference to another document.''). General Instruction D.2 to current Form N–6 makes Item 10(d) of Regulation S–K applicable to incorporation by reference into a variable life insurance contract's statutory prospectus.

[305] Proposed rule 498A(d)(2)(i) (referencing proposed rule 498A(h), among other paragraphs in the proposed rule); *see also supra* section II.A.4.

[306] Proposed rule 498A(b)(2)(vi)(C) and 498A(c)(3)(vi).

[307] *Id.* This requirement mirrors the requirements of rule 498(b)(1)(v)(B), and is similar to the requirements of rule 411(d) under the Securities Act [17 CFR 230.411(d)], which requires that information incorporated by reference ''be clearly identified in the reference by page, paragraph, caption or otherwise.'' Rule 411 is also subject to the 2017 FAST Act Modernization rulemaking proposal (which includes proposed amendments to the Commission's rules on incorporation by reference). *See* FAST Act Modernization and Simplification of Regulation S–K, Securities Act Release No. 10425 (Oct. 11, 2017) [82 FR 50988 (Nov. 2, 2017)] (''2017 FAST Act Proposal''). We requested that comments on the 2017 FAST Act Proposal be submitted by January 2, 2018.

[308] *Id.; see also supra* discussion in section II.A.4 and 5.

[309] *See supra* note 300 and accompanying text.

[310] Proposed rule 498A(d)(1); *see also* rule 498(b)(3)(i) (parallel provision in the rule governing the use of mutual fund summary prospectuses); General Instruction G of current Forms N–3 and N–4; General Instruction D of current Form N–6 (permitting a registrant to incorporate by reference all or part of the SAI into the prospectus without delivering the SAI with the prospectus).

b. Effect of Incorporation by Reference

Rule 159 under the Securities Act provides that any information ''conveyed'' to a purchaser after the time of sale will not be taken into account, for purposes of determining whether a prospectus or oral statement included an untrue statement of material fact at the time of sale for purposes of sections 12(a)(2) and 17(a)(2) of the Act.[311] The proposed rule would provide that, for purposes of rule 159, information is conveyed to a person not later than the time the person receives a summary prospectus, if that information is incorporated by reference into the summary prospectus in accordance with the proposed rule's conditions.[312] This addresses the question of when information that is incorporated by reference into the contract summary prospectus is conveyed for purposes of liability under sections 12(a)(2) and 17(a)(2) of the Securities Act.[313]

We request comment generally on the proposal to permit incorporation by reference into the summary prospectus and specifically on the following issues:

- Should we permit the contract statutory prospectus, SAI, and shareholder reports to be incorporated by reference into the summary prospectus? Are there special considerations in the case of variable contracts that warrant different incorporation by reference provisions than those under rule 498? For example, is there any other information we should permit registrants to incorporate by reference into the proposed contract summary prospectuses? Should we permit a registrant to incorporate by reference any information that is required to be included in the summary prospectuses? If so, should this approach vary based on the type of summary prospectus (initial summary prospectus versus updating summary prospectus)?
- Should we require, as proposed, that materials incorporated by reference into the summary prospectuses be available online? Are there additional or different conditions we should impose on the ability to incorporate by reference into the summary prospectus?
- The proposed rule would provide that, for purposes of rule 159, information is conveyed to a person not later than the time the person receives a summary prospectus, if that information is incorporated by reference into the summary prospectus in accordance with the proposed rule's conditions. Is this proposed provision, which mirrors the approach taken in the rule governing mutual fund summary prospectuses, also appropriate for variable contracts? Are there differences between mutual funds and variable contracts that warrant an alternative approach? If so, what modifications should be considered? Should the proposed provision apply to both types of summary prospectus (initial and updating)? Are there any modifications that would be appropriate depending on the type of summary prospectus?

7. Filing Requirements for the Summary Prospectus

a. Preliminary Form of Summary Prospectus

We are proposing to require that registrants file a preliminary form of any contract summary prospectus (initial or updating summary prospectus) that the registrant intends to use on or after the effective date of the registration statement as an exhibit to the registration statement (''preliminary summary prospectus'').[314] Registrants would only be required to provide the preliminary summary prospectus exhibit in connection with the filing of an initial registration statement, or in connection with a pre-effective amendment or a post-effective amendment filed in accordance with paragraph (a) of rule 485 under the Securities Act.

We believe that it is important that Commission staff have the opportunity to review a variable contract's summary prospectus for compliance with the proposed rule and the relevant form requirements prior to its first use. However, we note that this approach differs from the approach regarding mutual fund summary prospectuses. The Commission elected not to require the filing of a mutual fund summary prospectus prior to first use because the content of the summary prospectus would be essentially identical to the content of the summary section of the statutory prospectus, which is filed prior to its first use.[315]

In contrast, the proposed rule does not require the variable contract statutory prospectus to contain a stand-alone summary section from which a summary prospectus is created. In addition, while some variable contract summary prospectus disclosures would be identical to those in the statutory prospectus,[316] others would include only part of the information required in the statutory prospectus.[317] For example, the proposed rule would require an initial summary prospectus only to describe the features and options of the contract that the registrant currently offers, while the statutory prospectus could include information regarding contracts that the registrant no longer sells to new investors.

The initial summary prospectus and updating summary prospectus would also present certain information in a different order than might appear in the contract statutory prospectus.[318] Furthermore, certain disclosure requirements differ depending on whether the summary prospectus is an initial summary prospectus or an updating summary prospectus. We do not believe that registrants would need to visually identify or otherwise segregate those portions of the statutory prospectus that are also summary prospectus disclosures, and we recognize that doing so could impede the effective presentation of information in a contract statutory prospectus to investors.

[311] *See* rule 159 under the Securities Act.

Under section 12(a)(2) of the Securities Act, sellers have liability to purchasers for offers or sales by means of a prospectus or oral communication that includes an untrue statement of material fact or omits to state a material fact that makes the statements made, based on the circumstances under which they were made, not misleading. Section 17(a)(2) of the Securities Act is a general antifraud provision, which makes it unlawful for any person in the offer and sale of a security to obtain money or property by means of any untrue statement of a material fact or any omission to state a material fact necessary in order to make the statements made, in light of the circumstances under which they were made, not misleading.

[312] Proposed rule 498A(d)(3); *see also* rule 498(b)(3)(iii) (parallel provision in the rule governing the use of mutual fund summary prospectuses); 2009 Summary Prospectus Adopting Release, *supra* note 33, at nn.106 through 110.

[313] *See* 2009 Summary Prospectus Adopting Release, *supra* note 33, at nn.109 and 110 (discussing further considerations of liability under sections 12(a)(2) and 17(a)(2) of the Securities Act, as well as reliance under section 19(a) of the Securities Act).

[314] *See* proposed Item 34(r) of Form N–3; proposed Item 28(o) of Form N–4; proposed Item 29(r) of Form N–6. The filing process and format of these documents would be dictated by current Commission rules, including its rules on electronic submissions and exceptions. *See, e.g.,* rule 101 of Regulation S–T [17 CFR 232.101] (providing, among other things, that registration statements and prospectuses filed pursuant to the Securities Act shall be submitted in electronic format).

[315] *See* 2009 Summary Prospectus Adopting Release, *supra* note 33, at n.73. The contents of a mutual fund summary prospectus consist of the information required or permitted by Items 2–8 of Form N–1A, which constitutes the summary section of the statutory prospectus. *See* rule 498(b)(2).

[316] *See, e.g.,* Items 2 and 3 of Forms N–3, N–4, and N–6.

[317] *See, e.g.,* proposed Item 11(a) of Form N–3; proposed Item 10(a) of Form N–4; proposed Item 10(a) of Form N–6; proposed Item 12(a) of Form N–3; proposed Item 11(a) of Form N–4; proposed Item 11(a) of Form N–6. (These are the proposed ''Standard Death Benefit'' and ''Other Benefits Available Under the Contract'' disclosure items for Forms N–3, N–4, and N–6.). While only certain information of the statutory prospectus is required to be included in the summary prospectus, proposed rule 498A permits the summary prospectus to incorporate by reference some or all of the information contained in the statutory prospectus or SAI.

[318] For example, in the initial summary prospectus, the Fee Table would be located towards the end of the prospectus, with more summary type of fee information would be provided earlier in the summary prospectus as part of the Key Information Table. In contrast, the Fee Table in the statutory prospectus is closer to the front of the document, where it has been traditionally located.

b. Definitive Form of Summary Prospectus

In addition to requiring registrants to file a preliminary summary prospectus with the Commission prior to use, we are also proposing amendments to rule 497 under the Securities Act that would require a registrant to file a definitive form of summary prospectus after it is first used.[319] This would ensure that the Commission receives a copy of every summary prospectus in use.[320] This is consistent with the filing requirement for mutual fund summary prospectuses under rule 497.[321]

c. Investor Protection and Liability Under Section 11 of the Securities Act

Section 10(b) of the Securities Act provides that a prospectus permitted under that section must, unless Commission rules provide otherwise, be filed as part of the registration statement but would not be deemed a part of the registration statement for purposes of section 11 of the Securities Act.[322] Accordingly, a summary prospectus that is filed as part of the registration statement (*e.g.,* as an exhibit or otherwise) would not be deemed a part of the registration statement for purposes of section 11 of the Securities Act.[323]

Some commenters in connection with the mutual fund summary prospectus proposal expressed concerns that the mutual fund summary prospectus would not be subject to section 11 liability, suggesting that this would result in a diminution of funds' liability under that section.[324] The Commission stated in response that while section 11 prescribes that the mutual fund summary prospectus will not itself be deemed a part of the registration statement for purposes of section 11, all of the information in the summary prospectus will be subject to liability under section 11, either because the information is the same as information contained in the statutory prospectus or because the information is incorporated by reference from the registration statement. The Commission noted that: (1) The final rule required the information contained in a summary prospectus that is used to satisfy prospectus delivery obligations must be the same as the information contained in the summary section of the fund's statutory prospectus; [325] and (2) information may be incorporated by reference into a summary prospectus only if it is contained in the fund's statutory prospectus, SAI, or has been incorporated into the statutory prospectus from the shareholder report.[326]

For similar reasons, it is our view that while a variable contract summary prospectus under the proposed rule would not itself be deemed a part of the registration statement for purposes of section 11, the information in the summary prospectus will generally be subject to liability under section 11. While proposed rule 498A would not have a comparable provision to that in rule 498 requiring that the information in the summary prospectus must be the same as in the statutory prospectus, we believe that the substance of the information itself would be the same, even though the language in both documents relating to the information may not be identical. For example, the language of the initial summary prospectus could differ from the language used in the statutory prospectus because proposed rule 498A requires that the initial summary prospectus may only describe a single contract that the registrant currently offers for sale, whereas we understand that certain contract statutory prospectuses include disclosure about contract features and options that the registrant may no longer offer to new investors. Nevertheless, the substance of the information for any currently-offered features and options would be the same.[327] In addition, proposed rule 498A would have the same provisions regarding information permitted to be incorporated into the summary prospectus as those in rule 498.[328]

The summary prospectus would be subject to liability under section 12(a)(2) of the Securities Act [329] and the general antifraud provisions of the federal securities laws.[330] In addition, a summary prospectus would be subject to the stop order and other administrative provisions of section 8 of the Securities Act.[331] This is in addition to the Commission's power under section 10(b) of the Securities Act to prevent or suspend the use of the summary prospectus, regardless of whether or not it has been filed.[332]

We request comment generally on the proposed filing requirements for the variable contract summary prospectus and specifically on the following issues:

- Should we require filing of the preliminary form of any contract summary prospectuses? If not, what alternatives should we consider to facilitate staff review of the summary prospectus disclosures, and would investors be adequately protected if staff did not have the opportunity to review a summary prospectus pre-use? Should we only require the initial summary prospectus (or updating summary prospectus) to be filed prior to first use?
- Should we require post-use filing of the summary prospectus? Should only the initial summary prospectus (or updating summary prospectus) be filed after use?
- If the updating summary prospectus includes a description of a contract change that is not similarly described in the related

[319] Proposed amended rule 497(k).

[320] A summary prospectus filed with the Commission would be publicly available; however, a registrant could not rely on this availability to satisfy the requirements to post the document online. *See supra* section II.A.4.

[321] S*ee* rule 497(k).

[322] 15 U.S.C. 77j(b) and 77k. Under section 11 of the Securities Act [15 U.S.C. 77k], purchasers of an issuer's securities have private rights of action for untrue statements of material facts or omissions of material facts required to be included in the registration statement or necessary to make the statements in the registration statement not misleading. Congress provided a specific exception from liability under section 11 for summary prospectuses under section 10(b) of the Securities Act in order to encourage the use of summary prospectuses. L. Loss & J. Seligman, Securities Regulation, § 2–b–5 (3d ed. 2006) (citing S. Rep. 1036, 83d Cong., 2d Sess. 17–18 (1954) and H.R. Rep. 1542, 83d Cong., 2d Sess. 26 (1954)).

[323] Section 10(b) of the Securities Act (''A prospectus permitted under this subsection shall, except to the extent the Commission by rules or regulations deems necessary or appropriate in the public interest or for the protection of investors otherwise provides, be filed as part of the registration statement but shall not be deemed a part of such registration statement for purposes of section 11.'').

[324] *See* 2009 Summary Prospectus Adopting Release, *supra* note 33, at n.344 and accompanying text.

[325] *Id.* at nn.111 and 112; *see also* rule 498(f)(4).

[326] *See* rule 498(b)(3).

[327] *See supra* section II.A.1.b.

The updating summary prospectus could include information that does not appear in the related contract statutory prospectus if the updating summary prospectus discloses changes to the contract that the issuer has made after the most recent updating summary prospectus or statutory prospectus was sent or given to investors. *See supra* section II.A.2.b.ii(a); *see also* proposed rule 498A(c)(6)(i) and (ii). This information that only appears in the updating summary prospectus therefore would not be deemed a part of the registration statement for purposes of section 11 of the Securities Act.

For example, if a particular fee has changed from x% to y%, while the disclosure of the current fee rate (y%) would appear in both the updating summary prospectus and the related statutory prospectus, the earlier fee rate (x%) and the fact that the fee was changed would likely not be disclosed in the statutory prospectus.

[328] *See* proposed rule 498A(d); *see also* rule 498(b)(3) (parallel provisions in the rule governing the use of mutual fund summary prospectuses).

[329] *See* section 12(a)(2) of the Securities Act; *see also* discussion *supra* note 311.

[330] *See, e.g.,* section 17(a) of the Securities Act; section 10(b) of the Exchange Act; section 34(b) of the Investment Company Act.

[331] 15 U.S.C. 77h; H.R. Rep. 1542, 83d Cong., 2d Sess., 1954 U.S.C.C.A.N. 2973, 2982 (1954) (noting that the Commission's authority to suspend the use of a defective summary prospectus under section 10(b) ''is intended to supplement the stop-order powers of the Commission under [S]ection 8'').

[332] 15 U.S.C. 77j(b).

statutory prospectus (for example, the updating summary prospectus describes the fact that there was a change and the nature of the change), or otherwise includes content or wording differences compared to the statutory prospectus, would this adversely affect investor protection (for example, if certain information were not deemed to be part of the registration statement for purposes of section 11 of the Securities Act), and if so, how? Should we require the statutory prospectus to include the same description of contract changes contained in the related updating summary prospectus? Why or why not?

- Should the summary prospectus be subject to the stop order and other administrative provisions of section 8 of the Securities Act? Why or why not?
- Should the contract summary prospectus be deemed a part of the registration statement for purposes of section 11 of the Securities Act? Why or why not?

8. Definitions in the Proposed Rule

Proposed rule 498A includes a section of definitions for certain terms used throughout the rule.[333] These definitions generally: (1) Identify specific prospectuses described in the proposed rule (*e.g.,* ''initial summary prospectus''); (2) mirror the existing definitions used in Forms N–3, N–4, and N–6 (*e.g.,* ''variable annuity contract'' as used in Forms N–3 and N–4) or other rules (*e.g.,* ''statement of additional information'' as used in rule 498); or (3) combine other defined terms in the proposed rule (*e.g.,* ''summary prospectus''). In addition, in recognition that today a variable contract may offer classes with the same currently-available features and options but different characteristics (*e.g.,* differences in the length of the surrender periods) and/or different pricing structures, we are also proposing to define ''class'' to mean a class of a contract that varies principally with respect to distribution-related fees and expenses.[334]

We request comment generally on the definitions used in the proposed rule and specifically on the following issues:

- Should we include any additional, or exclude any proposed, defined terms?
- Should we modify the definitions of any defined terms? For example, does the proposed definition of ''class'' adequately distinguish among classes of a variable contract?

[333] Proposed rule 498A(a).

[334] Proposed rule 498A(a)(1). We understand that this is how the term is commonly used in industry practice. *See also* rule 18f–3 (permitting registered investment companies to issue multiple classes of voting stock); Part A (''Definitions'') of the General Instructions to Form N–1A (defining ''class'' as ''a class of shares issued by a Multiple Class Fund that represents interests in the same portfolio of securities under rule 18f–3 [17 CFR 270.18f–3] or under an order exempting the Multiple Class Fund from sections 18(f), 18(g), and 18(i) [15 U.S.C. 80a–18(f), 18(g), and 18(i)]'').

B. Optional Method To Satisfy Portfolio Company Prospectus Delivery Requirements

1. Current Delivery Practices for Portfolio Company Prospectuses

The Commission has interpreted section 5(b)(2) of the Securities Act to require the delivery of a portfolio company prospectus to any variable contract investor that allocates his or her purchase payments to that portfolio company, including on any exchange of contract value from one portfolio company to another.[335] Since variable contracts generally offer exchange privileges permitting an investor to reallocate his or her investment from one underlying portfolio company to another, we understand that, typically, prospectuses for all underlying portfolio companies are delivered to investors to avoid the administrative burden of tracking whether an investor has already received the current prospectus.[336] We also understand that summary prospectuses, as opposed to statutory prospectuses, for the underlying portfolio companies are typically delivered. As with contract prospectuses, portfolio company prospectuses may be delivered electronically pursuant to the Commission's guidance.[337]

Because the identity of investors is known by the insurance company and not the underlying portfolio companies, delivery of prospectuses for underlying portfolio companies is typically effected by the insurance company rather than the portfolio company.[338] Based on a staff review of participation agreements between insurance companies and underlying portfolio companies, we understand that there is diversity in practice as to whether the insurance company or portfolio company bears the printing and mailing costs associated with portfolio company prospectus deliveries.

[335] *See* Forms N–3 and N–4 Adopting Release, *supra* note 28, at n.49 and accompanying text (''Of course, delivery of a prospectus of an underlying company in which a contractowner actually invests will be required pursuant to section 5(b)(2) of the 1933 Act'').

[336] We understand that while some insurers have invested in infrastructure to deliver only those prospectuses to which an investor allocates contract value, most insurers have not.

[337] *See supra* note 32 and accompanying text.

[338] *See, e.g.,* Forms N–3 and N–4 Adopting Release, *supra* note 28, at n.48 and accompanying text (suggesting that under certain circumstances, the prospectus delivery obligation for underlying portfolio companies would rest with the insurance company); *see also* rule 22c–2(c)(1) under the Investment Company Act (defining a ''financial intermediary'' for purposes of the rule to include a UIT that invests in a fund in reliance on section 12(d)(1)(E) under the Investment Company Act) [17 CFR 270.22c–2(c)(1)].

2. New Option To Satisfy Prospectus Delivery Requirements

a. Overview

The proposed rule would provide an optional method for satisfying portfolio company prospectus delivery obligations by making portfolio company summary and statutory prospectuses available online, with certain key information about the portfolio companies provided in the contract's summary prospectus.[339] This new option would be available to Form N–4 and Form N–6 registrants, but would not be available to Form N–3 registrants because they do not have underlying portfolio companies.

As proposed, this option would allow satisfaction of prospectus delivery obligations with respect to a portfolio company, if: (1) An initial summary prospectus is used for each currently offered contract described under the related registration statement; [340] (2) a summary prospectus is used for the portfolio company (only if the portfolio company is registered on Form N–1A); [341] and (3) the portfolio company's current summary prospectus, statutory prospectus, SAI, and most recent shareholder reports are posted online under similar posting requirements for the variable contract's summary prospectuses and other documents.[342] In addition, the proposed rule would provide that any communication related to a portfolio company, other than a prospectus permitted or required under section 10 of the Securities Act, would not be deemed a prospectus if the above conditions are satisfied.[343]

As discussed above, we are concerned that the volume of disclosure materials variable contract investors currently receive may prevent them from reading the materials or fully understanding these products. While the proposed variable contract summary prospectus framework is intended to provide investors with key information relating to the contract's terms, benefits, and risks in a concise and more reader-friendly format, we are concerned that investors may not read or understand information if the variable contract summary prospectus is accompanied by hundreds of pages of underlying

[339] Proposed rule 498A(j).

[340] Proposed rule 498A(j)(1)(i).

[341] Proposed rule 498A(j)(1)(ii).

[342] Proposed rule 498A(j)(1)(iii).

[343] Proposed rule 498A(j)(2).

portfolio company prospectuses.[344] To address this issue, the proposed option for satisfying portfolio company prospectus delivery requirements would provide investors with certain key summary information about underlying portfolio companies in an appendix to the contract summary prospectus.[345] If an investor desires more detailed information about a particular portfolio company, prospectuses and other documents relating to the portfolio company would be available online and in paper or electronically upon request.

The vast majority of investors purchase variable contracts from sales persons, as opposed to purchasing directly from insurance companies.[346] We understand these sales agents assist investors in many ways, including providing information about underlying portfolio companies and sometimes recommending that investors allocate their contract value into specific portfolio companies. We anticipate that this would continue following our proposal, and that sales agents would assist investors in understanding key facts about the portfolio companies, obtaining portfolio company prospectuses, and understanding the proposed portfolio company prospectus delivery framework. For this reason, we believe that sales agents would play a significant role in continuing to provide information about portfolio companies to investors, even if investors were to no longer receive paper copies of portfolio company prospectuses.

b. Conditions

As a condition to relying on the new option, we would require the related variable contract to use an initial summary prospectus for each currently offered contract described under the related registration statement.[347] We believe that this condition would help promote the use of contract summary prospectuses. Also, the initial summary prospectus content requirements (as well as the requirements for the updating summary prospectus) would ensure that investors receive disclosure regarding: (1) The online availability of the portfolio company prospectuses; [348] and (2) key summary information about each of the portfolio companies.[349]

As a second condition, a portfolio company that is registered on Form N–1A must use a summary prospectus.[350] If we were to permit the satisfaction of delivery obligations by making portfolio company prospectuses (and other documents) available online, portfolio companies that are mutual funds and ETFs would have less incentive to use a summary prospectus.[351] We believe it is important to make available both a summary prospectus and the statutory prospectus for a portfolio company to continue the current layered disclosure approach for portfolio companies whereby investors have the option to choose the amount and type of information to review. This condition also would continue to provide investors with summary information about the portfolio company that we believe they are more likely to use and understand.[352]

Finally, to rely on the new option, the portfolio company's current summary and statutory prospectus, SAI, and most recent annual and semi-annual shareholder reports would be required to be posted online under similar conditions for the posting of variable contract materials:

- The materials are publicly accessible, free of charge, at the website address specified on the cover page or beginning of the summary prospectuses for the variable contract, for the time period specified in proposed rule 498A(h)(1); [353]
- The materials are presented on the website in a format, or formats, that are human-readable and capable of being printed on paper in human-readable format,[354] and permit persons accessing the materials to move directly back and forth between each section heading in a table of contents and the corresponding section of the document; [355]
- Persons accessing the materials must be able to permanently retain, free of charge, an electronic version of such materials in a format, or formats, that is human-readable and permits persons accessing the materials to move directly back and forth between each section heading in a table of contents and the corresponding section of the document; [356]
- Requested materials must be sent in paper or electronically upon request within three business days after receiving a request; [357] and
- The safe harbor specified in paragraph (h)(4) of the proposed rule would be available if the required materials are temporarily unavailable at the specified website.[358]

c. Interim Amendments to Portfolio Company Prospectuses

When a portfolio company supplements or otherwise amends its summary or statutory prospectus between annual updates, the amendment is typically filed with the Commission pursuant to rule 497 under the Securities Act.[359] In addition, we understand that the amendment is typically delivered to investors, either

[344] Variable annuity contracts offer an average of 59 portfolio companies as investment options. *See supra* note 8. While we intended mutual fund summary prospectuses to be three to four pages in length, rule 498 does not provide page length or similar restrictions and some summary prospectuses have been as long as 19 pages. *See* Request for Comment on Fund Retail Investor Experience, *supra* note 39, at n. 27 and accompanying text. If we conservatively estimate that each portfolio company summary prospectus is four pages in length, an investor who purchases a variable contract that offers 59 portfolio companies would receive 236 pages of portfolio company disclosure materials, in addition to the contract prospectus.

[345] A contract summary prospectus would include an appendix that would provide for each portfolio company its name, type or investment objective, adviser and subadviser, expense ratio, and average annual returns for the past year, five years, and ten years. *See supra* discussion at section II.A.1.c.ii(i); *see also infra* section II.D.2.r (discussing our proposal to include this appendix also in variable contracts' statutory prospectuses). Registrants on Form N–3, who would not be relying upon this optional method to satisfy portfolio company prospectus delivery obligations, would have the option of omitting the appendix and instead providing more detailed disclosures for the investment options offered under the contract that would be required by proposed Item 20 of Form N–3. *See supra* note 204 and accompanying text.

In addition, each summary prospectus would also include a Key Information Table that would provide certain disclosures about portfolio company risks and investment restrictions. *See supra* discussion at section II.A.1.c.ii(b)(ii); *see also infra* section II.D.2.c (discussing the Key Information Table in proposed Forms N–3, N–4, and N–6).

[346] Approximately 97% of sales of variable annuities are made through sales agents. *See* IRI Fact Book, *supra* note 8, at 168. Only a small percentage of investors purchase their variable contracts directly from the issuing insurance company. *See* Insurance Information Institute, *Facts + Statistics: Distribution Channels, available at https://www.iii.org/fact-statistic/facts-statistics-distribution-channels* (in 2013, 4% of new individual life insurance sales were directly sold). In comparison, only 50% of households owning mutual funds purchased their funds through sales agents. *See* Investment Company Institute, *Profile of Mutual Fund Shareholders, 2017* (Oct. 2017), at Fig. 3.1, *available at https://www.ici.org/pdf/rpt_17_profiles17.pdf.*

[347] Proposed rule 498A(j)(1)(i).

[348] *See supra* note 198 and accompanying text.

[349] *See supra* section II.A.1.c.(ii)(i).

[350] Proposed rule 498A(j)(1)(ii).

[351] For example, this online option would reduce—or fully eliminate—the cost savings associated with printing and mailing a summary prospectus as opposed to the statutory prospectus, since those summary prospectuses would be posted online instead of being printed and mailed.

[352] *See* 2009 Summary Prospectus Adopting Release, *supra* note 33, at paragraph accompanying n.195.

[353] Proposed rule 498A(j)(1)(iii).

[354] Proposed rule 498A(h)(2)(i); proposed rule 498A(j)(1)(iii). In addition, the materials must be presented on the website in a format or formats that are convenient for reading online and printing on paper. Proposed rule 498A(i)(3)(i); proposed rule 498A(j)(1)(iii).

[355] Proposed rule 498A(h)(2)(ii).

[356] Proposed rule 498A(j)(1)(iii); proposed rule 498A(h)(3). In addition, persons must be able to permanently retain these materials in a format or formats that are convenient for reading online and printed on paper. Proposed rule 498A(j)(1)(iii); proposed rule 498A(i)(3)(ii).

[357] Proposed rule 498A(j)(1)(iii); proposed rule 498A(i)(1).

[358] Proposed rule 498A(j)(1)(iii); proposed rule 498A(h)(4).

[359] Rule 497 under the Securities Act.

by special mailing or by including it with another mailing, such as with the account statement or confirmation.[360]

As discussed above, the proposed new option for satisfying portfolio company prospectus delivery requirements would require that current portfolio company summary prospectuses and statutory prospectuses be posted online. If a portfolio company amends its prospectus between annual updates, the updated prospectus must be posted online.

The proposed rule would not, however, include any separate requirement to deliver portfolio company prospectus amendments to investors. We believe that requiring delivery of prospectus amendments to investors who had not been delivered the prospectus itself could cause investor confusion. Instead, the proposed legend to the summary prospectus appendix listing all the portfolio companies available under the contract would include a statement that investors should review the prospectuses before making an investment decision and that they may be amended from time to time.[361] In addition, we note that if an interim amendment to a portfolio company prospectus affects the information provided in the variable contract summary prospectus (*e.g.,* a change to the type/investment objective or expense ratio of the portfolio company provided in the required appendix to the contract summary prospectus), then investors would receive notice of the change through an amendment to the contract summary prospectus which would be delivered to investors.[362]

We request comment generally on the proposal to permit a new option for satisfying portfolio company prospectus delivery requirements, and specifically on the following issues (in addition, we are requesting comment on certain parallel provisions of rule 498):

- Should the rule permit the use of the new option for satisfying portfolio company prospectus delivery requirements? Should this aspect of the proposed rule be optional as proposed or required if the variable contract uses a summary prospectus?
- The rule as proposed would only permit the use of the new option for portfolio company prospectuses if the related variable contract uses an initial summary prospectus for each currently offered contract described under the related registration statement. Should we permit the use of the new option even if the related variable contract does not use a summary prospectus? Why or why not?
- The rule as proposed would only permit the use of the new option if the portfolio company uses a summary prospectus. This would effectively require a portfolio company to use a summary prospectus if it does not already do so. If we were to permit the satisfaction of delivery obligations by making portfolio company prospectuses (and other documents) available online, would portfolio companies still have an incentive to use a summary prospectus? Should we permit the use of the new option even if the portfolio company does not otherwise use a summary prospectus? Why or why not?
- Should we modify any of the proposed conditions related to the new option for satisfying portfolio company prospectus delivery requirements, or add any additional conditions? For example, should we—as proposed—specify that these materials must be available at the same website address as the variable contract materials that appear online, or should there be flexibility regarding the website address on which the portfolio company materials appear? As another example, although the proposed rule specifies that the materials posted online must be in human-readable format, should we also require that the materials be posted online in machine-readable format to promote the gathering and dissemination of information by data aggregators?
- If we change any of the proposed conditions related to the new option, should we make parallel changes regarding the use of contract summary prospectuses? Should we similarly make any changes to rule 498 under the Securities Act governing mutual fund summary prospectuses for consistency or other reasons?
- Should we modify the proposed linking requirements in any way with respect to portfolio company documents encompassed by the online accessibility and delivery upon demand requirements of the proposed rule?
- Do the separate requirements of rule 498 regarding mutual fund summary prospectus documents create any confusion that should be addressed by proposed rule 498A?
- Under the rule as proposed, persons relying on the new delivery option would not be required to deliver interim prospectus supplements to investors. Should we instead require that interim prospectus supplements be delivered? Would confusion result if investors were to receive prospectus supplements when they had not previously received portfolio company prospectuses? Are there ways to mitigate any such confusion?
- Would the proposed legend on the initial and updating summary prospectuses provide sufficient notice to investors that portfolio company prospectuses may be amended from time to time? Why or why not? Should we revise the legend to include alternate or additional information? Should a similar legend also appear on the cover page of the contract summary prospectus, as well as in the appendix to the summary prospectus as proposed? Alternatively, should we require that a separate notice be given to investors to alert them of the online availability of prospectus supplements? If so, what information should that notice contain? Should that notice be filed with the Commission?
- Should the final rules provide that a communication relating to a portfolio company (other than a prospectus permitted or required under section 10 of the Securities Act) is not deemed to be a prospectus under section 2(a)(10) of the Securities Act under the conditions specified by the rule? Should we amend any of the conditions related to this provision?

C. Discontinued Variable Contracts

An insurance company may choose to stop offering a variable contract to new investors while continuing to accept additional payments from existing investors. Each additional purchase payment under a variable contract is considered a ''sale'' under section 5 of the Securities Act requiring delivery of a current prospectus, and variable contract issuers generally maintain current prospectuses for their products through the filing of annual post-effective amendments to the registration statements.[363]

As the number of contracts outstanding declines over time, the proportion of fixed costs per contract and other burdens associated with maintaining a current registration statement and mailing prospectuses increase over a diminishing asset base. Unlike other types of registered investment companies that can liquidate

[360] For investors who received a summary prospectus for a portfolio company, we understand that amendments are typically delivered to investors only if the amendments relate to the summary prospectus and summary section portion of the statutory prospectus.

[361] The appendix would include the following legend: ''The following is a list of [Portfolio Companies] currently available under the [Contract], which is subject to change as discussed in [the Statutory Prospectus for the Contract]. Before you invest, you should review the prospectuses for the [Portfolio Companies]. These prospectuses contain more information about the [Portfolio Companies] and their risks and may be amended from time to time. You can find the prospectuses and other information about the [Portfolio Companies] online at [____]. You can also request this information at no cost by calling [____] or by sending an email request to [____].'' *See* proposed Item 18 of Forms N–4 and N–6.

[362] The proposed rule would not affect the requirements to deliver other materials specified under other rules or terms of exemptive orders. *See, e.g.,* rule 35d–1 under the Investment Company Act (requiring a registered investment company with a name suggesting investment in certain investments or industries, or investment in countries or geographic regions, to adopt a policy to invest at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in investments suggested by its name, and if not a fundamental policy, to provide investors with at least 60 days prior notice of any change in that investment policy.

[363] *See supra* note 28 and accompanying text.

when assets are reduced to such a level that continuing the fund is not viable, an insurance company is unable to liquidate or otherwise terminate a variable contract. We understand that an insurance company may sometimes seek to encourage investors to exchange into new contracts or make buyout offers, but it cannot unilaterally terminate an investor's contract.

Staff No-Action Letters

Beginning in 1977, the staff of the Division of Investment Management issued a series of no-action letters stating that the staff would not recommend enforcement action if issuers did not update the variable contract registration statement and deliver updated prospectuses to existing investors, so long as certain conditions were met, including sending alternative disclosures to investors (each, a ''Staff Letter,'' and collectively, the ''Staff Letters'').[364] The last Staff Letter was issued in 1995.[365]

The Staff Letters generally were limited to Securities Act registration statements for contracts that are no longer offered to new purchasers and that have fewer than 5,000 investors (or participants in the case of group contracts).[366] The Staff Letters also identified a set of circumstances in which the staff would not recommend enforcement action once the registration statement is no longer updated:[367]

- There are no material changes made to the contract;
- Investors are provided the following disclosures:
  - The portfolio companies' current prospectuses (or summary prospectuses) and any updates thereto, annual and semi-annual reports, proxy materials, and any other periodic reports or other shareholder materials for the portfolio companies;
  - Confirmations of transactions in accordance with rule 10b–10 under the Exchange Act;
  - Within 120 days after the close of the fiscal year, updated audited financial statements of the registrant, and in the case of variable life insurance contracts, the depositor's updated audited financial statements;[368] and
  - At least once a year, a statement of the number of units and values in each investor's account.
- The registrant files periodic reports with the Commission pursuant to section 30 of the Investment Company Act (*i.e.,* reports on Form N–CEN);[369] and
- New contracts are not offered to the public, and the registrant does not contemplate such an offering in the future.

Liability

As of the end of calendar year 2017, we understand that more than half of variable contract Securities Act registration statements may provide the alternative disclosures that the Staff Letters describe:[370]

Status[371]	Variable annuity	Variable life insurance	Grand total
Registration Statements That Are Updated Annually	500	221	721
Registration Statements Operating Under Staff Letters	521	334	855
Total Number of Registration Statements	1,021	555	1,576

Providing the alternative disclosures described in the Staff Letters may have the effect of potentially limiting issuers' liability under certain provisions of the federal securities laws requiring a registration statement or prospectus to contain whatever information may be necessary or appropriate to avoid material misstatements or omissions.[372] Although these alternative disclosures may not be subject to liability under sections 11 or 12 of the Securities Act, or section 34(b) of the Investment Company Act, they are subject to provisions prohibiting material misstatements in the offer or sale of a security.[373]

Commission Position on Existing Contracts Whose Issuers Provide Alternative Disclosures to Investors

In proposing the new variable contract summary prospectus disclosure framework, we acknowledge the industry practice of providing alternative disclosures (which are

[364] *See, e.g.,* Great-West Life and Annuity Insurance Company, SEC Staff No-Action Letter (pub. avail. Oct. 23, 1990) (''1990 Letter''); MML Bay State Life Ins. Co., SEC Staff No-Action Letter (pub. avail. Apr. 12, 1990); Transamerica Occidental Life Insurance Co., SEC Staff No-Action Letter (pub. avail. Mar. 16, 1990); Connecticut Mutual Life Insurance Company, SEC Staff No-Action Letter (pub. avail. Mar. 7, 1990).

The staff declined to extend its no-action position to variable annuities funded by managed separate accounts. *See* Provident National Assurance Company, SEC Staff No-Action Letter (pub. avail. June 2, 1987); Great-West Life Assurance Company, SEC Staff No-Action Letter (pub. avail. June 4, 1987).

[365] *See* Metropolitan Life Insurance Co., SEC Staff No-Action Letter (pub. avail. Apr. 26, 1995) (''Metropolitan Letter'').

[366] In the 1990 Letter, the staff stated that it would no longer respond to no-action requests ''in this area unless they raise novel issues or involve more than 5,000 variable annuity or variable life insurance contracts.'' However, there are four Staff Letters concerning contracts where the number of investors exceeded 5,000. *See* Metropolitan Letter (42,910 investors); Monarch Life Insurance Co., SEC Staff No-Action Letter (pub. avail. June 9, 1992) (''Monarch Letter'') (5,900 investors); New York Life Insurance and Annuity Corp., SEC Staff No-Action Letter (pub. avail. Nov. 15, 1989) (13,713 investors); Security Benefit Life Insurance Company, SEC Staff No-Action Letter (pub. avail. July 2, 1987) (28,019 investors).

[367] Some of the circumstances identified in which the staff would not recommend enforcement action varied slightly across the Staff Letters over time, specifically with respect to the delivery and availability of the insurance company's audited financial statements. The circumstances discussed below reflect those identified in the most recent Staff Letters.

[368] With respect to variable annuities, the depositor's updated audited financial statements would be available upon request. *See, e.g.,* Metropolitan Letter; Monarch Letter.

[369] The Staff Letters specifically identified a registrant's filing of reports on Form N–SAR as one of the set of applicable circumstances. Form N–SAR was recently rescinded and succeeded by Form N–CEN. *See* Investment Company Reporting Modernization, Investment Company Act Release No. 32314 (Oct. 13, 2016) [81 FR 81870 (Nov. 18, 2016)] (''Investment Company Reporting Modernization Adopting Release''), at n.744 and accompanying text.

[370] Our understanding is based on staff review of filings with the Commission and discussions with industry participants.

[371] The number of registration statements is based on a count of unique Securities Act registration statements and amendments filed on EDGAR. The number of registration statements representing contracts that provide alternative disclosures instead of the contract statutory prospectus, as described in the Staff Letters, was based on the number of Form N–4 and Form N–6 filers that did not file a registration statement or amendment in 2017, but made other regulatory filings, such as filings on Form 24f–2 (the form used by variable insurance contracts to pay registration fees to the Commission).

[372] Sections 11 and 12(a)(2) of the Securities Act and section 34(b) of the Investment Company Act. *See supra* discussion at notes 311 (discussing section 12(a)(2) liability) and 322 (discussing section 11 liability). In addition, section 34(b) of the Investment Company Act also imposes liability for misstatements in a registration statement, however, unlike sections 11 and 12(a)(2), there is no private right of action available to aggrieved investors. *See Bellikoff* v. *Eaton Vance Corp.,* 481 F.3d 110 (2d Cir. 2007).

[373] *See, e.g.,* section 17(a) of the Securities Act; section 10(b) and rule 10b–5 under the Exchange Act. There may also be additional remedies for investors, for example, under state insurance law, state securities law, and contract law.

significantly different from the requirements of the proposed summary prospectus regime) under specific circumstances that the Staff Letters identify. In light of this proposal as well as other developments with respect to layered disclosure, we believe that it is useful to consider the appropriate disclosure framework for the types of contracts that have historically relied on the alternative disclosures.

If the proposed summary prospectus framework is adopted, the Commission would take the position that if an issuer of an existing contract that provides alternative disclosures does not file post-effective amendments to update a variable contract registration statement and does not provide updated prospectuses to existing investors, this would not provide a basis for enforcement action so long as investors receive the alternative disclosures. The Commission would take this position in recognition of the industry's practice that has developed in light of the Staff Letters, the costs and burdens that issuers of contracts operating in accordance with the Staff Letters currently incur, and the costs and burdens that issuers would incur under the proposed summary prospectus framework. Therefore, under the Commission's position, the Commission would permit contracts operating in the manner that the Staff Letters describe as of the effective date of any final summary prospectus rules (hereinafter referred to as the ''Alternative Disclosure Contracts'') to continue to operate in such manner.[374] For all other contracts, the Commission's position would not be applicable, and therefore variable contract issuers would be required to file post-effective amendments to update their registration statements and provide updated prospectuses under current regulatory requirements, and could avail themselves of the summary prospectus framework as adopted.

As a general matter, we believe that all variable contract investors should receive the same information. In this regard, our position with respect to Alternative Disclosure Contracts would be limited to the current universe of Alternative Disclosure Contracts, which will diminish in number over time. Our position is also based on our belief that the proposed summary prospectus framework could give investors more pertinent information to monitor their contract investment than the alternative disclosures. For example, the updating summary prospectus would include a brief description of certain changes to the contract that occurred during the previous year, as well as certain key information about the contract. We believe that investors could find this document to be more useful and user-friendly than the separate account financial statements that investors receive under the alternative disclosures.

Additionally, under the proposed summary prospectus regime, investors would receive key summary information about the portfolio companies (with the portfolio company prospectuses available online) instead of receiving the portfolio company prospectuses as they do currently.[375] This proposed layered disclosure approach could provide an additional tool to investors to access the level of information about portfolio companies that best serves their information needs.

We solicit comment on the following issues regarding the Alternative Disclosure Contracts:

- Would adoption of a summary prospectus framework and related form amendments effectively relieve some of the current burdens and costs on variable contract issuers of updating registration statements, and delivering updated prospectuses, such that the Commission's position on Alternative Disclosure Contracts would not be necessary? If not, to what extent would the burdens and costs of maintaining an updated registration statement and compliance with the proposed summary prospectus regime (to the extent that a registrant chooses to rely on proposed rule 498A) exceed that of providing the disclosure related to the Alternative Disclosure Contracts?
- Does the proposed summary prospectus regime give investors more pertinent information to use to help them make informed investment decisions, compared to the information investors holding Alternative Disclosure Contracts would receive?
- Are fees and charges for variable contracts currently established based on an expectation that the insurer will be able to provide alternative disclosures at some point, such as if a product launch is unsuccessful or if the insurer stops selling new contracts so that the number of investors diminishes over time? Would the Commission's position on Alternative Disclosure Contracts have other effects relating to new variable contracts? For example, would it cause insurers to be less willing to introduce new products?
- Would the Commission's position on Alternative Disclosure Contracts result in any variable contract design changes? Would the length of registration statements or prospectuses increase or decrease? If so, why? What would be the effect, if any, on contract disclosure?
- Under the Commission's position on Alternative Disclosure Contracts, which contracts should be able to provide alternative disclosures? For example, should the Commission's position be limited to Alternative Disclosure (*i.e.,* contracts operating in the manner that the Staff Letters describe) as of the effective date of the adoption of final variable contract summary prospectus rules? Should the ability to provide alternative disclosures be limited to contracts with a maximum of 5,000 investors (or participants in the case of group contracts)? [376] Instead of limiting the number of investors, should a different approach be considered, such as limiting relief based on aggregate contract value, the length of time since a contract was last offered to new investors, the costs of updating a registration statement per contract, or the expected cost of updating a registration statement per $1,000 of contract value? If so, what limits should be imposed and why, and what is the benefit of these alternatives over using the number of investors? Alternatively, should the ability to provide alternative disclosures apply to all contracts outstanding at (1) the time of adoption, (2) the effective date, or (3) the compliance date, for final variable contract summary prospectus rules? Why?
- What percentage of insurers currently delivers the alternative disclosures for at least one contract? What percentage of the variable contract business (in terms of number of contact owners and aggregate contract value) provides alternative disclosures? What are the size ranges of registration statements for those contracts that deliver alternative disclosures (both in terms of number of investors and in terms of aggregate contract value)?
- What number of investors, or aggregate contract value, would make providing alternative disclosures more cost-effective than annually updating a registration statement under the current variable contract prospectus delivery regime?
- What are the cost savings, if any, associated with providing alternative disclosures? What are the sources of the cost savings?
- Which current items of variable annuity and variable life insurance registration

[374] The Commission's position on Alternative Disclosure Contracts would be an agency statement of general applicability with future effect designed to implement, interpret, or prescribe law or policy. This position would be consistent with the Staff Letters up to the effective date of any final rule and effectively would moot those letters. The Commission's longstanding position is that all staff statements are nonbinding and create no enforceable legal rights or obligations of the Commission or other parties. *See, e.g.,* Statement by Chairman Jay Clayton Regarding Staff Views. Securities and Exchange Commission (Sept. 13, 2018), available at *https://www.sec.gov/news/public-statement/statement-clayton-091318.*

We note, however, that if a material change is made with respect to an Alternative Disclosure Contract, the registration statement for that contract would be required to be updated, and the contract would no longer be permitted to operate as an Alternative Disclosure Contract.

[375] Under proposed rule 498A, investors would not receive the portfolio company prospectuses if the registrant were to elect to rely on the new optional method to satisfy portfolio company prospectus delivery requirements. *See supra* section II.B.2.

[376] *See supra* note 366.

statements are the most difficult or time-consuming for variable contract issuers to update? Why are these items difficult or time-consuming to update?

• How frequently do material changes to the variable contract occur that would require an issuer that is delivering alternative disclosures to update its registration statement? What specific types of contract changes are considered to be material? What types of contract changes are considered to be non-material, such that the issuer would not update its registration statement in response to this condition? How are investors notified of any non-material changes? Are there types of contract changes where it is difficult to determine whether an issuer should update its registration statement? If so, please identify those types of changes.

• Do insurers currently host on their websites the alternative disclosure documents that are delivered to investors? Why or why not?

• Do investors that receive alternative disclosures contact their insurance company looking for information at a greater frequency than investors who receive a prospectus annually? What information are these investors looking for?

• Some of the circumstances that the Staff Letters identify vary depending on the no-action letter.[377] Under which circumstances are issuers providing alternative disclosures?

We request comment generally on how investors and financial professionals view the alternative disclosures, and specifically on the following issues:

• Investors that have variable contracts with registrants that provide alternative disclosures would receive different disclosure documents, and hence different sets of information, than they would receive under the proposed summary prospectus regime. Which approach do you believe is most beneficial for investors and why?

• To the extent that there are no material changes to a variable contract, what information about the contract—if any—do investors need to receive on an ongoing basis to monitor their investments in the contract and understand how the contract operates? If there are no material changes, would it be useful to investors to receive disclosure repeating key information of the contract each year, and/or to receive summary information about the portfolio companies each year?

• Are investors able to effectively understand financial statements that are provided as alternative disclosures, and are they useful in helping investors monitor their investments?

• An updated contract statutory prospectus, which investors typically receive annually, describes the variable contract but does not include insurance company or separate account financial statements. Investors holding contracts whose issuers provide alternative disclosures, however, receive the separate account financial statements annually, and in some cases the insurance company's financials. Assuming there are no changes to the contract in a given year, do investors have a preference as to which information they would rather receive? Is there other information that investors would like to receive?

Other Approaches to the Framework for Discontinued Contracts

If the Commission takes the position described in the prior subsection with respect to Alternative Disclosure Contracts, it would permit continued operation of Alternative Disclosure Contracts (*i.e.,* issuers with contracts that are operating as described in the Staff Letters on the effective date of the final rules permitting use of a variable contract summary prospectus). All other variable contract issuers would operate under the new summary prospectus framework. That is, they would be required to file post-effective amendments to update their registration statements and provide updated prospectuses under current regulatory requirements, and could avail themselves of the summary prospectus framework as adopted.

We are also considering two alternative approaches for discontinued contracts. Each of these alternative approaches would involve modifying, and codifying by rule, the disclosure framework the Staff Letters identify. Each of these alternative approaches could be implemented in two different ways:

• *Method One (Apply New Approach Only to Discontinued Contracts Going Forward):* Permit Alternative Disclosure Contracts to continue operating as they currently do under the Commission position described above. For future discontinued contracts, adopt final rules codifying certain practices the Staff Letters identify and apply those rules on a going forward basis.

• *Method Two (Apply New Approach to All Discontinued Contracts):* Adopt final rules codifying certain practices the Staff Letters identify and apply those rules to all discontinued contracts (including Alternative Disclosure Contracts).

We request comment on the Commission position described above, as well as the proposed approaches described below. We also request comment on whether an alternative approach should be implemented using method one or method two.

Approach 1 (Codification of Practices under Staff Letters with Modifications): Under Approach 1, the Commission would adopt final rules providing that a registrant would not have to comply with certain requirements to update the variable contract registration statement and deliver updated contract prospectuses to existing investors, so long as the registrant complies with the following conditions:

• Investors would receive an annual notice that includes information that is comparable to that which would be provided in an updating summary prospectus. Specifically, this notice would include: (1) The Key Information Table that would appear in an updating summary prospectus; (2) a brief description of any material [378] changes to the offering relating to fees, the standard death benefits, other benefits available under the contract, and portfolio companies available under the contract; [379] (3) a table that would include the same information about portfolio companies that would appear in the proposed appendix to the updating summary prospectus; and (4) legends informing investors that additional information about their contract—including the registrant's financial statements (the depositor's financial statements in the case of variable life insurance contracts) and portfolio company prospectuses and periodic reports to shareholders—is available online. Because this notice would not be a section 10(b) prospectus, it (unlike a summary prospectus under proposed rule 498A) would not be subject to liability under section 12(a)(2) of the Securities Act, although it would remain subject to the general antifraud provisions of the federal securities laws.[380] The notice would be posted to the insurance company's website.

• The financial statements provided to investors under the alternative disclosures in the Staff Letters would be filed with the Commission, posted to the insurance company's website, and delivered to an investor upon request;

• Registrants would be permitted to use the optional method to satisfy portfolio company prospectus delivery requirements as provided under proposed rule 498A; and

• Investors would continue to receive portfolio company shareholder reports and proxy materials.

Issuers would be able to rely on Approach 1 if the contract is no longer offered to new purchasers, there are under 5,000 investors, and there have been no material changes during the period since the most recent update. Approach 1 reflects our belief that the proposed summary prospectus framework could give investors more pertinent information to use to help them make informed investment decisions, compared to the information

[377] *See supra* note 367.

[378] The changes that would necessitate disclosure under this alternative are broader than one of the circumstances that the Staff Letters identify—that there be no material changes to the contract. With respect to the annual notice, even if there are no changes to the contract between the insurance company and the investor, there may still be material changes to the offering that must be disclosed, such as changes in investment options, investment restrictions, fees, and other matters.

[379] As under proposed rule 498A, a registrant also could provide a concise description of any other change that has been made to the contract, in addition to the changes that the proposed rule would require be described. *See* proposed rule 498A(c)(6)(ii); *see also supra* note 233 and accompanying text.

[380] *See supra* note 329 and accompanying text (discussing the liability provisions applicable to summary prospectuses under proposed rule 498A).

under the circumstances that the Staff Letters identify.[381] This approach seeks to provide many of the benefits to investors associated with the summary prospectus framework while limiting the burden of updating registration statements relating to contracts that are only offered to a limited number of investors.

Approach 2 (Permit Registration Statements to be Updated via Forward Incorporation by Reference). As a variation on the framework for Approach 1, we also request comment on whether the Commission should adopt final rules that would:

- Permit the registrant to rely on a modified version of rule 498A that would:
  - Require that investors receive an annual notice that includes information that is comparable to that which would be provided in an updating summary prospectus, as described in Approach 1;
  - Require that the contract statutory prospectus and SAI be made available online and delivered to an investor upon request; and
  - Permit registrants to use the proposed rule's optional method to satisfy portfolio company prospectus delivery requirements;
- Require the filing of separate account (including accumulation unit values for variable annuities) and depositor financials with the Commission, permit issuers to incorporate these documents by reference into the registration statement (even if they are filed after the effective date of the registration statement),[382] and require these financial statements to be posted to the insurance company's website, and delivered to an investor upon request; and
- Require that investors receive portfolio company shareholder reports and proxy materials.

As with Approach 1, issuers would be able to rely on Approach 2 if the contract is no longer offered to new purchasers, there are under 5,000 investors, and there are no material changes to the contract. Also, like Approach 1, Approach 2 reflects our belief that the proposed summary prospectus framework could give investors more pertinent information to use to help them make informed investment decisions, compared to the alternative disclosures received by investors under the circumstances that the Staff Letters identify.[383]

However, Approach 2 would be more similar to the proposed summary prospectus regime in certain respects, in terms of the requirements for the information that is (1) delivered to all investors (with the annual notice under Approach 2 substituting for the summary prospectus), (2) made available online, and (3) delivered to those investors who so request.[384] This approach seeks to provide many of the benefits to investors associated with the summary prospectus framework and reduce the burden of updating registration statements for contracts that are only offered to a limited number of investors.

Approach 2 differs from Approach 1 chiefly in that Approach 2 would require a registrant to maintain a current registration statement and make the statutory prospectus and SAI available online. However, under Approach 2, the registrant would only update the registration statement when there are material changes to the offering, since updated financial statements would be permitted to be forward incorporated by reference into the registration statement.[385] Approach 2 therefore could reduce some of the burdens associated with maintaining a current registration statement.

Since Approach 2 would entail the maintenance of a current registration statement, the liability provisions available under the federal securities laws would apply to Approach 2 to the same extent as under the current variable contract prospectus delivery regime[386] and under the proposed summary prospectus regime for registrants that choose to rely on proposed rule 498A.[387] While the disclosures required under Approaches 1 and 2 are similar and both include certain protections under the federal securities laws against material misstatements or omissions, disclosures under Approach 2 may not limit potential issuer liability to investors.

The following Table 4 summarizes the frameworks under the Staff Letters, Approaches 1 and 2, and the proposed summary prospectus framework under proposed rule 498A for certain documents to either be: (1) Delivered to all investors; (2) made available online; or (3) delivered to those investors who so request.

TABLE 4—DOCUMENTS AVAILABLE TO VARIABLE CONTRACT INVESTORS

	Staff letters and commission position	Approach 1	Approach 2	Summary prospectus framework under proposed rule 498A
Contract Statutory Prospectus *.	N/A[388]		Required to be available online and delivered (in paper or electronic format) upon request.	
Contract SAI *	N/A		Required to be available online and delivered (in paper or electronic format) upon request.	
Contract Part C Information *.	N/A		Filed with registration statement (available on EDGAR).	
Initial Summary Prospectus	N/A			Delivered to all new investors.

[381] *See supra* paragraph following note 374.

[382] *See, e.g., supra* note 364. Certain registrants that file on Forms S–1 or S–3 are permitted to update their registration statements by reference to Exchange Act reports filed after the effective date of the registration statement (''forward incorporation by reference'').

[383] *See supra* paragraph following note 374.

[384] *See supra* sections II.A.4 through 6. We assume for purposes of this discussion that the relevant requirements in these sections—for example, the formatting requirements and relevant linking requirements discussed in these sections—would be requirements under Approach 2.

[385] One important distinction is that, under the Staff Letters, one of the set of circumstances in which the staff has stated that it would not recommend enforcement action is if there are no material changes to the contract between the investor and insurance company. However, even if there are no material changes to the contract, there may still be material changes to the offering that is described in the registration statement. *See supra* note 378. These material changes to the offering generally should be described in any updating summary prospectus or similar notice.

See supra note 29 (discussing current requirements for updating variable contract registration statements).

[386] *See supra* note 372 and accompanying text (noting that providing the alternative disclosures described in the Staff Letters may have the effect of potentially limiting issuers' liability under certain provisions available under the federal securities laws).

[387] *See supra* section II.A.3.

TABLE 4—DOCUMENTS AVAILABLE TO VARIABLE CONTRACT INVESTORS—Continued

	Staff letters and commission position	Approach 1	Approach 2	Summary prospectus framework under proposed rule 498A
Updating Summary Prospectus *.	N/A			Delivered to all existing investors.
Alternative Notice to Investors *.	N/A	Delivered to all investors (would include information that is comparable to that which would be included in the updating summary prospectus).		N/A.
Financial Statements * [389]	Delivered to all investors	Required to be available online and delivered (in paper or electronic format) upon request, and also available on EDGAR.[390]		
Portfolio Company Prospectuses *.	Delivered to all investors	Delivered to investors, or, if the new option to satisfy portfolio company prospectus delivery is relied-upon,[391] required to be available online and delivered (in paper or electronic format) upon request.		
Portfolio Company Shareholder Reports.	Delivered to all investors	Delivered to all investors, or, if the new option to satisfy portfolio company prospectus delivery is relied-upon,[392] required to be available online and delivered (in paper or electronic format) upon request.		
Portfolio Company Proxy Materials.	Delivered to all investors.			

* Updated at least annually.

We request comments on the framework for discontinued contracts:[388] [389] [390] [391] [392]

- Should the Commission codify either Approach 1 or Approach 2? Why or why not? If so, which approach should the Commission codify? Would either of Approach 1 or Approach 2 facilitate the disclosure of useful information to investors in a better way than the information they would receive under the proposed summary prospectus regime? What are the benefits and drawbacks for investors of permitting Approach 1 or Approach 2, instead of requiring issuers to update the registration statement consistent with the proposed summary prospectus regime?
- Would either of Approach 1 or Approach 2 provide more useful information to investors than the information investors holding Alternative Disclosure Contracts would receive? If so, how?
- What number of investors or aggregate contract value would make reliance on Approach 1 or Approach 2 more cost-effective than annually updating a registration statement, both under current disclosure requirements and under the proposed summary prospectus regime?
- What are the expected cost savings, if any, associated with reliance on Approach 1 or Approach 2 as compared to: (1) The current disclosure regime; (2) the disclosures provided with respect to Alternative Disclosure Contracts; and (3) the proposed summary prospectus regime? What are the anticipated sources of the cost savings? Are there challenges that issuers would face in preparing and providing the information to investors that each alternative would require, and if so, what would these challenges (and any associated costs) be? Are there changes to the alternatives that we should consider in order to address those challenges? If so, what changes, and how would those changes affect investors' ability to make informed decisions?
- Under Approach 1 and Approach 2, investors would annually receive a notice that is substantially similar to the proposed updating summary prospectus. Should this notice be modified in any way? If so, how?
- Under Approach 1 and Approach 2, should the conditions incorporate a more precise definition of material changes that would require a registration statement to be updated? If so, what should the definition of material changes be? For changes to a registration statement that are not a material change to the contract, should we include a condition that the changes be posted on the insurance company's website and filed with the Commission? If so, what would be the costs associated with this condition? If not, why not?
- Under Approach 1, should the most-recently-updated prospectus and registration statement be made available to investors either by request or online? If not, why not? If we did require these documents to be made available online or by request, what kind of legend should appear on the cover page of these documents to make it clear to investors that these documents have not been updated, and that the contract has undergone no material changes, since the date of the document? Is there other information we should also require to be made available online (such as current investment restrictions associated with optional benefits, or a current Fee Table that shows both maximum and current contract fees)?
- Under Approach 1, certain materials would be required to be made available online. Should the web posting requirements be the same as those that proposed rule 498A would prescribe? Are there modifications that should be considered with respect to contracts relying on Approach 1? If so, what are those modifications and why are they necessary?
- Should a condition of Approach 1 be that audited financial statements of the registrant (and in the case of variable life insurance contracts, the depositor's audited financial statements) be filed with the Commission? If not, why not? What would be the additional costs associated with this condition?
- The approach in Approach 2, where a registration statement can refer to financial information that may be filed in the future avoiding the need to annually file a post-effective amendment to a registration statement, is permitted by other SEC registration forms, such as Form S–3. However, Securities Act rules still require that an updated registration statement be filed with the Commission once every three years.[393] Should such a requirement apply under Approach 2? Why? Instead, should we require a new prospectus to be filed every

[388] While the contract prospectus (and SAI and Part C information) would have been filed with the Commission earlier in the contract's life cycle, under the Staff Letters' framework and Approach 1, these documents are not updated annually, and registrants would not make these documents available to investors either online or in paper format.

[389] These include updated audited financial statements of the registrant, and in the case of variable life insurance contracts, the depositor's updated audited financial statements. *See supra* note 368 and accompanying text.

[390] The financial statements are part of the contract SAI, and proposed rule 498A would require a registrant relying on the rule to make the SAI available online. *See* proposed rule 498A(h)(1); proposed Item 26 of Form N–4; proposed Item 27 of Form N–6.

Approaches 1 and 2 separately would require financial statements to be filed with the Commission, posted to the insurance company's website, and delivered to an investor upon request. *See supra* text following note 380; *supra* note 382 and accompanying text.

[391] *See supra* section II.B.2; *see also supra* bullets accompanying notes 378–382.

[392] *See id.*

[393] *See* rule 415(a)(5) under the Securities Act.

three years? If not, why not? In between updates to a registration statement, issuers typically file stickers reflecting certain changes.[394] Instead of requiring updated registration statements or prospectuses after a certain period of time, should we limit the number of stickers before an updated registration statement or prospectus must be filed? If so, what should be the limit?

- Should Approach 2 be permitted for all registration statements even if the contract is still offered to new purchasers, has over 5,000 investors, or may have had material changes since the most recent prospectus update? What would be the benefits to registrants and investors of permitting forward incorporation by reference, as under Approach 2, for all variable contract registration statements? Or, would this result in changes to variable contract disclosure practices that would impede investors' ability to understand their variable contracts in any way?

Other Considerations

- How do Approach 1 and Approach 2 compare to the requirement to update a registration statement, and to the circumstances that the Staff Letters identify, with respect to the liability provisions available to investors under the federal securities laws? Are there changes to Approach 1 and Approach 2 that should be considered to further protect investors?
- Approaches 1 and 2 contemplate that the codified relief would be available only to Form N–4 and Form N–6 registrants (as the conditions associated with portfolio company disclosure would be applicable only to Form N–4 and Form N–6 registrants, and not also Form N–3 registrants).[395] Should the Commission's position on Alternative Disclosure Contracts or Approaches 1 or 2 be extended to managed separate accounts? If yes, how should the conditions be modified to accommodate managed separate accounts? For example, should we consider an approach similar to rule 8b–16(a) under the Investment Company Act where updated information about the contract (including audited financial statements for the insurance company) and the investment options are included in the separate account's annual shareholder report?
- Should the Commission's position on Alternative Disclosure Contracts or Approaches 1 or 2 be extended to annuity contracts registered with the Commission under the Securities Act only and filed on Forms S–1 and S–3? If yes, how should the conditions be modified to accommodate these contracts?
- If the Commission were to codify Approach 1 or Approach 2, should issuers that are operating in the manner described in the Staff Letters, as of the effective date of the adoption of final variable contract summary prospectus rules, be permitted to continue operating in this manner? Or should the Commission instead require all issuers—including those that are operating in the manner described in the Staff Letters as of the effective date of the adoption of final variable contract summary prospectus rules—to satisfy the conditions under Approach 1 or Approach 2? If commenters believe that the latter approach is appropriate, should Approach 1 or Approach 2 be available to only those contracts that are no longer offered to new purchasers, make no material changes, for contracts with fewer than a certain number of investors, or for some other group of contracts? Why?

D. Proposed Amendments to Registration Forms

We are proposing amendments to Forms N–3, N–4, and N–6 to update and enhance the disclosures to investors in variable contracts, and to implement the proposed summary prospectus framework. These proposed amendments include new disclosure requirements to reflect the evolution of variable contract features, including, in particular, the prevalence of optional benefits that insurers offer under these contracts. In addition, we are proposing amendments to provide greater consistency among the registration forms for variable contracts. Form N–6, which was adopted in 2002 and is the newest variable contract form, served as a model for many of the proposed revisions to Forms N–3 and N–4. Accordingly, we are proposing fewer changes to Form N–6 than the other forms.

Certain investors who are considering variable annuities may also be considering variable life insurance (and vice versa). We believe a consistent presentation could reduce investor confusion and promote investor understanding through common disclosure across types of variable products on elements that we consider useful in explaining variable contracts' features and risks. Also, we believe that more uniformity of disclosures across variable contract types may make it easier for investors to compare similar products. Similarly, we believe that increasing consistency of disclosure requirements among registration forms could increase efficiencies among sponsors of variable contracts that register on multiple of these registration form types, and other market participants.

1. General Instructions

We are proposing amendments to the General Instructions of Forms N–3, N–4, and N–6 regarding the preparation and filing of registration statements. The proposed General Instructions would, like the General Instructions in current Form N–6,[396] be structured to include four parts: (A) Definitions; (B) Filing and Use of Form; (C) Preparation of the Registration Statement; and (D) Incorporation by Reference.[397] With the exception of General Instruction C.3, these amendments are organizational in nature and incorporate minor changes that are not intended to significantly alter the content of the current General Instructions for these forms.

Proposed General Instruction C.3 would provide substantive requirements for the preparation of the registration statement, including instructions relating to the organization, presentation, and prospectuses permitted to be included in a registration statement. The instruction would parallel Instruction C.3 of current Form N–6 in substance, except as described below.

Proposed General Instruction C.3.(a) would require that the disclosures in response to Item 2, Item 3, and Item 4 of the registration forms appear in numerical order at the front of the prospectus, and not be preceded by anything other than a cover page (Item 1), a glossary, or a table of contents. We believe that these disclosures should appear at the beginning of the prospectus because they contain the most salient information about a variable contract's key features, costs, and risks.[398] Additionally, the instruction would provide that, if the discussion of the information that Items 2 or 3 requires also responds to disclosure requirements in other items of the prospectus, a registrant need not include additional disclosure that repeats this information.

Proposed General Instruction C.3.(b) would provide that, except in response to Items 2 and 3, a registrant would be

[394] *See supra* note 29 and accompanying text.

[395] Under the Staff Letters, one of the set of circumstances under which the staff has stated that it would not recommend enforcement action is that investors are provided prospectuses for the underlying portfolio companies. However, because a managed separate account prospectus describes both the offering of the contract and the investment options, it is not possible to provide the investment option prospectuses separate from the separate account prospectus.

[396] While the proposed General Instructions in Forms N–3 and N–4 would be structured like the General Instructions in current Form N–6, there are certain new instructions that we are proposing to add to each of the forms. *See, e.g.,* proposed General Instructions C.3.(a), C.3.(b), C.3.(c), C.3.(e), and C.3.(h) to Forms N–3, N–4, and N–6, each described *infra.*

[397] In 2017, the Commission proposed amendments to its rules on incorporation by reference as part of a broader proposal to modernize and simplify certain disclosure requirements in Regulation S–K (and related rules and forms) to implement Section 72003 of the Fixing America's Surface Transportation Act. *See* 2017 FAST Act Proposal, *supra* note 307. We would amend any references to these rules in the General Instructions to Forms N–3, N–4, and N–6 to reflect any rules that the Commission may adopt based on that proposal.

[398] The disclosure that proposed Items 2 and 3 would require also would appear at the beginning of the initial summary prospectus. *See supra* note 75 and accompanying text.

permitted to include information in the prospectus or SAI that is not otherwise required, so long as it is not incomplete, inaccurate, or misleading and does not, because of its nature, quantity, or manner of presentation, obscure or impede understanding of the information that is required to be included. This instruction is intended to provide flexibility to registrants to include contextual and other information that could aid investors' understanding of variable contracts and assist them in making informed investment decisions.

Proposed General Instruction C.3.(c) would encourage registrants to use, as appropriate, question-and-answer presentations, tables, side-by-side comparisons, captions, bullet points, numeric examples, illustrations or similar presentation methods.[399] We believe that these alternative ways of presenting information could increase readability and that this proposed instruction could encourage registrants to use these presentation options, where appropriate.

Proposed General Instruction C.3.(d) includes in substance the requirements of Item 2 (Definitions) of current Forms N–3 and N–4. The changes conform this instruction to the language in the parallel current General Instruction of Form N–6, which we believe will improve readability and consistency across form types.

Proposed General Instruction C.3.(e) would provide new guidance in each of the forms addressing when a registrant may describe multiple contracts in a single prospectus, and include multiple prospectuses in a single registration statement. First, proposed General Instruction C.3.(e)(i) would provide that registrants may describe multiple contracts in a single prospectus when the contracts are ''essentially identical.'' Whether the contracts are essentially identical would depend on the facts and circumstances. The proposed instruction includes examples to provide guidance on this point.[400] Similarly, proposed General Instruction C.3.(e)(ii) would further provide that a registrant may combine multiple prospectuses in a single registration statement when the prospectuses describe contracts that are essentially identical. The proposed instruction also includes examples to provide guidance on this point.[401] We believe these examples are generally consistent with current industry practice.

While proposed paragraph (a) of General Instruction C.3 requires registrants to disclose the information required by Items 2, 3, and 4 in numerical order at the front of the prospectus and generally not to precede the items with other information, proposed General Instruction C.3.(e)(iii) would provide that, as a general matter, registrants providing disclosure in a single prospectus for more than one contract, or for contracts sold in both the group and individual markets, may depart from this requirement as necessary to present the required information clearly and effectively (although the order of information required by each item must remain the same). The proposed instruction would include examples to provide guidance on this point.[402]

Proposed paragraph (h) of General Instruction C.3, which would require variable contracts to use the Inline XBRL format for the submission of certain required disclosures in the variable contract statutory prospectus,[403] is discussed in more detail in Section II.E below.

Proposed paragraph (i) of General Instruction C.3 would require any website address or cross-reference that is included in an electronic version of the statutory prospectus (*i.e.,* electronic versions sent to investors or available online) to be an active hyperlink.[404] This instruction is intended to ensure that investors viewing electronic versions of the prospectus are able to easily access website addresses and cross-referenced materials that are referenced in the prospectus. This requirement would not apply to statutory prospectuses that are filed on the EDGAR system.[405]

We request comment generally on the proposed amendments to the General Instructions of Forms N–3, N–4, and N–6 and specifically on the following issues:

- Would the proposed instructions provide clear guidance to registrants when preparing or amending a registration statement? Should any of the proposed instructions be modified or not be included? For example, proposed paragraph (i) of General Instruction C.3 would require any website address or cross-reference that is included in an electronic version of the statutory prospectus to be an active hyperlink. Should we broaden that requirement to also apply to the SAI and Part C of the registration statement? Would broadening the requirement in this manner result in any synergies or redundancies with the requirements of proposed rule 498A(h)(2)(iii)?[406] Additionally, to what extent, if any, would the proposed requirement regarding active hyperlinks present challenges or add costs or burdens with respect to the use of statutory prospectuses, given that active links are not required in EDGAR filings (and active links to websites, locations, and documents outside of the EDGAR system are expressly prohibited pursuant to rule 105 of Regulation S–T [17 CFR 232.105])? Are there additional instructions that we should include? Should any current instructions not be included in the revised forms?
- Are the proposed definitions listed as Part A of the General Instructions clear, or should they be modified? Are there additional definitions that we should include in proposed Part A of the General Instructions?
- Are the proposed instructions in Part B of the General Instructions relating to the filing and use of the registration forms clear, or should they be modified? For example, proposed General Instruction B.2.(b) to Forms N–3, N–4, and N–6 provides that for registration statements or amendments filed only under the Investment Company Act, registrants need not respond to certain items of the forms. Those registration statements generally relate to contracts offered to institutional investors who are seeking to provide coverage for their key personnel, and

[399] *See, e.g.,* Kleimann Presentation, *supra* note 106 (encouraging, for example, the use of question-and-answer format, the use of headings to make structure clear, using a strong design grid to organize elements, making line length readable, and using common words and sentence constructions as ways of designing disclosure to promote readability).

[400] The examples clarify that a contract that does not offer optional benefits would not be essentially identical to one that does. Similarly, group and individual contracts would not be essentially identical. However, contracts that vary only due to state regulatory requirements would be essentially identical.

[401] The examples clarify that a registrant could determine it is appropriate to include multiple prospectuses in a registration statement in the following situations: (1) The prospectuses describe the same contract that is sold through different distribution channels; (2) the prospectuses describe contracts that differ only with respect to underlying funds offered; or (3) the prospectuses describe both the original and an ''enhanced'' version of the same contract (where the ''enhanced'' version modifies the features or options that the registrant offers under that contract).

[402] The examples clarify that a prospectus may present all of the Item 2 information for several contracts, followed by all of the Item 3 information for the contracts, and followed by all of the Item 4 information for the contracts. Alternatively, the prospectus may present Items 2, 3, and 4 for each of several contracts sequentially. Other presentations also could be acceptable if they are consistent with the form's intent to disclose the information required by Items 2, 3, and 4 in a standard order at the beginning of the prospectus. As guidance, we believe that regardless of the presentation method chosen, when disclosing information relating to one of several contracts, registrants should clearly identify to which contract the information relates.

[403] *See* proposed General Instruction C.3.(h) to Forms N–3, N–4, and N–6; *see also* proposed Items 3, 4, 5, 12, 19, and 20 of Form N–3; proposed Items 3, 4, 5, 11, and 18 of Form N–4; proposed Items 3, 4, 5, 11, and 18 of Form N–6.

[404] *See* proposed General Instruction C.3.(i) to Forms N–3, N–4, and N–6.

[405] *Id.; see also* rule 105 of Regulation S–T [17 CFR 232.105] (prohibiting hyperlinking to websites, locations, or other documents that are outside of the EDGAR system).

[406] *See supra* section II.A.5.

therefore certain disclosures that would be relevant to retail investors are less significant.[407] Should that instruction in each of the forms be updated to either add any additional items to, or remove any of the items from, this proposed list of exclusions?

- Would the proposed instructions in Part C of the General Instructions result in clearer and more concise disclosure to investors? Are there other instructions that we should include to encourage registrants to use plain English principles or otherwise promote clear and concise disclosure?
- Would other requirements improve the utility and accessibility of the statutory prospectus for retail investors? Are there any areas in the document where requiring the use of a specific check-the-box approach, bullet points, tables, charts, graphs or other graphics or text features would be helpful in presenting any of the information or making it more engaging to retail investors? Should we include requirements for font size, margins and paper size? Should we restrict certain types or sizes of font, color choices or the use of footnotes?
- Is the requirement of proposed General Instruction C.3.(a) that Items 2, 3, and 4 appear in numerical order at the front of the prospectus appropriate? Should we specify that any other items appear at the front of the prospectus? Should all of the portions of the statutory prospectus that are also summary prospectus disclosures be segregated and placed at the beginning of the statutory prospectus to aid in the effective presentation of information for investors in contracts whose issuers choose not to rely on proposed rule 498A?
- Are the instructions in proposed General Instruction C.3.(e) on when registrants may describe multiple contracts in a single prospectus, and include multiple prospectuses in a single registration statement, clear and appropriate? Is it clear when contracts are ''essentially identical,'' or would additional clarification (either in the form text, or provided as Commission guidance) be helpful? Are the examples that the proposed form instructions include useful and appropriate? Are they generally consistent with current industry practice? Should we modify or expand these examples in any way? Would some alternative standard for when a single prospectus may describe multiple contracts, or for when a single registration statement may include multiple prospectuses, be more appropriate than the proposed ''essentially identical'' standard?
- Should a registrant only be permitted to describe a single contract in a prospectus, and if so, what parameters should dictate what a single contract is? Likewise, should a registrant only be permitted to include one prospectus in a registration statement? What is industry practice in terms of describing multiple contracts in a single prospectus, and combining multiple prospectuses into a single registration statement? What are the benefits and costs of this practice, both to members of the industry as well as to investors?
- Should we, as proposed, permit registrants that are providing disclosure for more than one contract in a single prospectus, or for contracts sold in both the group and individual markets, to depart from the instruction to disclose the information required by Items 2, 3, and 4 in numerical order to present the required information clearly and effectively (provided the order of information required by each item remains the same)? Should this instruction be modified in any way?
- Should the instructions in proposed Part D of the General Instructions regarding the use of incorporation by reference be modified in any way?

2. Part A (Information Required in a Prospectus)

Table 5 shows how our proposed amendments would amend the item requirements of Part A of the variable contract registration forms.

TABLE 5—PROPOSED AMENDMENTS TO PART A OF FORMS N–3, N–4, AND N–6

Item description	Proposed item No.	Form N–3: Proposed treatment	Form N–4: Proposed treatment	Form N–6: Proposed treatment
Front and Back Cover Pages (in Forms N–3 and N–4, currently ''Cover Page'').	• Form N–3: Item 1 (currently Item 1). • Form N–4: Item 1 (currently Item 1). • Form N–6: Item 1 (currently Item 1).	Revised	Revised	Revised.
Overview of the Contract	• Form N–3: Item 2 • Form N–4: Item 2 • Form N–6: Item 2	New Item (also in ISP)	New Item (also in ISP)	New Item (also in ISP).
Definitions	N/A (currently, Item 2 in Forms N–3 and N–4).	Revised (incorporated in General Instructions).	Revised (incorporated in General Instructions).	N/A (incorporated in General Instructions).

New Item (also in ISP, USP)	New Item (also in ISP, USP).
In Form N–3: Additional Information About Investment Options Available Under the Contract.	• Form N–3: Item 20	New Item (also in ISP, USP if disclosures from Item 19 are not included).	New Item	New Item.

a. Front and Back Cover Pages (Item 1 of Forms N–3, N–4, and N–6)

We propose to amend Item 1 of each registration form to reflect the requirements for the prospectus cover pages required by Item 1 of current Form N–6, with three additions to the front cover page:

- First, we are proposing that the front cover page include the name of the contract and the class or classes, if any, to which the contract relates to help clarify the specific contract and class or classes covered by the prospectus; [409]
- Second, as with the initial summary prospectus and updating summary prospectus, we are proposing that the front cover page include a statement directing an investor to the *Investor.gov* website for additional information; [410] and
- Third, as with the initial summary prospectus, we are proposing that the front cover page include a legend informing investors about the free look period.[411]

To streamline the front cover page and because similar information would appear in tabular presentation in the prospectus, we are proposing to eliminate the current requirements in Forms N–3 and N–4 that the registrant include on the front cover page the type of separate account and names of the available portfolio companies, respectively.

Additionally, we are proposing that the prospectus back cover page include certain additional information concerning: (1) The availability of the SAI and how to request other information about the contract; (2) whether and from where information is incorporated by reference into the prospectus as permitted by proposed Part D of the Form's General Instructions; and (3) the EDGAR contract identifier for the contract.[412]

We request comment generally on the proposed amendments to the prospectus cover page requirements, and specifically on the following issues:

- Are there additional disclosure topics that should be included in the cover pages of the statutory prospectus?
- As proposed, should a legend that is similar to the disclosure regarding the free look period on the cover page of the initial summary prospectus also appear on the cover page of the statutory prospectus? Why or why not? Should we modify the proposed legend regarding the free look period that would appear on the cover page of the statutory prospectus in any way?
- Should the registration forms require that the registrant include the names of the investment options/portfolio companies on the front cover page?
- Should we require the name of the contract and the class/classes?

b. Overview of the Contract (Item 2 of Forms N–3, N–4, and N–6)

We propose to add new Item 2 to the registration forms, which would require registrants to include certain basic and introductory information about the contract and its benefits.[413] These disclosures would also be required in initial summary prospectuses.[414]

We request comment generally on the proposal to include a new item requiring registrants to include in the prospectus an overview of the contract, and specifically on the following issues:

- Should we require the proposed overview discussion to be included in the statutory prospectus? Are the content requirements for this proposed item appropriate for inclusion in the statutory prospectus?
- Should the disclosure requirements for this item be modified in any way for the statutory prospectus?

c. Key Information (Item 3 of Forms N–3, N–4, and N–6)

We propose to add new Item 3 to the registration forms, which would require a statutory prospectus to include the Key Information Table providing a brief description of key facts about the variable contract.[415] The Key Information Table would also appear in the initial summary prospectus and the updating summary prospectus, except that it could vary depending on the scope of the initial summary prospectus (which could only describe a single contract that the registrant currently offers for sale), in contrast to the updating summary prospectus and statutory prospectus (which could describe multiple contracts under the conditions of the proposed General Instructions to the registration forms).[416] An updating summary prospectus that describes multiple contracts could contain a separate Key Information Table for each of the contracts, or use a different presentation approach that consistently discloses the required information for each contract in the required order. [417]

We request comment generally on the proposal to include the Key Information Table in the prospectus, and specifically on the following issues:

- Should we require the proposed Key Information Table to be included in the statutory prospectus? Are the content requirements for this proposed item appropriate for inclusion in the statutory prospectus?
- Should the Key Information Table in the statutory prospectus differ in any respect from the table in the summary prospectuses? If so, in what respect? Should we eliminate certain line-items? Are there additional disclosure topics that we should require in the Key Information Table that appears in the statutory prospectus?
- Would the Key Information Table disclosure requirements confuse investors if a prospectus were to describe multiple contracts? For example, if a prospectus that describes multiple contracts were to include a single Key Information Table that discloses separate fee information in the ''Fees and Expenses'' line-items for each contract, would this confuse investors?
- Are there certain disclosure presentations that would be so lengthy, or overly-broad, that they may not be useful to investors? Would it be useful for us to provide additional instructions in the form, about different approaches that registrants could take in presenting any of the required information in the Key Information Table? For example, with respect to fee disclosure in the Key Information Table, should we provide guidance or additional instructions on whether it would be acceptable to present a range of minimum and maximum fees, and lowest and highest annual costs, that includes all of the contracts that the prospectus describes, or instead require registrants to provide separate fee and cost ranges for each contract that the prospectus describes? Alternatively or additionally, should we require disclosure in the Key Information Table reminding investors to review their individual contract for information about the specific fees they will pay in connection with their contract?
- As discussed above, we are proposing a requirement that the Key Information Table include cross-references to the location in the statutory prospectus where the relevant subject matter is described in greater detail.[418] We are separately proposing a

[408] We are proposing to eliminate the Table of Contents of the SAI that is required by Item 15 of current Form N–3 and Item 14 of current Form N–4. We do so to streamline the prospectus and avoid duplicative disclosure with the SAI, which separately requires a Table of Contents. *See infra* section II.D.3.

[409] Proposed Item 1(a)(5) of Forms N–3; proposed Item 1(a)(4) of Forms N–4 and N–6.

[410] Proposed Item 1(a)(8) of Form N–3; proposed Item 1(a)(7) of Forms N–4 and N–6; *see also supra* note 84 and accompanying text.

[411] Proposed Item 1(a)(10) of Form N–3; proposed Item 1(a)(8) of Forms N–4 and N–6; *see also supra* note 83 and accompanying text. The proposed legend on each of the three forms would read: ''If you are a new investor in the [Contract], you may cancel your [Contract] within 10 days of receiving it without paying fees or penalties. In some states, this cancellation period may be longer. Upon cancellation, you will receive either a full refund of the amount you paid with your application or your total contract value. You should review this prospectus, or consult with your investment professional, for additional information about the specific cancellation terms that apply.''

[412] Proposed Item 1(b) of Forms N–3, N–4, and N–6.

[413] *See supra* section II.A.1.c.ii(a) for a discussion of these requirements in more detail. Proposed Item 2(d) of Form N–6 would include the requirements that appear in Item 2(a) of current Form N–6.

[414] Proposed rule 498A(b)(5)(i).

[415] *See supra* section II.A.1.c.ii(b) for a discussion of these requirements in more detail.

[416] *See supra* sections II.A.1 and II.A.2.

[417] *See supra* section II.A.2.c.ii(b).

[418] *See supra* note 162 and accompanying text.

General Instruction (and a parallel instruction in proposed rule 498A) requiring cross-references in electronic versions of the statutory prospectus to link directly to the location in the statutory prospectus where the subject matter is discussed in greater detail).[419] Should we instead include a General Instruction in each of the registration forms (and/or rule 498A as appropriate) that would provide that, where a topic is summarized in the summary or statutory prospectus and is discussed in more detail elsewhere in the statutory prospectus, the summarized topic must include a cross-reference (and a hyperlink in electronic document versions) to the location in the statutory prospectus where the topic is discussed in more detail?

d. Fee Table (Item 4 of Forms N–3, N–4, and N–6)

We propose to amend Item 3 of the current registration forms (which we would re-designate as Item 4) to simplify and update current fee and expense disclosure obligations.[420]

i. Transaction Expenses (Forms N–3 and N–4)

We are proposing to modify the current ''Contractowner Transaction Expenses'' table in Forms N–3 and N–4 (which we would re-title as ''Annual Transaction Expenses'' in each form) by removing the current ''Surrender Fees'' line-item in this table. We believe the current ''Deferred Sales Load'' line-item in the table would already capture these fees.[421] Correspondingly, we are proposing to revise the title of the ''Deferred Sales Load'' line-item to include ''Deferred Sales Load (or Surrender Charge)'' to clarify that a registrant should continue to include surrender charges in the table.

ii. Annual Contract Expenses (Forms N–3 and N–4) and Periodic Charges Other Than Portfolio Company Operation Expenses (Form N–6)

We are proposing several changes to the current ''Annual Account Fee'' and ''Annual Expenses'' line-items in Form N–3,[422] and the current ''Annual Contract Fee and Separate Account Annual Expenses'' table in Form N–4. As proposed, each would be retitled, as a stand-alone table, under the heading ''Annual Contract Expenses'' in both forms to clarify that the item reflects insurance-related annual contract fees and not the fees related to investment options.

In addition, we are proposing to modify the captions for existing line-items, consolidate certain line-items, and add a new line-item for optional benefits in this table in each form.[423] Under the proposal, the ''Annual Contract Expenses'' table in Forms N–3 and N–4 would be composed of the following line-items:

- *Administrative Expenses.* The line-item ''Annual Contract Fee'' in Form N–4 (''Annual Expenses'' in Form N–3) would be replaced with the more plain-English ''Administrative Expenses.'' [424]
- *Base Contract Expenses.* We are consolidating the current line-item under ''Annual Expenses'' in Form N–3 (''Mortality and Expense Risk Fees,'' and ''Other Expenses''), and the current line-items under ''Separate Account Annual Expenses'' in Form N–4 (''Mortality and Expense Risk Fees,'' ''Account Fees and Expenses,'' and ''Total Separate Account Annual Expenses'') under a single new line-item in each table, ''Base Contract Expenses.'' Collapsing these fees into a single line-item is intended to make it easier for investors to understand the annual cost of investing in the basic variable contract.[425] Any other recurring charge (other than charges associated with the portfolio companies, or management fees in the case of Form N–3) would appear as an additional line-item in the Annual Transaction Expenses table or the Annual Contract Expenses table, and would disclose the maximum amount or basis on which the charge is deducted.[426]
- *Management Fees.* Unlike Forms N–4 and N–6, which as discussed below would require separate disclosures about total annual portfolio company operating expenses, Form N–3 would not require such disclosures because Form N–3 registrants have a single-tier structure and do not have underlying portfolio companies. However, Form N–3 registrants generally do have distinct management fees for each investment option offered under the contract. Since these management fees can vary significantly, we propose to require disclosure of the management fee for each investment option.[427]
- *Optional Benefits.* In recognition of the fact that variable contracts today commonly offer optional benefits, the table in Forms N–3, N–4, and N–6 would require a new line-item that would require registrants to list any optional benefits available under the contract, along with its corresponding annual charge.[428] In Form N–6, this same new line-item would be added in the ''Periodic Charges Other Than Portfolio Company Operations Expenses'' table.[429]
- *Total Annual Contract Expenses.* In Form N–3, we are proposing a new requirement to disclose total annual contract expenses, and a related instruction that would specify that total annual contract expenses should be disclosed as a percentage of account value.[430] While annual contract expenses are generally calculated as a percentage of account value, optional benefit expenses may be calculated on a different basis, such as a percentage of the benefit base or as a percentage of average net assets. The proposed instruction would provide that if optional benefit expenses are calculated on a basis other than account value, registrants should prominently indicate that those optional benefit expenses are not included in total annual contract expenses (because they are calculated on different bases and cannot be added). The requirement to disclose total annual contract expenses would differ from the proposed approach to disclosing annual contract expenses in Form N–4, which would require separate line-items for administrative expenses, base contract expenses, and optional benefit expenses, but would not (unlike the proposed approach in Form N–3) require the disclosure of a composite total of these line-items.[431]

---

[419] *Id.*

[420] We also propose to change the title of the Item from ''Synopsis of Highlights'' in Form N–3, ''Synopsis'' in Form N–4, and ''Risk/Benefit Summary: Fee Table'' in Form N–6 to ''Fee Table'' in all three forms.

[421] As a conforming change, we propose to remove Instruction 2(c) to current Item 3 of Form N–3 and Instruction 10 to current Item 3 of Form N–4 and revise Instruction 2(b) to current Item 3 of Form N–3 and Instruction 9 to current Item 3 of Form N–4 (which we would re-number as Instruction 10 in each form) to clarify that the term ''deferred sales load'' includes surrender charges.

[422] In current Form N–3, these items are each presented as line-items in the table that Item 3(a) requires.

[423] Although these proposed revisions generally apply to Forms N–3 and N–4, as discussed below, the new line-item for optional benefits would also be added to the ''Periodic Charges Other Than Portfolio Company Operation Expenses'' table in Form N–6.

[424] We also propose to make conforming changes to Instruction 3 to current Item 3 of Form N–3 and Instruction 7 to current Item 3 of Form N–4, which we would renumber as new Instruction 8 in both forms (no changes to the definition).

[425] We also propose to make conforming changes to each form's instructions. We propose to remove Instruction 4(b) to current Item 3 of Form N–3 and Instruction 13 to current Item 3 of Form N–4, which permit ''Mortality and Expense Risk Fees'' to be listed separately on two lines in the table. We also propose to revise Instruction 14 to current Item 3 of Form N–4 (which we would renumber as Instruction 13), and add a corresponding new Instruction 13 to proposed Item 4 of Form N–3, to state that ''Base Contract Expenses'' includes mortality and expense risk fees, and account fees and expenses. We would also include a new Instruction 3(e) to proposed Item 4 of Form N–6 permitting Registrants to consolidate any charges that are assessed on a similar basis (*e.g.,* Administrative charge and Mortality and Expense Risk Fees).

[426] We propose to revise and renumber Instruction 15 to current Item 3 of Form N–4 (which currently appears under the heading ''Portfolio Company Annual Expenses'') as Instruction 14 to proposed Item 4 (to appear under the heading ''Other Annual Expenses'') to make clear that other annual expenses are required to be disclosed (not just other portfolio company annual expenses, as the current instruction provides).

[427] *See* Instruction 7 to proposed Item 4 of Form N–3.

[428] *See* Instruction 15 to proposed Item 4 of Forms N–3 and N–4.

[429] *See* Instruction 3.(f) to proposed Item 4 of Form N–6.

[430] *See* Instruction 16 to proposed Item 4 of Form N–3.

[431] *See* ''Annual Contract Expenses'' table in Item 4 of proposed Form N–4. We understand that most registrants on Form N–4 calculate optional benefit expenses on a basis other than contract value. Because of this, it would generally be difficult to sum optional benefit expenses with other expenses that are presented as annual contract expense line-items. In contrast, we understand that most

iii. Total Annual Portfolio Company Operating Expenses (Form N–4)

We are proposing to amend the disclosures that registrants would provide with respect to the ''Total Annual Portfolio Company Operating Expenses'' table in Form N–4. First, we are proposing to revise the legend that would precede the table to direct investors to the new appendix required by new Item 18 relating to the portfolio companies available under the contract. As a conforming change, we are proposing to eliminate current Instruction 20 (stating that a registrant may include additional tables showing annual operating expenses separately for each portfolio company immediately following the required table), as this information would duplicate the fee information that would appear in the new appendix.

We also propose to simplify other instructions to the table. We propose to revise current Instruction 17(a) (which we would re-designate as new Instruction 16) to instruct registrants to use the gross expense ratio presented in the fee table of a portfolio company's current prospectus when disclosing the minimum and maximum ''Total Annual [Portfolio Company] Operating Expenses.'' Current Instruction 17(a) contains instructions for calculating Total Annual Portfolio Company Operating Expenses, which results in a figure that is the same as the gross expense ratio presented in a portfolio company's prospectus fee table. Directing registrants to use the gross expense ratio reflected in a portfolio company's current prospectus would avoid the need to provide detailed instructions in the form regarding how to calculate this figure (as is the case with current Instruction 17(a)).[432]

We also propose revising current Instruction 19 (and renumbering it as Instruction 17) to modify the way that registrants could reflect operating expenses that include expense reimbursement or fee waiver arrangements. Currently, the instruction specifies that such expenses could appear in a footnote to the table. The revised instruction would instead state that these could appear as an additional line-item to the table. We believe that including these disclosures as a separate line-item in the table would provide a clearer presentation for investors than a footnote to the table.[433]

iv. Example (Forms N–3 and N–4)

We are proposing to update the requirements for the Example that would appear in the Fee Table in Forms N–3 and N–4 in several respects. First, we propose to revise the legend accompanying the Example to reflect the revised Fee Table headings and to reference the inclusion of optional benefits in the Example's assumptions. We believe the Example should reflect the highest cost that an investor may pay under the contract, inclusive of any available optional benefits. We also propose to increase the value of the assumed investment from $10,000, as required under Item 3 of current Form N–4 (and $1,000, as required under Item 3 of current Form N–3), to $100,000. We believe that $100,000 more closely approximates the current average value of a variable annuity,[434] and therefore we believe this figure is more likely to result in cost projections that align with actual investor expectations and experience.

We are also proposing to revise the instructions for the Example to clarify that registrants must provide an example for each contract class, consistent with current practice.[435] We also propose to revise Instruction 21(b) in current Form N–4 (which we would re-number as Instruction 18(b)), and to add new Instruction 16(b) in Form N–3, to make clear that that an example showing the most expensive combination of contract features should be shown first, while additional expense examples would be permitted, but not required.

In addition, we propose to remove the last sentence of Instruction 21(b) of current Form N–4, which states that in lieu of providing the required example based on maximum portfolio company expenses, a registrant may include separate expense examples based on the expenses of each portfolio company. In our experience, registrants rarely include separate expense examples based on the expense of each portfolio company (likely because to do so would add extensive length to the Example section of the prospectus). Eliminating this option would therefore not only reflect actual practice, but also would be consistent with our goal of streamlining prospectus disclosure.

We also propose to make certain technical corrections to Instructions 21(a) and (b) of current Form N–4, by eliminating references to amortization costs, which do not apply to variable annuity contracts that are structured as UITs.[436]

v. Portfolio Turnover (Form N–3)

Because Form N–3 registrants have a single-tier structure, investors do not receive separate prospectuses containing portfolio turnover information for investment options offered under the contract, as is the case for portfolio companies offered under contracts registered on Forms N–4 and N–6. We propose to require disclosure of portfolio turnover for each investment option in Form N–3, as well as a brief statement explaining that portfolio turnover has associated transaction costs, and that a higher portfolio turnover rate may indicate higher transaction cost and higher taxes, which affect the investment option's performance.[437] These disclosure requirements would largely restate existing requirements in caption 10 of Item 4(a) of current Form N–3, although they would include the brief statement that is required by the parallel item in Form N–1A in order to provide more context and information for investors.[438]

vi. General Instructions (Forms N–3, N–4, and N–6)

In addition to specific instructions associated with each of the tables and the Example(s) that would appear in response to the proposed Item 4 disclosure requirements, we also propose to update the General Instructions associated with this item.

Instruction 1(a) to the Fee Table in current Form N–6 instructs registrants to round all dollar figures to the nearest

registrants on Form N–3 either do not offer optional benefits or else calculate optional benefit expenses on a contract value basis. We therefore believe that proposing the disclosure of total annual contract expenses is appropriate for Form N–3 registrants, because the disclosure would be practicable and could help investors understand the total expenses (not including portfolio company fees and expenses) that they will pay each year.

[432] Because this simplification would render obsolete the rest of Instruction 17, as well as Instructions 16 and 18, to current Item 3 of Form N–4, we propose eliminating them.

[433] *See* Disclosure of Costs and Expenses by Insurance Company Separate Accounts Registered as Unit Investment Trusts that Offer Variable Annuity Contracts, Investment Company Act Release No. 25802 (Nov. 13, 2002) [67 FR 69973 (Nov. 19, 2002)], at n.14 and accompanying text (''We intend that the staff construe the amendments to the fee table of Form N–4 consistent with the approach taken under Form N–1A, to permit the addition of one line to the fee table showing the range of net Portfolio Company operating expenses after taking account of contractual limitations that require reimbursement or waiver of expenses.'').

[434] *See supra* note 130.

[435] The instructions for the Example in current Item 3 of Form N–3 (currently unnumbered) would be new Instruction 17 to proposed Item 4, while Instruction 21 to current Item 3 of Form N–4 would be renumbered as Instruction 18 to proposed Item 4.

[436] When Forms N–3 and N–4 were first adopted, the references in Form N–3 to amortization costs were inadvertently included in Form N–4. Because investors in UITs (Form N–4 and N–6 filers) do not pay amortization costs, we are removing this reference from the instruction.

[437] *See* proposed Item 4 of Form N–3.

[438] *See* Item 3 of Form N–1A.

dollar and all percentages to the nearest hundredth of one percent.[439] Because of the underwriting process inherent in variable life insurance contracts, rounding dollar figures to the nearest dollar for certain younger and healthier investors may result in disclosures of zero cost for certain fees, which may be misleading for investors. Therefore, we have proposed to modify this instruction to only require rounding percentages to the nearest hundredth of one percent.[440]

We also propose to revise General Instruction 5 of Form N–4 to state that if a fee is calculated based on a benchmark (*e.g.,* a fee that varies according to volatility levels or Treasury yields), the registrant must disclose a maximum guaranteed charge as a single number. We believe that this proposed instruction would help minimize confusion regarding how much an investor can expect to pay under the contract and would better assist investors in understanding the costs they will pay when investing in a variable annuity. Without this clarifying statement, registrants that offer variable annuity contracts that link certain fees to benchmarks might seek only to present the maximum fee as a range (*e.g.,* a certain percentage plus or minus a stated benchmark).[441] Under the proposed instruction, a registrant that chooses to disclose the fee range (*e.g.,* a fee that varies based on the 10-year Treasury rate) associated with a particular feature could do so, as long as they also disclose the maximum possible charge (*e.g.,* 3%). We also propose to add a parallel provision to Form N–3 as General Instruction 5 of Item 4.

As part of our effort to update the Fee Table, we propose to modify current General Instruction 1.(f) to Item 3 of Form N–3 and General Instruction 6 to Item 3 of Form N–4 to eliminate language that would be redundant in light of new proposed General Instruction C.3.(e) of both forms.[442] We also propose to include new General Instruction 7 to Forms N–3 and N–4, which would require registrants offering a contract with more than one class to provide fee and expense information for each class (and, for Form N–3 registrants, to require registrants offering more than one investment option to provide a separate response for each investment option).[443]

vii. Instructions for New Variable Contract Registrants (Forms N–3, N–4, and N–6)

Finally, we propose to eliminate certain instructions in Item 3 of current Forms N–3, N–4, and N–6 relating to new variable contract registrants. Specifically, we propose to eliminate Instructions 4(d)(i), 4(f)(ii), 4(g)(vi) and Instruction (f) under ''Example'' in Form N–3, Instruction 22 of Form N–4, and Instruction 5 of Form N–6 as the staff has found these instructions to be unnecessary.

For example, Instruction 4(d)(i) to Item 3 of current Form N–3, Instruction 22(a) to Item 3 of current Form N–4, and Instruction 5(a) to current Item 3 of Form N–6 instruct a registrant to base the percentages in the Total Annual Portfolio Company Operating Expenses table on estimated amounts for the current fiscal year, but we understand that these operating expenses need not be estimated because they would not vary based on whether the registrant is new or already exists. Likewise, Instructions 4(f)(ii) and 4(g)(vi) to Item 3 of current Form N–3, Instruction 22(b) to Item 3 of current Form N–4, and Instruction 5(b) of Item 3 to current Form N–6 state that a new registrant may disclose any expense reimbursement or fee waiver arrangements that are expected to reduce the expenses that the table would show. Because Instruction 14(e) in proposed Item 4 of Form N–3, Instruction 17 in proposed Item 4 of Form N–4, and Instruction 4(b) in proposed Item 4 of Form N–6 would address this same issue, and we do not see a reason to distinguish between new and existing registrants for this purpose, these current Instructions are unnecessary.

Lastly, Instruction (f) under the ''Example'' in Item 3 of current Form N–3 and Instruction 22(c) to Item 3 of current Form N–4 state that new registrants must only complete the 1- and 3-year period portions of the Example and estimate any annual contract fees collected. However, because variable contract charges are contractual and do not vary based on whether the variable contract registrant is new or existing, we believe a new registrant's Example should include the full 1, 3, 5, and 10-year periods required of existing registrants. For these reasons, we propose to eliminate these current Instructions in their entirety.

We request comment generally on the amendments we propose to make to the Fee Table, and specifically on the following issues:

- Would the proposed changes to the Fee Table disclosures effectively and appropriately streamline and consolidate the Form and the required disclosures? Would the proposed changes better reflect registrants' current disclosure practices? Would the new captions convey, more clearly than the current captions, the types of expenses investors can expect to pay under the contract?
- Are the proposed disclosure requirements and related instructions associated with the ''Annual Contract Expenses'' table appropriate? For example, would the table appropriately disclose the annual fees and expenses associated with a variable contract? As another example, is ''Base Contract Expenses'' an appropriate way to describe the basic insurance-related contract features available under the contract, or would some other term be preferable? How else might we characterize the charges associated with the basic features available under the contract (excluding optional benefits and annual portfolio company operating expenses)?
- For Form N–3 registrants, should we revise or remove the instruction to the ''Total Annual Expenses'' line-item providing that if optional benefit expenses are calculated on a basis other than contract value, registrants should prominently indicate that those optional benefit expenses are not included in total annual expenses? Would investors be confused by viewing total annual expenses which did not include optional benefit expenses? In this case, or generally, should we not require disclosure of total annual expenses? Conversely, should we require disclosure of total annual expenses for all registrants on Forms N–4 and N–6, as well as on Form N–3?
- Would the proposed requirements appropriately convey to investors the types of optional benefits available under the contract and the charges associated with each? Should we require disclosure of optional benefits that are available at no additional charge in the list of optional benefits? If not, why not?
- Should we revise the legend that would precede the required ''Total Annual Portfolio

[439] *See* Instruction 1(a) to current Item 3 of Form N–6.

[440] *See* Instruction 1(a) to proposed Item 4 of Form N–6.

[441] Our staff has observed that some registrants disclose a fee range for certain optional benefits based on a benchmark (*e.g.,* a fee that varies according to volatility levels or Treasury yields), without also disclosing a firm cap on the maximum amount an investor may have to pay for that contract feature.

[442] We propose to remove from Instruction 6 to current Item 3 of Form N–4 and Instruction 1.(f) to current Item 3 of Form N–3 the statement that ''[i]f a Registrant uses one prospectus to offer a contract in both the group and individual variable annuity contract markets, the Registrant may (a) add narrative disclosure following the fee table identifying markets where certain fees are either inapplicable or waived or lower fees charged to investors in group markets, or (b) provide a separate fee table for group and individual contracts,'' as proposed General Instruction C.3.(e)(i) of Forms N–3 and N–4 would address the registration of multiple contracts.

[443] This would harmonize the General Instructions associated with the Fee Table for Forms N–3 and N–4 with parallel instructions in Form N–1A. *See* Instruction 1(d)(ii) to Item 3 of Form N–1A (''If the prospectus offers more than one Class of a Multiple Class Fund or more than one Feeder Fund that invests in the same Master Fund, provide a separate response for each Class or Feeder Fund.'').

Company Operating Expenses'' table, as proposed in Forms N–4 and N–6? Are the amendments that we propose to the current instructions associated with this table appropriate? Should we make any other modifications to the table?

- Should we modify the requirements for the Example that would appear in the Fee Table, as proposed? Would the revised legend accompanying the Example appropriately alert investors to the assumptions that form the basis for the Example? Are the proposed revised instructions for the Example, including eliminating the option to include separate expense examples based on the expenses of each portfolio company, appropriate? Would they result in a clearer and more salient illustration of the costs of investing in the contract? Would increasing the value of the assumed investment in the Example from $10,000 (or $1,000 in the case of Form N–3 registrants) to $100,000 more closely align with typical current levels of investment in variable contracts? Are there any other modifications to the Example that we should make? If so, what?
- Should we revise the General Instructions to the Fee Table item, as proposed? For example, would the proposed requirement to disclose a maximum guaranteed charge as a single number, if a fee is calculated based on a benchmark, reduce investor confusion and better assist investors in understanding the costs they will pay when investing in a variable annuity? Are the other proposed revisions to the General Instructions appropriate to eliminate redundant language, and to otherwise update the tables? Should we modify or remove any other General Instructions, and if so, how?
- Are there any current General Instructions that we also should amend or other General Instructions we should include?
- Are there any additional modifications we should require to make the fee and expense information easier for investors to understand?

e. Principal Risks of Investing in the Contract (Item 5 of Forms N–3, N–4, and N–6)

We propose to add new Item 5 to Forms N–3 and N–4, which would require registrants to summarize the principal risks of purchasing a contract, including the risks of poor investment performance, that contracts are unsuitable as short-term savings vehicles, limitations on access to cash value through withdrawals, and the possibility of adverse tax consequences. The new disclosure item for Forms N–3 and N–4 generally mirrors Item 2(b) of current Form N–6 (which we propose to re-designate as Item 5), with the exception of the risk of contract lapse.[444] Although registrants currently include risk disclosures in their prospectuses without an explicit form requirement to do so, we note that in some cases, the risk discussions are provided across various sections of the prospectus. We believe the approach taken in Form N–6 of requiring a consolidated summary of the principal risks associated with the contract would provide more effective communication of risks to investors.

Although current Form N–6 requires risk disclosures to be presented in a summary section at the front of the statutory prospectus, we propose to require for each registration form that the risk section be provided after the Key Information Table and Fee Table. While the Key Information Table would include a condensed discussion of contract risks, proposed Item 5 would give registrants the flexibility to describe the principal risks of investing in the contract in more detail than what could reasonably appear in a table meant to summarize the contract's key risks and features. While we are not proposing to limit the length of the summary of principal risks in response to proposed Item 5, we believe that the utility of a summary would be undermined by the long, complex descriptions we sought to avoid when we adopted the summary principal risk section as part of Form N–6.[445]

We request comment generally on the proposal to include a new item requiring disclosure of principal risks in the prospectus, and specifically on the following issues:

- Should we require the summary of principal risks of investing in a contract to be disclosed in a single location in the prospectus? Should we instead permit registrants the flexibility to disclose risks in conjunction with the specific contract feature to which they pertain, thus providing greater context for the risk(s)?
- Should the summary of principal risks disclosures be required to follow the Key Information Table and Fee Table, or should we require or permit the disclosures to be provided elsewhere in the prospectus?
- Does the proposed item appropriately describe the types of risks to be summarized, or should the list of risks be revised?
- Would cross-referencing the risk section in the Key Information Table provide useful layered disclosure for investors, or are there limitations in this approach? How might they be resolved?
- Should we impose a page limit, or other length limit, on responses to the proposed item? If so, what limit would be appropriate? Should we instead allow registrants the flexibility to determine how much disclosure is appropriate? Are there any organizing principles we might consider to encourage registrants to avoid overly-lengthy disclosure?
- Should we make any other changes regarding proposed prospectus disclosures describing risks associated with the contract?
- Should we require the Item 5 disclosures to also be included in the Initial Summary Prospectus and Updating Summary Prospectus?

f. General Description of Registrant, Depositor, and Investment Options/ Portfolio Companies (Item 6 of Forms N–3, N–4, and N–6)

We propose to amend Item 5 of current Forms N–3 and N–4, and Item 4 of current Form N–6, which we would re-designate as Item 6 in each of the registration forms. Reflecting the more up-to-date requirements of the parallel item of current Form N–6, we are proposing to amend Forms N–3 and N–4 to relocate certain information from the prospectus to the SAI: (1) With respect to the depositor, a description of the general nature of its business, its date and form of organization and the state or other jurisdiction under which it is organized, and information relating to persons controlling the depositor; and (2) with respect to the registrant, its date and form of organization and classification pursuant to section 4 of the Investment Company Act, and whether there are sub-accounts of the registrant.[446] In addition, for consistency with Form N–6 and our newer registration forms,[447] in Forms N–3 and N–4 we are proposing to relocate the requirement to identify and state the principal business address of any person who provides significant administrative or business affairs

[444] We are not including risk of contract lapse in proposed Item 5 of Form N–3 or Form N–4 because lapse, which occurs when there is insufficient cash value to pay insurance policy charges, is a less significant risk for variable annuities. Lapse is a greater risk for variable life insurance contracts, which, unlike variable annuities, require continuous premium payments (failure to pay premiums generally triggers a lapse and terminates the contract). In addition, the expenses associated with the death benefit for a variable life insurance contract tend to be higher than those for a variable annuity (in proportion to contract cash value). Higher expenses more quickly erode a variable life insurance contract's cash value, which if insufficient to pay policy charges, will cause the contract to lapse.

[445] *See* Registration Form for Insurance Company Separate Accounts Registered as Unit Investment Trusts that Offer Variable Life Insurance Policies, Investment Company Act Release No. 23066 (Mar. 13, 1998) [63 FR 13988 (Mar. 23, 1998)] (''Form N–6 Proposing Release''), at n.8 (noting that ''[v]ariable life insurance prospectuses generally disclose [information required under the item as proposed], particularly risk information, in the context of long, often complex descriptions of the policy. The Commission believes that the proposed narrative summary will help achieve more effective communication of risks.'').

[446] Proposed Item 6(a) and (b) of Forms N–3 and N–4; proposed Item 22(a) and (b) of Form N–3; proposed Item 20 of Form N–4; *see also* Item 5(a) and 5(b) of current Forms N–3 and N–4.

[447] *See, e.g.,* Item 17(c) of current Form N–6; Item 19(h) of Form N–1A.

management services, and a description of those services, from the prospectus to the SAI.[448]

We are also proposing to amend the information required by the current item in Forms N–4 and N–6 regarding portfolio companies (and for Form N–3, investment options).[449] As discussed below, we are moving the summary of certain information about the portfolio companies and investment options to an appendix of the prospectus.[450] Therefore, with respect to Forms N–4 and N–6, we propose to revise this item to replace the current requirement to briefly describe each portfolio company [451] with a requirement to state that certain information about the portfolio companies is available in the appendix and to cross-reference or link to that appendix, to further state that more detailed information is available in the portfolio companies' prospectuses, and to explain how investors may obtain copies of those prospectuses.[452]

Proposed Item 19 of Form N–3 similarly would require a comparable appendix of investment options, but only if the appendix were included in a summary prospectus.[453] Registrants would also include more detailed disclosures about investment options as required by proposed Item 20. Proposed Item 20 would generally include the disclosures required by current Item 5(c) through (e) regarding investment objectives and policies and principal risk factors associated with investing, as well as additional disclosures regarding the performance of each investment option.[454] Similar to Forms N–4 and N–6, proposed Item 6 would require a Form N–3 registrant to state that certain information about the investment options is available in the appendix (pursuant to proposed Item 19) or elsewhere in the prospectus (pursuant to proposed Item 20), and provide cross-references or links as appropriate.

We request comment generally on the amendments we propose to make to the required prospectus disclosures describing the registrant, depositor, and portfolio companies, and specifically on the following issues:

- Should we streamline the disclosures relating to the depositor and registrant as proposed? Would these proposed amendments reduce any information that would be important to investors? Should we maintain any existing disclosures or require additional disclosures as to the depositor and registrant?
- Should we relocate the requirement to disclose information relating to service providers to the SAI as proposed?
- Should we make any other changes to the form regarding required prospectus disclosures describing the registrant, depositor, and/or portfolio companies?

g. Charges (Item 8 of Form N–3, Item 7 of Forms N–4 and N–6)

We propose to amend Item 7 of current Form N–3 and Item 6 of current Form N–4 (which we would re-title, and re-designate as Item 8 (in the case of Form N–3) and Item 7 (in the case of Form N–4) to reflect the more up-to-date requirements of the parallel item of current Form N–6.[455]

Paragraph (a) would expand the disclosure requirements of the current item in Forms N–3 and N–4 to include certain additional disclosure requirements that currently appear in the parallel item of Form N–6. The proposed amended items would require a registrant to provide a brief description of charges deducted from ''any other source'' (in addition to charges specifically deducted from purchase payments, investor accounts or assets of the registrant, which is currently required). These additional charges could include, for example, contract loan charges and optional benefit charges. In addition, we are proposing to require that the registrant describe: (1) The frequency of deductions (*e.g.,* daily, monthly or annually) for any recurring charges; and (2) where it is possible to identify what is provided in consideration for a particular charge (*e.g.,* use of sales load to pay distribution costs), an explanation of what consideration is provided. We believe these additional disclosures could help alleviate investor confusion about costs by more specifically describing the types of charges that might be incurred under a variable annuity contract.

In addition, Instruction 1 to subparagraph (a) of the proposed amended item in Forms N–3 and N–4 would include a new requirement for the registrant to describe the factors affecting the computation of the amount of the sales load.[456] For contracts with a deferred sales load, Instruction 1 would require the registrant to describe the sales load as a percentage of the applicable measure of purchase payments (or other basis) that the deferred sales load may represent, rather than the amount withdrawn or surrendered. Additionally, registrants would identify any events that would cause the deduction of a deferred sales load (*e.g.,* surrender or partial surrender). The description of any deferred sales load would include how the deduction will be allocated if the investor has allocated contract value among multiple sub-accounts and when, if ever, the sales load will be waived (*e.g.,* if the contract provides a free withdrawal amount).

We are also proposing new Instruction 4 to subparagraph (a) of the amended item of Forms N–3 and N–4.[457] If the contract's charge for premium taxes or other taxes varies according to jurisdiction, proposed Instruction 4 would clarify for the registrant that identifying the range of current premium taxes or other taxes in this paragraph is sufficient.

We also propose to revise the item related to charges in each form to clarify that the required disclosures should relate to ''current'' charges.[458] Disclosure of ''maximum'' charges would be redundant because those charges are encompassed in the fee table that would be included in the prospectus.[459]

Finally, we are proposing to amend the item of Form N–6 relating to charges in two respects. First, we are proposing to relocate disclosures on commissions paid to dealers from the SAI [460] to the prospectus.[461] We believe that this disclosure, which is currently required in the prospectus under Forms N–3 and N–4,[462] is more appropriate in the prospectus due to potential conflict of interest concerns. In addition, we also propose to require a description of the types of operating expenses for which the registrant is responsible,[463] which

[448] *See* proposed Item 25(g) of Form N–3; proposed Item 21(c) of Form N–4.

[449] Item 5(c) through (e) of current Form N–3; Item 5(c) and (d) of current Form N–4; Item 4(c) and (d) of current Form N–6.

[450] *See infra* section II.D.2.r (discussing proposed Item 19 of Form N–3, proposed Item 18 of Forms N–4 and N–6).

[451] *See* Item 5(c) of current Form N–4; Item 4(c) of current Form N–6.

[452] Proposed Item 6(c) of Forms N–4 and N–6.

[453] Instruction 1(a) to proposed Item 19 of Form N–3; *see also supra* text accompanying note 204 and note 241.

[454] *See infra* text following note 525 (discussing the disclosure requirements of proposed Item 20 of Form N–3).

[455] *See* Item 5 of current Form N–6.

[456] This instruction is based on Instruction 1 to Item 5(a) of current Form N–6.

[457] This instruction is based on Instruction 3 to Item 5(a) of current Form N–6.

[458] *See* proposed Item 8(a) of Form N–3; proposed Item 7(a) of Forms N–4 and N–6.

[459] *See* Item 4 of proposed Forms N–3, N–4, and N–6.

[460] Item 20(d) of current Form N–6.

[461] Proposed Item 7(b) of Form N–6.

[462] *See* Item 7(d) of current Form N–3; Item 6(d) of current Form N–4.

[463] Proposed Item 7(e) of Form N–6. If organizational expenses of the registrant are to be paid out of its assets, this item also would require an explanation of how the expenses will be amortized and the period over which the amortization will occur.

Forms N–3 and N–4 currently require in the prospectus.[464] Operating expenses paid by the registrant can be significant, and we believe this is appropriate disclosure for an item discussing contract charges.

We request comment generally on the amendments we propose to make to the required prospectus disclosures regarding contract charges and specifically on the following issues:

- Will investors find the information resulting from the expanded disclosure requirements of the proposed amendments useful (*e.g.,* new requirements in Forms N–3 and N–4 that the registrant describe the frequency of deductions for any recurring charges and, where it is possible to identify what is provided in consideration for a particular charge, an explanation of what consideration is provided)?
- Is the proposed new instruction in Forms N–3 and N–4 that would permit a registrant to disclose a range of charges for premium or other taxes (if these would vary according to jurisdiction) appropriate? Instead, should the prospectus specify each of these charges individually?
- Should we require prospectus disclosure of additional information regarding contract charges?
- In the context of Form N–6 registrants, are there reasons that disclosures on commissions paid to dealers should not be located in the prospectus (and instead should be located in the SAI)? Will the new requirement in Form N–6 to provide a description of the types of operating expenses for which the registrant is responsible better help investors to understand contract charges?
- Are there any instructions that we should not include? Are there any additional instructions we should include?

h. General Description of the Contracts (Item 9 of Form N–3, Item 8 of Forms N–4 and N–6)

We propose to amend Item 8 of current Form N–3, Item 7 of current Form N–4, and Item 6 of current Form N–6 (which we would re-designate as Items 9, 8, and 8, respectively) to reflect the more up-to-date requirements of Form N–6 (in the case of the amendments to Forms N–3 and N–4) and also to harmonize this disclosure item with other proposed amendments to the forms. Except as described below, we do not intend these proposed amendments to significantly alter current disclosure obligations.

We propose to remove the current instruction to subparagraph (a) of Forms N–3 and N–4, which states that the registrant need not repeat rights that are described elsewhere in the prospectus, and replace it with a new instruction to subparagraph (a) in each of the forms[465] that requires registrants to disclose all material state variations and intermediary-specific variations (*e.g.,* certain contract features that may vary by distribution channel). Due to differences in state insurance law, there may be significant variations in a contract based on the state in which a contract is offered. We have also observed that certain contract features may not be available through certain intermediaries.

We also propose to revise current subparagraph (b) of Forms N–3 and N–4 regarding contract provisions and limitation in two ways.[466] First, we would require registrants to briefly describe any provisions and limitations for minimum contract value and the consequences of falling below that amount, because those consequences in some cases can be significant.[467] Second, we are proposing to modify the current requirement in Forms N–3 and N–4 regarding exchanges of contracts to more broadly describe provisions or limitations on conversion or exchange of the contract for another contract (which could include a fixed or variable annuity or life insurance contract) as currently required by Form N–6.[468]

We also propose to revise the disclosure requirement in each registration form to clarify that the existing requirement to describe any provisions and limitations on transfer of contract value between sub-accounts includes transfer programs, such as dollar cost averaging, portfolio rebalancing, asset allocation programs, and automatic transfer programs.[469]

We are also proposing to newly require in each registration form a description of the obligations under the contract that the insurer's general account funds (*e.g.,* death benefits, living benefits, or other benefits available under the contract) and include a statement that these amounts are subject to the insurer's claims-paying ability and financial strength.[470] While some of this information would appear in the Key Information Table,[471] this item would require registrants to provide more detailed disclosure later in the prospectus.

We are also proposing to modify the instruction to the current subparagraph in each form relating to contract or registrant changes to require disclosure of the substitution of one portfolio company for another pursuant to section 26(c) of the Investment Company Act.[472] This amendment is intended to formalize the Commission's long-standing position that investors should be put on notice of the possibility that an insurer may substitute one portfolio company for another portfolio company.[473]

We are also proposing to eliminate current subparagraph (d) in Forms N–3 and N–4, which requires a description of how investor inquiries may be made. This item would duplicate information that would be required to appear on the back cover page of the prospectus pursuant to proposed Item 1(b)(1).

Finally, with respect to Forms N–3 and N–4, we are proposing to relocate disclosures regarding limitations on classes of purchasers from the cover page of the prospectus[474] to the item requiring the general description of contracts.[475] This proposed revision mirrors Item 6(e) of current Form N–6, would help streamline cover page disclosure, and would permit registrants to describe this limitation more fully than if it had to appear on the cover page (which would necessarily entail space constraints).[476]

We request comment on the proposed form amendments relating to the general description of the contracts, and specifically on the following issues:

[464] *See* Item 7(f) of current Form N–3; Item 6(f) of current Form N–4.

[465] This new instruction would also appear in Form N–6.

[466] In addition, subparagraph (b)(iii) of current Forms N–3 and N–4 would be re-designated as subparagraph (b)(5) and revised to replace ''exchanges'' with ''buyout offers'' of variable annuity contracts, including interests of participations therein.

[467] Proposed Item 9(b)(1) of Form N–3; proposed Item 8(b)(1) of Form N–4. For example, some contracts specify that if the contract's value falls below a certain threshold, the contract terminates and an investor's contract value is returned.

[468] Proposed Item 9(b)(4) of Form N–3 and related proposed instruction; proposed Item 8(b)(4) of Form N–4 and related proposed instruction; *see also* Item 8(b)(3) and related instruction of proposed Form N–6; Item 6(b)(3) of current Form N–6.

[469] Proposed Item 9(b)(3) of Form N–3; proposed Item 8(b)(3) of Form N–4; proposed Item 8(b)(2) of Form N–6.

[470] Proposed Item 9(c) of Form N–3; proposed Item 8(c) of Form N–4; proposed Item 8(c) of Form N–6.

[471] *See* Instruction 3(d) to proposed Item 3 of Forms N–3, N–4, and N–6.

[472] *See* Instruction to proposed Item 9(d) of Form N–3; Instruction to proposed Item 8(d) of Form N–4; Instruction to proposed Item 8(d) of Form N–6.

[473] *See* Changes in Investment Company Act Made by 1970 Amendments Act, Investment Company Act Release No. 6506 [36 FR 9130 (May 5, 1971)] (depositors of UITs should notify investors of the possibility that underlying securities may be substituted).

[474] Item 1(a)(iv) of current Forms N–3 and N–4.

[475] Proposed Item 9(e) of Form N–3; proposed Item 8(e) of Form N–4.

[476] *See* Item 6(e) of current Form N–6. Like Form N–6, Form N–1A also requires disclosure of limitations on the purchasers to whom the Contracts are offered further back in the prospectus, and not on the cover page. *See* Items 6 and 11 of Form N–1A.

- Should we require the prospectus to include a description of the obligations under the contract that the insurer's general account funds? Should the proposed requirement be modified in any way?
- Should we require disclosure of the substitution of one portfolio company for another pursuant to section 26(c) of the Investment Company Act? If not, why not? How should such disclosure be provided to investors?
- Should we make any other changes to the form regarding required prospectus disclosures describing the contract?

i. Annuity Period (Item 10 of Form N–3, Item 9 of Form N–4)

We propose to amend Item 9 of current Form N–3 and Item 8 of current Form N–4 (which we would re-designate as Items 10 and 9, respectively) to include a new requirement that a registrant state, if applicable, that the investor will not be able to withdraw any contract value amounts after the annuity commencement date.[477] While the proposed ''Overview'' section of the prospectus would contain similar information,[478] the new item requirement would provide investors with more complete disclosure about a key aspect of annuitization that we believe investors often misunderstand in the context of a more detailed discussion about the annuity benefits under the contract.

We request comment generally on the proposed form amendments relating to the annuity period, and specifically on the following issues:

- Should we require the prospectus to include a statement that the investor will not be able to withdraw any contract value amounts after the annuity commencement date? Should the proposed requirement be modified in any way?
- Should we make any other changes to the form regarding required prospectus disclosures relating to the annuity period (*e.g.,* to specifically require a registrant to state directly, as applicable, that all contract benefits terminate upon annuitization)?

j. Standard Death Benefit (Item 11 of Form N–3, Item 10 of Forms N–4 and N–6)

We propose to amend Item 10 of current Form N–3, Item 9 of current Form N–4, and Item 8 of current Form N–6 (which we would re-designate as Items 11, 10, and 10, respectively) to clarify that the current disclosures required by the item would only apply to the standard death benefit under the contract.[479] Registrants would include prospectus disclosure about optional death benefits (as well as standard and optional living benefits) pursuant to the proposed new Item 12 to Form N–3, and proposed new Item 11 to Forms N–4 and N–6, as discussed below.

To assist variable annuity investors in better understanding the operation of the standard death benefit, we are also proposing to amend Forms N–3 and N–4 to specifically require registrants to summarize the operation of the standard death benefit.[480] As discussed above, these disclosures would also be required in any variable annuity initial summary prospectus, and would serve as the counterpart to similar disclosures that would be included in variable life initial summary prospectuses.[481]

We request comment generally on the proposed form amendments relating to the standard death benefit, and specifically on the following issues:

- Should we require other disclosures regarding the operation of the standard death benefit? Should we make any other changes to the form regarding required prospectus disclosures relating to the standard death benefit?
- As proposed, optional death benefit disclosures would be provided with disclosures of other optional benefits available under the contract. Instead, should we permit or require optional death benefits disclosures to accompany standard death benefit disclosures?

k. Other Benefits Available Under the Contract (Item 12 of Form N–3, Item 11 of Forms N–4 and N–6)

We propose to add a new item to each registration form that would require a registrant to discuss any standard living benefits, as well as all optional benefits (*e.g.,* death benefit, accumulation benefit, withdrawal benefit, long-term care benefit, etc.) available under the contract.[482] Optional benefits and standard living benefits are now a significant aspect of most variable annuity contracts (as well as most variable life insurance contracts). While we understand that insurers generally include disclosure about optional benefits and standard living benefits in their prospectuses, these disclosures have no standard content or presentation because there is no current form requirement regarding optional benefits.

As discussed above, subparagraph (a) of the proposed new item would require a tabular summary overview of each benefit available under the contract (other than the standard death benefit).[483] This tabular summary would also be required in any initial summary prospectus.[484]

Subparagraphs (b) and (c) of the proposed new item would require the statutory prospectus to include narrative disclosures that would provide more detailed information regarding each of the benefits presented in the tabular summary. As proposed, a registrant would be required to include a brief description of each benefit (other than the standard death benefit) offered under the contract,[485] and a brief description of any limitations, restrictions and risks associated with each benefit.[486]

Some benefits offered by a contract may have complicated terms that do not readily lend themselves to being fully described in a tabular summary. Therefore, the proposed narrative disclosures are intended to complement the tabular summary presentation by allowing registrants to discuss the benefits, as well as the limitations, risks, and restrictions associated with each, in more detail without being constrained by the limitations of a tabular presentation. The requirement to discuss the limitations, risks, and restrictions associated with each benefit would also help ensure that these aspects of contract benefits—along with the value they could provide to investors—are discussed in a standardized manner among contract prospectuses.

[477] Proposed Item 10(g) of Form N–3; proposed Item 9(g) of Form N–4.

[478] Proposed Item 2(c)(2) of Forms N–3 and N–4.

[479] Proposed Item 11 of Form N–3; proposed Item 10 of Forms N–4 and N–6.

[480] Proposed Item 11(a) of Form N–3; proposed Item 10(a) of Form N–4. When describing the standard death benefit, registrants would discuss the amount of the benefit and how the benefit amount may vary, the circumstances under which the value of the benefit may increase or be reduced (including the impact of withdrawals), and how the benefit may be terminated.

[481] *See* proposed rule 498A(b)(5)(iii); *see also supra* section II.A.1.c.ii(c).

[482] Proposed Item 12 of Form N–3; proposed Item 11 of Forms N–4 and N–6.

[483] The summary table would include the name of each benefit, its purpose, whether the benefit is standard or optional, associated fees (as a stated percentage of contract value, benefit base, etc.), and a brief description of limitations or restrictions. *See supra* section II.A.1.c.ii(d).

[484] *See* proposed rule 498A(b)(5)(iv); *see also supra* section II.A.1.c.ii(d).

[485] This brief description would be required to include a discussion of: (1) Whether the benefit is standard or elected; (2) the operation of the benefit, including the amount of the benefit and how the benefit amount may vary, the circumstances under which the value of the benefit may increase or be reduced (including the impact of withdrawals), and how the benefit may be terminated; (3) fees and costs, if any, associated with the benefit; and (4) how the benefit amount is calculated and payable, and the effect of choosing a specific method of payment on calculation of the benefit. *See* proposed Item 12(b) of Form N–3; proposed Item 11(b) of Forms N–4 and N–6.

[486] For example, this could include restrictions on which portfolio companies may be selected, risk of reduction or termination of benefit resulting from excess withdrawals, etc. *See* proposed Item 12(c) of Form N–3; proposed Item 11(c) of Forms N–4 and N–6.

We also propose to include an instruction directing registrants in responding to proposed subparagraphs (b) and (c) to provide one or more examples illustrating the operation of each benefit in a clear, concise, and understandable manner.[487] This instruction is intended to further assist investors in understanding the other benefits offered under the contract.

We request comment generally on the proposed new form requirements relating to other benefits under the contract, and specifically on the following issues:

- Would the disclosures by the proposed new item enhance the ability of investors to understand any standard living benefit, as well as additional options available under the contract?
- Should we require additional disclosures or otherwise modify the proposed requirements? For example, while the proposed new item would encompass optional death benefits, as well as standard and optional living benefits, should our registration forms require separate and more tailored disclosures for any of these benefit categories?
- Should the required disclosures be presented in a different manner? Should the statutory prospectus include both a tabular summary overview as well as narrative disclosures? Should any of the disclosures specifically required in the narrative disclosure also be required in the tabular summary?

l. Purchases and Contract Value (Item 13 of Form N–3, Item 12 of Form N–4)

We propose to amend Item 11 of Form N–3 and Item 10 of current Form N–4 (which we would re-designate as Items 13 and 12, respectively) to re-structure the disclosure item and make other minor revisions that would not substantively change current disclosure requirements.[488] As discussed above, variable annuity initial summary prospectuses would include the proposed subparagraph (a) disclosures, which would require registrants to briefly describe the procedures for purchasing a contract, and would serve as the counterpart to similar disclosures that would be included in variable life initial summary prospectuses.[489]

We request comment generally on the proposed form requirements relating to purchases under the contract, including whether we should require any other disclosures with respect to purchases, or otherwise modify existing requirements.

m. Surrenders and Withdrawals (Item 14 of Form N–3, Item 13 of Form N–4, Item 12 of Form N–6)

We propose to amend Item 12 of current Form N–3 and Item 11 of current Form N–4 (which we would re-title and re-designate as Items 14 and 13, respectively) to reflect the more up-to-date requirements of the parallel item of Form N–6 and standardize these disclosure requirements across variable product registration forms.[490]

Specifically, subparagraph (a) of the proposed item would consolidate the current disclosure requirements regarding surrenders and delays in effecting requests for surrender and provide a high-level overview of how an investor can surrender (or partially surrender or make withdrawals from) a contract, including any limits on the ability to surrender, how the proceeds are calculated, and when they are payable.[491] As discussed above, the initial summary prospectus would include the proposed subparagraph (a) disclosures.[492]

Subparagraphs (b) through (d) would require additional information related to the operation of partial surrenders and withdrawals under the contract, including: (1) Whether and under what circumstances they are available; (2) how they will affect a contract's cash value, death benefit(s), and/or any living benefits; and (3) how partial surrenders and partial withdrawals will be allocated among the sub-accounts.[493]

Subparagraph (e) would require registrants to describe any provision for involuntary redemptions and the reasons for such provision.[494] While Item 12(d) of current Form N–3 and Item 11(d) of current Form N–4 specifically also require a description of any provision for lapse, we are proposing to eliminate the requirement to discuss lapse provisions because contract lapse is more relevant in the context of variable life products.[495]

Subparagraph (f), like Item 12(e) of current Form N–3 and Item 11(e) of current Form N–4, would require the disclosure of any revocation rights. However, to provide additional information relating to an investor's revocation rights, the proposed item would also specifically require: (1) A description of how the amount refunded is determined; (2) the method for crediting earnings to purchase payments during the free look period; and (3) whether investment options are limited during the free look period.[496] We believe these disclosures are particularly important because the free look is typically the only time the investor may leave the contract for multiple years after investing in the contract without paying significant surrender fees and penalties.[497]

We request comment generally on the proposed form requirements relating to surrenders and withdrawals, and specifically on the following issues:

- Do commenters agree with our proposed approach of generally modeling disclosures regarding surrenders and withdrawals on similar disclosures required by Form N–6? Are there specific disclosures in Form N–6 that would be inappropriate or less relevant for N–3 and N–4 registrants? For example, although current Form N–3 and Form N–4 use the terms ''redemptions'' and ''partial redemptions,'' proposed Form N–3 and proposed Form N–4 would use the terms ''surrender'' and ''partial surrender.'' We understand these terms are synonymous, although we have chosen the latter terms to reflect the same terminology used in Form N–6. Is there any reason why Form N–3 and Form N–4 should use different terminology other than what is included in Form N–6? Alternatively, are there specific disclosures that would be more appropriate or relevant for N–3 or N–4 registrants but are not currently required by Form N–6?
- Would the proposed amendments help investors to better understand the procedures and impact of surrenders and withdrawals, including issues relating to partial surrenders and withdrawals, sub-account allocation, involuntary redemption, and investors' revocation rights under the contract?
- Should we require any other disclosures with respect to surrenders and withdrawals, or otherwise modify existing requirements? For example, should the proposed

[487] *See* Instruction to proposed Item 12 of Form N–3; Instruction to proposed Item 11 of Forms N–4 and N–6.

[488] Proposed Item 13 of Form N–3; proposed Item 12 of Form N–4.

[489] *See* proposed rule 498A(b)(5)(v); *see also supra* section II.A.1c.ii(e).

[490] *See* Item 9 of current Form N–6.

[491] Proposed Item 14(a) of Form N–3; proposed Item 13(a) of Form N–4.

We are proposing to eliminate Item 12(b) of current Form N–3 and Item 11(b) of current Form N–4 (requirement to disclose any restrictions on redemption that may apply if the registrant offers the contracts in connection with the ''Texas Optional Retirement Program'') and Item 12(c) of current Form N–3 and Item 11(c) of current Form N–4 (requirement to briefly describe whether a request for redemption may not be honored for a period of time after an investor makes a purchase payment). We believe that these requirements are generally encompassed by the proposed requirements (discussed in the following paragraph) to disclose any limits on the ability to surrender, including any limits on the availability of partial surrenders and withdrawals.

[492] *See* proposed rule 498A(b)(5)(vii); *see also supra* section II.A.1.c.ii(g).

[493] Proposed Item 14(b) through (d) of Form N–3; proposed Item 13(b) through (d) of Form N–4. These disclosure requirements would conform to those that appear in the parallel provisions of current Form N–6. *See* Item 9(b) through (d) of current Form N–6.

[494] Proposed Item 14(e) of Form N–3; proposed Item 13(e) of Form N–4.

[495] *See supra* note 444 and accompanying text.

[496] These proposed disclosure requirements would conform to those that appear in the parallel provisions of current Form N–6. *See* Item 9(e) of current Form N–6.

[497] *See supra* paragraphs accompanying note 65.

requirements to disclose any limits on the ability to surrender, including any limits on the availability of partial surrenders and withdrawals, specifically include any of the disclosure requirements that appear currently in Form N–3 and Form N–4, and that we believe the proposed disclosure requirements encompass? [498]

n. Loans (Item 15 of Form N–3, Item 14 of Form N–4, Item 13 of Form N–6)

We are proposing to amend Form N–6 to consolidate required prospectus and SAI disclosures relating to contract loans [499] into a single item in the prospectus.[500] Given that investors would receive summary information relating to loan provisions in the Overview section of the statutory prospectus (and initial summary prospectus), we believe that investors would benefit from having more complete information on contract loans in a single location.

Specifically, a registrant would be required to briefly describe: (1) The availability of loans; (2) any limitations on that availability (*e.g.,* a prohibition on loans during the first contract year); (3) interest provisions; (4) the effects of loans on contract value and death benefits; (5) any other effects that a loan could have on the contract (*e.g.,* the effect of a contract loan in excess of contract value); and (6) loan procedures.

We understand that variable annuities, like variable life insurance contracts, often offer investors the opportunity to borrow money against the cash value of their contract, and that insurers and intermediaries frequently promote this contract feature in their sales of variable annuities. Therefore, we are also proposing to add new Item 15 to Form N–3 and new Item 14 to Form N–4, which would require similar prospectus disclosure about the availability and terms of loans under the contract.[501]

We request comment generally on the proposed new form requirements relating to loans under the contract, and specifically on the following issues:

- Should we require the prospectus to include a discussion of contract loan provisions? Would this disclosure be more appropriate only in the context of variable life insurance products?
- Will the information disclosed to investors pursuant to the proposed new form item be helpful to investors in understanding contract loan provisions, including any attendant risks? Should we require disclosure of additional information related to loan provisions, or otherwise modify the proposed requirements?

o. Taxes (Item 16 of Form N–3, Item 15 of Forms N–4 and N–6)

We propose to amend Item 13 of current Form N–3 and Item 12 of current Form N–4 (which we would re-designate as Items 16 and 15, respectively) to reflect the more up-to-date presentation and disclosure requirements of the parallel provisions of Form N–6.[502] As amended, registrants would continue to (a) describe the material tax consequences to the investor and beneficiary of buying, holding, exchanging, or exercising rights under the contract, (b) identify the types of qualified plans for which the contract is intended to be used, and (c) describe the effect, if any, of taxation on the determination of cash values or sub-account values.[503]

However, the amendments would specifically limit required disclosures to ''material'' tax consequences. While the instructions to subparagraph (a) of Item 13 of current Form N–3 and Item 12 of current Form N–4 provide that the ''disclosure need not include detailed description of applicable law,'' we are proposing to eliminate this instruction in light of the proposed language limiting disclosures to ''material'' consequences.

We do not expect any of the proposed amendments to this item to significantly alter current disclosure obligations. We request comment generally on these amendments.

p. Legal Proceedings (Item 17 of Form N–3, Item 16 of Forms N–4 and N–6)

We propose to amend Item 14 of current Form N–3 and Item 13 of current Form N–4 (which we would re-designate as Items 17 and 16, respectively) to reflect the more up-to-date presentation and disclosure requirements of the parallel provisions of Form N–6.[504]

As currently required by Form N–6, the proposed amendments would newly require registrants to: (1) Provide a description of the factual basis alleged to underlie the proceeding, and the relief sought, and (2) in addition to describing proceedings that a governmental authority has instituted, include information about proceedings ''known to be contemplated'' by governmental authorities.[505] The proposed amendments would also eliminate the requirement to discuss pending legal proceedings against any subsidiary of the registrant to mirror Form N–6's (and Form N–1A's) parallel provision and provide consistency across forms, which we believe is particularly appropriate in the context of separate account registrants, which are unlikely to have subsidiaries.[506]

These amendments are not expected to significantly alter current disclosure obligations. We request comment generally on these amendments.

q. Financial Statements (Item 18 of Form N–3, Item 17 of Forms N–4 and N–6)

We propose to add new Item 18 of Form N–3 and new Item 17 to Form N–4, which would require a statement, under a separate caption, of where any required financial statements of the registrant and the depositor may be found if they are not included in the prospectus.[507] A registrant would also briefly explain how investors may obtain any financial statements not provided in the SAI.[508] These proposed disclosure requirements would conform with a similar requirement included in Item 14 of current Form N–6.

The form's proposed General Instructions would provide that registrants are free to include in the prospectus financial statements required to be in the SAI, and may also include in the SAI financial statements that may be placed in Part C.[509] The proposed new item is intended to assist investors in finding and obtaining any financial statements that have been moved at the registrant's discretion from the location where they would otherwise be provided in the registration statement.[510]

We request comment generally on the proposal to include new Item 18 of Form N–3 and new Item 17 of Form N–4, and specifically on the following issues:

- To what extent do registrants currently make available the financial statements of the registrant and depositor in locations other than the prospectus and/or SAI, as our

[498] *See supra* note 491 and accompanying text.

[499] *See* Items 10 and 23 of current Form N–6.

[500] Proposed Item 13 of Form N–6.

[501] Proposed Item 15 of Form N–3; proposed Item 14 of Form N–4.

[502] *See* Item 12 of current Form N–6.

[503] Proposed Item 16 of Form N–3; proposed Item 15 of Form N–4.

[504] *See* Item 13 of current Form N–6.

[505] Proposed Item 17 of Form N–3; proposed Item 16 of Form N–4.

[506] *Id.; see also* Item 13 of current Form N–6; Item 10(a)(3) of Form N–1A.

[507] Proposed Item 18 of Form N–3; proposed Item 17 of Form N–4.

[508] *Id.*

[509] *See* proposed General Instruction C.3.(b) to Forms N–3, N–4, and N–6.

[510] A similar requirement to this proposed new item appears in paragraph (c) of Item 4 of current Form N–3 and paragraph (b) of current Form N–4. As discussed below, we propose to move the majority of the disclosure that current Item 4 of each of these forms would require to the contract SAI. *See infra* notes 545 through 554 and accompanying text (discussion of Accumulation Unit Value tables).

registration forms currently permit? What are the advantages or disadvantages of providing flexibility to registrants as to the location of the registrant's and depositor's financial statements?

• Would the proposed item in the prospectus regarding the availability of financial statements assist investors in locating those materials?

r. Appendix: Portfolio Companies/ Investment Options Available Under the Contract (Item 19 of Form N–3, Item 18 of Forms N–4 and N–6)

We propose to add a new disclosure item to each registration form (proposed Item 19 of Form N–3, and proposed Item 18 of Forms N–4 and N–6), which would require registrants to include as an appendix to the prospectus a table summarizing information about the portfolio companies available under the contract. This table would appear under the heading ''Portfolio Companies Available Under the Contract'' and would consolidate certain summary information about each portfolio company into a concise, easy-to-read tabular presentation, as discussed in more detail above.[511] This would replace certain other disclosure requirements, on the prospectus cover page[512] and elsewhere in the prospectus,[513] relating to the contract's portfolio companies or investment options.

The appendix would provide a tabular summary overview of portfolio companies available under the contract that is designed to improve the ability of investors to understand, evaluate, and compare those portfolio companies. If the availability of one or more portfolio companies varies by benefit offered under the contract, registrants would be required to include as another appendix a separate table indicating which portfolio companies were available under each of those benefits.[514] These same disclosures would also appear in the initial summary prospectuses and updating summary prospectus,[515] except for variations due to the more limited scope of the initial summary prospectus (which would only describe one contract) in contrast to the updating summary prospectus and statutory prospectus (which could describe more than one contract).[516]

Because we understand that certain variable contracts registered on Form N–3 have very few investment options (and sometimes have only one investment option), we recognize that the proposed appendix could have limited utility for certain Form N–3 registrants and their investors. For this reason, for variable contracts registered on Form N–3, we propose that registrants could omit the appendix and instead provide the more detailed disclosures about the investment options offered under the contract that proposed Item 20 of Form N–3 would require.[517] For Form N–3 registrants, the appendix would be required to appear in a statutory prospectus only if the appendix were included in a summary prospectus.[518]

The same legends that precede the appendix in the summary prospectus would generally also precede the appendix in the statutory prospectus.[519] Under proposed Form N–3, the legend that would precede the appendix would be required to state, in part, as follows: ''Performance reflects contract fees and expenses that are paid by each investor'' (in contrast, the parallel legend that Forms N–4 and N–6 would require would state that performance *does not* reflect contract fees and expenses that are paid by each investor). This difference is intended to reflect the fact that insurance charges are inherently reflected in the performance of investment options for contracts registered on Form N–3, since those investment options are offered as part of the variable contract. The performance of portfolio companies offered under contracts registered on Forms N–4 and N–6 does not reflect insurance charges, because those portfolio companies are separately registered as entities distinct from the variable contract. Additionally, only registrants on Forms N–4 and N–6 that chose to rely upon proposed rule 498A(j) to satisfy their portfolio company prospectus delivery obligations would be required to include in the appendix an internet address to a landing page, toll-free telephone number, and email address that investors could use to obtain or request portfolio company statutory and summary prospectuses.[520]

We request comment generally on the proposed appendix requirement, and specifically on the following issues:

• Should we require these disclosures to be included in the statutory prospectus? Are the content requirements for this proposed item appropriate for inclusion in the statutory prospectus?

• Our proposal would generally require registrants to include the same information in the proposed appendix regarding portfolio companies in the statutory prospectus and in the initial summary prospectus and updating summary prospectus.[521] Should any of the appendix requirements for the summary prospectus be different for the appendix

[511] *See supra* discussion at note 192 and accompanying and following text.

[512] *See* Item 1(a)(v) of current Form N–3 (requiring outside cover page to identify the type of separate account or a brief statement of the registrant's investment objectives); Item 1(a)(viii) of current Form N–4 (requiring the outside cover page of the prospectus to include the names of portfolio companies).

[513] *See* Item 5(c) and (d) of current Form N–3 (requiring registrants to concisely describe the investment objectives and policies of the registrant, and providing instructions for disclosure regarding the registrant's investment policies); Item 5(c) of current Form N–4 (requiring registrants to briefly describe each portfolio company, including its name, its type or a brief statement concerning its investment objectives, and its investment adviser); Item 4(c) of current Form N–6 (requiring registrants to briefly describe the registrant's sub-accounts and each portfolio company, including its name, its type or a brief statement concerning its investment objectives, and its investment adviser and any sub-adviser).

[514] *See supra* note 195 and accompanying and following text. A reference in this section to ''appendix'' includes any additional appendix (to the extent a registrant would be required to include one).

[515] *See* proposed rule 498A(b)(5)(ix); proposed rule 498A(c)(6)(iv); *see also supra* sections II.A.1.c.ii(*i*), II.A.2.c.ii(c).

[516] As discussed above, an initial summary prospectus could only describe a single contract that the registrant currently offers for sale, whereas the updating summary prospectus and statutory prospectus could describe multiple contracts under the conditions of the proposed General Instructions to Forms N–3, N–4, and N–6. *See supra* sections II.A.1.b, II.A.2.b.

[517] *See* Instruction 1(a) to proposed Item 19 of Form N–3; *see also* proposed rule 498A(b)(5)(ix), (c)(6)(iv) (the appendix also could be omitted from the summary prospectus); *infra* paragraphs following note 525 (discussing proposed Item 20 of Form N–3).

[518] *See* Instruction 1(a) to proposed Item 19 of Form N–3; *see also supra* text following note 192 and accompanying note 241.

[519] *See supra* section II.A.1.c.ii(i). The sole exception involves registrants on Form N–3 that use a summary prospectus that includes the disclosures required by proposed Item 19. In this case, the portion of the legend in the summary prospectus explaining how more information about the investment options may be obtained would not be required to be included in the statutory prospectus. *See* note 520 and accompanying text.

[520] *See* Instruction 1(b) to proposed Item 18 of Forms N–4 and N–6 (''Registrants not relying upon rule 498A(j) under the Securities Act [17 CFR 230.498A(j)] with respect to the Portfolio Companies that are offered under the Contract may, but are not required to, provide the next-to-last sentence of the first paragraph of the introductory legend to the table regarding online availability of the prospectuses.'').

Registrants on Form N–3 that use a summary prospectus that includes the disclosures required by proposed Item 19 of Form N–3 would be required to include in that appendix an introductory legend explaining how more information about the investment options may be obtained. *See* proposed rule 498A(b)(5)(ix) and *supra* notes 196–199 (discussing legend in initial summary prospectus); proposed rule 498A(c)(6)(iv) and note 240 (discussing legend in updating summary prospectus). However, that legend would not be required to be included in the statutory prospectus, because the statutory prospectus would already include those disclosures pursuant to proposed Item 20 (which requires more detailed disclosure regarding each of the investment options available under the contract). *See* Instruction 1(a) to proposed Item 19 of Form N–3; proposed Item 20 of Form N–3.

[521] *See generally supra* sections II.A.1.c.ii(*i*), II.A.2.c.ii(c).

included in the statutory prospectus? If so, how? For example, should registrants that choose not to use a summary prospectus be permitted not to include disclosures about how investors can find portfolio company prospectuses online or obtain them at no cost upon request? Should the statutory prospectus require more comprehensive disclosures for investors who wish to obtain additional details beyond what would be disclosed in the summary prospectus? If so, what additional information should be disclosed?

- Will the proposed tabular presentation required for portfolio company-related disclosures in the prospectus be more user-friendly for investors than the current disclosure requirements? Is the specific information required to be disclosed about portfolio companies likely to be more relevant and useful to investors than the current disclosure requirements? If not, why not? Are there alternatives we should consider?
- Under our proposal, registrants on Form N–3 would have the option of omitting the proposed appendix and instead providing the more detailed disclosures about the investment options offered under the contract that proposed Item 20 of Form N–3 would require (and would be required to include the appendix in the statutory prospectus only if the appendix also appears in the summary prospectus). In order to increase comparability between registration statements, should we require this appendix for all registration statements on Form N–3?

s. Additional Amendments to Form N–3

We are also proposing additional amendments to Form N–3 that are generally intended to update and enhance disclosures related to investment options by requiring similar disclosures required for open-end management companies registered on Form N–1A.

Management (Item 7 of Form N–3)

We are proposing to revise Item 6 of current Form N–3 (which we would re-designate as Item 7) to increase consistency among forms used to register management investment companies.[522] Except as described below, we do not intend these proposed amendments to significantly alter current disclosure obligations.

Among other things, the proposed amendments would require disclosure of the compensation paid to each investment adviser of the registrant.[523] Form N–3 currently includes three fiscal years of such disclosures in the SAI, where they would remain under our proposal, but our proposal would also include such disclosures for the most recent fiscal year in the prospectus to highlight this information for investors and to update this aspect of Form N–3 to parallel Form N–1A.[524] The proposed amendments would also move certain information from the prospectus to the SAI, including responsibilities of the board of managers, disclosure regarding persons providing administrative or business affairs services, and information regarding brokerage allocations.[525] We believe this information is more appropriate for disclosure in the SAI, and is consistent with how such information is presented in Form N–1A.

Additional Information About Investment Options Available Under the Contract (Item 20 of Form N–3)

We are proposing a new item that would provide more detailed information about each of the investment options available under the contract.

New paragraphs (a) and (b) would restate existing disclosure requirements contained in paragraphs (c), (d), and (e) of current Item 5 regarding investment strategies and risks to reflect the updated presentation and disclosure requirements of the parallel provisions of Form N–1A. These paragraphs would re-focus these disclosure requirements to require more granular disclosure related to each investment option as opposed to broader disclosure regarding registrants.

Specifically, among other things, the proposed amendments would require disclosure of whether the investment option may take temporary defensive positions that are inconsistent with the investment option's principal investment strategies in attempting to respond to adverse market, economic, political, or other conditions. We believe that investors should be informed about investment positions that an investment option can take from time to time that are inconsistent with the investment option's central investment focus.

The proposed amendments also would require the registrant to disclose, for each investment option, whether it may engage in active and frequent trading of portfolio securities and, if so, the consequences of increased portfolio turnover to investors and the investment option's performance. Increased portfolio turnover can result in increased transaction costs that are ultimately borne by investors. Collectively, these proposed amendments are intended to clarify and enhance the disclosure requirements relating to investment options' strategies and risks, and to increase consistency and thereby promote comparability among forms used to register management investment companies.[526]

New paragraph (c) would require registrants with annual returns for at least one calendar year to provide, for each investment option:

- A bar chart showing the investment option's annual total returns for each of the last 10 calendar years (or for the life of the investment option, if less than 10 years), as well as the investment option's highest and lowest return for a quarter during the period displayed in the chart;
- A table showing the investment option's average annual total returns (with and without taxes on distributions and redemptions) for 1-, 5-, and 10-year calendar periods ending on the date of the most recently completed calendar year (or for the life of the investment option, if shorter), as well as the returns of an appropriate broad-based securities market index for those same periods; and
- Certain explanatory statements, such as how the information in the chart and table illustrates the variability of the investment option's returns, the investment option's past performance is not necessarily an indication of how the investment option will perform in the future, and, if applicable, how updated performance information may be obtained.

The disclosures that new paragraph (c) would require are modeled after the risk/return bar chart and table that Form N–1A currently requires and are intended to supplement the disclosures currently required by Form N–3 regarding accumulation unit income and capital changes [527] by providing investors and potential investors with more information about the performance of the investment options offered under the contract.[528] In particular, the bar chart would illustrate the variability of the investment options' returns and give investors an idea of the attendant risks of each investment option. Likewise, the

[522] *See, e.g.,* Items 5 and 10 of Form N–1A.

[523] Registrants would disclose the aggregate fee paid to each investment adviser for the most recent fiscal year as a percentage of net assets or, if the adviser's fee is not based on a percentage of net assets, a description of the basis of the adviser's compensation. *See* proposed Item 7(a)(1)(i) and (ii) of Form N–3.

[524] *Compare* Item 21(a)(iii) of Form N–3 (requiring total compensation paid to the adviser under the investment advisory contract for the last three fiscal years) *with* proposed Item 25(a)(3) of Form N–3 (same); *see also* Item 10 of Form N–1A.

[525] These disclosure requirements would be moved, respectively, to: Proposed Item 24(b)(1) (''Management of the Registrant''); proposed Item 25(g) (''Investment Advisory and Other Services''); and proposed Item 27 (''Brokerage Allocation and Other Practices'').

[526] *See, e.g.,* Item 9 of current Form N–1A.

[527] *See infra* section II.D.3.d.

[528] *See, e.g.,* Item 4(b)(2) of Form N–1A; *see also* Registration Form Used by Open-End Management Investment Companies, Investment Company Act Release No. 23064 (Mar. 13, 1998) [98 FR 13968 (Mar. 23, 1998)] (''Form N–1A Adopting Release'') at text accompanying and following n.51 (discussing the risk/return bar chart/table requirement).

accompanying table would help investors evaluate an investment option's risks and returns relative to the market.

We request comment generally on the proposed amendments to the Part A requirements of Form N–3, and specifically on the following issues:

- Should we, as proposed, adopt amendments to certain current items in Form N–3 Part A as described in this section? To the extent that we have proposed amending these items to generally mirror the presentation of parallel items in Form N–1A, is this appropriate in the context of variable annuities whose separate accounts are registered on Form N–3? Do commenters recommend any additional amendments to any of the current Form N–3 Part A items?
- Proposed Item 7 (''Management'') would revise current disclosure requirements to move certain disclosures from the prospectus to the SAI, while other disclosures would appear in the prospectus that currently only appear in the SAI. Are these proposed amendments appropriate, and are there other disclosures that currently appear in Part A of Form N–3 that would be better suited for disclosure in the SAI? On the other hand, are there other disclosures that currently appear in the SAI that would better suited for disclosure in the prospectus?
- In the case of registrants that offer more than one investment option under the contract, should the disclosures contemplated by proposed Item 20 (''Additional Information About Investment Options Available Under the Contract''), as proposed, be presented for each investment option? If not, how should those disclosures be presented? Should any of these proposed disclosures be modified in any way? Are there additional investment option-related disclosures that may be relevant to contract investors and that we should require to appear in the prospectus?

3. Part B (Information Required in a Statement of Additional Information)

Table 6 shows how our proposal would amend the item requirements of Part B of our variable contract registration forms. Except as described below, our proposed amendments to Part B of Forms N–3 and N–4 would generally conform to the language of the related Part B disclosure items in current Form N–6.

TABLE 6—PROPOSED AMENDMENTS TO PART B OF FORMS N–3, N–4, AND N–6

Item description	Proposed item No.	Form N–3: Proposed treatment	Form N–4: Proposed treatment	Form N–6: Proposed treatment

a. Amendments Conforming Part B Items of Forms N–3 and N–4 to Presentation in Form N–6

We propose to amend certain items of Part B of Forms N–3 and N–4 to reflect the more up-to-date presentation of corresponding items in Form N–6, and to re-designate their numbering as shown in Table 6 above. To the extent that these amended items incorporate only minor wording changes,[529] they are indicated as ''unchanged items'' in Table 6. Otherwise, each of these amended items is discussed in more detail below.

• *Cover Page (Item 21 of Form N–3, Item 19 of Forms N–4 and N–6).* We are proposing to amend the outside front cover page requirements for each registration form to include the name of the contract and classes to which the contract relates.[530] We are also proposing to amend Forms N–3 and N–4 to: (1) Require a statement whether and from where information is incorporated by reference; [531] (2) remove the current required statement that the SAI should be read with the prospectus; [532] and (3) consolidate the current item requiring a table of contents into the item specifying cover page disclosures.[533]

• *General Information and History (Item 22 of Form N–3, Item 20 of Forms N–4 and N–6).* We are proposing to amend Item 18 of current Form N–3 and Item 17 of current Form N–4 (which we would re-designate as Items 22 and 20, respectively) to require: (1) The date and form of organization of the depositor, the name of the state or other jurisdiction in which the depositor is organized, and a description of the general nature of the depositor's business; and (2) the date and form of organization of the registrant and the registrant's classification pursuant to Section 4 of the Investment Company Act.[534]

• *Services (Item 25 of Form N–3,*[535] *Item 21 of Forms N–4 and N–6).* We are proposing to amend Item 21 of current Form N–3 and Item 18 of current Form N–4 (which we would re-designate as Items 25 and 21, respectively) to require registrants to, unless disclosed elsewhere, identify and state the principal business address of any person who provides significant administrative or business affairs management services for the registrant (*e.g.,* an ''administrator,'' ''sub-administrator,'' ''servicing agent''), describe the services provided, and the compensation paid for the services.[536]

• *Financial Statements (Item 32 of Form N–3, Item 26 of Form N–4, Item 27 of Form N–6).* We are proposing to amend Item 28 of current Form N–3 and Item 23 of current Form N–4 (which we would re-designate as Items 32 and 26, respectively) to: (1) Clarify that the depositor's financial statements must be prepared in accordance with generally accepted accounting principles (''GAAP'') if the depositor prepares financial information in accordance with GAAP for use by the depositor's parent in any report under sections 13(a) and 15(d) of the Exchange Act or registration statement filed under the Securities Act; [537] (2) specify how an investor may request certain additional financial information about the depositor that is omitted from the SAI and is included in Part C of the registration statement; [538] and (3) clarify how current the depositor's financial statements must be when the anticipated effective date of the registration statement

[529] For example, edits to use defined terms where appropriate, to use synonyms for consistency across forms (*e.g.,* ''State the name . . .'' instead of ''Give the name . . .''), and to add titles to sub-paragraphs for clarity and consistency across forms (and to help the reader navigate the form).

[530] Proposed Item 21(a)(3) of Form N–3; proposed Item 19(a)(3) of Form N–4; proposed Item 19(a)(3) of Form N–6.

[531] Proposed Item 21(a)(4)(iii) of Form N–3; proposed Item 19(a)(4)(iii) of Form N–4.

[532] Item 16(a)(iii)(B) of current Form N–3; Item 15(a)(iii)(B) of current Form N–4.

[533] Proposed Item 21(b) of Form N–3; proposed Item 19(b) of Form N–4.

[534] Proposed Item 22 of Form N–3; proposed Item 20 of Form N–4.

[535] In Form N–3, the title of this disclosure item is ''Investment Advisory and Other Services.'' In addition to the amendments we propose to conform this disclosure item with the parallel item in Form N–6, we also propose additional amendments to this disclosure item, as discussed below, that would reflect the presentation of Item 19 in Form N–1A. *See infra* section II.D.3.e.

[536] Proposed Item 25(g) of Form N–3; proposed Item 21(c) of Form N–4.

[537] Instruction 1 to proposed Item 32(b) of Form N–3; Instruction 1 to proposed Item 26(b) of Form N–4. This instruction would be consistent with prior guidance we have provided in the context of registration statements on Form N–6, namely that statutory financial statements could be used in those limited circumstances when GAAP financial statements are not otherwise required to be prepared for either the depositor or its parent. *See* Separate Accounts Offering Variable Life Release, *supra* note 54, at n.58 and accompanying and following text.

[538] Instruction 2 to proposed Item 32(b) of Form N–3; Instruction 2 to proposed Item 26(b) of Form N–4.

falls within 90 days after the depositor's fiscal year-end.[539]

b. Underwriters (Item 29 of Form N–3, Item 23 of Form N–4, Item 24 of Form N–6)

We are proposing to amend Item 25 of current Form N–3 and Item 20 of current Form N–4 (which we would re-designate as Items 29 and 23, respectively) to specifically require identification of all principal underwriters of the registrant (other than the depositor), their principal business addresses, and the source of any affiliation.[540]

We also propose to add an instruction to this item in Forms N–3, N–4, and N–6 stating that information need not be provided about bona fide contracts with the registrant or its insurance company for outside legal or auditing services, or bona fide contracts for personal employment entered into with the registrant or its depositor in the ordinary course of business. This instruction is intended to focus disclosures on underwriting costs, as opposed to costs for legal or auditing services or other ancillary matters, and would parallel similar instructions in Part C of these same forms regarding disclosures for principal underwriters.[541]

Also, because we propose to amend Item 5 of current Form N–6 to include the disclosures on commissions to dealers currently required by current Item 20 in the SAI, we also propose to remove this disclosure from current Item 20 (which we would re-designate as Item 24).[542]

c. Calculation of Performance Data (Item 30 of Form N–3, Item 24 of Form N–4)

We are proposing to amend Item 26 of current Form N–3 and Item 21 of current Form N–4 (which we would re-designate as Items 30 and 24, respectively), to remove the instruction specifically permitting the registrant to furnish separate yield quotations for individual and group contracts.[543] Because the proposed General Instructions would state that individual and group contracts are not essentially identical, we would not expect to see both types of contracts presented in a single prospectus.[544]

d. Accumulation Unit Value Disclosure (Item 33 of Form N–3, Item 27 of Form N–4)

We also propose to relocate the disclosures required by Item 4 of current Forms N–3 and N–4 from the prospectus to the SAI,[545] with some modifications.[546] Those items currently require a registrant to disclose, for the last ten fiscal years and for each subaccount, the accumulation unit value at the beginning and end of each period and the number of accumulation units outstanding at the end of each period (the ''AUV tables'').[547] For variable annuity contracts, the change in accumulation unit value provides a measure of performance of the registrant's sub-accounts.[548]

When the AUV tables were adopted in 1985, the approach did not anticipate the proliferation of variations in contract charges and optional benefits that has resulted in numerous possible combinations of contract charges.[549] Since registrants commonly maintain a separate class of accumulation units for each combination of separate account charges, the AUV tables add considerable length (sometimes hundreds of pages) to the contract prospectus, which may overwhelm other important information.[550] Because only one combination of contract charges is relevant to any individual investor (depending on the contract features they select), much of the required disclosure is of limited value to most investors.[551]

To streamline the prospectus, we propose to relocate the AUV tables from the prospectus to the SAI, where they are more appropriately located with certain detailed information that traditionally appears in the SAI. To reduce burdens on registrants, we propose to decrease the time periods for which the required information must be presented from 10 years [552] to five years.[553] We also propose to include an instruction permitting registrants to omit AUV tables altogether if they provide each investor with an annual account statement that discloses, with respect to each class of accumulation units the investor holds, the actual performance of each subaccount during the prior fiscal year.[554] This option would reduce the length of the SAI and provide investors with customized annual performance information that reflects the impact of insurance-related costs.

[539] Instruction 3 to proposed Item 32(b) of Form N–3; Instruction 3 to proposed Item 26(b) of Form N–4.

[540] Proposed Item 29(a) of Form N–3; proposed Item 23(a) of Form N–4. Item 25(a) of current Form N–3 and Item 20(a) of current Form N–4 only require a registrant to state if the depositor or the affiliate of the depositor is the principal underwriter of the contract.

[541] *See infra* text accompanying and preceding note 597. Forms N–3, N–4, and N–6 also include in their disclosure requirements regarding underwriters other similar instructions, such as instructions stating that information need not be given about the service of mailing proxies or periodic reports of the registrant.

[542] *See supra* note 461 and accompanying text.

[543] Proposed Item 30 of Form N–3; proposed Item 24 of Form N–4.

[544] *See supra* note 400 and accompanying text.

[545] Proposed Item 33 of Form N–3; proposed Item 27 of Form N–4.

[546] Such modifications would include re-designating Item 4(c) of current Form N–3 and Item 4(b) of current Form N–4 as Items 18 and 17, respectively (''Financial Statements''), and adding an instruction to proposed Item 33 of Form N–3 and proposed Item 27 of Form N–4 that defines ''class of accumulation units'' to mean ''any variation that affects accumulation units, including variations related to contract class, optional benefits, and sub-accounts.'' *See supra* section II.D.2.q (discussing proposed Item 18 of Form N–3 and proposed Item 17 of Form N–4); *see also* Instruction 1 to proposed Item 33 of Form N–3; Instruction 1 to proposed Item 27 of Form N–4.

[547] Item 4(a) of current Form N–3; Item 4(a) of current Form N–4.

[548] When Form N–6 was proposed, it did not include AUV tables ''[b]ecause [due to] the individual nature of variable life insurance charges, such as the cost of insurance, there does not appear to be a comparable measure of performance that is applicable to all holders of a particular variable life insurance policy.'' *See* Form N–6 Proposing Release, *supra* note 445, at 17.

[549] *See* Forms N–3 and N–4 Adopting Release, *supra* note 28.

[550] In response to these concerns, the staff issued a no-action letter stating that the staff would not recommend enforcement action if registrants were to depict in the prospectus only two classes of unit values (one reflecting the highest possible combination of contract charges, the other reflecting the lowest possible combination of contract charges) shown for each available portfolio company, so long as the SAI were to include the full disclosure that current Item 4 would require. *See* Nationwide Life Insurance Company, SEC Staff No-Action Letter (pub. avail. Mar. 16, 2001) (''Nationwide 2001 Letter''). If the Commission adopts the proposed AUV table amendments, these final rules would effectively moot the Nationwide 2001 Letter.

[551] In addition, while the AUV tables are designed to reflect the performance of a subaccount after reflecting contract charges that are based on separate account value, many contract charges today are based on other values, such as a benefit base, which cannot be reflected in AUV values. Instead, when these charges are assessed, the number of accumulation units is reduced. As a result, AUV tables may only reflect a portion of a contract's fees, diminishing their usefulness to investors.

[552] *See* Instruction 2 to Item 4 of current Forms N–3 and N–4.

[553] *See* Instruction 3 to proposed Item 33 of Form N–3; Instruction 3 to proposed Item 27 of Form N–4. We are proposing five years to be consistent with Item 13 of Form N–1A, which requires funds to disclose five years of data for the Financial Highlights section of the prospectus. Five years is also the typical timeframe for disclosing information in response to other form items (*e.g.,* Fee Table expense example (Item 3 of current Form N–3 and current Form N–4); insurer name change and suspension of sales (Item 18 of current Form N–3 and Item 17 of current Form N–4)).

[554] *See* Instruction 7 to proposed Item 33 of Form N–3; Instruction 6 to proposed Item 27 of Form N–4. For accounts held less than one year, the annual account statement would disclose the actual performance of each sub-account for the length of time the investor has owned the sub-account.

e. Adjustment to Disclosure Thresholds (Items 29 and 32 of Form N–3, Items 23 and 26 of Form N–4, Items 24 and 27 of Form N–6)

Our variable contract registration forms currently include various dollar thresholds that date back to their initial adoption. In the SAI, for example, information need not be given about any service required to be disclosed pursuant to current Item 25 of Form N–3, current Item 20 of Form N–4, and current Item 20 of Form N–6, for which total payments of less than $5,000 were made during each of the last three fiscal years.[555] In addition, financial statements of the insurance company required to be included in the registration statement need not be more current than as of the end of the most recent fiscal year of the insurance company unless certain balance sheets of the sponsor would show a combined capital and surplus (if a stock company) or an unassigned surplus (if a mutual company), of less than $1,000,000.[556] As part of our efforts to update the registration forms, we are proposing to increase these thresholds to $15,000[557] and $2,500,000,[558] respectively, to account for the effects of inflation since 1985, the year of inception for Forms N–3 and N–4.[559]

f. Additional Amendments to Form N–3

We are also proposing additional amendments to Form N–3 that are generally intended to update and enhance disclosures related to investment options by requiring similar disclosures required for open-end management companies registered on Form N–1A. The revisions generally reflect the updated presentation and disclosure requirements of the parallel item in Form N–1A and would harmonize the disclosure requirements across registration statements for different products.
