DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-21–21BL; Docket No. CDC–2020–0120]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled, ''Evaluation of the Overdose Data to Action Technical Assistance Hub''. This proposed collection will be used to monitor and evaluate the effectiveness and impact of technical assistance (TA) provided to Overdose Data to Action (OD2A) program recipients funded to implement opioid surveillance and prevention efforts in their jurisdictions.

DATES: CDC must receive written comments on or before February 9, 2021.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2020–0120 by any of the following methods:

- *Federal eRulemaking Portal: Regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS–D74, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *Regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (regulations.gov) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS–D74, Atlanta, Georgia 30329; phone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

5. Assess information collection costs.

Proposed Project

Evaluation of the Overdose Data to Action Technical Assistance Hub—New—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Division of Overdose Prevention (DOP), at Centers for Disease Control and Prevention (CDC) requests a three-year OMB approval to support the evaluation of technical assistance (TA) provided for the Overdose Data to Action (OD2A) program. OD2A is a cooperative agreement (CDC–RFA–CE19–1904) funded in 2019 to focus on comprehensive and interdisciplinary opioid overdose prevention efforts in 47 state health departments, 16 localities, Puerto Rico, Washington DC, and the North Mariana Islands. This program consists of two required components– a surveillance component and a prevention component. OD2A recipients implement a combination of activities across ten strategies within these components in order to gain access to high quality, complete, and timelier data on opioid prescribing and overdoses and to use those data to inform prevention and response efforts in their jurisdictions.

Training and technical assistance (TA) is essential to building knowledge and strengthening the capacity of recipients to implement and evaluate OD2A program strategies. CDC will develop and deploy a TA hub (hereafter referred to as the OD2A TA Center) to deliver comprehensive technical assistance and training to support the

successful implementation and evaluation of surveillance and prevention activities. The OD2A TA Center is designed to enhance the efficiency, coordination, and effectiveness of TA efforts by streamlining and centralizing the provision of overdose surveillance and prevention TA. TA to OD2A recipients is divided into four different levels with multiple modes of TA delivery and involves a wide range of TA providers including CDC staff, internal and external subject matter experts (SMEs) and program partners as well as ICF staff.

The evaluation consists of two web-based surveys designed to collect process and outcome measures about TA access, utilization, and outcomes across all 66 OD2A recipient programs. The Technical Assistance Feedback Form will be administered to collect immediate feedback following individual TA encounters and group events such as webinars and in-person trainings. The Annual OD2A TA Survey will be distributed twice (mid-point and final) to assess satisfaction with overall TA provided and the extent to which TA supports informed implementation of OD2A strategies. The information obtained through this evaluation will allow TA providers to assess OD2A recipients' experience and utility of knowledge and resources gained through individual TA support, peer-to-peer sessions, and other group trainings. Ultimately, the evaluation data will inform subsequent rounds of TA and allow TA providers to make necessary adjustments to the overall TA strategy for continuous quality improvement. This will ensure recipients have the support necessary to implement strategies that will improve opioid surveillance and prevention policies and practices within their communities.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
OD2A Recipients	TA Feedback Form	671	2	5/60	112
Annual OD2A TA Survey		440	1	15/60	110
Total					222

[30Day–21–20OT]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled ''Mycoplasma genitalium Treatment Failure Registry'' to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on June 5, 2020 to obtain comments from the public and affected agencies. CDC did not receive comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Mycoplasma genitalium Treatment Failure Registry—New—National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC), Division of STD Prevention requests a three-year approval of an information collection request for the Mycoplasma genitalium Treatment Failure Registry, which will entail use of a standardized Case Report Form.

The primary goal of this activity is to establish a registry to monitor cases of Mycoplasma genitalium (*M. genitalium)* treatment failure in the United States. The project objectives are as follows: (1) Using existing clinical data, describe demographic and behavioral factors among patients with documented Mycoplasma genitalium who fail current CDC-recommended treatment, (2) Using existing clinical data, describe antibiotic regimens utilized among patients with *Mycoplasma genitalium* treatment failure, including documentation of clinical and

microbiologic cure, (3) Using existing laboratory specimens, monitor genetic mutations associated with macrolide or fluroquinolone antibiotic resistance.

Data captured on the standardized Case Report Form will be analyzed to determine outcomes from usage of second-line antibiotic therapy for *M.gentialium.* These data may inform future CDC STD Treatment Guidelines. There are an estimated 100 respondents (anticipated to report once per year) who will be clinicians in private and public health care settings. The data collection is necessary as there are no current national recommendations for patients who fail current CDC-recommended therapy for *M. genitalium.* Each case report form is anticipated to take up to 60 minutes to complete. This data collection provides CDC with information to determine which second-line treatments are most clinically effective, as well as determining antibiotic resistance patterns of *M. genitalium* throughout the US. There are no costs to respondents other than their time. The estimated annualized burden hours for this data collection are 100 hours.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	No. of Respondents	No. responses per respondent	Average burden per response (in hours)
Physician or Nurse Practitioner.	M. genitalium Treatment Failure Registry Case Report Form	100	1	1

Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended, and the Determination of the Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, CDC, pursuant to Public Law 92–463. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP)-DP21–002, Epidemiologic Cohort Study of Interstitial Cystitis.

Date: March 30, 2021.

Time: 10:00 a.m.–6:00 p.m., EST.

Place: Teleconference.

Agenda: To review and evaluate grant applications.

For Further Information Contact: Jaya Raman Ph.D., Scientific Review Officer, CDC, 4770 Buford Highway, Mailstop F80, Atlanta, Georgia 30341, Telephone: (770) 488–6511, *JRaman@cdc.gov.*

The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Centers for Disease Control and Prevention

[Docket No. CDC–2020–0124]

Advisory Committee on Immunization Practices (ACIP)

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of meeting and request for comment.

SUMMARY: In accordance with the Federal Advisory Committee Act, the Centers for Disease Control and Prevention (CDC), announces the following meeting of the Advisory Committee on Immunization Practices (ACIP). This meeting is open to the public. The meeting will be webcast live via the World Wide Web.

DATES: The meeting will be held on December 18, 2020 from 12 p.m. to 6 p.m., EST and December 20, 2020 from 12 p.m. to 6 p.m., EST (times subject to change, see the ACIP website for any updates: *http://www.cdc.gov/vaccines/acip/index.html*).

Written comments must be received on or before December 21, 2020.

ADDRESSES: For more information on ACIP please visit the ACIP website: *http://www.cdc.gov/vaccines/acip/index.html.*

You may submit comments, identified by Docket No. CDC–2020–0124 by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Docket No. CDC–2020–0124, c/o Attn: December 18 and 20, 2020 ACIP Meeting, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H24–8, Atlanta, GA 30329–4027.

Instructions: All submissions received must include the Agency name and Docket Number. All relevant comments received in conformance with the *https://www.regulations.gov* suitability policy will be posted without change to *https://www.regulations.gov,* including any personal information provided. For access to the docket to read background documents or comments received, go to *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Stephanie Thomas, ACIP Committee Management Specialist, Centers for Disease Control and Prevention, National Center for Immunization and Respiratory Diseases, 1600 Clifton Road NE, MS–H24–8, Atlanta, GA 30329–4027; Telephone: 404–639–8367; Email: *ACIP@cdc.gov.*

SUPPLEMENTARY INFORMATION: In accordance with 41 CFR 102–3.150(b), less than 15 calendar days' notice is being given for this meeting due to the exceptional circumstances of the COVID–19 pandemic and rapidly evolving COVID–19 vaccine development and regulatory processes. The Secretary of Health and Human Services has determined that COVID–19 is a Public Health Emergency. A notice of this ACIP meeting has also been posted on CDC's ACIP website at: *http://www.cdc.gov/vaccines/acip/index.html.* In addition, CDC has sent notice of this ACIP meeting by email to those who subscribe to receive email updates about ACIP.

Purpose: The committee is charged with advising the Director, CDC, on the use of immunizing agents. In addition, under 42 U.S.C. 1396s, the committee is mandated to establish and periodically review and, as appropriate, revise the list of vaccines for administration to vaccine-eligible children through the Vaccines for Children (VFC) program, along with schedules regarding dosing interval, dosage, and contraindications to administration of vaccines. Further, under provisions of the Affordable Care Act, section 2713 of the Public Health Service Act, immunization recommendations of the ACIP that have been approved by the Director of the Centers for Disease Control and Prevention and appear on CDC immunization schedules must be covered by applicable health plans.

Matters To Be Considered: The agenda will include discussions on COVID–19 vaccine. A recommendation vote(s) is scheduled. Agenda items are subject to change as priorities dictate. For more information on the meeting agenda visit *https://www.cdc.gov/vaccines/acip/meetings/meetings-info.html.*

Meeting Information: The meeting will be webcast live via the World Wide Web; for more information on ACIP please visit the ACIP website: *http://www.cdc.gov/vaccines/acip/index.html.*

Public Participation

Interested persons or organizations are invited to participate by submitting written views, recommendations, and data. Please note that comments received, including attachments and other supporting materials are part of the public record and are subject to public disclosure. Do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure. If you include your name, contact information, or other information that identifies you in the body of your comments, that information will be on public display. CDC will review all submissions and may choose to redact, or withhold, submissions containing private or proprietary information such as Social Security numbers, medical information, inappropriate language, or duplicate/near duplicate examples of a mass-mail campaign. CDC will carefully consider all comments submitted into the docket. CDC does not accept comment by email.

Written Public Comment: Written comments must be received on or before December 21, 2020. Oral Public Comment: This meeting will include time for members of the public to make an oral comment. Oral public comment will occur before any scheduled votes including all votes relevant to the ACIP's Affordable Care Act and Vaccines for Children Program roles. Priority will be given to individuals who submit a request to make an oral public comment before the meeting according to the procedures below.

Procedure for Oral Public Comment: All persons interested in making an oral public comment at the December 20, 2020 ACIP meeting must submit a request at *http://www.cdc.gov/vaccines/acip/meetings/* no later than 11:59 p.m., EST, December 18, 2020 according to the instructions provided.

If the number of persons requesting to speak is greater than can be reasonably accommodated during the scheduled time, CDC will conduct a lottery to determine the speakers for the scheduled public comment session. CDC staff will notify individuals regarding their request to speak by email by 12:00 p.m., EST, December 19, 2020. To accommodate the significant interest in participation in the oral public comment session of ACIP meetings, each speaker will be limited to 3 minutes, and each speaker may only speak once per meeting.

The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day–21–20NE]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled Feeding My Baby and Me: Infant Feeding Practices Study III to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on May 15, 2020 to obtain comments from the public and affected agencies. CDC received one comment related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Feeding My Baby and Me: Infant Feeding Practices Study III—New—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

A child's first two years of life can have profound impacts on their later dietary behaviors and health outcomes. Early feeding behaviors (*e.g.,* breastfeeding; timing of complementary food introduction; intake of different foods and beverages such as fruits, vegetables, sugar sweetened beverages; and, maternal and infant feeding styles) can play a role in the establishment of later dietary behaviors and may be associated with health outcomes (*e.g.,* risk of infections, obesity, and weight gain). However, limited data is available to track how prenatal and maternal practices impact infant feeding and health in the early years of life. Findings from the Feeding My Baby and Me: Infant Feeding Practices Study III (''FMB&M–IFPS III'') will be used to fill research gaps on how feeding behaviors, patterns, and practices change over the first two years of life and the health-related impacts; inform multiple federal agency efforts targeting maternal and infant and toddler nutrition through work in hospitals, with health care providers, with early care and education providers, and outreach to families and caregivers; and provide context to documents such as the *U.S. Dietary Guidelines for Americans,* which will include pregnant women and children birth to 24 months of age for the first time in 2020–2025.

CDC requests OMB approval for a new information collection designed to address current gaps in knowledge and strengthen programmatic efforts aimed at promoting optimal nutrition and health in children less than two years of age. FMB&M–IFPS III will be a longitudinal study of pregnant women and their new baby for two years. Throughout the study planning period, CDC engaged with subject matter experts from multiple federal agencies including the National Institutes of Health (NIH), the U.S. Department of Agriculture (USDA), and the Food and Drug Administration (FDA) to ensure that FMB&M–IFPS III applies lessons learned from previous studies and represents the priorities and needs of numerous stakeholders. The new study design is based on updated methodology and questions, and recruitment of a new cohort of study participants.

CDC will collect information about mother's intentions, behaviors, feeding decisions, and practices from pregnancy through their child's first two years of life and how these change; child health outcomes; and emerging issues related to infant and toddler feeding practices. Data will be collected using web-based surveys at multiple time points. This includes (1) a prenatal survey, (2) 14 follow-up surveys after the baby is born, and (3) 2–4 maternal dietary data recalls. CDC estimates that 7,477 pregnant women, ages 18–49, must be screened in order to obtain complete data on 2,500 study participants. The goal is to recruit equal proportions of non-Hispanic white, non-Hispanic black, and Hispanic participants.

OMB approval is requested for three years. Participation is voluntary, and there are no costs to respondents other than their time. The total estimated annualized burden hours are 5,051.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Pregnant/Postpartum Women	Study Screener	2,492	1	3/60
	Study Consent	1,570	1	5/60
	Prenatal Survey	1,413	1	20/60
	24-Hour Dietary Recall—Prenatal	919	1	24/60

ESTIMATED ANNUALIZED BURDEN HOURS—Continued

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
	Replicate 24-Hour Dietary Recall—Prenatal	90	1	24/60
	Request for notification of child's birth	1,413	1	2/60
	Birth Screener	1,368	1	2/60
	1-Month Survey	1,231	1	20/60
	2-Month Survey	1,192	1	15/60

DATES: This meeting will be held on January 27, 2021, from 11:00 a.m.—5:30 p.m., EST.

ADDRESSES: The teleconference access is*https://www.cdc.gov/nchs/about/bsc/bsc_meetings.htm.*

FOR FURTHER INFORMATION CONTACT: Sayeedha Uddin, M.D., M.P.H., Executive Secretary, NCHS/CDC, Board of Scientific Counselors, 3311 Toledo Road, Room 2627, Hyattsville, Maryland 20782; Telephone (301) 458–4303, Email *SUddin@cdc.gov.*

SUPPLEMENTARY INFORMATION: *PURPOSE:* This committee is charged with providing advice and making recommendations to the Secretary, Department of Health and Human Services; the Director, CDC; and the Director, NCHS, regarding the scientific and technical program goals and objectives, strategies, and priorities of NCHS.

Matters to be Considered: The meeting agenda includes welcome remarks and a Center update by NCHS leadership; presentation on National Center for Health Statistics Strategic Planning; presentation on integrating Pulse and RANDS Surveys into the National Health Interview Survey; the National Health and Nutrition Examination Survey update; and update on the National Ambulatory Medical Care Survey workgroup. Agenda items are subject to change as priorities dictate.

The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been

delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS- 1758–PN]

Medicare Program; Request for an Exception to the Prohibition on Expansion of Facility Capacity Under the Hospital Ownership and Rural Provider Exceptions to the Physician Self-Referral Prohibition

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice with request for comment.

SUMMARY: The Social Security Act prohibits a physician-owned hospital from expanding its facility capacity, unless the Secretary of the Department of Health and Human Services grants the hospital's request for an exception to that prohibition after considering input on the hospital's request from individuals and entities in the community where the hospital is located. The Centers for Medicare & Medicaid Services has received a request from a physician-owned hospital for an exception to the prohibition against expansion of facility capacity. This notice solicits comments on the request from individuals and entities in the community in which the physician-owned hospital is located. Community input may inform our determination regarding whether the requesting hospital qualifies for an exception to the prohibition against expansion of facility capacity.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on January 11, 2021.

ADDRESSES: In commenting, refer to file code CMS–1758–PN.

Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the ''Submit a comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-*1758*-PN, P.O. Box 8010, Baltimore, MD 21244–1850.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-*1758*-PN, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Patricia Taft at 410–786–4561 or Joi Hosley at 410–786–2194; *POH-ExceptionRequests@cms.hhs.gov.*

SUPPLEMENTARY INFORMATION: *Inspection of Public Comments:* All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following website as soon as possible after they have been received: *http://www.regulations.gov.* Follow the search instructions on that website to view public comments. CMS will not post on *Regulations.gov* public comments that make threats to individuals or institutions or suggest that the individual will take actions to harm the individual. CMS continues to encourage individuals not to submit duplicative comments. We will post acceptable comments from multiple unique commenters even if the content is identical or nearly identical to other comments.

I. Background

Section 1877 of the Social Security Act (the Act), also known as the physician self-referral law— (1) prohibits a physician from making referrals for certain designated health services payable by Medicare to an entity with which he or she (or an immediate family member) has a financial relationship, unless the requirements of an applicable exception are satisfied; and (2) prohibits the entity from filing claims with Medicare (or billing another individual, entity, or third party payer) for any improperly referred designated health services. A financial relationship may be an ownership or investment interest in the entity or a compensation arrangement with the entity. The statute establishes a number of specific exceptions and grants the Secretary of the Department of Health and Human Services (the Secretary) the authority to create regulatory exceptions for financial relationships that do not pose a risk of program or patient abuse.

Section 1877(d) of the Act sets forth exceptions related to ownership or investment interests held by a physician (or an immediate family member of a physician) in an entity that furnishes designated health services. Section 1877(d)(2) of the Act provides an exception for ownership or investment interests in rural providers (the ''rural provider exception''). In order to qualify for the rural provider exception, the designated health services must be furnished in a rural area (as defined in section 1886(d)(2) of the Act) and substantially all the designated health services furnished by the entity must be furnished to individuals residing in a rural area, and, in the case where the entity is a hospital, the hospital meets the requirements of section 1877(i)(1) of the Act no later than September 23, 2011. Section 1877(d)(3) of the Act provides an exception for ownership or investment interests in a hospital located outside of Puerto Rico (the ''whole hospital exception''). In order to qualify for the whole hospital exception, the referring physician must be authorized to perform services at the hospital, the ownership or investment interest must be in the hospital itself (and not merely in a subdivision of the hospital), and the hospital meets the requirements of section 1877(i)(1) of the Act no later than September 23, 2011.

II. Prohibition on Facility Expansion

Section 6001(a)(3) of the Patient Protection and Affordable Care Act (Affordable Care Act) (Pub. L. 111–148) amended the rural provider and whole hospital exceptions to provide that a hospital may not increase the number of operating rooms, procedure rooms, and beds beyond that for which the hospital was licensed on March 23, 2010 (or, in the case of a hospital that did not have a provider agreement in effect as of this date, but did have a provider agreement in effect on December 31, 2010, the effective date of such provider agreement). Thus, since March 23, 2010, a physician-owned hospital that seeks to avail itself of either exception is

prohibited from expanding facility capacity unless it qualifies as an ''applicable hospital'' or ''high Medicaid facility'' (as defined in sections 1877(i)(3)(E), (F) of the Act and 42 CFR 411.362(c)(2), (3) of our regulations) and has been granted an exception to the prohibition by the Secretary. Section 6001(a)(3) of the Affordable Care Act added new section 1877(i)(3)(A)(i) of the Act, which required the Secretary to establish and implement an exception process to the prohibition on expansion of facility capacity for hospitals that qualify as an ''applicable hospital.'' Section 1106 of the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152) amended section 1877(i)(3)(A)(i) of the Act to require the Secretary to establish and implement an exception process to the prohibition on expansion of facility capacity for hospitals that qualify as either an ''applicable hospital'' or a ''high Medicaid facility.'' These terms are defined at sections 1877(i)(3)(E) and 1877(i)(3)(F) of the Act.

The requirements for qualifying as an applicable hospital are set forth at § 411.362(c)(2) and the requirements for qualifying as a high Medicaid facility are set forth at § 411.362(c)(3). An applicable hospital means a hospital: (1) That is located in a county in which the percentage increase in the population during the most recent 5-year period (as of the date that the hospital submits its request for an exception to the prohibition on expansion of facility capacity) is at least 150 percent of the percentage increase in the population growth of the State in which the hospital is located during that period, as estimated by the Bureau of the Census; (2) whose annual percent of total inpatient admissions under Medicaid is equal to or greater than the average percent with respect to such admissions for all hospitals in the county in hospital is located during the most recent 12-month period for which data are available (as of the date that the hospital submits its request for an exception to the prohibition on expansion of facility capacity); (3) that does not discriminate against beneficiaries of federal health care programs and does not permit physicians practicing at the hospital to discriminate against such beneficiaries; (4) that is located in a state in which the average bed capacity in the state is less than the national average bed capacity; and (5) that has an average bed occupancy rate that is greater than the average bed occupancy rate in the State in which the hospital is located. The regulations at § 411.362(c)(2)(ii), (iv), and (v) specify acceptable data sources for determining whether a hospital qualifies as an applicable hospital. A ''high Medicaid facility'' means a hospital that—(1) is not the sole hospital in a county; (2) with respect to each of the three most recent 12-month periods for which data are available, has an annual percent of total inpatient admissions under Medicaid that is estimated to be greater than such percent with respect to such admissions for any other hospital located in the county in which the hospital is located; and (3) does not discriminate against beneficiaries of federal health care programs and does not permit physicians practicing at the hospital to discriminate against such beneficiaries. Section 411.362(c)(3)(ii) specifies the acceptable data sources for determining whether a hospital qualifies as a high Medicaid facility. On November 30, 2011, we published the CY 2012 OPPS/ASC final rule in the **Federal Register**, which set forth the process for a hospital to request an exception from the prohibition on facility expansion (the exception process) at § 411.362(c) and related definitions § 411.362(a) (76 FR 74122).

Section 1877(i)(3)(A)(ii) of the Act provides that individuals and entities in the community in which the provider requesting the exception is located must have an opportunity to provide input with respect to the provider's application for the exception. For further information, we refer readers to the CMS website at: *http://www.cms.gov/Medicare/Fraud-and-Abuse/PhysicianSelfReferral/Physician_Owned_Hospitals.html.*

III. Exception Request Process

On November 30, 2011, we published a final rule in the **Federal Register** (76 FR 74122, 74517 through 74525) that, among other things, finalized § 411.362(c), which specified the process for submitting, commenting on, and reviewing a request for an exception to the prohibition on expansion of facility capacity. We published a subsequent final rule in the **Federal Register** on November 10, 2014 (79 FR 66770) that made certain revisions. These revisions include, among other things, permitting the use of data from an external data source or data from the Hospital Cost Report Information System (HCRIS) for specific eligibility criteria.

As stated in regulations at § 411.362(c)(5), we will solicit community input on the request for an exception by publishing a notice of the request in the **Federal Register**. Individuals and entities in the hospital's community will have 30 days to submit comments on the request. Community input must take the form of written comments and may include documentation demonstrating that the physician-owned hospital requesting the exception does or does not qualify as an applicable hospital or high Medicaid facility as such terms are defined in § 411.362(c)(2) and (3).

In the November 30, 2011 final rule (76 FR 74522), we gave examples of community input, such as documentation demonstrating that the hospital does not satisfy one or more of the data criteria or that the hospital discriminates against beneficiaries of Federal health programs. However, we noted that these were examples only and that we will not restrict the type of community input that may be submitted. If we receive timely comments from the community, we will notify the hospital, and the hospital will have 30 days after such notice to submit a rebuttal statement (§ 411.362(c)(5)).

A request for an exception to the facility expansion prohibition is considered complete as follows:

- If the request, any written comments, and any rebuttal statement include

only HCRIS data: (1) The end of the 30-day comment period if the Centers for Medicare & Medicaid Services (CMS) receives no written comments from the community; or (2) the end of the 30-day rebuttal period if CMS receives written comments from the community, regardless of whether the physician-owned hospital submitting the request submits a rebuttal statement (§ 411.362(c)(5)(i)).

- If the request, any written comments, or any rebuttal statement include data from an external data source, no later than: (1) 180 Days after the end of the 30-day comment period if CMS receives no written comments from the community; and (2) 180 days after the end of the 30-day rebuttal period if CMS receives written comments from the community, regardless of whether the physician-owned hospital submitting the request submits a rebuttal statement (§ 411.362(c)(5)(ii)).

If we grant the request for an exception to the prohibition on expansion of facility capacity, under our current regulations, the expansion may occur only in facilities on the hospital's main campus and may not result in the number of operating rooms, procedure rooms, and beds for which the hospital is licensed to exceed 200 percent of the hospital's baseline number of operating rooms, procedure rooms, and beds (§ 411.362(c)(6)). The CMS decision to

grant or deny a hospital's request for an exception to the prohibition on expansion of facility capacity must be published in the **Federal Register** in accordance with our regulations at § 411.362(c)(7).

IV. Hospital Exception Request

As permitted by section 1877(i)(3) of the Act and our regulations at § 411.362(c), the following physician-owned hospital has requested an exception to the prohibition on expansion of facility capacity:

Name of Facility: Solutions Medical Consulting, LLC d/b/a Serenity Springs Hospital

Location: 1495 Frazier Road, Ruston, Louisiana 71270–1632

Basis for Exception Request: High Medicaid Facility

We seek comments on this request from individuals and entities in the community in which the hospital is located. We encourage interested parties to review the hospital's request, which is posted on the CMS website at: *http://www.cms.gov/Medicare/Fraud-and-Abuse/PhysicianSelfReferral/Physician_Owned_Hospitals.html.* We solicit public comments regarding whether the hospital qualifies as a high Medicaid facility. Under § 411.362(c)(3), a high Medicaid facility is a hospital that satisfies all of the following criteria:

- Is not the sole hospital in the county in which the hospital is located.
- With respect to each of the 3 most recent 12-month periods for which data are available as of the date the hospital submits its request, has an annual percent of total inpatient admissions under Medicaid that is estimated to be greater than such percent with respect to such admissions for any other hospital located in the county in which the hospital is located.
- Does not discriminate against beneficiaries of Federal health care programs and does not permit physicians practicing at the hospital to discriminate against such beneficiaries.

Individuals and entities wishing to submit comments on the hospital's request should review the ''DATES'' and ''ADDRESSES'' sections above and state whether or not they are in the community in which the hospital is located.

V. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

VI. Response to Comments

Because of the large number of public comments we normally receive on **Federal Register** documents, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and time specified in the *DATES* section of this preamble, and, when we proceed with a subsequent document, we will respond to the comments in the preamble to that document.

The Administrator of the Centers for Medicare & Medicaid Services (CMS), Seema Verma, having reviewed and approved this document, authorizes Lynette Wilson, who is the Federal Register Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Dated: December 8, 2020.

Lynette Wilson,

Federal Register Liaison, Centers for Medicare & Medicaid Services.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for OMB Review; ORR–3 and ORR–4 Report Forms for the Unaccompanied Refugee Minors Program (OMB #0970–0034)

AGENCY: Office of Refugee Resettlement, Administration for Children and Families, HHS.

ACTION: Request for Public Comment.

SUMMARY: The Office of Refugee Resettlement (ORR) is requesting a 3-year extension of the ORR–3 and ORR–4 Report Forms (OMB #0970–0034, expiration 01/31/2021). ORR proposes revisions to improve clarity, secure outcome-based data, increase compliance with reporting requirements, and reduce burden.

DATES: *Comments due within 30 days of publication.* OMB must make a decision about the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

SUPPLEMENTARY INFORMATION:

Description: The ORR–3 Report is submitted within 30 days of the minor's initial placement in the state, within 60 days of a change in the minor's status (*e.g.,* change in legal responsibility, change in foster home placement, change in immigration data), and within 60 days of termination from the program. The ORR–4 Report is submitted every 12 months beginning on the first anniversary of the initial placement date, to record outcomes of the minor's progress.

Respondents: Unaccompanied Refugee Minors (URM) State Agencies, URM Provider Agencies, and Youth Participants.

Annual Burden Estimates: URM State Agencies.

Instrument	Total number of respondents	Total number of responses per respondent	Average burden hours per response	Total burden hours	Annual burden hours
ORR–3 Unaccompanied Refugee Minors Placement Report	15	432	0.25	1,620	540
ORR–4 Unaccompanied Refugee Minors Outcomes Report	15	282	0.50	2,115	705

Estimated Total Annual Burden Hours (State Agencies): 1,245.

Annual Burden Estimates: URM Provider Agencies.

Instrument	Total number of respondents	Total number of responses per respondent	Average burden hours per response	Total burden hours	Annual burden hours
ORR–3 Unaccompanied Refugee Minors Placement Report	24	270	0.50	3,240	1,080
ORR–4 Unaccompanied Refugee Minors Outcomes Report	24	162	1.0	3,888	1,296

Estimated Total Annual Burden Hours (Provider Agencies): 2,376.

Annual Burden Estimates: Youth Participants.

Instrument	Total number of respondents	Total number of responses per respondent	Average burden hours per response	Total burden hours	Annual burden hours
ORR–4 Unaccompanied Refugee Minors Outcomes Report	1032	3	0.50	1,548	516

Estimated Total Annual Burden Hours (Youth Participants): 516.

Total Estimated Annual Burden Hours: 4,137.

Authority: 8 U.S.C. 1522(d).

Mary B. Jones,

ACF/OPRE Certifying Officer.

BILLING CODE 4184–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket Nos. FDA–2019–D–1647, FDA–2019–D–1652, and FDA–2019–D–1650]

Performance Criteria for Safety and Performance Based Pathway; Guidances for Industry and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of three device-specific final guidance documents for the Safety and Performance Based Pathway—specifically, ''Spinal Plating Systems—Performance Criteria for Safety and Performance Based Pathway; Guidance for Industry and Food and Drug Administration Staff,'' ''Orthopedic Non-Spinal Metallic Bone Screws and Washers—Performance Criteria for Safety and Performance Based Pathway; Guidance for Industry and Food and Drug Administration Staff,'' and ''Magnetic Resonance (MR) Receive-only Coil—Performance Criteria for Safety and Performance Based Pathway; Guidance for Industry and Food and Drug Administration Staff.'' The device-specific guidances identified in this notice were developed in accordance with the final guidance entitled ''Safety and Performance Based Pathway.''

DATES: The announcement of the guidances is published in the **Federal Register** on December 11, 2020.

ADDRESSES: You may submit either electronic or written comments on Agency guidances at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2019–D–1647 for ''Spinal Plating Systems—Performance Criteria for Safety and Performance Based Pathway; Guidance for Industry and Food and Drug Administration Staff,'' Docket No. FDA–2019–D–1652 for ''Orthopedic Non-Spinal Metallic Bone Screws and Washers—Performance Criteria for Safety and Performance Based Pathway; Guidance for Industry and Food and Drug Administration Staff,'' and Docket No. FDA–2019–D–1650 for ''Magnetic Resonance (MR) Receive-only Coil—Performance Criteria for Safety and Performance Based Pathway; Guidance for Industry and Food and Drug Administration Staff.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff

between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

An electronic copy of the guidance documents are available for download from the internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidances. Submit written requests for a single hard copy of the guidance document entitled ''Spinal Plating Systems—Performance Criteria for Safety and Performance Based Pathway; Guidance for Industry and Food and Drug Administration Staff,'' ''Orthopedic Non-Spinal Metallic Bone Screws and Washers—Performance Criteria for Safety and Performance Based Pathway; Guidance for Industry and Food and Drug Administration Staff,'' or ''Magnetic Resonance (MR) Receive-only Coil—Performance Criteria for Safety and Performance Based Pathway; Guidance for Industry and Food and Drug Administration Staff'' to the Office of Policy, Guidance and Policy Development, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request.

FOR FURTHER INFORMATION CONTACT: Jason Ryans, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 1613, Silver Spring, MD 20993–0002, 301–796–4908.

SUPPLEMENTARY INFORMATION:

I. Background

These device-specific guidance documents provide performance criteria for premarket notification (510(k)) submissions to support the optional Safety and Performance Based Pathway, as described in the guidance entitled ''Safety and Performance Based Pathway.'' [1] As described in that guidance, substantial equivalence is rooted in comparisons between new devices and predicate devices. However, the Federal Food, Drug, and Cosmetic Act does not preclude FDA from using performance criteria to facilitate this comparison. If a legally marketed device performs at certain levels relevant to its safety and effectiveness, and a new device meets those levels of performance for the same characteristics, FDA could find the new device as safe and effective as the legally marketed device. Instead of reviewing data from direct comparison testing between the two devices, FDA could support a finding of substantial equivalence with data demonstrating the new device meets the level of performance of an appropriate predicate device(s). Under this optional Safety and Performance Based Pathway, a submitter could satisfy the requirement to compare its device with a legally marketed device by, among other things, independently demonstrating that the device's performance meets performance criteria as established in the above-listed guidances, rather than using direct predicate comparison testing for some of the performance characteristics.

A notice of availability of the draft guidances ''Spinal Plating Systems'' and ''Orthopedic Non-Spinal Metallic Bone Screws and Washers'' appeared in the **Federal Register** of September 20, 2019 (84 FR 49528). A notice of availability of the draft guidance ''Magnetic Resonance Coil'' appeared in the **Federal Register** of December 9, 2019 (84 FR 67272). FDA considered comments received on the ''Spinal Plating Systems'' guidance and revised the guidance as appropriate by clarifying the types of plates that are excluded from the scope of the guidance (*i.e.,* occipital plates) and the lack of a specified minimum plate thickness. FDA considered comments received on the ''Orthopedic Non-Spinal Metallic Bone Screws and Washers'' guidance and revised the guidance as appropriate by expanding the scope of appropriate materials, clarifying the type of appropriate screw and washer design features, and clarifying the expectations for performance test methods and criteria. FDA considered comments received on the ''Magnetic Resonance Coil'' guidance and revised the guidance as appropriate by clarifying that the guidance is intended for receive-only magnetic resonance coils, expanding performance test methods with applicable FDA-recognized consensus standards, and clarifying the relation between performance testing and evaluations of interoperability.

These guidances are being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidances represent the current thinking of FDA on performance criteria for ''Spinal Plating Systems,'' ''Orthopedic Non-Spinal Metallic Bone Screws and Washers,'' and ''Magnetic Resonance Coil.'' They do not establish any rights for any person and are not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Electronic Access

Persons interested in obtaining a copy of the guidance may do so by downloading an electronic copy from the internet. A search capability for all Center for Devices and Radiological Health guidance documents is available at *https://www.fda.gov/medical-devices/device-advice-comprehensive-regulatory-/assistance/guidance-documents-medical-devices-and-radiation-emitting-products.* These guidance documents are also available at *https://www.regulations.gov* and at *https://www.fda.gov/regulatory-information/search-fda-guidance-documents.* Persons unable to download an electronic copy of either ''Spinal Plating Systems—Performance Criteria for Safety and Performance Based

[1] Available at *https://www.fda.gov/regulatory-information/search-fda-guidance-documents/safety-and-performance-based-pathway.*

Pathway; Guidance for Industry and Food and Drug Administration Staff'' (document number 19008), ''Orthopedic Non-Spinal Metallic Bone Screws and Washers—Performance Criteria for Safety and Performance Based Pathway; Guidance for Industry and Food and Drug Administration Staff'' (document number 19009), or ''Magnetic Resonance (MR) Receive-only Coil—Performance Criteria for Safety and Performance Based Pathway; Guidance for Industry and Food and Drug Administration Staff'' (document number 19011) may send an email request to *CDRH-Guidance@fda.hhs.gov* to receive an electronic copy of the document. Please use the document number and complete title to identify the guidance you are requesting.

III. Paperwork Reduction Act of 1995

While these guidances contain no collection of information, they do refer to previously approved FDA collections of information. Therefore, clearance by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521) is not required for these guidances. The previously approved collections of information are subject to review by OMB under the PRA. The collections of information in the following FDA regulations and guidance have been approved by OMB as listed in the following table:

21 CFR part or guidance	Topic	OMB control No.
807, subpart E	Premarket notification	0910–0120

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA- 2019–N–4203]

Advisory Committee; Bone, Reproductive and Urologic Drugs Advisory Committee; Renewal

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; renewal of advisory committee.

SUMMARY: The Food and Drug Administration (FDA) is announcing the renewal of the Bone, Reproductive and Urologic Drugs Advisory Committee by the Commissioner of Food and Drugs (the Commissioner). The Commissioner has determined that it is in the public interest to renew the Bone, Reproductive and Urologic Drugs Advisory Committee for an additional 2 years beyond the charter expiration date. The new charter will be in effect until the March 23, 2022, expiration date.

DATES: Authority for the Bone, Reproductive and Urologic Drugs Advisory Committee will expire on March 23, 2022 unless the Commissioner formally determines that renewal is in the public interest.

FOR FURTHER INFORMATION CONTACT: Kalyani Bhatt, Division of Advisory Committee and Consultant Management, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 31, Rm. 2417, Silver Spring, MD 20993–0002, 301–796–9001, email: *BRUDAC@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to 41 CFR 102–3.65 and approval by the Department of Health and Human Services pursuant to 45 CFR part 11 and by the General Services Administration, FDA is announcing the renewal of the Bone, Reproductive and Urologic Drugs Advisory Committee. The Committee is a discretionary Federal advisory committee established to provide advice to the Commissioner.

The Bone, Reproductive and Urologic Drugs Advisory Committee advises the Commissioner or designee in discharging responsibilities as they relate to helping to ensure safe and effective drugs for human use and, as required, any other product for which FDA has regulatory responsibility.

The Committee reviews and evaluates data on the safety and effectiveness of marketed and investigational human drug products for use in the practice of osteoporosis and metabolic bone disease, obstetrics, gynecology, urology and related specialties, and makes appropriate recommendations to the Commissioner.

Under its Charter, the Committee shall consist of a core of 11 voting members including the Chair. Members and the Chair are selected by the Commissioner or designee from among authorities knowledgeable in the fields of osteoporosis and metabolic bone disease, obstetrics, gynecology, urology, pediatrics, epidemiology, or statistics and related specialties. Members will be invited to serve for overlapping terms of up to 4 years. Almost all non-Federal members of this committee serve as Special Government Employees. The core of voting members may include one technically qualified member, selected by the Commissioner or designee, who is identified with consumer interests and is recommended by either a consortium of consumer-oriented organizations or other interested persons. In addition to the voting members, the Committee may include one non-voting representative member who is identified with industry interests. There may also be an alternate industry representative.

Further information regarding the most recent charter and other information can be found at *https://www.fda.gov/advisory-committees/human-drug-advisory-committees/bone-reproductive-and-urologic-drugs-advisory-committee-formerly-reproductive-health-drugs-advisory* or by contacting the Designated Federal Officer (see **FOR FURTHER INFORMATION CONTACT**). In light of the fact that no change has been made to the Committee name or description of duties, no amendment will be made to 21 CFR 14.100.

This document is issued under the Federal Advisory Committee Act (5 U.S.C. app.). For general information related to FDA advisory committees, please check *https://www.fda.gov/AdvisoryCommittees/default.htm.*

Dated: December 8, 2020.

Lauren K. Roth,

Acting Principal Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2015–D–3787]

Electromagnetic Compatibility of Medical Devices; Draft Guidance for Industry and Food and Drug Administration Staff; Availability; Extension of Comment Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability; extension of comment period.

SUMMARY: The Food and Drug Administration (FDA or the Agency) is extending the comment period for the notice of availability that appeared in the **Federal Register** of November 17, 2020. In the notice of availability, FDA requested comments on the draft guidance for industry and FDA staff entitled ''Electromagnetic Compatibility of Medical Devices.'' The Agency is taking this action in response to a request for an extension to allow interested persons additional time to submit comments.

DATES: FDA is extending the comment period on the document published on November 17, 2020 (85 FR 73276). Submit either electronic or written comments on the draft guidance by February 16, 2021, to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2015–D–3787 for ''Electromagnetic Compatibility (EMC) of Medical Devices.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

An electronic copy of the guidance document is available for download from the internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance. Submit written requests for a single hard copy of the draft guidance document entitled ''Electromagnetic Compatibility (EMC) of Medical Devices'' to the Office of Policy, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993–0002; or to the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request.

FOR FURTHER INFORMATION CONTACT: Seth J. Seidman, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 62, Rm. 1108, Silver Spring, MD 20993–0002, 301–796–2477; or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of November 17, 2020, FDA published a notice of availability with a 60-day comment period to request comments on the draft guidance for industry and FDA staff entitled ''Electromagnetic Compatibility of Medical Devices.''

The Agency has received a request for a 30-day extension of the comment period. The request conveyed concern that the current 60-day comment period does not allow sufficient time to develop a meaningful or thoughtful response.

FDA has considered the request and is extending the comment period for the

notice of availability for 30 days, until February 16, 2021. The Agency believes that a 30-day extension allows adequate time for interested persons to submit comments without significantly delaying guidance on these important issues.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on the electromagnetic compatibility of medical devices. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Electronic Access

Persons interested in obtaining a copy of the draft guidance may do so by downloading an electronic copy from the internet. A search capability for all Center for Devices and Radiological Health guidance documents is available at *https://www.fda.gov/medical-devices/device-advice-comprehensive-regulatory-assistance/guidance-documents-medical-devices-and-radiation-emitting-products* or from the Center for Biologics Evaluation and Research at *https://www.fda.gov/vaccines-blood-biologics/guidance-compliance-regulatory-information-biologics/biologics-guidances.* This guidance document is also available at *https://www.regulations.gov* and at *https://www.fda.gov/regulatory-information/search-fda-guidance-documents.* Persons unable to download an electronic copy of ''Electromagnetic Compatibility (EMC) of Medical Devices'' may send an email request to *CDRH-Guidance@fda.hhs.gov* to receive an electronic copy of the document. Please include the complete title and the document number 16040 to identify the guidance you are requesting.

Dated: December 8, 2020.

Lauren K. Roth,

Acting Principal Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2020–N–2226]

Cheese Products Deviating from Identity Standard; Temporary Permit for Market Testing

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice

SUMMARY: The Food and Drug Administration (FDA or we) is announcing that a temporary permit has been issued to Bongards Creameries (the applicant) to market test several pasteurized standardized cheeses that deviate from the U.S. standards of identity for cheese products. The temporary permit will allow the applicant to evaluate commercial viability of the products and to collect data on consumer acceptance of the products.

DATES: This permit is effective for 15 months, beginning on the date the applicant introduces or causes introduction of the test products into interstate commerce, but not later than March 11, 2021.

FOR FURTHER INFORMATION CONTACT: Marjan Morravej, Center for Food Safety and Applied Nutrition (HFS–820), Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240–402–2371.

SUPPLEMENTARY INFORMATION: We are giving notice that we have issued a temporary permit to Bongards Creameries. We are issuing the temporary permit in accordance with 21 CFR 130.17, which addresses temporary permits for interstate shipments of experimental packs of food varying from the requirements of standards of identity issued under section 401 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 341).

The permit covers interstate marketing test of several pasteurized standardized cheeses. The test products deviate from the standards of identity for cheese products under 21 CFR 133.167, 133.169, 133.170, and 133.173. For the purpose of this permit, natamycin, which is not permitted under the standards of identity for these cheese products, would be added as a mold inhibitor in the standardized cheeses. The inhibitor would be incorporated into blended and processed cheese just prior to pasteurization and further cast into slices (or packaging into loaves or other final forms as in the case of pasteurized process cheese spread). Natamycin, which is stable under typical thermal processing conditions for pasteurized cheeses, would be added directly to cheese blends just prior to pasteurization, as is done with other mold inhibitors such as sorbic acid, sodium propionate, and their approved variants. The final concentration of natamycin would not exceed 20 parts per million and would be effective at producing process and blended slices with a shelf life of up to 150 days before seeing mold growth.

The purpose of the temporary permit is to allow the applicant to market test the products throughout the United States. The permit will allow the applicant to evaluate commercial viability of the products and to collect data on consumer acceptance of the products.

This permit provides for the temporary marketing of a maximum of 100 million pounds (45,359,237 kg) of the test products. The test products will be manufactured at the Bongards Creamery facilities located at 13200 County Rd. 51, Bongards, MN 55368, and 3001 Hwy. 45 Bypass West, Humboldt, TN 38343.

Bongards Creameries will produce, market test, and distribute the test products throughout the United States. The following sliced cheese products will be market tested: American Pasteurized Process Cheese, Reduced Fat and Reduced Sodium American Pasteurized Process Cheese, Restricted Melt American Pasteurized Process Cheese, American Swiss Pasteurized Process Cheese, White American Pasteurized Process Cheese, American with Jalapeno Pasteurized Process Cheese, Pasteurized Blended Cheddar Cheese, Pasteurized Reduced Fat Cheddar Cheese, Pasteurized Blended Swiss Cheese, Pasteurized Blended Pepper Jack Cheese, Pasteurized Blended Low-Moisture Part Skim Mozzarella Cheese, and Pasteurized Blended Provolone Cheese.

In addition, the following products will be market tested for further manufacturing: Yellow Restricted Melt Process American Slice, Yellow Reduced Fat/Reduced Sodium Process American Slice, Yellow Reduced Sodium Process American Slice, and Yellow Process American Cheese Food Slice.

Each ingredient used in the food must be declared on the labels as required by the applicable sections of 21 CFR part 101. This permit is effective for 15 months, beginning on the date the applicant introduces or causes the introduction of the test products into

interstate commerce, but not later than March 11, 2021.

Dated: December 7, 2020.

Lauren K. Roth,

Acting Principal Associate Commissioner for Policy.

[FR Doc. 2020–27197 Filed 12–10–20; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2020–N–2197]

VistaPharm, Inc., et al.; Withdrawal of Approval of 10 Abbreviated New Drug Applications

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is withdrawing approval of 10 abbreviated new drug applications (ANDAs) from multiple applicants. The applicants notified the Agency in writing that the drug products were no longer marketed and requested that the approval of the applications be withdrawn.

DATES: Approval is withdrawn as of January 11, 2021.

FOR FURTHER INFORMATION CONTACT: Martha Nguyen, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 75, Rm. 1676, Silver Spring, MD 20993–0002, 240–402–6980, *Martha.Nguyen@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: The applicants listed in the table have informed FDA that these drug products are no longer marketed and have requested that FDA withdraw approval of the applications under the process described in § 314.150(c) (21 CFR 314.150(c)). The applicants have also, by their requests, waived their opportunity for a hearing. Withdrawal of approval of an application or abbreviated application under § 314.150(c) is without prejudice to refiling.

Application No.	Drug	Applicant
ANDA 040323	Prednisolone Syrup, 15 milligrams (mg)/5 milliliters (mL)	VistaPharm, Inc., 7265 Ulmerton Rd., Largo, FL 33771
ANDA 075782	Valproic Acid Syrup, 250 mg/5 mL	Do.
ANDA 076188	Fosinopril Sodium Tablets, 10 mg, 20 mg, and 40 mg	Upsher-Smith Laboratories, LLC, 6701 Evenstad Dr., Maple Grove, MN 55369
ANDA 076189	Mirtazapine Tablets, 15 mg, 30 mg, and 45 mg	Do.
ANDA 077537	Glyburide Tablets, 1.25 mg, 2.5 mg, and 5 mg	Aurobindo Pharma USA, Inc., 279 Princeton-Hightstown Rd., East Windsor, NJ 08520
ANDA 077672	Stavudine Capsules, 15 mg, 20 mg, 30 mg, and 40 mg	Do.
ANDA 085055	Tylenol W/Codeine No. 1 (acetaminophen and codeine phosphate) Tablets, 300 mg; 7.5 mg. Tylenol W/Codeine No. 2 (acetaminophen and codeine phosphate) Tablets, 300 mg; 15 mg. Tylenol W/Codeine No. 3 (acetaminophen and codeine phosphate) Tablets, 300 mg; 30 mg. Tylenol W/Codeine No. 4 (acetaminophen and codeine phosphate) Tablets, 300 mg; 60 mg.	Janssen Pharmaceuticals, Inc., 1000 U.S. Route 202, P.O. Box 300, Raritan NJ 08869
ANDA 087266	Lindane Shampoo, 1%	Olta Pharmaceuticals Corp. (an Akorn Company), 1925 West Field Ct., Suite 300, Lake Forest, IL 60045
ANDA 087313	Lindane Lotion, 1%	Do.
ANDA 089003	Phenytoin Sodium Injection, 50 mg/mL	Fresenius Kabi USA, LLC, Three Corporate Dr., Lake Zurich, IL 60047

Therefore, approval of the applications listed in the table, and all amendments and supplements thereto, is hereby withdrawn as of January 11, 2021. Approval of each entire application is withdrawn, including any strengths and dosage forms inadvertently missing from the table. Introduction or delivery for introduction into interstate commerce of products without approved new drug applications violates section 301(a) and (d) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 331(a) and (d)). Drug products that are listed in the table that are in inventory on January 11, 2021 may continue to be dispensed until the inventories have been depleted or the drug products have reached their expiration dates or otherwise become violative, whichever occurs first.

Dated: December 8, 2020.

Food and Drug Administration

[Docket No. FDA–2010–D–0529]

Qualification Process for Drug Development Tools; Guidance for Industry; Availability; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA) is correcting a notice entitled ''Qualification Process

for Drug Development Tools; Guidance for Industry; Availability'' that appeared in the **Federal Register** of November 25, 2020. The document announced the availability of a final guidance for industry and FDA staff that met the 21st Century Cures Act's requirement to issue guidance on this qualification process and elaborated on the new qualification process and transparency requirements and discusses the taxonomy for biomarkers and other drug development tools. The document was published with incorrect information in the Paperwork Reduction Act of 1995 section. This document corrects that error.

FOR FURTHER INFORMATION CONTACT: Chris Leptak, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 6461, Silver Spring, MD 20993–0002, 301–796–0017; or Stephen Ripley, Center for Biologics Evaluation and Research, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002; 240–402–7911.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of November 25, 2020 (85 FR 75334), in FR Doc. 2020–26051, the following correction is made:

On page 75336, in the first column, under the heading, ''II. Paperwork Reduction Act of 1995'', the paragraph is corrected to read:

''While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. Therefore, clearance by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521) is not required for this guidance. The previously approved collections of information are subject to review by OMB under the PRA. The collections of information pertaining to submissions of investigational new drug applications have been approved under OMB control number 0910–0014; the collections of information pertaining to submissions of new drug applications and abbreviated new drug applications have been approved under OMB control number 0910–0001; and the collections of information pertaining to submissions of biologics license applications in 21 CFR part 601 have been approved under OMB control number 0910–0338.''

Dated: December 8, 2020.

Pre-Submission Consultation Process for Animal Food Additive Petitions or Generally Recognized as Safe Notices; Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA, we, or Agency) is announcing the availability of a final guidance for industry #262 entitled ''Pre-Submission Consultation Process for Animal Food Additive Petitions or Generally Recognized as Safe (GRAS) Notices.'' The guidance provides uniform, consistent process information to industry to facilitate effective and efficient review of pre-consultation submissions for animal food additives or GRAS notices for intended use in animal food.

DATES: The announcement of the guidance is published in the **Federal Register** on December 11, 2020.

ADDRESSES: You may submit either electronic or written comments on Agency guidances at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- Mail/Hand delivery/Courier (for written/paper submissions): Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2020–D–0064 for ''Pre-Submission Consultation Process for Animal Food Additive Petitions or Generally Recognized as Safe (GRAS) Notices.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments

received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the guidance to the Policy and Regulations Staff (HFV–6), Center for Veterinary Medicine, Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: William Burkholder, Center for Veterinary Medicine (HFV–229), Food and Drug Administration, 7519 Standish Pl., Rockville, MD 20855, 240–402–5900, *william.burkholder@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of February 13, 2020 (85 FR 8297), FDA published the notice of availability for a draft guidance entitled ''Pre-Submission Consultation Process for Animal Food Additive Petitions or Generally Recognized as Safe (GRAS) Notices,'' giving interested persons until April 13, 2020, to comment on the draft guidance.

FDA received two comments on the draft guidance and those comments were considered as the guidance was finalized. Editorial changes were made to improve clarity. The guidance announced in this notice finalizes the draft guidance dated February 2020.

This guidance provides uniform, consistent process information to industry to facilitate effective and efficient review of pre-consultation submissions for animal food additive petitions or GRAS substances and preparation of food use authorization requests.

This level 1 guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on the pre-submission consultation process for animal food additive petitions or GRAS notices for intended use in animal food. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. Therefore, clearance by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521) is not required for this guidance.

The previously approved collections of information are subject to review by OMB under the PRA. The collections of information in 21 CFR 570.17 and 571.1 have been approved under OMB control number 0910–0546; the collections of information under 21 CFR part 570, subpart E have been approved under OMB control number 0910–0342; and the collections of information under 21 CFR part 58 have been approved under OMB control number 0910–0119.

III. Electronic Access

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Proposed Collection: Public Comment Request Information Collection Request Title: Standardized Work Plan Form for Use with Applications to the Bureau of Health Workforce Research and Training Grants and Cooperative Agreements OMB No. 0906–0049—Revision

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, HRSA has submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR have been provided to OMB. OMB will accept further comments from the public during the review and approval period. OMB may act on HRSA's ICR only after the 30 day comment period for this notice has closed.

DATES: Comments on this ICR should be received no later than January 11, 2021.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

A 60-day **Federal Register** Notice was published in the **Federal Register** on September 15, 2020, Vol. 85, No. 179, pp.57221–57222. There were no public comments.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email Lisa Wright-Solomon, the HRSA Information Collection Clearance Officer at *paperwork@hrsa.gov* or call (301) 443–1984.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: Standardized Work Plan Form for Use with Applications to the Bureau of Health Workforce Research and Training Grants and Cooperative Agreements, OMB No. 0906–0049—Revision

Abstract: HRSA's Bureau of Health Workforce requires applicants of training and research grants and cooperative agreements to submit work plans via the Standardized Work Plan (SWP) form.

The information in the SWP describes the timeframes and progress required during the grant period of performance to address each of the needs detailed in the Purpose and Need section of the application, as required in the Notice of Funding Opportunity announcement.

Applicants use the SWP form when they submit their proposals, and award recipients and Project Officers use the SWP information to assist in monitoring progress once HRSA makes the awards. HRSA proposes a revision to the SWP to include a Quarterly Progress Update (QPU) for award recipients to provide information to HRSA on a quarterly basis on each activity listed in the SWP.

Need and Proposed Use of the Information: The information collected by the SWP form standardizes and streamlines the data used by HRSA in reviewing applications and monitoring awardees. The form asks applicants to provide a description of the activities or steps the applicant will take to achieve

each of the objectives proposed during the entire period of performance. The current standardized format and data submission by applicants increases efficiency in reviewing, awarding, and monitoring each project.

This revision to the clearance package will incorporate an additional form for participants, the QPU. The QPU is completed via HRSA's Electronic Handbook and prompts recipients to report on progress of activities that were submitted using the SWP in the original application. The QPU will automatically populate activities from the recipient's SWP form on a quarterly basis. For each activity listed in the submitted SWP for any particular quarter within the project period, recipients will select and submit a single selection response for each activity status from a pull-down menu with five options: Activity is on Schedule, Activity is Complete, Timing is off track, Activity will be missed if action is not taken, and Activity cannot be achieved. Information provided will be utilized by the program staff to regularly assess overall progress of program requirements and analyze data in order to monitor award recipient compliance and track progress against proposed targets and goals. Information gathered will allow for an improved and more efficient method for identifying whether projects' goals are being advanced or achieved, as set forth in 45 CFR 75.342. Program staff will also use information provided over the period of performance to see emerging trends and to assess whether an award recipient requires technical assistance to address challenges that the award recipient may be experiencing with the implementation of the project. Seeking OMB approval comports with the regulatory requirement imposed by 45 CFR 75.206(a), Paperwork clearances.

Likely Respondents: Recipients of HRSA Bureau of Health Workforce's research and training grants and cooperative agreements.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total annual burden hours
Standardized Work Plan (SWP)	1,000	1	1,000	1.00	1,000
Quarterly Progress Update (QPU) Form	1,000	4	4,000	.10	400
Total	[1] 1,000	–	5,000	–	1,400

[1] The 1,000 Standardized Work Plan (SWP) respondents reflects the number of new grant applications submitted annually. The 1,000 Quarterly Progress Update (QPU) respondents reflects the current volume of funded, active grants.

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.

[FR Doc. 2020–27318 Filed 12–10–20; 8:45 am]

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Findings of Research Misconduct

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: Findings of research misconduct have been made against Charles A. Downs (Respondent), former Adjunct Assistant Professor, Arizona Health Sciences Center, University of Arizona (UA). Respondent engaged in research misconduct in research supported by U.S. Public Health Service (PHS) funds, specifically National Center for Advancing Translation Sciences (NCATS), National Institutes of Health (NIH), grant UL1 TR000454. The administrative actions, including supervision for a period of four (4) years, were implemented beginning on November 18, 2020, and are detailed below.

FOR FURTHER INFORMATION CONTACT: Elisabeth A. Handley, Director, Office of Research Integrity, 1101 Wootton Parkway, Suite 240, Rockville, MD 20852, (240) 453–8200.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Office of Research Integrity (ORI) has taken final action in the following case:

Charles A. Downs, University of Arizona: Based on the report of an investigation conducted by UA and analysis conducted by ORI in its oversight review, ORI found that Respondent, former Adjunct Assistant Professor, Arizona Health Sciences Center, UA, engaged in research misconduct in research supported by PHS funds, specifically NCATS, NIH, grant UL1 TR000454.

Respondent neither admits nor denies ORI's findings of research misconduct. Respondent and ORI desire to close this matter without further expense of time and other resources and thus have entered into a Voluntary Settlement Agreement (Agreement).

ORI found that Respondent engaged in research misconduct by intentionally, knowingly, or recklessly falsifying and/or fabricating data included in the following six (6) grant applications submitted for PHS funds:

- R01 NR016242–01, submitted to the National Institute of Nursing Research (NINR), NIH
- R01 NR016242–01A1, submitted to NINR, NIH
- R01 NR016957–01, submitted to NINR, NIH
- R01 NR016957–01A1, submitted to NINR, NIH

- R01 HL142576–01, submitted to National Heart, Lung, and Blood Institute (NHLBI), NIH
- R01 NR016957–02, submitted to NINR, NIH

ORI found that Respondent knowingly, intentionally, or recklessly falsified and/or fabricated histological images and bar graphs of fluorescent signal data for the production of reactive oxygen species (ROS) in rat lung tissue slices and isolated alveolar type-2 cells by reusing and relabeling previously published figures to represent results from different experiments in twelve (12) figures and related text included in six (6) grant applications. Specifically, Respondent falsified data in:

- Figures 4 and 5 in R01 NR016242–01
- Figures 2 and 3 in R01 NR016242–01A1
- Figures 3A and 3B in R01 NR016957–01
- Figures 3A and 3B in R01 NR016957–01A1
- Figures 3A and 3B in R01 HL142576–01
- Figures 3A and 3B in R01 NR016957–02

Respondent entered into an Agreement and agreed to the following:

(1) Respondent agreed to have his research supervised for a period of four (4) years beginning on November 18, 2020. Respondent agrees that prior to the submission of an application for PHS support for a research project on which Respondent's participation is proposed and prior to Respondent's participation in any capacity on PHS-supported research, Respondent shall ensure that a plan for supervision of Respondent's duties is submitted to ORI for approval. The supervision plan must be designed to ensure the scientific integrity of Respondent's research contribution. Respondent agrees that he shall not participate in any PHS-supported research until such a supervision plan is submitted to and approved by ORI. Respondent agrees to maintain responsibility for compliance with the agreed upon supervision plan.

(2) The requirements for Respondent's supervision plan are as follows:

i. A committee of 2–3 senior faculty members at the institution who are familiar with Respondent's field of research, but not including Respondent's supervisor or collaborators, will provide oversight and guidance for a period of four (4) years from the effective date of the Agreement. The committee will review primary data from Respondent's laboratory on a quarterly basis and submit a report to ORI at six (6) month intervals, setting forth the committee meeting dates and Respondent's compliance with appropriate research standards and confirming the integrity of Respondent's research.

ii. The committee will conduct an advance review of any PHS grant applications (including supplements, resubmissions, etc.), manuscripts reporting PHS-funded research submitted for publication, and abstracts. The review will include a discussion with Respondent of the primary data represented in those documents and will include a certification to ORI that the data presented in the proposed application/publication are supported by the research record.

(3) Respondent agreed that for a period of four (4) years beginning on November 18, 2020, any institution employing him shall submit, in conjunction with each application of PHS funds, or report, manuscript, or abstract involving PHS-supported research in which Respondent is involved, a certification to ORI that the data provided by Respondent are based on actual experiments or are otherwise legitimately derived and that the data, procedures, and methodology are accurately reported in the application, report, manuscript, or abstract.

(4) If no supervisory plan is provided to ORI, Respondent agreed to provide certification to ORI at the conclusion of the supervision period that he has not engaged in, applied for, or had his name included on any application, proposal, or other request for PHS funds without prior notification to ORI.

(5) Respondent agreed to exclude himself voluntarily from serving in any advisory capacity to PHS including, but not limited to, service on any PHS advisory committee, board, and/or peer review committee, or as a consultant for a period of four (4) years, beginning on November 9, 2020.

Dated: December 8, 2020.

Elisabeth A. Handley,

Director, Office of Research Integrity, Office of the Assistant Secretary for Health.

[FR Doc. 2020–27309 Filed 12–10–20; 8:45 am]

BILLING CODE 4150–31–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Proposed Collection: 60-Day Comment Request; Generic Clearance to Support the Safe to Sleep® Campaign at the Eunice Kennedy Shriver National Institute for Child Health and Human Development

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995 to provide opportunity for public comment on proposed data collection projects, the *Eunice Kennedy Shriver* National Institute of Child Health and Human Development (NICHD), the National Institutes of Health (NIH) will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

DATE: Comments regarding this information collection are best assured of having their full effect if received within 60 days of the date of this publication.

FOR FURTHER INFORMATION CONTACT: To obtain a copy of the data collection plans and instruments, submit comments in writing, or request more information on the proposed project, contact: Lorena Kaplan, M.P.H., CHES, Office of Communications, *Eunice Kennedy Shriver* National Institute of Child Health and Human Development, National Institutes of Health, 31 Center Drive, Room 2A32, Bethesda, Maryland 20892, or call non-toll free number (301) 496–6670 or Email your request, including your address to *lorena.kaplan@nih.gov.* Formal requests for additional plans and instruments must be requested in writing.

SUPPLEMENTARY INFORMATION: Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires: Written comments and/or suggestions from the public and affected agencies are invited to address one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be

collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Proposed Collection Title: Generic Clearance to Support the Safe to Sleep® Campaign at the *Eunice Kennedy Shriver* National Institute for Child Health and Human Development (NICHD), 0925–0701, exp., date 02/28/2021, REVISION, *Eunice Kennedy Shriver* National Institute of Child Health and Human Development (NICHD), National Institutes of Health (NIH).

Need and Use of Information Collection: This is a request for a revision to a generic clearance used for submissions specific to the *Eunice Kennedy Shriver* National Institute of Child Health and Human Development (NICHD) Safe to Sleep® (STS) public education campaign. Submissions for the STS campaign will be used to assess the understanding and reach of STS campaign materials and messages, and to monitor and improve campaign activities such as training workshops and overall implementation. The purpose of this information collection is to monitor and modify campaign activities, to plan future campaign activities, to develop messages and materials, and to develop distribution and outreach strategies that are effective at communicating their message to bring about the intended response, awareness, and/or behavioral change for the target audiences. This generic clearance will enable the NICHD to: (1) More efficiently assess the implementation of campaign activities; (2) better understand the target audiences' knowledge, attitudes, and beliefs toward STS messages and materials; (3) better understand how the campaign activities have influenced the target audiences' behaviors and practices; and (4) monitor and improve activities such as trainings, materials, and messages. Having a way to gather feedback on the STS campaign activities is critical to assessing the reach and effect of campaign efforts. Data collected for the campaign can inform where future STS campaign resources can produce the most meaningful results.

Data collected for the STS campaign generic clearance will be used by a number of audiences, including STS campaign staff, NICHD leadership, STS campaign collaborators, Federal SUID/SIDS Workgroup members, SUID/SIDS stakeholders, clinical and maternal and child health professionals. These audiences may use the information collections to: (1) Develop new campaign messages, materials, and/or training curricula; (2) monitor and improve campaign activities; (3) make decisions about campaign activities; (4) inform current campaign activities; and (5) inform and/or change practices and behaviors of program participants.

Examples of the types of information collections that could be included under this generic clearance include: *Focus groups and key informant interviews* with parents/caregivers and/or health professionals to get feedback on distribution and outreach activities, and/or campaign messages; and *Surveys* with parents/caregivers and/or health professionals to: (1) Assess the usefulness of the new STS campaign materials, including print and on-line multi-media materials, (2) track outreach experiences of program participants, (3) assess training participants' changes in knowledge related to safe infant sleep behavior and implementation of learned outreach and education methods, and (4) assess program participants' resource needs.

The sub-studies for this generic clearance will be small in scale, designed to obtain results frequently and quickly to guide campaign development and implementation, inform campaign direction, and be used internally for campaign management purposes. NICHD's current scope and capacity for STS generic sub-studies is non-existent and this request would fill this gap.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 13,305.

ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Type of respondents	Number of respondents	Number of responses per respondent	Average burden per response, in hours	Total Annual Burden Hours
Focus Groups	General Public	215	1	1	215
Interviews	General Public	50	1	1	50
Pre-/Post-Tests	General Public	3,000	2	15/60	1,500
Pre-/Post-Tests	Health Professionals	20,000	2	15/60	10,000
Surveys	Health Professionals	3,000	1	30/60	1,500
Tracking/Feedback Form	Health Educators	20	2	1	40
Total		26,285	49,305		13,305

Dated: December 7, 2020.

Jennifer M. Guimond,

Project Clearance Liaison, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institutes of Health.

[FR Doc. 2020–27192 Filed 12–10–20; 8:45 am]

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request a copy of these documents, call or email the SAMHSA Reports Clearance Officer at (240) 276–0361 or *carlos.graham@samhsa.hhs.gov.*

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the

information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: Networking Suicide Prevention Hotlines—Evaluation of Imminent Risk (OMB No. 0930–0333)—REVISION

The Substance Abuse and Mental Health Services Administration's (SAMHSA), Center for Mental Health Services (CMHS) funds a National Suicide Prevention Lifeline Network (''Lifeline''), consisting of a toll–free telephone number that routes calls from anywhere in the United States to a network of local crisis centers. In turn, the local centers link callers to local emergency, mental health, and social service resources. This project is a revision of the Evaluation of Imminent Risk and builds on previously approved data collection activities [Evaluation of Networking Suicide Prevention Hotlines Follow–Up Assessment (OMB No. 0930–0274) and Call Monitoring of National Suicide Prevention Lifeline Form (OMB No. 0930–0275)]. The extension data collection is an effort to advance the understanding of crisis hotline utilization and its impact.

The overarching purpose of the proposed Evaluation of Imminent Risk data collection is to evaluate hotline counselors' management of imminent risk callers and third party callers concerned about persons at imminent risk, assess counselor adherence to the *Lifeline Policies and Guidelines for Helping Callers at Imminent Risk of Suicide,* and identify the types of interventions implemented with imminent risk callers. Specifically, the Evaluation of Imminent Risk will collect data, using the Imminent Risk Form, to inform the network's knowledge of the extent to which counselors are aware of and being guided by Lifeline's imminent risk guidelines; counselors' definitions of imminent risk; the rates of active rescue of imminent risk callers; the types of rescue and non-rescue interventions used; barriers to intervention; and the circumstances in which active rescue is initiated, including the caller's agreement to receive the intervention. To capture differences across centers, the form also collects information on counselors' employment status and hours worked/volunteered, level of education, license status, training status, source of safety planning protocols, and responsibility for follow up.

Clearance is being requested for the activity to assess the knowledge, actions, and practices of counselors to aid callers who are determined to be at imminent risk for suicide and who may require active rescue. This evaluation will allow researchers to examine and understand the actions taken by counselors to aid imminent risk callers, the need for active rescue, the types of interventions used, and, ultimately, improve the delivery of crisis hotline services to imminent risk callers. A total of nine centers will participate in this evaluation. Thus, SAMHSA is requesting OMB review and approval of the Imminent Risk Form.

Crisis counselors at nine participating centers will record information discussed with imminent risk callers on the Imminent Risk Form, which does not require direct data collection from callers. As with previously approved evaluations, callers will maintain anonymity. Participating counselors will be asked to complete the form for 100% of their imminent risk calls. At centers with high call volumes, data collection may be limited to designated shifts. The Imminent Risk Form contains minor changes from the earlier data collection with revised options of either receiving emergency department services or crisis stabilization centers services while the caller was determined to be at imminent risk for suicide. The prior option was for the emergency department or hospital services. This form requests information in 15 content areas, each with multiple sub-items and response options. Response options include open-ended, yes/no, Likert-type ratings, and multiple choice/check all that apply. The form also requests demographic information on the caller, the identification of the center and counselor submitting the form, and the date of the call. Specifically, the form is divided into the following sections: (1) Counselor information, (2) center information, (3) call characteristics (*e.g.,* line called, language spoken, participation of third party), (4) suicidal desire, (5) suicidal intent, (6) suicidal capability, (7) buffers to suicide, (8) interventions agreed to by caller or implemented by counselor without caller's consent, (9) whether imminent risk was reduced enough such that active rescue was not needed, (10) interventions for third party callers calling about a person at imminent risk, (11) whether supervisory consultation occurred during or after the call, (12) barriers to getting needed help to the person at imminent risk, (13) steps taken to confirm whether emergency contact was made with person at risk, (14) outcome of attempts to rescue person at risk, and (15) outcome of attempts to follow-up on the case. The form also includes an Additional Counselor Training section that counselors complete only when applicable. The form will take approximately 15 minutes to complete and will be completed by the counselor after the call. It is expected that a total of 440 forms will be completed by 116 counselors over the two-year data collection period.

The estimated response burden to collect this information is annualized over the requested two-year clearance period and is presented below:

TOTAL AND ANNUALIZED BURDEN: RESPONDENTS, RESPONSES AND HOURS

Instrument	Number of respondents	Responses/respondent	Total responses	Hours per response	Total hour burden
National Suicide Prevention Lifeline—Imminent Risk Form	116	1.9	220	.26	57

Send comments to Carlos Graham, SAMHSA Reports Clearance Officer at *carlos.graham@samhsa.hhs.gov.* Written comments should be received by February 9, 2021.

Carlos Graham,

Social Science Analyst.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2020–0029; OMB No. 1660–0142]

Agency Information Collection Activities: Proposed Collection; Comment Request; Survivor Sheltering Assessment

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice and request for comments.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public to take this opportunity to comment on a revision of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning the revision of the collection Survivor Sheltering Assessment to include an alternate streamlined form and exchange of information process with the state, tribal, and territorial (STT) governments.

DATES: Comments must be submitted on or before February 9, 2021.

ADDRESSES: To avoid duplicate submissions to the docket, please use the following means to submit comments:

Online. Submit comments at *www.regulations.gov* under Docket ID FEMA–2020–0029. Follow the instructions for submitting comments.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy and Security Notice that is available via the link on the homepage of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Christopher Shoup, Privacy Project Lead, Reporting & Analytics Division, FEMA Recovery Directorate; *christopher.shoup@fema.dhs.gov,* 202.733.7544. You may contact the Information Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: FEMA Emergency Non-Congregate Sheltering during the COVID–19 Public Health Emergency (Interim) FP 104–009–18. This policy defines the framework, policy details, and requirements for determining eligible work and costs for sheltering in response to declarations as defined in the Robert T. Stafford Act for PA or the Fire Management Assistance Grant (FMAG) programs. FEMA provides Public Assistance (PA) funding to state, tribal, and territorial (STT) governments (aka PA Applicants) for costs related to emergency sheltering for survivors. Typically, sheltering occurs in facilities with large open spaces, such as schools, churches, community centers, armories, or other similar facilities rather than in non-congregate environments, which are locations where each individual or household has living space that offers some level of privacy (*e.g.,* hotels, motels, casinos, dormitories, retreat camps, etc.). However, FEMA recognizes that sheltering operations during the COVID–19 Public Health Emergency may require STT's to consider additional strategies to ensure that survivors are sheltered in a manner that does not increase the risk of exposure to or further transmission of COVID–19. FEMA will provide flexibility to STTs to take measures to safely conduct non-congregate sheltering activities. FEMA will encourage STTs operating non-congregate shelters to collect basic shelter resident data. If there is a subsequent Major Disaster Declaration that includes the Individual Assistance (IA) program, FEMA and STTs may begin a bi-lateral exchange of data to coordinate and expedite assistance to shelter residents. This data exchange will enable FEMA to share additional disaster survivor data on losses and needs to STT shelter managers facilitating a coordinated effort to provide resources to shelter residents. This data also provides STTs increased ability for shelter planning and shelter population management.

Collection of Information

Title: Survivor Sheltering Assessment.

Type of Information Collection: Revision of a currently approved information collection.

OMB Number: 1660–0142.

FEMA Forms: FEMA Form 009–0–42, Survivor Sheltering Assessment; FEMA Form 009–0–42AV, Survivor Sheltering Assessment-Alternate Version.

Abstract: FEMA will encourage state, tribal, and territorial (STT) governments operating non-congregate shelters to collect basic shelter resident data. If there is a subsequent Major Disaster Declaration that includes the Individual Assistance (IA) program, FEMA and STTs may begin a bi-lateral exchange of data to coordinate and expedite assistance to shelter residents. This data exchange will enable FEMA to share additional disaster survivor data on losses and needs to STT shelter managers facilitating a coordinated effort to provide resources to shelter residents. This data also provides STTs increased ability for shelter planning and shelter population management.

Affected Public: Individuals or Households, State, Tribal or Territorial Government.

Estimated Number of Respondents: 51,200.

Estimated Number of Responses: 51,200.

Estimated Total Annual Burden Hours: 8,535.

Estimated Total Annual Respondent Cost: $320,489.

Estimated Respondents' Operation and Maintenance Costs: N/A.

Estimated Respondents' Capital and Start-Up Costs: N/A.

Estimated Total Annual Cost to the Federal Government: $306,276

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to: (a) Evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology,

e.g., permitting electronic submission of responses.

Maile Arthur,

Acting Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

BILLING CODE 9111–23–P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS–2020–0049]

Privacy Act of 1974; System of Records

AGENCY: U.S. Department of Homeland Security.

ACTION: Notice of a modified system of records.

SUMMARY: In accordance with the Privacy Act of 1974, the U.S. Department of Homeland Security (DHS) proposes to modify a current DHS system of records titled, ''DHS/ALL–047 Records Related to DHS Personnel, Long-Term Trainees, Contractors, and Visitors During a Declared Public Health Emergency System of Records,'' and retitle it, ''DHS/ALL–047 Records Related to DHS Personnel, Long-Term Trainees, Contractors, Mission Support Individuals, and Visitors During a Declared Public Health Emergency System of Records.'' This system of records describes DHS's collection, use, and maintenance of records on individuals associated with DHS and its facilities during a declared public health emergency. DHS is updating this system of records to more clearly articulate the relevant authorities and purpose; modify the categories of individuals to include individuals who support DHS missions, but were outside the previously defined categories of individuals; modify the categories of records to include those records collected and disclosed in accordance with the requirements of the Coronavirus Aid, Relief, and Economic Security Act (CARES Act); and add an additional routine use. This modified system will be included in DHS's inventory of record systems.

DATES: Submit comments on or before January 11, 2021. This modified system will be effective upon publication. New or modified routine uses will be effective January 11, 2021.

ADDRESSES: You may submit comments, identified by docket number DHS–2020–0049 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–343–4010.
- *Mail:* Constantina Kozanas, Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528–0655.

Instructions: All submissions received must include the agency name and docket number DHS–2020–0049. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: For general and privacy questions, please contact: Constantina Kozanas, (202) 343–1717, *Privacy@hq.dhs.gov,* Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528–0655.

SUPPLEMENTARY INFORMATION:

I. Background

The Secretary of the Department of Health and Human Services (HHS) may, under section 319 of the Public Health Service (PHS) Act (codified at 42 U.S.C. 247d), declare that: (a) A disease or disorder presents a public health emergency; or (b) that a public health emergency, including significant outbreaks of infectious disease or bioterrorist attacks, otherwise exists. The declaration lasts for the duration of the emergency or 90 days but may be extended by the Secretary of HHS. Congress must be notified of the declaration within 48 hours. The U.S. Department of Homeland Security (DHS) must ensure the safety of its workforce, including when the Secretary of HHS or the responsible, designated State official determines and declares that a public health emergency exists. Responses to public health emergencies depend on the nature of the emergency, but in the context of infectious disease or other events that can cause widespread harm to the health of DHS personnel and others in DHS facilities, in order to ensure a safe and secure workspace, DHS may collect information on DHS personnel (*i.e.,* employees, detailees, interns, and volunteers), contractors, long-term trainees, mission support individuals, and visitors at or on buildings, grounds, and properties that are owned, leased, or used by DHS.

This system of records covers information collected on DHS personnel, contractors, long-term trainees, mission support individuals, and visitors at or on buildings, grounds, and properties that are owned, leased, or used by DHS who have contracted or may have been exposed to a suspected or confirmed disease or illness that is the subject of a declared public health emergency or who must undergo preventative testing for a disease or illness that is the subject of a declared public health emergency as a requirement of federal, state, or local public health orders. The information collected may include identifying and contact information of individuals who have been suspected or confirmed to have contracted a disease or illness, or who have been exposed to an individual who had been suspected or confirmed to have contracted a disease or illness, related to a declared public health emergency; individual circumstances and dates of suspected exposure; testing results, symptoms, and treatments; and health status information. DHS maintains this information to reduce the spread of the disease or illness among DHS personnel, contractors, long-term trainees, mission support individuals, and visitors at or on buildings, grounds, and properties that are owned, leased, or used by DHS. In certain instances, depending on the type of record collected and maintained, for federal employees, this information will also be maintained and covered by Office of Personnel Management/Government-10 Employee Medical File System Records (75 FR 35099, June 21, 2010). However, any collection and use of records covered by the DHS/ALL–047 Records Related to DHS Personnel, Long-Term Trainees, Contractors, Mission Support Individuals, and Visitors During a Declared Public Health Emergency System of Records is only permitted during times of a declared public health emergency and when the circumstances permit the Department to collect and maintain such information on the various categories of DHS personnel, contractors, long-term trainees, mission support individuals, and visitors at or on buildings, grounds, and properties that are owned, leased, or used by DHS.

It must first be determined that the circumstances surrounding the declared public health emergency permit the Department to collect and maintain the information that may fall within the scope of this system of records. To make this determination, these circumstances must be examined in conjunction with all applicable laws, including the U.S. Constitution, federal privacy laws, federal labor and employment laws, and federal workforce health and safety laws. Different laws may apply

depending upon the type of information at issue, who the information pertains to, who collected the information, and how the information is collected, maintained, and used by the Department.

For instance, when collecting information on DHS employees, there are several employment laws that govern the collection, dissemination, and retention of employee medical information. These employment laws include the Americans with Disability Act (ADA), the Rehabilitation Act of 1973 (Rehab Act), and the Occupational Safety and Health Act of 1970 (OSH Act). Generally, under federal employment laws, medical information pertaining to employees is confidential and may be obtained by an employer only for certain reasons and only at certain points in the employment relationship. During a public health emergency, an employer may be permitted to collect certain employee medical information that it would not otherwise be permitted to collect depending upon the circumstances. Whether an employer is permitted to collect otherwise confidential employee medical information during a public health emergency depends upon whether an employee or a potential employee poses a ''direct threat'' to others within the meaning of the Americans with Disabilities Act of 1990, the Americans with Disabilities Amendments Act of 2008, and the Rehabilitation Act of 1973. Again, this system of records will apply if it is determined that the circumstances permit the Department to legally collect the employee medical information at issue in the first instance.

Further, this system of records notice (SORN) is being updated to include a reference to the Genetic Information Nondiscrimination Act of 2008 (GINA), 42 U.S.C. 2000ff to ff–11. Title II of GINA prohibits employment discrimination based on genetic information, including family medical history; restricts the circumstances under which employers may lawfully acquire applicants' and employees' genetic information; and prohibits the disclosure of applicants' and employees' genetic information, with limited exceptions, including those stated in 42 U.S.C. 2000ff–5(b) and 29 CFR 1635.9(b). DHS may request the circumstances of an individual's suspected or actual exposure to a disease or illness that is the subject of a declared public health emergency, including the source of exposure. Although it is not the intent for DHS to collect family medical information, an individual may indicate that they were exposed to specific family members who have been diagnosed with, or are suspected to have, the disease or illness in question. To the extent this information may be acquired inadvertently, such information will be kept as a ''confidential medical record'' and maintained separately from an employee's general medical files, pursuant to 42 U.S.C. 2000ff–5(a) and 29 CFR 1635.9(a).

This SORN is also being updated to include DHS mission support individuals in the categories of individuals. DHS mission support individuals include those who are assigned from other federal, state, local, or private agencies to support DHS missions and operations at or on buildings, grounds, and properties that are owned, leased, or used by DHS. For example, the Federal Emergency Management Agency (FEMA) may collect information from non-DHS individuals, including those from a state agency, that have been assigned to work a disaster response in support of DHS and FEMA.

Additionally, this SORN is being published to update the authorities and categories of records to include records that are required to be reported to public health officials in accordance with the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), as cited in the authorities' section below. The CARES Act requires ''[e]very laboratory that performs or analyzes a test that is intended to detect or to diagnose a possible case of COVID–19 to report the results from each such test to the Secretary of HHS in such form and manner, and at such timing and frequency, as the Secretary may prescribe until the end of the Secretary's Public Health Emergency declaration with respect to COVID–19 or any extension of such declaration.'' As provided for by HHS guidance, laboratory entities are required to report certain data for all testing completed, for each individual tested, within 24 hours of results being known or determined, on a daily basis to the appropriate state or local public health department based on the individual's residence. To the extent permitted by law, this information may be collected, and subsequently shared with state and local public health officials, as a result of DHS contracting with laboratories to analyze tests to determine whether a DHS employee, long-term trainee, mission support individual, or contractor had contracted the disease or illness. This additional change to include testing reporting requirements is reflected in the updated purpose section of this SORN.

DHS is adding Routine Use I, permitting the sharing of information to the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel. Instances of this disclosure may occur if high-ranking DHS personnel are impacted and disclosure of their status is important to uphold public confidence in DHS.

Consistent with DHS's information sharing mission, information stored in the DHS/ALL–047 Records Related to DHS Personnel, Long-Term Trainees, Contractors, Mission Support Individuals, and Visitors During a Declared Public Health Emergency System of Records may be shared with other DHS Components that have a need to know the information to carry out their mission essential functions, but only if it is first determined that the information may be shared under all other applicable laws and DHS policies.

In addition, to the extent permitted by law, DHS may share information with appropriate federal, state, local, tribal, territorial, foreign, or international government agencies consistent with the routine uses set forth in this SORN.

This modified system will be included in DHS's inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information practice principles in a statutory framework governing the means by which federal government agencies collect, maintain, use, and disseminate individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. Additionally, the Judicial Redress Act (JRA) provides covered persons with a statutory right to make requests for access and amendment to covered records, as defined by the JRA, along with judicial review for denials of such requests. In addition, the JRA prohibits disclosures of covered records, except as otherwise permitted by the Privacy Act.

Below is the description of the DHS/ALL–047 Records Related to DHS Personnel, Long-Term Trainees, Contractors, Mission Support Individuals, and Visitors During a Declared Public Health Emergency System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of Management and Budget and to Congress.

SYSTEM NAME AND NUMBER:

U.S. Department of Homeland Security (DHS)/ALL–047 Records Related to DHS Personnel, Long-Term Trainees, Contractors, Mission Support Individuals, and Visitors During a Declared Public Health Emergency System of Records.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Records are maintained at the DHS Headquarters and Component offices in Washington, DC and field offices, and contractor-owned and operated facilities.

SYSTEM MANAGER(S):

Chief, Medical Quality & Risk Reduction Branch, Workforce Health and Safety, Office of the Chief Human Capital Officer, U.S. Department of Homeland Security, *OCHCOPrivacyOfficer@hq.dhs.gov.*

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 319 of the Public Health Service (PHS) Act (42 U.S.C. 274d); Coronavirus Aid, Relief, and Economic Security (CARES) Act, Public Law 116–136, Div. B., Title VIII, sec. 18115, 134 Stat. 574 (codified in 42 U.S.C. 274d note); DHS Chief Medical Officer's authorities pursuant to 6 U.S.C. sec. 350 and 6 U.S.C. sec. 597; 6 U.S.C. sec. 464; 21 U.S.C. 360bbb–3; 40 U.S.C. 1315; American with Disabilities Act, including 42 U.S.C. 12112(d)(3)(B), 29 CFR 602.14, 1630.2(r), 1630.14(b)(1), (c)(1), (d)(4); Medical Examinations for Fitness for Duty Requirements, including 5 CFR part 339; Workforce safety federal requirements, including the Occupational Safety and Health Act of 1970, Executive Order 12196, 5 U.S.C. 7902; 29 U.S.C. Chapter 15 (*e.g.,* 29 U.S.C. 668), 29 CFR part 1904, 29 CFR 1910.1020, and 29 CFR 1960.66; Genetic Information Nondiscrimination Act of 2008, 42 U.S.C. secs. 2000ff to ff–11, and 29 CFR part 1635; and United States Coast Guard authorities, including 10 U.S.C. Subtitle A, Part II, Chapter 55, Medical and Dental Care, as applicable, 14 U.S.C. 504(a)(17), 14 U.S.C. 936, 14 U.S.C. 3705, 42 U.S.C. 253, 32 CFR part 199, and 42 CFR 31.2–31.10.

PURPOSE(S) OF THE SYSTEM:

The purpose of this system is to maintain records to protect the Department's workforce and respond to a declared public health emergency. For instance, DHS may use the information collected to conduct contact tracing (*i.e.,* the subsequent identification, monitoring, and support of a confirmed or probable case's close contacts who have been exposed to, and possibly infected with, the disease or illness at or on buildings, grounds, and properties that are owned, leased, or used by DHS); institute preventative testing to permit entry to buildings, grounds, and properties that are owned, leased, or used by DHS to minimize exposure; and fulfill testing reporting requirements, to the extent permitted by law.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Department personnel (including employees, detailees, interns, and volunteers), long-term trainees (such as Federal Law Enforcement Training Centers (FLETC) students), contractors, mission support individuals, and visitors (all other federal employees, applicants, and members of the public) at or on buildings, grounds, and properties that are owned, leased, or used by DHS who are suspected or confirmed to have a disease or illness that is the subject of a declared public health emergency, or may have been or could have been exposed to someone who is suspected or confirmed to have a disease or illness that is the subject of a declared public health emergency, or who must undergo preventative testing for a disease or illness that is the subject of a declared public health emergency as a requirement of federal, state, or local public health orders.

CATEGORIES OF RECORDS IN THE SYSTEM:

For DHS personnel, long-term trainees, contractors, and mission support individuals, the following information may be collected:

- Individual's full name;
- Preferred phone number(s);
- DHS duty location, facility, and specific work space accessed;
- Preferred email address(es);
- Individual's supervisor's name, address, and contact information, and/or the contractor's supervisor/contracting officer representative name, address, and contact information;
- Date(s) and circumstances of the individual's suspected or actual exposure to disease or illness including symptoms, as well as locations within DHS workplace where an individual may have contracted or been exposed to the disease or illness; and names and contact information of other employees, long-term trainees, contractors, mission support individuals, or visitors that the individual interacted with at or on a DHS workspace, facility, or grounds during time the individual was suspected to or had contracted the disease or illness;
- Current work status of the individual (*e.g.,* administrative leave, sick leave, teleworking, in the office, deployed to the field) and affiliated leave status information;
- Other individual information directly related to the disease or illness (*e.g.,* testing results/information, symptoms, treatments (*e.g.,* vaccines), source of exposure);
- Other information for verification purposes when disclosed to third-parties; and
- Information collected in accordance with CARES Act reporting requirements or other HHS statutory, regulatory, and administrative reporting requirements.

For visitors at or on buildings, grounds, and properties that are owned, leased, or used by DHS, the following information may be collected:

- Full name;
- Preferred phone number(s);
- Preferred email address(es);
- Date(s) and time(s) of entrance and exit from DHS workspaces, facilities, and grounds;
- Name(s) of all individuals encountered while in or at DHS workspaces, facilities, and grounds.
- Information indicating plans on entering a DHS workspace, facility, or grounds in the near future; and
- Other records covered by DHS/ALL–024 Facility and Perimeter Access Control and Visitor Management System of Records (75 FR 5609, February 3, 2010) that are relevant and necessary to achieve the purpose of this SORN.

RECORD SOURCE CATEGORIES:

When permitted by applicable law, records may be obtained from DHS personnel, long-term trainees, contractors, mission support individuals, and visitors at or on buildings, grounds, and properties that are owned, leased, or used by DHS; their family members; federal, state, local, tribal, territorial, and foreign government agencies; employers and other entities and individuals who may provide relevant information on a suspected or confirmed disease or illness that is the subject of a declared public health emergency.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information

contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows, to the extent permitted by other applicable laws as described herein:

A. To the Department of Justice (DOJ), including the U.S. Attorneys Offices, or other federal agency conducting litigation or proceedings before any court, adjudicative, or administrative body, when it is relevant or necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;

2. Any employee or former employee of DHS in his/her official capacity;

3. Any employee or former employee of DHS in his/her individual capacity, only when DOJ or DHS has agreed to represent the employee; or

4. The United States or any agency thereof.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration (NARA) or General Services Administration pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency or organization for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when (1) DHS suspects or has confirmed that there has been a breach of the system of records; (2) DHS has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, DHS (including its information systems, programs, and operations), the federal government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

F. To another federal agency or federal entity, when DHS determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the federal government, or national security, resulting from a suspected or confirmed breach.

G. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

H. To appropriate federal, state, local, tribal, or foreign governmental agencies or multilateral governmental organizations, to the extent permitted by law, and in consultation with DHS legal counsel, for the purpose of protecting the vital interests of a data subject or other persons, including to assist such agencies or organizations in preventing exposure to or transmission of a communicable or quarantinable disease or to combat other significant public health threats; appropriate notice will be provided of any identified health risk.

I. To the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel, when there exists a legitimate public interest in the disclosure of the information, when disclosure is necessary to preserve confidence in the integrity of DHS, or when disclosure is necessary to demonstrate the accountability of DHS's officers, employees, or individuals covered by the system, except to the extent the Chief Privacy Officer determines that release of the specific information in the context of a particular case would constitute a clearly unwarranted invasion of personal privacy.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

DHS stores records in this system electronically or on paper in secure facilities in a locked drawer behind a locked door. The records may be stored on magnetic disc, tape, and digital media. Medical information collected is maintained on separate forms and in separate medical files and are treated as a confidential medical record.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

DHS may retrieve records by any of the categories of records, including name, location, testing ID number, date of exposure, or work status.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

DHS is in the process of developing a records schedule for declared public health emergency records. However, to the extent applicable, to ensure compliance with Americans with Disabilities Act (ADA), the Rehabilitation Act, and the Genetic Information Nondiscrimination Act of 2008 (GINA), medical information must be ''maintained on separate forms and in separate medical files and be treated as a confidential medical record.'' 42 U.S.C. 12112(d)(3)(B); 42 U.S.C. sec 2000ff–5(a); 29 CFR 1630.14(b)(1), (c)(1), (d)(4)(i); and 29 CFR 1635.9(a). This means that medical information and documents must be stored separately from other personnel records. As such, the Department must keep medical records for at least one year from creation date. 29 CFR 1602.14. Further, any records compiled under this SORN and incorporated into an occupational individual medical case record pursuant to the OSH Act must be maintained in accordance with 5 CFR part 293.511(b) and 29 CFR 1910.1020(d), and must be destroyed 30 years after employee separation or when the Official Personnel Folder (OPF) is destroyed, whichever is longer, in accordance with NARA General Records Schedule (GRS) 2.7, Item 60, and NARA records retention schedule DAA–GRS–2017–0010–0009, to the extent applicable. Visitor processing records are covered by GRS 5.6, Items 110 and 111, and must be destroyed when either two or five years old, depending on security level, but may be retained longer if required for business use, pursuant to DAA–GRS–2017–0006–0014 and –0015.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

DHS safeguards records in this system according to applicable rules and policies, including all applicable DHS automated systems security and access policies. DHS has imposed strict controls to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

RECORD ACCESS PROCEDURES:

Individuals seeking access to and notification of any record contained in this system of records, or seeking to contest its content, may submit a request in writing to the Chief Privacy Officer or the appropriate Headquarters

or component's FOIA Officer whose contact information can be found at *http://www.dhs.gov/foia* under ''Contact Information.'' If an individual believes more than one component maintains Privacy Act records concerning him or her, the individual may submit the request to the Chief Privacy Officer and Chief Freedom of Information Act Officer, U.S. Department of Homeland Security, Washington, DC 20528–0655. Even if neither the Privacy Act nor the Judicial Redress Act provide a right of access, certain records about you may be available under the Freedom of Information Act.

When an individual is seeking records about himself or herself from this system of records or any other Departmental system of records, the individual's request must conform with the Privacy Act regulations set forth in 6 CFR part 5. The individual must first verify his/her identity, meaning that the individual must provide his/her full name, current address, and date and place of birth. The individual must sign the request, and the individual's signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, an individual may obtain forms for this purpose from the Chief Privacy Officer and Chief Freedom of Information Act Officer, *http://www.dhs.gov/foia* or 1–866–431–0486. In addition, the individual should:

- Explain why he or she believes the Department would have information being requested;
- Identify which component(s) of the Department he or she believes may have the information;
- Specify when the individual believes the records would have been created; and
- Provide any other information that will help the FOIA staff determine which DHS component agency may have responsive records;

If the request is seeking records pertaining to another living individual, the request must include an authorization from the individual whose record is being requested, authorizing the release to the requester.

Without the above information, the component(s) may not be able to conduct an effective search, and the individual's request may be denied due to lack of specificity or lack of compliance with applicable regulations.

CONTESTING RECORD PROCEDURES:

For records covered by the Privacy Act individuals may make a request for amendment or correction of a record of the Department about the individual by writing directly to the Department component that maintains the record, unless the record is not subject to amendment or correction. The request should identify each particular record in question, state the amendment or correction desired, and state why the individual believes that the record is not accurate, relevant, timely, or complete. The individual may submit any documentation that would be helpful. If the individual believes that the same record is in more than one system of records, the request should state that and be addressed to each component that maintains a system of records containing the record.

NOTIFICATION PROCEDURES:

See ''Record Access Procedures'' above.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

85 FR 45914 (July 30, 2020).

Constantina Kozanas,

Chief Privacy Officer, U.S. Department of Homeland Security.

[FR Doc. 2020–27204 Filed 12–10–20; 8:45 am]

BILLING CODE 9112–FP–P

DEPARTMENT OF HOMELAND SECURITY

Transportation Security Administration

[Docket No. TSA–2001–11120]

Intent To Request Extension From OMB of One Current Public Collection of Information: Imposition and Collection of Passenger Civil Aviation Security Service Fees

AGENCY: Transportation Security Administration, DHS.

ACTION: 60-Day notice.

SUMMARY: The Transportation Security Administration (TSA) invites public comment on one currently approved Information Collection Request (ICR), Office of Management and Budget (OMB) control number 1652–0001, abstracted below that we will submit to OMB for an extension in compliance with the Paperwork Reduction Act (PRA). The ICR describes the nature of the information collection and its expected burden. The collection involves air carriers maintaining an accounting system for the passenger civil aviation security service fees collected and reporting this information to TSA on a quarterly basis, as well as retaining the data used for these reports for three fiscal years.

DATES: Send your comments by February 9, 2021.

ADDRESSES: Comments may be emailed to *TSAPRA@tsa.dhs.gov* or delivered to the TSA PRA Officer, Information Technology (IT), TSA–11, Transportation Security Administration, 6595 Springfield Center Drive, Springfield, VA 20598–6011.

FOR FURTHER INFORMATION CONTACT: Christina A. Walsh at the above address, or by telephone (571) 227–2062.

SUPPLEMENTARY INFORMATION:

Comments Invited

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The ICR documentation will be available at *http://www.reginfo.gov* upon its submission to OMB. Therefore, in preparation for OMB review and approval of the following information collection, TSA is soliciting comments to—

(1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Consistent with the requirements of Executive Order (E.O.) 13771, Reducing Regulation and Controlling Regulatory Costs, and E.O. 13777, Enforcing the Regulatory Reform Agenda, TSA is also requesting comments on the extent to which this request for information could be modified to reduce the burden on respondents.

Information Collection Requirement

OMB Control Number 1652–0001; Imposition and Collection of Passenger Civil Aviation Security Service Fees. In accordance with 49 U.S.C. 44940 and relevant TSA Regulations, *see* 49 CFR part 1510, TSA imposes a Passenger Civil Aviation Security Service Fee (September 11th Security Fee) on passengers of both foreign and domestic air carriers (''air carriers'') on air

transportation originating at airports in the United States.

The September 11th Security Fee is collected by TSA and transmitted to the U.S. Treasury Department to offset the Federal Government's costs of providing civil aviation security services and other purposes designated by section 44940. This information collection requires air carriers to submit to TSA information regarding the amount of September 11th Security Fees an air carrier has imposed, collected, refunded to passengers, and remitted to TSA. The retention of this data is necessary for TSA to ensure the proper imposition, collection, and regulation the September 11th Security Fee. Additionally, TSA collects the information to monitor carrier compliance with the fee requirements and for auditing purposes. Air carriers are required to retain this information for three years. Specifically, information collected during a given fiscal year (October 1 through September 30) must be retained through three subsequent fiscal years. For example, information collected during fiscal year 2020 must be retained through fiscal year 2023.

TSA's regulations require air carriers to impose and collect the fee on passengers, and to submit the fee to TSA by the final day of the calendar month following the month in which the fee was collected. *See* 49 CFR 1510.13. Air carriers are further required to submit quarterly reports to TSA, which indicate the amount of the fees imposed, collected, and refunded to passengers, and remitted to TSA. *See* 49 CFR 1510.17.

Each air carrier that collects security service fees from more than 50,000 passengers annually is also required to submit to TSA an annual independent audit, performed by an independent certified public accountant, of its security service fee activities and accounts. *See* 49 CFR 1510.15. Although the annual independent audit requirements were suspended on January 23, 2003 (*see* 68 FR 3192), TSA conducts its own audits of the air carriers. *See* 49 CFR 1510.11. Notwithstanding the suspension of the audit requirements, air carriers must establish and maintain an accounting system to account for the security service fees imposed, collected, refunded to passengers and remitted to TSA. *See* 49 CFR 1510.15(a).

TSA is seeking an extension of this collection to require air carriers to continue submitting the quarterly reports to TSA, and to require air carriers to retain the information for three fiscal years after the fiscal year in which the information was collected. This requirement includes retaining the source information for the quarterly reports remitted to TSA as well as the calculations performed to create the reports submitted to TSA. Should the annual audit requirement be reinstated, the requirement would include information and documents reviewed and prepared for the independent audit; the accountant's working papers, notes, worksheets, and other relevant documentation used in the audit; and, if applicable, the specific information leading to the accountant's opinion, including any determination that the accountant could not provide an audit opinion. Although TSA suspended the independent audit requirement, TSA conducts audits of the air carriers, and therefore, requires air carriers to retain and provide the same information as required for the quarterly reports and independent audits.

TSA has incorporated minor adjustments to the figures used to estimate the costs of this ICR. The adjustments consider changes in the number of regulated air carriers and various administrative cost rates since the previous extension. TSA estimates that 170 total respondent air carriers will each spend approximately 1 hour to prepare and submit each quarterly report. TSA estimates that these respondents will incur a total of 680 hours (170 carriers × 4 quarterly reports × 1 hour per report) to satisfy the quarterly reporting requirements annually.

TSA estimates 274 total responses from all respondent air carriers (170 plus 104, should the annual audit requirement be reinstated), with 2,760 burden hours (680 hours for quarterly reports and 2,080 hours for audits) annually to satisfy the quarterly report and audit requirements.

TSA estimates that the 170 air carriers will each incur an average cost of $456.56 annually to satisfy the quarterly reporting requirement. This estimate includes $383.36 in labor for preparation of each quarterly report (4 reports × $95.84 per hour, each quarterly report is estimated to take 1 hour to prepare), $71.00 in annual records storage related costs, and $2.20 for postage to submit the report (4 stamps at 55 cents each). TSA estimates an aggregate annual cost of $77,615.20 ($456.56 cost × 170 air carriers) for all air carriers to prepare, store, and submit quarterly reports and a cost of $232,845.60 for the three-year extension period requested.

Should TSA reinstate the audit requirement, TSA estimates that 104 air carriers, of the 170 total respondent carriers that collect fees from more than 50,000 passengers annually, would be required to submit annual audits. These carriers would take approximately 20 hours for audit preparation, for a total of 2,080 hours (104 carriers × 20 hours per audit) annually. Air carriers required to submit annual audits would incur an average cost of $2,508.20 per audit. This estimate includes $2,433.40 in labor for preparation of each audit (20 hours per report × $121.67 per hour), $71.00 in annual records storage related costs, and $3.80 for postage to submit the report. TSA estimates an aggregate annual cost of $13,042.64 ($2,508.20 cost × 104 air carriers × .05 likelihood of audit to occur) for all air carriers to prepare, store, and summit the annual audit should the requirement be reinstated and $39,127.92 for the three-year extension period requested.

Dated: December 8, 2020.

Christina A. Walsh,

TSA Paperwork Reduction Act Officer, Information Technology.

BILLING CODE 9110–05–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7027–N–38]

60-Day Notice of Proposed Information Collection: Energy Efficient Mortgages (EEMs) OMB Control No.: 2502–0651

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* February 9, 2021.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Room 4176, Washington, DC 20410–5000; telephone 202–402–3400 (this is not a toll-free number) or email at *Colette.Pollard@hud.gov* for a copy of the proposed forms or other available information. Persons with hearing or

speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Room 4176, Washington, DC 20410–5000; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202–402–3400 (this is not a toll-free number). Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Energy Efficient Mortgages.

OMB Approval Number: 2502–0561.

Type of Request: Extension of currently approved collection.

Form Number: N/A.

Description of the need for the information and proposed use: Lenders provide the required information to determine the eligibility of a mortgage to be insured under Section 106 of the Energy Policy Act of 1992 (formerly 42 U.S.C. 12712 note; transferred to 12 U.S.C. 1701z–16). Section 2123 of the Housing and Economic Recovery Act of 2008 (HERA) (Pub. L. 110–289, approved July 30, 2008) amended Section 106 of the Energy Policy Act of 1992 by revising the maximum dollar amount that can be added to an FHA-insured mortgage for energy efficient improvements.

Respondents (*i.e.* affected public): Business or other for-profit (lenders).

Estimated Number of Respondents: 40.

Estimated Number of Responses: 270.

Frequency of Response: On occasion.

Average Hours per Response: 1.35.

Total Estimated Burdens: 364 hours.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comments in response to these questions.

C. Authority

Section 2 of the Paperwork Reduction Act of 1995, 44 U.S.C. 3507.

Dana T. Wade,

Assistant Secretary for Housing-Federal Housing Commissioner.

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7027–N–40]

60-Day Notice of Proposed Information Collection: Section 811 Project Rental Assistance for Persons With Disabilities; OMB Control No.: 2502–0608

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* February 9, 2021.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Room 4176, Washington, DC 20410–5000; telephone 202–402–3400 (this is not a toll-free number) or email at *Colette.Pollard@hud.gov* for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202–402–3400. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Section 811 Project Rental Assistance for Persons with Disabilities.

OMB Approval Number: 2502–0608.

OMB Expiration Date: 04/30/2020.

Type of Request: Reinstatement of an expired collection.

Form Number: SF–424, SF–LLL, HUD–2880, HUD–92235, HUD–92236, HUD–92237, HUD–92238, HUD–92240, HUD–92239, HUD–92241, HUD–92243, HUD–93205.

Description of the need for the information and proposed use: The collection of this information is necessary to the Department to assist HUD in determining applicant eligibility and capacity to award and administer the HUD PRA funds within statutory and program criteria. A thorough evaluation of an applicant's submission is necessary to protect the Government's financial interest.

Respondents (i.e. affected public): State, Local or Tribal Government, Not-for-profit institutions, Business or other for-profit.

Estimated Number of Respondents: 2,285.

Estimated Number of Responses: 2,375.

Frequency of Response: Annually or quarterly.

Average Hours per Response: varies from 10 minutes to 20 hours.

Total Estimated Burden: 4,248.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 3507.

Assistant Secretary for Housing—Federal Housing Commissioner, Dana T. Wade, having reviewed and approved this document, is delegating the authority to electronically sign this document to submitter, Nacheshia Foxx, who is the **Federal Register** Liaison for HUD, for purposes of publication in the **Federal Register**.

Nacheshia Foxx,

Federal Register Liaison for theDepartment of Housing and Urban Development.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date: February 9, 2021.*

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Room 4176, Washington, DC 20410–5000; telephone 202–402–3400 (this is not a toll-free number) or email at *Colette.Pollard@hud.gov* for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION CONTACT: Robert Peterson, Director, States and Small Cities Division, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Robert Peterson at *Robert.C.Peterson@hud.gov* or telephone 202–402–4211. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

Copies of available documents submitted to OMB may be obtained from Mr. Peterson.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: 60-Day Notice of Proposed Information Collection: State Community Development Block Grant (CDBG) Program.

OMB Approval Number: 2506–0085.

Type of Request: Extension of currently approved collection.

Form Number: HUD–40108.

Description of the need for the information and proposed use: The Housing and Community Development Act of 1974, as amended (HCDA), requires grant recipients that receive CDBG funding to retain records necessary to document compliance with statutory and regulatory requirements on an on-going basis. The statute also requires [Section 104(e)(2)] that HUD conduct an annual review to determine whether states have distributed funds to units of general local government in a timely manner. Additionally, Section 916 of the Cranston-Gonzalez National Affordable Housing Act of 1990, prescribes a consultation with representatives of the interests of the residents of the colonias.

Respondents (i.e. affected public): This information collection applies to 50 State CDBG Grantees (49 states and Puerto Rico but not Hawaii).

Information collection	Number of respondents	Frequency of response	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
Recordkeeping:						
States	50	1	126.00	6,300	$36.76	$231,588.00
Localities	3,500	1	26.13	91,455	36.76	3,361,885.80
Timely Distribution	50	1	2.60	130	36.76	4,778.80
Colonias Consultation	54	1	4.00	216	36.76	7,940.16
Total				98,101		3,606,192.76

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

30-Day Notice of Proposed Information Collection: COVID19 HUD Contingency Plan for HUD Multifamily Rental Project Closing Documents; OMB Control No.: 2502–0618

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: HUD has submitted the proposed information collection requirement described below to the Office of Management and Budget (OMB) for review, in accordance with the Paperwork Reduction Act. The purpose of this notice is to allow for an additional 30 days of public comment.

DATES: *Comments Due Date:* January 11, 2021.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/Start* Printed Page 15501PRAMain. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202–402–3400. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339. This is not a toll-free number. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A. The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on September 4, 2020 at 85 FR 55312.

A. Overview of Information Collection

Title of Information Collection: COVID19 HUD Contingency Plan for HUD Multifamily Rental Project Closing Documents.

OMB Approval Number: 2502–0618.

OMB Expiration Date: 12/32/2020.

Type of Request: Revision of a currently approved collection.

Form Numbers: HUD–5985 & HUD–5960.

Respondents: Business or other for-profit, Not-for-profit institutions, State, Local or Tribal Government.

Estimated Number of Respondents: 612.

Estimated Number of Responses: 1,224.

Frequency of Response: Twice per annum.

Average Hours per Response: 1.00 hour [0.50 x 2 = 1 hour].

Total Estimated Burdens: 1,224.

Description of the need for the information and proposed use: This is a new collection based on situational conditions relating to the COVID–19 Coronavirus outbreak and the Presidential declaration that began a national emergency. This new PRA collection will serve as the authority for any new or future changes or revisions to multifamily programs impacted by COVID–19 or related pandemics.

The Lender's Certificate, HUD–92434, establishes the conditions, which the Lender agrees to abide by in consideration of HUD's commitment to FHA-insure mortgages, and by which the Lender certifies that the conditions have been fulfilled to date, including any work done prior to endorsement of the Note that has been approved by HUD in writing, and all HUD imposed conditions that have been met with respect to such work. The information collection requirements contained in the Lender's Certificate are to oversee the parties' compliance with all applicable legal requirements and therefore ensure protection of the FHA insurance fund. The HUD–92434M is required by the Closing Checklists via the Firm Commitment (Housing Notice 2018–03) and per the fact that the underlying forms contemplate hardcopy submission (since HUD historically has not accepted electronic submission of documents for closing purposes). The *Lender's Certification Regarding: Electronic Submission of Closing Documents* is a modification of the HUD–92434M that will set the Office of General Counsel's (''OGC'') temporary uniform electronic closing protocols until normal closing can resume after the COVID–19 Pandemic.

Relating to the current COVID–19 Coronavirus outbreak and the President declaring a national emergency the Department of Housing and Urban Development (''HUD'') and its offices remain open for business at this time, many are now engaged in full-time telework. It is therefore prudent and appropriate for the OGC, in collaboration with Multifamily to establish protocols, rules, and procedures that best ensure continuity of operations in the event of an extended closure of a specific division, regional or field office, or the determination that OGC in its entirety should work remotely. Pursuant to the March 16, 2020 HUD Memorandum issued for all Regional Counsel and Deputy Regional Counsel, all Associate Regional Counsel for Programs and all OGC Closing Attorneys, set forth protocols and best practices for the continued provision of legal services by HUD Closing Attorneys while working from home or from another remote location. Also included in the memorandum are suggestions that may be shared with outside counsel to facilitate the work being done remotely by OGC attorneys. Therefore, Regional Counsel will ensure that the temporary protocols set forth in the March 16, 2020 memorandum are adopted and applied consistently across the regional and field offices within their purview. When the pandemic subsides and OGC resumes normal closing operations consistently across the country, HUD will reconsider the temporary protocols in this memorandum. OGC attorney protocols for review and approval of draft closing documents must rely on electronic transmission of closing documents in lieu of hard copies in performing their initial reviews. This approach will ensure the continuation of reviews even if our external partners are unable to physically transmit the volume of paper documents needed at this stage. While providing increased flexibility to lenders in submitting closing documents, this protocol does

not authorize any additional substantive modifications to the closing process without approval of the appropriate Regional Counsel and the Office of Insured Housing in Headquarters. Draft closing submission will remain consistent with the approach of Multifamily Housing and OGC will accept draft closing packages in fully electronic form.

Respondents estimation for the Escrow Agreement for Deferred Repairs & Debt Service—223(f)—(one closing):

Estimated Number of Respondents: 330.

Estimated Number of Responses: 330.

Frequency of Response: Once per annum.

Average Hours per Response: .50 hours.

Total Estimated Burdens: 165.

Description of the need for the information and proposed use: The form *Escrow Agreement for Deferred Repairs & Debt Service—223(f)* (''*Debt Service Escrow Agreement*''), sets the terms and conditions between the Borrower and Lender and provides for the establishment of an escrow by the Borrower as security for completion of non-critical deferred repairs. Such escrow also serves as security for HUD's insurance of the loan. The agreement provides for prior approval of HUD for certain actions to be taken by the Borrower or Lender. The information collection requirements contained in Debt Service Escrow Agreement are to oversee the parties' compliance with all applicable legal requirements and therefore ensure protection of the FHA insurance fund.

The global pandemic relating to the COVID–19 Emergency has disrupted the U.S. economy with significantly increased unemployment and overall economic instability. This instability has carried over to real estate markets in general, including multifamily commercial markets. During these challenging times, HUD remains open for business and will continue as an active participant in sourcing new construction and refinance debt through its mortgage insurance programs. At the same time, HUD has reevaluated its underwriting requirements, particularly for market rate refinance transactions that may now experience increased vacancy, rent collection losses and income disruption both in the near and long term. Section 207 of the National Housing Act provides that no mortgage shall be acceptable for insurance unless the Secretary finds that the project is economically sound, and the MAP Guide permits specific mitigants to be employed to reduce risk for transactions currently in process but yet to receive a Firm Commitment to insure. These mitigants include but are not limited to the requirement of a Debt Service Reserve (DSR) for Section 223(f) transactions to offset anticipated operating losses post endorsement. To address risk and/or changed economic circumstances for transactions that have been issued a commitment to insure but have yet to endorse, HUD includes language in the Firm Commitment affirming that no material adverse change (MAC) has occurred between the issuance of the commitment and endorsement. Accordingly, HUD has taken the position that the impact of the COVID–19 Emergency has resulted in a material change in most, if not all, real estate markets and therefore, HUD will require mitigants to offset this additional risk. Accordingly, this form provides clarification and instructions to HUD staff describing additional mitigants that may be included in the Firm Commitment for Section 223(f) loans that are in processing, as well as for those projects for which a Firm Commitment has been issued.

Revisions to the OMB approved Form HUD–92476.1M is the temporary *Escrow Agreement for Deferred Repairs & Debt Service—223(f).* This form does not permanently replace the HUD–92476.1M. The revised escrow, while based on the HUD–92476.1M, is a separate document for temporary use during the COVID–19 emergency pursuant to Mortgagee Letter 2020–11 issued April 10, 2020. The temporary *Escrow Agreement for Deferred Repairs & Debt Service—223(f)* Form will remain in effect until such time as HUD determines that the real estate markets that have been negatively affected by the COVID–19 Emergency have stabilized and additional mitigants for Section 223(f) transactions are no longer required.

This new collection can be used to address future changes to multifamily programs or processes that may arise from impacts due to the COVID19 pandemic.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

(5) Ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Colette Pollard,

Departmental Reports Management Officer, Office of the Chief Information Officer.

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7024–N–51]

30-Day Notice of Proposed Information Collection: Public Housing Agency (PHA) 5-Year and Annual Plan; OMB Control No.: 2577–0226

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: HUD has submitted the proposed information collection requirement described below to the Office of Management and Budget (OMB) for review, in accordance with the Paperwork Reduction Act. The purpose of this notice is to allow for an additional 30 days of public comment.

DATES: *Comments Due Date: January 11, 2021.*

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/Start* Printed Page 15501PRAMain. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, QDAM, Department of Housing

and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202–402–3400. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339. This is not a toll-free number. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD has submitted to OMB a request for approval of the information collection described in Section A. The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on October 9, 2018 at 83 FR 50676.

A. Overview of Information Collection

Title of Information Collection: Public Housing Agency (PHA) 5-Year and Annual Plan.

OMB Approval Number: 2577–0226.

Type of Request: Revision of currently approved collection.

Form Number(s): HUD–50075–5Y, HUD–50075–ST, HUD–50075–SM, HUD–50075–HCV, HUD–50075–HP, HUD–50075–MTW, HUD–50077–CR, HUD–50077–SL, HUD–50077–CRT–SM, and HUD–50077–ST–HCV–HP.

Description of the need for the information and proposed use: Under the provisions of Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the Department of Housing and Urban Development (HUD) has submitted to the Office of Management and Budget (OMB) a request to review and approve the information collection listed below. The Public Housing Agency (PHA) Plan was created by section 5A of the United States Housing Act of 1937 (42 U.S.C. 1437c–1). There are two different PHA Plans: The Five-Year Plan and the Annual Plan. The Five-Year Plan describes the agency's mission, long-range goals and objectives for achieving its mission over a five-year period. The Annual PHA Plan is a comprehensive guide to PHA policies, programs, operations, and strategies for meeting local housing needs and goals. This revision integrates the MTW Supplement to the Annual PHA Plan process for PHAs that join MTW under the 2016 Appropriations Act (*i.e.,* MTW Expansion).

The PHA Plans informs HUD, residents, and the public of the PHA's mission for serving the needs of low, very low-income, and extremely low-income families and its strategy for addressing those needs. This information helps provide accountability to the local community for how PHAs spend their funding and implement their policies. Also, PHA Plans allow HUD to monitor the performance of programs and the performance of public housing agencies that administer them.

This proposed information collection was previously published in the **Federal Register** on October 9, 2018 (FR 83, 50676) and allowed 60-days for public comment. It should be noted that all forms except for the Moving to Work (MTW) Supplement were published in the **Federal Register** on October 30, 2019 (FR 84, 58167) for a 30-day public comment period. The four public comments received for the documents included in that notice were addressed at that time. The MTW Supplement was not included in this publication due to revisions that were needed as part of ongoing work on the MTW Operations Notice, which has now been published. The purpose of this 30-day notice is to respond to public comments received during the 60-day public comment period on the MTW Supplement and to allow for the 30-day public comment period for the MTW Supplement.

Respondents (i.e. affected public): Local, Regional and State Body Corporate Politic Public Housing Agencies (PHAs) Governments.

Estimated Number of Respondents: 3,780.

Estimated Number of Responses: 4,832 (Annual Plan: 1,152 and 5 Year Plan: 3,780).

Frequency of Response: Every five years for all PHAs, annually for all PHAs except HERA Qualified PHAs.

Average Hours per Response: 6.33 hrs.

Total Estimated Burdens: 14,613.74.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

(5) Ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

HUD encourages interested parties to submit comment in response to these questions.

Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

D. Overview of Significant Changes Made to the HUD–50075–MTW, MTW Supplement to the Annual PHA Plan

The MTW Supplement has been updated to reflect the final MTW Operations Notice, which was published in the **Federal Register** (FR 85, 53444) on August 28, 2020, and public comments received during the 60-day **Federal Register** public comment period. A copy of the draft HUD–50075 MTW can be obtained per the information provided earlier in this notice under ''For further information'', or on the HUD Moving to Work website at *https://www.hud.gov/mtw.*

The other forms in the PHA Plan data collection were published in the **Federal Register** on October 30, 2019 for the 30-day public comment period and, therefore, are not included in this 30-day **Federal Register** notice.

Colette Pollard,

Department Reports Management Officer, Office of the Chief Information Officer.

[FR Doc. 2020–27276 Filed 12–10–20; 8:45 am]

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Geological Survey

[GX21EG31DW50100; OMB Control Number 1028–New]

Agency Information Collection Activities; Hydrography Maintenance Portal

AGENCY: U.S. Geological Survey, Interior.

ACTION: Notice of Information Collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the U.S. Geological Survey (USGS) are proposing a new information collection.

DATES: Interested persons are invited to submit comments on or before February 9, 2021.

ADDRESSES: Send your comments on this information collection request (ICR) by mail to U.S. Geological Survey,

Information Collections Officer, 12201 Sunrise Valley Drive, MS 159, Reston, VA 20192; or by email to *gs-info_collections@usgs.gov.* Please reference OMB Control Number 1028–xxxx in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Michael Tinker by email at *mdtinker@usgs.gov,* or by telephone at 303–202–4476.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995, we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are soliciting comments on the proposed ICR that is described below. We are especially interested in public comment addressing the following issues: (1) Is the collection necessary to the proper functions of the USGS; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the USGS enhance the quality, utility, and clarity of the information to be collected; and (5) how might the USGS minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The Hydrography Maintenance Portal (HMP) is a website used by trained editors to access data from the USGS National Hydrography Dataset (NHD) or Watershed Boundary Dataset (WBD) national databases for the purpose of editing the data to update, correct, or otherwise improve it. HMP is used by federal employees of the USGS National Geospatial Program (NGP) and state partners with which USGS has a signed Stewardship Program Memorandums of Understanding (MOU). USGS employees use the HMP as their primary means of accessing NHD and WBD for data management. State partners use the HMP to check out areas of the NHD and/or WBD to perform edits and updates to the data using their specialized, local knowledge of the streams in their areas. These data contributions are very important to maintaining the datasets as A–16 National Geospatial Data Assets, as well as helping to prevent duplication of data by supporting editing of one primary dataset by many.

Using HMP, NHD or WBD data is ''checked out'' from a national database for a select area. No other editor can check out the data for an area when the data is already checked out. The HMP is *not* used to directly edit or submit (''check in'') data to the national database. Data checked out with HMP must be edited with USGS hydrography editing tools, such as the WBD Edit Tool or the NHD Update Tool. To check in data, editors must use the USGS hydrography editing tools.

An HMP user must take special training from USGS staff before they can register for an HMP user account. After training, users register an HMP user account with their business contact information including first/last name, business phone, state, and work organization. Registered users are then assigned check out permissions by the HMP administrators. HMP administrators are a limited group of the USGS NHD/WBD Partner Support Team. HMP user accounts are necessary because they allow HMP administrators to provide assistance if needed, to coordinate production needs, and enable tracking on the editing history for the datasets through reporting.

HMP has reporting functions to generate production statistics. These reports detail active and previous checkout histories within specified date ranges. The business contact information of the users who checked out the data are visible on these reports. Any registered user can generate reports with HMP.

HMP reports are frequently used to coordinate essential production needs between states, or between USGS staff and state partners. The reports allow USGS staff to contact partners if there is a problem with their data or allow partners to contact partners in others states to confirm if editing work is planned or occurring in an adjacent watershed.

Title of Collection: Hydrography Maintenance Portal.

OMB Control Number: New.

Form Number: None.

Type of Review: New.

Respondents/Affected Public: General public. NHD stewards and editors.

affiliated with Federal, State, Local governments, and universities.

Total Estimated Number of Annual Respondents: 200.

Total Estimated Number of Annual Responses: 200.

Estimated Completion Time per Response: 1 hour.

Total Estimated Number of Annual Burden Hours: 200.

Respondent's Obligation: Voluntary.

Frequency of Collection:

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

David Brostuen,

Acting Director, National Geospatial Technical Operations Center.

Bureau of Indian Affairs

[212A2100DD AAK6006201 AOR3030.999900]

Final Supplemental Environmental Impact Statement for the Proposed Arrow Canyon Solar Project, Clark County, Nevada

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of availability.

SUMMARY: This notice advises the public that the Bureau of Indian Affairs (BIA), as the lead Federal agency, with the Bureau of Land Management (BLM), the Environmental Protection Agency (EPA), U.S. Fish and Wildlife Service (USFWS), and the Moapa Band of Paiute Indians (Moapa Band) as cooperating agencies, intends to file a final supplemental environmental impact statement (FSEIS) with the EPA for the proposed Arrow Canyon Solar Project (ACSP or Project). The FSEIS evaluates the expansion of the previously approved Moapa Solar Energy Center (MSEC) Project on the Moapa River Indian Reservation (Reservation) in Clark County, Nevada. This notice also announces that the FSEIS is now available for public review.

DATES: The FSEIS is available at the following website: *www.arrowcanyonsolarseis.com.* In order to be fully considered, written comments on the FSEIS must arrive no later than 30 days after EPA publishes its Notice of Availability in the **Federal Register**.

ADDRESSES: You may mail, hand carry, fax, or email written comments to Mr. Chip Lewis, Regional Environmental Protection Officer, BIA Western Regional Office, Branch of Environmental Quality Services, 2600 North Central Avenue, 4th Floor Mail Room, Phoenix, Arizona 85004–3008; fax (602) 379–3833; email: *chip.lewis@bia.gov.*

FOR FURTHER INFORMATION CONTACT: Mr. Chip Lewis, BIA Western Regional Office, Branch of Environmental Quality Services at (602) 379–6750 or Mr. Garry Cantley at (602) 379–6750.

SUPPLEMENTARY INFORMATION: The proposed Federal action, taken under 25 U.S.C. 415, is BIA's approval of a lease to accommodate the expansion of the solar field previously approved for the MSEC Project and the modification of the existing solar energy ground lease and related agreements entered into by the Moapa Band with the Applicant. The agreements provide for construction, operation and maintenance (O&M), and decommissioning of a 200-megawatt (MW) alternating current solar photovoltaic (PV) electricity generation facility located entirely on the Reservation and specifically on lands held in trust for the Moapa Band.

The MSEC Project was originally developed by Moapa Solar LLC and included an 850-acre solar site on the Reservation and associated rights-of-way (ROWs) on BLM-managed lands for an access road, gen-tie line, and water pipeline. Records of Decision (RODs) were issued by the BIA and BLM in May 2014 and BIA approved the lease one month later. The ROW was issued by BLM in August 2015 for the linear facilities. In March 2017, EDF Renewables Development, Inc. (EDFR) purchased the MSEC Project from the original owner and renamed the Project the Arrow Canyon Solar Project. EDFR subsequently transferred the Project to Arrow Canyon Solar, LLC. Currently, the approved MSEC Project and associated facilities have not yet been constructed.

The Applicant currently plans to expand the solar field on the Reservation from 850 acres to 2,200 acres. This expansion would occur on Tribal lands identified by the Moapa Band that are adjacent to the originally approved MSEC site. The linear facilities, (*i.e.* main access road, 230kV gen-tie line, and water pipeline) as previously approved by the BLM would remain a part of the Project description; therefore, these facilities are not reevaluated. The FSEIS focuses on the expansion of the solar field only.

Construction of the Project is expected to take approximately 18 to 20 months. The Applicant is expected to operate the energy facility up to 50 years. Major components of the solar site would include multiple blocks of solar PV panels mounted on tracking systems, inverters, transformers, collection lines, battery storage facilities, project substation, and O&M facilities. Water will be needed during construction primarily for dust control and a minimal amount will be needed during operations for administrative and sanitary water use and panel washing. The water supply required for the Project would be from wells owned by the Moapa Band and delivered to the site via the previously approved water pipeline or trucks. Access to the ACSP will be provided via North Las Vegas Boulevard from the I–15/US 93 interchange.

The purposes of the proposed Project are, among other things, to: (1) help provide a long-term, diverse, and viable economic revenue base and job opportunities for the Moapa Band; (2) meet the terms of the existing Power Purchase Agreement for the output of the Project; (3) help Nevada and neighboring states to meet their State renewable energy needs; and (4) allow the Moapa Band, in partnership with the Applicant, to optimize the use of the lease site while maximizing the potential economic benefit to the Moapa Band.

The BIA will use the FSEIS to make a decision on the land lease application under its jurisdiction; the EPA may use the document to make decisions under its authorities; the Band may use the FSEIS to make decisions under its Environmental Policy Ordinance; and the USFWS may use the FSEIS to support its decision under the Endangered Species Act.

Directions for Submitting Comments: Please include your name, return address and the caption: ''FSEIS Comments, Proposed Arrow Canyon Solar Project'' on the first page of your written comments and send to the address listed above in the **ADDRESSES** section.

Locations Where the FSEIS is Available for Review: The FSEIS will be available for review at: BIA Western Regional Office, 2600 North Central Avenue, 12th Floor, Suite 210, Phoenix, Arizona and the BIA Southern Paiute Agency, 180 North 200 East, Suite 111, St. George, Utah. The FSEIS is also available on line at: *www.arrowcanyonsolarseis.com.*

To obtain an electronic copy of the FSEIS, please provide your name and address in writing or by voicemail to Mr. Chip Lewis or Mr. Garry Cantley. Their contact information is listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice. Individual paper copies of the FSEIS will be provided only upon request.

Public Comment Availability: Written comments, including names and addresses of respondents, will be available for public review at the BIA Western Regional Office, 2600 North Central Avenue, 12th Floor, Suite 210, Phoenix, Arizona during regular business hours, 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. Before including your address, telephone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: This notice is published in accordance with section 1503.1 of the Council on Environmental Quality regulations (40 CFR 1500 *et seq.*) and the Department of the Interior Regulations (43 CFR part 46) implementing the procedural requirements of the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*), and in accordance with the exercise of authority delegated to the Assistant Secretary—Indian Affairs by part 209 of the Department Manual.

Tara Sweeney,

Assistant Secretary—Indian Affairs.

Indian Gaming; Approval of Tribal-State Class III Gaming Compact Taking Effect in the State of Washington

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Skokomish Indian Tribe (Tribe) and the State of Washington (State) submitted the Fifth Amendment to the Tribal-State Compact for Class III Gaming between the Skokomish Indian Tribe and the State of Washington (Compact) governing certain forms of Class III gaming. This notice announces that the Fifth Amendment to the Tribal-State Compact for Class III Gaming between the Skokomish Indian Tribe and the State of Washington is taking effect.

DATES: The compact takes effect on December 11, 2020.

FOR FURTHER INFORMATION CONTACT: Ms. Paula L. Hart, Director, Office of Indian Gaming, Office of the Deputy Assistant Secretary—Policy and Economic Development, Washington, DC 20240, (202) 219–4066.

SUPPLEMENTARY INFORMATION: Under section 11 of the Indian Gaming Regulatory Act (IGRA), Public Law 100–497, 25 U.S.C. 2701 *et seq.,* the Secretary of the Interior shall publish in the **Federal Register** notice of approved Tribal-State compacts for the purpose of engaging in Class III gaming activities on Indian lands. As required by 25 CFR 293.4, all compacts and amendments are subject to review and approval by the Secretary. On September 22, 2020, the Tribe and the State submitted the Fifth Amendment to the Tribal-State Compact for Class III Gaming between the Skokomish Indian Tribe and the State of Washington. The Secretary took no action on the Fifth Amendment to the Tribal-State Compact for Class III Gaming between the Skokomish Indian Tribe and the State of Washington within 45 days of its submission. Therefore, the Compact is considered to have been approved, but only to the extent it is consistent with IGRA. *See* 25 U.S.C. 2710(d)(8)(C).

Tara Sweeney,

Assistant Secretary—Indian Affairs.

Bureau of Indian Affairs

[212A2100DD/AAKC001030/A0A501010.999900]

Land Acquisitions; Tule River Tribe, Airpark Site, Tulare County, California

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Assistant Secretary—Indian Affairs made a final agency determination to acquire in trust 40 acres, more or less, of land known as the Airpark Site in the City of Porterville, Tulare County, California (Site), for the Tule River Indian Tribe of the Tule River Reservation, California (Tribe), for gaming and other purposes.

DATES: This final determination was made on December 7, 2020.

FOR FURTHER INFORMATION CONTACT: Ms. Paula L. Hart, Director, Office of Indian Gaming, Mailstop 3543, 1849 C Street NW, Washington, DC 20240, telephone (202) 219–4066, *paula.hart@bia.gov.*

SUPPLEMENTARY INFORMATION: On the date listed in the **DATES** section of this notice, the Assistant Secretary—Indian Affairs made a final agency determination to acquire the Site, consisting of 40 acres, more or less, in trust for the Tribe under the authority of the Indian Reorganization Act of June 18, 1934, 25 U.S.C. 5108.

The Assistant Secretary—Indian Affairs, on behalf of the Secretary of the Interior, will immediately acquire title to Site in the name of the United States of America in trust for Tribe upon fulfillment of all Departmental requirements. The 40 acres, more or less, are described as follows:

The following described real property in the County of Tulare, State of California, more particularly described as:

Parcel No's 1 through 17 inclusive, of Parcel Map No. 4343, in the City of Porterville, County of Tulare, State of California, according to the map thereof recorded in Book 44, Page 47 of Parcel Map, in the office of the County Recorder of said County and by certificates of correction recorded, June 1, 1999 as Instrument No. 99–0041612 and August 12, 1999 as Instrument No. 99–0061851.

Excepting therefrom all oil, gas, minerals and other hydrocarbon substances, in, on, upon or under said land, as reserved by the City of Porterville, a Municipal Corporation, in a Deed recorded October 29, 1990 as file No. 71536 of Official Records.

Authority: This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 Departmental Manual 8.1, and is published to comply with the requirements of 25 CFR 151.12 (c)(2)(ii) that notice of the decision to acquire land in trust be promptly provided in the **Federal Register**.

Tara Sweeney,

Assistant Secretary—Indian Affairs.

Land Acquisitions; The Picayune Rancheria of Chukchansi Indians of California

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Assistant Secretary—Indian Affairs has made a final determination to acquire 217.88 acres, more or less, into trust for The Picayune Rancheria of Chukchansi Indians of California.

DATES: This determination was made on December 7, 2020.

FOR FURTHER INFORMATION CONTACT: Ms. Sharlene M. Round Face, Bureau of Indian Affairs, Division of Real Estate Services, 1001 Indian School Road NW, Albuquerque NM 87104, telephone (505) 563–3132.

SUPPLEMENTARY INFORMATION: This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by part 209 of the Departmental Manual, and is published to comply with the requirement of 25 CFR 151.12(c)(2)(ii) that notice of the decision to acquire land in trust be promptly published in the **Federal Register**.

On the date listed in the **DATES** section of this notice, the Assistant Secretary—Indian Affairs issued a decision to accept land in trust for the Picayune Rancheria of Chukchansi Indians of California under the authority of Section 5 of the Indian Reorganization Act of 1934 (48 Stat. 984).

Picayune Rancheria of Chukchansi Indians of California

Parcel 1

All that portion of the North half of the Northeast quarter of Section 24, Township 9 South, Range 20 East, Mount Diablo Base and Meridian, according to the Official Plat thereof, lying Westerly of the Westerly line of State Highway No. 41.

Excepting Therefrom that portion thereof described in Grant Deed to the State of California, recorded April 8, 1987 in Book 1963, Page 411 of Official Records.

Parcel 2

All that portion of the South half of the Northeast quarter and of the North half of the North half of the Southeast

quarter of Section 24, Township 9 South, Range 20 East, Mount Diablo Base and Meridian, according to the Official Plat thereof, lying Westerly of the Westerly line of State Highway No. 41.

EXCEPTING THEREFROM that portion thereof described in Grant Deed to the State of California, recorded April 8, 1987 ln Book 1963, Page 411 of Official Records.

Parcel 3

All that portion of the South three-quarters of the Southeast quarter of Section 24. Township 9 South, Range 20 East. Mount Diablo Base and Meridian, according to the Official Plat thereof, lying Westerly of the Westerly line of State Highway No. 41.

Excepting Therefrom that portion thereof described in Grant Deed to the State of California, recorded April 8, 1987 in Book 1963. Page 411 of Official Records.

Parcel 4

The East 200.00 feet of the Southeast quarter of the Southwest quarter of Section 13 and the East 200 feet of the Northeast quarter of the Northwest quarter of Section 24, all in Township 9 South, Range 20 East, Mount Diablo Base and Meridian, in the unincorporated area, County of Madera, State of California, according to the Official Plat thereof.

Containing 217.88 acres, more or less.

Tara Sweeney,

Assistant Secretary—Indian Affairs.

Mecca Ranch Property

ALL THAT CERTAIN REAL PROPERTY IN THE COUNTY OF RIVERSIDE, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS:

PARCEL A: APN 729–040–003 & 729–040–004

THE WEST HALF OF THE NORTHEAST QUARTER AND THE EAST HALF OF THE EAST HALF OF THE NORTHWEST QUARTER OF SECTION 20, TOWNSHIP 7 SOUTH, RANGE 9 EAST, SAN BERNARDINO MERIDIAN, ACCORDING TO THE OFFICIAL PLAT THEREOF.

PARCEL B: APN 729–040–005–5

THAT PORTION OF THE EAST HALF OF THE NORTHEAST QUARTER OF SECTION 20, TOWNSHIP 7 SOUTH, RANGE 9 EAST, SAN BERNARDINO MERIDIAN, ACCORDING TO THE OFFICIAL PLAT THEREOF, DESCRIBED AS FOLLOWS:

BEGINNING AT THE NORTHEAST CORNER OF SECTION 20, TOWNSHIP 7 SOUTH, RANGE 9 EAST, SAN BERNARDINO BASE AND MERIDIAN; THENCE SOUTH 0°50′40″ EAST, ALONG THE EAST LINE OF SAID SECTION 20, A DISTANCE OF 59.33 FEET TO THE SOUTHWEST LINE OF THE RIGHT OF WAY OF THE SOUTHERN PACIFIC RAILROAD TO THE TRUE POINT OF BEGINNING;

THENCE CONTINUING ALONG THE EAST LINE OF SECTION 20, SOUTH 0°50′40″ EAST, A DISTANCE OF 114.72 FEET TO A POINT IN THE NORTH RIGHT OF WAY LINE OF STATE HIGHWAY NO. 111;

THENCE NORTH 61°30′15″ WEST, ALONG THE NORTH RIGHT OF WAY LINE OF SAID STATE HIGHWAY, A DISTANCE OF 365.10 FEET TO THE NORTH LINE OF SAID SECTION 20;

THENCE SOUTH 89° 58'' 19'' EAST, ALONG THE NORTH LINE OF SECTION 20, A DISTANCE OF 209.79 FEET TO THE SOUTHWEST LINE OF THE RIGHT OF WAY OF THE SOUTHERN PACIFIC RAILROAD;

THENCE SOUTH 61°30′15″ EAST ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 124.45 FEET TO THE TRUE POINT OF BEGINNING.

EXCEPTING THEREFROM THE NORTH 30 FEET AND THE EAST 30 FEET THEREOF.

ALSO EXCEPTING THEREFROM ALL MINERALS, OIL, GAS AND OTHER HYDROCARBONS, AND ALL OTHER SUBSTANCES PRODUCED THEREWITH, AND RIGHTS PERTAINING THERETO, IN, ON, UNDER, OR THAT MAY BE PRODUCED FROM SAID LAND, AS RESERVED BY DANTE A. GAIIANIGA AND ALICE M. GAIIANIGA, AS TRUSTEES UNDER THAT CERTAIN DECLARATION OF TRUST, DATED DECEMBER 6, 1971, IN THE DEED RECORDED MARCH 24, 1976 AS INSTRUMENT NO. 38365 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA.

PARCEL C: APN 729–040–006–6

THE EAST HALF OF THE NORTHEAST QUARTER OF SECTION 20, TOWNSHIP 7 SOUTH, RANGE 9 EAST, SAN BERNARDINO MERIDIAN, ACCORDING TO THE OFFICIAL PLAT THEREOF.

EXCEPTING THEREFROM THAT PORTION INCLUDED IN THE RIGHT–OF–WAY OF THE SOUTHERN PACIFIC RAILROAD COMPANY.

ALSO EXCEPTING THEREFROM THOSE PORTIONS CONVEYED TO THE STATE OF CALIFORNIA BY DEED RECORDED MARCH 9, 1948 IN BOOK 894, PAGE 456 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA.

ALSO EXCEPTING THEREFROM THAT PORTION CONVEYED TO COACHELLA VALLEY COUNTY WATER DISTRICT BY DEED RECORDED JULY 2, 1949 IN BOOK 1089, PAGE 363 OF OFFICIAL RECORDS.

ALSO EXCEPTING THEREFROM THE NORTH 30 FEET AND THE EAST 30 FEET THEREOF.

ALSO EXCEPTING THEREFROM THE WEST 90, FEET OF THE EAST 150

FEET OF THE SOUTH 1278.18 FEET AS CONVEYED TO THE COACHELLA VALLEY COUNTY WATER DISTRICT, A PUBLIC AGENCY OF THE STATE OF CALIFORNIA, AS SET FORTH AND DESCRIBED IN THAT CERTAIN DOCUMENT RECORDED JUNE 9, 1958 IN BOOK 2282, PAGE 595 OF OFFICIAL RECORDS.

ALSO EXCEPTING THEREFROM THAT PORTION THEREOF DESCRIBED AS FOLLOWS:

BEGINNING AT THE NORTHEAST CORNER OF SECTION NORTH 20, TOWNSHIP 7 SOUTH, RANGE 9 EAST, SAN BERNARDINO BASE AND MERIDIAN;

THENCE SOUTH 0°50′40″ EAST, ALONG THE EAST LINE OF SAID SECTION 20, A DISTANCE OF 59.33 FEET TO THE SOUTHWEST LINE OF THE RIGHT OF WAY OF THE SOUTHERN PACIFIC RAILROAD TO THE TRUE POINT OF BEGINNING;

THENCE CONTINUING ALONG THE EAST LINE OF SECTION 20, SOUTH 0°50′40″ EAST, A DISTANCE OF 114.72 FEET TO A POINT IN THE NORTH RIGHT OF WAY LINE OF STATE HIGHWAY NO. 111;

THENCE NORTH 61°30′15″ WEST, ALONG THE NORTH RIGHT OF WAY LINE OF SAID STATE HIGHWAY, A DISTANCE OF 365.10 FEET TO THE NORTH LINE OF SAID SECTION 20;

THENCE SOUTH 89°58′19″ EAST, ALONG THE NORTH LINE OF SECTION 20, A DISTANCE OF 209.79 FEET TO THE SOUTHWEST LINE OF THE RIGHT OF WAY OF THE SOUTHERN PACIFIC RAILROAD;

THENCE SOUTH 61°30′15″ EAST ALONG SAID RIGHT OF WAY LINE, A DISTANCE OF 124.45 FEET TO THE TRUE POINT OF BEGINNING.

ALSO EXCEPTING THEREFROM ALL MINERALS, OIL, GAS AND OTHER HYDROCARBONS, AND ALL OTHER SUBSTANCES PRODUCED THEREWITH, AND RIGHTS PERTAINING THERETO, IN, ON, UNDER, OR THAT MAY BE PRODUCED FROM SAID LAND, AS RESERVED BY DANTE A. GAIIANIGA AND ALICE M. GAIIANIGA, AS TRUSTEES UNDER THAT CERTAIN DECLARATION OF TRUST, DATED DECEMBER 6, 1971 IN DEED RECORDED MARCH 24, 1976 AS INSTRUMENT NO. 38365 OF OFFICIAL RECORDS OF RIVERSIDE COUNTY, CALIFORNIA.

Indian Gaming; Tribal-State Class III Gaming Compacts Taking Effect in the State of California

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The State of California submitted compacts governing certain forms of Class III gaming with six Tribes in California. This notice announces that the following compacts are taking effect: the Tribal-State Compact between the State of California and the Ione Band of Miwok Indians; the Tribal-State Compact between the State of California and the Mooretown Rancheria of Maidu Indians of California; the Tribal-State Compact between the State of California and Paskenta Band of Nomlaki Indians; the Tribal-State Compact between the State of California and the Shingle Springs Band of Miwok Indians; the Tribal-State Compact between the State of California and the Tolowa Dee-Ni' Nation; and the Tribal-State Compact between the State of California and the Tule River Indian Tribe of California.

DATES: The compacts take effect on December 11, 2020.

FOR FURTHER INFORMATION CONTACT: Ms. Paula L. Hart, Director, Office of Indian Gaming, Office of the Deputy Assistant Secretary—Policy and Economic Development, Washington, DC 20240, (202) 219–4066.

SUPPLEMENTARY INFORMATION: Under section 11 of the Indian Gaming Regulatory Act (IGRA), Public Law 100–497, 25 U.S.C. 2701 *et seq.,* the Secretary of the Interior shall publish in the **Federal Register** notice of approved Tribal-State compacts for the purpose of engaging in Class III gaming activities on Indian lands. As required by 25 CFR 293.4, all compacts are subject to review and approval by the Secretary. On October 14, 2020, the State of California submitted compacts governing certain forms of Class III gaming with six Tribes in California. The Secretary took no action on the following compacts within 45 days of their submission: The Tribal-State Compact between the State of California and the Ione Band of Miwok Indians; the Tribal-State Compact between the State of California and the Mooretown Rancheria of Maidu Indians of California; the Tribal-State Compact between the State of California and Paskenta Band of Nomlaki Indians; the Tribal-State Compact between the State of California and the Shingle Springs Band of Miwok Indians; the Tribal-State Compact between the State of California and the Tolowa Dee-Ni' Nation; and the Tribal-State Compact between the State of California and the Tule River Indian Tribe of California. Therefore, the Compacts are considered to have been approved, but only to the extent they are consistent with IGRA. *See* 25 U.S.C. 2710(d)(8)(C).

Tara Sweeney,

Assistant Secretary—Indian Affairs.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[20X.LLAKF03000 L16100000.PN0000]

Notice of Availability for the Central Yukon Draft Resource Management Plan/Environmental Impact Statement, Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended, and the Federal Land Policy and Management Act of 1976, as amended, the Bureau of Land Management (BLM) releases the Central Yukon Draft Resource Management Plan/Environmental Impact Statement (RMP/EIS) for public review and comment. The BLM will hold virtual public meetings and Alaska National Interest Lands Conservation Act (ANILCA) Section 810 subsistence-related hearings regarding the Central Yukon Draft RMP/EIS. Copies or notification of the electronic availability for the Central Yukon Draft RMP/EIS are being sent to affected federal, state, tribal, and local government agencies and to other stakeholders.

DATES: To ensure that comments will be considered, the BLM must receive written comments on the Draft EIS within 90 days following the date the Environmental Protection Agency publishes its Notice of Availability in the **Federal Register**. The BLM will announce virtual public meetings, subsistence-related hearings, and any other public participation activities at least 15 days in advance on the NEPA Register program page, *https://eplanning.blm.gov/eplanning-ui/project/35315/510,* as well as through public notices, press releases, social media posts, and/or mailings.

ADDRESSES: You can review and download the Central Yukon Draft RMP/EIS online from the BLM's NEPA Register at *https://eplanning.blm.gov/eplanning-ui/project/35315/510.* Select the ''Documents'' tab to find the electronic version of this material. Hard copies of the Draft RMP/EIS are also available for public inspection at the offices listed in this section in compliance with current COVID–19 protocols.

You may provide comments by mail, fax, email, or in person. Mail comments to: BLM Central Yukon Field Office, Attention: Central Yukon Draft RMP/EIS, 222 University Avenue, Fairbanks, AK 99709. Fax comments to (907) 474–2282 or email comments to *CentralYukon@blm.gov.* Hand-deliver comments to any of the locations listed in this section in compliance with current COVID–19 protocols.

Please contact each of the following facilities before visiting to determine their specific COVID–19 protocols, which might include needing an appointment and face mask to enter:

BLM Fairbanks District Office, 222 University Avenue, Fairbanks, AK 99709, (907) 474–2200.

BLM Alaska Public Information Center, James M. Fitzgerald Federal Building, 222 West 7th Avenue, Anchorage, AK 99513, (907) 271–5960.

Alaska Resources Library & Information Services, 3211 Providence Drive, Suite 111, Anchorage, AK 99508, (907) 272–7547.

Alaska Public Lands Information Center, 101 Dunkel Street Suite 110, Fairbanks, AK 99701, (907) 459–3730.

FOR FURTHER INFORMATION CONTACT: Michelle Ethun, BLM Central Yukon Field Office, at (907) 474–2253 or *methun@blm.gov.* People who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The Central Yukon Draft RMP/EIS is a comprehensive framework for future public land management actions in the Central Yukon region of Alaska. The planning area consists of about 55.7 million acres of land, including approximately 13.3 million acres of public lands managed by the BLM Central Yukon Field Office.

The Record of Decision for the Central Yukon RMP/EIS will guide management of these public lands for the next 15 to 20 years for the benefit of current and future generations as part of BLM's multiple-use mission. This planning effort is updating management decisions for public land uses and resources, including subsistence resources, mineral exploration and development, and recreation. When complete, the updated Central Yukon RMP will replace the Utility Corridor RMP (1991), the original Central Yukon RMP (1986), and portions of the Southwest Management Framework Plan (1981), as well as provide RMP-level decisions for unplanned lands west of Fairbanks. Although still draft, it provides:

- Consolidated direction under one resource management plan to address land and resource use and development on BLM-managed public lands within the planning area.
- An analysis of the environmental effects that could result from implementing the alternatives proposed in the Central Yukon Draft RMP/EIS. This Central Yukon Draft RMP/EIS evaluates five alternatives for managing the planning area. Alternative A, the no action alternative, represents existing management described by current land use plans and provides the benchmark against which to compare the other alternatives. Alternative B emphasizes reducing the potential for competition between development uses and subsistence resources by identifying key areas for additional management actions. Alternative C1 emphasizes a blend of resource protection and development at the planning level to maintain the long-term sustainability of resources while providing for multiple resource uses. Alternative C2, which is the agency preferred alternative, emphasizes management to facilitate resource development while applying habitat management and administrative designations to accommodate multiple uses. Alternative D focuses on maximizing BLM-managed public lands for development potential with fewer management restrictions at the planning level. Alternatives B, C1, C2, and D were developed using input from the public, tribes, stakeholders, and cooperating agencies. Major planning issues addressed include subsistence resources, water resources, fisheries, and wildlife; forestry; minerals and mining; recreation; travel management and access; and areas of critical environmental concern. Section 810 of ANILCA requires the BLM to evaluate the effects of all alternatives presented in the Draft EIS on subsistence resources and activities, as well as hold public hearings if it finds that any alternative may significantly restrict subsistence uses. The preliminary evaluation of impacts analyzed in the Central Yukon Draft RMP/EIS found that associated impacts may significantly restrict subsistence uses. Therefore, the BLM will hold virtual public hearings on subsistence resources and activities in conjunction with the Central Yukon

Draft RMP/EIS virtual public meetings for potentially affected communities. Before including your address, phone number, email address, or other personally identifying information in your comment, be aware that your entire comment—including your personally identifying information—may be made publicly available at any time. While you can ask the BLM in your comment to withhold your personally identifying information from public review, we cannot guarantee that we will be able to do so.

Notice of Intent To Prepare an Environmental Assessment and Resource Management Plan Amendment, for the Yerington Anaconda Mine Site Disposal, Lyon County, Nevada

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent.

SUMMARY: In compliance with the National Environmental Policy Act of 1969, as amended (NEPA), and the Federal Land Policy and Management Act of 1976, as amended (FLPMA), the United States Department of the Interior, Bureau of Land Management (BLM) Sierra Front Field Office, Carson City, Nevada, intends to prepare an Environmental Assessment (EA) and Land Use Plan Amendment (LUPA) to the current 2001 Carson City Resource Management Plan (CRMP) to analyze the potential impacts of approving the direct sale of surface and mineral estates of 2,062 acres of public lands to Atlantic Richfield Corporation (ARC) in Lyon County, Nevada. This notice announces the beginning of the scoping process to solicit public comments and identify issues to be considered in the EA.

DATES: This notice initiates the public scoping process for the EA. Comments on issues to be considered in the EA may be submitted in writing until January 11, 2021. Comments must be received prior to the close of the scoping period for the BLM to include them in the EA. The BLM will provide additional opportunities for public participation upon publication of the EA.

ADDRESSES: You may submit comments related to the ARC project by any of the following methods:

- *Email: gbuma@blm.gov;* include ''Anaconda Disposal Project EA Comments'' in the subject line.
- *Mail:* BLM, Sierra Front Field Office, attn. Gerrit Buma, 5665 Morgan Mill Road, Carson City, Nevada 89701.

FOR FURTHER INFORMATION CONTACT: For questions about the proposed ARC project, contact Mr. Gerrit Buma, Planning and Environmental Coordinator at: 775–885–6004, 5665 Morgan Mill Road, Carson City, Nevada 89701, or by email to: *gbuma@blm.gov.* Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The BLM intends to prepare an EA and LUPA to the CRMP to analyze the potential impacts of approving the direct sale of 2,062 acres of public lands to ARC in Lyon County, Nevada. The BLM anticipates publishing an EA for the Yerington Anaconda Mine Site Disposal in early 2021. This document would be available for a 30-day public comment period.

The EA will evaluate a request from ARC for a direct sale of public lands associated with the Anaconda Mine site near the town of Yerington in Lyon County, Nevada, as provided for in Section 203(f) of FLPMA. ARC's purpose for this request is to consolidate land ownership, both the surface and mineral estate, to facilitate better management of the Anaconda Mine site remediation. The BLM must amend the 2001 CRMP to ensure all lands within the designated 2,062 acres are suitable for disposal to the private sector. By this notice, the BLM is complying with the requirements in 43 CFR 1610.2(c) to notify the public of potential amendments to the 2001 CRMP. The BLM will integrate the land use planning process with the NEPA analysis process for this project. A Notice of Realty Action will be prepared for publication upon the publication of this notice. The project website can be found at *https://go.usa.gov/xdVfj.*

The lands to be identified as suitable for disposal under this Notice are legally described as follows:

Mount Diablo Meridian, Nevada

T. 13 N., R. 25 E.,
Sec. 4, SW1/4SW1/4 and SE1/4SE1/4;
Sec. 5, lots 1 thru 3, lots 5 thru 7, and SW1/4NE1/4;

[20X LLUTC02000 L14400000.FR0000 241A; UTU–90172]

Notice of Realty Action: Recreation and Public Purposes Act Classification and Conveyance of Public Land in Sevier County, Utah

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action.

SUMMARY: The Notice of Realty Action (NORA) announces the Bureau of Land Management (BLM) proposes to patent 154.694 acres of public land in Sevier County, Utah, to Sevier County for the expansion of the Sevier County landfill.

DATES: Interested parties may submit comments regarding this classification and conveyance of public land on or before January 25, 2021.

ADDRESSES: Comments may be submitted by mail to the Richfield Field Office, 150 East 900 North, Richfield, Utah, 84701 or by email to *BLM_UT_RF_Comments@blm.gov,* with a subject line of ''Sevier County NORA comment.'' See ''Classification Comments'' and ''Application Comments'' portions of this notice for specifics regarding subjects open to comments. Project information is available for review at *https://go.usa.gov/xvjmr* or by contacting the Richfield Field Office at the above address or at (435) 896–1500.

FOR FURTHER INFORMATION CONTACT: Michael Utley, Realty Specialist, at *mutley@blm.gov* or (435) 896–1515. Persons who use a telecommunications device for the deaf may call the Federal Relay Service (FRS) at 1–800–877–8339 to leave a message or question for the above individual. The FRS is available 24 hours a day, 7 days a week. Replies are provided during normal business hours.

SUPPLEMENTARY INFORMATION: In accordance with Section 7 of the Taylor Grazing Act and Executive Order No. 6910, as amended, the BLM examined certain public lands in Sevier County, Utah, and found them suitable for classification for conveyance to Sevier County under the provisions of the Recreation and Public Purposes (R&PP) Act, as amended., 43 U.S.C. 869 *et seq.;* Sec. 7 of the Taylor Grazing Act, 43 U.S.C. 315(f).

Sevier County submitted a statement in compliance with the regulations at 43 CFR 2741.4(b), and proposes to use the lands for expansion of the existing Sevier County landfill. The lands consist of 154.694 acres, must conform to the official plat of survey, and are legally described below. Sevier County has not applied for more than the 6,400-acre limitation for recreation uses in a year (or 640 acres if a nonprofit corporation or association), nor more than 640 acres for each of the programs involving public resources other than recreation. The lands examined and identified as suitable for lease or conveyance under the R&PP Act are legally described as:

Salt Lake Meridian, Utah

T. 22 S., R. 1 W.,
Sec. 34, SW¼NW¼SE¼ and W½SW¼SE¼.
T. 23 S., R. 1 W.,
Sec. 4, S½SW¼SE¼;
Sec. 9, lots 16 and 19, NW¼NE¼, N½SW¼NE¼, and SW¼SW¼NE¼.

The areas described aggregate 154.694 acres.

The lands are not needed for any Federal purposes.

Lease or conveyance of the lands for recreational or public purposes use is in conformance with the BLM Richfield Field Office Resource Management Plan, approved in October 2008, and would be in the public's interest. The BLM analyzed the parcel in a site-specific environmental assessment (EA) numbered DOI–BLM–UT–C020–2018–0039–EA. The EA has been published on the project's ePlanning site at *https://go.usa.gov/xvjmr.*

The conveyance of these parcels will not result in the loss of recreational access to adjacent lands in accordance with Secretary's Order 3373, Evaluating Public Access in Bureau of Land Management Public Land Disposals and Exchanges. There are no anticipated impacts to recreational access to adjacent lands from the conveyance because the existing roads will either be retained in place or rerouted by Sevier County. Because of this, access will continue to be provided to the public lands both north and south of the two conveyance parcels.

All interested parties will receive a copy of this notice once it is published in the **Federal Register**. A copy of the **Federal Register** notice with information about this proposed realty action will publish in a newspaper of local circulation once a week for three consecutive weeks. The regulations at 43 CFR subpart 2741 addressing requirements and procedures for conveyances under the R&PP Act do not require a public meeting. Upon publication of this notice in the **Federal Register**, the lands will be segregated from all other forms of appropriation under the public land laws, including locations under the mining laws, except for lease or conveyance under the R&PP Act and leasing under the mineral leasing laws.

The lease or conveyance of the land, when issued, will be subject to the following terms, conditions, and reservations:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States Act of August 30, 1890 (26 Stat. 391; 43 U.S.C. 945).

2. Provisions of the R&PP Act and to all applicable regulations of the Secretary of the Interior.

3. All mineral deposits in the land so patented, and the right to prospect for, mine, and remove such deposits from the same under applicable law and regulations as established by the Secretary of the Interior are reserved to the United States, together with all necessary access and exit rights.

4. Lease or conveyance of the parcel is subject to valid existing rights of record.

5. An appropriate indemnification clause protecting the United States from claims arising out of the lessee's/patentee's use, occupancy, or occupations on the leased/patented lands.

6. A limited reversionary provision stating the title shall revert to the United States upon a finding, after notice and opportunity for a hearing, that the patentee has not substantially developed the lands in accordance with the approved plan of development on or before the date five years after the date of conveyance. No portion of the land shall under any circumstance revert to the United States if any such portion has been used for solid waste disposal, or for any other purpose, which may result in the disposal, placement, or release of any hazardous substance.

7. The lessee/patentee shall comply with all Federal and State laws applicable to the disposal, placement, or release of hazardous substances.

8. Any other reservations the authorized officer determines appropriate to ensure public access and proper management of Federal lands and interests therein.

Classification Comments: Interested persons may submit comments involving the classification and suitability of the land for expansion and development of the existing landfill. Additionally, interested persons may submit comments regarding the specific use proposed in the application and plan of development and management, and whether the BLM followed proper administrative procedures in considering the decision to lease and convey under the R&PP Act.

Application Comments: Interested persons may submit comments regarding the specific use proposed in the application and plan of development and management, and whether the BLM followed proper administrative procedures in considering the decision to lease and convey under the R&PP Act.

Any adverse comments will be reviewed by the BLM Utah State Director or other authorized official of

the Department of the Interior, who may sustain, vacate, or modify this realty action. In the absence of any adverse comments, the classification will become effective on February 9, 2021. The lands will not be offered for lease or conveyance until after the classification becomes effective.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee we will be able to do so.

Authority: 43 CFR 2741.5.

Gregory Sheehan,

State Director.

BILLING CODE 4310–DQ–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[L1220000.EA0000 LLAZC03000 21X]

Notice of Temporary Closure and Temporary Restrictions of Selected Public Lands in La Paz County, AZ

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of temporary closure and restrictions.

SUMMARY: As authorized under the provisions of the Federal Land Policy and Management Act of 1976, as amended, notice is hereby given that temporary closures and temporary restrictions of activities will be in effect on public lands administered by the Lake Havasu Field Office, Bureau of Land Management (BLM), to minimize the risk of potential collisions with spectators and racers during the annual Best In The Desert (BITD) off-highway vehicle (OHV) race events, Parker 250 and Parker 425, authorized under a Special Recreation Permit (SRP).

DATES: This notice is effective upon publication. The temporary restrictions for the Parker 425 take effect at noon, January 13, 2021, through 11:59 p.m., January 16, 2021. The temporary closure for the Parker 425 takes effect at 7 a.m., January 15, 2021, through 11:59 p.m., January 16, 2021.

The temporary restrictions for the Parker 250 take effect at noon, February 17, 2021, through 11:59 p.m., February 20, 2021. The temporary closure for the Parker 250 takes effect at 8 a.m., February 19, 2021, through 11:59 p.m., February 20, 2021. All times are listed in local time.

FOR FURTHER INFORMATION CONTACT: Jason West, Field Manager, BLM Lake Havasu Field Office, 1785 Kiowa Avenue, Lake Havasu City, Arizona 86403, 928–505–1200. Also see the Lake Havasu Field Office website: *https://www.blm.gov/office/lake-havasu-field-office.* Persons who use a telecommunications device for hearing impaired (TDD) may call the Federal Relay Service (FRS) at 800–877–8339 to contact the above individual during normal business hours. FRS is available 24 hours a day, 7 days a week, to leave a message or question. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: On January 6, 2015, the Decision Record authorizing the BITD Parker Races SRP was signed. This permit authorizes the BITD to utilize the Parker 400 course for the Parker 425 race event on January 13 through 16, 2021, and for the Parker 250 race event on February 18 through 20, 2021. The permit is authorized from 2015 through 2024. The Environmental Assessment analyzing these routes (EA #DOI–BLM–AZ–C030–2014–0040) concluded that allowing permitted motorized racers exclusive use of the *Lake Havasu Field Office Record of Decision/Approved Resource Management Plan* (2007) designated Parker 400 course would mitigate safety concerns. These routes receive the most intense and concentrated high-speed use during the two annual permitted events.

These temporary closures and restrictions affect public lands in and around the Parker 400 course near the communities of Parker and Bouse in La Paz County, Arizona. The temporary restriction areas are shown on the maps entitled ''Parker 425 Map'' and ''Parker 250 Map'' found at *http://go.usa.gov/xfF8u.*

The temporary closures and restrictions are necessary because of the high-speed nature of the race event and the added safety concerns due to limited visibility when there is no daylight. Roads leading into the public lands under the temporary closure and restrictions will be posted with copies of the temporary closure, temporary restrictions, and associated maps to notify the public. The temporary closure and restriction orders will be posted in the Lake Havasu Field Office and online at *https://www.blm.gov/office/lake-havasu-field-office.* Maps of the affected area and other documents associated with this temporary closure are available at the Lake Havasu Field Office, 1785 Kiowa Avenue, Lake Havasu City, Arizona.

The closures and restrictions are issued under the authority of 43 CFR 8364.1, which allows the BLM to establish closures for the protection of persons, property, and public lands and resources. The closure and restrictions listed below are exactly the same as those published last year found at 84 FR 71458. Violation of any of the terms, conditions, or restrictions contained within this closure order may subject the violator to citation or arrest with a penalty or fine or imprisonment or both as specified by law.

Temporary Closure and Restrictions and Existing Regulations

1. Environmental Resource Management and Protection

a. No person may deface, disturb, remove, or destroy any natural object.

b. Fireworks: The use, sale, or possession of personal fireworks is prohibited.

c. Cutting or collecting firewood of any kind, including dead and downed wood or other vegetative material is prohibited.

d. Grey Water Discharge: The discharge and dumping of grey water onto the ground surface is prohibited. Grey water is defined as water that has been used for cooking, washing, dishwashing, or bathing and/or contains soap, detergent, food scraps, or food residue, regardless of whether such products are biodegradable or have been filtered or disinfected.

e. Black Water Discharge: The discharge and dumping of black water onto the ground surface is prohibited. Black water is defined as wastewater containing feces, urine, and/or flush water.

f. Human Waste: The depositing of human waste (liquid and/or solid) on the ground surface is prohibited.

g. Trash: The discharge of any and all trash/litter onto the ground surface is prohibited. All event participants must pack out or properly dispose of all trash at an appropriate disposal facility.

h. Hazardous Materials: The dumping or discharge of vehicle oil, petroleum products, or other hazardous household, commercial, or industrial refuse or waste onto the ground surface is prohibited. This applies to all recreational vehicles, trailers, motorhomes, port-a-potties, generators, and other camp infrastructure.

2. Alcohol/Prohibited Substance

a. Possession of an open container of an alcoholic beverage by the driver or

operator of any motorized vehicle, whether or not the vehicle is in motion, is prohibited.

b. Possession of alcohol by minors. The following are prohibited:

i. Consumption or possession of any alcoholic beverage by a person under 21 years of age on public lands.

ii. Selling, offering to sell, or otherwise furnishing or supplying any alcoholic beverage to a person under 21 years of age on public lands.

c. Operation of a motor vehicle while under the influence of alcohol, marijuana, narcotics, or dangerous drugs is prohibited.

3. Drug Paraphernalia

a. The possession of drug paraphernalia is prohibited.

4. Disorderly Conduct

a. Disorderly conduct is prohibited. Disorderly conduct means that an individual, with the intent of recklessly causing public alarm, nuisance, jeopardy, or violence, or recklessly creating a risk thereof:

i. Engages in fighting or violent behavior;

ii. Uses language, an utterance or gesture, or engages in a display or act that is physically threatening or menacing, or is done in a manner that is likely to inflict injury or incite an immediate breach of the peace.

iii. Obstructs, resists, or attempts to elude a law enforcement officer, or fails to follow their orders or directions.

5. Eviction of Persons

a. The temporary closure and restriction area is closed to any person who:

i. Has been evicted from the event by the permit holder, whether or not the eviction was requested by the BLM;

ii. Has been evicted from the event by the BLM; or

iii. Has been ordered by a law enforcement officer to leave the area of the permitted event.

b. Any person evicted from the event forfeits all privileges to be present within the temporary closure and restriction area.

6. Motor Vehicles

a. Motor vehicles must comply with the following requirements:

i. The operator of a motor vehicle must possess a valid driver's license.

ii. Motor vehicles and trailers must possess evidence of valid registration.

iii. Motor vehicle operators must possess evidence of valid insurance.

iv. Motor vehicles and trailers must not block a street used for vehicular travel or a pedestrian pathway. Parking any off-highway vehicle in violation of posted restrictions; or in such a manner as to obstruct or impede normal or emergency traffic movement or the parking of other vehicles; creating a safety hazard; or endangering any person, property, or feature is prohibited. Vehicles parked in violation are subject to citation, removal, and/or impoundment at the owner's expense.

v. Motor vehicles must not exceed the posted speed limit.

vi. Operating a vehicle through, around, or beyond a restrictive sign, barricade, fence, or traffic control barrier or device is prohibited.

vii. Failure to obey any person authorized to direct traffic or control access to event area including law enforcement officers, BLM officials, and designated race officials is prohibited.

b. The temporary closure area is closed to motor vehicle use, except as provided below. Motor vehicles may be operated within the temporary closure area under the circumstances listed below:

i. Race participants and support vehicles on designated routes;

ii. BLM, medical, law enforcement, and firefighting vehicles are authorized at all times;

iii. Vehicles operated by the permit holder's staff or contractors and volunteers are authorized at all times. These vehicles must display evidence of event registration at all times in such manner that it is visible to the front of the vehicle while the vehicle is in motion.

7. Public Camping

a. The temporary closure and restriction area is closed to public camping with the following exceptions:

i. The permitted event's spectators, who are camped in designated spectator areas, as marked by protective fencing, barriers, and informational signage provided by the permit holder;

ii. The permit holder's authorized staff, contractors, and BLM-authorized event managers.

b. Spectator area site reservations, denying other visitors or parties from utilizing unoccupied portions of the spectator area by marking with flags, tape, posts, cones, etc., is prohibited. Vehicles and trailers may not be left unattended for over 72 hours.

c. Allowing any pet or other animal to be unrestrained is prohibited. All pets must be restrained by a leash of not more than six feet in length.

d. Failure to observe restricted area quiet hours of midnight to 6 a.m. is prohibited.

8. Weapons

a. Discharging or use of firearms or other weapons is prohibited.

b. The prohibition above shall not apply to county, state, tribal and Federal law enforcement personnel who are working in their official capacity at the event.

9. Race Course Closure

a. The designated race course as shown in the Lake Havasu Field Office approved RMP and Decision Record is closed to public entry during the temporary closure.

b. The temporary closure area is closed to use by members of the public with the following exceptions:

i. The person is an employee or authorized volunteer with the BLM, a law enforcement officer, emergency medical service provider, fire protection provider, or another public agency employee working at and assigned to the event;

ii. The person is working at or attending the event directly on behalf of the permit holder.

c. Failure to obey any official sign posted by the BLM, law enforcement, La Paz County, or the permit holder is prohibited.

Enforcement: Any person who violates these closures or restrictions may be tried before a United States magistrate and fined in accordance with 18 U.S.C. 3571, imprisoned no more than 12 months under 43 U.S.C. 1733(a) and 43 CFR 8360.0–7, or both. In accordance with 43 CFR 8365.1–7, state or local officials may also impose penalties for violations of Arizona law. A complete list of laws and regulations applicable to public lands in Arizona may be viewed at: *http://www.azd.uscourts.gov/sites/default/files/general-orders/19-14.pdf.*

(Authority: 43 CFR 8364.1)

Jason West,

Field Manager.

BILLING CODE 4310–32–P

DEPARTMENT OF THE INTERIOR

Office of Natural Resources Revenue

[Docket No. ONRR–2011–0002; DS63644000 DRT000000.CH7000 201D1113RT]

States' Decisions on Participating in Accounting and Auditing Relief for Federal Oil and Gas Marginal Properties

AGENCY: Office of the Secretary, Office of Natural Resources Revenue, Interior.

ACTION: Notice.

SUMMARY: Office of Natural Resources Revenue (ONRR) regulations provide two types of accounting and auditing relief for Federal onshore or Outer Continental Shelf lease production from marginal properties. Each year, ONRR provides a list of qualifying marginal Federal oil and gas properties to States that receive a portion of Federal royalties from those properties. Each State then decides whether to participate in relief, and if so, whether to allow one or both relief options. For calendar year 2020, ONRR provides this notice of the affected States' decision regarding whether relief should be allowed and, if so, which type of relief will be allowed.

DATES: Effective January 1, 2021.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Sudar, Market and Spatial Analytics, Coordination, Enforcement, Valuations, and Appeals Division, ONRR, at (303) 231–3511; or email to *Robert.Sudar@onrr.gov.*

SUPPLEMENTARY INFORMATION: The regulations, codified under 30 CFR part 1204, subpart C, implement certain provisions of section 7 of the Federal Oil and Gas Royalty Simplification and Fairness Act of 1996 (30 U.S.C. 1726), which allows States to relieve the lessees of marginal properties from certain reporting, accounting, and auditing requirements. Each State makes an annual determination as to whether to allow relief, and if so, what types. Two relief options are authorized: (1) Notification-based royalty report and payment relief which, if selected, allows lessees or designees to forgo filing monthly reports and making monthly royalty payments and, instead, to file one annual royalty report and make one annual royalty payment, and (2) other requested appropriate accounting and auditing relief, as proposed by lessees or designees and approved by ONRR, after consultation with the affected State(s). The regulations require ONRR to publish, no later than 30 days before the beginning of the calendar year, a list of the States and their decisions regarding marginal property relief.

To qualify for the first relief option (notification-based relief) for calendar year 2021, properties must produce less than 1,000 barrels-of-oil-equivalent (BOE) per year for the base period (July 1, 2019 through June 30, 2020). Annual reporting relief will begin January 1, 2021, with the annual report and royalty payment due February 28, 2022, or March 31, 2022, if you have an estimated payment on file. To qualify for the second relief option (other requested relief), the combined equivalent production of the marginal properties during the base period must equal an average daily well production of less than 15 BOE per well per day, as calculated under 30 CFR 1204.4(c).

The following table lists the States with qualifying marginal properties and each State's decision as to the relief options it will allow in calendar year 2021. An ''N/A'' means that the State did not provide ONRR its decision and, accordingly, no relief will be allowed to lessees in that State.

State	Notification-based relief (less than 1,000 BOE per year)	Request-based relief (less than 15 BOE per well per day)
Alabama	No	No.
Arkansas	N/A	Yes.
California	No	No.
Colorado	No	No.
Kansas	No	No.
Louisiana	Yes	Yes.
Michigan	Yes	Yes.
Mississippi	No	No.
Montana	No	No.
Nebraska	N/A	No.
Nevada	N/A	Yes.
New Mexico	No	Yes.
North Dakota	N/A	Yes.
Oklahoma	No	No.
South Dakota	Yes	Yes.
Utah	No	No.
Wyoming	Yes	No

A Federal oil and gas property located in a State where ONRR does not share a portion of Federal royalties with the State is eligible for relief if the property qualifies as marginal under 30 U.S.C. 1726(c). For information on how to obtain relief, please refer to 30 CFR 1204.205, viewable at *https://www.ecfr.gov/.*

Unless the information ONRR receives is proprietary data, all correspondence, records, or information that ONRR receives in response to this notice may be subject to disclosure under the Freedom of Information Act (FOIA) (5 U.S.C. 552 *et seq.*). If applicable, please highlight any proprietary portions, including any supporting documentation, or mark the page(s) containing proprietary data. We protect proprietary information under the Trade Secrets Act (18 U.S.C. 1905), FOIA Exemption 4 (5 U.S.C. 552(b)(4)), and the Department of the Interior's FOIA regulations (43 CFR part 2).

Authority: Federal Oil and Gas Royalty Management Act of 1982, 30 U.S.C. 1701 *et seq.,* as amended by Federal Oil and Gas Royalty Simplification and Fairness Act of 1996 (RSFA, Pub. L. 104–185—Aug. 13, 1996, as corrected by Pub. L. 104–200—Sept. 22, 1996).

Kimbra G. Davis,

Director for the Office of Natural Resources Revenue.

[States' Decisions on Participating in Accounting and Auditing Relief for Federal Oil and Gas Marginal Properties]

[FR Doc. 2020–27267 Filed 12–10–20; 8:45 am]

BILLING CODE 4335–30–P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[RR83550000, 212R5065C6, RX.59389832.1009676]

Change in Discount Rate for Water Resources Planning

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of change in discount rate.

SUMMARY: The Bureau of Reclamation is announcing the interest rate to be used by Federal agencies in the formulation and evaluation of plans for water and related land resources is 2.50 percent for fiscal year 2021. The prior year's rate, as announced in the **Federal Register** on December 17, 2019, was 2.75 percent for fiscal year 2020.

DATES: This discount rate is to be used for the period October 1, 2020, through and including September 30, 2021.

FOR FURTHER INFORMATION CONTACT: Mr. Fernando Castro-Alvarez, Bureau of Reclamation, Reclamation Law Administration Division, P.O. Box 25007, Denver, Colorado 80225; telephone 303–445–2821.

SUPPLEMENTARY INFORMATION: The Water Resources Planning Act of 1965 and the Water Resources Development Act of 1974 require an annual determination of a discount rate for Federal water resources planning. The discount rate for Federal water resources planning for fiscal year 2021 is 2.50 percent. Discounting is to be used to convert future monetary values to present values.

This rate has been computed in accordance with Section 80(a), Public Law 93–251 (88 Stat. 34), and 18 CFR 704.39, which: (1) Specify that the rate will be based upon the average yield during The preceding fiscal year on interest-bearing marketable securities of the United States which, at the time the computation is made, have terms of 15 years or more remaining to maturity (average yield is rounded to nearest one-eighth percent); and (2) provide that the rate will not be raised or lowered more than one-quarter of 1 percent for any year. The U.S. Department of the Treasury calculated the specified average to be 1.5730 percent. In accordance with the Water Resource Council Rules and Regulations, the maximum adjustment allowed for the current fiscal year rate is one-quarter of one percentage point from the previous fiscal year rate, which was 2.75 percent. Therefore, the fiscal year 2021 rate is 2.50 percent.

The rate of 2.50 percent will be used by all Federal agencies in the formulation and evaluation of water and related land resources plans for the purpose of discounting future benefits and computing costs or otherwise converting benefits and costs to a common-time basis.

Signed:

Christopher J. Beardsley,

Director, Policy and Programs.

BILLING CODE 4332–90–P

DEPARTMENT OF THE INTERIOR

Bureau of Safety and Environmental Enforcement

[EEEE500000 21XE1700DX EX1SF0000.EAQ000]

Leaders in Advancing Safety and Environmental Stewardship

AGENCY: Bureau of Safety and Environmental Enforcement, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Safety and Environmental Enforcement (BSEE) developed objective, qualitative and quantifiable criteria to create a ''Leaders in Advancing Safety and Environmental Stewardship'' Recognition Program to recognize operators who demonstrate exemplary operating performance or sustained safety and environmental stewardship improvements on their Outer Continental Shelf (OCS) oil and gas facilities, including support vessels, and leadership within the industry regarding operational safety and environmental performance. BSEE's process for identifying ''Leaders in Advancing Safety and Environmental Stewardship'' is consistent with BSEE's inspection programs, regulations, and Notice to Operators and Lessees (NTL) No. 2008–N02, *Outer Continental Shelf (OCS) Inspection Program.* The ''Leaders in Advancing Safety and Environmental Stewardship'' Recognition Program will recognize OCS operators demonstrating high levels of operational safety, sustained safety improvement, or industry leadership on operational safety issues. The primary objective of the Recognition Program is to drive OCS operators to significantly improve safety and environmental prioritization, culture, and performance on OCS facilities and to encourage them to become leaders in industry regarding operational safety and environmental issues. Another objective is to create a platform through which BSEE can educate the public regarding the fact that OCS operators can conduct complex and high-risk operations on OCS oil and gas facilities in a way that is safe for personnel, the public, and the environment.

DATES: This notice will become effective on December 11, 2020.

FOR FURTHER INFORMATION CONTACT: Jason Mathews, Bureau of Safety and Environmental Enforcement, Chief, Safety Improvement Branch, (504) 731–1496, or by email: *jason.mathews@bsee.gov.*

SUPPLEMENTARY INFORMATION:

Each year, BSEE Gulf of Mexico and Pacific Regions conduct Annual Performance Reviews (APRs) of OCS operators. The APRs consist of a review of the following:

- The operator's compliance history, as reflected in findings from the BSEE Inspection Program;
- The operator's safety record as it relates to incidents;
- Any action that BSEE has forwarded to the BSEE Safety Enforcement Division (SED) for review for potential assessment of a civil penalty; and,
- The results of the most recent internal and regulatory audits of the operator's Safety and Environmental Management System (SEMS) program.

BSEE will use the information gathered during the APRs to provide factual bases for determining eligibility for operator recognition.

For an OCS operator to qualify for consideration as a Leader in Advancing Safety and Environmental Stewardship, the operator must have either:

1. An Injury/Illness Combined Rate (total recordables) less than the OCS average for the prior reporting year, or

2. Demonstrate two or more consecutive years of improvement of its Injury/Illness Combined Rate.

In addition, the OCS operator's operations for the reporting must not have included any of the following:

- Fatality;
- Incident with ≥ 3 injuries;
- Major pollution incidents;
- Major Fire/Explosion;
- ≥ 3 Incidents of Noncompliance (INCs) forwarded for civil penalty cases or $1 million in cumulative proposed fines;
- Loss of Well Control; (not to include shallow water flow)
- ≥ 3 Facilities on Increased Oversight List;
- Order to perform an additional Directed SEMS Audit; or,
- A sustained environmental compliance record <90 percent with assigned environmental mitigation measures and similar regulatory requirements; or,
- Placement on a Performance Improvement Plan.

If an OCS operator is disqualified by any of the factors above, BSEE may reconsider the operator for potential recognition if the issue(s) is satisfied prior to March 31st of the following year.

For OCS operators that meet the requirements above, BSEE will also look at how those operators are providing leadership within the industry regarding operational safety. BSEE will consider whether the OCS operator is offering

industry advice and details on steps it has taken that have resulted in significant improvement to its safety performance, and leadership positions it has taken within industry organizations, such as the American Petroleum Institute (API), the Offshore Operators Committee (OOC), or The Center for Offshore Safety (COS), with a focus on advancing safety. Similarly, BSEE will also assess how operators are providing guidance and supporting environmental research, mitigation assessments, and project validation of pollution prevention, spill preparedness/response, and environmental compliance efforts, which not only benefit their operations and stewardship culture, but every partner in the OCS energy program.

Environmental stewardship components that BSEE will consider include:

- A sustained compliance record (≤ 90-percent) with assigned environmental mitigation measures and similar regulatory requirements, as confirmed by office and field verification;
- Participation and leadership with critical Joint Industry Project (JIP) efforts and within environmental and/or pollution prevention-focused workgroups and teams;
- Response preparedness and planning assessments;
- Non-compulsory enhancements and innovation above and beyond standard pollution prevention requirements; and
- Repeated (100-percent) appropriate and constructive response on corrective/remedial actions associated with all noncompliance issues.

For information on the ''Leaders in Advancing Safety and Environmental Stewardship'' Recognition Program or the submission of comments, the public should contact Mr. Jason Mathews, Chief, Safety Improvement Branch, Regional Field Operations (GE 1073E), BSEE, Gulf of Mexico OCS Region, 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123–2394, (504) 731–1496.

BSEE will implement this program in 2021, with qualifying OCS operators recognized in 2022 for their 2020 and 2021 calendar year performance. BSEE will initiate performance reviews beginning in January 2021 and January 2022, and all OCS operators who meet the minimum requirements and are selected by BSEE for recognition, will be identified by April-May 2022.

Casey Hammond,

Principal Deputy Assistant Secretary, Land and Minerals Management.

[FR Doc. 2020–27237 Filed 12–10–20; 8:45 am]

BILLING CODE 4310–VH–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1088 (Rescission)]

Certain Road Construction Machines and Components Thereof; Commission Decision to Institute a Rescission Proceeding; Permanent Rescission of a Seizure and Forfeiture Order; Termination of the Rescission Proceeding

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined to institute a proceeding to determine whether to permanently rescind the Commission's seizure and forfeiture order (''SFO'') of January 14, 2020 (corrected January 23, 2020) issued against Wirtgen America, Inc. (''Wirtgen America''). The SFO is permanently rescinded. The rescission proceeding is terminated.

FOR FURTHER INFORMATION CONTACT: Houda Morad, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 708–4716. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on November 29, 2017, based on a complaint, as supplemented, filed by Caterpillar Inc. of Peoria, Illinois and Caterpillar Paving Products, Inc. of Minneapolis, Minnesota (collectively, ''Caterpillar''). *See* 82FR 56625–26 (Nov. 29, 2017). The complaint, as supplemented, alleges violations of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337) (''section 337''), based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain road construction machines and components thereof by reason of infringement of certain claims of U.S. Patent Nos. 7,140,693 (''the '693 patent''); 9,045,871; and 7,641,419. *See id.* The notice of investigation identifies the following respondents: Wirtgen GmbH of Windhagen, Germany; Joseph Vögele AG of Ludwigshafen, Germany; Wirtgen Group Holding GmbH of Windhagen, Germany; and Wirtgen America of Antioch, Tennessee (collectively, ''Wirtgen''). *See id.* The Office of Unfair Import Investigations is not a party to this investigation. *See id.*

On June 27, 2019, the Commission found a violation of section 337 in the above-identified investigation based on the infringement of claim 19 of the '693 patent and issued a limited exclusion order against the infringing articles and a cease and desist order (collectively, ''the remedial orders'') against Wirtgen America. The United States Customs and Border Protection (''Customs'') subsequently excluded six Wirtgen redesigned series 1810 machines in December 2019. Based on such exclusion, the Commission issued the subject SFO on January 14, 2020 (corrected January 23, 2020). On March 13, 2020, Wirtgen filed an appeal from the SFO (''the SFO appeal'') to the U.S. Court of Appeals for the Federal Circuit (''Federal Circuit'').

On January 30, 2020, Wirtgen filed a civil action against Customs and related U.S. government parties (collectively, ''the U.S. government'') in the U.S. Court of International Trade (''CIT'') under 28 U.S.C. 1581(a) and (i). The Commission moved to intervene to contest the CIT's exercise of jurisdiction, and the CIT denied the Commission's motion. The CIT exercised jurisdiction under section 1581(a) over the U.S. government's objections and granted summary judgment for Wirtgen as to the excluded entries of the redesigned machines at issue. The CIT also ordered Customs to release the machines for entry into the United States no later than Thursday, May 21, 2020. On July 14, 2020, the U.S. government appealed the CIT's decision to the Federal Circuit (''the CIT appeal'').

On May 21, 2020, arguing that the predicate for the SFO had been invalidated by the CIT, Wirtgen filed an emergency motion to stay or temporarily rescind the SFO pending resolution of any CIT appeal. On June 10, 2020, the Commission determined to deny Wirtgen's motion to stay, but granted Wirtgen's motion for temporary rescission of the SFO, thus temporarily suspending the SFO until such time as the CIT's decision is modified, stayed, or overturned. On June 15, 2020, the

Commission filed a motion to stay the SFO appeal pending reinstatement of the SFO by the Commission or resolution of any CIT appeal by the Federal Circuit. On July 29, 2020, the Federal Circuit granted the Commission's motion to stay the SFO appeal until the suspension of the SFO is lifted or until final disposition of the CIT appeal.

Concurrently, on January 16, 2020, the Commission instituted a modification proceeding to determine whether Wirtgen's redesigned series 1810 machines infringe claim 19 of the '693 patent. On August 31, 2020, the Commission determined that Wirtgen's redesigned machines do not infringe and issued modified remedial orders exempting the redesigned machines from the scope of the orders. Caterpillar did not appeal the Commission's non-infringement determination to the Federal Circuit, and therefore, the Commission's non-infringement determination is now final. Consequently, on November 5, 2020, the U.S. government moved to dismiss the CIT appeal. On December 4, 2020, the Federal Circuit dismissed the CIT appeal.

In view of the Federal Circuit's dismissal of the CIT appeal, the Commission has determined to institute a rescission proceeding and to permanently rescind the SFO. The rescission proceeding is hereby terminated.

The Commission's vote for this determination took place on December 7, 2020.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: December 7, 2020.

Lisa Barton,

Secretary to the Commission.

Drug Enforcement Administration

King Wong, M.D.; Decision and Order

On November 12, 2019, the Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, Government), issued an Order to Show Cause (hereinafter, OSC) to King Wong, M.D. (hereinafter, Registrant). OSC, at 1. The OSC proposed the revocation of Registrant's Certificate of Registration No. AL1804409. *Id.* It alleged that Registrant is without ''authority to handle controlled substances in California, the state in which [Registrant is] registered with the DEA.'' *Id.* (citing 21 U.S.C. 823(f) and 824(a)(3)).

Specifically, the OSC alleged that Registrant surrendered his medical license pursuant to an agreement with the Medical Board of California on March 18, 2019, and that his license remains surrendered. *Id.* at 1–2. The OSC further alleged that because Registrant surrendered his medical license, Registrant lacks the authority to handle controlled substances in the State of California. *Id.* at 2.

The OSC notified Registrant of the right to either request a hearing on the allegations or submit a written statement in lieu of exercising the right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* (citing 21 CFR 1301.43). The OSC also notified Registrant of the opportunity to submit a corrective action plan. *Id.* at 3 (citing 21 U.S.C. 824(c)(2)(C)).

A DEA Diversion Investigator personally served Registrant with the OSC on December 13, 2019, and Registrant signed a DEA Form 12, Receipt for Cash or Other Items, to acknowledge his receipt of the OSC. Request for Final Agency Action Exhibit (hereinafter, RFAAX) 8, at 2–3 (Declaration of Diversion Investigator); RFAAX 5 (DEA Form 12 signed by Registrant). I find that more than thirty days have now passed since the Government accomplished service of the OSC. Further, based on the Government's written representations, I find that neither Registrant, nor anyone purporting to represent Registrant, requested a hearing, submitted a written statement while waiving Registrant's right to a hearing, or submitted a corrective action plan. RFAAX 8, at 3; RFAAX 6 (Emails regarding no communication from Registrant). Accordingly, I find that Registrant has waived the right to a hearing and the right to submit a written statement and

corrective action plan. 21 CFR 1301.43(d) and 21 U.S.C. 824(c)(2)(C). I, therefore, issue this Decision and Order based on the record submitted by the Government, which constitutes the entire record before me. 21 CFR 1301.46.

Findings of Fact

REGISTRANT'S DEA REGISTRATION

Registrant is the holder of DEA Certificate of Registration No. AL1804409 at the registered address of 2392 N. Euclid Ave, Upland, CA 91784. RFAAX 1 (Registrant's DEA Certificate of Registration). Pursuant to this registration, Registrant is authorized to dispense controlled substances in schedules II through V as a practitioner. *Id.* Registrant's registration will expire on its own terms on March 31, 2022. *Id.*

THE STATUS OF REGISTRANT'S STATE LICENSE

On March 5, 2019, Registrant and the Medical Board of California entered into a Stipulated Surrender of License and Order, whereby Registrant surrendered his California medical license. RFAAX 3. The Medical Board of California's online records, of which I take official notice, document that Registrant's license is still surrendered. [1] Medical Board of California License Verification, *https://www.mbc.ca.gov/Breeze/License_Verification.aspx* (last visited date of signature of this Order).

Accordingly, I find that Registrant currently is not licensed to engage in the practice of medicine in California, the state in which Registrant is registered with the DEA.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the CSA ''upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.'' With respect to a practitioner, the DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner's registration. *See, e.g., James L. Hooper, M.D.,* 76 FR 71,371 (2011), *pet. for rev. denied,* 481 Fed. Appx. 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.,* 43 FR 27,616, 27,617 (1978).

This rule derives from the text of two provisions of the CSA. First, Congress defined the term ''practitioner'' to mean ''a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.'' 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner's registration, Congress directed that ''[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.'' 21 U.S.C. 823(f). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, the DEA has held repeatedly that revocation of a practitioner's registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper,* 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.,* 71 FR 39,130, 39,131 (2006); *Dominick A. Ricci, M.D.,* 58 FR 51,104, 51,105 (1993); *Bobby Watts, M.D.,* 53 FR 11,919, 11,920 (1988); *Frederick Marsh Blanton,* 43 FR at 27,617.

According to California statute, ''[n]o person other than a physician . . . shall write or issue a prescription.'' Cal. Health & Safety Code § 11150 (West 2020). Further, ''physician,'' as defined by California statute, is a person who is ''licensed to practice'' in California. *Id.* at § 11024.

Here, the undisputed evidence in the record is that Registrant currently lacks authority to practice medicine in California. As already discussed, a physician must be a licensed practitioner to dispense a controlled substance in California. Thus, because Registrant lacks authority to practice medicine in California and, therefore, is not authorized to handle controlled substances in California, Registrant is not eligible to maintain a DEA registration. Accordingly, I will order that Registrant's DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. AL1804409 issued to King Wong, M.D. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(f), I hereby deny any pending application of King Wong, M.D. to renew or modify this registration. This Order is effective January 11, 2021.

Timothy J. Shea,

Acting Administrator.

[FR Doc. 2020–27232 Filed 12–10–20; 8:45 am]

BILLING CODE 4410–09–P

[1] Under the Administrative Procedure Act, an agency ''may take official notice of facts at any stage in a proceeding—even in the final decision.'' United States Department of Justice, Attorney General's Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), ''[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.'' Accordingly, Registrant may dispute my finding by filing a properly supported motion for reconsideration within fifteen calendar days of the date of this Order. Any such motion shall be filed with the Office of the Administrator and a copy shall be served on the Government. In the event Registrant files a motion, the Government shall have fifteen calendar days to file a response. Any such motion and response may be filed and served by email (*dea.addo.attorneys@dea.usdoj.gov*).

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Zeljko Stjepanovic, M.D.; Decision and Order

On May 1, 2018, a former Acting Administrator of the Drug Enforcement Administration (hereinafter, DEA or Government) issued an Order to Show Cause and Immediate Suspension of Registration to Zeljko Stjepanovic, M.D. (hereinafter, Registrant). Government's Request for Final Agency Action Exhibit (hereinafter, RFAAX) 3, at 1 (Order to Show Cause and Immediate Suspension Order (hereinafter, collectively OSC)). The OSC informed Registrant of the immediate suspension of his DEA Certificate of Registration FS3042885 pursuant to 21 U.S.C. 824(d), ''because [his] continued registration constitutes an imminent danger to public health and safety.'' *Id.*

The substantive ground for the proceeding, as alleged in the OSC, is that Registrant's ''continued registration is inconsistent with the public interest, as that term is defined in 21 U.S.C. 823(f).'' *Id.* Specifically, the OSC alleges that on August 31, 2017, January 19, 2018, February 16, 2018, and March 15, 2018, Registrant unlawfully prescribed controlled substances in violation of 21 U.S.C. 841(a) and 842(a). The OSC further alleges that on those dates, Registrant prescribed controlled substances to individuals that he ''knew were not for a legitimate medical purpose and were not in the usual course of [his] professional practice,'' because he issued them ''without establishing bona fide practitioner-

patient relationships'' and ''issued prescriptions in the name of one patient for use by another patient, despite acknowledging the illegality of this behavior, in violation of federal and state law.'' *Id.* at 2 (citing 21 CFR 1306.04(a); Va. Code Ann. §§ 54.1–3303.A, 54.1–2915.A(3), (8), (13), (16), (17), and 18.2.248).

In issuing the OSC, which immediately suspended the registration, the former Acting Administrator concluded that Registrant's ''continued registration is inconsistent with the public interest'' based on a preliminary finding that Registrant ''issued prescriptions for controlled substances that [Registrant] knew were illegal, without a legitimate medical purpose and outside the usual course of professional practice'' and that were ''indicative of [Registrant's] general illegitimate practice of prescribing controlled substances in violation of State and Federal laws.'' *Id.* at 7. Citing 21 U.S.C. 824(d), he also made the preliminary finding that Registrant's ''continued registration during the pendency of the proceedings would constitute an imminent danger to the public health or safety because of the substantial likelihood that [Registrant] will continue to unlawfully prescribe controlled substances, thereby allowing the diversion of controlled substances unless [Registrant's] DEA COR is suspended.'' *Id.* The former Acting Administrator authorized the DEA Special Agents and Diversion Investigators serving the OSC on Registrant to place under seal or remove for safekeeping all controlled substances Registrant possessed pursuant to the immediately suspended registration. *Id.* (citing 21 U.S.C. 824(f) and 21 CFR 1301.36(f)). The former Acting Administrator also directed those DEA employees to take possession of Registrant's Certificate of Registration FS3042886 and any unused prescription forms. *Id.* at 8.

According to the Declaration of a DEA Diversion Investigator (hereinafter, DI) from the Richmond District Office, the DI personally served the OSC on Registrant on May 4, 2018, at his registered address. RFAAX 5, at 2. Based on the DI's Declaration, and my review of the record, I find that the Government accomplished service of the OSC on Registrant on May 4, 2018. The OSC notified Registrant of his right to request a hearing on the allegations or to submit a written statement while waiving his right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. OSC at 7–8 (citing 21 CFR 1301.43(c)).

On July 25, 2018, the Government forwarded a Request for Final Agency Action (hereinafter, RFAA), along with the evidentiary record for this matter, to my office, and asserted that the Government had not received a request for a hearing. RFAA, at 2. I find that more than thirty days have now passed since the Government accomplished service of the OSC. I further find, based on the Government's written representations, that neither Registrant, nor anyone purporting to represent the Registrant, requested a hearing, or submitted a written statement while waiving Registrant's right to a hearing. Accordingly, I find that Registrant has waived the right to a hearing and the right to submit a written statement. 21 CFR 1301.43(d). I, therefore, issue this Decision and Order based on the record submitted by the Government, which constitutes the entire record before me. 21 CFR 1301.43(e).

Having considered the record in its entirety, I find that the record establishes, by substantial evidence, that Registrant committed acts rendering his continued registration inconsistent with the public interest. I also find that Registrant has submitted no evidence that he accepts responsibility for his failures to meet the responsibilities of a registrant nor presented any evidence of mitigation or remedial measures. Accordingly, I conclude that the appropriate sanctions are (1) for Registrant's DEA registration to be revoked; and (2) for any pending application by Registrant to be denied.

Based on the representations of the Government in its RFAA, I make the following findings of fact.

I. Findings of Fact

A. Registrant's DEA Registration

Registrant is registered with DEA as a practitioner in schedules II through V under DEA Certificate of Registration No. FS3042885, at the registered address of 2004 Bremo Rd, Suite 200, Richmond, VA 23226. RFAAX 1. This registration expires on February 28, 2021. *Id.* The registration was suspended pursuant to the Immediate Suspension Order dated May 1, 2018. OSC, at 7.

B. The Investigation of Registrant

In 2017, the Richmond District Office (hereinafter, RDO) of the DEA Washington Field Office began an investigation of Registrant that included the use of undercover investigators. RFAAX 5, at 1–2. Two RDO Task Force Officers (hereinafter, TFO One and TFO Two) were assigned to investigate Registrant. *Id.* at 2. According to the Government, TFO One first visited Registrant posing as a patient on August 31, 2017, while Registrant was working for a practice located in Fredericksburg, VA. RFAAX 6 (Declaration of TFO One), at 1. TFO Two next went undercover to visit Registrant with TFO One on January 19, 2018 and February 16, 2018 in Registrant's Richmond Office. *Id.* at 2. Finally, TFO Two went undercover to visit Registrant by herself on March 15, 2018. RFAAX 7 (Declaration of TFO 2), at 2.

The Government submitted declarations from TFO One and TFO Two, which summarize the events of the undercover visits to Registrant. *See* RFAAX 6 and 7. The Government also submitted copies of controlled substance prescriptions written by Registrant to the aliases used by TFO One and TFO Two that support their accounting of their visits with Registrant, RFAAX 4 (Copies of prescriptions), and a partial transcript of a recording of the February 16 undercover visit.[1] RFAAX 2 (Transcript of February 16, 2018 undercover visit with Registrant).

1. August 31, 2017 Undercover Visit

TFO One first visited Registrant posing as a patient on August 31, 2017. RFAAX 6, at 1. At the time, Registrant was working for a practice located in Fredericksburg, VA. *Id.* During the August 31 visit, Registrant provided TFO One with a prescription for Tramadol (50 mg, QTY 84).[2] RFAAX 4 (copy of prescription); RFAAX 6, at 2.

TFO One said that she ''specifically asked for Tramadol by name because it made [her] feel good.'' RFAAX 6, at 2. When Registrant checked the Virginia Prescription Monitoring Program and discovered that TFO One did not have a previous prescription for Tramadol, TFO One told Registrant that she ''had previously been using [her] ex-boyfriend's Tramadol prescription.'' *Id.* According to TFO One, Registrant did

[1] The DI assigned to Registrant's case declared that TFO One and TFO Two recorded all of their visits with Registrant. RFAAX 5, at 2. The Government, however, has only provided a partial transcript from the recording of one of those visits. *See* RFAAX 2 (Transcript of February 16, 2018 undercover visit with Registrant). Exhibit Two to the Government's RFAA is three pages of a twenty-four page transcript of the recording of the February 16, 2018 visit. *Id.* The Government has provided no explanation for only including certain pages from the February 16, 2018 visit transcript and for not including any of the recordings or transcripts of the recordings from the other three visits. Although I do not have the recordings for the majority of the undercover visits in the evidence before me, there is no evidence in the record that contradicts the Government's presentation of the facts in this matter.

[2] Tramadol is a schedule IV controlled substance. 21 CFR 1308.14(b).

not conduct a physical exam, use diagnostic tools, or complete a urinalysis during the August 31 visit. *Id.* TFO One also declared that she did not provide any medical records from a previous medical provider. *Id.*

2. January 19, 2018 Undercover Visit

On January 19, 2018, TFO One visited Registrant again in an undercover capacity at Registrant's office in Richmond, Virginia. RFAAX 6, at 2. TFO One was accompanied on this visit by TFO Two, acting in an undercover capacity.[3] *Id.* Registrant saw TFO One and Two together, in the same room, during the visit. *Id.*

During the January 19 visit, TFO One asked Registrant for another prescription for Tramadol. *Id.* According to the declaration of TFO One, Registrant replied that he ''could not write [TFO One] [her] own prescription due to [her] status as a former Fredericksburg patient.'' *Id.* Instead, according to TFOs One and Two, Registrant issued TFO Two a double dose of oxycodone so TFO One and TFO Two ''could share a prescription until [their] next office visit to [Registrant].'' RFAAX 6, at 2; RFAAX 7, at 2. A copy of the prescription from the January 19 visit shows that Registrant wrote TFO Two (in the name of her alias) a prescription for oxycodone (10mg, QTY 90).[4] RFAAX 4.

3. February 16, 2018 Undercover Visit

TFO One and TFO Two visited Registrant in an undercover capacity together for a second time on February 16, 2018.[5] RFAAX 6, at 2. Registrant saw TFO One first, by herself, in Registrant's office. *Id.* TFO One stated that the office was not an examination room—that it contained a desk, computer, and chairs but no examination bed or medical equipment. *Id.* Registrant again stated that he could not write TFO One a prescription due to her status as a former Fredericksburg patient and offered to write TFO One a Tramadol prescription in TFO Two's name. *Id.; see also* RFAAX 2 (Excerpts from transcript of February 16 visit), at 2. The transcript of the recording made of the visit demonstrates that Registrant said, ''What I was thinking in the beginning according [sic], that you are so nice, and I know that it is illegal, but I technically can write down those medications on her name.'' RFAAX 2, at 2.

TFO Two was then summoned into Registrant's office with Registrant and TFO One. RFAAX 6, at 2. Registrant told TFO Two that he had been discussing with TFO One writing a Tramadol prescription for TFO One in TFO Two's name. RFAAX 7, at 2. Registrant sought to confirm that TFO Two was comfortable with having the Tramadol prescription for TFO One written in TFO Two's name. *Id.;* RFAAX 2, at 3. After TFO Two said that it was fine, Registrant told TFO Two what to say if a pharmacist questioned her on why a doctor was prescribing two short acting drugs. RFAAX 2, at 3. According to the transcript, Registrant then asked, ''Is that Okay? I'm sorry is illegal, but you know.'' *Id.*

Registrant issued two prescriptions to TFO Two, one for oxycodone (10mg, QTY 90) and one for Tramadol (50mg, QTY 90). RFAAX 6, at 2; RFAAX 7, at 2; RFAAX 4. Registrant then advised TFO Two that she should fill the prescriptions at the same pharmacy as the January 19, 2018 prescription to avoid any scrutiny. RFAAX 6, at 2; RFAAX 7, at 2; RFAAX 4. He said ''just don't change, because they're looking if you're changing doctors or changing pharmacies . . . .'' RFAAX 2, at 4. According to TFO Two, Registrant did not perform any type of physical exam on her during the February 16 visit. RFAAX 7, at 2.

4. March 15, 2018 Undercover Visit

TFO Two visited Registrant by herself on March 15, 2018, and met with Registrant in his office. RFAAX 7, at 2. According to TFO Two, Registrant asked ''if I wanted him to 'do the same stuff'' and ''if I wanted him to issue another Tramadol prescription for TFO [One] in [TFO Two's] name.'' *Id.* Registrant then asked if she had any problems with the pharmacy filling the previous prescriptions for oxycodone and Tramadol. *Id.* When TFO Two told him there were no problems, Registrant ''again advised [her] that to avoid scrutiny of the illegal prescriptions he was writing, [she] should not change providers or pharmacies.'' *Id.*

Registrant wrote TFO Two a prescription for oxycodone (10mg, QTY 90) and a prescription for Tramadol (50mg, QTY 90). *Id.;* RFAAX 4. TFO Two declared that during the visit Registrant ''asked generally, how [she] was feeling but did not perform any physical examination.'' RFAAX 7, at 2.

In summary, based on the substantial evidence in the record, I find that Registrant issued a total of six prescriptions for controlled substances to TFO One and TFO Two without performing a physical examination of either undercover officer. I also find that Registrant wrote two controlled substance prescriptions for TFO One in TFO Two's name even though he verbally stated that doing so was illegal.

II. Discussion

Under the Controlled Substances Act (CSA), ''[a] registration . . . to . . . distribute[ ] or dispense a controlled substance . . . may be suspended or revoked by the Attorney General upon a finding that the registrant . . . has committed such acts as would render his registration under section 823 of this title inconsistent with the public interest as determined under such section.'' 21 U.S.C. 824(a)(4). In the case of a ''practitioner,'' which is defined in 21 U.S.C. 802(21) to include a ''physician,'' Congress directed the Attorney General to consider the following factors in making the public interest determination:

(1) The recommendation of the appropriate State licensing board or professional disciplinary authority.

(2) The [registrant]'s experience in dispensing . . . controlled substances.

(3) The [registrant]'s conviction record under Federal or State laws relating to the . . . distribution[ ] or dispensing of controlled substances.

(4) Compliance with applicable State, Federal, or local laws relating to controlled substances.

(5) Such other conduct which may threaten the public health and safety. 21 U.S.C. 823(f). These factors are considered separately. *Robert A. Leslie, M.D.,* 68 FR 15,227, 15,230 (2003).

According to Agency decisions, I ''may rely on any one or a combination of factors and may give each factor the weight [I] deem[ ] appropriate in determining whether'' to revoke a registration. *Id.; see also Jones Total Health Care Pharm., LLC* v. *Drug Enf't Admin.,* 881 F.3d 823, 830 (11th Cir. 2018) (citing *Akhtar-Zaidi* v. *Drug Enf't Admin.,* 841 F.3d 707, 711 (6th Cir.

[3] TFO One declared that this visit occurred on January 19, 2018, while TFO Two declared that this visit occurred on January 18, 2018. RFAAX 7, at 2. I find that the one-day discrepancy between the two accounts of the date of this visit does not detract from TFO Two's credibility, given the other supporting evidence for this visit, and is ultimately irrelevant in this matter. The Government presents the visit as having occurred on January 19, 2018, and a prescription Registrant issued during the visit supports a finding of that date; therefore, I am concluding that the visit occurred on that January 19, 2018.

[4] Oxycodone is a schedule II controlled substance. 21 CFR 1308.12(1).

[5] In their declarations, TFO One and TFO Two state that this visit occurred on February 26, 2018. RFAA 6, at 2; RFAAX 7, at 2. The Government stated in the RFAA that the date in the declarations was a typo and should read February 16, 2018. RFAA, at 4. The transcript of the recording of the interview states that the recording was made on February 16, 2018. RFAAX 2. I find that the date in the declarations was a typo and that the visit occurred on February 16, 2018. I find that this date discrepancy was a scrivener's error and does not detract from the overall credibility of the Government's evidence.

2016)); *MacKay* v. *Drug Enf't Admin.,* 664 F.3d 808, 816 (10th Cir. 2011); *Volkman* v. *Drug Enf't Admin.,* 567 F.3d 215, 222 (6th Cir. 2009); *Hoxie* v. *Drug Enf't Admin.,* 419 F.3d 477, 482 (6th Cir. 2005). Moreover, while I am required to consider each of the factors, I ''need not make explicit findings as to each one.'' *MacKay,* 664 F.3d at 816 (quoting *Volkman,* 567 F.3d at 222); *see also Hoxie,* 419 F.3d at 482. ''In short, . . . the Agency is not required to mechanically count up the factors and determine how many favor the Government and how many favor the registrant. Rather, it is an inquiry which focuses on protecting the public interest; what matters is the seriousness of the registrant's misconduct.'' *Jayam Krishna-Iyer, M.D.,* 74 FR 459, 462 (2009). Accordingly, findings under a single factor can support the revocation of a registration. *MacKay,* 664 F.3d at 821.

The Government has the burden of proving that the requirements for revocation of a DEA registration in 21 U.S.C. 824(a) are satisfied. 21 CFR 1301.44(e). When the Government has met its *prima facie* case, the burden then shifts to the registrant to show that revoking the registration would not be appropriate, given the totality of the facts and circumstances on the record. *Med. Shoppe-Jonesborough,* 73 FR 364, 387 (2008).

In this matter, while I have considered all of the Factors, the Government's evidence in support of its *prima facie* case is confined to Factors Two and Four.[6] I find the Government has satisfied its *prima facie* burden of showing that Registrant's continued registration would be ''inconsistent with the public interest.'' 21 U.S.C. 824(a)(4).

A. Factors Two and/or Four—The Registrant's Experience in Dispensing Controlled Substances and Compliance With Applicable Laws Related to Controlled Substances

The Government alleges that on August 31, 2017, January 19, 2018, February 16, 2018, and March 15, 2018, Registrant prescribed controlled substances to undercover officers posing as patients without establishing a bona fide practitioner-patient relationship, without a legitimate medical purpose, and outside the usual course of his professional practice in violation of 21 CFR 1306.04(a) and Va. Code Ann. § 54.1–3303.A. RFAA, at 8; OSC, at 2. The Government further alleges that Registrant's actions violated 21 U.S.C. 841(a), which states, in relevant part, that it is unlawful for any person to knowingly or intentionally dispense a controlled substance except as authorized by the CSA. OSC, at 2.

According to the CSA's implementing regulations, a lawful prescription for controlled substances is one that is ''issued for a legitimate medical purpose by an individual practitioner acting in the usual course of his professional practice.'' 21 CFR 1306.04(a). This regulation further provides that ''an order purporting to be a prescription issued not in the usual course of professional treatment . . . is not a prescription within the meaning and intent of [21 U.S.C. 829] and . . . the person issuing it, shall be subject to the penalties provided for violations of the provisions of law related to controlled substances.'' *Id.* The Supreme Court has stated that ''the prescription requirement . . . ensures patients use controlled substances under the supervision of a doctor so as to prevent addiction and recreational abuse . . . [and] also bars doctors from peddling to patients who crave the drugs for those prohibited uses.'' *Gonzales* v. *Oregon,* 546 U.S. 243, 274 (2006).

DEA has consistently stated that a practitioner must establish and maintain a bona fide doctor-patient relationship in order to act ''in the usual course of . . . professional practice'' and to issue a prescription for a ''legitimate medical purpose.'' *Ralph J. Chambers,* 79 FR 4962, 4970 (2014) (citing *Paul H. Volkman,* 73 FR 30,629, 30,642 (2008), *pet. for rev. denied Volkman* v. *Drug Enf't Admin.,* 567 F.3d 215, 223–24 (6th Cir. 2009)); *see also U.S.* v. *Moore,* 423 U.S. 122, 142–43 (1975) (noting that evidence established that the physician exceeded the bounds of professional practice, when ''he gave inadequate physical examinations or none at all,'' ''ignored the results of the tests he did make,'' and ''took no precautions against . . . misuse and diversion''). In recognition of the State's primary role in regulating the practice of medicine, the CSA generally looks to state law to determine whether a doctor and patient have established a legitimate doctor-patient relationship. *Mackay,* 75 FR at 49,973; *Volkman,* 73 FR at 30,642.

The law of the Commonwealth of Virginia, the state in which Registrant is registered with DEA, to which the Government cited in the OSC, echoes the CSA requirement that a practitioner may only issue a prescription to a person with whom the practitioner has ''a bona fide practitioner-patient relationship.'' Va. Code Ann. § 54.1–3303A (West 2018).[7] At the time of the events at issue here, Virginia law defined a bona fide practitioner-patient relationship as ''one in which a practitioner prescribes, and a pharmacist dispenses, controlled substances in good faith to his patient for a medicinal or therapeutic purpose within the course of his professional practice.'' *Id.* The Virginia law further states that

> A bona fide practitioner-patient relationship means that the practitioner shall (i) ensure that a medical or drug history is obtained; (ii) provide information to the patient about the benefits and risks of the drug being prescribed; (iii) perform or have performed an appropriate examination of the patient, either physically or by the use of instrumentation and diagnostic equipment through which images and medical records may be transmitted electronically; except for medical emergencies, the examination of the patient shall have been performed by the practitioner himself, within the group in which he practices, or by a consulting practitioner prior to issuing a prescription; and (iv) initiate additional interventions and follow-up care, if necessary, especially if a prescribed drug may have serious side effects.

Id.

The Government typically establishes that a practitioner issued prescriptions without a legitimate medical purpose or outside the usual course of professional practice in violation of 21 CFR 1306.04(a) through, or with the support of, expert testimony. However, DEA decisions have found that the nature of the allegations and the evidence on the record can establish violations of Section 1306.04(a) without necessitating

[6] As to Factor One, the Government alleged that Registrant holds a valid state medical license, and there is no evidence in the record of any recommendation from Registrant's ''State licensing board or professional disciplinary authority.'' *See* OSC, at 2. State authority to practice medicine is ''a necessary, but not a sufficient condition for registration . . . .'' *Robert A. Leslie, M.D.,* 68 FR at 15,230. Therefore, ''[t]he fact that the record contains no evidence of a recommendation by a state licensing board does not weigh for or against a determination as to whether continuation of Respondent's DEA certification is consistent with the public interest.'' *Roni Dreszer, M.D.,* 76 FR 19,434, 19,444 (2011).

As to Factor Three, there is no evidence in the record that Registrant has a ''conviction record under Federal or State laws relating to the manufacture, distribution, or dispensing of controlled substances.'' 21 U.S.C. 823(f)(3). However, as Agency cases have noted, there are a number of reasons why a person who has engaged in criminal misconduct may never have been convicted of an offense under this factor, let alone prosecuted for one. *Dewey C. MacKay, M.D.,* 75 FR 49,956, 49,973 (2010), *pet. for rev. denied, MacKay* v. *Drug Enf't Admin.,* 664 F.3d 808 (10th Cir. 2011). Agency cases have therefore held that ''the absence of such a conviction is of considerably less consequence in the public interest inquiry'' and is therefore not dispositive. *Id.*

[7] Virginia amended this portion of the code in 2018 and 2020. This Decision cites to the law that was in effect during the time when Registrant issued the subject prescriptions to the undercover officers and when the OSC was issued.

the support of expert opinion.[8] *Lawrence E. Stewart, M.D.,* 81 FR 54,822, 54,839 (2016). DEA has not required expert testimony to establish a violation of 21 CFR 1306.04(a) in past matters under factual circumstances that include: Where a prescriber engaged in drug deals; where a prescriber did not conduct a physical exam of the patient as required by law; where a controlled substance prescription was based on a patient's request rather than the result of the application of the physician's medical judgment; and where a prescriber falsified patients' charts. *See e.g., Stewart,* 81 FR at 54,839–41 (finding, without expert testimony, that prescriptions were issued outside the usual course of professional practice, where the physician failed to perform and document a physical exam, and lacked a legitimate medical purpose, where a physician prescribed controlled substances based on a patient's request); *Morris W. Cochran, M.D.,* 77 FR 17,505, 17,519–20 (2011) (finding, without expert testimony, that prescriptions lacked a legitimate medical purpose, where a physician noted in patient medical records that patients had no pain, did not document any findings to support a diagnosis, and yet diagnosed patients as having chronic pain); *Robert F. Hunt, D.O.,* 75 FR 49,995, 50,003 (2010) (finding, without expert testimony, that a physician lacked a legitimate medical purpose based on statements made during undercover visits and falsification of patient chart). *See also T.J. McNichol, M.D.,* 77 FR 57,133, 57,147–48 (2012), *pet. for rev. denied,* 537 Fed. Appx. 905 (11th Cir. 2013).

I find that, with respect to the prescriptions Registrant issued to the undercover officers, expert testimony is not necessary to prove that Registrant lacked a legitimate medical purpose and acted outside of the usual course of professional practice in issuing them. Virginia law clearly states that to establish a practitioner-patient relationship, the practitioner must ''perform or have performed an appropriate examination of the patient, either physically or by the use of instrumentation and diagnostic equipment through which images and medical records may be transmitted electronically.'' Va. Code Ann. § 54.1–3303A(iii). The uncontested evidence in this matter shows that Registrant issued prescriptions for controlled substances to TFOs One and Two without performing any physical examination or using any diagnostic tools. By issuing prescriptions to TFOs One and Two without first establishing a bona fide practitioner-patient relationship, Registrant violated Va. Code Ann. § 54.1–3303A and thus acted outside the usual course of his professional practice.

I also find that Registrant did not issue the prescriptions to the undercover officers for legitimate medical purposes. First, there is substantial evidence that Registrant knew that TFO One was not seeking treatment for a legitimate medical condition but was either engaged in self-abuse or diversion. During her first visit with Registrant on August 31, 2017, TFO One asked Registrant for a prescription for Tramadol ''because it made [her] feel good'' and told Respondent that she had been taking Tramadol that was not prescribed to her. Previous DEA decisions have found, without the support of expert testimony, that controlled substance prescriptions did not have a legitimate medical purpose when practitioners prescribed them based on a patient request rather than for the treatment of a legitimate medical condition. *See Stewart,* 81 FR at 54,841; *Henri Wetselaar M.D.,* 77 FR 57,126, 57,132 (2012).

Second, Registrant's statements to TFOs One and Two during the course of their visits make clear that Registrant was prescribing controlled substances to TFO Two to intentionally divert drugs to TFO One. On their first visit together to Registrant on January 19, 2018, Registrant told the undercover officers that he was prescribing TFO Two a double dose of oxycodone, so that they ''could share a prescription until [their] next office visit to [Registrant].'' RFAAX 6, at 2; RFAAX 7, at 2. Then, during the undercover officers' second visit together to Registrant on February 16, 2018, Registrant told the undercover officers that he would write a prescription for Tramadol in TFO Two's name for TFO Two to give to TFO One. RFAAX 2 at 2; see also RFAAX 4 (prescription for Tramadol in TFO Two's name). When TFO Two visited Registrant by herself on March 15, 2018, Registrant again issued TFO Two a prescription for Tramadol so that she could give the drugs to TFO One. RFAAX 7, at 2. Registrant's actions ''completely betrayed any semblance of legitimate medical treatment.'' *Jack A. Danton, D.O,* 76 FR 60,900, 60,904 (quoting *United States* v. *Feingold,* 454 F.3d 1001, 1010 (9th Cir. 2006)). Therefore, the evidence clearly supports a finding that Registrant issued the prescriptions without a legitimate medical purpose and outside the usual course of his professional practice in violation of 21 CFR 1306.04(a).

Finally, despite Registrant's failure to take his responsibilities as a registrant seriously, he did understand the potential legal consequences for his action and undoubtedly knew his actions were wrong. Registrant repeatedly stated that the prescriptions he wrote for TFO Two to give to TFO One were ''illegal.'' [9] RFAAX 2, at 2–3. He also gave the undercover officers instructions on how to evade scrutiny when filling the prescriptions. RFAAX 2, at 3; RFAAX 7, at 2. This evidence supports the conclusion that Registrant knowingly engaged in an outright drug deal in violation of 21 U.S.C. 841(a).

In summary, I find that Registrant committed flagrant violations of 21 CFR 1306.04(a); violated state law, Va. Code Ann. § 54.1–3303.A; [10] and displayed an appalling disregard of a registrant's duty under the CSA to prescribe controlled substances based on a legitimate doctor-patient relationship.

B. Registrant's Registration Is Inconsistent With the Public Interest and Presented an Imminent Danger

Violations of the prescription requirement strike at the core of the CSA's purpose of preventing the diversion of controlled substances. *See United States* v. *Moore,* 423 U.S. 122, 135 (1975) (''Congress was particularly concerned with the diversion of drugs from legitimate channels to illegitimate channels. It was aware that registrants,

[8] Numerous federal courts have found in criminal cases, which require a higher standard of proof than is required in these proceedings, that expert testimony is not required to establish a violation of 21 U.S.C. 841 or 21 CFR 1306.04(a) based on the particular facts of the case. *See, e.g., United States* v. *Pellman,* 668 F.3d 918, 924 (7th Cir. 2012) (holding that even without expert testimony there was ''ample evidence'' for a reasonable jury to determine the physician-defendant acted outside the usual course of his professional practice and not for a legitimate purpose); *U.S.* v. *Armstrong,* 550 F.3d 382, 389 (5th Cir. 2008), *overruled on other grounds by United States* v. *Balleza,* 613 F.3d 382 (5th Cir. 2010) (''While expert testimony may be both permissible and useful, a jury can reasonably find that a doctor prescribed controlled substances not in the usual course of professional practice or for other than a legitimate medical purpose from adequate lay witness evidence surrounding the facts and circumstances of the prescriptions.''); *U.S.* v. *Word,* 806 F.2d 658 663–64 (6th Cir. 1986).

[9] In the transcript of recording from the February 16, 2018 visit, regarding prescribing in TFO Two's name for TFO One, Registrant stated, ''I know that is illegal, but I technically can write down those medications on her name,'' and ''Is that Okay? I'm sorry is illegal, but you know.'' RFAAX 2, at 2–3.

[10] The Government also alleged that Registrant's actions violated Va. Code Ann. § 54.1–2915.A(3), (8), (13), (16), and (17), which provide grounds for which the Virginia Medical Board may refuse to issue, suspend, or revoke a medical license. While I find that these provisions buttress the Government's argument that Registrant was acting outside the usual course of his professional practice, I do not find that they establish independent violations of state law and, as such, I am not including them in my findings herein.

who have the greatest access to controlled substances and therefore the greatest opportunity for diversion, were responsible for a large part of the illegal drug traffic.''). The Agency has previously found that proof of a single act of intentional or knowing diversion is sufficient to satisfy the Government's *prima facie* burden of showing that a practitioner's continued registration is inconsistent with the public interest. *McNichol,* 77 FR at 57,145–46 (2012); *see also, Alan H. Olefsky,* 57 FR 928, 928–29 (1992) (revoking registration based on physician's presentation of two fraudulent prescriptions to pharmacist in single act where physician failed to acknowledge his misconduct). Accordingly, I find that the evidence in this matter establishes Registrant ''has committed such acts as would render his registration . . . inconsistent with the public interest.'' *See* 21 U.S.C. 824(a)(4).

For purposes of the imminent danger inquiry, my findings also lead to the conclusion that Registrant ''fail[ed] . . . to maintain effective controls against diversion or otherwise comply with the obligations of a registrant'' under the CSA. 21 U.S.C. 824(d)(2). The substantial evidence that Registrant was issuing prescriptions for controlled substances without a legitimate medical purpose and outside the usual course of professional practice also establishes that there was ''a substantial likelihood [that an] . . . abuse of a controlled substance . . . [would] occur in the absence of the immediate suspension'' of Registrant's registration. *Id.* As I found above, the recording of the February 16, 2018 visit between Registrant and the undercover officers and the undercover officers' accountings of their other visits establish that Registrant unlawfully prescribed controlled substances to the officers without conducting physical examinations and wrote controlled substance prescriptions in TFO Two's name for her to give to TFO One. Thus, at the time the Government issued the OSC, the Government had clear evidence of Registrant's violations of law.

III. Sanction

Where, as here, the Government has met its *prima facie* burden of showing that a Registrant's continued registration is inconsistent with the public interest, the burden shifts to the Registrant to show why he can be entrusted with a registration. *Garrett Howard Smith, M.D.,* 83 FR 18,882, 18,910 (2018) (collecting cases). Registrant did not present any evidence of remorse for his past misconduct or evidence of rehabilitative actions taken to correct his past unlawful behavior. Further, he provided no assurances that he would not engage in such conduct in the future. Absent such evidence and such assurances in this matter, I find that continued registration of Registrant is inconsistent with the public interest. Registrant's silence weighs against his continued registration. *Zvi H. Perper, M.D.,* 77 FR 64,131, 64,142 (2012 (citing *Med. Shoppe-Jonesborough,* 73 FR at 387); *see also Samuel S. Jackson,* 72 FR 23,848, 23,853 (2007). Accordingly, I find that the factors weigh in favor of sanction, and I shall order the sanctions the Government requested, as contained in the Order below.

IV. Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration FS3042885 issued to Zelijko Stjepanovic, M.D. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(f), I hereby deny any pending application of Zelijko Stjepanovic, M.D. to renew or modify this registration. This Order is effective January 11, 2021.

Timothy J. Shea,

Acting Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Anindita Nandi, M.D.; Decision and Order

On January 31, 2020, the Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, DEA or Government), issued an Order to Show Cause (hereinafter, OSC) to Anindita Nandi, M.D. (hereinafter, Registrant) of Jersey City, New Jersey. OSC, at 1. The OSC proposed the revocation of Registrant's Certificate of Registration No. FN5040136. *Id.* It alleged that Registrant has ''no state authority to handle controlled substances.'' *Id.* (citing 21 U.S.C. 824(a)(3)).

Specifically, the OSC alleged that, ''[o]n September 25, 2018, the New Jersey State Board of Medical Examiners (hereinafter, BME) issued an Order of Temporary Suspension of License, suspending . . . [Registrant's] license to practice medicine and surgery in the State of New Jersey, effective September 12, 2018.'' OSC, at 2. The OSC further alleged that Registrant's ''State of New Jersey C[ontrolled] D[angerous] S[ubstance] (hereinafter, CDS) license is in an 'Inactive' status, having expired on October 31, 2018.'' *Id.* The OSC concluded that ''[c]onsequently, the DEA must revoke . . . [her] DEA registration based on . . . [her] lack of authority to handle controlled substances in the State of New Jersey.'' *Id.*

The OSC notified Registrant of the right to request a hearing on the allegations or to submit a written statement, while waiving the right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* (citing 21 CFR 1301.43). The OSC also notified Registrant of the opportunity to submit a corrective action plan. OSC, at 3 (citing 21 U.S.C. 824(c)(2)(C)).

Adequacy of Service

In a sworn Declaration, dated May 21, 2020, a DEA Diversion Investigator assigned to the Newark Division Office (hereinafter, DI) stated that he attempted personal service of the OSC on Registrant at the Hudson County Correctional Facility. Request for Final Agency Action (hereinafter, RFAA), EX 5 (DI Declaration), at 1. Registrant, however, refused to meet with DI. *Id.*

DI, therefore, sent the OSC to Registrant certified mail, return receipt requested. *Id.* He attached the executed return receipt card, dated February 26, to his Declaration. *Id.* at Attachment C. Further evidence of the adequacy of the Government's service is Registrant's proposed Corrective Action Plan (hereinafter, CAP) and waiver of hearing dated March 4, 2020. RFAA EX 6 (CAP), at 1. Accordingly, I find that the Government's service of the OSC was adequate.

Registrant's Proposed CAP

As already discussed, Registrant timely submitted a proposed CAP and waiver of hearing. *Id.* In her CAP, Registrant asked that this proceeding be discontinued or postponed. *Id.* She alleged that she received notification of the reactivation of her medical license in July 2019. *Id.* at 2. Further, she alleged that she timely renewed her ''second State of NJ CDS Account.'' *Id.*

I find that Registrant waived her right to a hearing and proposed a CAP. I find that the Assistant Administrator, Diversion Control Division, denied Registrant's CAP request that the administrative proceeding be discontinued or deferred. RFAA EX 7 (Letter Denying Proposed CAP), at 1. I also find that the Assistant Administrator concluded that ''there is no potential modification of . . . [her proposedCAP] that could or would alter

. . . [his] decision in this regard.'' *Id.* I agree.

The Government forwarded its RFAA, along with the evidentiary record, to my office on May 26, 2020. In its RFAA, the Government represented that ''Registrant has no valid medical license or CDS registration in New Jersey.'' RFAA, at 3. The Government requested that Registrant's registration be revoked. *Id.* at 4.

I issue this Decision and Order based on the record submitted by the Government in its RFAA, which constitutes the entire record before me.[1] 21 CFR 1301.43(e).

Findings of Fact

Registrant's DEA Registration

Registrant is the holder of DEA Certificate of Registration No. FN5040136 at the registered address of 610 Washington Boulevard, Jersey City, NJ 07310. RFAA, EX 1 (Certification of Registration History), at 1. Pursuant to this registration, Registrant is authorized to dispense controlled substances in schedules II through V as a practitioner. *Id.* Registrant's registration expired on October 31, 2020.[2] *Id.*

The Status of Registrant's State License and Registration

The Government submitted a certified copy of the ''Order of Temporary Suspension of License'' concerning Registrant that the BME issued on September 25, 2018. RFAA, EX 3 (hereinafter, Temporary Suspension Order). The Temporary Suspension Order ''temporarily suspended (Registrant's New Jersey medical license) pending final adjudication of the allegations of the Verified Complaint.'' *Id.* at 12. It ordered Registrant immediately to cease and desist practicing medicine in New Jersey and it set out the steps required for Registrant's reinstatement. *Id.* at 12–13.

The Government also submitted a Certification from the New Jersey Drug Control Unit stating that Registrant's ''CDS registration became inactive on September 25, 2018, when a suspension was imposed on her medical license. Her CDS registration remains inactive.'' RFAA, EX 4 (New Jersey Attorney General, Division of Consumer Affairs, Drug Control Unit, Certification that Registrant's CDS registration is ''Inactive''), at 1. The Certification is dated January 17, 2020. *Id.*

As already discussed, Registrant's proposed CAP alleged that her New Jersey medical license was ''reactivated'' in July 2019 and that her controlled dangerous substance registration was ''timely . . . renewed.'' RFAA, EX 6, at 2. Her proposed CAP, however, did not include evidence documenting or supporting her allegations.

According to New Jersey's online records, Registrant's medical license is still suspended today.[3] New Jersey Division of Consumer Affairs License Information, *https://www.njconsumeraffairs.gov* (last visited date of signature of this Order). The evidence that the Government submitted with its RFAA, EX 3 and EX 8, and the evidence from today's New Jersey online records outweigh Registrant's unsupported allegation about her ''reactivated'' medical license. Accordingly, I find that Registrant's New Jersey medical license is currently suspended.

The Government's RFAA includes evidence that Registrant's New Jersey controlled dangerous substance registration is inactive. RFAA, EX 4, at 1. Registrant's CAP did not include evidence supporting her allegation that she ''timely . . . renewed'' her New Jersey controlled dangerous substance registration. RFAA, EX 6, at 2. The Government's evidence outweighs Registrant's unsupported allegation. Accordingly, I find that Registrant is not authorized in New Jersey to dispense controlled substances. *See also infra* Discussion section.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the CSA ''upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.'' With respect to a practitioner, the Agency has long stated that the possession of authority to dispense controlled substances under the laws of the state in which the practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner's registration. *See, e.g., James L. Hooper, M.D.,* 76 FR 71,371 (2011), *pet. for rev. denied,* 481 F. App'x 826 (4th Cir. 2012); Frederick Marsh Blanton, M.D., 43 FR 27,616, 27,617 (1978).

This rule derives from the text of two provisions of the CSA. First, Congress defined the term ''practitioner'' to mean ''a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.'' 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner's registration, Congress directed that ''[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.'' 21 U.S.C. 823(f). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, the Agency has repeatedly stated that revocation of a practitioner's registration is the appropriate sanction whenever she is no longer authorized to dispense controlled substances under the laws of the state in which she practices. *See, e.g., James L. Hooper, M.D.,* 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.,* 71 FR 39,130, 39,131 (2006); *Dominick A. Ricci, M.D.,* 58 FR 51,104, 51,105 (1993); *Bobby Watts, M.D.,* 53 FR 11,919, 11,920 (1988); *Frederick Marsh Blanton, M.D.,* 43 FR at 27,617.

According to New Jersey statute, ''Practitioners shall be registered to dispense substances in Schedules II through IV if they are authorized to dispense or conduct research under the law of this State.'' N.J. Stat. Ann. § 24:21–11(c) (West, current with laws through L. 2020, c. 109 and J.R. No. 2); *see also* N.J. Stat. Ann. § 24:21–10(a) (West, current with laws through L. 2020, c. 109 and J.R. No. 2) (''Every person who manufactures, distributes, or dispenses any controlled dangerous

[1] The RFAA includes Registrant's proposed CAP/hearing waiver.

[2] The fact that a Registrant's registration expires during the pendency of an OSC does not impact my jurisdiction or prerogative under the Controlled Substances Act (hereinafter, CSA) to adjudicate the OSC to finality. *Jeffrey D. Olsen, M.D.,* 84 FR 68,474 (2019).

[3] Under the Administrative Procedure Act, an agency ''may take official notice of facts at any stage in a proceeding—even in the final decision.'' United States Department of Justice, Attorney General's Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), ''[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.'' Accordingly, Applicant may dispute my finding by filing a properly supported motion for reconsideration of finding of fact within fifteen calendar days of the date of this Order. Any such motion shall be filed with the Office of the Administrator and a copy shall be served on the Government. In the event Applicant files a motion, the Government shall have fifteen calendar days to file a response. Any such motion and response shall be filed and served by email on the other party at the email address the party submitted for receipt of communications related to this administrative proceeding, and on the Office of the Administrator, Drug Enforcement Administration at *dea.addo.attorneys@dea.usdoj.gov.*

substance within this State . . . shall obtain a registration issued by the division in accordance with rules and regulations promulgated by it.'').

New Jersey statute defines ''practitioner'' as a ''physician.'' N.J. Stat. Ann. § 24:21–2 (West, current with laws through L. 2020, c. 109 and J.R. No. 2). It defines ''physician'' as ''a physician authorized by law to practice medicine in this or any other state.'' *Id.*

Here, the weight of the evidence in the record is that Registrant's license to practice medicine is currently suspended and that her CDS registration is inactive. In New Jersey, as already discussed, a ''practitioner'' must be a physician authorized by law to practice medicine. *Id.* As such, she is not a ''physician'' or a ''practitioner'' as New Jersey statute defines those terms. *Id.* Thus, since Registrant lacks authority to practice medicine in New Jersey and does not have an active New Jersey CDS registration, she is not eligible to dispense controlled substances in that state. N.J. Stat. Ann. § 24:21–11(c). As such, based on the overwhelming record evidence and the law in New Jersey, I find that Registrant is not authorized to dispense controlled substances in New Jersey. 21 U.S.C. 824(a)(3). Accordingly, I will order that Registrant's DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. FN5040136 issued to Anindita Nandi, M.D. This Order is effective January 11, 2021.

Timothy J. Shea,

Acting Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–748]

Bulk Manufacturer of Controlled Substances Application: Sterling Pharma USA, LLC

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of application.

SUMMARY: Sterling Pharma USA, LLC has applied to be registered as a bulk manufacturer of basic class(es) of controlled substance(s). Refer to Supplemental Information listed below for further drug information.

DATES: Registered bulk manufacturers of the affected basic class(es), and applicants therefore, may file written comments on or objections to the issuance of the proposed registration on or before February 9, 2021. Such persons may also file a written request for a hearing on the application on or before February 9, 2021.

ADDRESSES: Written comments should be sent to: Drug Enforcement Administration, Attention: DEA **Federal Register** Representative/DPW, 8701 Morrissette Drive, Springfield, Virginia 22152.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 1301.33(a), this is notice that on August 24, 2020, Sterling Pharma USA, LLC, 1001 Sheldon Drive, Suite 101, Cary, North Carolina 27513–2079, applied to be registered as a bulk manufacturer of the following basic class(es) of controlled substance(s):

Controlled substance	Drug code	Schedule
Tetrahydrocannabinols ..	7370	I

The company plans to manufacture in bulk drug code 7370 (Tetrahydrocannabinols) exclusively from hemp extract, for distribution and sale to its customers. No other activities for this drug code is authorized for this registration.

William T. McDermott,

Assistant Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–752]

Bulk Manufacturer of Controlled Substances Application: Johnson Matthey, Inc.

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of application.

SUMMARY: Johnson Matthey, Inc., has applied to be registered as a bulk manufacturer of basic class(es) of controlled substance(s). Refer to Supplemental Information listed below for further drug information.

DATES: Registered bulk manufacturers of the affected basic class(es), and applicants therefore, may file written comments on or objections to the issuance of the proposed registration on or before February 9, 2021. Such persons may also file a written request for a hearing on the application on or before February 9, 2021.

ADDRESSES: Written comments should be sent to: Drug Enforcement Administration, Attention: DEA **Federal Register** Representative/DPW, 8701 Morrissette Drive, Springfield, Virginia 22152.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 1301.33(a), this is notice that on November 2, 2020, Johnson Matthey, Inc., 2003 Nolte Drive West Deptford, New Jersey 08066–1742, applied to be registered as an bulk manufacturer of the following basic class(es) of controlled substance(s):

Controlled substance	Drug code	Schedule
Gamma Hydroxybutyric Acid.	2010	I
Marihuana	7360	I
Tetrahydrocannabinols ..	7370	I
Dihyromorphine	9145	I
Difenoxin	9168	I
Amphetamine	1100	II
Methamphetamine	1105	II
Lisdexamfetamine	1205	II
Methylphenidate	1724	II
Nabilone	7379	II
Norfentanyl	8366	II
Cocaine	9041	II
Codeine	9050	II
Dihydrocodeine	9120	II
Oxycodone	9143	II
Hydromorphone	9150	II
Diphenoxylate	9170	II
Ecgonine	9180	II
Hydrocodone	9193	II
Levorphanol	9220	II
Meperidine	9230	II
Methadone	9250	II
Methadone intermediate	9254	II
Morphine	9300	II
Thebaine	9333	II
Opium tincture	9630	II
Oxymorphone	9652	II
Noroxymorphone	9668	II
Alfentanil	9737	II
Remifentanil	9739	II
Sufentanil	9740	II
Tapentadol	9780	II
Fentanyl	9801	II

The company plans to bulk manufacture the listed controlled substances for the internal use intermediates or for sale to its customers. In reference to drug codes 7360 (Marihuana), and 7370 (Tetrahydrocannabinols), the company plans to bulk manufacture these drugs as synthetic. No other activities for these drug codes are authorized for this registration.

William T. McDermott,

Assistant Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 19–29]

Lisa Hofschulz, N.P.; Decision and Order

On June 21, 2019, the Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, DEA or Government), issued an Order to Show Cause (hereinafter, OSC) to Lisa Hofschulz, N.P. (hereinafter, Respondent) of Wauwatosa, Wisconsin. OSC, at 1. The OSC proposed the revocation of Respondent's Certificate of Registration No. MH1088182. *Id.* It alleged that Respondent is without ''authority to handle controlled substances in Wisconsin, the state in which [Respondent is] registered with DEA.'' *Id.*

Specifically, the OSC alleged that Respondent's Wisconsin ''Advance Practice Nursing Prescriber [hereinafter, APNP] license expired on September 30, 2018, and has not been renewed. As a result of the expiration of [her] APNP license, [Respondent] currently lack[s] the authority to handle controlled substances in Wisconsin.'' *Id.* at 1–2 (citing 21 U.S.C 802(21), 823(f), and 824(a)(3)).

The OSC notified Respondent of the right to request a hearing on the allegations or to submit a written statement, while waiving the right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* at 2–3 (citing 21 CFR 1301.43). The OSC also notified Respondent of the opportunity to submit a corrective action plan. *Id.* at 3 (citing 21 U.S.C. 824(c)(2)(C)).

By letter dated July 17, 2019, Respondent timely requested a hearing.[1] Hearing Request, at 1. In the Hearing Request, Respondent stated that ''[o]n May 17, 2019, Respondent applied to transfer her DEA registration from the State of Wisconsin to the State of Florida'' and that ''Respondent has a current and active Nurse Practitioner license . . . in the State of Florida.'' *Id.*

The Office of Administrative Law Judges put the matter on the docket and assigned it to Administrative Law Judge Mark M. Dowd (hereinafter, ALJ). The ALJ issued an Order for Prehearing Statements, dated July 18, 2019. The Government timely complied with the Briefing Schedule by filing a Motion for Summary Disposition on July 25, 2019 (hereinafter, Government Motion or Govt Motion). In its Motion, the Government submitted evidence that the Wisconsin Board of Nursing (hereinafter, Board) entered a Final Decision and Order with an attached Stipulation on April 12, 2018, which suspended Respondent's APNP following an investigation into unlawful prescribing practices, and Respondent therefore lacked authority to handle controlled substances in Wisconsin, the state in which she is registered with DEA. Govt Motion, at 1. The Government acknowledged that Respondent had requested a modification of her registration to Florida, but stated that the ''Government's allegations in support of revocation of Respondent's [registration] pertain solely to Respondent's current authorization to handle controlled substances in Wisconsin [] and . . . do not address any denial of Respondent's pending application for modification of that [registration.]'' *Id.* at 4. In light of these facts, the Government argued that DEA must revoke her registration. Govt Motion, at 6.

On July 31, 2019, Respondent requested an extension of time to file her Prehearing Statement and Response to Government's Motion for Summary Disposition, which the ALJ granted that same day. *See* Respondent's Unopposed Motion for Extension and ALJ's Order Granting Respondent's Unopposed Motion for Extension. On August 5, 2019,[2] Respondent filed a Response in Opposition to Government's Motion for Summary Disposition (hereinafter, Resp Opposition). Respondent argued that ''Under the Administrative Procedure[ ] Act (''APA''), '[w]hen the licensee has made timely and sufficient application for a renewal or a new license in accordance with agency rules, a license with reference to an activity of a continuing nature does not expire until the application has been finally determined by the agency.' '' Resp Opposition, at 1 (quoting 5 U.S.C. 558). Respondent, therefore, argued that the Agency is obligated to act on Respondent's application for a registration in Florida. In the alternative, Respondent argued that even if the Agency decided that it must revoke Respondent's application, then it ''should determine that the application for modification is not affected.'' *Id.* at 4.

On August 8, 2019, the ALJ issued an Order Granting the Government's Motion for Summary Disposition, and Recommended Rulings, Findings of Fact, Conclusions of Law, and Recommended Decision of the Administrative Law Judge (hereinafter, Summary Disposition or SD). The ALJ granted the Government Motion for Summary Disposition—finding that the only subject of the underlying action was Respondent's Wisconsin registration, Respondent had conceded that she had no authority in Wisconsin, and therefore, ''summary disposition of an administrative case is warranted where, as here, 'there is no factual dispute of substance.' '' SD, at 7 (citing *Veg-Mix, Inc.* v. *U.S. Dep't of Agric.,* 832 F.2d 601, 607 (D.C. Cir. 1987) (''[A]n agency may ordinarily dispense with a hearing when no genuine dispute exists.'' (citations omitted))). By letter dated September 4, 2019, the ALJ certified and transmitted the record to me for final Agency action. In that letter, the ALJ advised that neither party filed exceptions. I find that the time period to file exceptions has expired. *See* 21 CFR 1316.66.

I issue this Decision and Order based on the entire record before me. 21 CFR 1301.43(e). I make the following findings of fact.

Findings of Fact

Respondent's DEA Registration

Respondent is the holder of DEA Certificate of Registration No. MH1088182 at the registered address of 6163 Washington Circle, Wauwatosa, Wisconsin 53213. Govt Motion Exhibit (hereinafter, GX) 2, at 1. Pursuant to this registration, Respondent is authorized to dispense controlled substances in schedules II through V as a ''practitioner.'' *Id.* Respondent's registration expires on October 31, 2021, and is currently in ''active pending status.'' *Id.*

The Status of Respondent's State License

On April 12, 2018, the Wisconsin Board of Nursing issued a Final Decision and Order (hereinafter, Board Order), in which Respondent stipulated to facts and conclusions of law related to her prescribing practices. Respondent Exhibit (hereinafter, RX) C (Board Order). The Board Order was ''effective on the date of its signing.'' *Id.* at 29. According to the Board Order, Respondent ''engaged in unprofessional conduct . . . by departing from or failing to conform to the minimal standards of acceptable nursing practice that may create unnecessary risk or danger to a patient's life, health, or safety.'' *Id.* at 27. The Board suspended Respondent's professional nursing

[1] The Hearing Request was deemed filed on July 17, 2019. Order for Prehearing Statements, at 1. I find that the Government's service of the OSC was adequate and that the Hearing Request was timely filed on July 17, 2019.

[2] Respondent filed a Prehearing Statement on the same day.

license and advanced practice nurse prescriber certificate in Wisconsin for twenty-one (21) days, and further limited her license requiring that she ''not practice pain management'' and ''not return to practice in the State of Wisconsin unless she provides written notification to the Board, or its designee, of intent to return to Wisconsin at least fifteen (15) days prior to return'' at which time the Board ''may impose additional limitations upon Respondent's license.'' *Id.* at 27–28.

According to Wisconsin's online records, of which I take official notice, Respondent's Advance Practice Nurse Prescriber license status is listed as ''license is not current (Expired)'' and further states ''Not Eligible to Practice (See board order).'' [3] Wisconsin Department of Safety and Professional Services Credential/Licensing Search, *https://licensesearch.wi.gov* (last visited on date of this Order).

Based on the entire record before me, I find that Respondent currently is not licensed as an Advance Practice Nurse Prescriber in Wisconsin, the state in which Respondent is registered with DEA.

I further find, as recommended by the ALJ, that Respondent's application for modification is not the subject of this proceeding, and agree that the Government did not challenge that application modification in its OSC. *See* OSC, at 1; *see also* SD, at 7–8.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the Controlled Substances Act (CSA) ''upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing[4] of controlled substances.'' With respect to a practitioner, the DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner's registration in that state. *See, e.g., James L. Hooper, M.D.,* 76 FR 71371 (2011), *pet. for rev. denied,* 481 F. App'x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.,* 43 FR 27616, 27617 (1978).

This rule derives from the text of two provisions of the CSA. First, Congress defined the term ''practitioner'' to mean ''a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.'' 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner's registration, Congress directed that ''[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.'' 21 U.S.C. 823(f). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, the DEA has held repeatedly that revocation of a practitioner's registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper,* 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.,* 71 FR 39,130, 39,131 (2006); *Dominick A. Ricci, M.D.,* 58 FR 51,104, 51,105 (1993); *Bobby Watts, M.D.,* 53 FR 11,919, 11,920 (1988); *Frederick Marsh Blanton,* 43 FR at 27,617.

In Wisconsin, an ''advanced practice nurse'' is a registered nurse who ''has a current license to practice professional nursing'' in Wisconsin. Wis. Admin. Code N § 8.02(1) (West, Current through Wisconsin Register 776B, published August 31, 2020). An ''advanced practice nurse prescriber'' is ''an advanced practice nurse who has been granted a certificate to issue prescription orders'' under Wis. Stat. § 441.16(2). *Id.* § 8.02(2).[5]

Under the Wisconsin Uniform Controlled Substances Act (hereinafter, Act), a person must have a federal controlled substances registration in order to lawfully dispense controlled substances in Wisconsin.[6] Wis. Stat. § 961.32(1m)(a) (West, Current through 2019 Act 186, published April 18, 2020). The Act further provides that a ''practitioner'' includes an ''advanced practice nurse . . . licensed, registered, certified or otherwise permitted to . . . dispense . . . a controlled substance in the course of professional practice.'' *Id.* § 961.01(19)(a).

Here, the undisputed evidence in the record is that Respondent is not currently licensed as an APNP in Wisconsin. As such, she is not authorized to dispense controlled substances in Wisconsin, the state in which she is registered with the DEA. Because Respondent lacks authority to dispense controlled substances in Wisconsin, she is not eligible to hold a DEA registration in Wisconsin. 21 U.S.C. 823(f).

I agree with the ALJ's finding that ''[t]he subject of the instant litigation is not whether the Respondent has requested to modify her [registration] to reflect an address in Florida, but whether she has state authority to dispense controlled substances in the state in which her [registration] is currently registered, Wisconsin, which she concedes, she does not.'' SD, at 7. The current issue before me is whether Respondent has state authority in Wisconsin, and I find that she does not. *See Parth S. Bharill,* 84 FR 39014 (2019).

Although she admitted that her Wisconsin APRN license expired about forty days before she asked DEA to change the address of her registration from Wisconsin to Florida, Respondent opposed the Government's Motion for Summary Disposition and argued for my focus first to be on her request for a change of address. Resp Opposition, at 1. In doing so, as already discussed, Respondent suggested that I ignore the fact that the Show Cause Order I am adjudicating is based on Respondent's lack of authority to dispense controlled substances in Wisconsin. 21 U.S.C. 823(f) (stating that a prerequisite to receiving a registration is having authorization to dispense controlled substances in the state of requested

[3] Under the Administrative Procedure Act, an agency ''may take official notice of facts at any stage in a proceeding—even in the final decision.'' United States Department of Justice, Attorney General's Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), ''[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.'' Accordingly, Respondent may dispute my finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion shall be filed with the Office of the Administrator and a copy shall be served on the Government. In the event Respondent files a motion, the Government shall have fifteen calendar days to file a response. Any motion and response shall be filed and served by email to the other party and to the Office of the Administrator at *dea.addo.attorneys@dea.usdoj.gov.*

[4] ''[D]ispense[ ] means to deliver a controlled substance to an ultimate user . . . by, or pursuant to the lawful order of, a practitioner, including the prescribing and administering of a controlled substance . . . .'' 21 CFR 802(10).

[5] An advanced practice nurse (hereinafter, APN) who meets the requisite education, training and examination requirements, and who pays the required fee, ''shall [be] grant[ed] a certificate to issue prescription orders.'' Wis. Stat. § 441.16(2) (West, Current through 2019 Act 186, published April 18, 2020).

[6] Under Wisconsin law, ''dispensing'' a controlled substance includes ''prescribing'' a controlled substance. Wis. Stat. § 961.01(7) (West, Current through 2019 Act 186, published April 18, 2020).

registration). Respondent made no argument that convinces me to ignore the statutorily mandated show cause order process or to limit the Agency's enforcement discretion and prerogatives by addressing her modification request based merely on a chronological sequence of events. 21 U.S.C. 823(c). The *Wedgewood Village Pharmacy* case Respondent cited explicitly articulates this process and DEA's enforcement discretion and prerogatives when it states that, ''[w]hen an application for modification of an existing practitioner's registration is received by DEA, and before an approval may be given, DEA must determine whether there is any need to conduct a further investigative inquiry.'' *Wedgewood Village Pharmacy, Inc.* v. *Ashcroft,* 293 F. Supp. 2d, 462, 467 (D.N.J. 2003). Here, Respondent's loss of APRN authority in Wisconsin was reason ''to conduct a further investigative inquiry.'' *Id.* Similarly, I reject Respondent's alternative argument that, even if I revoke her registration, ''then the application for modification should continue and be granted.'' Resp Opposition, at 4.

Respondent suggested that, even if I revoke her registration, her requested modification should continue and either be granted or be the subject of an order to show cause and a demonstration that ''granting the application is not in the public interest.'' *Id.* She did not, however, address how to implement the regulatory requirement of maintaining the modification with the ''old certificate'' until its expiration when the old certificate already expired due to revocation. 21 CFR 1301.51(c).

Respondent argued that the statement in 21 CFR 1301.51(c), that a ''request for modification shall be handled in the same manner as an application for registration,'' means that the Agency is ''required to register an applicant, unless it determines that the applicant's registration would be inconsistent with the public interest.'' Resp Opposition, at 2 (citing 21 U.S.C. 823). The further support Respondent provided for her argument is the *Wedgewood Village Pharmacy* federal district court decision. *Id.* (citing *Wedgewood Village Pharmacy, Inc.* v. *Ashcroft,* 293 F. Supp. 2d at 469).

Respondent's arguments ignore the entirety of 21 U.S.C. 823. That statutory provision premises a public interest analysis, in the first instance, on an applicant's existing authorization ''to dispense . . . controlled substances under the laws of the State in which he practices.'' 21 U.S.C. 823(f). Respondent admitted that she lacks authority to dispense controlled substances in Wisconsin. Accordingly, if she were to apply for a registration in Wisconsin, the public interest portion of section 823 would not be reached due to her failure to meet the threshold eligibility requirements for a registration. Thus, Respondent's reliance on the district court's decision in *Wedgewood Village Pharmacy* is unavailing. Although Wedgewood Village Pharmacy retained its state authorization to dispense controlled substances during its litigation and, as such, its eligibility for a registration, Respondent has not.

Respondent did not address past Agency decisions concerning the precise portion of 21 CFR 1301.51(c) that she cited. Those decisions starkly show the weakness of Respondent's position. Most recently, my predecessor noted that this portion of the regulation ''does not mean that a modification request is the same as an application for a new registration in every respect.'' *Parth S. Bharill, M.D.,* 84 FR 39014 n.2 (2019) (citing *Craig S. Morris, D.D.S.,* 83 FR 36966, 36967 (2018)). In *Craig S. Morris, D.D.S.,* my predecessor had noted that ''[u]nlike a timely renewal application, a request to modify the registration address of an existing registration . . . does not remain pending after the registration expires, nor does it operate to extend when that registration expires.'' 83 FR at 36967.

Respondent also cited the Administrative Procedure Act (hereinafter, APA) as ''clearly indicat[ing] a governmental policy, by which agencies must consider a timely application before terminating a current registration,'' and 21 CFR 1301.36(i) for the proposition that ''as long as a current DEA registrant submits his renewal application in a timely manner, an Order to Show Cause in administrative revocation proceedings will not void the registration.'' Resp Opposition, at 2 (citing 5 U.S.C. 558 and *Wedgewood Village Pharmacy,* 293 F. Supp. 2d at 467). Both of these arguments fail because both section 558 of the APA and section 1301.36(i) of DEA's regulations concern applications for reregistration (renewal) or for a new registration. 5 U.S.C. 558 (''When the licensee has made timely and sufficient application for a renewal or a new license . . .''); 21 CFR 1301.36(i) (''In the event that an applicant for reregistration (who is doing business under a registration previously granted and not revoked or suspended) has applied for reregistration . . .'').

Respondent's request under 21 CFR 1301.51(c) was not to renew or obtain a new registration. Her request was ''for modification of her DEA registration, to change the address of her registration'' from Wisconsin to Florida. Resp Opposition, at 1. As discussed above, the regulations are clear that the request to modify is not an extension of an existing registration, but shall be handled in the same manner as an application. *See Cleveland J. Enmon, Jr. M.D.,* 77 FR 57,116, 57,125 (2012) (''[W]hile the address change request is pending with the DEA, the registrant is not authorized to handle controlled substances at the new location until the DEA approves the modification.'').

Accordingly, I will order that Respondent's DEA registration in Wisconsin be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. MH1088182 issued to Lisa Hofschulz, N.P. This Order is effective January 11, 2021.

Timothy J. Shea,

Acting Administrator.

[FR Doc. 2020–27239 Filed 12–10–20; 8:45 am]

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 18–13]

George Pursley, M.D.; Denial of Application

I. Introduction

On December 1, 2017, a former Acting Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, DEA or Government), issued an Order to Show Cause to George Pursley, M.D. (hereinafter, Applicant), of Augusta, Georgia. Administrative Law Judge Exhibit (hereinafter, ALJX) 1 (Order to Show Cause (hereinafter, OSC)), at 1. The OSC proposed the denial of Applicant's application for a DEA certificate of registration on the ground that his registration ''would be inconsistent with the public interest,'' citing 21 U.S.C. 823(f). *Id.*

The substantive grounds for the proceeding, as more specifically alleged in the OSC, are that Applicant unlawfully pre-signed and pre-printed prescriptions, committed violations of applicable federal and state recordkeeping requirements, unlawfully prescribed controlled substances, and, citing 21 U.S.C. 823(f)(5), did not exhibit candor during DEA's investigation. *Id.* at 2–8.

The OSC notified Applicant of his right to request a hearing on the

allegations or to submit a written statement while waiving his right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* at 9 (citing 21 CFR 1301.43). Applicant timely requested a hearing by letter dated January 3, 2018. ALJX 3 (Order for Prehearing Statements dated January 10, 2018), at 1 (interpreting ALJX 2 (Request for Hearing)).

The matter was placed on the docket of the Office of Administrative Law Judges and assigned to Administrative Law Judge (hereinafter, ALJ) Mark M. Dowd. The parties agreed to nine stipulations.[1] ALJX 8 (Prehearing Ruling dated February 12, 2018), at 1.

The hearing in this matter spanned four days and took place in Augusta, Georgia. The Recommended Rulings, Findings of Fact, Conclusions of Law, and Decision of the Administrative Law Judge (hereinafter, RD) is dated August 20, 2018. Both parties filed exceptions to the RD. Transmittal Letter, at 1. With his exceptions, Applicant filed a Motion for Leave to Supplement Evidence Post-Hearing. The Government filed an opposition to Applicant's Motion on September 12, 2018. *Id.* The ALJ denied Applicant's Motion on September 14, 2018.

Having considered the record in its entirety, I find that it establishes, by substantial evidence, that Applicant violated controlled substance recordkeeping requirements and unlawfully prescribed controlled substances. I disagree with the RD that it is in the public interest for Applicant to be granted a DEA registration. I find that Applicant's acceptance of responsibility was insufficient and that, even if it were sufficient, Applicant did not offer adequate remedial measures. Further, for the reasons stated in his Order, I agree with the ALJ's denial of Applicant's Motions for Leave to Supplement Evidence Post-Hearing.

Accordingly, I conclude that Applicant's application for a DEA registration should be denied. I make the following findings.

II. Georgia Physicians' Standard of Care

According to the Controlled Substances Act (hereinafter, CSA), ''Except as authorized by this subchapter, it shall be unlawful for any person knowingly or intentionally . . . to . . . distribute, . . . dispense, or possess with intent to . . . distribute[ ] or dispense, a controlled substance.'' 21 U.S.C. 841(a)(1). The CSA's implementing regulations state, among other things, that a lawful controlled substance order or prescription is one that is ''issued for a legitimate medical purpose by an individual practitioner acting in the usual course of his professional practice.'' 21 CFR 1306.04(a).

Applicant's registration application is for his medical practice in Georgia. As such, I also evaluate the record evidence according to the applicable laws and standard of care in Georgia.[2] The Government offered two exhibits about the standard of care in Georgia. Applicant did not object to the admission of either exhibit.[3]

The Government offered Georgia Composite Medical Board Rule 360–3–.06, entitled ''Pain Management.'' GX 4 (hereinafter, GA Pain Management Rule). The GA Pain Management Rule initially notes that section 43–34–8 of Georgia's statutes authorizes the Georgia Composite Medical Board (hereinafter, GCMB) to discipline licensees for unprofessional conduct, ''which includes conduct below the minimum standards of practice.''[4] GX 4, at 1 (360–3–.06(2)); *see also* transcript page (hereinafter, Tr.) 185 (the Government's expert, Dr. Kaufman, testifying that these standards apply to all individuals holding a medical license). With respect to prescribing controlled substances to treat pain and chronic pain, the GA Pain Management Rule states, ''Physicians cannot delegate the dispensing of controlled substances to an unlicensed person.'' GX 4, at 1 (360–3–.06(2)(a)). When ''initially prescribing'' a controlled substance to treat pain or chronic pain, ''a physician shall have a medical history of the patient, a physical examination of the patient shall have been conducted, and informed consent shall have been obtained.'' *Id.* (360–3–.06(2)(c)); *see also* Tr. 195–201 (testimony of Dr. Kaufman discussing the applicable standard of care in Georgia). The GA Pain Management Rule addresses such a non-terminal patient's prior diagnostic records in significant detail: ''[T]he physician shall obtain or make a diligent effort to obtain any prior diagnostic records relative to the condition for which the controlled substances are being prescribed and shall obtain or make a diligent effort to obtain any prior pain treatment records.'' GX 4, at 1 (360–3–.06(2)(d)). The physician ''shall'' maintain the prior treating physician's records ''for a period of at least ten . . . years.'' *Id.* If the physician, after trying diligently, is not able to obtain prior diagnostic records, the physician ''must document the efforts made to obtain the records'' and ''must order appropriate tests to document the condition requiring treatment for pain or chronic pain.'' *Id.* at 1–2.

According to the GA Pain Management Rule, when a ''physician determines that a patient for whom he is prescribing controlled scheduled substances is abusing the medication, then the physician shall make an appropriate referral for treatment for substance abuse.'' *Id.* at 2 (360–3–.06(2)(e)). For patients being treated for chronic pain with a schedule II or III controlled substance for ninety or more days, the physician ''must have a written treatment agreement with the patient and shall require the patient to have a clinical visit at least once every three . . . months to evaluate the patient's response to treatment, compliance with the therapeutic regimen through monitoring appropriate for that patient, and any new condition.'' *Id.* (360–3–.06(f)). Physicians are explicitly charged with ''respond[ing] to any abnormal result of any monitoring'' and told to ''record

[1] ''1) Prior to and on August 11, 2015, [Applicant] maintained Schedule II–V controlled substances at his office of 1219 West Wheeler Parkway, Augusta, GA 30909.

''(2) Three hundred sixteen pre-signed prescriptions were seized from [Applicant's] office on August 11, 2015.

''(3) On August 11, 2015, DEA investigators seized [Applicant's] patient sign-in list for August 6–7, 2015.

''(4) On August 11, 2015, DEA seized pre-printed, unsigned prescriptions dated August 11, 2015 from [Applicant's] office.

''(5) [Applicant] no longer works at the location listed on his application for a DEA [registration], 1219 West Wheeler Parkway, Augusta, GA 30909.

''(6) [Applicant] has not filed any materially falsified applications.

''(7) [Applicant] has not been convicted of a felony relating to a controlled substance or a List I chemical.

''(8) [Applicant] has not had his state license or registration suspended, revoked, or denied despite full disclosure to all entities and boards of the DEA investigation including, but not limited to [the Centers for Medicare and Medicaid Services (Department of Health and Human Services)], the Georgia Medical Composite Board, and the South Carolina Board of Medical Examiners.

''(9) [Applicant] has not been excluded from participation in a Medicaid or Medicare program.''

[2] *See Gonzales* v. *Oregon,* 546 U.S. 243, 269–71 (2006).

[3] Applicant did not offer any exhibit purporting to address or memorialize the Georgia standard of care.

[4] According to section 43–34–8, unprofessional conduct ''need not have resulted in actual injury to any person'' and includes ''any departure from, or failure to conform to, the minimum standards of acceptable and prevailing medical practice and shall also include . . . the prescribing or use of drugs, treatment, or diagnostic procedures which are detrimental to the patient as determined by . . . rule of the board.'' Ga. Code Ann. § 43–34–8(a)(7) (West, Westlaw: Effective January 1, 2013, to May 8, 2017). This provision of the Georgia Code also defines unprofessional conduct as failure ''to maintain appropriate medical or other records as required by board rule.'' *Id.* at § 43–34–8(a)(19).

. . . [such response] in the patient's record.'' [5] *Id.*

While the GCMB does not have a ''magic formula for determining the dosage and duration of administration for any drug,'' it ''does have the expectation that physicians will create a record that shows evaluation of every patient receiving a controlled substance prescription.'' *Id.* The need for record documentation appears throughout the Ten Steps. The evaluation record that the GCMB expects is to show (1) ''[p]roper indication for the use of drug or other therapy;'' (2) ''[m]onitoring of the patient where necessary;'' (3) ''[t]he patient's response to therapy on follow-up visits;'' (4) [a]ll rationale for continuing or modifying the therapy;'' (5) ''[d]iscussion of risks/benefits;'' (6) ''[p]eriodic medical record review;'' and (7) ''[p]rescription records.'' *Id.* at 2.

According to the Ten Steps, a ''medical history and physical examination must be obtained, evaluated, and documented in the medical records.'' The medical record documentation ''should'' address the nature and intensity of the pain, current and past treatments for pain, underlying or coexisting diseases or conditions, the effect of the pain on physical and psychological function, and history of substance abuse.'' *Id.* It also ''should document the presence of one or more recognized medical indications for the use of a controlled substance.'' *Id.* The ''workup'' is to be ''sufficient to support a diagnosis including all necessary tests, history and physical examination.'' *Id.* In sum, the ''medical record will need to document sufficient and appropriate H&P and diagnostic testing to support the diagnosis necessitating the use of controlled substances.'' *Id.*

Second, the Ten Steps calls for creation of a treatment plan, including the use of appropriate non-controlled drugs, and consideration of referrals to appropriate specialists. *Id.* The treatment plan is to ''state objectives that will be used to determine treatment success . . . and should indicate if any further diagnostic evaluations or other treatments are planned.'' *Id.* at 3.

Third, the Ten Steps calls for a determination, through trial or a documented history and physical, that non-controlled drugs are not appropriate or effective for the patient's condition. *Id.* Further, when controlled substances are used as a ''first-line therapy,'' ''it is important to document the rationale when used as such.'' *Id.*

According to the fourth step, the physician is to ''[r]eview the patient's prescription records and discuss the patient's chemical history before prescribing a controlled drug.'' *Id.*

Fifth, the physician is to ''discuss the risks and benefits of the use of controlled substances with the patient,'' taking the ''time to explain the relative risks and benefits of the drug,'' and ''record[ing] in the chart the fact that this was done.'' *Id.*

The sixth step addresses monitoring and states that regular monitoring, including ''frequent physical monitoring,'' of the patient is to be ''maintained.'' *Id.* at 4. Further, according to this step, ''it is very important to monitor the patient for the underlying condition which necessitates the drug and for the side effects of the drug itself'' when the regimen calls for prolonged need for use of the drug. *Id.*

Seventh, the ''physician must keep detailed records of the type, dosage and amount of the drug prescribed.'' *Id.* In addition, the prescribing physician ''should also monitor and personally control all refills.'' *Id.* According to this step, ''[o]ne good way to accomplish this is to require the patient to return to obtain refill authorization, at least part of the time.'' *Id.* Further, this step states that a ''patient should receive prescriptions from one physician and one pharmacy whenever possible'' while advising that it is a ''felony in Georgia for a patient to fail to disclose to his physician that he has received controlled substances of a similar therapeutic use from another practitioner at the same time.'' *Id.* This step advises physicians to contact the local police or the Georgia Drug and Narcotics Agency if they ''are aware of these situations occurring.'' *Id.*

The eighth step suggests that the ''patient's family may be a valuable source of information on the patient's response to the therapy regimen and the patient's functional status.'' *Id.* This information is important because changes ''may be symptoms of dependency or addiction.'' *Id.*

Ninth, ''[m]aintaining adequate records is extremely important.'' *Id.* According to the Ten Steps, the ''physician who carefully manages pain treatment and maintains detailed records which reflect all the steps involved in the process will be able to assess and review the treatment course and progress.'' *Id.*

The tenth of the Ten Steps states, ''Document. Document. Document. Keep accurate and complete records'' to include medical history and physical exam; diagnostic, therapeutic, and laboratory results; evaluations and consultations; treatment objectives; medications; and instructions and agreements, including any pain contracts.

The second exhibit the Government offered about the standard of care in Georgia is GCMB Rule 360–3–.02, entitled ''Unprofessional Conduct Defined,'' GX 5. The rule starts by citing two Georgia statutes for the proposition that the GCMB is authorized to take disciplinary action against licensees for unprofessional conduct. Ga. Code Ann. § 43–34–8(a)(7) (West, Westlaw effective January 1, 2013, to May 8, 2017) (authorizing the GCMB to discipline a regulated person who engages in ''any unprofessional, unethical, deceptive, or deleterious conduct or practice harmful to the public,'' explaining that the conduct or practice ''need not have resulted in actual injury to any person,'' and explicitly including ''any departure from, or failure to conform to, the minimum standards of acceptable and prevailing medical practice'' and ''the prescribing or use of drugs, treatment, or diagnostic procedures which are detrimental to the patient as determined by the minimum standards of acceptable and prevailing medical practice or rule of the board'') and **G**a. Code Ann. § 43–1–19(a)(6) (West, Westlaw effective to May 2, 2016) (containing ''general provisions'' authorizing professional licensing boards to refuse to grant a license to an applicant, to revoke a license, and to discipline a licensed person when the applicant or licensee engaged in any unprofessional conduct or practice harmful to the public that materially affects the fitness of the licensee or applicant to practice the profession or is of a nature likely to jeopardize the interest of the public, and the conduct need not result in actual injury to any person or be related to the practice of the licensed profession). The Georgia Code also authorizes the GCMB to refuse to grant a license and to

[5] The GCMB adopted ''Guidelines for the Use of Controlled Substances for the Treatment of Pain: Ten Steps'' (hereinafter, Ten Steps) on January 11, 2008. The Ten Steps are ''primarily intended to provide orientation for physicians intending to prescribe schedule II and III analgesics . . . [to treat] chronic pain conditions and do not necessarily apply to clinical conditions . . . such as acute pain management following surgery, emergency care pain management and end-of-life care.'' Ten Steps, at 1. The Ten Steps ''clarify the . . . [GCMB's] position on pain management, particularly as it relates to the use of controlled substances, to alleviate physician uncertainty and to encourage better pain management practices.'' *Id.* They are also intended to curtail drug diversion, ''a serious public safety concern for the . . . [GCMB] and law enforcement agencies.'' *Id.* The Ten Steps state that physicians ''should not fear disciplinary action from the . . . [GCMB] for ordering, prescribing, dispensing or administering controlled substances, including opioid analgesics, for a legitimate medical purpose and in the course of professional practice.'' *Id.* According to the GCMB, ''[a]dherence . . . [to the Ten Steps] will not only improve quality medical practice but will also improve the . . . [GCMB's] efficiency in its investigations by distinguishing legitimate practice from foul play.'' *Id.*

discipline a regulated person who has ''[f]ailed to maintain appropriate medical or other records as required by . . . [GCMB] rule.'' [6] Ga. Code Ann. § 43–34–8(a)(19) (West, Westlaw effective January 1, 2013, to May 8, 2017); *see also* Ga. Comp. R. & Regs. § 480–28–.02 (West, Westlaw effective 2002) (''All practitioners who dispense drugs shall comply with all record-keeping, labeling, packaging, and storage requirements imposed upon pharmacists and pharmacies with regard to such drugs and those regulations contained in this Chapter.'') and Ga. Comp. R. & Regs. § 480–28–.04(5) (West, Westlaw effective 2002) (establishing controlled substance invoice, inventory, and filing requirements).

Having read and analyzed all of the record evidence, I agree with the ALJ's determination to recognize Dr. Kaufman as an expert in the area of pain management.[7] Tr. 183. Dr. Kaufman testified that the GA Pain Management Rule establishes the minimum standard of care in Georgia for prescribing controlled substances, regardless of the prescriber's medical specialty. *Id.* at 180, 182, 192–93. He noted that a prescriber's failure to conform to the requirements of the GA Pain Management Rule is unprofessional conduct subject to disciplinary action. *Id.* at 185; GX 5, at 4 (Rule 360–3–.02(22)). Dr. Kaufman testified that prescribing controlled substances for a known or suspected habitual drug abuser or other substance abuser in the absence of substantial justification is also unprofessional conduct under Georgia law. Tr. 185, 208–10; GX 5, at 1 (Rule 360–3–.02(1)). Further, he stated that writing a controlled substance prescription for immediate family members, except in a documented emergency, constitutes unprofessional conduct. Tr. 185–86, 215–16 (''everybody knows this''); *id.* at 489–90; GX 5, at 1 (Rule 360–3.02(2)).

Dr. Kaufman's testimony provided additional detail about the standard of care for prescribing controlled substances in Georgia. Regarding the requirement that a physician review the medical history of a patient when initially prescribing a controlled substance to treat pain or chronic pain, Dr. Kaufman testified that a history ''doesn't just say, the patient has back pain. You have to say how long, how did it get hurt, what things have they tried to get better before they came to see you, what types has another physician tried, what types of evaluations have they done.'' Tr. 195. Concerning the physical examination called for by the Georgia standard of care, Dr. Kaufman testified that it has to be ''appropriate to the problem.'' *Id.* at 196.

> So, if you're saying that someone has a back problem, you have to do an examination of the back. Obviously, my examination of the back might be different than a family practitioner's. But there are some sort of basic things that are involved with a physical examination that have to be done.''

Id.

The standard of care in Georgia states that physicians ''should always start with the easiest treatment plan,'' non-addicting options, such as physical therapy, chiropractic, tens unit, and anti-inflammatories. *Id.* at 203. Through physician-patient conversations, the physician evaluates whether the treatment is working and documents ''what's going on.'' *Id.* at 204. This process may lead to the prescribing of controlled substances. *Id.*

Regarding the requirement that a physician obtain the patient's informed consent when initially prescribing a controlled substance, Dr. Kaufman explained that ''[t]here's no reason a patient should know anything about opioids and you have an obligation to explain that things like they can be habit forming, that you cannot take extra ones, because these could really cause issues, you shouldn't have alcohol.'' *Id.* at 196–97. According to Dr. Kaufman, ''It's just a general discussion and explanation of what they are getting into . . . because they might not know that it's habit forming, they may not know that they are going to develop physical dependence, and you have to explain these things.'' *Id.* at 197. In addition, the physician has an obligation to inform the patient that he ''should go to one pharmacy so that we can really keep track'' and ''should really only go to one physician to write these prescriptions.'' *Id.* The physician should tell the patient ''about the interactions with other medications or other medical problems that they might have as it relates to these medications.'' *Id.* at 196–97.

Dr. Kaufman elaborated on the requirements for a physician prescribing a Schedule II or III controlled substance for ninety or more days to treat a patient with a non-terminal condition in chronic pain. *Id.* at 189–90. He testified that the physician must have a written treatment agreement with the patient and require the patient to have a clinical visit at least once every three months. *Id.* at 190. The physician must monitor the patient's compliance with the therapy and identify any new condition. *Id.* Although the standard of care does not specify a physician's exact response to the monitoring's results, it ''insist[s] that you document that something was abnormal and encourage[s] you to write down what you are thinking and why it is you do whatever it is you do.'' *Id.* The standard of care calls for the physician to make a referral to an appropriate practitioner when the physician determines that the patient has a new condition ''beyond his scope of training.'' *Id.*

Dr. Kaufman explained that the written treatment agreement is a component of the physician's discussion with the patient being treated for more than ninety days. *Id.* at 197. The doctor explores what physical and emotional impacts the patient is experiencing. *Id.* This discussion leads to written goals for the therapy. *Id.* ''You ask . . . [the patient], can you climb the stairs, can you go to the mailbox, can you stand and make your lunch.'' *Id.* at 204.

> You want to have a plan. . . . . You want to have some things that are laid down as goals, and you tell patients, or at least . . . you're supposed to tell patients. And if were [sic] not effective, we give it a period of time and if it's not working, if we don't see some objective improvement, we're going to stop these medicines. We don't want to just turn you into a person who got a dependency on medications unless were [sic] getting somewhere, unless were [sic] doing something.

Id. at 197–98. Dr. Kaufman further explained the standard of care with an analogy to blood pressure medication—after prescribing blood pressure medication, the physician records the changes in the patient's blood pressure. *Id.* at 201–02. For patients in pain, there is a ''visual analog scale'' and, as

[6] Although not charged in this administrative proceeding, provisions of the Georgia criminal code address related matters. For example, only an authorized, registered practitioner acting in the usual course of his professional practice for a legitimate medical purpose may prescribe or order the dispensing of a controlled substance. Ga. Code Ann. § 16–13–41(f) (West, Westlaw effective since 2011).

Regarding prescriptions for Schedule II controlled substances, the Georgia criminal code states, among other things, that they ''shall be signed and dated by the practitioner on the date when issued.'' Ga. Code Ann. § 16–13–41(b) (West, Westlaw effective since 2011); *see* OSC, at 2 (unlawful pre-signed and pre-printed prescriptions allegation). The same issuance-related requirement applies to Schedule III, IV, and V controlled substances. Ga. Code Ann. § 16–13–41(d)(2) (West, Westlaw effective since 2011). Further, regarding recordkeeping, the Georgia criminal code states that persons registered to dispense controlled substances ''shall keep a complete and accurate record of all controlled substance on hand, received, . . . sold, dispensed, or otherwise disposed of and shall maintain such records and inventories in conformance with the record-keeping and inventory requirements of federal law and with any rules issued by the State Board of Pharmacy.'' Ga. Code Ann. § 16–13–39 (West, Westlaw effective since 1982); *see* OSC, at 2 (recordkeeping violations allegation).

[7] Applicant's counsel did not object to this determination. Tr. 183.

already discussed, objective improvements in the patient's physical ability. *Id.* at 202. ''[A]t the very least,'' he testified, ''you need to find out how they're doing and document whether they got better, or worse or what's going on.'' *Id.* at 204. If the current therapy does not work, the physician is to try something else. *Id.* at 205. Since there are ''severe issues, complications'' for a patient on the equivalent of more than 90 milligrams of morphine, ''it's recommended that non-specialists don't really go above that level . . . [and that] they then send those patients to specialists.'' *Id.* at 206.

Dr. Kaufman explained that a narcotics agreement advises the patient that controlled substances are ''very serious medications, they're not to be sneezed at.'' *Id.* at 198. The patient is told that a controlled substance may be taken only as prescribed, that drinking ''a whole bunch of alcohol'' while taking a controlled substance will result in ''horrible side effects,'' and that it is important to be ''very careful the first few times if they're going to be driving a vehicle or climbing a ladder, because there's all kinds of side effects from this.'' *Id.* at 199. Further, the prescribing physician is to explain the screening procedures to the patient, including urine drug screens whose results are recorded in the patient record, the possibility of pill counts, and the unavailability of early refills. *Id.* at 199, 201.

Dr. Kaufman also testified about the standard of care for the maintenance of medical records. He explained that complete medical records help prevent a physician from making a mistake due to the difficulty of recalling everything that transpired with the passage of time. *Id.* at 210. He noted that the GCMB reviews medical records to determine if the physician ''followed everything and if you did, everything is okay and there's no problem.'' *Id.* Dr. Kaufman emphatically testified that errors or sloppiness are not an ''adequate explanation of a failure to document properly'' and, ''at the end of the day, I'm responsible for anything that's in that chart'' and ''I take ownership'' of anything in the chart ''once I sign off on it,'' ''just as everybody else does.'' *Id.* at 211. He affirmed that this is the standard of care in Georgia. *Id.* at 212.

In sum, having read and analyzed the relevant legal authorities and the record evidence, I find that Dr. Kaufman's testimony about the Georgia standard of care applicable to this adjudication is credible. I give it controlling weight in this proceeding.[8] The testimony of Applicant's expert witnesses is not cited in this section because, to the extent that they addressed the applicable standard of care in Georgia, they did not detail a perspective that is contrary to the much more comprehensive and credible testimony of Dr. Kaufman.[9] Further, to the extent that the testimony of Applicant or his experts about the applicable standard of care in Georgia conflicts with Dr. Kaufman's testimony, I will credit Dr. Kaufman's testimony. *See, e.g., infra* section IV.

III. Findings of Fact

A. Applicant's Current Medical Licensure

The Georgia Composite Medical Board (hereinafter, GCMB) issued medical license number 31308 to Applicant. According to Applicant, his Georgia medical license was renewed on April 3, 2019. Applicant's Second Motion for Leave to Supplement Evidence Post-Hearing dated February 7, 2020, at 2.[10]

B. The Investigation of Applicant and His Recent Registration History

During the course of the DEA Diversion Investigator's (hereinafter, DI) duties conducting an administrative inspection at an area pharmacy, he received information from a pharmacist who claimed to have work experience at Applicant's office. Tr. 29, 82, 85; *see also id.* at 136 (testimony of Group Supervisor (hereinafter, GS)). According to that information, Applicant ''would pre-sign prescriptions and then would be filling prescriptions without evaluation or without seeing them, sometimes for long periods of time.'' *Id.* at 30; *see also id.* at 44. DI asked the pharmacist to repeat this information to DI's supervisor. *Id.* at 31. He then recommended that DEA conduct an inspection of Applicant's office. *Id.* DI's supervisor agreed. *Id.*

C. The Allegations of Dispensing and Non-Dispensing Violations

The OSC alleges four bases for the denial of Applicant's registration application: The pre-signing and pre-printing of prescriptions (citing 21 CFR 1306.04 and 1306.05; Ga. Code Ann. § 16–13–41(b)); recordkeeping violations (citing 21 U.S.C. 842(a)(5); 21 CFR 1304.04(a), (f)(1), (f)(2), and (g), 1304.11(b) and (c), 1304.21(a); Ga. Code Ann. §§ 16–13–39, 16–13–42(a)(3)); the unlawful prescribing of controlled substances (citing 21 CFR 1306.04; Ga. Code Ann. § 16–13–41(f); GCMB Rules 360–03–.02(2) and 360–03–.06; the Georgia Guidelines for the Use of Controlled Substances for the Treatment of Pain (hereinafter, GA Guidelines)); and lack of candor (citing 21 U.S.C. 823(f)(5)).[11]

There is factual agreement among the witnesses on a number of matters. When there is factual disagreement, I apply my credibility determinations and, to the extent that I agree with them, any credibility recommendations of the ALJ.[12] *See, e.g., supra,* section II; *infra* sections III.D., III.E., and IV.B.3.

[8] I agree with the RD that Dr. Kaufman ''generally offered detailed assessments of individual prescriptions and actions by the . . . [Applicant], and tied these directly to the relevant regulation or statute.'' RD, at 76. I do not, however, adopt all of the statements in the RD about Dr. Kaufman's credibility. *Id. Infra* n.28.

[9] The RD states that ''[a]s to patients DC and M.B., by all accounts, these are exceptional patients, legacy pain patients, by their history and according to Dr. Downey, warranting a different evaluation and treatment standard than that afforded non-legacy pain patients.'' RD, at 113. I find that this portion of the RD is not complete; it does not include Dr. Downey's testimony explicitly acknowledging that the provisions of the Georgia Pain Management Rule apply to all controlled substance prescriptions written since 2012, including for so-called ''legacy pain patients,'' such as patients whom an applicant treated since 1994. Tr. 601–03.

[10] My citation to this document is solely for the purpose of noting the status of Applicant's Georgia medical license and does not change my finding that the ALJ was correct to deny Applicant's motions. *Supra* section I.

[11] The Government abandoned two of the patient files (H.B. and K.K.) cited in the unlawful prescribing of controlled substances charges. Tr. 244. The Government subsequently withdrew the lack of candor charge entirely. *Id.* at 9–10.

[12] I appreciate the ALJ's work and the work of Applicant's and Government's counsel on this matter. I considered the entire record certified to me and, as the ultimate Agency decision maker, found facts, assessed credibility, and determined how the findings of fact measure against the applicable law. In doing so, I carefully considered the ALJ's RD and the parties' submissions. *See Universal Camera Corp.* v. *N.L.R.B.,* 340 U.S. 474, 487–97 (1951) (holding that the standard of proof specifically required by the Taft-Hartley Act is the same as that to be exacted by courts reviewing every administrative action subject to the Administrative Procedure Act, finding that the Courts of Appeals determine whether there is substantial evidence to support agency findings on the record as a whole, stating that the reviewing court is directed to determine the substantiality of evidence on the record including the examiner's report, and concluding, ''We do not require that the examiner's findings be given more weight than in reason and in the light of judicial experience they deserve. The 'substantial evidence' standard is not modified in any way when the Board and its examiner disagree.''); *Reckitt & Colman, Ltd.* v. *Administrator, Drug Enf't Admin.,* 788 F.2d 22, 26–27 (1986) (''The agency, and not the ALJ, is the ultimate factfinder. . . . While it is true that reviewing courts must take the ALJ's findings into account as part of the record, . . . the significance to be ascribed to them 'depends largely on the importance of credibility in the particular case.' . . . The dispute in this case centered not on the occurrence or nonoccurrence of historical facts, or other issues for which demeanor evidence would be highly probative, but rather on matters of scientific judgment and expertise. The ALJ conceded that Dr.

D. The Government's Case

The Government's documentary evidence consists primarily of medical records. The Government called three witnesses: A DEA Diversion Investigator, DI, GS, and Dr. Gary Kaufman, the Government's expert witness.

DI testified about his investigation-related actions, including execution of the Notice of Inspection (hereinafter, NOI), Applicant's voluntary consent to the inspection, Applicant's polite and cooperative demeanor, Applicant's subsequent voluntary surrender of his DEA registration, and the handwritten statement Applicant voluntarily provided. Tr. 31–44; GX 3 (DEA–82 (Notice of Inspection of Controlled Premises) that Applicant signed consenting to the inspection on August 11, 2015); GX 2 (DEA–104 (Voluntary Surrender of Controlled Substances Privileges) that Applicant signed concerning BP1660338 and XP1660338 on August 11, 2015); GX 96 (Applicant's undated handwritten statement).[13] After Applicant voluntarily surrendered his registration, DI ascertained that there were controlled substances in Applicant's office. Tr. 39, 43.

DI testified that he seized a ''clear plastic tub full of pre-signed prescriptions'' and ''[u]nsigned, pre-printed prescriptions . . . sitting right there in plain view.'' *Id.* at 43–44; GX 87 (''pre-signed prescriptions,'' including prescriptions for controlled substances); GX 88 (''pre-printed, unsigned controlled substance prescriptions''); *see also* Tr. 45–49. DI also testified that, according to Applicant and Applicant's staff, Applicant was not in the office on August 7, 2015, and he was only in the office for half of August 6, 2015. Tr. 49–53. While conducting the inspection, DI also seized patient sign-in sheets that Applicant's staff provided as evidence of the patients who were in the office on August 6 and 7, 2015. *Id.* at 56–58; GX 86. DI testified that GX 86 was ''the only thing that . . . [Applicant's] Office provided . . . [him] as evidence of who was in the office those two days,'' and that Applicant's staff did not indicate that ''there was any other evidence or sign-in logs that would indicate who was in the office on August 6th and August 7th.'' Tr. 58.

DI testified about the seizure of Applicant's patient files, DEA's analysis of those files, and the identification of ''red flags'' in those files.[14] *Id.* at 58–68; GX 51 (D.C. patient files); GX 59 (M.B. patient files); GX 77 (patient files for Applicant's daughter (hereinafter, Applicant's (or his) daughter)); GX 52–58 (prescriptions that Applicant issued to D.C.); GX 60–76 (prescriptions that Applicant issued to M.B.); GX 78–84 (prescriptions that Applicant issued to his daughter). The analysis of Applicant's patient files, according to DI's testimony, led to the retention of a medical expert to analyze the legitimacy of Applicant's controlled substance prescribing and to the issuance of subpoenas to pharmacies for prescriptions that Applicant issued to these patients and that the patients filled.[15] Tr. 68–79.

In addition to his testimony about the origin of DEA's investigation of Applicant and execution of the NOI, *id.* at 136–37, GS testified about the controlled substance records that registrants are legally required to maintain, his request for Applicant's controlled substance records, his NOI-related interactions with Applicant and Applicant's staff, and the seizure of controlled substances from Applicant's office.[16] *Id.* at 137–73.

GS explained that the mandatory controlled substance records include an initial inventory, a biennial inventory, dispensing records, purchasing records, return records, and destruction records, and that these records must be maintained in a manner that allows them to be readily retrievable upon the registrant's receipt of an authorized request for them. *Id.* at 138–40. According to GS, both federal law and Georgia law require controlled substance recordkeeping. *Id.* at 141. When he learned that Applicant had controlled substances in his office, GS asked to see ''the records for any controlled substances that you might have on hand.'' *Id.* at 138. More specifically, he testified that he asked for ''any initial inventory, the bi-annual inventory, the purchasing records, the dispensing records, any type of destruction records, any other type of record dealing with controlled substances that they would be required to maintain for a period of two years in a readily retrievable format on site.'' *Id.* at 141–42.

GS testified that Applicant's office was not able to produce any of the records that he requested. *Id.* at 142, 155, 156–57, 160, 168, 172–73.

> There was no bi-annual inventory, when a schedule of a drug changes, say . . . [as] hydrocodone did on October 6, 2014. There would have been a required new inventory for that, so there wasn't an initial inventory for that. There were no purchasing records on site. No 222s. No invoices. No destruction of controlled substance records. No controlled substance records whatsoever.

Id. at 155. GS also testified that no one in Applicant's office stated that the required controlled substance records were maintained electronically. *Id.* at 144; *see also id.* at 170. Also, GS specifically testified that (1) anyone's testimony that Applicant's ''pharmacist'' showed him ''the computer'' and that he was not ''interested in it'' is not accurate, (2) a statement that Applicant's staff ''pointed . . . [him] to two notebooks where the invoices were kept'' is not accurate, (3) he did not ask ''if all the data was on the computer,'' (4) he does not recall ''a discussion with . . . [Applicant's staff] that they should scan the filled prescriptions back into the EMR records,'' (5) he does not recall telling Applicant and Applicant's staff that ''there were some minor problems, but in general they were in compliance;'' he recalls ''telling . . . [the staff] there were recordkeeping violations, and . . . that's when . . . [he] said it could be a letter of admonition, a memorandum of agreement, civil fine, up the gamut,'' and (6) he does not recall stating that ''they would likely get a letter within the next 30 days with a corrective plan.'' *Id.* at 169–71.

GS specifically testified about the documents in RX 11F. On cross-examination, GS looked through RX 11F and concluded that he saw in there ''clear[ ] violations of the recordkeeping requirements.'' *Id.* at 166. On re-direct, GS testified that, if RX 11F had been presented to him on August 11, 2015, he ''absolutely'' would still have cited Applicant for recordkeeping violations ''[b]ecause they are not in compliance with the federal regulations of the United States [C]ode.'' *Id.* at 173.

Zelesko was 'a highly qualified and experienced chemist' but simply found the petitioner's experts more persuasive. On such matters the Administrator remains free to disagree. We conclude that the Administrator's conclusion is supported by substantial evidence.''); 5 U.S.C. 557(b) (''On appeal from or review of the initial decision [by the ALJ], the agency has all the powers which it would have in making the initial decision except as it may limit the issues on notice or by rule.'').

[13] Tr. 97 (Applicant's counsel purported to read Applicant's handwritten statement into the record during his cross-examination of DI: ''I've been practicing medicine in the State of Georgia for 25 years. I have never willfully tried to be unlawful in my practice with my patients. Evidently, today I found out that I have been in violation of federal drug code with my practice. I will surrender my DEA license and hope that a hearing would be obtained to hopefully reconcile this matter.'').

[14] DI explained that ''red flags'' is a ''term of art, that we use for signs indicative of opioid or other prescription medical abuse or diversion.'' Tr. 65.

[15] The DEA subpoena did not result in the seizure of every prescription that Applicant issued.

[16] GS also testified that Applicant was ''very cordial'' during execution of the NOI. Tr. 137.

When Applicant's staff asked him what could happen when a registrant does not produce the required records, GS testified that he outlined the possible ramifications ranging from a verbal, on-site warning to a criminal prosecution. *Id.* 148–49; *see also id.* at 171. In response to questioning by Applicant's counsel, GS stated that he had never before seen the paperwork counsel was showing him during the cross-examination. *Id.* at 163. GS testified that, had Applicant or Applicant's staff given him RX 11 during the inspection, he would not have accepted it. *Id.* GS pointed out pages in the paperwork that did not concern controlled substances, were not relevant to the required time period, or exhibited clear violations of the recordkeeping requirements. *Id.* at 163–68 (regarding RX 11F, RX 11G, RX 11I, RX 11J); *see also* Tr. 160–61 (regarding RX 11B). GS testified that, if Applicant had offered the DEA team the required records that he had requested, ''even the next day,'' the team would have taken them. Tr. 156. ''We probably would have been like, yes, that's what we're looking for. We probably would have taken them and explained that you need to make sure in the future that you have that. . . . [W]e have done that in the past,'' he testified. *Id.*

When GS learned that Applicant had voluntarily surrendered his registration, his request for required records ''became a moot point,'' and he seized the controlled substances in Applicant's office.[17] *Id.* at 156, 150–51. The DEA Form 7 memorializing the seizure of Applicant's controlled substances was admitted as GX 94. *Id.* at 153–55.

I find that GS and DI presented as objective, rational, careful law enforcement officers, whose testimonies deserves full credibility.[18] *Id.* at 28–173.

The Government's expert, Dr. Gary Kaufman, is a physician licensed in Georgia and Board certified in both pain medicine and neurosurgery. *Id.* at 175–77; GX 93 (Curriculum Vitae of Dr. Gary Kaufman, M.D.).[19] He explained that he read all of Applicant's medical files that he was given and, taking into account his training and experience, assessed Applicant's compliance with the standard of care in Georgia for the treatment and management of pain patients.[20] *Id.* at 191–93. He explicitly stated that he was not providing an opinion of the ''medical care'' Applicant provided as a family practitioner. *Id.* at 192, 399 (''I'm not in a position to say if . . . [Applicant's medical care] was good, bad or indifferent.''); *contra id.* at 1082–84 (Counsel for Applicant's statement, after admitting his client ''made mistakes,'' that ''ultimately, going back to the quality of care, even Dr. Kaufman said, look I can't criticize his quality [of] care''). The ALJ recognized Dr. Kaufman as an expert and authorized him to give expert testimony in the area of pain management. *Id.* at 183.

From his review of Applicant's medical records, Dr. Kaufman concluded that Applicant failed to comply fully with the applicable standard of care with respect to obtaining the patient's history, conducting a physical exam, and obtaining informed consent before prescribing controlled substances.[21] *See, e.g., id.* at 285–87 (concluding that Applicant's documentation of M.B.'s history is ''terrible. There's essentially no reasonable history of back pain or neck pain documented. . . . [T]here was never an examination of the back documented. There was never an examination of the neck documented, and there was . . . an x-ray in 2008, plain x-ray which didn't show anything, and the next time she had any radiographic exam and the first time she probably had a legitimate medical problem that could be treated with scheduled medications, was in 2014 when she fell and landed on her back, had a compression fracture.''). Dr. Kaufman explained that the lack of a history, a physical, and any supporting document means ''there's no diagnosis of any illness that should be treated with schedule[d] medications.'' *Id.* at 286. ''None,'' he emphasized,

[17] GS testified that DEA's inspection put him at Applicant's office ''for probably at least three hours.'' Tr. 156.

[18] The RD does not address the credibility of DI and GS in one spot. It concludes, for example, that there was ''no indication from . . . [the testimony of DI or GS] that any partiality interfered with their telling the truth'' and that DI and GS did not target Applicant for ''unequal treatment.'' RD, at 72. *See also id.* at 71–72, 94.

[19] GX 93 is incomplete; it does not reference that Dr. Kaufman has a DEA ''X'' number authorizing him to prescribe Suboxone. Tr. 181.

[20] According to the RD, the ''Government offered testimony from its expert fairly characterized as general conclusions regarding . . . [Applicant's] practice, and that the prescriptions charged were merely examples of a larger number of violative prescriptions within the files.'' RD, at 30. It concludes that ''[d]ue process requires more specificity and more notice than that'' and, as such, ''[t]hey have not been considered herein, as substantive evidence in support of the allegations.'' *Id.*

This section of the RD references three transcript cites, the first of which it quotes in footnote 30. The first transcript cite, Tr. 209–10, concerns whether Dr. Kaufman's review of Applicant's medical records indicates that any of Applicant's patients are ''suspected or known drug abusers.'' *See* RD, at n.30. Second, the RD references Tr. 213, apparently for Dr. Kaufman's statements that he identified improper prescriptions written by Applicant in ''the various case files'' although he did not attempt an exhaustive identification of every improper prescription. Third, the RD references Tr. 224, apparently when the ALJ requested clarification about Dr. Kaufman's having said that ''there were so many [prescriptions written for Applicant's daughter], it looked like this was a continual treatment'' and Dr. Kaufman responded that ''there are prescriptions that are not here, but there were quite a few more.''

I agree with the RD that conclusory statements about unspecified record evidence in this matter are insufficient to prove the allegations in the OSC. I note, though, that there is sufficient evidence in the record to prove the Applicant issued improper controlled substance prescriptions, prescribed controlled substances for suspected or known drug abusers, and wrote multiple controlled substances prescriptions for his daughter.

[21] Portions of the RD are critical of aspects of Dr. Kaufman's testimony. The results of my close examination of the RD and the portions of Dr. Kaufman's testimony it criticizes give me no pause in crediting Dr. Kaufman's testimony. For example, the RD, while explicitly stating that it is ''not directly contradictory to Dr. Kaufman's earlier testimony regarding the lack of physical exam,'' states that an MRI of D.C.'s lumbar spine in September 2013 and a chest x-ray in August 2013 ''were relevant to Dr. Kaufman's opinion regarding the absence of a back examination, and diminishes his opinion on this issue in that regard.'' RD, at 28. I disagree. Dr. Kaufman's testimony was that Applicant's treatment of DC with controlled substances ''over several years'' for ''chronic pain . . . sometimes described as chronic headaches, . . . sometimes from knee pain, . . . sometimes the back pain'' was supported by ''very inadequate and not credible at all'' physical exams ''[a]s documented'' in the medical records for DC Tr. 229. I see no evidence in the record to support the RD's conclusion that one chest x-ray and one MRI in August and September of 2013 are a sufficient basis to support Applicant's prescribing controlled substances ''over several years.'' *Id.* While Dr. Kaufman's testimony does not specify the several year period he referenced, I note that there are medical records in Applicant's file for DC dated as far back as the late 1990s. Accordingly, I disagree with the RD's statement that this portion of the record ''diminishes . . . [Dr. Kaufman's] opinion on this issue in that regard.'' RD, at 28.

By way of further example, the RD states that ''Dr. Kaufman was confronted with a referral by . . . [Applicant] to a specialist in lumbar osteoporosis in 2003, a referral to a pain specialist in 2002, and to a headache specialist in 2003'' and that those documents ''certainly qualified Dr. Kaufman's . . . opinion . . . that . . . [Applicant did not] pursue testing or alternative treatment for DC's pain issues.'' *Id.* The pain and headache specialist referrals referenced in the RD, however, concern M.B., not DC, and Dr. Kaufman cautioned against using opioids to treat headaches ''because they cause rebound headaches.'' Tr. 485–86. I do not agree that these matters ''certainly qualified Dr. Kaufman's subject opinion,'' and they do not change my positive assessment of Dr. Kaufman's testimony. RD, at 28.

Further, Dr. Kaufman's testimony about a patient named in the OSC, and whom the Government subsequently withdrew from the adjudication, shows the expert's willingness to accept Applicant's *post hoc* injection of information and justification for a prescribing pattern Dr. Kaufman had concluded was outside the applicable standard of care. Tr. 226–27 (Dr. Kaufman testifying that ''I always want to give the physician the benefit of the doubt. And after reading what he had written, I was willing to say that if that material was correct, then I would not judge that substandard care'' and noting that, under the applicable standard of care, Applicant's *post hoc* information and justification ''should have been in the [medical] records.'').

concluding that any controlled substance that Applicant prescribed for M.B. before the 2014 compression fracture was issued outside the usual course of professional practice in Georgia. *Id.; see also id.* at 326; *id.* at 343–46; *id.* at 455 (''[T]he last two months, it's very clear that since her fall she's being treated [with pain medicine] for the fall. The preceding 11 years or so, it's impossible to know why she's in treatment.'').

Dr. Kaufman found Applicant's controlled substance-related actions to be below the standard of care based on the documentation in the medical records of Applicant's practice.[22] *Id.* at 230–31 (Dr. Kaufman testifying about D.C.'s complaint of knee and back pain and Applicant's medical records for D.C.: ''So, there was no [ ] examination of the back, there was no examination of the knee. Furthermore, this is pretty disturbing, every physical examination documented a normal rectal examination, a normal prostate examination, normal testicles, and I would seriously doubt that that was done on every visit. . . . I don't think it's credible at all.''); *id.* at 231 (Dr. Kaufman testifying about Applicant's medical records for D.C.: ''[I]n the face of repeated normal prostate exams, there is a diagnosis of prostate hypoplasia, which means enlargement of the prostate. Which is something you would pick up on a prostate exam. So, if you're going to do a prostate exam every visit and you're going to give the diagnosis of an enlarged prostate, you should document, at least once, that there's an enlarged prostate. And that was never done [against the Georgia standard of care].''); *id.* at 501–05 (Dr. Kaufman agreeing that there needs to be follow through on language in a patient's medical records to meet the standard of care); *id.* at 226–27 (Dr. Kaufman determining that medical records show a pattern of prescribing that is outside the standard of care and that did not comply with Georgia's rules, and even though additional information provided by Applicant, if accurate, would change the substandard care conclusion, it is still a violation of the Georgia standard of care not to have that information in the medical records); *id.* at 451–53 (Dr. Kaufman discussing internally inconsistent information in a patient file and countering the suggestion that the inconsistency is the patient's fault by explaining that only the physician (not a scribe or the patient) is allowed to enter the history of the present illness ''[a]nd so, it was . . . [Applicant's] obligation to enter this, nobody else and it is not correct.'').[23]

Dr. Kaufman found that Applicant did not re-evaluate patients, did not always document the changes he made to a patient's therapy, and did not always document the impact of a change in therapy. *Id.* at 204, 202, 207–08, 346–48.

Dr. Kaufman concluded that Applicant did not comply with the applicable standard of care when, for example, he prescribed controlled substances for M.B., who exhibited signs of abusing, or being addicted to, controlled substances. *Id.* at 287–326 (explaining that signs of patient addiction include requesting early controlled substance refills and an abnormal urine drug screen, evaluating Applicant's response to the signs of addiction the patient exhibited over the course of years, noting that Applicant continued to prescribe controlled substances for M.B. despite signs of her addiction, thereby ''basically just feeding her addiction,'' concluding that Applicant did not apply his own protocols to his treatment of M.B. and did not implement the Georgia standard of care response to an abnormal urine drug screen, and calling Applicant's response ''a mockery of the rules,'' ''not excusable,'' ''irresponsible,'' ''beyond ridiculous,'' and outside the Georgia standard of care); *see also, e.g., id.* at 439–41 (Dr. Kaufman's explanation that the applicable standard of care for an abnormal urine screen is discussing it with the patient, documenting the abnormality in the chart, and documenting ''what you as the treating physician are thinking about this abnormality,'' and that implementation of the standard of care involves ''com[ing] up to some solution that you and the patient work out,'' and cautioning that the ''fact that [the patient] stopped being positive doesn't indicate that she all of a sudden listened to . . . [Applicant] necessarily. Perhaps she stopped obtaining that medication in whatever fashion she was obtaining it. . . . I do know that it wasn't documented and there was no explanation and this went on for quite some time.''); *id.* at 327–32, 336–42, 459 (Dr. Kaufman's testimony about Applicant's failures to comply with the standard of care regarding abnormal urine drug screens, and opinion that Applicant did too little too late because ''[i]t just keeps going on and on and there's no consequence and it's nuts, sir. This is not the standard of care.''); *id.* at 332 (concluding that Applicant's failure to refer a patient to an addiction specialist ''because she's clearly addicted to medications and clearly needs help and she's not getting any help. She's just getting more medication'' violates Georgia's pain management rules and constitutes ''unprofessional conduct.'').

Dr. Kaufman identified issues with, and testified about, Applicant's controlled substance prescribing. For example, he testified that Applicant prescribed, and continued to prescribed, controlled substances groundlessly. *Id.* at 323–26 (Dr. Kaufman stating that ''it's the same repetitive situation where there's no complaints to justify it. There's no exam that justifies this. The urines are all out of whack. The patient has been told she won't get these . . . without a letter from a pain specialist which is nowhere to be seen . . . it's all wrong. . . . [T]he patient is not needing refills and you give her refills. Something is clearly off.'').

Dr. Kaufman also testified about specific controlled substances that Applicant prescribed. More specifically, he pointed out Applicant's inadequate actions and, therefore, the illegality of, and danger posed by, Applicant's methadone prescribing for D.C. *Id.* at 232–39. He explained that methadone is used in two ways. First, it is prescribed for people who have an addiction. Tr. 232. The correct methadone dose suppresses cravings for a day and keeps the patient out of withdrawal. *Id.* In Georgia, only narcotic treatment clinics may dispense methadone, and they only dispense it to treat addiction. *Id.* at 498; *see id.* at 233–34 (''If you were to go to a methadone clinic and say, I have chronic knee pain. Could you give me methadone? They would turn you down. It's not their expertise. . . . So, anybody who is going to a methadone clinic is a person who has an addiction issue.''); *see also id.* at 605 (testimony of one of Applicant's experts (Dr. Downey), *infra* section III.E., that, in Georgia, only specially licensed narcotic treatment programs are authorized to issue methadone for addiction).[24]

Second, Dr. Kaufman explained, methadone is used as a pain medicine. *Id.* at 232. He testified that, when

[22] In the case of one of the patients whose treatment is referenced throughout this decision, M.B., Dr. Kaufman reviewed fifteen years of Applicant's medical records for the patient. Tr. 338.

[23] The context of this testimony referenced in the penultimate citation was a medical record cited in the OSC that the Government subsequently abandoned.

[24] *See, e.g.,* GX 51, at 672, 675 (Applicant's medical record documenting D.C.'s office visit on August 10, 2012, stating in the ''Diagnoses'' section that D.C. ''went to clinic this morning so he has two weeks[']' worth of methadone 190 mg QD [once a day] and would like to RTC [return to clinic] at the end of two weeks and begin to be tapered off of it to try the Suboxone for his chronic pain instead (will not be for dependence) OK per Dr P dose will be dropped to 180 mg on 8/24/2012.'').

prescribed for pain, methadone is taken more than once a day, depending on the dose. *Id.* at 233. When prescribed for pain, Dr. Kaufman elaborated, methadone ''has a lot of difficult issues related to the way it's metabolized in the body.'' *Id.* at 232. He testified that, although it constitutes ''less than five percent of the pain prescriptions in the United States,'' it accounts for thirty percent of the overdose deaths. *Id.* at 233. ''One of the reasons, is that the pain effect wears off, and the patient will take an extra pill, even though they are not supposed to,'' he explained. *Id.* ''When they take that extra pill,'' he continued, ''because of the very long half-life, the medicine tends to accumulate in the body and people stop breathing.'' *Id.*

Dr. Kaufman testified that Applicant's methadone prescriptions for D.C., with their instructions to ''taper as directed,'' were dangerous. *Id.* at 254 (Dr. Kaufman's analysis of Applicant's medical records for D.C.: ''It just says, 'taper as directed.' So, you don't know what the dosage is. I mean, if the patient was, in fact, cutting back. It should be indicated on the chart, what the dosage is at the current time. But you have no idea. I have no idea what's going. I don't think anybody did.'').[25]

Dr. Kaufman concluded that Applicant unlawfully prescribed methadone for D.C. for addiction. *Id.* at 246–48 (Dr. Kaufman's explanation for his opinion that Applicant unlawfully prescribed methadone for addiction, not for pain, in the context of the RX 17, at 60 version of Applicant's office notes for D.C.'s visit on May 28, 2013: ''I believe that . . . [methadone] is being given for addiction. It had been given for addiction in the clinic. The clinic will not treat patients for chronic pain. They are a treatment for addiction. The statement due to chronic pain, he became dependent on opioids, so there is a dependency. And the [handwritten] statement [on the RX 17, at 60 version] about where the Suboxone came from, is probably not correct, but it's not clear. . . . It's an illegally obtained substance. So, that's really a problem. Again, who knows. . . . He certainly did not get this . . . [in] a methadone clinic and . . . [Applicant] did not prescribe it until the next month. This is a problem.''); *id.* at 248–51 (continuing Dr. Kaufman's explanation for his opinion that Applicant unlawfully prescribed methadone for addiction, not for pain, in the context of the RX 17, at 64–68 version of Applicant's office notes for D.C.'s visit on June 25, 2013: ''[T]here's no mention of a back examination. It's not even listed as a possibility. There's no mention of the knee examination. And on the next page, there's further examinations, where again, no back exam, no knee exam. . . . And then the next page is the list of diagnosis. And the first diagnosis is lumbago, which means back pain. And the medicine for that is Tylenol. And it says, 'opioid dependence, counseled patient on the condition, advise him to seek group or individual therapy, anxiety state, take the medicines as prescribed.' And another diagnosis is 'long term use of medications, with a urine drug screen having been performed.' . . . [The methadone is] not being used as a pain reliever, because it's not be[ing] given several times a day, what you notice is the methadone pain effect wears off, so they're going to tell you the pain is much worse at night, because it's worn off. It's not a pain medicine anymore. It will still work to prevent you from being an addict prevent the addictive behavior, but it's not going to work for the pain. . . . But if you give somebody Suboxone, you [are] going to really make the methadone not work as a pain medicine, whatever pain medicine effect it was having. And they're going to say my pain is much, much worse. . . . Yes, [methadone was given as related to addiction a]nd very inappropriately, because they are both being given at the same time.'').[26]

Dr. Kaufman addressed other issues with Applicant's controlled substance prescribing during his testimony that Applicant prescribed both Percocet 10/650 and Lorcet 10/650, two short-term opioids, to M.B. It was ''not good medicine in any term,'' he testified. *Id.* at 447. Dr. Kaufman explained that ''there could be no other reason to give two drugs'' than for ''breakthrough pain.'' *Id.* at 446. Yet, he testified, prescribing two controlled substance pain medications for M.B. ''doesn't make much sense'' because they have the ''same duration of action.'' *Id.* at 447. Further, both Percocet and Lorcet are preparations containing 650 mg. of Tylenol. *Id.* at 446. This means that one dose of the two controlled substances is 1300 mg. of Tylenol. ''If you go above 4,000 mg. in a day,'' Dr. Kaufman continued, ''it's exceptionally bad for your liver.'' *Id.* at 447.

In the face of suggestions that M.B.'s narcotic-seeking actions were caused by obsessive compulsivity, not addiction, Dr. Kaufman answered that one of the problems he had with the patient's chart was assessing the credibility of the controlled substance prescribing given that ''there are many things that are listed, many things, many things that are stated . . . they're not always documented and in fact I would've paid it a lot more credence if I kn[e]w she did see a onetime psychiatrist . . . if she's getting some ongoing suggestions . . . but that wasn't the case.'' [27] *Id.* at 435.

Dr. Kaufman addressed the allegation that Applicant unlawfully prescribed controlled substances for his daughter. Based on his review of the record, he concluded that Applicant violated the applicable standard of care by prescribing controlled substances for his daughter because ''there was . . . nothing in . . . the chart to reflect an emergency.'' *Id.* at 490. In response to the ALJ's questioning about Adderall and Vyvanse, that the ALJ described as ''like a maintenance medication for ADHD or ADD,'' Dr. Kaufman pointed out a preauthorization insurance form. *Id.* at 494. According to the form, Dr. Kaufman testified, the physician for Applicant's daughter had cancelled the treatment, but Applicant sought to revive it ''indefinitely.'' *Id.*

Applicant's counsel suggested that a physician treating a patient or a family member might try to get insurance approval for a long period of time

[25] Applicant's testimony acknowledged dangers associated with his methadone prescribing. *Infra* section III.E.

[26] Dr. Downey's testimony on this matter was not helpful. He testified that he thinks Applicant prescribed methadone for D.C. for pain, adding that ''[i]f someone's treating pain with methadone, the prescription should say for pain, just to make it clear.'' Tr. 615, 618. Dr. Downey did not, however, identify any record evidence showing that Applicant wrote ''for pain'' on any of the methadone prescriptions he issued.

[27] In addition, according to Dr. Kaufman's testimony, Applicant's medical records for M.B. indicate that Applicant, himself, suspected that M.B.'s drug seeking behavior was due to addiction, not obsessive compulsive disorder. Tr. 454–55 (Dr. Kaufman's interpretation of Applicant's medical record for M.B.). Applicant is not an orthopedic surgeon, a neurosurgeon, or an interventionalist, so he sent M.B. to obtain Dr. Bundy's opinion about the proper treatment of her compression fracture. If Dr. Bundy said that the fracture was not bad enough for M.B. to have a procedure or to have pain medications, and if Dr. Bundy did not think anything should be done, Applicant indicated in the medical record that ''we're going to stop the pain meds and we're going to start her on Suboxone.'' This, according to Dr. Kaufman, shows that ''there's a suspicion [on the part of Applicant] that maybe . . . [M.B. is] a drug seeker and she should be put on Suboxone.'').

When Applicant's counsel suggested that Applicant's ''putting up with and that's probably a poor choice of terms, being willing to undertake to continue to treat a patient like . . . [M.B.] speaks . . . well of him, does it not,'' Dr. Kaufman responded that ''perhaps . . . [Applicant] should've referred . . . [M.B.] to somebody with more expertise.'' *Id.* at 489. Dr. Kaufman also pointed out that there are ''very different approaches to treatment'' for obsessive compulsive behavior and for addiction to narcotics, indicating that a physician is ''only going to get . . . [the patient] better by treating'' the actual cause. *Id.* at 499–500.

because, even if the physician ''may mentally think that it's not going to last that long[,] . . . you don't want to have to keep going back to the insurance company every month or every special occasion.'' *Id.* at 495. Applicant's counsel, then, asked ''[w]ouldn't it be common just to say, well this could go on for a while?'' *Id.* Dr. Kaufman replied that, ''unfortunately, this medication you cannot prescribe to a family member unless it's an emergency and if you're going to do this several times, . . . that is not the way to deal with an emergency.'' *Id.* at 495–96. He elaborated that an ''emergency is three days and then the real doctor shows up to take care of this.'' *Id.* at 496. When Applicant's counsel opined that Applicant did not commit a legal violation, Dr. Kaufman stated that ''[e]very one of these is a violation because you're saying that there were five 30-day emergencies in which a physician couldn't be reached.'' *Id.* He restated that ''a 30-day prescription is certainly not an emergency.'' *Id.*

In sum, I find that Dr. Kaufman's testimony about pain management and about the applicable standard of care is of sufficient clarity, authority, and candor to merit controlling weight in this adjudication.[28] *See also supra* section II. Accordingly, when Dr. Kaufman's testimony conflicts with other record evidence, I will credit Dr. Kaufman's testimony.

E. Applicant's Case

At the hearing, Applicant testified after calling two expert witnesses, four staff witnesses, four character witnesses, and one witness from the software company whose application he used to manage his in-office pharmacy.[29] The ALJ admitted into evidence thirty-seven Applicant exhibits, including ''a small trove of favorable letters'' from colleagues, patients, and others that the ALJ admitted over the Government's objection. RD, at 70.

During his testimony, Applicant addressed his family life, his employment experience before enrolling in medical school, including as a nursing assistant on a hospital's acute drug and alcohol detox unit, his medical internship and residency, and his varied positions as a medical doctor. Tr. 960–75. He testified about his private practice of about 4,400 active patients, his twenty-six years of emergency room work, and his simultaneous positions as medical director for the Youth Development Center of the Georgia State Department of Juvenile Justice, as Assistant Medical Director for a large hospice home health company attesting to patients' need for hospice care, as medical director for about seven nursing homes, and as attending to nine nursing homes serving ''probably'' 1,600 patients in a year and ''probably at any one time'' 900 nursing home patients. *Id.* at 975–81. In response to a question asking how he organized his staff to assist his medical practice, Applicant stated that his employees ''just try to get the patient organized so that I could see the patient, examine the patient and make a good decision, based on, you know, the information to [sic] labs and a physical exam and then we come up with an assessment and plan.'' *Id.* at 998. Applicant confirmed that RX 2 and RX 3 ''relating to protocols with controlled substances and new patients'' are ''accurate as to what . . . [he] wanted the staff to be doing as far as controlled substances and prescriptions.'' *Id.* at 1000.

Applicant used testimonial narrative to address the medical care he provided patients named in the pending OSC charges against him. *Id.* at 1002–40. In other words, he rarely relied on a specific page or pages of any of the exhibits entered into the record. *Cf. id.* at 175–508 (Dr. Kaufman's testimony). Regarding D.C., Applicant painted the portrait of a man who began seeing him in the early 1990s, who worked hard at two jobs, and who suffered from depression and anxiety related to feeling the pressure of a ''very demanding wife.'' [30] *Id.* at 1003. According to Applicant's testimonial narrative, D.C.'s ''biggest problem and . . . the reason . . . [D.C.] ended up home dependent on pain medicine is he had cluster migraines.'' *Id.* Applicant described cluster migraines as ''probably the worst type of migraine headaches'' that cause ''very severe'' pain that usually comes on at night. *Id.* He explained that cluster migraines ''might come every other night or come every night'' and ''go on for three-four months and then, all of a sudden they just go away [a]nd then, . . . [the patient] might not have a headache for two or three years. And then they would come back.'' *Id.* at 1005. D.C. started having cluster migraines ''at a very early age'' and his doctors treated them with Demerol and Phenergan, ''which was a very common thing,'' according to Applicant. *Id.* at 1004.

Applicant testified that he treated D.C.'s headaches with medicine that ''would get rid of . . . [D.C.'s] headaches,'' but if Applicant's office ''wasn't open, . . . [D.C.] ended up going to the Emergency Room . . . [and] started to use more and more Demerol and all that sort of stuff.'' *Id.* at 1008. According to his narrative, Applicant told D.C. that ''you may want to go to try and find a pain center.'' *Id.* Applicant reported that D.C. followed his advice and that the pain center ''put . . . [D.C.] on methadone and

[28] I agree with the RD that Dr. Kaufman ''generally offered detailed assessments of individual prescriptions and actions by the . . . [Applicant], and tied these directly to the relevant regulation or statute.'' RD, at 76. I do not, however, adopt all of the statements in the RD about Dr. Kaufman. *Id.* I do not agree that Dr. Kaufman's assessments of Applicant's ''prescribing practices had a notable weakness: he did not review all of the relevant patient records.'' *Id.* My review of the record does not identify any ''relevant'' patient record that Dr. Kaufman did not review. *See, e.g.,* Tr. 505–07 (ALJ's questioning about Applicant's forty-page response to Dr. Kaufman's Report and Dr. Kaufman's confirmation that he adjusted, altered, and modified his opinions accordingly.). In response to the ALJ's questions about whether Dr. Kaufman was confronted with ''additional reports or medical records'' since his ''initial opinion,'' Dr. Kaufman replied that he thinks he saw ''a few things'' that he did not have originally, ''handwritten things.'' *Id.* In response to the ALJ's follow-up question, Dr. Kaufman indicated that these items did not change his opinion. *Id.* at 506. ''I think if you do great care 90 percent of the time but miss 10 percent, you've missed 10 percent, and that's the 10 percent I think we're discussing.'' *Id.* at 506–07.

Further, I do not agree that Dr. Kaufman's analysis of Applicant's prescribing practices is impugned because Dr. Kaufman did not hear Applicant's ''justification'' for those practices. RD, at 76. Dr. Kaufman's testimony addressed, as it should, whether Applicant complied with the applicable standard of care based on Applicant's actions documented in the medical records. *Post hoc* written or oral justifications for Applicant's actions are not controlling in this proceeding. *Lesly Pompy, M.D.,* 84 FR 57,749, 57,760 (2019) (''[A] physician may not expect to vindicate himself through oral representations at the hearing about his compliance with the standard of care that were not documented in appropriately maintained patient records.''). In addition, I found nothing persuasive enough in ''Dr. Downey's critique'' to outweigh Dr. Kaufman's testimony entirely. RD, at 76; *see also supra* section II and section III.D. and *infra* section III.E. Finally, although Dr. Kaufman admitted to missing or forgetting about some pages in Applicant's voluminous exhibited medical records, he also convincingly testified that those pages did not change his opinion about Applicant's compliance with the applicable standard of care. *E.g.,* Tr. 506–07.

[29] After the Government objected that the line of questioning was outside of the Prehearing Statement and the ALJ noted that the witness was the ''third . . . describing the same procedures,'' Applicant withdrew one staff witness who had worked at the front desk and was responsible for nursing home-related billings. Tr. 946.

[30] According to Applicant, D.C. died of mesothelioma. Tr. 1002. Although D.C. was a smoker, ''which made him . . . a greater risk to develop mesothelioma,'' mesothelioma was not an issue when D.C. first began seeing Applicant. *Id.* at 1002–03. Applicant's controlled substance prescribing to D.C. at issue in this proceeding is not related to D.C.'s mesothelioma diagnosis.

Regarding Applicant's medical records, I note that at least one record states that D.C. ''never smoked.'' GX 51, at 192. Other medical records for D.C. state that he smoked. *E.g.,* GX 51, at 138 (ten cigarettes a day). Thus, Applicant's medical records do not report consistently on whether or not D.C. smoked and some of Applicant's medical records conflict with Applicant's hearing testimony.

oxycodone.'' *Id.* Although Applicant stated that he was the doctor who ''still managed . . . D.C.'s] headaches,'' he attributed D.C.'s having ''entered himself into the methadone clinic'' to three areas of pain—migraines, osteoarthritis in both knees, and chronic low back pain concluding that ''actually, you know, the methadone helped.'' *Id.* at 1008–09; *see also id.* at 1010 (confirming that D.C. received methadone from a methadone clinic).

According to Applicant, he thought that the 190 milligrams of methadone that the methadone clinic was giving D.C. was too much, causing memory issues and ''more shortness of breath and coughing.'' *Id.* at 1009–10; *see also id.* at 1101 (''Methadone has a seven-day half life. Every methadone you take is going to stay in your body for seven days. For the first four days, you get adequate pain control. The—for the whole seven days you're at risk for respiratory depression. And that's what's dangerous about the drug because at 190 milligrams, I would really be worried about some of this shortness of breath also being respiratory suppression.''). D.C. agreed ''[b]ecause he wanted to go ahead and get down.'' *Id.* at 1011.

Applicant's testimony recounted what he determined to have been successful tapering of other chronic pain patients down from methadone, stating the way he ''did it was ten milligrams every week or every two weeks.'' *Id.* ''And then, usually what I would do is wait a week before I drop them again,'' Applicant explained. He stated that he ''had a lot of success with that,'' predicted that he could get D.C. ''down to you know 30 milligrams of methadone,'' and concluded that ''then I could switch him to a short acting substance like oxycodone and give him that for a week, four days a week . . . [to] keep him from going into withdrawal.'' *Id.* at 1011–12. According to Applicant, ''we finally got him down to I think 30 milligrams and I gave him the prescription that's been brought up in testimony and oxycodone 50 milligrams.'' *Id.* at 1013. ''I gave him that prescription to help him through that period . . . when he stopped the methadone, he would not go into complete withdrawal, but it would . . . help him to get to the point where he had the methadone out of his system and . . . he could take the Suboxone,'' Applicant testified. *Id.*

Applicant stated that D.C. reported his pain was no better and he just did not feel good even though he was not in withdrawal. *Id.* When Applicant increased the amount of Suboxone, D.C. ''ended up with a rash . . . [and] couldn't tolerate it.'' *Id.* So, D.C. ''ended up back on 60 milligrams of methadone, which . . . controlled his pain.'' *Id.* Applicant's testimony did not explain his plan to use Suboxone to treat D.C.'s pain, particularly in light of his own office procedures stating that ''Suboxone is not to be used to treat pain.'' RX 3C (Orientation Manual for Dr. George C. Pursley's Office Based Treatment of Opioid Dependence with Buprenorphine/Naloxone (Informally know[n] as the Suboxone Program)), at 11; *see also id.* at 2 (''Suboxone (buprenorphine + naloxone) is an FDA approved medication for treatment of people with opiate (narcotic) dependence.''); *id.* at 4 (''Who Can Prescribe Suboxone? Not all physicians can prescribe Suboxone. To prescribe Suboxone, a physician must either be a specialist in Substance Abuse treatment or they must have completed specialized training that certifies them as a Suboxone Provider. Once a physician is certified as a Suboxone Provider, they may care for up to 30 patients during their first year of practice and up to 100 patients per year thereafter.'').

At the end of his testimonial narrative of his medical care of D.C., Applicant concluded that D.C. ''was not a diverter. He was just somebody that had pain.'' Tr. 1015. He stated that ''pain is . . . like an emergency . . . everybody's definition of an emergency is different and everybody's definition of pain is different.'' *Id.* His testimony was that ''I've learned one thing in medicine, is patients don't sit in the waiting room waiting to see you for two or three hours, if they don't have something wrong [with] them . . . [and] it's your job to figure out what's wrong,'' and ''that's one thing I've learned in treating pain or any illness, . . . most of the majority of patients, they don't lie to you.'' *Id.* Applicant did not testify that he applied any specific step of the Georgia standard of care or any Georgia requirement, whether issued by the GCMB or the Georgia legislature, as he did his ''job to figure out what's wrong.'' *Id.* He did not describe any physical examination he performed or medical data he gathered to use in his analysis or to inform his assessment of what his patients were telling him about their pain. I find that Applicant's testimonial narrative of the medical care he gave D.C. did not rebut Dr. Kaufman's criticism of it nor did it attempt to counter Dr. Kaufman's exhibit page-by-exhibit page analysis. I find that Applicant did not address, let alone acknowledge, how unusual it would be for a Georgia methadone clinic to give D.C. methadone for pain. *Id.* at 1060–61. Instead, Applicant testified that he is ''still of the belief that all the prescriptions that . . . [he] issued for D.C. in this case were issued within the usual course of professional practice,'' and that he believes he ''complied with all the relevant rules and laws dealing with the prescriptions of controlled substances to D.C.'' *Id.* at 1051.

Applicant similarly presented a testimonial narrative about the medical care he provided M.B., even including some of the same themes that were part of his testimony about D.C. He repeatedly returned to his view that M.B. ''was a very difficult and hard patient to manage, but . . . [he] took it on.'' *Id.* at 1016. Calling M.B. ''a problem patient, a person with problems . . . [a]nd unlucky or another unfortunate person in life,'' Applicant listed physical and mental health challenges that M.B. faced and endured. *Id.* at 1026, 1016–34. Possibly in an attempt to exonerate himself, Applicant emphasized his belief that the physician who treated M.B. before she became his patient started her on a controlled substance. ''I think, he had her on Oxycontin like, 30 milligrams, twice a day or something,'' Applicant stated. *Id.* at 1018. He asked ''what am I going to do with this lady'' because ''when she came to see me, she was dependent.'' *Id.* at 1022. His own office procedures provided the answer to his question, although the record does not support the conclusion that he always followed those procedures. For example, he testified that ''I think, some of her hydrocodone, she got from her husband.'' *Id.* at 1025. According to the second page of Applicant's Pain Management/Drug Addiction Contract, RX 3A, Applicant's patients' relationship with him will be terminated for ''use [of] another person's medication.'' RX 3A, at 2. By way of further example, Applicant testified that he thinks M.B. ''also got a [hydrocodone] script from Dr. Bundy, I think.'' Tr. 1025. Again, according to Applicant's Pain Management/Drug Addiction Contract, Applicant's patients' relationship with him will be terminated if they ''seek or obtain controlled substances from any other doctor or clinic.'' RX 3A, at 2. Applicant did not explain why he did not follow the terms of his own contract when he believed M.B. had violated it.

As if it conclusively established his compliance with the applicable standard of care, Applicant stated that the doses of the controlled substances he started M.B. on when she became his patient, specifically mentioning Klonopin, Adderall, and Percocet,

''pretty much'' remained the same throughout his tenure as her physician. Tr. 1034. ''If you look at from the time I picked her up,'' he stated, ''she was pretty much on the same dosages all the time. . . . [D]id she have exacerbations . . .? Yeah. But I managed her, I dealt with her, . . . that's really, I think a true picture of what I was dealing with.'' *Id.*

While he stated that M.B.'s previous physician ''sent her to a very good psychiatrist'' who diagnosed her with obsessive compulsive disorder, attention deficit disorder, anxiety disorder, and a panic disorder, he also stated that ''Blue No Choice doesn't allow us to—we don't have psychiatrists in practice.'' *Id.* at 1018–19, 1022. Applicant did not address why he did not consult with the ''very good psychiatrist'' about options for their mutual patient. Although he admitted violating the Georgia standard of care when he stated that ''you had to overlook'' M.B.'s drug screens, he did not explain or justify his conscious violations. *Id.* at 1025 (''And so, was she compliant? No. Was she dismissible? No. I mean, but if you look at obsessive compulsive disorder, the more you try to control these people, the more they [sic] going to bunk you.'').

I find that Applicant's testimonial narrative of the medical care he gave M.B. did not rebut Dr. Kaufman's criticism of it or attempt to counter Dr. Kaufman's exhibit page-by-exhibit page analysis. I find that Applicant did not testify about, or seek the admission of, a statute, regulation, or any applicable standard of care that exempts practitioners treating patients with a diagnosed mental illness from the provisions of the GA Pain Management Rule, GCMB Rule 360–3–.02, or the Ten Steps. *Id.* at 1024–26. Instead, I find Applicant testified that he ''believe[s] that all the prescriptions that . . . [he] issued to M.B. . . . [were] issued within the usual course of professional practice.'' *Id.* at 1051.

Applicant addressed the medical care he provided his daughter. He admitted treating her, explaining that he ''thought it was an emergency.'' [31] *Id.* at 1038. He specifically admitted to issuing eight controlled substance prescriptions to her between August 2014 and June 2015. *Id.* at 1056. He also admitted that he did not follow his urine drug screen-related office procedures when treating his daughter. *Id.* at 1053–54; *see also* RX 4, at 2 (ADD and ADHD patients take a urine drug screen at visits). ''I understand it is wrong in hindsight. And, you know, I'm sorry I did it,'' he stated. Tr. 1038. His testimony was that he understood the GCMB position on treating family members, ''but it's not a perfect world and it's my daughter.'' *Id.* When asked if he was willing to make a condition of being granted a registration that he ''not treat anybody under . . . what is ultimately a Georgia regulation'' about the treatment of family members, Applicant stated, ''Oh, yeah. I mean, I make amends.'' [32] *Id.* at 1040.

Applicant testified about his position on his practice's compliance with his own office protocols and also addressed his medical recordkeeping. Regarding compliance with his own office protocols, Applicant stated that we got to have some kind of, you know, ordered system in which we all work in, whether we're digging ditches . . . [or] practicing medicine.'' *Id.* at 1063. He continued: ''I think, you try to, you set protocols, you try to stick with them. Does that always happen? No. . . . [E]verything 100 percent? No.'' *Id.* He restated that ''my practice was a big practice,'' pointed out that ''what we've looked in these charts have been mainly four or five patients,'' and concluded that, ''if you look at my overall practice, . . . I don't think that's a really a good statistical sampling, if I could memorize [sic] my statistics of my practice of that many people.'' *Id.* He then admitted, again, that he's ''sure'' his ''protocols weren't 100 percent.'' *Id.* On re-direct, he added that ''I think you need to be able to deviate from a protocol if you really find that it's necessary.'' *Id.* at 1064.

Regarding his medical recordkeeping, Applicant agreed that, when he signs off on a record of a patient office visit, he accepts responsibility for everything in that record.[33] *Id.* at 1052.[34]

Applicant described the instability in his medical practice after, and the ramifications of, his voluntary surrender of his registration. *Id.* at 981–85. He testified that both Georgia and South Carolina renewed his medical licenses after his surrender, and that he was able to retain his hospital privileges on a temporary basis for a year after the surrender. *Id.* at 983, 985–97. Applicant testified that he stabilized his practice by hiring a physician whom he knew, among other ways. *Id.* at 981–82, 987. They found other physicians for Applicant's Suboxone patients but a ''lot of the . . . heart failure, hypertension guy, diabetes, whatever patients, chronic, other chronic patients, we were able to just continue taking care of those people.'' *Id.* at 988. After sixteen months, though, Applicant testified that he closed his practice. *Id.* at 992. He stated that even though his nursing home business enabled him to pay for his staff and his building, he did not have a salary. *Id.* For the sixteen months, he testified, he ''was able to live off of some of . . . [his] medical director[']s reimbursement, being a medical director.'' *Id.* After he closed his practice, he testified, ''we have been able to just do the long-term care and I do some hospice work.'' *Id.* at 993–94. Subsequently, Applicant testified that ''if my mind stays good and I can practice, I'm going to practice as long as I can. . . . I'd like to just be able to

[31] Even though the OSC does not charge it, Applicant admitted treating his wife and stated ''I treated my wife, thought I was being helpful and I understand that it was wrong and I—it is what it is.'' Tr. 1039–40. I note that the OSC alleges that Applicant treated his daughter, but not his wife. I see the record evidence documenting the dispensing of controlled substances to his wife and the RD's analysis of Applicant's testimonial admission that it was wrong for him to treat his wife. *See, e.g., id.* at 1040; RX 11F, at 66; RD, at 56, n.42. Given the content of this case, I see no reason to consider Applicant's admission that it was wrong for him to treat his wife, and I do not do so.

[32] I note that it is incumbent on Applicant to follow the applicable standard of care regardless of his DEA registration status.

[33] I disagree with the RD's conclusion concerning Applicant's testimony on Tr. 1052. RD, at 56 (''Ultimately, . . . [Applicant] accepted full responsibility for everything within the medical records for which he signed off.''). Instead, Applicant was agreeing, on cross examination, with Government Counsel that ''You also understand that when you sign a record of a patient office visit, right. When you're done, if they're there, however you did it, you would sign off on a patient record? . . . You understand that once you've signed off on it, you accepted responsibility for everything that . . . was in that record.'' Tr. 1052.

I note Applicant's testimony indicating that he knowingly sacrificed having medical records that met the standard of care so that he could take care of his patients. *Id.* at 1041 (''I think I did the best documentation. I put more—my hands on the patient and taking care of the patient then [sic] I do treatment chart. But I know that's not what we need to do, but sometimes you got to give your patients the time and not a computer.'').

[34] RD footnote 43 correctly states that recordkeeping is a ''substantive allegation . . . upon which a denial of Registration can be based.'' RD, at 56, n.43. Its statement that ''deficiencies in maintaining . . . [Applicant's] medical files . . . [were] not alleged in the Order to Show Cause'' may be referring specifically to the OSC section entitled ''Recordkeeping Violations,'' as opposed to the OSC section entitled ''Unlawful Prescribing of Controlled Substances,'' whose legal underpinnings include medical record requirements related to controlled substance prescribing. OSC, at 3–8; *supra* section II and section III.

commit my practice to long-term care, home health, hospice.'' *Id.* at 1067–68.

Applicant also testified about his in-office pharmacy. He stated that ''the reason I started it, it was—I could get people medications for, like, $10, like . . . high blood pressure medicine, diabetes medications, COPD medications and so forth, anti-inflammatories. . . . '' *Id.* at 991. ''[O]r they would do copays on these same drugs I had, excluding schedules, for $4,'' he continued. *Id.* Regarding controlled substances, Applicant testified that ''we had some patients that did not have insurance and they did not have—they had to pay cash and so, . . . [the in-office pharmacy] was good for my patients.'' *Id.* Applicant admitted that he did not have a licensed pharmacist working at his in-office pharmacy. *Id.* at 1051–52. He stated he was unaware that only a licensed pharmacist may lawfully fill a written prescription. *Id.* at 1052. Since the OSC does not charge Applicant with a violation of this requirement, his admission is not relevant to this proceeding. *See id.* at 1080–81.

After he admitted to not being ''aware'' that the only person who is allowed to fill a written prescription is a licensed pharmacist, Applicant addressed his prospective compliance with applicable state and federal medical standards in response to questions from ALJ Dowd. He testified that it is his ''intention to become fully compliant with all of the regulations.'' *Id.* at 1068. ALJ Dowd asked ''[w]hat about learning any of these regulations. . . . [N]obody knows them by heart, but . . . you're responsible for knowing . . . both the Georgia regulations as well . . . [as] the DEA regulations if you're going [to] run a doctor's office.'' *Id.* Applicant answered, after having stated that his current age is 66, that he is ''always willing to learn anything.'' *Id.* at 1068–69. He added that, ''I think, the one thing, I don't think I left a lot of dead bodies laying around.'' *Id.* at 1069.

Having read and analyzed all of the record evidence, I find that Applicant is the witness with the most at stake in this adjudication.[35] I find that, while Applicant's testimony does include reliable statements, it also includes statements that lack credibility, are implausible, and/or are not persuasive. I find that Applicant's testimony must be considered with much caution, and where his testimony conflicts with credible record evidence, I do not credit it.

The ALJ certified Applicant's first expert, Dr. John Martin Downey, as an expert in pain management and interpretation of medical records.'' *Id.* at 534. Dr. Downey testified about his education, his military service, his medical practice, his affiliations, and his involvement with the Pain and Investigation Committees of the GCMB. *Id.* at 525–34. He confirmed on the record his familiarity with three Applicant exhibits: RX 17 (concerning D.C.), RX 18, RX 19 (concerning M.B.), and RX 20 (concerning a medical record that the Government abandoned). *Id.* at 534–37. Likewise, he denied being familiar with RX 21 (concerning Applicant's daughter). *Id.* at 537. In addition, he testified that he reviewed the ''Georgia Professional Conduct Rule,'' ''the control [sic] substance guidelines and the pain management rule, I guess that would be called,'' a letter from a patient, the OSC, and Applicant's ''summaries.'' [36] *Id.* at 545–46.

Dr. Downey testified that he knows of Applicant because they practice in the same community and Applicant has referred patients to him over the years. *Id.* at 546. He referred to Applicant as a ''colleague in a sense, yes. Consulting.'' *Id.* at 547. Dr. Downey stated that he had the occasion to review the medical records for Applicant's patients who were referred to him for a pain consultation or an electrodiagnostic study, or who became his patients after Applicant closed his practice. *Id.* According to Dr. Downey, ''as a general rule,'' his medical record review of Applicant's patients did not indicate practice below the standard of care expected of doctors in Georgia. *Id.* at 547–48. ''In fact,'' he testified, ''I looked, with the patients I recall, no changes were made in their pain regimen.'' *Id.* at 548. Dr. Downey did not explain why ''no changes were made in their pain regimen'' necessarily meets the applicable standard of care. Dr. Downey admitted that he did not know if the medical records on which he based this assessment had been prepared by Applicant or by the physician Applicant hired to write all of the controlled substance prescriptions after Applicant voluntarily surrendered his registration. *Id.* at 608–12.

In Dr. Downey's opinion, Dr. Kaufman's evaluation was ''a little overly critical, because Dr. Kaufman and I are both pain specialists and critiquing a primary care physician . . . it was a little bit of an overstep to be so critical, I think.'' *Id.* at 549. Dr. Downey did not testify that Applicant was exempt from complying with GA Pain Management Rule, GCMB Rule 360–3–.02, or the Ten Steps, for example, because he is a primary care physician, not a pain specialist.

Dr. Downey stated that, taking ''as a whole'' the medical records for Applicant's patients that he reviewed for this proceeding, he ''was impressed with the care. The multiple medical conditions, managed the consultations, the bracing, the referrals to physical therapy, . . . hospitalization, post-hospitalization management. I was impressed. I would say they stack up highly.'' *Id.* at 569. He did not explain whether ''stack up highly'' meets the applicable standard of care and he did not address the standard of care for medical record required by the GA Pain Management Rule, the GCMB Rule 360–3-.02, or the Ten Steps.

Dr. Downey testified that he found, in Applicant's medical records, mentions of urine drug screens, office visits, referrals, medical testing, counseling, and pain contracts. *Id.* at 577–78. He stated that he found documentation of health, physicals, labs, x-rays, prior medical records, records from and consultations with other doctors, and ongoing evaluation and treatment. *Id.* at 580. Dr. Downey opined that Applicant treated pain diagnoses appropriately.[37] *Id.* at 579. He did not present persuasive elaboration on the connection among what he ''found'' in Applicant's documentation, his opinion that Applicant treated pain diagnoses appropriately, and the applicable standard of care.

During his testimony, Dr. Downey offered his opinion and evaluation of electronic medical records. *Id.* at 537–45. According to Dr. Downey, electronic medical records are ''one of the worst things to happen to medical practice that I can recall in my experience since 1983. . . . Being an old doctor that can't type, a lot of the things get left out.'' *Id.* at 538–39. Dr. Downey testified that electronic medical records ''took the physician contact with the patient out of the picture, put the physician's head and face and fingers into a computer, and poor records result[ed].''

[35] The RD does not address Applicant's credibility in one spot.

[36] There is no indication of the content of Applicant's ''summaries,'' and there is no admitted exhibit with this title.

[37] During his testimony, Dr. Downey offered his views, that he developed since 1995, on treating pain patients —specifically that there is ''outside pressure'' to reduce the amount of pain medicine given to legacy patients, and that treating pain patients has turned doctors into being ''almost policemen'' due to urine drug screen and prescription drug monitoring program requirements. Tr. 549–61.

Id. at 538; *see also id.* at 542. He recounted an experience he had to make the point that a Post-it note ''with just a few chicken scratches on it . . . told us more . . . than ten pages of electronic medical records that say nothing.'' *Id.* at 538–39.

Dr. Downey testified that both his and Applicant's practice used ''AdvantaChart.'' *Id.* at 539. According to Dr. Downey, this electronic medical record software has ''limited space to put physical examinations. If you're typing or trying to put in a physical examination, even with voice-activation, you'll get the 50 characters, and it stops. So you just—you give up. I gave up on it.'' *Id.* Dr. Downey also testified that ''[i]t's very common to see an error'' in electronic medical records. *Id.* at 540. About ''some of the records I saw for review of this case,'' he testified, ''obviously, the wrong button was pressed.'' *Id.* According to Dr. Downey, ''the history is somewhat reliable because that's typed in, . . . and in most of the time the plan is somewhat reliable because it's typed in. But anything between . . . is just kind of well, let's see if we can get something out of it.'' *Id.* at 540–41. Handwritten records are ''much easier'' and ''much more accurate,'' according to Dr. Downey, because ''you can write what you're thinking.'' *Id.* at 542. Dr. Downey concluded that ''records before were handwritten and you couldn't read them. . . . [T]he records now are typed . . . and . . . they tell you nothing.'' *Id.* at 541.

Whether doctors handwrite or type their medical records, Dr. Downey agreed that they ''are still required to properly document patient visits.'' *Id.* at 606. To ensure a complete medical record, Dr. Downey supplemented the electronic AdvantaCharts record with his handwritten notes. *Id.* at 607. ''Well, when I had the AdvantaCharts . . . , because I couldn't put enough information [in electronically], . . . we had a separate sheet, separate office visit sheet.'' *Id.* During cross-examination, Dr. Downey did not answer when asked whether he saw that Applicant had supplemented his AdvantaCharts electronic medical records with handwritten notes. *Id.*

Dr. Downey compared the medical records he has reviewed, apparently during his work for the GCMB physician investigations committee, with Applicant's medical records. *Id.* at 531–32, 543. According to his analysis, ''actually, [Applicant's medical records are] better than most that I see at the record requests for the Georgia Board, because there's a paragraph at the front that's the beginning. It says what's going on. There's a paragraph, again, of what's the plan, and a lot of medical records don't even have that.'' *Id.* at 543–44; *see also id.* at 578. Dr. Downey continued by stating that, although ''you can't find what the result of that office visit is going to be . . . [a]t least . . . [Applicant's] records have a plan, have a start, and that's really what you need.'' *Id.* at 544. He concluded that Applicant's records are not ''outside the usual standard of care or course of professional practice in Georgia,'' explaining his conclusion as ''that's comparing medical records across multiple specialties, over three years of doctors that received complaints, either erroneous complaints, or hassle complaints, or genuine complaints,'' and that Applicant's records are ''not unprofessional.'' *Id.* at 544–45. In other words, Dr. Downey's conclusion that Applicant's records are not ''outside the usual standard of care or course of professional practice in Georgia'' is based on his comparison of Applicant's records with the records of Georgia physicians whom the GCMB is investigating due to complaints.[38]

Dr. Downey testified that Dr. Kaufman ''implied'' that Applicant ''would be expected'' to conduct a urine drug screen, possibly referring to Applicant's legacy patients when he stated that ''[t]here was no concept of a urine drug screen back in those days.'' *Id.* at 584. Dr. Downey stated his disagreement with what he characterized as Dr. Kaufman's implication. *Id.* ''A urine screen 18 years after the first office visit,'' Dr. Downey testified, ''[i]t didn't make sense to me for that to be a criticism.'' *Id.* According to Dr. Downey, ''there is no law or regulation that says . . . [a urine drug screen] needs to be done, but it's kind of filtering through the literature. And that's what it is, it's to say what's in the system the first day they come in the office.'' *Id.; but see id.* at 624–25 (Dr. Downey's testimony that GCMB investigations of physicians inquire whether they are checking urine drug screens. ''And the answer is yes, and then they go back down to the next question. . . . [T]hey don't really delve into the . . . [urine drug screen] result. They look at are you . . . performing . . . [urine drug screens]? Are you meeting the checkmark.''). Despite his criticism of Dr. Kaufman, though, Dr. Downey admitted that the GA Pain Management Rule applies to Applicant's controlled substance prescribing since the Rule's enactment in 2012, including to the controlled substance prescriptions that Applicant subsequently wrote for patients he had been treating for years before the Rule's enactment. *Id.* at 602; *see also id.* at 600–03 (Dr. Downey's agreement that Applicant must comply with the GA Pain Management Rule (GX 4) and GCMB Rule 360–3–.02 (GX 5)).

Dr. Downey stated that he and the other members of the GCMB would be ''concerned'' if they were presented with evidence of a doctor's ''ongoing practice for a number of years . . . [of] prescribing to an immediate family [member] over and over and over, over again for prescriptions such as Adderall and Vyvanse.'' *Id.* at 613–14. He agreed that such a scenario ''starts to look less like an emergency.'' *Id.* at 614. He stated that he does not believe he would consider a doctor's seeking insurance preapproval for prescribing to a family member for an entire year to be a demonstration of emergency prescribing. *Id.*

I agree with the RD that Dr. Downey, as one of Applicant's experts, ''offered more summary opinions or assessments, and less frequently tied . . . [his] conclusions directly to specific regulatory provisions.'' RD, at 76. I also agree with the RD that Dr. Downey ''appeared to be influenced by the practicalities and realities of medical practice . . . in evaluating'' Applicant's medical practice and did not elucidate, or tie his opinions or assessments to, the applicable standard of care.[39] *Id.* The record of Dr. Downey's testimony is replete with examples.

For example, concerning electronic medical records in general and Applicant's medical records in particular, the primary focus of Dr. Downey's testimony was his opinion that electronic medical records are ''one of the worst things to happen to medical practice that I can recall in my experience since 1983'' and his self-interested conclusion that ''[b]eing an old doctor that can't type, a lot of the things get left out.'' Tr. 538–39. It is in

[38] Applicant's sixth exception urges me to adopt Dr. Downey's assessment of Applicant's medical records. Applicant Exceptions dated September 10, 2018 (hereinafter, Applicant Exceptions), at 7. I reject Dr. Downey's assessment as it is not an accurate statement of the applicable standard of care. *Accord* Tr. 591–92; *see also infra* n.39.

[39] I do not agree that Dr. Downey always ''presented his testimony in a professional, candid, and straightforward manner.'' RD, at 66; *see, e.g.,* Tr. 590 (Dr. Downey testifying that ''I hate to say this. Could you repeat that question? I forgot how I was supposed to answer that.''); *id.* at 591–92 (ALJ's statements accompanying his sustaining a relevance objection by the Government to Dr. Downey's testimony: ''Dr. Downey, you've been giving your opinion, and you've compared . . . [Applicant's] treatment and whatnot to a lot of the doctors that you've reviewed . . . for possible disciplinary action before the . . . [GCMB], but that's not the standard that we're going to use. We're going to use whether it complied with the regulations of Georgia.'').

this context of derogatory statements about electronic medical records, in general, and the resulting inadequacy of his own medical records that Dr. Downey summarily forgave the deficiencies of Applicant's medical records. While ''you can't find what the result of that office visit is going to be,'' Dr. Downey testified, ''[a]t least . . . [Applicant's] records have a plan, have a start, and that's really what you need.'' *Id.* at 544. Although acknowledging that ''[t]here are some [electronic medical record] software programs that allow a[n] unlimited amount of information,'' Dr. Downey's evaluation of Applicant's medical records did not state the applicable standard of care for medical records or address whether Applicant could have availed himself of one of the software programs with more functionality to assist his compliance with that standard. *Id.* at 539. While he testified that he, himself, resorts to adding handwritten paper records to his electronic medical records, he did not even suggest using handwritten paper records, as he did, as a way that Applicant could bring his medical records up to the applicable standard of care.

By way of further example, while stating that he is ''not complaining,'' Dr. Downey testified that ''the physicians in pain management are now almost policemen'' due to the ''opioid epidemic.'' *Id.* at 552; *see also id.* at 554 (''[T]he patient has to pay for the test that's required to prove that they are taking the medication they're taking and not taking something else, which 70 percent of the people that are in pain are compliant. And sometimes more, 80 percent.''). ''We have to monitor urine drug screens, for example, to make sure there's compliance, which is almost a legal aspect,'' he added. *Id.* at 552. He spoke extensively about his involvement in a proposal that the GCMB ''reduce the urine screen requirement from four per year to one per year because . . . [s]o many doctors are pulling away from taking care of people in pain because of the police aspect.'' *Id.* at 553.

Dr. Downey also described point of care urine drug screens as ''disappointingly inaccurate'' and spoke extensively about how the interpretation of results ''can be a challenge.'' *Id.* at 555. ''Has anyone seen one of these cups,'' he asked. *Id.* He elaborated:

> It's a plastic cup, and it's got some stripes on it, some paper stripes with chemicals in there. Urine goes in, and you try to read that chemical. If two lines show up on the paper strip, then that test is negative. If one line shows up, and that little pink line is so subtle that a lot of times three or four people have to look and say is there a line there or not? If it's not there, the test is positive for that substance. If the line is there, this is negative, and it's okay. So it can be some visual acumen challenge to determine whether it's positive or negative . . . for any particular one of those substances that it can test.

Id. at 555–56. He stated that ''[y]ou're taking that urine screen because you have to. It's state law to take it four times a year, so you take it, but the interpretation is almost anybody's guess.'' *Id.* at 557. ''It becomes a, basically, an exercise in frustration,'' he concluded. *Id.* At the forefront of Dr. Downey's testimony were what he considers to be impositions on doctors by medical, legislative, and law enforcement attempts to address the ''opioid epidemic.'' *Id.* at 552–54.

In subsequent testimony, Dr. Downey stated that the GCMB does not ''delve into the . . . [urine drug screen] result'' in evaluating a doctor's prescribing habits. *Id.* at 624–25. ''They look at are you . . . meeting that checkmark,'' he testified. *Id.* at 625. How a doctor deals with multiple, inconsistent urine drug screens is ''not even brought up,'' Dr. Downey stated. *Id.* When asked if the GCMB would intervene regarding how a doctor handles multiple, inconsistent urine drug screens, Dr. Downey answered that ''I wouldn't say never, but it hasn't happened in my three years.'' *Id.* Dr. Downey did not explain the differences between his testimony and section (2)(f) of the GA Pain Management Rule. GX 4, at 2 (360–3–.06(2)(f)) (''The physician shall respond to any abnormal result of any monitoring and such response shall be recorded in the patient's record.'').

I base my Decisions and Orders on the CSA and, as the ALJ indicated during the hearing, on all other applicable authorities. Tr. 591–92. Accordingly, I find that Dr. Downey's testimony is largely not germane and certainly not as germane to my adjudication of this matter as Dr. Kaufman's testimony. In the event of inconsistencies between the testimony of Dr. Downey and the testimony of Dr. Kaufman, I will credit Dr. Kaufman's testimony.[40]

The ALJ certified Applicant's second expert, Dr. Joseph Bailey, as an expert in general medicine after the Government's initial objection. *Id.* at 926–27; RD, at 67. Dr. Bailey retired after a thirty-three year career as Chief of Rheumatology at the Medical College of Georgia. Tr. 920. He stated that the ''loss of . . . [Applicant's] presence . . . has been a major negative,'' that Applicant ''has demonstrated, repetitively in my judgment, the highest quality of the practice of medicine that one could ask out of anyone,'' and that Applicant ''is the kind of physician that I would go to if I had illness and was in need of care.'' *Id.* at 935–36.

Dr. Bailey testified that he spent fifteen to twenty minutes reviewing M.B.'s medical records, and ''did not make an effort to go through every component of that chart. I was unable to.'' *Id.* at 941. Based on his review of the medical records for M.B., he agreed that ''M.B. had complex medical issues . . . , as well as psychiatric issues.'' *Id.*

The RD states that ''Dr. Bailey's limited review of the medical records would limit the weight given to his testimony.'' RD, at 68, n.46. I agree. Further, I find that, given the very limited relevance of Dr. Bailey's testimony to the adjudication of this matter, I see no need to assess Dr. Bailey's credibility.

Applicant also called three licensed practical nurses he employed at his practice to testify. The first one, the nurse manager at his practice (hereinafter, LPN), testified about her education, her employment history, and her current lack of employment due to the closure of Applicant's office. Tr. 637–38, 806–07. When she worked for Applicant as nurse manager, she was responsible for the staff and student schedules, and ''made sure office policies and procedures were handled.'' *Id.* at 639. She described the daily operation of Applicant's office, including Applicant's demeanor with patients and the procedures for new and existing patient office visits. *Id.* at 641–44. LPN testified that, for the six years before the practice closed, Applicant had a nurse with him during patient visits. *Id.* at 647. She testified that the nurse would help Applicant enter information into the electronic medical record. *Id.* If Applicant decided during the office visit to put the patient on a controlled substance, the nurse ''would type it up into the system'' when Applicant was with her. *Id.* The nurse would print the prescription and get it from the printer. *Id.* Applicant ''would make sure that that's exactly what was in the computer, and then he'd sign it and give it to the patient,'' LPN

[40] I do not agree that Dr. Downey's testimony was always ''sufficiently objective, detailed, plausible, and internally consistent to be generally reliable.'' RD, at 66. As already discussed, Dr. Downey's testimony is marked by his personal opinions about matters such as the state of the medical profession and legal and professional requirements currently imposed on doctors who prescribe controlled substances. I find that his reference to, and discussion of, Applicant's controlled substance prescribing documented by Applicant's medical records is virtually non-existent, and that the usefulness of his testimony to evaluate the relevant evidence pales when compared to Dr. Kaufman's testimonial contribution to the adjudication of this matter.

stated.[41] *Id.* LPN testified that Applicant ''would see . . . [patients receiving a prescription] at least once every 90 days.'' *Id.* at 649; *but see id.* at 815–16 (LPN testimony that ''[w]e didn't see . . . [Applicant's daughter] on a regular basis. . . . I wouldn't even say a few times a year. . . . Maybe once her dentist was out of town. . . . It wasn't a regular thing. It was just . . . [e]mergency kind of reasons.''). LPN testified that Applicant ''never'' signed blank prescriptions. *Id.* at 649–50.

LPN testified that the office policy for patients for whom Applicant prescribed controlled substances was a monthly urine drug screen and a visit every three months.[42] *Id.* at 644–45, 773. She stated that a patient would call the office thirty days after Applicant prescribed the controlled substance and say, ''I've had my 30 days, I'm going to come in tomorrow and pick up my prescription.'' *Id.* at 645. Then, according to LPN, ''[w]e would get the prescription ready if, after we looked at the chart and made sure that they did have a visit, and then the patient would come in the next day.'' *Id.* LPN continued to describe the controlled substance refill process by stating that ''[w]e would do a urine drug screen on them, and if they didn't fail the urine drug screen, if it was positive for what they were on and negative for what they weren't, we would get them their prescription.'' *Id.*

LPN's testimony did not explicitly state who interpreted urine drug screens administered before a controlled substance refill prescription could be given out. Her testimony, though, did not describe a role for Applicant or for the practice's Physician Assistant in the process. Her description first advised that ''[w]e would do a urine drug screen on them'' and, after explaining what passing a urine drug screen means (''it was positive for what they were on and negative for what they weren't''), she continued by stating that ''we would get them their prescription.'' *Id.* From LPN's continued use of the pronoun ''we,'' without defining it, and her use of the word ''get,'' I find that the staff, not Applicant or any registrant, interpreted urine drug screen results during the controlled substance refill process implemented in Applicant's practice.[43]

When asked what would happen if there were an abnormal urine drug screen, LPN testified that ''[w]e would send it off for a confirmation.'' *Id.* On follow-up, when asked if the ''patient would have to see anybody if there was an abnormality,'' LPN stated that ''[i]t depended on the abnormality.'' *Id.; see also id.* at 739–40. In other words, LPN did not testify that all abnormal urine drug screens required the immediate attention of a registrant, or at least the attention of a registrant before the controlled substance refill was handed out. ''[S]ay he [Applicant] had given them Klonopin before, and they were negative for Klonopin, then we would go ahead and give them their prescription . . . [and] [w]e would send it off for confirmation,'' LPN testified. *Id.* at 646. In other words, LPN's testimony distinguished between the prior action of Applicant in having prescribed the controlled substance Klonopin and the subsequent unilateral action by the staff (''we would go ahead and give them their prescription''). *Id.* LPN's testimony continued with her stating, ''Klonopin, it's a benzo[diazepine], and it's affected by light . . . [s]o then we may get a negative . . . when they've been on it before. So we would go ahead and continue the Klonopin.''[44] *Id.*

When asked if ''someone like M.B. . . . failed to [sic] test would she have to see somebody,'' LPN responded that ''[s]he would normally see'' Applicant or the Physician Assistant. *Id.* I note that LPN was not asked, and did not state, whether ''someone like M.B.'' would be *required* to see Applicant or the Physician Assistant *before* being given the controlled substance refill prescription. I find, however, that LPN's use of the word ''normally'' means that there were times when ''someone like M.B.'' would not see either Applicant or the Physician Assistant before receiving a controlled substance refill prescription. In addition, according to the ''Office Protocol and Pain Treatment'' that LPN authenticated, ''established patients'' on ''controlled meds'' visit every ninety days ''unless [urine drug screen] failure . . . then sched[ule] visit.'' RX 2, at 1. I find that the language in the Office Protocol and Pain Treatment document, ''then sched[ule] visit,'' makes clear that ''established patients'' are not required to see Applicant on the same day as the urine drug screen failure. The same Office Protocol and Pain Treatment document also instructs that the results of the urine drug screen given at the time of prescription ''pick up'' are ''scanned into chart for review'' and ''notes'' that urine drug screen ''failure, p[atien]t needs app[ointmen]t to discuss. Chart and UDS will be reviewed at time of visit, p[atien]t will be counseled and may be released from our care.'' *Id.* Thus, I find that the Office Protocol and Pain Treatment document does not make a meeting with Applicant or any registrant a prerequisite to the release of a controlled substance refill prescription. I also find that Applicant's Office Protocol and Pain Treatment document does not instruct the staff to withhold a controlled substance refill prescription in the event of an abnormal urine drug screen.

LPN testified that for ''suspicious patients, patients that failed their drug screen,'' or about ten to fifteen times a week, and for new patients, ''[t]here was a DEA website that we . . . would go on . . . [to see] what doctors they had gotten prescriptions from, if they were controlled prescriptions, when those were filled at the pharmacy, [and] what pharmacy filled it.''[45] Tr. 649, 794. I find that this testimony and the portion of the Office Protocol and Pain Treatment document stating that the ''rx website'' is only to be checked if the new patient ''states recently on controlled meds and if the pt does not have records'' are inconsistent. RX 2, at 1.

A patient who received a prescription could fill it at the pharmacy in Applicant's office. A licensed practical nurse (hereinafter, PLPN) on staff ''ran'' the pharmacy, filled prescriptions, and was responsible for maintaining the controlled substance records. Tr. 650, 807. The office manager auto-ordered the medicine for Applicant's office pharmacy. *Id.* at 651. The medicine came in prefilled, sealed, and labeled bottles. *Id.* According to LPN, the office pharmacy was opened to help patients without insurance who could not afford their medication. *Id.* at 662. ''[S]hortly after,'' she added, a ''year, year and a half after we started our pharmacy, big-name pharmacies started doing the $4 plan, where patients could go and get some of their generic medications for $4.'' *Id.* She stated that the office pharmacy ''couldn't beat $4, so we didn't do well with that.'' *Id.* LPN

[41] LPN testified that Applicant used blue watermark prescription paper and signed prescriptions in red ink. Tr. 648.

[42] According to DI, however, a urine drug screen was not required when a family member picked up the controlled substance refill prescription including, possibly, a Schedule II refill prescription. Tr. 131.

[43] The testimony of other witnesses whom Applicant called informs this finding. *Infra* section III.E.

[44] LPN testified that ''also, if you stop Klonopin that patient might have a seizure.'' Tr. 646.

[45] From the description, it appears that LPN is describing the Prescription Drug Monitoring Program, not a DEA website. *See, e.g.,* RX 10; *see also* Tr. 792–95.

continued by stating that ''our pharmacy was on auto-order, so they were automatically just sending us a standard order . . . and we ended up having to dispose of those that were expired'' since ''we didn't sell a lot of medications.'' *Id.*

LPN was at work when DEA inspected Applicant's office on August 11, 2015. *Id.* at 653. She testified that the DEA team arrived ''right after lunch'' and asked to see Applicant, the Physician Assistant, and the pharmacy. *Id.* at 653–54. She stated that she, Applicant, PLPN, and GS went to the office pharmacy. *Id.* at 654. Applicant returned to seeing patients, as permitted by the DEA team. *Id.* According to LPN, the DEA team asked her questions and asked her to get and show them things. *Id.* at 658. LPN testified that the DEA team asked her ''if we had a patient that came in at 2:00 [on August 6, 2015], and who was that patient, and did they get a prescription.'' *Id.* at 738. She reported her response as ''[w]e did not have a patient that came in on 2:00 that Thursday. We closed early that day. It was 12:30 when we closed.'' *Id.* LPN stated that Applicant was in the office on August 6, 2015, ''just to review some paperwork, review some prescriptions, sign some things,'' and that the Physician Assistant was in the office to see all of the patients who came in on August 6, 2015. *Id.* at 738–39. He was also in the office all day on August 7, 2015. *Id.* at 739. On cross-examination, LPN testified that the ''printed'' dates on RX 6 and RX 7 (August 18, 2015) mean that she could not have given the DEA team either of those documents on August 11, 2015. *Id.* at 809. Instead, she stated that the August 6 and 7, 2015 patient schedule reports she handed the DEA team are marked GX 86. *Id.* at 810.

LPN testified that the DEA team asked ''for certain records and patient paper records, which we did not have because . . . we had [electronic medical records].'' *Id.* at 658; *see also id.* at 668–69, 736–37. LPN testified that she offered to show GS the three-ring binders containing the medication information stickers attached to the corresponding filled prescription, but ''he said he didn't want to see that right then.'' *Id.* at 661, 664–65. She said that GS told her, Applicant, and PLPN that ''there were just minor issues, and . . . he would send a letter, and we would have to comply with the letter, you know, fix the issues, and he said other than that, the pharmacy was okay.'' [46] *Id.* at 666. LPN testified that Applicant told the staff that ''DEA threatened to take us all to jail, and he signed over his things.'' *Id.* at 742. She clarified on cross examination that no one on the DEA team told her that she would go to jail, only Applicant. *Id.* at 807.

During LPN's testimony, many Applicant exhibits were admitted into the record.[47] *Id.* at 746–805. LPN described RX 5A as concerning ''patients that we released from our office'' and including a list of ''[m]aybe more'' than 100 names and, annotated by her handwritten notes, ''[l]etters to different patients letting them know that they were released from our care.'' *Id.* at 774, 776, 779; *see* RX 2, at 1 (''Release from our care-pts that have been released will not be allowed to become pts again. Pts can be released for non compliance, deception, . . . [urine drug screen] failures.''); Tr. 814–15 (LPN explaining that ''[t]hings would happen'' such that instructions were not followed and precautions were not taken). I find, from my review of pages in RX 5A containing legible handwritten notes, at least five situations in which Applicant was prescribing controlled substances concurrently with another physician. RX 5A, at 28, 41, 43, 50, and 55; *cf.* Tr. 649. I see nothing in the record that explains convincingly why it took months for Applicant's office to address matters that would appear on a query of the Prescription Drug Monitoring Program. I also find at least nine instances in which Applicant continued to prescribe controlled substances despite abnormal urine drug screens. RX 5A, at 29, 46, 48, 49, 52, 76, 83, 87, and 89; *cf.* RX 2, at 1. Again, I see nothing in the record that explains convincingly the continued controlled substance prescribing.

I agree with the RD that LPN ''presented her testimony in a professional, candid, and straightforward manner'' and, ''[f]or the most part, . . . [her] testimony was sufficiently objective, detailed, plausible, and internally consistent to be reliable.'' RD, at 37. As did the ALJ, I ''merit [LPN's testimony] as generally reliable.'' *Id.* I note, though, that there are discrepancies between the testimonies of LPN and PLPN, particularly regarding the controlled substance refill process.

Applicant also called PLPN, the licensed practical nurse staffing the pharmacy, who testified about her professional education, her lack of a pharmacist license, her past employment, and her current unemployment after working for Applicant since 1999 until he closed his practice in November 2016. Tr. 819–22, 911. PLPN described the pharmacy in Applicant's office, including her duties, and how she dispensed medicine, including controlled substances, from it. *See, e.g., id.* at 820–23. She testified that the office handled the prescriptions for the nursing homes Applicant visited. *See, e.g., id.* at 837–38. She explained how Applicant's practice processed requests for refills, including administered urine drug screens, and the use of a box at the front desk as the repository for signed refill prescriptions. *Id.* at 823–38, 840–69, 889–90, 892–901, 903–12, 914–18.

According to PLPN, the process at Applicant's practice for handling requests for refills of controlled substance prescriptions started with a telephone call requesting a refill. *Id.* at 825. ''As long as it was . . . right there at the 30 days and there's no notation that they had to be seen, . . . then we—the prescription would be printed, it would be put in the folder for . . . [Applicant] to sign, so he always viewed everything, signed everything,'' she testified. *Id.* PLPN's testimony was inconsistent regarding whether Applicant always approved and signed all of the controlled substance refill prescriptions she prepared.[48] *Id.* at 832 (''He always approved them.'') *contra id.* at 826 (''Sometimes . . . [Applicant] would come around and say they need to come in.''). PLPN's testimony is consistent that Applicant did pre-sign controlled substance refill prescriptions. The prescriptions that Applicant signed were ''filed in the prescription pickup bin that we have'' at the front desk, PLPN testified. *Id.* at 827. They were filed alphabetically ''to try to find them easier,'' she added. *Id.*

When refill requesters came to the office to pick up refill prescriptions,

[46] LPN stated that ''[i]n June 2012 the State came in and inspected the pharmacy. We didn't have any problems. . . . We didn't hear anything else back from them after that. They said it was fine when they were there.'' Tr. 667–68.

[47] LPN also testified that the handwriting on one of the medical records for D.C, RX 17, at 64, ''looks like [Applicant's spouse's] handwriting . . . [t]hat was added later. That wasn't part of the patient's record.'' Tr. 805; *see also supra* section III.D. (Dr. Kaufman's testimony that the handwritten statement in DC's medical records about where the Suboxone came from is probably not correct, yet the Suboxone was an illegally obtained substance, a problem that Applicant did not address).

[48] Counsel's question to PLPN was not specific (''We may have covered this in part, but I would like to make sure we cover it in depth. When the patient came to the office to pick up a . . . prescription, what was the procedure that was followed?). Tr. 831–32. Nevertheless, the context of PLPN's testimony makes clear that she was describing the procedure followed for picking up controlled substance refill prescriptions because she stated that, after the pre-signed refill prescription was located in the box up front, ''then they would put into the system for a urine drug screen.'' *Id.* at 832. According to the Office Protocol and Pain Treatment document, it is controlled substance refill prescriptions that involved a urine drug screen. RX 2, at 1.

they would first have a urine drug screen. *Id.* at 826. PLPN described how she and ''the office'' monitored the submission of urine samples. *Id.* at 833. She also described how the staff interpreted the urine sample. *Id.* at 834. ''They would check the temperature. They were also looking at the color, and . . . the panel on the cup would tell them what substance was in the urine, and there's . . . we had a sheet that was a checklist. As to whether it was positive or negative, you would check, you know,'' she testified. *Id.* She testified that ''what they're checking for is to make sure the medications they were prescribed were in the patient's system and nothing else.'' *Id.* at 835. Based on PLPN's testimony, I find that she or other staff in Applicant's practice, not Applicant or a registrant, interpreted and analyzed urine samples and determined if the urine drug screen was normal or abnormal.

PLPN testified that ''[i]f their urine drug screen was good, then they would be able to get their prescriptions.'' *Id.* If the urine drug screen was not good, ''we would take them and put them in a room, so that . . . [Applicant] could see them and discuss the test,'' she stated. *Id.* at 836; *see also id.* at 826 (''[T]hey have to be put in a room and be seen by'' Applicant if the urine drug screen showed the presence of marijuana.).

PLPN's testimony was not internally consistent about Applicant's office policy regarding the release of a controlled substance refill prescription and whether Applicant or any registrant first met with the person who failed the urine drug screen before determining whether the pre-signed refill should be released. On one occasion, PLPN testified that ''if they failed'' the urine drug screen, LPN would say ''you've got to come in and talk to'' Applicant. *Id.* at 828. On another occasion, PLPN testified that if a urine drug screen was bad, such as showing marijuana, ''they have to be put in a room and be seen'' by Applicant). *Id.* at 826; *see also id.* at 836. PLPN's testimony about the process implemented prior to the time Applicant was scheduled to be out of town indicates that the staff was pre-authorized to release a controlled substance refill prescription even when the urine drug screen was abnormal and before a meeting with Applicant or any registrant took place.

The process at Applicant's practice that PLPN testified took place before Applicant went out of town was that ''some of us girls would get together and figure out, okay, we need to look back on the schedule of who come [sic] in 30 days prior on those days.'' *Id.* Based on that research, the ''girls'' identified what prescriptions were needed and who needed to be ''squeezed'' in so that Applicant saw them before he went out of town. *Id.* If someone ''failed a urine drug screen'' when Applicant was out of town, PLPN testified that ''we would defer that to . . . [LPN], and most of the time, you know, it was always sent off for confirmation . . . [a]nd a lot of time she was—you've got to come in and talk to'' Applicant. *Id.* at 828. By testifying that ''a lot of time'' LPN stated ''you've got to come in and talk to'' Applicant, PLPN was stating, at a minimum, that there were times when someone who failed the urine drug screen received the controlled substance refill prescription that Applicant had pre-signed without having to speak with Applicant. *Id.* PLPN's testimony does not address whether those whom LPN told ''you've got to come in and talk to'' Applicant received the pre-signed controlled substance refill prescription before subsequently meeting with Applicant. *Id.*

PLPN testified that the office manager handled ordering for the pharmacy. *Id.* at 901–03. PLPN addressed pharmacy-related documents that Applicant moved into evidence, including interactions with the DEA team about the pharmacy and pharmacy-related documents. *Id.* at 860–68, 873–98.[49]

Applicant also called the licensed practical nurse who staffed him during patient office visits (hereinafter, SLPN). She testified about her professional education, her current employment, and her duties in Applicant's practice. *Id.* at 948–49. She testified that she stayed with Applicant ''during the day to see all of his patients.'' *Id.* at 949. She entered the information into the electronic medical record that Applicant told her as he stood over her shoulder, she stated. *Id.* She added that Applicant also told her things that he wanted her ''to change and always made sure my spelling was correct and things of that nature.'' *Id.*

When asked about ''what appear to be template statements about advice about pain'' in the medical records, SLPN stated that a ''lot of the stuff was very repetitive.'' *Id.* at 954. ''[T]he plan of action for the patients is kind of, you know, the same,'' she testified. *Id.* She stated that Applicant ''always would tell patients to . . . take the least amount of medication possible'' and that ''[i]f they could taper off the medication that would be great. . . . [Applicant] would tell them . . . you can do it as slow as possible, even it [sic] just meant a ½ a pill every other day. . . . He would suggest swimming and stretches and exercises and physical therapy.'' *Id.* at 949–50; *see also id.* at 954–55 (When asked if Applicant ''discussed'' with patients ''every time'' and ''reminded'' them ''of these very basic physical therapy, swimming, . . . all the stuff that is in the pain plans,'' SLPN answered ''Yes. He would encourage them constantly to do those things, yes. Every visit, he would go through the same things, over and over and over with them.'').

According to SLPN, someone whose office urine drug screen was abnormal was not ''allowed to receive their medications unless . . . [Applicant] met with them.'' *Id.* at 956. Applicant would sometimes say ''there's lots of false positives in the cups in the office. False negatives, false positives,'' she testified. *Id.* She continued her testimony by stating that ''[i]f the patient, you know, disagreed with what was being said, . . . [Applicant] might give them one week's worth of medicine, send it to the lab and say, you got [to] come back in a week and we'll review the lab results.'' *Id.; see also id.* at 955–56 (SLPN's agreeing that Applicant met with the patient when the urine drug screen was confirmed.).

On cross-examination, SLPN testified that Applicant used Suboxone ''to help take people off opioids . . . and to treat pain as well.'' *Id.* at 958. On re-direct, however, when SLPN was asked if Applicant ever used Suboxone to treat pain, she did not answer the question directly. *Id.* Instead, she stated that ''sometimes patients would say that they felt like it controlled their pain . . . because you're not going through withdrawals having that pain.'' [50] *Id.*

Applicant also called a member of his office staff whose in-office employment tenure was almost six years. *Id.* at 944. She continued handling medical billing for Applicant's nursing home practice after he closed his office practice. *Id.* at 945. After some questioning, the Government objected to her testimony as being outside the parameters stated in Applicant's Prehearing Statement. *Id.* at 946. As he considered the objection, the ALJ noted that she was the third witness

[49] *See infra* n.50 regarding the reliability of PLPN's testimony.

[50] I do not see in the RD an assessment of the reliability of the testimony of PLPN or SLPN that parallels its assessment of the reliability of LPN's testimony. The topics covered by the testimonies of PLPN and SLPN are similar to the topics covered by LPN's testimony. The RD does not question the general reliability of the testimony of PLPN or SLPN and, based on my review, I find no reason to do so. As such, as with LPN's testimony, I merit the testimonies of PLPN and SLPN as generally reliable. I note again, though, that there are discrepancies among the testimonies of LPN, PLPN, and SLPN, particularly regarding the controlled substance refill process.

describing the same front desk protocols and procedures. *Id.* Before the ALJ ruled on the objection, Applicant's counsel withdrew the witness. *Id.* at 946–47.

Applicant called the Chief Information Officer (hereinafter, CIO) of the software company whose application he used to manage his in-office pharmacy. *Id.* at 671. CIO's testimony described the application's functionalities, including how it is able to interface with external data, how it tracks in real time inputted data and changes, and what reports it can generate. *Id.* at 672–709. The software does not, however, interface with distributor invoices or order forms such as DEA–222s. *Id.* at 710.

According to the RD, CIO ''presented his testimony in a professional, candid, and straightforward manner.'' RD, at 49. In addition, the RD concludes that CIO's testimony was ''impartial, objective, detailed, plausible, and internally consistent.'' *Id.* I agree with the RD and, as the RD did, I merit CIO's testimony as fully credible. *Id.*

The first character witness whom Applicant called was Joseph Newman, a former federal criminal prosecutor for the Southern District of Georgia and, at the time of his testimony, a part-time *pro tem* and substitute Judge in the State Court of Chatham County. Tr. 510. Judge Newman testified that he has known Applicant socially for eighteen years due to the longstanding, since childhood, friendship of their wives. *Id.* at 512–14. While he testified that he is not a member of the Augusta community, he also testified that Applicant's reputation in the community for being truthful and law abiding is ''good'' and, therefore, that he would ''absolutely'' believe him ''under oath.'' *Id.* at 514. He testified that, from his social conversations and dealings with Applicant, that Applicant is ''an extremely knowledgeable doctor with a broad range of medical knowledge . . . [who] has always administered great concern to his patients and the way he goes about practicing medicine.'' *Id.* at 515. He testified that he believes the Augusta community shares his sentiments as he underlined that he is ''not really a member of the Augusta community as such.'' *Id.* The Government did not cross-examine this witness.[51]

The second character witness whom Applicant called was Dr. Paul Allen Biladou, a retired general internist and oncologist who also served on the faculty of the Medical College of Georgia. *Id.* at 721. Dr. Biladou testified that he thinks he knows Applicant ''pretty well personally, and medically.'' *Id.* at 722–23. He stated that the individuals whom he knows whom Applicant ''treated . . . for both general medical conditions, as well as helping people with substance abuse . . . [had] good outcomes . . . [and] spoke highly of him.'' *Id.* at 723. Dr. Biladou testified that he is familiar with Applicant's reputation for truthfulness in the community and in the medical profession, and that reputation is good. *Id.* at 723–24. He stated that Applicant provided an important service to the community when he was practicing and that he would like to see Applicant get his DEA certificate back. *Id.* at 724. The Government did not cross-examine Dr. Biladou.[52] *Id.*

The third character witness whom Applicant called was Dr. Justin Voich Bundy, an orthopedic surgeon in August, Georgia. *Id.* at 725. Dr. Bundy testified that Applicant took care of ''a lot of . . . [his] patients over the past six to seven years'' and ''assume[s he knows Applicant] very well.'' [53] *Id.* at 726. Dr. Bundy testified that he is familiar with Applicant's reputation for truthfulness in the community and in the medical profession, and that reputation is good. *Id.* at 727. He stated that Applicant's practice provided a needed service to the community and that he believes it is in the public's interest for Applicant to get his DEA certificate of registration back. *Id.* at 728–29. The Government did not cross-examine this witness.[54] *Id.* at 730.

The fourth character witness whom Applicant called was Earl Wright, a pharmacist for about forty-eight years who became familiar with Applicant in the mid-1990s. *Id.* at 731, 734. He testified that Applicant double-signed prescriptions in red ink and that he has not seen any other doctor do that. *Id.* at 734. According to Mr. Wright, Applicant and his office ''have always been very receptive to resolving whatever questions we have'' about Applicant's patients and prescriptions. *Id.* at 735. Mr. Wright stated that Applicant's patients ''speak well of him . . . [and t]hat says a lot for him.'' *Id.* He testified that thinks it would be in the public's interest for Applicant to have a DEA certificate of registration. *Id.* The Government did not cross-examine this witness.[55] *Id.*

In addition, RX 22 consists of statements supporting Applicant from about fifty patients, colleagues, and others.

I find that the four individuals who offered verbal character witness testimony and the written statements of support for Applicant in RX 22 provided limited evidence relevant to Applicant's controlled substance prescribing, specifically evidence of his experience in dispensing controlled substances, and to whether I should grant Applicant's request for a registration.[56] 21 U.S.C. 823(f)(2). Heart-felt evidence, if it is not specific or presented in a context that explains it, is of limited value in an adjudication such as this one. I find that the record evidence of multiple controlled substance-related violations outweighs the evidence in the testimonies of the four individuals and in RX 22.

F. Allegation That Applicant Unlawfully Pre-Signed and Pre-Printed Prescriptions

Having read and analyzed all of the record evidence, I find that the Government has not presented a *prima facie* case that Applicant unlawfully pre-signed and pre-printed controlled substance prescriptions due to insufficiently developed record evidence. The fact that I am not sustaining this charge due to insufficient evidence, however, does not allay the concerns raised by evidence in the record.

As already discussed, the OSC charges that Applicant unlawfully pre-signed and pre-printed prescriptions. OSC, at 2. According to the Government's Posthearing Brief, ''[i]n order for a prescription to be valid, it must be signed and dated on the same date.'' Govt Posthearing dated July 30, 2018, at 3. The Government submitted testimonial and documentary evidence to support this allegation. The Government's documentary evidence includes patient sign-in sheets, GX 86, and double signed (computer software and wet signed) and single signed (computer software signed) prescriptions, many of which are for controlled substances, seized from Applicant's office on the inspection date. GX 87 (314 prescriptions) and GX 88 (four prescriptions). According to the

[51] *See infra* n.56 regarding the reliability of Judge Newman's testimony.

[52] *See infra* n.56 regarding the reliability of Dr. Biladou's testimony.

[53] Dr. Bundy testified that he does not have any business relationship with Applicant. Tr. 730.

[54] *See infra* n.56 regarding the reliability of Dr. Bundy's testimony.

[55] *See infra* n.56 regarding the reliability of Mr. Wright's testimony.

[56] The RD does not assess the testimony of Judge Newman. The RD states that the testimonies of Dr. Biladou, Dr. Bundy, and Mr. Wright were candid, straightforward, and ''sufficiently objective and plausible to be reliable.'' RD, at 69–70, 47 (respectively). Given the very limited relevance of these witnesses' testimonies to the adjudication of this matter, I see no need to make a reliability finding.

OSC, GX 86 ''demonstrated that patients received prescriptions authorized and signed by . . . [Applicant] on those days when neither . . . [Applicant or his Physician Assistant] were [sic] present at . . . [his] office.'' OSC, at 2.

Applicant submitted testimonial and documentary evidence to refute this charge. In terms of documentary evidence, Applicant submitted patient schedules for August 6 and 7, 2015. RX 6 and RX 7. During her testimony, LPN confirmed the notations on the face of each page of RX 6 and RX 7 showing that they were printed on August 18, 2015, seven days after the inspection. Tr. 807–08. I agree with the RD that the print date of RX 6 and RX 7, alone, makes them less credible than GX 86. RD, at 73.

I find that the Government's evidence includes circumstantial, but not substantial, evidence supporting this charge. GX 86 consists of seven pages. I find that the only legible date on GX 86, August 5, 2015, is on the top of its first page. GX 86, at 1. Throughout GX 86, I find that there are hours and minutes entered in handwriting under columns labeled ''Arrival Time'' and ''Appt. Time.'' One could infer from these handwritten times under ''Arrival Time'' and ''Appt. Time,'' and from the sequence of those times and any information in the ''Appointment with'' and ''New Patient'' columns, roughly what took place in Applicant's office on August 6 and 7, 2015. One could also infer from the handwriting in the column marked ''Appointment with'' which member of Applicant's office met with the person who filled in that row of the sign-in sheet. If one were to make these inferences, one would first need to be able to read the handwriting on the pages of GX 86, much of which is too light to be seen and illegible. I note that no Government witness testified about the specific content of any line or lines of GX 86 to assist the adjudication of this.

I find, though, that ''Dr Pursley'' is legibly written on the last page of the exhibit in the row stating that the arrival time was ''3:40'' and the appointment time was ''3:45.'' *Id.* at 7. If one were to infer that the last page of GX 86 proves what took place at 3:40 or 3:45 on Friday, August 7, 2015, as the Government's case theory suggests, then one could conclude from the last page of GX 86 that Applicant did, indeed, see a patient after 3:30 on that Friday. Such an inference conflicts with the Government's case theory, and other record evidence, that Applicant was not in the office that Friday.

Further, GX 86 does not contain legible evidence, let alone substantial evidence, that anyone actually received a controlled substance refill prescription on August 6 or August 7, 2015. Thus, I do not see substantial legible evidence in GX 86 that ''patients received [controlled substance] prescriptions authorized and signed by . . . [Applicant] on those days when neither . . . [Applicant nor his Physician Assistant] were [sic] present'' in Applicant's office. OSC, at 2.

Regarding the prescriptions in GX 87 and GX 88, I find that many, but not all of them, are for controlled substances. Of the prescriptions that are for controlled substances, I find that the prescriptions include orders for Schedule II and III controlled substances. *E.g.,* GX 87, at 12 (Schedule II); *id.* at 5 (Schedule III); GX 88, at 2 (Schedule II). I also find that many, but not all, of the prescriptions have Applicant's ''wet'' signature in addition to his computer-generated electronic signature. GX 87, at 214 (prescription for a Schedule II controlled substance bearing Applicant's electronic and ''wet'' signatures and dated August 6, 2015); *id.* at 127 (prescription for a Schedule IV controlled substance bearing Applicant's electronic signature and Physician Assistant's ''wet'' signature and dated August 7, 2020); GX 88, at 1–4 (prescriptions for Schedule II and Schedule IV controlled substances bearing only Applicant's electronic signature and dated August 11, 2015). I do not see substantial evidence in the record, however, explaining why some of the controlled substance prescriptions in these exhibits include both an electronic and a ''wet'' signature while others do not. It could be, for example, that the printed prescription was not accurate and that Applicant did not sign it for that reason. *See* Tr. 647; 21 CFR 1306.05(f) (stating that a secretary or agent may prepare a prescription for the practitioner's signature).

Although I find that the record contains substantial evidence addressing aspects of the controlled substance prescriptions in GX 87 and GX 88, such as what prescriptions were written, and circumstantial evidence, including the testimony of LPN, PLPN, and SLPN, concerning when Applicant may have signed them, I do not find substantial record evidence explicating the prescriptions in GX 87 and GX 88. Further, I find conflicts within the record evidence concerning the prescriptions comprising GX 87. For example, putting aside the record evidence concerning D.C., M.B., and Applicant's daughter, the record does not establish with substantial evidence Applicant's policy or process concerning controlled substance refill prescriptions. It is this policy or process, though, that appears to be at the heart of the Government's theory for the first OSC allegation.[57]

While there is also circumstantial record evidence addressing aspects of the prescriptions in GX 88, I do not find that GX 88 contributes substantial evidence to the establishment of a violation of the first OSC allegation. For example, the four pages of GX 88 consist of controlled substance prescriptions dated August 11, 2015, the date of the inspection, written for two different individuals. Given the date on the prescriptions, the time and location of their seizure could have occurred concurrently with the two individuals' medical visits. *See* Tr. 647 (LPN's testimony that SLPN would print prescriptions she typed into the computer, Applicant would make sure what printed is ''exactly what was in the computer and then he'd sign it and give it to the patient.''). In sum, the record evidence does not substantially illuminate these prescriptions.[58]

For the above reasons, I find insufficient evidence in the record to support my finding that the Government presented a *prima facie* case that Applicant violated 21 CFR 1306.05 or Ga. Code Ann. § 16–13–41(b). On the record before me, therefore, I find an insufficient evidentiary basis to support a founded violation of either of these two provisions.[59]

Regarding the third legal basis of the first OSC allegation, 21 CFR 1306.04(a), the Government's Posthearing Brief does not advocate for it to be sustained. Accordingly, it appears, from the Government's decision not to address this regulation in its Posthearing Brief, that the Government may have

[57] The inclusion of Schedule II controlled substance prescriptions in GX 87, however, might be evidence of a violation of the GA Pain Management Rule requiring physicians to monitor patients receiving Schedule II and Schedule III controlled substance prescriptions for compliance with the therapy, to note abnormal monitoring results, to respond to an abnormality, and to record the response in the patient's record. GX 4, at 2 (360–3-.06(2)(f)).

[58] DI testified that the controlled substance prescriptions gathered into GX 88 ''were the ones that were refills for the next day.'' Tr. 130. The record does not include a foundation for this testimony. As already discussed, all of the prescriptions in GX 88 are for controlled substances and are dated August 11, 2015. GX 88. GX 87, however, also contains several controlled substance prescriptions dated August 11, 2015, the date of the DEA inspection. *E.g.,* GX 87, at 119, 120, 201. The inclusion of those prescription in GX 87 appears to be inconsistent with this portion of DI's testimony. The record does not explicate these facts. The insufficient evidence in the record about these exhibits limits the weight I afford them.

[59] I acknowledge the RD's recommendations to the contrary. RD, at 90–92.

abandoned this theory. Regardless, there is extensive circumstantial evidence in the record supporting a violation of this regulation. While this evidence falls short of the substantial evidence needed to sustain the allegation, the evidence raises concerns about Applicant's office process and procedures regarding controlled substance prescription refills.

The testimony of LPN, PLPN, and SLPN about the process Applicant implemented in his office regarding controlled substance prescription refills raises concern about whether Applicant improperly delegated his controlled substances-related responsibilities to his licensed practical nursing staff. For example, the weight of the record evidence suggests that neither Applicant nor the Physician Assistant always analyzed, reviewed, or responded to the results of office-administered urine drug screen monitoring before the office LPN staff released a controlled substance refill prescription.[60] *Supra,* section III.E. Instead, based on the record evidence, Applicant apparently ceded to the LPN staff the analysis of urine drug screen samples. *Id.* Further, Applicant apparently delegated to the LPN staff the responsibility of determining who, after having submitted to a urine drug screen, receives and who does not receive a controlled substance refill prescription. *Id.* Indeed, Applicant's LPN staff testimony admitted to their handing out controlled substance refill prescriptions even when the in-office urine drug screen results were abnormal. *Id.* I note that there is no affirmation in the LPN staff testimony that their handing out a controlled substance refill prescription never occurred before Applicant or the Physician Assistant evaluated the urine drug screen sample results, responded to an abnormal urine drug screen result, and recorded in the medical record his response to the abnormal urine drug screen. *Id.; contra* 21 CFR 1306.12(b) (leaving it to individual practitioners' ''sound medical judgment and in accordance with established medical standards, whether it is appropriate to issue multiple [Schedule II] prescriptions and how often to see their patients when doing so'').[61] While these matters are troubling for their consistency with core CSA principles, they played no role in my decision to deny Applicant's request for a registration.

G. Recordkeeping Allegations

The OSC charges Applicant with violating federal and Georgia controlled substance recordkeeping requirements. OSC, at 2. Regarding this charge, the testimony of Applicant's licensed practical nursing staff and the testimony of GS are in conflict.[62] According to Applicant's licensed practical nursing staff, GS was shown the two pharmacy notebooks, RX 11I and RX 11J (Pharmacy Invoices for 2013 and 2014, respectively). Tr. 860–61 (PLPN testifying that, when a DEA agent asked for the invoices for the medications in the pharmacy on August 11, 2015, she showed him the two pharmacy notebooks); *see also id.* at 890–92 (PLPN testifying that she showed GS the pages consisting of RX 11I and RX 11J on August 11, 2015); and *id.* at 664–65 (LPN testifying that ''[w]e showed'' GS the pharmacy's notebooks containing medication bottle ''stickers'' and the ''patient's prescription''). According to both LPN and PLPN, the DEA agent looked at the two pharmacy notebooks and stated that ''he didn't need to see that right now.'' *Id.* at 665 (testimony of LPN); *see also id.* at 861 (PLPN testifying that she showed the DEA agent the two pharmacy notebooks and that he ''picked it up, he opened it, flipped a couple of pages, and said I don't need it right now and sat it down.'').

GS, on the other hand, testified that he asked PLPN if she had the ''records for any controlled substance that you might have on hand.'' *Id.* at 138, 140; *see also id.* at 141–42 (GS testifying that he specifically asked Applicant's office staff for ''any initial inventory, the bi-annual inventory, the purchasing records, the dispensing records, any type of destruction records''). GS explained that the controlled substance-related records that registrants are required by federal and Georgia law to maintain include an initial inventory, a bi-annual inventory, dispensing records, purchasing records, return records, and destruction records. *Id.* at 138–41. According to GS, Applicant's staff was not able to produce any of the records he requested. *Id.* at 142; *see also id.* (GS testifying that ''[t]hey never provided . . . [the bi-annual inventory]. They never said they had one. They never showed me one.''). GS also testified that ''at no point in time did anyone from . . . [Applicant's] staff nor . . . [Applicant] say that they maintain controlled substance records electronically . . . [n]or was I shown a data base that would indicate that they possibly maintained controlled substance records electronically.'' *Id.* at 144; *see also id.* at 143; *id.* at 169 (GS testifying that the computer PLPN showed him ''was in the nurse's station hallway . . . [and] was the electronic medical record.'').

As already discussed, GS testified that Applicant's office did not produce any of the controlled substance records that the law requires Applicant to maintain. *Id.* at 141 (required by federal and Georgia state law); *see also id.* at 168 (GS testifying that he ''[n]ever received one controlled substance record while we were on site.''). Further, GS enumerated Applicant's recordkeeping violations during his testimony. *Id.* at 155. He testified that Applicant had no bi-annual inventory, no purchasing records on site, no invoices, and no records showing the destruction of controlled substances. *Id.* at 155–56. GS explained that he would have accepted the required controlled substance records even the next day, had Applicant provided them at that time. *Id.* at 156 (''On site, even the next day, if they came to us and said hey, we found these records, was this what you were talking about? We probably would have been like, yes, that's what we're looking for. . . . But that all became a moot point, once it went to Surrender for Cause.'').

Regarding Applicant's hearing exhibits, GS testified that, had he been

[60] The weight of Applicant's testimonial evidence is that a urine drug screen was a prerequisite to receipt of a controlled substance refill prescription. *See, e.g.,* Tr. 826 (PLPN's testimony that release of a methadone refill prescription required a urine drug screen); *id.* at 832 (PLPN's testimony that a urine drug screen was administered before the release of a controlled substance refill prescription). The apparent exception, gleaned from the Government's testimony, is that a urine drug screen was not a prerequisite to the release of a controlled substance refill prescription when, for example, a family member picked up the refill. *Id.* at 131 (DI testimony).

[61] The location and contents of the plastic tub raise diversion concerns. The record testimony seems to place the plastic tub that held the prescriptions making up GX 87 at the prescription desk, the front desk, and the nurse's station. Tr. 831–32, *id.* at 903. Wherever its location actually was, PLPN answered ''no'' when asked if a patient ''could . . . reach around and grab a stack [of prescriptions from the plastic tub] and take off'', and if ''anybody, other than staff, . . . [had] access to the prescriptions.''1 *Id.* at 837. PLPN's testimony does not provide detail about these two ''no'' answers.

Further, regarding the risk of diversion due to the location of the plastic tub holding signed controlled substance (refill) prescriptions, PLPN answered ''no'' when asked whether, ''in the entire 17 years . . . [she was] there, ever have an issue with loss . . . [or] theft of prescriptions from this—from the storage'' [tub]. *Id.* She also testified that she would ''purge'' the plastic tub when she was not busy. *Id.* What the record evidence does not address is the meaning of PLPN's testimony and the bases for that testimony.

[62] Even if I were to credit the testimony that the DEA investigative team did not ask to see specific records during the inspection, my finding, *infra,* that Applicant never retrieved and provided to DEA any legally required controlled substance records even after Applicant knew from this proceeding which records DEA requires, renders irrelevant. *See, e.g.,* Applicant Posthearing, at 12.

shown RX 11F, ''Inventory,'' he would not have ''taken this anyway because of the dates.'' *Id.* at 163; *see also id.* at 166 (GS testifying about RX 11F that ''You see the problem is, Your Honor, . . . when I'm looking at them, there's clearly violations of the recordkeeping requirements.''); *id.* at 172 (GS testifying about RX 11F that ''[s]ome of the records appear to be non-control. Some were, you know, like in 2009. Some of those records were just on a piece of paper, that had no DEA number. No date it was taken. If that was a record that was provided to me, and they said this is the controlled substance binder, and the inventory required for the two-year timeframe . . . [w]e wouldn't have taken that, because it doesn't have . . . a DEA number on it. You don't know whose records these are for controlled substances. It doesn't have whether it was taken at the beginning of business or the close of business. . . . That was just some of the stuff I gleaned just from the short time that I had a chance to review those.''); *id.* at 167 (GS testifying about RX 11G, agreeing that ''Images Pharmacy Stickers/Records'' would be one form of recording exactly what got dispensed where ''[i]f it was within the timeframe.''); *id.* at 167–68 (GS testifying about RX 11I that ''I can't see what's behind it . . . [and] it's not controlled substances . . . so those wouldn't fall within our purview.''). When asked whether the evidence that Applicant submitted for the proceeding ''meet the federal recordkeeping requirements for controlled substances,'' GS responded that ''there were some in there that appeared, just from looking at it. But there were several in there that there was no quantity that was dispensed, no balance or anything like that. There was just a date and name on there. That was it.'' *Id.* at 172–73.

After testifying that the Georgia recordkeeping requirements ''almost mimic[ ] what federal regulations are,'' GS summarized his analysis that Applicant ''absolutely'' would still have been cited for recordkeeping violations if he had presented his hearing exhibits to GS on August 11, 2015, ''[b]ecause . . . [Applicant's hearing exhibits] are not in compliance with the federal regulations.'' *Id.* at 173. I credit the testimony of GS on this matter and, having reviewed Applicant's record evidence, agree with his assessment of Applicant's admitted exhibits. *See, e.g.,* RX 11I (Applicant's ''Pharmacy Invoices 2013'') and RX 11J (Applicant's ''Pharmacy Invoices 2014''). Both RX 11I and RX 11J are one page each. Three quarters of the exhibits' only page shows a large portion of a single piece of paper labeled ''invoice'' (RX 11J) or ''inv'' (RX 11I). This piece of paper includes an affixed hand-written label stating a month and year (''March 2013'' on RX 11I and ''Jan 2014'' on RX 11J). At the top quarter of the exhibits' only page are snippets of similarly looking affixed hand-written labels stating a month and year and paper on which ''invoice'' or some letters from that word appear. For both RX 11I and RX 11J, the lower three quarters of the exhibits' only page describes one or more medicines, such as ''Celexa'' (RX 11I) or ''Lexapro'' (RX 11J). All visible medicines are listed as non-scheduled substances. In other words, nothing visible on the one page of either RX 11I or RX 11J pertains to a controlled substance.

Further, I note that Applicant called CIO who, as described above, is the Chief Information Officer of the company whose electronic clinical dispensing software application Applicant chose for his practice. Tr. 671–720. I interpret CIO's testimony to state that Applicant's first use of this software was in about March of 2013, including a training period. *Id.* at 700. CIO testified that the company software was ''up and running in Applicant's practice on August 11 of 2015.'' *Id.* at 703. According to CIO, the company's software manages medication inventories and dispensing activities. *Id.* at 672. ''We track everything,'' CIO testified, and represented that the company software is capable of producing all of the controlled substance records required by federal and Georgia law. *Id.* at 672, 704–05.

The record does not address why Applicant or his staff did not contact CIO or his company for assistance with the requests of the DEA investigative team on August 11, 2015. *See id.* at 704–06 (CIO testifying that the company ''usually'' receives calls from customers seeking help in pulling information from the software when DEA is at the customer's site asking for required records and ''[w]e point them to run specific inventory reports or dispensing reports and be able to walk them through pulling up patient records and showing where that information is stored.''). Further, assuming the accuracy of CIO's testimony, the record leaves open the question of why Applicant did not offer into evidence, for incorporation into this proceeding's record, all of the required controlled substance records that the DEA investigative team sought on August 11, 2015.[63] Perhaps the conclusion I could reach that is most favorable to Applicant is that neither he nor his staff understood what records the DEA investigative team was requesting on August 11, 2015.[64] With or without this assumption, the record is clear: Applicant did not provide the legally required controlled substance records to DEA on, or after, August 11, 2015. *See also* RD, at 73–74, 94–95.

H. Allegation That Applicant Unlawfully Prescribed Controlled Substances

Having read and analyzed the record evidence, the parties' arguments, and the RD, I find that the record contains substantial evidence that Applicant prescribed controlled substances beneath the applicable standard of care and outside the usual course of professional practice in Georgia to M.B., D.C., and his daughter. *Supra* sections III.D. and III.E; *see also infra* section IV.B.3 (Applicant's Exceptions). My findings based on the record evidence include that Applicant failed to comply fully with the Georgia requirement to obtain the patient's history, to conduct a physical exam, and to obtain informed consent before prescribing controlled substances. *Id.* (*e.g.,* inadequate documentation of M.B.'s medical history, physical examination, and pain complaints; prescribing controlled substances for M.B. for about eleven

[63] I note that Applicant moved RX 11B, RX 11C, RX 11D, and RX 11E into evidence without objection. Tr. 678–84. While CIO and PLPN addressed these exhibits, neither testified that their contents are the required records that DEA requested on August 11, 2015. CIO testified, however, that ''reports could have been run by users at the practice'' and that his company's software is capable of producing all of the reports required by federal and Georgia authorities. *Id.* at 703, 705. Yet, neither Applicant's closing brief nor his exceptions argues that any of Applicant's exhibits consist of any of the records that DEA requested on August 11, 2015. *See also id.* at 693–95 (CIO's testimony that ''you can export your current inventory as of today, and that would give you a report of what you have on hand,'' ''[r]ight now you can't go back and do a point-in-time inventory,'' ''you can review all the changes . . . if you rolled back all the log entries and applied them to either your beginning inventory or the current inventory. You could work back or forward into it,'' ''[t]here's a screen that . . . gives you the current inventory. Again, you can filter it to show just controls, or you can do a biannual inventory for all medications,'' and there's ''one report that you can set the schedules to show schedule II, schedule III.''); *see, e.g., id.* at 695–701 (CIO's description of RX 11C as manual adjustments made to inventory in March 2015, CIO's description of RX 11D as an order summary report showing ''[b]asically every data point that's collected in the dispensing process,'' and CIO's description of RX 11B and RX 11E as showing all medications added through vendor shipments.).

[64] Both parties' exceptions address the RD's statements about certain witnesses' motivations to fabricate evidence. Applicant Exceptions, at 4; Government Exceptions, dated September 10, 2018 (hereinafter, Govt Exceptions), at 6; RD at 72–73. My findings are not premised on motivation to fabricate evidence, so I need not address these exceptions.

years without a diagnosis that should be treated with a controlled substance; prescribing controlled substances for DC without documentation of a physical examination of the parts of the body about which DC had complained; internal inconsistency in DC's medical records due to the listed diagnosis and the documented maladies). They include that Applicant did not re-evaluate patients, did not always document the changes he made to a patient's therapy, and did not always document the impact of a change in therapy. *Id.* (*e.g.,* failure to re-evaluate the efficacy of controlled substance therapy; failure to obtain a specialist's consult when therapy was ineffective). My findings also include that Applicant's medical records fall beneath the applicable standard of care and outside the usual course of professional practice. *Id.* (*e.g.,* incomplete documentation and explanation in medical records). They include that Applicant prescribed methadone for DC for addiction, not pain. *Id.* My findings include record evidence of dangerous controlled substance prescribing by Applicant that risked the lives of those for whom he wrote the prescriptions. *Id.* (*e.g.,* methadone prescriptions for DC; two short-term opioids prescribed for M.B.). My findings further include that Applicant did not comply with the applicable standard of care when he prescribed controlled substances despite signs of abusing, or being addicted to, controlled substances by the person for whom he wrote the prescription. *Id.* (*e.g.,* prescribing for M.B. despite her exhibiting signs of controlled substance abuse).

Regarding Applicant's daughter, I find that Applicant admitted he unlawfully prescribed controlled substances for her between August 2014 and June 2015. *Id.* I find insufficient evidence in the record to support a conclusion that Applicant's treatment of his daughter was always necessitated by an emergency. *Id.* I further find that Applicant also admitted he did not follow his urine drug screen-related office procedures when treating his daughter. *Id.; see also* RX 4, at 2 (ADD and ADHD patients take a urine drug screen at visits). ''I understand it is wrong in hindsight. And, you know, I'm sorry I did it,'' he stated. Tr. 1038. His testimony was that he understood the GCMB position on treating family members, ''but it's not a perfect world and it's my daughter.'' *Id.* When asked if he was willing to make a condition of being granted a registration that he ''not treat anybody under . . . what is ultimately a Georgia regulation'' about the treatment of family members, Applicant stated, ''Oh, yeah. I mean, I make amends.'' *Id.* at 1040.

I. Allegation That Applicant Did Not Exhibit Candor During DEA's Investigation

In its Supplemental Prehearing Statement, the Government ''gave notice'' that it ''elected to drop the lack of candor charges'' from the OSC. Govt Supp Prehearing dated May 8, 2018, at 1; *see also* Tr. 9–10. Accordingly, I do not address this allegation.[65]

IV. Discussion

A. The Controlled Substances Act and the Public Interest Factors

Pursuant to section 303(f) of the CSA, ''[t]he Attorney General shall register practitioners . . . to dispense . . . controlled substances . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.'' 21 U.S.C. 823(f). Section 303(f) further provides that an application for a practitioner's registration may be denied upon a determination that ''the issuance of such registration . . . would be inconsistent with the public interest.'' *Id.* In making the public interest determination, the CSA requires consideration of the following factors:

(1) The recommendation of the appropriate State licensing board or professional disciplinary authority.

(2) The applicant's experience in dispensing . . . controlled substances.

(3) The applicant's conviction record under Federal or State laws relating to the manufacture, distribution, or dispensing of controlled substances.

(4) Compliance with applicable State, Federal, or local laws relating to controlled substances.

(5) Such other conduct which may threaten the public health and safety.

Id.

These factors are considered in the disjunctive. *Robert A. Leslie, M.D.,* 68 FR 15,227, 15,230 (2003). I ''may rely on any one or a combination of factors and may give each factor the weight [I] deem[ ] appropriate in determining whether . . . an application for registration [should be] denied.'' *Id.* Moreover, while I am required to consider each factor, I '' 'need not make explicit findings as to each one,' '' and I '' 'can give each factor the weight . . . [I] determine[ ] is appropriate.' '' *Jones Total Health Care Pharmacy, LLC* v. *Drug Enf't Admin.,* 881 F.3d 823, 830 (11th Cir. 2018), quoting *Akhtar-Zaidi* v. *Drug Enf't Admin.,* 841 F.3d 707, 711 (6th Cir. 2016); *see also MacKay* v. *Drug Enf't Admin.,* 664 F.3d 808, 816 (10th Cir. 2011) (quoting *Volkman* v. *Drug Enf't Admin.,* 567 F.3d 215, 222 (6th Cir. 2009) quoting *Hoxie* v. *Drug Enf't Admin.,* 419 F.3d 477, 482 (6th Cir. 2005)). In other words, the public interest determination ''is not a contest in which score is kept; the Agency is not required to mechanically count up the factors and determine how many favor the Government and how many favor the registrant. Rather, it is an inquiry which focuses on protecting the public interest; what matters is the seriousness of the registrant's misconduct.'' *Peter A. Ahles, M.D.,* 71 FR 50,097, 50,098–99 (2006).

The Government has the burden of proof in this proceeding. 21 CFR 1301.44. Both parties submitted documentary evidence. The admitted documentary evidence implicates Factors Two and Four.[66] In this matter,

[65] Applicant's seventh exception concerns his cooperation with DEA and cites filings he submitted on the matter. Applicant Exceptions, at 7–8. The Government's withdrawal of the lack of candor OSC charge renders moot Applicant's seventh exception and obviates a need for me to address it.

[66] Regarding Factor One, ''[a]lthough statutory analysis [of the CSA] may not definitively settle . . . [the breadth of the cognizable state 'recommendation' referenced in Factor One], the most impartial and reasonable course of action is to continue to take into consideration all actions indicating a recommendation from an appropriate state.'' *John O. Dimowo, M.D.,* 85 FR 15,800, 15,810 (2020). Applicant's Second Motion for Leave to Supplement Evidence Post-Hearing dated February 7, 2020 (hereinafter, Second Supplement Evidence Motion), at 2, seeks to supplement the record with evidence that Applicant's Georgia and South Carolina medical licenses were renewed after the record was certified and transmitted to me. Second Supplement Evidence Motion, at 2. Without explication, Applicant cites 21 CFR 1316.57 as authority for his Motion. His reliance on this provision, however, is misplaced.

While the title of the regulation, ''Submission of documentary evidence and affidavits and identification of witnesses subsequent to prehearing conference,'' may suggest that it supports the Second Supplement Evidence Motion, the text of the regulation makes clear that it applies to evidence a movant had good cause not to identify or submit ''at the prehearing conference,'' when the movant is able to submit the evidence ''sufficiently in advance of the . . . hearing to avoid prejudice or surprise to the other parties.'' 21 CFR 1316.57. Due to this authority's irrelevance, I do not grant Applicant's Motion.

Nevertheless, if the record evidence were to have included the content of the Second Supplement Evidence Motion concerning Applicant's Georgia and South Carolina medical license renewals, I would consider those license renewals under Factor One. *John O. Dimowo, M.D.,* 85 FR 15,800, 15,810 (2020). Further, I would have afforded the evidence minimal weight because Applicant's submission includes no evidence that the Georgia and South Carolina medical licensing authorities were aware of the allegations being adjudicated in this proceeding, considered them, and determined that they would not be an impediment to the renewal of Applicant's medical licenses. *Id.*

As to Factor Three, there is no evidence in the record that Applicant has a ''conviction record under Federal or State laws relating to the

while I have considered all of the factors, the Government's evidence in support of its *prima facie* case is confined to Factors Two and Four. I find that the Government's evidence with respect to Factors Two and Four, as to the recordkeeping and unlawful controlled substance prescribing, satisfies its *prima facie* burden of showing that Applicant's having a registration would be ''inconsistent with the public interest.'' [67] 21 U.S.C. 823(f). I further find that Applicant failed to produce sufficient evidence to rebut the Government's *prima facie* case.

B. Factors Two and Four—Applicant's Experience Dispensing Controlled Substances and Compliance With Applicable Laws Related to Controlled Substances

1. Allegation That Applicant Unlawfully Pre-Signed and Pre-Printed Controlled Substance Prescriptions

The OSC allegation that Applicant unlawfully pre-signed and pre-printed controlled substance prescriptions cites three authorities. As already discussed, the Government's Post Hearing brief does not address the first authority, 21 CFR 1306.04(a), and the Government, therefore, apparently has abandoned it.

The second cited federal regulation, 21 CFR 1306.05, states that all controlled substance prescriptions ''shall be dated as of, and signed on, the day when issued'' and lists the information they must ''bear.'' 21 CFR 1306.05(a). As already discussed, *supra* section III, I find that the record includes circumstantial, but not substantial, evidence that Applicant violated this regulation.

The cited provision of the Georgia criminal code, Ga. Code Ann. § 16–13–41(b), is similar to 21 CFR 1306.05 but only concerns prescriptions for Schedule II controlled substances. It states, in salient part, that such an order ''shall include the name and address of the person for whom it is prescribed, the kind and quantity of such Schedule II controlled substance, the directions for taking, the signature, and the name, address, telephone number, and DEA registration number of the prescribing practitioner.'' Ga. Code Ann. § 16–13–41(b). It further states that ''[s]uch prescription shall be signed and dated by the practitioner on the date when issued.'' *Id.*

The Georgia Supreme Court analyzed this statute, including the cited subsection, in *Raber* v. *State,* 285 Ga. 251 (2009). In that decision, the Georgia Supreme Court determined that, pursuant to Ga. Code Ann. § 16–13–41(b), a '' 'prescription' is 'issued' only when both the signature mandate and the other contemporaneous requirements are fulfilled.'' [68] 285 Ga. at 253. Based on the Georgia Supreme Court's interpretation of the OSC-cited subsection, I do not find substantial evidence in the record that Applicant violated Ga. Code Ann. § 16–13–41(b).[69]

For all of the above reasons, I find that the Government did not present a *prima facie* case that Applicant unlawfully pre-signed and pre-printed controlled substance prescriptions.[70]

2. Recordkeeping Allegations

The second allegation in the OSC, concerning recordkeeping, consists of two paragraphs. The first paragraph alleges that, ''when asked to produce the required records necessary to maintain controlled substances,'' Applicant was ''unable to produce any records.'' OSC, at 2. This paragraph does not cite a legal basis for its allegation against Applicant. *Id.* Applicant's Posthearing Brief, however, makes clear that he understood the requirement that ''records . . . be readily available'' and is aware of the authority for the requirement, 21 CFR 1304.04.[71] Applicant Posthearing Brief dated July 30, 2018, at 23. As such, I find that Applicant understood the basis of the second OSC allegation, had the opportunity to litigate it, and did, in fact, litigate it.[72] Accordingly, I need not address further whether the second OSC allegation was properly noticed.

The second paragraph of the second OSC allegation consists of five subparagraphs listing some of Applicant's alleged recordkeeping violations. OSC, at 2. The cited federal authorities list requirements that applied to Applicant when he was registered. *Id.; see, e.g.,* 21 CFR 1304.04(a) (stating that required inventories and records be kept for at least two years); 21 CFR 1304.04(g) (incorporating 21 CFR 1304.04(f)'s requirements stating that inventories and records of Schedule II controlled substances be maintained separately from other Schedules' records and that Schedule III, IV, and V controlled substance inventories and records be maintained separately or in a form that is readily retrievable); 21 CFR 1304.11 (inventory requirements); and 21 CFR 1304.21 (continuing records requirement). The listed state authorities parallel or incorporate federal recordkeeping requirements. OSC, at 2.

The CSA's recordkeeping requirements are an essential part of the statute's goal of preventing the diversion of controlled substances from legitimate to illicit purposes. *Howard N. Robinson, M.D.,* 79 FR 19,356, 19,370 (2014) (''There is no question that the maintenance of accurate records by registrants is key to the DEA's ability to fulfill its obligations to regulate controlled substances.''). The Supreme Court recognized statutory recordkeeping requirements as part of the ''closed regulatory system'' Congress devised to ''prevent the diversion of drugs from legitimate to illicit channels.'' *Gonzales* v. *Raich,* 545 U.S. 1, 13–14, 27 (2005). As recently as last year, the Eleventh Circuit affirmed that a recordkeeping violation, not having controlled substance prescriptions readily retrievable when DEA asked for them, is a violation of federal law. *Pharmacy Doctors Enterprises, Inc.* v. *Drug Enf't Admin.,* 789 F. App'x 724, 730 (2019). Further, the Eleventh Circuit determined that the violation of the ''readily retrievable'' recordkeeping

manufacture, distribution, or dispensing of controlled substances.'' 21 U.S.C. 823(f)(3). However, as Agency decisions have noted, there are a number of reasons why a person who has engaged in criminal misconduct may never have been convicted of an offense under this factor, let alone prosecuted for one. *Dewey C. MacKay, M.D.,* 75 FR 49,956, 49,973 (2010), *pet. for rev. denied, MacKay* v. *Drug Enf't Admin.,* 664 F.3d 808 (10th Cir. 2011). Agency decisions have therefore noted that ''the absence of such a conviction is of considerably less consequence in the public interest inquiry'' and is therefore not dispositive. *Id.*

[67] I already determined that the Government did not present a *prima facie* case as to the Unlawfully Pre-Signed and Pre-Printed Controlled Substance Prescriptions allegation due to insufficiently developed record evidence. *Supra* section III.F.

[68] While the Georgia Supreme Court further opined that Ga. Code Ann. ''§ 16–13–41(a) and (d)(1) may also imply that a written prescription is issued only when the 'ultimate user' or someone on his behalf has received it,'' the OSC only cites subsection (b) of Ga. Code Ann. § 16–13–41 as its state law basis. *Raber* v. *State,* 285 Ga. 251, 254 (2009). Ga. Code Ann. § 16–13–41(d) concerns Schedules III, IV, and V.

I note that DI's testimony is consistent with the Georgia Supreme Court's interpretation of the relevant subsection. Tr. 108.

[69] GX 87, page 183 of 314 is a prescription for Klonopin (Schedule IV). It shows Applicant's computer-generated and wet signatures. This appears on the address line: '',, GA.'' Even though this prescription does not include the ''address of the person for whom it is prescribed,'' it does not violate Ga. Code Ann. § 16–13–41(b) because it is not a prescription for a Schedule II controlled substance.

[70] In reaching this conclusion, I acknowledge and disagree with the RD's conflicting findings and recommendations. *E.g.,* RD, at 90–92. Given my findings, there is no need for me to address Applicant's fourth exception. Applicant Exceptions, at 5.

[71] This regulation is referenced in the second paragraph of the OSC's second allegation. OSC, at 2, subparagraphs 5.d. and 5.e.

[72] The RD reaches the same conclusion for different reasons. RD, at 94.

requirement was supported by substantial evidence and, thus, appropriately used by the Government to meet its *prima facie* burden to show that continued controlled substance registration would be inconsistent with the public interest. *Id.* at 729–30. Thus, the elements of this OSC's second allegation concerning recordkeeping requirements are essential to the CSA's anti-diversion purpose; they are far from mere administrative niceties. *See also Volkman* v. *Drug Enf't Admin.,* 567 F.3d 215, 224–25 (6th Cir. 2009) (''Volkman did not keep proper records for controlled substances that were ordered and dispensed under his registration. The . . . [CSA] requires all prescription-dispensing entities to conduct a biennial inventory of all of the controlled substances it has on hand and to 'maintain, on a current basis, a complete and accurate record of each [controlled] substance' that it has 'received, sold, delivered, or otherwise disposed of.' '').

As already discussed, I found that Applicant, on August 11, 2015, did not provide the DEA inspection team any of the records he was required to maintain as a registrant. I also found that Applicant did not produce those required records to the DEA inspection team at any time after August 11, 2015, including during this proceeding. Accordingly, I find that Applicant violated the controlled substance recordkeeping requirements of federal and Georgia law.[73] Further, I disagree with Applicant's suggestion that ''this issue is moot.'' [74] *See, e.g.,* Applicant Posthearing, at 6 n.2.

[73] Even if Applicant's required controlled substance records were readily retrievable and available, as CIO's testimony suggested, I already found that Applicant never retrieved or made any of them available to DEA. *Supra* section III.G.

[74] Applicant's argument about 21 CFR 1304.04, that the ''records need only be readily retrievable,'' suggesting that the records need not actually be provided, is without merit. Applicant's Posthearing, at 23. The regulatory definition of ''readily retrievable'' calls for locating the records ''in a reasonable time.'' 21 CFR 1300.01(b). Agency decisions state that ''what constitutes 'a reasonable time' necessarily depends on the circumstances.'' *Edmund Chein, M.D.,* 72 FR 6580, 6593 (2007), *pet. for rev. denied, Chein* v. *Drug Enf't Admin.,* 533 F.3d 828, 832 n.6 (D.C. Cir 2008), *cert. denied,* 555 U.S. 1139 (2009). According to that DEA decision, ''under normal circumstances if a practice is open for business, it should be capable of producing a complete set of records within several hours of the request.'' 72 FR at 6593. The decision explained that ''[t]o allow a registrant an even greater period of time to produce the records would create an incentive for those who are engaged in illegal activity to obstruct investigations by stalling for time in the hopes that DEA personnel would eventually give up and leave.'' *Id.* As such, there is no doubt that ''readily retrievable'' encompasses both timely retrieval and the production of the records to DEA.

3. Allegation That Applicant Unlawfully Prescribed Controlled Substances

According to the CSA's implementing regulations, a lawful prescription for controlled substances is one that is ''issued for a legitimate medical purpose by an individual practitioner acting in the usual course of his professional practice.'' [75] 21 CFR 1306.04(a). The Supreme Court stated, in the context of the CSA's requirement that schedule II controlled substances may be dispensed only by written prescription, that ''the prescription requirement . . . ensures patients use controlled substances under the supervision of a doctor so as to prevent addiction and recreational abuse . . . [and] also bars doctors from peddling to patients who crave the drugs for those prohibited uses.'' *Gonzales* v. *Oregon, supra,* 546 U.S. at 274. The Eleventh Circuit recently noted, in part, that, ''[u]nder the CSA, the responsibility for the proper prescribing and dispensing of controlled substances, which must be for 'a legitimate medical purpose,' is on the prescribing practitioner.'' *Jones Total Health Care Pharmacy, LLC* v. *Drug Enf't Admin.,* 881 F.3d at 827.

As already discussed, I found that Applicant prescribed controlled substances beneath the applicable standard of care and outside the usual course of professional practice.[76] *Supra* sections III.D., III.E., and III.H.[77]

[75] The standard of care applicable in this adjudication is set out *supra* section II.

[76] After stating that ''[e]valuation of . . . [Factor Two, experience in dispensing controlled substances] is a mixed bag,'' the RD states, among other things, that the ''prior positive medical experience'' of Applicant ''apparently enjoys the confidence and esteem of his colleagues and the hierarchy of the medical community, as evidenced by the several character witnesses who testified.'' RD, at 109. It states that Applicant ''has recently been elected by his peers to Trustee of . . . a prestigious regional medical society'' and that ''[a]nother indication of his positive experience are the scores of letters of recommendation and of support from former patients.'' *Id.* Without citing any record evidence, the RD states that Applicant's ''experience in prescribing controlled substances is extensive, as reflected by his long career in treating patients and reported willingness to take on difficult and complex patients.'' *Id.* It also asserted, without citation to any record evidence, that Applicant ''has extensive experience in treating patients suffering from alcohol and drug addiction.'' *Id.* It also claimed, also without citation to record evidence, that Applicant had ''enacted various apparently effective policies and procedures to prevent drug diversion and drug abuse at his clinic.'' *Id.* at 109–10. I disagree with these portions of the RD.

Factor Two is the ''applicant's experience in dispensing . . . controlled substances.'' 21 U.S.C. 823(f)(2). As I indicated, *supra* section III.E., the public interest assessment that the CSA requires me to make does not contemplate my considering the character witness testimony and other forms of adulation that Applicant offered into the record. 21 U.S.C. 823(f). Instead, the CSA requires me to consider Applicant's controlled substance dispensing experience, among other things. 21 U.S.C. 823(f)(2). I find that the record evidence of multiple controlled substance dispensing-related violations is relevant to the public interest inquiry I am charged with undertaking and, therefore, outweighs all of the record evidence that Applicant was respected and may also have dispensed controlled substances in conformity with state and federal law.

[77] I note that there is record evidence suggesting situations when Applicant complied with the applicable standard of care. *See, e.g.,* RX 19, at 185–87 (medical record for M.B. concerning March 2015 stating that ''[w]e will not prescribe narcotic pain medicine unless pain management provides us with a formal letter, on their clinic letterhead and signed by the provider that conducted the patient's exam, stating what medicine, at what dose, and in what manner the medicine should be taken,'' that ''PT statd [sic] she found some pills tucked into a blanekt [sic] in the closet and she assumed that they were her Percocet. She states she had to hide her medicines from herself to keep from taking too much,'' and ''[n]on-compliance is grounds for dismissal from our care.'' Yet, the medical record for three visits later, in June 2015, states that ''PT had hydrocodone and valium in system. PT swears she did not take anthing [sic] other than what we give her. I told her that the mass spectrometry reading illustrates otherwise and that this is what we have to go by. I have instructed the patient t[o] ensure she take [sic] the correct meds, throw away all old meds, and only take what we authorize as we instruc[t] or she could be released from our care.'' *Id.* at 207. In other words, the medical records show that indications of Applicant's compliance with the applicable standard of care involve no follow-up and, therefore, non-compliance.

According to Dr. Kaufman, Applicant did not follow his own protocols. Tr. 312. Regarding M.B.'s medical records from 2013, Dr. Kaufman testified that M.B.'s request for early controlled substance refills ''is an ongoing problem, it hasn't been

Applicant engaged a skillful team and defended himself against all of the OSC's allegations. I read and analyzed every aspect of Applicant's defense.[78]

Applicant argued that Dr. Kaufman should have considered ''M.B.'s mental health issues in making his opinion'' and that, because he did not, he ''could not competently and intelligently analyze M.B.'' Applicant Exceptions, at 3–4. Applicant's argument did not cite any provision of federal or Georgia law that states, or even suggests, that there is a mental health exception to the requirement that controlled substance prescriptions be effective and legitimate. 21 CFR 1306.04(a). I looked for a mental health exception to the applicable standard of care in federal and Georgia law and in Agency decisions. I found none.[79] Accordingly, I reject Applicant's second exception.

Applicant labeled ''clearly erroneous'' the RD's conclusion that Applicant prescribed methadone for D.C. to treat addiction, not pain. Applicant Exceptions, at 5–6. Applicant argued that ''[b]ased purely on . . . [Applicant's] reduction of D.C.'s methadone from the 190 mg received through the methadone clinic to 10 mg immediate [sic] prior to the cessation of methadone by D.C. Kaufman lept to the conclusion that . . . [Applicant] was treating for addiction as opposed to pain.'' *Id.* at 6. Applicant also argued that D.C.'s ''debilitating cluster migraine (mini-seizure) headaches,'' knee osteoarthritis in both knees, and chronic lower back pain ''support'' the conclusion that Applicant was treating D.C. with methadone for pain, not addiction. *Id.* I disagree with Applicant's characterization of the record evidence and, as did the RD, I credit Dr. Kaufman's testimony on this matter and find that Applicant prescribed methadone for D.C. to treat addiction. *See also* RD, at 77–78.

First, the credible record evidence puts in doubt Applicant's diagnoses of pain in DC *E.g.,* Tr. 229–30 (Dr. Kaufman's testimony about Applicant's treatment of D.C.); *see also* RX 17, at 64–68 (Applicant's office notes for D.C.'s visit on June 25, 2013); Tr. 249–50 (Dr. Kaufman's testimony regarding Applicant's methadone prescribing for D.C. stating that ''there's no mention of a back examination. It's not even listed as a possibility. There's no mention of the knee examination. And on the next page, there's further examinations, where again, no back exam, no knee exam. . . . And then the next page is the list of diagnosis. And the first diagnosis is lumbago, which means back pain. And the medicine for that is Tylenol. And it says, 'opioid dependence, counseled patient on the condition, advise him to seek group or individual therapy, anxiety state, take the medicines as prescribed.' And another diagnosis is 'long term use of medications, with a urine drug screen having been performed.' . . . [The methadone is] not being used as a pain reliever, because it's not be[ing] given several times a day, what you notice is the methadone pain effect wears off, so they're going to tell you the pain is much worse at night, because it's worn off. It's not a pain medicine anymore. It will still work to prevent you from being an addict prevent the addictive behavior, but it's not going to work for the pain.'').

Second, as Applicant admitted, it is significant that D.C.'s 190 mg. of methadone was prescribed by a methadone clinic before Applicant took it over. Applicant Exceptions, at 6; Tr. 1009 (Applicant's testimony that a methadone clinic prescribed methadone to D.C.). The credible record evidence is, in Georgia, that methadone clinics treat addiction, they do not treat pain, and that only methadone clinics may prescribe methadone to treat addiction. Tr. 498 (Dr. Kaufman confirming that, in the state of Georgia, methadone treatment for addiction can only be given by a narcotic treatment clinic); *see id.* at 233–34 (''If you were to go to a methadone clinic and say, I have chronic knee pain. Could you give me methadone? They would turn you down. It's not their expertise. . . . So, anybody who is going to a methadone clinic is a person who has an addiction issue.''); *see also id.* at 605 (testimony of Applicant's expert, Dr. Downey, that, in Georgia, only specially licensed narcotic treatment programs are authorized to issue methadone for addiction). Thus, if a methadone clinic initially prescribed methadone for D.C., the prescription was clearly to treat addiction. When Applicant took it over, even when he reduced the amount over time, he was prescribing methadone to D.C. for addiction.

Third, Applicant's evidence, in the form of office policy, clearly states that Suboxone is prescribed for addiction, not pain. RX 3C, at 11. According to Applicant's own evidence, D.C.'s methadone prescription was being ''tapered down,'' so that it could be replaced by Suboxone. Consequently, it is clear that Applicant prescribed methadone for D.C. to treat addiction. Accordingly, I reject Applicant's fifth exception. Applicant Exceptions, at 6–7.

In sum, I carefully considered all of the record evidence relevant to Factors Two and Four and Applicant's position on that evidence. I applied my credibility assessments to that evidence. I conclude that the Government met its *prima facie* burden of showing that Applicant violated federal and Georgia recordkeeping requirements and prescribed controlled substances beneath the applicable standard of care and outside the usual course of professional practice. I further find that Applicant did not rebut the Government's *prima facie* case regarding these violations. Accordingly, I conclude that it would be ''inconsistent with the public interest'' for me to grant Applicant's application for a registration. 21 U.S.C. 823(f).

V. Sanction

Where, as here, the Government presented a *prima facie* case that it would be ''inconsistent with the public interest'' to grant Applicant's request for a registration, and Applicant did not rebut the Government's *prima facie* case, the ''burden of proof shifts'' to Applicant ''to show why . . . [he] can be trusted with a registration.'' *Jones Total Health Care Pharmacy, LLC* v. *Drug Enf't Admin.,* 881 F.3d at 830; *see also Samuel Mintlow, M.D.,* 80 FR 3630,

resolved and . . . she's addicted to her medication.'' *Id.* at 294. He testified about how Applicant's handling of M.B. measured up against the applicable standard of care in Georgia, stating that ''the Medical Board simply states that when things like this happen, you should document that they've happened, and document what you're thinking. So, if there was a note which had some sort of rational explanation about why you're allowing this to continue, you might allow it to continue forever. I mean there's no set rules, but in this particular patient there's so many other things that are wrong. There's no documentation of a history that should be treated this way. There's no physical exam that justifies this. There were no x-rays or—I mean this is going on for so many years, this type of irresponsible—it's irresponsible. So, I mean, again there's no rules, but this is just not right.'' *Id.* at 296–97. Dr. Kaufman reiterated that Applicant's handling of the situation is outside the applicable standard of care. *Id.* at 297. Thus, I find that what initially appeared to be possible compliant and positive controlled substance dispensing experience turned out, upon examination, to be hollow statements with no compliant follow-up.

My finding does not mean that Applicant's controlled substance-related practice of medicine was always beneath the applicable standard of care and outside the usual course of professional practice. Based on the record evidence before me, I find that Applicant's violations of the applicable standard of care and the usual course of professional practice took place with more than one individual and in more than one context over a period of years and, therefore, were not isolated.

[78] My Decision and Order does not consider and is not based on the fact that PLPN was not registered when she dispensed controlled substance prescriptions from Applicant's in-office pharmacy. Applicant Exceptions, at 2–3 (First Exception).

[79] Consulting with a mental health provider about mental health and addiction issues is the standard of care in states in addition to Georgia. *E.g., Wesley Pope, M.D.,* 82 FR 14,944, 14,956, 14,972 (2017); *Bobby D. Reynolds, N.P., Tina L. Killebrew, N.P. and David R. Stout, N.P.,* 80 FR 28,643 (2015).

3652 (2015) (''sufficient mitigating evidence'' must be presented ''to assure the Administrator that [he] can be entrusted with the responsibility carried by such a registration.''); *Cleveland J. Enmon Jr., M.D.,* 77 FR 57,116, 57,126 (2012) (same); *Robert M. Golden, M.D.,* 61 FR 24,808, 24,812 (1996) (same). Further, past performance is the best predictor of future performance and, when an applicant has ''failed to comply with . . . [his] responsibilities in the past, it makes sense for the agency to consider whether . . . [he] will change . . . [his] behavior in the future.'' *Pharmacy Doctors Enterprises, Inc.* v. *Drug Enf't Admin.,* 789 F. App'x, at 733 (citing *Jones Total Health Care Pharmacy, LLC* v. *Drug Enf't Admin.,* 881 F.3d at 831 (citing *MacKay* v. *Drug Enf't Admin.,* 664 F.3d at 820 (''[T]hat consideration is vital to whether continued registration is in the public interest.'') and *Alra Labs., Inc.* v. *Drug Enf't Admin.,* 54 F.3d 450, 452 (7th Cir. 1995) (''An agency rationally may conclude that past performance is the best predictor of future performance.'')).

Circuit courts have also approved the Agency's acceptance of responsibility requirement. *Pharmacy Doctors Enterprises, Inc.* v. *Drug Enf't Admin.,* 789 F. App'x, at 732; *Jones Total Health Care Pharmacy, LLC* v. *Drug Enf't Admin.,* 881 F.3d at 830 (citing *MacKay* v. *Drug Enf't Admin.,* 664 F.3d at 820 (''The DEA may properly consider whether a physician admits fault in determining if the physician's registration should be revoked.''); *see also Jeffrey Stein, M.D.,* 84 FR 46,968, 46,972–73 (2019) (unequivocal acceptance of responsibility); *Jayam Krishna-Iyer, M.D.,* 74 FR 459, 463 (2009) (collecting cases). The Agency has decided that the egregiousness and extent of the misconduct are significant factors in determining the appropriate sanction. *Garrett Howard Smith, M.D.,* 83 FR 18,882, 18,910 (2018) (collecting cases); *Samuel Mintlow, M.D.,* 80 FR at 3652 (''Obviously, the egregiousness and extent of a registrant's misconduct are significant factors in determining the appropriate sanction.''). The Agency has also considered the need to deter similar acts by Applicant and by the community of registrants. *Id.*

In terms of egregiousness, the violations that the record evidence shows Applicant committed go to the heart of the CSA—not complying with required controlled substance recordkeeping and not prescribing controlled substances in compliance with the applicable standard of care and in the usual course of professional practice. In addition, the record evidence indicates that Applicant, even though he was registered in the past, lacks familiarity with applicable controlled substance legal requirements. For example, as already discussed, perhaps the conclusion I could reach that is most favorable to Applicant is that neither he nor his staff understood what records the DEA agents were requesting on August 11, 2015. *Supra* section III.G.

Most remarkable, though, are the under-oath statements of Applicant himself during the hearing. The ALJ asked Applicant whether he had changed the way he does business as far as his practices and protocols in response to the OSC allegations and the ''suggestions or the accusations by Dr. Kaufman.'' Tr. 1066. Applicant started his response by stating that he was not going back into his ''ambulatory practice,'' but if he were, he ''would make changes.'' *Id.* He started again to say he was ''not,'' presumably not returning to his ambulatory practice, and then stated: ''I don't desire to not comply with the law. I don't like what I've been through in the last three years.'' *Id.* The ALJ's next question was whether Applicant intended ''to become fully compliant with all of the regulations.'' *Id.* at 1068. Applicant responded: ''Yes, sir.'' The ALJ then asked ''[w]hat about learning any of these regulations. You know, nobody knows them by heart, but you know, you're responsible for knowing . . . both the Georgia regulations as well . . . the DEA regulations if you're going [to] run a doctor's office.'' *Id.* Applicant answered: ''I'm—I'm always willing to learn anything. And I've already learned a lot. And, I think, the one thing, I don't think I left a lot of dead bodies laying around.'' *Id.* at 1069. Applicant's response was an admission of his lack of familiarity with both the applicable federal and Georgia regulations. Further, although Applicant stated that he is ''always willing to learn anything'' and that he's ''already learned a lot,'' his statement about ''dead bodies'' put into question the value he assigned to practicing medicine in compliance with the applicable standard of care, given his belief that his practice, up until this point, had not ''left a lot of dead bodies laying around'' without following that standard of care.

While Applicant took responsibility for unlawfully prescribing controlled substances to his daughter, he did not take responsibility, let alone unequivocal responsibility, for the other allegations I determined to be founded.[80] Indeed, Applicant testified, at the end of the hearing, that he ''still'' believed that his controlled substance prescribing for D.C. and M.B. was within the usual course of professional practice. *Id.* at 1051. He, thus, evidenced no understanding that his controlled substance prescribing fell short of legal requirements. Accordingly, it is not reasonable to believe that Applicant's future controlled substance prescribing will comply with legal requirements, when he was firm in his belief that he did nothing wrong.[81] *Id.*

Applicant's testimony and statements in his briefing that he intended to restrict his medical practice to elderly patients in institutional settings, such as nursing homes, assisted living, and hospice centers, in other words caring for vulnerable individuals who may be isolated from their loved ones, do not advance the approval of his application.[82] Applicant's Amended Response Brief Regarding the 21 U.S.C. 824(c)(3) Corrective Action Plan Provisions dated September 23, 2019, at 5. The recordkeeping and controlled substance prescribing requirements of the CSA and its implementing regulations also apply to practitioners treating the elderly and vulnerable in institutional settings. If I were to grant his application, I would be sending a message to the regulated community that I do not require registrants to know, and conform to, the provisions of the CSA and its implementing regulations. For all of these reasons, I find that it would be against the public interest for me to entrust Applicant with a registration and, therefore, I will deny his application.

Given my decision that it is not in the public interest for Applicant to have a registration at this time, I conclude that Applicant's proposed Corrective Action Plan provides no basis for me to discontinue or defer this proceeding.

Accordingly, I shall order the denial of Applicant's application.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C.

[80] Although it is not charged in the OSC, Applicant admitted that he also treated his wife. Tr. 1039.

[81] I do not consider remedial measures when an applicant does not unequivocally accept responsibility. Applicant's limited proposed remedial efforts, however, are unpersuasive given the egregiousness and breadth of his violations.

[82] I agree with my predecessors that community impact-type arguments are not persuasive. *Frank Joseph Stirlacci, M.D.,* 85 FR 45,229, 45,239 (2020); *see also Richard J. Settles, D.O.,* 81 FR 64,940, n.16 (2016). Accordingly, I reject Applicant's community impact-type arguments.

823(f), I hereby deny the application submitted by George Pursley, M.D., Control No. W15101573C, seeking registration in Georgia as a practitioner, and any other pending application submitted by George Pursley, M.D. for a DEA registration in the State of Georgia. This Order is effective January 11, 2021.

Timothy J. Shea,

Acting Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Poplar Grove Pharmacy Inc.;

Decision and Order

On November 20, 2019, the Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, DEA or Government), issued an Order to Show Cause (hereinafter, OSC) to Poplar Grove Pharmacy Inc. (hereinafter, Registrant) of Baltimore, Maryland. OSC, at 1. The OSC proposed the revocation of Registrant's Certificate of Registration No. FP3109027. *Id.* It alleged that Registrant ''has no state authority to handle controlled substances.'' *Id.* (citing 21 U.S.C. 824(a)(3)).

Specifically, the OSC alleged that, ''[o]n April 15, 2019, the Maryland State Board of Pharmacy (hereinafter, MBP) . . . issued an Order for Summary Suspension, suspending . . . [Registrant's] Maryland pharmacy permit.'' OSC, at 2. The OSC alleged that ''[c]onsequently, the DEA must revoke . . . [Registrant's] DEA registration based on . . . [its] lack of authority to handle controlled substances in the State of Maryland.'' *Id.*

The OSC notified Registrant of the right to request a hearing on the allegations or to submit a written statement, while waiving the right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* (citing 21 CFR 1301.43). The OSC also notified Registrant of the opportunity to submit a corrective action plan. OSC, at 3 (citing 21 U.S.C. 824(c)(2)(C)).

Adequacy of Service

In a sworn Declaration, dated May 22, 2020, a DEA Diversion Investigator assigned to the Baltimore District Office (hereinafter, DI) stated that he accomplished personal service of the OSC on Susan Nwoga, Registrant's registration contact, at the Maryland Correctional Institution for Women on December 10, 2019. Request for Final Agency Action (hereinafter, RFAA), EX 4 (DI Declaration), at 1. The DI stated that Ms. Nwoga took the OSC. *Id.*

Further evidence of the adequacy of the Government's service is Registrant's proposed Corrective Action Plan (hereinafter, CAP) dated December 16, 2019. RFAA EX 5 (CAP), at 1. Accordingly, based on the evidence in the RFAA and the Government's representations, I find that the Government's service of the OSC was adequate.

Registrant's Proposed CAP

As already discussed, Registrant timely submitted a proposed CAP. *Id.* In the CAP, Registrant asked that ''DEA begin an internal investigation on it's [sic] failure to provide . . . [Ms. Nwoga] with whistle blower protection and why when big retail pharmacies are met with fines, the DEA set out to entrap . . . [her], a black woman who is an American of Nigerian descent.'' *Id.* at 4. Ms. Nwoga ''denied all charges'' and stated that she is ''entitled to all privileges of a licensed pharmacist.'' [1] *Id.* In the CAP, Registrant did not address the status of its Maryland pharmacy permit, including whether the MBP suspended it.

I find that Registrant waived its right to a hearing and proposed a CAP. I find that the Assistant Administrator, Diversion Control Division, denied ''the request to discontinue or defer administrative proceedings.'' RFAA EX 6 (Letter Denying Proposed CAP), at 1. I also find that the Assistant Administrator concluded that ''there is no potential modification of . . . [the proposed CAP] that could or would alter . . . [his] decision in this regard.'' *Id.* I agree with the Assistant Administrator's CAP-related decisions.

The Government forwarded its RFAA, along with the evidentiary record, to my office on May 28, 2020. In its RFAA, the Government represented that ''Registrant currently lacks authority to handle controlled substances in the state of Maryland, the jurisdiction where it was licensed as a pharmacy and where it is registered with DEA.'' RFAA, at 3. The Government requested ''a Final Order revoking Registrant's DEA registration.'' *Id.* at 4.

I issue this Decision and Order based on the record submitted by the Government in its RFAA, which constitutes the entire record before me.[2] 21 CFR 1301.43(e).

Findings of Fact

Registrant's DEA Registration

Registrant is the holder of DEA Certificate of Registration No. FP3109027 at the registered address of 709 Poplar Grove Street, Baltimore, MD 21216. RFAA, EX 1 (Certification of Registration), at 1. Pursuant to this registration, Registrant is authorized to dispense controlled substances in schedules II through V for the business activity of retail pharmacy. *Id.* Registrant's registration ''is in a renewal pending status until the resolution of administrative proceedings.'' *Id.*

The Status of Registrant's State License and Registration

The Government submitted a certified copy of the ''Order for Summary Suspension'' concerning Registrant's pharmacy permit No. P05639 that the MBP issued on April 15, 2019. RFAA, EX 3 (hereinafter, Summary Suspension Order). According to the Summary Suspension Order, Registrant's pharmacist ''pleaded guilty . . . to approximately three hundred (300) counts that included possession with . . . [the] intent to distribute a controlled dangerous substance, Medicaid fraud, and theft.'' *Id.* at 5. The Summary Suspension Order stated that, ''[f]ollowing her conviction, Pharmacist A was ordered held in jail until the date of her sentencing.'' *Id.* It also stated that Registrant ''failed to request or submit to a closing inspection by the . . . [MBP], as required by . . . [MBP] regulations, to ensure the proper transfer of controlled and non-controlled drug inventory and confidential prescription records.'' *Id.* at 6.

After concluding that ''the public health, safety, or welfare imperatively requires emergency action,'' the MBP ''summarily suspended'' the permit issued to Registrant to operate as a pharmacy in Maryland. *Id.* The MBP thus prohibited Registrant from operating as a pharmacy in Maryland and ordered the immediate return of all pharmacy permits to the MBP. *Id.*

The Government also submitted a MBP website screen print showing that Registrant's pharmacy permit is

[1] Most of Registrant's CAP concerned Ms. Nwoga's allegations about ''the DEA's . . . failure to follow their own monitoring policy, thus, allowing the Baltimore city streets to become flooded with controlled narcotics.'' RFAA EX 5, at 2. The CAP stated that she ''satisfied all the requirements of whistle blower,'' but ''[r]ather than protect . . . [her] the DEA began an illegal under cover [sic] operation that spanned many years'' and entrapped her. *Id.* at 2–3. According to the CAP, ''[t]his case is wrought with very ugly racism, anti-feminism, and anti-immigrant overtones in the Baltimore City DEA. The criminal case is under appeal and when reviewed by legal experts, the experts say I will absolutely be released from prison.'' *Id.* at 3.

[2] The RFAA includes Registrant's proposed CAP.

''suspended.'' [3] RFAA, EX 7 (State of Maryland Board of Pharmacy website Screen Print), at 1.

As already discussed, Registrant's proposed CAP did not address the status of its Maryland pharmacy permit. As such, the Government's record evidence that Registrant's pharmacy permit was summarily suspended is not rebutted.

According to Maryland's online records, of which I take official notice, Registrant's pharmacy permit is still suspended today.[4] State of Maryland Board of Pharmacy Web Lookup/Verification, *https://mdbop.mylicense.com/Verification* (last visited date of signature of this Order).

In sum, there is no record evidence rebutting the evidence the Government submitted with its RFAA, EX 3 and EX 7, and the evidence from today's Maryland online records supports the Government's evidence. Accordingly, I find that Registrant's Maryland pharmacy permit is currently suspended.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the CSA ''upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.'' With respect to a practitioner, the Agency has long stated that the possession of authority to dispense controlled substances under the laws of the state in which the practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner's registration. *See, e.g., James L. Hooper, M.D.,* 76 FR 71,371 (2011), *pet. for rev. denied,* 481 F. App'x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.,* 43 FR 27,616, 27,617 (1978).

This rule derives from the text of two provisions of the CSA. First, Congress defined the term ''practitioner'' to mean ''a pharmacy . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which . . . [it] practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.'' 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner's registration, Congress directed that ''[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.'' 21 U.S.C. 823(f). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, the Agency has repeatedly stated that revocation of a practitioner's registration is the appropriate sanction whenever it is no longer authorized to dispense controlled substances under the laws of the state in which she practices. *See, e.g., James L. Hooper, M.D.,* 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.,* 71 FR 39,130, 39,131 (2006); *Dominick A. Ricci, M.D.,* 58 FR 51,104, 51,105 (1993); *Bobby Watts, M.D.,* 53 FR 11,919, 11,920 (1988); *Frederick Marsh Blanton, M.D.,* 43 FR at 27,617.

According to Maryland statute, ''a person shall be registered by the [Maryland] Department [of Health] before the person manufactures, distributes, or dispenses a controlled dangerous substance in the State.'' [5] Md. Code Ann., Crim. Law § 5–301(a)(1) (West, Westlaw current through all legislation from the 2020 Regular Session of the General Assembly). Also according to Maryland statute, a ''person shall hold a pharmacy permit issued by the (Maryland State) Board (of Pharmacy) before the person may establish or operate a pharmacy in this State.'' Md. Code Ann., Health. Occ. § 12–401(a) (West, Westlaw current through all legislation from the 2020 Regular Session of the General Assembly). Accordingly, holding a permit issued by the MBP is a prerequisite to operating a pharmacy and dispensing a controlled substance in Maryland.

Here, the undisputed evidence in the record is that Registrant's pharmacy permit is currently suspended. In Maryland, as already discussed, a pharmacy must hold a permit from the MBP to dispense a controlled substance lawfully. Md. Code Ann., Health. Occ. § 12–401(a); Md. Code Ann., Crim. Law § 5–301(a)(1). Registrant currently lacks a pharmacy permit in Maryland and, thus, it is not eligible to dispense controlled substances in Maryland. 21 U.S.C. 824(a)(3). Accordingly, I will order that Registrant's DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. FP3109027 issued to Poplar Grove Pharmacy Inc. This Order is effective January 11, 2021.

Timothy J. Shea,

Acting Administrator.

BILLING CODE 4410–09–P

[3] Although there is no date on RFAA EX 7, the Government represented in its RFAA that EX 7 shows Registrant's pharmacy permit ''continues to be suspended.'' RFAA, at 3.

[4] Under the Administrative Procedure Act, an agency ''may take official notice of facts at any stage in a proceeding—even in the final decision.'' United States Department of Justice, Attorney General's Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), ''[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.'' Accordingly, Applicant may dispute my finding by filing a properly supported motion for reconsideration of finding of fact within fifteen calendar days of the date of this Order. Any such motion shall be filed with the Office of the Administrator and a copy shall be served on the Government. In the event Applicant files a motion, the Government shall have fifteen calendar days to file a response. Any such motion and response shall be filed and served by email on the other party at the email address the party submitted for receipt of communications related to this administrative proceeding, and on the Office of the Administrator, Drug Enforcement Administration at *dea.addo.attorneys@dea.usdoj.gov.*

[5] ''Dispense,'' under Maryland statute, means ''to deliver to the ultimate user . . . by or in accordance with the lawful order of an authorized provider.'' Md. Code Ann., Crim. Law § 5–101(l)(1) (West, Westlaw current through all legislation from the 2020 Regular Session of the General Assembly).

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Ernesto C. Torres, M.D.; Decision and Order

On July 20, 2020, the Acting Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, Government or DEA), issued an Order to Show Cause (hereinafter, OSC) to Ernesto C. Torres, M.D., (hereinafter, Registrant), of Frederick, Maryland. Government's Request for Final Agency Action (hereinafter, RFAA) Exhibit (hereinafter RFAAX) 4 (OSC), at 1. The OSC proposed the revocation of Registrant's Certificate of Registration No. AT8751213. Id. It alleged that Registrant is without ''authority to handle controlled substances in Maryland, the state in which [Registrant is] registered with DEA.'' Id. at 2 (citing 21 U.S.C. § 824(a)(3)).

Specifically, the OSC alleged that ''[o]n January 6, 2020, the [Maryland Board of Physicians (hereinafter, MBP)] issued [a] Final Decision and Order on Order for Summary Suspension, whereby the MBP affirmed its May 2019 suspension ruling. Moreover, during the pendency of the above MBP suspension proceedings, [Registrant's] state medical license expired on September 30, 2019,

and has not been renewed.'' Id. at 2. The OSC further alleged that Registrant is not eligible to obtain or retain a DEA registration because he lacks state authority to handle controlled substances in Maryland. Id.

The OSC notified Registrant of the right to either request a hearing on the allegations or submit a written statement in lieu of exercising the right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. Id. at 2–3 (citing 21 C.F.R. § 1301.43). The OSC also notified Registrant of the opportunity to submit a corrective action plan. Id. at 3 (citing 21 U.S.C. § 824(c)(2)(C)).

I.Adequacy of Service

A DEA Diversion Investigator (hereinafter, DI) provided details regarding DEA's ''multiple efforts'' to serve Registrant with the OSC, which were complicated by the fact that Registrant is currently at a Maryland Department of Health facility. RFAAX 11, at 3 (Declaration of Diversion Investigator, dated October 22, 2020). The DI stated that due to visitor restrictions at the facility, the DI arranged to email the OSC to Registrant's doctor, who confirmed via reply email that Registrant had received the OSC. Registrant's doctor attached a signed DEA Form 12, Receipt for Cash or Other Items, which demonstrated that Registrant received the OSC on September 17, 2020, and was signed by Registrant and witnessed by his doctor. Id. at 4; see also RFAAX 6, at 1 (signed DEA Form 12).

The Government forwarded its RFAA along with the evidentiary record, to this office on October 23, 2020. In its RFAA, the Government represents that Registrant has not requested a hearing nor '''otherwise corresponded or communicated with DEA regarding the... [OSC], including the filing of any written statement in lieu of a hearing' and therefore has waived his right to a hearing.'' RFAA, at 6 (quoting Warren B. Dailey. M.D., 82 Fed. Reg. 46,525–26 (2017); David D. Moon, D.O., 82 Fed. Reg. 19,385, 19,387 (2017)). The Government argued that ''grounds exist for the revocation of Registrant's DEA [registration] pursuant to 21 U.S.C. §§ 823(f) and 824(a)(3)'' and requests ''the issuance of a DEA Final Order for the revocation'' of Registrant's registration. Id. at 6, 7.

I find that more than thirty days have now passed since the Government accomplished service of the OSC. Further, based on the Government's written representations and Registrant's own statements, I find that neither Registrant, nor anyone purporting to represent Registrant, requested a hearing, submitted a written statement while waiving Registrant's right to a hearing, or submitted a corrective action plan. RFAA, at 6. Accordingly, I find that Registrant has waived the right to a hearing and the right to submit a written statement and corrective action plan. 21 C.F.R. § 1301.43(d) and 21 U.S.C. § 824(c)(2)(C). I, therefore, issue this Decision and Order based on the record submitted by the Government, which constitutes the entire record before me. 21 C.F.R. § 1301.46.

II. Findings of Fact

A. Registrant's DEA Registration

Registrant is the holder of DEA Certificate of Registration No. AT8751213 at the registered address of 188 Thomas Johnson Drive, Suite 202, Frederick, Maryland 21702. RFAAX 2 (Certification of Registration History). Pursuant to this registration, Registrant is authorized to dispense controlled substances in schedules II through V as a practitioner. Id. Registrant's registration expires on November 30, 2021. Id. The registration ''is in active pending status until the resolution of administrative proceedings.'' Id.

B.The Status of Registrant's State License

On May 28, 2019, the MBP issued an Order for Summary Suspension of License to Medicine against Registrant. RFAAX 3 (Final Decision and Order on Order for Summary Suspension (hereinafter, Suspension Order)), at 1. After a hearing, the MBP issued a Suspension Order affirming Registrant's suspension on January 6, 2020, in which it concluded that summary suspension of Registrant's medical license ''is imperatively required to protect the public health, safety, and welfare.'' Id. at 2. The MBP ordered that ''the summary suspension of [Registrant's] license to practice medicine in Maryland remains in effect.'' Id. at 3.

According to Maryland's online records, of which I take official notice, Registrant's medical license status and Controlled Dangerous Substances (CDS) registration are both ''expired.''[1] Maryland Board of Physicians Profile Search, available at https://www.mbp.state.md.us/bpqapp/ (last visited date of signature of this Order), and Maryland Office of Provider Engagement and Regulation (Oper) Controlled Dangerous Substances Registration Search, available at https://health.maryland.gov/ocsa/Pages/cdssearch.aspx (last visited date of signature of this Order).

Accordingly, I find that Registrant currently is neither licensed to engage in the practice of medicine nor registered to dispense controlled substances in Maryland, the state in which Registrant is registered with the DEA.

III. Discussion

Pursuant to 21 U.S.C. § 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the CSA ''upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.'' With respect to a practitioner, the DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner's registration. See, *e.g.* , James L. Hooper, M.D., 76 Fed. Reg. 71,371 (2011), pet. for rev. denied, 481 Fed. Appx. 826 (4th Cir. 2012); Frederick Marsh Blanton, M.D., 43 Fed. Reg. 27,616, 27,617 (1978).

This rule derives from the text of two provisions of the CSA. First, Congress defined the term ''practitioner'' to mean ''a physician... or other person licensed, registered, or otherwise permitted, by... the jurisdiction in which he practices..., to distribute, dispense,... [or] administer... a controlled substance in the course of professional practice.'' 21 U.S.C. § 802(21). Second, in setting the requirements for obtaining a practitioner's registration, Congress directed that ''[t]he Attorney General shall register practitioners... if the applicant is authorized to dispense... controlled substances under the laws of the State in which he practices.'' 21

[1] Under the Administrative Procedure Act, an agency ≥may take official notice of facts at any stage in a proceeding - even in the final decision.≥ United States Department of Justice, Attorney General's Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. § 556(e), ≥[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.≥ Accordingly, Registrant may dispute my finding by filing a properly supported motion for reconsideration of finding of fact within fifteen calendar days of the date of this Order. Any such motion shall be filed with the Office of the Administrator and a copy shall be served on the Government. In the event Registrant files a motion, the Government shall have fifteen calendar days to file a response. Any such motion and response may be filed and served by e-mail (dea.addo.attorneys@dea.usdoj.gov).

U.S.C. § 823(f). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, the DEA has held repeatedly that revocation of a practitioner's registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. See, *e.g.* , James L. Hooper, 76 Fed. Reg. at 71,371–72; Sheran Arden Yeates, M.D., 71 Fed. Reg. 39,130, 39,131 (2006); Dominick A. Ricci, M.D., 58 Fed. Reg. 51,104, 51,105 (1993); Bobby Watts, M.D., 53 Fed. Reg. 11,919, 11,920 (1988); Frederick Marsh Blanton, 43 Fed. Reg. at 27,617.

Pursuant to the Maryland Controlled Dangerous Substances Act, ''a person shall be registered by the Department before the person manufactures, distributes, or dispenses a controlled dangerous substance in the State or transports a controlled dangerous substance into the State.'' Md. Code Ann., Crim. Law § 5–301 (West 2020). Maryland law further defines ''dispense'' to ''mean[] to deliver to the ultimate user of the human research subject by or in accordance with the lawful order of an authorized provider'' and states that the term ''includes to prescribe, administer, package, label, or compound a substance for delivery.'' Id. at § 5–101(l)(1)&(2).

Here, the undisputed evidence in the record is that Registrant currently lacks authority to dispense controlled substances in Maryland, as his controlled substance license is ''expired.'' As already discussed, a practitioner must hold a valid controlled substance license to dispense a controlled substance in Maryland. Thus, because Registrant lacks authority to handle controlled substances in Maryland, Registrant is not eligible to maintain a DEA registration. Accordingly, I order that Registrant's DEA registration be revoked.

Order

Pursuant to 28 C.F.R. § 0.100(b) and the authority vested in me by 21 U.S.C. § 824(a), I hereby revoke DEA Certificate of Registration No. AT8751213 issued to Ernesto C. Torres, M.D. This Order is effective January 11, 2021.

Timothy J. Shea,

Acting Administrator.

[FR Doc. 2020–27233 Filed 12–10–20; 8:45 am]

BILLING CODE 4410–09–P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Ionizing Radiation Standard

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Occupational Safety and Health Administration (OSHA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before January 11, 2021.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: Crystal Rennie by telephone at 202–693–0456, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: The purpose of the Ionizing Radiation Standard and its information collection requirements are to document that employers are providing their workers with protection from hazardous ionizing radiation exposure. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on June 29, 2020 (85 FR 38931).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–OSHA.

Title of Collection: Ionizing Radiation Standard.

OMB Control Number: 1218–0103.

Affected Public: Private Sector, Businesses or other for-profits.

Total Estimated Number of Respondents: 13,135.

Total Estimated Number of Responses: 337,279.

Total Estimated Annual Time Burden: 59,077 hours.

Total Estimated Annual Other Costs Burden: $ 8,892,917.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Crystal Rennie,

Acting Departmental Clearance Officer.

[FR Doc. 2020–27208 Filed 12–10–20; 8:45 am]

BILLING CODE 4510–26–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–2021–009]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of proposed extension request.

SUMMARY: NARA proposes to request an extension from the Office of Management and Budget (OMB) of approval to use forms by which we collect information from people requesting military records so that we can locate, identify, and provide the requested information. We invite you to comment on this proposed information collection pursuant to the Paperwork Reduction Act of 1995.

DATES: We must receive comments in writing on or before February 9, 2021.

ADDRESSES: Send comments by email to *tamee.fechhelm@nara.gov.* Because our buildings are temporarily closed during the COVID–19 restrictions, we are not able to receive comments by mail during this time.

FOR FURTHER INFORMATION CONTACT: Tamee Fechhelm, Paperwork Reduction Act Officer, by email at *tamee.fechhelm@nara.gov* or by telephone at 301.837.1694 with requests for additional information or copies of the proposed information collection and supporting statement.

SUPPLEMENTARY INFORMATION: Pursuant to the Paperwork Reduction Act of 1995 (Pub. L. 104–13), we invite the public and other Federal agencies to comment on proposed information collections. The comments and suggestions should address one or more of the following points: (a) Whether the proposed information collection is necessary for NARA to properly perform its functions; (b) our estimate of the burden of the proposed information collection and its accuracy; (c) ways we could enhance the quality, utility, and clarity of the information we collect; (d) ways we could minimize the burden on respondents of collecting the information, including through information technology; and (e) whether this collection affects small businesses. We will summarize any comments you submit and include the summary in our request for OMB approval. All comments will become a matter of public record.

In this notice, we solicit comments concerning the following information collection:

Title: Request Pertaining to Military Records.

OMB number: 3095–0029.

Agency form number: SF 180 and NA Form 13176; online form in eVetRecs is an electronic equivalent to the SF 180.

Type of review: Regular.

Affected public: Individuals who request access to military records, military medical records, and medical records of military dependents.

Estimated number of respondents: 953,328.

Estimated time per response: 5 minutes.

Frequency of response: On occasion (when an individual wishes to request information from military records, military medical records, or medical records of military dependents).

Estimated total annual burden hours: 79,444 hours.

Abstract: The general purpose of this voluntary data collection is to determine what is being requested, where records are located, what information is releasable, and where to send the response. When third parties submit requests, the information collected and provided serves as records of disclosure, which are required by the Privacy Act. The information collected via the SF 180 and eVetRecs is vital to our National Personnel Records Center, which stores and handles these records. We need this information to locate and release information from requested records. It also significantly improves our ability to provide timely and accurate information to requesters.

Swarnali Haldar,

Executive for Information Services/CIO.

[FR Doc. 2020–27343 Filed 12–10–20; 8:45 am]

BILLING CODE 7515–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2020–0255]

Implementation of Aging Management Requirements for Spent Fuel Storage Renewals

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft regulatory guide; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment draft regulatory guide (DG), DG–3055, ''Implementation of Aging Management Requirements for Spent Fuel Storage Renewals.'' This DG is a proposed new regulatory guide that would describes an approach that is acceptable to the staff of the NRC to meet the regulatory requirements for spent fuel storage renewals. It addresses requirements for the renewal of specific licenses for independent spent fuel storage installations (ISFSI) and certificates of compliance (CoC) for spent fuel storage cask designs pursuant to NRC requirements.

DATES: Submit comments by January 25, 2021. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal Rulemaking website:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2020–0255. Address questions about Docket IDs in *Regulations.gov* to Jennifer Borges; telephone: 301–287–9127; email: *Jennifer.Borges@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on accessing information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Kristina Banovac, telephone: 301–415–7116, email: *Kristina.Banovac@nrc.gov,* or Harriet Karagiannis, telephone: 301–415–2493, email: *Harriet.Karagiannis@nrc.gov.* Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2020–0255 when contacting the NRC about the availability of information regarding this action. You may obtain publicly available information related to this action, by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2020–0255.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.*
- *Attention:* The PDR, where you may examine, and order copies of public documents is currently closed. You may submit your request to the PDR via email at *PDR.Resource@nrc.gov* or call 1–800–397–4209 between 8:00 a.m. and 4:00 p.m. (EST), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal Rulemaking website: *https://www.regulations.gov.* Please include Docket ID NRC–2020–0255 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at *https://www.regulations.gov* as well as enters the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Additional Information

The NRC is issuing for public comment a DG in the NRC's ''Regulatory Guide'' series. This series was developed to describe methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, to explain techniques that the staff uses in evaluating specific issues or postulated events, and to describe information that the staff needs in its review of applications for permits and licenses.

This DG, titled, ''Implementation of Aging Management Requirements for Spent Fuel Storage Renewals,'' is temporarily identified by its task number, DG–3055 (ADAMS Accession No. ML20282A298). This draft guide is a proposed new regulatory guide (RG) 3.76. Regulatory Guide 3.76 describes an approach that is acceptable to the staff of the NRC by endorsing, with clarifications, the Nuclear Energy Institute (NEI) guidance in NEI 14–03, Revision 2, ''Format, Content and Implementation Guidance for Dry Cask Storage Operations-Based Aging Management,'' issued December 2016.

This new RG provides guidance to industry for complying with and implementing the requirements for spent fuel storage renewals in part 72 of title 10 of the *Code of Federal Regulations* (10 CFR), ''Licensing Requirements for the Independent Storage of Spent Nuclear Fuel, High-Level Radioactive Waste, and Reactor-Related Greater Than Class C Waste.'' This guidance addresses renewal of ISFSI specific licenses and CoCs for spent fuel storage cask designs in 10 CFR 72.42, ''Duration of license; renewal,'' and 10 CFR 72.240, ''Conditions for spent fuel storage cask renewal,'' respectively.

The guidance specifically addresses the format and content of spent fuel storage renewal applications and the implementation of aging management programs (AMPs). The guidance uses an operations-focused approach to aging management, in which operating experience is shared through an industry database and continually assessed to adjust AMPs, as needed and within regulatory limits, to ensure the effectiveness of aging management activities during the period of extended operation and the continued safe storage of spent fuel.

The staff is also issuing for public comment a draft regulatory analysis (ADAMS Accession No. ML20282A299). The staff develops a regulatory analysis to assess the value of issuing this new regulatory guide as well as alternative courses of action.

III. Backfitting, Forward Fitting, and Issue Finality

This proposed regulatory guide, RG 3.76, proposes to endorse, with clarifications, NEI 14–03, which provides guidance on the format and content of spent fuel storage renewal applications and implementation of aging management programs under 10 CFR part 72. As explained in the proposed RG 3.76, licensees are not required to comply with the positions set forth in this regulatory guide. Therefore, proposed RG 3.76 does not constitute backfitting as defined in 10 CFR 72.62, ''Backfitting,'' and as described in NRC Management Directive (MD) 8.4, ''Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests;'' or constitute forward fitting as that term is defined and described in MD 8.4. If, in the future, the NRC were to impose a position in this proposed RG 3.76 in a manner that would constitute backfitting or forward fitting, then the NRC would address the backfitting provision in 10 CFR 72.62 or the forward fitting provision of MD 8.4, respectively.

Dated: December 8, 2020.

For the Nuclear Regulatory Commission.

Meraj Rahimi,

Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.

[FR Doc. 2020–27351 Filed 12–10–20; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 40–9075; NRC–2012–0277]

Updated Record of Decision for Powertech (USA) Inc.; Dewey-Burdock In Situ Uranium Recovery Facility

AGENCY: Nuclear Regulatory Commission.

ACTION: Record of Decision; update.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) staff has issued an updated Record of Decision (ROD) related to the license for Powertech (USA) Inc. (Powertech), Dewey-Burdock in situ uranium recovery (ISR) facility in Custer and Fall River Counties, South Dakota. Powertech's request for a source and byproduct materials license to construct and operate the Dewey-Burdock ISR facility was contested through the NRC's adjudicatory process. On October 8, 2020, the Commission denied a petition for review of the Atomic Safety and Licensing Board Panel's (ASLBP) Final Initial Decision issued on December 12, 2019, and two interlocutory orders, thus terminating the adjudicatory proceeding. The ROD has been updated to account for the ASLBP's decision and the Commission's ruling.

DATES: The ROD was updated on December 3, 2020.

ADDRESSES: Please refer to Docket ID NRC–2012–0277 when contacting the NRC about the availability of information regarding this document. You may access publicly available information related to this document using any of the following methods:

- *Federal Rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2012–0277. Address questions about Docket IDs in *Regulations.gov* to Jennifer Borges; telephone: 301–287–9127; email: *Jennifer.Borges@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/*

adams.html. To begin the search, select ''Begin Web-based ADAMS Search.'' The updated ROD can be found by searching for ADAMS Accession No. ML20321A051. For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.*

• Attention: The PDR, where you may examine and order copies of public documents, is currently closed. You may submit your request to the PDR via email at *PDR.Resource@nrc.gov* or call 1–800–397–4209 between 8:00 a.m. and 4:00 p.m. (EST), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Diana Diaz-Toro, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC,

20555–0001; telephone: 301–415–0930; email: *Diana.Diaz-Toro@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Discussion

The NRC staff issued a license to Powertech for the construction and operation of its Dewey-Burdock ISR facility in Custer and Fall River Counties, in South Dakota in April 2014. Along with the issuance of the license, the NRC staff published a ROD in April 2014 that supported its decision to approve Powertech's license application for the Dewey-Burdock ISR facility.

During the NRC staff's licensing review, the NRC's ASLBP, an independent, trial-level adjudicatory body, granted a hearing request from the Oglala Sioux Tribe and Consolidated Intervenors (consisting of a group of individuals and organizations). The ASLBP held an evidentiary hearing in Rapid City, South Dakota, from August 19–21, 2014, on seven admitted contentions. On April 30, 2015, the ASLBP issued a Partial Initial Decision (LBP–15–16) resolving all but two of the admitted contentions in favor of the NRC staff: Contentions 1A and 1B, regarding historic and cultural resources, were resolved in favor of the Oglala Sioux Tribe and Consolidated Intervenors. Subsequently, on October 19, 2017, the ASLBP granted the NRC staff's motion for summary disposition of Contention 1B and determined that the NRC staff's efforts satisfied the National Historic Preservation Act (NHPA) requirement that the NRC staff consult with the Oglala Sioux Tribe. On April 29, 2019, the ASLBP granted the NRC staff's motion to set a schedule for an evidentiary hearing. The hearing was held on August 28 and 29, 2019, in Rapid City, South Dakota. On December 12, 2019, the ASLBP issued the Final Initial Decision (LBP–19–10) finding that the staff satisfied its National Environmental Policy Act (NEPA) obligation to take a reasonable hard look at potential impacts to cultural resources. The ASLBP also found that, consistent with the Council on Environmental Quality regulations at section 1502.22 of the title 40 of the *Code of Federal Regulations,* the information necessary to complete the NEPA review is effectively unavailable and that no further supplemental environmental impact statement is necessary in this case. The ASLBP also included a new condition to Powertech's license. It provides that, prior to appointing a Tribal Monitor pursuant to Stipulation 13(c) of the NHPA Programmatic Agreement, Powertech shall notify the NRC of the identity of the Monitor, and the NRC will in turn distribute that information to the signatories and consulting Tribes to the Programmatic Agreement for a 30-day review and comment period. On October 8, 2020, the Commission denied a petition for review (CLI–20–09) of the ASLBP's final initial decision in LBP–19–10 and two interlocutory ASLBP orders, which terminated the adjudicatory proceeding. The updated ROD accounts for the ASLBP's decisions and the Commission's ruling.

II. Availability of Documents

The documents identified in the following table are available to interested persons as indicated.

Document description	ADAMS Accession No.
Powertech Dewey-Burdock Application, February 28, 2009	ML091200014 (package).
Generic Environmental Impact Statement for In Situ Leach Uranium Milling Facilities, May 2009	ML091530075 (package).
Resubmission of Application, August 10, 2009	ML092870160 (package).
Response to Request for Additional Information, August 12, 2010	ML102380530 (package).
Revised Response to Request for Additional Information, June 28, 2011	ML112071064 (package).
Ground Water Model, February 27, 2012	ML120620195 (package).
Clarification of Oxidation-Reduction Potential Measurement, April 11, 2012	ML121030013.
Clarification of Regional Meteorological Data, June 13, 2012	ML12173A038.
Clarification of Response to Request for Additional Information, June 27, 2012	ML12179A534.
Supplemental Sampling Plan and Responses to Comments Regarding Draft License, October 19, 2012.	ML12305A056.
Comments on Draft Supplemental Environment Impact Statement, January 8, 2013	ML13022A386.
Supplemental Environmental Impact Statement for the Dewey-Burdock ISR Facility in Fall River and Custer Counties, South Dakota (NUREG-1910, Supplement 4, Volumes 1 and 2), January 31, 2014.	ML14024A477 ML14024A478.

BILLING CODE 7590–01–P

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2021–41 and CP2021–42; Docket Nos. MC2021–42 and CP2021–43]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* December 15, 2020.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the market dominant or the competitive product list, or the modification of an existing product currently appearing on the market dominant or the competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern market dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3030, and 39 CFR part 3040, subpart B. For request(s) that the Postal Service states concern competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3040, subpart B. Comment deadline(s) for each request appear in section II.

1. *Docket No(s).:* MC2021–41 and CP2021–42; *Filing Title:* USPS Request to Add Priority Mail & First-Class Package Service Contract 181 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 7, 2020; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Christopher C. Mohr; *Comments Due:* December 15, 2020.

2. *Docket No(s).:* MC2021–42 and CP2021–43; *Filing Title:* USPS Request to Add Parcel Select Contract 44 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* December 7, 2020; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Christopher C. Mohr; *Comments Due:* December 15, 2020.

This Notice will be published in the **Federal Register**.

Erica A. Barker,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–90584; File No. SR–NYSEAMER–2020–64]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing of Amendment No. 1 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 1, to Modify Rule 971.1NY Regarding Customer Best Execution Auctions to Provide Optional All-or-None Functionality for Larger-Sized Orders

December 7, 2020.

I. Introduction

On August 19, 2020, NYSE American LLC (''NYSE American'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to modify Rules 971.1NY and 971.2NY regarding the Exchange's Customer Best Execution auction (''CUBE Auction'' or ''Auction'') to provide optional all-or-none (''AON'') functionality for larger-sized orders. The proposed rule change was published for comment in the **Federal Register** on September 8, 2020.[3] On October 14, 2020, pursuant to Section 19(b)(2) of the Act,[4] the Commission extended the time period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to approve or disapprove the proposed rule change, to December 7, 2020.[5] The Commission has received no comments on the proposed rule change. On November 24, 2020, the Exchange filed Amendment No. 1 to the proposed rule change, which replaced and superseded the proposed rule change in its entirety.[6] The Commission is publishing this notice to solicit comments on the proposed rule change, as modified by Amendment No. 1, from interested persons, and is approving the proposed rule change, as modified by Amendment No. 1, on an accelerated basis.

II. Description of the Proposed Rule Change

In Amendment No. 1, the Exchange proposes to expand its electronic crossing mechanism—the CUBE Auction—to provide optional AON[7]

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 89723 (September 1, 2020), 85 FR 55562 (September 8, 2020).

[4] 15 U.S.C. 78s(b)(2).

[5] *See* Securities Exchange Act Release No. 90178 (October 14, 2020), 85 FR 66645 (October 20, 2020).

[6] In Amendment No. 1, the Exchange modified the proposal with regard to the outcomes of the proposed new CUBE Auction functionality, as proposed for larger-sized orders, in certain situations where Customer interest at the stop price is resting on the Exchange's book before, or arrives during, the Auction. *See* infra notes 15–18 and accompanying text for a description of these outcomes under the proposal as amended. *See also* Exhibit 4 of Amendment No. 1 showing the changes made by the amendment to the text of Commentary .05 to Rule 971.1NY as originally proposed. In Amendment No. 1 the Exchange also deleted proposed new Commentary .04 to Rule 971.2NY, which would have provided for optional functionality for larger-sized orders in the Exchange's CUBE Auction for Complex Orders paralleling the similar functionality for Single-Leg CUBE Auctions proposed in new Commentary .05 to Rule 971.1NY, and made other, clarifying revisions in its discussion of the purpose of the proposal.

[7] An All-or-None Order or AON Order is a ''Market or Limit Order that is to be executed on

functionality for ATP Holders to execute larger-sized orders (*i.e.,* 500 or more contracts) in the Single-Leg CUBE Auction.[8] The Exchange seeks to expand the CUBE Auction functionality in a manner consistent with similar price-improvement mechanisms for larger-sized orders already available on other options exchanges.[9] As such, the Exchange believes that its proposal would allow it to compete with other options exchanges for such larger-sized orders and would benefit market participants who are already familiar with such price-improvement mechanisms.

According to the Exchange, the CUBE Auction operates seamlessly with the Consolidated Book—while still affording CUBE Orders an opportunity to receive price improvement.[10] The Exchange states that the proposal to expand the current CUBE Auction functionality by providing an additional (optional) method for market participants to effect larger-sized orders in the CUBE Auction would likewise operate seamlessly with the Consolidated Book. The Exchange believes that its proposal would encourage ATP Holders to compete vigorously to provide the opportunity for price improvement for larger-sized orders in a competitive auction process, which may lead to enhanced liquidity and tighter markets.

Proposed AON Single-Leg CUBE functionality

The Exchange proposes to add new Commentary .05 to Rule 971.1NY to provide that a CUBE Order of at least 500 contracts would execute in full at the single stop price against the Contra Order, except under specified circumstances (the ''AON CUBE Order'').[11] As further proposed, a Contra Order would not be permitted to guarantee an AON CUBE Order for auto-match or an auto-match limit, which features are otherwise available in a Single-Leg CUBE Auction.[12]

The initiating price and permissible range of executions for a proposed AON CUBE Order would be determined in the same manner as for a standard CUBE Order.[13] An AON CUBE Order Auction would also be subject to the same early end events as a Single-Leg CUBE Order.[14]

As proposed, an AON CUBE Order would not execute with the Contra Order if the entire AON CUBE Order could be satisfied in full by certain eligible contra-side interest. Specifically, the Exchange proposes that paragraph (a) to Commentary .05 to Rule 971.1NY would provide that:

(a) The Contra Order would not receive any allocation and will be cancelled if (i) RFR Responses to sell (buy) at prices lower (higher) than the stop price can satisfy the full quantity of the AON CUBE Order or (ii) there is Customer interest to sell (buy) at the stop price that on its own, or when aggregated with RFR Responses to sell (buy) at the stop price or prices lower (higher) than the stop price, can satisfy the full quantity of the AON CUBE Order. In either such case, the RFR Responses will be allocated as provided for in paragraphs (c)(5)(A) and (c)(5)(B)(i) of this Rule, as applicable.[15]

Thus, as noted by the Exchange, if there is price-improving contra-side interest that can satisfy the AON condition of the Auction, the AON CUBE Order would execute in full against those price-improving RFR Responses and the Contra Order would cancel. Or, absent such price-improving interest, if there is Customer interest equal to the stop price that on its own, or when combined with equal- or better-priced RFR Responses that can satisfy the AON condition of the Auction, the AON CUBE Order would execute in full against such interest and the Contra Order would cancel. Under either scenario, the AON CUBE Order would be allocated against contra-side interest at the best price(s) pursuant to the Exchange's priority rules.[16]

As further proposed, both the AON CUBE Order and Contra Order would be cancelled, *i.e.,* the Auction would be cancelled, if there is contra-side Customer interest at the stop price and such interest on its own or when combined with RFR Responses (at the stop price or better) is insufficient to satisfy the entire AON CUBE Order. To effect this result, the Exchange proposes that paragraph (b) to Commentary .05 to Rule 971.1NY would provide that:

(b) T he AON CUBE Order and Contra Order will both be cancelled if there is Customer interest to sell (buy) at the stop price and such interest, either on its own or when aggregated with RFR Responses to sell (buy) at the stop price or prices lower (higher) than the stop price, is insufficient to satisfy the full quantity of the AON CUBE Order.[17]

Thus, as proposed, if there is contra-side Customer interest at the stop price, but there is not enough size (considering the Customer interest and all RFR Responses at the stop price or better) to satisfy the entire AON CUBE Order, then both the AON CUBE Order and the Contra Order would be cancelled. The Exchange believes that this proposal is consistent with the terms of how AON orders function generally without violating the Exchange's general priority rules.[18] With respect to allocation, the Exchange notes that the proposed functionality differs from the allocation of a standard Single-Leg CUBE Order in that the Contra Order is not guaranteed

the Exchange in its entirety or not at all.'' *See* Rule 900.3NY(d)(4).

[8] *See* proposed Rules 971.1NY, Commentary .05. Capitalized terms have the same meaning as the defined terms in Rule 971.1NY.

[9] The Exchange cites as an example the Solicitation Auction Mechanism (''SAM'' or ''SAM Auction'') of the Cboe Exchange, Inc. (''Cboe''), governed by Cboe Rule 5.39, described by the Exchange as an electronic crossing mechanism for single-leg paired orders of 500 or more contracts, which the Cboe system automatically treats as All-Or-None, where the solicited contra order(s) trades entirely with the agency order at the stop price unless, in the aggregate, the agency order can be filled entirely by responses to the auction at improved prices or, if there are Priority Customer orders at the stop price, by such Priority Customer orders alone or in combination with responses to the auction at the stop price or improved prices. If there are Priority Customer orders at the stop price but insufficient size of such orders alone or when aggregated with responses at the stop price or better prices to fill the agency order, both the agency order and solicited contra order(s) will be cancelled. The Exchange notes that Cboe's affiliated exchanges similarly offer such auction mechanism for larger-sized orders. *See, e.g.,* Cboe EDGX Exchange, Inc. (''Cboe EDGX'') Rules 21.21 (SAM). The Exchange also notes that similar mechanisms are available on other options exchanges. *See, e.g.,* Nasdaq ISE LLC (''ISE''), Options 3, Section 11(d) (setting forth its Solicited Order Mechanism).

[10] *See* Rule 900.2NY(14) (defining Consolidated Book (or ''Book'') and providing that all quotes and orders ''that are entered into the Book will be ranked and maintained in accordance with the rules of priority as provided in Rule 964NY''). Rule 964NY (Display, Priority and Order Allocation—Trading Systems) dictates the priority of quotes and orders.

[11] *See* proposed Commentary .05, Rule 971.1NY. *See* Rule 971.1NY(c)(1)(A) (setting forth parameters for single stop price). An AON CUBE Order would be rejected for the same reasons as a CUBE Order (*see* Rule 971.1NY(b)(2)–(10)), except that the minimum size for an AON CUBE Order is 500 contracts, as opposed to one contract, as set forth in Rule 971.1NY(b)(8).

[12] *See* proposed Commentary .05, Rule 971.1NY. *See also* Rule 971.1NY(c)(1)(B)–(C) (regarding parameters for auto-match and auto-match limit price).

[13] An AON CUBE Order and its paired Contra Order would be rejected if it failed to meet the pricing parameters. *See* Rule 971.1NY(b) (regarding auction eligibility requirements).

[14] *See* Rule 971.1NY(c)(4) (setting forth the type of interest that causes the early end to a Single-Leg CUBE Auction).

[15] *See* proposed Commentary .05, Rule 971.1NY(a).

[16] *See* Rule 971.1NY (c)(5)(A) (providing Customer interest first priority to trade with the CUBE Order, pursuant to the size pro rata algorithm set forth in Rule 964NY(b)(3) at each price point) and (c)(5)(B)(i) (providing that, second to Customer interest, RFR Responses priced below (above) the stop price, beginning with the lowest (highest) price within the range of permissible executions will execute with the CUBE Order, pursuant to the size pro rata algorithm set forth in Rule 964NY(b)(3) at each price point).

[17] *See* proposed Commentary .05, Rule 971.1NY(b).

[18] *See* Rule 964NY (regarding order ranking and priority).

a minimum allocation at the stop price. Instead, given the AON nature of the functionality, the Contra Order either trades with the entire AON CUBE Order or not at all.[19] The Exchange's proposal also is consistent with the AON nature of similar mechanisms on other options exchanges.[20]

With the exception of differences to the minimum size and allocation described in proposed Commentary .05 to Rule 971.1NY, an AON CUBE Order would otherwise be subject to Rule 971.1NY with respect to all other aspects of the CUBE Auction functionality.[21]

Implementation

The Exchange states that it will announce the implementation date of the proposed rule change in a Trader Update following the approval of this proposed rule change.

III. Discussion and Commission Findings

After careful review, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges.[22] In particular, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with Section 6(b)(5) of the Act,[23] which requires that the rules of an exchange be designed, among other things, to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Commission believes that approving the Exchange's proposal, as amended, to provide optional AON functionality for larger-sized orders may allow for greater flexibility in executing large-sized orders and could provide additional opportunities for such orders to receive price improvement over the NBBO, in the interest of perfecting the mechanism of free and open markets. The Commission further believes that the proposal, as amended, includes appropriate conditions to protect the priority of public customer orders on the Exchange, and is thereby consistent with the protection of investors and the public interest, because it assures that public customers who have taken the risk of placing limit orders on the Exchange have a fair opportunity to participate in transactions taking place on the Exchange. The Commission notes that the proposed rules providing this protection are similar to the rules of other exchanges with similar functionality and believes that they raise no novel issues.[24] Based on the foregoing, the Commission finds that the proposed rule change is consistent with the Act.

IV. Solicitation of Comments on Amendments No. 1

Interested persons are invited to submit written data, views, and arguments concerning whether Amendments No. 1 is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEAMER–2020–64 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEAMER–2020–64. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of this filing will also be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change.

Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEAMER–2020–64 and should be submitted on or before January 4, 2021.

V. Accelerated Approval of the Proposed Rule Change, as Modified by Amendment No. 1

The Commission finds good cause to approve the proposed rule change, as modified by Amendment No. 1, prior to the thirtieth day after the date of publication of Amendment No. 1 in the **Federal Register**. In Amendment No. 1, the Exchange modified the proposal with respect to the outcomes of AON CUBE Auctions for larger-sized orders in certain cases where there is Customer interest on the Exchange's book.[25] In doing so, the Exchange aligned the outcomes of the Auction with the outcomes of similar mechanisms on other exchanges, affording appropriate protections for the priority of Customer interest,[26] which the Commission has found to be consistent with the Act.[27] Accordingly, the Commission finds good cause, pursuant to Section 19(b)(2) of the Act,[28] to approve the proposed rule change, as modified by Amendment No. 1, on an accelerated basis.

VI. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[29] that the proposed rule change SR–NYSEAMER–

[19] *See* Rule 971.1NY(c)(5)(B)(i)(b) (providing that, ''if there is sufficient size of the CUBE Order still available after executing at better prices or against Customer interest, the Contra Order shall receive additional contracts required to achieve an allocation of the greater of 40% of the original CUBE Order size or one contract (or the greater of 50% of the original CUBE Order size or one contract if there is only one RFR Response)'').

[20] *See supra* note 9 (regarding Cboe's SAM functionality for larger-sized paired orders designated as AON).

[21] *See* proposed Commentary .05, Rule 971.1NY.

[22] In approving this proposed rule change, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[23] 17 U.S.C. 78f(b)(5).

[24] *See supra* note 9 and *see also* Rules of the Miami International Securities Exchange, LLC at Rule 515A(b).

[25] *See supra* note 6.

[26] *See supra* note 9

[27] In the other changes made by Amendment No. 1, the Exchange exercised its discretion not to propose an AON CUBE Auction for Complex Orders at this time, and enhanced the clarity of its proposal.

[28] 15 U.S.C. 78s(b)(2).

[29] 15 U.S.C. 78s(b)(2).

2020–64, as modified by Amendment No. 1 be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[30]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 34130; 811–22260]

RMR Mortgage Trust

December 7, 2020.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice.

Notice of application for deregistration under Section 8(f) of the Investment Company Act of 1940 (the ''Act'').

Summary of Application: RMR Mortgage Trust requests an order declaring that it has ceased to be an investment company.

Applicant: RMR Mortgage Trust.

Filing Dates: The application was filed on May 27, 2020 and was amended on August 17, 2020, November 18, 2020 and December 1, 2020.

Hearing or Notification of Hearing: An order granting the request will be issued unless the Commission orders a hearing. Interested persons may request a hearing by emailing the Commission's Secretary at *Secretarys-Office@sec.gov* and serving Applicant with a copy of the request by email. Hearing requests should be received by the Commission by 5:30 p.m. on January 4, 2021 and should be accompanied by proof of service on Applicant, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing to the Commission's Secretary at *Secretarys-Office@sec.gov.*

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.* Applicants: *jclark@rmrgroupadvisors.com.*

FOR FURTHER INFORMATION CONTACT: Marc Mehrespand, Senior Counsel; Trace Rakestraw, Branch Chief, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's website by searching for the file number, or for an applicant using the Company name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Applicant's Representations:

1. Applicant is a Maryland statutory trust and is a non-diversified, closed-end management investment company registered under the Act. Prior to the Special Meeting (as defined below), Applicant was named ''RMR Real Estate Income Fund'' and its primary investment objective was to earn and pay to its common shareholders a high level of current income by investing in real estate companies. Capital appreciation was Applicant's secondary objective.

2. At a special meeting of Applicant's shareholders on April 16, 2020 (''the Special Meeting''), Applicant's shareholders approved a proposal (the ''Business Change Proposal'') to change Applicant's business from a registered investment company to a commercial mortgage real estate investment trust (''REIT'') that focuses primarily on originating and investing in first mortgage whole loans secured by middle market and transitional commercial real estate (''CRE''). Notably, the proxy statement in connection with the Business Change Proposal stated that, if approved, Applicant would realign its portfolio so that it will not be considered an investment company under the Act and apply to the Commission for an order declaring that Applicant has ceased to be an investment company. Applicant represents that it has operated during its 2020 taxable year so that it may qualify for taxation as a REIT for federal tax purposes.

3. Applicant states that, following the Special Meeting, it has taken various steps to implement the Business Proposal, including changing its name to ''RMR Mortgage Trust,'' divesting legacy portfolio assets and reorienting its portfolio to originating and investing in first mortgage whole loans secured by middle market and transitional CRE. Applicant states that it also holds itself out in its periodic reports to shareholders, press releases and website as a company that focuses primarily on originating and investing in first mortgage whole loans secured by middle market and transitional CRE.

4. Applicant's investment advisory agreement (''IAA'') with RMR Advisors LLC (the ''Adviser''), Applicant's investment adviser, remains in effect but Applicant anticipates that, if Applicant receives the order, the IAA would be terminated and Applicant would enter into a new management agreement with the Adviser, or an affiliate of the Adviser. Applicant represents that its officers devote significant time to Applicant's new business strategy, including in connection with the formation of business objectives, plans and strategies and sourcing of mortgage origination opportunities. In addition, the Adviser has established an investment committee (the ''Investment Committee'') responsible for evaluating mortgage loan origination opportunities and making determinations as to whether or not to fund such loan opportunities, in each case, taking into account Applicant's investment guidelines and considerations, subject to any required approvals by Applicant's Board of Trustees (''Board''). Two of Applicant's Board members serve as members of the Investment Committee.

5. Applicant states that it currently originates commercial mortgage loans through a wholly-owned subsidiary, RMTG Lender LLC (the ''Real Estate Subsidiary''). As of November 30, 2020, 100% of the assets of the Real Estate Subsidiary consisted of commercial mortgage loans fully secured by real estate. Applicant represents that it may establish other wholly-owned subsidiaries to carry out specific activities, consistent with Applicant's business of originating and investing in first mortgage whole loans secured by middle market and transitional CRE.

6. Applicant represents that the Real Estate Subsidiary is excluded from the definition of ''investment company'' by section 3(c)(5)(C) of the Act and, therefore, securities issued by the Real Estate Subsidiary are not ''investment securities'' as defined in section 3(a)(2) of the Act. Applicant states that, as of November 30, 2020, the value of investment securities owned by Applicant represents approximately 35.1% of Applicant's total assets, exclusive of Government securities and cash items, on an unconsolidated basis (''Adjusted Total Assets'').

7. For the nine months ended September 30, 2020, Applicant states that it derived approximately 100% of its gross income from securities (other than investments that qualify as ''mortgages and other liens on and interests in real estate'' for purposes of section 3(c)(5)(C) of the Act (''Qualifying Real Estate Assets'')) and approximately 0% of its gross income from Qualifying Real Estate Assets, and for the period from October 1, 2020 through November

[30] 17 CFR 200.30–3(a)(12).

30, 2020, Applicant derived approximately 82% of its gross income from securities (other than Qualifying Real Estate Assets) and approximately 18% of its gross income from Qualifying Real Estate Assets. Applicant expects its income from securities (other than Qualifying Real Estate Assets and other assets that are not Qualifying Real Estate Assets but which are real estate-related assets (''Real Estate-Related Assets'') to continue to decrease, and its income from Qualifying Real Estate Assets and Real Estate-Related Assets to continue to increase, as it continues to divest its legacy portfolio assets and reinvest in Qualifying Real Estate Assets and Real-Estate Related Assets. Applicant represents that currently it derives no material portion of its gross income from securities that are not Qualifying Real Estate Assets or Real Estate-Related Assets.

8. Upon deregistering as an investment company, which will be the final step in implementing the Business Change Proposal, Applicant represents that it will issue a press release to shareholders indicating that it is no longer a registered investment company and will cease indicating in its financial statements that it is a registered investment company.

9. Applicant states that it is not currently a party to any litigation or administrative proceeding and has timely complied with its obligations to file annual and other reports with the Commission.

10. Applicant represents that, if the requested order is granted, its common shares will continue to be traded on The Nasdaq Stock Market LLC.

Applicant's Legal Analysis:

1. Section 8(f) of the Act provides that whenever the Commission, upon application or its own motion, finds that a registered investment company has ceased to be an investment company, the Commission shall so declare by order and upon the taking effect of such order, the registration of such company shall cease to be in effect.

2. Section 3(a)(1)(A) of the Act defines an ''investment company'' as any issuer which ''is or holds itself out as being engaged primarily, or proposes to engage primarily, in the business of investing, reinvesting, or trading in securities.'' Section 3(a)(1)(B) of the Act defines an ''investment company'' as any issuer which ''is engaged or proposes to engage in the business of issuing face-amount certificates of the installment type, or has been engaged in such business and has any such certificate outstanding.''

3. Section 3(a)(1)(C) of the Act defines an ''investment company'' as any issuer which ''is engaged or proposes to engage in the business of investing, reinvesting, owning, holding, or trading in securities, and owns or proposes to acquire investment securities having a value exceeding 40 per centum of the value of such issuer's total assets (exclusive of Government securities and cash items) on an unconsolidated basis.'' Section 3(a)(2) of the Act defines ''investment securities'' as ''all securities except (A) Government securities, (B) securities issued by employees' securities companies, and (C) securities issued by majority-owned subsidiaries of the owner which (i) are not investment companies, and (ii) are not relying on the exception from the definition of investment company in paragraph (1) or (7) of subsection (c).''

4. Applicant states that it is no longer an investment company as defined in section 3(a)(1)(A), 3(a)(1)(B) or section 3(a)(1)(C). With regard to section 3(a)(1)(A), Applicant represents that it now operates as a commercial mortgage REIT, and argues that its historical development, its public representations, the activities of its directors and officers, the nature of its present assets and the sources of its present income support this assertion.

5. With regard to section 3(a)(1)(B), Applicant represents that it is not engaged, and does not propose to engage, in the business of issuing face-amount certificates of the installment type, has not been engaged in such business and does not have any such certificate outstanding.

6. With regard to section 3(a)(1)(C), Applicant represents that, as discussed in greater detail below, the Real Estate Subsidiary is excluded from the definition of investment company by virtue of section 3(c)(5)(C) of the Act and that, as a result, securities issued by the Real Estate Subsidiary are not ''investment securities'' within the meaning of section 3(a)(2) of the Act. Because the value of Applicant's interest in the Real Estate Subsidiary exceeds 60% of the value of Applicant's Adjusted Total Assets, the value of any ''investment securities'' owned by Applicant is less than 40% of the value of Applicant's Adjusted Total Assets. Applicant, therefore, states that it is not an investment company within the meaning of section 3(a)(1)(C) of the Act.

7. Section 3(c)(5)(C) of the Act excludes from the definition of an investment company ''any person who is not engaged in the business of issuing redeemable securities, face-amount certificates of the installment type or periodic payment plan certificates, and who is primarily engaged in one or more of the following businesses: . . . (C) purchasing or otherwise acquiring mortgages and other liens on and interests in real estate.''

8. Applicant represents that, as of November 30, 2020, the only assets of the Real Estate Subsidiary were mortgage loans fully secured by real estate and, as a result, the Real Estate Subsidiary meets the exclusion from the definition of investment company in section 3(c)(5)(C).

9. Applicant states that it is thus qualified for an order of the Commission pursuant to section 8(f) of the Act.

For the Commission, by the Division of Investment Management, under delegated authority.

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–90579; File No. SR–PEARL–2020–28]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 2611, Odd and Mixed Lots

December 7, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 23, 2020, MIAX PEARL, LLC (''MIAX PEARL'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend Exchange Rule 2611 regarding the handling of odd lot sized orders.

The text of the proposed rule change is available on the Exchange's website at *http://www.miaxoptions.com/rule-filings/pearl* at MIAX PEARL's principal office, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend Exchange Rule 2611 to provide that odd lot orders [3] would no longer be processed differently than orders that are a round lot or greater in size.[4] Exchange Rule 2611 sets forth the requirements relating to odd and mixed lot trading of equity securities on the Exchange's equity trading platform (referred to herein as ''MIAX PEARL Equities''). Exchange Rule 2611(b) further provides that round lot, mixed lot, and odd lot orders are treated in the same manner on the Exchange, provided that, the working and display price of a displayable odd lot order will be adjusted both on arrival and when resting on the MIAX PEARL Equities Book.[5]

Currently, Exchange Rule 2611(b)(1) and subparagraphs (A)–(C) describe how the working and displayed price of odd lot orders are adjusted in relation to the contra-side Protected Best Bid (''PBB'') or Protected Best Offer (''PBO'', collectively with PBB, the ''PBBO''). In short, working and displayed prices of odd lot orders are bound by either the PBBO of an away trading center or of the Exchange, which means resting odd lot orders can be re-priced if the PBBO changes or becomes locked or crossed.

Specifically, current Exchange Rule 2611(b)(1)(A) reflects standard behavior and provides that if the limit price of an odd lot order to buy (sell) is below (above) the PBO (PBB) of an away Trading Center, it will have a working and display price equal to the limit price. Current Exchange Rule 2611(b)(1)(B) provides that if the limit price of an odd lot order to buy (sell) is at or above (below) the PBO (PBB) of an away Trading Center, it will have a working price equal to the PBO (PBB). The display price will also be adjusted to one minimum price variation lower (higher) than the PBO (PBB). Current Exchange Rule 2611(b)(1)(C) provides that if the PBBO is locked or crossed and the limit price of an odd lot order to buy (sell) resting on the MIAX PEARL Equities Book is above (below) the PBO (PBB) of an away Trading Center, it will have a working and display price equal to the PBB (PBO) of the Exchange. Current Exchange Rule 2611(b)(1)(C) further provides that the working and display price of such odd lot order will be adjusted again pursuant to paragraphs (A) and (B) of Exchange Rule 2611(b)(1) should the PBBO unlock or uncross.

As proposed, odd lot sized orders would be handled in the same manner as orders of a round lot size or higher, and if they are designated displayed, they would stand their ground if locked or crossed by the PBBO of an away trading center.[6] The proposal would, therefore, result in fewer orders being re-priced, thereby allowing those orders to retain their priority on the MIAX PEARL Equites Book. To effect this change, the Exchange proposes to delete Exchange Rule 2611(b)(1) and sub-paragraphs (A)–(C) in their entirety. As a result of these changes, Exchange Rule 2611(b) would provide, without any qualifiers, that ''[r]ound lot, mixed lot and odd lot orders are treated in the same manner on the Exchange.'' The Exchange proposes an additional non-substantive change to renumber current Exchange Rule 2611(b)(2) as Exchange Rule 2611(c).

Implementation

Due to the technological changes associated with this proposed change, the Exchange will issue a trading alert publicly announcing the implementation date of this proposed rule change. The Exchange anticipates that the implementation date will be in the first half of 2021.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Section 6(b)(5),[8] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. The Exchange believes that processing odd lot sized orders in the same manner as round and mixed lot sized orders would remove impediments to and perfect the mechanism of a free and open market because the same principle applies: an order of any size that has been displayed has priority at that price if an away Trading Center subsequently locks or crosses that price. In addition, the Exchange believes that processing odd lot orders the same as round-lot sized orders is not novel as it is consistent with the rules of other exchanges.[9]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. In fact, the Exchange believes that the proposal may have a positive effect on competition because it is designed to conform how the Exchange processes odd lot orders to the functionality available on other exchanges. The Exchange believes that the proposed change would promote competition because fewer orders would need to be repriced on the Exchange and therefore liquidity providers seeking for their orders to retain priority may route additional orders to the Exchange. Likewise, liquidity takers may be more likely to route orders to the Exchange if

[3] Exchange Rule 2610 provides that the unit of trading in stocks is one (1) share. 100 shares constitutes a ''round lot,'' unless specified by the primary listing market to be fewer than 100 shares. Any amount less than a round lot shall constitute an ''odd lot,'' and any amount greater than a round lot that is not a multiple of a round lot shall constitute a ''mixed lot.''

[4] The proposed rule change is substantially similar to a recent rule amendment by the New York Stock Exchange LLC (''NYSE''). *See* Securities Exchange Act Nos. 88362 (March 12, 2020), 85 FR 15538 (March 18, 2020) (SR–NYSE–2020–13); *and* 88793 (May 1, 2020), 85 FR 27259 (May 7, 2020) (SR–NYSE–2020–13) (''NYSE Approval Order''). *See also* NYSE Rule 7.38.

[5] *See* Exchange Rule 1901 defining the term ''MIAX PEARL Equities Book''.

[6] Like round and mixed lot sized orders, odd lot sized orders would be subject to the Exchange price sliding processes under Exchange Rule 2614(g).

[7] 15 U.S.C. 78f(b).

[8] 15 U.S.C. 78f(b)(5).

[9] *See* the NYSE Approval Order, *supra* note 5. *See* NYSE Rule 7.38. *See also* Nasdaq Rules 4703(b)(3) (defining the term ''odd lot'' as an order attribute) and 4702 (describing which order attributes are available for orders on Nasdaq, without any discussion of odd lot sized orders being priced differently than round-lot sized orders). *See also* BZX Rules 11.10 (defining the term ''odd lot'') and 11.9 (describing BZX Orders and Modifiers, without any discussion of odd lot sized orders being priced differently than round-lot sized orders).

they have greater determinism regarding the price at which their orders would be executed.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate, it has become effective pursuant to 19(b)(3)(A) of the Act [10] and Rule 19b-4(f)(6) [11] thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–PEARL–2020–28 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–PEARL–2020–28. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–PEARL–2020–28, and should be submitted on or before January 4, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

[10] 15 U.S.C. 78s(b)(3)(A).

[11] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–90577; File No. SR–NASDAQ–2020–079]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Relocate Its Equity and General Rules From Its Current Rulebook Into Its New Rulebook Shell

December 7, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b-4 thereunder,[2] notice is hereby given that on November 23, 2020, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to relocate its equity and general rules from its current Rulebook into its new Rulebook shell.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/nasdaq/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this rule change is to relocate Nasdaq equity and general rules from the current Rulebook into the new Rulebook shell.[3] The Exchange also proposes a number of minor, non-substantive changes to the Rulebook shell as described below. The relocation and harmonization of these rules is part of the Exchange's continued effort to promote efficiency and conformity of its processes with those of its affiliated exchanges. The Exchange believes that the placement of these rules into their new location in the Rulebook shell will

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Previously, the Exchange filed to relocate other rules within its Rulebook. *See* Securities Exchange Act Release No. 87778 (December 17, 2019), 84 FR 70590 (December 23, 2019) (SR–NASDAQ–2019–098).

facilitate the use of the Rulebook by members.

Universal Changes

The Exchange proposes to update all cross-references within the Rulebook shell to the new relocated rule cites. The Exchange proposes to replace internal rule references to simply state ''this Rule'' where the rule is citing itself without a more specific cite included in the Rule. For example, if Nasdaq Rule 4619 refers currently to ''Rule 4619'' or ''this Rule 4619'' the Exchange will amend the phrase to simply ''this Rule.'' Except where the Exchange specifies below that it will retain the current rule numbering, the Exchange also proposes to conform the paragraph numbering and lettering to that used in the Rulebook shell for greater consistency, and to correct punctuation. Furthermore, the Exchange proposes to delete any empty reserved rules and already deleted rules in the current Rulebook other than in relocated Equity 11. Lastly, the Exchange will delete the following rule numbers from the current Rulebook, but will relocate the substance of these rules into the new Rulebook shell: Conduct Rules (2000–3000), 3300, 4000, 4100, 4600, 4610, 4700, 4750, 6000, and 6100.

General 1

The Exchange proposes to amend the section heading from General 1, General 1 to General 1, Section 1. The Exchange also proposes to retitle General 1, Section 1 from ''General Provisions'' to ''Definitions.'' Lastly, the Exchange proposes a non-substantive change in paragraph (b)(15) to delete ''Exchange'' immediately before ''Options 3, Section 4.''

General 2

The Exchange proposes to relocate Rule 4615 (Sponsored Participants) to General 2, Section 22, which is currently reserved, to harmonize the Exchange's rule numbering to that of Nasdaq PHLX LLC (''Phlx'') General 2, Section 22, which currently sets forth the same rule on Phlx.

General 3

The Exchange proposes to relocate the membership rules 1001, 1002, 1010, 1011, 1012, 1013, 1014, 1015, 1016, 1017, 1018 and 1019 into General 3 (Membership and Access). The Exchange proposes to retain the current rule numbers which closely align with FINRA rules. The Exchange will delete current Rule 1031 as this Rule presently has no substantive rule text. The Exchange also proposes to update a number of obsolete cross-references in the relocated membership rules that presently refer to rules that were already moved to the Rulebook shell under SR–NASDAQ–2019–098.[4]

General 4

The Exchange proposes to remove the ''1.'' from the rule numbering within General 4. The Exchange also proposes to replace ''General 4, Section 1.'' with ''General 4, Rule'' throughout General 4. The proposed changes are intended to better align General 4's rule numbering with FINRA rules. The Exchange also proposes to make corresponding changes in other places throughout the Rulebook shell outside of General 4 to replace all instances of ''General 4, Section 1.'' with ''General 4, Rule'' for greater consistency.[5]

General 5

In General 5, IM–9216, the Exchange proposes to add chapter headers before the cross-cites to Rules 1013, 8211, and 11870 for greater consistency within this Rule. As amended, the cross-cites would be General 3, Rule 1013; General 5, Rule 8211; and Equity 11, Rule 11870.

General 9

The Exchange proposes to relocate Rule 2170 (Disruptive Quoting and Trading Activity Prohibited) to General 9, Section 53, and to reserve General 9, Section 52. The proposed rule numbering is to ensure that the Exchange's General 9 rules mirror its affiliated exchanges' General 9 rules as closely as practicable. In particular, relocating this Rule to General 9, Section 53 will harmonize the Exchange's rule numbering to that of Phlx General 9, Section 53, which currently sets forth the same rule prohibiting disruptive quoting and trading activity on Phlx. Because this Rule is being added to General 9, which applies to both the Exchange's equities and options markets, the Exchange proposes to delete a duplicate rule in Options 9, Section 4, which applies only to the options market.

The Exchange also proposes to relocate Rule 4570 (Custodian of Books and Records) to General 9, Section 71, and to reserve Sections 54—70 to harmonize its General rule numbering with that of Phlx's General 9.

The Exchange further proposes to update several obsolete cross-references throughout General 9 that presently refer to rules that were already moved to the Rulebook shell under SR–NASDAQ–2019–098.[6] The Exchange will also update the cross-references to Rule 2310A (within General 9, Section 12(b)) and Rule 2810A (within General 9, Section 18(c)(1)(C)(iv)) to relocated Equity 10, Section 1. Rule 2810A does not exist within the current Rulebook, but the Exchange is updating this cite to relocated Equity 10, Section 1 as this rule governs direct participation programs. Lastly, the Exchange proposes to fix a formatting error in General 9, Section 20(d)(1).

Equity 1

The Exchange proposes to amend the section header from Equity 1, Equity 1 to Equity 1, Section 1. The Exchange also proposes to add ''(a)'' before the phrase ''When used in the Equity Rules. . .'' to conform to the paragraph lettering of the Rulebook shell. Lastly, the Exchange proposes to relocate the defined terms currently within Rule 4701(a)—(l) into Equity 1, Section 1(a)(3)—(14).

Equity 2

The Exchange proposes to relocate the following rules into Equity 2:

Shell rule	Current rule
Section 1	4601. Scope.
Section 2	4200. Definitions.
Section 3	4611. Nasdaq Market Center Participant Registration.
Section 4	4612. Registration as a Nasdaq Market Maker.
Section 5	4613. Market Maker Obligations.
Section 6	4614. Stabilizing Bids.

[4] Specifically, the Exchange will update obsolete cross-references in Rule 1002(d)(2), the introductory paragraph to Rule 1011, Rule 1011(o)(3), and Rule 1013(a)(1)(N).

[5] Specifically, the Exchange will make corresponding changes to the following rules in the proposed Rulebook shell outside of General 4: General 3, Rule 1001; General 3, Rule 1011; General 5, IM–9216; General 5, Rule 9630; and General 9, Section 20(b).

[6] Specifically, the Exchange will update obsolete cross-references in General 9, Section 1(b), Section 10(b)(1) and Section 14(a).

Shell rule	Current rule
Section 7	4616. Reports.
Section 8	4617. Normal Business Hours.
Section 9	4618. Clearance and Settlement.
Section 10	4619. Withdrawal of Quotations and Passive Market Making.
Section 11	4620. Voluntary Termination of Registration.
Section 12	4621. Suspension and Termination of Quotations.
Section 13	4622. Termination of Nasdaq Service.
Section 14	4623. Alternative Trading Systems.
Section 15	4624. Penalty Bids and Syndicate Covering Transactions.
Section 16	4625. Obligation to Provide Information.[7]
Section 17	4626. Limitation of Liability.
Section 18	4627. Obligation to Honor System Trades.
Section 19	4628. Compliance with Rules and Registration Requirements.
Section 20	4631. Customer Disclosures.

Equity 3

The Exchange proposes to reserve Equity 3, currently titled ''Equity Trading Rules.''

Equity 4

The Exchange proposes to re-title Equity 4, currently ''Limit Up Limit Down,'' to ''Equity Trading Rules.'' The Exchange proposes to relocate Rules 4110, 4120, 4121, 4370, 4702, 4703, 4752, 4753, 4754, 4756, 4757, 4758, 4759, 4760, 4761, 4762, 4763, and 4770 into Equity 4 and retain the current rule numbers. In relocated Rule 4110, the Exchange also proposes to update an obsolete cross-reference to the Rule 4300 and 4400 Series to the Rule 5000 Series.[8]

Equity 5

The Exchange proposes to update an obsolete cross-reference in Equity 5, Section 6 that presently refers to Rule 2010A (Standards of Commercial Honor and Principles of Trade), which was already moved to General 9, Section 1 in the Rulebook shell under SR–NASDAQ–2019–098.

Equity 6

The Exchange proposes to title Equity 6, which is currently reserved, to ''Nasdaq Risk Management Service; Other Systems and Programs,'' and to relocate the following rules into Equity 6:

Shell rule	Current rule
Section 1	6110. Definitions.
Section 2	6120. System Functions.
Section 3	6130. Nasdaq Kill Switch.
Section 4	6200. Exchange Sharing of Participant Risk Settings.
Section 5	IM–6200–1. Risk Settings.
Section 6	6300. Nasdaq Equity Value Indicator Cross.

The Exchange will also correct a typographical error in Equity 6, Section 3(e) where the Exchange inadvertently capitalized ''When'' in the first sentence.

Equity 8

The Exchange proposes to re-title Equity 8, currently ''Uniform Practice Code,'' to ''Trading of Non-Convertible Bonds Listed on Nasdaq.'' The Exchange proposes to relocate Rule 4000B (Trading of Non-Convertible Bonds Listed on Nasdaq) into Equity 8, Section 1.

Equity 9

The Exchange proposes to re-title Equity 9, currently ''Supplementary Conduct Rules,'' to ''Business Conduct,'' and to relocate the following rules into Equity 9:

Shell rule	Current rule
Section 1	3220. Adjustment of Open Orders.
Section 2	3230. Clearing Agreements.
Section 3	3310. Publication of Transactions and Quotations.
Section 4	IM–3310. Manipulative and Deceptive Quotations.
Section 5	3320. Offers at Stated Prices.
Section 6	3340. Prohibition on Transactions, Publication of Quotations, or Publication of Indications of Interest During Trading Halts.
Section 7	3350. Suspension of Trading.
Section 8	3351. Trading Practices.
Section 9	3360. Short-Interest Reporting.
Section 10	3370. Prompt Receipt and Delivery of Securities.
Section 11	3380. Order Entry and Execution Practices.
Section 12	3381. SEC Rule 19c–1—Governing Certain Off-Board Agency Transactions by Members of National Securities Exchanges.
Section 13	*3385. SEC Rule 19c–3 — Governing Off-Board Trading by Members of National Securities Exchanges.*
Section 14	3390. SEC Rule 604—Display of Customer Limit Orders.

[7] The Exchange will not port over the reference to IM–4120–1 into the Rulebook shell as this Rule does not currently exist in the Nasdaq Rulebook.

[8] The Exchange previously relocated the Nasdaq listing standards within the Rule 4300 and 4400 Series to the Rule 5000 Series. *See* Securities Exchange Act Release No. 59663 (March 31, 2009), 74 FR 15552 (April 6, 2009) (SR–NASDAQ–2009–018).

The Exchange also proposes to update two obsolete cross-references in Equity 9, Section 4 (Manipulative and Deceptive Quotations) that currently point to Rules 2110 and 2120. Rule 2110 (Standards of Commercial Honor and Principles of Trade) was previously renumbered as Nasdaq Rule 2010A, which the Exchange then relocated to General 9, Section 1 of the Rulebook shell under SR–NASDAQ–2020–098.[9] Rule 2120 (Use of Manipulative, Deceptive or Other Fraudulent Devices) was likewise relocated to General 9, Section 1 of the Rulebook shell under SR–NASDAQ–2019–098.

Equity 10

The Exchange proposes to title Equity 10, which is currently reserved, to ''Other Products and Securities,'' and to relocate the following rules into Equity 10:

Shell rule	Current rule
Section 1	2310A. Direct Participation Programs.
Section 2	2830. Investment Company Securities.
Section 3	2840. Trading in Index Warrants, Currency Index Warrants, and Currency Warrants.
	2841. General.
	2842. Definitions.
Section 4	2850. Position Limits.
Section 5	2851. Exercise Limits.
Section 6	2852. Reporting Requirements.
Section 7	2853. Liquidation of Index Warrant Positions.
Section 8	4630. Trading in Commodity-Related Securities.

Equity 11: Uniform Practice Code

The Exchange proposes to add new Equity 11, titled ''Uniform Practice Code,'' and relocate the current Rule 11000 Series into new Equity 11 without renumbering them.

The Exchange also proposes to update an obsolete cross-reference in IM–11720 (Obligations of Members Who Discover Securities in Their Possession to Which They Are Not Entitled) that currently points to Rule 2110. Rule 2110 (Standards of Commercial Honor and Principles of Trade) was previously renumbered as Nasdaq Rule 2010A, which the Exchange then relocated to General 9, Section 1 of the Rulebook shell under SR–NASDAQ–2020–098.[10]

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[11] in general, and furthers the objectives of Section 6(b)(5) of the Act,[12] in particular, in that it is designed to promote just and equitable principles of trade and to protect investors and the public interest by bringing greater transparency to its rules by relocating the equity and general rules into the new Rulebook shell together with other rules which have already been relocated.[13] The Exchange's proposal is consistent with the Act and will protect investors and the public interest by harmonizing its rules, where applicable, across Nasdaq markets so that members can readily locate rules which cover similar topics. The relocation and harmonization of the Nasdaq Rules is part of the Exchange's continued effort to promote efficiency and conformity of its processes with those of its affiliated exchanges. The Exchange believes that the placement of the Nasdaq equity and general rules into their new location in the shell will facilitate the use of the Rulebook by members. Specifically, the Exchange believes that market participants that are members of more than one Nasdaq market will benefit from the ability to compare Rulebooks.

The Exchange is not substantively amending rule text. The renumbering, re-lettering, deleting reserved and already deleted rules, amending cross-references and other minor technical changes will bring greater transparency to Nasdaq's Rules. The Exchange's affiliates intend to file similar rule changes to relocate their respective equity and general rules into the same location in each Rulebook for ease of reference. The Exchange believes its proposal will benefit investors and the general public by increasing the transparency of its Rulebook and promoting easy comparisons among the various Nasdaq affiliated exchanges' Rulebooks.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes that the proposed amendments do not impose an undue burden on competition because the amendments to relocate the equity and general rules are non-substantive. This rule change is intended to bring greater clarity to the Exchange's Rules and to promote easy comparisons among the various Nasdaq affiliated exchanges' Rulebooks. Renumbering, re-lettering, deleting reserved rules and amending cross-references will bring greater transparency to Nasdaq's Rules.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

[9] *See* Securities Exchange Act Release No. 68153 (November 5, 2012), 77 FR 67409 (November 9, 2012) (SR–NASDAQ–2012–124).

[12] 15 U.S.C. 78f(b)(5).

[13] *See supra* note 3.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[14] and Rule 19b–4(f)(6) thereunder.[15]

A proposed rule change filed under Rule 19b–4(f)(6)[16] normally does not become operative for 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[17] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay. Waiver of the operative delay would allow the Exchange to immediately relocate its rules and continue to file other rules that are affected by this relocation in a timely manner. The Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and designates the proposal operative upon filing.[18]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

[14] 15 U.S.C. 78s(b)(3)(A).

[15] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[16] 17 CFR 240.19b–4(f)(6).

[17] 17 CFR 240.19b–4(f)(6)(iii).

[18] For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml);* or
- Send an email to *rule-comments@sec.gov. Please include File Number SR–NASDAQ–2020–079 on the subject line.*

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2020–079. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2020–079 and should be submitted on or before January 4, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[19]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–90575; File No. SR–NYSEArca–2020–46]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Designation of a Longer Period for Commission Action on Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To Amend NYSE Arca Rule 5.2–E(j)(6) Relating to Options-Linked Securities

December 7, 2020.

On June 10, 2020, NYSE Arca, Inc. (''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend NYSE Arca Rule 5.2–E(j)(6) to accommodate Exchange listing and trading of Options-Linked Securities. The proposed rule change was published for comment in the **Federal Register** on June 22, 2020.[3] On July 28, 2020, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] On September 16, 2020, the Commission instituted proceedings under Section 19(b)(2)(B) of the Act[6] to determine whether to approve or disapprove the proposed rule change.[7] The Commission has received no

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 89073 (June 16, 2020), 85 FR 37488 (''Notice'').

[4] 15 U.S.C. 78s(b)(2).

[5] *See* Securities Exchange Act Release No. 89412, 85 FR 46744 (August 3, 2020).

[6] 15 U.S.C. 78s(b)(2)(B).

[7] *See* Securities Exchange Act Release No. 89898, 85 FR 59572 (September 22, 2020). Specifically, the Commission instituted proceedings to allow for additional analysis of the proposed rule change's consistency with Section 6(b)(5) of the Act, which requires, among other things, that the rules of a national securities exchange be ''designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade,'' and ''to protect investors and the public interest.'' *See id.* at 59573 (citing 15 U.S.C. 78f(b)(5)).

comment letters on the proposed rule change.

Section 19(b)(2) of the Act[8] provides that, after initiating disapproval proceedings, the Commission shall issue an order approving or disapproving the proposed rule change not later than 180 days after the date of publication of notice of filing of the proposed rule change. The Commission may extend the period for issuing an order approving or disapproving the proposed rule change, however, by not more than 60 days if the Commission determines that a longer period is appropriate and publishes the reasons for such determination. The date of publication of notice of filing of the proposed rule change was June 22, 2020. December 19, 2020, is 180 days from that date, and February 17, 2021, is 240 days from that date.

The Commission finds it appropriate to designate a longer period within which to issue an order approving or disapproving the proposed rule change so that it has sufficient time to consider this proposed rule change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[9] designates February 17, 2021, as the date by which the Commission shall either approve or disapprove the proposed rule change (File No. SR–NYSEArca–2020–46).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[10]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–90583; File No. SR–CBOE–2020–112]

Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating To Adopt Temporary Rules To Extend the Time by Which Trading Permit Holders must Complete Their Office Inspections for the Calendar Year 2020 and To Provide Temporary Remote Inspection Relief for Their Office Inspections for Calendar Years 2020 and 2021

December 7, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 30, 2020, Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') proposes to adopt temporary Rules to extend the time by which Trading Permit Holders must complete their office inspections for the calendar year 2020 and to provide temporary remote inspection relief for their office inspections for calendar years 2020 and 2021. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

In light of the operational challenges that Trading Permit Holders are facing due to the outbreak of the coronavirus disease (COVID–19), the Exchange proposes to extend the time by which Trading Permit Holders must complete their calendar year 2020 inspection obligations under Rule 8.6(f) (Office Inspections) and Rule 9.2(d) (Annual Branch Inspections) to March 31, 2021,[5] and to provide Trading Permit Holders with the option to complete their calendar year 2020 and calendar year 2021 inspection obligations under Rules 8.16(f) and 9.2(d) remotely, without an on-site visit to the office or location.[6]

The Exchange has observed the impact of the COVID–19 pandemic on its Trading Permit Holders, investors, and the industry generally and recognizes that Trading Permit Holders are experiencing operational challenges with much of their personnel working from home due to stay-at-home orders, restrictions on businesses and social activity imposed in various states, and adherence to other social distancing guidelines consistent with the recommendations of public health officials.[7] In response, like many employers across the United States, Trading Permit Holder organizations

[5] The proposed rule change will automatically sunset on March 31, 2021. If the Exchange seeks to provide additional temporary relief from the rule requirement identified in this proposal beyond March 31, 2021, it will submit a separate rule filing to further extend the temporary extension of time.

[6] The proposed rule change will automatically sunset on December 31, 2021. If the Exchange seeks to extend the duration of the temporary proposed rule beyond December 31, 2021, it will submit a separate rule filing to further renew the temporary relief. The Exchange notes that SEC staff has stated in guidance that inspections must include a physical, on-site review component. *See* SEC National Examination Risk Alert, Volume I, Issue 2 (November 30, 2011); SEC Division of Market Regulation, Staff Legal Bulletin No. 17: Remote Office Supervision (March 19, 2004) (stating, in part, that broker-dealers that conduct business through geographically dispersed offices have not adequately discharged their supervisory obligations where there are no on-site routine or ''for cause'' inspections of those offices).

[7] *See* Centers for Disease Control and Prevention (''CDC''), International Classification of Diseases, Tenth Revision, Clinical Modification, *https://www.cdc.gov/nchs/data/icd/Announcement-New-ICD-code-forcoronavirus-3-18-2020.pdf;* WHO Director-General, Opening Remarks at the Media Briefing on COVID–19 (March 11, 2020), *https://www.who.int/dg/speeches/detail/who-director-general-s-opening-remarksat-the-media-briefing-on-covid-19-11-march-2020; and* Centers for Disease Control and Prevention, How to Protect Yourself & Others (last visited November 12, 2020) *https://www.cdc.gov/coronavirus/2019-ncov/prevent-gettingsick/prevention.html.*

closed their offices to the public, transitioned their employees to telework arrangements to comply with stay-at-home orders, and implemented other restrictive measures in an effort to slow the spread of COVID–19, such as curtailing or eliminating non-essential business travel and significantly limiting or canceling in-person activities.[8]

Exchange Rules require Trading Permit Holders [9] to conduct branch [10] and non-branch office and location inspections pursuant to certain annual cycles. Specifically, pursuant to Rule 8.16(f), each Trading Permit Holder shall inspect every office or location of the Trading Permit Holder at least once every three calendar years, the cycle of which is contingent on the nature and complexity of the securities activities for which the office or location is responsible, the volume of business done, and the number of associated persons at each office or location. The examination schedule and an explanation of the factors considered in determining the frequency of the examinations in the cycle shall be set forth in the Trading Permit Holder's written supervisory procedures. Such inspection shall be reasonably designed to assist in preventing and detecting violations of, and achieving compliance with, applicable securities laws and regulations, and with applicable Exchange rules, and each Trading Permit Holder shall retain a written record of the dates upon which each inspection is conducted, the participants in the inspection, and the results thereof. Pursuant to Rule 9.2(d), each branch office that supervises one or more non-branch locations must be inspected no less often than once each calendar year, unless it qualifies for certain exemptions.[11] Every branch office, without exception, must be inspected at least once every three calendar-years. Trading Permit Holders must maintain written reports of such inspections.

As a result of the compelling health and welfare concerns stemming from the COVID–19 pandemic, Trading Permit Holders are facing potentially significant disruptions to their normal business operations that include staff absenteeism, the increased use of remote offices or telework arrangements, travel or transportation limitations, and technology interruptions or slowdowns. Pandemic-related operational changes have made it impracticable for Trading Permit Holders to conduct the on-site inspections pursuant to Rules 8.16(f) and 9.2(d) at many or most locations for calendar year 2020 because this compliance function requires firm employees to travel to geographically dispersed branch and non-branch office locations. Such travel not only has been restricted by government orders,[12] but also puts the health and safety of employees at great risk of contracting and spreading COVID–19.[13] By mid-year, with many restrictive measures still in place, and in some instances additional quarantine requirements imposed on interstate travel, on-site inspections of Trading Permit Holder offices or locations scheduled for calendar year 2020 remain pending. The acute health and safety concerns related to COVID–19 persist, with the number of confirmed cases of COVID–19 in the U.S. continuing to rise through the fall of 2020.[14] While Trading Permit Holders have continued to supervise all offices and locations by, among other things, implementing remote supervisory practices through novel uses of technology as well as existing methods of supervision (*e.g.,* supervisory checklists, surveillance tools, incident trackers, email review, and trade exception reports),[15] they are still experiencing logistical challenges related to conducting the onsite portion of their inspections due to continuing business and governmental restrictions and public health concerns.[16] As a result, the Exchange understands that Trading Permit Holders have not yet been able to conduct on-site inspections scheduled for calendar year 2020, and, with no certainty as to when pandemic-related health concerns will subside and restrictions recently re-implemented in light of the resurgence of cases during the fall of 2020,[17] Trading Permit Holders may have a considerable backlog of 2020 inspections that may be difficult, if not impossible, to overcome on or before calendar year 2020 ends. Additionally, the Exchange recognizes that planning on-site inspections for calendar year 2021 for Trading Permit Holder branch and non-branch offices and locations in the current environment may be impacted as well. In light of pandemic-related developments and the approaching end of calendar year 2020, the Exchange believes it is appropriate to provide tailored temporary relief for Trading Permit Holders to meet their inspection obligations under Rule 8.16(f) and Rule 9.2(d) for calendar years 2020 and 2021.

Specifically, the Exchange proposes to adopt temporary language in Rule 8.16(f), and to adopt temporary Rule 9.2(d)(4), to provide that each Trading Permit Holder obligated to complete an office inspection pursuant to Rule 8.16(f) and Rule 9.2(d), respectively, in calendar year 2020 will be deemed to have satisfied such obligation if the applicable inspection is completed on or before March 31, 2021. The Exchange believes that this proposed temporary extension of time is tailored to address the needs and constraints on a Trading Permit Holder's operations during the COVID–19 pandemic, without significantly compromising critical investor protection, as potential risks that may arise from providing firms additional time to comply with their inspection obligations due in calendar year 2020 are mitigated by their ongoing supervisory obligations, off-site monitoring, and the temporary nature of the extension. The proposed extension will provide Trading Permit Holders with an opportunity to better manage the operational challenges resulting from the COVID–19 pandemic and the

[8] *See e.g.,* FINRA Regulatory Notice 20–16 (May 2020) (''Notice 20–16'') (describing practices implemented by small, mid-sized and large firms to transition to, and supervise in, remote work environment during the COVID–19 pandemic).

[9] The Exchange notes that the term Trading Permit Holder includes Trading Permit Holder organizations. *See* Eleventh Amended and Restated Bylaws of Cboe Exchange, Inc., Section 1.1(f).

[10] The Exchange notes that any location that is responsible for supervising the activities of persons associated with a Trading Permit Holder or TPH organization at one or more non-branch locations of such Trading Permit Holder or TPH organization is considered to be a branch office. *See* Rule 3.40(c).

[11] A Trading Permit Holder may demonstrate to the satisfaction of the Exchange that because of proximity, special reporting or supervisory practice, other arrangements may satisfy this Rule's requirements for a particular branch office, or that, based upon the written policies and procedures of such Trading Permit Holder organization providing for a systematic risk-based surveillance system, the Trading Permit Holder organization submits a proposal to the Exchange and receives, in writing, an exemption from the requirement in 9.2(d), pursuant to Rule 9.2(e).

[16] *See supra* note 12.

[17] *See supra* note 14.

resources needed to fulfill these supervisory obligations during the pandemic.

In addition to this, the Exchange proposes to extend temporary remote inspection relief for calendar year 2020 and 2021. In particular, the Exchange proposes to adopt temporary Rule 9.2(d)(5), which provides that each Trading Permit Holder obligated to conduct an inspection of a branch office or non-branch location in calendar year 2020 and calendar year 2021 pursuant to Rule 8.16(f) [18] and Rule 9.2(d), as applicable, may, subject to the requirements of this Rule 9.2.(d)(5), satisfy such obligation by conducting the applicable inspection remotely, without an on-site visit to the office or location. In accordance with Rules 8.16(f) and 9.2(d)(4), inspections for calendar year 2020 must be completed on or before March 31, 2021. Inspections for calendar year 2021 must be completed on or before December 31, 2021. Notwithstanding proposed Rule 9.2(d)(5), a Trading Permit Holder remains subject to the other requirements of Rules 8.16(f) and 9.2(d).

The proposed rule change also adopts written supervisory procedures for remote inspections in proposed Rule 9.2(d)(5)(A), which provides that, consistent with a Trading Permit Holder's obligations under Rule 8.16(f) and Rule 9.2(d), a Trading Permit Holder that elects to conduct each of its calendar year 2020 or calendar year 2021 inspections remotely must amend or supplement its written supervisory procedures to provide for remote inspections that are reasonably designed to assist in detecting and preventing violations of and achieving compliance with applicable securities laws and regulations, and with applicable Exchange Rules. Reasonably designed procedures for conducting remote inspections of offices or locations should include, among other things: (i) A description of the methodology, including technologies permitted by the Trading Permit Holder, that may be used to conduct remote inspections; and (ii) the use of other risk-based systems employed generally by the Trading Permit Holder to identify and prioritize for review those areas that pose the greatest risk of potential violations of applicable securities laws and regulations, and of applicable Exchange Rules. The Exchange believes the proposed rule change is consistent with a Trading Permit Holder's existing supervisory obligations to establish and maintain written supervisory procedures for branch office reviews [19] and reviews of non-branch offices and locations.[20]

Proposed temporary Rule 9.2(d)(5)(B) provides that the requirement to conduct inspections of offices and locations is one part of a Trading Permit Holder's overall obligation to have an effective supervisory system and, therefore, a Trading Permit Holder must continue with its ongoing review of the activities and functions occurring at all offices and locations, whether or not the Trading Permit Holder conducts inspections remotely. A Trading Permit Holder's use of a remote inspection of an office or location will be held to the same standards for review as set forth under Rule 8.16(f) and Rule 9.2(d). Where a Trading Permit Holder's remote inspection of an office or location identifies any indicators of irregularities or misconduct (*i.e.,* ''red flags''), [21] the Trading Permit Holder may need to impose additional supervisory procedures for that office or location or may need to provide for more frequent monitoring or oversight of that office or location, or both, including potentially a subsequent physical, on-site visit on an announced or unannounced basis when the Trading Permit Holder's operational difficulties associated with COVID–19 abate, nationally or locally as relevant, and the challenges a Trading Permit Holder is facing in light of the public health and safety concerns make such on-site visits feasible using reasonable best efforts. The temporary relief provided by this Rule 9.2(d)(5) does not extend to a Trading Permit Holder's inspection requirements beyond calendar year 2021 and such inspections must be conducted in compliance with Rule 9.2(d)(1) through (3). The Exchange believes that the proposed rule is consistent with a Trading Permit Holder's existing supervisory obligations to maintain policies and procedures, and a system for applying such procedures, reasonably designed to achieve compliance with, as well as assist in preventing and detecting violations of, applicable securities laws and regulations and Exchange Rules.[22]

Finally, proposed temporary Rule 9.2(d)(5)(C) provides for a documentation requirement and specifically provides that a Trading Permit Holder must maintain and preserve a centralized record for each of calendar year 2020 and calendar year 2021 that separately identifies: (i) All offices or locations that had inspections that were conducted remotely; and (ii) any offices or locations for which the Trading Permit Holder determined to impose additional supervisory procedures or more frequent monitoring, as provided in Rule 9.2(d)(5)(B) above. A Trading Permit Holder's documentation of the results of a remote inspection for an office or location must identify any additional supervisory procedures or more frequent monitoring for that office or location that were imposed as a result of the remote inspection. The Exchange believes that this documentation requirement would help readily distinguish the offices and locations that underwent remote inspections and their attendant supervisory procedures, and their more frequent monitoring, as applicable.

As noted above, even in the current environment, Trading Permit Holders have an ongoing obligation to establish and maintain a system to supervise the activities of their associated persons that is reasonably designed to achieve compliance with applicable securities laws and regulations, and with applicable Exchange Rules. The proposed amendments to Rule 8.16(f) and proposed Rule 9.2(d)(4) and (d)(5) are not intended to lessen the supervisory obligations prescribed under the Exchange Rules. The Exchange believes that the proposed temporary rule changes, which address the needs and constraints on a Trading Permit Holder's operations during the COVID–19 pandemic by extending the time to conduct inspections for calendar year 2020 and permitting firms to remotely inspect, subject to specified requirements described above, their

[18] The proposed rule change adds language to Rule 8.16(f), which provides that the temporary remote inspection relief provided in Rule 9.2(d)(5) will apply to each Trading Permit Holder obligated to complete an office inspection pursuant to Rule 8.16(f) in calendar year 2020 or calendar year 2021.

[19] *See* Rule 3.40(f).

[20] *See* Rule 8.16(e).

[21] Red flags that suggest the increased risk or occurrence of violations may include, among other events: customer complaints; an unexplained increase or change in the types of investments or trading concentration that a representative is recommending or trading; an unexpected improvement in a representative's production, lifestyle, or wealth; questionable or frequent transfers of cash or securities between customer or third party accounts, or to or from the representative; a representative that serves as a power of attorney, trustee or in a similar capacity for a customer or has discretionary control over a customer's account(s); representative with disciplinary records; customer investments in one or a few securities or class of securities that is inconsistent with firm policies related to such investments; churning; trading that is inconsistent with customer objectives; numerous trade corrections, extensions, liquidations; or significant switching activity of mutual funds or variable products held for short time periods. *See generally* SEC Division of Market Regulation, Staff Legal Bulletin 17: Remote Office Supervision (March 19, 2004).

[22] *See generally* Rule 8.16; *and see* Rule 9.2(g)(5)(A).

offices and locations for calendar years 2020 and 2021, would provide Trading Permit Holders a way to comply with Rules 8.16(f) and 9.2(d) that would not materially diminish, and is reasonably designed to achieve, the investor protection objectives of the inspection requirements under these unique circumstances. The Exchange notes that potential risks that may arise from providing Trading Permit Holders extended time to conduct their 2020 inspections and the option to conduct their inspections remotely are mitigated by their use of technology to meet their supervisory obligations on an ongoing basis, the unique circumstances under which they are operating, and the temporary nature of the proposed rules, which would expire on March 31, 2021 and December 31, 2021, respectively.[23]

The Exchange notes that the proposed temporary rules are substantively identical to the temporary inspection extension and remote relief rules recently filed by the Financial Industry Regulatory Authority (''FINRA'').[24] The Exchange notes too that it will continue to monitor the situation and engage with Trading Permit Holders, other financial regulators, and governmental authorities to determine whether further regulatory relief or guidance related to Rules 8.16 and 9.2 may be appropriate.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[25] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[26] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[27] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes that, in light of the impact of COVID–19 on the performance of on-site office and location inspections pursuant to Rules 8.16(f) and 9.2(d), the proposed temporary rule changes are intended to provide Trading Permit Holders additional time to comply with their Rule 8.16(f) and 9.2(d) inspection obligations due in calendar year 2020 and a temporary regulatory option to conduct inspections of offices and locations remotely for calendar years 2020 and 2021. The proposed temporary rule changes do not relieve firms from meeting their existing regulatory obligations to establish and maintain a supervisory system that is reasonably designed to achieve compliance with applicable securities laws and regulations, and with applicable Exchange Rules, which directly serve investor protection. In a time when faced with unique challenges resulting from the COVID–19 pandemic, the Exchange believes that the proposed temporary rule changes provide appropriately tailored relief that will afford Trading Permit Holders the ability to observe the recommendations of public health officials to provide for the health and safety of their personnel, while continuing to serve and promote the protection of investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe the proposed temporary rule changes will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the Act, because the extension for inspections and the remote inspection relief will apply equally to all Trading Permit Holders required to conduct office and location inspections in calendar year 2020 and 2021. The Exchange further does not believe that the proposed temporary rule changes will impose any burden on intermarket competition because it relates only to the extension of time for 2020 inspections and the manner in which inspections for 2020 and 2021 may be conducted. Additionally, and as stated above, FINRA has recently submitted filings to adopt substantively identical temporary inspection relief rules for its members.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

A. Significantly affect the protection of investors or the public interest;

B. impose any significant burden on competition; and

C. become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[28] and Rule 19b–4(f)(6)[29] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml);* or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–CBOE–2020–112 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–CBOE-2020–112. This file

[23] *See supra* notes 5 and 6.

[24] *See* FINRA Rule 3110.16; Securities and Exchange Act Release No. 89188 (June 30, 2020), 85 FR 40713 (July 7, 2020) (SR–FINRA–2020–019); *and* SR–FINRA–2020–040 (filed November 6, 2020) available at *https://www.finra.org/sites/default/files/2020-11/SR-FINRA-2020-040.pdf.*

number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CBOE-2020–112 and should be submitted on or before January 4, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[30]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration # 16805 and # 16806; North Carolina Disaster Number NC–00120]

Administrative Declaration of a Disaster for the State of North Carolina

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a notice of an Administrative declaration of a disaster for the State of North Carolina dated 12/4/2020.

Incident: Tropical Storm Eta.

Incident Period: 11/12/2020.

DATES: Issued on 12/04/2020.

Physical Loan Application Deadline Date: 02/02/2021.

Economic Injury (EIDL) Loan Application Deadline Date: 09/07/2021.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT:

A. Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the Administrator's disaster declaration, applications for disaster loans may be filed at the address listed above or other locally announced locations. The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Alexander

Contiguous Counties:

North Carolina: Caldwell, Catawba, Iredell, Wilkes

The Interest Rates are:

	Percednt
For Physical Damage:	
Homeowners With Credit Available Elsewhere	2.250
Homeowners Without Credit Available Elsewhere	1.125
Businesses With Credit Available Elsewhere	6.000
Businesses Without Credit Available Elsewhere	3.000
Non-Profit Organizations With Credit Available Elsewhere	2.000
Non-Profit Organizations Without Credit Available Elsewhere	2.000
For Economic Injury:	
Businesses & Small Agricultural Cooperatives Without Credit Available Elsewhere	3.000
Non-Profit Organizations Without Credit Available Elsewhere	2.000

The number assigned to this disaster for physical damage is 16805 8 and for economic injury is 16806 0.

The State which received an EIDL Declaration # is North Carolina.

(Catalog of Federal Domestic Assistance Number 59008)

Jovita Carranza,

Administrator.

BILLING CODE 8026–03–P

SOCIAL SECURITY ADMINISTRATION

[Docket No. SSA–2018–0012]

Privacy Act of 1974; System of Records

AGENCY: Office of Analytics, Review, and Oversight, Social Security Administration (SSA).

ACTION: Notice of a modified system of records.

SUMMARY: In accordance with the Privacy Act, we are issuing public notice of our intent to modify an existing system of records entitled, Anti-Fraud Enterprise Solution (AFES) (60–0388), last published on May 3, 2018. This notice publishes details of the modified system as set forth under the caption, **SUPPLEMENTARY INFORMATION**.

DATES: The system of records notice (SORN) is applicable upon its publication in today's **Federal Register**. We invite public comment on the routine uses or other aspects of this SORN. In accordance with 5 U.S.C. 552a(e)(4) and (e)(11), the public is given a 30-day period in which to submit comments. Therefore, please submit any comments by January 11, 2021.

ADDRESSES: The public, Office of Management and Budget (OMB), and Congress may comment on this publication by writing to the Executive Director, Office of Privacy and Disclosure, Office of the General Counsel, SSA, Room G–401 West High Rise, 6401 Security Boulevard, Baltimore, Maryland 21235–6401, or through the Federal e-Rulemaking Portal at *http://www.regulations.gov.* Please reference docket number SSA–2018–0012. All comments we receive will be available for public inspection at the above address and we will post them to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Neil Etter, Government Information Specialist, Privacy Implementation Division, Office of Privacy and Disclosure, Office of the General Counsel, SSA, Room G–401 West High Rise, 6401 Security Boulevard, Baltimore, Maryland 21235–6401, telephone: (410) 966–5855, email: *Neil.Etter@ssa.gov.*

SUPPLEMENTARY INFORMATION: We are modifying the system of records name from ''Anti-Fraud Enterprise Solution'' to ''Anti-Fraud (AF) System'' to reflect the system accurately. The AF System is an agency-wide and overarching system that we use to detect, prevent, and mitigate fraud in SSA's programs. The AF System collects and maintains personally identifiable information (PII)

[30] 17 CFR 200.30–3(a)(12).

to assist in identifying suspicious or potentially fraudulent activities performed by individuals across our programs and service delivery methods.

We are claiming that the AF System is exempt from certain provisions of the Privacy Act pursuant to 5 U.S.C. 552a(k)(2). Some information in the AF System relates to our efforts to mitigate, detect, and investigate fraud in Social Security's programs and systems and to collaborate with the Office of the Inspector General in fraud investigations and prosecutions. Therefore, we need these exemptions to protect information from public access. The exemptions are required to avoid disclosure of screening techniques; to protect the identities and physical safety of confidential informants; to ensure our ability to obtain information from third parties and other sources; and to protect the privacy of third parties. Allowing an individual to access the information in AF System could permit the individual to avoid detection or apprehension.

In appropriate circumstances, when compliance would not appear to interfere with or adversely affect the law enforcement purposes of the AF System and the overall law enforcement process, we may, at our discretion, grant notification of or access to a record in the AF System. If an individual is denied any right, privilege, or benefit to which he or she is otherwise entitled under Federal law due to the maintenance of material in the AF System, we will provide such material to such individual, except to the extent that the disclosure of such material would reveal the identity of a source who furnished information to us under an express promise that the identity of the source would be held in confidence.

SSA claims exemption from Privacy Act subsection (c)(3) (Accounting and Disclosure); subsection (d) (Access and Amendment to Records); subsection (e)(4)(G), (e)(4)(H), and (e)(4)(I) (Agency Requirements); and subsection (f) (Agency Rules) for this system of records. We claim exemption from these Privacy Act subsections for the AF System because release of the accounting of disclosures, access to the records, and notice to individuals with respect to existence of records could alert the individual whom might be a subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of that investigation. Disclosures of accounting would therefore present a serious impediment to law enforcement efforts. These Privacy Act subsections would permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses, or evidence, and to avoid detection or apprehension, which would undermine the investigative process. Thereby, these Privacy Act subsections would undermine SSA investigative efforts and reveal the identities of witnesses, and potential witnesses, and confidential informants.

The AF System supports our goal of enhancing SSA's fraud prevention and detection activities by protecting the public's data, providing secure online services, and increasing payment accuracy. The AF System provides us with access to a single repository of data that currently resides across many different SSA systems of records. We use the PII in the AF System to employ advanced data analytics solutions to identify patterns indicative of fraud, improve the functionality of data-driven fraud activations, conduct real-time risk analysis, and integrate developing technology into our anti-fraud business processes. This solution also provides true business intelligence to agency leadership with assistance in data-driven anti-fraud decision-making. We use the records in the AF System to detect indications of fraud in all our programs and operations initiated by individuals outside of SSA or internal to SSA (*e.g.,* SSA employees).

In accordance with 5 U.S.C. 552a(r), we provided a report to OMB and Congress on this modified system of records. Concurrently, in today's edition of the **Federal Register**, we are publishing a Notice of Proposed Rulemaking (NPRM), in which we propose the addition of this system of records to the list of systems exempted under the Privacy Act.[1]

Matthew Ramsey,

Executive Director, Office of Privacy and Disclosure, Office of the General Counsel.

SYSTEM NAME AND NUMBER:

Anti-Fraud (AF) System, 60–0388

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION: SOCIAL SECURITY ADMINISTRATION, OFFICE OF ANALYTICS, REVIEW, AND OVERSIGHT, OFFICE OF ANTI-FRAUD PROGRAMS, ROBERT M. BALL BUILDING, 6401 SECURITY BOULEVARD, BALTIMORE, MD 21235.

SYSTEM MANAGER(S):

Social Security Administration, Office of Analytics, Review, and Oversight, Office of Anti-Fraud Programs, Robert M. Ball Building, 6401 Security Boulevard, Baltimore, MD 21235, *DCARO.OAFP.Controls@ssa.gov.*

[1] The public may access the NPRM at *www.regulations.gov* and searching under the common docket folder, ''SSA–2018–00012''.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 205(a) and 702(a)(5) of the Social Security Act, as amended, and the Fraud Reduction and Data Analytics Act of 2015 (Pub. L. 114–186).

PURPOSE(S) OF THE SYSTEM:

The records maintained in the AF System are necessary to detect, prevent, mitigate, and track the likelihood of fraudulent activity in SSA's programs and operations. We will use information in this system to identify patterns of fraud and to improve data-driven fraud activations and real-time analysis. We may use the results of these data analysis activities, including fraud leads and vulnerabilities, in our fraud investigations and other activities to support program and operational improvements.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

This system maintains information about individuals who are relevant to suspicious or potentially fraudulent activities connected with Social Security programs and operations, including but not limited to, the subjects of an investigation, Social Security applicants and beneficiaries, recipients, Supplemental Security income applicants and recipients, representative payees, appointed representatives, complainants, key witnesses, and current or former employees, contractors, or agents.

CATEGORIES OF RECORDS IN THE SYSTEM:

We will collect and maintain information in connection with our review of all suspicious or potentially fraudulent activities in Social Security programs and operations. We will also collect and maintain SSA and non-SSA breach information, including data generated internally or received from businesses with whom SSA has a relationship or government entities or partners.

The AF System includes records on individuals that it obtains from other SSA systems of records and will maintain information such as:

Enumeration Information: This information may include name, Social Security number (SSN), date of birth, parent name(s), address, and place of birth.

Earnings Information: This information may include yearly earnings and quarters of coverage information.

Social Security Benefit Information: This information may include disability status, benefit payment amount, data relating to the computation, appointed representative, and representative payee.

Supplemental Security Income payment information: This information may include may include disability status, benefit payment amount, data relating to the computation, appointed representative, and representative payee.

Representative Payee Information: This information may include names, SSNs, and addresses of representative payees and relationship with the beneficiary.

Persons Conducting Business with Us Through Electronic Services: This information may include name, address, date of birth, SSN, knowledge-based authentication data, and blocked accounts.

Employee Information: This information may include a personal identification number (PIN), employee name, job title, SSN about our employees, contractors, or agents.

RECORD SOURCE CATEGORIES:

We obtain information in this system from individuals (*i.e.,* the public and SSA staff), other Government agencies, and private entities. The largest record sources for the AF System is information the agency collects and maintains for purposes related to other business processes that have established systems of records, such as the Master Files of SSN Holders and SSN Applications (60–0058), the Claims Folders System (60–0089), the Master Beneficiary Record (60–0090), the Supplemental Security Income Record and Special Veterans Benefits (60–0103), the Personal Identification Number File (60–0214), the Master Representative Payee File (60–0222), and the Central Repository of Electronic Authentication Data Master File (60–0373). The AF System may pull any relevant information from any SSA system of records. For a full listing of our system of records notices that could provide information to the AF System, please see the Privacy Program section of SSA's website.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

We will disclose records pursuant to the following routine uses; however, we will not disclose any information defined as ''return or return information'' under 26 U.S.C. 6103 of the Internal Revenue Code (IRC), unless authorized by statute, the Internal Revenue Service (IRS), or IRS regulations.

1. To any agency, person, or entity in the course of an SSA investigation to the extent necessary to obtain or to verify information pertinent to an SSA fraud investigation.

2. To a congressional office in response to an inquiry from that office made on behalf of, and at the request of, the subject of the record or a third party acting on the subject's behalf.

3. To the Office of the President in response to an inquiry received from that office made on behalf of, and at the request of, the subject of record or a third party acting on the subject's behalf.

4. To the Department of Justice (DOJ), a court or other tribunal, or another party before such court or tribunal, when:

(a) SSA, or any component thereof; or

(b) any SSA employee in his or her official capacity; or:

(c) any SSA employee in his or her individual capacity where DOJ (or SSA where it is authorized to do so) has agreed to represent the employee; or

(d) the United States or any agency thereof where SSA determines the litigation is likely to SSA or any of its components, is a party to the litigation or has an interest in such litigation, and we determine that the use of such records by DOJ, a court or other tribunal, or another party before the tribunal, is relevant and necessary to the litigation, provided, however, that in each case, we determine that such disclosure is compatible with the purpose for which the records were collected.

5. To contractors and other Federal agencies, as necessary, for the purpose of assisting us in the efficient administration of its programs. We will disclose information under this routine use only in situations in which we may enter into a contractual or similar agreement to obtain assistance in accomplishing an SSA function relating to this system of records.

6. To student volunteers, individuals working under a personal services contract, and other workers who technically do not have the status of Federal employees, when they are performing work for SSA, as authorized by law, and they need access to PII in our records in order to perform their assigned agency functions.

7. To Federal, State, and local law enforcement agencies and private security contractors, as appropriate, if necessary:

(a) to enable them to protect the safety of SSA employees and customers, the security of the SSA workplace, and the operation of our facilities, or

(b) to assist investigations or prosecutions with respect to activities that affect such safety and security, or activities that disrupt the operation of our facilities.

8. To the National Archives and Records Administration (NARA) under 44 U.S.C. 2904 and 2906.

9. To appropriate agencies, entities, and persons when:

(a) SSA suspects or has confirmed that there has been a breach of the system of records;

(b) SSA has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, SSA (including its information systems, programs, and operations), the Federal Government, or national security; and

(c) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with SSA's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

10. To another Federal agency or Federal entity, when we determine that information from this system of records is reasonably necessary to assist the recipient agency or entity in:

(a) responding to suspected or confirmed breach; or

(b) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

11. To the Equal Employment Opportunity Commission, when requested in connection with investigations into alleged or possible discriminatory practices in the Federal sector, examination of Federal affirmative employment programs, compliance by Federal agencies with the Uniform Guidelines on Employee Selection Procedures, or other functions vested in the Commission.

12. To the Office of Personnel Management, Merit Systems Protection Board, or the Office of Special Counsel in connection with appeals, special studies of the civil service and other merit systems, review of rules and regulations, investigations of alleged or possible prohibited personnel practices, and other such functions promulgated in 5 U.S.C. Chapter 12, or as may be required by law.

13. To the Federal Labor Relations Authority, the Office of the Special Counsel, the Federal Mediation and Conciliation Service, the Federal Service Impasses Panel, or an arbitrator requesting information in connection with the investigations of allegations of unfair practices, matters before an arbitrator or the Federal Service Impasses Panel.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

We maintain records in this system in paper and electronic form.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

We will retrieve records by the individual's name, SSN, as well as internal transaction identifiers (*e.g.,* transaction identification for the internet Claim application, transaction identification for an electronic online Direct Deposit change, etc.). Information from these retrieved records that matches across other agency systems of records will also create a linkage to retrieve those records, because the system is able to show key connections or overlaps based on similar information stored in different data sources at the agency.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

These records are currently unscheduled. We retain the records in accordance with NARA approved records schedules. In accordance with NARA rules codified at 36 CFR 1225.16, we maintain unscheduled records until NARA approves an agency-specific records schedule or publishes a corresponding General Records Schedule.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

We retain electronic and paper files containing personal identifiers in secure storage areas accessible only by our authorized employees who have a need for the information when performing their official duties. Security measures include, but are not limited to, the use of codes and profiles, personal identification number and password, and personal identification verification cards. We restrict access to specific correspondence within the system based on assigned roles and authorized users. We maintain electronic files with personal identifiers in secure storage areas. We will use audit mechanisms to record sensitive transactions as an additional measure to protect information from unauthorized disclosure or modification. We keep paper records in cabinets within secure areas, with access limited to only those employees who have an official need for access in order to perform their duties.

We annually provide our employees and contractors with appropriate security awareness training that includes reminders about the need to protect PII and the criminal penalties that apply to unauthorized access to, or disclosure of PII. *See* 5 U.S.C. 552a(i)(1). Furthermore, employees and contractors with access to databases maintaining PII must annually sign a sanction document that acknowledges their accountability for inappropriately accessing or disclosing such information.

RECORD ACCESS PROCEDURES:

This system of records is exempt from the Privacy Act's access, contesting, and notification provisions stated below. However, individuals may submit requests for information about whether this system contains a record about them by submitting a written request to the system manager at the above address, which includes their name, SSN, or other information that may be in this system of records that will identify them. Individuals requesting notification of, or access to, a record by mail must include (1) a notarized statement to us to verify their identity or (2) must certify in the request that they are the individual they claim to be and that they understand that the knowing and willful request for, or acquisition of, a record pertaining to another individual under false pretenses is a criminal offense.

Individuals requesting notification of or access to, records in person must provide their name, SSN, or other information that may be in this system of records that will identify them, as well as provide an identity document, preferably with a photograph, such as a driver's license. Individuals lacking identification documents sufficient to establish their identity must certify in writing that they are the individual they claim to be and that they understand that the knowing and willful request for, or acquisition of, a record pertaining to another individual under false pretenses is a criminal offense.

These procedures are in accordance with our regulations at 20 CFR 401.40 and 401.45.

CONTESTING RECORD PROCEDURES:

Same as record access procedures. Individuals should also reasonably identify the record, specify the information they are contesting, and state the corrective action sought and the reasons for the correction with supporting justification showing how the record is incomplete, untimely, inaccurate, or irrelevant. These procedures are in accordance with our regulations at 20 CFR 401.65(a).

NOTIFICATION PROCEDURES:

Same as record access procedures. These procedures are in accordance with our regulations at 20 CFR 401.40 and 401.45.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

This system of records is exempt from certain provisions of the Privacy Act pursuant to 5 U.S.C. 552a(k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553(b), (c), and (e) and have been published in today's **Federal Register**.

HISTORY:

Anti-Fraud Enterprise Solution (AFES), 83 FR 19588.

BILLING CODE 4191–02–P

DEPARTMENT OF STATE

[Public Notice: 11226]

Notice of Department of State Sanctions Actions Blocking Property and Suspending Entry of Certain Persons Contributing to the Situation in Syria

SUMMARY: The Secretary of State has imposed sanctions on four individuals, Blocking Property and Suspending Entry of Certain Persons Contributing to the Situation in Syria.

DATES: The Secretary of State's determination and selection of certain sanctions to be imposed upon the four individuals identified in the **SUPPLEMENTARY INFORMATION** section were effective on August 20, 2020.

FOR FURTHER INFORMATION CONTACT: Taylor Ruggles, Director, Office of Economic Sanctions Policy and Implementation, Bureau of Economic and Business Affairs, Department of State, Washington, DC 20520, tel.: (202) 647 7677, email: *RugglesTV@state.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to Section 2(a) of E.O. 13894 of October 14, 2019, the Secretary of State, in consultation with the Secretary of the Treasury, the Secretary of Commerce, the Secretary of Homeland Security, and the United States Trade Representative, and with the President of the Export-Import Bank, the Chairman of the Board of Governors of the Federal Reserve System, and other agencies and officials as appropriate, is authorized to impose on a person any of the sanctions described in section 2(c) of E.O. 13894 upon determining that the person met any criteria set forth in section 2(a)(i)(A) or section 2(a)(i)(D) of E.O. 13894.

The Secretary of State has determined, pursuant to Section 2(a)(i)(A) of E.O. 13894, that Fadi Saqr, Ghaith Dalah, and Samer Ismail are responsible for or complicit in, have directly or indirectly engaged in, attempted to engage in, or financed, the

obstruction, disruption, or prevention of a ceasefire in northern Syria.

The Secretary of State has determined, pursuant to Section 2(a)(i)(D) of E.O. 13894, that Yasser Ibrahim is responsible for or complicit in, has directly or indirectly engaged in, attempted to engage in, or financed, the obstruction, disruption, or prevention of efforts to promote a political solution to the conflict in Syria.

Pursuant to Sections 2(b) and 2(c) of E.O. 13894, the Secretary of State has selected the following sanctions to be imposed upon Fadi Saqr, Ghaith Dalah, Samer Ismail, and Yasser Ibrahim:

- Block all property and interests in property that are in the United States, that hereafter come within the United States, or that are or hereafter come within the possession or control of any United States person of Fadi Saqr, Ghaith Dalah, Samer Ismail, or Yasser Ibrahim, and provide that such property and interests in property may not be transferred, paid, exported, withdrawn, or otherwise dealt in (Section 2(c)(iv) of E.O. 13894).

Peter D. Haas,

Principal Deputy Assistant Secretary, Bureau of Economic and Business Affairs, Department of State.

[FR Doc. 2020–27122 Filed 12–10–20; 8:45 am]

BILLING CODE 4710–07–P

DEPARTMENT OF STATE

[Public Notice: 11253]

Notice of Department of State Sanctions Actions Blocking Property and Suspending Entry of Certain Persons Contributing to the Situation in Syria

SUMMARY: The Secretary of State has imposed sanctions on three individuals Blocking Property and Suspending Entry of Certain Persons Contributing to the Situation in Syria.

DATES: The Secretary of State's determination and selection of certain sanctions to be imposed upon the three individuals identified in the **SUPPLEMENTARY INFORMATION** section were effective on September 30, 2020.

FOR FURTHER INFORMATION CONTACT: Taylor Ruggles, Director, Office of Economic Sanctions Policy and Implementation, Bureau of Economic and Business Affairs, Department of State, Washington, DC 20520, tel.: (202) 647 7677, email: *RugglesTV@state.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to Section 2(a) of E.O. 13894 of October 14, 2019, the Secretary of State, in consultation with the Secretary of the Treasury, the Secretary of Commerce, the Secretary of Homeland Security, and the United States Trade Representative, and with the President of the Export-Import Bank, the Chairman of the Board of Governors of the Federal Reserve System, and other agencies and officials as appropriate, is authorized to impose on a person any of the sanctions described in section 2(c) of E.O. 13894 upon determining that the person met any criteria set forth in section 2(a)(i)(A) or section 2(a)(ii) of E.O. 13894.

The Secretary of State has determined, pursuant to Section 2(a)(i)(A) of E.O. 13894, that Milad Jedid is responsible for or complicit in, has directly or indirectly engaged in, attempted to engage in, or financed, the obstruction, disruption, or prevention of a ceasefire in northern Syria.

The Secretary of State has determined, pursuant to Section 2(a)(ii) of E.O. 13894, that Nasreen Ibrahim and Rana Ibrahim are adult family members of a person designated under subsection (a)(i) of E.O. 13894.

Pursuant to Sections 2(b) and 2(c) of E.O. 13894, the Secretary of State has selected the following sanctions to be imposed upon Milad Jedid, Nasreen Ibrahim, and Rana Ibrahim:

- Block all property and interests in property that are in the United States, that hereafter come within the United States, or that are or hereafter come within the possession or control of any United States person of Milad Jedid, Nasreen Ibrahim, or Rana Ibrahim, and provide that such property and interests in property may not be transferred, paid, exported, withdrawn, or otherwise dealt in (Section 2(c)(iv) of E.O. 13894).

Peter D. Haas,

Principal Deputy Assistant Secretary, Bureau of Economic and Business Affairs, Department of State.

BILLING CODE 4710–07–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Public Notice of Surplus Property Release; Spokane International Airport, Spokane, Washington

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of request to release surplus property.

SUMMARY: Notice is being given that the FAA is considering a request from the City of Spokane, Washington and the County of Spokane, Washington, to waive the surplus property requirements for approximately 1.07 acres of airport property located at Spokane International Airport, in Spokane, Washington. The subject property is located away from the aeronautical area and currently vacant. The property will remain vacant of any structures, as it will be utilized for public road improvements creating a roundabout for access to the Interstate 90 freeway. This release will allow the City and County to sell 1 parcel of airport property to WSDOT interested in accommodating increased traffic and access to the business park. There will be proceeds generated from the proposed release of this property for public road improvements. The City and County will receive not less than fair market value for the property and the revenue generated from the sale will be used for airport purposes. It has been determined through study that the subject parcel will not be needed for aeronautical purposes.

DATES: Comments are due within 30 days of the date of the publication of this notice in the **Federal Register**. Written comments can be provided to Ms. Mandi M. Lesauis, Program Specialist, Seattle Airports District Office, 2200 S. 216th Street, Des Moines, Washington, 98198, (206) 231–4140.

FOR FURTHER INFORMATION CONTACT: Comments on this application may be mailed or delivered to the FAA at the following address:

Ms. Mandi Lesauis, Compliance Specialist, at the Federal Aviation Administration, 2200 S. 216th St., Des Moines, Washington 98198.

(Authority: 49 U.S.C. 47153(c))

Issued in Des Moines, Washington, on December 7, 2020.

William C. Garrison,

Acting Manager,Seattle Airports District Office.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No 2020–0260]

Agency Information Collection Activities: Requests for Comments; Clearance of a Renewed Approval of Information Collection: Verification of Authenticity of Foreign License, Rating, and Medical Certification; Extension of Comment Period

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice; extension of comment period.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on 4/15/2020. The collection involves information used to identify foreign airmen in order to allow the agency to verify their foreign license when used to qualify for a U.S. certificate. Respondents are holders of foreign licenses wishing to obtain U.S. Certificates.

DATES: Written comments should be submitted by January 11, 2021.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Margaret A Hawkins by email at: *Margaret.A.Hawkins@faa.gov;* phone: 1–405–954–7045.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information.

OMB Control Number: 2120–0724.

Title: Verification of Foreign License, Rating and Medical Certification.

Form Numbers: Form 8060–71.

Type of Review: Renewal of an information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on 04/15/2020 (85 FR 21061). The information collected is used to properly identify airmen to allow the agency to verify their foreign license being used to qualify for a U.S. certificate. The respondents are holders of a foreign license wishing to obtain a U.S. certificate. A person who is applying for a U.S. pilot certificate or rating on the basis of a foreign pilot license must apply for verification of that license at least 90 days before arriving at the designated FAA FSDO where the applicant intends to receive the U.S. pilot certificate.

Respondents: Approximately 8,700 foreign applicants for U.S. certificates annually.

Frequency: On occasion.

Estimated Average Burden per Response: 10 minutes.

Estimated Total Annual Burden: 1,450 Hours.

Issued in Oklahoma City, OK on November 19, 2020.

Margaret A Hawkins,

Compliance Specialist, Forms Manager, Airmen Certification Branch, AFB–720.

[FR Doc. 2020–26004 Filed 12–10–20; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Collin County, Texas

AGENCY: Texas Department of Transportation (TxDOT), Federal Highway Administration (FHWA), Department of Transportation.

ACTION: Federal notice of intent to prepare an environmental impact statement (EIS).

SUMMARY: FHWA, on behalf of TxDOT, is issuing this notice to advise the public that an EIS will be prepared for a proposed transportation project to construct an eight-lane freeway along the United States (US) Highway 380 corridor from Coit Road in Prosper (west of McKinney) to Farm-to-Market Road (FM) 1827 (east of McKinney), in Collin County, Texas.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen Endres, Project Manager, TxDOT Dallas District, 4777 E. US Highway 80, Mesquite, Texas 75150; Phone (214) 320–4469 or email: at *Stephen.Endres@txdot.gov.* TxDOT's normal business hours are 8:00 a.m.-5:00 p.m. (central time), Monday through Friday.

SUPPLEMENTARY INFORMATION: The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 9, 2019, and executed by FHWA and TxDOT.

The purpose of the proposed project is to manage congestion and improve east-west connectivity and safety across the project area. The project is needed due to regional population growth, increasing traffic congestion, and crash rates higher than the statewide average. Project alternatives include improvement of the existing US 380 alignment (a distance of approximately 12 miles) and new location alternatives ranging in length from approximately 14.8 miles to 16.3 miles that would pass through the communities of Prosper, McKinney, and New Hope, and unincorporated areas of Collin County. The proposed project would provide an access-controlled freeway with one-way frontage roads on each side within an anticipated right-of-way width of 330 to 400 feet. The typical freeway section would consist of four 12-foot (ft.) travel lanes in each direction and 10 ft. inside and outside shoulders. Grade-separated interchanges would include 14 ft. ramps with 2 ft. inside shoulders and 6 ft. outside shoulders, with curb and gutter. Bridges and overpasses along the main lanes would have a desired vertical clearance of 18.5 ft with vertical clearance over railroads desired at 23.5 ft.

In April 2020, TxDOT completed the US 380 Feasibility Study for Collin County, which recommended an alignment for an improved US 380 across Collin County. The Coit Road to FM 1827 section of the Recommended Alignment from the Feasibility Study is the basis for development of the alternatives to be considered in the EIS. The EIS will evaluate a range of build alternatives and a no-build alternative. Possible build alternatives include improvement of the existing US 380 alignment, the Recommended Alignment between Coit Road and FM 1827 from the 2020 US 380 Feasibility Study, and three additional new location alternatives that consider optional alignments through the Town of Prosper within the western portion of the project area and along the East Fork of the Trinity River within the eastern portion of the project area. The following 5 segments combine to form the new location build alternatives under consideration.

Segment A connects Coit Road on the west and the future Ridge Road and Bloomdale Road intersection on the east. This segment follows existing US 380 from Coit Road to near the approximate alignment of future Ridge Road where it turns north and connects to Bloomdale Road. Segment A was a component of the Feasibility Study Recommended Alignment.

Segment B also connects Coit Road on the west and the future Ridge Road and Bloomdale Road intersection to the east.

This segment follows existing US 380 from Coit Road to west of Custer Road (FM 2478) where it turns northeast to intersect with Custer Road and East First Street, then continues northeast to connect to Bloomdale Road at the future extension of Ridge Road.

Segment C begins at State Highway (SH) 5 extending in a southeasterly direction across the Dallas Area Rapid Transit (DART) rail line and the East Fork of the Trinity River, then shifts to a more southerly direction east of and parallel to the East Fork of the Trinity River to connect to existing US 380 near FM 1827.

Segment D also begins at SH 5 extending in a southerly direction across the DART rail line and the East Fork of the Trinity River and continues in a southerly direction west of and parallel to the East Fork of the Trinity River connecting to US 380 near Airport Drive, and following existing US 380 to the east to FM 1827. Segment D was a component of the Feasibility Study Recommended Alignment.

Segment E extends roughly along the alignment of existing Bloomdale Road through north McKinney beginning at the proposed intersection of Ridge Road and Bloomdale Road on the west and SH 5 on the east. This segment includes a new interchange connection with US 75 and SH 5. The location of Segment E is constrained by existing development and existing and proposed utilities along Bloomdale Road. Segment E was a component of the Feasibility Study Recommended Alignment and is a common segment in all the new location build alternatives.

These segments, when linked end-to-end between Coit Road and FM 1827, result in the Purple, Blue, Brown, and Gold Alternatives described below. The Green Alternative to improve the existing US 380 alignment is composed of one segment (Segment F) extending from Coit Road to FM 1827 along existing US 380.

The Purple Alternative is composed of Segments A, E, and D and is approximately 15.8 miles long. It represents the section of the Recommended Alignment from the 2020 Feasibility Study between Coit Road and FM 1827. The Purple Alternative begins at the intersection of Coit Road and US 380 in the Town of Prosper and travels around the north side of McKinney turning south near US 75 and SH 5 to extend along the west side of the East Fork of the Trinity River to connect back to existing US 380 and FM 1827. Grade-separated interchanges would be considered at US 380/Coit Road, the alignment's departure from existing US 380 at future Ridge Road, Wilmeth Road, Ridge Road (McKinney city limits/Collin County line), Lake Forest Drive, County Road (CR) 1006, future Hardin Road (McKinney city limits), Laud Howell development, US 75 (multi-level), SH 5, McIntyre Road, and at its connection back to US 380 near Airport Drive west of FM 1827. Additional interchange locations may be studied.

The Blue Alternative is composed of Segments A, E, and C and is approximately 15.6 miles long. The Blue Alternative differs from the Purple Alternative between US 75/SH 5 and existing US 380 east of McKinney where the alignment follows that of Segment C parallel to and east of the East Fork of the Trinity River. The alignment would connect back to existing US 380 near FM 1827. Grade-separated interchanges would be considered at US 380/Coit Road, the alignment's departure from existing US 380 at future Ridge Road, Wilmeth Road, Ridge Road (McKinney city limits/Collin County line), Lake Forest Drive, CR 1006, future Hardin Road (McKinney city limits), Laud Howell development, US 75 (multi-level), SH 5, CR 338, CR 2933, and at its connection back to US 380 near FM 1827. Additional interchange locations may be studied.

The Brown Alternative, approximately 14.8 miles long, is composed of Segments B, E, and C. It begins at Coit Road and existing US 380 and follows the existing US 380 alignment to west of Custer Road where it turns north and east to travel around the north side of McKinney, connect to US 75/SH 5, and then follows the alignment east of and parallel to the East Fork of the Trinity River to connect to existing US 380 near FM 1827. The Brown Alternative differs from the Blue Alternative in the alignment from Coit Road to the future intersection of Ridge Road and Bloomdale Road (Segment B). Grade-separated interchanges would be considered at the alignment's departure from existing US 380 west of Custer Road, at Custer Road/First St., future Wilmeth Road, future N. Stonebridge Drive, Ridge Road (McKinney city limits/Collin County line), Lake Forest Drive, CR 1006, future Hardin Road (McKinney city limits), Laud Howell development, US 75 (multi-level), SH 5, CR 338, CR 2933, and at its connection back to US 380 near FM 1827. Additional interchange locations may be studied.

The Gold Alternative, composed of Segments B, D, and E, is approximately 16.3 miles long and matches the Brown Alternative between Coit Road and US 75/SH 5 where it turns south along the west side of the East Fork of the Trinity River to connect to existing US 380 near Airport Drive and then follows the exiting US 380 alignment east to FM 1827. Grade-separated interchanges would be considered at the alignment's departure from existing US 380 west of Custer Road, at Custer Road/First St., future Wilmeth Road, future N. Stonebridge Drive, Ridge Road (McKinney city limits/Collin County line), Lake Forest Drive, CR 1006, future Hardin Road (McKinney city limits), Laud Howell development, US 75 (multi-level), SH 5, McIntyre Road, and at its connection back to US 380 near Airport Drive west of FM 1827. Additional interchange locations may be studied.

The Green Alternative (Segment F) would widen the existing US 380 corridor from Coit Road to FM 1827. Grade-separated interchanges would be provided at Coit Road, Custer Road, Stonebridge Drive, Grassmere Lane, Ridge Road, Lake Forest Road, Hardin Road, Community Ave., US 75, SH 5, Airport Drive, and FM 1827.

The new location build alternatives share some common alignments, with potential impacts to wetlands and waters of the US, floodplain/floodway encroachment and need for compensatory storage, conversion of farmland to transportation use, residential and business displacements, cultural resources, wildlife/habitat, air quality, traffic noise, the visual environment, induced growth, and cumulative effects. The Green Alternative would result in potential residential and business displacements, including low-income and minority residents, and impacts to potential historic properties, community facilities, public parks (Section 4(f)), air quality, traffic noise, property access, the visual environment, and cumulative effects.

The proposed action may require issuance of an Individual or Nationwide Permit under Section 404 of the Clean Water Act, Section 401 Water Quality Certification, Section 402/Texas Pollution Discharge Elimination System Permit; conformance with Executive Orders on Environmental Justice (12898), Limited English Proficiency (13166), Wetlands (11990), Floodplain Management (11988), Invasive Species (13112); and compliance with Section 106 of the National Historic Preservation Act, Section 7 of the Endangered Species Act, the Migratory Bird Treaty Act, Section 4(f) of the DOT Act (49 U.S.C. 303), Section 6(f) of the Land and Water Conservation Act (16 U.S.C. 4601), Title VI of the Civil Rights Act, and other applicable Federal and State regulations.

TxDOT anticipates completing the study process for this proposed action by December 2022.

TxDOT will issue a single Final Environmental Impact Statement and Record of Decision document pursuant to 23 U.S.C. 139(n)(2), unless TxDOT determines statutory criteria or practicability considerations preclude issuance of a combined document.

In accordance with 23 U.S.C. 139, cooperating agencies, participating agencies, and the public will be given an opportunity for continued input on project development. A virtual public scoping meeting is planned to be held on January 19, 2021. The meeting materials will be posted on *http://www.drive380.com* starting January 19, 2021, and will remain available through February 2, 2021, which is the date the comment period ends. The meeting will be hosted online and provide an opportunity for the public to review and comment on the draft coordination plan and schedule, the project purpose and need, the range of alternatives, and methodologies and level of detail for analyzing alternatives. It will also allow the public an opportunity to provide input on any expected environmental impacts, anticipated permits or other authorizations, and any significant issues that should be analyzed in depth in the EIS. In addition to the public scoping meeting, a public meeting will be held during development of the draft EIS, and a public hearing will be held after the draft EIS is prepared. Public notice will be given of the time and place of the meeting and hearing.

The public scoping meeting, public meeting, and public hearing will be conducted in English. If you need an interpreter or document translator because English is not your primary language or you have difficulty communicating effectively in English, one will be provided to you. If you have a disability and need assistance, special arrangements can be made to accommodate most needs. If you need interpretation or translation services or you are a person with a disability who requires an accommodation to participate in the public scoping meeting, please contact Mr. Patrick Clarke, Public Information Officer, Dallas District at (214) 320–4483 no later than 4 p.m. (central time), on January 14, 2021. Please be aware that advance notice is required as some services and accommodations may require time for the Texas Department of Transportation to arrange.

The public is requested to identify in writing potential alternatives, information, and analyses relevant to this proposed project. Such information may be provided by email to Mr. Stephen Endres, TxDOT Project Manager at *Stephen.Endres@txdot.gov,* or by mail to the TxDOT Dallas District, 4777 E. US Highway 80, Mesquite, Texas 75150. Such information must be received by February 2, 2021.

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2013–0444; FMCSA–2014–0212; FMCSA–2015–0320; FMCSA–2015–0323; FMCSA–2016–0007; FMCSA–2018–0054]

Qualification of Drivers; Exemption Applications; Epilepsy and Seizure Disorders

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of final disposition.

SUMMARY: FMCSA announces its decision to renew exemptions for nine individuals from the requirement in the Federal Motor Carrier Safety Regulations (FMCSRs) that interstate commercial motor vehicle (CMV) drivers have ''no established medical history or clinical diagnosis of epilepsy or any other condition which is likely to cause loss of consciousness or any loss of ability to control a CMV.'' The exemptions enable these individuals who have had one or more seizures and are taking anti-seizure medication to continue to operate CMVs in interstate commerce.

DATES: The exemptions were applicable on November 15, 2020. The exemptions expire on November 15, 2022.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, (202) 366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE, Room W64–224, Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m., ET, Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Dockets Operations, (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation

A. Viewing Documents and Comments

To view comments, as well as any documents mentioned in this notice as being available in the docket, go to *http://www.regulations.gov.* Insert the docket number, FMCSA–2013–0444, FMCSA–2014–0212, FMCSA–2015–0320, FMCSA–2015–0323, FMCSA–2016–0007, or FMCSA–2018–0054, in the keyword box, and click ''Search.'' Next, click the ''Open Docket Folder'' button and choose the document to review. If you do not have access to the internet, you may view the docket online by visiting Dockets Operations in Room W12–140 on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

B. Privacy Act

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.transportation.gov/privacy.*

II. Background

On October 28, 2020, FMCSA published a notice announcing its decision to renew exemptions for nine individuals from the epilepsy and seizure disorders prohibition in 49 CFR 391.41(b)(8) to operate a CMV in interstate commerce and requested comments from the public (85 FR 68405). The public comment period ended on November 27, 2020, and no comments were received.

FMCSA has evaluated the eligibility of these applicants and determined that renewing these exemptions would achieve a level of safety equivalent to, or greater than, the level that would be achieved by complying with § 391.41(b)(8).

The physical qualification standard for drivers regarding epilepsy found in § 391.41(b)(8) states that a person is physically qualified to drive a CMV if that person has no established medical history or clinical diagnosis of epilepsy or any other condition which is likely to cause the loss of consciousness or any loss of ability to control a CMV.

In addition to the regulations, FMCSA has published advisory criteria [1] to assist medical examiners in determining whether drivers with certain medical conditions are qualified to operate a CMV in interstate commerce.

III. Discussion of Comments

FMCSA received no comments in this proceeding.

IV. Conclusion

Based on its evaluation of the nine renewal exemption applications, FMCSA announces its decision to exempt the following drivers from the epilepsy and seizure disorders prohibition in § 391.41(b)(8).

In accordance with 49 U.S.C. 31136(e) and 31315(b), the following groups of drivers received renewed exemptions in the month of November and are discussed below.

As of November 15, 2020, and in accordance with 49 U.S.C. 31136(e) and 31315(b), the following nine individuals have satisfied the renewal conditions for obtaining an exemption from the epilepsy and seizure disorders prohibition in the FMCSRs for interstate CMV drivers (85 FR 68405):

Kevin Beamon (NY)
Joshua Cirilo (MN)
Peter DellaRocca, Jr. (PA)
Marvin Fender (CO)
Donald Horst (MD)
Chad T. Knott (MD)
Louis Lerch (IA)
Kyle Loney (WA)
Curtis J. Palubicki (MN)

The drivers were included in docket number FMCSA–2013–0444, FMCSA–2014–0212, FMCSA–2015–0320, FMCSA–2015–0323, FMCSA–2016–0007, and FMCSA–2018–0054. Their exemptions were applicable as of November 15, 2020, and will expire on November 15, 2022.

In accordance with 49 U.S.C. 31315(b), each exemption will be valid for 2 years from the effective date unless revoked earlier by FMCSA. The exemption will be revoked if the following occurs: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained prior to being granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b).

Larry W. Minor,

Associate Administrator for Policy.

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2018–0136]

Qualification of Drivers; Exemption Applications; Hearing

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of renewal of exemptions; request for comments.

SUMMARY: FMCSA announces its decision to renew exemptions for 10 individuals from the hearing requirement in the Federal Motor Carrier Safety Regulations (FMCSRs) for interstate commercial motor vehicle (CMV) drivers. The exemptions enable these hard of hearing and deaf individuals to continue to operate CMVs in interstate commerce.

DATES: The exemptions are applicable on December 16, 2020. The exemptions expire on December 16, 2022. Comments must be received on or before January 11, 2021.

ADDRESSES: You may submit comments identified by the Federal Docket Management System (FDMS) Docket No. FMCSA–2018–0136 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov/docket?D=FMCSA-2018-0136.* Follow the online instructions for submitting comments.
- *Mail:* Dockets Operations; U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal Holidays.
- *Fax:* (202) 493–2251.

To avoid duplication, please use only one of these four methods. See the ''Public Participation'' portion of the **SUPPLEMENTARY INFORMATION** section for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, 202–366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE, Room W64–224, Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m., ET, Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Dockets Operations, (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation

A. Submitting Comments

If you submit a comment, please include the docket number for this notice (Docket No. FMCSA–2018–0136), indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov/docket?D=FMCSA-2018-0136.* Click on the ''Comment Now!'' button and type your comment into the text box on the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

FMCSA will consider all comments and material received during the comment period.

B. Viewing Documents and Comments

To view comments, as well as any documents mentioned in this notice as being available in the docket, go to *http://www.regulations.gov/docket?D=FMCSA-2018-0136* and choose the document to review. If you do not have access to the internet, you may view the docket online by visiting Dockets Operations in Room W12–140 on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. To be sure someone is there to help you,

please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

C. Privacy Act

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.transportation.gov/privacy.*

II. Background

Under 49 U.S.C. 31136(e) and 31315(b), FMCSA may grant an exemption from the FMCSRs for no longer than a 5-year period if it finds such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption. The statute also allows the Agency to renew exemptions at the end of the 5-year period. FMCSA grants medical exemptions from the FMCSRs for a 2-year period to align with the maximum duration of a driver's medical certification.

The physical qualification standard for drivers regarding hearing found in 49 CFR 391.41(b)(11) states that a person is physically qualified to drive a CMV if that person first perceives a forced whispered voice in the better ear at not less than 5 feet with or without the use of a hearing aid or, if tested by use of an audiometric device, does not have an average hearing loss in the better ear greater than 40 decibels at 500 Hz, 1,000 Hz, and 2,000 Hz with or without a hearing aid when the audiometric device is calibrated to American National Standard (formerly ASA Standard) Z24.5—1951.

This standard was adopted in 1970 and was revised in 1971 to allow drivers to be qualified under this standard while wearing a hearing aid, 35 FR 6458, 6463 (April 22, 1970) and 36 FR 12857 (July 3, 1971).

The 10 individuals listed in this notice have requested renewal of their exemptions from the hearing standard in § 391.41(b)(11), in accordance with FMCSA procedures. Accordingly, FMCSA has evaluated these applications for renewal on their merits and decided to extend each exemption for a renewable 2-year period.

III. Request for Comments

Interested parties or organizations possessing information that would otherwise show that any, or all, of these drivers are not currently achieving the statutory level of safety should immediately notify FMCSA. The Agency will evaluate any adverse evidence submitted and, if safety is being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b), FMCSA will take immediate steps to revoke the exemption of a driver.

IV. Basis for Renewing Exemptions

In accordance with 49 U.S.C. 31136(e) and 31315(b), each of the 10 applicants has satisfied the renewal conditions for obtaining an exemption from the hearing requirement. The 10 drivers in this notice remain in good standing with the Agency. In addition, for Commercial Driver's License (CDL) holders, the Commercial Driver's License Information System and the Motor Carrier Management Information System are searched for crash and violation data. For non-CDL holders, the Agency reviews the driving records from the State Driver's Licensing Agency. These factors provide an adequate basis for predicting each driver's ability to continue to safely operate a CMV in interstate commerce. Therefore, FMCSA concludes that extending the exemption for each of these drivers for a period of 2 years is likely to achieve a level of safety equal to that existing without the exemption.

As of December 16, 2020, and in accordance with 49 U.S.C. 31136(e) and 31315(b), the following 10 individuals have satisfied the renewal conditions for obtaining an exemption from the hearing requirement in the FMCSRs for interstate CMV drivers:

Joshua Cogan (MD)
Ronald Cottrell (OR)
Heath Focken (NE)
Ahmed Gabr (NC)
Daniel Hanson (PA)
Arnold Hatton (DE)
Donte Mason (TN)
Taryn Peterson (IA)
Greivin Salazar (CA)
Eric Woods (MD)

The drivers were included in docket number FMCSA–2018–0136. Their exemptions are applicable as of December 16, 2020, and will expire on December 16, 2022.

V. Conditions and Requirements

The exemptions are extended subject to the following conditions: (1) Each driver must report any crashes or accidents as defined in § 390.5; and (2) report all citations and convictions for disqualifying offenses under 49 CFR 383 and 49 CFR 391 to FMCSA; and (3) each driver prohibited from operating a motorcoach or bus with passengers in interstate commerce. The driver must also have a copy of the exemption when driving, for presentation to a duly authorized Federal, State, or local enforcement official. In addition, the exemption does not exempt the individual from meeting the applicable CDL testing requirements. Each exemption will be valid for 2 years unless rescinded earlier by FMCSA. The exemption will be rescinded if: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b).

VI. Preemption

During the period the exemption is in effect, no State shall enforce any law or regulation that conflicts with this exemption with respect to a person operating under the exemption.

VII. Conclusion

Based upon its evaluation of the 10 exemption applications, FMCSA renews the exemptions of the aforementioned drivers from the hearing requirement in § 391.41(b)(11). In accordance with 49 U.S.C. 31136(e) and 31315(b), each exemption will be valid for two years unless revoked earlier by FMCSA.

Larry W. Minor,

Associate Administrator for Policy.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2020–0012]

Qualification of Drivers; Exemption Applications; Vision

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of final disposition.

SUMMARY: FMCSA announces its decision to exempt five individuals from the vision requirement in the Federal Motor Carrier Safety Regulations (FMCSRs) to operate a commercial motor vehicle (CMV) in interstate commerce. They are unable to meet the vision requirement in one eye for various reasons. The exemptions enable these individuals to operate CMVs in interstate commerce without meeting the vision requirement in one eye.

DATES: The exemptions were applicable on December 3, 2020. The exemptions expire on December 3, 2022.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, (202) 366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE, Room W64–224, Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m., ET, Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Dockets Operations, (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation

A. Viewing Documents and Comments

To view comments, as well as any documents mentioned in this notice as being available in the docket, go to *http://www.regulations.gov/docket?D=FMCSA-2020-0012* and choose the document to review. If you do not have access to the internet, you may view the docket online by visiting Dockets Operations in Room W12–140 on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

B. Privacy Act

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.transportation.gov/privacy.*

II. Background

On November 2, 2020, FMCSA published a notice announcing receipt of applications from five individuals requesting an exemption from the vision requirement in 49 CFR 391.41(b)(10) and requested comments from the public (85 FR 69382). The public comment period ended on December 2, 2020, and one comment was received.

FMCSA has evaluated the eligibility of these applicants and determined that granting the exemptions to these individuals would achieve a level of safety equivalent to, or greater than, the level that would be achieved by complying with § 391.41(b)(10).

The physical qualification standard for drivers regarding vision found in § 391.41(b)(10) states that a person is physically qualified to drive a CMV if that person has distant visual acuity of at least 20/40 (Snellen) in each eye without corrective lenses or visual acuity separately corrected to 20/40 (Snellen) or better with corrective lenses, distant binocular acuity of a least 20/40 (Snellen) in both eyes with or without corrective lenses, field of vision of at least 70° in the horizontal meridian in each eye, and the ability to recognize the colors of traffic signals and devices showing red, green, and amber.

III. Discussion of Comments

FMCSA received one comment in this proceeding. Tracy Ibinger submitted a comment stating that the Minnesota Department of Public Safety has no objections to the Agency's decision to grant an exemption to Wesley D. Enkers.

IV. Basis for Exemption Determination

Under 49 U.S.C. 31136(e) and 31315(b), FMCSA may grant an exemption from the FMCSRs for no longer than a 5-year period if it finds such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption. The statute also allows the Agency to renew exemptions at the end of the 5-year period. FMCSA grants medical exemptions from the FMCSRs for a 2-year period to align with the maximum duration of a driver's medical certification.

The Agency's decision regarding these exemption applications is based on medical reports about the applicants' vision, as well as their driving records and experience driving with the vision deficiency. The qualifications, experience, and medical condition of each applicant were stated and discussed in detail in the November 2, 2020, **Federal Register** notice (85 FR 69382) and will not be repeated here.

FMCSA recognizes that some drivers do not meet the vision requirement but have adapted their driving to accommodate their limitation and demonstrated their ability to drive safely. The five exemption applicants listed in this notice are in this category. They are unable to meet the vision requirement in one eye for various reasons, including amblyopia, chorioretinal scarring, optic neuropathy, and prosthesis. In most cases, their eye conditions did not develop recently. Three of the applicants were either born with their vision impairments or have had them since childhood. The two individuals that developed their vision conditions as adults have had them for a range of 8 to 11 years. Although each applicant has one eye that does not meet the vision requirement in § 391.41(b)(10), each has at least 20/40 corrected vision in the other eye, and, in a doctor's opinion, has sufficient vision to perform all the tasks necessary to operate a CMV.

Doctors' opinions are supported by the applicants' possession of a valid license to operate a CMV. By meeting State licensing requirements, the applicants demonstrated their ability to operate a CMV with their limited vision in intrastate commerce, even though their vision disqualified them from driving in interstate commerce. We believe that the applicants' intrastate driving experience and history provide an adequate basis for predicting their ability to drive safely in interstate commerce. Intrastate driving, like interstate operations, involves substantial driving on highways on the interstate system and on other roads built to interstate standards. Moreover, driving in congested urban areas exposes the driver to more pedestrian and vehicular traffic than exists on interstate highways. Faster reaction to traffic and traffic signals is generally required because distances between them are more compact. These conditions tax visual capacity and driver response just as intensely as interstate driving conditions.

The applicants in this notice have driven CMVs with their limited vision in careers ranging for 8 to 50 years. In the past 3 years, no drivers were involved in crashes, and no drivers were convicted of moving violations in CMVs. All the applicants achieved a record of safety while driving with their vision impairment that demonstrates the likelihood that they have adapted their driving skills to accommodate their condition. As the applicants' ample driving histories with their vision deficiencies are good predictors of future performance, FMCSA concludes their ability to drive safely can be projected into the future.

Consequently, FMCSA finds that in each case exempting these applicants from the vision requirement in § 391.41(b)(10) is likely to achieve a level of safety equal to that existing without the exemption.

V. Conditions and Requirements

The terms and conditions of the exemption are provided to the applicants in the exemption document and includes the following: (1) Each driver must be physically examined every year (a) by an ophthalmologist or optometrist who attests that the vision

in the better eye continues to meet the standard in § 391.41(b)(10) and (b) by a certified medical examiner (ME) who attests that the individual is otherwise physically qualified under § 391.41; (2) each driver must provide a copy of the ophthalmologist's or optometrist's report to the ME at the time of the annual medical examination; and (3) each driver must provide a copy of the annual medical certification to the employer for retention in the driver's qualification file, or keep a copy in his/her driver's qualification file if he/she is self-employed. The driver must also have a copy of the exemption when driving, for presentation to a duly authorized Federal, State, or local enforcement official.

VI. Preemption

During the period the exemption is in effect, no State shall enforce any law or regulation that conflicts with this exemption with respect to a person operating under the exemption.

VII. Conclusion

Based upon its evaluation of the five exemption applications, FMCSA exempts the following drivers from the vision requirement, § 391.41(b)(10), subject to the requirements cited above:

Wesley D. Enkers (MN)

Michael J. Jewell (CO)

Anthony G. Offutt (OR)

Joseph Sottile (IL)

Michael Westervelt (MT)

In accordance with 49 U.S.C. 31136(e) and 31315(b), each exemption will be valid for 2 years from the effective date unless revoked earlier by FMCSA. The exemption will be revoked if the following occurs: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained prior to being granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b).

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2020–0052]

Qualification of Drivers; Exemption Applications; Epilepsy and Seizure Disorders

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of applications for exemption; request for comments.

SUMMARY: FMCSA announces receipt of applications from three individuals for an exemption from the prohibition in the Federal Motor Carrier Safety Regulations (FMCSRs) against persons with a clinical diagnosis of epilepsy or any other condition that is likely to cause a loss of consciousness or any loss of ability to control a commercial motor vehicle (CMV) to drive in interstate commerce. If granted, the exemptions would enable these individuals who have had one or more seizures and are taking anti-seizure medication to operate CMVs in interstate commerce.

DATES: Comments must be received on or before January 11, 2021.

ADDRESSES: You may submit comments identified by the Federal Docket Management System (FDMS) Docket No. FMCSA–2020–0052 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov/docket?D=FMCSA-2020-0052.* Follow the online instructions for submitting comments.
- *Mail:* Dockets Operations; U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal Holidays.
- *Fax:* (202) 493–2251.

To avoid duplication, please use only one of these four methods. See the ''Public Participation'' portion of the **SUPPLEMENTARY INFORMATION** section for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, (202) 366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE, Room W64–224, Washington, DC 20590–0001. C. Privacy Act

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.transportation.gov/privacy.*

II. Background

Under 49 U.S.C. 31136(e) and 31315(b), FMCSA may grant an exemption from the FMCSRs for no longer than a 5-year period if it finds such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption. The statute also allows the Agency to renew exemptions at the end of the 5-year period. FMCSA grants medical exemptions from the FMCSRs for a 2-year period to align with the maximum duration of a driver's medical certification.

The three individuals listed in this notice have requested an exemption from the epilepsy and seizure disorders prohibition in 49 CFR 391.41(b)(8). Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting the exemption will achieve the required level of safety mandated by statute.

The physical qualification standard for drivers regarding epilepsy found in § 391.41(b)(8) states that a person is physically qualified to drive a CMV if that person has no established medical history or clinical diagnosis of epilepsy or any other condition which is likely to cause the loss of consciousness or any loss of ability to control a CMV.

In addition to the regulations, FMCSA has published advisory criteria [1] to assist medical examiners (MEs) in determining whether drivers with certain medical conditions are qualified to operate a CMV in interstate commerce.

The criteria states that if an individual has had a sudden episode of a non-epileptic seizure or loss of consciousness of unknown cause that did not require anti-seizure medication, the decision whether that person's condition is likely to cause the loss of consciousness or loss of ability to control a CMV should be made on an individual basis by the ME in consultation with the treating physician. Before certification is considered, it is suggested that a 6-month waiting period elapse from the time of the episode. Following the waiting period, it is suggested that the individual have a complete neurological examination. If the results of the examination are negative and anti-seizure medication is not required, then the driver may be qualified.

In those individual cases where a driver has had a seizure or an episode of loss of consciousness that resulted from a known medical condition (*e.g.,* drug reaction, high temperature, acute infectious disease, dehydration, or acute metabolic disturbance), certification should be deferred until the driver has recovered fully from that condition, has no existing residual complications, and is not taking anti-seizure medication.

Drivers who have a history of epilepsy/seizures, off anti-seizure medication and seizure-free for 10 years, may be qualified to operate a CMV in interstate commerce. Interstate drivers with a history of a single unprovoked seizure may be qualified to drive a CMV in interstate commerce if seizure-free and off anti-seizure medication for a 5-year period or more.

As a result of MEs misinterpreting advisory criteria as regulation, numerous drivers have been prohibited from operating a CMV in interstate commerce based on the fact that they have had one or more seizures and are taking anti-seizure medication, rather than an individual analysis of their circumstances by a qualified ME based on the physical qualification standards and medical best practices.

On January 15, 2013, FMCSA announced in a Notice of Final Disposition titled, ''Qualification of Drivers; Exemption Applications; Epilepsy and Seizure Disorders,'' (78 FR 3069), its decision to grant requests from 22 individuals for exemptions from the regulatory requirement that interstate CMV drivers have ''no established medical history or clinical diagnosis of epilepsy or any other condition which is likely to cause loss of consciousness or any loss of ability to control a CMV.'' Since that time, the Agency has published additional notices granting requests from individuals for exemptions from the regulatory requirement regarding epilepsy found in § 391.41(b)(8).

To be considered for an exemption from the epilepsy and seizure disorders prohibition in § 391.41(b)(8), applicants must meet the criteria in the 2007 recommendations of the Agency's Medical Expert Panel (78 FR 3069).

III. Qualifications of Applicants

Dylan C. Hill

Mr. Hill is a 25-year old Commercial Learner's Permit holder in Kansas. He has a history of epilepsy, and has been seizure free since 2008. He takes anti-seizure medication with the dosage and frequency remaining the same since 2013. His physician states that he is supportive of Mr. Hill receiving an exemption.

James R. Satterlee

Mr. Satterlee is a 58-year old Enhanced Chauffer License holder in Michigan. He has a history of seizures, and has been seizure free since 2001. He takes anti-seizure medication with the dosage and frequency remaining the same since 2001. His physician states that she is supportive of Mr. Satterlee receiving an exemption.

Robert G. Schauer, III

Mr. Schauer is a 36-year old Class C driver license holder in Iowa. He has a history of seizures, and has been seizure free since August 2012. He takes anti-seizure medication with the dosage and frequency remaining the same since 2017. His physician states that he is supportive of Mr. Schauer receiving an exemption.

IV. Request for Comments

In accordance with 49 U.S.C. 31136(e) and 31315(b), FMCSA requests public comment from all interested persons on the exemption petitions described in this notice. We will consider all comments received before the close of business on the closing date indicated under the **DATES** section of the notice.

Larry W. Minor,

Associate Administrator for Policy.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2020–0092]

Petition for Waiver of Compliance

Under part 211 of title 49 of the Code of Federal Regulations (CFR), this document provides the public notice that on November 12, 2020, the Southeastern Pennsylvania Transportation Authority (SEPTA) petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 238, Passenger Equipment Safety Standards. FRA

assigned the petition Docket Number FRA–2020–0092.

Specifically, SEPTA requests relief from 49 CFR 238.131, *Exterior side door safety systems—new passenger cars and locomotives used in passenger service,* and 49 CFR 238.133, *Exterior side door safety systems—all passenger cars and locomotives used in a passenger service,* as they pertain to the exterior side door safety system interface with the Siemens ACS–64 ''Sprinter'' electric locomotives. SEPTA notes the ACS–64 ''Sprinter'' locomotive uses similar operating controls and software to the SC–44 ''Charger'' diesel-electric locomotives, for which FRA granted relief in Docket Number FRA–2018–0029.

SEPTA proposes installing similar software in the ACS–64 locomotives, as that developed for the SC–44, to allow such locomotives to be operated in ''Yard Mode.'' When ''Yard Mode'' is activated, it allows low speed operation of the locomotive without activating the door by-pass device. The ''Yard Mode'' software monitors the door summary circuit trainline, along with other trainlines and locomotive operating parameters, determining whether the locomotive is operating in a lite consist (locomotives only) or a passenger car consist. This solution involves multi-step software verification along with multiple deliberate acts and confirmations by an operator to enable ''Yard Mode.'' When ''Yard Mode'' is active, the locomotive may not be operated above 10 miles per hour.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at *www.regulations.gov.*

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:

- *Website: http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* Docket Operations Facility, U.S. Department of Transportation (DOT), 1200 New Jersey Ave., SE, W12–140, Washington, DC 20590.
- *Hand Delivery:* 1200 New Jersey Ave. SE, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

Communications received by January 25, 2021 will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable.

Anyone can search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). Under 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its processes. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *https://www.transportation.gov/privacy.* See also *https://www.regulations.gov/privacyNotice* for the privacy notice of regulations.gov.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2020–0091]

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System

Under part 235 of title 49 Code of Federal Regulations (CFR) and 49 U.S.C. 20502(a), this document provides the public notice that on November 19, 2020, the National Railroad Passenger Corporation (Amtrak) petitioned the Federal Railroad Administration (FRA) seeking approval to discontinue or modify a signal system. FRA assigned the petition Docket Number FRA–2020–0091.

Applicant: National Railroad Passenger Corporation, Nicholas J. Croce III, PE, Deputy Chief Engineer, C&S, 2995 Market Street, Philadelphia, PA 19104

Specifically, Amtrak requests permission to convert approximately 6 miles of its cab signal and fixed automatic block signal system to a signal system having cab signals without fixed automatic block signals, operated under NORAC Rule 562, on Amtrak's Mid-Atlantic Division, Main Line Philadelphia to Washington, Northeast Corridor, between Landover interlocking located at milepost (MP) 128.8, Landover, Maryland, and CP Avenue located at MP 134.6, Washington, DC. Amtrak is the owner and operator of this line. Maryland Area Regional Commuter Train Service, Norfolk Southern Railway, and CSX Transportation operate on portions of this line as tenants with trackage rights. All tenants have concurred with the application.

The changes proposed are to remove the wayside signals on Tracks No. 2 and No. 3 at automatic block points 1298, 1307, 1323/1324, and 1338/1339. All locations will remain in service as a block point without wayside signals.

The reason for removal of the signals is to eliminate maintenance and operation of unnecessary hardware and to reduce delays to trains caused by failures of the signals.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at *www.regulations.gov.*

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:

- *Website: http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* Docket Operations Facility, U.S. Department of Transportation (DOT), 1200 New Jersey Ave. SE, W12–140, Washington, DC 20590.
- *Hand Delivery:* 1200 New Jersey Ave. SE, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

Communications received by January 25, 2021 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable. Anyone can search the electronic form of any written communications and comments received into any of our dockets by the

name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). Under 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its processes. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *https://www.transportation.gov/privacy.* See also *https://www.regulations.gov/privacyNotice* for the privacy notice of regulations.gov.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2020–0090]

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System

Under part 235 of title 49 Code of Federal Regulations (CFR) and 49 U.S.C. 20502(a), this document provides the public notice that on November 19, 2020, the National Railroad Passenger Corporation (Amtrak) petitioned the Federal Railroad Administration (FRA) seeking approval to discontinue or modify a signal system. FRA assigned the petition Docket Number FRA–2020–0090.

Applicant: National Railroad Passenger Corporation, Nicholas J. Croce III, PE, Deputy Chief Engineer, C&S, 2995 Market Street, Philadelphia, PA 19104.

Specifically, Amtrak requests permission to convert approximately 3 miles of its cab signal and fixed automatic block signal system to a signal system having cab signals without fixed automatic block signals, operated under NORAC Rule 562, on Amtrak's Mid-Atlantic Division, Main Line Philadelphia to Washington, Northeast Corridor, between Bush interlocking located at milepost (MP) 71.6, in Perryman, Maryland, and Wood interlocking located at MP 75.3, in Edgewood, Maryland. Amtrak is the owner and operator of this line. Maryland Area Regional Commuter Train Service and Norfolk Southern Railway operate on portions of this line as tenants with trackage rights. Both have concurred with the application.

The changes proposed are to remove the wayside signals on Tracks No. 2 and No. 3 at automatic block points 733 and 744. Both locations will remain in service as a block point without wayside signals.

The reason for removal of the signals is to eliminate maintenance and operation of unnecessary hardware and to reduce delays to trains caused by failures of the signals.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at *www.regulations.gov.*

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2020–0091; Notice 1]

Mercedes-Benz USA, LLC, Receipt of Petition for Decision of Inconsequential Noncompliance

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Receipt of petition.

SUMMARY: Mercedes-Benz AG (''MBAG'') and Mercedes-Benz USA, LLC, (''MBUSA'') (collectively, ''Mercedes-Benz'') have determined that certain model year (MY) 2019–2021 Mercedes-Benz motor vehicles do not fully comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 135, *Light Vehicle Brake Systems.* Mercedes-Benz filed a noncompliance report dated August 14, 2020. Mercedes-Benz subsequently petitioned NHTSA on September 4, 2020, for a decision that the subject noncompliance is inconsequential as it relates to motor vehicle safety. This notice announces receipt of Mercedes-Benz's petition.

DATES: Send comments on or before January 11, 2021.

ADDRESSES: Interested persons are invited to submit written data, views, and arguments on this petition. Comments must refer to the docket and notice number cited in the title of this notice and submitted by any of the following methods:

- *Mail:* Send comments by mail addressed to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver comments by hand to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590. The Docket Section is open on weekdays from 10 a.m. to 5 p.m. except for Federal holidays.
- *Electronically:* Submit comments electronically by logging onto the

Federal Docket Management System (FDMS) website at *https://www.regulations.gov/.* Follow the online instructions for submitting comments.

• Comments may also be faxed to (202) 493–2251.

Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are provided. If you wish to receive confirmation that comments you have submitted by mail were received, please enclose a stamped, self-addressed postcard with the comments. Note that all comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided.

All comments and supporting materials received before the close of business on the closing date indicated above will be filed in the docket and will be considered. All comments and supporting materials received after the closing date will also be filed and will be considered to the fullest extent possible.

When the petition is granted or denied, notice of the decision will also be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

All comments, background documentation, and supporting materials submitted to the docket may be viewed by anyone at the address and times given above. The documents may also be viewed on the internet at *https://www.regulations.gov* by following the online instructions for accessing the docket. The docket ID number for this petition is shown in the heading of this notice.

DOT's complete Privacy Act Statement is available for review in a **Federal Register** notice published on April 11, 2000 (65 FR 19477–78).

SUPPLEMENTARY INFORMATION: I. Overview: Mercedes-Benz has determined that certain MY 2019–2021 Mercedes-Benz A-Class, CLA-Class, GLA-Class, and GLB-Class motor vehicles do not fully comply with the requirements of paragraph S5.1.2 of FMVSS No. 135, *Light Vehicle Brake Systems* (49 CFR 571.135). Mercedes-Benz filed a noncompliance report dated August 14, 2020, pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports.* Mercedes-Benz subsequently petitioned NHTSA on September 4, 2020, for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential as it relates to motor vehicle safety, pursuant to 49 U.S.C. 30118(d) and 30120(h) and 49 CFR part 556, *Exemption for Inconsequential Defect or Noncompliance.*

This notice of receipt of Mercedes-Benz's petition is published under 49 U.S.C. 30118 and 30120 and does not represent any Agency decision or other exercise of judgment concerning the merits of the petition.

II. *Vehicles Involved:* Approximately 56,223 of the following MY 2019–2021 Mercedes-Benz A-Class, CLA-Class, GLA-Class, and GLB-Class motor vehicles, manufactured between October 8, 2018, and July 27, 2020, are potentially involved:

- 2020 Mercedes-Benz A35 AMG
- 2020 Mercedes-Benz CLA45 AMG
- 2021 Mercedes-Benz GLA250
- 2019–2020 Mercedes-Benz A220
- 2020–2021 Mercedes-Benz CLA250
- 2020 Mercedes-Benz CLA35 AMG
- 2021 Mercedes-Benz GLA45 AMG
- 2021 Mercedes-Benz GLA35 AMG
- 2020 Mercedes-Benz GLB250

III. *Noncompliance:* Mercedes-Benz explains that the noncompliance is that the subject vehicles are not equipped with an acoustic or optical device that warns the driver when the rear brake lining requires replacement, and therefore, does not meet the requirements specified in paragraph S5.1.2 of FMVSS No. 135. Specifically, the subject vehicles do not have an electrical sensor to measure the thickness of the rear brake pads.

IV. *Rule Requirements:* Paragraph S5.1.2 of FMVSS No. 135 includes the requirements relevant to this petition. The wear condition of all service brakes shall be indicated by either acoustic or optical devices warning the driver at his or her driving position when lining replacement is necessary or by way of visually checking the degree of brake lining wear, from the outside or underside of the vehicle, utilizing only the tools or equipment normally supplied with the vehicle. The removal of wheels is permitted for this purpose.

V. *Summary of Mercedes-Benz's Petition:* The following views and arguments presented in this section, ''V. Summary of Mercedes-Benz's Petition'', are the views and arguments provided by Mercedes-Benz. They have not been evaluated by the Agency and do not reflect the views of the Agency. Mercedes-Benz described the subject noncompliance and stated their belief that the noncompliance is inconsequential as it relates to motor vehicle safety.

In support of its petition, Mercedes-Benz submitted the following reasoning:

1. In the affected vehicles, the front service brakes use an electrical brake pad sensor to monitor the thickness of the front brake pads. Once the front brakes reach a thickness of ⅛ inch or 3 mm, a warning lamp will automatically display in the instrument cluster and will remain permanently illuminated until the vehicle is serviced. In addition, the message appears in the instrument cluster and communicates the brake pad wear status to the driver.

2. The brake warning indicator and in-vehicle message will display at each ignition cycle until the brake pads are replaced. The warning lamp cannot be extinguished unless new brake pads are installed. While the driver could manually extinguish the warning message, it will automatically reappear at each ignition cycle.

3. Depending on the vehicle platform, the brake force distribution is in a range of 71.9%–75.5% (front)/28.1%–24.5% (rear). This means that between nearly 72% to more than 75% of the vehicle's braking force is generated by the front brake pads. Because of the brake force distribution, the front brake pads will always initially wear out faster than the brake pads on the rear wheels. Indeed, the front brake pads will then continue to wear out at a faster pace than the rear brake pads, approximately 1 ½ to 2 times more frequently depending on the operator's driving style.

4. Once the front brake pads reach a thickness of approximately 3 mm, both the warning lamp and the warning message are automatically triggered, and the consumer is advised to visit the workshop to have the front brake pads replaced. Any time one set of brake pads is inspected at a Mercedes-Benz workshop, the standard work instructions direct the technician to also inspect and evaluate the status of all other sets of brake pads. (This inspection is carried out visually with the tire and wheel on the vehicle. In exceptional circumstances, the technician may need to remove the wheel to conduct the inspection and measurement. The technician does not use the gauge tool discussed in this petition in either scenario.) The workshop instructions provide that the technician is to assess the remaining braking distance for each axle based on the thickness of the brake pad that is most heavily worn. If the remaining thickness of the brake pads is not sufficient to make it to the next service interval, the customer will be advised to replace the brake pads. However, if the wear limit has already been reached, the technician will automatically replace the brake pads. Thus, at every Mercedes-Benz workshop visit, all four sets of brake pads will be inspected for wear. The customer will be advised of the remaining thickness and individual brake pads are replaced automatically if needed. Because the front brakes wear faster than the rear due to the brake force distribution, the vehicle's rear brakes will be inspected by a trained professional technician a number of times before they ever need to be replaced.

5. Even if the vehicle were taken to an independent repair facility that did not follow Mercedes-Benz's comprehensive brake

pad inspection protocols, there is not an increased safety risk due to the vehicle being operated with worn rear brake pads. In the worst case, if a vehicle with fully worn brake pads on the rear axle continued to operate, given the brake force distribution and the performance of the rear brakes, the vehicle would continue to meet the braking distance requirement of FMVSS No. 135. Furthermore, the brakes on the rear axle will continue to operate, even with completely worn rear brake pads, the driver will hear the unmistakable sound of metal being pressed against the brake discs. Moreover, the ABS and ESC functionality is not affected by worn rear brake pads and will continue to function normally, as needed.

6. Mercedes-Benz is not aware of any reports or complaints about the issue from the field and it has corrected the condition in production.

Mercedes-Benz concluded by expressing the belief that the subject noncompliance is inconsequential as it relates to motor vehicle safety, and that its petition to be exempted from providing notification of the noncompliance, as required by 49 U.S.C. 30118, and a remedy for the noncompliance, as required by 49 U.S.C. 30120, should be granted.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, any decision on this petition only applies to the subject vehicles that Mercedes-Benz no longer controlled at the time it determined that the noncompliance existed. However, any decision on this petition does not relieve vehicle distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant vehicles under their control after Mercedes-Benz notified them that the subject noncompliance existed.

(Authority: 49 U.S.C. 30118, 30120: delegations of authority at 49 CFR 1.95 and 501.8)

Otto G. Matheke III,

Director, Office of Vehicle Safety Compliance.

BILLING CODE 4910–59–P

DEPARTMENT OF THE TREASURY

Financial Crimes Enforcement Network

Agency Information Collection Activities; Proposed Renewal; Comment Request; Renewal Without Change of Administrative Rulings Regulations

AGENCY: Financial Crimes Enforcement Network, Treasury.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork and respondent burden, FinCEN invites comments on the proposed renewal, without change, of a currently approved information collection found in existing Bank Secrecy Act (BSA) regulations. Specifically, the regulations provide procedures for requestors to seek, and for FinCEN to issue, administrative rulings. This request for comments is made pursuant to the Paperwork Reduction Act of 1995.

DATES: Written comments are welcome and must be received on or before February 9, 2021.

ADDRESSES: Comments may be submitted by any of the following methods:

- *Federal E-rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Refer to Docket Number FINCEN–2020–0017 and the specific Office of Management and Budget (OMB) control number 1506–0050.
- *Mail:* Policy Division, Financial Crimes Enforcement Network, P.O. Box 39, Vienna, VA 22183. Refer to Docket Number FINCEN–2020–0017 and OMB control number 1506–0050.

Please submit comments by one method only. Comments will also be incorporated into FinCEN's review of existing regulations, as provided by Treasury's 2011 Plan for Retrospective Analysis of Existing Rules. All comments submitted in response to this notice will become a matter of public record. Therefore, you should submit only information that you wish to make publicly available.

FOR FURTHER INFORMATION CONTACT: The FinCEN Regulatory Support Section at 1–800–767–2825 or electronically at *frc@fincen.gov.*

SUPPLEMENTARY INFORMATION:

I. Statutory and Regulatory Provisions

The legislative framework generally referred to as the Bank Secrecy Act (BSA) consists of the Currency and Financial Transactions Reporting Act of 1970, as amended by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA PATRIOT Act) (Pub. L. 107–56) and other legislation. The BSA is codified at 12 U.S.C. 1829b, 12 U.S.C. 1951–1959, 31 U.S.C. 5311–5314 and 5316–5332, and notes thereto, with implementing regulations at 31 CFR Chapter X.

The BSA authorizes the Secretary of the Treasury, *inter alia,* to require financial institutions to keep records and file reports that are determined to have a high degree of usefulness in criminal, tax, and regulatory matters, or in the conduct of intelligence or counter-intelligence activities to protect against international terrorism, and to implement anti-money laundering (AML) programs and compliance procedures.[1] Regulations implementing the BSA appear at 31 CFR Chapter X. The authority of the Secretary to administer the BSA has been delegated to the Director of FinCEN.[2]

A FinCEN administrative ruling is a written ruling interpreting the relationship between the regulations implementing the BSA at 31 CFR Chapter X and each situation for which such a ruling has been requested in conformity with the regulatory requirements.[3] The regulations implementing the procedures for requestors to submit, and for FinCEN to issue, administrative rulings appear in Part 1010, Subpart G—Administrative Rulings. Specifically, the regulations address the following: (a) How to submit a request for an administrative ruling (31 CFR 1010.711); (b) treatment of non-conforming requests (31 CFR 1010.712); (c) treatment of oral communications (31 CFR 1010.713); (d) withdrawal of administrative ruling requests (31 CFR 1010.714); (e) issuance of administrative rulings (31 CFR 1010.715); (e) modification and rescission of administrative rulings (31 CFR 1010.716); and (f) disclosure of administrative ruling (31 CFR 1010.717). An administrative ruling has precedential value, and may be relied upon by others similarly situated, only if FinCEN makes them available to the public through publication on the FinCEN website or other appropriate forum.[4]

[1] Section 358 of the USA PATRIOT Act added language expanding the scope of the BSA to intelligence or counter-intelligence activities to protect against international terrorism.

[2] Treasury Order 180–01 (re-affirmed Jan. 14, 2020).

[3] *See* 31 CFR 1010.715.

[4] *Id.* FinCEN's administrative rulings are collected on the FinCEN website at the following address:

Continued

II. Paperwork Reduction Act of 1995 (PRA) [5]

Title: Administrative rulings regulations (Subpart G—31 CFR 1010.710 through 31 CFR 1010.717).

OMB Control Number: 1506–0050.

Report Number: Not applicable.

Abstract: FinCEN is issuing this notice to renew the OMB control number for the administrative rulings regulations.

Affected Public: Businesses or other for-profit institutions, non-profit institutions, and individuals.

Type of Review: Renewal without change of a currently approved information collection.

Frequency: As required.

Estimated Number of Requests Annually: 33 requests.[6]

Estimated Recordkeeping Burden: FinCEN receives approximately 33 administrative ruling requests per year. FinCEN continues to estimate that it takes a requestor approximately two hours to draft and submit an administrative rule request to FinCEN.[7] This results in an estimated total annual burden of 66 hours (33 administrative ruling requests multiplied by two hours per request).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Records required to be retained under the BSA must be retained for five years.

III. General Request for Comments

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (i) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (ii) the accuracy of the agency's estimate of the burden of the collection of information; (iii) ways to enhance the quality, utility, and clarity of the information to be collected; (iv) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (v) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Michael G. Mosier,

Deputy Director, Financial Crimes Enforcement Network.

[FR Doc. 2020–27370 Filed 12–10–20; 8:45 am]

BILLING CODE 4810–02–P

https://www.fincen.gov/resources/statutes-regulations/administrative-rulings.

[5] Public Law 104–13, 44 U.S.C. 3506(c)(2)(A).

[6] In 2018, 2019, and 2020, FinCEN received a total of 98 administrative ruling requests.

[7] When this OMB control number was last renewed in 2017, FinCEN estimated the total burden per requestor to draft and submit an administrative ruling request was two hours per requestor.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0715]

Agency Information Collection Activity: Servicer's Staff Appraisal Reviewer (SAR) Application

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration (VBA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before February 9, 2021.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *nancy.kessinger@va.gov* Please refer to ''OMB Control No. 2900–0715'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Danny S. Green, (202) 421–1354 or email *Danny.Green2@va.gov*. Please refer to ''OMB Control No. 2900–0715'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: Public Law 104–13; 44 U.S.C. 3501–3521.

Title: VA FORM 26–0829 Servicer's Staff Appraisal Reviewer (SAR) Application.

OMB Control Number: 2900–0715.

Type of Review: Extension of a currently approved collection.

Abstract: Title 38 U.S.C. 3702(d) authorizes the Department of Veterans Affairs (VA) to establish standards for Servicers making automatically guaranteed loans and 38 U.S.C. 3731(f) authorizes VA to establish, in regulation, standards and procedures to authorize a lender to determine the reasonable value of property. VA has implemented this authority through its Servicer Appraisal Processing Program (SAPP), codified in 38 CFR 36.4348.

Affected Public: Individuals (employees of servicers making applications).

Estimated Annual Burden: 2 hours.

Estimated Average Burden per Respondent: 5 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 20 per year.

By direction of the Secretary.

Danny S. Green,

VA PRA Clearance Officer, Office of Quality, Performance and Risk, Department of Veterans Affairs.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0658]

Agency Information Collection Activity: Lender's Staff Appraisal Reviewer (SAR) Application

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration (VBA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before February 9, 2021.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *nancy.kessinger@va.gov.* Please refer to ''OMB Control No. 2900–0658'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Danny S. Green, (202) 421–1354 or email *Danny.Green2@va.gov.* Please refer to ''OMB Control No. 2900–0658'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: Public Law 104–13; 44 U.S.C. 3501–3521.

Title: Lender's Staff Appraisal Reviewer (SAR) Application (VA Form 26–0785)

OMB Control Number: 2900–0658.

Type of Review: Extension of a currently approved collection.

Abstract: Title 38 U.S.C. 3702(d) authorizes the Department of Veterans Affairs (VA) to establish standards for lenders making automatically guaranteed loans and 38 U.S.C. 3731(f) authorizes VA to establish, in regulation, standards and procedures to authorize a lender to determine the reasonable value of property. VA has implemented this authority through its Lender Appraisal Processing Program (LAPP), codified in 38 CFR 36.4347.

Affected Public: Individuals (employees of lenders making applications).

Estimated Annual Burden: 200 hours.

Estimated Average Burden per Respondent: 5 minutes.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

Solicitation of Nominations for Appointment to the Advisory Committee on Structural Safety of Department of Veterans Affairs (VA) Facilities

ACTION: Notice.

SUMMARY: The Department of Veterans Affairs (VA), Office of Construction and Facilities Management, is seeking nominations of qualified candidates to be considered for appointment to the Advisory Committee on Structural Safety of Department Facilities (''the Committee'').

DATES: Nominations for membership on the Committee must be received no later than 5:00 p.m. EST on December 31, 2020.

ADDRESSES: All nominations should be submitted to Mr. Juan Archilla by email at *juan.archilla@va.gov.*

FOR FURTHER INFORMATION CONTACT: Mr. Juan Archilla, Office of Construction & Facilities Management (CFM), Department of Veterans Affairs, via email at *juan.archilla@va.gov,* or via telephone at (202) 632–5967. A copy of the Committee charter and list of the current membership can be obtained by contacting Mr. Archilla or by accessing the website: *http://www.va.gov/ADVISORY/Advisory_Committee_on_Structural_Safety_of_Department_of_Veterans_Affairs_facilities_Statutory.asp.*

SUPPLEMENTARY INFORMATION: In carrying out the duties set forth, the Committee responsibilities include:

(1) Providing advice to the Secretary of VA on all matters of structural safety in the construction and altering of medical facilities and recommending standards for use by VA in the construction and alteration of facilities.

(2) Reviewing of appropriate State and local laws, ordinances, building codes, climatic and seismic conditions, relevant existing information, and current research.

(3) Recommending changes to the current VA standards for structural safety, on a state or regional basis.

(4) Recommending the engagement of the services of other experts or consultants to assist in preparing reports on present knowledge in specific technical areas.

(5) Reviewing of questions regarding the application of codes and standards and making recommendations regarding new and existing facilities when requested to do so by VA.

Authority: The Committee was established in accordance with 38 U.S.C. 8105, to provide advice to the Secretary on all matters of structural safety in the construction and altering of medical facilities and recommends standards for use by VA in the construction and alteration of facilities. Nominations of qualified candidates are being sought to fill current and upcoming vacancies on the Committee.

Membership Criteria and Professional Qualifications: CFM is requesting nominations for current and upcoming vacancies on the Committee. The Committee is composed of five members, in addition to ex-officio members. The Committee is required to include at least one architect and one structural engineer who are experts in structural resistance to fire, earthquake, and other natural disasters and who are not employees of the Federal Government. To satisfy this requirement and ensure the Committee has the expertise to fulfill its statutory objectives, VA seeks nominees from the following professions at this time:

(1) *Architect:* Candidate must be a licensed Architect experienced in the design requirements of health care facilities. Expert knowledge in codes and standards for health care and life safety is required;

(2) *Practicing Structural Engineer:* Candidate must have experience in both

new building seismic analysis and design and strengthening of existing buildings in high seismic regions. Expert knowledge of building codes and standards, with a focus on seismic safety, is required. Experience designing for structural resistance to other natural disasters is desired. A licensed Structural Engineer or Professional Engineer with a focus on structural engineering is required;

(3) *Research Structural Engineer:* Candidate must have experience leading experimental and/or computational research in the field of structural engineering to advance building structural performance and/or design methods against natural disasters, such as earthquakes, fire, hurricanes, tornados, etc.;

Prior experience serving on nationally recognized professional and technical committees is also desired.

Requirements for Nomination Submission: Nominations should be type written (one nomination per nominator). Nomination package should include: (1) A letter of nomination that clearly states the name and affiliation of the nominee, the basis for the nomination (*i.e.* specific attributes which qualify the nominee for service in this capacity), and a statement from the nominee indicating a willingness to serve as a member of the Committee; (2) the nominee's contact information, including name, mailing address, telephone numbers, and email address; (3) the nominee's curriculum vitae, and (4) a summary of the nominee's experience and qualification relative to the *professional qualifications* criteria listed above.

Membership Terms: Individuals selected for appointment to the Committee shall be invited to serve a two-year term. At the Secretary's discretion, members may be reappointed to serve an additional term. All members will receive travel expenses and a per diem allowance in accordance with the Federal Travel Regulation for any travel made in connection with their duties as members of the Committee. The Department makes every effort to ensure that the membership of its Federal advisory committees is fairly balanced in terms of points of view represented and the committee's function. Every effort is made to ensure that a broad representation of geographic areas, gender, racial and ethnic minority groups, and the disabled are given consideration for membership. Appointment to this Committee shall be made without discrimination because of a person's race, color, religion, sex (including gender identity, transgender status, sexual orientation, and pregnancy), national origin, age, disability, or genetic information. Nominations must state that the nominee is willing to serve as a member of the Committee and appears to have no conflict of interest that would preclude membership. An ethics review is conducted for each selected nominee.

Dated: December 8, 2020.

Jelessa M. Burney,

Federal Advisory Committee Management Officer.

[Release No. 33–10891; File No. S7–18–20]

RIN 3235–AM38

Modernization of Rules and Forms for Compensatory Securities Offerings and Sales

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule.

SUMMARY: The Securities and Exchange Commission (''Commission'') is proposing for public comment amendments to Rule 701 under the Securities Act of 1933 (the ''Securities Act''), which provides an exemption from registration for securities issued by non-reporting issuers pursuant to compensatory arrangements, and Form S–8, the Securities Act registration statement for compensatory offerings by reporting issuers. The amendments are designed to modernize the exemption and registration statement in light of the significant evolution in compensatory offerings since the Commission last substantively amended these regulations, consistent with investor protection.

DATES: Comments should be received on or before February 9, 2021.

ADDRESSES: Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/proposed.shtml*).

Paper Comments

- Send paper comments to Vanessa A. Countryman, Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number S7–18–20. To help us process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's website (*http://www.sec.gov/rules/proposed.shtml*). Comments are also available for website viewing and copying in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly.

We or the staff may add studies, memoranda, or other substantive items to the comment file during this rulemaking. A notification of the inclusion in the comment file of any such materials will be made available on our website. To ensure direct electronic receipt of such notifications, sign up through the ''Stay Connected'' option at *www.sec.gov* to receive notifications by email.

FOR FURTHER INFORMATION CONTACT: Anne M. Krauskopf, Senior Special Counsel, or Lisa Krestynick, Special Counsel, Office of Chief Counsel, Division of Corporation Finance, at (202) 551–3500.

SUPPLEMENTARY INFORMATION: We are proposing to amend 17 CFR 230.405 (''Rule 405''), 17 CFR 230.413 (''Rule 413''), 17 CFR 230.416 (''Rule 416''), 17 CFR 230.456 (''Rule 456''), 17 CFR 230.457 (''Rule 457''), 17 CFR 230.701 (''Rule 701''), and 17 CFR 239.16b (''Form S–8'') under the Securities Act of 1933 [1] (the ''Securities Act''), and 17 CFR 229.601 (''Item 601'') of Regulation S–K.

Table of Contents

I. Overview

We are proposing amendments to Rule 701 and Form S–8 to modernize the two principal means by which issuers grant securities to employees in compensatory transactions.[2] Every offer

[1] 15 U.S.C. 77a *et seq.*

[2] Rule 701 is available for compensatory transactions with employees, directors, general partners, trustees (where the issuer is a business trust), officers, or consultants and advisors, and their family members who acquire such securities from such persons through gifts or domestic relations orders. Offers and sales to former employees, directors, general partners, trustees, officers, consultants and advisors are exempted from registration by the rule subject to specified conditions. Form S–8 is available for compensatory transactions with ''employees,'' with the form defining ''employee'' as any employee, director, general partner, trustee (where the registrant is a business trust), or officer. ''Employee'' also includes consultants and advisors, former employees,

and sale of securities must be registered, or rely on an exemption from the registration requirements of Section 5 of the Securities Act.[3] The Commission has long recognized that offers and sales of securities as compensation present different issues than offers and sales of securities by issuers that seek to raise capital.[4] Among other considerations, the Commission has recognized that the relationship between the issuer and recipient of securities is often different in a compensatory, rather than capital raising, transaction. The Commission has thus provided a limited exemption from registration—Rule 701—for certain compensatory securities transactions by non-reporting issuers [5] and a specialized form—Form S–8—for registering certain compensatory securities transactions by reporting issuers. The proposed amendments reflect changes in compensatory practices, including the types of securities offered, and are intended to modernize and simplify administrative requirements.

In July 2018, in connection with amending Rule 701,[6] as mandated by the Economic Growth, Regulatory Relief, and Consumer Protection Act,[7] the Commission sought comment on ways to modernize the Rule 701 exemption from registration, the Form S–8 registration statement, and the relationship between these two regulations, consistent with investor protection.[8] In doing so, the Commission noted that significant evolution has taken place in both the types of compensatory offerings issuers make and the composition of the workforce since it last substantively amended these regulations and sought to determine whether and, if so, how the rules should be amended to address these developments. The Concept Release stated that the Commission's evaluation of any potential changes would focus on retaining the compensatory purpose of Rule 701 and Form S–8 and preventing them from being used for capital-raising purposes, consistent with the Commission's investor protection mandate. The Concept Release also solicited comment on how any possible rule or form amendments may affect an issuer's decision to become a reporting issuer. The Commission received many comment letters in response to the Concept Release.[9]

Among the Rule 701 topics covered by the Concept Release were the Rule 701(d) exemptive conditions, including the 12-month sales caps, and the Rule 701(e) disclosure requirements, including the timing and manner of disclosure, and how those disclosure requirements apply to derivative securities. Form S–8 topics covered by the Concept Release included ways to reduce administrative burdens, such as by permitting multiple plans to be registered on a single Form S–8, permitting fee payment on a ''pay-as-you-go'' basis, and registering tax-qualified plans based on a dollar amount rather than the number of shares issued. The comments received on those topics and the Commission's related proposed rule amendments are discussed in this release.

Based, in part, on the consideration of feedback from commenters, with respect to Rule 701 we propose to:[10]

- Revise the additional disclosure requirements for Rule 701 exempt transactions exceeding $10 million, including how the disclosure threshold applies, the type of financial disclosure required, and the frequency with which it must be updated;
- Revise the time at which such disclosure is required to be delivered for derivative securities that do not involve a decision by the recipient to exercise or convert in specified circumstances where such derivative securities are granted to new hires;
- Raise two of the three alternative regulatory ceilings that cap the overall amount of securities that a non-reporting issuer may sell pursuant to the exemption during any consecutive 12-month period; and
- Make the exemption available for offers and sales of securities under a written compensatory benefit plan (or written compensation contract) established by the issuer's subsidiaries, whether or not majority-owned.

With respect to Form S–8, we propose to:

- Implement improvements and clarifications to simplify registration on the form, including:
  - Clarifying the ability to add multiple plans to a single Form S–8;
  - Clarifying the ability to allocate securities among multiple incentive plans on a single Form S–8;
  - Permitting the addition of securities or classes of securities by automatically effective post-effective amendment;
- Implement improvements to simplify share counting and fee payments on the form, including:
  - Requiring the registration of an aggregate offering amount of securities for defined contribution plans;
  - Implementing a new fee payment method for registration of offers and

executors, administrators or beneficiaries of the estates of deceased employees, guardians or members of a committee for incompetent former employees, or similar persons duly authorized by law to administer the estate or assets of former employees, subject to specified conditions. For purposes of both Rule 701 and Form S–8, ''employee'' includes insurance agents who are exclusive agents of the issuer, its subsidiaries or parents, or derive more than 50% of their annual income from those entities. *See* Rule 701(c) and General Instructions A.1(a)(1)-(3) to Form S–8.

[3] 15 U.S.C. 77e.

[4] *See, e.g., Notice of Proposed Form S–8,* Release No. 33–3469–X (Apr. 12, 1953) [18 FR 2182 (Apr. 17, 1953)] and *Adoption of Form S–8,* Release No. 33–3480 (Jun. 16, 1953) [18 FR 3688 (Jun. 27, 1953)], each observing that the investment decision to be made by the employee is of a different character than when securities are offered for the purpose of raising capital.

[5] Only issuers that are not subject to the reporting requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m and 78o(d)) and are not investment companies registered or required to be registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*) are eligible to use Rule 701. *See* Rule 701(b). As such, the use of the term ''non-reporting issuer'' in this release means issuers that are not subject to the reporting requirements of Section 13 or 15(d) of the Exchange Act, and includes issuers subject to Rule 257 of Regulation A [17 CFR 230.257].

Unless otherwise noted, comments cited are to the Concept Release and may be found at the following link: *https://www.sec.gov/comments/s7-18-18/s71818.htm.*

[9] *See, e.g.,* letters from Airbnb, Inc. (''Airbnb''); American Bar Association, Business Law Section, Federal Regulation of Securities Committee (''ABA''); American Benefits Council (''Council''); Sen. Sherrod Brown, United States Senator (''Senator Brown''); Center for Capital Markets Competitiveness, U.S. Chamber of Commerce (''Chamber''); Davis Polk & Wardwell (''Davis Polk''); Ernest & Young LLP (''EY''); Indigo Ag, Inc. (''Indigo''); Rep. Patrick McHenry, United States Representative (''Representative McHenry''); National Association of Stock Plan Professionals (''NASPP''); National Employment Law Project (''NELP''); Marie P. Petion (''Petion''); Postmates (''Postmates''); Nick Reyes (''Reyes''); Brian Sament (''Sament''); Shearman & Sterling LLP (''Shearman''); John P. Stoelting (''Stoelting''); Sullivan & Cromwell LLP (''Sullivan''); Uber Technologies, Inc. (''Uber''); Rep. Maxine Waters, United States Representative (''Representative Waters''); Zachor Legal Institute (''Zachor''); and Zionist Advocacy Center (''Zionist'').

[10] The current version of Rule 701 was adopted pursuant to the Commission's general exemptive authority under Section 28 of the Securities Act. *See Rule 701—Exempt Offerings Pursuant to Compensatory Arrangements,* Release No. 33–7645 (Feb. 25, 1999) [64 FR 11095 (Mar. 8, 1999)] (''1999 Adopting Release''). We believe the proposed amendments to Rule 701 would modernize the exemption in light of the significant evolution in compensatory offerings since the Commission last substantively amended the rule, while maintaining important investor protections. For this reason and the reasons discussed below, we believe the proposed amendments to Rule 701, if adopted, would be necessary and appropriate in the public interest and consistent with investor protections.

sales pursuant to defined contribution plans;

○ Conforming Form S–8 instructions with current IRS plan review practices; and

• Revise Item 1(f) of Form S–8 to eliminate the requirement to describe the tax effects of plan participation on the issuer.

With respect to both the Rule 701 exemption and the Form S–8 registration statement, we propose to:

• Extend consultant and advisor eligibility to entities meeting specified ownership criteria designed to link the securities to the performance of services; and

• Expand eligibility for former employees to specified post-termination grants and former employees of acquired entities.

To comply with current **Federal Register** formatting requirements, we also propose a ministerial amendment to Rule 701 to remove the Preliminary Notes and move their provisions without change to Rule 701(a). This change does not affect the purpose or effect of these provisions.

The Concept Release also discussed the scope of eligible plan participants, including whether persons providing services in the so-called ''gig economy'' should be eligible to receive securities pursuant to Rule 701 and Form S–8. We are addressing these issues and the comments received on these topics in a separate companion release.[11]

We discuss the proposed amendments below. We welcome feedback and encourage interested parties to submit comments on any or all aspects of the proposed amendments. When commenting, it would be most helpful if you include the reasoning behind your position or recommendation.

II. Rule 701

A. Disclosure Requirements

We are proposing to amend Rule 701(e) to revise the disclosure requirements for transactions exceeding $10 million, including the age of financial statements, and to allow issuers to provide alternative valuation information in lieu of financial statements. In addition, we are proposing to allow certain foreign private issuers [12] to provide financial statements using home country accounting standards if financial statements prepared in accordance with generally accepted accounting principles in the United States (''U.S. GAAP'') or International Financial Reporting Standards as issued by the International Accounting Standards Board (''IFRS'') are not otherwise available. Finally, we propose to modify the timing requirement for providing disclosure for certain derivative securities granted to new hires in specified circumstances.

Rule 701(e) currently provides that an issuer must deliver to investors a copy of the compensatory benefit plan or contract, as applicable. In addition, if the aggregate sales price or amount of securities sold during any consecutive 12-month period exceeds $10 million, the issuer must deliver the following additional disclosure to investors a reasonable period of time before the date of sale:[13]

• A copy of the summary plan description required by ERISA [14] or a summary of the plan's material terms if it is not subject to ERISA;

• Information about the risks associated with investment in the securities sold pursuant to the compensatory plan or compensation contract; and

• Financial statements required to be furnished by Part F/S of Form 1–A [15] under 17 CFR 230.251 through 230.263 (''Regulation A''). These financial statements must be as of a date no more than 180 days before the sale of securities relying on Rule 701.[16]

• Foreign private issuers must provide a reconciliation to U.S. GAAP if their financial statements are not prepared in accordance with U.S. GAAP or IFRS.

This disclosure must be provided to investors a reasonable period of time before the date of sale. For options and other derivative securities, this requires the issuer to deliver disclosure a reasonable period of time before the date of exercise or conversion.[17] In adopting Rule 701(e), the Commission made clear that if the required disclosure has not been provided to all investors on a timely basis, the issuer will lose the exemption for the entire offering.[18]

1. The Disclosure Requirement for the Period Preceding the Threshold Amount Being Exceeded

We are proposing to revise Rule 701(e) to provide that, if the aggregate sales price or amount of securities sold during any consecutive 12-month period exceeds $10 million, the issuer must deliver to investors the additional disclosure required by the rule only with respect to those sales that exceed the rule's $10 million threshold. One commenter who addressed the current rule characterized the requirement that the disclosure be provided for all sales, including those occurring before the threshold is exceeded, as ''largely unworkable'' and ''a trap for the unwary.'' [19] The same commenter recommended that there be a thirty-day ''grace period'' following the date when the threshold is exceeded, so that the issuer would be required to provide disclosure only for future offers or sales after the ''grace period.'' Another commenter suggested that crossing the threshold should impact the exemption's availability only for: (1) The securities issued that caused the threshold to be breached and for which disclosure was not provided; and (2) any subsequent offerings in the same 12-month period for which sufficient disclosure was not provided.[20] This commenter further expressed the view that treating sales over $10 million separately from earlier sales would be consistent with the current operation of Rule 504 of Regulation D.[21]

---

[11] *Temporary Rules to Include Certain ''Platform Workers'' in Compensatory Offerings Under Rule 701 and Form S–8,* Release No. 33–10892 (Nov. 24, 2020).

[12] A ''foreign private issuer'' is defined in Rule 405 and 17 CFR 240.3b–4(c) [Exchange Act Rule 3b–4(c)] as a foreign issuer other than a foreign government, except an issuer meeting the following conditions as of the last business day of its most recently completed second fiscal quarter: (i) More than 50 percent of the outstanding voting securities of which are directly or indirectly owned of record by residents of the United States; and (ii) any of the following: (A) the majority of the executive officers or directors are United States citizens or residents; (B) more than 50 percent of the assets of the issuer are located in the United States; or (C) the business of the issuer is administered principally in the United States.

[13] Rule 701(e).

[14] The Employee Retirement Income Security Act of 1974 (29 U.S.C. 1001 *et seq.*).

[15] Form 1–A [17 CFR 239.90].

[16] Rule 701(e)(4).

[17] Rule 701(e)(6). As described in Section II.A.5, *infra,* for options and other derivative securities, the issuer's obligation to deliver Rule 701(e) disclosure is determined based on whether the option or other derivative security was granted during a 12-month period in which the disclosure threshold is exceeded. If the grant occurred during such a period, the issuer must deliver the Rule 701(e) disclosure a reasonable period of time before the date of exercise or conversion.

[18] In the 1999 Adopting Release at Section II.B, the Commission, referencing the $5 million threshold that applied at the time, stated: ''Where the formula permits sales in excess of $5 million during a 12-month period, and the issuer chooses to take advantage of this increased amount, the new disclosure should be provided to all investors before sale. This requirement will obligate issuers to provide disclosure to all investors if the issuer believes that sales will exceed the $5 million threshold in the coming 12-month period. If disclosure has not been provided to all investors before sale, the issuer will lose the exemption for the entire offering when sales exceed the $5 million threshold.''

[19] *See* letter from ABA.

[20] *See* letter from Sullivan.

[21] *See* Instruction to paragraph (b)(2) of Rule 504 (''If a transaction under § 230.504 fails to meet the

Currently, for issuers to be able to rely on Rule 701, they must anticipate whether their compensatory sales could exceed $10 million at the outset of a 12-month period. If an issuer does not anticipate exceeding the $10 million threshold and, as a result, does not provide disclosures to all investors, then that issuer cannot exceed the $10 million threshold without losing the exemption for all of the sales in that 12-month period. We understand that the ''lookback'' aspect of the requirement may make it unduly difficult for issuers to plan their compensatory programs or respond efficiently to unforeseen situations, such as where an issuer wants to offer equity compensation in connection with an unanticipated opportunity to hire new employees.

We are proposing to amend the rule to provide that the disclosure required by Rule 701(e) be delivered to investors only with respect to sales after the $10 million threshold is exceeded and not to require after-the-fact disclosure for sales made in reliance on the rule during the 12-month period before the threshold was exceeded.[22] The exemption would remain available for all sales that exceed the $10 million threshold during the 12-month period if the issuer provides the required disclosure for those sales. We are not proposing to include a ''grace period'' between the point at which the $10 million threshold is exceeded and the requirement to deliver the Rule 701(e) disclosure, given that other amendments to Rule 701(e) proposed in this release should make it easier for issuers to comply with the disclosure delivery requirement.[23]

Request for Comment:

1. Should the rule be amended, as proposed, to require additional disclosure only for those sales during the 12-month period that exceed the $10 million threshold? Are there circumstances in which issuers may have trouble providing the information upon exceeding the threshold? If so, how could those difficulties be addressed?

2. Should there be a ''grace period'' between crossing the $10 million threshold and the requirement to provide additional disclosure with respect to the sales exceeding the $10 million threshold? If so, how long a period is appropriate? Would the other amendments proposed in this release that make it easier for issuers to comply with Rule 701's disclosure delivery requirement mitigate the need for a grace period?

3. Alternatively, upon crossing the $10 million threshold, should the issuer be required to provide the additional Rule 701(e) disclosure on a retrospective basis to all investors who had previously been granted or purchased securities during the 12-month period? Would such after-the fact disclosure mitigate informational asymmetry between investors who purchase before and investors who purchase after crossing the $10 million threshold? If we impose such a requirement, should the issuer lose the exemption for those earlier transactions if it fails to retrospectively provide the disclosure? Should there be a ''grace period'' between crossing the $10 million threshold and the requirement to retrospectively provide the disclosure? If so, how long a period is appropriate?

2. Age of Financial Statements

We propose to conform the age of financial statement requirement set forth in Rule 701(e) to the corresponding requirement in Part F/S of Form 1–A. Rule 701(e) requires delivery of financial statements required to be furnished by Part F/S of Form 1–A, which prescribes the financial statements required for Regulation A Tier 1 and Tier 2 offerings. In Regulation A offerings, issuers generally must include two years of consolidated balance sheets, statements of comprehensive income, cash flows, and changes in stockholders' equity.[24] Issuers relying on Rule 701 may choose to provide financial statements that comply with the requirements of either tier.[25]

Currently, the age of the financial statements must be as of a date no more than 180 days before the date of sale of securities relying on the Rule 701 exemption.[26] This requirement, in effect, necessitates financial statements to be prepared on a quarterly basis, and to be completed within three months after the end of each quarter, in order to keep current information available for delivery a reasonable time before the date of sale so that sales may occur on an uninterrupted basis. One commenter[27] recommended requiring the financial statement disclosure to be updated and provided only once per fiscal year, unless a material event results in a material change to the issuer's enterprise value or the value of the securities.[28]

Moreover, under existing Rule 701, foreign private issuers are required to provide financial information on the same schedule as domestic issuers.[29] Foreign private issuers, like domestic issuers, may issue securities in reliance on Rule 701 throughout the year, which could require them to update their financial statements more frequently than required for registered offerings under Form 20–F.[30] Commenters expressed the view that non-reporting foreign private issuers should not be obligated to prepare quarterly financial statements solely to rely on Rule 701, but instead should be able to satisfy the requirements of Rule 701 by providing investors financial statements conforming to the requirements for annual financial statements in reports on Form 20–F and interim financial statements within the timeframe required by home country rules.[31]

We propose to amend Rule 701(e) to apply the age of financial statement requirements of Form 1–A, Part F/S, paragraphs (b)(3) and (4) at the time of sale.[32] This proposal, which would apply to both domestic and foreign issuers, would conform the Rule 701(e) financial statement age requirements with those of Regulation A.[33] Under the proposal, financial statements must be available on at least a semi-annual basis

limitation on the aggregate offering price, it does not affect the availability of this § 230.504 for the other transactions considered in applying such limitation. For example, if an issuer sold $10,000,000 of its securities on June 1, 2021 under this § 230.504 and an additional $500,000 of its securities on December 1, 2021, this § 230.504 would not be available for the later sale, but would still be applicable to the June 1, 2021 sale.'').

[22] Proposed Rule 701(e).

[23] *See* Sections II.A.2–6, *infra.*

[24] Tier 2 offerings require audited financial statements. *See* Part F/S of Form 1–A [17 CFR 239.90].

[25] Specifically, an issuer may elect to provide financial statements that follow the requirements of either Tier 1 or Tier 2 Regulation A offerings without regard to whether the amount of sales that occurred pursuant to Rule 701 during the time period contemplated in Rule 701(e) would have required the issuer to follow the Tier 2 financial statement requirements in a Regulation A offering of the same amount. Rule 701 does not, and the proposals would not, require an issuer utilizing Rule 701 that would be subject to Tier 2 financial statement requirements to file with the Commission the current and periodic reports required by Rule 257(b) [17 CFR 230.257(b)].

[26] *See* Rule 701(e)(4).

[27] *See* letter from ABA.

[28] This is generally the same timing that applies to updating valuation disclosures under the IRS Section 409A regulations. *See* Treas. Reg. § l.409A–l(b)(5)(iv)(B) (2017).

[29] *See* Rule 701(e). *See also* 1999 Adopting Release at Section II.C.

[30] 17 CFR 249.220f. *See* Item 8.A.5 of Form 20–F.

[31] *See* letters from ABA, Davis Polk, and Shearman. In particular, one commenter noted that foreign private issuers subject to Exchange Act reporting requirements can use Form S–8 for compensatory offerings without providing financial statements more frequently than required by their home jurisdiction, which puts U.S. employees of non-registered foreign private issuers at a disadvantage compared to U.S. employees of registered foreign private issuers. *See* letter from Davis Polk.

[32] Proposed Rule 701(e)(4)(i).

[33] *See* Part F/S of Form 1–A.

and completed within three months after the end of the second and fourth quarters. Issuers would no longer be required to prepare financial statements quarterly in order for sales to be made continuously pursuant to Rule 701. We believe the financial statement updating requirements for Rule 701 compensatory offerings need not be more stringent than those applicable to capital raising transactions under Regulation A, which may be used by the same issuers. The proposal also would be consistent with foreign private issuers' financial statement updating requirements for registered offerings on Form 20–F, thereby eliminating any disadvantage for non-reporting foreign private issuers.

Rule 12h–1(f)[34] under the Securities Exchange Act of 1934[35] (''Exchange Act''), which exempts from Exchange Act Section 12(g)'s registration requirements stock options issued under written compensatory stock option plans by non-reporting issuers, includes, as a condition to the exemption, the delivery of Rule 701(e) information every six months with the financial statements that are not more than 180 days old. For ease of plan administration, we considered proposing to amend the age of financial statements requirements of this rule to remain consistent with those of Rule 701(e). However, it is unclear to what extent non-reporting companies continue to rely on Rule 12h–1(f) after the adoption of Exchange Act Rule 12g5–1(a)(8),[36] which excludes from the definition of ''held of record'' for purposes of Section 12(g) certain securities held by persons who received them pursuant to employee compensation plans. Accordingly, we request comment below on whether we should rescind or adopt a conforming amendment to Rule 12h–1(f).

Request for Comment:

4. Would the proposed amendment to the age of financial statement requirements ease the burden of compliance with Rule 701(e) in a manner consistent with investor protection, both for domestic issuers and foreign private issuers? Would a different age of financial statement requirement better promote this objective? For example, should issuers be required to update financial statements only once per fiscal year, unless there is a material change to the issuer's enterprise value or the value of the securities? Should issuers be permitted to rely on either Tier 1 or Tier 2 financial statement requirements regardless of the size of the offering, as proposed?

5. Subsequent to the adoption of Exchange Act Rule 12g5–1(a)(8), to what extent do non-reporting issuers rely on the Rule 12h–1(f) exemption? If we amend Rule 701(e), should we also make conforming amendments to the age of financial statement requirement under Rule 12h–1(f), assuming non-reporting issuers continue to rely on the rule? If non-reporting issuers no longer rely on the exemption it provides, should we rescind Rule 12h–1(f)?

3. Financial Statement Content Requirements for Foreign Private Issuers

We propose to allow foreign private issuers that are eligible for the exemption from Exchange Act registration provided by Exchange Act Rule 12g3–2(b)[37] to provide financial statements prepared in accordance with home country accounting standards for purposes of Rule 701(e) disclosure without reconciliation to U.S. GAAP in certain circumstances. Currently, all foreign private issuers relying on the Rule 701 exemption must provide a reconciliation to U.S. GAAP if their financial statements are not prepared in accordance with U.S. GAAP or IFRS to satisfy their financial statement disclosure requirements under Rule 701(e).[38]

The Concept Release requested comment on whether we should amend any aspect of the Rule 701 financial statement requirements that apply to foreign private issuers other than the timing requirements.[39] A few commenters addressed this topic. One commenter[40] stated that the financial statement reconciliation and the need to keep it current for an ongoing plan is unduly costly and burdensome. Another commenter[41] stated that Rule 701 should allow foreign private issuers to provide financial statements audited under the International Standards on Auditing (''ISAs'').

After consideration of the comments received, we propose to permit foreign private issuers that are eligible for the exemption from registration under Section 12(g)[42] of the Exchange Act provided by Exchange Act Rule 12g3–2(b) to provide financial statements prepared in accordance with home country accounting standards to satisfy the financial statement disclosure requirements of Rule 701(e) if financial statements prepared in accordance with U.S. GAAP or IFRS are not otherwise available.[43] Consistent with the current requirements, all other foreign private issuers would continue to be required to provide a reconciliation to U.S. GAAP if their financial statements are not prepared in accordance with U.S. GAAP or IFRS.

We believe it is appropriate to extend this relief to foreign private issuers that are eligible for the exemption from registration under Section 12(g) because, in other contexts, those issuers are currently not required to provide a reconciliation to U.S. GAAP if financial statements prepared in accordance with U.S. GAAP or IFRS are not otherwise available. Specifically, to be eligible for the exemption from registration under Rule 12g3–2(b), a foreign private issuer that is not otherwise subject to Exchange Act reporting must maintain a securities listing on one or more exchanges in a foreign jurisdiction that constitutes the primary trading market for its securities and must publish in English, on its website or through an electronic information delivery system generally available to the public in its primary trading market, information that satisfies specified public dissemination and shareholder distribution requirements.[44] The Rule 12g3–2(b) exemption allows a foreign private issuer to exceed the registration thresholds of Section 12(g) and effectively have its equity securities traded on a limited basis in the over-the-counter market in the United States. The Commission determined that such Section 12(g) exemptive relief was appropriate for a foreign private issuer that has not sought a public market in the United States and that makes available its non-U.S. disclosure documents.[45] As a foreign private issuer eligible for the exemption under Rule 12g3–2(b) would not be seeking to create a public market for its securities in the United States through its reliance on Rule 701, we believe that the same level of disclosure would be appropriate.

The proposal would not modify the disclosure requirements of Rule 701(e) to permit foreign private issuers to provide financial statements audited under ISAs, as suggested by one

commenter, because such an approach would require us to conduct a thorough evaluation of issuer financial statements audited in accordance with ISAs, which is beyond the scope of this rulemaking. Instead, the rule would continue to recognize only audits prepared in accordance with U.S. generally accepted auditing standards or Public Company Accounting Oversight Board auditing standards.

Request for Comment:

6. Should we permit foreign private issuers that are eligible for the exemption from Exchange Act registration provided by Exchange Act Rule 12g3–2(b) to provide financial statements prepared in accordance with home country accounting standards without reconciliation to U.S. GAAP, as proposed? Would such an accommodation provide financial information that is consistent with investor protection?

7. Should the proposal be expanded to apply to any foreign private issuer with securities that are listed and traded in its home country, without regard to Exchange Act Rule 12g3–2(b) eligibility? Alternatively, if we do not expand the proposal to all foreign private issuers with securities listed and traded in its home country, should we amend Rule 701(e)(4) to allow issuers to present their financial statements in accordance with other international financial reporting standards, such as International Financial Reporting Standards as adopted by the European Union, without requiring such issuers to provide a reconciliation to U.S. GAAP?

4. Alternative Valuation Disclosure

We propose to allow issuers to provide alternative valuation information, specifically an independent valuation report of the securities' fair market value as determined by an independent appraisal consistent with the rules and regulations under Internal Revenue Code Section 409A [46] (a ''Section 409A independent valuation report''), in lieu of financial statements, for purposes of Rule 701(e) disclosure. The Concept Release solicited comment on whether we should allow valuation information regarding the securities in lieu of, or in addition to, financial statements. In particular, the Concept Release asked what valuation method should be used for this purpose, and whether ASC Topic 718 [47] grant date fair value information or IRC Section 409A valuation information would be informative.

A few commenters recommended allowing issuers to provide valuation information prepared for purposes of IRC Section 409A in lieu of U.S. GAAP financials.[48] These commenters stated that this information would be a practical alternative to financial statement disclosure, as it is subject to an existing regulatory scheme and has independent economic significance. One of the commenters stated that it is less costly to comply with IRC Section 409A than to produce than U.S. GAAP financials.[49] Another commenter stated that valuation information would be more useful for an employee in evaluating an equity award than early stage financial information and that many issuers already prepare IRC Section 409A valuations to determine option exercise prices and tax withholding.[50] This commenter also stated that non-reporting issuers would be more willing to disclose valuation information than U.S. GAAP financial statements and observed that some issuers choose not to rely on Rule 701 to avoid facing competitive risks from unauthorized release of sensitive financial information.

We propose amending Rule 701(e)(4) to permit, as an alternative to financial statement disclosure, the use of a Section 409A independent valuation report prepared in accordance with the rules and regulations applicable to determining the fair market value of service recipient stock for stock not readily tradable on an established securities market.[51] The proposed alternative would apply to all issuers other than foreign private issuers eligible for the Rule 12g3–2(b) exemption. We believe that permitting this alternative is appropriate because the disclosure would be particularly helpful to employee investors in non-reporting issuers, which typically do not have a significant trading market from which to readily derive valuation information. To provide employee investors with meaningful information that they can use to assess the manner in which fair market value was derived, the amendments would require the issuer to provide employees the entire Section 409A independent valuation report provided to the issuer.[52] As noted above,[53] the applicable rules and regulations under IRC Section 409A specify numerous factors to be taken into account in determining the fair market value of securities not readily tradeable on an established securities market, including but not limited to recent arm's length transactions involving the sale or transfer of such securities, and specifically provide that use of a valuation method is not reasonable if such valuation method does not take into consideration all available information material to the value of the company. These rules are widely-used and have independent legal significance under Federal tax law. We believe that a Section 409A independent valuation report containing a rigorous analysis of the factors considered in such a valuation would provide employee investors with appropriate financial disclosure.

To ensure appropriate investor protections, we are proposing certain conditions on the use of a Section 409A independent valuation report. First, the proposed amendments require an independent appraisal that is consistent with the rules and regulations under Section 409A applicable to determination of the fair market value of service recipient stock for stock not

[46] 26 U.S.C. 409A (''IRC Section 409A'').

[47] FASB ASC Topic 718.

[48] *See* letters from ABA and Sullivan.

[49] *See* letter from ABA.

[50] *See* letter from Sullivan.

[51] Proposed Rule 701(e)(4)(ii). As provided in Treasury Reg. 1.409A–1(b)(5)(iv)(B)(*1*), in the case of service recipient stock that is not readily tradable on an established securities market, the fair market value of the stock as of a valuation date means a value determined by the reasonable application of a reasonable valuation method. For this purpose, a valuation is presumed to be a reasonable valuation if the valuation is determined by an independent appraisal that meets certain requirements. *See* Treasury Reg. 1.409A–1(b)(5)(iv)(B)(*2*)(i). The determination whether a valuation method is reasonable, or whether an application of a valuation method is reasonable, is made based on the facts and circumstances as of the valuation date. Factors to be considered under a reasonable valuation method include, as applicable, the value of tangible and intangible assets of the corporation, the present value of anticipated future cash-flows of the corporation, the market value of stock or equity interests in similar corporations and other entities engaged in trades or businesses substantially similar to those engaged in by the corporation the stock of which is to be valued, the value of which can be readily determined through nondiscretionary, objective means (such as through trading prices on an established securities market or an amount paid in an arm's length private transaction), recent arm's length transactions involving the sale or transfer of such stock or equity interests, and other relevant factors such as control premiums or discounts for lack of marketability and whether the valuation method is used for other purposes that have a material economic effect on the service recipient, its stockholders, or its creditors. The use of a valuation method is not reasonable if such valuation method does not take into consideration in applying its methodology all available information material to the value of the corporation. Under the Treasury Regulation, the use of a value previously calculated under a valuation method is not reasonable as of a later date if such calculation fails to reflect information available after the date of the calculation that may materially affect the value of the corporation (for example, the resolution of material litigation or the issuance of a patent).

[52] Proposed Rule 701(e)(4)(ii)(B).

[53] *See* n. 51, *supra.*

readily tradable on an established securities market. Those rules and regulations call for an independent appraisal. The proposed amendments would not permit reliance on other aspects of the Section 409A rules that permit determination of fair value for tax purposes by other means. This condition would have the effect of requiring an independent party to prepare the appraisal and report to reduce potential risks that may arise from an issuer providing its own valuation.[54] Further, in order to keep valuation information current, similar to Rule 701(e) financial statement disclosure, the proposed amendments would require the Section 409A independent valuation report to be as of a date that is no more than six months before the sale of securities in reliance on this exemption.[55] This updating schedule would be comparable to the proposed age of financial statement requirements for Rule 701(e).

We anticipate that providing the proposed valuation disclosure may be less costly, particularly because it is likely the issuer is already preparing such reports for purposes of complying with IRC Section 409A. At the same time, as commenters suggested, valuation disclosure may be as useful to an investor, if not more so, than financial statements in the particular context of evaluating the value of an equity award granted pursuant to Rule 701.

Although most non-reporting issuers relying on Rule 701 are unlikely to have a trading market of the necessary depth and liquidity to justify using the IRC Section 409A valuation standard for stock readily traded on an established securities market, foreign private issuers eligible for the Rule 12g3–2(b) exemption may meet this criterion. In particular, such an issuer must maintain a listing of a class of securities on one or more exchanges in a foreign jurisdiction that, either singly or together with the trading of the same class of the issuer's securities in another foreign jurisdiction, constitutes the primary trading market for those securities.[56] For this reason, the proposed amendments would allow Rule 12g3–2(b) eligible foreign private issuers to provide alternative valuation disclosure prepared consistent with the IRC Section 409A rules and regulations applicable to determining the fair market value of stock readily tradeable on an established securities market.[57] To comply with this alternative disclosure requirement, the eligible issuer would simply disclose the fair market value of the stock on the most recent trading day preceding the date of sale.[58]

Request for Comment:

8. Should we permit a Section 409A independent valuation report to be provided in lieu of financial statement disclosures, as proposed? Would the IRC Section 409A regulations for determining the fair market value of stock not readily tradable on an established securities market generate valuation information that is easy to understand and appropriate to the financial disclosure needs of investors receiving securities under Rule 701? Would such disclosure be an acceptable alternative to financial statements prepared in accordance with U.S. GAAP or IFRS, as applicable? Would this proposal provide meaningful information to securities recipients while avoiding competitive risks from unauthorized financial statement disclosure?

9. Should we require, as proposed, that Section 409A independent valuation reports be prepared pursuant to an independent appraisal for Rule 701(e) disclosure purposes? Taken together, would the related Treasury Regulations defining the terms ''independent appraiser,'' ''qualified appraiser,'' and ''qualified appraisal'' provide adequate guidance for purposes of satisfying this proposed requirement? If not, should we provide further guidance? Would the proposed independence requirement add significantly to preparation costs? How would those costs compare to the costs of preparing the financial statements required by the proposed amendments?

10. As proposed, the Section 409A independent valuation reports would need to be updated at six-month intervals. Would a different interval be more appropriate to ensure that such valuation disclosures provide appropriate information? If so, what interval should we prescribe? Would the proposed updating schedule impose significant costs? Would a less frequent updating schedule raise investor protection concerns?

11. More specifically, would the Section 409A updating schedule imposed for tax purposes, calling for an independent valuation report to be updated if it fails to reflect information that may materially affect the value of the issuer and otherwise only once per fiscal year, result in more frequently updated information than if the issuer provides financial statement disclosure only on a semi-annual basis as proposed? Would using the tax updating schedule for Rule 701(e) purposes provide adequate investor protection?

12. Should we require disclosure of the entire Section 409A independent valuation report, as proposed? Would requiring disclosure of the entire Section 409A independent valuation report result in disclosure of competitively sensitive information? If so, how could we modify the proposal to avoid this result while still providing investors with appropriate disclosure? Are there particular contents of the report that would be competitively sensitive and not meaningful to investors?

[54] To meet the requirements of Treasury Reg. 1.409A–1(b)(5)(iv)(B)(2)(i), the valuation must be determined by an independent appraisal that meets the requirements of IRC Section 401(a)(28)(C) and the Treasury Regulations thereunder. For purposes of IRC Section 401(a)(28)(C), the term ''independent appraiser'' means any appraiser meeting requirements similar to the requirements of the Treasury Regulations prescribed under IRC Section 170(a)(1). IRC Section 170(f)(11)(E) and Treasury Reg. 1.170A–17 define the terms ''qualified appraisal'' and ''qualified appraiser.'' In order to be a ''qualified appraisal,'' a valuation of property must be made by a ''qualified appraiser.'' *See* IRS Publication 561, which generally describes a ''qualified appraiser'' as a disinterested person who has earned an appraisal designation from a generally recognized professional appraiser organization or met specified minimum educational requirements, and regularly prepare appraisals for which he or she is paid.

[55] In contrast, the applicable Treasury Regulations provide that use of a previously calculated valuation is not reasonable if the value was calculated more than 12 months earlier than the date for which the valuation is being used, or if the valuation fails to reflect information available after the date of the calculation that may materially affect the value of the corporation. Treasury Reg. 1.409A–1(b)(5)(iv)(B).

[56] Exchange Act Rule 12g3–2(b)(1)(ii).

[57] Proposed Rule 701(e)(4)(ii)(A).

[58] For stock readily tradable on an established securities market, the fair market value of the stock must be determined ''based upon the last sale before or the first sale after the grant, the closing price on the trading day before or the trading day of the grant, the arithmetic mean of the high and low prices on the trading day before or the trading day of the grant, or any other reasonable method using actual transactions in such stock as reported by such market.'' *See* Treasury Reg. 1.409A–1(b)(5)(iv)(A). For this purpose, stock is treated as ''readily tradable'' if it is regularly quoted by brokers or dealers making a market in such stock, and the term ''established securities market'' means an established securities market within the meaning of Treasury Reg. 1.897–1(m). *See* Treasury Reg. 1.409A–1(b)(5)(vi)(G) and 1.409A–1(k). Treasury Reg. 1.897–1(m) provides that the term ''established securities market'' means ''(1) A national securities exchange which is registered under section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f), (2) A foreign national securities exchange which is officially recognized, sanctioned, or supervised by governmental authority, and (3) Any over-the-counter market. An over-the-counter market is any market reflected by the existence of an interdealer quotation system. An interdealer quotation system is any system of general circulation to brokers and dealers which regularly disseminates quotations of stocks and securities by identified brokers or dealers, other than by quotation sheets which are prepared and distributed by a broker or dealer in the regular course of business and which contain only quotations of such broker or dealer.''

13. Is the proposed alternative valuation information based on IRC Section 409A valuation standards for stock readily tradable on an established securities market appropriate for Rule 12g3–2(b) eligible foreign private issuers? From an investor protection standpoint, would disclosure of the securities' fair market value alone be a sufficient alternative to financial statement disclosure? Would disclosure of the securities' fair market value provide any benefit considering the securities are traded in an established trading market?

14. Are there any other circumstances in which an issuer should be able to provide the alternative valuation information based on market price in accordance with the IRC Section 409A valuation standards for stock readily tradable on an established securities market?

15. Are there any other aspects of the Section 409A valuation regulations that would be useful for purposes of Rule 701(e) disclosure?

16. Other than the independent valuation prescribed with respect to IRC Section 409A, are there any other securities valuation methods that would be appropriate to import into the Rule 701(e) disclosure requirements?

5. Disclosure Requirements for Derivative Securities

We propose to amend the date by which Rule 701(e) disclosure must be provided for certain derivative securities. Specifically, for derivative securities that do not involve a decision by the recipient to exercise or convert, we propose to modify the date by which Rule 701(e) disclosure must be delivered for grants to new hires in specified circumstances.

Rule 701(e)(6) currently provides that if a sale involves a stock option or another derivative security, the issuer must deliver disclosure a reasonable period of time before the date of exercise or conversion. Adopted in 1999, this rule contemplates derivative securities where the sale of the underlying shares involves an investment decision at the time of exercise or conversion.[59]

Since Rule 701(e) was initially adopted, compensatory programs have developed that use derivative securities—such as restricted stock units (''RSUs'') and performance stock units (''PSUs'')—that do not require a decision to exercise or convert. Instead, when held to maturity, these instruments settle automatically in the underlying shares without need for any investment decision by the holder. In the Concept Release, the Commission observed that, because such instruments settle by their terms without action by the holder, the relevant investment decision, if there is one, likely takes place at the date of grant. Consequently, the issuer's obligation to provide Rule 701(e) disclosure would apply a reasonable period of time before the date the RSU or PSU award is granted.[60]

Commenters did not raise any concerns regarding the application of the existing rule to options, stock appreciation rights, or convertible securities. While commenters did not dispute the logic of the Commission's date of sale analysis for RSUs and PSUs,[61] they questioned its practicability in the context of grants to new hires.[62] In particular, one commenter stated that providing financial information to an individual who is considering whether to join the issuer would result in an obligation to provide sensitive financial and operational risk information before the individual starts employment.[63]

To address these practical challenges, commenters suggested several alternative approaches. One commenter suggested permitting issuers to provide the required disclosure within 30 days after employment commences.[64] Another commenter recommended treating RSU settlement as a conversion within the meaning of Rule 701(e)(6) on the date of settlement, so that disclosure delivery would be required a reasonable period of time before settlement.[65]

We propose revising Rule 701(e)(6) to clarify the distinction between derivative securities that involve a decision to exercise or convert, and those that do not.[66] If the sale involves a stock option or other derivative security that involves a decision to exercise or convert, the issuer would continue to be required to deliver disclosure a reasonable period of time before the date of exercise or conversion. If the sale involves an RSU or other derivative security that does not involve a decision to exercise or convert, the issuer generally would continue to be required to deliver disclosure a reasonable period of time before the date the RSU or similar derivative security is granted.

We also propose to amend the rule's application to the grant of an RSU or similar derivative security made in connection with the hire of new employees. In such circumstances, the disclosure would be considered delivered a reasonable period of time before the date of sale if it is provided no later than 14 calendar days after the date the person begins employment. In our view, providing an accommodation for delivery 14 calendar days after commencing employment would provide the issuer an opportunity to address confidentiality concerns while providing the employee disclosure within an appropriate time period. In any other circumstances, the issuer would be required to deliver the disclosure a reasonable period of time before the date the RSU or similar derivative security is granted. In any case, however, the disclosure may be provided subject to appropriate confidentiality conditions. We do not propose to treat RSU settlement the same as a conversion because, unlike conversion, RSU settlement does not involve an investment decision, and, as discussed above, the requirements of Rule 701 contemplate disclosure delivery as part of an investment decision.

Request for Comment:

17. Does the proposal sufficiently clarify the distinction between derivative securities that involve a decision to exercise or convert and those that do not with respect to the timing of the obligation to deliver Rule 701(e) disclosure?

18. Is there any basis for treating settlement of an RSU or PSU as a conversion under the current rule, given that the holder does not make any investment decision at the time of settlement? For example, should the decision whether to settle tax obligations arising at settlement by withholding shares be viewed as an investment decision?

19. For new hires, is it appropriate to require delivery of Rule 701(e) disclosures within 14 calendar days after a recipient's commencement of employment, as proposed? Would a shorter period, such as seven calendar days, or longer period, such as 30 calendar days, be more appropriate?

20. Does the proposal adequately address issuer confidentiality concerns in the context of new hires, in a manner consistent with investor protection?

21. Are there any circumstances in which the proposed new hire accommodation should not apply, such

[59] *See* 1999 Release, which predates issuers' utilization of restricted stock units and similar instruments for compensatory awards.

[60] *See* Concept Release at Section II.C.3.

[66] Proposed Rule 701(e)(6)(i).

as where the grant of securities is individually negotiated?

22. Should the proposed accommodation for new hires be available only if the financial disclosure that will be provided consists of financial statements, rather than the alternative proposed Section 409A valuation disclosure? Does a Section 409A independent valuation report raise the same concerns about disclosure of sensitive financial and operational risk information?

23. Are there any other categories of Rule 701 eligible participants for whom the proposed accommodations should apply?

24. Would it be helpful to amend Rule 701(e) to specify that disclosure may be made either by physical or electronic delivery or by written notice of the availability of the information on a website that may be password-protected and of any password needed to access the information? Would it be helpful for the rule to specifically permit use of dedicated physical disclosure rooms that house the medium used to convey the information required to be disclosed?

6. Disclosure Requirements Following Business Combination Transactions

To clarify the application of Rule 701 to merged entities, we propose to amend Rule 701(e) to address the application of the exemption and its disclosure delivery obligations to acquired entity derivative securities that the acquiring issuer assumes in a business combination transaction.[67]

In some business combination transactions, outstanding derivative securities issued by the acquired entity in compensatory transactions will not be accelerated, but will instead be assumed by the acquiring issuer. In these circumstances, shares of the acquiring issuer will be issued upon the exercise or conversion of the derivative securities, instead of those of the acquired entity. Under the proposal, as long as the acquired entity complied with Rule 701 at the time it originally granted the derivative securities, the exercise or conversion of those derivative securities that are assumed by the acquiring issuer would be exempt from registration, subject to the acquiring issuer's compliance, where applicable, with Rule 701(e). For assumed derivative securities for which the acquired entity was required to provide disclosure pursuant to Rule 701(e) and where the derivative securities are exercised or converted after completion of the business combination transaction, the acquiring issuer would satisfy that disclosure obligation by providing information meeting the requirements of Rule 701(e) consistent with the timing requirements of Rule 701(e)(6).[68] In other words, if the acquired entity would have been required to provide Rule 701(e) disclosure upon exercise or conversion of its derivative securities, the acquiring issuer that assumes those derivative securities would assume the obligation to provide Rule 701(e) disclosure upon their exercise or conversion.

Following completion of a business combination transaction, in determining whether the amount of securities the acquiring issuer sold during any consecutive 12-month period exceeds $10 million, the acquiring issuer would consider only the securities that it sold in reliance on Rule 701 during that period and would not be required to include any securities sold by the acquired entity pursuant to the rule during the same 12-month period.[69] Because the acquiring issuer presumably did not consider the acquired entity's Rule 701 sales preceding the business combination transaction in planning its own Rule 701 transactions, taking them into account after the business combination transaction could in some cases result in retroactive loss of the exemption if the combined Rule 701 transactions exceed the $10 million threshold. We believe that this result would be unduly restrictive and could create hurdles to potentially value-enhancing business combinations.

Request for Comment:

25. Would the proposal addressing acquired entity derivative securities assumed by an acquiring issuer sufficiently clarify the exempt status of and disclosure obligations applicable to exercises and conversions of those securities after completion of the business combination transaction? Are any additional clarifications needed? For example, is guidance needed to clarify who is the acquiring issuer in a business combination transaction where the acquirer is not the same entity for legal and accounting purposes?

26. Following completion of a business combination transaction, in determining whether the amount of securities the acquiring issuer sold pursuant to Rule 701 during any consecutive 12-month period exceeds $10 million, should the acquiring entity be permitted to disregard the securities that the acquired entity sold pursuant to the rule during the same 12-month period, as proposed? Are there any circumstances in which the acquiring entity should be required to take those acquired entity securities into account for purposes of the $10 million disclosure threshold, and how do these circumstances relate to investor protection?

B. Rule 701(d)

We propose to raise two of the three alternative regulatory ceilings that cap the overall amount of securities that a non-reporting issuer may sell pursuant to Rule 701 during any consecutive 12-month period. Since 1999,[70] the rule has provided that the amount of securities that may be sold in reliance on the exemption during any consecutive 12-month period is limited to the greatest of:[71]

- $1 million;
- 15% of the total assets of the issuer,[72] measured at the issuer's most recent balance sheet date; or
- 15% of the outstanding amount of the class of securities being offered and sold in reliance on the rule, measured at the issuer's most recent balance sheet date.

These measures apply on an aggregate basis, not plan-by-plan. For securities underlying options, the aggregate sales price is determined when the option grant is made, using the exercise price of the option, without regard to when it becomes exercisable.[73] For deferred compensation plans, the calculation is made at the time of the participant's irrevocable election to defer.[74] There is no separate limitation on the amount of securities that may be offered.

In proposing the current rule, the Commission explained that the purpose of a 12-month cap is to ''assur[e] that the exemption does not provide a threshold that small issuers could use to raise substantial capital from employees.'' [75] The alternatives based on 15% of total assets or 15% of the outstanding amount

[67] Proposed Rule 701(e)(7).

[68] Proposed Rule 701(e)(7)(ii).

[69] Proposed Rule 701(e)(7)(i).

[70] *See* 1999 Adopting Release.

[71] Rule 701(d).

[72] The relevant limit applies to the total assets of the issuer's parent if the issuer is a wholly-owned subsidiary and the securities represent obligations that the parent fully and unconditionally guarantees.

[73] *See* Rule 701(d)(3)(i)–(ii).

[74] *See* Rule 701(d)(3)(ii).

[75] *See Employee Benefit and Compensation Contracts,* Release No. 33–6726 (July 30, 1987) [52 FR 29033 (Aug. 5, 1987)] (''Rule 701 Reproposing Release''). As originally adopted, the rule permitted the amounts of securities offered and sold annually to be the greatest of $500,000, 15% of total assets of the issuer, or 15% of the outstanding securities of the class, subject to an absolute limit of $5,000,000 derived from Securities Act Section 3(b). *See Compensatory Benefit Plans and Contracts,* Release No. 33–6768 (Apr. 14, 1988) [53 FR 12918 (Apr. 20, 1988)] (''Rule 701 Adopting Release'').

of the class of securities were intended to increase the flexibility and utility of the exemption.[76] The $1 million alternative provides an amount that any issuer can use, regardless of size.

The Concept Release solicited comment on whether there is a continuing need for any annual regulatory ceiling for Rule 701 transactions, and whether investors would be harmed if the Commission eliminated or raised the ceiling. One commenter stated that compliance with Rule 701(d) imposes costly ongoing analysis and monitoring on issuers without any clear benefit to them or their employees.[77] A different commenter recommended raising the $1 million limit to $2 million, to retain its utility for start-up issuers that have few assets and may want to issue a large percentage of current equity to first round employees.[78] This commenter also recommended raising the 15% asset cap to 25%, as modern issuers rely increasingly on human capital and are less asset-intensive. Another commenter recommended providing relief in business combination transactions where the acquirer assumes the target's employee benefit plans, resulting in the combined enterprise exceeding the aggregate offering limitations in Rule 701(d)(2), particularly in the first year following closing of the transaction.[79]

We continue to believe that the Rule 701(d) caps are useful in curbing non-compensatory sales in reliance on the rule. Accordingly, the proposal retains the general structure of Rule 701(d)(2), providing that the aggregate sales price or amount of securities sold in reliance on Rule 701 during any consecutive 12-month period must not exceed the greatest of the three alternative ceilings. In light of the less asset-intensive nature of contemporary businesses and the effects of inflation since the adoption of these alternatives in 1999, we believe that it could be beneficial to issuers and securities recipients to raise two of the ceilings. As proposed, the asset cap would be raised from 15% to 25% of the total assets of the issuer (or of the issuer's parent if the issuer is a wholly-owned subsidiary and the securities represent obligations that the parent fully and unconditionally guarantees) measured at the issuer's most recent balance sheet date (if no older than its last fiscal year end).[80] The alternative $1 million cap available to any issuer would be raised to $2 million.[81] The third alternative cap—15% of the outstanding amount of the class of securities being offered and sold—would be retained with no changes. The considerations that motivate us to propose raising the alternative percentage of assets cap and the $1 million cap do not apply to the percentage of outstanding securities cap, and we continue to believe this cap is appropriate to prevent misuse of the exemption for capital-raising purposes.

To facilitate the operation of compensatory plans following a merger or acquisition, we propose an amendment to provide that after completion of a business combination transaction, to calculate compliance with paragraph (d)(2) of this section, the acquiring issuer may use a pro forma balance sheet that reflects the transaction or a balance sheet for a date after the completion of the transaction that reflects the total assets and outstanding securities of the combined entity.[82] Furthermore, in determining the amount of securities that it may offer pursuant to Rule 701 following a business combination transaction, as proposed, the acquiring issuer would not be required to include the aggregate sales price and amount of securities for which the acquired entity claimed the exemption during the same 12-month period. We believe that these changes would remove hurdles to potentially value-enhancing business combination transactions, consistent with investor protection.

Request for Comment:

27. Do the two proposed sales cap increases appropriately adjust the ceilings in a manner that benefits both issuers and securities recipients, consistent with investor protection? Should either cap be raised by a higher or lower amount? If so, what amount would be more appropriate? Should either cap remain unchanged?

28. Should we retain the current structure of Rule 701(d) with three alternative sales caps? If not, how should the structure be changed? In particular, do the caps further the goal of facilitating only compensatory transactions in reliance on Rule 701? Are there alternative provisions that would serve this purpose?

29. Does the cap based on 15% of the outstanding amount of the class of securities being offered and sold continue to play a useful and effective role in Rule 701? Does it prevent issuers from improperly relying on the rule to raise capital from employees? Have there been changes in the marketplace, as discussed above for the two other alternative caps, which suggest that this cap may inhibit beneficial compensatory transactions? Should this cap be raised? If so, what would be a more appropriate percentage?

30. Does the proposal to permit use of a pro forma balance sheet, or a balance sheet for a date after the completion of the business combination transaction that reflects the total assets and outstanding securities of the combined entity, meaningfully facilitate the operation of compensatory plans following a business combination transaction? Are any other changes necessary to achieve this objective?

31. Should we amend Rule 701(d), as proposed, to provide that following a business combination transaction, in determining the amount of securities that it may offer pursuant to Rule 701, the acquiring issuer need not include the aggregate sales price and amount of securities for which the acquired entity claimed the exemption during the same 12-month period?

C. Eligible Recipients

1. Consultants and Advisors

We propose to extend Rule 701 consultant and advisor eligibility to entities meeting specified ownership criteria designed to assure that the securities compensate the performance of services. Currently, consultants and advisors may participate in Rule 701 offerings only if:

- They are natural persons;
- They provide bona fide services to the issuer, its parents, its majority-owned subsidiaries or majority-owned subsidiaries of the issuer's parent; and
- The services are not in connection with the offer or sale of securities in a capital-raising transaction, and do not directly or indirectly promote or maintain a market for the issuer's securities.[83]

Some commenters on the Concept Release addressed whether participation should be limited to natural persons and corporate alter egos, as currently permitted, or expanded to include entities. One commenter noted that staff has not objected to treating personal services businesses as corporate alter egos of natural persons with respect to the ability to participate in Form S–8

[76] *See* Rule 701 Adopting Release at Section I.A.(2).

[77] *See* letter from ABA.

[78] *See* letter from Sullivan.

[79] *See* letter from Chamber.

[80] Proposed Rule 701(d)(2)(ii).

[81] Proposed Rule 701(d)(2)(i).

[82] Proposed Rule 701(d)(3)(v).

[83] Rule 701(c)(1). Where the consultant or advisor performs services for the issuer through a wholly-owned corporate alter ego, the issuer may contract with, and issue securities as compensation to, that corporate entity. *Cf., Registration of Securities on Form S–8,* Release No. 33–7646 (Feb. 25, 1999) [64 FR 11103 (Mar. 8, 1999)] at n. 20, (''1999 Form S–8 Adopting Release'') addressing such a corporate alter ego in the Form S–8 context.

offerings under existing employee, consultant and advisor categories, where such businesses are wholly-owned by (or jointly owned with the spouse of) the natural person who provides services to the issuer.[84] The commenter suggested that we expand eligible corporate alter egos to include entities wholly-owned by multiple natural person service providers or the management of the entities. Other commenters noted that service providers may be organized as entities in order to provide legal benefits such as tax and estate planning and stated that these providers should not have to choose between such benefits and receiving equity compensation.[85]

While we acknowledge these points, we are concerned that opening up Rule 701 eligibility to entities that are more broadly held than the corporate alter ego of an individual consultant could undermine the compensatory nature of the exemption by permitting securities to be issued to passive investment vehicles rather than individuals who perform services for the issuer. This concern is amplified by the fact that a person who receives securities pursuant to the plan and participant conditions of Rule 701(c) is not considered a holder of record for purposes of Exchange Act Section 12(g) registration. Specifically, Section 502 of the Jumpstart Our Business Startups Act[86] (''JOBS Act'') amended Exchange Act Section 12(g)(5)[87] to exclude from the definition of ''held of record,'' for purposes of determining whether an issuer is required to register a class of equity securities, securities that are held by persons who received them pursuant to an ''employee compensation plan'' in transactions exempted from the registration requirements of Section 5 of the Securities Act.[88] To implement this statutory amendment, the Commission amended the definition of ''held of record'' in Exchange Act Rule 12g5–1[89] to exclude certain securities held by persons who received them pursuant to employee compensation plans in a transaction exempt from, or not subject to, the registration requirements of Section 5.[90] This amendment also established a non-exclusive safe harbor for determining whether securities are ''held of record'' for purposes of registration under Exchange Act Section 12(g), providing that an issuer may deem a person to have received securities pursuant to an employee compensation plan if the plan and the person who received the securities pursuant to it met the plan and participant conditions of Rule 701(c). It is therefore important in expanding eligible participants under Rule 701(c) not to include passive investment vehicles that properly should be record holders for purposes of triggering Section 12(g) registration and the protections of Exchange Act reporting.

The proposed amendments seek to strike a balance between, on the one hand, allowing service providers flexibility to obtain the legal benefits of organizing as entities and, on the other hand, preventing Rule 701 securities from being issued to passive investment vehicles that would not be record holders, by expanding consultant or advisor eligibility to an entity, subject to the following conditions:

- Substantially all of the activities of the entity involve the performance of services; and
- Substantially all of the ownership interests in the entity are held directly by:
  - No more than 25 natural persons, of whom at least 50 percent perform such services for the issuer through the entity;
  - The estate of a natural person specified above; and
  - Any natural person who acquired ownership interests in the entity by reason of the death of a natural person specified above.[91]

The proposal seeks to expand eligibility for consultant entities while helping to ensure that compensatory securities are issued only to entities through which services are provided that are owned by those service providers. We believe that the proposed conditions are appropriate to help achieve this objective. In particular, substantially all of the ownership interests would need to be held directly by no more than 25 natural persons, at least 50 percent of whom provide services to the issuer, and by the estates and heirs of those natural persons. An entity that satisfies these conditions would also—like a natural person—need to satisfy the existing requirements for consultant and advisory eligibility by providing bona fide services that are not in connection with the offer or sale of securities in a capital-raising transaction and do not directly or indirectly promote or maintain a market for the issuer's securities.[92]

Request for Comment:

32. Should we extend consultant and advisor eligibility to entities meeting specified ownership criteria designed to link the securities to the performance of services for the issuer, as proposed?

33. Does the proposed standard for consultant and advisor entity eligibility appropriately balance a consultant's needs to obtain the legal benefits of entity organization with the rule's purpose to exempt from Securities Act registration offerings of securities issued in compensatory circumstances?[93]

34. The proposed standard would require that substantially all of the ownership interests of the entity be held by no more than 25 natural persons, of whom at least 50 percent perform services for the issuer through the entity, their estates, and natural persons who acquired ownership interests due to their death. Are the proposed conditions appropriate? Are there different or additional conditions we should consider? Should the rule specify criteria defining what ''substantially all'' would mean for this purpose? For example, should 95 percent ownership be required to establish ''substantially all''?[94]

35. To ensure that securities are issued to compensate persons who provide services to the issuer and not to

[84] *See* letter from Davis Polk.

[85] *See* letters from Chamber and Indigo.

[86] Sec. 502, 126 Stat. at 326. Section 501 of the JOBS Act [Sec. 601, 126 Stat. at 325] amended Section 12(g)(1) of the Exchange Act to require an issuer to register a class of equity securities (other than exempted securities) within 120 days after its fiscal year-end if, on the last day of its fiscal year, the issuer has total assets of more than $10 million and the class of equity securities is ''held of record'' by either (i) 2,000 persons, or (ii) 500 persons who are not accredited investors. Section 601 of the JOBS Act [Sec. 601, 126 Stat. at 326] further amended Exchange Act Section 12(g)(1) to require an issuer that is a bank or bank holding company, as defined in Section 2 of the Bank Holding Company Act of 1956 [12 U.S.C. 1841], to register a class of equity securities (other than exempted securities) within 120 days after the last day of its first fiscal year ended after the effective date of the JOBS Act, on which the issuer has total assets of more than $10 million and the class of equity securities is ''held of record'' by 2,000 or more persons.

[87] 15 U.S.C. 78*l*(g)(5).

[88] This statutory exclusion applies solely for purposes of determining whether an issuer is required to register a class of equity securities under the Exchange Act and does not apply to a determination of whether such registration may be terminated or suspended.

[89] 17 CFR 240.12g5–1.

[90] *See Changes to Exchange Act Registration Requirements to Implement Title V and Title VI of the JOBS Act,* Release No. 33–10075 (May 3, 2016) [81 FR 28689 (May 10, 2016)] (''JOBS Act Release''), adopting Exchange Act Rule 12g5–1(a)(8).

[91] Proposed Rule 701(c)(1)(iii). These conditions are loosely modeled on, but have a different focus than, the Internal Revenue Code definition of a ''qualified personal service corporation. *See* 26 U.S.C. 448(d)(2).

[92] Rule 701(c)(1)(ii) and (iii), proposed to be re-designated as Rule 701(c)(1)(i) and (ii), respectively.

[93] *See* Proposed Rule 701(a)(5), formerly Preliminary Note 5 to Rule 701.

[94] Regulation Reg. Sec. 1.448–1T(e)(5)(i)(D) defines ''substantially all'' as 95% or more for purposes of a ''personal service corporation'' as defined in IRC Section 448(d)(2).

passive investors, is it necessary to specify a maximum number of natural person owners for an entity to be eligible, as proposed? Should the number be larger or smaller? [95] Should the entity's eligibility to receive securities be conditioned on at least 50 percent of those natural person owners performing services for the issuer, as proposed? Should that percentage be larger or smaller?

36. To assure that a compensatory purpose is maintained, would it be necessary to further restrict ownership by persons who acquire the securities by reason of the death of a current or former service provider to a two-year period beginning on the date of death, as in the Internal Revenue Code definition of a qualified personal service corporation?

37. As noted above, a person who receives securities pursuant to the plan and participant conditions of Rule 701(c) is not considered a holder of record for purposes of Exchange Act Section 12(g) registration. How should this provision influence the limitations we place on those persons eligible to receive Rule 701 securities? Are any other restrictions or conditions needed to ensure that Rule 12g5–1(a)(8) excludes from the definition of held of record securities received as compensation for services that the recipients provided to the issuer?

2. Former Employees

We are proposing to expand Rule 701 eligibility for former employees to specified post-termination grants and to former employees of acquired entities. Rule 701 currently exempts offers and sales to former employees, directors, general partners, trustees, officers, or consultants and advisors only if such persons were employed by or providing services to the issuer at the time the securities were offered.

In response to the Concept Release, one commenter stated that Form S–8 should be available to register new grants to former employees that are made as compensation for prior service during the 12-month period after retirement or termination.[96] Another commenter suggested expanding eligible participants to include former employees of an acquired issuer that were granted equity awards in an acquisition in exchange for securities issued as compensation while such former employees were still employed by the acquired issuer.[97]

We believe that expanding Form S–8 eligibility to encompass former employees as suggested by commenters could benefit both issuers and securities recipients by facilitating compensatory transactions consistent with the purposes of the form.[98] We believe that this rationale applies equally to Rule 701 and Form S–8. Accordingly, we propose to expand the eligibility of former employees under Rule 701 to include offers and sales to:

- Persons who were employed by or providing services to the issuer, its parents, its subsidiaries, or subsidiaries of the issuer's parent and who are issued securities after resignation, retirement, or other termination as compensation for services rendered during a performance period that ended within 12 months preceding such termination; and
- former employees of an entity that was acquired by the issuer if the securities are issued in substitution or exchange for [99] securities that were issued to the former employees of the acquired entity on a compensatory basis while such persons were employed by or providing services to the acquired entity.

The proposal also would define ''employee'' for purposes of Rule 701 to include executors, administrators, and beneficiaries of the estates of deceased employees, guardians or members of a committee for incompetent former employees, or similar persons duly authorized by law to administer the estate or assets of former employees. This amendment would conform to the corresponding provision relating to former employee eligibility in Form S–8.[100]

Request for Comment:

38. Should we make Rule 701 available for new offers and sales to former employees as compensation for their service while employed by the issuer in the preceding 12 months, as proposed? Would expanding the exemption in this way facilitate compensatory transactions consistent with the purpose of the rule? To what extent do issuers grant awards on such a retrospective basis? Does ''following resignation, retirement, or other termination'' clearly describe the relationship of the award to former employment? Should the rule specifically address any other scenarios, such as expiration of the term of employment?

39. Should Rule 701 be available to a former employee of an acquired entity for securities substituted or exchanged for acquired entity securities issued as compensation for the former employee's work for the acquired entity, as proposed? Would this be consistent with the underlying rationale that the Rule 701 exemption is available based on the compensatory relationship with the issuer?

40. Would amending the rule, as proposed, to extend eligibility to executors, administrators, and beneficiaries of employees' estates and others duly authorized by law to administer the estates or assets of former employees facilitate the administration of compensatory plans relying on the exemption? If not, how should this proposal be modified to facilitate that objective?

3. Employees of Subsidiaries

In an effort to harmonize Rule 701 and Form S–8, we also propose to amend Rule 701(c) by substituting the term ''subsidiaries'' [101] for ''majority-owned subsidiaries.'' The proposed amendment would make the exemption available for offers and sales of securities under a written compensatory benefit plan (or written compensation contract) established by the issuer, its parents, its subsidiaries, or subsidiaries of the issuer's parent.[102] Like Form S–8, Rule 701 would be available for the issuance of issuer securities to employees of its subsidiaries, without regard to whether those subsidiaries are majority-owned.[103] We are not aware of

[95] In this regard, we note that to qualify for S corporation status, a corporation may have no more than 100 shareholders. *See generally* IRC Sections 1361(a)(2) and 1361(b).

[96] *See* letter from Sullivan.

[97] *See* letter from Davis Polk.

[98] *See* Section III.C.1, *infra.*

[99] Consistent with Exchange Act Rule 12g5–1(a)(8)(i)(B), we are using the language ''in substitution or exchange for'' to cover the various methods by which issuer securities may be received in place of acquired entity securities that were issued in compensatory transactions, such as upon exercise or conversion of those securities. *See* JOBS Act Release at Section III.B.3.

[100] General Instruction A.1(a)(3) to Form S–8, which as discussed in Section III.C.1, *infra,* would similarly be amended to expand eligibility for former employees and former employees of an entity acquired by the issuer.

[101] Rule 405 defines ''subsidiary'' for purposes of the Securities Act as an affiliate controlled by such person directly, or indirectly through one or more intermediaries. Rule 405 defines ''control'' as the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a person, whether through the ownership of voting securities, by contract, or otherwise.

[102] Under the proposal, ''subsidiary'' would replace ''majority-owned subsidiary'' in each place in Rule 701(c) where ''majority-owned subsidiary'' currently appears.

[103] The term ''majority-owned subsidiary'' is defined as a subsidiary more than 50 percent of whose outstanding securities representing the right, other than as affected by events of default, to vote for the election of directors, is owned by the subsidiary's parent and/or one or more of the

Continued

any reason to limit Rule 701 to employees of majority-owned subsidiaries. Expanding Rule 701 eligibility in this manner could facilitate the continued operation of compensation programs when non-reporting issuers transition to reporting status and are only eligible to use Form S–8 rather than Rule 701.

By broadening the exemption to include all subsidiaries, as defined, rather than only those that are majority-owned, the proposal would, among other things, expand eligibility to subsidiaries consolidated by the issuer as variable interest entities, such as physicians employed by medical practices controlled by the issuer.[104]

Request for Comment:

41. Should we harmonize the Rule 701 and Form S–8 eligibility requirements by broadening the Rule 701 exemption to include all subsidiaries, as proposed? Would the proposal facilitate a non-reporting issuer's transition to reporting issuer status and its subsequent registration of compensatory offerings on Form S–8?

42. Unlike Form S–8, the Rule 701 exemption currently is available to majority-owned subsidiaries of the issuer's parent rather than only subsidiaries of the issuer itself.[105] Should we amend Form S–8 to further harmonize the scope of Rule 701 and Form S–8 by making Form S–8 available to employees of all subsidiaries of the issuer's parent? Are there any other harmonizing amendments we should consider?

43. Are there any reasons not to extend Rule 701 eligibility to persons employed by subsidiaries that are consolidated by the issuer as variable interest entities? For example, are there any reasons not to extend Rule 701 eligibility to physicians employed by medical practices controlled by the issuer, based on their employment by a subsidiary of the issuer?

parent's other majority-owned subsidiaries. *See* Rule 405.

[104] In the 1999 Adopting Release at Section at Section II.D, n. 41, the Commission rejected a view expressed by the staff in certain no-action letters that such physicians were eligible as consultants or advisors in light of the narrower definition of consultant or advisor adopted in that release. Under Financial Accounting Standards Board Accounting Standards Codification Subtopic 810–10, *Consolidation—Overall,* a medical practice is often a variable interest entity. An issuer that has a controlling financial interest in such a medical practice generally would consolidate it. As a result, physicians employed by the medical practice would become eligible as employees of the issuer's subsidiary.

[105] *See* Form S–8, General Instruction A.1.(a).

III. Form S–8

Form S–8 was originally adopted in 1953, as a simplified form for the Securities Act registration of securities to be issued pursuant to employee stock purchase plans.[106] Form S–8 is available for the registration of securities to be offered under any employee benefit plan to an issuer's employees or employees of its subsidiaries or parents.[107] Registration on Form S–8 is used for many different types of employee benefit plans, including Internal Revenue Code Section 401(k) plans and similar defined contribution retirement savings plans, employee stock purchase plans, nonqualified deferred compensation plans, and incentive plans that provide for issuance of options, restricted stock, or RSUs. The form may be used by any issuer that is subject, at the time of filing, to the reporting requirements of Section 13 or 15(d) of the Exchange Act and has filed all reports required during the preceding 12 months or such shorter period that it was subject to those requirements.[108] Form S–8 is not available for shell companies.[109]

Over time, the Commission has made revisions to the Form S–8 requirements to simplify the use of the form and streamline the form's requirements where such simplification is consistent with investor protection.[110] In the Concept Release, the Commission asked whether Form S–8 registration is still necessary, and if so, how the Commission could further streamline Form S–8 registration. Among other things, the Concept Release solicited comment on the potential elimination of Form S–8 in favor of allowing Exchange Act reporting issuers to use the Rule 701 exemption and whether Form S–8 incentivized issuers to remain current in their Exchange Act reporting obligations. Commenters who addressed this issue generally supported eliminating the form, while expressing some reservations.[111] One commenter stated that the principal advantage of such an approach would be the elimination of compliance costs associated with filing and maintaining an effective Form S–8.[112] A few other commenters indicated that keeping Form S–8 is not necessary to provide an incentive for reporting issuers to remain current in their Exchange Act reporting obligations.[113]

At the same time, commenters noted a number of potential disadvantages with eliminating Form S–8. One commenter stated that reporting issuers would find it a significant disadvantage if failure to register on Form S–8 would subject an issuance of employee benefit plan shares to registration under state blue sky laws.[114] A different commenter stated that reporting issuers would not migrate to Rule 701 if securities issued under the exemption would be restricted securities, as defined in Rule 144, and observed that, unlike Rule 701 offerings, securities issued as part of an offering registered on Form S–8 are not ''restricted securities'' as defined in Rule 144.[115]

In evaluating this potential change, we considered these and other disadvantages that would result from eliminating Form S–8 and allowing reporting issuers to use Rule 701, such as:

- Employees' loss of the information required in Part I of Form S–8 that is part of the prospectus that must be provided to them; and
- Employees' potential loss of the protections provided by Section 11 and, in some cases, Section 12(a)(2) liability in the case of material misstatements or omissions.[116]

On balance, we believe that Form S–8 continues to provide a useful and effective means of registering securities to be issued in compensatory offerings under the Securities Act. Accordingly, we are proposing amendments to the

[106] *See generally Registration of Securities Offered Pursuant to Employees Stock Purchase Plans,* Release No. 33–3480 (June 16, 1953) [18 FR 3688 (June 27, 1953)].

[107] ''Employee benefit plan'' is defined in Securities Act Rule 405.

[108] *See* Form S–8, General Instruction A.1.

[109] ''Shell company'' is defined in Securities Act Rule 405. When a company ceases to be a shell company, by combining with a formerly private operating business, General Instruction A.1 to Form S–8 provides that it then becomes eligible to use Form S–8 60 days following the filing of Form 10-equivalent information with the Commission.

[110] *See, e.g.,* 17 CFR 230.462(a) (allowing Form S–8 to go effective automatically without review by the staff or other action by the Commission); Item 3 and General Instruction G of Form S–8 (allowing the incorporation by reference of certain past and future reports required to be filed by the issuer under Section 13 or 15(d) under the Exchange Act); 17 CFR 230.428(a)(1) (providing an abbreviated disclosure format that eliminated the need to file a separate prospectus and permitting the delivery of regularly prepared materials to advise employees about benefit plans to satisfy prospectus delivery requirements); Rule 416(c) and Rule 457(h)(2) (providing for registration of an indeterminate amount of plan interests and providing that there is no separate fee calculation for registration of plan interests, respectively); and General Instruction E to Form S–8 (providing a procedure for the filing of a simplified registration statement covering additional securities of the same class to be issued pursuant to the same employee benefit plan).

form and related rules that maintain the current non-reporting issuer-reporting issuer distinction between Rule 701 and Form S–8, but we are proposing amendments to simplify the use of Form S–8. The proposed amendments should significantly reduce the compliance burdens of filing and maintaining an effective Form S–8, while retaining the protection that registration under the Securities Act provides to investors. Finally, we are proposing amendments that would harmonize the requirements of Rule 701 and Form S–8.

Request for Comment:

44. Should we eliminate Form S–8? If so, what exemption or other registration statement should the Commission replace it with? What should the requirements and conditions of such exemption or registration statement be? If such an approach were adopted, what other steps should the Commission take to preserve companies' ability to offer equity-based compensation to employees (*e.g.,* preemption of state blue sky laws) and to protect investors?

A. Addition of Plans and Securities or Classes of Securities to Form S–8

1. Addition of Plans to Form S–8

To maximize the utility of Form S–8 for legitimate compensatory purposes, we are clarifying and proposing changes to our rules and to Form S–8 to provide additional flexibility for compensatory offerings, similar to provisions available to issuers in capital raising shelf offerings. The Concept Release solicited comment on whether we should permit an issuer to register on a single form the offers and sales pursuant to all employee benefit plans that it sponsors. One commenter stated that there is not currently an explicit requirement under Form S–8 that only shares under a single employee benefit plan may be registered on a specific registration statement but nonetheless recommended that the Commission clarify this point in any amendments to the form.[117] Other commenters were generally supportive of permitting offers and sales of securities pursuant to multiple plans to be registered on a single Form S–8.[118]

We are clarifying that issuers may add additional plans to an existing Form S–8. Specifically, issuers may file an automatically effective post-effective amendment to a previously filed Form S–8 to add employee benefit plans where the new plan does not require the authorization and registration of additional securities for offer and sale.[119] For example, assume an issuer has an effective Form S–8 that registers sales of common stock to be issued under the issuer's 2010 equity compensation plan and has recently adopted a new 2020 equity compensation plan to replace the 2010 plan that does not authorize additional securities. Upon effectiveness of the 2020 plan, no further awards may be granted pursuant to the 2010 plan and any shares covered by an award under the 2010 plan are now duly authorized for issuance under the 2020 plan. In order to sell under the 2020 plan, the issuer may register the securities to be offered and sold pursuant to the new plan on a new Form S–8. Alternatively, under the current requirements of Form S–8 or Rule 428,[120] the issuer could file an automatically effective post-effective amendment to the previously filed Form S–8 to add employee benefit plans, such as the 2020 plan in the example. The post-effective amendment to include the additional plan would be required to disclose any material change in the plan of distribution, including that a new plan is being added to an existing Form S–8.[121] This post-effective amendment would need to describe how shares that will not be issued under the previous plans may become authorized for issuance under the current plans. The post-effective amendment also must identify all covered plans on the cover page and describe, if applicable, how the shares that were registered for previous offerings on the Form S–8 pursuant to other plans have instead become authorized for issuance under the newly added plan.[122]

At the time of the filing of any post-effective amendment to Form S–8, the issuer must continue to meet the requirements of the form.[123] The issuer would also add the signatures and file the required opinions of counsel with the post-effective amendment. The issuer would thereafter deliver or cause to be delivered in accordance with Rule 428(b)(2)(i) the documents identified in Rule 428(a) as part of the prospectus that describes the new plan.

We believe that clarifying the ability to add plans to an existing Form S–8 via an automatically effective post-effective amendment will reduce the administrative burdens to the extent issuers previously believed that the filing an entirely new Form S–8 for each new plan was required. This approach also will help facilitate the use of a single Form S–8 for all employee benefit plans, if the issuer chooses to do so. In addition, it will reduce the problems associated with fee transfers between multiple registration statements that have registered ongoing offers and sales that cannot be terminated (*e.g.,* outstanding options that require continuous ongoing registration of the underlying shares).[124] Similar to permitting the allocation of securities between plans on Form S–8, which we discuss below, we do not believe that amendments to the current disclosure requirements of Form S–8 or Rule 428 are required to implement the proposed clarification. We are proposing, however, a minor modification to the cover page of Form S–8 to clarify that the full title of multiple plans may be listed.[125]

Request for Comment:

45. Is the clarification regarding the ability of issuers to register offers and sales of securities pursuant to multiple plans on a single Form S–8 sufficient, or is additional guidance needed? Should we instead amend Form S–8 to prohibit issuers from adding plans to an existing Form S–8?

46. Would registering multiple plans on a single Form S–8 work well in practice? For example, would registering incentive plans on the same Form S–8 as a 401(k) plan or other defined contribution plan cause administrative difficulties or investor

[117] *See* letter from ABA.

[118] *See* letters from Council, Davis Polk and NASPP.

[119] After discussing these clarifications, we discuss the proposed amendments regarding plans that authorize additional securities in Section III.A.2, *infra.*

[120] 17 CFR 230.428.

[121] *See* 17 CFR 230.464 and Rule 456. Item 9 of Form S–8 requires an issuer to make the undertaking set forth in Item 512(a)(1)(iii) of Regulation S–K in a post-effective amendment. The undertaking in Item 512(a)(1)(iii) states that the registrant will include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement to disclose a material change in the plan of distribution. For example, in certain circumstances, a material change may be the identification on the registration statement cover page of a new plan that is being added to an already existing Form S–8.

[122] *Id.* This would include, for example, if the 2010 plan included outstanding options that expired unexercised and the underlying shares became authorized for issuance under the 2020 plan. Using other aspects of the proposed amendments, if necessary, issuers would also be able to add securities to an existing Form S–8 as described below. *See* Section III.A.3, *infra.*

[123] *See* 17 CFR 230.464.

[124] *See* Rule 457(p). Under current rules, the issuer may be unable to avail itself of Rule 457(p) to transfer the fees previously paid for plans on other Forms S–8 because Rule 457(p) permits filing fees to be transferred only after the registered offering has been completed or terminated or the registration statement has been withdrawn. As a result, in our example, the issuer would not be able to transfer the fees associated with any remaining shares under the 2010 plan until it completes or terminates the 2010 plan offering registered on the existing Form S–8.

[125] *See* proposed amendments to the Cover Page of Form S–8.

confusion? Would issuers use this feature principally to update and refresh their incentive compensation plans?

47. Are there additional or different disclosures that should be required when a plan is added to an existing Form S–8?

2. Securities Allocation Among Incentive Plans

In addition to clarifying the ability to add additional plans using a post-effective amendment, as discussed in Section III.A.1 above, we are clarifying that issuers are not required to allocate registered securities among incentive plans and may use a single Form S–8 for multiple incentive plans.[126] Although we do not believe that amendments to the current disclosure requirements of Form S–8 or Rule 428 are necessary to permit an issuer's use of a single Form S–8, we are proposing several related clarifying amendments.[127]

For issuers utilizing this flexibility, the initial registration statement would be required to list the types of securities covered by the registration statement and identify the plan or plans pursuant to which the issuer intended to issue securities as of that date.[128] The full title of each plan would be required to be listed on the face of the registration statement on the appropriate line.[129] The Part I information delivered pursuant to Rule 428 with respect to each plan would be required to be specific to that plan. If any Part II information relates specifically to one plan, the issuer would be required to disclose that relationship clearly. The registration statement would not need to assign or allocate the securities to particular incentive plans. In this way, the form may be used to create a pool of registered shares that may be issued under the issuer's various incentive plans as necessary. However, issuers would need to track their offers and sales of securities to ensure they have sufficient capacity registered in order to fulfill the needs of the various incentive plans identified on the form.

In the Concept Release, the Commission solicited comment on whether the ability to file a single Form S–8 with respect to multiple plans and pay filing fees based on the aggregate dollar amount of securities to be registered would effectively reduce administrative burdens. Commenters were generally supportive of the Commission permitting the use of a single Form S–8 to register securities to be issued under multiple plans.[130] One commenter stated that a single ''omnibus'' Form S–8 registration statement would reduce administrative burdens of registering transactions for multiple plans.[131] According to another commenter, issuers find it to be a ''frustrating limitation'' that currently the pools of securities registered for offer and sale pursuant to separate plans on separate Forms S–8 cannot be used interchangeably.[132] Other commenters stated that while it may not be practicable for issuers to include all plans in a single Form S–8, they would benefit from combining at least some with similar characteristics,[133] with one of these commenters noting that 401(k) plans are administered separately from long-term incentive plans.[134]

We believe that clarifying the ability to use Form S–8 to create a pool of registered shares that may be issued under the issuer's various incentive plans will promote efficiency and flexibility because it will eliminate any doubt about whether authorized but unissued shares under a plan that expires would be immediately available for issuance under another authorized plan.[135] In addition, this clarification will reduce administrative burdens for those issuers that now believe they must use a separate Form S–8 for each plan. Specifically, issuers using a single Form S–8 to register the offer and sale of shares issuable pursuant to multiple plans simultaneously could avoid collecting signatures for multiple, independent Form S–8 filings and multiple consents of auditors and other experts whose reports are incorporated by reference.[136] In addition, issuers are required to file the consent of auditors with respect to audit opinions appearing in Exchange Act reports that are incorporated into Securities Act registration statements.[137] In such a situation, issuers using a single Form S–8 registration statement would only need to inform the auditors that there is a single Form S–8 into which the auditor's opinion is being incorporated by reference (along with any other outstanding registration statements on other forms).

Furthermore, we note that when shares are offered pursuant to a plan previously identified on the Form S–8, issuers must continue to prepare and deliver a plan-specific prospectus, according to current requirements, and thus investors would continue to receive the same information as is currently required for any Form S–8 offering.[138] Issuers also retain the option to register securities to be issued pursuant to individual incentive plans on separate Forms S–8.

Request for Comment:

48. Is the clarification regarding the ability of issuers to allocate securities among incentive plans on a single Form S–8 sufficient, or is additional guidance needed? Should we instead adopt amendments to prohibit allocation of securities among incentive plans?

49. Would allocation of securities among incentive plans on a single Form S–8 result in a more efficient process of registration?

50. Would allocation of securities among incentive plans result in disclosure that is confusing to investors?

51. Are there additional or different amendments (other than the proposed changes to the cover page of Form S–8) that we should make to facilitate the allocation of securities among various incentive plans?

3. Addition of Securities or Classes of Securities to Form S–8

In addition to adding plans to a Form S–8, from time-to-time, issuers may find that they need to add additional securities to the registration statement as well. Accordingly, after considering the comments received on the Concept Release, we are proposing amendments to Rule 413 that would permit issuers to add securities to an existing Form S–8 by filing an automatically effective post-effective amendment.

The Concept Release solicited comment on whether issuers should be

[126] We note that this clarification regarding allocation of securities will not apply to defined contribution plans if the amendments are adopted as proposed. Forms S–8 registering securities to be offered and sold pursuant to defined contribution plans will be deemed to have registered an indeterminate amount of securities to be offered and sold pursuant to those plans. *See* Section III.B.1, *infra* and Proposed Rule 416(d).

[138] *See* 17 CFR 230.428 and Part I of Form S–8.

able to add securities to an existing Form S–8 by automatically effective post-effective amendment. As certain commenters noted, Rule 413 currently does not permit an issuer to register the offer and sale of additional securities by means of a post-effective amendment, and therefore an issuer must instead file a new Form S–8 to register the offer and sale of those securities.[139] A few commenters supported enabling an issuer to add securities to its existing Form S–8 by automatically effective post-effective amendment.[140] One of these commenters stated that this would be necessary in order to allow a single Form S–8 to cover securities offered under new plans established by the issuer and new authorizations of shares under then-existing plans.[141] Another commenter supported this approach noting that it would create a pool of shares that could be issued under the issuer's various benefit plans as necessary.[142]

We are proposing to amend Rule 413 to permit issuers to register the offer and sale of additional securities or classes of securities on Form S–8 by post-effective amendment.[143] Under the proposed amendments, an issuer that has an effective registration statement for a previous incentive plan, would no longer be required to file a new Form S–8 to register the offering of additional shares under an existing or new incentive plan.[144] Instead, the issuer could file an automatically effective post-effective amendment to the existing Form S–8 to register the offer and sale of the additional securities.[145] Similarly, if an issuer were to adopt a new employee benefit plan which made available a new class of security on a compensatory basis,[146] the issuer would only be required to file an automatically effective post-effective amendment to its existing Form S–8 to add the new plan and the new class of security to the registration fee table and any additional disclosure [147] that would be required to inform investors about the new class of securities.[148] However, issuers adding new classes of securities in this manner would be required to satisfy all of the requirements of the form upon filing the post-effective amendment. This would include either filing the information required by Item 4. Description of Securities in the post-effective amendment to Form S–8 or incorporating such information by reference if the class has already been registered pursuant to Section 12 of the Exchange Act.[149]

Proposed Rule 413(c) would provide additional flexibility in that issuers registering compensatory offerings on Form S–8 would not need to predict how many securities would be required to fulfill obligations under each individual plan or even the types of securities that might be authorized for issuance pursuant to a plan in the future. For example, assume an issuer has an existing Form S–8 on file and intends to adopt a new incentive plan that would include awards in the form of issuer stock, stock options, restricted stock, stock appreciation rights or other share-based awards. Upon taking the necessary steps to approve the incentive plan and obtaining any necessary approvals to register the offer and sale of shares to be issued pursuant to the plan, the issuer could file an automatically effective post-effective amendment to its existing registration statement to name the newly authorized incentive plan on the cover page and provide all of the disclosures required by Rule 428 and Form S–8 for the new plan.[150] In the same post-effective amendment, the issuer could add the securities associated with the plan to the registration statement by listing the securities in the Calculation of Registration Fee table and checking the proposed new checkbox on the cover page of the amended Form S–8 to indicate that the sale of the newly included securities is registered pursuant to proposed Rule 413(c).[151] If this issuer later takes the necessary steps to increase the number of shares issuable under the plan, a new post-effective amendment could be filed that would register the offer and sale of the additional securities.[152] Similarly, if an issuer takes the necessary steps to adopt a new plan to include a new class of securities such as preferred stock, the issuer could file a post-effective amendment to the existing Form S–8 to add both the new class of securities and new plan to the registration statement simultaneously.[153]

Alternatively, assume an issuer that has maintained a 401(k) employee savings plan for several years decides to add its common stock as an investment option for employee contributions to the plan. As a result, both the 401(k) plan interests and the employer stock to be offered as an investment option would become subject to Securities Act registration requirements.[154] The ability to add new plans to an existing Form S–8 used in combination with proposed Rule 413(c), would permit both the plan interests and the issuer's stock to be added to the issuer's existing Form S–8 for an already-existing plan.[155] The issuer would be required to file a post-effective amendment, which would include the offer and sale of any shares of employer stock and plan interests required to be registered,[156] and the types of information described in the previous example.

Request for Comment:

52. Should we permit issuers to add securities to an existing Form S–8 registration statement by means of automatically effective post-effective amendments, as proposed?

53. Are there concerns associated with allowing issuers to register the offer and sale of additional securities or classes of securities by post-effective amendment to an existing Form S–8 instead of on a new registration statement?

[139] *See* letter from Sullivan; Rule 413; and Form S–8, General Instruction E.

[140] *See* letters from Davis Polk and NASPP.

[141] *See* letter from Davis Polk.

[142] *See* letter from NASPP.

[143] *See* Proposed Rule 413(c).

[144] The registration of the offer and sale of additional securities pursuant to proposed Rule 413(c) could be accomplished in the same automatically effective post-effective amendment used to add a new plan to a registration statement, as described in Section III.A.1, *supra.*

[145] As proposed, the current method of registering additional shares of the same class on Form S–8 by filing a new registration statement pursuant to General Instruction E of the form also would remain available for use in registering additional securities.

[146] An issuer adopting a new plan that did not include a new class of security may be able to amend the registration statement in the manner described in Section III.A.1, *supra,* to the extent that the new plan did not require the addition of new securities.

[147] As discussed in Section III.A.1, *supra,* adoption of a new plan to be included in the registration statement would require disclosure of a material change in the existing plan of distribution, as well as other information.

[148] *See, e.g.,* Item 4 Form of Form S–8, Description of Securities.

[149] *See* Item 3(c) of Form S–8.

[150] *See* Section III.A.1, *supra.*

[151] *See* Proposed Rule 413(c) and the proposed checkbox on Form S–8.

[152] *Id.*

[153] *See* Section III.A.1, *supra,* and Proposed Rule 413(c).

[154] The proposed amendments would not eliminate the requirement to register plan interests as separate securities. Nevertheless, where a registration statement on Form S–8 relates to securities to be offered pursuant to an employee benefit plan, including interests in such plan that constitute separate securities required to be registered under the Securities Act, such registration statement is deemed to register an indeterminate amount of such plan interests. No separate fee is required with respect to the registered plan interests. *See* Rule 416(c) and Rule 457(h)(2). Furthermore, the proposed amendments would not eliminate the requirement to file an Exchange Act annual report on Form 11–K [17 CFR 249.311] with respect to those plan interests.

[155] *See* Proposed Rule 413(c).

[156] If all of the amendments proposed today are adopted, in this circumstance, for the 401(k) plan, the issuer would be deemed to register an indeterminate amount of defined contribution plan securities on the registration statement. *See* Section III.B.1, *supra,* and Proposed Rule 416(d).

54. Would the interplay between adding new plans and registering the offer and sale of new securities by post-effective amendment to Form S–8 cause problems for particular types of issuers or plans? If so, please explain how.

55. If we adopt proposed Rule 413(c) for the registration of the offer and sale of additional securities on Form S–8, should we rescind current General Instruction E, which permits the filing of a new, abbreviated registration statement to register the offer and sale of additional securities of the same class relating to a plan for which a Form S–8 registration statement is already effective?

B. Fee Calculation and Fee Payments on Form S–8 for Defined Contribution Plans

As described below, we are proposing changes that we believe should ease potential challenges for issuers with respect to timing and calculation of fees for offerings of securities pursuant to defined contribution plans on Form S–8. First, we propose to amend Rule 457 to require registration based on the aggregate offering price of all the securities registered. Second, we are proposing a new fee payment method that would require issuers to pay the fee for all sales made pursuant to defined contribution plan offerings during a given fiscal year no later than 90 days after the issuer's fiscal year end. We are also soliciting additional comments on the topic of fee calculation to determine whether we should clarify how issuers should count shares or amounts offered and sold pursuant to defined contribution plans.

Several commenters noted difficulties currently involved with administering the registration of offers and sales pursuant to defined contribution plans and offered solutions that the commenters believed would reduce complexity and cost of compliance while retaining investor protection.[157] For defined contribution plans, when employees elect to invest in issuer securities, the plan may acquire additional shares from the issuer, buy shares on the open market, or allocate shares divested by other plan participants to fulfill the purchase.[158] As securities are sold to employees pursuant to the plan, issuers are required to account for the number of shares sold against the specified number of shares registered on the Form S–8. As described by one commenter, the issuer must estimate the number of shares to register on the original Form S–8, balancing the costs of registering a potentially excess number of securities for which fees have been paid,[159] but that may go unsold against the possibility that the issuer could inadvertently violate Section 5 if the number of shares sold exceeds the number registered under the plan.[160]

We believe the proposed rules should help resolve many of the share-counting difficulties that arise when registering shares to be offered and sold pursuant to defined contribution plans such as 401(k) plans. For this purpose, we propose to define a ''defined contribution plan'' as ''an employee benefit plan (as defined in § 230.405) that provides for specified or determinable contributions by the employee, employer, or both to an individual account for each employee participant where the amount of benefits paid depends, in addition to the level of contributions, on the return on the investment.'' [161]

Request for Comment:

56. As proposed, would the definition of ''defined contribution plan'' properly encompass the types of plans that would benefit from the fee calculation and payment methods outlined below? Should the definition be revised? If so, should it be broader or narrower?

1. Calculation of the Registration Fee Using the Aggregate Offering Price

One commenter recommended that the Commission permit registration of a dollar amount corresponding to an indeterminate number of shares because tracking dollar inflows to issuer stock funds would be less onerous than tracking the number of shares that remain available.[162] The commenter noted that because defined contribution plans are unitized plans whose participants own units of a fund that holds issuer stock, plan administrators frequently experience difficulty tracking the number of shares of issuer stock that have been offered and sold under a Form S–8.[163] As proposed, issuers relying on the new rules would be deemed to register an offering amount corresponding to an indeterminate number of securities that would be available for offer and sale through the issuer's defined contribution plans. Currently, issuers may be calculating the registration fee based on the maximum aggregate offering price of all the securities (*e.g.,* common stock, debt securities, convertible debt securities, preferred stock, and warrants) listed in the ''Calculation of Registration Fee'' table.[164] We are proposing amendments to Rule 457 and Form S–8 to require that the registration fee for a defined contribution plan be calculated in a similar way, based on the aggregate offering price of all the securities sold.[165] Upon the yearly calculation and payment of the registration fee within 90 days of the issuer's fiscal year end, as described below,[166] issuers that had registered an indeterminate number of securities on the Form S–8 for defined contribution plans would need to calculate their registration fee in accordance with proposed Rule 457(h)(4) by multiplying the aggregate offering price of securities sold during the fiscal year by the fee payment rate in effect on the date of the fee payment, and then pay such fee in accordance with the proposed requirements of Rule 456(e).

Under the proposed amendments, an issuer would calculate the fee based, in part, on the funds that plan participants have allocated via their payroll deductions to the purchase of issuer stock. Similarly, if an issuer contributes shares of issuer stock to satisfy its obligation to make matching contributions, the dollar amount of the matching obligation satisfied would be aggregated with the overall offering amount for the purpose of calculating the fees owed.

We believe that a fee calculation based on the aggregate offering amount of securities sold pursuant to defined contribution plans could simplify plan administration by eliminating the need

[157] *See* letters from ABA, Davis Polk, Shearman and Sullivan.

[158] For a discussion of sales and registration of securities to be issued pursuant to employee benefit plans, *see generally Employee Benefit Plans: Interpretations of Statute,* Release No. 33–6188 (Feb. 1, 1980) [45 FR 8960 (Feb. 11, 1980)] (''1980 Employee Benefit Plans Release''), and *Employee Benefit Plans,* Release No. 33–6281 (Jan. 15, 1981) [46 FR 8446 (Jan. 27, 1981)] .

[159] We note that registration fee payments pursuant to Section 6(b)(1) of the Securities Act [15 U.S.C. 77f(b)(1)] are not refundable. *See* 17 CFR 230.111.

[160] *See* letter from Sullivan.

[161] Proposed amendment to Rule 405.

[162] *See* letter from Shearman.

[163] *Id.*

[164] *See* Rule 457(o).

[165] *See* Proposed Rule 457(h)(4) and proposed Note 3 under Calculation of Registration Fee. We understand that issuers may have previously used existing Rule 457(o) to calculate registration fees based on the maximum aggregate offering price of the securities registered on Form S–8 for defined contribution plans. If these amendments are adopted, all issuers registering shares to be offered and sold pursuant to defined contribution plans, including issuers previously using 457(o) to calculate registration fees, would thereafter make use of Rule 416(d) to register an indeterminate amount of securities to be offered and sold pursuant to defined contribution plans and Rules 457(h)(4) and 456(e) to calculate and pay the required fee, respectively. Where necessary, issuers should refer to such fee calculation in the ''Calculation of Registration Fee Table'' in the Form S–8 registration statement or post-effective amendment to Form S–8 filed to pay the required fee.

[166] *See* Section III.B.2, *infra.*

to track offers and sales of individual shares of issuer stock within unitized plans and should reduce the risks of violating Section 5 by allowing offers and sales to be accounted for and paid for based on a known aggregate offering dollar amount after contributions are made to the issuer stock fund. For plans that are not defined contribution plans, such as incentive plans, we believe that issuers will continue to register a maximum number of securities issuable under the plan that are covered by the registration statement as is currently contemplated by Rule 457(h)(1). An issuer may rely on these provisions on the same registration statement if the fee table clearly explains how the registration fees are being calculated. For example, the proposed amendments would permit an issuer to use Rule 457(h)(1) to register the offer and sale of a specific number of securities that will be allocated to incentive plans and also to use proposed Rule 457(h)(4) to register the offer and sale of an indeterminate amount of securities pursuant to defined contribution plans on a single Form S–8. Alternatively, issuers may continue to file separate Forms S–8 for plans of different types.

Request for Comment:

57. Should we amend Rule 457 and Form S–8 to require registration based on the aggregate offering price of all the securities registered pursuant to defined contribution plans, as proposed?

58. For defined contribution plans, would registration of the offer and sale of an aggregate amount of securities mitigate difficulties in counting registered offers and sales?

59. Should the proposed fee calculation method be optional for issuers registering the offer and sale of shares to be issued pursuant to defined contribution plans?

60. Should we adopt a transition period for the proposed amendments to Rule 457 and Form S–8? If so, how long should the transition period be?

61. Should the proposed requirement to calculate registration fees based on an aggregate offering amount of securities be required only for defined contribution plans? Are there other types of plans whose administration would be simplified by a similar fee calculation?

62. Would there be difficulties in using separate registration and fee instructions (*e.g.,* Rule 457(h)(1) and proposed Rules 416(d) and 456(e)) on a single Form S–8? If so, would additional guidance on how the instructions apply be helpful?

63. Would issuers register the offer and sale of shares for defined contribution plans on the same registration statement as that used for other types of plans?

64. If an issuer wishes to use a single Form S–8 for all plans, would the proposed rules create difficulties for issuers that seek to register and pay fees for sales pursuant to incentive plans on the same form for which defined contribution plans are registered?

2. New Fee Payment Method for Sales Pursuant to Defined Contribution Plans

As discussed in the previous section, issuers may face difficulties with respect to calculating the number of securities that have been sold pursuant to defined contribution plans. In addition to the new fee calculation method described above, we are proposing a modernized approach to registration fee payment that would provide for the registration on Form S–8 of offers and sales of an indeterminate amount of securities of the issuer to be issued pursuant to defined contribution plans.[167] As proposed, the issuer would subsequently pay the securities registration fees on a delayed basis, in arrears.

In general, Form S–8 issuers today are required under the Securities Act to pay a registration fee to the Commission at the time of filing a registration statement, which is not refunded if the issuer does not sell the related securities.[168] As noted by one commenter, for defined contribution plans, the current fee payment method results in issuers estimating the potential number of future sales off the registration statement, both with respect to the initial employee deferrals and subsequent investment elections, based on historical usage and expected future participation and election rates.[169] Because this calculation and fee payment must occur at the time the registration statement is filed, issuers may over- or underestimate the number of securities to be offered and sold pursuant to the registration statement.

In order to alleviate these difficulties, several commenters suggested that for securities to be issued pursuant to a plan, issuers should be permitted to register the offer and sale of an indeterminate amount of securities initially and then pay a periodic fee based on the total sales over a given period.[170] Commenters that supported the registration of the offer and sale of an indeterminate amount of shares suggested different methods of calculating the fee owed for registration. One suggested a fee payment based on the size of the issuer (*e.g.,* market capitalization).[171] Some commenters suggested an issuer should measure usage by totaling the sales that occurred during the prior fiscal year and pay the fee based on the amount of shares offered and/or sold on an annual basis,[172] such as at the time of the filing of the Form 10–K.[173] Other commenters supported a pay-as-you-go fee payment system similar to that which currently exists for well-known seasoned issuers (''WKSIs'') by which WKSIs are able to pay filing fees on an as-needed basis rather than when the registration statement is initially filed.[174] Several commenters recommended a cure provision to remedy inadvertent or nominal errors, enabling issuers to pay the registration fee after the original due date if the issuer makes a good faith effort to pay the fee on a timely basis and then pays the fee within a certain number of business days after the original due date.[175] One commenter suggested that this type of fee payment method could be optional for issuers that have difficulty estimating the amount of securities to be offered and sold pursuant to the registration statement and calculating the fee under the current system.[176]

Consistent with our goal of further simplifying registration on Form S–8 and in order to help alleviate the difficulties that currently exist when registering the offer and sale of securities pursuant to defined contribution plans, we are proposing a new fee payment method for defined contribution plans. We have proposed the annual fee payment method because we believe it would permit issuers to accurately determine how many shares were sold pursuant to defined contribution plans in the covered period after-the-fact, and therefore should eliminate the problem of inadvertently registering the offer and sale of too many or too few shares in these offerings. Under the new method, when registering the offer and sale of shares pursuant to defined contribution plans, issuers would be deemed to have registered the offer and sale of an indeterminate amount of securities

[167] *See* Proposed Rules 416(d) and 456(e).

[168] Section 6(b)(1) of the Securities Act [15 U.S.C. 77f(b)(1)]. In some cases, unused filing fees may be carried forward to a new registration statement. *See* Rule 457(p) and the limitations described in note 124, *supra.*

[169] *See* letter from Sullivan.

[170] *See* letters from ABA, Chamber, Davis Polk, Postmates, and Sullivan.

[171] *See* letter from Davis Polk.

[172] *See* letters from ABA and Sullivan.

[173] *See* letter from ABA.

[174] *See* letters from Chamber and Council. *See also* the definition of well-known seasoned issuer in Rule 405.

[175] *See* letters from ABA, Council and Davis Polk.

[176] *See* letter from Sullivan.

pursuant to the plan.[177] We believe the proposed amendments would therefore eliminate the need for issuers to estimate the number of shares that will be sold pursuant to the registration statement and avoid the possibility that an issuer would inadvertently sell more shares than it had estimated. The amendments also would eliminate the need for issuers to register additional offers and sales under these plans either by using a new registration statement or proposed Rule 413(c).

Under the proposed annual fee payment method, any fees associated with sales made pursuant to a defined contribution plan in a given fiscal year would be required to be paid within 90 calendar days after the plan's fiscal year end.[178] We believe 90 days after the closing of the plan's fiscal year should provide issuers ample opportunity to calculate the total amount of the shares sold and the associated fee. An issuer would pay the fee by filing an automatically effective post-effective amendment to the Form S–8 registration statement. This post-effective amendment need only contain the cover page of the registration statement, including the calculation of the registration fee table, and the required signatures. In any such post-effective amendment, an issuer would also be required to check a newly proposed box on the post-effective amendment cover page to indicate that the amendment is being filed to pay filing fees using the method required by Rule 456(e).[179] This post-effective amendment would only be used for the purpose of the payment of fees and not for any other purpose such as adding plans or securities to the registration statement as proposed elsewhere in this release.[180]

Issuers would continue to rely on the applicable provision of Rule 457 to calculate the fee to be paid. As described earlier, if the proposed amendments are adopted, the applicable provision for defined contribution plans would be Rule 457(h)(4). Consistent with current requirements, issuers would be required to clarify their fee calculation by providing specific details relating to the fee calculation in notes to the Calculation of the Registration Fee table, including references to the applicable provisions of Rule 457, if the basis of the calculation is not otherwise evident from the information presented in the table.[181] If necessary, this would include specifying whether the issuer is relying on existing Rule 457(h)(1) or is otherwise registering the offer and sale of an indeterminate number of securities pursuant to a defined contribution plan and will pay the fees after fiscal year-end using proposed 457(h)(4) and Rules 456(e) for the calculation and payment of the fees, respectively.

In addition, proposed Rule 456(e) would include provisions designed to clarify the status of defined contribution plan securities where the fee is paid in accordance with the proposed rule as well as other provisions designed to ease the administration of the fee payments in certain circumstances. These proposed provisions include:

- Instruction 1 to Rule 456(e)—on how to count the 90-day period after the end of a fiscal year;
- Rules 456(e)(2) and (e)(3)—addressing the treatment of the offerings for purposes of Securities Act Sections 5 and 6(a).
- Rule 456(e)(4)—addressing when an issuer ceases operations or enters into a merger or other transaction between the sale of securities on Form S–8 and when the registration fees are due; and
- Rule 456(e)(5)—on the amount of interest due for late payments.

As proposed in Rule 456(e)(4), if an issuer ceases operations whether upon the merger, liquidation, or sale of substantially all issuer's assets, the plan's fiscal year would be deemed to end on the date of the merger, liquidation, or sale of substantially all issuer's assets for the purposes of Rule 456(e). Ninety days after such date, the issuer would be required to make a final payment for its securities that were sold pursuant to the defined contribution plan as of the plan's last fiscal year-end.

The fee payment method we are proposing today would be mandatory for issuers that register the offer and sale of shares pursuant to defined contribution plans, as we believe the after-fiscal year-end fee calculation would be easier for both issuers and the staff to administer. The proposed rule would not affect the amount of fees owed by issuers for previously registered defined contribution plan offerings on Form S–8 that paid the fee upon filing. If the rule is adopted as proposed, when the rule becomes effective, all newly filed registration statements on Form S–8 for offerings pursuant to defined contribution plans would be deemed to register the offer and sale of an indeterminate amount of employer securities, and the filing fee for those registration statements would be paid not later than 90 days after the plan's fiscal year end.

Request for Comment:

65. Should we adopt a new registration fee payment method that would require issuers to pay the fee for all sales made pursuant to defined contribution plan offerings during a given fiscal year no later than 90 days after the plan's fiscal year-end, as proposed?

66. Would the proposed registration fee payment method help to address administrative issues regarding the difficulty of keeping track of offers and sales registered pursuant to defined contribution plans?

67. Would the proposed fee payment method be workable in practice? If not, what changes should we make to render it more workable?

68. Is 90 days after the plan's fiscal year-end an appropriate period of time in which to calculate the required fee payment? If not, would a shorter or longer period be more appropriate?

69. Instead of paying the fee 90 days after the plan's fiscal year-end, should the rule be revised to require payment 90 days after the issuer's fiscal year-end? Should the payment due date be tied to some other date?

70. Given that these proposed rules are designed to prevent inaccuracies in estimating the amounts to be offered and sold under, and the calculation of registration fees for, defined contribution plans, should we consider adopting an ''insignificant deviations'' provision for immaterial or unintentional failures to comply with the proposed rules?

71. Should the proposed fee payment method be optional rather than mandatory?

72. Should the new registration fee payment method be limited to certain classes of issuers (*e.g.,* WKSIs or issuers with a proven compliance record)?

73. Are there other types of plans for which the new fee payment method would be beneficial? For example, should this payment method apply to

---

[177] *See supra* note 165.

[178] *See* Proposed Rule 456(e).

[179] The Commission has recently proposed amendments that would modernize filing fee disclosure and payment methods. The proposed amendments would revise most fee-bearing forms, schedules, statements, and related rules to require each fee table and accompanying disclosure to include all required information for fee calculation in a structured (*i.e.,* tagged) format. As proposed, the amendments would add the option for fee payment via Automated Clearing House (''ACH'') and eliminate the option for fee payment via checks and money orders. We expect that improvements in the payment validation process made possible by the proposed tagging of the fee table and accompanying information with pre-submission validation by the filer would provide more certainty to issuers that the proper filing fee has been paid. *See Filing Fee Disclosure and Payment Methods Modernization,* Release No. 33–10720 (Oct. 24, 2019) [84 FR 71580]. To the extent these changes are adopted, we expect that technical changes may be required to conform the new method proposed here to the other changes being proposed.

[180] *See* Proposed Rule 456(e)(1).

[181] *See* Note 2 to the Calculation of Registration Fee Table.

nonqualified deferred compensation plans?

74. Instead of requiring the registration fees for defined contribution plans to be paid on an annual basis, as proposed, should we permit all issuers registering securities for defined contribution plans on Form S–8 to make registration fee payments on a pay-as-you-go basis, as WKSIs are permitted to do for capital-raising offerings today? Should we adopt a pay-as-you-go fee payment procedure for other types of plans?

75. As proposed, the payment of the fee would require the filing of an automatically effective post-effective amendment to Form S–8 not later than 90 days after the plan's fiscal year-end. Are there any problems with using this existing form type for the fee payment? In the alternative, should we instead require the fee payment with a different form or should we adopt a new form dedicated to the payment of the fees? If so, what information should that form require?

76. If we were to require that filing fee information be tagged, is there a reason fee-tagging should not be required in the proposed post-effective amendments to Form S–8?

77. In the case of a merger, liquidation, or sale of substantially all of an issuer's assets, would the proposal to deem the closing of the plan's fiscal year to be the date of such transaction work well in practice? Are there better ways to ensure correct payment of fees in these situations?

78. Is a transition period needed to implement the proposed fee payment method? If so, what would be an appropriate transition period? For example, should we delay the effective date of the new fee payment method by one year?

79. If the new fee payment method is adopted as proposed, are there any other rules or guidance we should adopt to ensure the fee payment rules work effectively?

3. Additional Requests for Comment on Counting the Shares Registered on Form S–8 for Defined Contribution Plans

We believe that the rules proposed today will aid issuers in paying accurate and timely fees when registering the offer and sale of securities pursuant to defined contribution plans. Below, we address some of the additional challenges associated with counting securities to be offered and sold pursuant to a registration statement on Form S–8 for defined contribution plans. One commenter requested clarification of how sales and purchases should be tracked and how any netting of shares affects the amount of offers and sales that should be registered.[182] Difficulties in estimating the number of shares to be offered and sold may arise, for example, when employees participating in a defined contribution plan divest their holdings in the issuer stock fund, and the divested shares are used to satisfy another employee's investment in the issuer stock fund pursuant to the plan.

Currently, Section 5 of the Securities Act requires registration of the offer and sale of the securities to the investing employee under the plan because it is a separate transaction from the initial offer and sale of the securities to the divesting employee. Although current practice may vary, because each offer and sale of a security needs to be registered or exempt from registration,[183] we preliminarily believe that when employees divest and other employees invest in issuer securities within the plan, an issuer should not ''net'' or ''offset'' these plan transactions against each other in determining the number of shares to deduct from the total number of shares to be offered and sold pursuant to the Form S–8. If such securities become available for a subsequent sale, after their earlier sale pursuant to a registration statement, we preliminarily believe the fact that those shares may be the ''same'' shares that were part of a previous, registered transaction does not negate the fact that the subsequent sale involves a different transaction by the issuer and the plan.

We are requesting additional input from commenters that would help us clarify how sales of shares pursuant to defined contribution plans should be counted for purposes of the Securities Act. In addition, if we adopt the changes to the fee payment calculation rules [184] described above, as proposed, issuers will not be able to ''net'' or ''offset'' employee investments against employee divestments when calculating the fees owed for sales made pursuant to the defined contribution plan. We are requesting additional comments on whether this would be an appropriate result.

Request for Comment:

80. Does counting the sales of securities pursuant to a defined contribution plan on a gross basis, as described above, cause difficulty in administering defined contribution plans? Would Commission guidance indicating that ''netting'' or ''offsetting'' is not permitted eliminate or further mitigate this difficulty?

81. Should we permit the netting or offsetting of sales made within the defined contribution plan so that securities that were made available due to employee divestment from the issuer stock fund and sold pursuant to employee investment elections would not be counted against the number of securities for which sales were registered on Form S–8?

82. Should we adopt the new fee payment method described above without netting or offsetting as proposed? Alternatively, if we adopt the new fee payment method, should we permit the netting or offsetting of sales made within the defined contribution plan to apply to the payment of fees for defined contribution plans?

83. Should we provide additional guidance on this topic in the adopting release or elsewhere?

C. Conforming Form S–8 to Rule 701

The proposed amendments to Rule 701 include, among other things, changes to the scope of individuals eligible to receive shares pursuant to the exemption.[185] Several commenters indicated the scope of eligible individuals should remain consistent for Rule 701 and Form S–8 and recommended that, to the extent the Commission changes the scope of individuals eligible to receive securities under Rule 701, similar changes should be made to the scope of individuals eligible to receive securities where the offer and sale is registered on Form S–8.[186] For example, one commenter stated that different eligibility standards would create unnecessary compliance burdens and impede the ability of issuers to implement consistent and beneficial equity compensation strategies without regard to reporting status.[187] A different commenter noted that Rule 701 and Form S–8 promote the same goals (including recognizing the difference in the relationship between issuer and recipient in compensatory offerings compared to capital-raising transactions), and given the fact that issuers transition from non-reporting to reporting (or vice versa), suggested the two regimes should be aligned to the extent practicable.[188] In view of the amendments we are proposing to Rule 701, we are also proposing amendments to harmonize the scope of persons who are eligible to receive securities

[184] *See* Proposed Rules 456(e) and 457(h)(4).

[185] *See* Sections II.C. 1 and 2, *supra.*

[186] *See* letters from ABA, Chamber, Davis Polk, NASPP and Sullivan.

[187] *See* letter from NASPP.

[188] *See* letter from Sullivan.

pursuant to the Rule 701 exemption with those eligible to receive securities where the offer and sale is registered on Form S–8.

1. Scope of ''Former Employee''

As discussed above, we are proposing to expand Rule 701 eligibility for former employees to specified post-termination grants and to former employees of acquired entities.[189] We believe that expanding Form S–8 eligibility to encompass former employees in these ways could benefit both issuers and securities recipients by facilitating compensatory transactions consistent with the purposes of the form.

Accordingly, we propose to amend Form S–8 such that it may be used to register acquisitions of issuer securities by former employees as compensation for such a former employee's service to the issuer during a performance period ending within 12 months preceding the former employee's resignation, retirement or other termination.[190] We are also proposing that former employees of an acquired entity would be eligible to receive securities the offer and sale of which is registered on the form.[191] These individuals would be able to participate in an acquiring issuer's employee benefit plan with respect to equity awards granted in connection with the acquisition to replace awards issued by the target while employed there.

Request for Comment:

84. Should we conform the ''former employee'' eligibility provisions of Rule 701 and Form S–8, as proposed? Are there any unique considerations with respect to including former employees in compensatory offerings registered on Form S–8?

2. Consultants and Advisors

As discussed above, we are proposing to amend Rule 701 to expand eligibility to certain consultants and advisors that have chosen to organize their business as an entity.[192] Form S–8 may not be used by issuers offering securities to consultants who set up passive investment vehicles for a non-compensatory or capital raising purpose.[193] Therefore, consistent with the compensatory purpose of Form S–8, we propose to make conforming amendments to the form with the same conditions as Rule 701, which we believe would prevent issuers from using Form S–8 to offer and sell securities to third-party investors who did not actually perform services for the issuer. We also are proposing conforming changes to the definition of ''employee benefit plan'' in Rule 405 [194] to ensure that the scope of consultants or advisors that are eligible to participate in an employee benefit plan is consistent with our changes to Form S–8.[195]

We believe the proposed limitations on the use of Form S–8 to offer and sell securities to consultants and advisors that organize as entities would mitigate the risk that the form would be used to compensate investors that do not provide bona fide services to the issuer or for capital-raising transactions. As is currently the case, the instruction would continue to condition consultant and advisor eligibility on the provision of bona fide services to the issuer that are not in connection with the offer or sale of securities in a capital-raising transaction and do not directly or indirectly promote or maintain a market for the issuer's securities. In addition, the instruction would permit use of Form S–8 to compensate those entities that are owned by the individuals who are actually performing services for the issuer.

Request for Comment:

85. Should we adopt the same treatment of consultants and advisors under Rule 701 and Form S–8? Are there any unique considerations with respect to including consultants or advisors organized as entities in compensatory offerings registered on Form S–8?

D. Conforming Form S–8 Instructions With Current IRS Plan Review Practices

Item 8(b) of Form S–8 currently specifies that in lieu of providing an opinion of counsel regarding compliance with the requirements of ERISA or an Internal Revenue Service determination letter, as required by Item 601(b)(5)(ii) and (iii) of Regulation S–K,[196] the issuer may undertake to submit the plan and any amendments to the plan to the IRS in a timely manner and to make all changes required by the IRS in order to qualify the plan. The IRS, however, is only issuing determination letters for amendments to previously qualified plans under very limited circumstances.[197]

Given the IRS's changed practice, several commenters supported modifying or eliminating this requirement in Form S–8.[198] A few commenters stated that requiring the determination letter or legal opinion for plan modifications is overly burdensome on issuers and should be eliminated.[199] One commenter stated that it would be helpful to provide guidance that those issuers that have adopted a prototype or volume submitter plan may satisfy the IRS determination letter requirement by providing a copy of the IRS letter regarding the prototype or volume submitter plan that was issued to the sponsor of the plan that the issuer adopted.[200] The same commenter stated that the Item 8 undertaking should recognize the IRS correction program with respect to qualification of plans by having the issuer undertake to make corrections in order to maintain the qualification of the plan as required by the IRS.[201]

We are proposing amendments that take into account the IRS's changed practices for plan amendments, while continuing to protect investors with respect to the plan's compliance with ERISA. We propose to amend Item 8(b) to eliminate the requirement that issuers undertake to submit any amendment to the plan to the Internal Revenue Service.[202] We are likewise amending Item 601(b)(5)(iii) of Regulation S–K to remove the requirement to file a copy of the IRS determination letter that the amended plan is qualified under Section 401 of the Internal Revenue Code.[203] The proposal would revise Item 8(b) to permit an undertaking that issuers will maintain the plan's compliance with ERISA and will make all changes required to maintain such compliance in a timely manner. However, if the issuer does not provide the undertaking required by Item 8(b), as proposed to be revised, the requirements of Regulation S–K Item 601(b)(5)(iii) would continue to apply with regard to plan amendments and therefore require the issuer to file with respect to any amendment a legal opinion confirming compliance of the

[203] *See* proposed Item 601(b)(5)(iii) of Regulation S–K.

amended provisions of the plan with the requirements of ERISA.[204]

In addition, in lieu of compliance with Item 601(b)(5) and notwithstanding the undertaking required by Item 8(b) of Form S–8, the proposed amendments would eliminate the issuer-specific determination letter or opinion requirements in Item 601(b)(5)(ii) and the opinion requirement in Item 601(b)(5)(iii) for those issuers that adopt a third-party pre-approved plan [205] that has been approved by the IRS if such issuers file the IRS opinion letter [206] issued to the pre-approved plan's provider.[207] Issuers relying on proposed Item 8(c) would not need to obtain their own determination letter from the IRS or otherwise provide an opinion of counsel unless the issuer makes revisions to the pre-approved plan that may call into question whether the revised plan is still qualified.

Request for Comment:

86. Should we adopt the proposed amendments to conform the Form S–8 requirements to current IRS practices?

87. Do the proposed amendments provide investors adequate assurance of the plan's qualified status?

88. Do the proposed amendments ease administrative burdens for adopters of pre-approved plans? Are there any changes to the requirements for adopters of these types of plans that we should consider?

89. Is the undertaking for plan amendments with respect to maintaining ERISA qualification necessary? Are there alternative approaches to ensuring plan qualification under ERISA that would protect investors?

E. Revisions to Item 1(f) of Form S–8; Tax Effects of Plan Participation

We are proposing revisions to the disclosure requirements in Form S–8 to eliminate the description of the tax effects, if any, on the issuer.[208] One commenter asked us to reconsider the Item 1(f) requirement to describe the tax effect that may accrue to employees as a result of participating in a plan, and the tax effects, if any, on the issuer.[209] In a Form S–8, investors are not making a decision whether to approve or disapprove a plan; rather, the investment decision is whether to participate in an existing plan. We are therefore proposing revisions to Form S–8 that would remove the requirement to briefly describe the tax consequences of the plan for the issuer.

With respect to the requirement to disclose the tax consequences for employees, the same commenter stated that tax effects depend on individual circumstances, which can vary among participants, especially for consultants in light of the new deduction for qualified business income under IRC Section 199A.[210] Nevertheless, we are not proposing to eliminate the requirement in Form S–8 to describe the tax consequences to employees [211] and to state whether or not the plan is qualified under Section 401(a) of the Internal Revenue Code. We continue to believe such disclosure could provide relevant information for investors as they assess the tax consequences of their participation in the plan. We are soliciting further comments, however, about the usefulness of this disclosure for investors.

Request for Comment:

90. Should we revise the disclosure requirements in Form S–8 to eliminate the description of the tax effects, if any, on the issuer, as proposed?

91. Are disclosures regarding the tax effects of plan participation useful to investors in the context of a Form S–8 registration statement? If so, how?

92. Are there other ways, outside of the registration statement, that investors receive the same information regarding the tax consequences to them of plan participation, such that disclosure from the issuer would not provide additional or material information?

93. Are disclosures regarding the description of tax effects of plan participation that may accrue to employees helpful? If not, how should we address this concern?

F. Additional Requests for Comment About Form S–8

1. Plan Trustee Signatures on Form S–8

Where interests in a plan are being registered, Form S–8 requires the registration statement to be signed by the plan. For the plan signature, Form S–8 indicates that it may be signed by the trustees or other persons who administer the employee benefit plan. Some commenters stated that it is unnecessary and burdensome to require the plan trustee to sign the Form S–8.[212] Instead, the commenters suggested the employer/sponsor of the plan whose interests are being registered should be able to sign Form S–8 on behalf of the plan.[213]

As noted above, we continue to believe that Form S–8 plays a useful and effective role in registering the offer and sale of securities issued in compensatory offerings under the Securities Act. This is true, in part, because the Securities Act registration statement provides employees with the liability protections of Section 11 and Section 12(a)(2) in the case of material misstatements or omissions of information contained in the registration statement or prospectus, respectively.[214] Securities Act Section 11 imposes liability on every person who signs the registration statement.[215] Furthermore, the plan and its administrators are responsible for a portion of the disclosure investors will receive in connection with the registered offering,[216] and the signature of the plan trustee or other persons who administer the employee benefit plan acknowledges that responsibility. As a result, we are not proposing changes to the signature requirements of Form S–8 at this time. We are, however, soliciting additional comment about the legal and practical consequences of the commenters' recommended approach.

Request for Comment:

94. Assuming that having the employer sign on behalf of the plan would be legally sufficient to meet the requirements in Section 11, such that liability would attach for plan disclosures included in the registration statement, could a plan legally authorize the employer to sign on its behalf? If so, how would this be done?

---

[205] We note that the pre-approved program, as described in Rev. Proc. 2015–36, 2015–27 I.R.B. 20 provided for two types of pre-approved plan programs: Master & prototype (''M&P'') and volume submitter. Those programs were merged into a single pre-approved program in Rev. Proc. 2017–41, 2017–29 I.R.B. 92 (''Rev. Proc. 2017–41'').

[206] *See* Section 4.06 of Rev. Proc. 2017–41.

[207] *See* proposed Item 8(c) of Form S–8.

[208] *See* proposed revisions to Item 1(f) of Form S–8.

[209] *See* letter from Davis Polk.

[210] *See* letter from Davis Polk, referencing IRC Section 199A.

[211] General Instruction A.1(a)(1) defines ''employee'' to include certain consultants and advisors.

[212] *See* letters from Council and Davis Polk.

[213] *See* letters from Council and Davis Polk.

[214] *See* the signature block of Form S–8, which requires the trustees or other persons who administer the employee benefit plan to have duly caused the registration statement to be signed on its behalf. *See also* 15 U.S.C. 77k and 77*l*(a)(2).

[215] *See* Section 11(a)(1) of the Securities Act [15 U.S.C. 77k(a)(1)].

[216] Where plan interests are being registered, Form S–8 requires the plan, at the time of filing, either to (a) have been subject to Exchange Act Section 15(d) for at least 90 days and be current in its filings thereunder; or (b) file, concurrently with the filing of the Form S–8 registration statement, an annual report on Form 11–K for its latest fiscal year (or, if the plan has not yet completed its first fiscal year, for a period ending not more than 90 days prior to the filing date). However, the requirement to file an annual report on Form 11–K does not apply if the plan was established less than 90 days prior to the Form S–8 filing date. Therefore, the form may be used for the initial registration of interests in a newly established plan.

2. Bridging the IPO Gap for Employee Stock Purchase Plans

It is common for issuers that are completing an initial public offering (''IPO'') to also implement an employee stock purchase plan (''ESPP''). Such stock purchase plans permit employees to purchase stock of their employer through payroll deductions or otherwise, typically at a discount to market.[217] The stock may be acquired either directly from the employer or in open market purchases effected by the plan.

A few commenters cited difficulty in implementing ESPPs for issuers that plan to conduct an IPO.[218] According to one of these commenters, most issuers want employees to be enrolled in the ESPP on the IPO date to give employees the benefit of the IPO price for the first offering under the plan.[219] Commenters indicated that the registration requirement is a ''significant obstacle'' in this process because when employees authorize contributions to an ESPP to be made via payroll deductions, such authorization is viewed as an investment decision on the part of the employee, even if the employee retains the right to withdraw contributions prior to the purchase.[220]

Where employees elect to participate in the ESPP, the pre-IPO enrollment of employees would constitute an offer and sale of securities to the participant employees, which would need to be either registered or exempt. One commenter noted that, without a valid exemption, the employer would be unable to solicit employees for participation in the plans prior to the IPO.[221] Consequently, for the offer and sale of shares purchased under the ESPP to be covered by a Form S–8 registration, the Form S–8 must be effective prior to the date that employees authorize the payroll deductions, which cannot occur because the issuer is not yet a reporting company, and therefore does not meet the requirements to use Form S–8.[222]

Commenters stated that to avoid the communication and registration issues, issuers implementing an ESPP that starts at the time of the IPO automatically enroll all of their eligible employees in their ESPPs, and then have employees withdraw from or confirm their enrollment before the first purchase is made under the ESPPs.[223] According to these commenters, this is an awkward solution because it requires them to enroll all the employees before they can communicate about the plan.[224] One commenter further stated that solving the issue of planning for an ESPP around the time of an IPO would remove a barrier that issuers face when undertaking an IPO.[225] We are not proposing specific amendments at this time but are soliciting additional comments on how to best address this issue.

Request for Comment:

95. Would extending Rule 701 to offers to participate in an ESPP made before the IPO and sales pursuant to ESPPs made after the IPO facilitate the use of ESPPs? If so, how could we limit such exempt sales to IPO employee stock purchase plans?

96. If Rule 701 were extended to reporting issuers for this purpose, would we also need to address the resale limitations set forth in Rule 701(g)? If so, how should we do so?

97. Aside from the Rule 701 exemption, are there alternative solutions that we could adopt that would allow employees to participate in ESPPs during an IPO?

98. Would the ability to communicate about the ESPP prior to the IPO without pre-IPO plan enrollment be sufficient to allow employee participation at the IPO price? If so, what types of communications should we exempt and for how long a time period prior to the IPO?

IV. General Request for Comments

We request and encourage any interested person to submit comments on any aspect of our proposals, other matters that might have an impact on the proposed amendments, and any suggestions for additional changes. With respect to any comments, we note that they are of greatest assistance to our rulemaking initiative if accompanied by supporting data and analysis of the issues addressed in those comments and by alternatives to our proposals where appropriate.

V. Economic Analysis

Compensatory practices, and the composition of the workforce have evolved significantly since the Commission last amended the Rule 701 exemption and the Form S–8 registration statement. For example, businesses have become less asset-intensive, and there have been non-trivial inflationary effects over the last 20 years. Under the current Rule 701 provisions, start-up non-reporting issuers may not be able to offer the amount of compensatory securities [226] that would attract and retain human capital and provide incentives to employees. The proposed amendments to Rule 701 are in response to such changes in the business environment and intended to update the rule's provisions to current business environment conditions.

We are proposing several amendments to Rule 701, Form S–8, and related rules to modernize the requirements for compensatory transactions. We are mindful of the costs imposed by and the benefits obtained from our rules and the proposed amendments.[227] The discussion below addresses the potential economic effects of the proposed amendments. These include the likely benefits and costs of the proposed amendments and reasonable alternatives thereto, as well as the potential effects on efficiency, competition, and capital formation. We attempt to quantify these economic effects whenever possible; however, due to data limitations, in many cases we are unable to do so. Particularly for Rule 701, we are unable to quantify the economic effects due to lack of data on non-reporting issuers. Where we are unable to provide a quantitative assessment, we provide a qualitative discussion of the economic effects instead.

A. Economic Baseline

The baseline for the economic analysis consists of the current

[217] The offer and sale of securities pursuant to ESPPs, when not exempt from registration, are typically registered on Form S–8. *See* 1980 Employee Benefit Plans Release at Section II.A.5.a.

[224] *Id.*

[225] *See* letter from NASPP.

[226] We believe that most, if not all, issuances under Rule 701 will be equity-based securities, although the scope of the proposed rules is broader than ''equity-based'' compensation.

[227] Section 2(b) of the Securities Act [15 U.S.C. 77b(b)], Section 3(f) of the Exchange Act [15 U.S.C. 78c(f)], and Section 2(c) of the Investment Company Act of 1940 [15 U.S.C. 80a–2(c)] require us, when engaging in rulemaking that requires us to consider or determine whether an action is necessary or appropriate in (or, with respect to the Investment Company Act, consistent with) the public interest, to consider, in addition to the protection of investors, whether the action will promote efficiency, competition and capital formation. In addition, Section 23(a)(2) of the Exchange Act [15 U.S.C. 78w(a)(2)] requires us to consider the effects on competition of any rules that the Commission adopts under the Exchange Act and prohibits the Commission from adopting any rule that would impose a burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act.

regulatory requirements applicable to issuers issuing securities to their employees as part of their compensation arrangements. Non-reporting issuers are able to rely on Rule 701 to offer compensatory securities to their employees. Reporting issuers are able to register compensatory securities offerings to their employees on Form S–8.

1. Rule 701

The proposed amendments to Rule 701 would affect many of the requirements associated with the exemption, including the timing and content of disclosure for certain offerings, the overall ceiling applicable to offerings under the exemption, and the eligible recipients of compensatory securities under Rule 701.

We can approximate the number of growth companies with external financing needs using data on companies conducting exempt securities offerings under Regulation D, Regulation A, and Regulation Crowdfunding. This group may be likely to rely on Rule 701 for the purpose of offering competitive compensation packages to attract and retain individuals. Based on filings in 2019, we estimate there are approximately 17,837 non-reporting companies conducting exempt offerings of unregistered securities under the aforementioned exemptions.[228] However, we do not have any data regarding the current utilization of the Rule 701 exemption that would allow us to quantify the effect of the proposed amendments. Accordingly, in the discussion below, we provide a qualitative assessment of the potential effects and encourage commenters to provide data and information that would help quantify the benefits, costs, and the potential impacts of the proposed amendments on efficiency, competition, and capital formation.

2. Form S–8

The proposed amendments to Form S–8 would affect reporting issuers that currently offer, or seek to offer, securities pursuant to employee benefit plans. We estimate that 1,753 unique issuers filed 2,006 Forms S–8 with the Commission during calendar year 2019. The majority of these issuers filed one Form S–8 during 2019. There were 1,522 issuers filing one, 201 issuers filing two, and 30 issuers filing three or more Forms S–8 during 2019.

Among the issuers that filed at least one Form S–8 during 2019, 1,610 were domestic reporting issuers and 143 were FPIs. Among the domestic Form S–8 filers, approximately 41% were large accelerated filers, 27% were accelerated filers, and 32% were non-accelerated filers.[229] In addition, we estimate that 40% of domestic Form S–8 filers were smaller reporting companies (''SRCs''), and 28% were emerging growth companies (''EGCs'').[230] Approximately 20% of domestic Form S–8 filers were both EGCs and SRCs. Among the FPIs that filed at least one Form S–8 during 2019, approximately 23% were large accelerated filers, 15% were accelerated filers, and 46% were non-accelerated filers. Among these FPIs, 48% were EGCs. We further estimate that of the 1,753 unique issuers filing at least one Form S–8 during 2019, at least 85% (1,523 companies) filed a Form S–8 to register the sale of compensatory securities for a non-retirement related plan.[231]

B. Benefits and Costs to Proposed Amendments to Rule 701 and Form S–8

1. Proposed Amendments to Rule 701(e)

Rule 701(e) specifies the disclosure requirements for non-reporting issuers relying on the Rule 701 exemption to offer securities as compensation to employees if the aggregate sales price or amount of securities sold during any consecutive 12-month period exceeds $10 million. For non-reporting issuers that exceed this threshold, the required disclosure includes: A copy of the summary plan description required by ERISA or a summary of the plan's material terms if it is not subject to ERISA; information about the risks associated with investment in the securities sold under the plan or contract; and financial statements required to be furnished by Part F/S of Form 1–A [232] under Regulation A.[233] Such financial statements must be as of a date no more than 180 days before the sale of securities relying on Rule 701. Moreover, the rule requires that the associated disclosures be delivered to all investors if the $10 million threshold is surpassed, and not only for the sales that exceed the $10 million threshold. For FPIs, Rule 701(e) requires financial statements that are not prepared in accordance with U.S. GAAP or IFRS to be reconciled to U.S. GAAP. We are proposing multiple amendments to Rule 701(e).

The proposed amendments would change various aspects of the disclosure required if the aggregate sales price or amount of securities sold during a consecutive 12-month period under Rule 701 exceeds $10 million. The proposed amendments would affect these disclosure requirements for all non-reporting issuers relying on the exemption, both domestic and FPIs. As proposed, such issuers would be required to provide financial statements that are no more than 270 days old (as compared to the current 180-day requirement), similar to the Regulation A disclosure requirement. FPIs that are eligible for the Rule 12g3–2(b) exemption would be able to provide such financial statements prepared in accordance with home country accounting standards without reconciliation to U.S. GAAP if financial statements prepared in accordance with U.S. GAAP or IFRS are not otherwise available. In lieu of financial statements, non-reporting issuers would be able to disclose a Section 409A independent valuation report, as described in more detail below.

In general, these proposed amendments would lower the cost to non-reporting issuers that rely on, or seek to rely on, the Rule 701 exemption, particularly the associated disclosure burden. Lower costs related to the use of the exemption may lead to an increase in the use of the exemption by non-reporting issuers, to the extent that

[228] Based on staff analysis of EDGAR filings in calendar year 2019, there were approximately 17,071 non-reporting operating companies conducting Regulation D offerings. In addition, there were 73 Regulation A issuers that were not Exchange Act reporting companies and that did not file a Form D or amendment to it. Finally, 693 non-reporting companies conducted offerings solely under Regulation Crowdfunding in 2019 (companies conducting both Regulation D and Regulation Crowdfunding offerings or both Regulation A and Regulation Crowdfunding offerings in 2019 are included in the number for Regulation Crowdfunding offerings).

[229] Although Rule 12b–2 [17 CFR 240.12b–2] defines the terms ''accelerated filer'' and ''large accelerated filer,'' it does not define the term ''non-accelerated filer.'' If an issuer does not meet the definition of accelerated filer or large accelerated filer, it is considered a non-accelerated filer.

[230] An ''emerging growth company'' is defined, in part, as an issuer that had total annual gross revenues of less than $1.07 billion during its most recently completed fiscal year. *See* Rule 405 and 17 CFR 240.12b–2. *See also* Rule 405; 15 U.S.C. 77b(a)(19); 15 U.S.C. 78c(a)(80); and *Inflation Adjustments and Other Technical Amendments under Titles I and II of the JOBS Act,* Release No. 33–10332 (Mar. 31, 2017) [82 FR 17545 (Apr. 12, 2017)].

''Smaller reporting company'' is defined in 17 CFR 229.10(f) as an issuer that is not an investment company, an asset-backed issuer (as defined in 17 CFR 229.1101), or a majority-owned subsidiary of a parent that is not a smaller reporting company and that: (i) Had a public float of less than $250 million; or (ii) had annual revenues of less than $100 million and either: (A) No public float; or (B) a public float of less than $700 million.

[231] We estimate that 712 issuers filed a form 11–K for fiscal year 2019. Of these issuers, 230 also filed a Form S–8 during 2019. We assume that Forms S–8 filed by these 230 issuers are in regard to a retirement related plan.

[232] 17 CFR 239.90.

[233] 17 CFR 230.251 through 230.263.

the current disclosure costs discourage non-reporting issuers from relying on it. In the context of securities-based compensation, we expect that the information contained in financial statements assists employees in valuing their compensation packages. However, we lack information as to how employees use the existing financial statement disclosures to interpret the value of offered securities-based compensation or to make investment decisions. To the extent that the proposed disclosure requirement leads to less information about the value of the non-reporting issuer being available to employees, economic theory suggests that increased uncertainty about such value may weaken the expected benefits associated with the use of equity-based pay.[234]

Below, we discuss the costs and benefits of each proposed amendment to Rule 701(e) individually.

(a) Disclosure Requirement for the Period Preceding the Threshold Amount Being Exceeded

The first proposed amendment to Rule 701(e) would limit the transactions that are subject to the rule's additional disclosure requirements when sales of securities under Rule 701 exceed $10 million in a 12-month period. Currently, disclosure must be provided a reasonable period of time before the date of sale to all investors to whom securities are sold during any consecutive 12-month period in which the $10 million threshold is exceeded. If disclosure has not been provided to all such investors before sale, the non-reporting issuer will lose its ability to rely on the exemption for the entire offering. The proposed amendment would require disclosure to only those investors receiving securities that exceed the $10 million threshold. The proposal would thus eliminate the ''look-back'' aspect of the disclosure requirement, which may facilitate non-reporting issuers' efforts to plan their compensatory programs or respond efficiently to unforeseen situations.

This proposed amendment is likely to provide more certainty to non-reporting issuers regarding their compliance with disclosure obligations under the rule. The proposed amendment also would allow non-reporting issuers the flexibility to offer compensatory securities as needed throughout the year to take advantage of opportunities to attract human capital, without the risk of retroactively losing the exemption if the required disclosure was not provided to investors involved in sales below the $10 million threshold. To the extent that the current disclosure requirement constrains non-reporting issuers from fully utilizing the exemption and the potential benefits that may accrue from the use of employee securities-based pay, the proposed amendment would likely loosen such constraint and allow for more efficient use of securities-based pay. We also expect employees to benefit from the proposed amendment as they would be able to further participate in a securities-based compensation program that might be currently constrained due to the existing disclosure requirements.

We do not expect this proposed amendment to generate any costs for employees and issuers. However, the proposed revision could create an information asymmetry among employees receiving compensatory securities, with some employees being provided more information about the non-reporting issuer's value than others. This asymmetry could affect the value that employees with different information assign to such compensation (higher value generally being associated with greater disclosure). Consequently, the benefits from using such compensation, such as the alignment of incentives between employees and other investors, could be weaker for the group of employees that do not receive the prescribed disclosure. Non-reporting issuers could choose to voluntarily provide the disclosure to all employees, if it is net beneficial for the non-reporting issuer.

(b) Age of Financial Statements

Another proposed amendment to Rule 701(e) would increase the maximum permissible age of the financial statements required to be provided to investors to harmonize the requirement with the corresponding requirements for capital-raising transactions under Regulation A. Currently, non-reporting issuers subject to the Rule 701(e) disclosure requirement must provide financial statements that are dated no more than 180 days before the securities' date of sale. As a practical matter, such a requirement compels non-reporting issuers to update their financial statements on a quarterly basis in order to make continuous offerings in compliance with the rule. The proposed revision would require non-reporting issuers to provide financial statements that are dated less than 270 days before the securities' date of sale, which would permit issuers to satisfy the disclosure requirement through semi-annual updating of their financial statements. For non-reporting issuers that would otherwise not prepare quarterly financial statements, increasing the maximum age of the financial statements to be provided to investors would lower the compliance costs associated with the rule. Such a decrease in the costs of complying with the rule's disclosure requirement could lead to an increase in the number of non-reporting issuers that rely on the exemption to compensate their employees or other eligible parties with securities to the extent such non-reporting issuers anticipate exceeding Rule 701's $10 million threshold for additional disclosure.

As mentioned above, more flexibility in the use of securities-based compensation may increase the ability of non-reporting issuers that are eligible to use the exemption to attract and retain employees, among other potential benefits. The proposed amendment would lower compliance costs for non-reporting issuers that do not otherwise prepare financial statements more frequently than semi-annually. For example, the proposed amendments would lower compliance costs relative to current Rule 701 for Tier 2 Regulation A issuers that are not Exchange Act reporting companies that utilize Rule 701 to offer compensatory securities and thus already are required to provide financial statement disclosure on a semi-annual basis.

We do not expect this proposed amendment to generate any costs for employees and issuers. We lack information as to how or the extent to which employees use these disclosures to make investment decisions, but to the extent that less frequent disclosure leads to less timely information about the value of the non-reporting issuer, increased uncertainty about such value may weaken the expected benefits associated with the use of equity-based pay.

(c) Financial Statement Content Requirements for FPIs

A third proposed amendment would permit FPIs that are eligible for the exemption from Exchange Act registration provided by Exchange Act Rule 12g3–2(b) to provide financial statements prepared in accordance with home country accounting standards, if financial statements prepared in accordance with U.S. GAAP or IFRS are not otherwise available. Such FPIs

[234] Non-reporting issuers have more opaque information environments, and with few exceptions their securities are not traded in an active market. As such, there is more inherent uncertainty about their value due to elevated liquidity and valuation risks, as compared to reporting companies. Such uncertainty is likely to exist for the value of compensatory securities offered and may potentially attenuate the incentive effects of equity-based pay for non-management employees.

would experience lower compliance costs under the proposed amendment because they would not incur the cost of reconciling their financial statements in order to offer more than $10 million in securities in a 12-month period. Also, to the extent that the cost of the required reconciliation to U.S. GAAP discourages Rule 12g3–2(b)-eligible FPIs from relying on the exemption, we expect that the proposed amendment would likely increase the number of such FPIs that may rely on the exemption in the future. Lowering the costs of compliance for such FPIs may increase their ability to attract and retain human capital through offering securities-based pay.

With respect to costs, the proposed amendment could generate some uncertainty for employees or increase their cost of processing the information disclosed in financial statements if those employees are less familiar with the home country's accounting standards than U.S. GAAP or IFRS, or if those accounting standards do not require the disclosure of as much material information.[235] However, to the extent that employees are more familiar with the home country's accounting standards, we do not expect the proposed amendment to increase their cost of processing the related information.

(d) Alternative Valuation Disclosure

A fourth proposed amendment to Rule 701(e) would permit non-reporting issuers to provide valuation disclosure using a Section 409 independent valuation report. The proposal would require the Section 409A independent valuation report to be prepared pursuant to an independent appraisal to reduce potential risks that may arise from an issuer providing its own valuation. The proposal also would require the Section 409A independent valuation report to be updated at six-month intervals. Rule 12g3–2(b)-eligible FPIs would be permitted to disclose the fair market value of the securities to be sold consistent with the Section 409A rules applicable to stock readily tradeable on an established securities market.[236]

To the extent that the proposed valuation disclosure is a less costly alternative to the applicable financial statement requirements, the proposed amendment is likely to lower compliance costs for at least some non-reporting issuers that issue securities under the Rule 701 exemption.[237] A decrease in compliance costs could lead to more non-reporting issuers relying on the exemption, or to an increase in the amount of compensatory securities issued by non-reporting issuers that were discouraged to offer compensatory securities in excess of $10 million so as to not trigger the disclosure requirement. Moreover, if the requirement for disclosure of financial statements presents a potential risk of unauthorized release of competitively sensitive information, the proposed alternative could reduce such risks (to the extent that valuation disclosure is less likely to have that consequence).

One difference in the information content of a Section 409A independent valuation report versus the information content of financial statements is that financial statements mostly provide information about past economic transactions as captured by applicable accounting standards, whereas Section 409A valuations are based on assumptions about future performance. It is possible that a Section 409A independent valuation report could simplify or enhance an employee's understanding of the value of his or her compensation as the report would provide valuation information that could be more practical for such purpose and, depending on the valuation method applied, does not necessarily need to be derived from the financial statements.[238] However, valuations rely on multiple assumptions, which could introduce some uncertainty with regard to the perceived value of compensatory securities. The proposed requirement that such a valuation report be prepared pursuant to an independent appraisal should lower the risk that valuation assumptions are inaccurate or opportunistic, and increase the reliability of such valuations.

Under the proposed amendment, Rule 12g3–2(b)-eligible FPIs that have stock readily tradeable on an established securities market would disclose the stock price on the most recent trading day preceding the date of sale to satisfy the rule's disclosure requirements. Because the stock price for these FPIs is readily observable and available, we expect the proposed amendment to lower compliance costs for these FPIs. Moreover, a valuation derived from the value of tradable stock on an established securities market is likely to represent a fair and objective value of the securities offered as compensation. To the extent that the market conditions for these FPIs lead to a fair and objective value, then disclosure of the stock price could increase the reliability of such valuation. The foreign listing of a Rule 12g3–2(b)-eligible FPI helps assure that there is a foreign jurisdiction that principally regulates and oversees the trading of the issuer's securities and its disclosure obligations to investors, and increases the likelihood that the issuer's pricing determinants are located outside the United States. While stock price alone does not provide the same level of analysis as an independent valuation report, the combination of the home country disclosure required in connection with the foreign listing and the stock price typically provides a significant amount of information that is available for recipients of compensatory securities under Rule 701.

(e) Disclosure Requirements for Derivative Securities

A fifth proposed amendment to Rule 701(e) would distinguish between derivative securities that involve a decision to exercise or convert, and those that do not, such as RSUs, for purposes of determining when disclosure is required to be delivered. As discussed in Section II.A.5, the timing of an investment decision, if any, is not universal for the various compensatory instruments that are derivative securities. Consistent with the rule's general requirement that disclosure be provided a reasonable period of time before the date of sale, the proposal would generally require delivery of disclosure to recipients of derivative securities under the rule at the time most relevant to making an investment decision.

A stock option or similar instrument may expire without being exercised or converted, and accordingly, does not result in delivery of the underlying shares to the holder absent an affirmative investment decision to exercise or convert. In contrast, a restricted stock unit or similar instrument settles automatically in the underlying shares at maturity, without need for any investment decision by the holder. Because such instruments settle by their terms without action by the

[235] It is also possible that the requirement to reconcile local/country GAAP financial statements to U.S. GAAP or IFRS may have resulted in financial statements with increased reliability, if an independent third party performed such exercise.

[236] *See* Treasury Reg. 1.409A–1(b)(5)(iv)(A).

[237] The frequency of the proposed valuation disclosure is less than the current financial statement disclosure requirement, which would lower compliance costs for non-reporting issuers. The requirement that such valuation reports be prepared by an independent party would increase the cost of the proposed disclosure option, to the extent that non-reporting issuers do not currently use an independent party to prepare such valuations for tax purposes.

[238] There are multiple ways a valuation could be derived, based on facts and circumstances specific to the issuer. Estimation of the sum of present value of anticipated future cash-flows is one method to derive a valuation, which could be based on information from existing financial statements and projections about anticipated future cash flows.

holder, the relevant investment decision, if any, likely takes place at the date of grant.

As proposed, if the sale involves a stock option or other derivative security that involves a decision to exercise or convert, the non-reporting issuer would continue to be required to deliver Item 701(e) disclosure a reasonable period of time before the date of exercise or conversion. If the sale involves a restricted stock unit or other derivative security that does not involve a decision to exercise or convert, the proposal would require the non-reporting issuer to deliver disclosure a reasonable period of time before the date the restricted stock unit or similar derivative security is granted. However, if the sale involves a restricted stock unit or other derivative security that does not involve a decision to exercise or convert and is in connection with the hire of a new employee, the disclosure would be considered timely delivered if provided within 14 calendar days after the date the person begins employment. The proposed amendment could benefit non-reporting issuers by limiting potential leaks of competitively sensitive information by individuals who seek, but do not accept, employment with the non-reporting issuer. If securities-based compensation is a significant component of the compensation offered to new hires, not providing the disclosure required by Rule 701(e) before such grants are awarded could limit the ability of securities-based compensation to attract talent. However, we expect non-reporting issuers to weigh this potential effect and choose the timing of the required disclosure in a way that maximizes their expected net benefit.

(f) Disclosure Requirements Following Business Combination Transactions

A sixth proposed amendment to Rule 701(e) would clarify disclosure delivery obligations for the derivative securities of an acquired entity that the acquiring non-reporting issuer assumed in a business combination transaction. Where an acquired entity complied with Rule 701 at the time it originally granted the derivative securities, the exercise or conversion of acquired entity derivative securities assumed by the acquiring non-reporting issuer would be exempt from registration, subject to the acquiring non-reporting issuer's compliance with Rule 701(e), where applicable. If the acquired entity was required to provide disclosure pursuant to Rule 701(e) and the derivative securities are exercised or converted after completion of the business combination transaction, the acquiring non-reporting issuer would assume that disclosure obligation, and would be required to provide information meeting the requirements of Rule 701(e) about itself, consistent with the timing requirements of Rule 701(e)(6), as amended. Further, in determining whether the amount of securities the acquiring non-reporting issuer sold during any consecutive 12-month period exceeds $10 million for purposes of triggering Rule 701(e) disclosure, the acquiring non-reporting issuer would need to consider only the securities that it sold in reliance on Rule 701 during that period, and would not be required to include any securities sold by the acquired entity pursuant to the rule during the same 12-month period. This proposal would clarify disclosure delivery obligations following a business combination transaction, and permit affected non-reporting issuers to plan their compensation programs with more certainty as to how a potential future business combination transaction would affect the non-reporting issuer's Rule 701(e) disclosure obligations.

2. Proposed Amendments to Rule 701(d)

Currently, for a non-reporting issuer to be eligible to rely on Rule 701, total sales of securities over a consecutive 12-month period may not exceed the greatest of three alternatives: (i) $1,000,000 (''dollar cap''), (ii) 15% of the issuer's total assets (''asset cap''), or (iii) 15% of the outstanding amount of securities of the class. We are proposing to amend two of these three alternative caps: The dollar cap would be raised to $2,000,000, and the asset cap would be raised to 25% of an issuer's total assets.

The proposed increases in the dollar and asset caps would provide non-reporting issuers with more flexibility to structure employee compensation contracts. We anticipate that non-reporting issuers would benefit from this increased flexibility as it would allow them to design compensatory arrangements that may better fit their individual circumstances. For example, the increased flexibility would permit a non-reporting issuer entering a market to grant larger individual awards in an effort to attract talent from competitors.

There is academic literature studying the use of forms of non-executive employee compensation.[239] Most of these studies focus on non-executive employee stock options. In general, there is evidence that the use of stock options in employee compensation contracts correlates to increases in future operating performance, higher levels of innovation, and firm value.[240] The studies also find that employee stock options are more likely to be used by issuers that are capital-constrained and by issuers that need to attract certain types of human capital.[241] In addition, one study finds that employee stock options are more effective in younger and high growth issuers and when such plans are implemented more broadly within issuers.[242] Other forms

[239] These academic studies examine the effects of compensatory benefit plans for publicly traded companies. The findings may not fully generalize to non-reporting issuers that rely on the Rule 701 exemption to provide equity-based pay. For example, as discussed earlier, the value of non-reporting companies is likely to be more uncertain relative to the value of reporting companies due to differences such as the information environment. This may increase the risk that equity-based pay for non-reporting companies imposes for employees receiving such compensation and thereby affect the strength of the incentives provided.

[240] *See* Xin Chang et al., *Non-Executive Employee Stock Options and Corporate Innovation,* 115 J. Fin. Econ. 168 (2015) (''Chang et al. (2015)''), which uses a sample of S&P1500 companies over the 1998–2003 period to examine the effect of stock options to non-executive employees on corporate innovation, as measured by patent applications and patent citations. The study documents a positive relation between the use of stock options to compensate non-executive employees and proxies for corporate innovation. The study also finds that the effect of employee stock options on innovation is due mostly to the risk-taking incentive that stock options provide to employees rather than the incentive to exert effort. *See also* Yael V. Hochberg & Laura Lindsey, *Incentives, Targeting, and Firm Performance: An Analysis of Non-Executive Stock Options,* 23 Rev. Fin. Stud. 4148 (2010) (''Hochberg & Lindsey (2010)''), which uses a sample of S&P1500 companies over the 1997–2004 period to examine the effect of employee stock options on company performance. The study documents a positive relation between implied incentives from employee stock options and future operating performance, on average. The study also documents that the positive relation between employee stock options and firm performance is concentrated in smaller firms and firms with significant growth options. Moreover, the study shows that such effect is stronger for broad-based option plans as they induce a mutual monitoring effect within employees.

[241] *See* John E. Core & Wayne R. Guay, *Stock Option Plans for Non-Executive Employees,* 61 J. Fin. Econ. 253 (2001) (''Core & Guay (2001)''), which examines detailed information about non-executive employee stock option holdings, grants, and exercises for 756 companies during the 1994–1997 period. Among other findings, the study's results support the hypothesis that options are granted to non-executives more intensively when firms have greater financing needs and face financing constraints. *See also* Ilona Babenko, Michael Lemmon, & Yuri Tserlukevich, *Employee Stock Options and Investment,* 66 J. Fin. 981 (2011) (''Babenko et al. (2011)''), which studies a sample of 1,773 companies over the period 2000 to 2005 with regard to their broad-based employee stock option programs. The study finds evidence consistent with the idea that stock options can relax financing constraints by substituting for cash wages at the time of the grant, and by providing significant cash inflows at the time of exercise, conditional on a high stock price. The study further estimates that $0.34 of each dollar of cash inflow received by the firm from the exercise of stock options is allocated to increasing capital and R&D expenditures.

[242] *See* Hochberg & Lindsey (2010), *supra note* 240.

of securities-based compensation could provide different incentives and lead to different outcomes. For example, a study that examines the effects of non-executive employee stock ownership in retirement savings vehicles finds an inverse relationship between employee stock ownership levels and risk-taking.[243]

Relatedly, the proposed amendments may affect non-reporting issuers' ability to attract and retain talent. For example, a non-reporting issuer would likely benefit if it is competing for talent with reporting companies that are relatively less constrained in their ability to offer securities-based incentives to attract talent. Moreover, such benefit would likely be particularly important for non-reporting issuers that are capital constrained. On a similar note, the increased ability to offer securities-based compensation may provide non-reporting issuers with an additional tool to achieve higher employee retention. An academic study finds that the use of broad based employee stock options leads to increased retention rates after the grant, but such increased retention is followed by higher turnover when the options vest.[244]

The proposed increases in the dollar cap and the asset cap may also allow non-reporting issuers to reallocate relatively limited cash resources to other productive uses. This expected benefit may be particularly important for non-reporting issuers that are resource-constrained and for non-reporting issuers whose business models rely on human capital (and are less asset-intensive). We expect the proposed increase to both caps to provide additional flexibility to non-reporting issuers in terms of allocating scarce resources.

While we expect the proposed amendments to Rule 701(d) to benefit non-reporting issuers as described above, there is some uncertainty as to the extent of the expected benefits from the proposed amendments. Specifically, securities-based compensation carries liquidity and valuation risks, and these risks are likely to be relatively higher for compensatory securities of non-reporting issuers.[245] Higher liquidity and valuation risks may blunt the anticipated economic effects of proposed amendments to Rule 701(d) on employee attraction, retention, and incentive alignment.[246]

The proposed amendments also would provide that after completion of a business combination transaction, to calculate compliance with paragraph (d)(2) of Rule 701, the acquiring non-reporting issuer may use a pro forma balance sheet that reflects the transaction or a balance sheet for a date after the completion of the transaction that reflects the total assets and outstanding securities of the combined entity. In addition, in determining the amount of securities that it may offer pursuant to Rule 701 following a business combination transaction, the acquiring non-reporting issuer would not be required to include the aggregate sales price and amount of securities for which the acquired entity claimed the exemption during the same 12-month period. These proposed changes would allow non-reporting issuers to plan their compensation programs without uncertainty as to the effect of a potential future business combination transaction. Further, permitting an acquiring issuer to compute the asset cap based on the combined entity may result in an increase in the maximum dollar amount of securities that may be sold over a 12-month period under the exemption.

3. Proposed Amendments to Rule 701(c) Eligible Participants

(a) Consultants and Advisors

We are proposing to extend the eligibility of consultants and advisors to receive Rule 701 compensatory securities to entities meeting specified ownership criteria designed to link the securities compensation to the performance of services and to prevent such securities from being issued to passive investment vehicles. Currently, only natural persons are eligible to receive securities pursuant to Rule 701 for providing services to the non-reporting issuer. The proposed amendment would expand the scope of eligible consultants or advisors to whom non-reporting issuers may issue securities as compensation for services. The proposed extension of consultant and advisor eligibility would allow non-reporting issuers to use securities-based compensation to engage a wider spectrum of service providers, which could enable these non-reporting issuers to gain access to potentially higher quality and/or lower cost outside expertise and services. These expected benefits likely would be greater for non-reporting issuers that are capital-constrained, and non-reporting issuers whose business models rely on such outside expertise. We do not anticipate any significant costs related to this proposal.

(b) Former Employees

The proposed amendments would extend eligibility to receive securities under Rule 701 to former employees of the non-reporting issuer who are issued specified post-termination grants and former employees of an entity that was acquired by the non-reporting issuer who are issued securities in substitution or exchange for securities issued as compensation while such persons were still employed by or providing services to the acquired issuer. We expect these amendments would benefit non-reporting issuers by making compensation planning and structure more efficient, as there would be less uncertainty and lower administrative costs in cases of employee turnover or business combination transactions. We do not anticipate any significant costs related to this proposal.

(c) Employees of Subsidiaries

Further, the proposed amendments would expand availability of the Rule 701 exemption to securities offered to employees of any subsidiary of the non-reporting issuer, consistent with the scope of eligibility for Form S–8, rather than only employees of majority-owned subsidiaries. This proposed amendment likely would lower administrative burdens for non-reporting issuers relying on the Rule 701 exemption when they transition to reporting status and become eligible to use Form S–8. We also expect the proposed amendment to benefit non-reporting issuers and their employees by providing certainty for this expanded group of eligible employees about their securities-based compensation awards

[243] *See* Francesco Bova et al., *Non-Executive Employee Ownership and Corporate Risk*, 90 Acct. Rev. 115 (2015), which uses U.S. Department of Labor Form 5500 filings to construct stockholdings which include employee stock ownership plans (ESOPs), 401(k) plans, deferred profit sharing plans invested in company stock, and employer stock bonus plans. It finds that a higher level of such employee stock ownership is related to lower risk-taking by employees. The study emphasizes the difference in employee incentives created by the various forms of equity-based pay and their interaction.

[244] *See* Serdar Aldatmaz, Paige Ouimet, & Edward D. Van Wesep, *The Option to Quit: The Effect of Employee Stock Options on Turnover,* 127 J. Fin. Econ. 136 (2018), which examines the effect of broad based stock option plans on employee retention. The study finds decreased employee turnover following the initiation of the plan and increased employee turnover in the third year of the grant.

[245] The absence of an active market for securities of non-reporting issuers introduces uncertainty as to their fair value. Holders of compensatory securities of non-reporting issuers also have to bear liquidity risk that arises from the absence of an active market for these securities.

[246] *See* Brian J. Hall & Kevin J. Murphy, *Stock Options for Undiversified Executives,* 33 J. Acct. & Econ. 3 (2002), which shows that there is a difference between the value of a stock option to an executive versus the cost of the option to the company, due to the executive's risk aversion and undiversified portfolio. *See* Core & Guay (2001), *supra* note 241.

when business combination transactions occur. We do not anticipate any significant costs to issuers or eligible participants related to this proposed amendment.

4. Benefits and Costs to Proposed Amendments to Form S–8

We are proposing multiple amendments regarding the use of Form S–8 by reporting issuers. The proposed amendments would expand the scope of participants that are eligible to receive compensatory securities issued pursuant to a Form S–8 registration statement and conform that scope with the corresponding proposed amendments to Rule 701. Moreover, the proposed amendments would reduce both the complexities associated with registration on Form S–8 and the risk of inadvertent non-compliance by reporting issuers using the form.

(a) Benefits and Costs From Changes to the Scope of Eligible Participants

The proposed amendments would expand the scope of participants eligible to receive compensatory securities issued pursuant to a Form S–8 registration statement to include former employees of the reporting issuer for specified post-termination grants and former employees of an entity that was acquired by the reporting issuer in exchange for securities issued as compensation while such former employees were still with the acquired issuer. We expect these proposed amendments would benefit reporting issuers by reducing uncertainty and administrative costs for these issuers' compensation programs in cases of employee turnover, or business combination transactions, which may make compensation planning and structuring more efficient.

The proposed amendments would permit reporting issuers to offer compensatory securities to consultants and advisors that have chosen to organize their business as an entity, provided that the entity meets specified ownership criteria designed to link the securities compensation with services performed for the issuer, and not issued to passive investment vehicles. We expect the proposed expansion of consultant and advisor eligibility would benefit reporting issuers as the ability to use securities-based compensation to engage a wider spectrum of service providers could enable these companies to gain access to potentially higher quality and/or lower cost outside expertise and services. The expected benefits likely would be greater for reporting issuers that are resource constrained and whose business models rely on such outside expertise. We do not expect any significant costs to issuers or eligible participants associated with the proposed amendments.

(b) Benefits and Costs From Other Amendments to Form S–8

We also are providing clarifications and proposing amendments to Form S–8 that are intended to simplify registration and to reduce compliance and administrative costs while increasing the utility of Form S–8 for reporting issuers.

We expect the main economic effect of these clarifications and proposed amendments to Form S–8 to be the reduction of compliance costs for issuers. For example, we are clarifying that reporting issuers may allocate securities among multiple incentive plans on a single Form S–8 and proposing amendments that would permit the addition of securities to an existing Form S–8 by an automatically effective post-effective amendment. These clarifications and proposed amendments should reduce the number of Form S–8 filings, thus reducing reporting issuers' compliance costs. Reporting issuers would still have to file post-effective amendments, which means they would incur some compliance costs associated with those filings, but we expect the costs of filing an amendment to Form S–8 to be less than those of filing the initial form. Likewise, we expect that the proposed amendments to Rule 457 and Form S–8 to require the registration of the offer and sale of a maximum aggregate offering price of securities pursuant to defined contribution plans would reduce compliance costs for reporting issuers by eliminating the need to track offers and sales of individual shares of issuer stock. For PRA purposes, we estimate the reduction in compliance costs associated with the proposed amendments to be approximately $46,000.[247] We note that the PRA costs relate to paperwork burdens and thus may not encompass all compliance costs. Accordingly, the PRA estimate may underestimate the reduction in compliance costs due to the proposed amendments.

We also expect that the clarifications and proposed amendments to Form S–8 would provide reporting issuers with flexibility to adjust their compensatory benefit plans and should eliminate the risks of over- or underestimating the number of securities required for compensatory offerings, thereby also reducing the associated risk of inadvertent noncompliance. For example, under proposed Rule 413(c), reporting issuers would not need to anticipate how many securities will be needed to fulfill obligations under each individual plan or even the types of securities that might be authorized for issuance pursuant to a plan in the future. Additionally, clarifying the ability to file a single Form S–8 for multiple plans will facilitate its use, especially in connection with incentive plans, because to the extent a plan expires with authorized but unissued shares, those shares would be immediately available for issuance under another authorized plan. By requiring registration of the offer and sale of a maximum aggregate offering price of securities pursuant to defined contribution plans, the proposed amendment would simplify administration of defined contribution plans and avoid inadvertent non-compliance with Section 5 of the Securities Act.

The proposed amendments would implement several improvements to simplify fee payments. Revised Form S–8 would include a new fee payment method for registration of offers and sales pursuant to defined contribution plans. The proposed amendment to the fee payment method would require reporting issuers to pay the registration fee for all sales made pursuant to a defined contribution plan during a fiscal year in arrears, based on the aggregate offering amount, no later than 90 days after the plan's fiscal year end. The proposed fee payment method would simplify administration of defined contribution plans and potentially eliminate the problem of inadvertently over- or underestimating the number of securities to be sold. As a result, it could create savings for issuers because instead of paying a registration fee to the Commission at the time of filing a registration statement, reporting issuers would pay the fee after the end of the fiscal year, when the number of transactions will have been definitively determined.

Finally, the proposed amendments would align Form S–8 instructions with current IRS plan review practices. This proposed amendment would eliminate the requirement that issuers undertake to submit any amendment to the plan to the IRS and file a copy of the IRS determination letter confirming that the amended plan is qualified under Section 401 of the IRC with the Commission. We are also proposing to revise Item 1(f) of Form S–8 to eliminate

[247] *See* Section VII.C, *infra*. We monetize the internal burden hours by multiplying them by $400, the cost per burden hour for outside professional help. Thus, the value of the internal burden hours is 115 * $400 = $46,000.

the requirement to describe the tax effects of plan participation on the issuer but are proposing to retain the requirement to describe the tax consequences to employees. These proposed amendments would align Form S–8 to current IRS review practices and streamline the content of Form S–8 without sacrificing potentially useful disclosure regarding the tax effects of participation in the plan for plan participants. We also expect these amendments to reduce the compliance costs for participants, but we are unable to quantify the cost reduction.

Overall, we expect that the economic impact to reporting issuers from the proposed technical amendments to be limited to reducing administrative burdens and complexity associated with registering offerings of compensatory securities. We do not anticipate any significant costs related to the proposed technical amendments.

C. Anticipated Effects on Efficiency, Competition, and Capital Formation

As described above, we believe that the proposed amendments could have positive effects on efficiency, competition, and capital formation. The proposed amendments to Rule 701 would enable non-reporting issuers to expand the use of securities as compensation for a wider range of outside expertise and services. We expect this to lead to improvements in the operational efficiency of these issuers. We expect a similar result from the proposed amendments to the scope of eligible participants who may receive compensatory securities for reporting issuers in offerings registered on Form S–8. We expect the proposed increase to two of the three alternative Rule 701(d) offering caps to improve affected issuers' ability to compete for talent by increasing their ability to provide equity-based pay packages. The proposed amendments to Rule 701(d) also may allow non-reporting issuers that are cash-constrained to re-allocate scarce resources to other productive uses and, as a result, lead to increased efficiency. Increased efficiency may be achieved because non-reporting issuers could further the use of securities-based compensation for incentive alignment at a lower cost compared to cash. Although offerings made pursuant to Rule 701(d) may not be used for capital-raising purposes, the proposed amendments could lead to improved utilization of limited resources by cash-constrained non-reporting issuers, which would enhance overall capital formation.

The proposed technical amendments to Form S–8 also may enhance efficiency as they are likely to lower administrative burdens and compliance uncertainty for reporting issuers offering securities-based compensation to employees. For example, the proposed amendments are likely to increase the ability of reporting issuers to react to changing conditions by adjusting their compensatory offerings by adding new securities or plans to an existing registration statement, and to pay fees for securities sold pursuant to defined contribution plans without the risk of inadvertent non-compliance.

D. Reasonable Alternatives

In broad terms, the proposed amendments to Rule 701 are likely to have three main effects:

(i) Increase the amount of securities-based compensation non-reporting issuers may provide pursuant to the Rule 701 exemption by increasing the rule's dollar amount and asset caps (Rule 701(d));

(ii) Expand the scope of eligible consultants, advisors and employees that may receive securities-based compensation under Rule 701 in exchange for services provided (Rule 701(c)); and

(iii) Lower the compliance and disclosure costs for non-reporting issuers relying on, or seeking to rely on, the exemption to provide exempt securities-based compensation (Rule 701(e)).

As an alternative to the proposed amendments, we could use different caps on the amount of annual securities-based compensation that a non-reporting issuer could provide under the Rule 701 exemption and/or adjust the third alternative cap (currently set at 15% of the maximum number of shares outstanding). Higher caps would allow non-reporting issuers more flexibility in using the Rule 701 exemption as a tool to compensate, attract, and retain employees (and vice versa for lower caps). However, due to the fact that non-reporting issuers are more opaque and their securities are less liquid, further increasing Rule 701(d) caps could lead to diminishing marginal benefits.

As another alternative, we could choose not to expand Rule 701 and Form S–8 eligibility to consultants or advisors organized as entities with prescribed characteristics, or to expand Rule 701 and Form S–8 to consultant and advisor entities that do not conform to the proposed ownership requirements. Given the tax and legal incentives that such consultants or advisors have to organize as entities, not including such entities under the exemption would result in a limited set of choices for non-reporting issuers to seek such services from third parties. In seeking the highest quality services at the lowest cost, cash-constrained issuers could be at a disadvantage to more established issuers facing fewer resource constraints. We also could expand Rule 701 and Form S–8 eligibility to any consultant or advisor, regardless of ownership structure. Such an alternative may provide an even wider range of options to issuers to engage outside expertise but would increase the risk that such compensatory securities would be issued to passive investment vehicles rather than individuals who perform services for the issuer.

Another alternative that we could have pursued is to extend the Rule 701 exemption to offers to participate in an ESPP made before the IPO and sales pursuant to ESPPs made after the IPO. This would facilitate employees' participation in the ESPP to obtain shares at the IPO price, which could be lower than the subsequent trading price. Such a proposal could present disadvantages, such as employees' loss of the information in the prospectus they receive pursuant to Part I of Form S–8, employees' loss of the legal protections provided by Securities Act liability in the case of material misstatements or omissions, and employees' receipt of restricted stock pursuant to Rule 701. However, as such an alternative could facilitate the use of ESPPs and allow issuers to better align incentives of their employees, the release requests comment on this alternative.

Finally, we could make different amendments to the Rule 701(e) disclosure requirements. For example, instead of harmonizing the Rule 701(e) disclosure requirements with those of Regulation A offerings in terms of age of financial statements, we could require less frequent updating of this disclosure, for example on an annual basis. Less frequent updating would provide less certainty to holders of these securities regarding their value and potentially weaken incentive effects from the provision of securities-based compensation. However, less frequent disclosure of financial statements would be less costly for non-reporting issuers and could lead to increased use of compensatory securities by non-reporting issuers.

As another alternative, we could permit the use of a Section 409A valuation report in lieu of financial statement disclosure but without requiring it to be independently prepared. Such an alternative could provide a lower cost option for affected non-reporting issuers to satisfy the disclosure requirement of Rule 701(e).

However, such alternative could give rise to conflicts of interest that would undermine the reliability of the valuation report. A lower quality valuation report would increase uncertainty about the value of the non-reporting issuer and the offered compensatory securities, and as a result, would attenuate the expected benefits from the provision of equity-based compensation.

Finally, we could eliminate Form S–8 and allow reporting issuers to rely on the Rule 701 exemption instead. Such alternative would lower compliance costs for reporting issuers and could promote further use of securities-based compensation by reporting issuers. However, such alternative could cause employees to receive less information than would be required to be provided pursuant to Part I of Form S–8, which could lead to more uncertainty about their compensation and potentially weaken the expected benefits from the provision of equity-based compensation. Eliminating Form S–8 also would cause employees to lose the protections provided by Section 11 and, in some cases, Section 12(a)(2) liability in the case of material misstatements or omissions.[248]

Request for Comment:

We request comments on all aspects of our economic analysis, including the potential costs and benefits of the proposed amendments and alternatives thereto, and whether the proposed amendments, if adopted, would promote efficiency, competition, and capital formation or affect investor protection. In addition, we also seek comment on alternative approaches to the proposed amendments and the associated costs and benefits of these approaches. Commenters are requested to provide data, estimation methodologies, and other factual support for their views, in particular, costs and benefits estimates.

Specifically, we seek comment with respect to the following questions: Are there any costs and benefits to any entity that are not identified or misidentified in the above analysis? Are there any effects on efficiency, competition, and capital formation that are not identified or are misidentified in the above analysis? Should we consider any of the alternative approaches outlined above instead of the proposed amendments? If so, which approach and why? Are there any other potential alternative approaches we should consider that would promote the ability of companies to compete in the market for talent consistent with investor protection?

VI. Paperwork Reduction Act

A. Summary of the Collection of Information

Certain provisions of our rules and forms that would be affected by the proposed amendments contain ''collection of information'' requirements within the meaning of the Paperwork Reduction Act of 1995 (''PRA'').[249] The Commission is submitting the proposal to the Office of Management and Budget (''OMB'') for review in accordance with the PRA.[250] The hours and costs associated with preparing and filing the forms and reports constitute reporting and cost burdens imposed by each collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information requirement unless it displays a currently valid OMB control number.

Compliance with the information collections is mandatory. Responses to the information collections are not kept confidential and there is no mandatory retention period for the information disclosed. The titles for the affected collections of information are:

''Rule 701'' (OMB Control No. 3235–0522); and

''Form S–8'' (OMB Control No. 3235–0066).

The Commission adopted Form S–8 and Rule 701 pursuant to the Securities Act. Form S–8 sets forth the disclosure requirements for a registration statement for securities to be offered by a reporting issuer under an employee benefit plan to its employees, or employees of a subsidiary or parent company, to help such investors make informed investment decisions. Rule 701 provides an exemption from registration for offers and sales of securities pursuant to certain compensatory benefit plans and contracts relating to compensation by non-reporting issuers. Issuers conducting compensatory benefit plan offerings in excess of $10 million in reliance on Rule 701 during any consecutive 12-month period are required to provide plan participants with certain disclosures, including financial statement disclosures.[251] This disclosure constitutes a collection of information. A description of the proposed rule amendments, including the need for the information and its proposed use, as well as a description of the likely respondents, can be found in Sections II and III above, and a discussion of the economic effects of the proposed amendments can be found in Section IV above.

B. Summary of the Proposed Amendments' Effects on the Collections of Information

The following table summarizes the estimated effects of the proposed amendments on the paperwork burdens associated with the affected collections of information.

PRA TABLE 1—ESTIMATED PAPERWORK BURDEN EFFECTS OF THE PROPOSED AMENDMENTS

Collection of information	Proposed amendment	Expected estimated PRA effect of proposed amendment	Current number of average annual responses	Estimated change in number of average annual respondents
Form S–8	• Clarify that registrants may add multiple plans and allocate securities among multiple plans on a single Form S–8; permit addition of securities or classes of securities by automatically effective-post effective amendment; permit registration of an indeterminate amount of securities for Defined Contribution Plans; implement a new fee calculation and payment method for Defined Contribution Plan. • Conform Form S–8 instructions to current IRS plan review practices and eliminate the requirement to describe the tax effects of plan participation on the registrant.	• These proposed amendments are expected to reduce the number of initial Forms S–8 filed annually, and correspondingly increase the number of post-effective amendments to Form S–8 filed annually. We expect the net effect to be no change in the PRA burden per response and no change in the number of responses. • Decrease PRA burden per response by 1 hour.	2,140	0

[248] *See* 15 U.S.C. 77k and 77*l*(a)(2).

[249] *See* 44 U.S.C. 3501 *et seq.*

[250] 44 U.S.C. 3507(d) and 5 CFR 1320.11.

[251] *See* Rule 701(e).

PRA TABLE 1—ESTIMATED PAPERWORK BURDEN EFFECTS OF THE PROPOSED AMENDMENTS—Continued

Collection of information	Proposed amendment	Expected estimated PRA effect of proposed amendment	Current number of average annual responses	Estimated change in number of average annual respondents
Rule 701	• Expand eligibility to specified consultant entities and specified former employees of the registrant and acquired companies.	• No change in PRA burden per response or number of responses.	800	40
	• Require Rule 701(e) disclosure to be delivered to investors only for sales that exceed the $10 million threshold.	• Elimination of the requirement to provide Rule 701(e) disclosure to investors who purchase before the $10 million threshold is crossed would permit issuers who did not provide such disclosure to continue relying on the exemption after crossing the $10 million threshold. It would also allow issuers to avoid providing such disclosure as a precautionary measure in offerings where it is unclear whether the threshold will be crossed. We expect the net effect on the number of responses to be 40 additional responses with no change in the PRA burden per response.		
	• Reduce the frequency of Rule 701(e) financial statement updates; allow Rule 12g3–2(b) eligible foreign private issuers to disclose financial statements that are not reconciled to U.S. GAAP; and allow issuers to disclose valuation information consistent with IRC Section 409A rather than financial statements.	• Decrease PRA burden per response by 0.5 hours.		
	• Increase the assets cap to 25% and increase dollar cap to $2 million and expand eligibility to specified consultant entities, employees of all subsidiaries, and specified former employees of issuer and acquired companies.	• No change in PRA burden per response or number of responses.		

C. Incremental and Aggregate Burden and Cost Estimates for the Proposed Amendments

Below we estimate the incremental and aggregate change in paperwork burden as a result of the proposed amendments. These estimates represent the average burden for all registrants, both large and small. In deriving our estimates, we recognize that the burdens will likely vary among individual issuers based on a number of factors, including the nature of their business. For purposes of the PRA, the burden is to be allocated between internal burden hours and outside professional costs. The table below sets forth the percentage estimates we typically use for the burden allocation for each affected collection of information. We also estimate that the average cost of retaining outside professionals is $400 per hour.[252]

PRA TABLE 2—STANDARD ESTIMATED BURDEN ALLOCATION FOR SPECIFIED COLLECTIONS OF INFORMATION

Collection of information	Internal (%)	Outside professionals (%)
Form S–8	50	50
Rule 701	25	75

For Rule 701, we estimate that the proposed amendments would change both the frequency of responses to, and the burden per response of, the existing collections of information. We believe that increasing the Rule 701 asset and dollar caps and making the exemption available for additional participants would increase the number of securities to be issued and expand eligibility to receive securities but would not increase the number of responses. For Form S–8 we believe the amendments would change only the burden hours. The revised burden estimates were calculated by multiplying the revised estimated number of responses by the revised estimated average amount of time it would take to prepare and review the disclosure required under the affected collection of information. The table below illustrates the incremental change to the annual compliance burden of the affected collection of information, in hours and in costs.[253]

[252] We recognize that the costs of retaining outside professionals may vary depending on the nature of the professional services, but for purposes of this PRA analysis, we estimate that such costs would be an average of $400 per hour. This estimate is based on consultations with several registrants, law firms, and other persons who regularly assist registrants in preparing and filing reports with the Commission.

[253] In both PRA Table 3 and PRA Table 4, the estimated number of Form S–8 responses is 230, reflecting the number of Forms S–8 filed during 2019 in regards to retirement related plans. *See* n. 231, *supra.*

PRA TABLE 3—CALCULATION OF THE INCREMENTAL CHANGE IN BURDEN ESTIMATES OF CURRENT RESPONSES RESULTING FROM THE PROPOSED AMENDMENTS

Collection of information	Number of estimated affected respondents (A)	Burden hour annual decrease per affected respondent (B)	Decrease in burden hours for affected respondents (C) = (A) × (B)	Decrease in internal burden hours for affected respondents (D) = (C) × 0.5 or 0.25	Decrease in professional hours for affected respondents (E) = (C) × 0.5 or 0.75	Decrease in professional costs for affected respondents (F) = (E) × $400
Form S–8	230	(1)	(230)	(115)	(115)	($46,000)
Rule 701	840	(0.5)	(420)	(105)	(315)	(126,000)

The table below illustrates the program change expected to result from the proposed rule amendments together with the total requested change in reporting burden and costs.

PRA TABLE 4—REQUESTED PAPERWORK BURDEN UNDER THE PROPOSED AMENDMENTS

Form	Current burden			Program change			Requested change in burden		
	Current annual responses (A)	Current burden hours (B)	Current cost burden (C)	Number of affected responses (D)	Change in company hours (E)	Change in professional costs (F)	Requested annual responses (G)	Requested burden hours (H)	Cost burden (I)
Form S–8	2,140	28,890	$11,556,000	230	(115)	($46,000)	2,140	[1] 28,775	[2] $11,510,000
Rule 701	800	400	480,000	840	[3] (85)	[4] (102,000)	840	[5] 315	[6] 378,000

[1] This equals the sum of (or difference between) Form S–8 current burden hours and the change in company hours.
[2] This equals the sum of (or difference between) the current cost burden and the change in professional costs.
[3] This represents a reduction of (.25 × 400) in the burden hours of the existing 800 respondents, as the PRA burden per response declines from 2 to 1.5 hours, plus (40 × 1.5 × .25) for the additional burden hours attributable to 40 additional responses.
[4] This represents $120,000 reduction in existing cost for existing 800 respondents, plus $18,000 additional cost from adding 40 responses.
[5] This equals 840 issuers × 1.5 hours × 25%.
[6] This equals 840 issuers × 1.5 hours × 75% × $400 per hour.

D. Request for Comment

Request for Comment:

We request comment in order to:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information would have practical utility;
- Evaluate the accuracy of our estimate of the burden of the proposed collection of information;
- Determine whether there are ways to enhance the quality, utility, and clarity of the information to be collected;
- Evaluate whether there are ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology; and
- Evaluate whether the proposed amendments would have any effects on any other collections of information not previously identified in this section.[254]

Any member of the public may direct to us any comments about the accuracy of these burden estimates and any suggestions for reducing these burdens. Persons submitting comments on the collection of information requirements should direct the comments to the Office of Management and Budget, Attention: Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Washington, DC 20503, and should send a copy to Vanessa A. Countryman, Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090, with reference to File No. S7–20. Requests for materials submitted to OMB by the Commission with regard to these collections of information should be in writing, refer to File No. S7–20, and be submitted to the Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736. OMB is required to make a decision concerning the collection of information between 30 and 60 days after publication of this release. Consequently, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication.

VII. Initial Regulatory Flexibility Act Analysis

This Initial Regulatory Flexibility Act Analysis (''IRFA'') has been prepared, and made available for public comment, in accordance with the Regulatory Flexibility Act (''RFA'').[255] It relates to the proposed amendments to Securities Act Rule 701 and Form S–8 to modernize the two principal means by which issuers grant securities to employees in compensatory transactions. As required by the RFA, this IRFA describes the impact of these proposed amendments on small entities.[256]

A. Reasons for, and Objectives of, the Proposed Action

The proposed amendments are designed to modernize Rule 701, an exemption from Securities Act registration for certain compensatory securities transactions by non-reporting issuers, and Form S–8, a form for registering certain compensatory securities transactions by reporting companies. The Commission has recognized that the relationship between the issuer and recipient of securities is often different in compensatory, rather than capital raising, transactions. The proposed amendments reflect changes in compensatory practices, including the

[254] We request comment pursuant to 44 U.S.C. 3506(c)(2)(B).

[255] 5 U.S.C. 601 *et seq.*

[256] 5 U.S.C. 603(a).

types of securities offered, and are intended to modernize and simplify administrative requirements.

B. Legal Basis

We are proposing the amendments contained in this release under the authority set forth in Sections 3(b), 6, 7, 8, 10, 19(a) and 28 of the Securities Act, as amended, and Sections 3(b), 12, 13, 15, 23(a), and 36 of the Exchange Act.

C. Small Entities Subject to the Proposed Amendments

The proposed amendments would affect some issuers that are small entities. The RFA defines ''small entity'' to mean ''small business,'' ''small organization,'' or ''small governmental jurisdiction.'' [257] For purposes of the RFA, under 17 CFR 240.0–10(a), an issuer, other than an investment company, is a ''small business'' or ''small organization'' if it had total assets of $5 million or less on the last day of its most recent fiscal year and, under 17 CFR 230.157, is also engaged or proposing to engage in an offering of securities that does not exceed $5 million. Under 17 CFR 230.157 and 17 CFR 240.0–10(a), an investment company is considered to be a small entity if it, together with other investment companies in the same group of related investment companies, has net assets of $50 million or less as of the end of its most recent fiscal year.

The proposed amendments would affect both reporting and non-reporting issuers. We estimate that approximately 52 currently reporting issuers that filed a Form S–8 in 2019 qualify as small entities that would be eligible to rely on the proposed amendments, but lack sufficient data to similarly estimate the number of small, non-reporting issuers who may be affected.[258] We therefore are soliciting comment on the number of small entities that would be affected by the proposed amendments.

D. Reporting, Recordkeeping and other Compliance Requirements

The proposed amendments to Rule 701 would:

- Revise the additional disclosure requirements for Rule 701 exempt transactions exceeding $10 million, including how the disclosure threshold applies, the type of financial disclosure required, and the frequency with which it must be updated; and
- Revise the time at which such disclosure is required to be delivered for derivative securities that do not involve a decision by the recipient to exercise or convert in specified circumstances where such derivative securities are granted to new hires.

Because these two proposals affect only Rule 701 offerings that exceed $10 million, it is unlikely that they would affect small entities that are small businesses or small organizations, which, as defined for purposes of the RFA, are subject to a $5 million offering limit.

The remaining proposed amendments would apply to small entities to the same extent as other issuers, irrespective of size. The remaining proposed amendments to Rule 701 would:

- Raise two of the three alternative regulatory ceilings that cap the overall amount of securities that a non-reporting company may sell pursuant to the exemption during any consecutive 12-month period; and
- Make the exemption available for offers and sales of securities under a written compensatory benefit plan (or written compensation contract) established by the issuer's subsidiaries, whether or not majority-owned.

With respect to Form S–8, the proposals would:

- Implement improvements and clarifications to simplify registration on the form, including:
  - Clarify the ability to add multiple plans to a single Form S–8; and
  - Clarify the ability to allocate securities among multiple incentive plans on a single Form S–8;
  - Permit the addition of securities or classes of securities by automatically effective post-effective amendment;
- Implement improvements to simplify share counting and fee payments on the form, including:
  - Permit the registration of an aggregate dollar amount of securities; and
  - Implement a new fee payment method for registration of offers and sales pursuant to Defined Contribution Plans;
  - Conform Form S–8's instructions with current IRS plan review practices; and
- Revise Item 1(f) of Form S–8 to eliminate the requirement that the tax effects of plan participation on the registrant be described.

Finally, for both the Rule 701 and Form S–8, the proposals would:

- Extend consultant and advisor eligibility to entities meeting specified ownership criteria designed to link the securities to the performance of services; and
- Expand eligibility for former employees to specified post-termination grants and former employees of acquired entities.

The proposed amendments are expected to modernize and simplify compensatory securities offerings for all issuers. As a result, we expect that the impact of the proposed amendments would be a reduction in the paperwork burden for all issuers, including small entities.[259] We expect that the nature of any benefits and costs imposed by the proposed amendments to be similar for large and small entities.[260]

The proposed amendments would not impose any new reporting or recordkeeping requirement, except that the new fee payment method for registration of offers and sales pursuant to Defined Contribution Plans would require such plans to file a post-effective amendment annually within 90 days after the end of the plan's fiscal year to pay the registration fee, in arrears, based on aggregate sales by the plan during the fiscal year. Currently, Defined Contribution Plans are required to keep track of the number of shares sold, so that they can maintain registration of sufficient shares to continue compensatory offers and sales without violating Section 5 of the Securities Act. The proposed fee payment method would simplify plan administration by eliminating the need to track individual offers and sales of shares and permit fees to be paid based on a known aggregate dollar amount after contributions are allocated to company stock. This should significantly simplify plan administration and reduce related costs for all reporting companies sponsoring Defined Contribution Plans that offer company stock, regardless of size.

E. Duplicative, Overlapping or Conflicting Federal Rules

We believe that the proposed amendments would not duplicate, overlap or conflict with other federal rules.

F. Significant Alternatives

The RFA directs us to consider alternatives that would accomplish our stated objectives, while minimizing any significant economic impact on small entities. In connection with the

[257] 5 U.S.C. 601(6).

[258] This estimate is based on staff analysis of issuers, excluding co-registrants, with EDGAR filings of Form 10–K, 20–F and 40–F, or amendments, and an S–8 registration filed during the calendar year of January 1, 2019 to December 31, 2019. This analysis is based on data from XBRL filings, Compustat, and Ives Group Audit Analytics.

[259] For purposes of the Paperwork Reduction Act, we estimate a decrease of 0.5 burden hour per response for Rule 701 and a decrease of 1 burden hour per response for Form S–8. *See* Section VI, *supra.*

[260] *See* the discussion of the proposed amendments' economic effects on all affected parties, including small entities, in Section V, *supra.*

proposed amendments, we considered the following alternatives:

- Establishing different compliance or reporting requirements that take into account the resources available to small entities;
- Clarifying, consolidating, or simplifying compliance and reporting requirements under the rules for small entities;
- Using performance rather than design standards; and
- Exempting small entities from all or part of the requirements.

We considered establishing different compliance or reporting requirements or further clarifying, consolidating, or simplifying compliance and reporting requirements for small entities. We have not proposed such alternatives, however, because we believe that investor protection is better served by the proposals we have chosen. In addition, some of the proposals, such as the proposed amendment to Rule 701(e), are unlikely to affect small entities due to the offering size involved.

With respect to performance versus design standards, the proposed amendments generally apply performance standards. For example, the proposed amendments provide issuers with discretion in crafting disclosures that meet broad principles and standards. We believe that it is not appropriate to apply design standards or different performance standards to small entities given that compensatory relationship between the issuer and employees and related investor protection concerns would be the same for small entities and other issuers. The proposed amendments generally would simplify, harmonize and improve the framework for compensatory securities offerings, including for the offering exemption used by small entities. With respect to Rule 701, we believe that the proposed amendments would provide small entities greater flexibility to make compensatory securities offerings at lower costs. With respect to Form S–8, the proposed amendments would not establish any significant new reporting, recordkeeping, or compliance requirements for small entities, and would relieve them of burdens currently associated with registration of compensatory offerings. Accordingly, we do not believe it is necessary to exempt small entities from all or part of the proposed amendments.

G. Request for Comments

Request for Comment:

We encourage the submission of comments with respect to any aspect of this IFRA. In particular, we request comments regarding:

- How the proposed rule and form amendments can achieve their objective while lowering the burden on small entities;
- The number of small entity companies that may be affected by the proposed rule and form amendments;
- The existence or nature of the potential effects of the proposed amendments on small entity companies discussed in the analysis;
- How to quantify the effects of the proposed amendments; and
- Whether the proposed amendments would duplicate, overlap or conflict with other federal rules.

Commenters are asked to describe the nature of any effect and provide empirical data supporting the extent of the effect. Comments will be considered in the preparation of the Final Regulatory Flexibility Analysis, if the proposed amendments are adopted, and will be placed in the same public file as comments on the proposed amendments themselves.

VIII. Small Business Regulatory Enforcement Fairness Act

For purposes of the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA),[261] the Commission must advise OMB as to whether the proposed amendments constitute a ''major'' rule if it results in, or is likely to result in:

- A major increase in costs or prices for consumers or individual industries; or
- Significant adverse effects on competition, investment, or innovation.
- An annual effect on the U.S. economy of $100 million or more;

We request comment on whether our proposal would be a ''major rule'' for purposes of the SBREFA. In particular, we request comment and empirical data on:

- The potential effect on the U.S. economy on an annual basis;
- Any potential increase in costs or prices for consumers or individual industries; and
- Any potential effect on competition, investment, or innovation.

IX. Statutory Authority

The amendments contained in this release are being proposed under the authority set forth in Sections 3(b), 6, 7, 8, 10, 19(a) and 28 of the Securities Act, as amended, and Sections 3(b), 12, 13, 15, 23(a), and 36 of the Exchange Act.

Administrative practice and procedure, Reporting and recordkeeping requirements, Securities.

Text of Proposed Rule and Form Amendments

In accordance with the foregoing, we are proposing to amend title 17, chapter II of the Code of Federal Regulations as follows:

PART 229—STANDARD INSTRUCTIONS FOR FILING FORMS UNDER SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934 AND ENERGY POLICY AND CONSERVATION ACT OF 1975—REGULATION S–K

■ 1. The authority citation for part 229 continues to read in part as follows:

Authority: 15 U.S.C. 77e, 77f, 77g, 77h, 77j, 77k, 77s, 77z–2, 77z–3, 77aa(25), 77aa(26), 77ddd, 77eee, 77ggg, 77hhh, 77iii, 77jjj, 77nnn, 77sss, 78c, 78i, 78j, 78j–3, 78l, 78m, 78n, 78n–1, 78o, 78u–5, 78w, 78ll, 78 mm, 80a–8, 80a–9, 80a–20, 80a–29, 80a–30, 80a–31(c), 80a–37, 80a–38(a), 80a–39, 80b–11 and 7201 *et seq.;* 18 U.S.C. 1350; sec. 953(b), Pub. L. 111–203, 124 Stat. 1904 (2010); and sec. 102(c), Pub. L. 112–106, 126 Stat. 310 (2012).

* * * * *

■ 2. Amend § 229.601 by revising paragraph (b)(5)(iii) to read as follows:

§ 229.601 (Item 601) Exhibits.

* * * * *

(b) * * *

(5) * * *

(iii) If the securities being registered are issued under a plan that is subject to the requirements of the Employment Retirement Income Security Act of 1974, as amended, (29 U.S.C. 1001 *et seq.*) (''ERISA'') and the plan has been amended subsequent to the filing of the documents required by paragraph (b)(5)(ii)(A) or (B) of this section, furnish an opinion of counsel that confirms the compliance of the amended provisions of the plan with the requirements of ERISA pertaining to such provisions.

* * * * *

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

■ 3. The authority citation for part 230 continues to read as follows:

Authority: 15 U.S.C. 77b, 77b note, 77c, 77d, 77f, 77g, 77h, 77j, 77r, 77s, 77z–3, 77sss, 78c, 78d, 78j, 78*l,* 78m, 78n, 78*o,* 78*o*–7 note, 78t, 78w, 78*ll*(d), 78mm, 80a–8, 80a–24, 80a–28, 80a–29, 80a–30, and 80a–37, and Pub. L. 112–106, sec. 201(a), sec. 401, 126 Stat. 313 (2012), unless otherwise noted.

* * * * *

■ 4. Amend § 230.405 by adding in alphabetical order a definition for ''*Defined contribution plan*'' and revising the definition of ''*Employee benefit plan*'' to read as follows:

§ 230.405 Definitions of terms.

* * * * *

Defined contribution plan. The term *defined contribution plan* means an employee benefit plan (as defined in § 230.405) that provides for specified or determinable contributions by the employee, employer or both to an individual account for each employee participant where the amount of benefits paid depends, in addition to the level of contributions, on the degree of investment success.

* * * * *

Employee benefit plan. The term *employee benefit plan* means any written purchase, savings, option, bonus, appreciation, profit sharing, thrift, incentive, pension or similar plan or written compensation contract solely for employees, directors, general partners, trustees (where the registrant is a business trust), officers, or consultants or advisors. However, consultants or advisors may participate in an employee benefit plan only if:

(1) They are:

(i) Natural persons; or

(ii) An entity, substantially all of the activities of which involve the performance of services; and substantially all of the ownership interests of which are held directly by:

(A) No more than 25 natural persons, of whom at least 50 percent perform such services for the issuer through the entity;

(B) The estate of a natural person specified in paragraph (1)(ii)(A) of this definition; and

(C) Any natural person who acquired ownership interests in the entity by reason of the death of a natural person specified in paragraph (1)(ii) (A) of this definition.

(2) They provide bona fide services to the registrant; and

(3) The services are not in connection with the offer or sale of securities in a capital-raising transaction, and do not directly or indirectly promote or maintain a market for the registrant's securities.

* * * * *

■ 5. Amend § 230.413 by revising paragraph (a) and adding paragraph (c) to read as follows:

§ 230.413 Registration of additional securities and additional classes of securities.

(a) Except as provided in section 24(f) of the Investment Company Act of 1940 (15 U.S.C. 80a–24(f)) and in paragraphs (b) and (c) of this section, where a registration statement is already in effect, the registration of additional securities shall only be effected through a separate registration statement relating to the additional securities.

* * * * *

(c) Notwithstanding paragraph (a) of this section, the following additional securities or additional classes of securities may be added to a Form S–8 registration statement already in effect by filing a post-effective amendment to that Form S–8 registration statement:

(1) Securities of the same class as those already registered on a previously effective Form S–8 registration statement; and

(2) Securities of a class different than those registered on the effective Form S–8 registration statement.

■ 6. Amend § 230.416 by adding paragraph (d) to read as follows:

§ 230.416 Securities to be issued as a result of stock splits, stock dividends and anti-dilution provisions and interests to be issued pursuant to certain employee benefit plans.

* * * * *

(d) Where a registration statement on Form S–8 relates to securities to be offered pursuant to a defined contribution plan, such registration statement shall be deemed to register an indeterminate amount of such securities.

■ 7. Amend § 230.456 by adding paragraph (e) to read as follows:

§ 230.456 Date of filing; timing of fee payment.

* * * * *

(e)(1) Notwithstanding paragraph (a) of this section, an issuer that registers securities on Form S–8 to be offered pursuant to a defined contribution plan is not required to pay a registration fee at the time of filing but instead must pay a registration fee to the Commission not later than 90 days after the end of the defined contribution plan's fiscal year. The registration fee must be calculated in the manner specified in section 6(b) of the Act and § 230.457(h)(4) (Rule 457), based on the aggregate offering price for which the issuer's securities were sold pursuant to registration of an indeterminate amount of securities under this subsection during the plan's previous fiscal year, provided that: Not later than 90 days after the end of the relevant plan fiscal year during which it has publicly offered such securities, the issuer files a post-effective amendment to the Form S–8 with the Commission. Such post-effective amendment must be filed for the sole purpose of paying the fees owed by the issuer for sales pursuant to a defined contribution plan, and not for any other purpose. The post-effective amendment is required to contain only the registration statement cover page including the calculation of the registration fee table and the required signatures. The post-effective amendment also must be accompanied by the payment by the issuer of a registration fee with respect to the offering amount of the securities sold during the plan's previous fiscal year as required in this section.

(2) Where an issuer is registering an offering of an indeterminate amount of securities pursuant to a defined contribution plan under paragraph (e)(1) of this section, the securities sold will be considered registered, for purposes of section 6(a) of the Act, if the registration fee has been paid and a post-effective amendment is filed pursuant to paragraph (e)(1) of this section not later than the end of the 90-day period.

(3) A registration statement filed relying on the registration fee payment provisions of paragraph (e)(1) of this section will be considered filed as to the securities identified in the registration statement for purposes of this section and section 5 of the Act when it is received by the Commission, if it complies with all other requirements under the Act, including this part.

(4) For purposes of this section, if an issuer ceases operations, the date the issuer ceases operations will be deemed to be the end of the plan's fiscal year for the purpose of this Rule 456. In the case of a liquidation, merger, or sale of all or substantially all of the assets (''merger'') of the issuer, the plan will be deemed to have ceased operations for the purposes of this section on the date the liquidation, merger or sale is consummated.

(5) An issuer paying the fee required by paragraph (e)(1) of this section or any portion thereof more than 90 days after the end of the fiscal year of the issuer shall pay to the Commission interest on unpaid amounts, calculated based on the interest rate in effect at the time of the interest payment by reference to the ''current value of funds rate'' on the Treasury Department's Financial Management Service internet site at *http://www.fms.treas.gov,* or by calling (202) 874–6995, and using the following formula: I = (X) (Y) (Z/365), where: I = Amount of interest due; X = Amount of registration fee due; Y = Applicable interest rate, expressed as a fraction; Z = Number of days by which the registration fee payment is late. The payment of interest pursuant to this paragraph (e)(5) shall not preclude the Commission from bringing an action to

enforce the requirements of paragraph (e) of this section.

Instruction 1 to paragraph (e): To determine the date on which the registration fee must be paid, the first day of the 90-day period is the first calendar day of the fiscal year following the fiscal year for which the registration fee is to be paid. If the last day of the 90-day period falls on a Saturday, Sunday, or Federal holiday, the registration fee is due on the first business day thereafter.

Instruction 2 to paragraph (e): For the purposes of this paragraph, the term ''issuer'' refers to the registrant who is offering shares to be purchased as part of a defined contribution plan. The term does not refer to the defined contribution plan as issuer of plan interests.

■ 8. Amend § 230.457 by adding paragraph (h)(4) to read as follows:

§ 230.457 Computation of fee.

* * * * *

(h) * * *

(4) If an issuer is registering an offering of an indeterminate amount of securities to be issued pursuant to a defined contribution plan in accordance with paragraph (e)(1) of § 230.456(e) (Rule 456(e)), the registration fee is calculated by multiplying the aggregate offering price of securities sold during the fiscal year by the fee payment rate in effect on the date of the fee payment.

■ 9. Amend § 230.701 by removing the Preliminary Notes, and revising paragraphs (a), and (c) through (e) to read as follows:

§ 230.701 Exemption for offers and sales of securities pursuant to certain compensatory benefit plans and contracts relating to compensation.

(a) *Exemption.* Offers and sales made in compliance with all of the conditions of this section are exempt from section 5 of the Act (15 U.S.C. 77e).

(1) This section relates to transactions exempted from the registration requirements of section 5 of the Act (15 U.S.C. 77e). These transactions are not exempt from the antifraud, civil liability, or other provisions of the federal securities laws. Issuers and persons acting on their behalf have an obligation to provide investors with disclosure adequate to satisfy the antifraud provisions of the federal securities laws.

(2) In addition to complying with this section, the issuer also must comply with any applicable state law relating to the offer and sale of securities.

(3) An issuer that attempts to comply with this section, but fails to do so, may claim any other exemption that is available.

(4) This section is available only to the issuer of the securities. Affiliates of the issuer may not use this section to offer or sell securities. This section also does not cover resales of securities by any person. This section provides an exemption only for the transactions in which the securities are offered or sold by the issuer, not for the securities themselves.

(5) The purpose of this section is to provide an exemption from the registration requirements of the Act for securities issued in compensatory circumstances. This section is not available for plans or schemes to circumvent this purpose, such as to raise capital. This section also is not available to exempt any transaction that is in technical compliance with this section but is part of a plan or scheme to evade the registration provisions of the Act. In any of these cases, registration under the Act is required unless another exemption is available.

* * * * *

(c) *Transactions exempted by this section.* This section exempts offers and sales of securities (including plan interests and guarantees pursuant to paragraph (d)(2)(ii) of this section) under a written compensatory benefit plan (or written compensation contract) established by the issuer, its parents, its subsidiaries or subsidiaries of the issuer's parent, for the participation of their employees, directors, general partners, trustees (where the issuer is a business trust), officers, or consultants and advisors, and their family members who acquire such securities from such persons through gifts or domestic relations orders. This section exempts offers and sales to former employees, directors, general partners, trustees, officers, consultants and advisors only if such persons were employed by or providing services to the issuer, its parents, its subsidiaries or subsidiaries of the issuer's parent at the time the securities were offered or during a performance period for which the securities are issued as compensation that ended within 12 months preceding the employee's resignation, retirement or other termination. This section also exempts offers and sales to former employees of an acquired entity of securities issued in substitution or exchange for securities issued to such employees on a compensatory basis while such persons were employed by or providing services to the acquired entity. In addition, the term ''employee'' includes insurance agents who are exclusive agents of the issuer, its subsidiaries, parents, or subsidiaries of the issuer's parent, or derive more than 50% of their annual income from those entities. The term ''employee'' also includes executors, administrators and beneficiaries of the estates of deceased employees, guardians or members of a committee for incompetent former employees, or similar persons duly authorized by law to administer the estate or assets of former employees.

(1) *Special requirements for consultants and advisors.* This section is available to consultants and advisors only if:

(i) They provide bona fide services to the issuer, its parents, its subsidiaries or subsidiaries of the issuer's parent;

(ii) The services are not in connection with the offer or sale of securities in a capital-raising transaction, and do not directly or indirectly promote or maintain a market for the issuer's securities; and

(iii) They are:

(A) Natural persons; or

(B) An entity, substantially all of the activities of which involve the performance of services; and substantially all of the ownership interests of which are held directly by:

(1) No more than 25 natural persons, of whom at least 50 percent perform such services for the issuer through the entity;

(2) The estate of a natural person specified in paragraph (c)(1)(iii)(B)*(1)* of this section; and

(3) Any natural person who acquired ownership interests in the entity by reason of the death of a natural person specified in paragraph (c)(1)(iii)(B)*(1)* of this section.

(d) *Amounts that may be sold*—(1) *Offers.* Any amount of securities may be offered in reliance on this section. However, for purposes of this section, sales of securities underlying options must be counted as sales on the date of the option grant.

(2) *Sales.* The aggregate sales price or amount of securities sold in reliance on this section during any consecutive 12-month period must not exceed the greatest of the following:

(i) $2,000,000;

(ii) 25% of the total assets of the issuer (or of the issuer's parent if the issuer is a wholly-owned subsidiary and the securities represent obligations that the parent fully and unconditionally guarantees) measured at the issuer's most recent balance sheet date (if no older than its last fiscal year end); or

(iii) 15% of the outstanding amount of the class of securities being offered and sold in reliance on this section, measured at the issuer's most recent balance sheet date (if no older than its last fiscal year end).

(3) *Rules for calculating prices and amounts*—(i) *Aggregate sales price.* The term *aggregate sales price* means the sum of all cash, property, notes, cancellation of debt or other consideration received or to be received by the issuer for the sale of the securities. Non-cash consideration must be valued by reference to bona fide sales of that consideration made within a reasonable time or, in the absence of such sales, on the fair value as determined by an accepted standard. The value of services exchanged for securities issued must be measured by reference to the value of the securities issued. Options must be valued based on the exercise price of the option.

(ii) *Time of the calculation.* With respect to options to purchase securities, the aggregate sales price is determined when an option grant is made (without regard to when the option becomes exercisable). With respect to other securities, the calculation is made on the date of sale. With respect to deferred compensation or similar plans, the calculation is made when the irrevocable election to defer is made.

(iii) *Derivative securities.* In calculating outstanding securities for purposes of paragraph (d)(2)(iii) of this section, treat the securities underlying all currently exercisable or convertible options, warrants, rights or other securities, other than those issued under this exemption, as outstanding. In calculating the amount of securities sold for other purposes of paragraph (d)(2) of this section, count the amount of securities that would be acquired upon exercise or conversion in connection with sales of options, warrants, rights or other exercisable or convertible securities, including those to be issued under this exemption.

(iv) *Other exemptions.* Amounts of securities sold in reliance on this section do not affect ''aggregate offering prices'' in other exemptions, and amounts of securities sold in reliance on other exemptions do not affect the amount that may be sold in reliance on this section.

(v) *Merged entities.* After completion of a business combination transaction, to calculate compliance with paragraph (d)(2) of this section, the acquiring issuer may use a *pro forma* balance sheet that reflects the business combination transaction or a balance sheet for a date after the completion of the business combination transaction that reflects the total assets and outstanding securities of the combined entity.

(e) *Disclosure that must be provided.* The issuer must deliver to investors a copy of the compensatory benefit plan or the contract, as applicable. In addition, if the aggregate sales price or amount of securities sold during any consecutive 12-month period exceeds $10 million, the issuer must deliver to investors, for sales after the $10 million threshold is exceeded, the following disclosure a reasonable period of time before the date of sale:

(1) If the plan is subject to the Employee Retirement Income Security Act of 1974 (''ERISA'') (29 U.S.C. 1104–1107), a copy of the summary plan description required by ERISA;

(2) If the plan is not subject to ERISA, a summary of the material terms of the plan;

(3) Information about the risks associated with investment in the securities sold pursuant to the compensatory benefit plan or compensation contract; and

(4)(i) Financial statements required to be furnished by Part F/S of Form 1–A (Regulation A Offering Statement) (§§ 230.251 through 230.263), for either a Tier 1 or Tier 2 offering. Issuers must apply the age of financial statements requirements of Part F/S paragraphs (b)(3) and (4) at the time of sale. Foreign private issuers as defined in Rule 405 must provide a reconciliation to generally accepted accounting principles in the United States (U.S. GAAP) if their financial statements are not prepared in accordance with U.S. GAAP or International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) (Item 17 of Form 20–F (§ 249.220f of this chapter)), provided that foreign private issuers that are eligible for the exemption from Exchange Act registration provided by Exchange Act Rule 12g3–2(b) (§ 240.12g3–2(b) of this chapter) may provide financial statements that are prepared in accordance with home country accounting standards without reconciliation to U.S. GAAP if financial statements prepared in accordance with U.S. GAAP or IFRS as issued by the IASB are not otherwise available.

(ii) In lieu of the financial statements required by paragraph (e)(4)(i) of this section:

(A) A foreign private issuer that is eligible for the exemption from Exchange Act registration provided by Exchange Act Rule 12g3–2(b) (§ 240.12g3–2(b) of this chapter) may provide the fair market value of the securities to be sold as determined consistent with the rules and regulations under Section 409A of the Internal Revenue Code (26 U.S.C. 409A) applicable to stock readily tradeable on an established securities market; and

(B) Any other issuer may provide an independent valuation report of the fair market value of the securities to be sold as determined by an independent appraisal consistent with the rules and regulations under Section 409A of the Internal Revenue Code (26 U.S.C. 409A) applicable to determination of the fair market value of service recipient stock for stock not readily tradable on an established securities market, as of a date that is no more than 6 months before the sale of securities in reliance on this exemption.

(5) If the issuer is relying on paragraph (d)(2)(ii) of this section to use its parent's total assets to determine the amount of securities that may be sold, the parent's financial statements must be delivered. If the parent is subject to the reporting requirements of section 13 or 15(d) of the Exchange Act (15 U.S.C. 78m or 78o(d)), the financial statements of the parent required by Rule 10–01 of Regulation S–X (§ 210.10–01 of this chapter) and Item 310 of Regulation D–B (§ 228.310 of this chapter), as applicable, must be delivered.

(6) If the sale involves a stock option or other derivative security that involves a decision to exercise or convert, the issuer must deliver disclosure a reasonable period of time before the date of exercise or conversion. If the sale involves a restricted stock unit or other derivative security that does not involve a decision to exercise or convert, the issuer must deliver disclosure a reasonable period of time before the date the restricted stock unit or similar derivative security is granted; *provided that,* if the sale is in connection with the hire of a new employee, the disclosure must be delivered no later than 14 calendar days after the date the person begins employment. For deferred compensation or similar plans, the issuer must deliver disclosure to investors a reasonable period of time before the date the irrevocable election to defer is made.

(7) *Merged entities.* (i) In determining whether the amount of securities the acquiring issuer sold during any consecutive 12-month period exceeds $10 million, the acquiring issuer would not be required to include any securities sold by the acquired entity pursuant to the rule during the same 12-month period.

(ii) As long as the acquired entity complied with Rule 701 at the time it originally granted the derivative securities assumed by the acquiring issuer in the business combination transaction, the exercise or conversion of the derivative securities would be exempted by this section, subject to compliance, where applicable, with

Rule 701(e). For assumed derivative securities for which the acquired entity was required to provide disclosure pursuant to Rule 701(e) that are exercised or converted after completion of the business combination transaction, the acquiring issuer would satisfy that obligation by providing information meeting the requirements of Rule 701(e) consistent with the timing requirements of Rule 701(e)(6).

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

■ 10. The authority citation for part 239 continues to read in part as follows:

Authority: 15 U.S.C. 77c, 77f, 77g, 77h, 77j, 77s, 77z–2, 77z–3, 77sss, 78c, 78*l,* 78m, 78n, 78o(d), 78o–7 note, 78u–5, 78w(a), 78*ll,* 78mm, 80a–2(a), 80a–3, 80a–8, 80a–9, 80a–10, 80a–13, 80a–24, 80a–26, 80a–29, 80a–30, 80a–37, and Sec. 71003 and Sec. 84001, Pub. L. 114–94, 129 Stat. 1312, unless otherwise noted.

■ 11. Amend Form S–8 (referenced in § 239.16b) by:

■ a. Revising the cover page;

■ b. Adding Note 3 under Calculation of Registration Fee;

■ c. Revising General Instruction A.1(a)(1)

■ d. Revising General Instruction A.1(a)(3);

■ e. Re-designating the existing text of General Instruction E to be paragraph 1;

■ f. Amending General Instruction E to include paragraph 2

■ g. Revising paragraph (f) of Item 1;

■ h. Revising paragraph (b) of Item 8; and

■ i. Adding paragraph (c) to Item 8.

The revisions and additions read as follows:

Note: The text of Form S–8 does not, and these amendments will not, appear in the Code of Federal Regulations.

GENERAL INSTRUCTIONS

A. Rule as to Use of Form S–8

1. * * *

a. * * *

(1) For purposes of this form, the term ''employee'' is defined as any employee, director, general partner, trustee (where the registrant is a business trust), officer, or consultant or advisor. Form S–8 is available for the issuance of securities to consultants or advisors only if:

(i) They provide bona fide services to the registrant;

(ii) The services are not in connection with the offer or sale of securities in a capital-raising transaction, and do not directly or indirectly promote or maintain a market for the issuer's securities; and

(iii) They are:

(A) Natural persons; or

(B) An entity, substantially all of the activities of which involve the performance of services; and substantially all of the ownership interests of which are held directly by:

(1) No more than 25 natural persons, of whom at least 50 percent perform such services for the issuer through the entity;

(2) The estate of a natural person specified in paragraph *(1);* and

(3) Any natural person who acquired ownership interests in the entity by reason of the death of a natural person specified in paragraph *(1).*

(2) * * *

(3) The term ''employee'' also includes former employees of the issuer, former employees of an entity acquired by the issuer, as well as executors, administrators or beneficiaries of the estates of deceased employees, guardians or members of a committee for incompetent former employees of the issuer or an entity acquired by the issuer, or similar persons duly authorized by law to administer the estate or assets of former employees of the issuer or an entity acquired by the issuer. The inclusion of all individuals described in the preceding sentence in the term ''employee'' is only to permit registration on Form S–8 of:

(i) The exercise of employee benefit plan stock options and the subsequent sale of the securities, if these exercises and sales are permitted under the terms of the plan;

(ii) the acquisition of registrant securities pursuant to intra-plan transfers among plan funds, if these transfers are permitted under the terms of the plan;

(iii) the acquisition of registrant securities as compensation for a former employee's service to the issuer during a performance period ending within the 12 months preceding the former employee's resignation, retirement or other termination; and

(iv) with respect to former employees of an entity acquired by the issuer, the acquisition of securities issued in substitution or exchange for securities issued to such persons by the acquired entity on a compensatory basis while such persons were employed by the acquired entity.

* * * * *

E. Registration of Additional Securities

1. With respect to the registration of additional securities of the same class as other securities for which a registration statement filed on this Form relating to an employee benefit plan is effective, the registrant may file a registration statement consisting only of the following: The facing page; a statement that the contents of the earlier registration statement, identified by file number, are incorporated by reference; required opinions and consents; the signature page; and any information required in the new registration statement that is not in the earlier registration statement. If the new registration statement covers restricted securities being offered for resale, it shall include the required reoffer prospectus. If the earlier registration statement included a reoffer prospectus, the new registration statement shall be deemed to include that reoffer prospectus; provided, however, that a revised reoffer prospectus shall be filed, if the reoffer prospectus is substantively different from that filed in the earlier

registration statement. The filing fee required by the Act and Rule 457 (§ 230.457) shall be paid with respect to the additional securities only.

2. An issuer may register additional securities or classes of securities, pursuant to Rule 413(c) by filing a post-effective amendment to the effective registration statement. The issuer may add subsidiaries as additional registrants, whose securities are eligible to be sold as part of the Form S–8 by filing a post-effective amendment identifying the additional registrants, and the registrant and the additional registrants and other persons required to sign the registration statement must sign the post-effective amendment. The post-effective amendment must consist of the facing page; any disclosure required by this Form that is necessary to update the registration statement to reflect the additional securities, additional classes of securities, any required opinions and consents; and the signature page. Required information, consents, or opinions may be included in the prospectus and the registration statement through a post-effective amendment or may be provided through a document incorporated or deemed incorporated by reference into the registration statement and the prospectus that is part of the registration statement.

* * * * *

Item 1. Plan Information.

* * * * *

(f) Tax Effects of Plan Participation

Describe briefly the tax effect that may accrue to employees as a result of plan participation and whether or not the plan is qualified under Section 401(a) of the Internal Revenue Code.

Note: If the plan is not qualified under Section 401 of the Internal Revenue Code of 1986, as amended, consideration should be given to the applicability of the Investment Company Act of 1940. *See* Securities Act Release No. 4790 (July 13, 1965).

* * * * *

Item 8. Exhibits.

* * * * *

(b) Neither an opinion of counsel concerning compliance with the requirements of ERISA nor an Internal Revenue Service determination letter that the plan is qualified under Section 401 of the Internal Revenue Code shall be required for any plan amendment if, in lieu thereof, the response to this Item 8 includes an undertaking that the registrant will maintain the plan's compliance with the requirements of ERISA and will make all changes required to maintain such compliance in a timely manner.

(c) Provided that if the plan adopted is a pre-approved plan that previously received an opinion letter from the Internal Revenue Service, neither an opinion of counsel concerning compliance with the requirements of ERISA nor an company-specific Internal Revenue Service opinion letter that the plan is qualified under Section 401 of the Internal Revenue Code shall be required if, in lieu thereof, the registrant files a copy of the IRS opinion letter approving the pre-approved plan that was issued to the provider of the plan, unless the company makes revisions to the pre-approved plan that may call into question whether the plan, as so revised, is still qualified.

Procedures for Asylum and Withholding of Removal; Credible Fear and Reasonable Fear Review

AGENCY: Department of Homeland Security; Executive Office for Immigration Review, Department of Justice.

ACTION: Final rule.

SUMMARY: On June 15, 2020, the Department of Homeland Security (''DHS'') and the Department of Justice (''DOJ'') (collectively ''the Departments'') published a notice of proposed rulemaking (''NPRM'' or ''proposed rule'') that would amend the regulations governing credible fear determinations. The proposed rule would make it so that individuals found to have a credible fear will have their claims for asylum, withholding of removal under section 241(b)(3) of the Immigration and Nationality Act (''INA'' or ''the Act'') (''statutory withholding of removal''), or protection under the regulations issued pursuant to the legislation implementing the Convention Against Torture and Other Cruel, Inhuman, or Degrading Treatment or Punishment (''CAT''), adjudicated by an immigration judge within the Executive Office for Immigration Review (''EOIR'') in streamlined proceedings (rather than under section 240 of the Act), and to specify what standard of review applies in such streamlined proceedings. The Departments further proposed changes to the regulations regarding asylum, statutory withholding of removal, and withholding and deferral of removal under the Convention Against Torture (''CAT'') regulations. The Departments also proposed amendments related to the standards for adjudication of applications for asylum and statutory withholding. This final rule (''rule'' or ''final rule'') responds to comments received in response to the NPRM and generally adopts the NPRM with few substantive changes.

DATES: This rule is effective on January 11, 2021.

FOR FURTHER INFORMATION CONTACT: Lauren Alder Reid, Assistant Director, Office of Policy, Executive Office for Immigration Review, 5107 Leesburg Pike, Falls Church, VA 22041, telephone (703) 305–0289 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

I. Executive Summary of the Final Rule

On June 15, 2020, the Departments published an NPRM that would amend the regulations governing credible fear determinations to establish streamlined proceedings under a clarified standard of review. Procedures for Asylum and Withholding of Removal; Credible Fear and Reasonable Fear Review, 85 FR 36264 (June 15, 2020). The proposed rule would also amend regulations regarding asylum, statutory withholding of removal, and withholding and deferral of removal under the regulations. *Id.*

The following discussion describes the provisions of the final rule, which is substantially the same as the NPRM, and summarizes the changes made in the final rule.

A. Authority and Legal Framework

The Departments are publishing this final rule pursuant to their respective authorities under the Immigration and Nationality Act (''INA'') as amended by the Homeland Security Act of 2002 (''HSA''), Public Law 107–296, 116 Stat. 2135.

The INA, as amended by the HSA, charges the Secretary ''with the administration and enforcement of this chapter [titled ''Immigration and Nationality''] and all other laws relating to the immigration and naturalization of aliens'' and granted the Secretary the power to take all actions ''necessary for carrying out'' the provisions of the immigration and nationality laws. INA 103(a)(1) and (3), 8 U.S.C. 1103(a)(1) and (3); *See* HSA, sec. 1102, 116 Stat. at 2273–74; Consolidated Appropriations Resolution of 2003, Public Law 108–7, sec. 105, 117 Stat. 11, 531.

The HSA charges the Attorney General with ''such authorities and functions under this chapter and all other laws relating to the immigration and naturalization of aliens as were [previously] exercised by [EOIR], or by the Attorney General with respect to [EOIR] . . . .'' INA 103(g)(1), 8 U.S.C. 1103(g)(1); *see* 6 U.S.C. 521; HSA, sec. 1102, 116 Stat. at 2274.

Furthermore, the Attorney General is authorized to ''establish such regulations, prescribe such forms of bond, reports, entries, and other papers, issue such instructions, review such administrative determinations in immigration proceedings, delegate such authority, and perform such other acts as the Attorney General determines to be necessary for carrying out this section.'' INA 103(g)(2), 8 U.S.C. 1103(g)(2); HSA, sec. 1102, 116 Stat. 2135, 2274.

B. Changes in the Final Rule

Through the NPRM, the Departments sought to satisfy a basic tenet of asylum law: To assert a ''government's right and duty to protect its own resources and citizens, while aiding those in true need of protection from harm.'' 85 FR at 36265 (citations omitted). To achieve this dual aim, the Departments proposed numerous amendments to the DHS and DOJ regulations.[1] After carefully reviewing all of the comments received on the NPRM, the Departments are making the following changes to the final rule.

This final rule makes thirteen non-substantive changes to the regulatory provisions in the proposed rule, some of which were noted by commenters. First, the final rule corrects a typographical error—*i.e.* ''part'' rather than ''party''—in 8 CFR 208.30(e)(2)(ii), which was proposed to read, ''Such other facts as are known to the officer, including whether the alien could avoid a future threat to his or her life or freedom by relocating to another *party* of the proposed country of removal and, under all circumstances, it would be reasonable to expect the applicant to do so'' (emphasis added). Second, the Departments added the word ''for'' to correct the form name ''Application for Asylum and for Withholding of Removal'' at 8 CFR 208.31(g)(2), 1208.30(g)(2)(iv)(B), and 1208.31(g)(2). Third, the Departments are replacing the word ''essential'' with the word ''material'' in 8 CFR 208.20(c)(1) and 1208.20(c)(1), consistent with the stated intent of the NPRM.

Fourth, the Departments are making stylistic revisions to 8 CFR 208.15(a)(1) and 1208.15(a)(1), including breaking them into three subparagraphs, to make them easier to follow and to reduce the risk of confusion. Fifth, the Departments

[1] In addition to the amendments outlined in more detail herein, the Departments also proposed additional minor amendments for clarity, such as replacing references to the former Immigration and Naturalization Service with references to DHS where appropriate (*see, e.g.,* 8 CFR 208.13(b)(3)(ii)) or replacing forms listed by form number with the form's name (*see, e.g.,* 8 CFR 1003.42(e)). The Departments also further reiterate the full explanation and justifications for the proposed changes set out in the preamble to the NPRM. 85 FR at 36265–88.

are editing the temporal language in 8 CFR 208.15(a)(3)(i) and (ii) and 1208.15(a)(3)(i) for clarity and consistency with similar language in 8 CFR 208.15(a)(2) and 1208.15(a)(2). The edited language clarifies the relevant temporal scope to read ''after departing his country of nationality or last habitual residence and prior to arrival in or entry into the United States'' in lieu of the language in the NPRM. Sixth, the Departments are striking the parenthetical phrase ''(''rogue official'')'' in 8 CFR 208.18(a)(1) and 1208.18(a)(1). Relatedly, they are replacing the remaining uses of the phrase ''rogue official'' in 8 CFR 208.16(b)(3)(iv), 208.18(a)(1), and 1208.18(a)(1) with its definition, ''public official who is not acting under color of law.'' [2] Seventh, the Departments are adding the clarifying phrase ''as defined in section 212(a)(9)(B)(ii) and (iii) of the Act'' to 8 CFR 208.13(d)(2)(i)(D) and 1208.13(d)(2)(i)(D) consistent with the intent of the NPRM. Eighth, the Departments are clarifying the language in 8 CFR 208.1(g) and 1208.1(g) to alleviate apparent confusion and improve consistency with the intent of the NPRM regarding the use of stereotypes as evidence for an asylum claim. A bald statement that a country or its denizens have a particular cultural trait that causes citizens, nationals, or residents of that country to engage in persecution is evidence lacking in probative value and has no place in an adjudication.

Ninth, the Departments are making conforming edits to 8 CFR 208.6(a) and (b) and 8 CFR 1208.6(a) and (b) to make clear that the disclosure provisions of 8 CFR 208.6 and 1208.6 apply to applications for withholding of removal under the INA and for protection under the regulations implementing the CAT,[3] and not solely to asylum applications. That point is already clear in 8 CFR 208.6(d), (e) and 1208.6(d), (e), and the Departments see no reason not to conform the other paragraphs in that section for consistency. Tenth, and relatedly, the Departments are making edits to 8 CFR 208.6(a), (b), (d) and (e) and 8 CFR 1208.6(a) and (b), (d), and (e) to make clear that applications for refugee admission pursuant to INA 207(c)(1), 8 U.S.C. 1157(c)(1), and 8 CFR part 207 are subject to the same information disclosure provisions as similar applications for asylum, withholding of removal under the INA, and protection under the regulations implementing the CAT. The Departments already apply the disclosure provisions to such applications as a matter of policy and see no basis to treat such applications differently than those for protection filed by aliens already in or arriving in the United States. Eleventh, the Departments are amending 8 CFR 208.13(d)(2)(ii) to reflect that, operationally, DHS may refer or deny an asylum application, depending on the circumstances of the applicant. *See* 8 CFR 208.14. Twelfth, the Departments are correcting 8 CFR 1208.30(g)(1)(i), (ii) to reflect that asylum officers issue determinations, not orders. *See* 8 CFR 208.30(e).

Thirteenth, EOIR is making a conforming change to 8 CFR 1244.4(b) to align it with the both the appropriate statutory citation and the corresponding language in 8 CFR 244.4(b). Aliens described in INA 208(b)(2)(A), 8 U.S.C. 1158(b)(2)(A), including those subject to the firm resettlement bar contained in INA 208(b)(2)(A)(vi), 8 U.S.C. 1158(b)(2)(A)(vi), are ineligible for Temporary Protected Status. That statutory ineligibility ground is incorporated into regulations in both chapter I and chapter V of title 8; however, while the title I provision, 8 CFR 244.4(b), cites the correct statutory provision—INA 208(b)(2)(A)(vi), 8 U.S.C. 1158(b)(2)(A)(vi)—the title V provision, 8 CFR 1244.4(b), maintains an outdated reference to an incorrect statutory provision. *Compare* 8 CFR 244.4(b) (referencing INA 208(b)(2)(A), 8 U.S.C. 1158(b)(2)(A)), *with* 8 CFR 1244.4(b) (referencing former INA 243(h)(2), 8 U.S.C. 1253(h)(2)).

The Departments are also making four non-substantive changes in the final rule to correct regulatory provisions that were inadvertently changed or deleted in the proposed rule or that introduced an unnecessary redundancy. First, the final rule reinserts language relating to DHS's ability to reconsider a negative credible fear finding that has been concurred upon by an immigration judge after providing notice of its reconsideration to the immigration judge, which was inadvertently removed from 8 CFR 1208.30(g)(2)(iv)(A) in the NPRM. The final rule reinserts that language in 8 CFR 208.30(g)(2)(i); it pertains to a DHS procedure and, thus, appropriately belongs in chapter I, rather than chapter V, of title 8.

Second, the final rule strikes the regulatory text changes proposed to 8 CFR 103.5. Those changes were not discussed in the preamble to the NPRM and were inadvertently included in the NPRM's proposed regulatory text.

Third, the final rule reinserts the consideration—of-novel-or-unique-issues language in 8 CFR 208.30(e)(4) that was inadvertently proposed to be removed in the NPRM, with modifications to account for changes in terminology adopted via this final rule (specifically, ''[i]n determining whether the alien has a credible fear of persecution, as defined in section 235(b)(1)(B)(v) of the Act, or a reasonable possibility of persecution or torture, the asylum officer shall consider whether the alien's case presents novel or unique issues that merit consideration in a full hearing before an immigration judge.'').

Fourth, this final rule removes the following sentence from the proposed 8 CFR 208.30(e)(4): ''An asylum officer's determination will not become final until reviewed by a supervisory asylum officer.'' Nearly identical text already exists in 8 CFR 208.30(e)(8) and would be repetitive to include in 8 CFR 208.30(e)(4).

In response to issues raised by commenters or to eliminate potential confusion caused by the drafting in the NPRM, the Departments are making five additional changes to the NPRM in the final rule. First, the Departments are amending the waiver provision in 8 CFR 208.1(c) and 1208.1(c) related to claims of ineffective assistance of counsel to provide an exception for egregious conduct on the part of counsel. As discussed, *infra,* the Departments believe that cognizable ineffective assistance of counsel claims in the context of failing to assert a particular social group should be extremely rare. If a particular social group is not asserted because the alien did not tell his or her counsel about it, then there has been no ineffective assistance on the part of counsel. If the alien did provide his or her counsel with a particular social group and counsel elected not to present it as a strategic choice, then there is no basis to reopen the proceedings. *See Matter of B–B-,* 22 I&N Dec. at 310 (''subsequent dissatisfaction with a strategic decision of counsel is not grounds to reopen''). Nevertheless, the Departments recognize there may be *sui generis* situations in which ''egregious circumstances'' may warrant reopening due to ineffective assistance of counsel in this context, provided that appropriate procedural requirements for such a claim are observed. Thus, the Departments are adding such an

[2] The NPRM did not use the term ''rogue official'' in 8 CFR 1208.16(b)(3)(iv); rather it referred to ''officials acting outside their official capacity.'' The discrepancy regarding this phrasing between 8 CFR 208.16(b)(3)(iv) 8 CFR 1208.16(b)(3)(iv) in the NPRM was inadvertent, and the Departments are correcting it accordingly in both regulations in the final rule.

[3] *See* UN General Assembly, *Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment,* 10 December 1984, United Nations, Treaty Series, vol. 1465, p. 85.

exception to the final rule, consistent with existing case law. *See id.* (''The respondents opted for a particular strategy and form of relief, and although they might wish to fault their former attorney and recant that decision, they are nonetheless bound by it, unless they can show egregious conduct on counsel's part.''); *see also Matter of Velasquez,* 19 I&N Dec. 377, 377 (BIA 1986) (concession of attorney is binding on an alien absent egregious circumstances).

Second, the Departments are amending the language in 8 CFR 208.1(e) and 1208.1(e) regarding when threats may constitute persecution to clarify that particularized threats of severe harm of an immediate and menacing nature made by an identified entity or person may constitute persecution, though the Departments expect that such cases will be rare. This revision, as discussed *infra,* is consistent with existing case law. *See Duran-Rodriguez* v. *Barr,* 918 F.3d 1025, 1028 (9th Cir. 2019) (''death threats alone can constitute persecution'' but ''they constitute 'persecution in only a small category of cases, and only when the threats are so menacing as to cause significant actual suffering or harm' '' (citation omitted)). As noted, threats ''combined with confrontation or other mistreatment'' are likely to be persecution; however, ''cases with threats *alone,* particularly anonymous or vague ones, rarely constitute persecution.'' *Id.* (citation omitted) (emphasis added); *see also Juan Antonio* v. *Barr,* 959 F.3d 778, 794 (6th Cir. 2020) (threats alone amount to persecution only when they are ''of the most immediate and menacing nature'' (citation omitted)).

Third, in recognition of commenters' concerns and the reality that aliens under the age of 18, especially very young children, may not have decisional independence regarding an illegal entry into the United States, the Departments are amending 8 CFR 208.13(d)(1)(i) and 1208.13(d)(1)(i) to reflect that an unlawful or attempted unlawful entry into the United States by an alien under the age of 18 will not be considered as a significant adverse discretionary factor in considering a subsequent asylum application filed by such an alien. The Departments do not believe that a similar exception is warranted in 8 CFR 208.13(d)(1)(ii) and (iii), and 1208.13(d)(1)(ii) and (iii), however. For (d)(1)(ii) to apply to an alien under the age of 18, that alien must have filed an asylum application in the United States, notwithstanding any language barriers or other impediments; thus, there is no reason to assume categorically that such an alien could not have filed an application for protection in another country. Consequently, the Departments find that no age exemption is warranted in 8 CFR 208.13(d)(1)(ii) and 1208.13(d)(1)(ii). Further, as discussed, *infra,* there is no reason that an alien of any age would need to use fraudulent documents to enter the United States in order to seek asylum. Accordingly, no age exemption is warranted in 8 CFR 208.13(d)(1)(iii) and 1208.13(d)(1)(iii). Even without age exemptions, the Departments note that these discretionary factors do not constitute bars to asylum and that adjudicators may appropriately consider an applicant's age in assessing whether a particular application warrants being granted as a matter of discretion.

Fourth, in response to commenters' concerns about the applicable effective date of the frivolousness provisions in 8 CFR 208.20 and 1208.20, the Departments have clarified the language in those provisions. The amendments to those provisions provided in this rule apply only to asylum applications filed on or after the effective date of the rule. The current definition of ''frivolousness'' will continue to apply to asylum applications filed between April 1, 1997, and the effective date of the rule.

Fifth, to avoid confusion and potential conflict between the proposed language of 8 CFR 208.20(b) and 1208.20(b) and 8 CFR 208.20(d) and 1208.20(d), the Departments are deleting language in the former regarding an alien's opportunity to account for issues with a claim. The intent of the NPRM, expressed unequivocally in the proposed addition of 8 CFR 208.20(d) and 1208.20(d), was clear that adjudicators would not be required to provide ''multiple opportunities for an alien to disavow or explain a knowingly frivolous application.'' 85 FR at 36276. The Departments inadvertently retained language from the current rule in the proposed additions of 8 CFR 208.20(b) and 1208.20(b), however, that was in tension with that intent. *Compare, e.g.,* 8 CFR 208.20(b) (proposed) (''Such finding [of frivolousness] will only be made if the asylum officer is satisfied that the applicant has had sufficient opportunity to account for any discrepancies or implausible aspects of the claim.''), *with* 8 CFR 208.20(d) (proposed) (''If the alien has been provided the warning required by section 208(d)(4)(A) of the Act, he or she need not be given any additional or further opportunity to account for any issues with his or her claim prior to the entry of a frivolous finding.''). Accordingly, in the final rule, the Departments are deleting the sentence from 8 CFR 208.20(b) and 1208.20(b) regarding an alien's opportunity to address issues with his or her claim after receiving the statutory warning regarding the knowing filing of a frivolous asylum application to avoid any residual confusion on the point.

The following discussion describes the provisions of the final rule, which are substantially the same as the NPRM, and also incorporates the changes made in the final rule summarized above.

C. Provisions of the Final Rule

1. Expedited Removal and Screenings in the Credible Fear Process

1.1. Asylum-and-Withholding-Only Proceedings for Aliens With Credible Fear

DOJ is amending 8 CFR 1003.1, 8 CFR 1003.42(f), 8 CFR 1208.2, 8 CFR 1208.30, and 8 CFR 1235.6—and DHS is amending 8 CFR 208.2(c), 8 CFR 208.30(e)(5) and (f), and 8 CFR 235.6(a)(1)—so that aliens who establish a credible fear of persecution, a reasonable possibility of persecution, or a reasonable possibility of torture and accordingly receive a positive fear determination would appear before an immigration judge for ''asylum-and-withholding-only'' proceedings under 8 CFR 208.2(c)(1) and 8 CFR 1208.2(c)(1). Such proceedings would be adjudicated in the same manner that currently applies to certain alien crewmembers, stowaways, and applicants for admission under the Visa Waiver Program, among other categories of aliens who are not entitled by statute to proceedings under section 240 of the Act, 8 U.S.C. 1229a. *See* 8 CFR 208.2(c)(1)(i)–(viii), 1208.2(c)(1)(i)–(viii).[4] Additionally, to ensure that these claims receive the most expeditious consideration possible, the Departments are amending 8 CFR 208.5 and 8 CFR 1208.5 to require DHS to make available appropriate applications and relevant warnings to aliens in its custody who have expressed a fear in the expedited removal process and received a positive determination. The Departments believe that this change would bring the proceedings in line with the statutory objective that the expedited removal process be streamlined and efficient.

[4] In addition, DOJ proposed a technical correction to 8 CFR 1003.1(b), which establishes the jurisdiction of the BIA, to correct the reference to 8 CFR 1208.2 in paragraph (b)(9) and ensure that the regulations accurately authorize BIA review in ''asylum-and-withholding-only'' proceedings.

1.2. Consideration of Precedent in Credible Fear Determinations

DOJ is adding language to 8 CFR 1003.42(f) to specify that an immigration judge will consider applicable legal precedent when reviewing a negative fear determination. This instruction would be in addition to those currently listed in 8 CFR 1003.42 to consider the credibility of the alien's statements and other facts of which the immigration judge is aware. These changes would codify in the regulations the current practice and provide a clear requirement to immigration judges that they must consider and apply all applicable law, including administrative precedent from the Board of Immigration Appeals (''BIA''), decisions of the Attorney General, decisions of the Federal courts of appeals binding in the jurisdiction where the immigration judge conducting the review sits, and decisions of the Supreme Court.

1.3. Remove and Reserve DHS-Specific Procedures From DOJ Regulations

DOJ is removing and reserving the following provisions in chapter V of 8 CFR: 8 CFR 1235.1, 8 CFR 1235.2, 8 CFR 1235.3, and 8 CFR 1235.5. When the Department first incorporated part 235 into 1235, it stated that ''nearly all of the provisions * * * affect bond hearings before immigration judges.'' Aliens and Nationality; Homeland Security; Reorganization of Regulations, 68 FR 9823, 9826 (Feb. 28, 2003). Upon further review, the Department determined that these sections regard procedures that are specific to DHS's examinations of applicants for admission as set forth in 8 CFR 235.1, 8 CFR 235.2, 8 CFR 235.3, and 8 CFR 235.5, and do not need to be duplicated in the regulations for EOIR in Chapter V, except for the provisions in 8 CFR 1235.4, relating to the withdrawal of an application for admission, and 8 CFR 1235.6, relating to the referral of cases to an immigration judge.

In comparison to the NPRM, this final rule is making an additional technical amendment by updating the outdated reference to ''the Service'' in 8 CFR 1235.6(a)(1)(ii) to read ''DHS.''

1.4. Reasonable Possibility Standard for Statutory Withholding of Removal and Torture-Related Fear Determinations

The Departments are amending 8 CFR 208.30 and 8 CFR 1208.30 to clarify and raise the statutory withholding of removal screening standard and the torture-related screening standard under the CAT regulations for aliens in expedited removal proceedings and stowaways. Specifically, the Departments are amending 8 CFR 208.30 and 8 CFR 1208.30 to raise the standard of proof in credible fear screenings from a significant possibility that the alien can establish eligibility for statutory withholding of removal to a reasonable possibility that the alien would be persecuted because of his or her race, religion, nationality, membership in a particular social group, or political opinion. *See* 8 CFR 208.16, 208.30(e)(2), 1208.16. Similarly, for aliens expressing a fear of torture, the Departments are amending 8 CFR 208.30 and 8 CFR 1208.30 to raise the standard of proof from a significant possibility that the alien is eligible for withholding or deferral of removal under the CAT regulations to a reasonable possibility that the alien would be tortured in the country of removal. *See* 8 CFR 208.18(a), 208.30(e)(3), 1208.18(a); 85 FR at 36268. Consistent with INA 235(b)(1)(B)(v), 8 U.S.C. 1225(b)(1)(B)(v), the asylum eligibility screening standard (a significant possibility that the alien could establish eligibility for asylum) currently applied in credible fear screenings remains unchanged. *See* INA 235(b)(1)(B)(v), 8 U.S.C. 1225(b)(1)(B)(v). By clarifying and applying the ''reasonable possibility'' standard to the statutory withholding of removal screening and the torture-related screening under the CAT regulations, the alien's screening burdens would become adequately analogous to the merits burdens, where the alien's burdens for statutory withholding of removal and protections under the CAT regulations are higher than the burden for asylum.

The Departments are also amending 8 CFR 208.30, 8 CFR 1208.30, and 8 CFR 1003.42 to refer to the screenings of aliens in expedited removal proceedings and of stowaways for statutory withholding of removal as ''reasonable possibility of persecution'' determinations and the screening for withholding and deferral of removal under the CAT regulations as ''reasonable possibility of torture'' determinations, in order to avoid confusion between the different standards of proof.

In conjunction with the edits to DHS's regulation in 8 CFR 208.30, DOJ is amending 8 CFR 1208.30. Currently, after an asylum officer determines that an alien lacks a credible fear of persecution or torture, the regulation provides that an immigration judge in EOIR reviews that determination under the credible fear (''significant possibility'') standard. 8 CFR 208.30(g), 1208.30(g). DHS's ''reasonable possibility'' screening standard for statutory withholding of removal and CAT protection claims is a mismatch with EOIR's current regulation, which does not provide for a reasonable possibility review process in the expedited removal context. Therefore, DOJ is modifying 8 CFR 1208.30(g) to clarify that credible fear of persecution determinations (*i.e.,* screening for asylum eligibility) would continue to be reviewed under a ''credible fear'' (significant possibility) standard, but screening determinations for eligibility for statutory withholding of removal and protection under the CAT regulations would be reviewed under a ''reasonable possibility'' standard.

Additionally, to clarify terminology in 8 CFR 208.30(d)(2), mention of the Form M–444, Information about Credible Fear Interview in Expedited Removal Cases, is replaced with mention of relevant information regarding the ''fear determination process.'' This change clarifies that DHS may relay information regarding screening for a reasonable possibility of persecution and a reasonable possibility of torture, in addition to a credible fear of persecution.

DHS is also revising the language in 8 CFR 208.30(e)(1) to interpret the ''significant possibility'' standard that Congress established in section 235(b)(1)(B)(v) of the Act, 8 U.S.C. 1225(b)(1)(B)(v).

In comparison to the NPRM, this final rule is correcting a typographical error—*i.e.* ''part'' rather than ''party''—in 8 CFR 208.30(e)(2)(ii). The sentence now reads: ''Such other facts as are known to the officer, including whether the alien could avoid a future threat to his or her life or freedom by relocating to another part of the proposed country of removal and, under all circumstances, it would be reasonable to expect the applicant to do so[.]'' In addition, this final rule adds the word ''for'' to correct the form name ''Application for Asylum and for Withholding of Removal'' at 8 CFR 1208.30(g)(2)(iv)(B). This final rule also reinserts language allowing DHS to reconsider a negative credible fear finding that has been concurred upon by an immigration judge after providing notice of its reconsideration to the immigration judge, which was inadvertently removed from 8 CFR 1208.30(g)(2)(iv)(A) in the NPRM. The final rule reinserts that language in 8 CFR 208.30(g)(2)(i) because it pertains to a DHS procedure and, thus, appropriately belongs in chapter I, rather than chapter V, of title 8.

1.5. Amendments to the Credible Fear Screening Process

The Departments further amend 8 CFR 208.30, 8 CFR 1208.30, and 8 CFR 1003.42 to make several additional technical and substantive amendments regarding fear interviews, determinations, and reviews of determinations. The Departments amend 8 CFR 208.30(a) and 8 CFR 1208.30(a) to clearly state that the respective sections describe the exclusive procedures applicable to applicants for admission who are found inadmissible pursuant to section 212(a)(6)(C) or 212(a)(7) of the Act, 8 U.S.C. 1182(a)(6)(C) or 1182(a)(7), and receive ''credible fear'' interviews, determinations, and reviews under section 235(b)(1)(B) of the Act, 8 U.S.C. 1225(b)(1)(B).

DHS is clarifying the existing ''credible fear'' screening process in 8 CFR 208.30(b), which states that if an alien subject to expedited removal indicates an intention to apply for asylum or expresses a fear of persecution or torture, or a fear of return, an inspecting officer shall not proceed further with removal until the alien has been referred for an interview with an asylum officer, as provided in section 235(b)(1)(A)(ii) of the Act, 8 U.S.C. 1225(b)(1)(A)(ii). The rule also states that the asylum officer would screen the alien for a credible fear of persecution and, as appropriate, a reasonable possibility of persecution and a reasonable possibility of torture, and conduct an evaluation and determination in accordance with 8 CFR 208.9(c), which is consistent with current policy and practice. These proposals aim to provide greater transparency and clarity with regard to fear screenings.

DHS is also including consideration of internal relocation in the context of 8 CFR 208.30(e)(1)–(3), which outline the procedures for determining whether aliens have a credible fear of persecution, a reasonable possibility of persecution, and a reasonable possibility of torture. Considering internal relocation in the ''credible fear'' screening context is consistent with existing policy and practice, and the regulations addressing internal relocation at 8 CFR 208.16(c)(3)(ii) and 8 CFR 1208.16(c)(3)(ii) (protection under the CAT regulations); 8 CFR 208.13(b)(1)(i)(B) and 8 CFR 1208.13(b)(1)(i)(B) (asylum); and 8 CFR 208.16(b)(1)(i)(B) and 8 CFR 1208.16(b)(1)(i)(B) (statutory withholding). The regulatory standard that governs consideration of internal relocation in the context of asylum and statutory withholding of removal adjudications is different from the standard that considers internal relocation in the context of protection under the CAT regulations. *See generally Maldonado* v. *Lynch,* 786 F.3d 1155, 1163 (9th Cir. 2015) (noting the marked difference between the asylum and CAT regulations concerning internal relocation).

In addition, the Departments are adding asylum and statutory withholding eligibility bar considerations in 8 CFR 208.30(e)(1)(iii) and (e)(2)(iii), and 8 CFR 1003.42(d). Currently, 8 CFR 208.30(e)(5)(i) provides that if an alien, other than a stowaway, is able to establish a credible fear of persecution or torture but also appears to be subject to one or more of the mandatory eligibility bars to asylum or statutory withholding of removal, then the alien will be placed in section 240 proceedings. The Departments are amending 8 CFR 208.30 to apply mandatory bars to applying for or being granted asylum at the credible fear screening stage for aliens in expedited removal proceedings and for stowaways, such that if a mandatory bar to applying for or being granted asylum applies, the alien would be unable to show a significant possibility of establishing eligibility for asylum. In 8 CFR 208.30(e)(5), DHS requires asylum officers to determine (1) whether an alien is subject to one or more of the mandatory bars to being able to apply for asylum under section 208(a)(2)(B)–(D) of the Act, 8 U.S.C. 1158(a)(2)(B)–(D), or the bars to asylum eligibility under section 208(b)(2) of the Act, 8 U.S.C. 1158(b)(2), including any eligibility bars established by regulation under section 208(b)(2)(C) of the Act, 8 U.S.C. 1158(b)(2)(C); and (2) if so, whether the bar at issue is also a bar to statutory withholding of removal and withholding of removal under the CAT regulations. If a mandatory bar to asylum applies, the alien will then be screened only for statutory withholding of removal or withholding or deferral of removal under the CAT regulations. If the alien is subject to a mandatory bar to asylum that is also a mandatory bar to statutory withholding of removal, then the alien will be screened only for deferral of removal under the CAT regulations. An alien who could establish a credible fear of persecution or reasonable possibility of persecution but for the fact that he or she is subject to one of the bars that applies to both asylum and statutory withholding of removal would receive a negative fear determination, unless the alien could establish a reasonable possibility of torture, in which case he or she would be referred to the immigration court for asylum-and-withholding-only proceedings. In those proceedings, the alien would have the opportunity to raise whether he or she was correctly identified as being subject to the bar(s) to asylum and withholding of removal and also pursue protection under the CAT regulations.

Additionally, under 8 CFR 208.30(e)(5), DHS has used a ''reasonable fear'' standard (identical to the ''reasonable possibility'' standard enunciated in this rule) in procedures related to aliens barred from asylum under two interim final rules issued by the Departments,[5] as described in 8 CFR

[5] On July 16, 2019, the Departments issued an interim final rule providing that certain aliens described in 8 CFR 208.13(c)(4) or 1208.13(c)(4) who enter, attempt to enter, or arrive in the United States across the southern land border on or after such date, after transiting through at least one country outside the alien's country of citizenship, nationality, or last lawful habitual residence en route to the United States, will be found ineligible for asylum (and, because they are subject to this bar, not be able to establish a credible fear of persecution) unless they qualify for certain exceptions. *See* Asylum Eligibility and Procedural Modifications, 84 FR 33829 (July 16, 2019). On July 24, 2019, the U.S. District Court for the Northern District of California enjoined the Departments ''from taking any action continuing to implement the Rule'' and ordered the Departments ''to return to the pre-Rule practices for processing asylum applications.'' *E. Bay Sanctuary Covenant* v. *Barr,* 385 F. Supp. 3d 922, 960 (N.D. Cal. 2019). On August 16, 2019, the U.S. Court of Appeals for the Ninth Circuit issued a partial stay of the preliminary injunction so that the injunction remained in force only in the Ninth Circuit. *E. Bay Sanctuary Covenant* v. *Barr,* 934 F.3d 1026, 1028 (9th Cir. 2019). On September 9, 2019, the district court then reinstated the nationwide scope of the injunction. *E. Bay Sanctuary Covenant* v. *Barr,* 391 F. Supp. 3d 974 (N.D. Cal. 2019). Two days later, the Supreme Court stayed the district court's injunction. *Barr* v. *East Bay Sanctuary Covenant,* 140 S. Ct. 3 (2019). On July 6, 2020, the Ninth Circuit affirmed the district court's injunction. *E. Bay Sanctuary Covenant* v. *Barr,* 964 F.3d 832 (9th Cir. 2020). Additionally, on June 30, 2020, the interim final rule was vacated by the D.C. District Court in *Capital Area Immigrants' Rights (''CAIR'') Coalition, et al.* v. *Trump,* 19–cv–02117 (D.D.C. 2020) and *I.A., et al.* v. *Barr,* 19–cv–2530 (D.D.C. 2020).

On November 9, 2018, the Departments issued an interim final rule providing that certain aliens described in 8 CFR 208.13(c)(3) or 8 CFR 1208.13(c)(3) who entered the United States in contravention of a covered Presidential proclamation or order are barred from eligibility for asylum. *See* Aliens Subject to a Bar on Entry Under Certain Presidential Proclamations; Procedures for Protection Claims, 83 FR 55934 (Nov. 9, 2018). On December 19, 2018, the U.S. District Court for the Northern District of California enjoined the Departments ''from taking any action continuing to implement the Rule'' and ordered the Departments ''to return to the pre-Rule practices for processing asylum applications.'' *E. Bay Sanctuary Covenant* v. *Trump,* 354 F. Supp. 3d 1094, 1121 (N.D. Cal. 2018). On February 28, 2020, the U.S. Court of Appeals for the Ninth Circuit affirmed the injunction. *E. Bay Sanctuary Covenant* v. *Trump,* 950 F.3d 1242, 1284 (9th Cir. 2020). The Departments in this rule do not make any

208.13(c)(3)–(4). The Departments include technical edits in 8 CFR 208.30(e)(5), to change ''reasonable fear'' to ''reasonable possibility'' to align the terminology with the other proposed changes in this rule. Similarly, DOJ makes technical edits in 8 CFR 1208.30(g)(1) and 8 CFR 1003.42(d)—both of which refer to the ''reasonable fear'' standard in the current version of 8 CFR 208.30(e)(5)—to change the ''reasonable fear'' language to ''reasonable possibility.'' These edits are purely technical and would not amend, alter, or impact the standard of proof applicable to the fear screening process and determinations, or review of such determinations, associated with the aforementioned bars.

Additionally, in 8 CFR 208.2(c)(1), 8 CFR 1208.2(c)(1), 8 CFR 235.6(a)(2), and 8 CFR 1235.6(a)(2), the Departments include technical edits to replace the term ''credible fear of persecution or torture'' with ''a credible fear of persecution, reasonable possibility of persecution, or reasonable possibility of torture'' to mirror the terminology used in proposed 8 CFR 208.30 and 8 CFR 1208.30. Moreover, in 8 CFR 1208.30(g)(2)(iv)(C), DOJ makes a technical edit to clarify that stowaways barred from asylum and both statutory and CAT withholding of removal may still be eligible for deferral of removal under the CAT regulations.

The Departments further amend 8 CFR 208.30(g) and 8 CFR 1208.30(g)(2), which address procedures for negative fear determinations for aliens in the expedited removal process. In 8 CFR 208.30(g)(1), the Departments treat an alien's refusal to indicate whether he or she desires review by an immigration judge as declining to request such review. Also, in 8 CFR 208.31, the Departments treat a refusal as declining to request review within the context of reasonable fear determinations.

In comparison to the NPRM, this final rule adds the word ''for'' to correct the form name to ''Application for Asylum and for Withholding of Removal'' at 8 CFR 208.31(g)(2) and 1208.31(g)(2). This final rule also reinserts language concerning novel or unique issues in 8 CFR 208.30(e)(4) that was inadvertently proposed to be removed in the NPRM, with modifications to account for changes in terminology adopted via this final rule. The language now reads: ''In determining whether the alien has a credible fear of persecution, as defined in section 235(b)(1)(B)(v) of the Act, or a reasonable possibility of persecution or torture, the asylum officer shall consider whether the alien's case presents novel or unique issues that merit consideration in a full hearing before an immigration judge.'' Also, this final rule removes one sentence from the proposed 8 CFR 208.30(e)(4)—''An asylum officer's determination will not become final until reviewed by a supervisory asylum officer''—because similar text already exists in 8 CFR 208.30(e)(8) and it would be repetitive to include it in 8 CFR 208.30(e)(4).

2. Amendments Related to the Filing Requirements and Elements for Consideration of Form I–589, Application for Asylum and for Withholding of Removal

2.1. Frivolous Applications

The Departments amend both 8 CFR 208.20 and 1208.20 regarding determinations that an asylum application is frivolous. *See* INA 208(d)(6), 8 U.S.C. 1158(d)(6) (providing that an alien found to have ''knowingly made a frivolous application for asylum'' is ''permanently ineligible for any benefits'' under the Act). The Departments propose the new standards in order to ensure that manifestly unfounded or otherwise abusive claims are rooted out and to ensure that meritorious claims are adjudicated more efficiently so that deserving applicants receive benefits in a timely fashion.

The Departments clarify the meaning of ''knowingly'' by providing that ''knowingly'' requires either actual knowledge of the frivolousness or willful blindness toward it. 8 CFR 208.20(a)(2), 1208.20(a)(2). The Departments also amend the definition of ''frivolous.'' 8 CFR 208.20, 208.20(c)(1)–(4), 1208.20, 1208.20(c)(1)–(4). Under the new definition, if knowingly made, an asylum application would be properly considered frivolous if the adjudicator were to determine that it included a fabricated material element; that it was premised on false or fabricated evidence; that it was filed without regard to the merits of the claim; or that it was clearly foreclosed by applicable law. The definition aligns with the Departments' prior understandings of frivolous applications, including applications that are clearly unfounded, abusive, or involve fraud, and the Departments believe the definition would better effectuate the intent of section 208(d)(6) of the Act, 8 U.S.C. 1158(d)(6), to discourage applications that make patently meritless or false claims.

In addition, the Departments allow asylum officers adjudicating affirmative asylum applications to make findings that aliens have knowingly filed frivolous asylum applications and to refer the cases on that basis to immigration judges (for aliens not in lawful status) or to deny the applications (for aliens in lawful status). 8 CFR 208.20(b), 1208.20(b). For an alien not in lawful status, a finding by an asylum officer that an asylum application is frivolous would not render an alien permanently ineligible for immigration benefits unless an immigration judge or the BIA subsequently makes a finding of frivolousness upon de novo review of the application. Asylum officers would apply the same definition used by immigration judges and the BIA under this rule. *Id.* This change would allow U.S. Citizenship and Immigration Services (''USCIS'') to more efficiently root out frivolous applications, deter frivolous filings, and reduce the number of frivolous applications in the asylum system. Additionally, an asylum officer who makes a finding of frivolousness would produce a record on that issue for an immigration judge to review. Further, the proposed change is consistent with congressional intent to ''reduce the likelihood that fraudulent or frivolous applications will enable deportable or excludable aliens to remain in the U.S. for substantial periods.'' S. Rep. No. 104–249, at 2 (1996).

The Departments clarify that, as long as the alien has been given the notice of the consequences of filing a frivolous application, as required by section 208(d)(4)(A) of the Act, 8 U.S.C. 1158(d)(4)(A), the adjudicator need not give the alien any additional or further opportunity to account for any issues prior to the entry of a frivolousness finding. 8 CFR 208.20(d), 1208.20(d). The Departments have determined that this provision is sufficient to comply with the Act's requirements, and that there is no legal or operational justification for providing additional opportunities to address aspects of a claim that may warrant a frivolousness finding. The Departments believe the current regulatory framework, which provides that an EOIR adjudicator may only make a frivolous finding if he or she ''is satisfied that the applicant, during the course of the proceedings, has had sufficient opportunity to account for any discrepancies or implausible aspects of the claim,'' has not successfully achieved the Departments' goal of preventing knowingly frivolous applications that delay the adjudication of other asylum applications that may merit relief.

As this rule would overrule *Matter of Y–L–,* 24 I&N Dec. 151 (BIA 2007), and revise the definition of ''frivolous,'' adjudicators would not be required to

amendments that would implement the rules at issue in the aforementioned cases.

provide opportunities for applicants to address discrepancies or implausible aspects of their claims if an applicant had been provided the warning required by INA 208(d)(4)(A) (8 U.S.C. 1158(d)(4)(A)).

In order to ameliorate the consequences of knowingly filing a frivolous application in appropriate cases, however, the Departments include a mechanism that would allow certain aliens in removal proceedings to withdraw, with prejudice, their applications by disclaiming the applications; accepting an order of voluntary departure for a period of no more than 30 days; withdrawing, also with prejudice, all other applications for relief or protection; and waiving any rights to file an appeal, motion to reopen, and motion to reconsider. 8 CFR 208.20(f), 1208.20(f). In such instances, the aliens would not be subject to a frivolousness finding and could avoid the penalties associated with such a finding. In addition, the regulation does not change current regulatory language that makes clear that a frivolousness finding does not bar an alien from seeking statutory withholding of removal or protection under the CAT regulations. Finally, the Departments clarify that an application may be found frivolous even if the application was untimely. 8 CFR 208.20(e), 1208.20(e).

In comparison to the NPRM, this final rule updates the frivolousness language in 8 CFR 208.20 and 8 CFR 1208.20 to further clarify that the new frivolousness standards only apply prospectively to applications filed on or after the effective date of this final rule. This final rule also replaces the word ''essential'' with the word ''material'' in 8 CFR 208.20(c)(1) and 1208.20(c)(1), consistent with the stated intent of the NPRM. Finally, to avoid confusion and potential conflict between the proposed language of 8 CFR 208.20(b) and 1208.20(b) and 8 CFR 208.20(d) and 1208.20(d), this final rule deletes the following sentence from proposed 8 CFR 208.20(b) and 1208.20(b): ''Such finding will only be made if the asylum officer is satisfied that the applicant has had sufficient opportunity to account for any discrepancies or implausible aspects of the claim.''

2.2. Pretermission of Applications

DOJ adds a new paragraph (e) to 8 CFR 1208.13 to clarify that immigration judges may pretermit and deny an application for asylum, statutory withholding of removal, or protection under the CAT regulations if the alien has not established a prima facie claim for relief or protection under the applicable laws and regulations. *See Matter of E–F–H–L–,* 27 I&N Dec. 226 (A.G. 2018); *see also Matter of A–B–,* 27 I&N Dec. 316, 340 (A.G. 2018) (''Of course, if an alien's asylum application is fatally flawed in one respect—for example, for failure to show membership in a proposed social group * * *—an immigration judge or the Board need not examine the remaining elements of the asylum claim.''). Other immigration applications are subject to pretermission when legally insufficient, and the INA and current regulations do not require asylum to be treated any differently. Such a decision would be based on the Form I–589 application itself and any supporting evidence. Under this rule, an immigration judge may pretermit an asylum application in two circumstances: (1) Following an oral or written motion by DHS, and (2) sua sponte upon the immigration judge's own authority. Provided the alien has had an opportunity to respond, and the immigration judge considers any such response, a hearing would not be required for the immigration judge to make a decision to pretermit and deny the application. In the case of the immigration judge's exercise of his or her own authority, parties would have at least ten days' notice before the immigration judge would enter such an order. A similar timeframe would apply if DHS moves to pretermit, under current practice. *See* EOIR, *Immigration Court Practice Manual* at D–1 (Aug. 2, 2018), *https://www.justice.gov/eoir/page/file/1084851/download.*

2.3. Particular Social Group

The Departments adopt amendments to codify long-standing standards from case law regarding the cognizability of particular social groups and to provide clarity, allow for uniform application, and reduce the time necessary to evaluate claims involving particular social groups. These requirements would aid efficient litigation and avoid gamesmanship and piecemeal litigation.

Specifically, the Departments codify the requirements that (1) a particular social group must be (a) composed of members who share a common immutable characteristic, (b) defined with particularity, and (c) socially distinct in the society in question; (2) the group must exist independently of the alleged persecutory acts; and (3) the group must not be defined exclusively by the alleged harm. 8 CFR 208.1(c), 1208.1(c). Additionally, the Departments list nine, non-exhaustive circumstances that, if a particular social group consisted of or was defined by, would not generally result in a favorable adjudication. *Id.* Further, the Departments adopt several procedural requirements regarding the alien's responsibility to define the particular social group. *Id.*

In comparison to the NPRM, this final rule amends the waiver provision in 8 CFR 208.1(c) and 1208.1(c) related to claims of ineffective assistance of counsel based on a failure to define, or provide a basis for defining, a formulation of a particular social group before an immigration judge to provide an exception for egregious conduct on the part of counsel. The Departments believe that cognizable ineffective assistance of counsel claims in the context of failing to assert a particular social group should be extremely rare. Nevertheless, the Departments recognize there may be unique situations in which ''egregious conduct'' on the part of counsel may warrant reopening in this context, provided that appropriate procedural requirements for such a claim are observed.

2.4. Political Opinion

The Departments adopt amendments to define ''political opinion'' and provide other guidance for adjudicators regarding applications for asylum or statutory withholding of removal premised on the applicant's political opinion. These amendments would provide additional clarity for adjudicators and better align the regulations with statutory requirements and general understanding that a political opinion is intended to advance or further a discrete cause related to political control of the state.

Specifically, the Departments define ''political opinion'' for the purposes of applications for asylum or for statutory withholding of removal as an opinion expressed by or imputed to an applicant in which the applicant possesses an ideal or conviction in support of the furtherance of a discrete cause related to political control of a state or a unit thereof. 8 CFR 208.1(d), 1208.1(d). Additionally, the Departments adopt a list of potential definitional bases for a political opinion that would not, in general, support a favorable adjudication: A political opinion defined solely by generalized disapproval of, disagreement with, or opposition to criminal, terrorist, gang, guerilla, or other non-state organizations absent expressive behavior in furtherance of a cause against such organizations related to efforts by the state to control such organizations or behavior that is antithetical to or otherwise opposes the ruling legal entity of the state or a legal sub-unit of the state. *Id.* Finally, consistent with section 101(a)(42) of the Act, 8 U.S.C.

1101(a)(42), the Departments provide that a person who has been forced to abort a pregnancy or to undergo involuntary sterilization, or who has been persecuted for failure or refusal to undergo such a procedure or for other resistance to a coercive population control program, would be deemed to have been persecuted on account of political opinion, and a person who has a well-founded fear that he or she will be forced to undergo such a procedure or be subject to persecution for such failure, refusal, or resistance would be deemed to have a well-founded fear of persecution on account of political opinion. *Id.*

2.5. Persecution Definition

Given the wide range of cases interpreting ''persecution'' for the purposes of the asylum laws, the Departments are adding a new paragraph to 8 CFR 208.1 and 1208.1 to define ''persecution'' and to better clarify what does and does not constitute persecution given the extreme and severe nature of harm required. The Departments believe that these changes would better align the relevant regulations with the high standard Congress intended for the term ''persecution.'' *See Fatin* v. *INS,* 12 F.3d 1233, 1240 n.10, 1243 (3d Cir. 1993).

Specifically, this rule provides that persecution requires ''an intent to target a belief or characteristic, a severe level of harm, and the infliction of a severe level of harm by the government of a country or by persons or an organization that the government was unable or unwilling to control.'' 8 CFR 208.1(e), 1208.1(e). The Departments further clarify that persecution does not include, for example: (1) Every instance of harm that arises generally out of civil, criminal, or military strife in a country; (2) any and all treatment that the United States regards as unfair, offensive, unjust, or even unlawful or unconstitutional; (3) intermittent harassment, including brief detentions; (4) threats with no actions taken to carry out the threats; (5) non-severe economic harm or property damage; or (6) government laws or policies that are infrequently enforced, unless there is credible evidence that those laws or policies have been or likely would be applied to an applicant personally. *See id.*

In comparison to the NPRM, this final rule amends the language in 8 CFR 208.1(e) and 1208.1(e) regarding when threats alone may constitute persecution to clarify that particularized threats of severe harm of an immediate and menacing nature made by an identified entity may constitute persecution. The Departments expect that such cases will be rare. *See, e.g., Duran-Rodriguez* v. *Barr,* 918 F.3d at 1028 (explaining that ''death threats alone can constitute persecution'' but ''constitute persecution in only a small category of cases, and only when the threats are so menacing as to cause significant actual suffering or harm'' (quotation marks and citation omitted)).

2.6. Nexus

The Departments add paragraph (f) to both 8 CFR 208.1 and 1208.1 to provide clearer guidance on situations in which alleged acts of persecution would not be on account of one of the five protected grounds. This proposal would further the expeditious consideration of asylum and statutory withholding claims by bringing clarity and uniformity to this issue.

Specifically, the Departments are adopting the following eight non-exhaustive circumstances, each of which is rooted in case law, that would not generally support a favorable adjudication of an application for asylum or statutory withholding of removal due to the applicant's inability to demonstrate persecution on account of a protected ground: (1) Interpersonal animus or retribution; (2) interpersonal animus in which the alleged persecutor has not targeted, or manifested an animus against, other members of an alleged particular social group in addition to the member who has raised the claim at issue; (3) generalized disapproval of, disagreement with, or opposition to criminal, terrorist, gang, guerilla, or other non-state organizations absent expressive behavior in furtherance of a discrete cause against such organizations related to control of a state or expressive behavior that is antithetical to the state or a legal unit of the state; (4) resistance to recruitment or coercion by guerilla, criminal, gang, terrorist, or other non-state organizations; (5) the targeting of the applicant for criminal activity for financial gain based on wealth or affluence or perceptions of wealth or affluence; (6) criminal activity; (7) perceived, past or present, gang affiliation; and (8) gender. 8 CFR 208.1(f)(1)–(8), 1208.1(f)(1)–(8). At the same time, the regulation would not foreclose that, at least in rare cases, such circumstances could be the basis for finding nexus, given the fact-specific nature of this determination.

2.7. Stereotype Evidence

In order to make clear that pernicious cultural stereotypes have no place in the adjudication of applications for asylum and statutory withholding of removal, regardless of the basis of the claim, the Departments bar consideration of evidence promoting cultural stereotypes of countries or individuals, including stereotypes related to race, religion, nationality, and gender, to the extent those stereotypes are offered in support of an alien's claim. 8 CFR 208.1(g), 1208.1(g).

In comparison to the NPRM, the final rule clarifies the language in 8 CFR 208.1(g) and 1208.1(g) to alleviate apparent confusion and improve consistency with the intent of the NPRM regarding the use of stereotypes as an evidentiary basis for an asylum claim. In the final rule, bald statements that a country or its denizens have a particular cultural trait that causes citizens, nationals, or residents of that country to engage in persecution is evidence lacking in probative value and has no place in an adjudication.

2.8. Internal Relocation

The Departments are adopting amendments to 8 CFR 208.13(b)(3), 208.16(b)(3), 1208.13(b)(3), and 1208.16(b)(3) regarding the reasonableness of internal relocation because the Departments determined that the current regulations inadequately assess the relevant considerations in determining whether internal relocation is possible, and if possible, whether it is reasonable to expect the asylum applicant to relocate. The Departments adopt a more streamlined presentation in the regulations of the most relevant factors for adjudicators to consider in determining whether internal relocation is a reasonable option. This clarification would assist adjudicators in making more efficient adjudications and would bring the regulatory burdens of proof in line with baseline assessments of whether types of persecution generally occur nationwide.

Specifically, the Departments amend the general guidelines regarding determinations of the reasonableness of internal relocation to specify that adjudicators should consider the totality of the circumstances. 8 CFR 208.13(b)(3), 1208.13(b)(3). In addition, the Departments amend the list of considerations for adjudicators including, inter alia, an instruction that adjudicators consider ''the applicant's demonstrated ability to relocate to the United States in order to apply for asylum.'' *Id.* The Departments also adopt a presumption that for applications in which the persecutor is not a government or government-sponsored actor, internal relocation would be reasonable unless the applicant demonstrates by a

preponderance of the evidence that it would not be. 8 CFR 208.13(b)(3)(iii), 1208.13(b)(3)(iii). This presumption would apply regardless of whether an applicant has established past persecution. For ease of administering these provisions, the Departments also provide examples of the types of individuals or entities who are private actors. 8 CFR 208.13(b)(3)(iv), 1208.13(b)(3)(iv).[6]

2.9. Discretionary Factors

Asylum is a discretionary form of relief, and the Departments provide general guidelines on factors for adjudicators to consider when determining whether or not an alien merits the relief of asylum as a matter of discretion. 8 CFR 208.13(d), 1208.13(d). Specifically, the Departments provide three factors that adjudicators must consider when determining whether an applicant merits the relief of asylum as a matter of discretion: (1) An alien's unlawful entry or unlawful attempted entry into the United States unless such entry or attempted entry was made in immediate flight from persecution or torture in a contiguous country; (2) subject to certain exceptions, the failure of an alien to seek asylum or refugee protection in at least one country through which the alien transited before entering the United States; and (3) an alien's use of fraudulent documents to enter the United States, unless the alien arrived in the United States by air, sea, or land directly from the applicant's home country without transiting through any other country. 8 CFR 208.13(d)(1), 1208.13(d)(1). The adjudicator must consider all three factors, if relevant, during every asylum adjudication. If one or more of these factors were found to apply to the applicant's case, the adjudicator would consider such factors to be significantly adverse for purposes of the discretionary determination, though the adjudicator should also consider any other relevant facts and circumstances to determine whether the applicant merits asylum as a matter of discretion.

In addition, the Departments provide nine additional adverse factors that, if applicable, would ordinarily result in the denial of asylum as a matter of discretion. 8 CFR 208.13(d)(2)(i), 1208.13(d)(2)(i). Specifically, the Departments list the following factors for the adjudicator to consider: (1) Whether an alien has spent more than 14 days in any one country that permitted application for refugee, asylee, or similar protections prior to entering or arriving in the United States, 8 CFR 208.13(d)(2)(i)(A), 1208.13(d)(2)(i)(A);[7] (2) whether the alien transited through more than one country prior to arrival in the United States, 8 CFR 208.13(d)(2)(i)(B), 1208.13(d)(2)(i)(B);[8] (3) whether the applicant would be subject to a mandatory asylum application denial under 8 CFR 208.13(c), 1208.13(c) but for the reversal, vacatur, expungement, or modification of a conviction or sentence unless the alien was found not guilty, 8 CFR 208.13(d)(2)(i)(C) 1208.13(d)(2)(i)(C); (4) whether the applicant has accrued more than one year of unlawful presence in the United States prior to filing an application for asylum, 8 CFR 208.13(d)(2)(i)(D), 1208.13(d)(2)(i)(D); (5) whether the applicant, at the time he or she filed the asylum application, had failed to timely file or to timely file an extension request of any required Federal, state, or local tax returns; failed to satisfy any outstanding Federal, state, or local tax obligations; or has income that would generate tax liability but that has not been reported to the Internal Revenue Service, 8 CFR 208.13(d)(2)(i)(E), 1208.13(d)(2)(i)(E); (6) whether the applicant has had two or more prior asylum applications denied for any reason, 8 CFR 208.13(d)(2)(i)(F), 1208.13(d)(2)(i)(F); (7) whether the applicant has previously withdrawn an asylum application with prejudice or been found to have abandoned an asylum application, 8 CFR 208.13(d)(2)(i)(G), 1208.13(d)(2)(i)(G); (8) whether the applicant previously failed to attend an interview with DHS regarding his or her application, 8 CFR 208.13(d)(2)(i)(H), 1208.13(d)(2)(i)(H);[9] and (9) whether the applicant was subject to a final order of removal, deportation, or exclusion and did not file a motion to reopen within one year of the change in country conditions, 8 CFR 208.13(d)(2)(i)(I), 1208.13(d)(2)(i)(I); *see also* INA 240(c)(7)(C)(ii), 8 U.S.C. 1229a(c)(7)(C)(ii); 8 CFR 1003.2(c)(3)(ii), 1003.23(b)(4)(i).

This rule provides that if the adjudicator were to determine that any of these nine circumstances applied during the course of the discretionary review, the adjudicator may nevertheless favorably exercise discretion in extraordinary circumstances, such as those involving national security or foreign policy considerations, or if the alien demonstrates, by clear and convincing evidence, that the denial or referral of asylum would result in an exceptional and extremely unusual hardship to the alien. 8 CFR 208.13(d)(2)(ii), 1208.13(d)(2)(ii).

In comparison to the NPRM, this final rule adds the clarifying phrase ''as defined in section 212(a)(9)(B)(ii) and (iii) of the Act'' to 8 CFR 208.13(d)(2)(i)(D) and 1208.13(d)(2)(i)(D) consistent with the intent of the NPRM. In addition, this final rule amends 8 CFR 208.13(d)(1)(i) and 1208.13(d)(1)(i) to reflect that an unlawful or attempted unlawful entry into the United States by an alien under the age of 18 will not be considered as a significant adverse discretionary factor in considering a subsequent asylum application filed by such an alien. Further, the final rule amends 8 CFR 208.13(d)(2)(ii) to reflect that, operationally, DHS may refer or deny an asylum application, depending on the circumstances of the applicant. *See* 8 CFR 208.14.

2.10. Firm Resettlement

Due to the increased availability of resettlement opportunities and the interest of those genuinely in fear of persecution in attaining safety as soon as possible, the Departments revise the definition of firm resettlement that applies to asylum adjudications at 8 CFR 208.15 and 1208.15.[10] These

[6] Because the issue of internal relocation arises in the context of applications for both asylum and statutory withholding of removal, the Departments are amending the relevant regulations related to applications for statutory withholding of removal for the same reasons discussed herein they are amending the regulations related to asylum applications. *See* 8 CFR 208.16(b)(3) and 1208.16(b)(3).

[7] The Departments, however, provided exceptions for aliens who demonstrate that (1) they applied for and were denied protection in such country, (2) they are a trafficking victim as set out as 8 CFR 214.11, or (3) such country was at the time the alien transited not a party to the 1951 Convention relating to the Status of Refugees, the 1967 Protocol relating to the Status of Refugees, or the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment. 8 CFR 208.13(d)(2)(i)(A)(*1*)–(*3*), 1208.13(d)(2)(i)(A)(*1*)–(*3*).

[8] The Departments, however, provided the same exceptions described above. *See* 8 CFR 208.13(d)(2)(i)(B)(*1*)–(*3*), 1208.13(d)(2)(i)(B)(*1*)–(*3*).

[9] The Departments included exceptions if the alien shows by the preponderance of the evidence that either exceptional circumstances prevented the alien from attending the interview or that the interview notice was not mailed to the last address provided by the alien or the alien's representative and neither the alien nor the alien's representative received notice of the interview. 8 CFR 208.13(d)(2)(i)(H)(*1*)–(*2*), 1208.13(d)(2)(i)(H)(*1*)–(*2*).

[10] As the Departments noted in the proposed rule, 85 FR at 36286 n.41, 43 countries have signed the Refugee Convention since 1990. In particular, resettlement opportunities in Mexico, one of the most common transit countries for aliens coming to the United States, have increased significantly in recent years. For example, the UNHCR has documented a notable increase in asylum and refugee claims filed in Mexico—even during the ongoing COVID–19 pandemic—which strongly

changes recognize the increased availability of resettlement opportunities and that an alien fleeing persecution would ordinarily be expected to seek refuge at the first available opportunity where there is no fear of persecution or torture. Further, the changes would ensure that the asylum system is used by those in need of immediate protection rather than those who chose the United States as their destination for other reasons and then relied on the asylum system to reach that destination.

Specifically, the Departments identify three circumstances under which an alien would be considered firmly resettled: (1) The alien resided in a country through which the alien transited prior to arriving in or entering the United States and (i) received or was eligible for any permanent legal immigration status in that country, (ii) resided in such a country with any non-permanent but indefinitely renewable legal immigration status (including asylee, refugee, or similar status but excluding status such as of a tourist), or (iii) resided in such a country and could have applied for and obtained any non-permanent but indefinitely renewable legal immigration status in that country; (2) the alien physically resided voluntarily, and without continuing to suffer persecution, in any one country for one year or more after departing his country of nationality or last habitual residence and prior to arrival in or entry into the United States; or (3) (i) the alien is a citizen of a country other than the one where the alien alleges a fear of persecution and the alien was present in that country prior to arriving in the United States, or (ii) the alien was a citizen of a country other than the one where the alien alleges a fear of persecution, the alien was present in that country prior to arriving in the United States, and the alien renounced that citizenship prior to or after arriving in the United States. 8 CFR 208.15(a)(1)–(3), 1208.15(a)(1)–(3).

The Departments further provide that the issue of whether the firm resettlement bar applies arises ''when the evidence of record indicates that the firm resettlement bar may apply,'' and specifically allows both DHS and the immigration judge to first raise the issue based on the record evidence. 8 CFR 208.15(b), 1208.15(b). Finally, the Departments specify that the firm resettlement of an alien's parent(s) would be imputed to the alien if the resettlement was prior to the alien turning 18 and the alien resided with the parents at the time of the firm resettlement unless the alien could not have derived any legal immigration status or any nonpermanent legal immigration status that was potentially indefinitely renewable from the parent. *Id.*

In comparison to the NPRM, this final rule analyzes the components of 8 CFR 208.15(a)(1) and 1208.15(a)(1), breaks it into three subparagraphs, and changes the syntax, all for easier readability and to avoid confusion. The changes in the final rule are stylistic and do not reflect an intent to make a substantive change from the NPRM. This final rule also changes the temporal language in 8 CFR 208.15(a)(3)(i) and (ii) and 1208.15(a)(3)(i) and (ii) for clarity and consistency with similar language in 8 CFR 208.15(a)(2) and 1208.15(a)(2). The changes clarify the relevant temporal scope to read ''after departing his country of nationality or last habitual residence and prior to arrival in or entry into the United States'' in lieu of the language in the NPRM. Finally, as discussed above, the rule corrects a related outdated statutory cross-reference in 8 CFR 1244.4(b).

2.11. ''Public Officials''

The Departments are revising 8 CFR 208.18(a)(1), (7) and 1208.18(a)(1), (7) to provide further guidance for determining what sorts of officials constitute ''public officials,'' including whether an official such as a police officer is a public official for the purposes of the CAT regulations if he or she acts in violation of official policy or his or her official status. Specifically, in comparison to the NPRM, this final rule strikes the parenthetical phrase ''(''rogue official'')'' in 8 CFR 208.18(a)(1) and 1208.18(a)(1). Relatedly, this final rule replaces the remaining uses of the phrase ''rogue official'' in 8 CFR 208.16(b)(3)(iv), 208.18(a)(1), and 1208.18(a)(1) with the definition, ''public official who is not acting under color of law.'' As recently noted by the Attorney General in *Matter of O–F–A–S–,* 28 I&N Dec. 35, 38 (A.G. 2020), ''continued use of the 'rogue official' language by the immigration courts going forward risks confusion, not only because it suggests a different standard from the 'under color of law' standard, but also because 'rogue official' has been interpreted to have multiple meanings.''

In addition, the Departments clarify (1) that pain or suffering inflicted by, or at the instigation of or with the consent or acquiescence of, a public official is not torture unless it is done while the official is acting in his or her official capacity (*i.e.,* under ''color of law'') and (2) that pain or suffering inflicted by, or at the instigation of or with the consent or acquiescence of, a public official not acting under color of law does not constitute a ''pain or suffering inflicted by or at the instigation of or with the consent or acquiescence of a public official or other person acting in an official capacity,'' even if such actions cause pain and suffering that could rise to the severity of torture. *See* 8 CFR 208.18(a)(1), 1208.18(a)(1). This amendment clarifies that the requirement that the individual be acting in an official capacity applies to

---

suggests that Mexico is an appropriate option for seeking refuge for those genuinely fleeing persecution. *See, e.g.,* Shabia Mantoo, *Despite pandemic restrictions, people fleeing violence and persecution continue to seek asylum in Mexico,* U.N. High Commissioner for Refugees (Apr. 28, 2020), *https://www.unhcr.org/en-us/news/briefing/2020/4/5ea7dc144/despite-pandemic-restrictions-people-fleeing-violence-persecution-continue.html* (''While a number of countries throughout Latin America and the rest of the world have closed their borders and restricted movement to contain the spread of coronavirus, Mexico has continued to register new asylum claims from people fleeing brutal violence and persecution, helping them find safety.''). Asylum and refugee claims filed in Mexico increased 33 percent in the first three months of 2020 compared to the same period in 2019, averaging almost 6000 per month. *Id.* Asylum claims filed in Mexico rose by more than 103 percent in 2018 compared to the previous year. U.N. High Commissioner for Refugees, *Fact Sheet* (Apr. 2019), *https://reporting.unhcr.org/sites/default/files/UNHCR%20Factsheet%20Mexico%20-%20April%202019.pdf.* Overall, ''[a]sylum requests have doubled in Mexico each year since 2015.'' Congressional Research Serv., *Mexico's Immigration Control Efforts* (Feb. 19, 2020), *https://fas.org/sgp/crs/row/IF10215.pdf.* Moreover, some private organizations acknowledge that asylum claims in Mexico have recently ''skyrocket[ed],'' that ''Mexico has adopted a broader refugee definition than the U.S. and grants a higher percentage of asylum applications,'' and that ''Mexico may offer better options for certain refugees who cannot find international protection in the U.S.,'' including for those ''who are deciding where to seek asylum [*i.e.* between Mexico and the United States].'' Asylum Access, *Mexican Asylum System for U.S. Immigration Lawyers FAQ* (Nov. 2019), *https://asylumaccess.org/wp-content/uploads/2019/11/Mexican-Asylum-FAQ-for-US-Immigration-Lawyers.pdf.* Moreover, the Mexican Constitution was amended in 2011 to include the specific right to asylum and further amended in 2016 to expand that right. *See* Mex. Const. Art. 11 (''Every person has the right to seek and receive asylum. Recognition of refugee status and the granting of political asylum will be carried out in accordance with international treaties. The law will regulate their origins and exceptions.''). In fact, the grounds for seeking and obtaining refugee status under Mexican law are broader than the grounds under U.S. law. As in the United States, individuals in Mexico may seek refugee status as a result of persecution in their home countries on the basis of race, religion, nationality, gender, membership in a social group, or political opinion. *Compare* 2011 Law for Refugees, Complementary Protection, and Political Asylum (''LRCPPA''), Art. 13(I), *with* INA 208(b)(1)(B)(i), 8 U.S.C. 1158(b)(1)(B)(i). However, individuals in Mexico may also seek refugee status based on ''generalized violence'' and ''massive violation of human rights.'' *See* 2011 LRCPPA, Art. 13(II). In short, resettlement opportunities are unquestionably greater now than when the regulatory definition of ''firm resettlement'' was first implemented, and those changes warrant revisions to that definition accordingly.

both a ''public official,'' such as a police officer, and an ''other person,'' such as an individual deputized to act on the government's behalf. *Id.*

The Departments also clarify the definition of ''acquiescence of a public official'' so that, as several courts of appeals and the BIA have recognized, ''awareness''—as used in the CAT ''acquiescence'' definition—requires a finding of either actual knowledge or willful blindness. 8 CFR 208.18(a)(7), 1208.18(a)(7). The Departments further clarify in this rule that, for purposes of the CAT regulations, ''willful blindness'' means that ''the public official acting in an official capacity or other person acting in an official capacity was aware of a high probability of activity constituting torture and deliberately avoided learning the truth; it is not enough that such public official acting in an official capacity or other person acting in an official capacity was mistaken, recklessly disregarded the truth, or negligently failed to inquire.'' *Id.*

Additionally, the Departments clarify that acquiescence is not established by prior awareness of the activity alone, but requires an omission of an act that the official had a duty to do and was able to do. 8 CFR 208.18(a)(7), 1208.18(a)(7).

2.12. Information Disclosure

The Departments are making changes to 8 CFR 208.6 and 8 CFR 1208.6 to clarify that information may be disclosed in certain circumstances that directly relate to the integrity of immigration proceedings, including situations in which there is suspected fraud or improper duplication of applications or claims. Specifically, the Departments provide that to the extent not already specifically permitted, and without the necessity of seeking the exercise of the Attorney General's or Secretary's discretion under sections 1208.6(a) and 208.6(a), respectively, the Government may disclose all relevant and applicable information in or pertaining to the application for asylum, statutory withholding of removal, and protection under the CAT regulations as part of a Federal or state investigation, proceeding, or prosecution; as a defense to any legal action relating to the alien's immigration or custody status; during an adjudication of the application itself or an adjudication of any other application or proceeding arising under the immigration laws; pursuant to any state or Federal mandatory reporting requirement; and to deter, prevent, or ameliorate the effects of child abuse. 8 CFR 208.6(d)(1)(i)–(iv), 1208.6(d)(1)(i)–(vi). Finally, the Departments provide that nothing in 8 CFR 208.6 or 1208.6 should be construed to prohibit the disclosure of information in or relating to an application for asylum, statutory withholding of removal, and protection under the CAT regulations among specified government employees or where a government employee or contractor has a ''good faith and reasonable'' belief that the disclosure is necessary to prevent the commission of a crime, the furtherance of an ongoing crime, or to ameliorate the effects of a crime. 8 CFR 208.6(e), 1208.6(e).

The Departments are making conforming edits to 8 CFR 208.6(a) and (b) and 8 CFR 1208.6(b) to make clear that the disclosure provisions of 8 CFR 208.6 and 1208.6 apply to applications for withholding of removal under the INA and for protection under the regulations implementing the CAT, and not solely to asylum applications. That point is already clear in 8 CFR 208.6(d) and 1208.6(d), and the Departments see no reason not to conform the other paragraphs in that section for consistency.

2.13. Severability

Given the numerous and varied changes proposed in the NPRM, the Departments are adding severability provisions in 8 CFR parts 208, 235, 1003, 1208, 1212, and 1235. *See* 8 CFR 208.25, 235.6(c), 1003.42(i), 1208.25, 1212.13, 1235.6(c). Because the Departments believe that the provisions of each part would function sensibly independent of other provisions, the Departments make clear that the provisions are severable so that, if necessary, the regulations can continue to function without a stricken provision.

3. Other

In comparison to the NPRM, this final rule strikes the regulatory text changes proposed at 103.5 because those changes were inadvertently included in the NPRM's proposed regulatory text.

II. Public Comments on the Proposed Rule

A. Summary of Public Comments

The comment period for the NPRM closed on July 15, 2020, with more than 87,000 comments received. Organizations, including non-government organizations, legal advocacy groups, non-profit organizations, religious organizations, unions, congressional committees, and groups of members of Congress, submitted 311 comments, and individual commenters submitted the rest. Most individual comments opposed the NPRM.

Many if not most comments opposing the NPRM either misstate its contents, provide no evidence (other than isolated or distinguishable anecdotes) to support broad speculative effects, are contrary to facts or law, or lack an understanding of relevant immigration law and procedures. As the vast majority of comments in opposition fall within one of these categories, the Departments offer the following general responses to them, supplemented by more detailed, comment-specific responses in Section II.C of this preamble.

Many comments oppose the NPRM because they misstate, in hyperbolic terms, that it ends or destroys the asylum system or eliminates the availability of humanitarian protection in the United States. The NPRM does nothing of the kind. The availability of asylum is established by statute, INA 208, 8 U.S.C. 1158, and an NPRM cannot alter a statute.[11] Rather, the NPRM, consistent with the statutory authority of the Secretary and the Attorney General, adds much-needed guidance on the many critical, yet undefined, statutory terms related to asylum applications. Such guidance not only improves the efficiency of the system as a whole, but allows adjudicators to focus resources more effectively on potentially meritorious claims rather than on meritless ones. In short, the NPRM enhances rather than degrades the asylum system.

Many comments misstate that the NPRM creates a blanket rule denying asylum based on its addition of certain definitions—*e.g.,* particular social group, political opinion, nexus, and persecution. Although the rule provides definitions for these terms and examples of situations that generally will not meet those definitions, the rule also makes clear that the examples are generalizations, and it does not categorically rule out types of claims based on those definitions. In short, the rule does not contain the blanket prohibitions that some commenters ascribe to it.

Many comments assert that the NPRM targets certain nationalities, groups, or types of claims and is motivated by a nefarious or conspiratorial animus, particularly an alleged racial animus. The Departments categorically deny an improper motive in promulgating the NPRM. Rather, the animating principles of the NPRM were to provide clearer guidance to adjudicators regarding a number of thorny issues that have

[11] For similar reasons, the NPRM cannot—and does not—alter the general availability of withholding of removal under the Act or protection under the CAT.

created confusion and inconsistency; to improve the efficiency and integrity of the overall system; to correct procedures that were not working well, including the identification of meritless or fraudulent claims; and to reset the overall asylum adjudicatory framework in light of numerous—and often contradictory or confusing—decisions from the Board and circuit courts. The Departments' positions are rooted in law, as explained in the NPRM. In short, the Departments have not targeted any particular groups or nationalities in the NPRM or in the provisions of this final rule.[12] Rather, the Departments are appropriately using rulemaking to provide guidance in order to streamline determinations consistent with their statutory authorities. *See Heckler* v. *Campbell,* 461 U.S. 458, 467 (1983) (''The Court has recognized that even where an agency's enabling statute expressly requires it to hold a hearing, the agency may rely on its rulemaking authority to determine issues that do not require case-by-case consideration. . . . A contrary holding would require the agency continually to relitigate issues that may be established fairly and efficiently in a single rulemaking proceeding.'') (citation omitted); *see also Lopez* v. *Davis,* 531 U.S. 230, 243–44 (2001) (''[E]ven if a statutory scheme requires individualized determinations, which this scheme does not, the decisionmaker has the authority to rely on rulemaking to resolve certain issues of general applicability unless Congress clearly expresses an intent to withhold that authority. . . . The approach pressed by Lopez—case-by-case decision-making in thousands of cases each year—could invite favoritism, disunity, and inconsistency.'') (citations and internal quotations omitted).

Many, if not most, commenters asserted that the rule was ''arbitrary and capricious,'' though nearly all of those assertions were ultimately rooted in the fact that the rule did not adopt the commenters' policy preferences rather than specific legal deficiencies. The Departments have considered all comments and looked at alternatives. The Departments understand that many, if not most, commenters opposing the rule believe that most asylum applications are meritorious and, thus, would prefer that more applications for asylum be granted; that border restrictions should be loosened; and that the Departments, as a matter of forbearance or discretion, should decline to enforce the law when doing so would be beneficial to aliens. For all of the reasons discussed in the NPRM, and reiterated herein, the Departments decline to adopt those positions.

The Departments further understand that many if not most commenters have a policy preference for the status quo over the proposed rule changes. The Departments have been forthright in acknowledging the changes, but have also explained the reasoning behind those changes, including the lack of clarity in key statutory language and the resulting cacophony of case law that leads to confusion and inconsistency in adjudication. The Departments acknowledge changes in positions, where applicable have provided good reasons for the changes; they believe the changes better implement the law; and they have provided a ''reasoned analysis'' for the changes, which is contained in the NPRM and reiterated herein in response to the comments received. In short, the rule is not ''arbitrary and capricious'' under existing law. *See FCC* v. *Fox Television Stations, Inc.,* 556 U.S. 502, 515 (2009).

Finally, many commenters assert that various provisions of the NPRM are inconsistent with either Board or circuit-court precedents. The Departments may engage in rulemaking that overrules prior Board precedent, and as noted in the NPRM, 85 FR at 36265 n.1, to the extent that some circuits have disagreed with the Departments' interpretations of ambiguous statutory terms in the past, the Departments' new rule would warrant reevaluation in appropriate cases under well-established principles of administrative law. *See Nat'l Cable & Telecomms. Ass'n* v. *Brand X internet Servs.,* 545 U.S. 967, 982 (2005) (hereinafter ''*Brand X*''); *Chevron, U.S.A., Inc.* v. *Natural Resources Defense Council, Inc.,* 467 U.S. 837, 842–844 (1984). Moreover, '' 'judicial deference to the Executive Branch is especially appropriate in the immigration context,' where decisions about a complex statutory scheme often implicate foreign relations.'' *Scialabba* v. *Cuellar de Osorio,* 573 U.S. 41, 56–57 (2014) (plurality op.) (quoting *INS* v. *Aguirre-Aguirre,* 526 U.S. 415, 425 (1999)).

Consequently, for the reasons explained in the NPRM and herein, prior Board and circuit court decisions do not restrict the Departments to the extent asserted by most commenters. Further, as also discussed, *infra,* and recognized by commenters, much of the relevant circuit court case law points in different directions and offers multiple views on the issues in the NPRM. There is nothing inappropriate about the Departments seeking to improve the consistency, clarity, and efficiency of asylum adjudications, and to bring some reasonable order to the dissonant views on several important-but-contested statutory issues. *See, e.g., Fed. Express Corp.* v. *Holowecki,* 552 U.S. 389, 403 (2008) (''We find no reason in this case to depart from our usual rule: Where ambiguities in statutory analysis and application are presented, the agency may choose among reasonable alternatives.'').

Overall, and as discussed in more detail below, the Departments generally decline to adopt the recommendations of comments that misinterpret the NPRM, offer dire and speculative predictions that lack support, are contrary to facts or law, or otherwise lack an understanding of relevant law and procedures.

B. Comments Expressing Support for the Proposed Rule

Comment: At least two organizations and other individual commenters expressed general support for the rule. Some commenters noted the need for regulatory reform given the current delays in asylum adjudication and said the rule is a move in the right direction. Other commenters indicated a range of reasons for their support, including a desire to limit overall levels of immigration, a belief that many individuals who claim asylum are instead simply seeking better economic opportunities, or a belief that asylum seekers or immigration representatives abuse the asylum system.

Commenters stated that the rule will aid both adjudicators and applicants. For example, one individual and organization explained that:

> [T]hese proposals will give aliens applying for protection ample notice and motivation to file complete and adequately reasoned asylum applications in advance of the merits hearing, which will protect the rights of the alien, assist the IJ in completing the case in a timely manner, and aid the ICE attorney in representing the interests of the government.

Response: The Departments note and appreciate these commenters' support for the rule.

[12] Asylum claims are unevenly distributed among the world's countries. *See* EOIR, *Asylum Decision Rates by Nationality* (July 14, 2020), *https://www.justice.gov/eoir/page/file/1107366/download.* Thus, to the extent that the NPRM affects certain groups of aliens more than others, those effects are a by-product of the inherent distribution of claims, rather than any alleged targeting by the Departments. *See also DHS* v. *Regents of Univ. of Cal.,* 140 S.Ct. 1891, 1915–16 (2020) (impact of a policy on a population that is intrinsically skewed demographically does not established a plausible claim of racial animus, invidious discrimination, or an equal protection violation).

C. Comments Expressing Opposition to the Proposed Rule

1. General Opposition

1.1. General Immigration Policy Concerns

Comment: Many commenters expressed a general opposition to the rule, and noted that, although they may not be commenting on every aspect of the rule, a failure to comment on a specific provision does not mean that the commenter agrees with a provision. Commenters stated that the rule would ''destroy'' the U.S. asylum system and would result in the denial of virtually all asylum applications. Instead, commenters recommended that the current regulations remain in place. Moreover, commenters stated that the rule conflicts with America's values and deeply rooted policy of welcoming immigrants and refugees. Commenters asserted that the rule would damage the United States' standing in the world. Commenters explained that the United States should be promoting values of freedom and human rights, and that immigration benefits the United States both economically and culturally. Commenters asserted that the rule provides inadequate legal reasoning and is inappropriately motivated by the administration's animus against immigrants.

Response: The rule is not immoral, motivated by racial animus, or promulgated with discriminatory intent. Instead, the rule is intended to help the Departments better allocate limited resources in order to more expeditiously adjudicate meritorious asylum, statutory withholding of removal, and CAT protection claims. For example, placing aliens who receive a positive credible fear screening into asylum-and-withholding-only proceedings will lessen the strain on the immigration courts by limiting the focus of such proceedings and thereby streamlining the process. Similarly, applying certain asylum bars and raising the standards for statutory withholding of removal and CAT protection will help screen out non-meritorious claims during the credible fear screening, which will allow the Departments to devote their limited resources to adjudicating claims that are more likely to be meritorious. Likewise, allowing immigration judges to pretermit asylum applications that are not prima facie eligible for relief will allow judges to use limited hearing time to focus on cases with a higher chance of being meritorious. The rule's expanded definition of frivolousness will also help to deter specious claims that would otherwise require the use of limited judicial resources. The rule's additional guidance regarding certain definitions (such as particular social groups, political opinion, persecution, and acquiescence, among others), as well as enumerated negative discretionary factors, will provide clarity to adjudicators and the parties and make the adjudicatory process more efficient and consistent.

These changes do not ''destroy'' the U.S. asylum system, prevent aliens from applying for asylum, or prevent the granting of meritorious claims, contrary to commenters' claims. The asylum system remains enshrined in both statute and regulation. Rather, the changes are intended to harmonize the process between the relevant Departments, provide more clarity to adjudicators, and allow the immigration system to more efficiently focus its resources on adjudicating claims that are more likely to be meritorious. In doing so, the rule will help the Departments ensure that the asylum system is available to those who truly have ''nowhere else to turn.'' *Matter of B–R–,* 26 I&N Dec. 119, 122 (BIA 2013) (internal citations omitted).

1.2. Issuance of Joint Regulations

Comment: At least one commenter expressed a belief that it is inappropriate for DHS (characterized by the commenter as the immigration prosecutors) and DOJ (characterized by the commenter as the immigration adjudicators) to issue rules jointly because the agencies serve different roles and missions within the immigration system. The commenter stated that the issuance of joint regulations calls into question the agencies' independence from each other.

Response: The HSA divided, between DHS and DOJ, some immigration adjudicatory and enforcement functions that had previously been housed within DOJ. *See* INA 103, 8 U.S.C. 1103 (setting out the powers of the Secretary and Under Secretary of DHS and of the Attorney General); *see also* HSA, sec. 101, 116 Stat. at 2142 (''There is established a Department of Homeland Security, as an executive department of the United States . . . .''). However, the Departments disagree that issuing joint regulations violates the agencies' independence in the manner suggested by commenters. Instead, the DHS and DOJ regulations are inextricably intertwined, and the Departments' roles are often complementary. *See, e.g.,* INA 235(b)(1)(B)(iii)(III), 8 U.S.C. 1225(b)(1)(B)(iii)(III) (providing for immigration judge review of asylum officers' determinations regarding certain aliens' credible fear claims); *see* also 8 CFR 208.30 and 1208.30 (setting out the credible fear procedures, which involve actions before both DHS/USCIS and DOJ/EOIR). Because officials in both DHS and DOJ make determinations involving the same provisions of the INA, including those related to asylum, it is appropriate for the Departments to coordinate on regulations like the proposed rule that affect both agencies' equities in order to ensure consistent application of the immigration laws.

1.3. Impact on Particular Populations

Comment: Commenters asserted that the proposed regulation is in conflict with American values and that it would deny due process to specific populations—including women, LGBTQ asylum seekers, and children. Commenters similarly expressed concerns that the proposed regulation would lead to the denial of virtually all applications from those populations, which, commenters asserted, would place them in harm's way.

Commenters asserted that the elimination of gender-based claims would be particularly detrimental to women and LGBTQ asylum-seekers. Commenters asserted that the proposed rule would ''all but ban'' domestic-violence-based and gang-based claims. Commenters noted that courts have found that such claims can be meritorious.

Response: The Departments disagree that the rule is contrary to American values. The United States continues to fulfill its international commitments in accordance with the Refugee Act of 1980,[13] evidenced by United Nations High Commissioner for Refugees (''UNHCR'') data on refugee resettlement confirming that the United States was the top country for refugee resettlement in 2019, as well as 2017 and 2018. *See* UNHCR, *Resettlement at a Glance (January–December 2019), https://www.unhcr.org/protection/resettlement/5e31448a4/resettlement-fact-sheet-2019.html.* Further, since the Refugee Act was passed, the United States has admitted more than three million refugees and granted asylum to more than 721,000 individuals. *See* UNHCR, *Refugee Admissions, https://www.state.gov/refugee-admissions/.* In Fiscal Year (''FY'') 2019 alone, the Departments approved nearly 39,000 asylum applications. EOIR, *Asylum Decision Rates,* (Oct. 13, 2020), *https://www.justice.gov/eoir/page/file/1248491/download* (listing 18,836 grants); USCIS, *Number of Service-wide Forms Fiscal*

[13] *See infra* Section II.C.6.8 for further discussion on this point.

Year To- Date, *https://www.uscis.gov/sites/default/files/document/data/Quarterly_All_Forms_FY19Q4.pdf* (listing 19,945 grants). This rule does not affect the United States' long-standing commitment to assisting refugees and asylees from around the world.

The rule does not deny due process to any alien. As an initial matter, courts have found that aliens have no cognizable due process interest in the discretionary benefit of asylum. *See Yuen Jin* v. *Mukasey,* 538 F.3d 143, 156–57 (2d Cir. 2008); *Ticoalu* v. *Gonzales,* 472 F.3d 8, 11 (1st Cir. 2006) (citing *DaCosta* v. *Gonzales,* 449 F.3d 45, 49–50 (1st Cir. 2006)). Still, the statute and regulations provide for certain basic procedural protections—such as notice and an opportunity to be heard—and the rule does not alter those basic protections. *See LaChance* v. *Erickson,* 522 U.S. 262, 266 (1998) (''The core of due process is the right to notice and a meaningful opportunity to be heard.''); *see also Lapaix* v. *U.S. Att'y Gen.,* 605 F.3d 1138, 1143 (11th Cir. 2010) (''Due process requires that aliens be given notice and an opportunity to be heard in their removal proceedings.''). Aliens in removal proceedings will continue to be provided a notice of the charges of removability, INA 239(a)(1), 8 U.S.C. 1229(a)(1), have an opportunity to present the case to an immigration judge, INA 240(a)(1), 8 U.S.C. 1229a(a)(1), and have an opportunity to appeal, 8 CFR 1003.38. Aliens in asylum-and-withholding-only proceedings will continue to be provided notice of referral for a hearing before an immigration judge, 8 CFR 1003.13 (defining ''charging document'' used by DHS to initiate non-removal, immigration proceedings before an immigration judge), to have an opportunity to be heard by an immigration judge, 8 CFR 1208.2(c), and have an opportunity to appeal, 8 CFR 1003.1(b)(9). Nothing in the proposed regulations alters those well-established procedural requirements.

The generalized concern that the rule will categorically deny asylum to classes of persons, such as women or LGBTQ asylum-seekers—and thus put those persons in harm's way—is unsupported, speculative, and overlooks the case-by-case nature of the asylum process. The rule provides more clarity to adjudicators regarding a number of difficult issues—*e.g.* persecution, particular social group, and nexus—in order to improve the consistency and quality of adjudications, but it establishes no categorical bars to domestic-violence-based or gang-based claims, and no categorical bars based on the class or status of the person claiming asylum; instead, asylum cases turn on the nature of the individual's claim. Moreover, in accordance with its non-refoulement obligations, the United States continues to offer statutory withholding of removal and CAT protection. Although this rule amends those forms of relief, the amended relief continues to align with the provisions of the 1951 Convention relating to the Status of Refugees, the 1967 Protocol relating to the Status of Refugees, and the CAT, such that eligible aliens will not be returned to places where they may be subjected to persecution or torture.

The portion of the rule that draws the objection above does not categorically ban or eliminate any types of claims, including those posited by the commenters. In relevant part, the rule codifies a long-standing test for determining the cognizability of particular social groups and sets forth a list of common fact patterns involving particular-social-group claims that generally will not meet those long-standing requirements. *See* 85 FR at 36278–79; *see also* 8 CFR 208.1(f)(1), 1208.1(f)(1). At the same time, the Departments recognized in the NPRM that ''in rare circumstances,'' items from the list of common fact patterns ''could be the basis for finding a particular social group, given the fact- and society-specific nature of this determination.'' 85 FR at 36279. Thus, the NPRM explicitly stated that the rule did not ''foreclose'' any claims; the inquiry remains case-by-case.

2. Expedited Removal and Screenings in the Credible Fear Process

2.1. Asylum-and-Withholding-Only Proceedings for Aliens With Credible Fear

Comment: One organization stated that the rule would deprive individuals who have established a credible fear from being placed into full removal proceedings under section 240 of the Act, 8 U.S.C. 1229a. Another organization claimed that the rule, ''effectively destroys due process rights of asylum seekers'' as it would prevent these individuals from contesting removability where there are ''egregious due process violations,'' defects in the Notice to Appear, or competency concerns.

One organization stated that the rule is contrary to congressional intent because there is no statutory prohibition against placing arriving asylum seekers into complete section 240 proceedings, and at least one organization claimed that this intent is supported by the legislative history. One organization expressed its disagreement with the rule's citation to *Matter of M–S–,* 27 I&N Dec. 509 (A.G. 2019), 85 FR at 36267 n.9, contending that if Congress intended to ''strip asylum-seekers of their due process rights, it would have expressly said so.'' Another organization stated that the rule is ''[a]rbitrary and capricious,'' noting that the proposed policy is a ''dramatic change'' from decades of practice but claiming the Departments offer ''no discussion'' as to why it is necessary.

One organization emphasized that ''asylum-only proceedings,'' are limited in scope and both parties are prohibited from raising ''any other issues.'' The organization alleged that the NPRM did not include any data regarding the number of asylum seekers who are placed in section 240 proceedings after passing a credible fear interview, or the number of respondents in these proceedings who are granted some form of relief besides asylum or withholding of removal. Because of this, the organization claimed that the rule ''does not provide adequate justification'' for the proposed change.

Another organization claimed the rule ''pre-supposes'' that asylum seekers would not be eligible for other forms of immigration relief. The organization noted that many individuals who are apprehended at the border as asylum applicants may also be victims of human trafficking or serious crimes committed within the United States. The organization stated that Congress has recognized the unique assistance that victims of human trafficking and victims of crimes potentially eligible for U visas are able to provide to Federal law enforcement, claiming this is the reason the S visa, T visa, and U visa programs were created. The organization asserted that if the Departments ''cut off'' access to a complete section 240 proceeding, they will essentially ''tie the hands'' of law enforcement. Another organization expressed concern that the rule would prevent survivors of gender-based and LGBTQ-related violence in expedited removal proceedings from applying for protection under the Violence Against Women Act (''VAWA'') or the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008 (''TVPRA'').

One organization contended that there is little efficiency in abandoning removability determinations in removal proceedings, arguing that ''[i]n the overwhelming majority of cases, the pleadings required to establish removability take 30 seconds.'' The organization argued that Congress

would not have chosen to sacrifice competency and accuracy to save such a short amount of time. Another organization criticized the rule's statement that ''referring aliens who pass a credible fear for section 240 proceedings runs counter to [the] legislative aims'' of a quick expedited removal process, 85 FR at 36267, arguing that this justification is ''faulty at best and baseless at worst.'' One organization claimed that administrative efficiency is aided by the availability of a broad range of reliefs because respondents placed in full removal proceedings often qualify for a simpler form of relief, allowing courts to omit many of these complexities.

One organization noted that, in the expedited removal context, decisions are made by Customs and Border Protection (''CBP'') officers. The organization expressed concern about the risk of error in permitting an enforcement officer to act as both ''prosecutor and judge,'' particularly when the officer's decisions are not subject to appellate review. The organization also noted the rule's reference to the ''prosecutorial discretion'' of DHS in removal proceedings and argued that this discretion does not include the authority to create new types of proceedings. Instead, the organization contended that this discretion is confined to decisions surrounding the determination of whether to pursue charges. Another organization emphasized that, while DHS has the discretion to place an individual without documentation directly into section 240 proceedings instead of expedited removal, this discretion is ''initial,'' and does not continue once the individual has established fear (as the individual must then be referred for full consideration of his or her claims). The organization disagreed with the rule's assertion, 85 FR at 36266, that the current practice of placing applicants with credible fear into section 240 proceedings ''effectively negat[es]'' DHS's prosecutorial discretion.

The organization further disagreed with the Departments' claim that ''[b]y deciding that the [individual] was amenable to expedited removal, DHS already determined removability,'' 85 FR at 36266, contending this ''overreaches.'' The organization noted that, pursuant to section 235(b)(1) of the Act, 8 U.S.C. 1225(b)(1), a DHS inspector does have initial discretion to place an applicant into expedited removal proceedings if it is determined that the person ''is inadmissible under section 1182(a)(6)(C) or 1182(a)(7);'' however, the organization emphasized that this is not the ultimate determination for applicants who establish credible fear, as DHS cannot continue to seek expedited removal at this point.

One organization stated that, when Congress enacted the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (''IIRIRA''), Public Law 104–208, Div. C, 110 Stat. 3009, 3009–546, it created two specific removal procedures: Expedited removal proceedings in section 235 of the Act, 8 U.S.C. 1225, and regular removal proceedings in section 240 of the Act, 8 U.S.C. 1229a. The organization asserted that section 240 proceedings are the ''exclusive'' admission and removal proceedings ''unless otherwise specified'' in the Act, 8 U.S.C. 1229a(a)(3). The organization also noted Congress's specification that certain classes of citizens should not be placed in full removal proceedings, noting the exclusion of persons convicted of particular crimes (INA 240(a)(3), 8 U.S.C. 1229a(a)(3)); INA 238(a)(1), 8 U.S.C. 1228(a)(1)) as well as the prohibition of visa waiver program participants from contesting inadmissibility or removal except on the basis of asylum (INA 217(b), 8 U.S.C. 1187(b)). The organization also noted that, within the expedited removal statute itself, Congress specifically excluded stowaways from section 240 proceedings (INA 235(a)(1), 8 U.S.C. 1225(a)(2)); in contrast, Congress considered asylum seekers to be applicants for admission under section 235(a)(1) of the Act, 8 U.S.C. 1225(a)(1), and did not similarly exclude them (*see* INA 235(b), 8 U.S.C. 1225(b)). The organization concluded that the plain text of the INA ''precludes the agencies' claim that they are free to make up new procedures to apply to arriving asylees'' *(citing Henson* v. *Santander Consumer USA, Inc.,* 137 S. Ct. 1718, 1723 (2017)). The organization claimed that IIRIRA's legislative history ''unanimously confirms'' this conclusion, citing the conference report by the Joint Committee from the House and the Senate in support of its assertion. *See* H.R. Rep. No. 104–828 at 209 (1996). The organization also emphasized that, after twenty-three years of placing applicants with credible fear into section 240 proceedings, ''Congress has never suggested that the agencies got that wrong.''

Another organization emphasized that Congress only authorized expedited removal for a specific category of noncitizens and that, at the time this determination was made, the class was confined to individuals arriving at ports of entry. The organization argued that Congress did not intend to deter individuals who have ''cleared the hurdle of establishing a credible fear of persecution.'' Another organization argued that the credible fear screening ''creates an exit'' from expedited removal proceedings, emphasizing that those who establish credible fear are effectively ''screened out'' of expedited removal proceedings (INA 235(b)(1)(B)(ii)–(iii), 8 U.S.C. 1225(b)(1)(B)(ii)–(iii)). One organization expressed particular concern that ''the president has announced an intention to expand expedited removal to the interior of the United States,'' noting that noncitizens who have been in the United States for up to two years are more likely to have other forms of relief to pursue.

Response: The Departments disagree with commenters that the INA requires aliens who are found to have a credible fear to be placed in full removal proceedings pursuant to section 240 of the Act, 8 U.S.C. 1229(a). The expedited removal statute states only that ''the alien shall be detained for further consideration of the application for asylum,'' but is silent on the type of proceeding. INA 235(b)(1)(B)(ii) 8 U.S.C. 1225(b)(1)(B)(ii). This silence is notable as Congress expressly required or prohibited the use of full removal proceedings elsewhere in the same expedited removal provisions. *Compare* INA 235(b)(2)(A), 8 U.S.C. 1225(b)(2)(A) (explicitly requiring certain aliens not eligible for expedited removal to be placed in section 240 removal proceedings), *with* INA 235(a)(2), 8 U.S.C. 1225(a)(2) (explicitly prohibiting stowaways from being placed in section 240 removal proceedings).[14] As explained in the NPRM, the former Immigration and Naturalization Service (''INS'') interpreted this ambiguous section to place aliens with positive credible fear determinations into section 240 removal proceedings. *See* Inspection and Expedited Removal of Aliens; Detention and Removal of Aliens; Conduct of Removal Proceedings; Asylum Procedures, 62 FR 10312 (Mar. 6, 1997). However, it is the Departments' view that the better interpretation is to place aliens with positive credible fear determinations into limited asylum-and-withholding-only proceedings. This is consistent with the statutory language that the

[14] The Departments note that section 240(a)(3) of the Act (8 U.S.C. 1229a(a)(3)), which makes removal proceedings the ''exclusive'' procedure for inadmissibility and removability determinations, is inapplicable here because DHS has already determined inadmissibility as part of the expedited removal process. *See* INA 235(b)(1)(A)(i) (8 U.S.C. 1225(b)(1)(A)(i)).

alien is entitled to a further proceeding related to the alien's ''application for asylum,'' and not a full proceeding to also determine whether the alien should be admitted or is otherwise entitled to various immigration benefits. INA 235(b)(1)(B)(ii), 8 U.S.C. 1225(b)(1)(B)(ii).

This interpretation also best aligns with the overall purpose of the expedited removal statute to provide a streamlined and efficient removal process for certain aliens designated by Congress.[15] *See generally* INA 235, 8 U.S.C. 1225; *cf. DHS* v. *Thuraissigiam,* 140 S.Ct. 1959, 1966 (2020) (''As a practical matter . . . the great majority of asylum seekers who fall within the category subject to expedited removal do not receive expedited removal and are instead afforded the same procedural rights as other aliens.''). Further, contrary to commenters' claims, placing aliens into asylum-and-withholding-only proceedings is not inconsistent with the purposes of the credible fear statute. *See* INA 235(b)(1)(B), 8 U.S.C. 1225(b)(1)(B). The credible fear process was designed to ensure that aliens subject to expedited removal are not summarily removed to a country where they may face persecution on account of a protected ground or torture. This rule maintains those protections by ensuring that an alien with a positive credible fear finding receives a full adjudication of their claim in asylum-and-withholding-only proceedings.

Regarding commenters' concerns about due process in asylum-and-withholding-only proceedings, the Departments note that the rule provides the same general procedural protections as section 240 removal proceedings. *See* 85 FR at 36267 (''These 'asylum-and-withholding-only' proceedings generally follow the same rules of procedure that apply in section 240 proceedings . . . .''); *accord* 8 CFR 1208.2(c)(3)(i) (''Except as provided in this section, proceedings falling under the jurisdiction of the immigration judge pursuant to paragraph (c)(1) or (c)(2) of this section [*i.e.,* asylum-and-withholding-only proceedings] shall be conducted in accordance with the same rules of procedure as proceedings conducted under 8 CFR part 1240, subpart A [*i.e.,* removal proceedings].''). Moreover, just as in removal proceedings, aliens will be able to appeal their case to the BIA and Federal circuit courts, as necessary. Finally, DOJ has conducted asylum-and-withholding-only proceedings for multiple categories of aliens for years already, 8 CFR 1208.2(c)(1) and (2), with no alleged systemic concerns documented about the due process provided in those proceedings.

The Departments agree with the commenter who noted that removability determinations are typically brief for those aliens subject to expedited removal who subsequently establish a credible fear and are placed in removal proceedings. The Departments believe that comment further supports the placement of such aliens in asylum-and-withholding-only proceedings since ''in the overwhelming majority of cases,'' there is no need for a new removability determination that would otherwise be called for in removal proceedings.

The Departments disagree with commenters that section 240 removal proceedings are more efficient than asylum-and-withholding-only proceedings or that more data is required to align asylum-and-withholding-only proceedings with the statutory language of INA 235(b)(1)(B)(ii), 8 U.S.C. 1225(b)(1)(B)(ii), especially when there was little analysis—and no data offered—to support placing aliens with positive credible fear determinations in removal proceedings in the first instance. *See* 85 FR at 36266 (stating that the 1997 decision to place such aliens in removal proceedings was made with limited analysis, other than to note that the statute was silent on the type of proceeding that could be used). Most aliens subject to the expedited removal process are, by definition, less likely to be eligible for certain other forms of relief due to their relatively brief presence in the United States. *See, e.g.,* INA 240A(b)(1), 8 U.S.C. 1229b(b)(1) (cancellation of removal for certain non-permanent residents requires ten years of continuous physical presence); INA 240B(b)(1)(A), 8 U.S.C. 1229c(b)(1)(A) (voluntary departure at the conclusion of proceedings requires an alien to have been physically present in the United States for at least one year prior to the service of a notice to appear). In particular, they are less likely to be eligible for the simplest form of relief, voluntary departure, because either they are arriving aliens, INA 240B(a)(4), 8 U.S.C. 1229c(a)(4), or they are seeking asylum, 8 CFR 1240.26(b)(1)(i)(B) (requiring the withdrawal of claims for relief in order to obtain pre-hearing voluntary departure), or they have not been physically present in the United States for at least one year prior to being placed in proceedings, INA 240B(b)(1)(A), 8 U.S.C. 1229c(b)(1)(A). Further, immigration judges often adjudicate multiple forms of relief in a single removal proceeding—in addition to asylum, withholding of removal, or CAT claims—and those additional issues generally only serve to increase the length of the proceedings. Although there may be rare scenarios in which aliens subject to expedited removal are eligible for a form of relief other than asylum, the Departments believe that interpreting the statute to place aliens with positive credible-fear determinations into more limited asylum-and-withholding-only proceedings properly balances the need to prevent aliens from being removed to countries where they may face persecution or torture with ensuring the efficiency of the overall adjudicatory process.

The Departments also disagree with comments that the placement of aliens who have passed a credible fear review in asylum-and-withholding-only proceedings will somehow ''tie the hands'' of law enforcement regarding an alien's eligibility for certain visas. The rule has no bearing on an alien's ability to provide assistance to law enforcement, and the adjudication of applications for S-, T-, and U-visas occurs outside of any immigration court proceedings.[16] *See generally* 8 CFR 214.2(t) (S-visa adjudication process), 214.11 (T-visa adjudication process), 214.14 (U-visa adjudication process).

Commenters also mischaracterize the Departments' policy reliance on DHS's prosecutorial discretion authority, claiming that the Departments are relying on this discretion as the legal authority for placing aliens with positive credible fear determinations into asylum-and-withholding-only proceedings. However, it is the expedited removal statute that provides the authority, *see* INA 235(b)(1)(B)(ii), 8 U.S.C. 1225(b)(1)(B)(ii), not DHS's prosecutorial discretion. In the NPRM, the Departments noted that it made better policy sense to place aliens with positive credible fear determinations into asylum-and-withholding-only proceedings; placing aliens in section 240 proceedings after a credible fear determination ''effectively negates DHS's original discretionary decision.'' 85 FR at 36266.

The Departments acknowledge commenters' concerns about CBP processing aliens for expedited removal and the exercise of prosecutorial discretion, but those issues are beyond

[15] The Departments note that any comments regarding the potential expansion of expedited removal is outside the scope of this rule. *Cf.* Designating Aliens for Expedited Removal, 84 FR 35409 (July 23, 2019).

[16] The Departments note that S-visa recipients are already subject to withholding-only proceedings. INA 214(k)(3)(C), 8 U.S.C. 1184(k)(3)(C); 8 CFR 236.4(d), (e) and 1208.2(c)(2)(vi).

the scope of the rule. Moreover, the rule does not affect DHS's use of prosecutorial discretion, nor does it alter any other statutory authority of CBP.

2.2. Consideration of Precedent When Making Credible Fear Determinations in the ''Credible Fear'' Process

Comment: One organization stated that the rule would ''unnecessarily narrow'' the law that immigration judges must consider in the context of a credible fear review, restricting them to the circuit court law in their own jurisdiction. The organization alleged that this ''makes little sense'' because individuals seeking a credible fear review will often have their asylum claim adjudicated in a jurisdiction with different case law than the jurisdiction where their credible fear claim is reviewed. As an example, one organization suggested that an asylum seeker apprehended in Brownsville, Texas, in the Fifth Circuit, could subsequently have his or her asylum claim heard in an immigration court located within another circuit's jurisdiction. Because of this, the organization urged asylum officers and immigration judges to consider all case law when determining the possibility of succeeding on the claim, ''[r]egardless of the location of the credible fear determination.''

One organization claimed the rule could require asylum officers to order the expedited removal of an applicant who has shown an ability to establish asylum eligibility under section 208 of the Act, 8 U.S.C. 1158, in another circuit or district, which the organization alleged is contrary to section 235(b)(1)(B)(v) of the Act, 8 U.S.C. 1225(b)(1)(B)(v). The organization also claimed this portion of the rule is ''flatly contrary'' to the decision in *Grace* v. *Whitaker,* 344 F. Supp. 3d 96 (D.D.C. 2018) (hereinafter ''*Grace I*''), *overruled in part, Grace* v. *Barr,* 965 F.3d 883 (D.C. Cir. 2020), holding that the same provision in USCIS guidance was contrary to the INA. The organization quoted *Grace I,* 344 F. Supp. 3d 96 in which the court stated that ''[t]he government's reading would allow for an [individual's] deportation, following a negative credible fear determination, even if the [individual] would have a significant possibility of establishing asylum under section 1158 during his or her removal proceeding. Thus, the government's reading leads to the exact opposite result intended by Congress.'' *Id.* at 140. The organization also claimed the rule violates *Brand X* because it exceeds the Departments' ''limited ability to displace circuit precedent on a specific question of law to which an agency decision is entitled to deference'' (citing *Grace I,* 344 F. Supp. 3d at 136). Another organization alleged that the Departments offer no explanation for the policy change, claiming there is ''no discernable reason'' for it other than to ''limit the possibility of favorable case law in another jurisdiction.''

One organization noted that well-settled USCIS policy holds that, in the case of a conflict or question of law, ''generally the interpretation most favorable to the applicant is used when determining whether the applicant meets the credible fear standard'' regardless of where the credible fear interview is held. The organization claimed that this policy is in line with congressional intent, quoting a statement from Representative Smith that ''[l]egal uncertainty must, in the credible fear context, adhere to the applicant's benefit.'' The organization alleged that the NPRM fails to note or explain this departure from practice.

Response: The Departments decline to respond to comments centering on an asylum officer's consideration of precedent as that issue was not addressed in this rule, and further disagree with commenters that immigration judges are currently required to consider legal precedent from all Federal circuit courts in credible fear proceedings. DOJ has not issued any regulations or guidance requiring immigration judges to use a ''most favorable'' choice of law standard in credible fear review proceedings. *See, e.g.,* 8 CFR 1003.42.

Moreover, the statute is silent as to this choice of law question. *See* INA 235(b)(1)(B)(iii)(III), 8 U.S.C. 1225(b)(1)(B)(iii)(III). Due to this ambiguity, the Departments are interpreting the statute to require immigration judges to apply the law of the circuit in which the credible fear review proceeding is located. This better comports with long-standing precedent affirming the use of the ''law of the circuit'' standard in immigration proceedings. *See Jama* v. *ICE,* 543 U.S. 335, 351 n.10 (2005) (''With rare exceptions, the BIA follows the law of the circuit in which an individual case arises . . . .'' (citations omitted)); *Ballesteros* v. *Ashcroft,* 452 F.3d 1153, 1157 (10th Cir. 2006) (explaining that an immigration judge ''should analyze removability and relief issues using only the decisions of the circuit in which he or she sits . . . since it is to that circuit that any appeal from a final order of removal must be taken''). It will also provide clarity to immigration judges conducting credible fear reviews, particularly on issues in which there is conflicting circuit court precedent.

Further, contrary to commenters' assertions, in most cases the immigration judge conducting the credible fear review in person will be in the same circuit in which the full asylum application in asylum-and-withholding only proceedings would be adjudicated if the judge finds the alien has a credible fear.[17] Aliens in this posture are subject to detention by DHS. *Thuraissigiam,* 140 S.Ct. at 1966 (''Whether an applicant [subject to expedited removal] who raises an asylum claim receives full or only expedited review, the applicant is not entitled to immediate release.''). As a result, unless DHS moves the alien to a detention facility in a different circuit, the case would likely remain in the same jurisdiction. Requiring the immigration judge to review nationwide circuit case law would only create inefficiencies in a credible fear review process that Congress intended to be streamlined. *See* INA 235(b)(1)(B)(iii)(III), 8 U.S.C. 1225(b)(1)(B)(iii)(III) (requiring immigration judge review to be completed ''as expeditiously as possible, to the maximum extent practicable within 24 hours, but in no case later than 7 days'' after the asylum officer's determination).

Moreover, the Departments have reviewed the statutory mandate in the credible fear context and note that a rule requiring evaluation of a claim using law beyond that of a particular circuit could produce perverse outcomes contrary to the statute. For example, an alien could be found to have a ''significant possibility'' of establishing eligibility for asylum under section 208 of the Act even though binding law of the circuit in which the application would be adjudicated precludes the alien from any possibility of establishing eligibility for asylum. Such an absurd result would be both contrary to the statutory definition of a credible fear, INA 235(b)(1)(B)(v), 8 U.S.C. 1225(b)(1)(B)(v), and would further burden the system with claims that were known to be unmeritorious at the outset. The Departments decline to adopt a course of action that would lead to results inconsistent with the statute.

Moreover, adopting the uniform rule proposed by the Departments would ameliorate otherwise significant operational burdens—burdens that would be inconsistent with Congress's

[17] Even in situations in which an immigration judge conducts the review from a different location—*e.g.* by telephone or by video teleconferencing—in a different circuit, the rule provides a clear choice of law principle to apply.

goal of establishing an efficient expedited removal system. Without it, asylum officers and immigration judges around the country would potentially have to consider and apply a shifting patchwork of law from across the country, and this obligation would undermine the stated statutory aim of expedited removal: To remove aliens expeditiously.

The Departments' choice-of-law rule in this context is reasonable. The most natural choice-of-law principle is the rule that the law of the circuit where the interview is conducted governs. That is the principle embraced by DOJ in adjudicating the merits of asylum claims, *Matter of Anselmo,* 20 I&N Dec. 25, 31 (BIA 1989) (''We are not required to accept an adverse determination by one circuit . . . as binding throughout the United States.''), as well as by circuit courts. For example, where the law governing an agency's adjudication is unsettled, an agency generally is required to acquiesce only in the law of the circuit where its actions will be reviewed; while ''intracircuit acquiescence'' is generally required, ''intercircuit acquiescence'' is not. *See Johnson* v. *U.S. R.R. Ret. Bd.,* 969 F.2d 1082, 1093 (D.C. Cir. 1992). Because the circuits may disagree on the law, requiring acquiescence with every circuit would charge the Departments with an impossible task of following contradictory judicial precedents. *See Nat'l Envtl. Dev. Ass'n Clean Air Project* v. *EPA,* 891 F.3d 1041, 1051 (D.C. Cir. 2018); *see also Grant Med. Ctr.* v. *Hargan,* 875 F.3d 701, 709 (D.C. Cir. 2017).

Intercircuit nonacquiescence principles are especially important where there is ''venue uncertainty,'' meaning the agency cannot know at the time it issues its decision in which circuit that decision will be reviewed. In those situations, an agency has discretion in its choice of law, though it must be candid about its nonacquiescence. *See Grant Med. Ctr.,* 875 F.3d at 707. The rule's choice-of-law provision in this context is fully consistent with the Board's long-standing approach and the administrative-law principles embraced by circuit courts. At the time of the credible-fear screenings by an asylum officer, the only circuit with a definite connection to the proceedings is the circuit where the screening of the alien takes place. The location of the alien at the time of the credible fear determination will be the determinative factor as to which circuit's law applies. Applying that circuit's law is an objective, reasonable, administrable, and fair approach to credible-fear screening.

In *Grace* v. *Barr,* the D.C. Circuit affirmed an injunction of USCIS's implementation of a ''law of the circuit'' policy in credible fear proceedings. 965 F.3d 883 (D.C. Cir. 2020) (hereinafter ''*Grace II*''). However, in that case, the court affirmed an injunction based on USCIS's failure to explain the basis of its ''law of the circuit'' policy and expressly declined to decide whether the substance of such a policy—if explained more fully—would be contrary to law. *Id.* at 903. Here, as detailed above, the Departments have explained the necessity of codifying a law of the circuit policy in credible fear proceedings before immigration judges and, to that end, are interpreting an ambiguous statutory provision, INA 235(b)(1)(B)(v), 8 U.S.C. 1225(b)(1)(B)(v) (defining ''credible fear of persecution'' by reference to eligibility for asylum), in which the Departments are entitled deference. *See Chevron, U.S.A., Inc.,* 467 U.S. at 844 (holding that, when interpreting an ambiguous statute, ''a court may not substitute its own construction of a statutory provision for a reasonable interpretation made by the administrator of an agency'').

2.3. Remove and Reserve DHS-Specific Procedures From DOJ Regulations

Comment: In the context of discussing the DOJ's removal of DHS-specific provisions from 8 CFR part 1235, at least one commenter expressed concern that the rule would eliminate or make more difficult the parole authority at 8 CFR 235.3(c).

Response: Following the enactment of the HSA, EOIR's regulations were transferred to or duplicated in a newly created chapter V of 8 CFR, with related redesignations. *See* Aliens and Nationality; Homeland Security; Reorganization of Regulations, 68 FR 9824, 9830, 9834 (Feb. 28, 2003); *see also* Aliens and Nationality; Homeland Security; Reorganization of Regulations, 68 FR 10349 (Mar. 5, 2003). DOJ transferred parts of the Code of Federal Regulations that pertained exclusively to EOIR from chapter I to chapter V; duplicated parts of the Code of Federal Regulations that related to both the INS and EOIR, which were included in both chapters I and V; and made technical amendments to both chapters I and V. For example, DOJ duplicated all of part 235 in the newly created 8 CFR part 1235 because the Department determined that ''nearly all of the provisions of this part affect bond hearings before immigration judges.'' 68 FR at 9826. The Departments anticipated further future adjustments and refinements to the regulations in the future ''to further refine the adjudicatory process.'' 68 FR at 9825.

Upon further review, however, DOJ has determined that 8 CFR 1235.1, 1235.2, 1235.3, and 1235.5 are not needed in 8 CFR chapter V because they concern procedures specific to DHS's examination of applicants for admission and are outside the purview of DOJ's immigration adjudicators. *See* 85 FR at 36267. In order to prevent confusion and reduce the chance of future inconsistencies with 8 CFR 235.1, 235.2, 235.3, and 235.5, which are not amended, the rule removes and reserves 8 CFR 1235.1, 1235.2, 1235.3, and 1235.5. Finally, in response to the commenter's particular concern, the Departments note that DOJ does not make parole determinations, and DHS's parole authority in 8 CFR 235.3(c) is both unaffected by this rule and outside the scope of the rulemaking generally.

2.4. Reasonable Possibility as the Standard of Proof for Statutory Withholding of Removal and Torture-Related Fear Determinations for Aliens in Expedited Removal Proceedings and Stowaways

Comment: One organization noted that the rule would require that those applying for withholding of removal to prove a ''reasonable fear'' of persecution, which is a higher standard than that required for asylum. The organization suggested that the drafters of the rule were targeting individuals who are ineligible for asylum and are thus applying for withholding of removal only. The organization noted that a large number of refugees may meet this criteria due to the administration's ''unsuccessful attempts'' to impose additional asylum restrictions on individuals entering the United States outside a port of entry, as well as those arriving at the southern border after passing through third countries, if they did not apply for asylum and have their application(s) rejected in one of those countries.

One commenter alleged that the rule would ''greatly increase the burden'' of individuals eligible only for withholding of removal or protection under CAT to succeed in initial interviews and present their cases before an immigration judge. The commenter noted that the rule would require asylum seekers who would be subject to a bar on asylum, including those subject to the ''transit ban'' found at 8 CFR 208.13(c)(4)(ii), to meet the heightened standard in order to have their cases heard before an immigration judge. The commenter alleged that the rule would ''essentially eliminate'' the

''significant possibility'' standard set forth by Congress in the INA and replace it with a ''reasonable possibility'' standard which is much harder for asylum seekers to meet. One organization claimed that, as a result, ''[m]eritorious asylum seekers will be screened out of the asylum system—a reality Congress expressly prohibited.''

One organization claimed that Congress intended to set a low screening standard for the credible fear process in order to aid eligible asylum seekers and alleged that the NPRM fails to provide justification for raising this standard. The organization expressed concern that asylum officers lack the resources to ''jump'' from applying the ''significant possibility'' standard to the ''reasonable possibility'' standard during a brief interview and also emphasized that noncitizens are more likely to obtain counsel in immigration court than in the initial screening process. One commenter stated that the rule, ''[u]nrealistically and unconscionably'' heightens the standard individuals must meet upon arrival at the border and limits the protections for individuals who ''have or would be tortured.''

One organization emphasized that the ''reasonable possibility'' standard is essentially the same burden of proof used when adjudicating an asylum application in a full immigration hearing. The organization claimed, however, that individuals seeking a fear determination will almost always have less evidence and less time to present their case than individuals in court. As a result, the organization alleged that the standard of proof in fear determinations should be lower than that used in immigration court hearings. Another organization criticized the Departments' assertion that raising the screening bar is necessary to ''align'' the screening with the burden of proof in the merits proceeding for each type of relief. The organization disagreed, noting that asylum officers must already consider the merits burden of proof when screening for fear under existing law, as they must determine whether there is a ''significant possibility'' that an applicant ''could be eligible'' for each type of potential relief. The commenter asserted that this necessarily entailed a consideration of the burden of proof to establish eligibility for those forms of relief. As a result, the higher screening burden ''serves only to require more and stronger evidence before the merits stage, and at a moment when applicants are least likely to be able to amass it.''

One organization noted that many credible fear applicants are ''profoundly traumatized, exhausted, terrified,'' and unfamiliar with the legal process, and emphasized that these individuals will not have time to gather their thoughts or collect evidence to support ''highly fact-specific inquiries'' at an interview screening. Another organization stated that asylum-seekers are screened in ''exceedingly challenging circumstances,'' as well as in cursory interviews over the telephone. One organization specifically alleged that the Departments failed to consider how trauma affects the fear screening process, emphasizing research showing that trauma affects demeanor in ways that could ''easily affect credibility'' (nervousness, inability to make eye contact, etc.). At least one organization expressed particular concern for LGBTQ asylum seekers, and another organization emphasized that arriving applicants are unrepresented, unlikely to understand U.S. legal standards, and may be fearful or reluctant to discuss their persecution with authorities.

One organization claimed the Departments have offered no evidence that the current procedure of using one standard to screen for any claim for relief complicates or delays the expedited removal process, alleging that this argument is not supported by government data. The organization noted that the number of individuals removed through expedited removal has increased fairly steadily over the years, stating that 43 percent of removals during 2018 were through the expedited removal process and that this proportion has not changed over the past decade. The organization also asserted there is no evidence that ''requiring asylum officers to evaluate varying claims relating to the same group of facts with three different screens would be simpler,'' claiming this would actually make the determination more complicated.

The organization also disagreed with the Departments' suggestion that DOJ's language in a previous rule ''imposing the higher burden to a particular group in a previous rule supports their rationale'' (citing 85 FR at 36270). The organization emphasized that, in the previous rule, DOJ applied a higher screening standard strictly to individuals ''subject to streamlined administrative removal processes for aggravated felons under section 238(b) of the Act and for [people] subject to reinstatement of a previous removal order under section 241(a)(5) of the Act.'' Regulation Concerning the Convention Against Torture, 64 FR 8478, 8485 (Feb. 19, 1999). The organization claimed DOJ specifically distinguished that group as different from the ''broad class'' of arriving individuals subject to expedited removal, stating that the Departments offer no explanation for why this ''broad class'' can now be treated as a ''narrowly defined class whose members can raise only one claim.'' The organization also accused the Departments of failing to explain what authority they used to add to and raise the statutory burden of proof in Congress's ''carefully described credible fear procedures.'' INA 235(b), 8 U.S.C. 1225(b).

One organization noted that a U.S. district court vacated the ''third country asylum ban regulations'' on June 30, 2020, *see Capital Area Immigrants' Rights Coalition* v. *Trump,*— F.Supp.3d—, 2020 WL 3542481 (D.D.C. 2020) and also noted that the Ninth Circuit upheld a previous injunction against the rule on July 6, 2020, *see E. Bay Sanctuary Covenant* v. *Barr,* 964 F.3d 832 (9th Cir. 2020). The organization also referred to a separate rule that it claimed attempted to ban asylum for individuals entering the United States without inspection and noted that this rule was ''blocked'' by two separate district courts. *See E. Bay Sanctuary Covenant* v. *Trump,* 354 F.Supp.3d 1094 (N.D. Cal 2018); *O.A.* v. *Trump,* 404 F. Supp. 3d 109 (D.D.C. 2019). The organization noted that, based on these cases, it is unclear who would be eligible for withholding of removal or CAT only. The organization concluded by emphasizing that Congress created the credible fear standard as a safeguard due to ''the life or death nature of asylum,'' and described the proposed higher evidentiary standard as ''cruelly irresponsible.''

Response: In general, commenters appear to have confused multiple rulemakings, as well as the existing legal differences between and among asylum, statutory withholding of removal, and protection under the CAT regulations. The Departments decline to adopt the commenters' positions to the extent they are based on inaccurate or confused understandings of the proposed rule and of the legal distinctions between and among asylum, statutory withholding of removal, and protection under the CAT regulations.

Contrary to commenters' claims, the change of the credible fear standards for statutory withholding and protection under the CAT regulations are unrelated to the Departments' other asylum-related regulatory efforts, which are outside the scope of this rule, and the current change is not intended to ''target'' aliens that are not subject to those previous asylum regulations. *See, e.g.,* Asylum Eligibility and Procedural

Modifications, 84 FR 33829 (July 16, 2019); Aliens Subject to a Bar on Entry Under Certain Presidential Proclamations; Procedures for Protection Claims, 83 FR 55934 (Nov. 9, 2018). Further, the change in standards has no bearing on how any alleged trauma is assessed during the screening process by either asylum officers or immigration judges. Adjudicators in both Departments have conducted these assessments for many years and are trained and well-versed in assessing the credibility of applicants, including accounting for any alleged trauma that may be relevant.

As discussed in the NPRM, Congress did not require the same eligibility standards for asylum, statutory withholding of removal, and protection under the CAT in the ''credible fear'' screening process. *See* 85 FR at 36268–71. In fact, the INA does not include any references to statutory withholding of removal or protection under the CAT regulations when explaining the ''credible fear'' screening process. *See* INA 235(b)(1)(B), 8 U.S.C. 1225(b)(1)(B); *see also* The Foreign Affairs Reform and Restructuring Act of 1998 (''FARRA''), Public Law 105–277, 112 Stat. 2681–822.

Instead, the Departments have the authority to establish procedures and standards for statutory withholding of removal and protection under the CAT. *See* INA 103(a)(1), 8 U.S.C. 1103(a)(1) (''The Secretary of Homeland Security shall be charged with the administration and enforcement of [the INA] and all other laws relating to the immigration and naturalization of aliens * * *.''); INA 241(b)(3)(A), 8 U.S.C. 1231(b)(3)(A); FARRA, Public Law 105–277, sec. 2242(b), 112 Stat. at 2681–822 (providing that ''the heads of the appropriate agencies shall prescribe regulations to implement the obligations of the United States under Article 3'' of CAT).

Using this authority, the Departments believe that, rather than being ''unrealistic[ ]'' or ''unconscionabl[e]'' as commenters claim, raising the standards of proof to a ''reasonable possibility'' during screening for statutory withholding of removal and protection under the CAT regulations better aligns the initial screening standards of proof with the higher standards used to determine whether aliens are in fact eligible for these forms of protection when applying before an immigration judge. Further, as explained in the NPRM, this higher standard will also serve to screen out more cases that are unlikely to be meritorious at a full hearing, which will allow the overburdened immigration system to focus on cases more likely to be granted. And, contrary to commenters' claims, the NPRM did not claim that the use of a single ''significant possibility'' standard complicates or delays the expedited removal process.

The Departments recognize that a higher screening standard may make it more difficult to receive a positive fear determination. However, the Departments disagree with commenters that raising the screening standard for statutory withholding of removal and CAT protection will require aliens to submit significantly stronger documentary evidence. At the credible fear interview stage, these claims rest largely on the applicant's testimony, which does not require any additional evidence-gathering on the applicant's part. *See, e.g.,* 8 CFR 208.30(d), 208.30(e)(2) (describing the interview and explicitly requiring the asylum officer to make a credible fear determination after ''taking into account the credibility of the statements made by the alien in support of the alien's claim'').

In addition, the Departments have long used the ''reasonable possibility'' standard for reasonable fear determinations made under 8 CFR 208.31 and 8 CFR 1208.31, which cover certain classes of aliens who are ineligible for asylum but who are eligible for statutory withholding of removal and protection under the CAT regulations. *See* 8 CFR 208.31(a), 208.31(c), 1208.31(a), 1208.31(c).[18] By changing the standard in credible fear interviews for statutory withholding and CAT protection, asylum officers will process such claims under the same standard, providing additional consistency. Moreover, asylum officers receive significant training and the Departments have no concerns that they will be able to properly apply the standards set forth in this rule. *See* 8 CFR 208.1(b) (ensuring training of asylum officers).

In short, it is both illogical and inefficient to screen for three potential forms of protection under the same standard when two of those forms have an ultimately higher burden of proof. The Departments' rule harmonizes the screening of the various applications consistent with their respective ultimate burdens and ensures that non-meritorious claims are more quickly weeded out, allowing the Departments to focus more of their resources on claims likely to have merit.

2.4.1. Specific Concerns With ''Significant Possibility'' Standard

Comment: One commenter claimed the rule would make it much harder for asylum seekers subject to expedited removal to have their asylum requests ''fully considered'' by an immigration judge. The commenter noted that Congress intentionally set a low standard—''significant possibility''—for the credible fear interview in order to prevent legitimate refugees from being deported; one organization noted that this standard was designed to ''filter out economic migrants from asylum seekers.'' Commenters argued that the rule's redefinition of the ''significant possibility'' standard as ''a substantial and realistic possibility of succeeding'' contradicts the language Congress set forth in section 235(b)(1)(B)(v) of the Act, 8 U.S.C. 1225(b)(1)(B)(v) and is thus ''ultra vires.''

One organization argued that the legislative history confirms Congress's intent to protect ''bona fide'' asylum seekers. The organization cited the Judiciary Committee report to the House version of the bill that stated that ''[u]nder this system, there should be no danger that an alien with a genuine asylum claim will be returned to persecution'' and that ''the asylum officer should attempt to elicit all facts relevant to the applicant's claim.'' The organization included a statement from Senator Orrin Hatch noting that ''[t]he conference report struck a compromise'' and the standard adopted was ''intended to be a low screening standard for admission into the usual full asylum process.''

Finally, one organization stated that there is no ''sliding scale for legal standards based on the volume of cases,'' emphasizing that national security is irrelevant to the appropriate legal standard for credible fear. The organization claimed that raising the standard in order to ''better secure the homeland'' contradicts the clear meaning of the statute and is ''ultra vires.''

Response: Again, commenters appear to have confused the existing legal differences between and among asylum, statutory withholding of removal, and CAT protection, and the Department declines to adopt the commenters' positions to the extent they are based on inaccuracies or misstatements of law.

The rule does not change the ''significant possibility'' standard in credible fear interviews for asylum claims, which is set by statute. *See* INA

[18] Commenters raised concerns about analogizing the use of the ''reasonable possibility'' screening standard in 8 CFR 208.31 and 1208.31, which applies only to certain categories of aliens. However, the Departments referenced those regulations here and in the NPRM merely to show that the ''reasonable possibility'' standard has long existed in other contexts. *See, e.g.,* 85 FR at 36270.

235(b)(1)(B)(v), 8 U.S.C. 1225(b)(1)(B)(v). As a result, asylum claims will continue to be processed under the ''significant possibility'' standard in credible fear interviews. Instead, the rule only changes the standard to a ''reasonable possibility'' for statutory withholding of removal and CAT protection claims. Congress did not address the standards for these claims in credible fear interviews and instead explicitly focused on asylum claims. *See generally* INA 235(b), 8 U.S.C. 1225(b)(1)(B) (describing asylum interviews). Therefore, the Departments are within their authority to change these standards, as the use of a ''reasonable possibility'' standard does not contradict the ''significant possibility'' language in the statute, which only applies to asylum claims. *See generally* INA 103(a)(1), 8 U.S.C. 1103(a)(1) (''The Secretary of Homeland Security shall be charged with the administration and enforcement of this chapter and all other laws relating to the immigration and naturalization of aliens . . . .''); INA 103(g)(2), 8 U.S.C. 1103(g)(2) (''The Attorney General shall establish such regulations . . . as the Attorney General determines to be necessary for carrying out this section.'').

Moreover, in response to commenters' concerns about the ''significant possibility'' asylum standard in credible fear proceedings, the Departments note that this change does not raise the standard; instead, it merely codifies existing policy and practice in order to provide greater clarity and transparency to adjudicators and affected parties. USCIS already uses the ''significant possibility'' definition in screening whether an asylum-seeker has established a credible fear of persecution. *See* Memorandum from John Lafferty, Chief, Asylum Div., U.S. Citizenship and Immigration Servs., Release of Updated Asylum Division Officer Training Course (ADOTC) Lesson Plan, Credible Fear of Persecution and Torture Determinations 2 (Feb. 28, 2014).

This definition is also consistent with Congress's intent to create ''a low screening standard for admission into the usual full asylum process,'' 142 Cong. Rec. S11491 (daily ed. Sept. 27, 1996) (statement of Senate Judiciary Committee Chairman Orrin Hatch), and with the statutory text. *See* INA 235(b)(1)(B)(v), 8 U.S.C. 1225(b)(1)(B)(v). For example, the ''significant possibility'' standard does not require a showing that it is more likely than not that the applicant can meet their asylum burden in immigration court. Instead, the standard merely requires the applicant establish ''a substantial and realistic possibility of succeeding'' on their asylum claim, which in turn requires a showing of as little as a 10 percent chance of persecution on account of a protected ground. *See I.N.S.* v. *Cardoza-Fonseca,* 480 U.S. 421, 431–32 (1987). This additional language will help adjudicators and affected parties to ensure that the proper screening standard is used in the credible fear process.

2.5. Proposed Amendments to the Credible Fear Screening Process

Comment: One organization claimed that the rule would essentially combine the credible fear interview with the merits hearing and require an asylum officer to do both simultaneously. The organization contended that this would leave applicants who turn themselves in to CBP with no time to prepare and ''essentially no chance of success.'' The organization emphasized that individuals arriving at the border are often ''exhausted, stressed out, or ill,'' noting the high probability that an individual will be physically, emotionally, or mentally unfit for an interview that ''may determine whether he and his family lives or dies.'' The organization claimed this situation has been aggravated by the COVID–19 pandemic.

One organization stated that some individuals fleeing persecution and torture ''bypass CBP'' because they lack knowledge about asylum or believe they will be treated unfairly. The organization noted that some of these individuals prepare asylum applications on their own (either prior or subsequent to apprehension by ICE) and emphasized that these cases, which fall ''outside the established procedures,'' are far more difficult to regulate. The organization contended that, if the credible fear and merits interviews are combined, poor asylum or CAT protection seekers will be incentivized to evade CBP in order to try and obtain help preparing an application. The organization emphasized that if the Departments replace the existing procedure with one that is ''essentially impossible for many deserving people to use,'' their jobs will become more difficult and their efforts less efficient.

One organization expressed concern regarding the specific language in proposed 8 CFR 208.30(d)(1), claiming that it ''does not pass either simple humanity or due process.'' The organization conceded that the language of existing 8 CFR 208.30(d)(1) is identical, but claimed this ''does not excuse the proposed provision.'' Instead, the organization claimed the language should read as follows: ''[i]f the [asylum] officer conducting the interview determines that the alien is unable to participate effectively in the interview because of illness, fatigue, or other impediments, the officer *shall* reschedule the interview.''

One organization also emphasized that the rule would require asylum officers to consider bars to asylum, including the internal relocation bar,[19] during initial fear screenings. The organization alleged that the rule seems to build off the ''Asylum and Internal Relocation Guidance'' issued by USCIS, which the organization claimed was posted last summer ''without going through an NPRM.'' Another organization claimed that this portion of the rule is ''contrary to law and existing practice,'' noting that section 235(b) of the Act, 8 U.S.C. 1225(b), requires asylum officers to determine whether there is a ''significant possibility'' that an applicant could establish eligibility for asylum in some future proceeding. One organization emphasized that most credible fear applicants are unrepresented and have difficulty understanding the complex internal relocation analysis, noting that asylum seekers would likely need to include detailed country conditions materials in support of their claims. In addition, the organization claimed that adding ''an additional research burden'' on asylum officers would be inefficient.

One organization noted that the rule would require asylum officers to determine whether an applicant is subject to one of the mandatory bars under section 208(a)(2)(B)–(D) of the Act, 8 U.S.C. 1158(a)(2)(B)–(D), and, if so, whether the bar at issue is also a bar to statutory withholding of removal and withholding of removal under CAT. The organization emphasized that each of the mandatory bars involves intensive legal analysis and claimed that requiring asylum officers to conduct this analysis during a screening interview would result in ''the return of many asylum seekers to harm's way.''

Another organization claimed this portion of the rule is ''unworkable,'' noting that the mandatory bars are heavily litigated and often apply differently from circuit to circuit. The organization alleged that the new

[19] The Departments note that the possibility of internal relocation is not a mandatory bar to asylum. Rather, it is part of the underlying asylum eligibility determination and could rebut a presumption of a well-founded fear after a finding of past persecution, or be a reason to find that the applicant does not have a well-founded fear of persecution. As it is still a consideration during the credible fear screening, the Departments address the comment in the response below.

credible-fear analysis would require asylum officers to exceed their statutory authority and would violate due process by mandating fact-finding in a procedure that does not provide applicants with notice or the opportunity to respond with evidence. One organization claimed that ''countless asylum-seekers could be erroneously knocked out of the process based on hasty decisions, misunderstandings, and limited information,'' noting that the existing rule ''errs in favor of review.''

The organization also expressed concern that the rule would require asylum officers to treat an individual's silence as a reason to deny an immigration judge's review of a negative credible fear interview. The organization emphasized that many asylum seekers do not understand what is happening when they receive a negative credible fear determination from an asylum officer and do not know what it means to seek review by an immigration judge; as a result, many asylum seekers ''will simply not answer the question.'' The organization noted that many of these individuals are still ''tired and traumatized'' from their journey, and some have been separated from their families.

The organization noted that, historically, asylum officers have been required to request immigration judge review on behalf of individuals who remain silent; however, the organization alleged that the rule would ''reverse existing policy'' and require officers to indicate that unresponsive individuals do not want review. The organization noted that the NPRM does not include data on how many asylum seekers succeed in their credible fear claims before an immigration judge without specifically making a request to an asylum officer; nor does the rule contain data on how many immigration judge reviews are ''expeditiously'' resolved after the judge explains the asylum seeker's rights and the individual chooses not to pursue review. The organization claimed that its concerns are enhanced by the decision to allow CBP officers, rather than fully trained USCIS asylum officers, to conduct credible fear interviews. One organization emphasized that it is unreasonable to assume that asylum seekers who decline to expressly request further review are declining review by an independent agency. The organization stated that ''[a]bsent a clear waiver of the opportunity for review by an independent agency, it is reasonable to assume that asylum seekers arriving at our borders wish to pursue all available avenues of relief.''

One organization noted a statement from Senator Patrick Leahy, which introduced a newspaper article that expressed concern that an unenacted early version of IIRIRA ''gives virtually final authority to immigration officers at 300 ports of entry to this country.'' 142 Cong. Rec. S4461 (daily ed. May 1, 1996) (statement of Senator Patrick Leahy). The organization also alleged that ''[g]iving one agency unfettered power to decide whether an asylum seeker ever has a day in court goes against the intent of Congress.''

Response: In general, most of the commenters' concerns are speculative and fail to account for the fact-specific and case-by-case nature of the interviews and reviews in question. Moreover, their concerns tacitly question the competence, integrity, and professionalism of the adjudicators conducting interviews and reviews—professionals who are well-trained and experienced in applying the relevant law in the context of these screenings and reviews.

The suggestion that aliens genuinely seeking refuge regularly evade officials of the very government from whom they seek refuge is unsupported by evidence. Nothing in the rule restricts or prohibits any organization from providing assistance to any alien; instead, the rule's focus is on assisting adjudicators with clearer guidance and more efficient processes.

Additionally, many of the commenters failed to acknowledge the multiple layers of review inherent in the screening process, which reduces the likelihood of any errors related to consideration of the facts of the claim or application of relevant law. *See Thuraissigiam,* 140 S.Ct. at 1965–66 (''An alien subject to expedited removal thus has an opportunity at three levels to obtain an asylum hearing, and the applicant will obtain one unless the asylum officer, a supervisor, and an immigration judge all find that the applicant has not asserted a credible fear.''). To the extent that commenters mischaracterized the rule, provided comments that are speculative or unfounded, suggested that the Departments should not follow the law, or ignored relevant procedural protections that already address their concerns, the Departments decline to adopt such comments.

The Departments disagree that this rule combines the credible fear interview with a full hearing on an asylum application, or that the credible fear interview represents the ''final'' adjudication of an asylum application. This rule maintains the same ''significant possibility'' standard for asylum officers in conducting a credible fear interview with respect to screening the alien for eligibility for asylum, and any alien who is found to have a credible fear is referred to an immigration judge for asylum-and-withholding-only proceedings for consideration of the relief application. *See* 8 CFR 208.30(g). This rule does not change the fundamental structure of the credible fear process. Instead, during the credible fear interview, the rule additionally requires the asylum officer to consider internal relocation and relevant asylum bars as part of his or her determination, and separately to treat the alien's failure to request a review of a negative fear determination as declining the request.

Regarding commenters' concerns about unrepresented aliens having difficulty with the internal relocation analysis in the credible fear process, the Departments note that aliens are able to consult with a person of their choosing prior to their credible fear interview and have that person present during the interview. *See* 8 CFR 208.30(d)(4). Considering internal relocation in the credible fear screening context is consistent with existing policy and practice. *See* 85 FR 36272. Moreover, there is no reason to believe that an alien, in the course of providing testimony regarding the facts of his or her claim, cannot also provide testimony about his or her ability to internally relocate; in fact, in many cases, an alien's relocation is already part of the narrative provided in support of the alien's overall claim. In addition, the Departments disagree that requiring asylum officers to consider internal relocation is inefficient. To the contrary, as current practice requires such issues to be adjudicated in section 240 removal proceedings, screening out cases subject to internal relocation before requiring a lengthier proceeding before an immigration judge is inherently more efficient. It also has a further salutary effect of increasing the ability of adjudicators to address meritorious claims in a more timely manner. Lastly, contrary to commenters' assertions, this rule is unrelated to USCIS guidance on internal relocation, and any issues relating to such guidance are outside the scope of this rule.

Regarding commenters' concerns about requiring asylum officers to determine whether certain asylum bars apply during the credible fear interview, the Departments note that asylum officers are well trained in asylum law and are more than capable of determining whether long-standing statutory bars apply, especially in the credible fear screening context. INA

235(b)(1)(E), 8 U.S.C. 1235(b)(1)(E) (defining an asylum officer as one who ''has had professional training in country conditions, asylum law, and interview techniques comparable to that provided to full-time adjudicators of applications under [INA 208, 8 U.S.C. 1158], and . . . is supervised by an officer who [has had similar training] and has had substantial experience adjudicating asylum applications.''); *see generally* 8 CFR 208.1(b) (covering training of asylum officers).

Moreover, the statute requires asylum officers to determine whether ''the alien could establish eligibility for asylum under section 1158 of this title,'' which would by extension include the application of the bars listed in section 1158 that are a part of this rule. *See* INA 235(b)(1)(B)(v), 8 U.S.C. 1225(b)(1)(B)(v). Further, asylum officers already assess whether certain bars may apply to applications in the credible fear context—they simply do not apply them under current regulations. *See* Government Accountability Office, *Actions Needed to Strengthen USCIS's Oversight and Data Quality of Credible and Reasonable Fear Screenings* at 10 (Feb. 2020), *https://www.gao.gov/assets/710/704732.pdf* (''In screening noncitizens for credible or reasonable fear . . . . [a] USCIS asylum officer is to determine if the individual has any bars to asylum or withholding of removal that will be pertinent if the individual is referred to immigration court for full removal proceedings.''); U.S. Citizenship and Immigr. Serv., *Lesson Plan on Credible Fear of Persecution and Torture Determinations* at 31 (2019), *https://fingfx.thomsonreuters.com/gfx/mkt/11/10239/10146/2019%20training%20document%20for%20asylum%20screenings.pdf* (''Even though the bars to asylum do not apply to the credible fear determination, the interviewing officer must elicit and make note of all information relevant to whether a bar to asylum or withholding applies or not.''). Lastly, responding to commenters' concerns that such determinations would be ''final,'' this rule does not change the existing process allowing for an immigration judge to review any negative fear determination, which would include any bar-related negative fear determination. 8 CFR 208.30(g); *see also Thuraissigiam,* 140 S.Ct. at 1965–66 (''An alien subject to expedited removal . . . has an opportunity at three levels to obtain an asylum hearing, and the applicant will obtain one unless the asylum officer, a supervisor, and an immigration judge all find that the applicant has not asserted a credible fear.'').

Regarding commenters' concerns that aliens do not understand the credible fear process and, therefore, will refuse to indicate whether they want an immigration judge to review their negative fear finding, the Departments first note that if an alien requests asylum or expresses a fear of return, the alien is given an M–444 notice, Information about Credible Fear Interview, which explains the credible fear process and the right to an attorney at no cost to the U.S. Government. It would be unusual for an alien who has already undergone an interview, relayed a claim of fear, answered questions from an asylum officer about his or her claim, and continued to maintain that he or she has a genuine fear of being returned to his or her country of nationality to then—at the next step—be unaware of the nature of the process when asked whether he or she wishes to have someone else review the claim. The Departments further note that regulations require the asylum officer to ask aliens whether they wish to have an immigration judge review the negative credible fear decision. *See* 8 CFR 208.30(g) (requiring the asylum officer to ''provide the alien with a written notice of decision and inquire whether the alien wishes to have an immigration judge review the negative decision, using Form I–869''). And the relevant form states, ''You may request that an Immigration Judge review this decision.'' *See* Form I–869, Record of Negative Credible Fear Finding and Request for Review by Immigration Judge.

These procedures provide explicit informational protections to individuals in the credible fear process, and treating refusals as affirmative requests only serves to create unnecessary and undue burdens on the immigration courts. Although the Departments do not maintain data on how many individuals refuse to request immigration judge review of a negative fear finding, the Departments believe it is reasonable to require an individual to answer affirmatively when being asked by an asylum officer if the individual wishes to have their negative fear finding reviewed.

In response to a commenter's concern about 8 CFR 208.30(d)(1), which allows an asylum officer to reschedule a credible fear interview under certain circumstances, the Departments note that this rule does not change any language in that subparagraph and, therefore, any comments regarding that subparagraph are outside the scope of this rule.

3. Form I–589, Application for Asylum and for Withholding of Removal, Filing Requirements

3.1. Frivolous Applications

3.1.1. Allowing Asylum Officers To Make Frivolousness Findings

Comment: Commenters expressed a range of concerns regarding the proposed changes to allow DHS asylum officers to make frivolousness findings and deny applications or refer applications to an immigration judge on that basis. 85 FR at 36274–75.

Commenters expressed concerns about asylum officers' training and qualifications to make frivolousness findings. For example, at least one commenter noted that these DHS officers are not required to earn law degrees. Another organization disagreed with the NPRM's assertion that asylum officers are qualified to make frivolousness determinations because of their current experience making credibility determinations, emphasizing that ''credibility and frivolous determinations differ significantly.'' At least one organization noted that the applicant has the burden of proof in a credibility determination while the government bears the burden of proof in a frivolousness determination.

At least one organization emphasized that this authority is currently only vested in immigration judges and the BIA, and commenters expressed concern that allowing asylum officers to make frivolousness findings improperly changes the role of asylum officers in the asylum system. For example, one organization claimed that allowing asylum officers to make frivolousness determinations ''improperly changes their role from considering humanitarian relief, to being an enforcement agent.'' Commenters noted a law professor's statement that ''allowing asylum officers to deny applications conflicts with a mandate that those asylum screenings not be adversarial.'' Suzanne Monyak, *Planned Asylum Overhaul Threatens Migrants' Due Process,* LAW 360 (June 12, 2020), *https://www.law360.com/access-to-justice/articles/1282494/planned-asylum-overhaul-threatens-migrants-due-process* (quoting Professor Lenni B. Benson).

Commenters suggested that the rule would not require USCIS to allow asylum applicants to address inconsistencies in their claims, alleging that individuals appearing in non-adversarial proceedings before a DHS officer would not be granted important procedural protections. One organization cited both the U.S. Court of

Appeals for the Second Circuit and the BIA to support its claim that a comprehensive opportunity to be heard makes sense in the frivolousness context, noting that immigration enforcement is not limited to initiating and conducting prompt proceedings that lead to removals at any cost. *Liu* v. *U.S. Dep't of Justice.,* 455 F.3d 106, 114 n.3 (2d Cir. 2006); *Matter of S–M–J–,* 21 I&N Dec. 722, 727, 743 (BIA 1997).

One organization stated that, although immigration judges would have de novo review of findings by asylum officers, an adverse finding is ''always part of the DHS toolbox'' in immigration court and is considered by immigration judges.

Response: As stated in the proposed rule, the Departments find that allowing asylum officers to make frivolousness findings in the manner set out in the proposed rule and adopted as final in this rule will provide many benefits to the asylum process, including ''strengthen[ing] USCIS's ability to root out frivolous applications more efficiently, deter[ing] frivolous filings, and ultimately reduc[][ing] the number of frivolous applications in the asylum system.'' 85 FR at 36275.

The Departments disagree with commenters' allegations that asylum officers are not qualified or trained to make frivolousness findings. Instead, all asylum officers receive significant specialized ''training in international human rights law, nonadversarial interview techniques, and other relevant national and international refugee laws and principles'' and also receive ''information concerning the persecution of persons in other countries on account of race, religion, nationality, membership in a particular social group, or political opinion, torture of persons in other countries, and other information relevant to asylum determinations.'' 8 CFR 208.1(b). Moreover, there is no doubt that asylum officers are qualified to make significant determinations regarding asylum claims, including the most important determination—an adjudication on the merits regarding whether or not an alien has demonstrated eligibility for asylum. *See, e.g.,* 8 CFR 208.14(c) (''If the asylum officer does not grant asylum to an applicant after an interview . . . the asylum officer shall deny, refer, or dismiss the application . . . .''). Given asylum officers' authority and qualifications to make determinations on the underlying merits of asylum applications, the Departments find that they are clearly qualified to make subsidiary determinations such as frivolousness findings.[20]

Commenters are incorrect that the Departments analogized credibility determinations to frivolousness findings. *See* 85 FR at 36275. Instead, the Departments discussed asylum officers' credibility findings as background regarding the mechanisms currently used by asylum officers to approach questions similar to those involving frivolousness. *Id.* Nevertheless, the Departments disagree with commenters' implication that asylum officers should not be permitted to make frivolousness findings because the government bears the burden of proof. Not only does the statute not assign a burden of proof to the Departments regarding frivolousness findings, INA 208(d)(6), 8 U.S.C. 1158(d)(6), but for those not in lawful status, asylum officers' frivolousness findings are subject to de novo review by an immigration judge, and must simply be sufficiently supported.

Commenters are further incorrect that allowing asylum officers to make frivolousness findings improperly converts the USCIS affirmative application process from non-adversarial to adversarial. The purpose of the non-adversarial interview is to ''elicit all relevant and useful information bearing on the applicant's *eligibility for asylum*.'' 8 CFR 208.9(b) (emphasis added). There is nothing inherently contradictory—or adversarial—in eliciting all relevant and useful information regarding an applicant's eligibility for asylum and then determining, based on that information, that the applicant is ineligible for asylum because the applicant knowingly filed a frivolous application. Moreover, a nonadversarial process does not mean that the asylum officer simply has to accept all claims made by an alien as true; if that were the case, an asylum officer could never refer an application based on an adverse credibility determination. Further, equating the nonadversarial asylum interview process with a prohibition on finding an application to be frivolous is in tension with statutory provisions allowing adjudicators of asylum applications to consider, inter alia, ''candor'' and ''falsehoods'' in assessing an applicant's credibility. INA 208(b)(1)(B)(iii), 8 U.S.C. 1158(b)(1)(B)(iii).

In short, the Departments find that allowing asylum officers to make frivolousness findings does not conflict with the requirement that asylum officers conduct asylum interviews ''in a nonadversarial manner.'' 8 CFR 208.9(b). Instead, asylum officers will consider questions of frivolousness in the same manner that they consider other questions of the applicant's eligibility for asylum, such as whether the applicant has suffered past persecution or whether the applicant fears harm on account of a protected ground. Just as interview questions about these eligibility factors are appropriate topics for asylum officers in the current interview process, questions and consideration of frivolousness are similarly appropriate.

Regarding commenters' concerns about procedural protections for aliens who appear before an asylum officer for an interview, the Departments emphasize that both the proposed rule and this final rule prohibit a frivolousness finding unless the alien has been provided the notice required by section 208(d)(4)(A) of the Act, 8 U.S.C. 1158(d)(4)(A) of the consequences under section 208(d)(6) of the Act, 8 U.S.C. 1158(d)(6), of filing a frivolous asylum application. *See* 8 CFR 208.20(d), 1208.20(d). This requirement complies with the Act, which does not require any further warning or colloquy in advance of a frivolousness finding. Accordingly, while commenters are correct that the rule does not require USCIS to allow asylum applicants to address inconsistencies prior to a frivolousness finding or follow any other delineated procedures, the Departments reiterate that, as stated in the proposed rule, the procedural requirements provided by the rule for a frivolousness finding comply with the Act's requirements. 85 FR at 36276–77.

Further, the Departments emphasize that, for aliens who lack legal status and who are referred to an immigration judge because the asylum officer did not grant asylum to the alien, *see* 8 CFR 208.14(c)(1), USCIS asylum officers' frivolousness findings are not given effect and are subject to an immigration judge's de novo review. 8 CFR 208.20(b). Accordingly, for most, if not all, aliens who may be subject to a frivolousness finding by an asylum officer, this further review is effectively the procedural protection called for by commenters, as the alien will be on

[20] Although not strictly applicable to asylum officers who adjudicate asylum applications under section 208 of the Act, the Departments note that the definition of an asylum officer in other contexts as one who ''has had professional training in country conditions, asylum law, and interview techniques comparable to that provided to full-time adjudicators of applications'' under section 208 and is supervised by someone who has had ''substantial experience'' adjudication asylum applications further supports the determination that asylum officers are well-qualified to make frivolousness determinations. INA 235(b)(1)(E) (8 U.S.C. 1225(b)(1)(E)).

notice regarding the possible frivolousness finding and should be prepared to and expect to explain the issues surrounding it.

The Departments agree with commenters that DHS trial attorneys in immigration court may provide arguments regarding frivolousness in any appropriate case. However, as also stated in the proposed rule, the possibility of frivolousness findings in immigration court alone has been insufficient to deter frivolous filings consistent with the congressional intent behind section 208(d)(6) of the Act, 8 U.S.C. 1158(d)(6). 85 FR at 36275. Allowing asylum officers to also consider and make determinations regarding whether an affirmative asylum applicant's application is frivolous provides efficiencies not available from consideration of questions of frivolousness by an immigration judge alone, including providing immigration judges with a more robust and developed written record regarding frivolousness. *Id.*

Finally, to the extent that commenters suggested the proposed changes should not be implemented because they would make it easier to detect asylum fraud and would harm aliens who submit fraudulent asylum applications, the Departments do not find such suggestions compelling enough to warrant deleting such changes. *See Angov* v. *Lynch,* 788 F.3d 893, 901, 902 (9th Cir. 2015) (noting ''an unfortunate reality that makes immigration cases so different from all other American adjudications: Fraud, forgery and fabrication are so common—and so difficult to prove—that they are routinely tolerated''). Cases involving asylum fraud are ''distressingly common,'' *id.* at 902, and the Departments are committed to ensuring the integrity of immigration proceedings by using all available statutory tools to root out such fraud.

3.1.2. Changes to the Definition of ''Frivolous''

Comment: Commenters expressed a range of concerns with the rule's changes to the definition of ''frivolous'' and the expanded scope of applications that could qualify as such. One commenter claimed the rule would make it easier for immigration judges and asylum officers to ''throw out'' asylum requests as frivolous.

At least one commenter noted that, prior to the enactment of section 208(d)(6) of the Act 8 U.S.C. 1158(d)(6), a frivolous asylum application was defined in the employment context as ''manifestly unfounded or abusive'' and ''patently without substance.'' 85 FR at 36274. The commenter concluded that lowering this standard is ''ultra vires and an abuse of discretion.''

Commenters noted that, to be considered frivolous, an application must have been ''knowingly made,'' and the individual must have been given notice at the time of filing pursuant to section 208(d)(4)(A) of the Act 8 U.S.C. 1158(d)(4)(A). Commenters expressed concern that the NPRM seeks to redefine the term ''knowingly'' to include ''willful blindness'' toward frivolousness. At least one organization expressed concern that the NPRM relies on *Global-Tech Appliances, Inc.* v. *SEB S.A.,* 563 U.S. 754, 769 (2011) to support its definition for ''knowingly,'' emphasizing that this case ''involved sophisticated litigants represented by attorneys familiar with the intricacies of American patent law'' and contending that it would be inappropriate to hold asylum seekers to this standard. Commenters stated that the NPRM does not adequately explain how ''willful blindness'' differs from recklessness or negligence.

At least one organization expressed concern that the rule removes the requirements that (1) a fabrication be deliberate; and (2) the deliberate fabrication be related to a material element of the case. The organization claimed the rule suggests that asylum seekers who are unaware that an ''essential element'' is fabricated would be permanently barred from immigration benefits. The organization noted that the NPRM does not define ''essential'' but instead focuses on ''fabricated material evidence,'' emphasizing that, given the variance of standards, courts have held that ''fabrication of material evidence does not necessarily constitute fabrication of a material element,'' quoting *Khadka* v. *Holder,* 618 F.3d 996, 1004 (9th Cir. 2010).

Another organization stated that while ''[f]alse and fabricated evidence is inappropriate,'' poor language skills and faulty memory can ''produce honest mistakes that look like falsification,'' emphasizing that the rule's definition of ''frivolous'' provides the Departments with ''numerous opportunities to pressure applicants.''

Commenters expressed particular concerns with the rule's changes so that an application that lacks merit or is foreclosed by existing law could result in a frivolousness finding, particularly because case law involving asylum is constantly changing. For example, at least one organization contended that the rule contradicts existing regulations regarding a representative's duty to advocate for his or her client, emphasizing that representatives are allowed to put forth ''a good faith argument for the extension, modification, or reversal of existing law or the establishment of new law.'' *See* 8 CFR 1003.102(j)(1). Similarly, commenters alleged that the imposition of a permanent bar on applicants who raise claims challenging existing law ''deters representatives from putting forth nuanced arguments,'' contending that a representative's ethical duty to make every argument on a client's behalf could potentially subject the client to the permanent bar. In addition, commenters argued that the ability of attorneys to make good faith arguments has been ''crucial to modifying and expanding the law,'' emphasizing that good faith arguments by representatives allow asylum seekers to pursue ''a claim to the full extent of the law.'' One organization stated that, by imposing penalties on individuals who make good faith attempts to seek protection ''in light of contrary law based on different jurisdictions,'' the rule ''undoes years of jurisprudence in this field.''

Commenters also emphasized that the rule would expand when the penalties for a frivolous filing may attach and would require individuals who wish to challenge a denial of asylum in Federal court to risk a finding that would bar any future immigration relief. One commenter alleged that, should an immigration judge find an application to be frivolous under the rule, the applicant would be ineligible for all forms of immigration relief simply for ''making a weak asylum claim.'' One organization expressed concern that, as a result, asylum seekers would not seek relief for fear of losing their case and being accused of submitting a frivolous application. One organization claimed that the rule's frivolousness procedure is designed to ''instill fear in applicants to keep them from applying.'' Another organization emphasized that expediency is ''inappropriate'' in the context of a determination that would ''subject the applicant to one of the harshest penalties in immigration law.'' Commenters otherwise emphasized the seriousness for applicants of frivolousness findings.

At least one organization called the rule ''exceptionally unfair,'' emphasizing that many asylum seekers are unrepresented and do not speak English, making it difficult for them to understand the complexities of ''the ever-evolving law.'' The organization noted that many asylum seekers fall prey to unscrupulous attorneys or notarios who file asylum applications for improper purposes, arguing that it is

entirely unfair to penalize applicants in these types of situations.

Finally, at least one organization claimed that the rule would increase the workload of immigration judges, as they would be forced to determine whether the legal arguments presented sought to ''extend, modify, or reverse the law'' or were merely foreclosed by existing law. The organization argued that, because of the burdens already placed on immigration judges, this expectation is unrealistic and ''adds another layer to the litigation of referred asylum cases'' in immigration court.

Response: In general, commenters on this point either mischaracterized or misstated the proposed rule or relied solely on a hypothetical and speculative ''parade of horribles'' that ignores the actual text and basis of the rule. Contrary to commenters' concerns, the Departments do not believe that the proposed rule allows immigration judges or asylum officers to treat legitimate asylum requests as frivolous. Instead, the rule establishes four limited grounds for a frivolousness finding: Applications that (1) contain a fabricated essential element; (2) are premised on false or fabricated evidence unless the application would have been granted absent such evidence; (3) are filed without regard to the merits of the claim; or (4) are clearly foreclosed by applicable law. 8 CFR 208.20(c)(1)–(4), 1208.20(c)(1)–(4). In addition, the rule provides that an alien ''knowingly files a frivolous asylum application if . . . [t]he alien filed the application with either actual knowledge, or willful blindness, of the fact that the application'' was one of those four types. 8 CFR 208.20(a)(2), 1208.20(a)(2).

These changes are not ultra vires or an abuse of discretion. The Departments emphasize that the regulations interpret and apply the INA itself, the relevant provisions of which postdate the regulation defining frivolous as ''manifestly unfounded or abusive.'' In addition, the INA does not define the term ''frivolous,'' *see* INA 208(d)(6), 8 U.S.C. 1158(d)(6), and the Departments possess the authority to interpret such undefined terms. *See* INA 103(a)(3), (g)(2), 8 U.S.C. 1103(a)(3), (g)(2); *see also Chevron,* 467 U.S. at 866 (''When a challenge to an agency construction of a statutory provision, fairly conceptualized, really centers on the wisdom of the agency's policy, rather than whether it is a reasonable choice within a gap left open by Congress, the challenge must fail.''). The Departments believe that the prior regulatory definition artificially limited the applicability of the frivolous asylum bar because it did not fully address the different types of frivolousness, such as abusive filings, filings for an improper purpose, or patently unfounded filings.

Regarding the inclusion of willful blindness in determining what applications will be considered knowingly frivolous, the Departments reiterate that the inclusion of a willful blindness standard as part of a ''knowing'' action is consistent with long-standing legal doctrine:

> The doctrine of willful blindness is well established in criminal law. Many criminal statutes require proof that a defendant acted knowingly or willfully, and courts applying the doctrine of willful blindness hold that defendants cannot escape the reach of these statutes by deliberately shielding themselves from clear evidence of critical facts that are strongly suggested by the circumstances. The traditional rationale for this doctrine is that defendants who behave in this manner are just as culpable as those who have actual knowledge. . . . It is also said that persons who know enough to blind themselves to direct proof of critical facts in effect have actual knowledge of those facts. . . .

Global-Tech Appliances, Inc., 563 U.S. at 766 (internal citations omitted);[21] *see also, e.g., United States* v. *Caraballo-Rodriguez,* 726 F.3d 418 (3d Cir. 2013) (noting that ''knowledge'' can be demonstrated by actual knowledge or willful blindness.); *United States* v. *Perez-Melendez,* 599 F.3d 31, 41 (1st Cir. 2010) (''Willful blindness serves as an alternate theory on which the government may prove knowledge.'').

The doctrine of willful blindness applies in many civil proceedings as well. *See Global-Tech Appliances,* 563 U.S. at 768 (''Given the long history of willful blindness and its wide acceptance in the Federal Judiciary, we can see no reason why the doctrine should not apply in civil lawsuits for induced patent infringement under 35 U.S.C. 271(b).''). Given this background, if Congress did not wish to allow for willfully blind actions to satisfy the ''knowing'' requirement of section 208(d)(6) of the Act, 8 U.S.C. 1158(d)(6), Congress could have expressly provided a definition of ''knowingly'' in the Act. *Cf. Perrin* v. *United States,* 444 U.S. 37, 42 (1979) (''A fundamental canon of statutory construction is that, unless otherwise defined, words will be interpreted as taking their ordinary, contemporary, common meaning.'') (citations omitted). Due to Congress's silence, however, the Departments find that the inclusion of willful blindness, as it is generally interpreted, is a reasonable interpretation that better aligns the regulations with congressional intent to limit and deter frivolous applications.

Regarding the four grounds for finding an asylum application frivolous at 8 CFR 208.20(c) and 1208.20(c), the Departments emphasize that an application will not be found to be frivolous unless the alien knew, or was willfully blind to the fact, that the application met one of the four grounds. Accordingly, commenters are incorrect that an alien who does not know that an essential element is fabricated will be at risk of an immigration judge finding that his or her application is frivolous. Similarly, an alien who submits a claim that is clearly foreclosed by the applicable law but who, as noted by commenters, does not know that the claim is so clearly foreclosed, would not have his or her claim found frivolous on that basis.[22]

The Departments disagree that the rule will enable the Departments to ''pressure'' applicants who make mistakes of fact in the context of their application. Two of the bases related to fabricated elements or evidence, neither of which can be characterized appropriately as a mistake of fact. The other two bases go to the merits of the case or to applicable law, and neither of those turn on a mistake of fact.

One commenter expressed concern about the NPRM's proposed change, in the context of the definition of frivolous, from a fabricated ''material'' element to a fabricated ''essential'' element. The existing regulatory text provides that ''an asylum application is frivolous if any of its material elements is deliberately fabricated''; under the NPRM, an application that contained a fabricated ''essential element'' might have been found frivolous. The Departments acknowledge that the NPRM indicated that it was maintaining the prior definition of ''frivolous,'' which was premised on a fabricated ''material'' element, 85 FR at 36275, but then used the word ''essential'' in lieu of ''material'' in the proposed regulatory text itself. Although the Departments do not perceive a relevant difference between the two phrasings, they are reverting to the use of ''material'' in this context in the final rule to avoid any confusion.

[21] The Departments disagree with commenters' concerns that *Global-Tech* is an inappropriate case to cite given the complexity of the underlying dispute. Instead, this case provides a clear and concise summary of the willful blindness standard, which is separate and apart from the underlying facts or adjudication.

[22] As 85 percent of asylum applicants in immigration proceedings have representation, the likelihood of an alien alone knowingly making an argument that is foreclosed by law is relatively low as both a factual and legal matter. *See* EOIR, *Current Representation Rates* (Oct. 13, 2020), *https://www.justice.gov/eoir/page/file/1062991/download.*

Finally, commenters were particularly concerned about the frivolousness grounds covering claims that lack merit or are foreclosed by existing law. However, commenters' concerns are not based on the actual rule. As explained in the NPRM, an unsuccessful claim does not mean that the claim is frivolous. *See* 85 FR at 36273–77. For example, arguments to extend, modify, or reverse existing precedent are not a basis for a frivolousness finding under the ''clearly foreclosed by applicable law'' ground. 85 FR at 36276. Similarly, as discussed *supra,* both the relatively low numbers of pro se asylum applicants in immigration court proceedings and the requirement that a frivolous asylum application be ''knowingly'' filed will likely make frivolousness findings uncommon for pro se aliens under the ''clearly foreclosed by applicable law'' ground. Moreover, the proposed definition is fully consistent with the long-standing definition of ''frivolous'' behavior as applied in the context of practitioner discipline. *See* 8 CFR 1003.102(j)(1) (''A practitioner engages in frivolous behavior when he or she knows or reasonably should have known that his or her actions lack an arguable basis in law or in fact, or are taken for an improper purpose, such as to harass or to cause unnecessary delay.''). In other words, the bases for finding an asylum application frivolous do not limit ethical attorneys' conduct in the manner described by commenters.

As some commenters noted, however, some aliens may hire unscrupulous representatives or notarios who file applications for improper purposes. While the Departments are sympathetic to aliens who are victims of these unethical practices, the Departments note that, as described below in Section II.C.3.2 of this preamble, aliens must sign each asylum application attesting to the application's accuracy and acknowledging the consequences of filing a frivolous application; moreover, ''[t]he applicant's signature establishes a presumption that the applicant is aware of the contents of the application.'' 8 CFR 208.3(c)(2), 1208.3(c)(2). An alien may later file a motion to reopen premised on ineffective assistance of counsel [23] or pursue other subsequent avenues of redress against unscrupulous individuals, but the Departments find that an alien should not automatically be immune from the consequences of an asylum application he or she held out as accurate.[24] To offer such immunity would create moral hazard. It would encourage aliens not to read or familiarize themselves with the contents of their applications, thereby subverting both the efficiency and accuracy of asylum adjudications. Moreover, the requirement that a frivolous asylum application be ''knowingly'' filed also ensures that only genuinely culpable—or co-conspirator—aliens will face the full consequences associated with these unethical practices. *Cf. United States* v. *Phillips,* 731 F.3d 649, 656 (7th Cir. 2013) (''It is careless to sign a document without reading it, but it is a knowing adoption of its contents only if the signer is playing the ostrich game ('willful blindness'), that is, not reading it *because* of what she knows or suspects is in it.'').

The Departments disagree that the changes, including consideration of legal arguments regarding whether an asylum application was premised on a claim that was foreclosed by existing law, will increase the workload of immigration judges. As an initial point, immigration judges are already accustomed to both making frivolousness determinations and to assessing whether claims are foreclosed by applicable law; indeed, immigration judges are already required to apply precedent in asylum cases, even when a frivolousness finding is not at issue. Thus, the intersection of those two streams of decision making does not represent any additional adjudicatory burden. Further, the rule does not mandate that immigration judges make a determination in all cases, and many cases will not factually or legally lend themselves to a need to wrestle with close calls and complex determinations of whether an application was ''clearly foreclosed by applicable law'' due to the rest of the context of the application or the case. Finally, commenters also failed to consider that the direct inclusion of applications that are clearly foreclosed by applicable law as a possible basis for frivolousness findings may cause secondary efficiencies by disincentivizing the filing of meritless asylum applications in the first instance—applications that already take up significant immigration court resources.

3.1.3. Other Concerns With Regulations Regarding Frivolous Applications

Comment: Commenters expressed concern with the rule's changes to the procedural requirements that must be satisfied before an immigration judge may make a frivolousness finding. For example, commenters noted that the rule would allow immigration judges to make frivolousness findings without providing an applicant with additional opportunities to account for perceived issues with his or her claim. Similarly, an organization alleged that immigration judges would not have to provide an opportunity for applicants to meaningfully address the frivolousness indicators found by an asylum officer. Commenters stated that the rule conflicts with *Matter of Y–L–,* 24 I&N Dec. at 155, emphasizing that the NPRM only requires that applicants be provided notice of the consequences of filing a frivolous application. At least one organization claimed the rule, by not requiring immigration judges to first provide an opportunity to explain, assumes that ''applicants know what a judge would consider 'meritless' or implausible.'' The organization contested the NPRM's assertion that an asylum applicant ''already . . . knows whether the application is . . . meritless and is aware of the potential ramifications,'' claiming instead that applicants often lack a sophisticated knowledge of immigration law. *See* 85 FR at 36276.

Response: As stated in the proposed rule, the only procedural requirement Congress included in the Act for a frivolousness finding is the notice requirement at section 208(d)(4)(A) of the Act, 8 U.S.C. 1158(d)(4)(A). 85 FR at 36276. In addition, the asylum application itself provides notice that an application may be found frivolous and that a frivolousness finding results in significant consequences. *Id.* The law is clear on this point. *See, e.g., Niang* v. *Holder,* 762 F.3d 251, 254–55 (2d Cir. 2014) (''Because the written warning provided on the asylum application alone is adequate to satisfy the notice requirement under 8 U.S.C. 1158(d)(4)(A) and because Niang signed and filed his asylum application containing that warning, he received adequate notice warning him against filing a frivolous application.''). Thus, every alien who signs and files an asylum application has received the

[23] *See Matter of Lozada,* 19 I&N Dec. 637 (BIA 1988) (setting out requirements for motions to reopen due to ineffective assistance of counsel allegations).

[24] The Departments further note that purposefully filing meritless asylum applications, including for the purposes of causing DHS to initiate removal proceedings, violates the EOIR rules of professional conduct and constitutes behavior that may result in professional sanctions. *See In re Bracamonte,* No. D2016–0070 (July 1, 2020), *https://www.justice.gov/eoir/page/file/1292646/download* (entering into a settlement agreement with a practitioner who ''acknowledges that it was improper to file asylum applications without an indicated basis for asylum or an indication as to any asylum claim, to cancel or otherwise advise clients to fail to appear for asylum interviews, and to not demonstrate a clear intention to pursue an asylum claim, in order to cause DHS to issue a Notice to Appear to his clients'').

notice required by section 208(d)(4)(A) of the INA, 8 U.S.C. 1158(d)(4)(A).

Accordingly, commenters are correct that the rule's changes allow immigration judges to make frivolousness findings without the procedural requirements required by the current regulation and attendant case law. But the regulation and case law are not required by the Act, and have not been successful in preventing the filing of frivolous applications. To the extent commenters are correct that the rule conflicts with *Matter of Y–L–,* that decision is premised on the existing regulatory language that the Departments are revising. Thus, as the Departments noted in the proposed rule, this rule would overrule *Matter of Y–L–* and any other cases that rely on the same reasoning or now-revised regulatory language. 85 FR at 36277.

Comment: At least one organization expressed its belief that DHS could institute frivolousness procedures more directly related to DHS's adjudication of employment authorization requests (''EADs''). For example, the commenter noted that there is ''no explanation'' for why DHS cannot simply conduct a prima facie review of an I–589 filing prior to granting an EAD application or scheduling the I–589 interview. The organization claimed that, if the concern is the time and expense dedicated to ''clearly fraudulent'' applications, DHS could devise a policy to screen for indicators that the application itself lacks merit or supporting documentation. The organization contended that DHS does this with other benefit applications and is not prohibited from issuing Requests for Evidence or Notices of Intent to Deny to affirmative asylum applicants prior to an interview.

Response: Although the Departments appreciate this comment and DHS may evaluate it further as an additional avenue to protect the integrity of the asylum adjudication process, the Departments find that the changes set out in the proposed rule better align with congressional intent and are more efficient than a secondary process tied to the adjudication of EADS. Divorcing the question of frivolousness from the underlying adjudication of the application itself would potentially undermine Congress's clear direction that aliens face consequences for filing frivolous asylum applications. INA 208(d)(6), 8 U.S.C. 1158(d)(6). Moreover, asylum officers and immigration judges, the officials in the asylum system who are trained to review and adjudicate applications for asylum, are best positioned to make the sorts of determinations that the commenter suggests should instead be made by the DHS officials adjudicating EAD requests.

Comment: At least one organization alleged that the rule, ''perhaps recognizing its own harshness,'' claims to ''ameliorate the consequences'' by allowing applicants to withdraw their application(s) before the court with prejudice, accept a voluntary departure order, and leave the country within 30 days. The organization contended that, rather than ameliorating the consequences of a frivolous filing, these measures essentially replicate them in severity and permanence.

Response: Despite commenters' concerns, the Departments emphasize that this option to avoid the consequences of a frivolousness finding is a new addition to the regulations and provides applicants with a safe harbor not previously available. The Departments believe that the conditions are strict but reasonable and fair when compared with the alternative: The severe penalty for filing a frivolous application, as recognized by Congress at section 208(d)(6) of the Act, 8 U.S.C. 1158(d)(6). Further, the Departments disagree that the consequences of withdrawing an application are of the same severity as a frivolousness finding because an alien who withdraws an application will be able to leave the United States without a removal order and seek immigration benefits from abroad, while an alien who is found to have submitted a frivolous application is ''permanently ineligible for any benefits'' under the Act. INA 208(d)(6), 8 U.S.C. 1158(d)(6).

Comment: One organization emphasized that, although the NPRM claims that broadening the definition of frivolous would root out ''unfounded or otherwise abusive claims,'' the NPRM does not include any evidence of large numbers of pending frivolous applications.

Response: Congress laid out consequences for filing a frivolous asylum application at section 208(d)(6) of the Act, 8 U.S.C. 1158(d)(6), demonstrating the importance of the issue. There is no precise data threshold for a regulation that implements a clear statutory priority. Moreover, Federal courts have recognized both the extent of asylum fraud and the fact that the Government does not catch all of it. *Angov,* 788 F.3d at 902 (''Cases involving fraudulent asylum claims are distressingly common. . . . And for every case where the fraud is discovered or admitted, there are doubtless scores of others where the petitioner gets away with it because our government didn't have the resources to expose the lie.''). Indeed, as the Departments noted in the NPRM, the prior definition did not adequately capture the full spectrum of claims that would ordinarily be deemed frivolous, 85 FR at 36274, making statistics based on the prior definition either misleading or of minimal probative value.

The Departments note the record numbers of asylum applications filed in recent years, including 213,798 in Fiscal Year 2019, up from the then-previous record of 82,765 in Fiscal Year 2016. EOIR, *Total Asylum Applications* (Oct. 13, 2020), *https://www.justice.gov/eoir/page/file/1106366/download.* Given this significant increase in applications—which almost certainly means an increase in frivolous applications—and the corresponding increase in adjudications, the Departments believe it is important to ensure the regulations best reflect congressional intent and deter the submission of frivolous applications that delay the adjudication of meritorious cases.

Comment: Another organization expressed particular concern for children seeking asylum, noting that, although the TVPRA requires unaccompanied children's claims to be heard by asylum officers, the rule's expansion of a ''frivolous'' claim would result in the denial of meritorious claims for children who are unrepresented and ''unable to decipher complex immigration law.'' The organization contended that, because the rule would permit asylum officers who determine that a child's claim is ''frivolous'' to refer the case to immigration court without examining the merits of the claim, unaccompanied children ''would be forced into adversarial proceedings before an immigration judge in clear violation of the TVPRA and in a manner that would subject them to all of the harms attendant to adversarial hearings where there is no guarantee of representation.''

Similarly, at least one organization emphasized that the ''safety valve'' of allowing children to accept withdrawal conditions to avoid the consequences of a frivolousness finding is illusory, and may pressure children to waive valuable rights.

Response: Again, the Departments note that these concerns generally are not rooted in any substantive evidence and either mischaracterize or misstate the proposed rule. The Departments find the safeguards in place for allowing asylum officers to make a finding that an asylum application is frivolous are sufficient to protect unaccompanied alien children (''UAC'') in the application process. Even if an asylum officer finds an application is frivolous,

the application is referred to an immigration judge who provides review of the determination. The asylum officer's determination does not render the applicant permanently ineligible for immigration benefits unless the immigration judge or the BIA also make a finding of frivolousness. *Id.* Further, asylum officers and immigration judges continue to use child-appropriate procedures taking into account age, stage of language development, background, and level of sophistication.[25] Finally, to be found frivolous, an application must be knowingly filed as such, and the Departments anticipate that very young UACs will typically not have the requisite mental state to warrant a frivolousness finding.

Comment: At least one commenter appeared to express concern that the rule includes all applications submitted after April 1, 1997, as those which could potentially be deemed frivolous.

Response: To the extent the commenter is concerned about frivolous applications in general dating back to April 1, 1997, the Departments note that DOJ first implemented regulations regarding frivolous asylum applications on March 6, 1997, effective April 1, 1997. Inspection and Expedited Removal of Aliens; Detention and Removal of Aliens; Conduct of Removal Proceedings; Asylum Procedures, 62 FR 10312, 10344 (Mar. 6, 1997). The April 1, 1997 effective date was enacted by Congress in 1996 through IIRIRA. *See* IIRIRA, Public Law 104–208, sec. 604(a), 110 Stat. 3009, 3009–693. Thus, all asylum applications filed on or after April 1, 1997, have been subject to a potential penalty for frivolousness for many years.

The NPRM made clear, however, that the new regulatory definition of frivolous applies only to applications filed[26] on or after the effective date of the final rule. To provide further clarification on this point, the Departments made several non-substantive edits to the regulatory text at 8 CFR 208.20 and 8 CFR 1208.20 in the final rule to clarify the temporal applicability of the existing definition of frivolousness and the prospective application of the definition contained in the rule. Thus, the commenters apparent retroactivity concerns about the definition of a frivolous application have been addressed. For further discussion of the rule's retroactive applicability, *see* Section II.C.7 of this preamble.

3.2. Pretermission of Legally Insufficient Applications

3.2.1. Pretermission and the INA

Comment: Commenters stated that allowing immigration judges to pretermit applications conflicts with multiple sections of the INA and is not a ''reasonable'' interpretation of the INA.

Commenters cited section 208(a)(1) of the Act, 8 U.S.C. 1158(a)(1), alleging that the phrase ''may apply for asylum'' should be broadly construed. Commenters also noted that the statute requires the establishment of a procedure for considering asylum applications. INA 208(d)(1), 8 U.S.C. 1158(d)(1). Commenters claimed that allowing for the pretermission of asylum applications does not satisfy this required procedure and is an ''unreasonable interpretation'' of the statute.

Commenters stated that the rule violates section 240(b)(1) of the Act, 8 U.S.C. 1229a(b)(1), which states that ''[t]he immigration judge shall administer oaths, receive evidence, and interrogate, examine, and cross-examine the alien and any witnesses.'' Commenters stated that the rule violates this requirement by ''requiring immigration judges to abandon their essential function of examining the noncitizen about their application for relief.''

Similarly, commenters stated that the rule violates section 240(b)(4)(B) of the Act, 8 U.S.C. 1229a(b)(4)(B), which states that ''the alien shall have a reasonable opportunity to examine the evidence against the alien, to present evidence on the alien's own behalf, and to cross-examine witnesses presented by the Government.'' Commenters believe the rule violates this provision because it denies aliens the ability to present and examine evidence on their own behalf, including their own credible testimony.

Finally, commenters stated that the rule violates section 240(c)(4) of the Act, 8 U.S.C. 1229a(c)(4), which states that, inter alia, ''the immigration judge shall weigh the credible testimony along with other evidence of record'' when determining whether an alien has met his or her burden of proof on an application for relief. INA 240(c)(4)(B), 8 U.S.C. 1229a(c)(4)(B).

Commenters also disagreed with the Departments that allowing pretermission of applications would not conflict with the legislative history of IIRIRA. *See* 85 FR at 36277 n.26 (noting statements in H.R. Rep. No. 104–469, part 1 (1996) regarding balancing the need for the alien to provide sufficient information on the application with the need for the alien's application to be timely). Commenters stated that the rule creates additional burdens for aliens with regard to submission and preparation of the Form I–589.

Response: Allowing pretermission of asylum applications in the manner set out in this rule does not violate the INA. As an initial point, the regulations have long allowed immigration judges to pretermit asylum applications when certain grounds for denial exist. *See* 8 CFR 1240.11(c)(3).[27] Additionally, courts have affirmed the pretermission of legally deficient asylum applications. *See, e.g., Zhu* v. *Gonzales,* 218 F. App'x 21, 23 (2d Cir. 2007) (''Here, the IJ alerted Zhu early in the proceedings that his asylum claim might be pretermitted if he failed to illustrate a nexus to a protected ground, and granted him a 30-day continuance in which to submit a brief addressing the nexus requirement. When Zhu had neither submitted a brief, nor requested an extension of the deadline, after nearly 60 days, the IJ acted within his discretion in pretermitting the asylum claim.''). As discussed further below, the pretermission of legally deficient asylum applications is consistent with existing law, and immigration judges already possess authority to take any action consistent with their authorities under the law that is appropriate and necessary for the disposition of cases, 8 CFR 1003.10(b), to generally take any appropriate action consistent with applicable law and regulations, *id.* 1240.1(a)(1)(iv), and to regulate the course of a hearing, *id.* 1240.1(c). Accordingly, the authority of an immigration judge to pretermit an asylum application is well-established even prior to the proposed rule.[28]

[25] For further discussion of the intersection of the rule and the TVPRA, see section II.C.6.10.

[26] This includes applications filed in connection with a motion to reopen on or after the effective date of the rule or applications filed on or after the effective date of the rule after proceedings have been reopened or recalendared.

[27] The text of 8 CFR 1240.11(c)(3) references, *inter alia,* the mandatory denial of an asylum application pursuant to 8 CFR 1208.14. In turn, 8 CFR 1208.14(a) references 8 CFR 1208.13(c), which lists the specific grounds for the mandatory denial of an asylum application, including those listed in INA 208(a)(2) and (b)(2) (8 U.S.C. 1158(a)(2) and (b)(2)). Some of those grounds may require a hearing to address disputed factual issues, but some involve purely legal questions—*e.g.* INA 208(b)(2)(A)(ii) and (B)(i) (8 U.S.C. 1158(b)(2)(A)(ii) and (B)(i)) (an alien convicted of an aggravated felony is ineligible for asylum)—and, thus, may be pretermitted without a hearing.

[28] The National Association of Immigration Judges (''NAIJ''), the union which formerly represented non-supervisory immigration judges, opposed the rule on general grounds but did not take a position on this specific provision. A. Ashley Tabadorr, *Comment by the National Association of Immigration Judges,* (July 15, 2020), *https://www.naij-usa.org/images/uploads/newsroom/*

Further, regarding sections 208(a)(1) and 208(d)(1) of the Act, 8 U.S.C. 1158(a)(1) and (d)(1), nothing in the rule regarding the pretermission of applications affects the ability of aliens to apply for asylum, and this rule adds to the already robust procedures in place for the consideration and adjudication of applications for asylum. Instead, pretermission establishes an efficiency for the adjudication of applications for asylum that have been submitted for consideration and is utilized in a similar fashion as summary decision is used in other DOJ immigration-related proceedings, *see* 28 CFR 68.38, and as summary judgment is used in Federal court proceedings, *see* Fed. R. Civ. P. 56.

Similarly, pretermission of asylum applications in the manner set out in this rule does not violate any provision of section 240 of the Act, 8 U.S.C. 1229a. First, section 240(b)(1) of the Act, 8 U.S.C. 1229a(b)(1), authorizes immigration judges to ''interrogate, examine, and cross-examine the alien and any witnesses'' but does not establish a mandatory requirement for them to do so in every case on every application or issue. Further, it is settled law that immigration judges may pretermit applications for relief in other contexts. *See, e.g., Matter of J–G–P–,* 27 I&N Dec. 642, 643 (BIA 2019) (explaining that the immigration judge granted DHS's motion and pretermitted the respondent's application for cancellation of removal due to the respondent's disqualifying criminal conviction); *Matter of Moreno-Escobosa,* 25 I&N Dec. 114 (BIA 2009) (reviewing questions of eligibility for a waiver of inadmissibility under former section 212(c) of the Act (8 U.S.C. 1182(c) (1994)) following an immigration judge's pretermission of the respondent's application). Second, the rule allows the applicant a ''reasonable opportunity'' to present evidence on his or her own behalf before pretermission as an immigration judge would not pretermit an application without either the time expiring for the alien to respond to DHS's motion or the judge's notice. Similarly, the alien would be afforded the opportunity to present evidence, including written testimony, on their own behalf prior to an immigration judge's decision to pretermit an application, in accordance with section 240(b)(4)(B) and (c)(4) of the Act, 8 U.S.C. 1229a(b)(4)(B) and (c)(4).

Regarding the legislative history of IIRIRA, the Departments find that allowing pretermission in the manner set out in the proposed rule and this final rule does not conflict with the legislative history of IIRIRA. First, regarding the statement in the House report cited in the proposed rule, the Departments note that at that point, the House legislation would have imposed a 30-day filing deadline for asylum applications. *See* H.R. Rep. No. 104–469, pt. 1, at 259 (1996). Accordingly, the Departments find that congressional statements suggesting lower requirements for specificity in an asylum application were based on a concomitant suggestion that an application should be filed within 30 days and were correspondingly obviated by the longer one-year filing deadline ultimately enacted by IIRIRA. INA 208(a)(2)(B), 8 U.S.C. 1158(a)(2)(B). Second, there is no discussion in the IIRIRA conference report that similarly encourages a condensed application for the sake of expediency. *See generally* H.R. Rep. No. 104–828 (1996) (conference report). Finally, the Departments reiterate that, as stated in the proposed rule, the alien would only be expected to provide ''enough information to determine the basis of the alien's claim for relief and if such a claim could be sufficient to demonstrate eligibility.'' 85 FR at 36277 n.26. Indeed, the Departments expect that aliens who complete the Form I–589, Application for Asylum and for Withholding of Removal, in accordance with the instructions and provide all information requested by the form would provide sufficient information for the prima facie determination, just as it does in the context of a motion to reopen. *See INS* v. *Abudu,* 485 U.S. 94, 104 (1988) (''There are at least three independent grounds on which the BIA may deny a motion to reopen. First, it may hold that the movant has not established a prima facie case for the underlying substantive relief sought.'') Further, an alien would be able to provide additional information as desired in response to the DHS motion or immigration judge notice regarding possible pretermission. In short, a requisite prima facie showing for an asylum application is not an onerous burden, and the Departments disagree with the commenter that allowing pretermission presents any additional mandatory burden on the alien beyond that which is already required by the asylum application itself.

3.2.2. Pretermission and the Regulations

Comment: Commenters stated that allowing pretermission of applications in the manner set out in the proposed rule violates the other regulatory provisions, including 8 CFR 1240.1(c), 8 CFR 1240.11(c)(3), and 8 CFR 1240.11(c)(3)(iii). Regarding 8 CFR 1240.1(c) (''The immigration judge shall receive and consider material and relevant evidence . . . .''), commenters noted that pretermission would foreclose consideration of an asylum seeker's testimony, which is often one of the most important pieces of evidence, as well as witness testimony. Regarding 8 CFR 1240.11(c)(3) (''Applications for asylum and withholding of removal so filed will be decided by the immigration judge . . . after an evidentiary hearing to resolve factual issues in dispute.''), commenters emphasized the regulation's requirement that an immigration judge's decision be made ''after an evidentiary hearing'' and noted that the factual and legal issues in an asylum claim are often interconnected. Regarding 8 CFR 1240.11(c)(3)(iii) (''During the removal hearing, the alien shall be examined under oath on his or her application and may present evidence and witnesses in his or her own behalf''), commenters stated that pretermission would deprive the alien of the opportunity to meet his or her burden of proof through testimony, which may be sufficient for the alien to sustain the burden of proof without corroboration.

Commenters stated that allowing pretermission would make into surplusage the provisions of the regulations regarding the authority of the immigration judge to consider evidence (8 CFR 1240.11(c) and control the scope of the hearing (c)(3)(ii)).

Response: Allowing pretermission of asylum applications that fail to demonstrate a prima facie claim for relief or protection in the manner set out in the proposed rule and this final rule does not violate other provisions of the Departments' regulations. As stated in the proposed rule, ''[n]o existing regulation requires a hearing when an asylum application is legally deficient.'' 85 FR at 36277. Commenters' arguments to the contrary misconstrue the regulatory framework. The Departments agree that an alien's testimony may be important evidence for a case. *See, e.g., Matter of Mogharrabi,* 19 I&N Dec. 439, 445 (BIA 1987) (''The alien's own testimony may in some cases be the only evidence available, and it can suffice where the testimony is believable, consistent, and sufficiently detailed to provide a plausible and

2020.07.15.00.pdf (''NAIJ's comment to the proposed rulemaking takes no position on what the law should be or how it is to be interpreted.''). Nevertheless, individual immigration judges have, on occasion, pretermitted legally-deficient asylum applications even prior to the issuance of the proposed rule.

coherent account of the basis for his fear.'').[29] But in cases where it is clear from the fundamental bases of the alien's claim that the claim is legally deficient and the alien will not be able to meet his or her burden of proof, regardless of the additional detail or specificity that the alien's testimony may provide, such testimony is not material or relevant and is not needed for the judge to be able to make a determination that the application is legally insufficient.[30]

Further, the rule does not conflict with the specific regulatory sections cited by the commenters. To the contrary, as discussed, *supra,* the rule is fully consistent with an immigration judge's existing authority to take any action consistent with their authorities under the law that is appropriate and necessary for the disposition of cases, 8 CFR 1003.10(b), to generally take any appropriate action consistent with applicable law and regulations, *id.* 1240.1(a)(1)(iv), and to regulate the course of a hearing, *id.* 1240.1(c). Further, the rule does not affect the instruction at 8 CFR 1240.1(c) for immigration judges to consider material and relevant evidence. If a case presents a prima facie claim, the case will proceed through the adjudicatory process consistent with current practice, including the submission and consideration of whatever material and relevant evidence is included in the record. Similarly, in that adjudication, the alien would be examined and allowed to present evidence and witnesses, consistent with 8 CFR 1240.11(c)(3)(iii). Finally, those applications that present a prima facie claim will proceed to an evidentiary hearing to resolve those factual and legal issues presented by the alien's claim. *See* 8 CFR 1240.11(c)(3). Accordingly, pretermission works to supplement the existing regulations; it does not conflict with them, nor does it render them surplusage.

3.2.3. Pretermission and BIA Case Law

Comment: Commenters stated that allowing immigration judges to pretermit and deny asylum applications violates *Matter of Fefe,* 20 I&N Dec. 116 (BIA 1989), and *Matter of Ruiz,* 20 I&N Dec. 91 (BIA 1989). Commenters disagreed with the Departments' distinguishing *Matter of Fefe* in the proposed rule by noting that the underlying regulations interpreted by the BIA in *Matter of Fefe* are no longer in effect. *See* 85 FR at 36277. Instead, commenters stated that both the BIA and the Federal courts have noted that the current regulations at 8 CFR 1240.11 are substantially similar to the regulations at issue in *Matter of Fefe. See Matter of E–F–H–L–,* 26 I&N Dec. 319, 323 (BIA 2014) (noting that the current regulatory ''language does not differ in any material respect from that in the prior regulations''), *vacated by* 27 I&N Dec. 226, 226 (A.G. 2018); *Oshodi* v. *Holder,* 729 F.3d 883, 898 (9th Cir. 2013) (''We reaffirm our holding, and the BIA's own rule, that an applicant's oral testimony is 'an essential aspect of the asylum adjudication process' and the refusal to hear that testimony is a violation of due process.'') (citing *Matter of Fefe,* 20 I&N Dec. at 118).

Response: As stated in the proposed rule, the Departments find that intervening changes to the regulations since its publication and the Attorney General's vacatur of *Matter of E–F–H–L–* have superseded the BIA's holding in *Matter of Fefe.* 85 FR at 36277. The BIA's statement in *Matter of E–F–H–L–* that the current regulations ''do not differ in any material respect'' from those in effect in 1989 was simply not accurate, and the Departments find that the regulations today create a substantively different framework for adjudications than the regulations in 1989. Notably, the earlier regulations contained a general requirement that all applicants be examined in person by an immigration judge or asylum officer prior to the application's adjudication. 8 CFR 208.6 (1988). Today, however, the regulations provide direct examples of times when no hearing on an asylum application is required: If no factual issues are in dispute and once the immigration judge has determined that the application must be denied pursuant to the mandatory criteria in 8 CFR 1208.14 or 1208.16. *See* 8 CFR 1240.11(c)(3) (''An evidentiary hearing extending beyond issues related to the basis for a mandatory denial of the application pursuant to § 1208.14 or § 1208.16 of this chapter is not necessary once the immigration judge has determined that such a denial is required.'').

The procedures at 8 CFR part 208 at issue in *Matter of Fefe* were first amended in 1990. Aliens and Nationality; Asylum and Withholding of Deportation Procedures, 55 FR 30674 (July 27, 1990) (final rule); Aliens and Nationality; Asylum and Withholding of Deportation Procedures, 53 FR 11300 (Apr. 6, 1988) (proposed rule). At that time, the Department clearly indicated that the purpose of the amendments[31] was to allow immigration judges and the BIA greater flexibility to ''limit the scope of evidentiary hearings . . . to matters that are dispositive of the application for relief.'' 53 FR at 11301. The Department of Justice explained that, ''[i]f it is apparent upon the record developed during a proceeding that the alien is clearly ineligible for asylum or withholding of deportation, the Immigration Judge will be permitted to forego a further evidentiary hearing on questions extraneous to the decision, thus avoiding unnecessary and time consuming factual hearings on nondispositive issues.'' *Id.*

Despite the BIA's statements opining on the similarity of 8 CFR 1240.11(c) and 8 CFR 236.3 and 242.17 (1988)—which, as stated elsewhere have been vacated by the Attorney General—the Departments find that there are clear procedural differences between a general requirement to conduct a hearing and regulations that establish clear exceptions to a hearing requirement. In short, the Board's decisions in *Matter of Fefe* and *Matter of E–F–H–L–,* in light of subsequent legal developments, simply do not stand for the propositions advanced by some commenters. *See Ramirez* v. *Sessions,* 902 F.3d 764, 771 n.1 (8th Cir. 2018) (''The current relevance of [*Matter of Fefe* and *Matter of E–F–H–L–*] is questionable. The regulations applied in *Matter of Fefe* were later rescinded and replaced. Further, *Matter of E–F–H–L–,* which reaffirmed *Matter of Fefe,* was vacated [by the Attorney General] after the petitioner withdrew his application.'').

[29] Nevertheless, despite commenters' statements, the Departments emphasize that while an alien's testimony *may* be sufficient to meet his or her burden of proof on its own, such testimony must be ''credible,'' ''persuasive,'' and refer to sufficient specific facts.'' INA 240(c)(4)(B) (8 U.S.C. 1229(c)(4)(B)). Otherwise, the immigration judge may determine that the alien should provide corroborative evidence unless the alien can demonstrate that he or she does not have and cannot reasonably obtain the evidence. *Id.; see also Matter of E–P–,* 21 I&N Dec. 860, 862 (BIA 1997) (a finding of credible testimony is not dispositive as to whether asylum should be granted).

[30] The Departments also note that an alien may proffer written testimony as part of his or her response to either the DHS motion or judge's notice regarding pretermission.

[31] The amended regulatory provisions at 8 CFR 236.3, which regarded exclusion proceedings, and 8 CFR 242.17, which regarded deportation proceedings, are the precursors to current regulatory sections 8 CFR 1240.33 and 8 CFR 1240.49. *Cf.* Inspection and Expedited Removal of Aliens; Detention and Removal of Aliens; Conduct of Removal Proceedings; Asylum Procedures, 62 FR 444, 450 (Jan. 3, 1997) (discussing the relocation of ''old regulations which are still applicable to proceedings commenced prior to April 1, 1997 . . . to new parts of the regulations as separate subtopics''). Current 8 CFR 1240.11(c)(3) in turn follows this approach for the consideration of asylum applications during removal proceedings under section 240 of the Act (8 U.S.C. 1229a).

Further, even if the regulation conflicted with a prior interpretation by the BIA, the Attorney General, consistent with his authority to interpret the INA, may still issue the rule. INA 103(g), 8 U.S.C. 1103(g). The Departments are not bound by prior judicial interpretations of the Departments' own regulations, as such interpretations are not interpretations of the INA's statutory requirements.

Matter of Ruiz, is also distinguishable. There, the BIA held that an immigration judge could not require an alien who sought to reopen proceedings conducted in absentia to demonstrate a prima facie eligibility for asylum in conjunction with the motion to reopen. *Matter of Ruiz,* 20 I&N Dec. at 93. Instead, the BIA held that the alien must demonstrate a ''reasonable cause for his failure to appear.'' *Id.* But the change in the rule here—which allows immigration judges to pretermit and deny asylum applications that fail to demonstrate a prima facie claim for relief or protection—has no connection to what aliens must demonstrate in order to reopen a hearing conducted in absentia. The in absentia requirements are separately set out by the Act and regulations. *See* INA 240(b)(5)(C)(i)–(ii), 8 U.S.C. 1229a(b)(5)(C)(i)–(ii) (providing conditions for rescinding an in absentia removal order based on a motion to reopen); 8 CFR 1003.23(b)(4)(ii). There is no separate requirement to demonstrate further eligibility for any application for relief, consistent with *Matter of Ruiz.* Further, the equivalent statutory right to former section 236(a) of the Act, 8 U.S.C. 1226(a), which was at issue in *Matter of Ruiz,* is the alien's rights in a proceeding under section 240(b)(4) of the Act, 8 U.S.C. 1229(b)(4), which, as discussed above, are not violated by allowing an immigration judge to pretermit and deny applications that fail to demonstrate a prima facie claim for relief or protection.

3.2.4. Additional Concerns Regarding Pretermission

Comment: Multiple commenters expressed concern that the rule would allow immigration judges to dismiss asylum claims without a hearing, denying applicants the opportunity to appear in court and offer testimony. Commenters emphasized that the rule is ''extremely problematic'' from a due process perspective and violates aliens' Fifth Amendment due process rights. In support, commenters cited to case law discussing the right to testify and finding due process violations when that right is curtailed or limited. *See, e.g., Atemnkeng* v. *Barr,* 948 F.3d 231, 242 (4th Cir. 2020) (holding that there was a due process violation where the immigration judge deprived an asylum applicant of the opportunity to testify on remand). Commenters emphasized a quote from the chair of the American Immigration Lawyers Association's asylum committee stating that ''the pretermission authority was the most striking attack on due process in the proposal,'' and noting that some immigration judges already have denial rates of 90 percent or higher.

Response: The commenters appear to misconstrue both the nature of the rule and the difference between issues of fact and issues of law. None of the examples provided by commenters involved situations in which an immigration judge pretermitted an application as legally deficient; rather, they involve situations in which an immigration judge initially allowed testimony but then cut-off questioning—or, in one case, disallowed testimony altogether—following a remand. In other words, the posture of the examples cited by commenters is one in which an alien had already demonstrated a prima facie case, making those examples inapposite to the rule. Commenters did not provide any examples where a properly supported legal pretermission—by itself—was found to be a due process violation, nor did commenters explain how analogous summary-decision or summary-judgment provisions in other contexts—*e.g.* 28 CFR 68.38 or Fed. R. Civ. P. 56—remain legally valid even though they, too, curtail an individual's ability to testify or introduce evidence in proceedings. In short, the commenters' concerns appear unconnected to the actual text of the rule and the applicable law.

The Departments disagree that allowing immigration judges to pretermit and deny asylum applications that do not show a prima facie claim for relief would violate applicants' due process rights. The essence of due process is notice and an opportunity to be heard. *See LaChance,* 522 U.S. at 266. Nothing in the rule eliminates notice of charges of removability against an alien, INA 239(a)(1), 8 U.S.C. 1229(a)(1), or the opportunity for the alien to make his or her case to an immigration judge, INA 240(a)(1), 8 U.S.C. 1229a(a)(1), or on appeal, 8 CFR 1003.38.

In addition, the rule would not require or expect aliens to meet their ultimate burden of proof to avoid pretermission; instead, the alien must only (per one common definition of ''prima facie'') ''establish a fact or raise a presumption, unless disproved or rebutted.'' *Black's Law Dictionary* (11th ed. 2019); *cf. Tilija* v. *Att'y Gen.,* 930 F.3d 165, 171 (3d Cir. 2019) (''To establish a prima facie claim, the movant 'must produce objective evidence that, when considered together with the evidence of record, shows a reasonable likelihood that he is entitled to [asylum] relief.''' (citation omitted)). Further, the rule ensures the alien has an opportunity to respond to either the DHS motion or the judge's notice regarding pretermission and provide the court with additional argument or evidence, including proffered written testimony, in support of the alien's application.

Comment: Commenters emphasized that asylum seekers are vulnerable and often unrepresented and noted the low rates of representation for aliens in the Migrant Protection Protocols (''MPP'') in particular. Because many asylum seekers do not speak English, it is often difficult for them to navigate the complexities of the immigration system. Commenters specifically noted that it is hard for detained, unrepresented individuals to complete asylum applications because they are often required to use ''unofficial translators'' with whom they are not comfortable sharing personal information. Commenters stated that the immigration judge's consideration of an alien's response to the judge's notice or DHS motion regarding pretermission does not alleviate the commenters' concerns. Commenters argued that the same language barriers and other vulnerabilities would apply to both the response and the underlying Form I–589 application; thus, they contend, a response alone does not provide a ''meaningful opportunity'' to address misunderstandings or fully engage with the judge or DHS.

Response: As an initial point, the commenters' assertion of a low rate of representation is inaccurate. The Departments note that a large majority (85 percent at the end of FY2020) of those asylum seekers who are in proceedings before DOJ—and who, in turn, could have an immigration judge pretermit their asylum applications—are represented in proceedings. EOIR, *Adjudication Statistics: Representation Rates* (Oct. 13, 2020), *https://www.justice.gov/eoir/page/file/1062991/download.* Second, while the Departments agree with commenters that many asylum seekers' first or preferred language is a language other than English, the Departments find that it is reasonable to expect aliens to utilize translators or other resources in order to complete the Form I–589 application in accordance with the regulations and instructions, which

require that the form be completed in English. *See* 8 CFR 208.3(a), 1208.3(a) (noting that an applicant must file an I–589 ''in accordance with the instructions on the form''); Form I–589, Application for Asylum and for Withholding of Removal, Instructions, 5 (Sept. 10, 2019), *https://www.uscis.gov/sites/default/files/document/forms/i-589instr.pdf* (''Your answers must be completed in English.''). Moreover, existing regulations already require that foreign-language submissions be translated into English, *see* 8 CFR 103.2(b)(3), 1003.33, so it is unclear how a non-English-speaking alien could submit evidence without a translator in any case.

The Departments thus disagree that aliens would be unable to answer the questions on the Form I–589 with enough specificity to make a prima facie claim for relief or protection. The Departments further note that aliens whose applications are deficient will be able to provide additional argument or evidence in response to either DHS's motion to pretermit or the judge's sua sponte notice. *See* 8 CFR 1208.13(e) (as amended). Despite commenters' concerns that this process is insufficient, this is the same process that is regularly used in immigration court, including other times when an alien's ability to seek a particular form of relief may be foreclosed by DHS filing a motion to pretermit. 85 FR at 36277.

Comment: Commenters stated that allowing immigration judges to pretermit applications would violate the duty of the immigration judge under the Act and the regulations to develop the record, particularly for cases where the alien appears pro se and for cases involving UACs. *See, e.g., Jacinto* v. *I.N.S.,* 208 F.3d 725, 734 (9th Cir. 2000) (''[U]nder the statute and regulations previously cited, and for the reasons we have stated here, immigration judges are obligated to fully develop the record in those circumstances where applicants appear without counsel . . . .'').

Response: Allowing immigration judges to pretermit and deny asylum applications that do not demonstrate a prima facie claim for relief or protection does not violate the immigration judge's responsibility to develop the record. Instead, the rule comports with this duty by requiring immigration judges to provide notice and an opportunity to respond before pretermitting any application. Such notice should provide the parties with information regarding the judge's concerns, and should elicit relevant information in response. Similarly, in the context of DHS motions to pretermit, the immigration judge would consider the alien's response to the motion and may solicit additional information, if needed, for review.

Comment: Commenters stated that pretermission conflicts with adjudication guidance in UNHCR's *Handbook on Procedures and Criteria for Determining Refugee Status,* which provides that, ''while the burden of proof in principle rests on the applicant, the duty to ascertain and evaluate all the relevant facts is shared between the applicant and the examiner. Indeed, in some cases, it may be for the examiner to use all the means at his disposal to produce the necessary evidence in support of the application.'' UNHCR, *Handbook On Procedures and Criteria for Determining Refugee Status,* ¶ 196 (1979) (reissued Feb. 2019), *https://www.unhcr.org/en-us/publications/legal/5ddfcdc47/handbook-procedures-criteria-determining-refugee-status-under-1951-convention.html.* As a result, commenters stated that allowing immigration judges to pretermit and deny applications that do not demonstrate a prima facie claim does not meet the United States' international obligations and does not align with congressional intent to follow the Refugee Convention.

Response: Commenters' reliance on guidance from UNHCR is misguided. UNHCR's interpretations of (or recommendations regarding) the Refugee Convention and Protocol, including the UNHCR Handbook, are ''not binding on the Attorney General, the BIA, or United States courts.'' *INS* v. *Aguirre-Aguirre,* 526 U.S. 415, 427 (1999). ''Indeed, the Handbook itself disclaims such force, explaining that 'the determination of refugee status under the 1951 Convention and the 1967 Protocol . . . is incumbent upon the Contracting State in whose territory the refugee finds himself.' '' *Id.* at 427–28 (citation and internal quotations omitted). Further, to the extent such guidance ''may be a useful interpretative aid,'' *id.* at 427, it would apply only to statutory withholding of removal, which is the protection that implements Article 33 of the Convention. *Cf. R–S–C* v. *Sessions,* 869 F.3d 1176, 1188, n.11 (10th Cir. 2017) (explaining that ''the Refugee Convention's non-refoulement principle—which prohibits the deportation of aliens to countries where the alien will experience persecution—is given full effect by the Attorney General's withholding-only rule''). And although the rule would allow pretermission of Form I–589 applications submitted for withholding of removal or CAT protection, such pretermission does not necessarily constrict or limit the population of aliens that may qualify for such protection. Instead, it simply provides an efficiency for the adjudication of those claims that do not demonstrate a baseline prima facie eligibility for relief.

Comment: Commenters emphasized that the rule forces the entire eligibility decision to be based on the Form I–589 and supporting documents, noting that this could be problematic if the applicant does not initially possess all of the necessary documentation. Commenters also claimed that pretermitting an application while the individual is still working to gather paperwork would be ''grossly unfair'' and contended that, if the rule is adopted, it must provide a ''working period'' after submission during which an application cannot be pretermitted. Commenters also noted that unrepresented individuals may have their applications terminated prior to finding representation who could help them supplement an application that was originally lacking or insufficient.

Other commenters noted that there are many cases that initially appear to lack eligibility but later qualify for asylum after testimony is taken and additional facts are uncovered. Commenters referenced *Matter of Fefe,* 20 I&N Dec. 116, and *Matter of Mogharrabi,* 19 I&N Dec. 443, noting that there are often discrepancies between the written and oral statements in an asylum application that can only be resolved through direct examination.

Response: Commenters again appear to misstate the rule, to misunderstand the difference between issues of fact and issues of law, and to misunderstand the difference between a prima facie legal showing and a full consideration of the merits of a case. The rule requires simply a prima facie case for relief; it does not require that every factual assertion be supported by additional corroborative evidence. If the alien's application for relief states sufficient facts that could support his or her claim for relief or protection, the immigration judge would not pretermit the application solely because some additional documentation is still being gathered.[32] Accordingly, the

[32] Many commenters raised this issue specifically for particular social group asylum claims, noting the fact-intensive nature of the social distinction element—*i.e.,* that it be recognized by the society in question—required for such groups. *See S.E.R.L.,* 894 F.3d at 556 (''And that must naturally be so, once it is given that social distinction involves proof of societal views. What those views are and how they may differ from one society to another are questions of fact''). The Departments recognize that situations in which particular social group asylum claims may be pretermitted due to a failure to make a prima facie showing of the social distinction element are likely to be rare. Nevertheless, the

Departments disagree that a minimum ''working period'' before which an application may not be pretermitted is needed.

Regarding applications that at first appear insufficient but are later bolstered through additional information, the Departments again emphasize that the rule provides the alien with the opportunity to respond to either the DHS motion or the judge's notice regarding pretermission. The Departments expect that such a response would be used to provide additional information, which the immigration judge would consider prior to making any final determination regarding pretermission. Moreover, in both *Matter of Fefe* and *Matter of Mogharrabi,* there was no question about whether the alien had stated a prima facie claim. In the former, the immigration judge raised doubts over the alien's credibility—not over the legal basis of the claim—that were not resolved because the alien did not testify. In the latter, the Departments see no indication that the alien could not have stated a prima facie claim.

Finally, an immigration judge may only pretermit an application that is legally deficient. Thus, the gathering of additional facts that do not bear on the legal cognizability of the claim—for example, gathering the specific names of every speaker at a political rally—is not required by the rule to avoid pretermission.

Comment: Commenters also criticized the 10-day notice period, claiming it is ''unreasonably short,'' especially considering the COVID–19 pandemic.

Response: The 10-day period is consistent with current EOIR practice, where it has worked well. *See* EOIR, *Immigration Court Practice Manual* at D–1 (July 2, 2020), *https://www.justice.gov/eoir/page/file/1258536/download.* The Departments disagree that the current COVID–19 situation affects the reasonableness of the 10-day deadline as filings can be submitted by mail and, in some locations, online. *See* EOIR, *Welcome to the EOIR Courts & Appeals System (ECAS) Information Page, https://www.justice.gov/eoir/ECAS.* Further, if an immigration court location is unexpectedly closed on the day of the deadline, the deadline is extended until the immigration court reopens. *See* EOIR, *PM 20–07: Case Management and Docketing Practices,* 2 n.1 (Jan. 31, 2020), *https://www.justice.gov/eoir/page/file/1242501/download.* Moreover, many non-detained hearings continue to be postponed due to COVID–19 rendering deadlines largely malleable until hearings resume.

Comment: Commenters alleged that the rule would result in a higher rate of pretermission for unrepresented individuals because these applicants would be unfamiliar with the ''magic language'' needed to survive a motion to pretermit. As a result, commenters claimed that the rule violates the Fifth and Sixth Amendments, and concurrently violates section 240(b)(4)(A) and (B) of the Act, 8 U.S.C. 1229a(b)(4)(A) and (B).[33]

Response: Commenters are incorrect that the rule violates an alien's right to counsel under section 240(b)(4)(A) of the Act, 8 U.S.C. 1229a(b)(4)(A), and the Sixth Amendment. First, section 240(b)(4)(A) of the Act, 8 U.S.C. 1229a(b)(4)(A), provides that aliens ''shall have the privilege of being represented, at no expense to the government, by counsel of the alien's choosing who is authorized to practice in such proceedings.'' No provision of this rule would limit an alien's ability to obtain representation as provided by the INA. Second, the Sixth Amendment right to counsel does not apply in immigration proceedings, which are civil, not criminal, proceedings. *See, e.g., Tawadrus* v. *Ashcroft,* 364 F.3d 1099, 1103 (9th Cir. 2004).[34]

Commenters are similarly incorrect that the rule violates the equal protection component of the Fifth Amendment's Due Process Clause because unrepresented aliens will be more likely to have asylum applications pretermitted than similarly situated represented aliens. First, commenters' concerns that the rule will have a disparate impact are speculative. Second, similar procedures in other civil proceedings—such as the summary decision procedures of 28 CFR 68.38 or summary judgment under the Federal Rules of Civil Procedure—do not violate the Fifth Amendment. Third, even if the commenters were correct that the rule has a discriminatory impact, the Departments find it would not violate the Fifth Amendment's equal protection guarantee because the rule does not involve a suspect classification or burden any fundamental right. *See Heller* v. *Doe,* 509 U.S. 312, 319 (1993) (holding that ''a classification neither involving fundamental rights nor proceeding along suspect lines is accorded a strong presumption of validity'').

Allowing the pretermission of applications would enhance judicial efficiency by no longer requiring a full hearing for applications that are legally deficient on their face. There continue to be record numbers of both pending cases before EOIR[35] and asylum applications[36] filed annually. Accordingly, the Departments seek to most efficiently allocate EOIR's limited adjudicatory capacity in order to decide cases in a timely manner, including granting relief to aliens with meritorious cases as soon as possible. Accordingly, there is at least a rational basis for allowing pretermission of asylum applications in this manner. *Cf. DeSousa* v. *Reno,* 190 F.3d 175, 184 (3d Cir. 1995) (''[D]isparate treatment of different groups of aliens triggers only rational basis review under equal protection doctrine. . . . Under this minimal standard of review, a classification is accorded 'a strong presumption of validity' and the government has no obligation to produce evidence to sustain its rationality.'' (internal citations omitted)).

Comment: Commenters also alleged that the pretermission of asylum applications is incompatible with federally established pleading standards

immutability and particularity requirements are not necessarily factbound—though they may be in discrete cases—and the failure of an alien to make a prima facie showing that a proposed particular social group consists of a characteristic that is immutable (or fundamental) or is defined with particularity may warrant pretermission of the claim in appropriate cases.

[33] Commenters did not provide further explanation regarding how the rule allegedly violates section 240(b)(4)(B) of the Act (8 U.S.C. 1229a(b)(4)(B)), which provides that: The alien shall have a reasonable opportunity to examine the evidence against the alien, to present evidence on the alien's own behalf, and to cross-examine witnesses presented by the Government but these rights shall not entitle the alien to examine such national security information as the Government may proffer in opposition to the alien's admission to the United States or to an application by the alien for discretionary relief under this chapter. This rule does not affect any procedures that relate to aliens' rights under this provision of the INA, and, accordingly, the Departments need not respond further to this point.

[34] Although the Sixth Amendment's right to counsel does not apply in immigration proceedings, some courts have held that a constitutional right to counsel in immigration proceedings applies as part of the Fifth Amendment's due process clause. *See, e.g., Arrey* v. *Barr,* 916 F.3d 1149, 1157 (9th Cir. 2019) (''Both Congress and our court have recognized the right to retained counsel as being among the rights that due process guarantees to petitioners in immigration proceedings.''). Nevertheless, neither the proposed rule nor this final rule violates such a right to counsel as the rule does not amend any procedures related to an alien's right to obtain counsel of his or her choosing at no government expense.

[35] EOIR, *Adjudication Statistics: Pending Cases* (Apr. 15, 2020), *https://www.justice.gov/eoir/page/file/1242166/download* (1,122,697 pending cases as of the second quarter of FY2020)

[36] EOIR, *Adjudication Statistics: Total Asylum Applications* (Apr. 15, 2020), *https://www.justice.gov/eoir/page/file/1106366/download* (120,495 asylum applications filed as of the second quarter of FY2020).

and ''would be an abrupt change from decades of precedent and practice before the immigration court.'' Commenters provided a hypothetical chain of events to illustrate this alleged violation of pleading standards and cited to *Braden* v. *Wal-Mart Stores, Inc.,* 588 F.3d 585, 594 (8th Cir. 2009) (citing *Ashcroft* v. *Iqbal,* 556 U.S. 662, 678 (2009) and *Bell Atl. Corp.* v. *Twombly,* 550 U.S. 554, 556 (2007)).

Response: The Federal Rules of Civil Procedure do not apply in immigration court. *See* Fed. R. Civ. P. 81 (setting out the applicability of the rules); *see also* 8 CFR part 1003, subpart C (setting out the immigration court rules of procedure). Accordingly, commenters' reliance on cases that interpret Rule 8(a) of the Federal Rules of Civil Procedure are not applicable to immigration court. Moreover, the commenters' comparisons to a pleading standard are inaccurate as the decision to pretermit an application is akin to a summary judgment decision, not a pleading determination. *Cf.* F.R. Civ. P. 56 (''The court shall grant summary judgment if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law.''). In order to ensure the immigration judge has as much information as possible about the underlying claim, the rule ensures the applicant has the opportunity to respond to the possible pretermission of his or her application, either as a response to a DHS motion to pretermit or a response to the immigration judge's notice of possible pretermission.

Comment: Commenters contended that the rule, in combination with the Immigration Court Performance Metrics, incentivizes immigration judges to pretermit asylum applications in order to fulfill case completion requirements.

Response: The Departments strongly disagree with the commenters' underlying premise, namely that immigration judges are unethical or unprofessional and decide cases based on factors other than the law and the facts of the cases. Immigration judges exercise ''independent judgment and discretion'' in deciding cases, 8 CFR 1003.10, and are expected to ''observe high standards of ethical conduct, act in a manner that promotes public confidence in their impartiality, and avoid impropriety and the appearance of impropriety in all activities,'' EOIR, *Ethics and Professionalism Guide for Immigration Judges* at 1 (2011), *https://www.justice.gov/sites/default/files/eoir/legacy/2013/05/23/EthicsandProfessionalismGuideforIJs.pdf.* Further, it is well-established that ''[t]he administrative process is entitled to a presumption of regularity,'' *Int'l Long Term Care, Inc.* v. *Shalala,* 947 F. Supp. 15, 21 (D.D.C. 1996), and commenters provide no evidence for the bald assertion that immigration judges will ignore applicable law and the evidence in each case simply in order to pretermit the case. *See also United States* v. *Chemical Found.,* 272 U.S. 1, 14–15 (1926) (''The presumption of regularity supports the official acts of public officers, and, in the absence of clear evidence to the contrary, courts presume that they have properly discharged their official duties.''). To the contrary, in FY 2019, the first full FY after immigration judge performance measures went into effect, not only did most non-supervisory immigration judges working the full year meet the case completion measure without any difficulty, *see* EOIR, *Executive Office for Immigration Review Announces Case Completion Numbers for Fiscal Year 2019, https://www.justice.gov/opa/pr/executive-office-immigration-review-announces-case-completion-numbers-fiscal-year-2019,* but complaints of immigration judge misconduct actually declined slightly from the prior FY, *see* EOIR, *Adjudication Statistics: Immigration Judge Complaints, https://www.justice.gov/eoir/page/file/1104851/download,* even though the total number of immigration judges increased 12 percent, *see* EOIR, *Adjudication Statistics: Immigration Judge Hiring, https://www.justice.gov/eoir/page/file/1242156/download.*

Allowing pretermission of Form I–589 applications that do not establish a prima facie claim for relief or protection under the law provides immigration judges with a mechanism to improve court efficiency by clarifying that there need not be a full merits hearing on those cases that present no legal questions for review, allowing them to devote more time to cases in which facts are at issue. There is no basis for the assumption that the rule would inappropriately incentivize immigration judges to pretermit applications solely to fulfill case-completion goals. As noted, *supra,* some immigration judges already pretermit legally deficient applications, and the Departments are unaware of any link between that action and performance metrics; in fact, immigration judges have pretermitted legally deficient asylum applications since at least 2012, *Matter of E–F–H–L–,* 26 I&N Dec. 319 (BIA 2014), which was several years before performance measures were implemented.

Moreover, assuming, *arguendo,* there were such an incentive, it would be counter-balanced by the performance measure for an immigration judge's remand rate. In other words, an immigration judge who improperly pretermitted applications in violation of the law solely in order to complete more cases would have those cases remanded by the Board on appeal which, in turn, would cause the immigration judge's remand rate to exceed the level set by the performance measures. In short, there is no legal, factual, or logical reason to believe that codifying an immigration judge's authority to pretermit legally deficient applications and the existence of immigration judge performance evaluations will incentivize immigration judges to violate the law in their decision making.

Comment: Commenters emphasized that asylum applications are governed by the law at the time of adjudication rather than the time of filing and expressed concern that the pretermission of applications for lack of a prima facie showing of eligibility forces immigration judges and asylum officers to become ''soothsayers.''

Response: Allowing immigration judges to pretermit and deny applications that do not present a prima facie claim for relief or protection does not conflict with this point. If the judge determines that pretermission is appropriate, that decision would be based on the law and regulations in place at that point, and the decision to pretermit is the adjudication of the application.

Comment: Commenters questioned the effect the rule will have on the asylum clock, especially if a decision affecting eligibility is abrogated by a higher court after an application was filed and pretermitted; one commenter expressed concern that the rule does not specify ''when in the process DHS or the judge can move.'' One commenter emphasized that ''[a]ny final rule which is eventually published should consider how the asylum clock will operate, and should provide clear instructions which attorneys and their clients can rely on.''

Response: The Departments note that USCIS recently published a final rule, Asylum Application, Interview, and Employment Authorization for Applicants, that eliminates the asylum clock.[37] However that rule is currently the subject of ongoing litigation and portions of the rule are subject to a preliminary injunction, as applied to two plaintiff organizations.[38] Regardless, as stated in the proposed rule, an immigration judge who

[37] 85 FR 38532, 39547.

[38] *Casa de Maryland* v. *Wolf,* No. 8:20–cv–02118–PX, 2020 WL 5500165, (D. Md. Sept. 11, 2020) (order granting preliminary injunction).

determines that an asylum application that fails to demonstrate prima facie eligibility for relief or protection under applicable law may ''pretermit and deny'' such application. *See* 8 CFR 1208.13(e). Accordingly, a decision to pretermit and deny would have the same asylum clock effects as any other denial of an asylum application by the immigration judge.

Comment: Commenters alleged that the rule would greatly decrease efficiency in the asylum process, as the number of cases in which a hearing is denied would ''skyrocket'' and the majority of these respondents would appeal to the BIA. Commenters noted the BIA's current backlog and the increased delay in issuing briefing schedules and decisions.

Response: Allowing immigration judges to pretermit and deny asylum applications that do not demonstrate a prima facie claim for relief or protection will increase, not decrease, efficiencies for DOJ. Commenters' predictions of how many cases will be pretermitted under these changes are speculation, as the Departments do not have data on the underlying bases for denials currently, which would be required to accurately predict how many might be pretermitted in the future. Moreover, as fewer than 20 percent of asylum applications are granted even with a full hearing, *see* EOIR, *Asylum Decision Rates, https://www.justice.gov/eoir/page/file/1248491/download,* and many of the ones not granted are appealed already, there is likely to be little operational impact on the BIA.[39] In contrast, pretermitting legally deficient claims will improve efficiency for immigration courts by allowing immigration judges to screen out cases that do not demonstrate prima facie eligibility and, thus, allowing potentially meritorious applications to progress more expeditiously to individual hearings.

Comment: One commenter noted that there are particular signatures on the asylum application which can only be signed by the applicant at the final hearing and claimed that pretermission is ''non-sensical'' because the application will not yet be complete.

Response: The Departments disagree with commenters' concerns that asylum applications may not be pretermitted because a signature is required by the applicant at the final hearing. The Departments believe that the commenters are referring to the signature in Part G of the Form I–589, which is most often signed by the alien at the beginning of the merits hearing on the alien's asylum application and in which the alien swears that the application's contents are true and acknowledges the consequences of submitting a frivolous application. Accordingly, the signature in Part G of the Form I–589 is related to a possible frivolousness finding and the attendant consequences.

Moreover, for the purposes of determining whether to pretermit an application, whether or not the immigration judge has had the applicant sign in Part G, the applicant signs in Part D at the time the application is completed. The signature in Part D is the alien's certification under penalty of perjury that the application and any evidence submitted with it are ''true and correct,'' in addition to another notice of the consequences of filing a frivolous application and other activities. Given the alien's signature in Part D that the application is ''true and correct,'' the Departments believe that the application is sufficient for the purposes of possible pretermission even without a signature in Part G.

Comment: Commenters stated that allowing pretermission will inevitably violate the confidentiality obligations for asylum applicants, speculating that the immigration judge, alien, and DHS counsel will engage in inappropriate conversations regarding the specifics of an asylum application in front of other people during master calendar hearings.

Response: With few exceptions, most immigration hearings are open to the public. 8 CFR 1003.27. Regulations further note that ''[e]videntiary hearings on applications for asylum or withholding of removal will be open to the public unless the alien expressly requests that the hearing be closed.'' 8 CFR 1240.11(c)(3)(i). A master calendar hearing is not an evidentiary hearing. *See Immigration Court Practice Manual,* ch. 4.15(a), *https://www.justice.gov/eoir/page/file/1258536/download* (''Master calendar hearings are held for pleadings, scheduling, and other similar matters.''). Further, an evidentiary hearing is designed to ''resolve factual matters in dispute,'' 8 CFR 1204.11(c)(3), which would necessarily exclude such a hearing from the ambit of pretermission. Accordingly, there is no reason that the specifics of an asylum application would be discussed at a master calendar hearing, and even if they were, an immigration judge may close the courtroom as appropriate to protect the parties. 8 CFR 1003.27(b).

Comment: Commenters noted that the Departments are required to comply with Executive Orders 12866 and 13653, which together direct agencies to evaluate the costs and benefits of alternative methods and to select the approach that maximizes net benefits. Commenters contended that the rule is ''wholly unconcerned'' with calculating the costs and benefits of the pretermission of asylum applications or reducing costs to Federal government agencies.

In particular, commenters expressed concern about costs of the rule possibly eliminating what the commenters referred to as the current, more flexible ''redlining'' procedure in favor of pretermission. The commenters explained that ''redlining'' allows the alien to update and edit the asylum application after it is filed ''up until the point of decision.''

Commenters disagreed that the rule will create efficiencies, arguing instead that the rule will ''increase administrative burden, expense, and processing time by effectively creating two distinct opportunities for appeals to the BIA, including: (1) Appeal from the IJ's decision to pretermit; and (2) appeal on the merits after the IJ's decision to pretermit is overturned.''

Response: The Office of Information and Regulatory Affairs, in conducting its review of the proposed rule, concluded that the Departments complied with Executive Orders 12866 and 13653, as set out in section V.D of the proposed rule. 85 FR at 36289–90. The Departments' consideration included all provisions of the proposed rule, including the changes to 8 CFR 1208.13 regarding pretermission of applications.

Further, as stated above, the Departments emphasize that allowing pretermission of applications will increase efficiencies by allowing immigration judges to complete the adjudication of certain legally insufficient asylum applications earlier in the process, which in turn leaves additional in-court adjudication time available for those applications that may be meritorious. This change would not prevent aliens from amending or updating applications that are pending a decision by the immigration judge, including a decision on pretermission. In addition, the Departments dispute the commenters' assumption that immigration judge decisions to pretermit an application will be overturned. Immigration judges apply the immigration laws and would only pretermit applications that fail to demonstrate a prima facie case for eligibility for relief—in other words, that the application could be sufficient to establish eligibility for relief. Applications that are facially deficient

[39] The Departments note that DOJ has also recently taken steps to improve adjudicatory efficiency at the BIA. *See* EOIR, *Case Processing at the Board of Immigration Appeals* (Oct. 1, 2019), *https://www.justice.gov/eoir/page/file/1206316/download.*

in this manner would not comply with the applicable law and regulations, and, as such, the Departments would not expect such decisions to be overturned on appeal.

4. Standards for Consideration During Review of an Application for Asylum or for Statutory Withholding of Removal [40]

4.1. Membership in a Particular Social Group

Comment: One organization noted generally that the rule denies asylum to individuals fleeing violence and persecution. Commenters noted that the inclusion of ''particular social group'' in the statute was designed to create flexibility in the refugee definition so as to capture individuals who do not fall within the other characteristics enumerated in section 101(a)(42) of the INA, 8 U.S.C. 1101(a)(42), and to ensure that the United States provides protection in accordance with its treaty obligations. Commenters argued that the rule's narrowing of particular social group has been rejected by the Federal courts as contrary to congressional intent to align U.S. refugee law with the Convention relating to the Status of Refugees and its 1967 Protocol. *See Flynn* v. *Sec'y of Health, Ed. & Welfare,* 344 F. Supp. 94, 96 (E.D. Wis. 1972). Another organization stated that, by denying the most common grounds of particular social group membership, the rule ''abridges U.S. obligations under the Refugee Convention . . . which affords asylum seekers the opportunity to explain why they fit into a protected group.'' The organization also claimed that the rule breaches the United States' commitment to nonrefoulement, noting that the United States has committed itself to this principle as a party to the Refugee Protocol, the CAT, and customary international law. Commenters emphasized a quote from the UNHCR stating that ''[t]he term membership of a particular social group should be read in an evolutionary manner.''

Another organization noted that while the phrase ''particular social group'' in the Refugee Convention does not apply to every person facing persecution, the Convention requires only that a social group not be ''defined exclusively by the fact that it is targeted for persecution.'' According to the Convention, ''the actions of the persecutors may serve to identify or even cause the creation of a particular social group in society.'' As a result, the organization contended that the Convention allows particular social groups that do not exist independently of the persecution.

The organization claimed the NPRM takes the opposite approach, defining ''circular'' not only as particular social groups exclusively defined by persecution but also as those that do not exist independently of the persecution claim. The organization noted that, in doing so, the NPRM seeks to adopt the circularity analysis in *Matter of A–B–,* 27 I&N Dec. 316, which treats any group partially defined by the persecution of its members as circular. The organization alleged that this interpretation of circularity is a ''dramatic departure'' from longstanding precedent, noting that the courts of appeals have held that a particular social group is not circular unless it is defined ''entirely'' by persecution. The organization claimed that the Departments do not acknowledge or justify this ''departure,'' which makes the rule arbitrary. The organization also claimed that the Federal appellate cases cited in the rule have the same effect. In addition, the organization emphasized that the BIA has long accepted particular social groups with references to the persecution bringing asylum seekers to the United States.

One organization claimed the rule's requirement that the cognizable group must exist independently from the persecution abrogates the following specific particular social groups already recognized by circuit courts: Former gang members, *Arrazabal* v. *Lynch,* 822 F.3d 961 (7th Cir. 2016); former members of the Kenyan Mungiki, *Gatimi* v. *Holder,* 578 F.3d 611 (7th Cir. 2009); defected KGB agents, *Koudriachova* v. *Gonzales,* 490 F.3d 255 (2d Cir. 2007); young Albanian women targeted for prostitution, *Cece* v. *Holder,* 733 F.3d 662 (7th Cir. 2013) (en banc); former child guerilla soldiers in Uganda, *Lukwago* v. *Ashcroft,* 329 F.3d 157 (3d Cir. 2003); individuals targeted by Pakistani terrorist groups, *Rehman* v. *Att'y Gen. of U.S.,* 178 F. App'x 126 (3d Cir. 2006), and the Taliban, *Khattak* v. *Holder,* 704 F.3d 197 (1st Cir. 2013); and Ghanaians returning from the United States, *Turkson* v. *Holder,* 667 F.3d 523 (4th Cir. 2012).

Another organization claimed that, under international guidelines, the ''common characteristic'' and ''socially visible'' elements of a particular social group are meant to be ''disjunctive,'' requiring proof of either one or the other. The organization also alleged that the ''particularity'' requirement is unfounded, noting that, according to UNHCR, the size of the group is irrelevant in determining whether a particular social group exists.

Similarly, one organization noted that the rule would require a particular social group to be ''defined with particularity'' and ''recognized as socially distinct in the society at question,'' claiming that the NPRM fails to provide any reason for codifying these standards. The organization alleged that the particularity and social distinction requirements ''cut across'' each other, noting the BIA's interpretation that an asylum seeker ''identify a group that is broad enough that the society as a whole recognizes it, but not so broad that it fails particularity'' and claiming that this has caused the BIA to essentially end asylum grants based on particular social groups that have not been previously approved.

Multiple commenters called the rule ''unwise and discriminatory.'' Commenters alleged that the rule is designed to prevent individuals from Central America from receiving asylum and claimed that the rule evidences the Departments' intent to prevent ''whole classes of persons'' from claiming asylum based simply on ''the macro-level characteristics of their country of origin.'' One organization representing DHS employees criticized the Departments for creating a rule based on the belief that asylum seekers are engaging in ''gamesmanship'' within the United States legal system, a premise, the organization claimed, that is ''contrary to our experiences as adjudicators.'' The organization stated that several of the social groups ''slated for dismissal'' in the rule ''encompass a wide cross-section of potentially successful asylum claims.'' The organization also alleged that the rule creates a ''rebuttable presumption'' that asylum claims based on any of the ''broadly enumerated particular social groups'' are insufficient unless ''more'' is provided, but claimed the rule fails to define what is actually needed for a successful claim.

Another organization alleged that the NPRM's proposal would violate due process, claiming that the private interest at stake—preventing the violence or torture that would occur due to refoulement—is ''the most weighty interest conceivable.'' The organization contended that the government's countervailing interest is ''nonexistent'' due to the NPRM's silence, also alleging that ''working with pro se asylum seekers'' imposes a minimal burden on the government.

[40] As an initial matter, the Departments note that commenters' discussion on these points often referred solely to asylum claims. Where relevant, however, the Departments have also considered the comments in regards to statutory withholding of removal.

One organization claimed that the adjudication of asylum applications has become ''increasingly politicized'' over the past three years through the Attorney General's self-certification of cases. The commenter noted that the Attorney General has issued nine decisions in the past three years that restrict eligibility of relief for noncitizens (with four additional self-certified decisions pending), while only four precedential decisions were issued during the eight years of the previous administration. The organization stated that, rather than clarifying existing definitions, the rule ''virtually eliminates particular social group as a basis for asylum.''

One organization emphasized that if the Departments choose to codify the prerequisites to particular social groups as stated in the rule, they must ''consider all reasonable alternatives presented to'' them. Multiple organizations suggested the Departments adopt the *Matter of Acosta* standard for the analysis of particular social group claims, meaning that ''particular social group'' should be interpreted consistently with the other four protected characteristics laid out in the INA. 19 I&N Dec. 211, 233 (BIA 1985), *abrogated in part on other grounds by Matter of Mogharrabi,* 19 I&N Dec. 439 (BIA 1987). One organization emphasized that this definition is simple, straightforward, and could be understood by pro se asylum seekers.

Another organization alleged that the Departments failed to consider adopting the UNHCR definition of particular social group, which includes both immutability and the basic requirement that the group ''be perceived as a group by society.'' The organization contended that this standard, like the *Matter of Acosta* definition, is reasonable, emphasizing that it remains ''significantly closer to the other grounds for asylum in the INA'' than the Departments' proposal.

One organization expressed concern that the rule would codify the ''restrictive definition'' of particular social group announced in *Matter of M–E–V–G–,* 26 I&N Dec. 227, 237 (BIA 2014), noting that the rule shortens the definition set forth in *Matter of Acosta.* The organization also contended that the rule misconstrues the concept of particular social group by inserting unrelated legal issues into the definition, which the organization believes would lead to greater confusion for all parties involved. The organization emphasized that each particular social group claim should be evaluated on a ''case-by-case basis'' instead of being subjected to general rules that would result in ''blanket denials.'' Another organization stated that the Attorney General's own decision in *Matter of A–B–,* 27 I&N Dec. 316, is based on the necessity of a ''detailed, case-specific analysis of asylum claims'' and highlights the BIA's previous errors in ''assessing the cognizability of a social group without proper legal analysis.'' One organization asserted that the rule appears to codify the wrongly-decided *Matter of W–Y–C– & H–O–B–,* 27 I&N Dec. 189 (BIA 2018), and ''takes those restrictions even further.''

Another organization emphasized that the circuit courts have disagreed on ''at least a portion'' of the definition of particular social group. One organization noted that elements of the rule's proposed definition have met an ''uneven fate'' in the courts of appeals, with many courts finding at least one of the provisions inconsistent with the statutory text. Another organization contended that the circuit courts cannot be ''overruled'' by either this rule or ''the Attorney General's attempt to devise a new definition of 'particular social group' that intends to cut off certain claims'' that have been previously recognized by the circuit courts and the BIA. One organization noted that, while the NPRM states in its first footnote that agencies have the authority to re-interpret ambiguous statutory phrases, it fails to explain how the definitions at issue arise from an ambiguous term. Another organization claimed that until the Supreme Court resolves the disagreements surrounding the particular social group definition, the Departments have no authority to ''overrule'' the circuit courts' interpretation of this term.

Another organization alleged that the rule would ''carve out'' a laundry list of particular social groups toward which the administration has shown ''pervasive, unlawful hostility'' without any effort to ground these exceptions in the Departments' statutory authority, claiming this is a violation of the Administrative Procedure Act (''APA''). One organization contended that ''[t]he use of such brazen ipse dixit without more renders each entry on the list arbitrary,'' also claiming that this impedes the Departments' goal of consistency. The organization claimed the Departments failed to consider whether their ''laundry list'' of generally-barred particular social groups would result in the erroneous denial of meritorious claims.

Commenters claimed that one of the ''most unfair'' aspects of the rule is that it would require asylum seekers to state every element of a particular social group with exactness before the immigration judge. Commenters expressed particular concern with the portion of the rule stating that a failure to define a formulation of a particular social group before a judge constitutes a waiver of any such claim under the Act, including on appeal. One organization noted that this portion of the rule would disproportionately impact unrepresented asylum seekers, particularly those subjected to MPP, and would ''forever punish asylum seekers who were the victims of ineffective assistance of counsel.''

Another organization alleged that the combination of performance goals and interminable dockets will result in ''the demise of due process in Immigration Court for pro se litigants.'' The organization noted the importance of the ''motions practice'' in a legal system that is committed to due process, emphasizing the long-standing practice of allowing motions to reopen in the context of ineffective assistance of counsel. Another organization stated that, over the past five years, between 15 percent and 24 percent of all asylum seekers have been unrepresented by counsel, emphasizing that these individuals do not have training in United States asylum law, often speak little to no English, and are unfamiliar with the intricate rules surrounding particular social groups. One organization expressed specific concern for refugees. Another organization claimed that the rule provides no reasoning for its ''expansion of the punitive effect of waiver to encompass ineffective assistance claims,'' claiming this is against public policy and is also arbitrary and capricious; at least one other organization emphasized this point as well.

One organization expressed particular concern for members of the LGBTQ community, emphasizing that, due to the nature of the ''coming out and transitioning process,'' the formulation of a particular social group may change over time, also noting that a refugee may not know right away that he or she is HIV positive. The organization claimed that the rule, ''disregards the reality of LGBTQ lives'' and will cause LGBTQ asylum seekers to be sent back to danger merely because they were unable to ''come up with the right verbiage to describe the complicated process of coming out and transitioning.'' The organization claimed this issue is exacerbated by the fact that many of these individuals are unrepresented and do not speak English. Another organization noted that the INA requires exceptions to the one-year filing

deadline for ''changed and extraordinary circumstances,'' INA 208(a)(2)(D), 8 U.S.C. 1158(a)(2)(D), emphasizing that this is particularly important for this category of asylum seekers.

One organization claimed the rule would make it especially difficult for African asylum seekers to qualify for asylum based on particular social group membership. The organization also expressed concern for women survivors of female genital cutting (''FGC''), alleging that these individuals would not know to include this fact as part of a gender-based particular social group claim. The organization claimed it would be ''a miscarriage of justice'' to preclude these women from presenting claims.

One organization alleged that the rule would make it ''almost impossible'' for children, particularly those from Central America or Mexico, to obtain asylum protection based on membership in a particular social group. The organization alleged that the rule's barring of a particular social group claim that was not initially raised in the asylum application (or in the ''record'' before an immigration judge) raises ''serious due process concerns'' for children, as many of the children arriving in the United States have suffered immense trauma and may not be able to discuss their experiences for quite some time. The organization expressed particular concern for unaccompanied children, noting they are often unable to discuss the harm they experienced in their home country until they have spent time with a trusted adult. The organization noted that, for many children, the asylum process is the first time they ever discuss their experiences, claiming the rule ''is unrealistic and an untenable burden for most children.''

Commenters also stated that an asylum seeker's life should not depend on his or her ''ability to expertly craft arguments in the English language in a way that satisfies highly technical legal requirements.'' One organization stated that ''[a]pplying for asylum is not a word game; asylum seekers' lives are on the line with every application that an adjudicator decides.'' Multiple commenters claimed that asylum officers and immigration judges have a duty to help develop the record. One organization stated that the Departments should rely on the decisions of EOIR and Article III courts rather than on the expertise of asylum seekers. Finally, one organization expressed concern that this portion of the rule contains no exceptions for minors or individuals who are mentally ill or otherwise incompetent, stating that holding these respondents to this kind of legal standard violates their rights under the Rehabilitation Act. *See* 29 U.S.C. 794; *see also Franco-Gonzales* v. *Holder,* 767 F. Supp. 2d 1034 (C.D. Cal. 2010).

Response: The Departments disagree with general comments that the rule would deny asylum to all individuals fleeing violence and persecution. The Departments note that asylum protection is not available to every applicant who is fleeing difficult or dangerous conditions in his or her home country. To qualify for asylum, an applicant must demonstrate, among other things, that the feared persecution would be inflicted ''on account of'' a protected ground, such as membership in a particular social group. *See* INA 101(a)(42), 8 U.S.C. 1101(a)(42) (defining ''refugee'' as a person who, inter alia, has suffered ''persecution or a well-founded fear of persecution on account of . . . membership in a particular social group''). Even accepting that the term ''particular social group'' was intended to create flexibility in the refugee definition, the contours of that flexible term are clearly ambiguous and within the purview of the Departments to decide. *See, e.g., Matter of A–B–,* 27 I&N Dec. at 326 (''As the Board and the Federal courts have repeatedly recognized, the phrase 'membership in a particular social group' is ambiguous.'' (collecting cases)). Accordingly, the Departments are establishing clear guidelines for adjudicators and parties regarding the parameters of particular-social-group claims. The Departments believe that such guidelines will promote a more uniform approach towards adjudicating such claims. This will not only aid adjudicators in applying a more uniform standard, but will also aid parties such that they may have a clearer understanding of how they may prevail on a particular social group claim as they develop their applications.

The Departments disagree that the proposed changes to particular-social-group claims violate the Act, case law, or the due process rights of immigrants. As noted in the NPRM, Congress has not defined the term ''membership in a particular social group.'' *See* 85 FR at 36278; *see also Grace II,* 965 F.3d at 888 (''The INA nowhere defines 'particular social group.' '').[41] Additionally, despite commenters' contentions that the Convention Relating to the Status of Refugees (''Refugee Convention''), July 28, 1951, 19 U.S.T. 6259, 189 U.N.T.S. 150, or the related Refugee Protocol offers guidance on the matter, the term is not defined in either of those instruments. 85 FR at 36278; *see also Matter of A–B–,* 27 I&N Dec. at 326, n.5 (''The Protocol offers little insight into the definition of 'particular social group,' which was added to the Protocol 'as an afterthought.' '') (quoting *Matter of Acosta,* 19 I&N Dec. at 232)).

The Board has noted that the term ''particular social group'' is both ambiguous and difficult to define. *Matter of M–E–V–G–,* 26 I&N Dec. at 230 (''The phrase 'membership in a particular social group,' which is not defined in the Act, the Convention, or the Protocol, is ambiguous and difficult to define.''). Moreover, the Board has also recognized that prior approaches to defining the term have led to confusion and inconsistency, warranting further evaluation. As the Board stated in *M–E–V–G–:*

> Now, close to three decades after *Acosta,* claims based on social group membership are numerous and varied. The generality permitted by the *Acosta* standard provided flexibility in the adjudication of asylum claims. However, it also led to confusion and a lack of consistency as adjudicators struggled with various possible social groups, some of which appeared to be created exclusively for asylum purposes. . . . In *Matter of R–A–,* 22 I&N Dec. 906, 919 (BIA 1999; A.G. 2001), we cautioned that ''the social group concept would virtually swallow the entire refugee definition if common characteristics, coupled with a meaningful level of harm, were all that need be shown.''

Id. at 231 (footnote omitted). Consequently, the inherently case-by-case nature of assessing the cognizability of a particular social group, the lack of a clear definition of the term and its consideration through an open-ended and largely subjective

[41] One commenter questioned the accuracy of the Departments' citation to and characterization of *Grace II's* underlying case, *Grace I,* 344 F. Supp. 3d at 146, because, according to the commenter, the case stated that the Attorney General could ''not propose a general rule that a particular social group will not qualify for asylum'' and did ''not reach the question of whether the Attorney General could propose a general rule that a particular group does qualify for asylum.'' Irrespective of the commenter's characterization of the Departments' citation, the D.C. Circuit recently reversed the district court regarding its statements that the agency action contested in that litigation improperly established a categorical bar against recognizing a specified particular social group. *Grace II,* 965 F.3d at 906. Specifically, the court determined that the Departments' use of the term ''generally'' demonstrated that the Departments had not imposed a categorical rule against finding the particular social group at issue in that litigation. *Id.* Similarly, the Departments here have set forth a list of particular social groups that ''generally, without more'' will not be cognizable, but have specifically recognized that the regulation does not foreclose that, in rare circumstances, such facts could be the basis for finding a particular social group, given the fact- and society specific nature of this determination.'' 85 FR at 36279.

lens by adjudicators, and the potential for confusion and inconsistent application—particularly with conflicting circuit court interpretations of similar groups—all make the definition of a particular social group ripe for rulemaking. *See Lopez* v. *Davis,* 531 U.S. 230, 244 (2001) (observing that ''a single rulemaking proceeding'' may allow an agency to more ''fairly and efficiently'' address an issue than would ''case-by-case decisionmaking'' (quotation marks omitted)).

Furthermore, courts have also expressly held that the term is ambiguous. *See, e.g., Cordoba* v. *Holder,* 726 F.3d 1106, 1114 (9th Cir. 2013) (''We have recognized that the phrase 'particular social group' is ambiguous.''); *Fatin,* 12 F.3d at 1238 (''Both courts and commentators have struggled to define 'particular social group.' Read in its broadest literal sense, the phrase is almost completely open-ended. Virtually any set including more than one person could be described as a 'particular social group.' Thus, the statutory language standing alone is not very instructive.'').[42]

As noted in the NPRM, ambiguities in the Act should ''be resolved, first and foremost, by the agency.'' 85 FR at 36265 (quoting *Matter of R–A–,* 24 I&N Dec. at 631 (quoting *Brand X,* 545 U.S. at 982 (internal quotation and citations omitted)). Further, the Supreme Court has clearly indicated that administrative agencies, rather than circuit courts, are the most appropriate entities to make determinations about asylum eligibility in the first instance. The Supreme Court, in *INS* v. *Ventura,* 537 U.S. 12 (2002), noted:

> Within broad limits the law entrusts the agency to make the basic asylum eligibility decision here in question. . . . In such circumstances a judicial judgment cannot be made to do service for an administrative judgment. . . . Nor can an appellate court . . . intrude upon the domain which Congress has exclusively entrusted to an administrative agency. . . . A court of appeals is not generally empowered to conduct a *de novo* inquiry into the matter being reviewed and to reach its own conclusions based on such an inquiry.

Id. at 16 (cleaned up)); *cf. Gonzales* v. *Thomas,* 547 U.S. 183, 185–87 (2006) (applying *Ventura* to require a remand from the circuit court to the agency to determine a question of the meaning of ''particular social group). ''Indeed, 'judicial deference to the Executive Branch is especially appropriate in the immigration context,' where decisions about a complex statutory scheme often implicate foreign relations.'' *Scialabba* v. *Cuellar de Osorio,* 573 U.S. 41, 56–57 (2014) (plurality op.) (quoting *INS* v. *Aguirre-Aguirre,* 526 U.S. 415, 425 (1999)). Accordingly, the Departments are acting within their well-established authority to define the term ''particular social group.''

Furthermore, the Departments' regulations regarding the adjudication of claims pertaining to ''membership in a particular social group'' are reasonable interpretations of the term, as evidenced by a long history of agency and circuit court decisions to have interpreted the terms consistently with the Departments' guidelines. *See Matter of W–G–R–,* 26 I&N Dec. 208, 222–23 (BIA 2014) (pertaining to past or present criminal activity or associations)*; Cantarero* v. *Holder,* 734 F.3d 82, 86 (1st Cir. 2013) (same); *Gonzalez* v. *U.S. Att'y Gen.,* 820 F.3d 399, 405 (11th Cir. 2016) (same); *Matter of A–B–,* 27 I&N Dec. at 320 (pertaining to presence in a country with generalized violence or a high crime rate and private criminal acts of which governmental authorities were unaware or uninvolved)*; Matter of S–E–G–,* 24 I&N Dec. 579, 585–86 (BIA 2008) (pertaining to attempted recruitment of the applicant by criminal, terrorist, or persecutory groups); *Matter of E–A–G–,* 24 I&N Dec. 591, 594–95 (BIA 2008) (same); *Matter of A–M–E– & J–G–U–,* 24 I&N, Dec. 69, 75 (BIA 2007) (same); *Matter of Pierre,* 15 I&N Dec. 461, 462–63 (BIA 1975) (pertaining to interpersonal disputes of which governmental authorities were unaware or uninvolved); *Gonzalez-Posadas* v. *Att'y Gen. of U.S.,* 781 F.3d 677, 685 (3d Cir. 2015) (same); *Gonzales-Veliz* v. *Barr,* 938 F.3d 219, 230–31 (5th Cir. 2019) (pertaining to private criminal acts of which governmental authorities were unaware or uninvolved); *Delgado-Ortiz* v. *Holder,* 600 F.3d 1148, 1151–52 (9th Cir. 2010) (''We conclude that Petitioners' proposed social group, 'returning Mexicans from the United States,' . . . is too broad to qualify as a cognizable social group.''); *Sam* v. *Holder,* 752 F.3d 97, 100 (1st Cir. 2014) (Guatemalans returning after a lengthy residence in the United States is not a cognizable particular social group).

The Departments agree with commenters that circuit court interpretations of the phrase ''particular social group'' have been uneven, and the inconsistency with which that phrase has been evaluated strongly militates in favor of the agencies adopting a clearer, more uniform definition. Further, the Departments have considered all relevant circuit court law on the issue and note that significant conflicts exist among the various interpretations. *See, e.g., Paloka* v. *Holder,* 762 F.3d 191, 197 (2d Cir. 2014) (highlighting conflicting circuit court decisions regarding whether young Albanian women are a particular social group and collecting cases showing differing circuit court decisions regarding cognizability of other particular social groups). Nevertheless, the Departments believe that the rule reflects an appropriate and reasonable synthesis of legal principles consistent with the Departments' respective policy positions. Additionally, as noted in the NPRM, 85 FR at 36265 n.1, to the extent that some circuits have disagreed with the Departments' reasonable interpretation, the Departments' proposed rule would warrant re-evaluation in appropriate cases under well-established principles. *See Brand X,* 545 U.S. at 982; *cf. Ventura,* 537 U.S. at 16–17 (within broad limits, the INA entrusts agencies, not circuit courts, to make basic asylum eligibility determinations).

The Departments disagree with commenters' assertions that the rule would render it ''virtually impossible'' to prevail on asylums claim involving membership in a particular social group or undermine the concept of ''case-by-case'' adjudication of particular-social-group claims, as described in *Matter of A–B–,* 27 I&N Dec. 316. Assuming the formulation of the proposed particular social group would, if supported, meet the definition of such a group in the first instance—*i.e.,* assuming the proposed particular social group sets forth a prima facie case that the group is based on an immutable or fundamental characteristic, is defined with particularity, and is recognized as socially distinct—the rule does not alter an adjudicator's responsibility to determine whether the facts and evidence of each individual case ultimately establish that the proposed particular social group is cognizable. Thus, whether a proposed group has—*see, e.g., Matter of Toboso-Alfonso,* 20

[42] One commenter also suggests that the Departments cited *Cordoba,* 726 F.3d 1106, with a ''glaring omission.'' The commenter suggests that *Cordoba* acknowledges that the term ''particular social group'' is ambiguous, but asserts that the Departments fail to recognize that the case goes on to ''clear up that ambiguity.'' The Departments need not delve further into this analysis, which is refutable for various reasons, other than to state that the case plainly supports the proposition that the term ''particular social group'' is ambiguous and that such ambiguities are left to the Departments to clarify pursuant to agency authority. *Chevron,* 467 U.S. at 845 (''Once [the court] determined, after its own examination of the legislation, that Congress did not actually have an intent regarding the applicability of the bubble concept to the permit program, the question before it was not whether in its view the concept is 'inappropriate' in the general context of a program designed to improve air quality, but whether the [agency's] view that it is appropriate in the context of this particular program is a reasonable one.'').

I&N Dec. 819, 822 (BIA 1990) (designated as precedent by Attorney General Order No. 1895–94 (June 12, 1994)) (homosexuals in Cuba may be a particular social group)—or has not—*see, e.g., Matter of Vigil,* 19 I&N Dec. 572, 575 (BIA 1988) (young, male, urban, unenlisted Salvadorans do not constitute a particular social group)—been recognized in other cases is not dispositive of whether the proposed particular social group in an individual case is cognizable. *See S.E.R.L.* v. *Att'y Gen.,* 894 F.3d 535, 556 (3d Cir. 2018) (''Consequently, it does not follow that because the BIA has accepted that one society recognizes a particular group as distinct that all societies must be seen as recognizing such a group.''). Adjudicators should not assume that a particular social group that has been found cognizable in one case is cognizable in every other case in which it is asserted or is cognizable in perpetuity, nor should they assume the opposite. *Id.* Rather, if the proposed particular social group would be legally cognizable if sufficiently supported by evidence, adjudicators should continue to adjudicate particular social group claims on a case-by-case basis.

Further, as the Departments have specified, while the listed groups would be ''generally insufficient to establish a particular social group'' because they do not meet the definition of such a group, the Departments do not entirely foreclose the possibility of establishing an asylum claim on those bases. Rather, the rule simply lists social groups that, ''without more,'' generally will not meet the particularity and social distinction requirements for particular social group. 85 FR at 36279.

Such general guidelines are an appropriate use of agency authority that comports with the Attorney General's decision in *Matter of A–B–. Cf.* 8 CFR 208.4(a)(4),(5), 1208.4(a)(4), (5) (providing general categories of circumstances that may qualify as changed circumstances or extraordinary circumstances for purposes of INA 208(a)(2)(D), 8 U.S.C. 1158(a)(2)(D)); 8 CFR 212.7(d), 1212.7(d) (''The Attorney General, in general, will not favorably exercise discretion under section 212(h)(2) of the Act . . . with respect to immigrant aliens who are inadmissible under section 212(a)(2) of the Act in cases involving violent or dangerous crimes, except in extraordinary circumstances[.]''); *Matter of Y–L–,* 23 I&N Dec. at 274–76 (establishing a general presumption that aggravated felony drug trafficking crimes are ''particularly serious crimes'' for purposes of INA 241(b)(3)(B), 8 U.S.C. 1231(b)(3)(B)). The Departments are providing clarity on this issue through rulemaking, rather than through other forms of sub-regulatory guidance or through the development of case law in individual adjudications, in order to promote much needed uniformity and clarity on the particular-social-group issue. *See also* Memorandum from Jefferson B. Sessions, III, Attorney General, re: *Prohibition on Improper Guidance Documents* 1 (Nov. 16, 2017), *https://www.justice.gov/opa/press-release/file/1012271/download* (in contrast with issuing informal ''guidance documents,'' ''notice-and-comment rulemaking . . . has the benefit of availing agencies of more complete information about a proposed rule's effects than the agency could ascertain on its own, and therefore results in better decision making''). The Department applies the same response to address commenters' concerns with respect to the ''broad wording'' of the groups that the rule describes as generally not cognizable for asylum claims.

The Departments also disagree with commenters that the rule is unwise or discriminatory, or that the purpose of this rule is to exclude certain groups of applicants or target individuals from Central America and Mexico. As stated above, the rule is not ''immoral,'' motivated by racial animus or promulgated with discriminatory intent. Rather, it is rooted in case law from the BIA, multiple circuits, and the Supreme Court, none of which have evinced a racial or discriminatory animus. Further, the rule is intended to help the Departments better allocate limited resources in order to more expeditiously adjudicate meritorious asylum, statutory withholding of removal, and CAT protection claims. Relatedly, with respect to commenters' concerns about this rule's potential effect on certain, discrete groups—*e.g.,* LGBTQ individuals, minors, and other specific nationalities—the Departments note that they have codified a long-standing test for determining cognizability of particular social groups and have set forth a list of common fact patterns involving particular-social-group claims that generally will not meet those well-established requirements. The Departments did not first determine which groups should or should not be cognizable and craft a rule around that determination, and the rule does not single out any discretely-labeled groups in the manner suggested by commenters. Moreover, as the rule makes clear, it applies ''in general'' and does not categorically rule out specific claims depending on the claim's evidentiary support. Further, because each asylum application is adjudicated based on its own facts and evidentiary support and because the rule does not categorically rule out specific claims, commenters' concerns about the effects of the rule on broad, undifferentiated categories without reference to specific claims are conclusory, conjectural, unfounded, and wholly and inherently speculative.

With respect to commenters' claims that the social groups that would be dismissed under the rule would historically encompass a large number of potentially successful asylum claims, the Departments reiterate that they are setting forth, by regulation, a reasonable interpretation of the statutory term ''particular social group'' that will ameliorate stressors upon the healthy functioning of our immigration system and encourage uniformity of adjudications. Even assuming, without deciding, that there are other, broader interpretations of the term ''particular social group'' that might encompass a larger number of asylum applicants, the relevant inquiry is not whether the Departments' interpretation is the preferred interpretation or even the best interpretation. Rather the relevant inquiry is whether the Departments' interpretation is reasonable. *See Chevron,* 467 U.S. at 845; *see also Holder* v. *Martinez Gutierrez,* 566 U.S. 583, 591 (2012) (observing that the agency's ''position prevails if it is a reasonable construction of the [INA], whether or not it is the only possible interpretation or even the one a court might think best''). The regulations indeed set forth a reasonable interpretation of the term ''particular social group,'' for the reasons described above. The Departments also note again that the rule will not categorically exclude the listed groups, rather it issues guidance that such groups will ''generally'' not meet the requirements of a cognizable particular social group ''without more.''

Relatedly, commenters' statements that the rule would result in denial of meritorious claims are circular. A claim is meritorious if it meets all of the statutory requirements for asylum, including, where appropriate, the ambiguous statutory requirement of demonstrating ''membership in a particular social group.'' The Departments note the commenters' position that the term should be defined more broadly than what the Departments proposed, and, to be sure, a broader definition would result in more groups being recognized as cognizable. However, for the reasons explained in the NPRM, 85 FR at

36277–79, and throughout this rulemaking, the Departments have set forth a reasonable definition of the term as part of their well-established authority to do so. To the extent that applicants are unable to meet the statutory requirements, including ''membership in a particular social group'' as that term is reasonably defined by the Departments, their claims are not meritorious.

The Departments believe that commenter assertions that parties will need to prove that they do not belong in or are distinct from a listed particular social group misconstrue the particular social group analysis. People may, and are likely to, belong to multiple groups, which might or might not include cognizable particular social groups. An applicant need not prove that he or she does not belong to a non-cognizable group, only that he or she belongs to a cognizable group and was persecuted on account of that membership. Membership in a non-cognizable group does not negate one's membership in a cognizable group. Thus, an asylum applicant who has membership in one of the listed groups, which will generally not be cognizable without more, does not preclude an applicant from prevailing on a separate cognizable claim.

The Departments disagree with commenter assertions that the rule impermissibly creates a negative presumption against cognizability of the listed groups. As an initial point, the listed groups, as discussed in the NPRM, 85 FR at 36279, are generally rooted in case law, and commenters neither allege that the circuit court case law underlying the listing of these groups establishes a ''negative presumption'' against groups that have not been recognized in that case law, nor urge the Departments to abandon their longstanding policy to treat circuit court case law as binding—including decisions regarding the cognizability of alleged particular social groups—in the circuit in which it arises. Thus, to the extent that commenters disagree with the Departments' codification of existing case law, that disagreement lies with the case law itself. Additionally, in the Departments' experience, many advocates treat the recognition of a particular social group—either by the Board or a circuit court—as establishing a positive presumption, if not a categorical rule, that the group is cognizable in every case, yet commenters expressed no concern with that type of presumption. *Cf. S.E.R.L.,* 894 F.3d at 556 (''S.E.R.L. relies heavily on [*Matter of A–R–C–G–*], in which the Board considered a group consisting of married female victims of domestic violence.''); *Amezcua-Preciado* v. *U.S. Att'y Gen.,* 943 F.3d 1337, 1344 (11th Cir. 2019) (discussing similar proposed particular social groups across multiple circuits that closely tracked the group recognized by the BIA in *Matter of A–R–C–G–*); *Del Carmen Amaya-De Sicaran* v. *Barr,*—F.3d—, 2020 WL 6373124 (4th Cir. 2020) (noting decisions from other circuits addressing similar proposed particular social groups that closely tracked the group recognized by the BIA in *Matter of A–R–C–G–*). As the Departments discussed, *supra,* the rule does not depart from longstanding principles regarding the case-by-case nature of asylum adjudications. Thus, adjudicators do not apply a positive presumption that a particular social group that has been found cognizable in one case is cognizable in every other case in which it is asserted or is cognizable in perpetuity, nor do they apply a categorical negative presumption that a group listed in the rule is always and in every case not cognizable. Nothing in the rule creates categorical presumptions, either positive or negative.

It is always the applicant's burden to demonstrate that he or she belongs to a cognizable particular social group and must set forth the facts and evidence to establish that claim, regardless of whether or not the proposed group is described in this rule. INA 208(b)(1)(B), 8 U.S.C. 1158(b)(1)(B). This rulemaking highlights common proposed groups that generally, without more, will not meet an applicant's burden to demonstrate membership in a ''particular social group,'' and the burden remains on the applicant, as it always has, to demonstrate that he or she is a member of a cognizable particular social group. *Id.* This rulemaking puts applicants on notice that such groups, generally, without more, will not be cognizable. To the extent that an applicant believes that his or her membership in one of the listed groups should nevertheless be recognized, he or she may present his or her claim stating why the proposed group is cognizable and, as appropriate, appeal it to the BIA and a Federal circuit court.

The commenters' statements about the Attorney General's authority to certify cases and issue precedential decisions relate to powers delegated to the Attorney General by Congress that have existed for decades and are far outside of the scope of this rulemaking. INA 103(a)(1), (g), 8 U.S.C. 1103(a)(1), (g); 8 CFR 1003.1(h). All decisions in the immigration system are made in accordance with the evidence and applicable law and policy. In particular, EOIR's mission remains the same—to adjudicate cases in a fair, expeditious, and uniform manner. *See* EOIR, About the Office, *https://www.justice.gov/eoir/about-office* (last updated Aug. 14, 2018); *see also* 8 CFR 1003.1(d)(1)(ii) (''Board members shall exercise their independent judgment and discretion in considering and determining the cases coming before the Board[.]''); 8 CFR 1003.1(e)(8)(ii) (''[T]he Director shall exercise delegated authority from the Attorney General identical to that of the Board[.]''); 8 CFR 1003.10(b) (''immigration judges shall exercise their independent judgment and discretion'').

The Departments decline to incorporate the commenter recommendation to codify either the *Matter of Acosta* standard for particular social group, which required only that a group be immutable, or the alleged UNHCR standard, which commenters stated requires immutability and that the group ''be perceived as a group by society'' in lieu of the *Matter of M–E–V–G–* standard, which requires immutability, particularity, and social distinction. To do so would be to shirk decades of development in particular social group claims in favor of a standard set forth shortly after enactment of the Refugee Act of 1980, when ''relatively few particular social group claims had been presented'' to immigration adjudicators, and which ''led to confusion and a lack of consistency'' in subsequent years as adjudicators struggled with ''numerous and varied'' proposed groups. *See Matter of M–E–V–G–,* 26 I&N Dec. at 231. Moreover, ''immutability, while important, has never been the last or only word on the definition of a social group,'' because ''[m]any social groups are labile in nature.'' *Ahmed* v. *Ashcroft,* 348 F.3d 611, 617 (7th Cir. 2003). Further, notwithstanding the commenter's statement that the *M–E–V–G–* standard is confusing, the Departments note that the nearly all of the circuits have applied the *M–E–V–G–* test and the Third and Ninth Circuits have expressly accorded *Chevron* deference to that framework. *See, e.g., S.E.R.L.,* 894 F.3d at 554 n.20 (collecting cases). As the commenter notes, the Seventh Circuit has neither rejected nor endorsed the framework.

Relatedly, the Departments will not incorporate commenter suggestions to expand the regulatory language with respect to the requirement of

immutability to include characteristics that are ''so fundamental to individual identity or conscience that it ought not be required to be changed[,]'' as stated in *Matter of Acosta.* 19 I&N Dec. at 233. Contrary to the commenter's assertion, the Departments clearly noted in the NPRM that this rulemaking codifies the ''longstanding requirements'' of immutability, particularity, and social distinction, recognizing that ''[i]mmutability entails a common characteristic: A trait that the members of the group either cannot change, or should not be required to change because it is fundamental to their individual identities or consciences.'' 85 FR at 36278 (internal quotations omitted) (citing *Matter of Acosta,* 19 I&N Dec. at 233). Accordingly, the Departments believe that this language adequately addresses the commenter concerns without further expanding the definition in the regulatory language.

The Departments disagree with commenters' concerns that the rule's requirement that the particular social group must have existed independently of the alleged persecutory acts and cannot be defined exclusively by the alleged harm is arbitrary. 85 FR at 36278. This codifies the Attorney General's analysis for determining whether a social group has been defined ''circularly,'' as laid out in *Matter of A–B–,* 27 I&N Dec. at 334 (''To be cognizable, a particular social group must 'exist independently' of the harm asserted in an application for asylum or statutory withholding of removal.''); *see generally Matter of M–E–V–G–,* 26 I&N Dec. at 243 (''The act of persecution by the government may be the catalyst that causes the society to distinguish [a collection of individuals] in a meaningful way and consider them a distinct group, but the immutable characteristic of their shared past experience exists independent of the persecution.''). In response to commenters' assertions that the Convention allows for particular social groups that do not exist independently of the persecution, and that this rule reflects a ''departure'' from the current particular-social-group adjudication, the Departments reiterate that ''[t]he 'independent existence' formulation'' has existed for some time and ''has been accepted by many courts.'' 85 FR at 36278; *see, e.g., Perez-Rabanales* v. *Sessions,* 881 F.3d 61, 67 (1st Cir. 2018) (''A sufficiently distinct social group must exist independent of the persecution claimed to have been suffered by the alien and must have existed before the alleged persecution began.''); *Lukwago,* 329 F.3d at 172 (''We agree that under the statute a 'particular social group' must exist *COM007*independently of the persecution suffered by the applicant for asylum.''); *accord Amaya-De Sicaran,* 2020 WL 6373124 at *5 (''The proposition that a cognizable particular social group cannot be defined by the underlying persecution is hardly controversial. The anti-circularity principle—and the *Chevron* deference to which it is entitled—has won wide acceptance among the circuit courts . . . . Even prior to the Attorney General's decision, we have applied the anti-circularity principle . . . . And a broader examination of caselaw pre-*Matter of A–B–* confirms that this is no new proposition.'').

In recent litigation, asylum seekers did ''not challenge *A–B–*'s description of the circularity rule'' and, the court determined, *A–B–*'s test sets forth ''exactly the analysis required to determine whether a particular claim is or is not circular.'' *Grace II,* 965 F.3d at 905. For courts that have rejected this ''independent existence'' requirement, *see, e.g., Cece,* 733 F.3d at 671–72, both subsequent decisions recognizing the requirement, *see, e.g., Matter of A–B–,* 27 I&N Dec. 316, and *Matter of M–E–V–G–,* 26 I&N Dec. 227, and the Departments' proposed rule codifying it would warrant re-evaluation under well-established principles, *see Brand X,* 545 U.S. at 982; *see also Amaya-De Sicaran,* 2020 WL 6373124 at *5 (''The Attorney General's [anti-circularity formulation] in *Matter of A–B–* is not arbitrary and capricious.'').

The Departments disagree with commenters' concerns about due process violations with respect to the rule's requirement that, while in proceedings before an immigration judge, an applicant must ''first define the proposed particular social group as part of the asylum application or otherwise in the record'' or ''waive any claim based on a particular social group formulation that was not advanced.'' To the extent that this requirement allegedly ''goes further than'' *Matter of W–Y–C–& H–O–B–,* 27 I&N Dec. 189, as the commenter alleges, this requirement is merely a codification of the longstanding principle that arguments not made in front of an immigration judge are deemed waived for purposes of further review. *See, e.g., In re J–Y–C–,* 24 I&N Dec. 260, 261 n.1 (BIA 2007) (claim not raised below is not appropriate to consider on appeal).

Contrary to commenters' concerns, the rule does not violate notions of fairness or due process.[43] Nothing in the rule eliminates an alien's right to notice and an opportunity to be heard, which are the foundational principles of due process. *See Matthews* v. *Eldridge,* 424 U.S. 319, 348–49 (1976) (''The essence of due process is the requirement that a person in jeopardy of serious loss (be given) notice of the case against him and opportunity to meet it.'' (cleaned up)). Aliens remains subject to specified procedures regarding claims of a fear of return to an alien's country of nationality, including the ability to have a claim reviewed or heard by an immigration judge. Moreover, the fact that applicable law may limit the types of claims an alien may bring—*e.g.,* an asylum claim based on a fear of persecution unrelated to one of the five statutory grounds in INA 101(a)(42), 8 U.S.C. 1101(a)(42)—or the ability of an alien to bring an asylum or statutory withholding claim at all—*e.g.,* an alien convicted of an aggravated felony for which the alien was sentenced to an aggregate term of imprisonment of at least five years, INA 208(b)(2)(A)(ii), (B)(i) and 241(b)(3)(B)(ii), 8 U.S.C. 1158(b)(2)(A)(ii), (B)(i) and 1231(b)(3)(B)(ii)—does not mean that an alien has been deprived of due process. As explained in the NPRM and reiterated herein, this rule is rooted in well-established law and does not violate an alien's due process right regarding an application for relief or protection from removal.

Some commenters objected to the procedural requirement that an alien must initially define the proposed particular social group as either part of the record or with the application. The INA directs the Attorney General to establish procedures for the consideration of asylum applications, INA 208(d)(1), 8 U.S.C. 1158(d)(1), and regulations already require both an

[43] Asylum is a discretionary benefit demonstrated by the text of the statute that states the Departments ''*may* grant asylum,'' INA 208(b)(1)(A), 8 U.S.C. 1158(b)(1)(A) (emphasis added); *Dep't of Homeland Sec.* v. *Thuraissigiam,* 140 S. Ct. 1959, 1965 n.4 (2020) (''A grant of asylum enables an alien to enter the country, but even if an applicant qualifies, an actual grant of asylum is discretionary.''), and provides authority to the Attorney General and Secretary of Homeland Security to limit and condition, by regulation, asylum eligibility under INA 208(b)(2)(C), (d)(5)(B), 8 U.S.C. 1158(b)(2)(C), (d)(5)(B). Courts have found that aliens have no cognizable due process interest in the discretionary benefit of asylum. *See Yuen Jin,* 538 F.3d at 156–57; *Ticoalu,* 472 F.3d at 11 (citing *DaCosta,* 449 F.3d at 49–50). In other words, ''there is no constitutional right to asylum per se.'' *Mudric* v. *Att'y Gen. of U.S.,* 469 F.3d 94, 98 (3d Cir. 2006). Thus, how the Departments choose to exercise their authority to limit or condition asylum eligibility and an adjudicator's consideration of an applicant's conduct in relation to asylum eligibility do not implicate due process claims.

application for an alien to seek asylum, 8 CFR 208.3(a) and 1208.3(a), and that the application be completed in full to be filed, *id.* 208.3(c)(3) and 1208.3(c)(3). To the extent that some commenters' concerns regarded the exactness with which an alien must define the particular social group, the Departments note that most asylum applicants, 87 percent, have representation, EOIR, *Current Representation Rates* (Oct. 13, 2020), *https://www.justice.gov/eoir/page/file/1062991/download,* and that aliens, if of limited English proficiency, are able to avail themselves of the resources provided to them by the government that detail pro bono or low cost alternatives.

One commenter worried that an alien would have to ''expertly craft arguments in the English language in a way that satisfies highly technical legal requirements.'' The Department disagrees that this is what the regulations require. As an initial point, nothing in the rule requires an alien to craft arguments when applying for asylum. Aliens, with or without representation, have filled out asylum applications for decades, including by stating particular social groups as a basis for the asylum claim. Commenters have not submitted any evidence or alleged any change in an alien's ability to complete the application over the preceding 40 years, and the Departments are unaware of any reasons or allegations that aliens are now less capable of filling out an application—including stating a particular social group, if appropriate—that has been used for years. An alien simply has to state in the application why the alien is afraid. As noted in the NPRM, the specific form of the delineation will not be considered over and above the substance of the alleged particular social group. Further, if there are deficiencies, the alien will be provided an opportunity to correct them. Nothing in the rule requires aliens to ''craft arguments'' meeting ''highly technical legal requirements,'' and commenters' suggestions to the contrary are simply not consistent with either the rule and the longstanding practice.

One commenter indicated that it was the asylum officer's or immigration judge's duty to assist in developing the record, citing section 240(b)(1) of the Act, 8 U.S.C. 1229a(b)(1); *Jacinto,* 208 F.3d at 734 (an immigration judge has the duty to fully develop the record where a respondent appears pro se); and *Agyeman* v. *INS,* 296 F.3d 871, 877 (9th Cir. 2002) (an immigration judge must adequately explain the procedures to the respondent, including what he must prove to prevail at the hearing). Even accepting the immigration judge's duty as described by the cited case law, this is not in conflict with the rule, as the rule clearly explains by regulation what an applicant must do to demonstrate a cognizable particular social group, a concept which was previously articulated in disparate BIA decisions that have been interpreted differently by the various circuits. Additionally, even if, as stated in *Jacinto,* an immigration judge has a duty to fully develop the record, this does not obviate the applicant's burden of demonstrating at least prima facie eligibility for the relief which he or she is seeking prior to proceeding to a more intensive hearing.

Regarding commenters' concerns focused on the ability for aliens to seek redress after an improper particular social group was presented based on ineffective assistance of counsel, the Departments note that the rule is consistent with both practice and applicable law. If a particular social group is not presented because the alien did not tell his or her counsel about it, then there has been no ineffective assistance on the part of counsel. If the alien did provide his or her counsel with a particular social group and counsel elected not to present it as a strategic choice, then there is no basis to reopen the proceedings. *See In re B–B–,* 22 I&N Dec. 309, 310 (BIA 1998) (''subsequent dissatisfaction with a strategic decision of counsel is not grounds to reopen''); *cf. Matter of Velasquez,* 19 I&N Dec. 377, 382 (BIA 1986) (concession of attorney is binding on an alien absent egregious circumstances). Nevertheless, the Departments recognize there may be unique ''egregious circumstances'' in which reopening based on ineffective assistance of counsel may be warranted, provided that the appropriate procedural requirements for such a claim are observed. *See Matter of Lozada,* 19 I&N Dec. 637, 639 (BIA 1988). Thus, the Departments are revising the final rule to account for such a scenario, though they expect such claims to be rare.

The Departments disagree with the commenters' fairness concerns with respect to the rule's requirement that applicants define the proposed particular social group as part of the asylum claim. As an initial point, asylum applicants have provided definitions of alleged particular social groups in asylum applications for many years, and there is no evidence of any recent change that would preclude them from doing so. The commenters' concerns may be based on an inaccurate belief that the rule requires legal precision of a particular social group, but as discussed above, that is simply not the case. Adjudicators are experienced with addressing the substance rather than the form of a claim, and articulation deficiencies will have an opportunity for correction before an immigration judge renders a decision.

The Departments also acknowledge commenters' concerns about the ''ever changing landscape'' of particular-social-group law and the due process concerns associated with that. The ''ever-changing landscape'' is, in fact, a principal animating factor behind this rulemaking, as the Departments believe the rule will function as a ''hard reset'' on the divergent—and sometimes contradictory—case law regarding particular social groups over the past several years in lieu of clearer guidelines that are both reasonable and easier for adjudicators and applicants alike to follow. In particular, the current state of case law may make it confusing for applicants to appreciate what is or is not a cognizable group, and the rule directly addresses that concern by providing clear definitions that should allow for more effective consideration of meritorious claims. In short, providing clearer guidance should reduce due process concerns, rather than increase them.

Similarly, the Departments disagree that this rulemaking will be harmful to pro se respondents. Although there are comparatively few pro se asylum applicants as an initial matter, EOIR, *Current Representation Rates* (Oct. 13, 2020), *https://www.justice.gov/eoir/page/file/1062991/download,* the Departments believe that this regulation will provide clarity to all respondents, including those who are pro se. That clarity will also allow immigration judges to better consider pro se claims and ensure that the record is developed appropriately consistent with the law.

The Departments believe that this clarity will also assist immigration judges in their adjudications, contrary to commenters' assertions. The Departments also disagree with commenters' statements that reducing the amount of time that adjudicators must spend evaluating claims is an improper purpose for the rule. The Departments contest allegations that they may not take regulatory action to help improve efficiencies with immigration adjudications. Regardless, as noted in the NPRM, reducing the amount of time that adjudicators must spend evaluating claims and more uniform application of the law are two additional benefits to ''providing clarity to [the particular social group] issue.'' 85 FR at 36279.

The Departments note commenter concerns that the rule does not create a regulatory requirement for immigration judges to clarify the particular social group for the record and instead allows for immigration judges to pretermit without holding an evidentiary hearing. The Departments note that the asylum application itself, which the applicant must sign attesting to the application's accuracy, and in which the applicant has had the opportunity to list his or her particular social group, is already part of the record without any further need for the immigration judge to clarify. Because the burden is always on the asylum applicant to establish eligibility, INA 208(b)(1)(B), 8 U.S.C. 1158(b)(1)(B), and because the immigration judge must remain a neutral arbiter of the claim, EOIR, *Ethics and Professionalism Guide for Immigration Judges* 2 (Jan. 26, 2011), *https://www.justice.gov/sites/default/files/eoir/legacy/2013/05/23/EthicsandProfessionalismGuideforIJs.pdf* (''An Immigration Judge shall act impartially and shall not give preferential treatment to any organization or individual when adjudicating the merits of a particular case.''), it would not be appropriate for the immigration judge to assist the alien in crafting his or her claim. Nevertheless, immigration judges are experienced and well-trained adjudicators who are adept at understanding the substance of a claim even if it is not perfectly articulated. Moreover, an alien will have 10 days to respond to any attempt to pretermit an application as legally insufficient, and there is no expectation that immigration judges will fail to follow the rule's requirements on that issue. In short, the Departments do not expect immigration judges to abdicate their duties to the law in considering an applicant's asylum claim.

The Departments disagree with commenters' concerns that the rule, in their estimation, violates the Rehabilitation Act of 1973, 29 U.S.C. 794, because it does not provide exceptions for minors, mentally ill persons, or individuals otherwise lacking competency.[44] The Departments note that no alien is excluded from applying for asylum—nor excluded from participating in processes to adjudicate such an application—on account of a disability. Further, all applicants for asylum are adjudicated under the same body of law, regardless of any particular individual characteristics, and nothing in the rule changes that. The Departments are unaware of any law requiring all asylum claims from minors, mentally ill persons, or incompetent aliens to be granted or establishing a categorical rule that each of those groups, regardless of any other characteristics, necessarily states a cognizable particular social group. The Departments are also unaware of any blanket exceptions to statutory eligibility for asylum for these identified groups. The rule does not change any established law regarding minors, *e.g.,* INA 208(b)(3)(C), 8 U.S.C. 1158(b)(3)(C), or those who lack mental competency, *e.g., Matter of M–A–M–,* 25 I&N Dec. at 480, 481–83 (holding that immigration judges should ''consider indicia of incompetency throughout the course of proceedings'' and implement appropriate safeguards, where necessary). In short, the rule provides clarity for asylum claims relevant to all aliens and does not alter any existing accommodations generally made for the identified groups. Further, because each asylum application is adjudicated based on its own facts and evidentiary support and because the rule does not categorically rule out specific claims, commenters' concerns about the effects of the rule on broad, undifferentiated categories without reference to specific claims are conclusory, conjectural, unfounded, and wholly and inherently speculative.

4.1.1. Past or Present Criminal Activity or Association (Including Gang Membership)

Comment: One organization noted that at least one court has recognized asylum claims from former child soldiers forced to commit bad acts, citing *Lukwago,* 329 F.3d at 178–180. The organization also stated that the United States has enacted the Child Soldiers Accountability Act, Public Law 110–340, imposing criminal and immigration penalties for those who use child soldiers. *See* 18 U.S.C. 2442. The organization emphasized that children recruited into other types of criminal acts, like gang activity, ''are not materially different from the children who fight on the front lines of conflicts in other parts of the world.'' The organization concluded by encouraging the government to extend its opposition to the use of child soldiers to ''a willingness to protect children fleeing from all types of forced criminal activity.''

Another organization emphasized that past activity is an immutable characteristic that ''cannot be undone,'' noting that an individual's personal biographical history cannot be changed. The organization noted that if a gang maintains that a child forcibly recruited is a member for life, the child would be regarded as a traitor for trying to leave the gang at a later time and would have a reasonable basis to fear for his or her life.

One organization alleged that the rule would change the law ''without explanation or justification'' by overturning the decisions of multiple Federal courts of appeals. The organization specifically referenced *Urbina-Mejia* v. *Holder,* 597 F.3d 360 (6th Cir. 2010) and *Benitez Ramos* v. *Holder,* 589 F.3d 426 (7th Cir. 2009). The organization claimed this would be contrary to the stated goal of the ''laundry list,'' which is legal consistency. *See* 85 FR at 36278. The organization also contended that the rule would be contrary to the intent behind the asylum bars, which preclude asylum based on a range of criminal conduct but ''pointedly'' do not preclude relief on account of previous gang membership. INA 208(b)(2)(A)–(B), 8 U.S.C. 1158(b)(2)(A)–(B). The organization also claimed the rule is contrary to congressional intent, claiming it makes no attempt to explain ''why the statutory bars'' on particular former persecutors ''should be extended by administrative interpretation to former members of gangs.'' *Benitez Ramos,* 589 F.3d at 430.

Response: The Departments note that the case cited by the commenter, *Lukwago,* 329 F.3d 157, which the commenter alleges recognized the likelihood of a cognizable particular social group involving former child soldiers, was published in 2003, well before the now-codified test for cognizability had been developed in *Matter of S–E–G–,* 24 I&N Dec. at 585–86 and *Matter of E–A–G–,* 24 I&N Dec. at 594–95. *See Matter of M–E–V–G–,* 26 I&N Dec. at 236–37 & n.11. Accordingly, this decision does not lend support to the commenter's claim. The Departments further note, however, that the court in *Lukwago* acknowledged that ''given the ambiguity of the [term ''particular social group''], [the court's] role is limited to reviewing the BIA's interpretation, using *Chevron* deference to determine if it is a ''permissible construction of the statute.'' *Lukwago,* 329 F.3d at 171. Additionally, the Child Soldiers Accountability Act is unrelated to this rulemaking.

Although past activity is an immutable characteristic, immutability alone is not sufficient to establish a cognizable particular social group; particularity and social distinction are also required. *See Matter of S–E–G–,* 24 I&N Dec. at 585–86; *Matter of E–A–G–,*

[44] The Departments note that the Rehabilitation Act applies to individuals with disabilities, and the status of being a minor does not automatically qualify someone as an ''individual with a disability'' under the statutory definition of that term. 29 U.S.C. 705(2).

24 I&N Dec. at 594–95; *Matter of M–E–V–G–,* 26 I&N Dec. at 237.

The Departments disagree with commenters that the rule would undermine establishing legal consistency and uniformity in the immigration laws, as it should encourage such consistency across all circuits by providing much-needed guidance on an ambiguous term in the Act. In fact, the circuits are themselves split on the issue of whether former gang membership is cognizable as a particular social group. *Compare Martinez* v. *Holder,* 740 F.3d 902, 910–12 (4th Cir. 2014) (former member of a criminal street gang may be a particular social group) *and, Benitez-Ramos* v. *Holder,* 589 F.3d 426, 430–31 (7th Cir. 2009) (same), *with Gonzalez* v. *U.S. Att'y Gen.,* 820 F.3d 399, 405 (11th Cir. 2016) (agreeing with First Circuit that former gang members do not constitute a cognizable ''particular social group''); *Cantarero* v. *Holder,* 734 F.3d 82, 85–86 (1st Cir. 2013) (''The BIA reasonably concluded that, in light of the manifest humanitarian purpose of the INA, Congress did not mean to grant asylum to those whose association with a criminal syndicate has caused them to run into danger. . . . Such recognition would reward membership in an organization that undoubtedly wreaks social harm in the streets of our country. It would, moreover, offer an incentive for aliens to join gangs here as a path to legal status.''); *and Arteaga* v. *Mukasey,* 511 F.3d 940, 945–46 (9th Cir. 2007) (''We cannot conclude that Congress, in offering refugee protection for individuals facing potential persecution through social group status, intended to include violent street gangs who assault people and who traffic in drugs and commit theft.''). *See also* Cong. Research Serv., *Asylum and Gang Violence: Legal Overview* 20 (Sept. 5, 2014) (''Granting asylum to aliens based on their membership in groups made up of former gang members is more complicated in that several Federal courts of appeals have evidenced at least some willingness to view former gang members as a particular social group, while others have suggested that granting asylum to those who belong to organizations that have perpetrated acts of violence or other crimes in their home countries is contrary to the humanitarian purposes of asylum.''). To the extent that commenters assert that circuit case law conflicts with the Departments' rule, such conflicts would warrant re-evaluation in appropriate cases by the circuits under well-established principles. *See Brand X,* 545 U.S. at 982.

4.1.2. Presence in a Country With Generalized Violence or a High Crime Rate

Comment: One commenter objected generally to the fact that the rule excludes asylum seekers coming from ''a country with generalized violence or a high crime rate,'' as the commenter believes this to be irrelevant. The commenter stated that the restriction appears designed to target individuals from specific countries and runs contrary to the purpose of asylum. The commenter stated that ''[i]t is natural'' for people to flee countries with violence that the governments are unable to control. One organization claimed the restriction will have a prejudicial impact on asylum seekers from Central America. Another organization specifically referenced the high crime rate in many African countries, claiming that violence is ''rampant'' due to ''national security forces'' and ''copycat violators.'' Another commenter stated generally that ''[t]he choice for them was to be killed and/or raped or to risk the hardships of seeking asylum in the U.S.,'' alleging that the frequency of these types of abuses does not make it reasonable to exclude them from eligibility for asylum claims. One organization claimed the restriction would unfairly impact LBGTQ+ individuals who are ''disproportionately victimized'' by violent crime and gender-based violence.

One organization noted that it would be ''difficult if not impossible'' to meet the three-prong test found in *Matter of M–E–V–G–,* 26 I&N Dec. at 237, using a claim in which the particular social group is based on ''presence in a county with generalized violence or a high crime rate.'' However, the organization expressed concern that this restrictive language (which it claims is not directly related to the particular social group definition at issue) would likely cause adjudicators to deny asylum applications solely because the applicant came from a country with a high crime rate, even if the applicant were to articulate a particular social group unrelated to the crime rate.

One organization claimed the rule is contrary to established case law recognizing that presence in a country with generalized violence or a high crime rate is ''irrelevant'' to evaluating an asylum seeker's claim. The organization noted that the Fourth Circuit has explained in at least three published opinions that criminal activities of a gang affecting the population as a whole are ''beside the point'' in evaluating an asylum seeker's particular claim. *See Alvarez-Lagos* v. *Barr,* 927 F.3d 236, 251 (4th Cir. 2019); *Zavaleta-Policiano* v. *Sessions,* 873 F.3d 241, 248 (4th Cir. 2017); *Crespin-Valladares* v. *Holder,* 632 F.3d 117, 127 (4th Cir. 2011).

Another organization alleged that the ''social distinction'' requirement makes it nearly impossible to develop a cognizable particular social group that does not reference the asylum seeker's country of origin. As a result, the organization claimed the rule would ''upend'' section 208 of the Act, 8 U.S.C. 1158, by preventing individuals fleeing ''the most violent countries in the world'' from receiving asylum or withholding of removal. The organization also contended that the ''generalized violence'' category is arbitrary to the extent it attempts to codify the statement in *Matter of A–B–* that particular claims are unlikely to satisfy the statutory grounds for demonstrating government inability or unwillingness to control the persecutors. *Matter of A–B–,* 27 I&N Dec. at 320. The organization claimed that attempting to codify that statement conflates two distinct elements of the asylum test, as the question of whether the government can control persecutors is distinct from whether a particular social group is cognizable. The organization also alleged that the Departments do not acknowledge or justify this conflation.

Response: The Departments acknowledge commenters' points that generalized violence may be a driving force behind many people fleeing their home countries. Although the suffering caused by such conditions is regrettable, the Departments note that asylum was never intended to protect individuals from generalized violence; instead, it was designed to protect those from violence perpetrated upon them on the basis of a protected ground, as well as other qualifying requirements. *See Harmon* v. *Holder,* 758 F.3d 728, 735 (6th Cir. 2014) (''General conditions of rampant violence alone are insufficient to establish eligibility.'').

Although circuit courts may not have been clear whether asylum claims based on fear of generalized violence or high crime rates are not cognizable on particular social group grounds or on nexus grounds (or on both grounds),[45] *see, e.g., Melgar de Torres* v. *Reno,* 191 F.3d 307, 314 (2d Cir. 1999) (''The increase in general crime that has been documented in the record does not

[45] Although the Departments have placed this category under the definition of ''particular social group,'' it may also be appropriately considered under the definition of ''nexus'' as well, as the lists under both definitions are nonexhaustive.

lend support to an asylum claim since a well-founded fear of persecution must be on account of an enumerated ground set forth in the Act, and general crime conditions are not a stated ground.''); *Umana-Ramos* v. *Holder,* 724 F3d 667, 670 (6th Cir. 2013) (''General conditions of rampant gang violence alone are insufficient to support a claim for asylum.''), they have been consistent that such fears are not a cognizable basis for asylum, even, contrary to one commenter, in the Fourth Circuit. *See, e.g., D.M.* v. *Holder,* 396 F. App'x 12, 14 (4th Cir. 2010) (''As found by the Board, the Petitioners have failed to show that they are at a greater risk of being victims of violent acts at the hands of criminal gangs than any other member of the general population in El Salvador. We have clearly held that a fear of general violence and unrest is inadequate to establish persecution on a protected ground.'').

The Departments believe that this rule—which establishes that particular-social-group claims grounded in an applicant's presence in a country with general violence or high crime rates, without more, will generally not be cognizable—is consistent with the Act, international law, and case law, particularly in connection to the definition of particular social group discussed, *supra,* which requires that the group exist independently of the alleged harm. Relatedly, commenters' allegations that the rule was crafted in response to the frequency of types of harm suffered are misguided. With respect to establishing a nexus to a protected ground, such as particular social group, it is not the frequency or severity of abuses that would render such claims insufficient, but rather the reasons for the abuse. Asylum is intended to protect individuals who have suffered abuses for a specific reason, on account of a protected ground. *Cf. Delgado-Ortiz,* 600 F.3d at 1151 (''Asylum is not available to victims of indiscriminate violence, unless they are singled out on account of a protected ground.'').

The Departments further note that an alien coming from a country with generalized violence or high crime rates is not precluded from asylum on that basis alone; the rule merely establishes that a particular-social-group claim premised upon general violence or high crime rates will not, without more, prevail. To succeed on a particular-social-group claim, an applicant must demonstrate that he or she has been or will be targeted on the basis of immutable, particular, and socially distinct characteristics, and the Departments believe that groups defined by general violence or high crime rates generally do not meet this threshold.

The Departments do not disagree with commenters who suggested that it would be natural for individuals to flee countries where their governments could not control violence. Indeed there are myriad reasons that would encourage or compel an individual to leave his or her home country. However, a government's inability or unwillingness to control violence is but one factor for asylum eligibility with respect to claims of persecution by non-state actors. Applicants must meet all eligibility factors and merit a positive exercise of discretion to warrant relief.

The Departments agree with commenters who stated that it would be difficult for applicants whose particular social group is predicated upon general violence or high crime rates in the country of origin to demonstrate that their proposed group meets all three requirements of immutability, particularity, and social distinction. However, the Departments do not believe that a regulatory standard stating so would lead adjudicators to deny applications where the applicant has articulated a particular social group unrelated to the crime rate. Rather, the Departments believe that this rulemaking offers clear guidance to adjudicators and parties that such proposed groups, without more, will not be cognizable. *See* 85 FR at 36278 (''The proposed rule would further build on the BIA's standards and provide clearer guidance to adjudicators regarding whether an alleged group exists and, if so, whether it is cognizable as a particular social group in order to ensure the consistent consideration of asylum and statutory withholding claims.''). Furthermore, immigration judges and asylum officers undergo training in which they learn to adjudicate asylum claims, including the cognizability of particular social groups. The Departments are confident that adjudicators are aptly prepared, through training and experience, to adjudicate asylum claims without confusing the particular-social-group analysis with other facets of asylum eligibility requiring a separate analysis.

With respect to commenter statements that this rule is contrary to established case law which, the commenter stated, established that a country's generalized violence and high crime rates were ''irrelevant'' to the applicant's claim, the commenter appears to have conflated relevance for sufficiency. The Fourth Circuit, in the cited cases, determined that generalized violence or high crime rate did not undermine claims where the court determined there was sufficient evidence to establish a nexus to a protected ground. However, these cases do not endorse a position that claims rooted in generally violent conditions or high crime rates, without more, would be sufficient to warrant a grant of asylum. *See Alvarez-Lagos,* 927 F.3d at 251; *Zavaleta-Policiano,* 873 F.3d at 248; *Crespin-Valladares,* 632 F.3d at 127.

4.1.3. Being the Subject of a Recruitment Effort by Criminal, Terrorist, or Persecutory Groups

Comment: One organization noted that the rule narrows the definition of credible fear by ''eliminating claims to protection from fear of gangs or terrorists.'' Another organization claimed there is no support in the cases cited by the NPRM for making gang recruitment-related particular social groups generally non-cognizable, emphasizing that the NPRM does not provide any evidence as to why the courts should not continue to consider recruitment-based particular social groups on a case-by-case basis.

One organization noted that the U.S. government recognizes that children are often targets for gang recruitment and gang violence in their home countries. The organization expressed concern regarding the rule's presumption that ''attempted recruitment'' or ''private criminal acts'' are not sufficient for asylum, contending this ignores the reality that many child asylum seekers flee their home countries ''precisely because the government is unable or unwilling to control non-state actors like terrorist or gang organizations who would recruit or harm children and families.''

One organization noted that UNHCR has emphasized the importance of recognizing claims based on resistance to and desertion from non-state armed groups, explaining that gangs may try to harm individuals who have resisted gang activity, are opposed to gang practices, or attempt to desert a gang.

Response: The Departments disagree with the commenter's assertion that the rule eliminates any claims to protection. As stated above, the rule will not eliminate any particular-social-group claims. Rather, it sets forth a list of social group claims that will generally not be, without more, cognizable. This does not foreclose the possibility that an applicant could pursue or prevail on a claim in which they were the subject of a recruitment effort by a criminal, terrorist, or persecutory group. As noted by the NPRM, ''such facts could be the basis for finding a particular social group, given the fact- and society-specific nature of this determination.''

85 FR at 36279; *see also Grace II,* 965 F.3d at 906 (''[T]he record in this case does not support the asylum seekers' argument that [the Departments] have erected a rule against asylum claims involving allegations of domestic and/or gang violence.''). However, as a general rule, such groups will not be cognizable, consistent with existing Attorney General and BIA precedent. *Matter of A–B–,* 27 I&N Dec. at 335 (''Victims of gang violence often come from all segments of society, and they possess no distinguishing characteristic or concrete trait that would readily identify them as members of such a group''); *Matter of S–E–G–,* 24 I&N Dec. at 584 (''[Y]outh who have been targeted for recruitment by, and resisted, criminal gangs may have a shared past experience, which, by definition, cannot be changed. However, this does not necessarily mean that the shared past experience suffices to define a particular social group for asylum purposes.''); *Matter of E–A–G–,* 24 I&N Dec. at 594–95 (determining that ''persons resistant to gang membership'' is not cognizable); *see also Constanza* v. *Holder,* 647 F.3d 749, 754 (8th Cir. 2011); *see also Lizama* v. *Holder,* 629 F.3d 440, 447 (4th Cir. 2011); *Larios* v. *Holder,* 608 F.3d 105, 109 (1st Cir. 2010); *Lushaj* v. *Holder,* 380 F. App'x 41, 43 (2d Cir. 2010); *Barrios* v. *Holder,* 581 F.3d 849, 855 (9th Cir. 2009). The Departments do not dispute that children may be targets for gangs, gang recruitment, and gang violence in their countries of origin. However, whether such applicants for asylum have been harmed or fear harm from the gangs is only one part of the overall asylum inquiry. Even a further showing that the government is unwilling or unable to protect the applicant would not be enough to merit a grant of asylum without meeting the other eligibility requirements. As discussed above, an applicant must also demonstrate that the harm he or she suffered or fears is on account of protected ground, such as membership in a particular social group.

4.1.4. The Targeting of the Applicant for Criminal Activity for Financial Gain Based on Perceptions of Wealth or Affluence

Comment: Another organization claimed that history is full of examples of persecution of classes of people on the basis of perceived wealth or influence. The organization stated that, under the proposed rule, the members of the kulak class who were killed after the Russian Revolution or the many wealthy and middle class Cubans who fled the Cuban Revolution would not have been recognized as persecuted social groups.

Another organization contended that there is no legal basis or support in the NPRM for precluding courts from analyzing particular social groups involving wealth on a case-by-case basis. The organization referenced the BIA's decision in *Matter of A–M–E– & J–G–U–,* 24 I&N Dec. 69 (BIA 2007), *aff'd Ucelo-Gomez* v. *Mukasey,* 509 F.3d 70 (2d Cir. 2007) (cited at 85 FR at 36279), stating the fact that the BIA held thirteen years ago that ''affluent Guatemalans'' is not a cognizable particular social group ''does not even begin to support the NPRM's sweeping proposal to bar all PSGs that mention wealth.''

Response: As noted in the NPRM, a social group which is founded upon being targeted for criminal activity for financial gain or for perceptions of wealth or affluence are generally, without more, unable to meet the well-established requirements for cognizability. 85 FR at 36279; *see Matter of A–M–E– & J–G–U–,* 24 I&N Dec. at 75.

With respect to commenters who presented specific examples that they alleged illustrated persecution of classes of people on the basis of perceived wealth or influence, as well as comments suggesting that the Departments are doing away with individualized analysis, the Departments note again that there may exist examples of social groups based on wealth that are cognizable, and that the listed social groups have been identified as generally not cognizable, without more. However, ''the regulation does not foreclose that, in rare circumstances, such facts could be the basis for finding a particular social group, given the fact- and society specific nature of this determination.'' 85 FR at 36279; *see Grace II,* 965 F.3d at 906 (''[T]he record in this case does not support the asylum seekers' argument that [the Departments] have erected a rule against asylum claims involving allegations of domestic and/or gang violence.'').

4.1.5. Interpersonal Disputes of Which Governmental Authorities Were Unaware or Uninvolved

Comment: One organization noted that the rule would limit particular social groups based on both ''interpersonal disputes of which governmental authorities were unaware or uninvolved'' and ''private criminal acts of which governmental authorities were unaware or uninvolved.'' The organization emphasized that it is unlikely that a particular social group framed in this way would be cognizable; however, because the fact pattern is included in the rule as a ''limiting concept,'' the organization expressed concern that adjudicators would likely deny asylum based on this language, even though the rule specifies that it applies ''in the context of analyzing a particular social group.''

Another organization expressed concern that governments could attempt to remove U.S. or international sanctions by demonstrating that ''private actors'' were carrying out persecution against political dissidents and religious minorities. The organization noted that these governments could use propaganda to ''inflame local residents against a particular group,'' using the decimation of the Tutsis population in Rwanda as an example. According to the organization, governments could claim this was not a human rights violation because ''government soldiers themselves took no part in the attack.'' Another organization emphasized that violence is sometimes outside the state's reach, noting that violent activity can occur where weak governments use allied armed groups to provide security.

Response: As discussed above with respect to particular social groups defined by general violence or high crime rates, the Departments agree with commenters that it would be difficult to demonstrate that particular social groups defined by interpersonal disputes of which governmental authorities were unaware or uninvolved, without more, are cognizable. However, immigration judges and asylum officers undergo rigorous training on how to adjudicate asylum claims, including the cognizability of particular social groups. The Departments are confident that adjudicators are aptly prepared to adjudicate asylum claims without confusing the particular social group analysis with other facets of asylum eligibility requiring a separate analysis. The Departments fail to see how setting forth a social group that the commenter believes is unlikely to be presented is grounds for the commenter's objection to the rule.

The Departments do not address comments raising concerns about international sanctions or holding international governments accountable for alleged human rights violations, as the Departments' implementing statutes and regulations are unrelated to such matters, which are more properly handled by the Department of State.

Comments raising concerns about non-governmental violence that occurs ''outside the state's reach'' or in cases where ''weak governments use allied armed groups to provide security'' do not alter the Departments' determination that particular social

groups predicated upon interpersonal disputes of which governmental authorities were unaware or uninvolved, without more, are generally not cognizable. The commenter's statement about non-governmental violence that occurs ''outside the state's reach'' is not sufficiently specific for the Departments to draw any conclusion about its relevancy to such social groups. Although the Departments must be explicit that they are not endorsing the cognizability of such groups, the commenter's proposed scenario regarding weak governments using allied armed groups clearly would not involve governmental unawareness and is unlikely to involve personal disputes.[46]

4.1.6. Private Criminal Acts of Which Governmental Authorities Were Unaware or Uninvolved

Comment: One organization noted generally that the rule would remove protections for individuals fleeing violence from non-state actors. Another organization claimed that the rule's exclusion of acts ''of which governmental authorities are unaware or uninvolved'' disproportionately affects the ability of children to seek asylum. The organization noted that the ability of many children to access state protection in their home country is dependent upon the adults in their lives, emphasizing that not all children have an adult to help them obtain protection. The organization also noted that some children who go directly to government officials for protection may be dismissed. One organization noted generally that it has ''long been determined'' that the government does not actually need to be aware of the threats and that there is no requirement to report the persecution to the government if doing so ''would be futile or place the applicant at greater risk of harm,'' citing *Bringas-Rodriguez* v. *Sessions,* 850 F.3d 1051, 1062–72 (9th Cir. 2017) (en banc) and *Lopez* v. *U.S. Att'y Gen.,* 504 F.3d 1341, 1345 (11th Cir. 2007). Another organization claimed that the rule disregards the ''well-documented fact'' that oppressive governments utilize irregular forces for the purpose of denying their actions. The organization emphasized that chronic violence arises when a government is unwilling or unable to protect the life and liberty of its citizens, claiming that this government inaction puts people at risk of death. The organization concluded by alleging that the rule would send these individuals back ''into mortal danger.''

Another organization claimed this portion of the rule would violate the APA in at least six different ways. First, the organization alleged that the rule is contrary to law, as the INA does not state or imply that interpersonal or ''private'' acts cannot give rise to asylum. Instead, the statute makes clear that such acts can do so if they ''rise to the level of persecution, are taken on account of a protected ground, and are inflicted by actors the government is unable or unwilling to control.'' Second, the organization claimed that it is ''manifestly unreasonable'' to use the particular social group analysis to ''place entire groups of persecutors outside the asylum laws,'' noting that the particular social group analysis is dependent on the nature of the group to which the survivor belongs rather than the identity of the persecutor. Third, the organization alleged that a general prohibition of asylum in all situations where the government is ''uninvolved'' in the persecution is ''arbitrary and contrary to law,'' claiming that the substitution of ''uninvolved'' for ''unable or unwilling'' would render large categories of previously meritorious claims ineligible. The organization also emphasized that the rule would require survivors of persecution by non-state actors to report persecution to authorities ''even where laws against gender-based violence are limited or non-existent.'' The organization noted that current asylum law allows applicants to submit evidence as to why reporting this type of violence was impossible or dangerous, claiming there is no legitimate justification for the prohibition of such evidence.

Fourth, the organization claimed that the NPRM's use of the word ''private'' implicitly raises the ''unable or unwilling'' standard on some claims. Fifth, the organization contended that the ''interpersonal'' category is ''even more sweeping'' and therefore contrary to the INA, claiming that the plain meaning of the ''interpersonal'' violence category would bar *all* asylum claims. Sixth, the organization claimed the ''interpersonal'' and ''private'' categories violate the INA to the extent that, in the Departments' view, they apply to domestic or other gender-based violence. The organization claimed this is ''at odds'' with the evidence, which clearly shows that this type of violence is ''not simply a private matter based on personal animosity.'' The organization also claimed that the application of the ''interpersonal'' and ''private'' categories to domestic and other gender-based violence would violate constitutional equal protection principles because the presumption created by these categories would have a disproportionate effect on women (as women are much more likely to experience violence by an intimate partner).

Similarly, another organization noted that this portion of the rule is especially damaging to gender and LGBTQ+ related claims because ''many are rooted in intimate partner or family violence that government actors choose to ignore as private or family matters.'' The organization emphasized the BIA's decision in *Matter of A–R–C–G–,* 26 I&N Dec. 338 (BIA 2014), holding that a Guatemalan woman should be granted asylum on the basis of abuse by her former spouse, noting that this precedent has allowed many female asylum seekers from Central America to win cases. One organization stated that ''the very indifference'' of governmental authorities to the plight of survivors of gender-based violence proves that persecution exists, emphasizing there is ''no good reason'' for denying the claims of survivors who can show their government's failure to protect them.

Another organization claimed the rule ''condemns women to endure various forms of domestic- and gender-based violence, stripping them of the humanitarian protection of the United States.'' The organization contended that this ''upends'' the longstanding recognition and protection of particular social groups, across circuits, on the following grounds: Femicide, *Perdomo* v. *Holder,* 611 F.3d 662, 662 (9th Cir. 2010); honor killings, *Sarhan* v. *Holder,* 658 F.3d 649, 649 (7th Cir. 2011); female genital mutilation, *Mohammed* v. *Gonzales,* 400 F.3d 785, 785 (9th Cir. 2005); arranged or inescapable marriages, *Acosta Cervantes* v. *Barr,* 795 F. App'x 995, 995 (9th Cir. 2020); and ''other forms of domestic violence,'' *Muñoz-Ventura* v. *Barr,* 799 F. App'x 977, 977 (9th Cir. 2020). One organization contended that, by dismissing violence against women or LGBTQ+ individuals as an ''interpersonal dispute,'' the rule fails to recognize that gender-based violence is a ''social means to subordinate rather than an individual problem'' and requires comprehensive responses.

Response: The Departments disagree that the rule is contrary to law. At the outset, the Departments acknowledge that the INA does not specify whether interpersonal or ''private'' acts can give rise to an asylum claim. While the actions of private actors are also discussed elsewhere in this

[46] Regarding the commenters' specific example, the Departments note that claims from Tutsis in Rwanda may also be framed in terms of race or nationality which are not defined in the rule and are separate from claims based on a particular social group.

rulemaking,[47] the Departments will now address concerns as they were raised specifically in the context of establishing a particular social group. As the commenters contend, acts can give rise to asylum claims only if they are taken on account of a protected ground, such as ''particular social group.'' And, as discussed above, the term ''particular social group'' is ambiguous. As the Departments have set forth a reasonable determination that the term would generally not include, without more, social groups predicated upon private criminal acts of which governmental authorities were unaware or uninvolved, such private acts would generally not be sufficient grounds for asylum. *See Matter of A–B–,* 27 I&N Dec. at 335 (''groups defined by their vulnerability to private criminal activity likely lack the particularity'' required for cognizability).

The commenter's allegations that the rule violates the APA are predicated on presumptions that the rule categorically excludes certain types of social group claims. As stated above, ''the regulation does not foreclose that, in rare circumstances, such facts could be the basis for finding a particular social group, given the fact- and society specific nature of this determination.'' 85 FR at 36279; *see Grace II,* 965 F.3d at 906 (''[T]he record in this case does not support the asylum seekers' argument that [the Departments] have erected a rule against asylum claims involving allegations of domestic and/or gang violence.''). The Departments believe that the listed social groups generally fail to meet the requirements for cognizability, not because, as the commenter alleged, of the identity of the persecutor, but rather because such groups are generally defined by the group members' vulnerability to private criminal activity. *See Matter of A–B–,* 27 I&N Dec. at 335.

The Departments note that social groups predicated on domestic or other gender-based violence, insofar as the group is defined by private criminal acts of which governmental authorities were unaware or uninvolved, will generally not be cognizable, as they, like all social groups defined by such acts, likely lack the requisite particularity due to the ''broad swaths of society [that] may be susceptible to victimization'' or social distinction to be cognizable. *Matter of A–B–,* 27 I&N Dec. at 335–36. Similarly, the Departments disagree with commenter's assertions that the rule would implicitly raise the ''unwilling or unable'' standard, as the Departments believe that social groups defined by private criminal acts of which governmental authorities were unaware or uninvolved are not cognizable under the particular social group analysis of immutability, particularity, and social distinction, irrespective of the government's inability or unwillingness to help, which is an independent factor in considering asylum eligibility.

With respect to commenters' concerns about this rule's potential effect on LGBTQ and gender-based-violence related claims, the Departments note again that they have codified a long-standing test for determining cognizability of particular social groups and have set forth a list of common fact patterns involving particular-social-group claims that generally will not meet those well-established requirements. The Departments did not first determine a set of groups that should or should not be cognizable and craft a rule around that determination.

To the extent that commenters assert that circuit case law conflicts with the Departments' rule, such conflicts would warrant re-evaluation in appropriate cases by the circuits under well-established principles. *See Brand X,* 545 U.S. at 982.

4.1.7. Past or Present Terrorist Activity or Association

Comment: At least one commenter raised concerns with the ''past or present terrorist activity or association'' base for not favorably adjudicating a particular social group. The commenter asserted that the terms ''terrorist activity'' and ''terrorist association'' were overbroad and, as a result, would result in unnecessary denials of asylum claims. Moreover, the commenter stated that the Departments did not provide ''empirical research'' to support the provision's inclusion, but rather relied on the ''unproven'' statement that allowing particular social groups defined by terrorist activity or association would reward membership in organizations that cause harm to society and create a perverse incentive to engage in reprehensible or illicit behavior as a means of avoiding removal.

Response: The Departments disagree that the terms ''terrorist activity'' or ''terrorist association'' are overbroad. The Departments are using the ''terrorist activity'' language that Congress clearly defined in the INA. *See* INA 212(a)(3)(B)(iii), 8 U.S.C. 1182(a)(3)(B)(iii). To the extent the commenter alleges that the statutory definition itself is overbroad, such arguments are outside the scope of this rule. Moreover, the Departments do not believe the phrase ''terrorist association'' is overly broad. The Departments intend for this provision to apply to those who voluntarily associate, or have previously voluntarily associated, with a terrorist organization. The Departments believe the ordinary meaning of the term provides sufficient definition for adjudicators to apply. *See, e.g.,* ''Associate'' Definition, Merriam-Webster, *https://www.merriam-webster.com/dictionary/associate* (defined as ''join[ing] as a partner, friend, or companion'' with an example of ''They were closely associated with each other during the war'').

Although the Departments do not maintain data on the number of prior asylum grants based on a terrorism-related particular social group, the Departments believe it is reasonable that, as a general matter, persons applying for asylum in the United States cannot claim asylum based on their participation in, or association with, terrorism. For example, Congress included certain terrorism-related activities as a categorical bar from asylum eligibility. *See* INA 208(b)(2)(A)(v), 8 U.S.C. 1158(b)(2)(A)(v).[48] Similarly, although this is not a categorical bar to terrorism-based particular social groups, generally disfavoring such groups is consistent with this Congressional intent.

Finally, the Departments note that association with past or current terrorist activity is at least as ''anti-social'' as association with criminal gang activity, if not more so, and the latter has been rejected as a basis for a particular social group by multiple courts. *Cf. Arteaga,* 511 F.3d at 945–46 (''We cannot conclude that Congress, in offering refugee protection for individuals facing potential persecution through social group status, intended to include violent street gangs who assault people and who traffic in drugs and commit

[47] The Departments note that longstanding law has precluded private acts of violence as a basis for asylum or similar protection for many years. *See, e.g., Matter of Pierre,* 15 I&N Dec. 461, 462–63 (BIA 1975) (strictly personal dispute between a husband and wife does not state a claim on account of race, religion, political opinion or membership in a particular social group). Further, circuit courts have also held that private acts of violence are not a cognizable basis for asylum, though their decisions are sometimes rooted in other bases. *See, e.g., Prado* v. *U.S. Att'y Gen.,* 315 F. App'x 184, 188 (11th Cir. 2008) (''Ordinary criminal activity and acts of private violence are generally not 'persecution' within the meaning of 8 U.S.C. 1101(a)(42)(A).''). The Departments' consideration of private violence under the definition of particular social group in no way precludes its consideration in connection with the other requirements necessary for asylum, including nexus and persecution.

[48] The Departments note that certain activities or associations that trigger terrorism-related inadmissibility grounds may potentially be the subject of discretionary group-based, situational, or individual exemptions. In such cases, they would not constitute bars to asylum eligibility.

theft.''); *Cantarero,* 734 F.3d at 85–86 (''The BIA reasonably concluded that, in light of the manifest humanitarian purpose of the INA, Congress did not mean to grant asylum to those whose association with a criminal syndicate has caused them to run into danger. . . . Such recognition would reward membership in an organization that undoubtedly wreaks social harm in the streets of our country. It would, moreover, offer an incentive for aliens to join gangs here as a path to legal status. . . . Accordingly, the BIA's interpretation merits our deference under *Chevron.*''); *Elien,* 364 F.3d at 397 (''Such recognition unquestionably would create a perverse incentive for [aliens] coming to or residing in the United States to commit crimes, thereby immunizing themselves from deportation. . . . Moreover, the BIA has never extended the term 'social group' to encompass persons who voluntarily engaged in illicit activities.''). Consequently, the Departments decline to follow a suggestion that terrorist association should generally be considered a cognizable particular social group.

4.1.8. Past or Present Persecutory Activity or Association

Comment: One organization claimed that the NPRM's proposed bar on ''past persecutory activity,'' 85 FR at 36279, is contrary to the APA in the same manner as the proposed bar on past criminal conduct. The organization alleged that listing a scenario involving past persecutory activity as generally non-cognizable would create even greater uncertainty, however, because ''past persecutory activity'' is not defined in the NPRM.

Response: Although the commenter's broad and unspecified allegations make a response difficult, the Departments do not believe this rulemaking is in violation of the APA for reasons given in both the NPRM and this final rule, and they reiterate that this rulemaking does not impose any categorical bar as suggested by the commenter. The Departments have provided descriptions and reasons for all the provisions and have established a reasonable basis for the rule. With respect to the commenter's concerns about what conduct falls under the term ''past persecutory activity,'' the Departments note that this rulemaking, including the NPRM, sets forth clear guidelines about what conduct constitutes persecutory activity, 85 FR at 36280–81, and thus, that this should serve as a guide for conduct involving past persecutory activity.

4.1.9. Status as an Alien Returning From the United States

Comment: One organization noted that the rule would generally not find a particular social group to be cognizable if based on ''status as an alien returning from the United States.'' The organization expressed concern about this, noting that there have been circumstances where ''Westernized Iraqi citizens have faced persecution and potential torture based on their perceived ties to the United States.'' The organization emphasized that each proposed particular social group should be evaluated on a case-by-case basis instead of being subjected to general rules that would result in ''blanket denials.''

Another organization claimed that ''status as an alien returning from the United States'' is on its face an ''immutable, socially distinct, and particular'' characteristic. The organization emphasized that past association as a former resident of the United States is similar to one's membership in a family or one's specific history because it is a particular characteristic that cannot be changed. The organization alleged that this portion of the rule could result in the denial of asylum to individuals persecuted due to their real or imputed association with the United States by ''a regime that is hostile to this country, or its culture and values.''

One organization disagreed with the claim that any group based on individuals returning from the United States will be ''too broad'' to qualify as a particular social group, 85 FR at 36279, claiming this is ''factually and legally erroneous.'' The organization alleged that, as a factual matter, the number of individuals returning to some countries from the United States is small. As a legal matter, the organization claimed that whether a group is potentially large would not, by itself, mandate the conclusion that the group is not particular.

Response: The Departments reiterate once again that this rule does not foreclose the possibility of pursuing and prevailing upon a particular social group claim defined by the applicant's status as an alien returning from the United States. ''[T]he regulation does not foreclose that, in rare circumstances, such facts could be the basis for finding a particular social group, given the fact- and society specific nature of this determination.'' 85 FR at 36279; *see Grace II,* 965 F.3d at 906 (''[T]he record in this case does not support the asylum seekers' argument that [the Departments] have erected a rule against asylum claims involving allegations of domestic and/or gang violence.''). If applicants believe that their proposed group as an alien returning from the United States meets one of the exceptions to the general rule based on, as commenter's proposed, the group meeting the particularity requirement, the applicants may propose such a group.

The Department disagrees with comments that individuals returning from the United States can, generally, demonstrate that their group is sufficiently particular or socially distinct. *See, e.g., Reyes* v. *Lynch,* 842 F.3d 1125, 1139 (9th Cir. 2016) (upholding BIA's determination that a proposed social group of deportees ''was too amorphous, overbroad and diffuse because it included men, women, and children of all ages, regardless of the length of time they were in the United States, the reasons for their removal, or the recency of their removal''); *Lizama,* 629 F.3d at 446 (rejecting proposed group of ''young, Americanized, well-off Salvadoran male deportees with criminal histories who oppose gangs'' as ''clearly fail[ing] to meet the required criteria'' (internal quotations omitted)). However, to the extent that commenters believe there may be exceptions to this general rule, ''the rule does not foreclose that, in rare circumstances, such facts could be the basis for finding a particular social group, given the fact- and society specific nature of this determination.'' 85 FR at 36279; *see Grace II,* 965 F.3d at 905.

4.2. Political Opinion

Comment: Commenters argued that the proposed definition of political opinion is inconsistent with legislative intent and international law, which, commenters asserted, require the term to be construed broadly. Specifically, commenters asserted that Congress, in passing the Refugee Act of 1980, aimed to align the United States definition of ''refugee'' with the United States' obligations under the 1967 Protocol relating to the Status of Refugees. Commenters provided excerpts from the House Report for the Refugee Act of 1980 and UNHCR guidance stating the term should be construed broadly. Commenters also argued that Congress is the branch that holds the plenary power and that the proposed edits to 8 CFR 208.1(d) are an attempt ''to do an end run around the legislative intent'' of section 101(a)(42) of the Act, 8 U.S.C. 1101(a)(42).

Commenters expressed concern that the proposed definition of political opinion is inconsistent with Federal court and BIA precedent. Commenters

cited *Cardoza-Fonseca,* 480 U.S. 421, to argue that the proposed definition of ''political opinion'' is too narrow. One commenter also cited cases from the United States Courts of Appeals for the Second, Third, and Ninth Circuits, which the commenter argued evidence that the term political opinion should be construed broadly. Another commenter noted that Federal courts have recognized political opinions based on feminist beliefs, labor organizing, environmental beliefs, support of student organizations, and gangs. With respect to BIA precedent, one commenter asserted that the NPRM incorrectly interpreted *Matter of S–P–,* 21 I&N Dec. 486 (BIA 1996), and that the case actually instructs that the term political opinion should be construed broadly. The commenter similarly asserted that the BIA decisions in *Matter of D–V–,* 21 I&N Dec. 77 (BIA 1993), and *Matter of N–M–,* 21 I&N Dec. 526 (BIA 2011), support a broad reading of political opinion. One commenter cited the third edition of the Webster's New World College Dictionary (1997) to argue that the definition of the word ''political'' is unambiguously understood to include more than just opposition to a particular regime. Accordingly, the commenter argued, the proposed definition of political opinion contradicts the plain meaning of the INA.

Commenters expressed concern that political opinions not directly related to regime change would be considered invalid under the proposed definition. As an example, one commenter asserted that Wang Quanzhang (who the commenter stated is a human rights defender in China) and Ivan Safronov (a Russian journalist who, the commenter stated, was charged with treason for contributing to a prominent business newspaper) would not have valid political opinions under the proposed definition. Commenters asserted that individuals could hold valid political opinions unrelated to regime change such as LGBTQ rights advocacy, voter registration advocacy, and opinions on the publication of data about COVID–19 in countries that seek to hide the pandemic's impact. One commenter noted that in some nations the geopolitical landscape renders a distinction between opposition to a specific regime indistinguishable from political opinions about cultural issues.

Commenters similarly expressed concern that gang-based claims would be rejected under the proposed definition. Commenters asserted that gangs can have substantial political power and that some nations are unable to control gang violence and influence. One commenter stated that the United States Department of State recognized this reality in its 2019 Country Reports on Human Rights Practices. Other commenters cited provisions of the UNHCR Guidelines on International Protection noting that gang-based and gender-based claims can be valid.

Commenters also expressed concern with the ''absent expressive behavior'' language in proposed 8 CFR 208.1(d) and 8 CFR 1208.1(d), asserting that section 208(b) of the Act, 8 U.S.C. 1158(b), does not require protected grounds to be expressed in a particular way and that ''political opinion,'' not ''political activity'' is the protected ground. Commenters asserted that the proposed definition contradicts UNHCR Guidance on expressing opinions. Commenters argued that ''absent expressive behavior'' is ''antithetical to the concept of an imputed political opinion against a non-state organization'' and that it is inconsistent with Federal case law that has recognized imputed political opinions against gangs that fall outside of the proposed definition of expressive behavior.

One commenter expressed concern that the proposed definition of political opinion ''frustrates the reliance interests'' of ''thousands'' of individuals whose asylum claims are based on political opinions under the current understanding of the concept. The commenter expressed concern that individuals with pending applications would ''have a much lower likelihood of obtaining relief under the proposed rule.''

Response: In regards to commenters' concerns that the final rule contravenes various Federal circuit court decisions, the Departments note that the disparity in interpretations of the term political opinion is a partial motive for the amendment. As discussed in the NPRM, this rule will provide clarity in an area of conflicting case law that has made uniform application challenging for adjudicators.

One commenter suggested that the Departments were ''seek[ing] to erase all precedent that is favorable to asylum seekers.'' The Departments deny this purported motive. As mentioned in the NPRM, the purpose behind the amendments surrounding political opinion is to provide clarity to adjudicators, avoid further strain on the INA's definition of ''refugee,'' and to acknowledge that the statutory requirements and general understanding of political opinion is intended to advance or further a discrete cause related to political control of a state.

A commenter expressed concern that the Departments failed to recognize that many asylum seekers flee their homelands because their governments are unable or unwilling to control non-state actors, including international criminal organizations. The Departments do not disagree that this may be the motivation for some aliens to flee their homelands. However, that fact alone does not create a basis for protection under the immigration laws. Asylum and statutory withholding of removal are narrowly tailored—allowing for the discretionary grant of protection from removal in the case of asylum and granting protection from removal in the case of withholding—to aliens who demonstrate that they meet specific eligibility criteria. The asylum laws were not created to address any misfortune that may befall an alien. Rather, asylum generally is available to individuals who are able to establish, among other things, that the harm they experienced or fear was (or there is a well-founded basis to believe would be) inflicted on account of a protected ground. The rule will improve the system by creating a clearer definition of political opinion, which, in turn, will assist in the expeditious processing of meritorious claims.

Several commenters listed various opinions which, commenters' opined, would no longer fit within the political opinion category. The Departments acknowledge that the rule codifies a specific definition for articulating political opinion claims, though it also incorporates existing case law principles.[49] As explained in the NPRM, the Departments seek to provide clear standards for adjudicators to determine political opinion claims. For example, if political opinion were expanded to include opposition to international criminal organizations, it would ''interfere with the other branches' primacy in foreign relations,'' and ''strain the language of'' INA 101(a)(42)(A), 8 U.S.C. 1101(a)(42)(A). *See Saladarriaga* v. *Gonzales,* 402 F.3d 461, 467 (4th Cir. 2005) (holding that an individual's cooperation with the DEA, even if it stemmed from disapproval of a drug cartel, did not constitute a political opinion). Although the Departments agree that international

[49] As discussed herein, the rule itself applies prospectively to applications filed on or after its effective date; accordingly, it will have no effect on pending applications, contrary to commenters' concerns. However, the rule also codifies many principles that are already applicable through binding case law. Thus, although the rule itself may not apply to pending applications, applicable case law that is reflected in the rule may nevertheless still apply to pending applications.

criminal organizations threaten both their fellow countrymen and the international community, the appropriate redress for such concerns is not to broadly grant asylum on the basis of political opinion.

A commenter stated, without more, that the rule does not meet the materiality standard as outlined in the UNHCR guidance. The Departments decline to respond to commenters' general assertions that the rule violates U.S. international treaty obligations.

The Departments do not share a commenter's concern that the NPRM defines ''political opinion'' narrowly to the extent that it runs afoul of congressional intent to define ''refugee'' broadly. The NPRM notes that since the enactment of the statute, the definition of ''refugee'' has been strained in various contexts. *See Saladarriaga,* 402 F.3d at 467. Thus, one aspect of the motive behind the NPRM is to reduce the strain on the statute and return the statute to its original meaning.

Additionally, the commenter claimed that the expansive definition was meant to mirror the 1967 Protocol relating to the Status of Refugees, the 1951 Convention relating to the Status of Refugees, and UNHCR guidelines, which the commenter claims are now violated by the new definition. The Departments reject this conclusion. While UNHCR guidelines are informative, they are not prescriptive and thus not binding. *See Aguirre-Aguirre,* 526 U.S. at 427 (''The U.N. Handbook may be a useful interpretative aid, but it is not binding on the Attorney General, the BIA, or United States courts.''); *Cardoza-Fonseca,* 480 U.S. at 439, n.22 (''Indeed, the Handbook itself disclaims such force[.]'').

In regards to the meaning of ''political,'' the Departments note that, according to the Merriam-Webster Dictionary, ''political'' does have numerous definitions. *See* ''Political'' Definition, Merriam-Webster, *https://www.merriam-webster.com/dictionary/political.* However, all but one of those definitions relates specifically, and often solely, to governments. Moreover, the first definition refers only to the government. Similarly, the Departments reject commenters' assertions that ''expressive behavior'' is solely ''political action'' and therefore distinct from political opinion. First, the Departments note that the definition of political opinion has been highly debated. *See, e.g.,* Catherine Dauvergne, *Toward a New Framework for Understanding Political Opinion,* 37 Mich. J. Int'l L. 243, 246–47 (2016) (''The tension between [differing interpretations of political opinion] raises the overarching question of whether political opinion should be defined at all. It is evident that existing definitions have not provided sufficient guidance, and that there is no definition in the adjacent area of human rights law that can be logically imported . . . . [A] broadly agreed-upon definition of political opinion would advance the jurisprudence by providing a consistent standard.''). The NPRM aims to clarify this definition for adjudicators. The Departments' use of ''expressive behavior'' is directly related to the NPRM's definition of political opinion as ''intended to advance or further a discrete cause related to political control of a state.'' 85 FR at 36280. Moreover, the Departments are unaware of any claim rooted in political opinion that did not contain some type of expressive behavior, and it is not clear how an opinion never uttered or conveyed could be recognized as a political opinion.

Another commenter expressed concern that a particular state's geopolitical landscape that would leave political opinions indistinguishable from cultural issues. First, BIA case law clearly holds that political opinion involves a cause against a state or political entity rather than against a culture. *Matter of S–P–,* 21 I&N Dec. at 494. However, the Departments also acknowledge that there may be rare circumstances that will amount to exceptions to the general guiding principles laid out in the NPRM. For this reason, the rule uses ''in general'' to guide adjudicators in their determinations.

4.3. Persecution

Comment: Commenters expressed a wide range of concerns with the rule's definitional standard for ''persecution.'' *See* 85 FR at 36280–81; 8 CFR 208.1(e), 1208.1(e). Overall, commenters asserted that the Departments' justification was generally flawed and inappropriately relied on case law to support its position.

Commenters asserted that the proposed definition of persecution is inconsistent with the statutory meaning of the word. For example, commenters argued that the new definition impermissibly alters the definition of refugee so that it does not conform with the United Nations Convention and Protocol Relating to the Status of Refugees. Commenters said this violates the ''fixed-meaning canon'' of construction, which ''holds that words must be given the meaning they had when the text was adopted.'' Commenters considered the meaning of ''refugee,'' which incorporates persecution, in the Refugee Act and argued that legislators intended for persecution to have a broad meaning in order to align the INA with U.S. international obligations.

Commenters expressed concern that the proposed definition of persecution would exclude claims based on threats with no accompanying effort to carry out the threat or non-exigent threats. Commenters cited and discussed numerous Federal cases, including, *Cardoza-Fonseca,* 480 U.S. 421, and argued that Federal case precedent suggests that threats alone can be the basis of asylum claims. One commenter provided the example of death threats and noted that the United States Court of Appeals for the Sixth Circuit reasoned that an applicant need not wait for an actual attempt on his or her life before having a valid claim for asylum. *Juan Antonio,* 959 F.3d at 794. Another commenter similarly argued that a teenage girl who rebuffed inappropriate advances from a corrupt official would not be able to prevail on a persecution claim unless the official assaulted her. Commenters asserted that through the focus on severe and exigent threats, the proposed definition and the accompanying non-exhaustive list of factors would unlawfully lead to denials of asylum claims where applicants suffer significant harms that fall short of an immediate threat to life or property. At least one commenter asserted that this requirement of action would inappropriately eliminate claims based on a well-founded fear of future persecution.

Commenters expressed concern that the proposed definition of persecution wrongfully fails to account for the possibility of cumulative harms rising to the level of persecution and argued that Federal case law instructs that adjudicators must consider cumulative harm. *See, e.g., Herrera-Reyes* v. *Att'y Gen. of U.S.,* 952 F.3d 101, 109 (3d Cir. 2020); *Tairou* v. *Whitaker,* 909 F.3d 702, 707 (4th Cir. 2018); *Matter of O–Z– & I–Z–,* 22 I&N Dec. 23 (BIA 1998). Commenters expressed concern that the rule would prevent applicants who have suffered multiple distinct harms from prevailing on an asylum claim if each instance is deemed to be not severe or to be minor. To illustrate these concerns, one commenter discussed persecution suffered by the Rohingya and another detailed the case of one of his clients whose application, the commenter argued, would be granted under the current regulations and case law but denied under the persecution definition established by the rule.

One commenter argued that because factors suggesting a lack of persecution

are overrepresented, adjudicators would not be engaging in case-by-case analysis and that the scales are inappropriately tipped towards finding a lack of persecution.

Commenters expressed concern that the proposed definition inappropriately fails to consider how children and adults experience harm differently. Specifically, commenters argued that children may experience harm because of affiliation with family members and caregivers and that harm suffered by children may rise to the level of persecution even though the same harm would not rise to such a level for adults. Other commenters noted that it is not reasonable to expect children to seek protection from official sources.

Commenters expressed concern that the proposed rule would require asylum seekers to demonstrate that persecutory laws would likely be enforced against them. As an example, commenters noted that asylum seekers coming from countries where same sex relationships carry the death penalty would not be able to secure asylum unless they could also establish that the law would likely be applied to them. In many cases, one commenter argued, such a penalty is not enforced frequently because sexual minorities are not likely to break the law given the risk of death. The commenter noted that the United States Court of Appeals for the Ninth Circuit has suggested that applicants with these types of claims should prevail. *See Karouni* v. *Gonzales,* 399 F.3d 1163, 1173 (9th Cir. 2005). Commenters also noted that even if laws such as the above are not enforced, they are still persecutory in nature because of the fear and vulnerability that they create in those that could be subjected to the laws.

Response: As stated in the proposed rule, the Departments added new paragraphs in 8 CFR 208.1 and 1208.1 ''to define persecution and better clarify what does and does not constitute persecution.'' 85 FR at 36280. These changes clarify that persecution is an extreme concept that requires severe harm and specify different examples of conduct that, consistent with case law, do not rise to the level of persecution. *See* 85 FR at 36280–81. They are not unduly restrictive, and it is well-established that not every harm that befalls an alien, even if it is unfair, offensive, unjust, or even unlawful, constitutes persecution. *See Gjetani* v. *Barr,* 968 F.3d 393, 397 (5th Cir. 2020) (''Persecution is often described in the negative: It is *not* harassment, intimidation, threats, or even assault. Persecution is a specific term that does not encompass all treatment that our society regards as unfair, unjust, or even unlawful or unconstitutional.'' (quotation omitted)); *see also Ahmed* v. *Ashcroft,* 341 F.3d 214, 217 (3d Cir. 2003) (discrimination against stateless Palestinians in Saudi Arabia did not amount to persecution).

Commenters are correct that the definition of ''refugee'' in the Act, first codified by the Refugee Act, incorporates ''persecution'' and that Congress enacted the Refugee Act in order to conform the Act with the United States' obligations under the 1967 Protocol relating to the Status of Refugees. *See Matter of Acosta,* 19 I&N Dec. at 219. However, commenters are incorrect that Congress intended for the Refugee Act to import any specific international or extrinsic definition of ''persecution.'' Instead, as explained by the BIA, Congress used the term persecution prior to the Refugee Act, and, accordingly, it is presumed that Congress intended for that pre-Refugee Act construction to continue to apply. *Id.* at 222.[50] That prior construction of the term included the notions that ''harm or suffering had to be inflicted upon an individual in order to punish him for possessing a belief or characteristic a persecutor sought to overcome . . . and either by the government of a country or by persons or an organization that the government was unable or unwilling to control.'' *Id.* The standards for persecution contained in the proposed rule and this final rule align with this understanding of ''persecution,'' and the rule is not incompatible with the Act or the United States' international treaty obligations.

Some of the standards implemented by this rule involve matters that the Federal courts have adjudicated inconsistently. For example, the rule establishes that repeated threats would not constitute persecution absent ''actual effort to carry out the threats.'' 8 CFR 208.1(e), 1208.1(e). Courts have held that threats, even with accompanying action, do not necessarily rise to the level of persecution. *See, e.g., Gjetani,* 968 F.3d at 398 (collecting cases and explaining that ''[E]ven those subject to brutal physical attack are not necessarily victims of 'persecution.' Courts have condemned all manner of egregious and even violent behavior while concluding they do not amount to persecution.''); *see also Quijano-Rodriguez* v. *Gonzales,* 139 F. App'x 910, 910–11 (9th Cir. 2005) (collecting cases).

The Departments note that Federal courts have also held that threats without attempts to carry out the threat may at times constitute persecution. *See, e.g., Duran-Rodriguez* v. *Barr,* 918 F.3d 1025, 1028 (9th Cir. 2019) (explaining that ''death threats alone can constitute persecution'' but ''they constitute 'persecution in only a small category of cases, and only when the threats are so menacing as to cause significant actual suffering or harm' '' (citation omitted)). Threats ''combined with confrontation or other mistreatment'' are likely to be persecution; however, ''cases with threats *alone,* particularly anonymous or vague ones, rarely constitute persecution.'' *Id.* (internal citation omitted) (emphasis added); *see also Lim* v. *INS,* 224 F.3d 929, 936 (9th Cir. 2000) (''In certain extreme cases, we have held that repeated and especially menacing death threats can constitute a primary part of a past persecution claim, particularly where those threats are combined with confrontation or other mistreatment. . . . Threats standing alone, however, constitute past persecution in only a small category of cases, and only when the threats are so menacing as to cause significant actual 'suffering or harm.''). Even the case cited by commenters, *Juan Antonio,* 959 F.3d at 794, noted that threats alone amount to persecution only when they are ''of a most immediate and menacing nature''; moreover, the respondent in that case experienced beatings and rape in addition to threats, rendering that case inapposite to the rule, *id.* at 793.

The Departments believe that the rule reflects appropriate and reasonable lines drawn from the relevant case law regarding persecution, particularly due to the difficulty associated with assessing the credibility of an alleged threat, especially in situations in which the threat was made anonymously and without witnesses or the existence of other corroborating evidence. *See Lim,* 224 F.3d at 936 (''Furthermore, claims of threats are hard to disprove. A finding of past persecution raises a regulatory presumption of future persecution and flips the burden of proof . . . to show that conditions have changed to such a degree that the inference is invalid . . . . Flipping the burden of proof every time an asylum applicant claimed that he had been threatened would unduly handcuff the [government].''). To the extent that the standards implemented by this rule conflict with case law interpreting what sorts of conduct rise to the level of persecution, the Departments invoke

[50] Moreover, as also noted by the BIA, the Protocol itself leaves the determination of who should be considered a refugee, which inherently includes a determination of who is at risk of persecution, to each state party itself. *Matter of Acosta,* 19 I&N Dec. at 220.

their authority to interpret the ambiguities of what constitutes persecution—an undefined term in the Act—outside the bounds of such prior judicial constructions. *See Brand X,* 545 U.S. at 982; *see also Grace II,* 965 F.3d at 889 (noting that the term ''persecution'' is ''undefined in the INA''); *cf. Fernandez* v. *Keisler,* 502 F.3d 337, 347–48 (4th Cir. 2007) (applying *Brand X* to affirm the BIA's rejection of the Fourth Circuit's prior interpretation of section 101(a)(22) of the Act, 8 U.S.C. 1101(a)(22), where the court's prior interpretation did not rest on a determination that the statute was ''unambiguous''). Moreover, in response to the commenters' concerns, the final rule more clearly specifies the types of threats included within the definition such that menacing and immediate ones may still come within the definition consistent with the case law noted above.

To the extent that aspects of persecution adjudications are not covered by the rule, the Departments expect adjudicators to conduct all determinations consistent with the law, regulations, and precedent. Accordingly, the rule does not conflict with case law explaining that harms must be considered cumulatively and in the aggregate, *see, e.g., Matter of Z–Z–O–,* 26 I&N Dec. 586, 589 (BIA 2015) (holding that applicant's experiences did not amount to persecution ''when considered either individually or cumulatively''); *Matter of O–Z– & I–Z–,* 22 I&N Dec. at 25–26 (considering incidents of harm ''[i]n the aggregate''), because it does not in any way direct adjudicators to blindly only consider harm suffered individually. In other words, adjudicators will still consider harms suffered by applicants in the aggregate.

Similarly, the rule does not end case-by-case adjudications of whether conduct constitutes persecution. The Departments disagree with commenters that the Departments' choice to frame persecution in the context of conduct that does not rise to the level of persecution while leaving open further adjudication of what conduct constitutes persecution in any way ''tips the scales.'' ''Persecution is often described in the negative . . . .'' *Gjetani,* 968 F.3d at 397.

As noted by commenters, Federal courts have held that an applicant's age is relevant for determining whether the applicant suffered persecution. *See, e.g., Liu* v. *Ashcroft,* 380 F.3d 307, 314 (7th Cir. 2004) (''[A]ge can be a critical factor in the adjudication of asylum claims and may bear heavily on the question of whether an applicant was persecuted or whether she holds a well-founded fear of future persecution.''). Commenters are incorrect, however, that the rule's persecution standard conflicts with this instruction. Instead, the rule provides a general standard for persecution that is built around the severity of the harm. 8 CFR 208.1(e), 1208.1(e). This focus on severity does not foreclose arguments or an adjudicator's finding that harms suffered by an applicant are severe in their particular context given the applicant's age or particular circumstances, even if such harms may not generally be considered severe for the average applicant.

Regarding commenters' concerns with the rule's instruction that ''[t]he existence of laws or government policies that are unenforced or infrequently enforced do not, by themselves, constitute persecution, unless there is credible evidence that those laws or policies have been or would be applied to an applicant personally,'' the Departments note this standard is consistent with well-established law that ''an asylum applicant can establish a well-founded fear of persecution by proving either a pattern or practice of persecution of a social group, of which the applicant has proven she is a member, or by proving the applicant will be singled out personally.'' *Ayele* v. *Holder,* 564 F.3d 862, 870 (7th Cir. 2009). Laws that are unenforced or enforced infrequently cannot demonstrate a pattern or practice of persecution, 8 CFR 208.13(b)(2)(iii), 1208.13(b)(2)(iii), and without credible evidence that such laws would be applied to the applicant, the alien cannot demonstrate that he or she would be singled out individually for persecution, *id.* The rule does not alter these well-established precepts. Further, this requirement that the mere existence of a law, without more, is insufficient to rise to the level of persecution is in keeping with prior interpretations of persecution. For example, the BIA has explained that evidence of the enactment of a new law is not evidence of changed country conditions for the purposes of a motion to reopen ''without convincing evidence that the prior version of the law was different, or was differently enforced, in some relevant and material way.'' *Matter of S–Y–G–,* 24 I&N Dec. 247, 257 (BIA 2007).

This definition does not foreclose an applicant from citing to the existence of such laws as a part of his or her evidence to demonstrate past persecution or risk of future persecution. Nor does this requirement require an applicant to live in secret in order to avoid future harm. Further, the Departments expect that in many cases there may be credible evidence of the enforcement of such laws. For example, in the Ninth Circuit case cited by commenters, the government conceded at oral argument that the Lebanese government arrested individuals for homosexual acts and enforced the law at issue. *Karouni,* 399 F.3d at 1172.

Finally, the rule's persecution standard does not in any way foreclose claims based solely on a well-founded fear of future persecution. Instead, the adjudicator will consider whether the future harm feared by the applicant would constitute persecution under the rule's standards. In other words, the adjudicator would consider whether the feared harm would be carried out by an individual with the intent to target the applicant's belief or characteristic, would be severe, and would be inflicted by the government or by persons or organizations that the government is unable or unwilling to control.[51]

4.4. Nexus

Comment: Numerous commenters expressed general disagreement regarding the rule's nexus provisions, including referring to the list as an ''anti-asylum wish list.'' Commenters claimed that it directed adjudicators to deny most claims.

Some commenters alleged that the Departments were attempting to accelerate asylum hearings at the expense of due process; the commenters construed the rule as creating a checklist that bypasses careful consideration that due process requires. Others opined that the rule prioritized efficiency and expediency over fairness, due process, and ''basic humanity.'' Commenters stated the rule allowed ''blanket denials.''

Another commenter opined that the rule was arbitrary because the Departments failed to consider the real-world implications of the proposal. Commenters expressed concern that, after the enactment of the rule, many asylum seekers would not have favorable adjudication of their claims,

[51] Specifically regarding commenters' concerns that the rule's standard that threats without accompanying action do not constitute persecution would undermine claims based on fear of future persecution, the Departments believe that the commenters are conflating past harms and determinations of past persecution with fear of future harm and determinations of a well-founded fear of future persecution. Indeed, it is difficult to understand how anyone could predict whether future threats will occur and difficult to conceive of a claim in which an alien alleges a fear of future threats but not a fear of future physical, mental, or economic harm. The real issue is the likelihood of future harm based on past threats, and the rule does not alter an alien's ability to argue that past threats are evidence of either past persecution or a likelihood of future persecution.

including those based on violence from non-state actors. Others claimed the rule's nexus components were ''completely incapable of supporting a meritorious asylum claim.''

Commenters expressed concern that the rule precludes a mixed-motive analysis, reasoning that if an actor had any one, potential motive listed in the rule, it would be fatal to the claim, and that it violates the ''one central reason'' standard. INA 208(b)(1)(B)(i), 8 U.S.C. 1158(b)(1)(B)(i).

Some of the commenters' disagreement surrounded *Matter of A–B–,* 27 I&N Dec. 316. One commenter opined that the rule is contrary to *Matter of A–B–*'s requirement of case-by-case rigorous analysis, and another commenter worried that the NPRM codified *Matter of A–B–,* despite, as the commenter characterized, its unfavorable treatment in various Federal courts.

Other commenters argued that the nexus provisions conflated ''categories of people'' with requirements of the perpetrator's mental state.

Another commenter expressed concern that the rule included ''substantive changes to the law disguised in procedural attire.''

Response: As an initial point, to the extent commenters' points misstate the rule, address issues not raised by the rule, are rooted in erroneous reasoning, are contrary to facts or law, or reflect unsubstantiated and exaggerated melodramatic views of the rule, the Departments decline to adopt those points. The Departments do not wish to enact some ''anti-asylum wish list'' in this rule. In codifying the circumstances that are generally insufficient to support a nexus finding, the Departments are simply specifying common circumstances, consistent with case law, in order to provide clarity and efficiency for adjudicators. The Departments proposed these amendments in order to assist aliens with meritorious claims, as well as the entire immigration system. As with all regulations or policy changes, the Departments considered the effect this rule will have; accordingly, the Departments reject commenters' allegations that such implications were not considered.

The rule's inclusion of these general guidelines for nexus determinations will not result in due process violations from adjudicators failing to engage in an individualized analysis. The rule provides a nonexhaustive list of eight circumstances that generally will not warrant favorable adjudication, but the rule does not prohibit a favorable adjudication depending on the specific facts and circumstances of the applicant's particular claim. *See* 8 CFR 208.1(f), 1208.1(f) (''For purposes of adjudicating an application for asylum under section 208 of the Act or an application for withholding of removal under section 241(b)(3) of the Act, the Secretary, in general, will not favorably adjudicate the claims of aliens who claim persecution based on the following list of nonexhaustive circumstances''); *see also Grace II,* 965 F.3d at 906 (holding that the inclusion of qualifying terms like ''in general'' and ''generally'' demonstrated that the government had not enacted a rule that all gang-based asylum claims would fail to demonstrate eligibility for asylum). In other words, the rule implicitly allows for those rare circumstances in which the specified circumstances could in fact be the basis for finding nexus given the fact-intensive nature of nexus determinations. *See* 85 FR at 36279. The amended regulations do not remove that fact-intensive nature from the nexus inquiry; rather, the amended regulations provide clarity in order to reduce the amount of time that adjudicators must spend evaluating claims. While the Departments did consider expediency and fairness, the Departments disagree that expediency is prioritized over and above due process.

The Departments disagree with commenters' concerns that the nexus provisions eliminate the mixed motive analysis or violate the ''one central reason'' standard. As discussed above in Section II.C.4.3 of this preamble, to the extent that aspects of persecution adjudications are not covered by the rule, the Departments expect adjudicators to conduct all determinations consistent with the law, regulations, and precedent. Here, the rule provides guidance on harms that would not be considered on account of one of the five protected grounds; the rule did not state, nor was it meant to be construed, that it precluded mixed motive analysis if the situation involved one of the five protected grounds in addition to one of the listed circumstances that would generally not be harm on account of a protected ground. Further, the preamble to the NPRM acknowledges mixed motive claims by quoting the REAL ID Act of 2005, which defined the nexus element as requiring that one of the five protected grounds to be ''at least one central reason for persecuting the applicant.'' 85 FR at 36281.

As to the concerns surrounding *Matter of A–B–,* the Departments reiterate the above discussion that adjudicators should continue to engage in individualized, fact-based adjudications as the rule provides only a list of circumstances that do not constitute harm on account of a protected ground in most, but not all, cases. Accordingly, the rule is consistent with the Attorney General's admonishment, in *Matter of A–B–,* of the BIA for failing to engage in an individualized analysis and instead accepting the Government's concessions as true. 27 I&N Dec. at 339. Regarding commenters' further concerns that the rule should not codify *Matter of A–B–* given its varied treatment by the Federal courts, the Departments note that the United States Court of Appeals for the District of Columbia Circuit recently affirmed that *Matter of A–B–* holds that decision makers must make individual determinations on a case-by-case basis. *Grace II,* 965 F.3d at 905. The Departments also note that every circuit court addressing *Matter of A–B–* on its merits so far, as opposed to the unusual procedural challenge at issue in *Grace II,* has found it to be a valid exercise of the Attorney General's authority. *See, e.g., Gonzales-Veliz* v. *Barr,* 938 F.3d at 234 (''In sum, because *A–B–* did not change any policy relating to asylum and withholding of removal claims, we reject Gonzales-Veliz argument that *A–B–* constituted an arbitrary and capricious change in policy.''); *Diaz-Reynoso* v. *Barr,* 968 F.3d 1070, 1080 (9th Cir. 2020) (''Accordingly, we decline to hold that the Attorney General's decision in *Matter of A–B–* was arbitrary or capricious.'').

The Departments disagree with the commenters' allegation that the Departments conflated nexus with other asylum requirements by not solely focusing on the perpetrator's state of mind. The NPRM provides a list of situations that would not ordinarily be on account of a protected ground. 85 FR at 36281. The listed situations are attenuated from protected grounds to the extent that they do not meet the necessary nexus requirement. While some of the listed situations, particularly those related to the rationale for the harm, are closely related to other elements of asylum, including particular social group, a nexus analysis has often required an examination of the persecutor's views. *See Sharma* v. *Holder,* 729 F.3d 407, 412–13 (5th Cir. 2013); *Caal-Tiul* v. *Holder,* 582 F.3d 92, 95 (1st Cir. 2009). Thus, the inclusion of the situations related to rationale for the harm are consistent with case law.

Finally, the Departments reiterate that the NPRM does not re-write asylum law as some commenters suggested. As noted in the NPRM and herein, the provisions of the rule related to the substance of asylum claims flows from

well-established statutory authority and relevant case law; thus, it does not ''re-write'' substantive asylum law. The NPRM falls squarely within the Departments' authority, which is discussed more fully in Section 6.5 of this preamble.

4.4.1. Interpersonal Animus or Retribution

Comment: Commenters expressed particular concerns regarding the specification that claims based on ''interpersonal animus or retribution'' generally will not be favorably adjudicated. 8 CFR 208.1(f)(1), 1208.1(f)(1). One commenter opined that it was arbitrary and irrational for the Departments to rely on *Zoarab* v. *Mukasey,* 524 F.3d 777, 781 (6th Cir. 2008), in support of this change because that case's facts were ''unusual.''

Commenters expressed confusion as to whether interpersonal modified both animus and retribution. If it did not modify retribution, commenters expressed concern that retribution, which they defined as punishment, encompasses all asylum claims.

Other commenters remarked that all harm between people is interpersonal.

Commenters also expressed concern that the inclusion of this situation would result in the erasure of mixed motive analysis as some ''may engage in persecution for pretextual reasons to hide their bias.''

Response: The inclusion of claims based on ''interpersonal animus and retribution'' as examples of claims that will generally not result in a favorable adjudication because the harm is not on account of a protected ground is consistent with longstanding precedent. The Departments cited to just one case, *Zoarab,* 524 F.3d at 781, to illustrate this point in the NPRM, but there are numerous other examples. *See, e.g., Martinez-Galarza* v. *Holder,* 782 F.3d 990, 993 (8th Cir. 2015) (finding that harm ''motivated by purely personal retribution'' is not a valid basis for an asylum claim); *Madrigal* v. *Holder,* 716 F.3d 499, 506 (9th Cir. 2013) (explaining that ''mistreatment motivated purely by personal retribution will not give rise to a valid asylum claim''); *Amilcar-Orellana* v. *Mukasey,* 551 F.3d 86, 91 (1st Cir. 2008) (holding that ''[f]ear of retribution over personal matters is not a basis for asylum under the Immigration and Nationality Act''); *Jun Ying Wang* v. *Gonzales,* 445 F.3d 993, 998 (7th Cir. 2006) (acknowledging that the Seventh Circuit has ''repeatedly held that a personal dispute cannot give rise to a claim for asylum''); *Molina-Morales* v. *INS,* 237 F.3d 1048, 1052 (9th Cir. 2001) (quoting *Grava* v. *INS,* 205 F.3d 1177, 1181 n.3 (9th Cir. 2000), and reiterating that ''[p]urely personal retribution is, of course, not'' a protected ground, specifically, imputed political opinion); *Blanco de Belbruno* v. *Ashcroft,* 362 F.3d 272, 284 (4th Cir. 2004) (finding that ''[f]ears of 'retribution over purely personal matters . . .' do[es] not constitute [a] cognizable bas[is] for granting asylum'') (quoting *Huaman–Cornelio* v. *BIA,* 979 F.2d 995, 1000 (4th Cir. 1992)). The Departments disagree that *Zoarab* is not an accurate example of this basic proposition despite commenters' characterizations of the case's particular facts. Furthermore, after the NPRM was promulgated, the Attorney General made the point more explicitly that interpersonal animus or retribution will generally not support a nexus finding required under the INA. *See Matter of A–C–A–A–,* 28 I&N Dec. 84, 92 (A.G. 2020) (''An alien's membership in a particular social group cannot be incidental, tangential, or subordinate to the persecutor's motivation for why the persecutor sought to inflict harm. . . . Accordingly, persecution that results from personal animus or retribution generally does not establish the necessary nexus.'' (cleaned up)). ''The reasoning for this is straightforward: When private actors inflict violence based on a personal relationship with a victim, then the victim's membership in a larger group may well not be 'one central reason' for the abuse.'' *Id.* (internal quotation marks omitted).

To the extent commenters argue that any harm between two people is ''interpersonal,'' commenters misinterpret both the cases supporting this provision and the rule itself. Instead, the point here is that a personal dispute between two people—for example a property dispute that causes some sort of altercation or a personal altercation because of one person's involvement with a criminal investigation and prosecution—is not generally a valid basis for an asylum claim because it is not harm on account of a protected ground. Further, as set out in the rule, the qualifier ''interpersonal'' applies to both animus and retribution. Accordingly, commenters are incorrect that this provision states that any claim based on ''retribution'' would generally be insufficient and that all or most claims would fail as a result.

Finally, the Departments reiterate the discussion above in Section II.C.4.4 of this preamble that the inclusion of these examples does not foreclose a mixed motive analysis. Accordingly, to the extent an applicant's fear is based on harm partially motivated by an interpersonal dispute and partially motivated by another potentially protected ground, the adjudicator will consider those particular facts and circumstances to determine the applicant's eligibility for asylum or statutory withholding of removal.

4.4.2. Interpersonal Animus in Which the Alleged Persecutor Has Not Targeted, or Manifested an Animus Against, Other Members of an Alleged Particular Social Group in Addition to the Member Who Has Raised the Claim at Issue

Comment: Commenters also raised concerns regarding this change in the NPRM described in this heading. One commenter argued that it was a ''clear attempt to bar women from obtaining asylum based on domestic violence,'' a claim that the commenter noted was an ''uncontroversial basis for asylum in many of our courtrooms until the Attorney General issued *Matter of A–B–.*'' One commenter asserted that this amendment gives the persecutor a ''free pass'' to persecute someone because that person will be unable to establish that another person suffered under this persecutor. Further, the commenter argued that asking an alien to investigate, while attempting to flee for safety, whether the persecutor had persecuted others was impossible, absurd, and arbitrary. Another commenter claimed that it violated the INA to require an alien to demonstrate that the persecutor ''manifested animus against others.'' One commenter claimed that the amendment was irrational because it held aliens seeking asylum through membership in a particular social group to a different and higher evidentiary standard than aliens seeking asylum through the other four protected grounds. The commenter asserted that this reading was supported by the BIA's use of ejusdem generis in *Matter of Acosta,* 19 I&N Dec. 211, and the Attorney General's favorable citation of the rule in *Matter of L–E–A–,* 27 I&N Dec. 581. Another commenter insisted that ''interpersonal'' was a meaningless modifier.

Response: The Departments, based on prior case law, decided that demonstration of animus against other members of the particular social group is generally necessary to establish nexus. 85 FR at 36281; *see also Matter of A–C–A–A–,* 28 I&N Dec. 84, 92 (A.G. 2020) (''Furthermore, if the persecutor has neither targeted nor manifested any animus toward any member of the particular social group other than the applicant, then the applicant may not satisfy the nexus requirement.''). The focus of the nexus requirement is membership in the group, INA

101(a)(42), 8 U.S.C. 1101(a)(42), and by definition, a ''group'' encompasses more than one individual. Thus, an alleged persecutor who has no interest in harming other individuals ostensibly in that group is generally not seeking to persecute one individual on account of his or her membership in that alleged particular social group. Without such animus against other group members, the motivation would appear to be personal, rather than on account of membership in the group, and a personal dispute, as discussed above, is generally insufficient on its own to qualify the applicant for the relief of asylum. *See Madrigal,* 716 F.3d at 506.

Asylum law is not meant to provide redress for every victim of crime no matter how sympathetic those victims may be. Accordingly, in order to demonstrate that an alien was persecuted ''on account of'' a particular social group based on interpersonal animus, the alien will ordinarily need to demonstrate that the persecutor has targeted or manifested an animus against someone else in that particular social group. Because an alien will necessarily articulate a particular social group that is socially distinct in order for the group to be cognizable in the first instance, it is reasonable to expect the alien to be able to articulate whether the alleged persecutor has sought to harm other members of that group. The rule does not require aliens to investigate or ask their alleged persecutors anything; rather, the aliens should already have evidence about the persecutor's motives in order to advance a valid asylum claim in the first instance, especially in cases where the alleged persecutor is the government.

Despite the inclusion of this ground as a statement of one type of claim that is generally incapable of supporting an application for relief, the Departments reject commenters' interpretation of this provision as a bar. Rather, as the Departments have detailed above, the rule itself allows for circumstances where a listed situation, based on the specific facts, will support a nexus finding. For example, as noted by commenters, an applicant who is a persecutor's initial victim may argue that despite the persecutor's lack of action against other group members, the applicant's dispute with the persecutor is in fact on account of the protected ground and not on account of a non-protected personal concern.[52] Accordingly, commenters' suggestion that each persecutor will have a ''free pass'' is also incorrect.[53]

Additionally, the Departments disagree that this provision evidences discriminatory intent against a particular class of asylum applicants. The rule is designed to provide expedited adjudication of meritorious claims as well as increased clarity and uniformity—a problem that commenters highlighted by noting that ''many,'' but not all, courts held a particular standard regarding applications premised on domestic violence.

The Departments do not believe that this requirement violates the INA, and without a more specific comment, they are unable to respond.

This provision is not irrational and does not hold aliens relying on membership in a particular social group to a higher evidentiary standard. Although particular social group is a more amorphous category than race, religion, nationality, or political opinion—and, thus, more in need of definitional clarity—each protected ground requires demonstration of the same base elements: Persecution or a well-founded fear of persecution on account of a protected ground.

Further, ''interpersonal'' is not a meaningless modifier. The Departments use the term ''interpersonal'' to differentiate instances of animus and dispute between two private parties from instances of animus and dispute between a private individual and a government official.

4.4.3. Generalized Disapproval of, Disagreement With, or Opposition to Criminal, Terrorist, Gang, Guerilla, or Other Non-State Organizations Absent Expressive Behavior in Furtherance of a Discrete Cause Against Such Organizations Related To Control of a State or Expressive Behavior That is Antithetical to the State or a Legal Unit of the State

Comment: Commenters expressed concerns regarding the required analysis, the underlying intent, and the necessary elements of the inclusion of ''generalized disapproval of, disagreement with, or opposition to criminal, terrorist, gang, guerilla, or other non-state organizations absent expressive behavior in furtherance of a discrete cause against such organizations related to control of a state or expressive behavior that is antithetical to the state or a legal unit of the state'' in the list of circumstances that will generally not support a nexus finding. Specifically, some commenters argued that this provision undermines a rigorous fact-based analysis as it ''categorically state[s] that certain opinions can never be political.'' The commenters urged that this type of labeling is incorrect and improper. Additionally, commenters asserted that the provision ''evidences a clear discriminatory intention to utterly annihilate the entire genres of asylum cases where opposition to gangs constitutes a political opinion.'' Another commenter claimed that the rule was ''clearly designed'' to eliminate asylum for those fleeing the ''Northern Triangle'' (El Salvador, Guatemala, and Honduras) of Central America. One commenter asserted that because the international criminal organizations function as quasi-governments, there is often no reason for an alien to engage in expressive behavior that is antithetical to the state because ''the state has no real authority.''

Response: First, commenters are incorrect that this provision prohibits certain opinions from being considered ''political.'' Instead, as discussed above, adjudicators should continue to engage in fact-based analysis of the particular facts and circumstances of an individual applicant's claim, and the rule expressly allows for rare circumstances in which the facts of a listed situation could be the basis for finding nexus. This provision does not remove that fact-intensive nature from the nexus inquiry.

Additionally, the Departments disagree that this provision evidences a discriminatory intent. Again, the rule is designed to allow a more expeditious adjudication of meritorious asylum claims so that applicants do not have to wait a lengthy amount of time before receiving relief. The Departments' inclusion in this section of the rule of a certain category of claims that is frequently raised but is generally insufficient to establish nexus is not the product of a desire to harm or inhibit a particular people, nationality, or group.

As to a commenter's suggestion that aliens may be unlikely to engage in expressive behavior that is antithetical to the state because the state has no real authority due to international criminal organizations functioning as quasi-governments, the Departments interpret this comment to refer to organizations such as drug cartels whom the commenter believes function as de facto governments in some countries. Although the Departments question the factual accuracy of the commenter's point and otherwise believe the comment is either hypothetical or

[52] The Departments also note that the commenters' example of an ''initial victim'' necessarily presumes both that there are other victims and that the alien knows or will know of them. Consequently, that example would fall outside of the rule's purview in any event.

[53] Further, persecutors are not brought to justice under U.S. asylum law nor should it be viewed that way. The Departments are not giving persecutors ''one free pass'' because they are often not dealing with the persecutors themselves.

speculative, especially due to the fact-intensive, case-by-case nature of asylum application adjudications, they nevertheless note that the rule does not preclude claims based on opposition to non-state organizations related to efforts by the state to control such organizations. 8 CFR 208.1(d), 1208.1(d). And if an applicant establishes that the organization is the de facto government or otherwise functions in concert with the government, then the rule does not preclude a claim based on the applicant's opposition to that organization or the government. In other words, whether the country has ''real authority'' or not, nothing in the rule precludes a claim based on opposition to non-state organizations in the circumstances outlined in the rule, though the Departments note that, in general, aliens who do not engage in expressive behavior regarding such organizations or the government are unlikely to establish a nexus based on political opinion for purposes of an asylum application.

4.4.4. Resistance to Recruitment or Coercion by Guerilla, Criminal, Gang, Terrorist, or Other Non-State Organizations

Comment: Commenters asserted that the inclusion of ''resistance to recruitment or coercion by guerilla, criminal, gang, terrorist, or other non-state organizations'' as a particular circumstance that generally does not support a nexus finding does not take in to account the significant power yielded by transnational criminal organizations, which often function as de facto governments.

Response: The Departments appreciate commenters' concerns about the expansive power of transnational criminal organizations. The Departments agree with commenters that such organizations may pose significant dangers. If an alien asserts that the government is unable or unwilling to control the transnational criminal organization, the alien may present evidence to establish that. As the Departments have previously mentioned, the NPRM explicitly acknowledges the fact-intensive nature of the nexus inquiry and further acknowledges that rare circumstances defined by the listed situations may warrant a favorable nexus determination.

4.4.5. The Targeting of the Applicant for Criminal Activity for Financial Gain Based on Wealth or Affluence or Perceptions of Wealth or Affluence

Comment: Regarding ''the targeting of the applicant for criminal activity for financial gain based on wealth or affluence or perceptions of wealth or affluence,'' one commenter expressed concern about the Departments' citation to *Aldana-Ramos* v. *Holder,* 757 F.3d 9, 18 (1st Cir. 2014), as support. The commenter stated that the case's primary holding was ''even if a persecutor seeks to harm an asylum seeker for financial gain, the BIA must engage in a mixed motive analysis to determine whether the protected characteristic was also a central reason for the persecution.'' The commenter alleged that the Departments were relying on *Aldana-Ramos* to ''implement a blanket rule against asylum seekers who may be targeted, in part, based on wealth or perceived wealth, with no regulatory requirement that adjudicators engage in mixed motive analysis, as is required under the Real ID Act as codified in the INA.''

Response: As discussed above, the nexus provisions do not eliminate the mixed-motive analysis. The NPRM explicitly detailed that it was providing guidance on what generally would not be considered one of the five protected grounds; the NPRM did not state, nor was it meant to be construed, that it precluded mixed-motive analysis if the situation involved one of the five protected grounds in addition to a situation on the list that was not adjudicated to be a protected ground. Thus, the NPRM is consistent with mixed-motive analysis precedent, and an applicant may provide argument, like the respondent in *Aldana-Ramos,* that his or her alleged persecutor is motivated by a protected ground in addition to the non-protected ground stated in the exception.

4.4.6. Criminal Activity

Comment: Commenters expressed concern about the rule's inclusion of ''criminal activity'' as the basis of claims that will generally not support a favorable adjudication due to the breadth of the provision and the underlying precedent. Numerous commenters opined that ''virtually all harm'' that satisfies the persecution requirement could be characterized as ''criminal activity'' because ''in virtually every country, beatings, rape, and threatened murder'' are criminalized. Another commenter realized that this broad definition may not be what the Departments intended, but without providing boundaries on the term, the Departments invited ''mass denials of claims by those who have bona fide asylum claims.'' A commenter expressed concern that the category would include aliens who were forced or coerced into committing crimes. Additionally, a commenter expressed reservations about the Departments' reliance on *Zetino* v. *Holder,* 622 F.3d 1007, 1016 (9th Cir. 2010), explaining that the ''alien was detained and unrepresented before the immigration court and the BIA'' and ''it was not until he had filed a pro se petition for review that he obtained counsel, and most of his appeal centered on procedural defects in the proceedings below.''

Response: The inclusion of ''criminal activity'' is not overly expansive. Rather, as demonstrated by the explanatory case citation provided by the Departments, this provision is meant to capture cases that are premised on generalized criminal activity. *See Zetino,* 622 F.3d at 1016 (discussing the ''desire to be free from harassment by criminals motivated by theft or random violence by gang members'').

The Departments find that these generalized claims are distinct from the commenters' concerns that persecutory acts in general may be ''criminal.'' To the extent commenters are nevertheless concerned that this provision would prohibit a broader swath of claims, the Departments again reiterate that these categories of cases are not categorical bans. Instead, the rule explicitly noted that there may be exceptions, and an applicant may present argument to the adjudicator as to why their individual case meets the nexus requirement. For example, aliens who were forced and coerced into crime may be an exception based upon the specific facts of the situation.

Further, the citation to *Zetino* remains an accurate example of the Departments' proposition despite commenters' concerns, which involved procedural issues unrelated to the relevant points in the case.

4.4.7. Perceived, Past or Present, Gang Affiliation

Comment: Regarding the inclusion of ''perceived, past or present, gang affiliation'' as the basis of claims that will generally not support a favorable adjudication, commenters objected to a perceived double standard and the implications for aliens, especially children. Several commenters argued that this provision was arbitrary and capricious because it would make individuals who were incorrectly imputed to be gang members ineligible for asylum while allowing incorrect

imputation of other characteristics, for example, homosexuality, to be grounds for asylum. Another commenter noted that this change would twice victimize aliens because imputed gang membership occurs at no fault of their own. One commenter also expressed concern that children who are forced into prostitution or drug smuggling would lose their right to asylum.

Response: The Departments acknowledge commenters' concerns and have sympathy for aliens who incorrectly have gang membership imputed onto them by no fault of their own. These concerns, however, do not result in a viable asylum claim. ''[T]he asylum statute does not provide redress for every misfortune.'' *Matter of A–B–,* 27 I&N Dec. at 318.

Regarding commenters' concerns that the rule provides an inconsistent approach to immutability, commenters compare dissimilar claims. While gang affiliation and homosexuality are traits that may both be imputed, accurately or not, to an applicant, the underlying ground of the latter may be a protected ground while the former is not. Thus, the Departments' approach toward immutability is consistently based on the protected nature of the underlying ground.

Commenters are incorrect that this provision would cause children, such as those forced into prostitution or drug smuggling by criminal gangs, to lose their eligibility for asylum.[54] Indeed, as noted in the preamble, claims premised on these sorts of gang affiliations had already been found in case law to not support a finding of asylum eligibility prior to the proposed rule's publication. *See, e.g., Reyes,* 842 F.3d at 1137–38 (holding that ''former members of the Mara 18 gang in El Salvador who have renounced their membership'' was not a cognizable particular social group); *Matter of A–B–,* 27 I&N Dec. at 320 (''Generally, claims by aliens pertaining to . . . gang violence perpetrated by non-governmental actors will not qualify for asylum.''). Because these gang-based claims are not related to a protected ground, it reasonably follows that they would further not succeed on nexus because the harms would not be on account of a protected ground. Nevertheless, the Departments again reiterate that, as discussed above, the rule explicitly provides for rare exceptions; children who were forced into prostitution or drug smuggling may present argument that their case sufficiently meets the nexus requirements based upon the specific facts in their application.

4.4.8. Gender

Comment: Some commenters expressed strong objections to the NPRM's inclusion of gender in the list of circumstances that would not ordinarily result in a favorable adjudication, including allegations that the provision is arbitrary and capricious as well as ''cruel and contrary to the purposes underlying Congress' desire to provide protection to refugees.'' Some commenters also argued that the amendments took a new and capricious position and would result in substantial and irreparable harm to aliens. One commenter opined that this provision was really about a desire to reduce the amount of aliens who could seek asylum.

Commenters asserted that gender has been one of the bedrock bases for asylum claims and that, as a result, the rule overturns decades of contrary legal precedent. In support, commenters cited to multiple cases ''in which immigration judges, the BIA, and the courts of appeals have held that gender-based persecution provides a valid ground for asylum.'' [55] One commenter claimed that the proposed rule ''runs counter to every case to have considered it.'' According to commenters, this includes the precedent cited in support of the rule, *Niang* v. *Gonzales,* 422 F.3d 1187 (10th Cir. 2005), which they assert in fact holds that gender can provide an adequate basis for establishing membership in a particular social group. *Id.* at 1199–1200. Some commenters asserted that the Departments should have included a larger quotation in the NPRM preamble, including:

> the focus with respect to such claims should be not on whether either gender constitutes a social group (which both certainly do) but on whether the members of that group are sufficiently likely to be persecuted that one could say that they are persecuted ''on account of'' their membership. 8 U.S.C. 1101(a)(42)(A). It may well be that only certain women—say, those who protest inequities—suffer harm severe enough to be considered persecution. The issue then becomes whether the protesting women constitute a social group.

Niang, 422 F.3d at 1199. One commenter expressed a belief that the Departments' choice of language to cite in *Niang* was designed to deceive the public and to reduce the notice and comment burden.

Commenters asserted that the inclusion of gender conflicts with the international obligations and international norms of the United States. For example, a commenter noted that the UNHCR, which oversees the Refugee Convention, has confirmed that people fleeing persecution based on gender, gender-identity, and sexual orientation do qualify for asylum under the Convention's definition of a refugee. In regards to numerosity, the commenter pointed to UNHCR guidance which explained, ''[t]he size of the group has sometimes been used as a basis for refusing to recognize 'women' generally as a particular social group. This argument has no basis in fact or reason, as the other grounds are not bound by this question of size.'' Commenters stated that because the inclusion of gender would exclude meritorious claims for relief, the rule against gender-based asylum claims would violate the government's duty of non-refoulement as codified in statutory withholding of removal at section 241(b)(3)(A), 8 U.S.C. 1231(b)(3)(A). Commenters stated that the rule against gender-based asylum would aid and abet violations of the law of nations in contravention of the Alien Tort Claims Act (''ATCA'') because there is a specific and universal obligation to prevent domestic violence and other violence against women in international law.

One commenter argued that it is improper to disfavor gender-based claims in the nexus section. In support of that position, the commenter asserted that to support a general bar on gender-based claims within the nexus analysis, the agencies would need to show that gender is not generally a central reason for persecution throughout the world, and further, the proposed regulation changes do nothing to establish any empirical claims about causation.

Commenters also expressed concern that the amendment would prevent adjudicators from evaluating claims on a case-by-case basis.

[54] The Departments note that aliens who are victims of criminal activities, including human trafficking, may be eligible for other immigration benefits beyond asylum based on that victimization. INA 101(a)(15)(T),(U), 8 U.S.C. 1101(a)(15)(T),(U).

[55] For example, one commenter cited to the following cases: *De Pena-Paniagua* v. *Barr,* 957 F.3d 88, 93–94 (1st Cir. 2020); *Cece,* 733 F.3d 671–72; *Sarhan* v. *Holder,* 658 F.3d 649, 654–57 (7th Cir. 2011); *Perdomo,* 611 F.3d at 662; *Agbor* v. *Gonzales,* 487 F.3d 499, 503 (7th Cir. 2007); *Hassan* v. *Gonzales,* 484 F.3d 513, 517–18 (8th Cir. 2007); *Barry* v. *Gonzales,* 445 F.3d 741, 745 (4th Cir. 2006); *Gao* v. *Gonzales,* 440 F.3d 62, 70 (2d Cir. 2004), *vac'd on other grounds sub nom. Keisler* v. *Gao,* 552 U.S. 801 (2007); *Niang,* 422 F.3d at 1999–1200; *Mohammed* v. *Gonzales,* 400 F.3d 785, 795–98 (9th Cir. 2005); *Balogun* v. *Ashcroft,* 374 F.3d 492, 499 (7th Cir. 2004); *Abay* v. *Ashcroft,* 368 F.3d 634, 639–42 (6th Cir. 2004); *Yadegar-Sargis* v. *INS,* 297 F.3d 596, 603–04 (7th Cir. 2002); *Fatin,* 12 F.3d at 1241; *In re Kasinga,* 21 I&N Dec. 357, 375 (BIA 1996); *cf., e.g., Kadri* v. *Mukasey,* 543 F.3d 16, 21 (1st Cir. 2008) (''Sexual orientation can serve as the foundation for a claim of persecution, as it is the basis for inclusion in a particular social group.''); *Karouni* v. *Gonzales,* 399 F.3d at 1171–72 (reaching the same conclusion).

Another commenter noted that levels of gender-based violence have risen during the coronavirus pandemic and stated that, as a result, it is not appropriate for the Departments to take action to restrict asylum claims based on gender.

A commenter requested that the Departments not eliminate one of the few protections for gender-based violence.

Another commenter noted the Department of State's work to reduce and eliminate gender-based violence, including emphasizing in the refugee protection context that the ''empowerment and protection of women and girls has been a central part of U.S. foreign policy and national security'' and that ''gender-based violence[ ] is a critical issue'' that is ''intricately linked to'' the Department's strategic goals.

Finally, a commenter made numerous unsupported claims, including that the inclusion of gender violates the constitutional guarantee of equal protection; that the inclusion of gender in the laundry list is contrary to the evidence; and that the NPRM's failure to include a rationale for listing gender as failing the nexus requirement is, without more, sufficient to render that inclusion arbitrary.

Response: Regarding commenters' concerns that gender and ''private criminal acts'' would no longer be recognized as a viable claim, the Departments again note that the rule, after listing the eight situations that will generally not result in favorable adjudication, also notes that in rare circumstances, given the fact-specific nature of such determinations, such facts could be the basis for finding nexus. Although the nexus requirement for an asylum claim requires scrutiny when an asserted particular social group encompasses ''millions'' of individuals, *Matter of A–C–A–A–,* 28 I&N Dec. 92, the rule does not categorically bar all gender-based asylum claims contrary to the assertions of commenters. In other words, the rule does not completely prohibit applications with a nexus related to issues of gender from being granted, and the inclusion of gender in the list of circumstances that generally does not constitute harm on account of a protected ground does not conflict with the requirement that adjudicators consider each application on a case-by-case basis. Further, a purpose for the amendments was to allow for increased clarity and more uniform adjudication than the prior scheme which was shaped through case law. Thus, the Departments do not believe that the inclusion of gender in the listed situations generally resulting in unfavorable adjudication is cruel, novel, capricious, or contrary to congressional intent.

The Departments acknowledge commenters' discussion of a wide range of case law involving issues surrounding gender and applications for asylum or for statutory withholding of removal. To the extent that the Departments' inclusion of ''gender'' as an example of a nexus basis that generally will not support a favorable adjudication conflicts with the provided case law, the Departments reiterate the discussion in Section II.C.4.3 of this preamble regarding *Brand X.* The Departments invoke their authority to interpret the ambiguities in the Act, including what constitutes harm on account of a protected ground, outside the bounds of any prior judicial constructions. *See Brand X,* 545 U.S. at 982 (explaining that agencies are not bound by prior judicial interpretations of ambiguous statutory interpretations because there is a presumption that Congress left statutory ambiguity for the agencies to resolve).

Regarding commenters' specific objections to the Departments' use of *Niang,* the Departments agree that the section following the quote in the NPRM stated that the issue surrounding gender is the nexus determination. This does not undermine, but enhances, the inclusion of gender in the listed circumstances that, without more, will not generally result in favorable adjudication based on nexus. *Niang* goes on to place more limits on a specific gender-based particular social group: ''It may well be that only certain women—say, those who protest inequities—suffer harm severe enough to be considered persecution. The issue then becomes whether the protesting women constitute a social group.'' *Niang,* 422 F.3d at 1200. This tracks with the rule: Harm on account of gender alone will generally result in unfavorable adjudication.

Another commenter pointed to the UNHCR's approach toward gender and numerosity. While the Departments appreciate the comment, they note that they are not bound by the UNHCR, and commenters' reliance on guidance from UNHCR is misplaced. UNHCR's interpretations of or recommendations regarding the Refugee Convention and Protocol, such as set forth in the UNHCR Handbook, are ''not binding on the Attorney General, the BIA, or United States courts.'' *INS* v. *Aguirre-Aguirre,* 526 U.S. at 427. ''Indeed, the Handbook itself disclaims such force, explaining that 'the determination of refugee status under the 1951 Convention and the 1967 Protocol . . . is incumbent upon the Contracting State in whose territory the refugee finds himself.' '' *Id.* at 427–28. Further, to the extent such guidance ''may be a useful interpretative aid,'' *id.* at 427, it would apply only to statutory withholding of removal, which is the protection that implements Article 33 of the Convention, *cf. R–S–C–* v. *Sessions,* 869 F.3d 1176, 1188, n.11 (10th Cir. 2017) (explaining that ''the Refugee Convention's non-refoulement principle—which prohibits the deportation of aliens to countries where the alien will experience persecution—is given full effect by the Attorney General's withholding-only rule''). In the withholding of removal context, the Departments disagree with commenters that the rule will violate the United States' non-refoulement obligations because such claims are not, without more, meritorious.

In addition, the Departments note that commenters asserted that violating a so-called ''specific and universal obligation to prevent domestic violence and other violence against women'' was a viable claim under the ATCA. The Departments further note, however, that the ''aiding and abetting'' violations of the law of nations is not currently recognized as within the scope of the ATCA. *Doe* v. *Nestle, S.A.,* 929 F.3d 623 (9th Cir. 2019), *cert. granted sub nom. Nestle USA, Inc.* v. *Doe I,* No. 19–416, 2020 WL 3578678 (July 2, 2020), and *cert. granted sub nom. Cargill, Inc.* v. *Doe I,* No. 19–453, 2020 WL 3578679 (July 2, 2020). Moreover, the commenters failed to demonstrate that such a claim would ''rest on a norm of international character accepted by the civilized world and defined with a specificity comparable to the features of the 18th-century paradigms,'' such as violation of safe conducts, infringement of the rights of ambassadors, or piracy, that the Court has recognized. *Sosa* v. *Alvarez-Machain,* 542 U.S. 692, 724–25 (2004).

Much of the commenters' concern regarding the inclusion of gender arises from a misunderstanding of the complexity of particular social groups and the role of mixed-motive analysis. The Departments explain that the inclusion of gender indicates that, generally, a claim based on gender, without additional evidence, will not be favorably adjudicated in regards to the nexus claim. However, it does not read, nor should it be interpreted to mean, that the inclusion of gender in the claim is fatal. Rather, a claim based on gender alone will generally be insufficient. As to the role of mixed motive analysis, the text of the NPRM acknowledges mixed motive claims by quoting the REAL ID

Act of 2005 that defined the nexus element as requiring that one of the five protected grounds be ''at least one central reason for persecuting the applicant.'' 85 FR at 36281. Further, the NPRM explicitly detailed that it was providing guidance on what would not be considered one of the five protected grounds; the NPRM did not state, nor was it meant to be construed, that it precluded mixed motive analysis if the situation involved one of the five protected grounds in addition to a situation on the list that was not adjudicated to be a protected ground.[56]

The Departments disagree with commenters that the rule must show that gender is not the cause of harm around the world in order to include gender in the list of circumstances that generally does not constitute harm on account of a protected ground. Indeed, these comments miss the purpose of this discussion in the rule. The Departments do not make any statement about the question or prevalence of gender-based harm in other countries, but instead the point is that such harm is not on account of a protected ground and accordingly generally fails to support a valid claim to asylum or to statutory withholding of removal. As noted elsewhere, asylum is not designed to provide relief from all manners of harm that may befall a person. *See, e.g., Gjetani,* 968 F.3d at 397–98.

The Departments further disagree with commenters' statements that the inclusion of gender violates the constitutional guarantee of equal protection. The rule does not provide any benefits or discriminate on the basis of one gender over another.

Other commenters noted the severe problem of gender-based violence, especially in the global coronavirus pandemic, and the extensive work the Department of State is undertaking to reduce and eliminate gender-based violence. The Departments agree with commenters regarding the severity of the problem and the good work being done across the Federal government to address the problem. As previously mentioned, however, the narrow asylum statutes are not drafted to provide redress for every problem. The Departments must act within the legal framework set out by Congress.

4.5. Evidence Based on Stereotypes

Comment: Commenters expressed numerous reservations and disagreements with the Departments' regulation regarding the admissibility of evidence based on or promoting stereotypes to support the basis of an applicant's fear of harm. 8 CFR 208.1(g), 1208.1(g).

Some commenters alleged that the NPRM created a vague new evidentiary bar. Other commenters opined that the provision excludes necessary and critical evidence; some alleged that the NPRM was ''part of [the Departments'] efforts to make it harder for asylum seekers to present their cases,'' including claims based on particular social groups. Commenters also worried that the changes would unfairly advantage the government and violate due process. Other commenters expressed concern that the amendments would place a larger burden on adjudicators as they would be presented with difficult and time-consuming factual and legal issues. Regarding well-founded fear, a commenter alleged that the distinction between widespread, systemic laws or policies—evidence used to support a well-founded fear of persecution—and cultural stereotypes is so narrow that it will result in a ''quagmire of confusion'' and ''countless hours and resources of litigation.''

Other commenters claimed that cultural stereotypes were necessary for well-founded fear of persecution claims and were utilized in country condition reports. For example, a commenter argued that the Department of State's country reports contain cultural stereotypes. As evidence of this claim, the commenter included three quotes from the Human Rights Report for Guatemala: ''[a] culture of indifference to detainee rights put the welfare of detainees at risk''; ''[t]raditional and cultural practices, in addition to discrimination and institutional bias, however, limited the political participation of women and members of indigenous groups''; and ''[i]ndigenous communities were underrepresented in national politics and remained largely outside the political, economic, social, and cultural mainstream.'' Further, the commenter asserted that this was evidence that ''it would be impossible to discuss conditions in any country without discussing its culture and without engaging in at least some stereotyping.'' The commenter extrapolated this onto several other elements of an asylum claim, including a subjectively genuine and objectively reasonable fear of harm and a socially distinct, particular social group.

A commenter opined that this provision was evidence that the Departments ''fail[ed] to engage in reasoned decision making''; the commenter continued by claiming that the NPRM ''raises doubts about whether the agency appreciates the scope of its discretion or exercised that discretion in

[56] The Departments note that gender was not included among other broad categories, such as race or nationality, as a basis for refugee status in either the 1951 Refugee Convention or the 1980 Refugee Act. Further, no precedential decision has unequivocally recognized gender, standing alone, as a basis for asylum. *See, e.g., Fisher* v. *INS,* 79 F.3d 955, 963 (9th Cir. 1996) (en banc) (''Persecution on account of sex is not included as a category allowing relief under section 101(a)(42)(A) of the Act.''). The Departments further note that gender has frequently been analyzed by circuit courts in the context of the definition of a particular social group, rather than under the rubric of nexus, though the courts themselves are in disagreement over the issue. *See Matter of A–C–A–A–,* 28 I&N at 91 (''Although I do not decide the matter in this case, I note that there has been disagreement among the courts of appeals about whether gender-based groups may constitute a particular social group within the meaning of the INA.''). At least three circuits have concluded that gender is too broad or sweeping to constitute a particular social group itself. *See Gomez* v. *INS,* 947 F.2d 660, 664 (2d Cir. 1991) (''Like the traits which distinguish the other four enumerated categories-race, religion, nationality and political opinion-the attributes of a particular social group must be recognizable and discrete. Possession of broadly-based characteristics such as youth and gender will not by itself endow individuals with membership in a particular group.''), *Safaie* v. *INS,* 25 F.3d 636, 640 (8th Cir. 1994) (''We believe this category is overbroad, because no factfinder could reasonably conclude that all Iranian women had a well-founded fear of persecution based solely on their gender.''); *Da Silva* v. *U.S. Att'y Gen.,* 459 F. App'x 838, 841 (11th Cir. 2012) (''The BIA determined that 'women' was too broad to constitute a particular social group. We agree that such a group is too numerous and broadly defined to be considered a 'social group' under the INA.''). Another circuit has quoted the language in *Gomez* approvingly. *Lukwago* v. *Ashcroft,* 329 F.3d 157, 172 (3d Cir. 2003). Still another has rejected ''generalized sweeping classifications for asylum,'' while noting that the Board ''has never held that an entire gender can constitute a social group under the INA.'' *Rreshpja* v. *Gonzales,* 420 F.3d 551, 555 (6th Cir. 2005). One circuit has intimated that gender alone could suffice to constitute a particular social group, though it remanded the case to the Board to address that issue in the first instance. *Perdomo,* 611 F.3d at 667; *but see Rreshpja,* 420 F.3d at 555 (''We do not necessarily agree with the Ninth Circuit's determination that virtually all of the women in Somalia are entitled to asylum in the United States.''). Further, although gender is generally regarded as an immutable characteristic, *see e.g., Kauzonaite* v. *Holder,* 351 F. App'x 529, 531 (2d Cir. 2009) (''However, although gender is an immutable characteristic. . . gender alone is insufficient to identify a particular social group.''), modern notions of gender fluidity may raise questions about that assumption in individual cases. *Cf, e.g., Bostock* v. *Clayton,* 140 S.Ct. 1731, 1779 & n.45 (2020) (''while the Court does not define what it means by a transgender person, the term may apply to individuals who are 'gender fluid,' that is, individuals whose gender identity is mixed or changes over time.'' (Alito, J. dissenting)). Further, because every alien has a gender of some classification, gender may not carry sufficient particularity to warrant classification as a particular social group. *Cf. Matter of L–E–A-,* 27 I&N Dec. at 593 (''Further, as almost every alien is a member of a family of some kind, categorically recognizing families as particular social groups would render virtually every alien a member of a particular social group. There is no evidence that Congress intended the term 'particular social group' to cast so wide a net.''). In short, although the rule considers gender under the category of nexus, it may also be appropriately considered under the definition of ''particular social group'' as well, as the lists under both definitions are nonexhaustive.

a reasonable manner.'' *Dep't of Homeland Sec.* v. *Regents of the Univ. of Cal.,* 140 S. Ct. 1891, 1905 (2020) (quoting *Michigan* v. *EPA,* 576 U.S. 743, 750 (2015) (internal quotation marks omitted)).[57] Finally, commenters asserted that the provision's purported application only to aliens and not to DHS represented an unfair asymmetry because there was no prohibition of DHS filing evidence promoting stereotypes in opposition to asylum applications.

Response: The Departments reject the characterization of the rule regarding admissibility of evidence based on stereotypes as a new evidentiary bar. Numerous courts, and the BIA, have made clear that the Federal rules of evidence do not apply in immigration proceedings, but the evidence must be probative and its admission may not be fundamentally unfair. *See, e.g., Rosendo-Ramirez* v. *INS,* 32 F.3d 1085, 1088 (7th Cir. 1994); *Baliza* v. *INS,* 709 F.2d 1231, 1233 (9th Cir. 1983); *Tashnizi* v. *INS,* 585 F.2d 781, 782–83 (5th Cir. 1978); *Trias-Hernandez* v. *INS,* 528 F.2d 366, 369 (9th Cir. 1975); *Marlowe* v. *INS,* 457 F.2d 1314, 1315 (9th Cir. 1972); *Matter of Toro,* 17 I&N Dec. 340, 343 (BIA 1980); *Matter of Lam,* 14 I&N Dec. 168, 170 (BIA 1972). As the rule makes clear, ''conclusory assertions of countrywide negative cultural stereotypes'' are not probative of any of the eligibility grounds for asylum. *Matter of A–B–,* 27 I&N Dec. at 336 n.9.

For example, in *Matter of A–B–,* the Attorney General determined that the evidence submitted in *Matter of A–R–C–G–,* 26 I&N Dec. 388 (BIA 2014), ''an unsourced partial quotation from a news article eight years earlier,'' was not appropriate evidence to support the ''broad charge'' that Guatemala had a '' 'culture of machismo and family violence.' '' *Matter of A–B–,* 27 I&N Dec. at 336 n.9 (quoting *Matter of A–R–C–G–,* 26 I&N Dec. at 394). Similarly, the rule establishes that such unsupported stereotypes are not admissible as probative evidence. 85 FR at 36282 (''pernicious cultural stereotypes have no place in the adjudication of applications for asylum and statutory withholding of removal, regardless of the basis of the claim''); *see also Matter of A–C–A–A–,* 28 I&N Dec. at 91 n.4 (''Furthermore, the Board should remember on remand that 'conclusory assertions of countrywide negative cultural stereotypes . . . neither contribute to an analysis of the particularity requirement nor constitute appropriate evidence to support such asylum determinations.' '' (quoting *Matter of A–B–,* 27 I&N Dec. at 336 n.9)).

Reliance on stereotypes about a country, race, religion, nationality, or gender is inconsistent with the individualized consideration asylum claims require. Further, by definition, stereotypes are not subject to verification and have little intrinsic probative value; to the contrary, they frequently undermine credibility considerations that are important to an asylum claim. *Cf. Thomas* v. *Eastman Kodak Co.,* 183 F.3d 38, 61 (1st Cir. 1999) (''The concept of 'stereotyping' includes not only simple beliefs such as 'women are not aggressive' but also a host of more subtle cognitive phenomena which can skew perceptions and judgments.''). Instead, they reflect ''a frame of mind resulting from irrational or uncritical analysis.'' *Nguyen* v. *INS,* 533 U.S. 53, 68 (2001). Thus, even ''benevolent'' stereotypes are generally disfavored in law. *Cf. International Union, United Auto., Aerospace & Agric. Implement Workers of Am.* v. *Johnson Controls,* 499 U.S. 187, 199–200 (1991) (stating, in rejecting employer policy related to female fertility due to potential exposure to fetal hazards, that the ''beneficence of an employer's purpose does not undermine the conclusion that an explicit gender-based policy is sex discrimination''). In short, stereotypes about another individual or country have little place in American law as evidence supporting any type of claim. *See United States* v. *Bahena-Cardenas,* 411 F.3d 1067, 1078 (9th Cir. 2005) (''Refusing to allow expert testimony that would encourage or require jurors to rely on cultural stereotypes is not an abuse of discretion.'').

To be sure, asylum claims are generally rooted in hearsay, frequently cannot be confronted or rebutted, and are typically uncorroborated except by other hearsay evidence. *See, e.g., Angov,* 788 F.3d at 901 (' 'The specific facts supporting a petitioner's asylum claim—when, where, why and by whom he was allegedly persecuted—are peculiarly within the petitioner's grasp. By definition, they will have happened at some time in the past—often many years ago—in a foreign country. In order for the [DHS] to present evidence ''refuting or in any way contradicting'' petitioner's testimony, it would have to conduct a costly and often fruitless investigation abroad, trying to prove a negative—that the incidents petitioner alleges did not happen.' '' (quoting *Abovian* v. *INS,* 257 F.3d 971, 976 (9th Cir. 2001) (Kozinski, J., dissenting from denial of pet'n for reh'g en banc))); *Mitondo* v. *Mukasey,* 523 F.3d 784, 788 (7th Cir. 2008) (''Most claims of persecution can be neither confirmed nor refuted by documentary evidence. Even when it is certain that a particular incident occurred, there may be doubt about whether a given alien was among the victims. Then the alien's oral narration must stand or fall on its own terms. Yet many aliens, who want to remain in the United States for economic or social reasons unrelated to persecution, try to deceive immigration officials.''). Thus, adjudicators are certainly seasoned in assessing evidence that is not subject to verification and has minimal probative value in the context of asylum claims.

Nevertheless, the Departments believe that the harms associated with the use of evidence rooted in stereotypes far outweigh what little, if any, probative value such evidence may have in an asylum claim. Accordingly, the rule does not represent a wholly new evidentiary bar per se, but rather a codification of the point that such stereotypes will not meet the existing admissibility standards because they are inherently not probative. Contrary to commenters' suggestions, such evidence should not be necessary to an asylum application. Even if such stereotypes were admitted into evidence, they would be given little to no weight for the reasons stated above. Further, to the extent that an applicant's claim is supported only by the applicant's personal stereotypes about a country or the alleged persecutor, that claim is likely unmeritorious in the first instance.

Further, the Departments disagree with commenter assertions that the term ''cultural stereotypes'' is vague. As alluded to above, the concept of stereotyping is well-established in American jurisprudence, and legal questions regarding stereotypes, especially stereotypes about foreign countries, arise in a variety of settings. *See, e.g., United States* v. *Ramirez,* 383 F.Supp.2d 1179, 1180 (D. Neb. 2005) (collecting cases excluding testimony based on cultural stereotypes of different foreign countries); *United States* v. *Velasquez,* No. CR 08–0730 WHA, 2011 WL 5573243, at *3 (N.D. Cal. 2011) (not permitting a ''cultural defense'' expert witness to testify ''as his opinions are based on cultural stereotypes and generalizations that have no probative value in this case'' and permitting a ''mental condition expert'' to testify on the condition that he ''refrain from offering testimony based on stereotypes and/or generalizations of Guatemalan, Mayan, Mam or any other culture''); *see also*

[57] The Departments respond to allegations of failure to engage in reasoned decision making below in section II.C.6.2.

Bahena-Cardenas, 411 F.3d at 1078 (''Refusing to allow expert testimony that would encourage or require jurors to rely on cultural stereotypes is not an abuse of discretion.''). Moreover, existing Department policies forbid the use of generalized stereotypes in law enforcement activities. *See* U.S. Dep't of Justice, Guidance for Federal Law Enforcement Agencies Regarding the Use of Race, Ethnicity, Gender, National Origin, Religion, Sexual Orientation, or Gender Identity 4 (2014) (''Reliance upon generalized stereotypes involving the listed characteristics is absolutely forbidden.''), *https://www.justice.gov/sites/default/files/ag/pages/attachments/2014/12/08/use-of-race-policy.pdf.* Thus, the Departments do not believe that adjudicators will have difficulty understanding the rule's reference to ''cultural stereotypes.''

The Departments also disagree with commenter assertions that it will be difficult to distinguish between widespread, systemic laws or policies—a form of accepted evidence to establish a well-founded fear—and cultural stereotypes. The Departments are seeking to bar admissibility of non-probative evidence of the kind described in *Matter of A–B–,* broad cultural stereotypes that have no place in an impartial adjudication. Evidence of systemic laws or policies is more probative and concrete than unsupported assertions of reductive cultural stereotypes. For example, bald statements that a country, as a whole, has a particular cultural trait that causes certain members of that country to engage in persecution is evidence that has no place in an adjudication. In contrast, evidence that a country's leader has instituted a program to carry out systematic persecution against certain groups would be highly probative evidence. General assertions of cultural stereotypes are inherently conclusory, reductive, and unhelpful to the adjudicator or trier of fact—in addition to being harmful in and of themselves—and should not be admissible.

In support of the claim that cultural stereotypes are necessary for many asylum claims, one commenter presented three excerpts from a Department of State Human Rights Report on Guatemala. The Departments appreciate the commenter's examples, but they do not reflect assertions of pernicious cultural stereotypes described in this rulemaking.

The first alleged stereotype was that ''[a] culture of indifference to detainee rights put the welfare of detainees at risk.'' However, the report goes on to state: ''On August 22, Ronald Estuardo Fuentes Cabrera was held in confinement while awaiting trial for personal injury charges after a car accident. Fuentes died from internal thoracic injury hours before his scheduled trial and without having received a medical exam, while his wife and the passenger of the other vehicle were taken for medical care.'' U.S. Dep't of State, 2019 Country Reports on Human Rights Practices: Guatemala 6 (2019), *https://www.state.gov/reports/2019-country-reports-on-human-rights-practices/*guatemala. Further, the report nowhere alleges that Guatemalans are indifferent to detainee rights because of some cultural trait peculiar to Guatemalans. Thus, not only do these statements not promote any particular cultural stereotype about Guatemalans based on race, religion, nationality, gender or similar characteristic, but they are supported by some facts. In short, this statement reflects verifiable facts, not a stereotype.

The second alleged stereotype was that ''[t]raditional and cultural practices, in addition to discrimination and institutional bias, . . . limited the political participation of women and members of indigenous groups.'' Once again, the report went on to detail the low numbers of women and indigenous people in the government to support its conclusion. *Id.* at 12–13. Elsewhere in the report, the State Department included specific information about sexual harassment: ''No single law, including laws against sexual violence, deals directly with sexual harassment, although several laws refer to it. Human rights organizations reported sexual harassment was widespread.'' *Id.* at 17. Similarly, the report contained specific information about discrimination: ''Although the law establishes the principle of gender equality and criminalizes discrimination, women, and particularly indigenous women, faced discrimination and were less likely to hold management positions.'' *Id.* The Departments do not see how this broad statement suggests a stereotype about an alleged persecutor for purposes of supporting an asylum claim such that it would fall within the ambit of the rule. Moreover, it is, again, based on evidence rather than a stereotype.

The final alleged stereotype contained in the report was that ''[i]ndigenous communities were underrepresented in national politics and remained largely outside the political, economic, social, and cultural mainstream.'' This quote was also followed by supporting statements, including details regarding indigenous leaders who were killed. *Id.* at 20–21. Again, the Departments do not see how this broad statement suggests a stereotype such that it would fall under the rule. Further, it does not suggest that indigenous individuals possess some inherent trait—as opposed to larger structural factors in the country—that causes them to be underrepresented in national politics. Thus, it is also based on evidence rather than a stereotype.

Other commenters expressed concern that this portion of the rule would place a larger burden on adjudicators. The Departments appreciate both the comment and the underlying concern. But, as noted above, adjudicators at both Departments are experienced in assessing evidence of little-to-no probative value, and immigration judges at DOJ are already experienced at ruling on evidentiary objections as a matter of course in immigration proceedings. Thus, the Departments do not believe that this portion of the rule will increase any burden beyond what adjudicators already face. The definition of ''cultural stereotypes'' is straightforward; the Departments have confidence that adjudicators will be able to apply such a definition in a timely and fair manner. Nevertheless, in response to some of the apparent confusion by some commenters, the Departments have modified the language in the final rule to make it clearer. The change does not reflect a substantive modification from what was intended in the NPRM.

The Departments reject the commenters' assertions that this rule was passed with bad intent. One aim of this rule is to allow a more expeditious adjudication of meritorious asylum claims so that applicants do not have to wait a lengthy amount of time before receiving relief. The Departments agree with the commenter who stated that many asylum applications require at least some discussion of the culture of the country to which the applicant fears return. However, the Departments disagree with the commenter's assertions that some level of stereotyping would be helpful to the applicant's claim. Stereotypes are inherently unsupported generalizations. Such conclusory statements are not probative and can indeed be harmful, as discussed above.

Further, the Departments disagree with the commenter who asserted that the rule would disadvantage the applicant and violate due process. As discussed above, an applicant's inability to submit nonprobative evidence neither disadvantages the applicant nor violates due process.

Finally, in response to commenters' concerns about the perceived asymmetry of the rule, the Departments note that DHS is already bound by policy to treat stakeholders, including

aliens, in a non-discriminatory manner. DHS therefore may not rely on stereotype evidence to oppose an asylum application. *See* U.S. Immigration and Customs Enforcement, Office of Diversity and Civil Rights, *https://www.ice.gov/leadership/*dcr (''It is U.S. Immigration and Customs Enforcement's (ICE) policy to ensure that employees, applicants for employment and all stake holders are treated in a non-discriminatory manner in compliance with established laws, regulations and Executive Orders.''); *cf. Doe* v. *Att'y Gen.,* 956 F.3d 135, 155 n.10 (3d Cir. 2020) (''The applicant's specific sexual practices are not relevant to the claim for asylum or refugee status. Therefore, asking questions about 'what he or she does in bed' is never appropriate.'' (quoting USCIS, *RAIO Directorate—Officer Training: Guidance for Adjudicating Lesbian, Gay, Bisexual, Transgender, and Intersex (LGBTI) Refugee and Asylum Claims* 34 (Dec. 28, 2011))). Further, although Federal case law is clear that stereotypes have no place as a basis to deny asylum applications, *e.g., Doe,* 956 F.3d at 155 n.10 (collecting cases), there is no similar Federal case law regarding the use of stereotypes as a basis for granting asylum applications, and the issue of the reliance on stereotypes to support an asylum application has arisen only recently, *Matter of A–B–,* 27 I&N Dec. at 336 n. 9. Consequently, as both immigration judges and DHS are already bound by policy, if not also law, not to rely on stereotypes as a basis to oppose or deny an asylum application, the rule does not create any asymmetry regarding evidence of stereotypes. To the contrary, it corrects an existing asymmetry to ensure that asylum applications are not granted based on inappropriate evidence of stereotypes.

4.6. Internal Relocation

Comment: Commenters generally expressed concern that the NPRM would create a standard for the analyzing the reasonableness of internal relocation that almost no applicant for asylum, withholding of removal, or protection under the CAT regulations would be able to meet.[58]

Commenters expressed several concerns with the proposed list of factors pertaining to the internal relocation analysis in proposed 8 CFR 208.13(b)(3) and 1208.13(b)(3). First, commenters expressed concern that the list places too much weight on the identity and reach of the persecutor, and that it lacks factors pertaining to the asylum seeker and factors unrelated to the asylum application (such as country conditions).

Second, commenters asserted that the proposed list inappropriately implies that asylum seekers coming from large countries or who are subjected to persecution from a single source can reasonably relocate internally. Some commenters argued that persecution does not end at the limits of political jurisdictions and that persecutors could have contacts throughout a country or region. One commenter noted that UNHCR guidance does not require an asylum seeker to prove that his or her entire home country is unsafe before seeking asylum. Similarly, one commenter expressed concern with the proposed definition of the term ''safety,'' arguing that there has been no judicial disagreement or confusion pertaining to the current regulation and that the proposed definition would limit adjudicators' ability to perform case-by-case analyses.

Third, commenters argued that the proposed rule inappropriately focuses on an asylum seeker's ability to travel to the United States. Commenters noted a lack of jurisprudence discussing ability to travel and alleged that since asylum seekers had to first travel to the United States to make a claim, the factor would lead to the denial of most applications.

Fourth, commenters similarly expressed concern that the proposed rule would eliminate the reasonableness analysis, thus forcing adjudicators to ignore the overall context of an asylum applicant's plight. One commenter argued that many cases have been sent to the BIA from Federal courts so that adjudicators could apply the current reasonableness test to internal relocation determinations.

Finally, commenters took issue with the NPRM's assertion that 8 CFR 208.13(b) and 1208.13(b) include ''unhelpful'' language that undermines the need for the entire section. Commenters noted that Federal courts and the BIA have almost unanimously endorsed the current language and have not raised such concerns.

Commenters also expressed concern with the proposed regulation's change to the burden of proof for asylum seekers who establish they were subjected to past persecution by a non-governmental entity. Commenters argued that, contrary to the NPRM's assertion, the current regulations are preferable. Specifically, increasing the burden would be inappropriate, commenters argued, because asylum seekers would have already established past persecution and that the government is unable or unwilling to protect them.

One commenter noted that the proposed change to the burden of proof is unnecessary because DHS could offer information evidencing that internal relocation is reasonable, and then the applicant could respond to such information.

One commenter argued that the proposed change to the burden of proof in the case of non-state actors unfairly targets asylum seekers from Central American countries and Mexico because the types of individuals and groups that would be considered non-state actors under the proposed rule are commonly cited persecutors in asylum cases pertaining to these countries.

Response: To respond to commenters' concerns that ''almost no applicant . . . would be able to meet'' the revised standard for reasonableness of internal relocation, the Departments reject that concern as speculative. The Departments also reject a commenter's allegation that the factors in this section were ''justifications to deny applications of *bona fide* asylum seekers.'' These factors are relevant and material to an alien's asylum eligibility, as discussed in further detail below.

The Departments emphasize that the rule requires adjudicators to consider ''the totality of the relevant circumstances'' (as stated in 8 CFR 208.13(b)(3), 1208.13(b)(3) (asylum); 208.16(b)(3), 1208.16(b)(3) (statutory withholding of removal)) when determining the reasonableness of internal relocation. The Departments note that the proposed list identifies the ''most relevant'' circumstances for consideration and provides a streamlined presentation of those factors. *See* 85 FR at 36282. The list of factors in paragraph (b)(3) is not exhaustive, however, so the regulatory amendments do not foreclose consideration of factors mentioned by commenters, such as factors related to the particular asylum seeker or factors unrelated to the asylum application. This approach is not a one-size-fits-all analysis, as one commenter alleged. Rather, the totality of the relevant circumstances test allows adjudicators to consider each case individually.

Relatedly, the Departments disagree that the list of factors afford inordinate weight to the identity and reach of the persecutor or that adjudicators must make determinations in a vacuum. As a baseline matter, asylum is a form of

[58] The Departments note that consideration of internal relocation in the context of an application for withholding of removal under the CAT regulations is different than the consideration of internal relocation in the context of an application for asylum and statutory withholding of removal. *Compare, e.g.,* 8 CFR 1208.13(b)(3), 1208.16(b)(3) (assessing the reasonableness of internal relocation), *with* 1208.16(c)(3)(ii) (assessing internal relocation without reference to reasonableness).

discretionary relief for which an applicant must demonstrate to the Secretary or Attorney General that he or she, inter alia, is a refugee as defined in section 101(a)(42) of the Act, 8 U.S.C. 1101(a)(42), and warrants a favorable exercise of discretion. INA 208(b)(1)(A), 8 U.S.C. 1158(b)(1)(A); *Cardoza-Fonseca,* 480 U.S. at 428 n.5; 8 CFR 208.14(a), (b), 1208.14(a), (b). To determine whether the applicant is a refugee under section 101(a)(42) of the Act, 8 U.S.C. 1101(a)(42), the Departments assess the applicant's ''fear of persecution,'' which includes whether the applicant could relocate to avoid future persecution and whether it would be reasonable to do so. *See Melkonian* v. *Ashcroft,* 320 F.3d 1061, 1069 (9th Cir. 2003) (requiring a finding that an alien could relocate to avoid persecution and that it ''must be reasonable to expect them to do so'' (citing *Cardenas* v. *INS,* 294 F.3d 1062, 1066 (9th Cir. 2002)); *see also Singh* v. *Ilchert,* 63 F.3d 1501, 1511 (9th Cir. 1995) (permitting the Attorney General to assess an alien's ability to relocate to a safer part of the country). The Act does not require consideration of internal relocation. *See generally* INA 208, 8 U.S.C. 1158. Rather, this analysis was implemented by regulation to address whether ''an [asylum] applicant may be able to avoid persecution in a particular country by relocating to another area of that country.'' Asylum Procedures, 65 FR 76121 (Dec. 6, 2000). This rule would refine those regulations, which agencies may do so long as they give a reasoned explanation for the change. *See, e.g., Encino Motorcars, LLC* v. *Navarro,* 136 S. Ct. 2117, 2125 (2016) (''Agencies are free to change their existing policies as long as they provide a reasoned explanation for the change.'' (citing *Brand X,* 545 U.S. at 981–82)).

As the Departments explained in the NPRM, the changes are necessary for numerous reasons. First, the Departments believe the ''current regulations regarding internal relocation inadequately assess the relevant considerations.'' 85 FR at 36282. Second, the Departments changed the regulatory burdens of proof because the Departments determined that the burdens should generally align with those ''baseline assessments of whether types of persecution generally occur nationwide, while recognizing that exceptions, such as persecution by local governments or nationwide organizations, might overcome these presumptions.'' *Id.* Third, the Departments made amendments to facilitate ''ease of administering these provisions.'' *Id.* The Departments believe that the rulemaking will better serve the needs of adjudicators who will benefit from the addition of factors that more adequately assess relevant considerations for internal relocation and the elimination of less relevant factors. Despite commenters' disagreements with the new list of factors, the Departments believe that the regulations must clearly and accurately guide adjudicators in assessing the reasonableness of internal relocation. The Departments anticipate that the new regulations will facilitate more accurate and timely determinations, given that adjudicators will spend most of their time considering the most relevant factors and less time considering less relevant factors or trying to determine whether certain factors are relevant. This is especially significant considering the unprecedented pending caseload and the need for efficient adjudication. *See* EOIR, *Adjudication Statistics: Total Asylum Applications* (Oct. 13, 2020), *https://www.justice.gov/eoir/page/file/1106366/*download. Given these revisions to the regulations, adjudicators are not left to make determinations ''in a vacuum,'' as commenters suggested.

Accordingly, the Departments determined that the following factors were most relevant to an adjudicator's analysis: ''the size of the country of nationality or last habitual residence, the geographic locus of the alleged persecution, the size, reach, or numerosity of the alleged persecutor, and the applicant's demonstrated ability to relocate to the United States in order to apply for asylum.'' 8 CFR 208.13(b)(3), 1208.13(b)(3) (asylum); 208.16(b)(3), 1208.16(b)(3) (statutory withholding of removal). The Departments do not imply that this list compels the conclusion that asylum seekers who come from large countries or who were subjected to persecution from a single source can reasonably relocate internally, as commenters alleged. Instead, the Departments find those factors ''most relevant'' for adjudicators to consider in determining whether internal relocation is reasonable—not that those factors absolutely indicate that internal relocation is reasonable. 85 FR at 36282. Furthermore, as noted above, the listed relevant factors are not exhaustive and adjudicators may consider other factors that may be relevant to a particular case.

As commenters pointed out, the Departments recognize that persecutors may not be confined to political jurisdictions, which is already reflected in the factor assessing the ''size, reach, or numerosity of the alleged persecutor.'' 8 CFR 208.13(b)(3), 1208.13(b)(3) (asylum); 208.16(b)(3), 1208.16(b)(3) (statutory withholding of removal). Moreover, the Departments disagree with a commenter's allegation that the rule redefines safety—neither the proposed rule nor this final rule redefines ''safety.''

The Departments disagree that the factor assessing the alien's ability to travel to the United States is inappropriate. First, this factor is considered under the totality of the circumstances; thus, this factor's presence will not automatically result in one determination or another. The Departments added this factor so that adjudicators would fully consider whether an alien had already traveled a great distance to relocate to the United States, and whether the alien's ability to do so reflected a similar ability to relocate within the country from which the alien is seeking protection. Second, in contrast to commenters, the Departments believe that a lack of jurisprudence on this factor counsels in favor of including it in the regulation. Nor do the Departments find the lack of directly relevant jurisprudence surprising. Because the current regulations do not highlight an alien's ability to travel to the United States as one of the most relevant factors, courts would have had little reason to consider this factor unless a party raised it. *See, e.g., Garcia-Cruz* v. *Sessions,* 858 F.3d 1, 8–9 (1st Cir. 2017) (remanding the case to the BIA to consider the reasonableness factors specifically provided in the regulations); *Khattak,* 704 F.3d at 203–04 (same). Nevertheless, case law has considered travel-related factors such as an alien's return trips or previous relocations. *See, e.g., Ullah* v. *Barr,* No. 18–28912020 WL 6265858, at *1–2 (2d Cir. Oct. 26, 2020) (holding that country's lack of restriction on internal movement or relocation and alien's ability to work and move around the country without incident supported the BIA's finding that the alien could safely relocate to avoid future persecution); *Gambashidze* v. *Ashcroft,* 381 F.3d 187, 193 (3d Cir. 2004) (considering, in part, that the alien and his family relocated to a city that ''is not a great distance'' from the city where they faced persecution before the alien relocated again to the United States); *Belayneh* v. *I.N.S.,* 213 F.3d 488, 491 (9th Cir. 2000) (holding that the alien had not established a reasonable fear of future persecution in part because she had ''traveled to the United States and returned to Ethiopia three times without incident''). These cases provide examples in which courts

recognized that the ability and willingness to travel and the distance traveled are all relevant to the reasonableness inquiry because they may indicate the extent to which an alien is physically or financially able to travel. In that same vein, the Departments have determined that an alien's ability to travel to the United States is clearly relevant and appropriate to the reasonableness inquiry.

The rule does not eliminate the reasonableness analysis, as commenters alleged. First, the heading of each regulatory section is ''Reasonableness of internal relocation.'' 8 CFR 208.13(b)(3), 1208.13(b)(3) (asylum); 208.16(b)(3), 1208.16(b)(3) (statutory withholding of removal). The heading indicates the content of the section. What follows is a list of factors and the requisite burdens of proof to aid an adjudicator's assessment of the reasonableness of internal relocation. For example, the regulations state, in the case of a governmental persecutor, ''it shall be presumed that internal relocation would not be reasonable, unless the Department of Homeland Security establishes by a preponderance of the evidence that, under all the circumstances, *it would be reasonable for the applicant to relocate*'' and, in the case of a non-governmental persecutor, ''there shall be a presumption that internal relocation would be reasonable unless the applicant establishes, by a preponderance of the evidence, that *it would be unreasonable to relocate.*'' 8 CFR 208.13(b)(3)(ii), (b)(3)(iii), 1208.13(b)(3)(ii), (b)(3)(iii) (emphases added). The reasonableness inquiry continues to be an active prong of the internal relocation assessment. In addition, under the new regulations, adjudicators must not disregard other factors, as commenters alleged; rather, the regulations instruct adjudicators to consider ''the totality of the relevant circumstances.'' 8 CFR 208.13(b)(3), 1208.13(b)(3). Application of the previous regulations by courts and the BIA are irrelevant and unpersuasive as evidence that the rules cannot be changed. As previously explained, it is properly within the Departments' authority to revise their regulations. *See, e.g., Encino Motorcars, LCC,* 136 S. Ct. at 2125.

The Departments maintain that the language in the previous regulations was unhelpful. 85 FR at 36282. Equivocal phrases in the prior regulation—that factors ''may, or may not, be relevant''—are almost paradigmatically unhelpful. The Departments believe the revised regulations, including review under the totality of the circumstances and the nonexhaustive list of factors provided, will continue to allow adjudicators to assess internal relocation on a case-by-case basis.

Although commenters alleged that Federal courts and the BIA have ''nearly unanimously endorsed'' the previous regulations, the cases referenced in support of their allegations merely apply the previous regulations. Judicial application of regulations cannot be construed as ''endorsing'' the regulations except to the extent that a court finds the regulations to be a reasonable interpretation of the statute. *See Chevron,* 467 U.S. at 844 (''[A] court may not substitute its own construction of a statutory provision for a reasonable interpretation made by the administrator of an agency.'').

Finally, the Departments disagree that changing the burden of proof is inappropriate. As explained in the NPRM, the Departments believe the realigned burden of proof follows the ''baseline assessments of whether types of persecution generally occur nationwide, while recognizing that exceptions, such as persecution by local governments or nationwide organizations, might overcome these presumptions.'' 85 FR at 36282. Contrary to the commenters' assertion, when an adjudicator is determining reasonableness of internal relocation, an applicant may not have already established past persecution or that the government was unable or unwilling to protect the alien. For example, an applicant may be claiming a fear of future persecution pursuant to 8 CFR 208.13(b)(2), 1208.13(b)(2). Although showing past persecution raised a rebuttable presumption that internal relocation would be unreasonable under the prior regulation, the Departments have concluded, upon fresh review, that applying a blanket presumption independent of the identity of the persecutor is inconsistent with assessments of how widespread persecution is likely to be based on the identity of the alleged persecutor. Whereas government or government-sponsored actors would generally be expected to have nationwide influence, a private individual or organization would not ordinarily have such reach. Placing the burden on the government to show that the alien's fear of future persecution is *not* well-founded where he was previously persecuted by a non-governmental actor therefore inverts the usual burden of proof—which lies with the applicant—without good reason. *See* 85 FR at 36282 (explaining this rationale).

In the final rule, DHS still bears the burden to demonstrate that the applicant could relocate to avoid future persecution and that it would be reasonable for the applicant to do so in the case of a governmental persecutor (8 CFR 208.13(b)(3)(ii), 1208.13(b)(3)(ii) (asylum); 208.16(b)(3)(ii), 1208.16(b)(3)(ii) (statutory withholding of removal)), and the alien bears the burden to demonstrate that it would be reasonable to relocate in the case of a non-governmental persecutor (8 CFR 208.13(b)(3)(iii), 1208.13(b)(3)(iii)). These burdens reflect the Departments' belief that aliens who claim past persecution by non-state actors should bear the burden to rebut the presumption that internal relocation is reasonable.

The different burdens of proof do not unfairly target or discriminate against asylum seekers from Central American countries and Mexico, as commenters alleged. The new burden of proof applies to all asylum seekers, regardless of the country of origin. The Departments note that, contrary to the commenters' allegations, the examples of private-actor persecutors provided by the regulations exist in many countries, not just Central American countries and Mexico. *See, e.g., Mashiri* v. *Ashcroft,* 383 F.3d 1112, 1115–16 (9th Cir. 2004) (detailing facts in which a German citizen of Afghan descent was persecuted by non-state actors in Germany, some of whom were part of a Neo-Nazi mob); *Doe* v. *Att'y Gen. of the U.S.,* 956 F.3d 135, 139–40 (3d Cir. 2020) (detailing facts in which a Ghanaian citizen was persecuted by family members and neighbors in Ghana).

4.7. Factors for Consideration in Discretionary Determinations

Comment: Commenters generally expressed concern that the Departments did not provide a sufficient justification for the proposed changes and did not consider the practical consequence of the proposed rule. Commenters similarly expressed general concerns that the proposed changes are in conflict with section 208(a)(1) of the Act, 8 U.S.C. 1158(a)(1), are contrary to case precedent, are immoral, and would negatively impact children seeking asylum. The true purpose of the rule, some commenters asserted, is to lead to the denial of virtually all asylum applications.

Commenters expressed concern that the Departments seek to depart from the BIA's approach in *Matter of Pula,* 19 I&N Dec. 467 (BIA 1987). One commenter stated that it was inappropriate to use language from the

case to justify the proposed new factors while also superseding the case's central holding. Commenters stated that *Matter of Pula* instructs that danger of persecution should outweigh all but the most egregious factors. Commenters similarly stated that *Matter of Pula* requires adjudicators to consider the totality of the circumstances and to not give any particular factor such significant weight that it would outweigh all the others.

Citing *East Bay Sanctuary Covenant* v. *Barr,* 964 F.3d 832 (9th Cir. 2020), one commenter expressed concern that the proposed rule conflicts with recent Federal court precedent that the creation of ''eligibility bars'' to asylum is constrained by statute. The commenter asserted that as some of the discretionary factors would require denial of applications as a matter of discretion, they are, in actuality, unlawful eligibility bars.

Commenters stated that the proposed negative factors that adjudicators would be required to consider are not related to the merits of an asylum claim and are unavoidable in many cases. As a result, commenters argued, adjudicators would be required to deny most asylum cases as a matter of discretion. One commenter asserted that the Departments did not consider alternative policy options, and one commenter stated that the rule should be amended to require adjudicators to consider positive factors in their discretionary determinations. Commenters argued that inappropriately cabining discretion in this way is in conflict with making asylum determinations on a case-by-case basis.

Commenters expressed concern that the only way for applicants to overcome the presence of nine of the proposed adverse factors would be to show ''extraordinary circumstances'' or ''exceptional and extremely unusual hardship.'' One commenter stated that a demonstration of past persecution or a well-founded fear of future persecution is ''per se'' exceptional and extremely unusual hardship. Therefore, the commenter argued that by meeting the legal standard for asylum, applicants necessarily would meet the proposed new standard of exceptional and extremely unusual hardship. The commenter similarly stated that past persecution is ''exceptional hardship.'' Another commenter stated that application of the ''exceptional and extremely unusual hardship'' standard in exercising discretion for asylum applications contravenes the INA because Congress did not expressly provide for that heightened standard. Instead, the commenter noted that in section 208(b)(1)(A) of the Act, 8 U.S.C. 1158(b)(1)(A), Congress stated that the Attorney General ''may'' grant asylum. The commenter asserted that if Congress intended the use of a heightened standard, it would have expressly done so, as it did in section 240A(b)(1)(D) of the Act, 8 U.S.C. 1229b(b)(1)(D), for non-LPR cancellation of removal. The commenter cited the Supreme Court's decision in *Cardoza-Fonseca* for support. *See* 480 U.S. at 432 (''[W]here Congress includes particular language in one section of a statute but omits it in another section of the same Act, it is generally presumed that Congress acts intentionally and purposely in the disparate inclusion or exclusion.''). Accordingly, consistent with *Matter of Marin,* 16 I&N Dec. 581, 584–85 (BIA 1978), the commenter asserted that the totality of the circumstances approach should be applied in the exercise of discretion for asylum applications.

Commenters disagreed with the Departments' position that creating a list of proposed factors would save adjudicators time. Specifically, commenters noted that since a finding of ''extraordinary circumstances'' or an exceptional and extremely unusual hardship would require a separate hearing, the proposed factors would not save time.

Response: The Departments disagree that they failed to provide sufficient justification for this proposed change in the NPRM, evidenced by the three-page discussion of this section alone. *See* 85 FR at 36282–85. Nevertheless, the Departments provide further explanation in this final rule.

Asylum is a discretionary benefit. INA 208(b)(1)(A), 8 U.S.C. 1158(b)(1)(A) (providing that the Departments ''*may* grant asylum to an alien who has applied for asylum in accordance with the requirements and procedures established by the Secretary of Homeland Security or the Attorney General under this section'' (emphasis added)); *see also Cardoza-Fonseca,* 480 U.S. at 443 (''[A]n alien who satisfies the applicable standard under § 208(a) does not have a *right* to remain in the United States; he or she is simply *eligible* for asylum, if the Attorney General, in his discretion, chooses to grant it.'' (emphases in original)). Accordingly, ''with respect to any form of relief that is granted in the exercise of discretion,'' an alien must satisfy the eligibility requirements for asylum and establish that the application ''merits a favorable exercise of discretion.'' INA 240(c)(4)(A),8 U.S.C. 1229a(c)(4)(A); *see also Matter of A–B–,* 27 I&N Dec. at 345 n.12 (explaining that the ''favorable exercise of discretion is a discrete requirement for the granting of asylum and should not be presumed or glossed over solely because an applicant otherwise meets the burden of proof for asylum eligibility under the INA'' and providing relevant discretionary factors to consider in the exercise of such discretion), *abrogated on other grounds, Grace II,* 965 F.3d at 897–900.

In its broadest sense, legal discretion is defined as the ''exercise of judgment by a judge or court based on what is fair under the circumstances and guided by the rules and principles of law; a court's power to act or not act when a litigant is not entitled to demand the act as a matter of right.'' *Discretion,* Black's Law Dictionary (11th ed. 2019); *see also Discretion,* Merriam-Webster (last updated July 6, 2020), *https://www.merriam-webster.com/dictionary/discretion* (defining ''discretion'' as the ''power of free decision or latitude of choice within certain legal bounds''). While the statute and case law are clear that a grant of asylum is subject to discretion, *see* INA 208(b)(1)(A), 8 U.S.C. 1158(b)(1)(A); *INS* v. *Stevic,* 467 U.S. 407, 423 n.18 (1984), the statute and regulations are silent as to guidance that may direct such exercise of discretion.

The BIA has explained that the exercise of discretion requires consideration of the relevant factors in the totality of the circumstances, based on the facts offered by the alien to support the application in each case. *See Matter of Pula,* 19 I&N Dec. at 473 (noting that ''a number of factors . . . should be balanced in exercising discretion''). Further, the BIA has provided factors that may be relevant to the inquiry, including humanitarian considerations, such as the alien's age or health; any countries through which the alien passed en route to the United States and those countries' available refugee procedures; personal ties to the United States; and the alien's use of fraudulent documents. *See id.* at 473–74 (''Each of the factors . . . will not, of course, be found in every case. . . . In the absence of any adverse factors, however, asylum should be granted in the exercise of discretion.'').

In building upon the BIA's guidance and evaluating all policy options, the Departments have determined that it is appropriate to codify discretionary factors for adjudicators to consider. 85 FR at 36283. The statute and regulations currently contain discretionary factors for consideration in regard to other forms of relief. *See, e.g.,* 8 CFR 212.7(d), 1212.7(d) (authorizing the Attorney General to consent to an application for visa, admission to the United States, or adjustment of status, for certain criminal

aliens when declining to favorably exercise discretion ''would result in exceptional and extremely unusual hardship''); *see also Matter of Y–L–,* 23 I&N Dec. 270, 276–77 (A.G. 2002) (providing various factors that may indicate extraordinary and compelling circumstances that the Attorney General may consider to determine whether certain aggravated felonies are ''particularly serious crimes'' under section 241(b)(3)(B) of the INA for purposes of withholding of removal); *Matter of Jean,* 23 I&N Dec. 373, 383–84 (A.G. 2002) (explaining that discretionary relief requires a balancing of the equities, including, if any, extraordinary circumstances, the gravity of an alien's underlying criminal offense, or unusual hardships). The Departments have similar authority to promulgate discretionary factors for asylum relief. INA 208(b)(1)(A), 8 U.S.C. 1158(b)(1)(A); *see* 85 FR at 36283.

Contrary to commenters' concerns that the proposed rule effectively creates bars (or ''eligibility bars'') to asylum and inappropriately cabins adjudicators' discretion, the Departments reiterate that this rulemaking identifies various factors for consideration in making a discretionary determination on an asylum application. These factors are not bars; accordingly, concerns that the rule would result in the denial of all asylum claims are misguided. Rather, in regard to the three significantly adverse factors, the proposed rule clearly stated that ''the adjudicator *should also consider any other relevant facts and circumstances* to determine whether the applicant merits asylum as a matter of discretion.'' *Id.* (emphasis added). And in regard to the nine adverse factors, the proposed rule stated that ''the *adjudicator may nevertheless favorably exercise discretion in extraordinary circumstances* . . . or if the alien demonstrates, by clear and convincing evidence, that the denial of asylum would result in exceptional and extremely unusual hardship to the alien.'' *Id.* (emphasis added). Thus, a finding that any of the factors applies does not foreclose consideration of other relevant facts and circumstances, which a true asylum ''bar'' would require.

Commenters asserted that this rule is inconsistent with the BIA's approach in *Matter of Pula* and subsequent related case law in which past persecution or a strong likelihood of future persecution ''should generally outweigh all but the most egregious of adverse factors.'' 19 I&N Dec. at 474. The Departments clearly stated in the NPRM that the rule ''supersede[d]'' the BIA's approach in *Matter of Pula,* 85 FR at 36285, which is squarely within their authority. ''Agencies are free to change their existing policies as long as they provide a reasoned explanation for the change.'' *Encino Motorcars, LLC,* 136 S. Ct. at 2125 (citing *Brand X,* 545 U.S. at 981–82). The Court has further explained what a ''reasoned explanation'' should entail: Awareness in its decision making process that it is changing positions; demonstration that the new policy is permissible under the implementing statute, and not just the APA; statement and belief that the new policy is better; and provision of ''good reasons'' for the new policy. *See Organized Village of Kake* v. *U.S. Dep't of Agric.,* 795 F.3d 956, 966 (9th Cir. 2015) (en banc) (summarizing *FCC* v. *Fox Television Stations, Inc.,* 556 U.S. 502, 515–16 (2009)). In the NPRM, the Departments provided such information: awareness of changed position, 85 FR at 36285; demonstration that the policy is permissible under the INA and APA, *see generally* 85 FR at 36282–85; statement that the new policy is better, 85 FR at 36283; and good reasons for the new policy, 85 FR at 36283, 36285. Accordingly, the Departments properly and permissibly changed their policy from *Matter of Pula.*

Significantly, the rule does not preclude consideration of positive factors. Further, the NPRM instructed adjudicators to ''consider any other relevant facts and circumstances to determine whether the applicant merits asylum as a matter of discretion.'' 85 FR at 36283. Accordingly, the rule allows for consideration of positive equities as part of an adjudicator's discretionary analysis. The Departments have determined that the factors provided in the NPRM are appropriate and relevant to such analysis.

Moreover, the rule does not ''categorically limit'' adjudicators' discretion or make certain outcomes ''practically mandatory''; rather, the rule guides the exercise of discretion by providing various factors for consideration. The NPRM clearly stated, and the Departments reiterate, that the proposed factors were ''nonexhaustive.'' 85 FR at 36283. Further, the NPRM stated that ''any other relevant facts and circumstances'' should be considered and provided exceptions to one of the significantly adverse factors. *See id.* Accordingly, although the Departments proposed significantly adverse and adverse factors, an adjudicator must continue to consider positive factors in the discretionary analysis.

The Departments disagree with commenters that past or future persecution should be considered ''per se'' exceptional and extremely unusual hardship. Rather, the Departments have determined that the approach described in the NPRM—providing criteria for an adjudicator's consideration in the exercise of discretion, in addition to consideration of whether extraordinary circumstances or exceptional and extremely unusual hardship exists—is appropriate. Moreover, the Departments disagree that consideration of extraordinary circumstances or exceptional and extremely unusual hardship conflicts with the Act. Congress authorized the Attorney General to make discretionary asylum determinations, INA 208(b)(1)(A), 8 U.S.C. 1158(b)(1)(A), and that authority permits him to deny asylum even if an applicant can establish past or future persecution.

The Departments ''believe that the inclusion of the proposed factors in the rule will better ensure that immigration judges and asylum officers properly consider, in all cases, whether applicants for asylum merit the relief as a matter of discretion, even if the applicant has otherwise demonstrated eligibility for asylum.'' 85 FR at 36283, 36285. In this way, the list of factors to consider, including consideration of extraordinary circumstances or exceptional and extremely unusual hardship, would take place in one streamlined adjudication. Accordingly, the Departments disagree with commenters that the list of factors would not save time, is ''unworkable'' or ''cumbersome,'' or limits adjudicatory discretion.

The Departments also disagree that this section of the rule is immoral or would negatively impact children seeking asylum. Adjudicators consider these factors, as relevant, to all asylum cases. As it may relate specifically to children, if extraordinary circumstances exist or exceptional and extremely unusual hardships would arise if the application was denied, the adjudicator should consider such circumstances. *See* Section II.C.1.3 of this preamble for further discussion on this point.

4.7.1. Unlawful Entry or Unlawful Attempted Entry Into the United States

Comment: Commenters expressed general concern that the proposed regulation would improperly lead adjudicators to deny ''virtually all'' applications for asylum seekers who enter the United States between ports of entry. One commenter stated that the ''immediate flight'' exception is too narrow.

Commenters averred that the proposed regulation is contrary to section 208(a)(1) of the Act, 8 U.S.C. 1158(a)(1), which instructs that individuals are eligible to apply for

asylum regardless of where they enter the United States.

Commenters expressed concern that the proposed regulation is inconsistent with case law. Commenters argued that contrary to the NPRM's argument, *Matter of Pula,* 19 I&N Dec. Dec. 467 (BIA 1987), does not support the Departments' position that an unlawful entry should be a significant adverse factor. Instead, one commenter asserted that in *Matter of Pula* the BIA reversed *Matter of Salim,* 18 I&N Dec. 311 (BIA 1982), to the extent that *Matter of Salim* suggested that ''the most unusual showing of countervailing equities'' was needed to overcome a ''circumvention of orderly procedures.'' Citing, for example, *Zuh* v. *Mukasey,* 547 F.3d 504, 511 n.4 (4th Cir. 2008), commenters similarly argued that Federal courts of appeals have given the manner of an asylum seeker's entry into the United States very little weight (and sometimes no weight) in discretionary determinations and have noted that place of entry reveals little about the merits of the case. And, citing *Huang* v. *INS,* 436 F.3d 89, 100 (2d Cir. 2006), one commenter noted that the Second Circuit Court of Appeals reasoned that if an illegal manner of entry were afforded significant weight, then virtually no asylum applicant would prevail.

Commenters expressed concern that codification of unlawful entry as a significantly adverse factor in discretionary determinations contradicts recent Federal court decisions from the Ninth Circuit Court of Appeals and the District Court for the District of Columbia that struck down November 2018 regulations by the Departments. Commenters argued that the NPRM is similar to a 2018 Interim Final Rule (IFR) that, when coupled with a presidential proclamation issued the same day, made any individual who arrived between designated ports of entry ineligible for asylum. Commenters noted that the Ninth Circuit Court of Appeals found that the 2018 IFR was arbitrary and capricious and that it infringed upon treaty commitments (*E. Bay Sanctuary Covenant* v. *Trump,* 950 F.3d 1242 (9th Cir. 2020)). Commenters noted that the District Court for the District of Columbia held that the bar was inconsistent with the INA and congressional intent (*O.A.* v. *Trump,* 404 F. Supp. 3d 109, 147 (D.D.C. 2019)). Commenters expressed concern that the present rulemaking is intended to circumvent the courts' decisions on the 2018 IFR.

Commenters disagreed with the NPRM's reasoning that the proposed rule is necessary to address the strained resources used to adjudicate the growing number of asylum cases. One commenter asserted that ''expediency'' is not an appropriate consideration in determining the relief available to asylum seekers. The commenter also noted that in *Gulla* v. *Gonzales,* 498 F.3d 911, 919 n.2 (9th Cir. 2007), the Ninth Circuit Court of Appeals held that ''hypothetical numbers'' of potential asylum seekers is not a basis to deny relief to an applicant who has demonstrated a valid claim. The commenter similarly argued that limiting asylum to those who traveled from contiguous countries and those who flew directly to the United States is in conflict with case precedent and obligations under the 1967 Refugee Protocol.

Commenters expressed concern with the impact of the proposed rule in light of the CBP's practice of ''metering.'' Commenters asserted that, under the practice, applicants are required to wait for months in ''dangerous conditions'' in Mexico before they are able to apply for asylum. Commenters stated that some applicants are motivated to enter the United States between ports of entry in order to avoid the dangerous conditions.

One commenter expressed concern that codifying unlawful entry as a significant adverse discretionary factor would particularly burden children. The commenter argued that children often arrive with adults (such as parents, smugglers, or traffickers) who choose the manner and place of entry. The commenter argued further that children who travel to the United States on their own may not comprehend the importance of arriving at a port of entry.

Response: The Departments disagree that this factor will result in the denial of ''virtually all'' asylum applications. This factor is but one factor that an adjudicator must consider in light of all other relevant factors and circumstances. 85 FR at 36283. Likewise, the Departments disagree that the exception for aliens who enter or attempt entry ''made in immediate flight,'' 8 CFR 208.13(d)(1)(i), 1208.13(d)(1)(i), is too narrow. The Departments believe this exception properly balances the need for orderly processing of aliens with urgent humanitarian considerations.

As described throughout this rule, asylum is a discretionary benefit. INA 208(b)(1)(A), 8 U.S.C. 1158(b)(1)(A). The Departments have a legitimate interest in maintaining order and security on U.S. borders through the administration of lawful admissions procedures and, as stated in the proposed rule, the Departments remain concerned by the immense strain on resources needed to process aliens who illegally enter the United States. 85 FR at 36283 (citing Aliens Subject to a Bar on Entry Under Certain Presidential Proclamations; Procedures for Protection Claims, 83 FR 55934 (Nov. 9, 2018)). Aliens who unlawfully enter the United States circumvent the requirement that all applicants for admission be inspected, *see* INA 235(a)(3), 8 U.S.C. 1225(a)(3); break U.S. law, *see* INA 212(a)(6)(A), 8 U.S.C. 1182(a)(6)(A); INA 275(a)(1), 8 U.S.C. 1325(a)(1); and contribute to the ever-increasing strain on the government's limited resources. Given such limited resources, and subject to a full discretionary analysis of all relevant factors as described in the NPRM, the Departments have determined that failure to lawfully apply for admission, in other words, unlawful entry or attempted unlawful entry, should generally be considered a significant adverse factor in an asylum adjudication.

The Departments disagree with commenters' allegations that DHS procedures at the border have ''virtually shut down the processing of asylum applications'' and prevented asylum seekers from lawfully presenting themselves at the border. At various times since 2016, CBP has engaged in metering to regulate the flow of aliens present at land ports of entry on the southern border in order to ''address safety and health hazards that resulted from overcrowding at ports of entry.'' *See* DHS, OIG 18–84, *Special Review—Initial Observations Regarding Family Separation Issues Under the Zero Tolerance Policy* 5–6 & n.11 (Sept. 27, 2018), *https://www.oig.dhs.gov/sites/default/files/assets/2018-10/OIG-18-84-Sep18.pdf.* Individuals who are subject to metering are not prevented from presenting at the port of entry.[59]

Claims that refugees who are unable to get a visa will have to overcome the significant negative discretionary factor are unfounded. The rule does not require any alien to obtain a visa in order to apply for asylum. Under the law, ''[a]ny alien who is physically present in the United States or who arrives in the United States (whether or not at a designated port of arrival and including an alien who is brought to the United States after having been interdicted in international or United States waters) irrespective of such alien's status, may apply for asylum,''

[59] The permissibility of this practice is the subject of ongoing litigation, and the Departments decline to further comment on the legality or propriety of the practice in this rulemaking. *See Al Otro Lado, Inc.* v. *McAleenan,* No. 17–cv–02366–BAS–KSC, 2020 WL 4015669 (S.D. Cal. July 16, 2020).

INA 208(a)(1), 8 U.S.C. 1158(a)(1), and nothing in the rule changes that statutory framework. Moreover, nothing in the rule changes the longstanding principle that the Secretary and the Attorney General may deny asylum as a matter of discretion, even to aliens who otherwise meet the statutory definition of a refugee. *See INS* v. *Cardoza-Fonseca,* 480 U.S. at 428 n.5, 444–45 (''It is important to note that the Attorney General is *not required* to grant asylum to everyone who meets the definition of refugee. Instead, a finding that an alien is a refugee does no more than establish that 'the alien *may* be granted asylum *in the discretion of the Attorney General.'*. . . [Congress] chose to authorize the Attorney General to determine which, if any, eligible refugees should be denied asylum.'' (emphasis in original) (citation omitted)). Rather, consistent with the relevant authority, INA 208(b)(1)(A), 8 U.S.C. 1158(b)(1)(A), the Secretary and Attorney General are simply providing additional clarity and guidance to adjudicators to aid their consideration of asylum claims as a matter of discretion.

The Departments disagree with commenters' assertion that *Matter of Pula,* 19 I&N Dec. 467 (BIA 1987), is ''fundamentally incompatible'' with this rule. As a threshold matter, the Departments reiterate that the rule incorporates as a discretionary factor consideration of whether an alien unlawfully entered or attempted to unlawfully enter the United States. 85 FR at 36283. *Matter of Pula* similarly allows for consideration of this factor as part of the discretionary analysis:

> Yet while we find that an alien's manner of entry or attempted entry is a proper and relevant discretionary factor to consider in adjudicating asylum applications, we agree with the applicant that *Matter of Salim, supra,* places too much emphasis on the circumvention of orderly refugee procedures. *This circumvention can be a serious adverse factor,* but it should not be considered in such a way that the practical effect is to deny relief in virtually all cases. *This factor is only one of a number of factors which should be balanced in exercising discretion,* and the weight accorded to this factor may vary depending on the facts of a particular case.

19 I&N Dec. at 473 (emphases added).

The rule is consistent with *Matter of Pula* inasmuch as that factor must not be considered in a way that practically denies relief in all cases. The rule clearly states that the factor is one of many discretionary factors for an adjudicator to consider, consistent with *Matter of Pula's* holding that the totality of the circumstances should be examined. 85 FR at 36283 (''If one or more of these factors applies to the applicant's case, the adjudicator would consider such factors to be significantly adverse for purposes of the discretionary determination, though the adjudicator should also consider any other relevant facts and circumstances to determine whether the applicant merits asylum as a matter of discretion.''); 8 CFR 208.13(d), (d)(2)(ii), 1208.13(d), (d)(2)(ii). Like *Matter of Pula,* the rule would not treat this factor as an absolute bar. *See* 8 CFR 1208.13(d) (''Factors that fall short of grounds of mandatory denial of an asylum application may constitute discretionary considerations.'').

Similarly, the Departments disagree with commenters' assertions that this rule contravenes section 208(a)(1) of the Act, 8 U.S.C. 1158(a)(1). As explained, this rule does not bar individuals from applying for asylum. The rule merely articulates that unlawful entry or attempted unlawful entry are significant adverse factors when considering whether to grant asylum as a matter of discretion.

Commenters cited various Federal circuit court treatment that allegedly forecloses consideration of this factor as significantly adverse. Cases cited by the commenters, however, prohibit the use of this factor as a bar to asylum,[60] and the Departments reiterate that the articulated discretionary factors do not equate to asylum bars. Commenters also selectively quoted from cases for support, thus mischaracterizing several cases as foreclosing provisions of the NPRM.[61] Insofar as commenters cited to *Matter of Pula's* approach that considers persecution or strong likelihood of future persecution as factors that ''generally outweigh all but the most egregious adverse factors,'' 19 I&N Dec. at 474, the Departments reiterate that the rule supersedes *Matter of Pula* in that regard. *See* 85 FR at 36285. Given that non-discretionary statutory withholding of removal and CAT protection are available, the Departments believe the rule's revised approach that considers the enumerated discretionary factors under the totality of the circumstances is appropriate in all cases, including those in which the applicant has otherwise demonstrated asylum eligibility. *See id.*

Commenters also contend that this rule contradicts Federal precedents striking down the Departments' previous rule, Aliens Subject to a Bar on Entry Under Certain Presidential Proclamations; Procedures for Protection Claims, 83 FR 55934 (Nov. 9, 2018).[62] Unlike the rule struck down in those cases, however, consideration of unlawful entry or attempted unlawful entry as a significantly adverse factor in a discretionary analysis is not an asylum bar. This factor is one of many factors that an adjudicator must consider in the totality of the circumstances. *See* 8 CFR 208.13(d), 1208.13(d) (''Factors that fall short of grounds of mandatory denial of an asylum application may constitute discretionary considerations.'').

Further, commenters alleged that the Departments ''appear to seek a way around the courts' decisions'' by ''injecting'' the previous rule barring asylum into the NPRM as a discretionary analysis and that the NPRM failed to ''address how the purpose of INA 208(a) is effectuated by inclusion of unlawful entry as a significant adverse discretionary factor.'' The Departments reject the contention that the rule is merely ''injecting'' one rule into another. The rule struck down in *East Bay Sanctuary Covenant* and *O.A.* established a bar to asylum eligibility, and the courts in those cases held that the rule exceeded the Attorney General's authority under INA 208(b)(2)(C), 8 U.S.C. 1158(b)(2)(C), to establish additional limitations on asylum eligibility. But both courts have acknowledged that the Attorney General has broader authority to deny asylum as a matter of discretion to otherwise eligible applicants under INA 208(b)(1)(A), 8 U.S.C. 1158(b)(1)(A). *See E. Bay Sanctuary Covenant* v. *Barr,* 964 F.3d 832, 849 (9th Cir. 2020) (explaining in the context of a different eligibility bar that ''the Attorney General's discretion to deny asylum under

[60] Commenters cited *Gulla,* 498 F.3d at 917, which states that ''it would be anomalous for an asylum seeker's means of entry to *render him ineligible* for a favorable exercise of discretion,'' *id.* (emphasis added), and *Huang,* 436 F.3d at 100, which contemplates whether ''illegal manner of flight and entry *were enough independently to support a denial of asylum,*'' *id.* (emphasis added). The Departments understand those cases to state that manner of entry cannot, on its own, bar an applicant from asylum relief. Further, the Departments note that in regards to manner of entry, *Gulla* found that the petitioner did not unlawfully enter or attempt to enter the United States, 498 F.3d at 919; thus, that case is not particularly relevant for purposes of the factor at issue in 8 CFR 208.13(d)(1)(i), 1208.13(d)(1)(i).

[61] For example, commenters stated that Federal circuit courts have given ''manner of entry'' ''little to no weight'' in discretionary determinations. Commenters quoted from *Zuh* v. *Mukasey,* 547 F.3d 504 (4th Cir. 2008). In context, however, the court first referenced *Matter of Pula*'s totality of the circumstances analysis and then stated that the ''use of fraudulent documents *to escape imminent capture or further persecution*'' should be afforded ''little to no weight.'' *Id.* at 511 n.4 (emphasis added). *Zuh* does not stand for the proposition that this factor should never be afforded greater weight.

[62] Commenters cited *E. Bay Sanctuary Covenant* v. *Trump,* 950 F.3d 1242 (9th Cir. 2020), and *O.A.* v. *Trump,* 404 F. Supp. 3d 109, 147 (D.D.C. 2019).

§ 1158(b)(1)(A)'' is broader than ''his discretion to prescribe criteria for eligibility for asylum'' under § 1158(b)(2)(C)); *O.A.,* 404 F. Supp. 3d at 151 (''[T]here is a vast difference between considering how the alien entered the United States as one, among many, factors in the exercise of a discretionary authority, and a categorical rule that disqualifies any alien who enters across the southern border outside a designated port of entry.''). Consistent with those decisions, this rule simply clarifies that unlawful entry or attempted unlawful entry is a significant adverse factor in a discretionary analysis. Further, the Departments point to their explanation at 85 FR at 36283:

> the Secretary and Attorney General have not provided general guidance in agency regulations for factors to be considered when determining whether an alien merits asylum as a matter of discretion. Nevertheless, the Departments have issued regulations on discretionary considerations for other forms of relief, *e.g.,* 8 CFR 212.7(d), 1212.7(d) (discretionary decisions to consent to visa applications, admission to the United States, or adjustment of status, for certain criminal aliens), and the Departments believe it is similarly appropriate to establish criteria for considering discretionary asylum claims.

The Departments acknowledge that while that explanation does not specifically reference section 208(b)(1)(A) of the Act, 8 U.S.C. 1158(b)(1)(A), the explanation clearly states that the purpose of this section of the rule is to establish criteria to guide the exercise of discretion required in considering asylum claims. As explained in the NPRM and this final rule, asylum is a discretionary form of relief under section 208(b)(1)(A) of the Act, 8 U.S.C. 1158(b)(1)(A). Accordingly, this rule enables efficient and proper exercise of the discretion required by section 208(b)(1)(A) of the Act, 8 U.S.C. 1158(b)(1)(A).

Although the Departments agree with commenters that expediency is not the only relevant ''consideration when making a determination that would dictate the relief available to an asylum seeker,'' it is also true that ''the public has an interest in relieving burdens on the asylum system and the efficient conduct of foreign affairs.'' *See E. Bay Sanctuary Covenant,* 964 F.3d at 855. By disfavoring (though, not barring) asylum applicants who unlawfully enter the United States and by deterring meritless asylum claims, the Departments seek to ensure that those who need relief most urgently are better able to obtain it. As stated in the proposed rule, the Departments ''believe that the inclusion of the proposed factors in the rule will better ensure that immigration judges and asylum officers properly consider, in all cases, whether applicants for asylum merit the relief as a matter of discretion, even if the applicant has otherwise demonstrated eligibility for asylum.'' 85 FR at 36283. Adjudicators exercise independent judgment in each case before them, 8 CFR 1003.10(b), and this rule facilitates efficient adjudication of asylum applications, consistent with such exercise of independent judgment. Contrary to the suggestions of commenters, the rule does not codify expediency as the sole—or even one—factor to consider in determining asylum relief.

Commenters unpersuasively contend that the rule directly conflicts with Federal circuit case law. The commenters confuse the requirements for a grant of asylum by misconstruing a finding of eligibility as sufficient to grant asylum. Asylum eligibility is separate from the necessary discretionary analysis, as reflected in the statute: ''with respect to any form of relief that is granted in the exercise of discretion,'' an alien must establish satisfaction of the eligibility requirements for asylum and that the alien ''merits a favorable exercise of discretion.'' INA 240(c)(4)(A), 8 U.S.C. 1229a(c)(4)(A); *see also Cardoza-Fonseca,* 480 U.S. at 428 n.5 (explaining that ''a finding that an alien is a refugee does no more than establish that 'the alien *may* be granted asylum *in the discretion of the Attorney General*''' (quoting INA 208(a)) (emphases in original)); *Matter of A–B–,* 27 I&N Dec. at 345 n.12, (stating that the ''favorable exercise of discretion is a discrete requirement'' in granting asylum and should not be disregarded ''solely because an applicant otherwise meets the burden of proof for asylum eligibility under the INA''), *abrogated on other grounds, Grace II,* 965 F.3d at 897–900. The rule does not predicate asylum eligibility on unlawful entry or attempted unlawful entry. Instead, the rule makes such factor a consideration in the discretionary analysis.

In response to commenters' other quoted excerpts from case law, the Departments considered that responding to unlawful entry or attempted unlawful entry require expenditure of valuable government resources. 85 FR at 36283. Not all aliens who unlawfully enter or attempt to unlawfully enter intend to apply for asylum, and apprehension and processing of these aliens continues to strain resources. Accordingly, the Departments codify this factor as part of the discretionary analysis, to be considered in the totality of the circumstances, to determine whether an applicant warrants a favorable exercise of discretion.

The Departments disagree with commenters' assertions that the rule, in practice, will deny relief to ''virtually all asylum cases'' or that the rule will limit asylum relief to applicants from contiguous nations or applicants who arrive by air. The Departments reiterate the independent judgment exercised by adjudicators in applying immigration law, and this rulemaking does not dictate particular outcomes. Adjudicators examine the unique factors in each case before them, in accordance with applicable law and regulations. Accordingly, the Departments find these assertions to be purely speculative.

The Departments also disagree that the rule particularly burdens children. As discussed elsewhere in this final rule, adjudicators may consider whether extraordinary circumstances exist or whether exceptional and extremely unusual hardships would arise if the application was denied. In the case of a child's unlawful entry or attempted unlawful entry, an adjudicator could consider an alien's juvenile status and other related factors stemming from the alien's age, as relevant to and presented in the case. *See* Section II.C.1.3 of this preamble for further discussion on this point. Nevertheless, the Departments recognize that aliens under the age of 18 often have no say in determining their manner of entry into the United States. Accordingly, the Departments have modified the language in the final rule to reflect that the unlawful entry of an alien under age 18 would not necessarily be a significant adverse discretionary factor.[63]

4.7.2. Failure of an Alien To Apply for Protection From Persecution or Torture in at Least One Country Outside the Alien's Country of Citizenship, Nationality, or Last Lawful Habitual Residence Through Which the Alien Transited Before Entering the United States

Comment: Commenters expressed general opposition to the proposed rule's requirement that adjudicators consider failure to apply for asylum in third countries through which applicants traveled to reach the United States to be a significant adverse factor. Commenters argued that placing great negative weight on the applicant's route to the United States is inconsistent with discretionary determinations, which,

[63] Such entry would remain a significant adverse discretionary factor for any adults traveling with the minor, however.

commenters argued, should be based on a consideration of all the equities.

Commenters asserted that, contrary to the NPRM's reasoning, failure to apply for asylum protection in a third country is often not evidence of misuse of the asylum system. Commenters asserted that there are numerous reasons that applicants would not apply for asylum in such countries, including lack of knowledge on how to apply and language barriers. Additionally, commenters cited violence and a fear of persecution as a reason that applicants may not apply for asylum in third countries. One commenter noted that the U.S. government has issued travel advisories urging Americans to reconsider travel plans to El Salvador, Honduras, Guatemala, and eleven Mexican states because of violence. Furthermore, the commenter noted that the U.S. government urges travelers to ''exercise caution'' when travelling to sixteen other Mexican states, and that the United States has issued its highest travel warning—''Do Not Travel''—for the remaining five Mexican states. The commenter asserted that these warnings indicate that the conditions in some Mexican states are as dangerous as those in Syria and Iraq, which also have the highest travel warning. Given these various warnings, the commenter asserted, it is not reasonable to expect individuals to apply for asylum in Mexico.

Commenters asserted that the NPRM's reasoning failed to adequately consider the realities of the asylum systems in Mexico, Guatemala, Honduras, and El Salvador. In the case of Mexico, the commenter argued that the asylum system there is restrictive, underfunded, and underdeveloped. Commenters similarly asserted that the asylum systems in Guatemala, Honduras, and El Salvador are rudimentary.

Commenters argued that the requirement to apply for asylum in a third country en route to the United States inappropriately advantaged asylum seekers coming from contiguous countries, as well as those who have the means to fly non-stop to the United States. With respect to asylum seekers who reached the United States by air travel, commenters asserted that the NPRM lacked a rationale as to why asylum seekers who had even a brief layover in another country would be required to apply for asylum in that country. Commenters noted that such a requirement is particularly harmful for those coming from countries where direct flights to the United States are not possible. Commenters asserted that this difference in treatment violated the Fifth Amendment of the United States Constitution. Commenters asserted that the exceptions outlined in the proposed regulation are identical to language in the Departments' July 16, 2019, IFR. In considering the legality of the IFR, commenters stated that the Ninth Circuit Court of Appeals found the rule to be arbitrary and capricious and inconsistent with the INA.

One commenter asserted that the proposed provision conflicts with two statutory provisions concerning when asylum seekers must apply for asylum in another country: Sections 208(a)(2)(A) and 208(b)(2)(A)(vi) of the Act, 8 U.S.C. 1158(a)(2)(A), (b)(2)(A)(vi). Specifically, the commenter asserted that the proposed provision is not consistent with these statutory sections because it would exclude large classes of individuals from asylum, it does not require adjudicators to consider the safety of the third countries, and it does not require adjudicators to consider the fairness of third country asylum procedures.

Response: This factor was promulgated as a way to ensure that aliens in need of protection apply at the first available opportunity. As stated in the proposed rule, the Departments believe that there is a higher likelihood that aliens who fail to apply for protection in a country through which they transit en route to the United States are misusing the asylum system. 85 FR at 36283; *see also* Asylum Eligibility and Procedural Modifications, 84 FR 33829, 33831 (July 16, 2019). Because the Departments recognize that this may not always be the case, the rule provides exceptions for situations in which an alien was denied protection in the country at issue, the alien was a victim of a severe form of trafficking in persons, or the relevant country was not a party to certain humanitarian conventions, as provided in 8 CFR 208.13(d)(1)(ii), 1208.13(d)(1)(ii). In addition, the adjudicator may consider whether exceptional circumstances exist or whether denial of asylum would result in exceptional and extremely unusual hardship to the alien. 85 FR at 36285.

Further, because this factor is race-neutral on its face and applies equally to all aliens, it does not violate the Fifth Amendment's due process guarantee. *See Washington* v. *Davis,* 426 U.S. 229, 242 (1976) (''[W]e have not held that a law, neutral on its face and serving ends otherwise within the power of government to pursue, is invalid under the Equal Protection Clause simply because it may affect a greater proportion of one race than of another. . . . Standing alone, [disproportionate impact] does not trigger the rule . . . that racial classifications are to be subjected to the strictest scrutiny and are justifiable only by the weightiest of considerations.'' (citation omitted)). This factor was not motivated by discriminatory intent. The rule and this factor in particular apply equally to all asylum applicants. To the extent that any one group is disproportionately affected by the rule, such outcome was not based on discriminatory intent, but rather on the demographics of the affected population and the Departments' aim to ensure that asylum protection in the United States is available and timely granted to applicants who genuinely need it most. *See generally* 85 FR at 36283; *see also Regents of Univ. of Cal.,* 140 S. Ct. at 1915–16 (rejecting the claim that revoking an immigration policy that primarily benefitted Latinos supported an inference of invidious discrimination against Latinos, because any disparate impact could be explained by the demographic fact that ''Latinos make up a large share of the unauthorized alien population''). The Departments have determined that aliens who do not apply for protection in a country through which they transit are less likely to merit relief as a matter of discretion; thus, the Departments proposed such factor to be considered while also providing the opportunity for aliens to present evidence to the contrary. *See id.*

Moreover, this factor is not arbitrary. The rule requires adjudicators to consider, as part of their discretionary analysis, whether an alien transited through a country en route to the United States but did not apply for asylum there. If an alien did not apply for protection, regardless of whether transit was effectuated by foot, flight layover, or sea, the alien forwent the immediate opportunity to apply for protection in the transited country for the future opportunity to apply for protection in the United States. The Departments believe this choice is relevant to an adjudicator's discretionary analysis because it may indicate the urgency or legitimacy of an applicant's claim. Thus, adjudicators should consider, as relevant, whether an alien failed to apply for protection in a country through which the alien transited en route to the United States, in the totality of the circumstances, to determine whether the alien merits relief as a matter of discretion. Moreover, nothing in the rule categorically prohibits an adjudicator from concluding that, under the circumstances, an applicant's brief layover in transit is less probative of the urgency of the applicant's claim than a

longer stay. Nor does anything in the rule categorically prohibit an adjudicator from concluding that, under the circumstances, an applicant's layover in transit in a country known for human rights abuses is less probative of the urgency of the applicant's claim than a layover in a country with a well-recognized system for providing humanitarian protection. In any event, promulgating this factor in the rule ensures that adjudicators at least account for it in the exercise of discretion, even though its probative value may vary from case to case.

The Departments also disagree with commenters who claim the Departments ''merely refer[ ] back to its earlier rulemaking on the third country transit bar.'' The NPRM's citation to Asylum Eligibility and Procedural Modifications, 84 FR 33829, 33831 (July 16, 2019), was meant to clearly reiterate, while avoiding redundancy, the Departments' continued belief that, generally, aliens who do not apply for protection in a country through which they transit en route to the United States are more likely to have a non-meritorious asylum claim. As evidenced by the clause in the NPRM that states, ''as previously explained,'' the Departments explained this factor earlier in the proposed rule. 85 FR at 36282–83. The Departments provided extensive explanation of the BIA's decision in *Matter of Pula* in which the BIA held that ''whether the alien passed through any other countries or arrived in the United States directly from his country'' was a factor to consider in determining whether a favorable exercise of discretion is warranted. 19 I&N Dec. at 473–74. The Departments chose to codify that factor in the regulations. The Departments disagree with commenters who alleged that this factor ''ignores'' the fact that countries through which an alien may transit may be as dangerous as the country of origin and is based on an incorrect premise that there is a ''real opportunity'' to seek asylum in all countries party to the Convention. By becoming party to those treaties, the third countries through which an alien may have travelled are obligated, based on the treaties they have joined, to provide protection from removal to individuals who are likely to face persecution on account of a protected ground or torture. Accordingly, the Departments understand this factor to be consistent with the provisions of section 208 of the Act, 8 U.S.C. 1158.

For similar reasons, the Departments find commenters' assertion that there are numerous reasons that applicants would not apply for asylum in such countries, including lack of knowledge on how to apply and language barriers, as well as violence and a fear of persecution, as unpersuasive. As an initial point, aliens who apply for asylum in the United States do so despite the possibility of language barriers and lack of knowledge of application procedures, and commenters did not explain—and the Departments cannot ascertain—why these barriers would affect only other countries, but not the United States.

Additionally, the alleged failure to apply in other countries due to violence or a fear of persecution is based principally on anecdotes and speculation and is neither borne out by evidence nor distinguished from similar conditions in the United States. For example, the UNHCR has documented a notable increase in asylum and refugee claims filed in Mexico—even during the ongoing COVID–19 pandemic—which strongly suggests that Mexico is an appropriate option for seeking refuge for those genuinely fleeing persecution. *See, e.g.,* Summary of Statement by UNHCR Spokesperson Shabia Mantoo, *Despite Pandemic Restrictions, People Fleeing Violence and Persecution Continue to Seek Asylum in Mexico,* UNHCR (Apr. 28, 2020), *https://www.unhcr.org/en-us/news/briefing/2020/4/5ea7dc144/despite-pandemic-restrictions-people-fleeing-violence-persecution-continue.html* (''While a number of countries throughout Latin America and the rest of the world have closed their borders and restricted movement to contain the spread of coronavirus, Mexico has continued to register new asylum claims from people fleeing brutal violence and persecution, helping them find safety.''). Asylum and refugee claims filed in Mexico increased 33 percent in the first three months of 2020 compared to the same period in 2019, with nearly 17,800 claims in 2020. *Id.* Asylum claims filed in Mexico rose by more than 103 percent in 2018 compared to the previous year. UNHCR, Mexico Fact Sheet (Apr. 2019), *https://reporting.unhcr.org/sites/default/files/UNHCR%20Factsheet%20Mexico%20-%20April%202019.pdf.* Overall, ''[a]sylum requests have doubled in Mexico each year since 2015.'' Clare Ribando Seelke, Cong. Rsch. Serv., IF10215, *Mexico's Immigration Control Efforts* 2 (2020), *https://fas.org/sgp/crs/row/IF10215.pdf.*

Moreover, some private organizations acknowledge that asylum claims in Mexico have recently ''skyrocket[ed],'' that ''Mexico has adopted a broader refugee definition than the U.S. and grants a higher percentage of asylum applications,'' and that ''Mexico may offer better options for certain refugees who cannot find international protection in the U.S.,'' including for those ''who are deciding where to seek asylum [*i.e.,* between Mexico and the United States].'' Asylum Access, *Mexican Asylum System for U.S. Immigration Lawyers FAQ* 1, 7 (Nov. 2019), *https://asylumaccess.org/wp-content/uploads/2019/11/Mexican-Asylum-FAQ-for-US-Immigration-Lawyers.pdf.* If aliens coming to the United States through Mexico feared living in Mexico, it would be irrational for them to seek refuge there in large numbers; yet, that is precisely what the available data suggests.

Additionally, commenters do not indicate why violence in part of one country is different from violence existing in a part of the United States. Just as violence may occur in parts of the United States but individuals fleeing persecution consider the country ''safe'' and want to live here, localized episodes of violence in other countries do not mean the country, as a whole, is unsafe for individuals fleeing persecution. In other words, the presence of local or regional violence, particularly criminal violence, exists in *all* countries, even those generally considered ''safe,'' but such presence of local or regional violence does not render those countries too dangerous that individuals fleeing persecution could not take refuge anywhere in the country. *Cf. Cece,* 733 F.3d at 679 (Easterbrook, dissenting) (''Crime may be rampant in Albania, but it is common in the United States too. People are forced into prostitution in Chicago. . . . Must Canada grant asylum to young women who fear prostitution in the United States, or who dread the risk of violence in or near public-housing projects?''). For instance, per the United Nations Office on Drugs and Crime Chart on Victim of Intentional Homicide, the murder rate in Mexico of 29.1/100,000 in 2018, *see* United Nations Office on Drugs and Crime, *Mexico, Victims of Intentional Homicide, 1990–2018, https://dataunodc.un.org/content/data/homicide/homicide-rate,* was lower than that in American cities such as St. Louis, Baltimore, Detroit, New Orleans and Baton Rouge. *See, e.g.,* Missouri, FBI: UCR (2018); Maryland, FBI: UCR (2018); Michigan, FBI: UCR (2018); Louisiana, FBI: UCR (2018), *https://ucr.fbi.gov/crime-in-the-u.s/2018/crime-in-the-u.s.-2018/topic-pages/offenses-known-to-law-enforcement* (Table 8). The murder rate in Baltimore, America's deadliest big city, is twice that of Mexico. Sean Kennedy, '*The Wire' is*

Finished, but Baltimore Still Bleeds, Wall St. J. (Feb. 7, 2020), *https://www.wsj.com/articles/the-wire-is-finished-but-baltimore-still-bleeds-11581119104.* In short, although the Departments acknowledge commenters' concerns, they are supported by little evidence, do not explain why their concerns do not also apply to the United States, and are ultimately outweighed by the overall need to ensure appropriate and consistent consideration of probative discretionary factors that the rule provides.

Furthermore, this factor does not conflict with sections 208(a)(2)(A) and 208(b)(2)(A)(vi) of the Act, 8 U.S.C. 1158(a)(2)(A), (b)(2)(A)(vi), as one commenter alleged. Those provisions pose bars to asylum eligibility, but this factor merely guides adjudicators' discretion to grant or deny asylum to otherwise eligible applicants. Generally, the safe third country provision, INA 208(a)(2)(A), 8 U.S.C. 1158(a)(2)(A), bars an alien from applying for asylum if the Attorney General determines that the alien could be removed to a country in which the alien's life or freedom would not be threatened and where the alien has access to a process for determining asylum claims or equivalent protection. The firm resettlement provision, INA 208(b)(2)(A)(vi), 8 U.S.C. 1158(b)(2)(a)(vi), bars asylum eligibility for an alien who firmly resettled in another country before arriving in the United States.

In contrast to those two provisions, this factor—regarding whether an alien failed to apply for protection from persecution or torture in at least one country outside the alien's country of citizenship, nationality, or last lawful habitual residence through which the alien transited before entering the United States—is considered by an adjudicator in making a discretionary determination on the alien's asylum application. Whether an application warrants a favorable exercise of discretion is distinct from whether an alien is barred altogether from applying for asylum, as is the case with the safe third country provision, or from establishing eligibility for asylum, as is the case with the firm resettlement provision. To the extent that the commenter's concerns about the safety of a third country and availability of asylum procedures in that third country specifically refer to the safe third country provision in section 208(a)(2)(A) of the Act, 8 U.S.C. 1158(a)(2)(A), those are irrelevant to this distinct factor considered in discretionary determinations. To the extent that the commenter suggests specifically incorporating those considerations—the safety of a third country and availability of asylum procedures in that third country—into this factor, the Departments reiterate that an adjudicator may consider, as relevant, extraordinary circumstances and exceptional or extremely unusual hardship that may result if asylum is denied. *See* 85 FR at 36285.

Regardless, the Attorney General's discretion to deny asylum to otherwise eligible applicants is not limited by the safe third country or firm resettlement bars. *East Bay Sanctuary* and *O.A.* both presented the question whether the eligibility bar there conflicted with the statute's other eligibility bars, because the Attorney General's authority to ''by regulation establish additional limitations and conditions . . . under which an alien shall be ineligible for asylum'' must be ''consistent with this section.'' INA 208(b)(2)(C), 8 U.S.C. 1108(b)(2)(C). Here, by contrast, the Attorney General would be acting under his authority under INA 208(b)(1)(*A*), which includes no similar ''consistent with'' requirement. Simply, the Secretary of Homeland Security or the Attorney General ''may'' deny asylum in their discretion. *Id.; see E. Bay Sanctuary Covenant,* 964 F.3d at 849 (''Unlike the broad discretion to deny asylum to aliens who are eligible for asylum, the discretion to prescribe criteria for eligibility is constrained by § 1158(b)(2)(C), which allows the Attorney General to 'establish additional limitations and conditions . . . under which an alien shall be ineligible for asylum' only so long as those limitations and conditions are 'consistent with' § 1158.'').

4.7.3. Use of Fraudulent Documents To Enter the United States

Comment: Commenters expressed several general concerns regarding the regulatory provisions on fraudulent documents. First, commenters argued that the provisions would result in the denial of most asylum applications. Second, commenters argued that it is sometimes impossible for asylum seekers to obtain valid documents and that in some instances pursuing such documents could put them in greater danger. Third, commenters asserted that it is particularly difficult for women to obtain valid travel documents in some countries because they need to first obtain the approval of a male relative. Fourth, commenters asserted that the NPRM lacked a valid rationale as to why those travelling through multiple countries would be punished under the proposed rule and those who came directly to the United States from a contiguous country or a direct flight would be excused. Finally, one commenter argued that the proposed provisions are ultra vires because ''the law at INA 208 and 209 provide for specific waivers of the use of [fraudulent documents].''

Commenters argued that the NPRM's assertion that the use of fraudulent documents makes enforcement of immigration laws difficult and requires significant resources is not supported by evidence and is false. One commenter noted that under section 208(d)(5)(A)(i) of the Act (8 U.S.C. 1158(d)(5)(A)(i)) an individual cannot be granted asylum until he or she has completed a background check and his or her identity ''has been checked against all appropriate records or databases.'' The commenter noted that the statute's requirements are applicable to every person seeking asylum regardless of whether fraudulent documents were used. Thus, the commenter argued, making the use of fraudulent documents a significant adverse factor would not reduce the amount of resources needed to adjudicate asylum cases.

One commenter argued that the proposed fraudulent document provisions are contrary to congressional intent. Specifically, the commenter noted that on May 1, 1996, the Senate debated an immigration bill that would have summarily deported, among others, asylum seekers who used false documents to enter the United States. The commenter noted that Senator Patrick Leahy introduced an amendment to the bill that would remove the use of ''summary exclusion procedures for asylum applicants.'' The commenter quoted some of Senator Leahy's remarks in support of the amendment, in which he noted that people fleeing persecution will probably get fraudulent passports. The commenter noted there was bipartisan support of the amendment.

Commenters asserted that Federal courts have recognized that false documents may be needed to flee persecution. Citing *Gulla* v. *Gonzales,* 498 F.3d 911 (9th Cir. 2007), one commenter noted that Mr. Gulla, an Iraqi asylum seeker, used forged passports to flee government persecution on account of his religion and that the court concluded that reasoned use of false documentation in that case supported Mr. Gulla's asylum claim rather than detracted from it.

One commenter argued that the NPRM's rationale for the fraudulent document provisions distorted the BIA's reasoning in *Matter of Pula.* Specifically, the commenter argued that even though the BIA delineated a difference between the use of fraudulent

documents to escape persecution and falsifying a United States passport to assume the identity of a United States citizen, the BIA noted that an adjudicator would still be required to consider the totality of the circumstances in both cases. Accordingly, the commenter argued that the case does not provide justification for making the use of a fraudulent document a significantly adverse factor.

Response: As an initial point, commenters failed to explain why an alien genuinely seeking asylum would need to use false documents to enter the United States in the first instance, as distinguished from using false documents only to leave the alien's country of nationality. An alien need not necessarily have entered the United States to apply for asylum; rather, an alien ''arriv[ing] in the United States'' may apply for asylum. INA 208(a)(1), 8 U.S.C. 1158(a)(1). Thus, an alien may seek asylum at a port of entry without using or attempting to use any documents whatsoever. Moreover, large numbers of aliens enter the United States without presenting any documents at all, including those who subsequently seek asylum after turning themselves in or are otherwise apprehended by DHS. *See* INA 212(a)(6)(A), 8 U.S.C. 1182(a)(6)(A) (rendering inadmissible an alien who enters the United States without being admitted or paroled); *see also* Perla Trevizo, *How Do You 'Secure' the Border When Most Migrants Are Just Turning Themselves In?, Tuscon.com* (Dec. 15, 2018), *https://tucson.com/news/state-and-regional/how-do-you-secure-the-border-when-most-migrants-are-just-turning-themselves-in/article_deed8d48-fa50-11e8-837c-0b4b3be5a42a.html* (noting that ''large groups'' of aliens simply ''cross illegally to turn themselves in,'' with no mention of any entry documents, false or otherwise). The use of fraudulent documents undermines the integrity of the immigration system and is unnecessary for an alien to apply for asylum. In other words, because neither fraudulent documents nor even entry into the United States are requirements to make an asylum application, the use of such documents to enter or attempt to enter the United States strongly suggests that the motive of an alien using such documents is to enter the United States for reasons other than a genuine fear of persecution or a need for protection. Consequently, the Departments find it reasonable to consider that factor as a significantly adverse discretionary one for purposes of adjudicating an asylum application, and the commenters did not persuasively explain why that should not be the case.

Even if entry documents were a prerequisite to the ability to apply for asylum, the Departments nevertheless would find that this factor would deter the use of false documents, which create burdensome administrative costs in filtering valid from invalid documentation and dissipate human resources that could be used to ensure that meritorious claims are addressed efficiently. Those benefits, in the Departments' view, would also ultimately outweigh any costs associated with the denial of asylum applications due to the use of such documents.

Further, the Departments disagree that this factor would result in denial of most applications. Regardless of what documents aliens may use to depart their countries of nationality, there is no evidence that most asylum applicants use false documents to enter the United States; rather, most aliens seeking asylum either appear at a port of entry and request asylum without seeking to enter with any particular documents or enter the United States without inspection, *i.e.,* without presenting any documents at all.

Commenters' concerns are also speculative, and the Departments reiterate that this factor is one of many factors considered under the adjudicator's discretionary analysis—not a bar to asylum.

85 FR at 36283 (''[T]he adjudicator should also consider any other relevant facts and circumstances to determine whether the applicant merits asylum as a matter of discretion.''). Further, an alien may introduce relevant evidence of extraordinary circumstances, including challenges described by the commenters, for the adjudicator to consider. *See* 85 FR at 36283. The Departments also emphasize that an alien's use of fraudulent documents to enter the United States is a ground that renders the alien inadmissible. INA 212(a)(6)(C), 8 U.S.C. 1182(a)(6)(C). This clear, negative consequence underscores congressional disapproval of the use of fraudulent documents to enter the United States.

In the NPRM, the Departments explained why this factor considers use of fraudulent documents for aliens traveling through more than one country but not aliens arriving from a contiguous country. 85 FR at 36283 n.35. For aliens arriving from a contiguous country, an alien may simply be carrying the documents he or she used to depart that country, particularly in situations in which the exit control for the contiguous country is located in close physical proximity to the port of entry into the United States or the embarkation point for a trip by air or sea to the United States; thus the Departments will not consider this a significant adverse factor for such aliens. As further explained in the NPRM, the rule aligns with *Lin* v. *Gonzales,* 445 F.3d 127, 133 (2d Cir. 2006), and *Matter of Pula,* 19 I&N Dec. at 474, cases that draw a distinction between presentation of a fraudulent document to an immigration court and the use of a fraudulent document to escape immediate danger. 85 FR at 36283 n.35. To the extent other BIA cases reject such a distinction, the rule supersedes conflicting case law. Accordingly, aliens are not ''punished,'' as commenters alleged, if they travel through more than one country. Rather, the line drawn in *Lin* and *Pula* supports differential treatment. If an alien arrives directly (such as by air), there is an innocuous explanation for his carrying of fraudulent documents: He still has them because he used them to escape immediate danger. But if an alien travels through more than one such country, that justification for carrying fraudulent documents—escaping persecution—becomes far more attenuated. As explained elsewhere in the NPRM and this final rule, the Departments believe that if aliens who travel through more than one country, subject to some exceptions, are escaping persecution, they have an opportunity to seek protection in any of the countries through which they transit en route to the United States. If aliens arriving from a contiguous country are escaping persecution, the first place to seek protection would be the United States, and so the Departments will not consider such aliens' use of fraudulent documents in pursuit of protection as a significant adverse factor.

Contrary to commenters' assertions, section 208 of the Act, 8 U.S.C. 1158, does not provide a waiver for the use of fraudulent documents to enter the United States, and section 209 of the Act, 8 U.S.C. 1159, only waives a ground of inadmissibility related to the use of fraudulent documents, INA 212(a)(6)(C)(i), 8 U.S.C. 1182(a)(6)(C)(i), in conjunction with an application for adjustment of status for an alien who has already been granted asylum. Consequently, neither provision applies to the rule, which addresses solely discretionary determinations in connection with an asylum application. Moreover, the potential availability of a waiver of a ground of inadmissibility, which is itself discretionary, for an alien

who has already been granted asylum and is seeking lawful permanent resident status does not suggest that the basis for the ground of inadmissibility is not also a relevant discretionary consideration in the first instance.

Because this factor would discourage use of fraudulent documents and streamline the discretionary analysis regarding the use of fraudulent documents, the Departments believe the factor would reduce the overall time expended to address the issue of fraudulent documents on a systemwide basis because fewer aliens would use fraudulent documents and adjudicators would consider their use more consistently. Although the use of fraudulent documents to enter the United States is difficult to track in general and the Departments do not track the number of asylum applicants who present such documents, the Departments nevertheless expect less time to be expended overall. To the extent that this provision deters the use of fraudulent documents, the provision will conserve enforcement resources that may otherwise be spent ferreting out fraud and will support the overall integrity of the immigration systems and ensure that benefits are not inappropriately granted. The Departments find those benefits outweigh the various concerns raised by commenters.

The Departments follow applicable law and regulations. If the proposed amendments cited by commenters were not included in the version of the bill that became law, then the Departments do not follow or consider legislative history regarding such amendments. *See Park 'N Fly, Inc.* v. *Dollar Park and Fly, Inc.,* 469 U.S. 189, 194 (1985) (''Statutory construction must begin with the language employed by Congress and the assumption that the ordinary meaning of that language accurately expresses the legislative purpose.'').

The Departments again note the NPRM, which explains how the rule interacts with case law regarding this factor. 85 FR at 36283 n.35. Further, this rule supersedes previous regulations that case law may have interpreted in reaching decisions prior to promulgation of the rule at hand. To the extent that other circuits have disagreed with the Departments' reasonable interpretation, the Departments' proposed rule would warrant re-evaluation in appropriate cases under well-established principles. *See Brand X,* 545 U.S. at 982.

The rule requires adjudicators to consider this factor, like all the factors outlined in the NPRM, in light of all relevant factors. *See* 85 FR at 36283, 36285. In this regard, the rule aligns with the approach in *Matter of Pula,* contrary to the commenters' assertions. The Departments note, however, that the rule also supersedes *Matter of Pula* in some regards, as explicitly provided in the NPRM. 85 FR at 36285.

4.7.4. Spent More Than 14 Days in Any One Country

Comment: Commenters expressed general concerns with the proposed regulation's introduction of a bar that would make any person who spent more than 14 days in any country en route to the United States ineligible for asylum. Specifically, commenters asserted the new bar is cruel and arbitrary and capricious, and that it is designed to make most aliens who enter from the southern border ineligible for asylum.

Commenters asserted that the NPRM's reasoning as to the necessity for a 14-day bar is inadequate and that the policy would be contrary to the concept of firm resettlement. One commenter argued that the NPRM failed to explain how a 14-day stay in a country equates to an offer of firm resettlement, and another asserted that the length of stay in a country is irrelevant to the merits of an LGBTQ asylum seeker's claim. Additionally, one commenter stated that being given an application to seek protection in another country does not equate to an offer of firm resettlement. The same commenter argued the NPRM's use of a single Federal case to support the proposed provision—*Yang* v. *INS,* 79 F.3d 932 (9th Cir. 1996)—is not persuasive. The commenter stated that in *Yang,* refugees from Laos who spent 14 years in France with refugee status were denied asylum in the United States. The commenter asserted that using this case to support the position that denying asylum applications for anyone who spent 14 days in another country with no kind of lawful status is ''irrational.''

Commenters argued that the proposed 14-day bar would punish those who seek to comply with U.S. policies. Specifically, commenters noted that under the CBP ''metering'' policy, asylum seekers sometimes are required to wait more than 14 days (one commenter stated that the wait could span months) in order to make their asylum claims. Commenters also asserted that asylum seekers subject to MPP are often required to spend more than 14 days (up to weeks or months) in Mexico. Commenters expressed concern that asylum seekers subject to metering and MPP would be barred from asylum under the proposed rule. One commenter similarly argued that the United States has used COVID–19 as a ''pretext'' to close the Mexican border to all asylum seekers. The commenter implied that these policies could likewise cause an individual to be in a third country for longer than 14 days.

Commenters asserted that many asylum seekers travel to the United States by foot, bus, or train, which, commenters assert, often takes longer than 14 days. Commenters asserted that the length of an asylum seeker's journey is often extended due to the need to avoid detection from government officials and non-government actors trying to return the asylum seeker back to the country from which the individual is fleeing. Additionally, commenters noted that there could be other reasons that an asylum seeker's journey could be extended beyond 14 days, including robbery, kidnap, or rape. One commenter asserted that those who travel through southern Mexico face additional hurdles, asserting that the Mexican government refuses to issue travel documents and that the government threatens to fine transportation companies that sell tickets to those without travel documents.

One commenter expressed concern that the proposed regulation did not include an exception for children and other discrete populations, who, the commenter stated, might not have control over the amount of time spent in third countries en route to the United States.

Response: This factor is not a bar to asylum, as commenters alleged. This factor is considered, along with all the other factors outlined in the rule, as part of an adjudicator's discretionary analysis. Further, the NPRM clearly recognized that ''individual circumstances of an alien's presence in a third country or transit to the United States may not necessarily warrant adverse discretionary consideration in all instances,'' and subsequently provided various exceptions. 85 FR at 36284.

Consideration of this factor is not cruel or arbitrary and capricious. This factor is considered adverse only when an alien spends more than 14 days in a country that permits applications for asylum, refugee status, or similar protections. The Departments believe that an alien should apply for protection at the first available opportunity, but the Departments would not hold an alien responsible for failure to apply for protection that does not, in fact, exist. Asylum is a form of relief intended for aliens who legitimately need urgent protection. If any alien stays in one country for more than 14 days and that

country permits applications for various forms of protection but the alien fails to apply for such protections, then the Departments consider that failure to be indicative of a lack of urgency on the alien's part. This factor thus screens for urgency, an important consideration in light of the growing number of asylum applications the Departments receive: The Departments have seen record numbers of asylum applications, along with record numbers of asylum denials, in the past decade. For comparison, in FY 2008, 42,836 asylum applications were filed while, in FY 2019, 213,798 asylum applications were filed. *See* EOIR, *Adjudication Statistics: Total Asylum Applications* (Oct. 13, 2020), *https://www.justice.gov/eoir/page/file/1106366/download.* These record numbers have slowed the adjudication process for all asylum seekers, including those who urgently need protection. Thus, the Departments expect that considering this factor will assist the efficient adjudication of asylum claims.

The NPRM does not equate either a 14-day stay in one country or the offer to seek protection, on their own, as firm resettlement, contrary to commenters' assertions. For amendments to the firm resettlement bar, commenters should refer to Section II.C.7 of the preamble to the NPRM, 85 FR at 36285–86, and Section II.C.4.8 of the preamble to this final rule, revised at 8 CFR 208.15, 1208.15.

Contrary to commenters' allegations, the proposed treatment of an alien who spends more than 14 days in a country en route to the United States as a significant adverse factor does not conflict with firm resettlement. First, an alien found to have firmly resettled is barred from asylum relief. INA 208(b)(2)(A)(vi), 8 U.S.C. 1158(b)(2)(A)(vi). The provision at hand, however, is not a mandatory bar but a discretionary factor to be considered by the adjudicator, subject to exceptions in cases where the alien's application for protection in the third country was denied, the alien is a victim of a severe form of human trafficking defined in 8 CFR 214.11, or the alien was present in or transited through only countries that were not parties to the Refugee Convention, Refugee Protocol, or CAT at the relevant time. 8 CFR 208.13(d)(2)(i)(A)(*1*)–(*3*), (d)(2)(i)(B)(*1*)–(*3*); *see also* 85 FR at 36824. Second, as proposed by the NPRM, the firm resettlement bar would apply ''when the evidence of record indicates'' that it would apply. 85 FR at 36286. Then, the alien bears the burden of proof to demonstrate that the bar does not apply, consistent with 8 CFR 1240.8(d). *See id.* Accordingly, the discretionary factor of whether an alien spent more than 14 days in any one country that provides applications for refugee, asylee, or other protections prior to entering or arriving in the United States is different from but related to the firm resettlement bar: If an alien successfully demonstrates that the firm resettlement bar does not apply, then an adjudicator would consider that factor as part of a discretionary analysis regarding the asylum application.

The Departments disagree that the reference to *Yang,* 79 F.3d at 935–39, is irrational. That case clearly demonstrates why the Departments are promulgating this factor for consideration. As stated in the NPRM, that case ''uph[eld] a discretionary firm resettlement bar, and reject[ed] the premise that such evaluation is arbitrary and capricious or that it prevents adjudicators from exercising discretion.'' 85 FR at 36284 (citing *Yang,* 79 F.3d at 935–39). Such reasoning is relevant to all cases in which this factor is considered, whether the alien spent 14 days or 14 years in another country. Further, contrary to the commenters' assertion, even if the alien spent 14 days or more in another country, this factor is not a bar to asylum; rather, it is considered in light of all other relevant factors and various exceptions. *See id.*

For aliens subject to MPP, those aliens who have entered the United States and were processed under MPP are no longer en route to the United States and have already applied for admission to the United States, whereas, this factor considers whether an alien stayed for more than 14 days in one country ''[i]mmediately prior to his arrival in the United States or en route to the United States.'' 8 CFR 208.13(d)(2)(i)(A), 1208.13(d)(2)(i)(A). If an alien claims that he was subject to metering and waited more than 14 days in Mexico, he or she may introduce such evidence as an extraordinary circumstance. Moreover, such aliens may apply for protection in Mexico; if that application is denied, then the factor would not apply. In addition, the Departments reject any contention that COVID–19 has been used as a pretext to close the southern border. The government has taken steps at the Canadian and Mexican border to curb the introduction and spread of the virus, which continues to affect the United States and the entire world. *See* DHS, *Fact Sheet: DHS Measures on the Border to Limit the Further Spread of Coronavirus* (updated Oct. 22, 2020), *https://www.dhs.gov/news/2020/06/16/fact-sheet-dhs-measures-border-limit-further-spread-coronavirus;* Control of Communicable Diseases; Foreign Quarantine: Suspension of Introduction of Persons Into United States From Designated Foreign Countries or Places for Public Health Purposes, 85 FR 16559 (Mar. 24, 2020); Security Bars and Processing, 85 FR 41201 (July 9, 2020) (proposed rule).

For discrete populations, if circumstances exist that extend an alien's stay in one country to surpass 14 days, an adjudicator will consider such circumstances to determine whether they constitute extraordinary circumstances. Further, an adjudicator will evaluate whether such alien falls into one of the three exceptions to this factor.

4.7.5. Transits Through More Than One Country Between His Country of Citizenship, Nationality, or Last Habitual Residence and the United States

Comment: Commenters asserted that the proposed provision pertaining to transit through more than one country en route to the United States is arbitrary and capricious and contrary to congressional intent. They stated that the rule would inappropriately advantage asylum seekers coming from Mexico and Canada. Commenters similarly asserted that the proposed rule would advantage those coming from countries where direct flights to the United States are available and those who could afford to purchase tickets on such flights. They asserted that there was no rationale as to why asylum seekers travelling by air with one or more layovers in another country should be treated differently from those who took a direct flight. And they further expressed concern that the proposed factor would be particularly onerous on women and LGBTQ asylum seekers.

Commenters averred that the proposed factor of transit through more than one country conflicts with Federal court precedent. Specifically, commenters noted that a Federal district court invalidated a prior regulation concerning a third country transit ban. Commenters expressed concern that the Departments are trying to implement the ban a second time by making it a factor in discretionary determinations and asserted that the proposed provision would likewise be struck down by the courts.

Commenters expressed concern with two of the NPRM's proposed exceptions to the proposed third country transit factor. First, one commenter contended that exempting travel through countries that are not party to the 1951 Convention relating to the Status of Refugees, the 1967 Protocol relating to

the Status of Refugees, or the Convention Against Torture and Other Cruel, Inhuman, or Degrading Treatment or Punishment is overly narrow. Specifically, the commenter argued that since 146 countries are party to the 1951 convention and 147 countries are party to the Protocol, the exception would be inapplicable to many asylum seekers' journeys. Second, commenters expressed concern that the proposed exception of applying for asylum in countries visited en route to the United States is not reasonable. Commenters asserted that the asylum systems of many nations through which asylum seekers commonly travel (such as Guatemala, Honduras, and El Salvador) are not well developed and that the countries are sometimes just as dangerous as the ones from which they are fleeing.

Response: The Departments disagree that this factor is arbitrary and capricious or contrary to congressional intent. Although not a bar, this discretionary factor is consistent with case law regarding firm resettlement and safe third countries. *See* 85 FR at 36284. Further, taken together with the exceptions, the factor is consistent with section 208(a)(2)(A) of the Act, 8 U.S.C. 1158(a)(2)(A).

Similar to the aforementioned factors that consider whether an alien stayed in one country for more than 14 days and whether an alien failed to seek protection in a country through which the alien transited en route to the United States, this factor aims to ensure that asylum is available for those who have an urgent need for protection. The Departments generally believe that aliens with legitimate asylum claims would not forego the opportunity to seek protection in countries through which they traveled if they had an urgent need. However, the Departments acknowledge that circumstances may exist in which an alien did, in fact, travel through more than one country and has an urgent need for asylum; accordingly, the Departments outlined three exceptions to this factor, *see* 85 FR at 36284; 8 CFR 208.13(d)(2)(i)(A)(*1*)–(*3*), (B)(*1*)–(*3*), 1208.13(d)(2)(i)(A)(*1*)–(*3*), (B)(*1*)–(*3*), in addition to the general consideration of extraordinary circumstances or exceptional and extremely unusual hardship that may result if the application is denied. *See* 85 FR at 36283–84. For these reasons, the Departments did not promulgate this factor in an arbitrary and capricious manner.

Relatedly, this factor does not improperly advantage asylum seekers from Canada, Mexico, or countries with direct flights to the United States. As background, asylum and refugee provisions were incorporated into U.S. law based on the United States' international obligations, in part, from the 1951 Convention relating to the Status of Refugees and 1967 Protocol. Signatories to those agreements comprise an ''international regime of refugee protection.'' UNHCR, *Implementation of the 1951 Convention and the 1967 Protocol Relating to the Status of Refugees: II. Background,* ¶ 3, EC/SCP/54 (July 7, 1989), *https://www.unhcr.org/en-us/excom/scip/3ae68cbe4/implementation-1951-convention-1967-protocol-relating-status-refugees.html.* To that end, the Departments believe this system operates to ensure aliens may apply for protection as soon as possible, not to ensure that aliens receive protection specifically from the United States. Congress has authorized the Departments to bar an alien from applying for asylum in the United States if the alien may be removed to a third country that affords a full and fair process for determining asylum claims or equivalent temporary protections, pursuant to a bilateral or multilateral agreement. INA 208(a)(2)(A), 8 U.S.C. 1158(a)(2)(A). The United States shares the burden of processing asylum claims with other countries pursuant to various agreements. *See, e.g.,* Agreement Between the Government of Canada and the Government of the United States of America for Cooperation in the Examination of Refugee Status Claims from Nationals of Third Countries, Dec. 5, 2002, *https://www.canada.ca/en/immigration-refugees-citizenship/corporate/mandate/policies-operational-instructions-agreements/agreements/safe-third-country-agreement/final-text.html; DHS, Fact Sheet: DHS Agreements with Guatemala, Honduras, and El Salvador, https://www.dhs.gov/sites/default/files/publications/19_1028_opa_factsheet-northern-central-america-agreements_v2.pdf.* Thus, asylum seekers from countries in closer proximity to the United States or with direct flights to the United States are not ''advantaged,'' and asylum seekers from countries that are farther away from the United States or without direct flights to the United States are not ''punished.'' If anything, aliens from countries farther away may have more opportunities to seek protection than those whose closest—or potentially only—option is the United States. In an ''international regime of refugee protection,'' it makes sense that aliens closer to the United States may obtain asylum more easily in the United States, just as aliens closer to other countries may obtain asylum more easily in those countries. Including this factor will encourage aliens to seek asylum in countries that are closest to them and encourage all treaty signatories to do their fair share in providing safe harbor for refugees.

For discussion of this rule's effect on women and LGBTQ asylum seekers, *see* Section II.C.1.3 of this preamble. The Departments note here, however, that the rule applies to all asylum seekers regardless of gender or sexual orientation.

Moreover, this factor is not an eligibility bar for asylum; it is merely one factor to be considered as relevant, along with various other factors outlined in the rule. The previous rulemaking cited by commenters, Asylum Eligibility and Procedural Modifications, 84 FR 33829 (July 16, 2019), barred asylum relief to aliens who failed to apply for protection in a third country through which they traveled en route to the United States. While that rule encompasses similar considerations, it is fundamentally different because the 2019 rule constituted a mandatory bar to asylum. This rule considers this factor as part of an adjudicator's discretionary analysis. Adverse judicial treatment of the 2019 rule does not directly apply to this rulemaking, which the Departments propose to issue under a different statutory authority. *See E. Bay Sanctuary Covenant,* 964 F.3d at 849 (distinguishing ''the broad discretion to deny asylum to aliens who are eligible for asylum'' from the narrower ''discretion to prescribe criteria for eligibility'').

The Departments disagree with commenters that the exception for aliens who were present in or transited through countries that were, at the relevant time, not parties to the Refugee Convention, Refugee Protocol, or CAT is too narrow. That exception is fashioned to ensure that aliens have an opportunity to apply for protection—whether that be in the United States or in a country through which they transit. If a country does not offer such protection, then an alien would not be held to that standard and could avail themselves of the third exception. Regarding comments that the exceptions to this factor are insufficient due to danger in and underdevelopment of most countries through which aliens travel en route to the United States, the Departments note that, by becoming party to those treaties, the third countries through which an alien may have transited are obligated by treaty to provide protection from removal to individuals who are likely to face

persecution on account of a protected ground or torture. *See also* Section III.C.4.7.2 of this preamble, *supra* (discussing the availability of protection in countries outside the United States through which an alien may transit). Accordingly, the Departments believe the rule is consistent with section 208 of the Act (8 U.S.C. 1158). The Departments note that regardless of whether an alien claims any of the exceptions, an alien may still assert that denial of their asylum application would result in extraordinary circumstances or produce exceptional and extremely unusual hardship.

4.7.6. Subject to § 1208.13(c) But for the Reversal, Vacatur, Expungement, or Modification of a Conviction or Sentence

Comment: Commenters expressed general concerns with the provision of the proposed regulation relating to reversed or vacated criminal convictions, asserting that it would lead to many asylum applications being inappropriately denied.

One commenter asserted that the proposed regulation would inappropriately create a categorical approach to considering vacated convictions in discretionary determinations. The commenter asserted that adjudicators should consider vacated convictions on a case-by-case basis and argued that a vacated conviction could provide positive equities that should be considered.

Commenters asserted that the proposed regulation is inconsistent with due process. Specifically, one commenter asserted that the proposed regulation would bar from asylum relief individuals who had criminal sentences that were vacated, reversed, expunged, or modified unless there was an express finding that the person is not guilty. The commenter asserted that there could be instances where a prosecutor decides to decline to pursue a case further after learning of an underlying error in the criminal proceedings without first making a determination as to the defendant's innocence or guilt. The commenter asserted that the proposed regulation could cause some individuals in this position with otherwise meritorious claims to be barred from asylum. The commenter cited *Nelson* v. *Colorado,* 137 S. Ct. 1249, 1255–56 (2017), and argued that such an outcome would violate due process principles.

One commenter expressed concern that the proposed regulation is inconsistent with the INA and the BIA decision, *Matter of Devison,* 22 I&N Dec. 1362 (BIA 2000). The commenter asserted that the Act and precedent establish that juvenile charges and convictions are not criminal convictions and thus should not be considered under the proposed regulation. Similarly, the commenter cited research suggesting that a child's comprehension of the consequences for engaging in criminal activity varies based on age. Accordingly, the commenter asserted, individuals should not be subjected to excessive punishments for actions that they took when they were young.

Response: As an initial point, the Departments note that this provision is fully consistent with long-standing case law allowing adjudicators to appropriately consider as an adverse discretionary factor ''criminal conduct which has not culminated in a final conviction for purposes of the Act.'' *Matter of Thomas,* 21 I&N Dec. 20, 23–24 (BIA 1995) (collecting cases); *cf. Villanueva-Franco* v. *INS,* 802 F.2d 327, 329–30 (9th Cir. 1986) (finding that the Board could consider alien's extensive criminal record, which included an expunged felony conviction for assaulting a police officer, in weighing whether voluntary departure was merited as a matter of discretion); *Parcham* v. *INS,* 769 F.2d 1001, 1005 (4th Cir. 1985) (''Evidence of an alien's conduct, without a conviction, may be considered in denying the discretionary relief of voluntary departure.''); *Matter of Seda,* 17 I&N Dec. 550, 554 (BIA 1980) (noting that ''a plea of guilty [that] results in something less than a conviction'' is ''a significant adverse factor to be considered in whether a favorable exercise of discretion is warranted'' for voluntary departure), *overruled on other grounds by Matter of Ozkok,* 19 I&N Dec. 546, 552 (BIA 1988). Commenters did not persuasively explain why the Departments should abandon this long-standing principle in considering all conduct in making a discretionary determination, especially conduct that initially led to a criminal conviction.

Additionally, commenters' concerns that this factor will result in improper denials of asylum applications are speculative. This factor is not a bar to asylum. *Compare* Procedures for Asylum and Bars to Asylum Eligibility, 84 FR 69640, 69654–56 (Dec. 19, 2019) (proposing additional bars to asylum eligibility based on criminal convictions and clarifying when an order vacating or modifying a conviction or sentence will preclude the application of the proposed bars). Considered relative to all the other factors proposed in NPRM, outcomes will vary on a case-by-case basis, given consideration of extraordinary circumstances or exceptional and unusual hardship resulting from a denial of asylum. 85 FR at 36283.

The Departments disagree that this factor creates a ''categorical approach,'' as commenters alleged. A categorical approach often applies when determining whether a particular conviction qualifies as an offense that would render the alien ineligible for discretionary relief. 8 CFR 208.13(c), 1208.13(c); *see Kawashima* v. *Holder,* 565 U.S. 478, 483 (2012). This factor merely counsels adjudicators that *if* a conviction qualifies, it should be considered an adverse factor notwithstanding any subsequent vacatur or reversal of that sentence (unless the alien was found not guilty). But this rule takes no position on what approach should apply—categorical or circumstance-specific—in determining whether a conviction would so qualify. Moreover, this factor does not affect existing case law allowing the consideration of criminal activity as a discretionary factor, even when that activity has not resulted in a conviction. The rule, as proposed and in this final iteration, however, considers this factor as relevant to each case, along with consideration of extraordinary circumstances or exceptional and extremely unusual hardship that may befall an alien if asylum is denied. In this way, the rule is consistent with the commenter's suggestion that criminal activity must be considered on a case-by-case basis.

The rule does not violate due process. Consistent with long-standing case law, the rule requires adjudicators to consider, as part of the discretionary analysis, convictions that remain valid for immigration purposes. *See* 85 FR at 36284. Due process requires that an alien receive a full and fair hearing that provides a meaningful opportunity to be heard. *See Kerciku* v. *INS,* 314 F.3d 913, 917 (7th Cir. 2003). This rule does not violate due process because it does not deprive aliens of their right to a hearing before an immigration judge, 8 CFR 1240.10, or their right to appeal to the BIA, 8 CFR 1003.1(b).

Moreover, because asylum is a discretionary form of relief, aliens have no constitutionally protected interest in a grant of asylum. *See Nativi-Gomez* v. *Ashcroft,* 344 F.3d 805, 807–09 (8th Cir. 2003) (explaining that an alien has no expectation that discretionary relief will be granted and, consequently, no protected liberty interest in such relief (citing *Ashki* v. *INS,* 233 F.3d 913, 921 (6th Cir. 2000)). Accordingly, this rule presents distinct issues from *Nelson,* 137 S. Ct. at 1255–56, cited by a commenter. *Nelson* holds only that a state may not continue to deprive a

person of his property—there, thousands of dollars in costs, fees, and restitution—after his conviction has been reversed or vacated. The case applied the balancing test in *Mathews* v. *Eldridge,* 424 U.S. 319 (1976), which balances the private interest affected, the risk of erroneous deprivation of such interest through procedures used, and the governmental interest at stake. Because, unlike the monetary exactions at issue in *Nelson,* the rule affects no constitutionally protected liberty or property interest, that case and the *Mathews* balancing test do not apply.

The Departments will continue to apply *Matter of Devison,* 22 I&N Dec. 1362 (BIA 2000), as relevant; however, the commenter misunderstands the holding in that case. In that case, as referenced by a commenter, the BIA held that an adjudication as a ''youthful offender'' constituted a determination of juvenile delinquency rather than a conviction under section 101(a)(48)(A) of the Act, 8 U.S.C. 1101(a)(48)(A). *Matter of Devison,* 22 I&N Dec. at 1366. ''In its reasoning, the Board drew a critical distinction between a finding of delinquency, which involves 'status' rather than guilt or innocence, and deferred adjudication or expungement. Deferred adjudications constitute convictions under the INA while findings of delinquency do not.'' *Uritsky* v. *Gonzales,* 399 F.3d 728, 730 (6th Cir. 2005) (describing the BIA's holding in *Matter of Devison*) (internal citation omitted). Accordingly, juvenile adjudications of delinquency will continue to be evaluated in accordance with applicable statutes and regulations. But, because *Matter of Devison* does not hold that juvenile convictions cannot qualify as criminal convictions under the Act, the Departments decline to apply it as suggested by the commenter. The rule does not change or reinterpret the definition or disturb case law regarding criminal convictions; in fact, the rule codifies long-standing case law through promulgation of this factor. *See* 85 FR at 36284. To the extent commenters expressed disagreement with the definition of ''conviction'' under the Act, that issue is outside the scope of this rulemaking.

Finally, to the extent commenters queried whether particular types of cases with specific facts would necessarily be denied, the Departments find such queries speculative or hypothetical. Moreover, the Departments do not generally provide advisory opinions on asylum applications, especially in a rulemaking. Rather, the Departments expect that their adjudicators will address each case based on its own particular facts and the applicable law.

4.7.7. More Than One Year of Unlawful Presence in the United States Prior To Filing an Application for Asylum

Comment: Commenters generally expressed concern that consideration of unlawful presence in discretionary determinations would lead to the denial of most asylum applications. One commenter expressed concern that the proposed provision fails to account for practical realities such as official ports of entry being ''effectively closed'' to asylum seekers for years and that it could take more than a year to recover from the trauma that led an individual to flee his or her country.

Commenters asserted that inclusion of the proposed unlawful presence factor in discretionary determination is ultra vires. Specifically, commenters noted that section 208(a)(2)(d) of the Act (8 U.S.C. 1158(a)(2)(d)) provides two instances in which an asylum application can be filed outside of the one-year deadline: (1) Changed circumstances that affect eligibility for asylum, and (2) extraordinary circumstances relating to the delay of filing the application within one year. Commenters asserted that the proposed regulation would frustrate this statutory framework because a person who filed more than one year after his or her last entry into the United States but meets one of the above-identified exceptions could still see their application denied under the proposed rule as a matter of discretion. Commenters also noted that there could be instances where the exceptions would not be applicable until after the one-year deadline has expired. Commenters stated that deadline exceptions are especially important for LGBTQ asylum seekers. Commenters stated that the process to understanding one's identity as an LGBTQ individual can take more than one year and requires safety, security, and a support system that is often not available during flight from their home countries. Similarly, commenters asserted that it could take over a year to detect an HIV infection because of the need for ''culturally competent and clinically appropriate'' medical care that is often not available to asylum seekers outside of the United States.

Commenters argued that the proposed regulation conflicts with congressional intent. One commenter detailed the legislative history surrounding the one-year filing deadline. Specifically, the commenter noted that the Senate version of the bill in which the deadline was debated raised the deadline from 30 days to one year and that an amendment to the House version changed the wording of one of the exceptions from ''changed country conditions'' to ''personal circumstances'' in order to broaden the exception for applications that would be accepted after the statutory deadline. The commenter also highlighted a floor speech that the commenter argued evidenced congressional intent to create broad exceptions to the one-year deadline in order to reduce the chance of arbitrary denials.

One commenter argued that the proposed regulation conflicts with agency policy. Specifically, the commenter argued that in *Matter of Y–C–,* 23 I&N Dec. 286, 287 (BIA 2002), the BIA stated that a failure to file within the one-year deadline does not result in an absolute bar to filing an asylum application. The commenter also asserted that the proposed regulation is in conflict with 8 CFR 208.4(a)(4)–(5) and 8 CFR 1208(a)(4)–(5), which, the commenter asserted, provide broad definitions for the changed and extraordinary circumstances exceptions. The commenter similarly asserted that the proposed regulation is in conflict with 8 CFR 208.4(a)(2)(B) and 8 CFR 1208.4(a)(2)(B), which require applicants to establish the exceptions ''to the satisfaction'' of the adjudicator. The commenter noted that USCIS guidance states the standard is one of ''reasonableness,'' which, the commenter asserted, is lower than that of ''clear and convincing evidence.'' The commenter asserted that USCIS's articulation of the standard evidences agency acknowledgement of congressional intent to have the exceptions be broadly available.

One commenter asserted that the proposed regulation is inconsistent with the United States' obligations under the 1967 Protocol. Specifically, the commenter asserted that the UNHCR Executive Committee opposed the one-year filing deadline when it was under consideration because it was concerned with the impact it would have on the ability of the United States to offer protection to those fleeing persecution. The commenter similarly asserted that President Clinton opposed the one-year filing deadline out of a concern for it being inconsistent with international treaty obligations.

Response: This factor, like the other factors, is not a bar to asylum. The Departments proposed this factor as one of many that an adjudicator must consider when determining whether an asylum application warrants a favorable exercise of discretion. 85 FR at 36283. Commenters' concerns that consideration of this factor would result

in the denial of most asylum applications are speculative, untethered to the inherent case-by-case nature of asylum adjudications, and based on the erroneous underlying premise that this factor functions as an eligibility bar.

Moreover, this factor would, of its own force, result in the denial of only a small number, if any, of asylum claims. For aliens who entered the United States unlawfully and who accrue at least one year of unlawful presence, the statutory one-year bar in INA 208(a)(2)(B), 8 U.S.C. 1158(a)(2)(B), would likely apply independently, regardless of this provision. And aliens who arrive in the United States lawfully and maintain lawful status do not accrue unlawful presence and, thus, would not be subject to this provision. INA 212(a)(9)(B)(ii), 8 U.S.C. 1182(a)(9)(B)(ii). Even if such aliens fell out of status, their previous status may demonstrate extraordinary circumstances, 8 CFR 208.4(a)(5)(iv), 1208.4(a)(5)(iv), which would excuse the statutory one-year filing deadline for a ''reasonable period,'' and that ''reasonable period'' is likely to be less than the one year of unlawful presence required to trigger this provision. *See* Asylum Procedures, 65 FR 76121, 76123–24 (Dec. 6, 2000) (''Generally, the Department expects an asylum-seeker to apply as soon as possible after expiration of his or her valid status, and failure to do so will result in rejection of the asylum application. Clearly, waiting six months or longer after expiration or termination of status would not be considered reasonable.''). Commenters' concerns also do not account for the exceptions to the accrual of unlawful presence, INA 212(a)(9)(B)(iii), 8 U.S.C. 1182(a)(9)(B)(iii), or for situations in which the Attorney General or Secretary may grant an asylum application notwithstanding this factor. In short, commenters' concerns that this provision will result in the denial of most asylum application is wholly unfounded.

This factor is consistent with the Act. The rule preserves consideration of the two statutory provisions, cited by commenters, in which aliens may file an asylum application outside of the one-year deadline—changed circumstances and extraordinary circumstances. *See* 85 FR at 36285. Further, the rule provides consideration of whether exceptional and extremely unusual hardship may befall an alien if asylum was denied. For the discrete populations referenced by the commenters who file outside of the one-year deadline, adjudicators may consider those circumstances in accordance with the rule.[64] Accordingly, the rule does not frustrate the statutory framework.

The Departments disagree that the rule conflicts with congressional intent and agency policy. First, the Departments note that legislative history is secondary to the text of the statute itself. *See Park 'N Fly, Inc.,* 469 U.S. at 194 (''Statutory construction must begin with the language employed by Congress and the assumption that the ordinary meaning of that language accurately expresses the legislative purpose.''). The Supreme Court has explained the difficulty in examining legislative history because, oftentimes, both support and opposition may be found, thereby ''creat[ing] more confusion than clarity.'' *Lamie* v. *U.S. Trustee,* 540 U.S. 526, 539 (2004); *see also Milner* v. *Dep't of Navy,* 562 U.S. 562, 572 (2011) (''We will not take the opposite tack of allowing ambiguous legislative history to muddy clear statutory language.''). The Departments read the plain language of the statute conferring discretionary authority to the Attorney General to adjudicate asylum applications in promulgating this section of the rule, which guides the exercise of such discretion through consideration of various factors. Accordingly, in regard to this particular regulatory provision, the Departments rely on the text of the statute rather than the legislative history.

Second, the rule does not conflict with agency policy. This factor, as previously explained, does not function as an absolute bar to asylum; therefore, it does not conflict with case law holding that extraordinary circumstances may excuse untimely filing. Moreover, this factor does not conflict with current regulations, as alleged by a commenter. The rule does not change the definitions for changed circumstances or extraordinary circumstances in 8 CFR 208.4(a)(4)–(5), 1208.4(a)(4)–(5), and the rule repeatedly stated that the adjudicator will consider this factor, along with all of the factors, as part of the discretionary analysis. Thus, it does not offend 8 CFR 208.4(a)(2)(B), 1208.4(a)(2)(B).

In regard to one commenter's concern that the rule's ''clear and convincing evidence'' standard would displace USCIS's current ''reasonableness standard'' for excusing a late-filed application, the commenter conflates the burden for showing extraordinary circumstances excusing the general one-year filing deadline with the burden for showing exceptional and extremely unusual hardship warranting an exercise of discretion by the Secretary or Attorney General. *Compare* 8 CFR 208.4(a)(5), 1208.4(a)(5) (''The burden of proof is on the applicant to establish to the satisfaction of the asylum officer, the immigration judge, or the Board of Immigration Appeals . . . that the delay was reasonable under the circumstances''), *with* 8 CFR 208.13(d)(2)(ii), 1208.13(d)(2)(ii) (Secretary or Attorney General may favorably exercise discretion where one or more adverse discretionary factors are present in ''cases in which an alien, by clear and convincing evidence, demonstrates that the denial of the application for asylum would result in exceptional and extremely unusual hardship to the alien''). The two standards do not conflict because they apply in different contexts and serve different purposes.[65] The ''to the satisfaction of the asylum officer'' standard reflects the statutory requirement that an alien must demonstrate extraordinary circumstances ''to the satisfaction of the Attorney General'' to excuse a late-filed asylum application. INA 208(a)(2)(D), 8 U.S.C. 1158(a)(2)(D). It reflects a showing to be made by the alien in order to receive initial consideration of the asylum application, irrespective of its merits. The ''clear and convincing evidence'' standard reflects the showing necessary to warrant the Secretary's or Attorney General's favorable exercise of discretion when any significantly adverse factor—whether an unpaid tax obligation, or the denial of two previous applications—is present. This standard is consistent with prior standards set for the application of that discretion to immigration benefits. *See* 8 CFR 212.7(d), 1212.7(d). It represents a concluding consideration to determine whether a grant of asylum is ultimately appropriate and goes directly to the merits of the asylum application. The two standards therefore do not conflict.

The rule does not circumvent the United States' obligations under the 1967 Protocol. In accordance with its non-refoulement obligations under the 1967 Protocol, the United States continues to offer statutory withholding of removal and protection under the

[64] *See supra* Section II.C.1.3 for further discussion on vulnerable populations.

[65] For example, an alien may establish ineffective assistance of counsel as an extraordinary circumstance to excuse a failure to meet the one-year asylum application filing deadline. 8 CFR 208.4(a)(5)(iii), 1208.4(a)(5)(iii). That showing, however, simply allows the application to be filed and says little about whether the application should ultimately be granted as a matter of discretion, particularly if there are unrelated adverse factors to be considered, such as unpaid tax obligations. 8 CFR 208.13(d)(2)(i)(E)(2), 1208.13(d)(2)(i)(E)(2).

CAT regulations.[66] The Departments also find commenters' assertions unpersuasive that the UNHCR Executive Committee and former-President Clinton opposed the one-year deadline. As an initial matter, concerns regarding solely the one-year deadline are outside the scope of this regulation because the rule does not amend the deadline, nor could it. And, in any event, the Departments are not aware that any court has endorsed the UNHCR Executive Committee's and President Clinton's theory that the existing one-year time bar on asylum applications violates international law.

4.7.8. Tax Violations

Comment: Commenters asserted that tax violations are not related to the merits of an asylum application and that the proposed regulation would punish asylum seekers for not understanding tax law. Commenters asserted that another result of EAD regulations is that many asylum seekers work in the informal economy and are paid ''off the books'' to support themselves while their applications are pending. Commenters argued that it is not reasonable to expect asylum seekers (some of whom, one commenter noted, do not speak English) to navigate the complexities of tax law to determine if they are required to file taxes. Another commenter asserted that even if an asylum seeker determined that he or she was not required to file, it would be difficult prove in court due to employment in the informal economy. The commenter also noted that in seeking to comply with the proposed rule, asylum seekers may turn to, and be defrauded by, notarios.

One commenter asserted that, contrary to the NPRM's reasoning, consideration of this factor would require more adjudicative time. Specifically, the commenter asserted that longer asylum interviews and hearings would be required to determine whether an asylum seeker was required to file taxes.

Commenters further asserted that immigration judges are not qualified to make determinations as to whether an individual is required to file taxes and that by granting them such power the proposed rule would infringe upon the province of the Department of the Treasury. Commenters asserted that the proposed rule would open the DOJ to numerous and costly lawsuits under the APA where plaintiffs would allege that an immigration judge's misapplication of the tax code led to denials of asylum applications. Moreover, commenters argued that such lawsuits would ''effectively bankrupt'' the United States.

Commenters asserted that the proposed provisions relating to tax violations would violate the U.S. Constitution in two ways. First, commenters argued that the proposed provisions conflict with the Eighth Amendment's proscription against cruel and unusual punishment. Specifically, commenters asserted that if an applicant presents a meritorious claim, it would be cruel and unusual punishment to consider the ''minor civil error'' of not filing taxes on time a ''strict liability offense'' that completely bars the applicant from asylum protection. Second, commenters argued that the proposed regulation would violate the Equal Protection Clause because the proposed rule would create harsher penalties for asylum seekers who do not file than for citizens and LPRs. Specifically, commenters asserted that by barring individuals from eligibility for asylum protection, the proposed rule would create harsher penalties for asylum seekers for tax non-compliance than for citizens and LPRs who would not face such severe consequences.

Commenters also asserted that many asylum seekers would not be able to comply with the proposed tax provisions due to USCIS's rules pertaining to Employment Authorization Documents (''EAD''). Commenters asserted that under the EAD rules, it is not possible for asylum seekers to receive a social security number (''SSN'') prior to obtaining an EAD. One commenter asserted that the IRS website is unclear on whether asylum seekers without EADs would be eligible to receive Individual Taxpayer Identification Numbers (''ITIN''). The commenter asserted that even if an asylum seeker is eligible for an SSN or an ITIN, it could still be difficult for the applicant to obtain the identity documents needed to apply for an SSN or an ITIN from his or her home country.

Response: In general, the comments on this provision suggest either that aliens seeking asylum should be excused from filing Federal, state, or local income tax returns or that the Departments should ignore clear violations of law when aliens fail to do so. Neither suggestion is well-taken by the Departments, as either countenancing or ignoring violations of the law is inconsistent with each's mission. Moreover, the comments fail to acknowledge clear case law that income tax violations are a significant adverse discretionary factor in the immigration adjudication context. *See, e.g., Matter of A–H–,* 23 I&N Dec. 774, 782–83 (A.G. 2005) (noting that tax violations ''weigh against asylum'' because they exhibit ''disrespect for the rule of law''); *cf. In re Jean Gilmert Leal,* 2014 WL 4966499, *2 (BIA Sept. 9, 2014) (noting in the context of an application for adjustment of status that it is ''well settled'' that ''failure [to file tax returns] is a negative discretionary factor because it reflects poorly on the applicant's respect for the rule of law and his sense of obligation to his community'').

The Departments also note that consideration of tax returns filed by aliens are already enshrined in multiple places in immigration law. *See, e.g.,* 8 CFR 210.3(c)(3) (alien applicant for legalization program may establish proof of employment through, inter alia, Federal or state income tax returns); *id.* 214.2(a)(4) (alien dependents of certain visa holders who obtain employment authorization ''are responsible for payment of all Federal, state and local income, employment and related taxes and Social Security contributions on any remuneration received''); *id.* 214.2(5)(ii)(E) (restricting employment eligibility for certain visa dependents when the proposed employment is contrary to the interest of the United States, defined as, inter alia, employment of visa holders or dependents ''who cannot establish that they have paid taxes and social security on income from current or previous United States employment''); *id.* 214.2(g)(4), (5)(ii)(E) (same, but for a different visa category); *id.* 244.9(a)(2)(i), 1244.9(a)(2)(i) (income tax returns may serve as proof of residence for purposes of an application for Temporary Protected Status (''TPS'')); *id.* 1244.20(f)(1) (adjudicator may require proof of filing an income tax return before granting a fee waiver for a TPS application); *id.* 1245.13(e)(3)(iii)(E) (alien applicant for adjustment of status may establish proof of physical presence in the United States through, inter alia, income tax records). To the extent that commenters raised concerns about an alien's ability to navigate existing tax systems in the United States—a question that is beyond

[66] *See R–S–C–* v. *Sessions,* 869 F.3d 1176, 1188 n.11 (10th Cir. 2017) (explaining that ''the Refugee Convention's non-refoulement principle—which prohibits the deportation of aliens to countries where the alien will experience persecution—is given full effect by the Attorney General's withholding-only rule''); *Cazun* v. *Att'y Gen. U.S.,* 856 F.3d 249, 257 & n.16 (3d Cir. 2017) (similar); *Ramirez-Mejia* v. *Lynch,* 813 F.3d 240, 241 (5th Cir. 2016) (similar); *Maldonado,* 786 F.3d at 1162 (explaining that Article 3 of the CAT, which sets out the non-refoulement obligations of parties, was implemented in the United States by the FARRA and its implementing regulations). For further discussion on international law principles as they relate to this rulemaking, see section II.C.6.8 *infra.*

the scope of this rule—they neither acknowledged the many existing provisions linking aliens, benefits, and income tax returns nor persuasively explained why adherence to tax laws is an inappropriate discretionary factor to consider in the context of the rule.

The Departments disagree with commenters regarding the relation of tax violations to the statutory discretionary analysis. As the proposed rule explained, the Departments see no concern with treating an asylum applicant's failure to file tax forms, when required by law, as a negative factor in an asylum adjudication when all other individuals required to file tax returns in the United States are subject to negative consequences for failure to file required tax forms. *See* 85 FR at 36284. The Departments believe that adherence to U.S. tax law is applicable to a favorable exercise of discretion, and this factor evaluates such adherence as part of an adjudicator's discretionary analysis.

The Departments find commenters' concerns associated with working in the ''informal economy'' to be unpersuasive. Aside from the fact that working without authorization is unlawful, the Departments emphasize the potential dangers of working without authorization, including exploitation, and, thus, strongly discourage aliens from doing so. Although not the purpose of this regulation, if the rule deters aliens from working without authorization, then the Departments find that to be a positive unintended consequence. Further, to the extent that commenters assert this rule will have negative consequences on aliens who are violating the law—either by working without authorization or by failing to file tax returns—the Departments find continuing illegal activity to be an insufficiently persuasive basis to alter the rule.

To the extent that commenters are opposed to the EAD regulations or expressed concern in regard to notario fraud, such concerns are outside the scope of this rulemaking. Moreover, aliens who require an EAD but do not possess one should not be engaged in employment, and aliens who have not engaged in employment will—unless they have another source of taxable income—generally not be required to file income tax returns that are the subject of the rule. Further, the Departments recognize that notario fraud exists, but it exists independently of the rule and has existed for many years. To the extent that notario fraud exists in tax preparation services, again, that fraud exists outside of this rule and flows from long-standing state and Federal tax obligations, not any provision proposed in the rule. To the extent that commenters oppose this portion of the rule because they believe it will lead aliens to engage in unlawful behavior (*i.e.,* working without an EAD), the Departments note that nothing in the rule requires any individual to engage in unlawful behavior. Similarly, to the extent that commenters oppose the rule because they believe it will cause aliens to fulfill an existing legal obligation (*i.e.,* filing income tax returns) by utilizing individuals who themselves may engage in unlawful behavior (*i.e.,* notarios), the Departments also note that nothing in the rule requires aliens to hire individuals who engage in illegal behavior. Further, even if aliens turn to notarios to prepare and file tax returns, they would do so not in response to the rule, but in response to the myriad laws documented above that already incentivize or require aliens to file income tax returns. Moreover, under *Matter of A–H–,* 23 I&N at 782–83, immigration judges may already consider tax violations as a significantly adverse factor, and commenters point to no evidence of their predicted dire consequences from that decision. The Departments therefore believe any such speculative harm is outweighed by the policy benefits of codifying this factor by rule and providing clear guidance to adjudicators about how to weigh this factor when exercising discretion to grant or deny asylum. In short, commenters' concerns minimize personal responsibility and agency, are outside the scope of the rulemaking, and are outweighed by the policy benefits of the rule.

Commenters' concerns about tax law are similarly outside the scope of this rulemaking. Everyone, U.S. citizens and non-citizens alike, are required to comply with the tax laws. *See* 85 FR at 36284 (citing 26 U.S.C. 6012, 7701(b); 26 CFR 1.6012–1(a)(1)(ii), (b)). This rule does not change tax law, which, as relevant to this rulemaking, requires certain aliens to file tax forms without regard to their primary language or the complexity of the tax code. Nevertheless, the IRS has assistance available in multiple languages, *see* Internal Revenue Serv., *Help Available at IRS.gov in Different Languages and Formats* (last updated Apr. 3, 2020), *https://www.irs.gov/newsroom/help-available-at-irsgov-in-different-languages-and-formats,* and there are numerous legitimate agencies, clinics, and nonprofits that can also be solicited for assistance with tax law compliance, *see, e.g.,* Internal Revenue Serv., *Free Tax Return Preparation for Qualifying Taxpayers* (last updated Nov. 9, 2020), *https://www.irs.gov/individuals/free-tax-return-preparation-for-qualifying-taxpayers* (discussing the IRS's Volunteer Income Tax Assistance (''VITA'') program); *see also* Internal Revenue Serv., *IRS Publication 3676–B, https://www.irs.gov/pub/irs-pdf/p3676bsp.pdf* (explaining the types of tax returns prepared under the VITA program). This rule requires consideration of an asylum applicant's compliance with tax laws as part of the adjudicator's discretionary analysis and merely provides direction to adjudicators regarding how to assess, as a discretionary factor, an alien's failure to adhere to the law. It does not substantively change tax law in any way.

The Departments disagree with commenters' concerns that evaluating this factor will require more adjudicative time. As discussed above, consideration of a failure to file income tax returns is already an adverse factor for purposes of asylum adjudications. *See Matter of A–H–,* 23 I&N at 783. Thus, its further codification in applicable regulations will not appreciably require additional adjudicatory time. Further, even if it did, the benefit of clarity and guidance provided by this rule to the discretionary analysis outweighs any minimal, additional adjudicatory time.

The Departments are confident that asylum officers and immigration judges possess the competence and professionalism necessary to timely interpret and apply the relevant regulations and statutes when considering this factor. *See* 8 CFR 1003.10(b) (''immigration judges shall exercise their independent judgment and discretion''). Immigration judges have undergone extensive training; further, immigration judges already interpret and apply complex criminal law as it affects an alien's immigration status. In light of this, the Departments disagree with commenters who claim that immigration judges are not qualified to make determinations based on this factor. Relatedly, the Department declines to address commenters' speculative assertions that misapplication of the tax code by immigration judges will open up the Departments to litigation, which will, in turn, bankrupt the Departments. As discussed, *supra,* the Departments have already been considering the failure to file income tax returns as a discretionary factor for many years, and such considerations have not led to the dire consequences predicted by commenters.

Likewise, the Departments disagree that this factor improperly infringes on the purview of the Treasury Department. This factor evaluates the tax status of aliens only as it applies to their immigration status, which is clearly within the jurisdiction of the Departments. 8 CFR 208.2, 208.9(a), 1208.2, 1003.10(b). This factor does not determine tax-related responsibilities or consequences for such aliens.

Commenters misapply the Eighth Amendment's protection against cruel and unusual punishment. The Eighth Amendment applies in the context of criminal punishments, protecting against disproportional punishments as they relate to the offense. *See Roper* v. *Simmons,* 543 U.S. 551, 560 (2005) (''[T]he Eighth Amendment guarantees individuals the right not to be subjected to excessive sanctions. The right flows from the basic precept of justice that punishment for crime should be graduated and proportioned to the offense.'' (cleaned up)).

Denial of an asylum application, however, is not a criminal punishment. As an initial matter, immigration proceedings are civil in nature. *See INS* v. *Lopez-Mendoza,* 468 U.S. 1032, 1038–39 (1984) (''A deportation proceeding is a purely civil action[.]''). Courts have held the Eighth Amendment inapplicable to deportation because, as a civil proceeding, it is not a criminal punishment. *See Sunday* v. *Att'y Gen. U.S.,* 832 F.3d 211, 219 n.8 (3d Cir. 2016) (collecting cases); *Elia* v. *Gonzales,* 431 F.3d 268, 276 (6th Cir. 2005); *Bassett* v. *U.S. Immigration and Naturalization Serv.,* 581 F.2d 1385, 1387–88 (10th Cir. 1978); *cf. Lopez-Mendoza,* 468 U.S. at 1038–39. The underlying principle of these cases is that the power to exclude aliens through deportation constitutes an ''exercise of the sovereign's power to determine the conditions upon which an alien may reside in this country,'' rather than an exercise of penal power. *Trop* v. *Dulles,* 356 U.S. 86, 98, 101 (1958) (holding that Congress cannot strip citizenship as a punishment under the Eighth Amendment, but distinguishing denaturalization of a citizen from deportation of an alien); *see also Fong Yue Ting* v. *United States,* 149 U.S. 698, 705 (1893) (noting that the power to exclude aliens is an inherent function of sovereignty).

Accordingly, denial of asylum, regardless of the reasoning underlying such denial, cannot be construed as a criminal punishment subject to the Eighth Amendment because it is adjudicated in a civil proceeding as a form of discretionary relief. Further, this factor is not a ''strict liability offense,'' as asserted by the commenters, because it is only a factor to consider as part of the discretionary component of asylum eligibility under the Act. INA 208(b)(1)(A), 8 U.S.C. 1158(b)(1)(A); *see* 85 FR at 36283.

Commenters also misapply the Equal Protection Clause. This rule applies to all aliens and does not impose any classifications that would trigger heightened scrutiny under the clause. Thus, this factor does not offend principles of equal protection under the Constitution.

Finally, to the extent that commenters are concerned certain aliens may have difficulties meetings their tax obligations due to DHS's EAD rules, the Departments again note that these discretionary factors are not bars to eligibility. The Departments note, however, that asylum seekers who lack an EAD should generally not have a tax liability as they are prohibited from engaging in employment. Any other comments regarding specific IRS requirements for the issuance of SSNs or ITINs are outside the scope of this rule.

4.7.9. Two or More Prior Asylum Applications Denied for Any Reason

Comment: One commenter noted that there are many reasons that an asylum applicant may have had two or more prior asylum applications denied, including ineffective assistance of counsel, mental disability that prevented the applicant from properly articulating the claim, and pursuing the claim pro se. The commenter asserted that it would be inappropriate in such circumstances to deny future bona fide asylum applications.

One commenter asserted that it was inappropriate to include the proposed provision concerning denial of two or more asylum applications as a factor in discretionary determinations. Instead, the commenter argued, the presence of such a factor should be considered on a case-by-case basis and together with all of the circumstances.

Response: This factor, like the other factors, is considered under the totality of the circumstances. Further, it is not a bar to asylum; it is one of various factors that adjudicators should consider in determining whether an application merits a favorable exercise of discretion.

The Departments reiterate that consideration of this factor, as well as the other factors, does not affect the adjudicator's ability to consider whether extraordinary circumstances exist or whether denial of asylum would result in exceptional and extremely unusual hardship to the alien. 85 FR at 36285; 8 CFR 208.13(d)(2)(ii), 1208.13(d)(2)(ii). Accordingly, an adjudicator may consider the circumstances referenced by the commenter—ineffective assistance of counsel, mental disability, lack of counsel—and determine whether they constitute extraordinary circumstances. Further, the Departments reiterate that such aliens may still apply for other forms of relief, such as non-discretionary withholding of removal and protection under the CAT.

4.7.10. Withdrawn a Prior Asylum Application With Prejudice or Been Found To Have Abandoned a Prior Asylum Application

Comment: One commenter asserted that the proposed provisions concerning withdrawn and abandoned asylum applications are in conflict with a true discretionary determination. Specifically, the commenter asserted that discretionary determinations require consideration of the factor in light of the totality of circumstances, as opposed to the proposed ''strict liability'' standard.

Commenters asserted that, contrary to the NPRM's reasoning, there could be many valid reasons that an applicant would choose to withdraw or abandon an asylum application. One commenter noted that pursuing a family-based visa or Special Immigrant Juvenile (''SIJ'') status are two such examples. Another commenter noted that asylum seekers could be forced to abandon applications for reasons beyond their control, including a failure by the government to inform the asylum seeker of a court date, governmental notice that did not correctly state the time and place of a hearing, or a proceeding occurring in a language a respondent did not understand. Another commenter asserted that MPP has caused some asylum seekers at the southern border to abandon their applications. Specifically, the commenter asserted that some asylum seekers who had been returned to Mexico under MPP were subsequently kidnapped, which caused them to miss their hearings. The commenter asserted that immigration judges have been instructed to enter an order of removal in such instances, even when the judge has serious concerns that the asylum seeker did not appear as a result of kidnapping or violence.

One commenter acknowledged the existence of notarios and other bad actors who seek to abuse the asylum system by filing asylum applications without their clients' knowledge or consent and by engaging in ''ten year visa'' schemes. Rather than addressing abuse, the commenter argued that the proposed regulation would punish asylum seekers who have been victims

of such fraud because it could result in future applications being rejected on discretionary grounds.

One commenter asserted that asylum offices have ''piloted projects'' encouraging representatives to waive the asylum interview and have the matter referred directly to an immigration court. The commenter asserted that applicants may have relied on such action by asylum offices to assume the government did not have an objection to filing an asylum application for the purpose of being placed in removal proceedings. The commenter asserted that ICE should initiate removal proceedings in such situations if the individual has ''compelling reasons'' to pursue cancellation of removal.

Response: The Departments reiterate that this factor, along with all the other factors, is considered as part of the discretionary analysis. The rule does not propose a ''strict liability standard,'' as alleged by commenters, and this factor's presence does not bar asylum. The NPRM stated clearly that ''[i]f the adjudicator determines that any of these nine circumstances apply during the course of the discretionary review, the adjudicator may nevertheless favorably exercise discretion in extraordinary circumstances, such as those involving national security or foreign policy considerations, or if the alien demonstrates, by clear and convincing evidence, that the denial of asylum would result in an exceptional and extremely unusual hardship to the alien.'' *See* 85 FR at 36283–84. Accordingly, while the presence of this factor constitutes an adverse factor, adjudicators will consider extraordinary circumstances or exceptional and extremely unusual hardship—of which commenters referenced numerous examples—that may have led an applicant to withdraw or abandon a prior application.

This rule does not ''punish'' asylum seekers for the conduct of their attorneys. Although the actions of an attorney may bind an alien absent egregious circumstances, *Matter of Velasquez,* 19 I&N at 377, nothing in the rule prohibits an alien from either alleging such circumstances to avoid the withdrawal or raising a claim of ineffective assistance of counsel.[67] If an alien has concerns about the conduct of his or her representative, the alien should file an ineffective assistance of counsel claim or immigration fraud claim. *See, e.g., Sow* v. *U.S. Att'y Gen.,* 949 F.3d 1312, 1318–19 (11th Cir. 2020) (ineffective assistance of counsel); *see also Viridiana* v. *Holder,* 646 F.3d 1230, 1238–39 (9th Cir. 2011) (distinguishing between an ineffective assistance of counsel claim and immigration consultant fraud and explaining that fraud by an immigration consultant may constitute an extraordinary circumstance). Overall, however, concerns about the impact of unscrupulous attorneys are largely speculative and remain capable of appropriate redress. Thus, the Departments decline to preemptively attempt to resolve speculative or hypothetical concerns.

Further, should unusual circumstances warrant, applicants may present evidence so that adjudicators may consider whether it constitutes an extraordinary circumstance or exceptional and extremely unusual hardship, as previously described. *Viridiana,* 646 F.3d at 1238–39. Accordingly, the Departments disagree that consideration of this factor punishes asylum seekers who are victims of fraud.

Finally, regarding commenters' notation that asylum seekers may have relied on previous USCIS pilot programs to assume the government did not have an objection to filing an asylum application for the purpose of being placed in removal proceedings, the Departments disagree that it would ever have been appropriate or authorized to file an asylum application without an actual fear of persecution or torture and an intent to seek such relief or protection. Indeed, the I–589 form itself requires the alien's attestation as to the truth of the information provided and an acknowledgement of the consequences of filing a frivolous application.

4.7.11. Failed To Attend an Interview Regarding His or Her Asylum Application

Comment: Commenters asserted that the proposed provision concerning failure to attend an interview regarding his or her asylum application is unfair, and that presence of the proposed factor should be one factor considered in context with the totality of the circumstances.

Commenters asserted that the proposed ''extraordinary circumstances'' exception is unfair because it would not recognize valid explanations that, as one commenter noted, do meet the current ''good cause'' standard. For example, one commenter asserted that valid exceptions that may not rise to the level of extraordinary circumstances include lack of child care on the day of the interview, issues with public transportation, medical issues, or an interpreter cancelling at the last minute. One commenter asserted that the NPRM does not clarify what explanations would rise to the level of extraordinary circumstances.

One commenter asserted that the proposed regulation would increase the court backlog and that USCIS factors in the possibility that applicants may not appear for interviews to ensure that no interview slot is wasted. Specifically, the commenter asserted that under current USCIS policy, USCIS will typically wait 46 days before turning over a case to an immigration court, so as to give the applicant time to establish good cause and reschedule a missed interview. By not giving USCIS such flexibility, the commenter argued, more cases would be referred to the immigration courts, thereby increasing the backlog.

One commenter expressed concern with the proposed exception regarding the mailing of notices. The commenter argued that it is unfair to require applicants to prove that the government sent the notice to the correct address. The commenter also asserted that it is important for USCIS to send the notice to both the applicant and the applicant's representative. By just sending the notice to a representative, the commenter argued, a representative who had a falling out with his or her client (as a result of, the commenter highlighted, ineffective assistance of counsel or dispute over payment) may not inform the applicant of an upcoming interview, which could cause the applicant to miss the interview. The commenter noted that in the current COVID–19 environment, a representative may not be able to go to the office to receive mail in a timely fashion, which means that some applicants may not learn of the interview until it is too late. Conversely, the commenter argued, sending the notice only to applicants could lead to missed interviews because applicants who do not understand English may disregard the notice due to a misunderstanding of its importance.

Response: This factor is not an absolute bar to asylum; instead, this factor is considered as part of the

[67] An alien may also file a claim with DOJ's Fraud and Abuse Prevention Program (Program), which investigates complaints of fraud, scams, and unauthorized practitioners and addresses these issues within EOIR. *See* EOIR, *Fraud and Abuse Prevention Program* (last updated Mar. 4, 2020), *https://www.justice.gov/eoir/*fraud-and-abuse-prevention-program. The Program also supports investigations into fraud and unauthorized practice, prosecutions, and disciplinary proceedings initiated by local, state, and Federal law enforcement and disciplinary authorities. *Id.* From the efforts of this Program, and others, the Departments seek to ensure that aliens in proceedings before them are not victims to unscrupulous behavior by their representatives.

adjudicator's discretionary analysis. The proposed rule clearly stated that presence of this factor constitutes an adverse factor, 85 FR at 36283, not an asylum bar. Further, the alien may argue that (1) exceptional circumstances prevented the alien from attending the interview or (2) the interview notice was not mailed to the last address provided by the alien or the alien's representative and that neither received notice of the interview. *See* 8 CFR 208.13(d)(2)(i)(H)(1)–(2), 1208.13(d)(2)(i)(H)(1)–(2) (proposed). Such exceptions are evidence that this factor does not constitute a bar to asylum.

The exceptions provided in proposed 8 CFR 208.13(d)(2)(i)(H)(1), 1208.13(d)(2)(i)(H)(1) broadly allow for ''exceptional circumstances.'' If the rule identified exact circumstances sufficient to negate this factor—departing the United States or withdrawing the application for another reason, as suggested by the commenter—it would unnecessarily limit aliens to a narrow set of permissible reasons for why an alien might have missed an interview. The Departments recognize that a number of reasons may cause an alien's absence at an interview, including unanticipated circumstances by the Departments, and the broad language allows for such possibility. Contrary to the commenter's allegations, the Departments included language specifically referencing failure to receive the notice. *See* 8 CFR 208.13(d)(2)(i)(H)(2), 1208.13(d)(2)(i)(H)(2) (proposed).

This factor is not arbitrary or unfair. The current administrative process required after an alien misses an interview demonstrates the necessity of this factor's inclusion in a discretionary analysis. While asylum officers may currently follow a process for missed interviews, as commenters described, missed interviews increase overall inefficiencies because a case does not timely progress as the Departments intend. Commenters' reasoning that the rule increases inefficiencies at the hearing stage in place of rescheduling the interview in the first instance is nonsensical. If a missed interview is rescheduled, the case is prolonged at the outset, thereby increasing overall time to adjudicate the application. Moreover, the application may still be adjudicated in a hearing at a later date, adding even more time overall for adjudication. If a missed interview triggers scheduling of a hearing, as outlined in this rule, the case efficiently proceeds to the hearing stage where an adjudicator will balance all factors, including the missed interview, in a discretionary analysis. At bottom, the rule encourages aliens to attend their interviews after filing an asylum application, which increases the likelihood of being granted asylum and, thus, reduces the likelihood of cases being referred to an immigration judge. Accordingly, the Departments disagree that this factor is arbitrary or unfair or would increase the backlog. Rather, the current system allows aliens to prolong adjudication of their applications at the expense of slowing the entire system, such that other aliens fail to receive timely adjudication of their applications. The Departments believe this current system is unfair and seek to resolve these inefficiencies through this rulemaking.

As commenters aptly pointed out, these cases may involve significant issues that must be determined and further explored in an interview. The interview is a vital step in adjudication of an asylum application. *See* DHS, *Establishing Good Cause or Exceptional Circumstances* (last updated Aug. 25, 2020), *https://www.uscis.gov/humanitarian/refugees-and-asylum/asylum/*establishing-good-cause-or-exceptional-circumstances (''You must attend your scheduled asylum interview or the asylum office will treat your case as a missed interview (failure to appear).''). Other regulatory provisions already attest to the importance of this interview through imposition of blunt consequences. *See, e.g.,* 8 CFR 208.7(a)(iv)(D), 1208.7(a)(4) (providing that an alien will be denied an EAD upon failure to appear for an interview, absent extraordinary circumstances); *see also* 8 CFR 208.10(b)(1), 1208.10 (providing that failure to attend an interview may result in ''dismissal of the application''). In addition, aliens who are inadmissible or deportable and fail to attend their interview risk being deemed to have waived their right to an interview, the dismissal of their application, and being placed in removal proceedings where they may ultimately be ordered removed by an immigration judge. 8 CFR 208.14(c)(1). The NPRM's consideration of this factor further reflects the urgency and importance of attending such interviews but for the most exceptional reasons. For that reason, and not, as commenters alleged, to punish asylum seekers, the Departments include it as a factor for consideration.

Commenters' concerns about problems that may arise between an alien and his or her representative are speculative. Regardless of the rulemaking, such concerns are not without redress: an alien could file an ineffective assistance of counsel claim, *see, e.g., Sow,* 949 F.3d at 1318–19, or an alien could claim that immigration consultant fraud (or the like) is an extraordinary circumstances, *see Viridiana,* 646 F.3d at 1238–39.

Commenters' concerns about aliens providing a correct address to the Departments are also beyond the scope of this rulemaking. Aliens are already required to notify DHS of changes of address, INA 265, 8 U.S.C. 1305, and may face criminal, INA 266(b), 8 U.S.C. 1306(b), or civil, INA 237(a)(3)(A), 8 U.S.C. 1227(a)(3)(A), repercussions for not doing so. The rule does not alter the long-standing requirement that aliens notify the Government of their current address.

This exception employs a lower standard of preponderance of the evidence. Meeting such burden varies depending on the case; therefore, the Departments decline to expand on the exact method of proof or documents necessary to meet that burden.

4.7.12. Subject to a Final Order of Removal, Deportation, or Exclusion and Did Not File a Motion To Reopen To Seek Asylum Based on Changed Country Conditions Within One Year of the Changes in Country Conditions

Comment: Commenters expressed concern that the proposed discretionary factor pertaining to failure to file a motion to reopen after a final order had been entered and within one year since changed country conditions emerged would lead to the denial of most asylum applications. As with other proposed discretionary factors, commenters asserted that the proposed rule was not creating a true discretionary determination as a result of the weight given to the presence of this proposed factor. One commenter asserted that by giving this and other proposed factors significant negative weight, the Departments would be inappropriately deviating from *Matter of Pula,* which, the commenter argued, is well-established precedent. Commenters asserted that the proposed discretionary factor should be considered on a case-by-case basis and in context with all the circumstances.

One commenter asserted that the proposed factor is ultra vires and conflicts with congressional intent because it ''directly contradicts'' section 240(c)(7)(C)(ii) of the Act, 8 U.S.C. 1229a(c)(7)(C)(ii), which states circumstances for which there are no time limits for filing a motion to reopen. The commenter argued that the one case cited by the NPRM in support of the proposed provision, *Wang* v. *BIA,* 508 F.3d 710, 715–16 (2d Cir. 2007), concerned a different provision of the INA. Specifically, the commenter

asserted that the asylum seeker in *Wang* was subject to a 90-day limit on filing a motion to reopen and was arguing for equitable tolling in light of ineffective assistance of counsel. The commenter thus argued it is ''irrational'' for the government to use the case to justify the regulation.

Another commenter expressed opposition to the rule because it presumes that the exact date of a country condition change can be precisely determined, which in turn presumes that country conditions ''turn on a dime.'' Because, the commenter alleged, the NPRM did not provide guidance on determining when a change exactly occurs, the commenter predicted ''protracted disputes'' over when a change occurs, which would be ''antithetical to judicial economy.'' One commenter expressed disagreement with the NPRM's reasoning that the proposed provision would increase ''efficiency in processing.'' Specifically, the commenter asserted that the NPRM failed to explain why adjudicating a motion to reopen filed 13 months after the presence of changed country conditions would be less efficient than adjudicating a similar motion filed 11 months after the change.

Response: This factor, like all other factors discussed herein, is part of the adjudicator's discretionary analysis. 85 FR at 36285. This factor's presence does not bar asylum; an alien who files a motion to reopen based on changed country conditions more than one year following such changed conditions may still show that extraordinary circumstances exist or that denial of asylum would result in an exceptional and extremely unusual hardship to the alien. 8 CFR 208.13(d)(2)(ii), 1208.13(d)(2)(ii) (proposed). Accordingly, applications are indeed considered on a case-by-case basis, and concerns that this factor would result in denial of most asylum applications is speculative.

Further, commenters did not engage the Departments' animating thrust behind this provision—to discourage dilatory claims, encourage the timely adjudication of new claims, and improve overall efficiency. Those benefits far outweigh any alleged concerns raised by commenters, especially since the presence of ''changed country conditions'' is a clear statutory basis for filing a motion to reopen. INA 240(c)(7)(C)(ii), 8 U.S.C. 1229a(c)(7)(C)(ii). Both the Departments and aliens have a clear interest in raising and adjudicating claims for asylum in a timely fashion. To that end, there is nothing unreasonable or inappropriate about considering a lengthy delay in raising a claim as an adverse discretionary factor because such delays undermine the efficiency of the overall system and may, as a secondary effect, delay consideration of other meritorious claims.

Consideration of this factor does not impermissibly deviate from *Matter of Pula.* As explicitly stated in the NPRM, the rule's approach supersedes *Matter of Pula.* 85 FR at 36285. Because ''[a]gencies are free to change their existing policies as long as they provide a reasoned explanation for the change,'' *Encino Motorcars, LLC,* 136 S. Ct. at 2125, the Departments permissibly superseded *Matter of Pula's* approach. See Section II.C.4.7 of this preamble for further discussion regarding the permissibility of superseding that case.

This factor also aligns with the statute. As commenters correctly stated, section 240(c)(7)(C)(ii) of the Act, 8 U.S.C. 1229a(c)(7)(C)(ii), provides ''there is no time limit'' to file a motion to reopen to apply for relief under section 208 of the Act, 8 U.S.C. 1158, or section 241(b)(3) of the Act, 8 U.S.C. 1231(b)(3), based on changed country conditions. The rule does not institute a time limit in contravention of the statute.

Nor was the Departments' reference to *Wang,* 508 F.3d at 715–16, irrational. That case demonstrated the importance of aliens exercising due diligence in their cases. The citation was not meant to illustrate an identical fact pattern justifying the entire regulation, as one commenter alleged.

Although the Departments acknowledge it may be difficult to ascertain the precise date on which country conditions changed, the Departments also do not believe that ascertaining one specific day is necessarily required in most cases or that an inability to ascertain the precise date undermines the rule's efficacy. Even if country circumstances do not ''change on a dime'' and adjudicators can project only a range of dates, many cases would fall clearly inside or outside the one-year window. For example, if evidence showed that country conditions changed over a three-month period and the applicant filed two years outside the period, an adjudicator would be able to find this adverse factor notwithstanding difficulty in ascertaining a single day on which country conditions changed. In the Departments' view, the one-year window provides ample time for aliens to file a claim. And, in any event, the Departments doubt that it will be so difficult to ascertain a precise date in many cases. When a discrete event—*e.g.,* a ceasefire in a civil war—changes a country's conditions, determining a precise date will be straightforward. Accordingly, the rule would not produce ''protracted disputes'' about the date country conditions changed.

Moreover, commenters did not plausibly or persuasively explain why an alien with a genuine well-founded fear of persecution would delay in filing an asylum application for a significant length of time, and it strains credulity that such an alien would wait more than a year to seek asylum, absent some extraordinary circumstance. The rule requires that the alien exercise due diligence with regard to the case. 85 FR at 36285. If, for some reason, the alien is unable to meet that one-year deadline for reasons related to commenters' concerns that pinpointing the exact date a country condition changed will be problematic, an alien may present such an event as an extraordinary circumstance in accordance with the rule. *See id.*

The Departments have a significant interest in expedient, efficient adjudication of asylum cases. *See Talamantes-Penalver* v. *INS,* 51 F.3d 133, 137 (8th Cir. 1995) (''Enforcement of this nation's immigration laws is enhanced by the speedy adjudication of cases and the prompt deportation of offenders.''). Establishing this factor strongly encourages and underscores the importance of expedient resolution of asylum cases; however, the Departments note that expediency and efficiency do not trump extraordinary circumstances that may exist or exceptional or extremely unusual hardship that may result if asylum is denied.

The Departments have determined that the appropriate timeframe within which an alien should be able to file a motion to reopen based on changed country conditions is one year from a changed country condition. Currently, the regulation at 8 CFR 1208.4(a)(4)(ii) provides that an alien should file an asylum application

> within a reasonable period, given those ''changed circumstances.'' If the applicant can establish that he or she did not did not become aware of the changed circumstances until after they occurred, such delayed awareness shall be taken into account in determining what constitutes a ''reasonable period.''

Case law broadly applies this ''reasonable period'' standard. *See Pradhan* v. *Holder,* 352 F. App'x. 205, 207 (9th Cir. 2009) (explaining that, based on the record, the immigration judge properly denied an asylum application filed 11 months after the applicant learned of changed country conditions and his family kept him apprised of the political climate in the country); *cf. Ljucovic* v. *Barr,* 796 F.

App'x. 898, 899 (6th Cir. 2020) (dismissing for lack of jurisdiction a petition challenging the BIA's denial of a motion to reopen asylum proceedings four years following awareness of a changed condition because the petitioner did not exercise due diligence and file within a reasonable period of time). This factor would be no more difficult to apply than 8 CFR 1208.4's ''reasonable period'' standard, and, for purposes of the discretionary analysis, this rule determines that a reasonable period of time is one year within the date of the changed country condition. Further, just as 8 CFR 1208.4 allows adjudicators to consider ''delayed awareness'' in evaluating ''what constitutes a reasonable period'' when determining whether an alien may apply for asylum, this factor similarly allows adjudicators to consider whether extraordinary circumstances or exceptional or extremely unusual hardship would arise when determining whether to exercise discretion to grant or deny asylum.

Because Congress determined it reasonable for aliens to file an initial application within one year of arrival, INA 208(a)(2)(B), 8 U.S.C. 1158(a)(2)(B), the Departments similarly find it reasonable to use a one-year timeline, rather than 11 months or 13 months as suggested by commenters, in evaluating this factor as part of a larger discretionary analysis, subject to the exceptions previously described. The Departments recognize that any specific deadline is inherently both over- and under-inclusive to some extent, but the benefits of a clear deadline that is both familiar to applicants and adjudicators and straightforward to administer outweigh any purported benefits attributable to an unfamiliar and uncommon deadline—*e.g.,* 13 months—or one that is more difficult to apply—*e.g.,* a ''reasonable period''—particularly in the context of a discretionary analysis.

4.8. Firm Resettlement

Comment: Commenters asserted that the proposed firm resettlement provisions conflict with international law. Commenters stated that Congress considered the language in section 208(b)(A)(vi) of the Act, 8 U.S.C. 1158(b)(A)(vi), to be equivalent to Article 1E of the Refugee Convention, which only considered refugees to be resettled when they permanently took up residence in a third country or were afforded rights comparable to third country nationals. One commenter stated that the permanent residency requirement is further evidenced in the 1950 amendments of the Displaced Persons Act. *See* An Act to Amend the Displaced Persons Act of 1948, Public Law 81–555, 64 Stat. 219 (1950). The commenter asserted that the amendments were designed to ensure that those who temporarily resided in parts of Europe following their flight from Nazi persecution would remain eligible for protection in the United States. Under the proposed rules, the commenter argued, these same individuals would be inappropriately barred from asylum.

Commenters expressed concern that, under proposed 8 CFR 208.15(a)(1), individuals unaware of third country resettlement laws in countries through which they fleetingly passed could be punished and that those attempting to firmly resettle in a third country could face a number of challenges incompatible with the congressional intent of the concept of firm resettlement. Commenters argued, for example, that those attempting to firmly resettle could face restrictions on freedom of movement, unfair immigration procedures, government corruption, violence, and the practical inability to obtain legally guaranteed documents permitting asylees the right to live and work in the country while an application is pending. Commenters similarly asserted that, contrary to the NPRM's reasoning, the number of resettlement opportunities has not grown in recent years, and that considering whether a third country is a signatory to the Refugee Convention is not sufficient to determine whether firm resettlement is possible. A firm resettlement inquiry, commenters argued, requires a case-by-case consideration of the facts and circumstances.

Commenters asserted that proposed 8 CFR 208.15(a)(1) would replace a clear standard that is well-established in Federal case law and international law with an ambiguous standard that would require adjudicators to speculate in regard to what applicants could have done in third countries through which they transited. Accordingly, commenters argued, the proposed provision would result in lengthy litigation. One commenter asserted that the proposed provision is not legally defensible, as evidenced by the recent transit bar litigation invalidating a similar provision.

Commenters also stated opposition to proposed 8 CFR 208.15(a)(2). Commenters expressed concern that the proposed one-year bar would apply even if there is no possibility of ever obtaining a permanent or indefinitely renewable status in the country. Commenters also asserted that the proposed provision would inappropriately exclude most asylum seekers who were returned to Mexico under MPP because MPP often requires aliens to wait in Mexico for more than a year. Another commenter stated that UNHCR estimates that approximately 16 million refugees have spent five years in countries where they could not be considered firmly resettled and that they would be inappropriately barred from asylum under the proposed provision. Commenters expressed concerns that the proposed provision does not include exceptions for individuals who are victims of trafficking, lack the financial means to leave a third country, or fear persecution in the third country.

Commenters asserted that examples in the United States demonstrate the problems with proposed 8 CFR 208.15(a)(2). Commenters asserted that recipients of Deferred Action for Childhood Arrivals—who commenters noted are granted permission to stay in the United States in two-year increments—would be considered firmly resettled under the proposed rule even though their status could be rescinded at any time. Second, commenters similarly asserted that many undocumented individuals in the United States have lived here for decades, but that they cannot be considered firmly resettled because they are denied the opportunity to fully and meaningfully participate in public life and they live and work under the fear of removal.

Commenters opposed proposed 8 CFR 208.15(a)(3). One commenter stated that the proposed provision is unclear as to when presence in a country of citizenship occurred. The commenter asked, ''[d]oes it mean that the applicant must have been present there *sometime* before coming to the United States, anytime in their whole lives?'' The commenter asserted that it is unfair and unreasonable to consider someone firmly resettled in a country of citizenship without also considering factors such as whether such individual has the right to reside in the country and could be reasonably expected to do so. Commenters asserted that proposed 8 CFR 208.15(b) conflicts with *Matter of A–G–G–,* 25 I&N Dec. 486 (BIA 2011), which commenters asserted requires DHS to present evidence that a mandatory bar applies. Commenters stated that, under the proposed provision, if DHS or an immigration judge raises the issue that the firm resettlement bar might apply, then the burden of proof shifts to the respondent. This burden shifting, commenters argued, would increase the number of

unjust asylum application denials because pro se asylum seekers—especially non-English speakers and detainees—lack access to the knowledge or resources necessary to satisfy their burden of proof. Moreover, one commenter stated that if the proposed provision grants authority to DHS counsel to determine that firm resettlement applies, even if an immigration judge disagrees, then the subsection would inappropriately usurp immigration judges' authority.

One commenter asserted that the proposed rule would inappropriately permit the firm resettlement circumstances of a parent to be imputed to children and that a child's case must be considered separately from his or her parents' cases. Commenters similarly asserted that it is unreasonable to expect children to comport their movements and behavior in accordance with the proposed regulation.

Commenters noted that refugees—in addition to asylum applicants—are subject to a statutory bar based on firm resettlement. *See* INA 207(c)(1), 8 U.S.C. 1157(c)(1). At least one commenter suggested that refugee admission applicants and asylum applicants should be subject to the same standards. Commenters noted that, because Congress enacted laws to protect refugees and intended the firm resettlement bar to exclude refugees from protection only in narrow circumstances, the proposed standard for firm resettlement was an ''affront to Congressional intent.''

Response: Despite a lengthy history of international law, regulatory enactments, and circuit court interpretations, *see Matter of A–G–G–,* 25 I&N Dec. at 489–501 (explaining firm resettlement history), Congress ultimately codified the firm resettlement bar to asylum in IIRIRA without including any specific firm resettlement requirements, just as it had previously codified a firm resettlement bar to refugee admission without any specific requirements, INA 207(c)(1), 8 U.S.C. 1157(c)(1). Rather, the statutory language only states that asylum shall not be granted to an alien who ''was firmly resettled in another country prior to arriving in the United States.'' INA 208(b)(2)(A)(vi), 8 U.S.C. 1158(b)(2)(A)(vi). Accordingly, the Departments are using their regulatory authority to interpret this ambiguous statutory language.[68] *See Matter of R–A–,* 24 I&N Dec. at 631 (explaining that agencies are not bound by prior judicial interpretations of ambiguous statutory interpretations because there is a presumption that Congress left statutory ambiguity for the agencies to resolve). A clearer interpretation will help adjudicators in making firm resettlement determinations. Circuit courts have previously provided diverging interpretations of the firm resettlement requirements. *See Matter of A–G–G–,* 25 I&N Dec. at 495–500 (explaining differing circuit court approaches under the prior firm resettlement regulations).

In addition, as discussed further herein, efforts by the Board to provide clarity have not been fully successful, as its four-step framework reflects an unwieldy amalgamation of two competing approaches offered by Federal courts: The ''direct offer approach'' and the ''totality of the circumstances approach.'' *Id.* at 496–98, 501. Further, as described more fully below, its framework is not directed by any applicable statute or regulation,[69] contains internal tension, is in tension with other regulations regarding the parties' burdens, introduces ambiguous concepts such as indirect evidence of an offer of firm resettlement of ''a sufficient level of clarity and force,'' *id.* at 502, and relies principally on the concepts of an ''offer'' [70] and of ''acceptance'' of firm resettlement, even though the INA does not require an offer or acceptance for the provisions of INA 208(b)(2)(A)(vi), 8 U.S.C. 1158(b)(2)(A)(ii), to apply. *See Matter of A–G–G–,* 25 I&N Dec. at 501–03 (discussing the various aspects of its four-step framework). Ultimately, the best reading of the Board's cases is that the availability of some type of permanent legal immigration status or any non-permanent but indefinitely renewable legal immigration status—regardless of whether the alien applies for such status or has such status offered—is sufficient to raise the possibility of the firm resettlement bar, and that reading is incorporated into the rule.[71] *See id.* at 503 (''The regulations only require that an offer of firm resettlement was available, not that the alien accepted the offer.''). Based on these considerations and others, as described more fully below, the Departments have concluded that the current framework—with its case-by-case development and four-step framework that is divorced from any statute or regulation—invites confusion and inconsistent results because of immigration judges' potentially subjective judgments about how the framework should apply to the particular evidence in any given case. The Departments accordingly believe that the rule-based approach contained in this final regulation is more appropriate. *See Lopez* v. *Davis,* 531 U.S. 230, 244 (2001) (observing that ''a single rulemaking proceeding'' may allow an agency to more ''fairly and efficiently'' address an issue than would ''case-by-case decisionmaking'' (quotation marks omitted)).

In interpreting the statutory language, the Departments considered the history

[68] The Departments acknowledge that the concept of firm resettlement is a statutory bar to both refugee admission, INA 207(c)(1), 8 U.S.C. 1157(c)(1), and the granting of asylum, INA 208(b)(2)(A)(vi), 8 U.S.C. 1158(b)(2)(A)(vi). The two separate bars were enacted 16 years apart.

[69] Although the Board in *Matter of A–G–G–,* 25 I&N Dec. at 501, asserted that its framework follows the language of 8 CFR 1208.15, nothing in the text of that regulation actually outlines a particular framework to follow when considering issues of firm resettlement, and the regulation certainly does not delineate the four steps put forth by the Board. Further, the Board's reading of 8 CFR 1240.8(d) to suggest that DHS bears the initial burden at step one of its framework of establishing evidence that the firm resettlement bar applies, *Matter of A–G–G–,* 25 I&N Dec. at 502, is likewise atextual, and is further called into significant doubt by a recent decision of the Attorney General, *see Matter of Negusie,* 28 I&N Dec. 120, 154–55 (A.G. 2020) (''Consistent with the clear statutory mandate that an alien has the burden of proving eligibility for immigration relief or protection, the regulations make plain that if evidence in the record indicates that [a] bar may apply, then the applicant bears the additional burden of proving by a preponderance of the evidence that it does not. Although the evidence in the record must raise the possibility that the bar 'may apply,' *id.* § 1240.8(d), neither the statutory nor the regulatory scheme requires an extensive or particularized showing of the bar's potential applicability, and evidence suggesting the bar's applicability may come from either party. While the immigration judge must determine whether the evidence indicates that the . . . bar may apply—and, thus, whether the alien bears the burden of proving its inapplicability—that determination is an evidentiary one that does not stem from any burden on DHS. This conclusion is underscored by other statutory and regulatory provisions that specify when DHS is required to assume an evidentiary burden. Placing an initial burden on DHS to establish the applicability of the . . . bar would be contrary to the relevant statutory and regulatory scheme, and would unnecessarily tax its limited resources.'' (footnote, citations, and internal quotations omitted)).

[70] The Board's efforts to refine the concept of an ''offer'' have not improved the clarity of the application of the firm resettlement bar, as adjudicators may understandably be confused about how to consider whether an alien accepted an offer that was ''available,'' but not necessarily made. *Matter of A–G–G–,* 25 I&N Dec. at 502–03. Similarly, the Board adopted a ''totality of the evidence'' standard, *id.* at 503, but did not explain if that standard was intended to encompass the Federal courts' ''totality of the circumstances'' approach or to constitute something different.

[71] As discussed herein, the Departments recognize that other parts of *Matter of A–G–G–* are superseded by this rule because, inter alia, they are unwieldy to apply, in tension with other regulations or with other parts of the decision itself, do not represent the best implementation of the statute, do not appreciate the actual availability of firm resettlement in many countries, and are outweighed by the benefits of the rule as a policy matter. Thus, the Departments have provided ''reasoned explanation[s]'' for their departures from *Matter of A–G–G–* to the extent that there are actual departures. *See Encino Motorcars, LLC,* 136 S. Ct. at 2125 (citing *Brand X,* 545 U.S. at 981–82).

of the firm resettlement concept and determined that prior interpretations do not fully address the need for clarity and specific delineation of the meaning of firm resettlement. Moreover, prior adjudicatory interpretations do not effectively appreciate the availability of firm resettlement in many countries. Thus, the Departments believe that a broader interpretation of firm resettlement is necessary to ensure that the United States' overburdened asylum system is available to those with a genuine need for protection, and not those who want to live in the United States for other reasons and simply use the asylum process as a way to achieve those goals. *See* 85 FR at 36285–86. The Departments' interpretation also comports with the overall purpose of the asylum statute, which is ''not to provide [applicants] with a broader choice of safe homelands, but rather, to protect [refugees] with nowhere else to turn.'' *Matter of B–R–,* 26 I&N Dec. at 122 (quotation marks omitted).

The Departments' definition creates three grounds for a finding of firm resettlement.[72] The first ground captures aliens who have resided, or could have resided, permanently or indefinitely in a country but who have chosen not to pursue such opportunities. The Departments have determined that the firm resettlement bar should apply regardless of whether the alien received a direct offer of resettlement from the third country. The Departments believe that aliens should reasonably be required to pursue settlement opportunities when fleeing persecution and entering a new country, rather than forum shopping for their destination. *See Matter of A–G–G–,* 25 I&N Dec. at 503 (explaining the purpose of the firm resettlement bar ''is to limit refugee protection to those with nowhere else to turn''). This requirement is also supported by the fact that, as discussed in the NPRM, 43 additional countries have signed the Refugee Convention since 1990, evincing an increasing ability of an alien to find safe haven outside his or her home country. *See* 85 FR at 36285–86 & n.41. Contrary to commenters' claims, this first ground does not apply to aliens if the third country grants only temporary or unstable statuses. For the first ground of the firm resettlement bar to apply, the alien must be able to reside permanently or indefinitely in the third country, and temporary or unstable statuses would not meet that definition. Similarly, in order for this first ground to apply to aliens who ''could have'' resided in a permanent or indefinite status, the immigration judge must make a finding that the alien was eligible for, and otherwise would be granted, permanent or indefinite status under the laws of the third country. Moreover, the Departments disagree with commenters that the rule should retain the exception for aliens who reside in a third country but have the conditions of their stay ''substantially and consciously restricted.'' *See* 8 CFR 1208.15(b) (current). The Departments note that the language of the current regulation is more apt to cause confusion because it is not clear why—or perhaps even how—a country would offer citizenship or permanent legal residence to someone yet ''substantially and consciously'' restrict that person's residence. Further, the Departments believe that interpreting the firm resettlement bar to apply to any type of permanent or indefinite status advances the goal of limiting asylum forum shopping by persons who have the ability to live in a third country.

The second ground captures aliens who are living for an extended period of more than one year in a third country without suffering persecution. By living safely in a third country for more than a year without suffering persecution, the alien has evinced the ability to live long term in that country and is thereby ''firmly'' resettled as interpreted by the Departments. The dictionary definition of ''firm'' is ''securely or solidly fixed in place,'' not ''uncertain,'' and ''not subject to change or revision.'' *Firm,* Merriam Webster, *https://www.merriam-webster.com/dictionary/firm.* The Departments believe that this ground reasonably meets this definition, as an alien who is living in a third country for more than a year can be considered to be ''fixed in place'' and not thought to be present in the third country only temporarily.

Consistent with the purpose of the asylum statute, the Departments believe that asylum should not be made available to persons who ''have long since abandoned'' traveling to the United States in their flight from persecution. *See Rosenberg* v. *Yee Chien Woo,* 402 U.S. 49, 57 n.6 (1971). Rather, travel to the United States should be ''reasonably proximate'' to the flight from persecution and not be interrupted by ''intervening residence in a third country.'' *Id.*[73] In including this ground, the Departments do not believe that legal presence should be a requirement of firm resettlement, as persons can live indefinitely without status in a country. For example, according to a 2017 study, the median duration of residence for the United States' undocumented population is approximately 15 years. *See* Pew Research Center, *Mexicans decline to less than half the U.S. unauthorized immigrant population for the first time* (June 12, 2019), *https://www.pewresearch.org/fact-tank/2019/06/12/us-unauthorized-immigrant-population-2017/.* It is reasonable to conclude that such persons should be considered ''firmly resettled'' in the United States and do not intend to live in the United States only temporarily, and by the same reasoning, aliens who have resided for long periods in other countries—even without legal presence or status—can similarly be considered ''firmly resettled.'' Further, spending more than a year in a third country shows that the alien can support himself or herself or has the ability to receive necessary support. Separately, the Departments note that, contrary to commenters' concerns, the second ground would not apply to physical residence in Mexico after an alien was returned to Mexico under the MPP, because such aliens would already be considered to have arrived in the United States. Thus, time spent in Mexico solely as a direct result of returns to Mexico after being placed in MPP will not be considered for purposes of that specific element of the firm resettlement bar.[74]

The Departments also recognize that this second ground does not follow the language of the Refugee Convention or the Refugee Protocol, which require the alien to be recognized by the third country as possessing the same rights and obligations as citizens of that country. *See* 1951 Convention Relating to the Status of Refugees, Art. 1(E). In codifying the statutory firm resettlement bar as part of IIRIRA, however, Congress

[72] In comparison to the NPRM, this final rule expands the language in 8 CFR 208.15(a)(1) and 1208.15(a)(1) by breaking the first ground into three subparagraphs and changing the syntax to improve readability and clarity and to avoid confusion. The changes in the final rule are stylistic and do not reflect an intent to make a substantive change from the NPRM regarding 8 CFR 208.15(a)(1) and 1208.15(a)(1).

[73] By requiring that an alien live in any ''one'' third country for more than a year before triggering this ground, the Departments also recognize that it would not necessarily exclude aliens who make their flight in stages, *Yee Chien Woo,* 402 U.S. at 57 n.6, as aliens who remain in multiple countries over multiple years before coming to the United States are unlikely to have their travel to the United States viewed as ''reasonably proximate'' to their flight.

[74] An alien who physically resided voluntarily, and without continuing to suffer persecution, in Mexico for one year or more after departing the alien's country of nationality or last habitual residence and prior to arrival in or entry into the United States would potentially be subject to the bar, regardless of whether the alien was placed in MPP upon arrival in the United States.

did not include such a requirement, and, as a result, the Departments have chosen to interpret this ambiguous statutory language as not requiring the third country to provide the alien with rights comparable to that of citizens. *See Matter of R–A–,* 24 I&N Dec. at 631 (explaining presumption that Congress left statutory ambiguity for the agencies to resolve (citing *Brand X,* 545 U.S. at 982)).

The third ground captures aliens who maintain, or maintained and then later renounced, citizenship in a third country and were present in that country after fleeing their home country. By possessing citizenship in a third country and being physically present in that country, the alien has established that he or she has the ability to live with full citizenship rights in a third country, negating his or her need to apply for asylum in the United States. In response to a commenter's concerns about the timing of the alien's presence in the third country, the Departments clarify that the physical presence in the third country must occur after the alien leaves the home country where the alleged persecution occurred or where the well-founded fear of persecution would occur and before arriving in the United States.

Regarding commenters' concerns about the burden of proof, the Departments note that the existing burden framework outlined by the BIA is, at the least, not required by statute and appears to be in significant tension with existing regulations.[75] The burden associated with the firm resettlement bar as applied in removal proceedings is clarified in the existing language of 8 CFR 1240.8(d), which provides that the respondent has the burden of establishing eligibility for any requested benefit or privilege. That regulation then states that, if ''the evidence indicates that one or more of the grounds for mandatory denial'' of relief may apply, the alien has the burden of proving that such grounds do not apply. 8 CFR 1240.8(d). The existing regulation is thus clear that, if the evidence indicates that the firm resettlement bar may apply, then an applicant has the burden of proving that it does not. Although the evidence in the record must itself support the applicability of a bar, the regulations do not specify who must introduce that evidence, and relevant evidence may come from either party. Moreover, 8 CFR 1240.8(d) does not specify who may raise an issue of eligibility, only that the issue may be raised when the evidence indicates that a ground should apply. Because it is illogical to expect an alien applying for asylum to raise the issue that he or she is barred from receiving asylum, the rule appropriately acknowledges the reality that either DHS or the immigration judge may raise the issue based on the evidence, regardless of who submitted the evidence.

Similarly, although the immigration judge must determine whether the evidence indicates that the firm resettlement bar may apply—and, thus, whether the alien bears the burden of proving that it does not apply—that determination is simply an evidentiary one and does not place any burden on DHS. As noted, evidence that ''indicates that one or more of the grounds for mandatory denial of the application for relief may apply [*e.g.,* the firm resettlement bar],'' 8 CFR 1240.8(d), may be in the record based upon submissions made by either party; the regulation requires only that evidence be in the record, not that it be submitted by DHS. Put more simply, the regulations do not place an independent burden on DHS to establish a prima facie case. This conclusion is underscored by other regulations that, in contrast, specify when DHS is required to assume an evidentiary burden. *See, e.g.,* 8 CFR 208.13(b)(1)(ii) (''Burden of proof. In cases in which an applicant has demonstrated past persecution under paragraph (b)(1) of this section, [DHS] shall bear the burden of establishing by a preponderance of the evidence the requirements of paragraphs (b)(1)(i)(A) or (B) of this section.''). Placing a prima facie burden on DHS would be contrary to the relevant regulatory scheme and would unnecessarily tax the agency's limited resources without any statutory or regulatory justification, especially when ''[t]he specific facts supporting a petitioner's asylum claim . . . are peculiarly within the petitioner's grasp.'' *Angov,* 788 F.3d at 901. To the extent that commenters asserted that circuit case law conflicts with the Departments' rule, such conflicts would warrant re-evaluation in appropriate cases by the circuits under well-established principles. *See Brand X,* 545 U.S. at 982. Further, as noted in the NPRM, 85 FR at 36286, the rule overrules prior BIA decisions that are inconsistent, in accordance with well-established principles. *See Encino Motorcars, LLC,* 136 S. Ct. at 2125 (''Agencies are free to change their existing policies as long as they provide a reasoned explanation for the change.'' (citing *Brand X,* 545 U.S. at 981–82)).

In response to one commenter's concerns, the burden of proof provision does not allow DHS to make the final determination on whether the firm resettlement bar applies in EOIR proceedings; that authority continues to reside with DOJ for aliens whose asylum applications are referred for review by an immigration judge. *See* 8 CFR 208.14(c)(1), 1003.10(b), 1240.1(a)(1)(ii).

In response to concerns about imputing parents' firm resettlement to their minor children, the Departments note that the BIA has imputed parental attributes to children under other INA provisions on multiple occasions. *See, e.g., Holder,* 566 U.S. at 595–96 (2012) (describing various provisions of the Act in which parental attributes are imputed to children). Moreover, as noted in the NPRM, 85 FR at 36286, although the Departments have not previously established a settled policy regarding the imputation of the firm resettlement of parents to a child, the imputation in this rule is consistent with both case law and recognition of the practical reality that a child generally cannot form a legal intent to remain in one place. *See, e.g., Matter of Ng,* 12 I&N Dec. 411, 412 (Reg'l Comm'r 1967) (firm resettlement of father is imputed to a child who resided with his resettled family); *see also Vang* v. *INS,* 146 F.3d 1114, 1116–17 (9th Cir. 1998) (''We follow the same principle in determining whether a minor has firmly resettled in another country, *i.e.,* we look to whether the minor's parents have firmly resettled in a foreign country before coming to the United States, and then derivatively attribute the parents' status to the minor.'').

Here, it is reasonable to assume that minor children who are traveling with their parents would remain with their parents in any third country and, therefore, should also be subject to the firm resettlement bar. Moreover, the rule provides an exception when the alien

[75] The Board's framework also contains internal tension that has resulted in confusion on this point. In *Matter of A–G–G–,* the Board indicated that DHS bears the burden of making a prima facie showing that an offer for firm resettlement exists and will typically do so through the submission of documentary evidence. *Matter of A–G–G–,* 25 I&N Dec. at 501 (''DHS should first secure and produce direct evidence of governmental documents indicating an alien's ability to stay in a country indefinitely.''). It then went on to say, however, that prima facie evidence may already be part of the record as evidence, including testimony, which is typically offered by a respondent, not DHS. *Id.* at 502 n.17. Consequently, immigration judges may become confused about how to apply the firm resettlement bar in cases in which the evidence of record submitted by a respondent, including the respondent's testimony, indicates that the bar may apply but in which DHS has not affirmatively produced its own evidence of firm resettlement. This rule resolves that tension, reaffirms that immigration judges should follow the requirements of 8 CFR 1240.8 as appropriate, and reiterates that evidence in the record may raise the applicability of 8 CFR 1240.8 regardless of who submitted the evidence.

child can establish that he or she could not have derived any permanent legal immigration status or any non-permanent but indefinitely renewable temporary legal immigration status (such as asylee, refugee, or similar status) from his or her parent.[76] *See* 85 FR at 36294; 8 CFR 208.15(b), 1208.15(b).

The Departments acknowledge comments noting that the NPRM altered the definition of ''firm resettlement'' applicable to asylum applicants, but did not alter the definition applicable to refugee admission applicants, which is a distinction the Departments noted in the NPRM. 85 FR at 36285 n.40. The Departments did not propose to change 8 CFR 207.1(b) in the NPRM, *see id.,* and they do not believe such a change is warranted in this final rule, notwithstanding commenters' concerns regarding the two definitions.

Although the statutory provisions applying the firm resettlement bar in the refugee and asylum contexts are virtually identical, ''[a] given term in the same statute may take on distinct characters from association with distinct statutory objects calling for different implementation strategies.'' *Envtl. Def.* v. *Duke Energy Corp.,* 549 U.S. 561, 574 (2007). The United States Refugee Admissions Program (''USRAP'') and the asylum system serve distinct missions and populations and, thus, warrant different approaches. The asylum statute is not designed ''to provide [applicants] with a broader choice of safe homelands, but rather, to protect [refugees] with nowhere else to turn.'' *Matter of B–R–,* 26 I&N Dec. at 122 (quotation marks omitted). In contrast, the USRAP has long focused on resolving protracted refugee situations and providing relief to refugees who have not been able to find a durable solution to their need for protection in the country of first flight. Moreover, due to the lengthy referral, vetting, and application process in the refugee resettlement program, *see generally* USCIS, *Refugee Processing and Security Screening* (June 3, 2020), *https://www.uscis.gov/humanitarian/refugees-and-asylum/refugees/refugee-processing-and-security-screening,* time spent in a third country or otherwise awaiting overseas resettlement may not necessarily indicate that an alien was firmly resettled in the country hosting such populations.

Further, as a program explicitly addressing persons in foreign countries—rather than a form of relief available to aliens who arrive at or are inside the United States—the USRAP implicates issues of foreign relations and diplomacy in ways different than the asylum program. Additionally, although the current regulatory definitions of ''firm resettlement'' are similar, *compare* 8 CFR 207.1(b), *with* 8 CFR 208.15 *and* 1208.15, they are not identical. Rather, the definition applicable to refugee admission applicants requires that the alien entered the country of putative resettlement ''as a consequence of his or her flight from persecution,'' 8 CFR 207.1(b), whereas the definition applicable to asylum applicants indicates that entry into a country that was a necessary consequence of flight from persecution is one element of a potential exception to the general definition of ''firm resettlement.'' In other words, existing regulations already recognize distinctions in the definitions applicable to the two programs.

In short, although the Departments acknowledge commenters' concerns about the two different definitions, they do not believe changes to 8 CFR 207.1(b) are warranted at the present time. Nevertheless, the Departments do expect to study the issue closely and, if appropriate, may propose changes at a future date.

Finally, the Departments are noting two additional changes that the final rule makes regarding the issue of firm resettlement. First, consistent with the Departments' understanding that time spent in Mexico solely as a direct result of being returned to Mexico pursuant to section 235(b)(2)(C) of the Act or of being subject to metering would not be counted for purposes of that specific element of the firm resettlement bar, that point is being clarified explicitly in this final rule. Second, EOIR is making a conforming change to 8 CFR 1244.4(b) to align it with the both the appropriate statutory citation and the corresponding language in 8 CFR 244.4(b). Aliens described in INA 208(b)(2)(A), 8 U.S.C. 1158(b)(2)(A), including those subject to the firm resettlement bar contained in INA 208(b)(2)(A)(vi), 8 U.S.C. 1158(b)(2)(A)(vi), are ineligible for TPS. That statutory ineligibility ground is incorporated into regulations in both chapter I and chapter V of title 8; however, while the title I provision, 8 CFR 244.4(b), cites the correct statutory provision, INA 208(b)(2)(A)(vi), 8 U.S.C. 1158(b)(2)(A)(vi), the title V provision, 8 CFR 1244.4(b), maintains an outdated reference to an incorrect statutory provision. The final rule corrects that outdated reference.

4.9. ''Rogue Officials''/''Color of Law''

Comment: As an initial matter, commenters asserted that the terms ''color of law'' and ''official acting in his or her official capacity'' are not ambiguous and therefore are not open to agency interpretation. Commenters asserted that the rule seeks to codify the BIA's decision in *Matter of O–F–A–S–,* 27 I&N Dec. 709 (BIA 2019), *vacated by* 28 I&N Dec. 35, but that the standard set out in *Matter of O–F–A–S–* is an impossible burden. Specifically, commenters averred that ''if an official claims to be acting in an official capacity, is wearing an official uniform, or otherwise makes it known to the applicant that [he or she is] a government official, a CAT applicant would have no reason to know whether the official is acting lawfully or as a 'rogue' official.'' Commenters argued that to meet his or her burden, an applicant would have to obtain detailed information from a government official who has tortured or threatened him or her in order to establish that the actor was not acting in a rogue capacity.

Commenters also argued that the phrase ''under color of law'' calls for a more nuanced determination than the analysis required by the proposed regulation or the BIA's decision in *Matter of O–F–A–S–* would indicate. Quoting *Screws* v. *United States,* 325 U.S. 91, 111 (1945), commenters stated that ''[i]t is clear that under 'color' of law means under 'pretense' of law . . . . If, as suggested, the statute was designed to embrace only action which the State in fact authorized, the words 'under color of any law' were hardly apt words to express the idea.'' Following this analysis, commenters asserted that any proposed rule must emphasize that acting ''under color of law'' does not require the government official to be on duty, following orders, or to be acting on a matter of official government business.

Commenters similarly claimed that the proposed definition of ''rogue official'' is contrary to Federal and state jurisprudence because the proposed rule dismisses and invalidates the entire concept of ''color of law'' as being synonymous with ''acting in his or her official capacity.'' Commenters asserted that the Supreme Court views the terms as interchangeable because the

[76] The Department's experience in administering the firm resettlement bar indicates that cases in which a parent's firm resettlement would not be imputed to a minor child would be rare. Even in those rare cases, however, the Departments' use of child-appropriate procedures, as discussed elsewhere in the rule, which take into account age, stage of language development, background, and level of sophistication, would assist the child in ensuring that the child's claim is appropriately considered. *See, e.g.,* USCIS, *Interviewing Procedures for Minor Applicants* (Aug. 6, 2020), *https://www.uscis.gov/humanitarian/refugees-and-asylum/asylum/minor-children-applying-for-asylum-by-themselves.*

''traditional definition of acting under color of state law requires that the defendant . . . have exercised power 'possessed by virtue of state law and made possible only because the wrongdoer is clothed with the authority of state law.' '' *West* v. *Atkins,* 487 U.S. 42, 49 (1988) (quoting *United States* v. *Classic,* 313 U.S. 299, 326 (1941)).

Commenters explained that, in alignment with the Supreme Court's interpretation, some circuits have defined ''color of law'' to mean the ''misuse of power, possessed by virtue of state law and made possible only because the wrongdoer is clothed with the authority of state law.'' *See Iruegas-Valdez* v. *Yates,* 846 F.3d 806, 812–13 (5th Cir. 2017) (finding that the public official in question need not be high-level or follow ''an officially sanctioned state action''); *Garcia* v. *Holder,* 756 F.3d 885, 891–92 (5th Cir. 2014); *Ramirez-Peyro* v. *Holder,* 574 F.3d 893, 900–01 (8th Cir. 2009). Citing the Eighth Circuit, commenters asserted that this means that ''the focus is whether the official uses their position of authority to further their actions, even if for 'personal' motives.'' *Ramirez-Peyro,* 574 F.3d at 900–01. Commenters further asserted that the color-of-law analysis should be one of ''nexus''—*i.e.,* ''does the conduct relate to the offender's official duties?''

Commenters further quoted *Ramirez-Peyro,* 574 F.3d at 901, stating that ''it is not contrary to the purposes of the [Convention] and the under-color-of-law standard to hold Mexico responsible for the acts of its officials, including low-level ones, even when those officials act in contravention of the nation's will and despite the fact that the actions may take place in circumstances where the officials should be acting on behalf of the state in another, legitimate, way.'' Quoting *Khouzam* v. *Ashcroft,* 361 F.3d 161, 171 (2d Cir. 2004), commenters asserted that, ''when it is a public official who inflicts severe pain or suffering, it is only in exceptional cases that we can expect to be able to conclude that the acts do not constitute torture by reason of the official acting for purely private reasons.'' Commenters also cited a recent decision from the Ninth Circuit Court of Appeals, in which the court held that even a rogue official is still a public official for purposes of the CAT. *See Xochihua-Jaimes* v. *Barr,* 962 F.3d 1175, 1184 (9th Cir. 2020) (''We rejected BIA's 'rogue official' exception as inconsistent with *Madrigal* [, 716 F.3d at 506.]'').

Ultimately, commenters argued that the CAT requires protection for those that have suffered any act of torture at the hands of state officials, even ''rogue officials,'' as such evidence demonstrates that the foreign state cannot or will not protect the applicant from torture. Moreover, the commenter asserted that it does not matter that some countries cannot control large numbers of rogue officials. *See, e.g., Mendoza-Sanchez* v. *Lynch,* 808 F.3d 1182, 1185 (7th Cir. 2015) (''It's simply not enough to bar removal if the [Mexican] government may be trying, but without much success, to prevent police from torturing citizens at the behest of drug gangs.''). Commenters averred that the correct inquiry in CAT claims is whether a government official committed torture, not whether the applicant can demonstrate that the official was not acting in a ''rogue capacity.''

Commenters stated that the proposed changes to the ''rogue official'' standard also conflict with the standard established by the Attorney General in *Matter of O–F–A–S–,* 28 I&N Dec. 35 (A.G. 2020), which was issued subsequent to the proposed rule's publication. For example, at least one commenter stated that the Attorney General ''rejected'' the use of the term ''rogue official,'' while the proposed rule would codify the use of the same term. Commenters further stated that the Attorney General's decision in *Matter of O–F–A–S–* created difficulty in providing comment on the proposed rule because it changed the state of the law that the rule would affect.[77]

Commenters argued that exempting public officials from the concept of acquiescence in instances in which the public official ''recklessly disregarded the truth, or negligently failed to inquire'' seems indistinguishable from ''willful blindness,'' a term recognized by the Second, Third, Fourth, Fifth, Sixth, Seventh, Eighth, Ninth, and Tenth Circuits in the CAT analysis context. *See, e.g., Khouzam,* 361 F.3d at 170–71; *Myrie* v. *Att'y Gen. of U.S.,* 855 F.3d 509, 517 (3rd Cir. 2017), *Romero-Donado* v. *Sessions,* 720 Fed. App'x 693, 698 (4th Cir. 2018); *Iruegas-Valdez* v. *Yates,* 846 F.3d 806, 812 (5th Cir. 2017); *Torres* v. *Sessions,* 728 Fed. App'x 584, 588 (6th Cir. 2018); *Lozano-Zuniga* v. *Lynch,* 832 F.3d 822, 831 (7th Cir. 2016); *Fuentes-Erazo* v. *Sessions,* 848 F.3d 847, 852 (8th Cir. 2017); *Zheng* v. *Ashcroft,* 332 F.3d 1186, 1194–95 (9th Cir. 2003); *Medina-Velasquez* v. *Sessions,* 680 Fed. App'x 744, 750 (10th Cir. 2017). Commenters asserted that the rule should instead codify this ''near-universal standard.'' Further, commenters recommended codifying court decisions that have found government acquiescence even where parts of government have taken preventive measures. *See, e.g., Rodriguez-Molinero* v. *Lynch,* 808 F.3d 1134, 1139 (7th Cir. 2015) (noting it is not required to find the entire Mexican government complicit); *De La Rosa* v. *Holder,* 598 F.3d 103, 110 (2d Cir. 2010).

In addition, some commenters argued that the standard to demonstrate acquiescence is unreasonable because applicants would be required to demonstrate the legal duties of a government official who failed to act and also demonstrate whether the official was charged with preventing those actions but failed to act. Commenters asserted this would be an impossible standard to meet. Commenters also contended that the proposed rule's reliance on the Model Penal Code is irrelevant to what might occur in a foreign country.

Commenters argued that the proposed rule's amendments to 8 CFR 208.18(a)(1), (7) and 1208.18(a)(1), (7) will prevent many individuals from meeting the burden to establish eligibility for protection under the regulations issued pursuant to the legislation implementing the CAT. Commenters were concerned that an individual would be unable to determine that an officer is a rogue officer when ''every discernable fact (including but not limited to uniforms, weapons, badges, police cars, etc.) indicates the officer is legitimate.'' Therefore, commenters asserted, requiring this kind of detailed information would be unreasonable or impossible. Commenters similarly asserted that the requirement that an applicant demonstrate that the government official who has inflicted torture did so under color of law and is not a rogue official ignores the actual circumstances under which people flee.

Commenters also expressed concern that individuals who were tortured would have no recourse because they would be unable to report the rogue official to other potentially rogue officials. For example, commenters stated that, in many countries (such as the Democratic Republic of the Congo), members of the police or military are intentionally organized into paramilitary groups so that the government can deny responsibility for human rights violations. Commenters asserted that, in such circumstances, individuals who are subjected to harm or in danger of such harm would face an insurmountable burden of proof.

[77] To the extent commenters' concerns with the ability to comment may relate to the period of time provided for comment, the Departments responses are set forth below in Section II.C.6.3 of this preamble.

Commenters asserted that it is extremely rare for a government to openly acknowledge that it condones torture. Rather, when evidence of torture occurs, the government will claim the perpetrator was a ''bad apple'' who acted on his or her own. Commenters asserted that this rule would accept the ''bad apple'' excuse on its face, preventing torture victims from receiving protection. Similarly, commenters asserted that most governments would not publicly admit that they torture their citizens and that, without such admissions, it would be difficult for victims of torture to prove that the injury was caused by a government official acting in an official capacity as opposed to on the official's private initiative. Commenters also asserted that the proposed changes appear specifically to restrict typical claims from Central America, where individuals are ''tortured at the hands of non-state actors such as gangs and cartels and where government actors are frequently complicit in these actions.'' Finally, one commenter asserted that, if an agency is going to demand such a high burden to establish torture, the agency should be the one to take on the burden of demonstrating the difference because the agency has more capacity to obtain the required information than the individual requesting the relief.

Response: The Departments disagree with commenters' assertions that the term ''acting in an official capacity'' is unambiguous and thus not subject to agency interpretation, as multiple decisions from the BIA, the Attorney General, and circuit courts attest. As demonstrated most recently by the Attorney General's decision in *Matter of O–F–A–S–,* 28 I&N Dec. at 36–37, the term ''acting in an official capacity'' is a term that has been subject to different interpretations since it was implemented in the regulations. *See* Regulations Concerning the Convention Against Torture, 64 FR 8490 (Feb. 19, 1999). As explained by the Attorney General subsequent to the NPRM, whether an individual acted in an official capacity has been the subject of multiple inaccurate or imprecise formulations. *Matter of O–F–A–S–,* 28 I&N Dec. at 36–37. On the one hand, then-Attorney General Ashcroft first articulated that the official capacity requirement means torture ''inflicted under color of law.'' *Id.* at 36. Subsequently, every Federal court of appeals to consider the questions has read the standard in the same manner. *Id.* at 37 (citing *Garcia,* 756 F.3d at 891; *United States* v. *Belfast,* 611 F.3d 783, 808–09 (11th Cir. 2010); *Ramirez-Peyro,* 574 F.3d at 900). However, at the same time, some Federal courts have viewed immigration judges as applying an amorphous, different concept of ''rogue official,'' which has not been accepted by circuit courts. *Id.* (citing Federal court of appeals decisions reviewing immigration court decisions applying an alleged ''rogue official'' analysis).

As the NPRM made clear, there is not a ''rogue official'' exception *per se* for CAT protection. 85 FR at 36286. Rather, ''rogue official'' is simply a shorthand label for an official who is not acting under color of law, and the actions of such an official are not a basis for CAT protection because the individual is not acting in an official capacity. The Attorney General confirmed this view that a ''rogue official'' is one who is not acting under color of law. *Matter of O–F–A–S–,* 28 I&N Dec. at 38 (''To the extent the Board used 'rogue official' as shorthand for someone not acting in an official capacity, it accurately stated the law. By definition, the actions of such officials would not form the basis for a cognizable claim under the CAT.''). Thus, there is no longer any confusion regarding the definition of a ''rogue official,'' and, consistent with the rule, such an official is one who is not acting under color of law.

Nevertheless, as the Attorney General also noted, ''continued use of the 'rogue official' language by the immigration courts going forward risks confusion . . . because 'rogue official' has been interpreted to have multiple meanings.'' *Id.* Accordingly, the Departments are removing that term from the final rule to avoid any further confusion. Its removal, however, does not result in any substantive change to the rule. Regardless of whether an official who is not acting in an official capacity is described as a ''rogue official,'' the actions of such an official are not performed under color of law and, thus, do not form the basis of a cognizable claim under the CAT.

Regarding commenters' concerns about the Attorney General's decision in *Matter of O–F–A–S–,* the Attorney General determined that it was necessary to provide a clarification of the ambiguous term ''acting in an official capacity'' without waiting for the Departments' NPRM to be finalized. That he issued his decision does not prevent the Departments from codifying that definition subsequently.

Moreover, the Departments disagree that the Attorney General's decision in *Matter of O–F–A–S–,* 28 I&N Dec. at 35, conflicts with the language of this rule. In *Matter of O–F–A–S–,* the Attorney General explained that ''acting in an official capacity'' means actions performed ''under color of law.'' *Id.* This rule amends the current regulatory language to clarify that the conduct supporting a CAT claim must be carried out under color of law, which is fully consistent with the Attorney General's decision. *See* 8 CFR 208.18(a)(1), 1208.18(a)(1) (expressly using the phrase ''under color of law'').[78] Therefore, the regulatory text articulates that the test for determining whether an individual acted in an official capacity is whether the official acted under color of law. *See* 8 CFR 208.18(a)(1), 1208.18(a)(1).

This amendment aligns the regulatory language with congressional intent and circuit case law finding that ''in an official capacity'' means ''under color of law.'' The Senate, in recommending that the United States ratify the CAT, explicitly stated that ''the Convention applies only to torture that occurs in the context of governmental authority, excluding torture that occurs as a wholly private act or, in terms more familiar in U.S. law, it applies to torture inflicted 'under color of law.' '' S. Exec. Rep. No. 101–30, at 14 (1990). Further, as stated by the Attorney General in *Matter of O–F–A–S–,* every Federal court of appeals to consider the question has held that action ''in an official capacity'' means action ''under color of law.'' 28 I&N Dec. at 37 (citing *Garcia,* 756 F.3d at 891; *Belfast,* 611 F.3d at 808–09; *Ramirez-Peyro,* 574 F.3d at 900); *see also Ali* v. *Reno,* 237 F.3d 591, 597 (6th Cir. 2001) (adopting the ''under color of law'' standard in an opinion preceding *Matter of Y–L–,* 24 I&N Dec. 151).

The Senate's understanding of ''acquiescence'' for purposes of the CAT was that a finding of acquiescence requires a showing that the public official was aware of the act and that the public official had a legal duty to intervene to prevent the act but failed to do so. *See* S. Exec. Rep. No. 101–30, at 14 (''In addition, in our view, a public

[78] In clarifying this definition of a public official as one acting under color of law, the rule also makes clear that, for purposes of the CAT regulations, pain or suffering inflicted by, or at the instigation of or with the consent or acquiescence of, a public official is not torture unless the act is done while the official is ''acting in his or her official capacity. 85 FR at 36287; 8 CFR 208.18(a)(1) and 1208.18(a)(1). The Departments recognize that this change departs from the language considered in *Barajas-Romero* v. *Lynch,* 846 F.3d 351, 362–63 (9th Cir. 2017), which allowed for the consideration of a CAT claim even when the alleged torture was carried out by a public official not acting in an official capacity. Nevertheless, the Departments have provided reasoned explanations for this regulatory change and, thus, can implement that change in accordance with well-established principles. *See Encino Motorcars, LLC,* 136 S. Ct. at 2125 (''Agencies are free to change their existing policies as long as they provide a reasoned explanation for the change.'').

official may be deemed to 'acquiesce' in a private act of torture only if the act is performed with his knowledge and the public official has a legal duty to intervene to prevent such activity.''). As noted in the NPRM, however, the term ''awareness'' has led to some confusion. *See* 85 FR at 36287 (citing *Scarlett* v. *Barr,* 957 F.3d 316 (2d Cir. 2020)). Commenters asserted that the Departments, rather than creating a new definition for awareness, should instead codify the ''willful blindness'' standard as articulated by the circuit courts of appeals. But the final rule does just that: As noted in the NPRM, the Departments proposed to clarify that, in accordance with decisions from several courts of appeals and the BIA, '' 'awareness'—as used in the CAT 'acquiescence' definition—requires a finding of either actual knowledge or willful blindness.'' 85 FR at 36287; *see also* 8 CFR 208.18(a)(1), 1208.18(a)(1). The Departments, however, seeking to avoid further ambiguity, further define the term ''willful blindness'' to mean that the public official or other person acting in an official capacity was ''aware of a high probability of activity constituting torture and deliberately avoided learning the truth.'' 85 FR at 36287. The Departments further clarify that it is not enough that such a public official acting in an official capacity or other person acting in an official capacity was ''mistaken, recklessly disregarded the truth, or negligently failed to inquire.'' *Id.*

As explained in the NPRM, the Departments' definition of ''acquiescence'' aligns with congressional intent to require both an actus reus and a mens rea. *Id.* The Senate, during ratification of the CAT, included in its list of understandings the two elements required for a finding of acquiescence: Actus reus and mens rea. *See Convention Against Torture and Other Cruel, Inhuman, or Degrading Treatment or Punishment, Treaty Doc. 100–20: Hearing Before the S. Comm. on Foreign Relations,* S. Hrg. No. 101–718, 101st Cong., 2d Sess. 14 (1990) (''[T]o be culpable under the [CAT] . . . the public official must have had prior awareness of [the activity constituting torture] and must have breached his legal responsibility to intervene to prevent the activity.'' (statement of Mark Richard, Deputy Assist Att'y Gen., Criminal Division, Department of Justice)); U.S. Senate Resolution of Advice and Consent to Ratification of the Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment, 136 Cong. Rec. 36198 (1990). The definition further aligns with subsequent understandings that reduced the requirement from knowledge to mere awareness. *See Zheng,* 332 F.3d at 1193 (''The [Senate Committee on Foreign Relations] stated that the purpose of requiring awareness, and not knowledge, 'is to make it clear that both actual knowledge and 'willful blindness' fall within the definition of the term 'acquiescence.' '').

Regarding commenters' assertions that the proposed rule would create a burden that would be impossible for an applicant to meet, the Departments note that, currently, applicants must still demonstrate a legal duty and that this requirement does not change with this final rule. Even when applying the ''willful blindness'' standard articulated by various circuit courts of appeals, the applicant must demonstrate a legal duty and that the government official breached that legal duty. *See, e.g., Khouzam,* 361 F.3d at 171 (''From all of this we discern a clear expression of Congressional purpose. In terms of state action, torture requires only that government officials know of or remain willfully blind to an act and thereafter breach their legal responsibility to prevent it.'').

Regarding commenters' concerns about the burden applicants would have in establishing that an official was not a rogue official, the Departments reiterate that this rule codifies the analysis that, for an individual to be acting in an official capacity, he or she must be acting under color of law. As stated above, this standard aligns with the standard required by the Attorney General in *Matter of O–F–A–S–,* as well as the various circuit courts of appeals to have considered the issue. Therefore, the burden continues to require that an applicant demonstrate that an individual acted under color of law to demonstrate eligibility. The final rule does not raise or change the burden on the applicant, but merely provides clarity on the analysis. Moreover, the NPRM lists the main issues to consider in determining whether an official was acting under the color of law: Whether government connections provided the officer access to the victim, or to his whereabouts or other identifying information; whether the officer was on duty and in uniform at the time of his conduct; and whether the officer threatened to retaliate through official channels if the victim reported his conduct to authorities. 85 FR at 36287. The Departments believe these issues would be known by the alien, who could at least provide evidence in the form of his or her personal testimony if other witnesses or documents were unavailable. *See* 8 CFR 1208.16(c)(2) (''The testimony of the applicant, if credible, may be sufficient to sustain the burden of proof [for a claim for protection under the CAT] without corroboration.'').

5. Information Disclosure

Comment: Commenters raised concerns that the rule's confidentiality provisions violate asylum seekers' right to privacy in their asylum proceedings, are ''expansive and highly concerning,'' and would put asylum seekers at ''grave risk of harm.'' Commenters were particularly concerned about cases involving gender-based violence. Commenters explained that broad disclosure language would deter asylum seekers from pursuing relief or revealing details of their alleged persecution for fear that their persecutor would learn about their asylum claim and subject them or their families to further harm. This fear, according to commenters, would be compounded by the fact that persecutors could potentially learn such information online without needing to be physically present in the United States. For example, commenters were concerned that disclosures in Federal litigation could be accessed by anyone because the litigation is public record.

One commenter noted that the exception for state or Federal mandatory reporting requirements at 8 CFR 208.6(d)(1)(iii) and 1208.6(d)(1)(iii) is ''completely open ended and provides no safeguards against publication'' to the public. Another commenter raised concerns about the exception allowing for an asylum application to be filed in an unrelated case as evidence of fraud. The commenter explained that, in practice, this would mean that information from one applicant's case would be accessible to another applicant, potentially putting the asylum applicant in danger.

Response: The Departments are fully cognizant of the need to protect asylum seekers, as well as their relatives and associates in their home countries, by preventing the disclosure of information contained in or pertaining to their applications. There are specific situations, however, in which the disclosure of relevant information is necessary to protect the integrity of the system, to ensure that those engaged in fraud do not obtain benefits to which they are not entitled, and to ensure that unlawful behavior is not inadvertently and needlessly protected. The existing confidentiality provisions do not provide for an absolute bar on disclosure, but even their exceptions may encourage fraud or criminal behavior. *See Angov,* 788 F.3d at 901

(''This points to an unfortunate reality that makes immigration cases so different from all other American adjudications: Fraud, forgery and fabrication are so common—and so difficult to prove—that they are routinely tolerated.''). Ultimately, there is no utility in protecting a false or fraudulent asylum claim, in restricting access to evidence of child abuse, or in restricting access to evidence that may prevent a crime, and the rule properly calibrates those concerns as outweighing the blunt shield of confidentiality for an assortment of unlawful behaviors that exists under the current regulations.

Here, the Departments have determined that additional, limited disclosure exceptions are necessary to protect the integrity of proceedings, to ensure that other types of criminal activity are not shielded by the confidentiality provisions, and to ensure that the government can properly defend itself in relevant proceedings. By their text, these additional disclosure exceptions are limited to specific circumstances in which the disclosure of such information is necessary and the need for the disclosure outweighs countervailing concerns. This rule includes clarifying exceptions explicitly allowing release of information as it relates to any immigration proceeding under the INA or legal action relating to the alien's immigration or custody status. This will ensure that the government can provide a full and accurate record in litigating such proceedings.

The rule also includes provisions for protecting the integrity of proceedings and public safety. These include provisions aimed at detecting fraud by allowing the Departments to submit similar asylum applications in unrelated proceedings; pursuing state or Federal criminal investigations, proceedings, or prosecutions; and protecting against child abuse. For example, the fraud exception will allow the Departments to consider potentially fraudulent similar applications or evidence in an immigration proceeding in order to root out non-meritorious claims, which will in turn allow the Departments to focus limited resources on adjudicating cases with a higher chance of being meritorious. *See, e.g., Angov,* 788 at 901–02 (''[Immigration f]raud, forgery and fabrication are so common—and so difficult to prove—that they are routinely tolerated. . . . [I]f an alien does get caught lying or committing fraud, nothing very bad happens to him. . . . Consequently, immigration fraud is rampant.'').

Regarding commenters' concerns with the exception to allow disclosure as required by any state or Federal mandatory reporting requirements, the Departments note that the exception simply makes clear that government officials must abide by such laws. This provision is designed to prevent any inconsistencies and ensure that government officials comply with any mandatory reporting requirements. Accordingly, despite commenters' concerns with the breadth of this provision, the Departments disagree that any limiting language would be appropriate.

The Departments have considered commenters' concerns that an applicant's application will be submitted in another proceeding and thereby be made available to the other applicant, though they note that existing exceptions already cover ''[t]he adjudication of asylum applications'' and ''[a]ny United States Government investigation concerning any . . . civil matter,'' which, arguably, already encompass the use of applications across proceedings. 8 CFR 208.6(c)(1)(i), (v), 1208.6(c)(1)(i), (v). The Departments are maintaining the exceptions in the NPRM to ensure clarity on this point and to ensure that existing regulations are not inappropriately used to shield unlawful behavior. Because cases involving asylum fraud are ''distressingly common,'' *Angov,* 788 at 902, the need to root out fraudulent asylum claims greatly outweighs the concerns raised by commenters. Moreover, legitimate asylum seekers generally should be unaffected by this exception. Finally, the Departments reiterate that only ''relevant and applicable'' information is subject to disclosure under that exception; thus, rather than an open-ended exception, this exception ensures that only a limited amount of information is subject to disclosure under that exception.

Finally, as noted above, the Departments are making conforming edits to 8 CFR 208.6(a) and (b) and 8 CFR 1208.6(b) to make clear that the disclosure provisions of 8 CFR 208.6 and 1208.6 apply to applications for withholding of removal under the INA and for protection under the regulations implementing the CAT, and not solely to asylum applications. That point is already clear in 8 CFR 208.6(d) and 1208.6(d), and the Departments see no reason not to conform the other paragraphs in those sections for consistency. Relatedly, the Departments are also making edits to 8 CFR 208.6(a), (b), (d), and (e) and 8 CFR 1208.6(b), (d), and (e) to make clear that applications for refugee admission pursuant to INA 207(c)(1), 8 U.S.C. 1157(c)(1), and 8 CFR part 207 are subject to the same information disclosure provisions as similar applications for asylum, withholding of removal under the INA, and protection under the regulations implementing the CAT. The Departments already apply the disclosure provisions to such applications as a matter of policy and see no basis to treat such applications differently than those for protection filed by aliens already in or arriving in the United States.

6. Violates Domestic or International Law

6.1. Violates Immigration and Nationality Act

Comment: Commenters expressed a general belief that the rule violates the INA, such as by rendering it ''impossible'' or ''near impossible'' to obtain refugee status.

Multiple commenters stated that it appears the proposed rule is an ''unreasonable interpretation'' of sections 208 and 240 of the INA, 8 U.S.C. 1158 and 1229a, because two members of Congress have issued a statement in opposition to the rule.

Response: This rule implements numerous changes to the Departments' regulations regarding asylum and related procedures, including amendments to the expedited removal and credible fear screening process, changes to the standards for frivolous asylum application findings, a provision to allow immigration judges to pretermit applications in certain situations, codification of standards for consideration during the review of applications for asylum and for statutory withholding of removal, and amendments to the provisions regarding information disclosure. Each of these changes, as discussed with more specificity elsewhere in Section II.C of this preamble, is designed to better align the Departments' regulations with the Act and congressional intent. As also discussed, *supra,* the rule does not end asylum or refugee procedures, nor does it make it impossible for aliens to obtain such statuses. To the contrary, by providing clearer guidance to adjudicators and allowing them to more effectively consider all applications, the rule should allow adjudicators to more efficiently reach meritorious claims.

The Departments disagree that the statements of certain members of Congress about their personal opinion regarding the rule are sufficient to demonstrate that the rule is an ''unreasonable interpretation'' of the Act. Indeed, the statements of certain

members of Congress in 2020 is not clear evidence of the legislative intent behind the 1996 enactment of IIRIRA, which established the key statutory provisions related to this rule.

6.2. Violates Administrative Procedure Act

Comment: Commenters raised concerns that the rule does not comply with the APA. Commenters alleged that the rule is arbitrary and capricious under the APA because it does not offer ''reasoned analysis'' for the proposed changes. Commenters explained that ''reasoned analysis'' requires the Departments to display awareness that they are changing positions on a policy, to provide a legitimate rationale for departing from prior policy, and to identify the reasons for the change and why the change is a better solution to the issue.

In alleging this failure, commenters argued that the Departments did not analyze or rely on data or other evidence in formulating these changes. Moreover, commenters also claimed that the Departments did not consider possible alternatives to the changes and failed to consider important aspects of the various changes, including the impacts on the applicants and their communities. Commenters claimed that this rule is nothing more than a pretext for enshrining anti-asylum seeker sentiments, as evidenced by the thin or complete lack of justification for the various changes.

In addition, commenters claimed that this rule overlaps with other recent rules promulgated by the Departments, including rules involving asylum and adjusting fee amounts. Commenters claimed that it is arbitrary and capricious for the Departments to ''carve up [their] regulatory activity to evade comprehensive evaluation and comment.'' For example, one commenting organization stated that the rule treats domestic violence differently from another recent rule, in that the other rule bars relief for persons who have committed gender-based violence, while this rule bars relief from persons who have survived gender-based violence.

One commenting organization stated that the Departments are implementing this rule to enhance their litigating positions before EOIR and the Federal courts, which the commenter alleged is arbitrary and capricious where ''there is no legitimate basis for the regulation other than to enhance the litigating position'' of the Departments, particularly when the Departments are parties to the litigation.

Response: The Departments disagree that the promulgation of this rule is arbitrary and capricious under the APA. The APA requires agencies to engage in ''reasoned decisionmaking,'' *Michigan,* 576 U.S. at 750, and directs that agency actions be set aside if they are arbitrary or capricious, 5 U.S.C. 706(2)(A). This, however, is a ''narrow standard of review'' and ''a court is not to substitute its judgment for that of the agency,'' *Fox Television,* 556 U.S. at 513 (quotation marks omitted), but is instead to assess only whether the decision was ''based on a consideration of the relevant factors and whether there has been a clear error of judgment,'' *Citizens to Preserve Overton Park, Inc.* v. *Volpe,* 401 U.S. 402, 416 (1971). Arbitrary and capricious review is ''highly deferential, presuming the agency action to be valid.'' *Sacora* v. *Thomas,* 628 F.3d 1059, 1068 (9th Cir. 2010). It is ''reasonable for the [agency] to rely on its experience'' to arrive at its conclusions, even if those conclusions are not supported with ''empirical research.'' *Id.* at 1069. Moreover, the agency need only articulate ''satisfactory explanation'' for its decision, including ''a rational connection between the facts found and the choice made.'' *Motor Vehicle Mfrs. Ass'n of U.S., Inc.* v. *State Farm Mut. Auto Ins. Co.,* 463 U.S. 29, 43 (1983); *see also Dep't of Commerce* v. *New York,* 139 S. Ct. 2551, 2569 (2019) (''We may not substitute our judgment for that of the Secretary, but instead must confine ourselves to ensuring that he remained within the bounds of reasoned decisionmaking.'' (citation and quotation marks omitted)).

Under this deferential standard, and contrary to commenters' claims, the Departments have provided reasoned explanations for the changes in this rule sufficient to rebut any APA-related concerns. The NPRM describes each provision in detail and provides an explanation for each change. *See* 85 FR at 36265–88. The Departments explained that these various changes will, among other things, maintain a streamlined and efficient adjudication process for asylum, withholding of removal, and CAT protection; provide clarity in the adjudication of such claims; and protect the integrity of such proceedings. *Id.* As noted in Section II.A of this preamble, the animating principles of the NPRM were to provide clearer guidance to adjudicators regarding a number of thorny issues that have caused confusion and inconsistency and even bedeviled circuit courts; to improve the efficiency and integrity of the overall system in light of the overwhelming number of cases pending; to correct procedures that were not working well, including procedures for the identification of meritless or fraudulent claims; and to provide a consistent approach for the overall asylum adjudicatory framework in light of numerous—and often contradictory or confusing—decisions from the Board and circuit courts regarding multiple important terms that are not defined in the statute.

For example, the Departments explained that the changes to use asylum-and-withholding-only proceedings for positive credible fear findings, to increase the credible fear standard for withholding of removal and CAT protection claims, to apply certain bars and the internal relocation analysis in credible fear interviews, to pretermit legally insufficient asylum applications, and to expand the grounds for a frivolous asylum finding are all intended to create a more streamlined and efficient process for adjudicating asylum, withholding of removal, and CAT protection applications. *See* 85 FR at 36266–67 (explaining that asylum-and-withholding-only proceedings will ensure a ''streamlined, efficient, and truly 'expedited' '' removal process); *id.* at 36277 (explaining that the pretermission of legally insufficient asylum applications will eliminate the need for a hearing); *id.* at 36273–76 (explaining that frivolous applications are a ''costly detriment, resulting in wasted resources and increased processing times,'' and that the new grounds for a finding of frivolousness will ''ensure that meritorious claims are adjudicated more efficiently'' and will prevent ''needless expense and delay''); *id.* at 36268–71 (explaining that raising the credible fear standard for withholding and CAT applications will allow the Departments to more ''efficiently and promptly'' distinguish between aliens whose claims are more or less likely to ultimately be meritorious); *id.* at 36272 (explaining that applying certain eligibility bars in credible fear interviews will help to eliminate unnecessary removal delays in section 240 proceedings and eliminate the ''waste of adjudicatory resources currently expended in vain'').

Similarly, the Departments also explained in the NPRM that many of the changes are intended to provide clarity to adjudicators and the parties, including the addition of definitions and standards for terms such as ''particular social group,'' ''political opinion,'' ''persecution,'' ''nexus,'' and ''internal relocation;'' the delineation of discretionary factors in adjudicating asylum applications; the addition of guidance on the meaning of

''acquiescence'' and the circumstances in which officials are not acting under color of law in the CAT protection context; and the clarification of the use of precedent in credible fear review proceedings. *See* 85 FR at 36278 (explaining that the rule's definition of ''particular social group'' will provide ''clearer guidance'' to adjudicators regarding whether an alleged group exists and, if so, whether the group is cognizable); *id.* at 36278–79 (explaining that the rule's definition of ''political opinion'' will provide ''additional clarity for adjudicators''); *id.* at 36280 (explaining that the rule's definition of ''persecution'' will ''better clarify what does and does not constitute persecution''); *id.* at 36281 (explaining that the rule's definition of ''nexus'' will provide ''clearer guidance'' for adjudicators to ''uniformly apply''); *id.* at 36282 (explaining that the rule's definition of ''internal relocation'' will help create a more ''streamlined presentation'' to overcome the current lack of ''practical guidance''); *id.* at 36283 (explaining that, for asylum discretionary determinations, the Departments have not previously provided general guidance in agency regulations for factors to be considered when determining whether an alien merits asylum as a matter of discretion); *id.* at 36286–87 (explaining that guidance for CAT acquiescence and for the circumstances in which an official is not acting under color of law standards is meant to provide clarity because current regulations ''do not provide further guidance''); *id.* at 36267 (explaining that the inclusion of language regarding the consideration of precedent in credible fear review proceedings is intended to provide a ''clear requirement'').

The Departments also explained that many of the changes are intended to protect the integrity of proceedings. *See* 85 FR at 36288 (explaining the expansion of information disclosure is necessary to protect against ''suspected fraud or improper duplication of applications or claims''); *id.* at 36283 (explaining that the inclusion of a discretionary factor for use of fraudulent documents is necessary due to concerns that the use of fraudulent documents makes the proper enforcement of the immigration laws ''difficult'' and ''requires an immense amount of resources''); *id.* (explaining that the inclusion of a discretionary factor for failure to seek asylum or protection in a transit country ''may reflect an increased likelihood that the alien is misusing the asylum system''); *id.* at 36284 (explaining that making applications that were previously abandoned or withdrawn with prejudice a negative discretionary factor would ''minimize abuse of the system'').

The Departments also disagree with commenters that the rule does not provide support for the specific grounds that would be insufficient to qualify as a particular social group or to establish a nexus.[79] The Departments provided numerous citations to BIA and Federal court precedent that the Departments relied on in deciding to add these specific grounds. *See* 85 FR at 36279 (list of cases supporting the grounds that generally will not qualify as a particular social group); *id.* at 36281 (list of cases supporting the grounds that generally will not establish nexus).

In addition to the explicit purposes detailed in the NPRM, the Departments also considered, contrary to commenters' claims, the effects that such changes may have on applicants. The Departments noted that the proposed changes ''are likely to result in fewer asylum grants annually.'' 85 FR at 36289. Moreover, the Departments recognized that any direct impacts would fall on these applicants. *Id.* at 36290. The Departments acknowledge that these impacts are viewed as ''harsh'' or ''severe'' by commenters, but the Departments also note, as discussed, *supra,* that many of the commenters' overall assertions about the effects of this rule are unfounded or speculative.[80] In addition, the Departments made the decision to include the various changes in this rule because, after weighing the costs and benefits, the Departments determined that the need to provide additional clarity to adjudicators; to enhance adjudicatory efficiencies; and to ensure the integrity of proceedings outweighed the potential costs to applicants, especially since the changes, particularly those rooted in existing law, would naturally fall more on applicants with non-meritorious claims. In fact, the enhanced adjudicatory efficiencies would be expected to allow adjudicators to focus more expediently on meritorious claims, which would be a benefit offsetting any costs to those applicants filing non-meritorious applications. Overall, as shown in the NPRM and the final rule, the Departments engaged in ''reasoned decision making'' sufficient to mitigate any APA concerns.

The Departments also disagree with commenters' claim that the Departments purposefully separated their asylum-related policy goals into separate regulations in order to prevent the public from being able to meaningfully review and provide comment. The Departments reject any assertions that they are proposing multiple rules for any sort of nefarious purpose. Each of the Departments' rules stand on its own, includes an explanation of its basis and purpose, and allows for public comment, as required by the APA. *See Little Sisters of the Poor Saints Peter & Paul Home* v. *Pennsylvania,* 140 S. Ct. 2367, 2386 (2020) (explaining that the APA provides the ''maximum procedural requirements'' that an agency must follow in order to promulgate a rule). To the extent commenters noted some overlap or joint impacts, however, the Departments regularly consider the existing legal framework when a specific rule is proposed or implemented. For example, with respect to the potential impacts of DHS fee changes, DHS conducts a biennial review of USCIS fees and publishes a Fee Rule that impacts all populations before USCIS. *See, e.g.,* U.S. Citizenship and Immigration Services Fee Schedule and Changes to Certain Other Immigration Benefit Request Requirements, 84 FR 62280, 62282 (Nov. 14, 2019) (explaining that, in accordance with 31 U.S.C. 901–03, USCIS conducts ''biennial reviews of the non-statutory fees deposited into the [Immigration Examinations Fee Account]''). It is natural that there would be some impact on aliens who intend to seek asylum, but any such change to those fees must be considered with respect to USCIS's overall fee structure. Thus, any such changes were properly outside the scope of this rule. Moreover, nothing in any rule proposed by the Departments, including the NPRM underlying this final rule, precludes the public from meaningfully reviewing and commenting on that rule.

Finally, commenters are incorrect that the rule is related to enhancing the government's litigating positions. As explained in the NPRM and this response section, the Departments detailed a number of reasons for promulgating this rule, including to increase efficiency, to provide clarity to adjudicators, and to protect the integrity of proceedings. To the extent the rule

[79] For further discussion regarding the changes related to particular social groups, see Section II.C.4.1 of this preamble, and for further discussion regarding the changes related to nexus, see Section II.C.4.4.

[80] The Departments also note that aliens with otherwise meritorious claims who are denied asylum under genuinely new principles in the rule—*e.g.,* the new definition of ''firm resettlement''—may remain eligible for other forms of protection from removal, such as statutory withholding of removal or protection under the CAT. Thus, contrary to the assertions of many commenters, the rule would not result in the ''harsh'' or ''severe'' consequence of an alien being removed to a country where his or her life would be in danger.

corresponds with interpretations of the Act and case law that the Departments have set forth in other contexts, the Departments disagree that such correspondence violates the APA. Instead, it shows the Departments' consistent interpretation and the Departments' intent to better align the regulations with the Act through this rulemaking.

6.3. 30-Day Comment Period

Comment: Commenters raised concerns with the 30-day comment period, arguing that the Departments should extend the comment period to at least 60 days or should reissue the rule with a new 60-day comment period. Due to the complex nature of the rule and its length, commenters requested additional time to comment, asserting that such time is needed to meet APA requirements that agencies provide the public with a ''meaningful opportunity'' to comment. Commenters also claimed that the 30-day comment period was particularly problematic due to the COVID–19 pandemic, which caused disruption and limited staff capacity for some commenters. Moreover, commenters stated that there should be no urgency to publish the rule due to the southern border being ''blocked'' due to COVID–19. Finally, commenters referenced the companion data collection under the Paperwork Reduction Act, which allowed for a 60-day comment period.

Response: The Departments believe the 30-day comment period was sufficient to allow for meaningful public input, as evidenced by the almost 89,000 public comments received, including numerous detailed comments from interested organizations. The APA does not require a specific comment period length, *see* 5 U.S.C. 553(b), (c), and although Executive Orders 12866, 58 FR 51735 (Sept. 30, 1993), and 13563, 76 FR 3821 (Jan. 18, 2011), recommend a comment period of at least 60 days, a 60-day period is not required. Federal courts have presumed 30 days to be a reasonable comment period length. For example, the D.C. Circuit has stated that, although a 30-day period is often the ''shortest'' period that will satisfy the APA, such a period is generally ''sufficient for interested persons to meaningfully review a proposed rule and provide informed comment,'' even when ''substantial rule changes'' are proposed. *Nat'l Lifeline Ass'n* v. *Fed. Commc'ns Comm'n,* 921 F.3d 1102, 1117 (D.C. Cir. 2019) (citing *Petry* v. *Block,* 737 F.2d 1193, 1201 (D.C. Cir. 1984)).

Further, litigation has mainly focused on the reasonableness of comment periods shorter than 30 days, often in the face of exigent circumstances. *See, e.g., N. Carolina Growers' Ass'n, Inc.* v. *United Farm Workers,* 702 F.3d 755, 770 (4th Cir. 2012) (analyzing the sufficiency of a 10-day comment period); *Omnipoint Corp.* v. *FCC,* 78 F.3d 620, 629–30 (D.C. Cir. 1996) (15-day comment period); *Northwest Airlines, Inc.* v. *Goldschmidt,* 645 F.2d 1309, 1321 (8th Cir. 1981) (7-day comment period). In addition, the Departments are not aware of any case law holding that a 30-day comment period was insufficient, and the significant number of detailed public comments is evidence that the 30-day period was sufficient for the public to meaningfully review and provide informed comment. *See, e.g., Little Sisters of the Poor,* 140 S. Ct. at 2385 (''The object [of notice and comment], in short, is one of fair notice.'' (citation and quotation marks omitted)).

One commenter noted that the comment period in the rule regarding the edits to the Form I–589, Application for Asylum and for Withholding of Removal, was 60 days, while the comment period for the substantive portions of the rule was only 30 days. In most cases, by statute, the Paperwork Reduction Act requires a 60-day comment period for proposed information collections, such as the Form I–589. 44 U.S.C. 3506(c)(2)(A). Although the statute allows an exception for proposed collections of information contained in a proposed rule that will be reviewed by the Director of the Office of Management and Budget under 44 U.S.C. 3507, *see* 44 U.S.C. 3506(c)(2)(B), the Departments sought a 60-day comment period to provide the public with additional time to comment on the form changes. In contrast, as explained above, there is no similar statutory requirement for the proposed rule itself.

6.4. Agency Is Acting Beyond Authority

Comment: At least one organization emphasized the Departments' reliance on *Brand X,* 545 U.S. at 982, as a justification for the portions of the rule overruling circuit court decisions relating to asylum. *See* 85 FR at 36265, n.1. One organization claimed the Departments ''ignore[d]'' the Supreme Court's decision in *Kisor* v. *Wilkie,* 139 S. Ct. 2400 (2019), which ''follows the recent trend towards limiting deference to an agency's interpretation of its own rules.'' According to the organization, *Brand X* can be interpreted to mean that, where statutory or regulatory terms are generally ambiguous and the agency has not ruled on a particular issue, circuit court law addressing the issue in question governs only until ''the agency has issued a dispositive interpretation concerning the meaning of a genuinely ambiguous statute or regulation.'' The organization also noted that *Chevron* deference requires a Federal court to accept an agency's ''reasonable construction of an ambiguous statute,'' emphasizing that the distinction between ''genuinely ambiguous language'' and ''plain language'' is crucial. *See Chevron,* 467 U.S. at 843–44, n.11.

The organization then alleged that the Departments' reliance on *Brand X* ''to entirely eviscerate Federal court caselaw'' is misplaced and contrary to controlling law. According to the organization, the Departments failed to demonstrate that each instance of the statutory language they seek to overrule is ''genuinely ambiguous,'' and the organization cited *Kisor,* 139 S. Ct. 2400, to support its claim that deference to ''agency regulations should not be afforded automatically.'' The organization claimed that *Kisor* limits the ability to afford deference unless (1) a regulation is genuinely ambiguous; (2) the agency's interpretation is reasonable regarding text, structure, and history; (3) the interpretation is the agency's official position; (4) the regulation implicates the agency's expertise; and (5) the regulation reflects the agency's ''fair and considered judgment.'' The organization contended that the Departments failed to meet these criteria, alleging that the proposed rule attempts to ''re-write asylum law rather than interpret the statute.''

Multiple commenters claimed that the rule is in opposition to the asylum criteria established by Congress and expressed concern that the rule was drafted without congressional input.

Response: The Departments did not ignore *Kisor,* 139 S. Ct. 2400. *Kisor* examined the scope of *Auer* deference, which affords deference to an agency's ''reasonable readings of genuinely ambiguous regulations.'' *Id.* at 2408 (citing *Auer* v. *Robbins,* 519 U.S. 452 (1997)). Here, ambiguous regulations are not at issue; instead, the Departments amended the regulations based on their reading of ambiguities in the statute, in accordance with Congress's presumed intent for the Departments to resolve these ambiguities. *See* 85 FR at 36265 n.1 (citing *Brand X,* 545 U.S. at 982).

The Departments disagree that the rulemaking ''eviscerates'' case law. As explained in the NPRM, ''administrative agencies are not bound by prior judicial interpretations of ambiguous statutory interpretations, because there is 'a presumption that Congress, when it left ambiguity in a statute meant for

implementation by an agency, understood that the ambiguity would be resolved, first and foremost, by the agency, and desired the agency (rather than the courts) to possess whatever degree of discretion the ambiguity allows.' '' *Matter of R–A–,* 24 I&N Dec. at 631 (quoting *Brand X,* 545 U.S. at 982) (quotation marks and citations omitted); *see also* 85 FR at 36265 n.1; *Ventura,* 537 U.S. at 16 (''Within broad limits the law entrusts the agency to make the basic asylum eligibility decision here in question. In such circumstances a judicial judgment cannot be made to do service for an administrative judgment. Nor can an appellate court intrude upon the domain which Congress has exclusively entrusted to an administrative agency. A court of appeals is not generally empowered to conduct a *de novo* inquiry into the matter being reviewed and to reach its own conclusions based on such an inquiry.'' (alteration, citations, and quotation marks omitted)). Moreover, '' 'judicial deference to the Executive Branch is especially appropriate in the immigration context,' where decisions about a complex statutory scheme often implicate foreign relations.'' *Cuellar de Osorio,* 573 U.S. at 56–57 (quoting *INS* v. *Aguirre-Aguirre,* 526 U.S. 415, 425 (1999)).

Further, the Departments disagree that the rulemaking rewrites asylum law or that it conflicts with the asylum criteria established by Congress. Congress statutorily authorized the Attorney General to, consistent with the statute, make discretionary asylum determinations, INA 208(b)(1)(A), 8 U.S.C. 1158(b)(1)(A), establish additional limitations and conditions on asylum eligibility, INA 208(b)(2)(C), 8 U.S.C. 1158(b)(2)(C), and establish other conditions and limitations on consideration of asylum applications, INA 208(d)(5)(B), 8 U.S.C. 1158(d)(5)(B). The changes made by this rulemaking are consistent with those congressional directives. Regarding commenters' concerns that the rule was drafted without congressional input, the Departments once again point to Congress's statutory delegation of authority to the Attorney General. *See* INA 103(g)(1), (2), 8 U.S.C. 1103(g)(1), (2) (granting the Attorney General the ''authorities and functions under this chapter and all other laws relating to the immigration and naturalization of aliens,'' and directing the Attorney General to ''establish such regulations . . . and perform such other acts as the Attorney General determines to be necessary for carrying out this section''). Congress, in other words, has already delegated to the Attorney General the power to promulgate rules such as this one, and no further congressional input is required.

6.5. Violates Separation of Powers

One organization emphasized that the Departments only have authority to ''faithfully interpret'' a statute, not to rewrite it. The organization contended that ''[r]ulemaking is not an opportunity for an agency to engage in an unauthorized writing exercise that duplicates the legislative role assigned to Congress.'' Another commenter claimed there is an ''urgent need'' for checks and balances on the ''power'' of immigration authorities in the asylum process, alleging that the U.S. government is allowing ICE and CBP to put lives in danger due to ''lack of oversight.'' One commenter contended that revising asylum law ''is not an executive branch function.''

Response: The Departments are not rewriting statutes. As explained throughout this final rule in various sections, the Departments are statutorily authorized to promulgate this rule under section 208(b)(1)(A) of the Act, 8 U.S.C. 1158(b)(1)(A) (authority to make discretionary asylum determinations), section 208(b)(2)(C) of the Act, 8 U.S.C. 1158(b)(2)(C) (authority to establish additional limitations and conditions on asylum eligibility), and section 208(d)(5)(B) of the Act, 8 U.S.C. 1158(d)(5)(B) (authority to establish other conditions and limitations on consideration of asylum applications). In section 103(a)(1) and (3) of the INA, 8 U.S.C. 1103(a)(1), (3), Congress has conferred upon the Secretary broad authority to administer and enforce the immigration laws and to ''establish such regulations . . . as he deems necessary for carrying out his authority'' under the immigration laws. Under section 103(g)(1), (2) of the Act, 8 U.S.C. 1103(g)(1), (2), Congress provided the Attorney General with the ''authorities and functions under this chapter and all other laws relating to the immigration and naturalization of aliens,'' and directed the Attorney General to ''establish such regulations . . . and perform such other acts as the Attorney General determines to be necessary for carrying out this section.'' Thus, the Departments derive authority to promulgate this rule from the statute and issued this rule consistent with the statute, not in contravention of it. Moreover, the Departments have promulgated this rule in accordance with the APA's rulemaking process. *See* 5 U.S.C. 553; *see also* Sections II.C.6.2, 6.3 of this preamble.

The Departments also note that, although an agency ''must give effect to the unambiguously expressed intent of Congress,'' if Congress ''has explicitly left a gap for the agency to fill, there is an express delegation of authority to the agency to elucidate a specific provision of the statute by regulation. Such legislative regulations are given controlling weight unless they are arbitrary, capricious, or manifestly contrary to the statute.'' *Chevron,* 467 U.S. at 843–44; *see also Aguirre-Aguirre,* 526 U.S. at 424–25 (''It is clear that principles of *Chevron* deference are applicable to [the INA]. The INA provides that '[t]he Attorney General shall be charged with the administration and enforcement' of the statute and that the 'determination and ruling by the Attorney General with respect to all questions of law shall be controlling.' . . . In addition, we have recognized that judicial deference to the Executive Branch is especially appropriate in the immigration context where officials 'exercise especially sensitive political functions that implicate questions of foreign relations.' '' (citations omitted)). Congress has clearly spoken in the Act, *see* INA 208(b)(1)(A), 8 U.S.C. 1158(b)(1)(A); INA 208(b)(2)(C), 8 U.S.C. 1158(b)(2)(C); INA 208(d)(5)(B), 8 U.S.C. 1158(d)(5)(B); and INA 103(g)(1), (2), 8 U.S.C. 1103(g)(1), (2), and the Departments properly engaged in this rulemaking, consistent with 5 U.S.C. 553, to effectuate that statutory scheme. To the extent that comments disagree with provisions of the INA, such comments are properly directed to Congress, not the Departments.

6.6. Congress Should Act

Comment: Some commenters stated that Congress, not the Departments, must make the sorts of changes to the asylum procedures set out in the proposed rule. Commenters cited a variety of reasons why these changes are most appropriately the providence of Congress, including commenters' belief that the rule would effectively end or eliminate asylum availability and limit how many asylum seekers would receive relief annually, the breadth of the changes in the proposed rule, and alleged inconsistencies between the Act and the rule. Commenters expressed a belief that changes as significant as those proposed should be undertaken only by Congress. Other commenters suggested that Congress should separately enact other legislation to protect asylum seekers.

Response: As stated above, the Departments issued the proposed rule, and in turn are issuing this final rule, pursuant to the authorities provided by

Congress through the HSA and the Act. INA. *See, e.g.,* INA 103(a)(1) and (3), (g)(2), 208, 8 U.S.C. 1101(a)(1) and (3), (g)(2), 1158.[81] Despite commenters' statements, the provisions of the rule are consistent with these authorities and the Act, as discussed above. *See, e.g.,* Sections II.C.2, II.C.3, II.C.4, and II.C.6.1 of this preamble.

Should Congress enact legislation that amends the provisions of the Act that are interpreted and affected by this rule, the Departments will engage in future rulemaking as needed. Commenters' discussion of specific possible legislative proposals or initiatives, however, is outside of the scope of this rule.

6.7. Violates Constitutional Rights

Comment: One organization contended that the application of the ''interpersonal'' and ''private'' categories to domestic and gender-based violence would violate the Equal Protection Clause. The organization claimed the presumption created by these categories would have a disproportionate effect on women, who are much more likely than men to experience violence by an intimate partner.

Another organization alleged that the rule would essentially prevent women, children, LGBTQ individuals, people of color, survivors of violence, and torture escapees from obtaining asylum protection, claiming this violates the ''spirit and letter'' of both the Fifth Amendment and the Refugee Act of 1980. According to the organization, the rule is designed to ''eliminate due process'' and create ''impossible new legal standards'' to prevent refugees from obtaining asylum. One organization emphasized generally that asylum seekers should not be treated like criminals but should instead be shown dignity and respect; the organization noted that these individuals should also be given judicial due process.

Response: The rule makes no classifications prohibited by the Equal Protection Clause; thus, the commenter's allegation that the rule will disproportionately affect various groups—women, children, LGBTQ individuals, people of color, and survivors of violence and torture—is unfounded. The Departments do not track the factual bases for each asylum application, and each application is adjudicated on a case-by-case basis in accordance with the evidence and applicable law. Moreover, the changes alleged by commenters to have a disparate impact on discrete groups are ones rooted in existing law as noted in the NPRM, and commenters provided no evidence that existing law has caused an unconstitutional disparate impact. For allegations of disparate impact based on gender, a ''significantly discriminatory pattern'' must first be demonstrated. *Dothard* v. *Rawlinson,* 433 U.S. 321, 329 (1977). The Departments are unaware of such a pattern, and commenters did not provide persuasive evidence of one, relying principally on anecdotes and isolated statistics, news articles, and reports.[82] Moreover, to the extent that the NPRM may affect certain groups of aliens more than others, those effects are a by-product of the intrinsic demographic distribution of claims, and a plausible equal protection claim will not lie in such circumstances. *See Regents of Univ. of Cal.,* 140 S. Ct. at 1915–16 (impact of a policy on a population that is intrinsically skewed demographically does not established a plausible claim of animus, invidious discrimination, or an equal protection violation).

For allegations of disparate impact based on race, case law has ''not embraced the proposition that a law or other official act, without regard to whether it reflects a racially discriminatory purpose, is unconstitutional [s]olely because it has a racially disproportionate impact. . . . [W]e have not held that a law, neutral on its face and serving ends otherwise within the power of government to pursue, is invalid under the Equal Protection Clause simply because it may affect a greater proportion of one race than of another. Disproportionate impact is not irrelevant, but it is not the sole touchstone of an invidious racial discrimination forbidden by the Constitution.'' *Washington,* 426 U.S. at 239, 242. No discriminatory motive or purpose underlies this rulemaking; it does not address race in any way; [83] and commenters have not explained—logically, legally, or otherwise—how the rule would even affect asylum claims based on persecution because of race.

In regard to allegations that the rule would discriminate against LGBTQ individuals, children, and survivors of violence or torture, the Departments reiterate that the rule applies equally to all asylum seekers. Further, as noted elsewhere, to the extent that the NPRM may affect certain groups of aliens more than others based on the innate characteristics of those who file asylum applications, those effects are a by-product of the intrinsic demographic distribution of claims, and a plausible equal protection claim will not lie in such circumstances. *See Regents of Univ. of Cal.,* 140 S. Ct. at 1915–16 (impact of a policy on a population that is intrinsically skewed demographically does not established a plausible claim of animus, invidious discrimination, or an equal protection violation).

Relatedly, this rule does not eliminate statutory withholding of removal or protection under the CAT regulations, through which the United States continues to fulfill its commitments under the 1967 Refugee Protocol, consistent with the Refugee Act of 1980 and subsequent amendments to the INA, and the CAT, consistent with FARRA. *See R–S–C,* 869 F.3d at 1188, n.11 (explaining that ''the Refugee Convention's non-refoulement principle—which prohibits the deportation of aliens to countries where the alien will experience persecution—is given full effect by the Attorney General's withholding-only rule''); *Cazun* v. *Att'y Gen. U.S.,* 856 F.3d 249, 257 n.16 (3d Cir. 2017); *Ramirez-Mejia* v. *Lynch,* 813 F.3d 240, 241 (5th Cir. 2016); *Maldonado,* 786 F.3d at 1162 (explaining that Article 3 of the CAT, which sets out the non-refoulement obligations of parties, was implemented in the United States by the FARRA and its implementing regulations).

The rule does not eliminate due process. As explained previously in this rule, due process in an immigration proceeding requires notice and an opportunity to be heard. *See LaChance,* 522 U.S. at 266 (''The core of due process is the right to notice and a meaningful opportunity to be heard.''). The rule does not eliminate the notice of charges of removability against an alien, INA 239(a)(1), 8 U.S.C. 1229(a)(1), or the opportunity for the alien to make his or her case to an immigration judge, INA 240(a)(1), 8 U.S.C. 1229a(a)(1), or on appeal, 8 CFR 1003.38. Moreover, asylum is a discretionary benefit. *See* INA 208 (b)(1)(A), 8 U.S.C. 1158(b)(1)(A) (stating that the Departments ''may'' grant asylum''); *see also Thuraissigiam,* 140 S. Ct. at 1965 n.4 (''A grant of

[81] In addition, Congress has authorized the Department to ''provide by regulation for any other conditions or limitations on the consideration of an application for asylum'' consistent with the other provisions of the Act. INA 208(d)(5)(B), 8 U.S.C. 1158(d)(5)(B).

[82] The Departments also note that accepting the commenters' assertion that the likelihood of women being subject to intimate-partner violence being greater than that of men necessarily demonstrates an equal protection violation would, in turn, mean that other immigration regulations regarding victims of domestic violence, *e.g.,* 8 CFR 204.2(c), are also unconstitutional because of their putative disparate impact.

[83] The NPRM did not mention race at all, except when quoting the five statutory bases for asylum—race, religion, nationality, political opinion, and membership in a particular social group.

asylum enables an alien to enter the country, but even if an applicant qualifies, an actual grant of asylum is discretionary.''). The Attorney General and the Secretary are statutorily authorized to limit and condition asylum eligibility under section 208(b)(2)(C), (d)(5)(B) of the Act, 8 U.S.C. 1158(b)(2)(C), (d)(5)(B), by regulation and consistent with the Act, and courts have found that aliens have no cognizable due process interest in the discretionary benefit of asylum. *See Yuen Jin,* 538 F.3d at 156–57; *Ticoalu,* 472 F.3d at 11 (citing *DaCosta,* 449 F.3d at 50). The Departments properly exercised that authority in this rulemaking, and that exercise does not implicate due process claims. Finally, the rule does not treat aliens ''like criminals,'' as commenters alleged. Aliens retain all due process rights to which they are entitled under law, and the rule does not change that situation.

6.8. Violates International Law

Comment: Commenters asserted that the proposed rule violates the Convention on the Rights of the Child (''CRC'') because the United States, as a signatory, is obligated to ''refrain from acts that would defeat the object and purpose of the Convention.'' Commenters averred that the CRC protects the rights of children to seek asylum; therefore, commenters argued, the United States must protect the right of children to seek asylum. Commenters also asserted that the proposed rule violates the Refugee Convention and the CRC by requiring adjudicators to presume that many child-specific forms of persecution do not warrant a grant of asylum. Commenters alleged that this will result in children being returned to danger in violation of the language and spirit of the Refugee Convention and the CRC.

One commenter cited Article 14 of the Universal Declaration of Human Rights (''UDHR''), G.A. Res. 217A (III), U.N. Doc. A/810 (1948), which states that ''[e]veryone has the right to seek and to enjoy in other countries asylum from persecution.'' That commenter asserted that the proposed revisions unnecessarily hinder access to asylum in contradiction of that right. Commenters also asserted that, under Article 34 of the Refugee Convention, the United States has an obligation to extend grants of asylum ''as far as possible'' to eligible refugees. These commenters asserted that this requires adjudicators to, at the very least, exercise a general presumption in favor of individuals who meet the definition of refugee. To do otherwise would not meet the United States' obligation to facilitate ''as far as possible'' the assimilation and naturalization of individuals who qualify as refugees.

Commenters criticized the Departments' statements that the continued viability of statutory withholding of removal, as referenced in the preamble to the NPRM, meets the United States' non-refoulement obligations. Commenters asserted that this is a misreading of the scope of both domestic and international obligations. As an initial matter, commenters averred that the Refugee Act of 1980, as implemented, was designed to give full force to the United States' obligations under the Refugee Convention, to the extent applicable by incorporation in the 1967 Protocol. Commenters argued that these obligations are not limited to one article of the Refugee Convention and are not limited to not returning an individual to a country where he or she would face persecution or other severe harm. Rather, commenters asserted, the obligations also require the United States to ensure that refugees are treated fairly and with dignity, and are guaranteed freedom of movement and rights to employment, education, and other basic needs. Commenters also cited the Refugee Convention's provision to provide a pathway to permanent status for refugees, which the commenters asserted is reflected in the asylum scheme implemented by the Refugee Act, not the statutory withholding of removal provisions. Commenters argued that narrowing the opportunity to receive asylum through the implementation of numerous regulatory obstacles makes asylum—and therefore permanent status—unattainable, which is inconsistent with the United States' obligations under U.S. and international law. Commenters also generally asserted that allowing immigration judges to pretermit applications for asylum violates the principle of non-refoulement.

Commenters generally asserted that the culmination of the proposed rule's procedural and substantive changes subvert the purpose of the Refugee Act, which was to implement the United States' commitments made through ratification of the 1967 Protocol. Further, one organizational commenter argued that the proposed rule ''re-orients the U.S. asylum process away from a principled, humanitarian approach focused on identifying individuals with international protection needs towards one that establishes a set of obstacles which must be overcome by individuals seeking international protection.'' Commenters also criticized the Departments' statements that the continued viability of statutory withholding of removal ensures continued compliance with international obligations. Specifically, commenters noted that many of the provisions of the proposed rule also affect eligibility for protection under statutory withholding of removal. Commenters argued that the proposed changes that affect statutory withholding of removal would not adequately meet the United States' obligations under the non-refoulement provisions of Article 33.

Response: This rule is consistent with the United States' obligations as a party to the 1967 Protocol, which incorporates Articles 2 through 34 of the 1951 Refugee Convention.[84] This rule is also consistent with U.S. obligations under Article 3 of the CAT, as implemented in the immigration regulations pursuant to the implementing legislation.

Regarding the CRC, as an initial point, although the United States has signed the instrument, the United States has not ratified it; thus, it cannot establish any binding obligations. *See Martinez-Lopez* v. *Gonzales,* 454 F.3d 500, 502 (5th Cir. 2006) (''The United States has not ratified the CRC, and, accordingly, the treaty cannot give rise to an individually enforceable right.''). Moreover, contrary to commenters' assertions, nothing in the rule is inconsistent with the CRC. Under the CRC, states are obligated to ''take appropriate measures to ensure that a child who is seeking refugee status or who is considered a refugee in accordance with applicable international or domestic law and procedures shall, whether unaccompanied or accompanied by his or her parents or by any other person, receive appropriate protection and humanitarian assistance in the enjoyment of applicable rights set forth in the present Convention and in other international human rights or humanitarian instruments to which the said States are Parties.'' Convention on the Rights of the Child, art. 22, *opened for signature* Nov. 20, 1989, 28 I.L.M. 1448. Because this rule is consistent with the Refugee Act and the United States' obligations under the Refugee

[84] The Departments also note that neither of these treaties is self-executing, and that, therefore, neither is directly enforceable in the U.S. legal context except to the extent that they have been implemented by domestic legislation. *Al-Fara* v. *Gonzales,* 404 F.3d 733, 743 (3d Cir. 2005) (''The 1967 Protocol is not self-executing, nor does it confer any rights beyond those granted by implementing domestic legislation.''); *Auguste* v. *Ridge,* 395 F.3d 123, 132 (3d Cir. 2005) (''CAT was not self-executing''); *see also Stevic,* 467 U.S. at 428 n.22 (''Article 34 merely called on nations to facilitate the admission of refugees to the extent possible; the language of Article 34 was precatory and not self-executing.'').

Convention and Article 3 of the CAT, it is consistent with the CRC.

Similarly, the Departments disagree with commenters' assertions that the rule violates the CRC by creating a presumption against ''child-specific forms of persecution.'' As an initial point, nothing in the rule singles out children or ''child-specific'' claims; rather, the rule applies to all types of claims regardless of the demographic characteristics of the applicant. Moreover, although certain types of children are afforded more protections by statute than similarly-situated non-child asylum applicants, *see e.g.,* INA 208(b)(3)(C), 8 U.S.C. 1158(b)(3)(C), this rule does not affect those protections. Further, generally applicable legal requirements, including credibility standards and burdens of proof, are not relaxed or obviated for juvenile respondents. *See* EOIR, *Operating Policies and Procedures Memorandum 17–03: Guidelines for Immigration Court Cases Involving Juveniles, Including Unaccompanied Alien Children* 7 (Dec. 20, 2017), *https://www.justice.gov/eoir/file/oppm17-03/download.*

The UDHR is a non-binding human rights instrument, not an international agreement; thus it does not impose legal obligations on the United States. *Alvarez-Machain,* 542 U.S. at 728, 734–35 (citing John P. Humphrey, *The U.N. Charter and the Universal Declaration of Human Rights,* in The International Protection of Human Rights 39, 50 (Evan Luard ed., 1967) (quoting Eleanor Roosevelt as stating that the UDHR is '' 'a statement of principles . . . setting up a common standard of achievement for all peoples and all nations' and 'not a treaty or international agreement . . . impos[ing] legal obligations.' '')). Moreover, although article 14(1) of the UDHR proclaims the right of ''everyone'' to ''seek and to enjoy'' asylum, it does not purport to state specific standards for establishing asylum eligibility, and it certainly cannot be read to impose an obligation on the United States to grant asylum to ''everyone,'' *see id.,* or to prevent the Attorney General and Secretary from exercising the discretion granted by the INA, consistent with U.S. obligations under international law, *see* UNHCR, *Advisory Opinion on the Extraterritorial Application of* Non-Refoulement *Obligations under the 1951 Convention relating to the Status of Refugees and its 1967 Protocol* 3 (Jan. 26, 2007), *https://www.unhcr.org/4d9486929.pdf* (''The principle of *non-refoulement* as provided for in Article 33(1) of the 1951 Convention does not, as such, entail a right of the individual to be granted asylum in a particular State.'').

Similarly, the Departments disagree with commenters' unsupported assertions that the United States' obligation to ''as far as possible facilitate the assimilation and naturalization of refugees'' requires a general presumption in favor of granting asylum to all individuals who apply. Rather, as the Supreme Court has noted, Article 34 ''is precatory; it does not require the implementing authority actually to grant asylum to all those who are eligible.'' *Cardoza-Fonseca,* 480 U.S. at 441.

Moreover, the United States implemented the non-refoulement provision of Article 33(1) of the Refugee Convention through the withholding of removal provision at section 241(b)(3) of the Act, 8 U.S.C. 1231(b)(3), and the non-refoulement provision of Article 3 of the CAT through the CAT regulations, rather than through the asylum provisions at section 208 of the Act, 8 U.S.C. 1158. *See Cardoza-Fonseca,* 480 U.S. at 429, 440–41 & n.25; *Matter of O–F–A–S–,* 27 I&N Dec. at 712; FARRA; 8 CFR 208.16(b), (c), 208.17 through 208.18; 1208.16(b), (c); 1208.17 through 1208.18. This rule's limitations on asylum, including the ability of immigration judges to pretermit applications, do not violate the United States' non-refoulement obligations.

At the same time, the changes to statutory withholding of removal and CAT protection do not misalign the rule with the non-refoulement provisions of the 1951 Refugee Convention, the 1967 Protocol, and the CAT. As explained above, the Departments have properly asserted additional standards and clarification for immigration judges to follow when evaluating claims for statutory withholding of removal and protection under the CAT.

6.9. Executive Order 12866 and Costs and Benefits of the Rule; Regulatory Flexibility Act

Comment: At least one commenter alleged that the rule creates ''serious inconsistencies'' with sections 208(a) and 240(b) of the Act, 8 U.S.C. 1158(a), 1229a(b), and the Constitution; as a result, commenters stated, the rule constitutes a ''significant regulatory action'' under Executive Order 12866 and the Departments must comply with the order's analysis requirements, specifically sections 6(a)(3)(B) and (C).

Multiple organizations claimed that the costs and benefits section of the rule fails to address the cost to the ''reputation'' of the United States, as well as the cost of losing the ''talent, diversity, and innovation'' brought by asylees.

Another organization emphasized that it is difficult to evaluate whether the Departments' ''multiple overlapping proposals to amend the same asylum provisions'' comply with Executive Order 12866's mandate that ''[e]ach agency shall avoid regulations that are inconsistent, incompatible, or duplicative with its other regulations or those of other Federal agencies.'' Citing *CSX Transportation, Inc.* v. *Surface Transportation Board,* 754 F.3d 1056, 1065–66 (D.C. Cir. 2014), the organization claimed it would be ''arbitrary and capricious'' for the Departments to account for costs and benefits in favor of this proposal that are identical to the costs and benefits ''already priced into the other revisions of the same provision.'' [85] The organization contended that there is no indication in the rule that the Departments have attempted to identify such overlap.

Commenters disagreed with the Department's assertion, pursuant to the Regulatory Flexibility Act (''RFA'') requirements, that the rule would ''not have a significant economic impact on a substantial number of small entities'' and that the rule only regulates individuals and not small entities. 85 FR at 36288–89. For example, commenters argued that the combined effect of the rule's provisions would, inter alia, affect how practitioners accept cases, manage dockets, or assess fees. Commenters asserted that these effects would, in turn, impact the overall ability of practitioners to provide services and affect aliens' access to representation. In addition, commenters stated that these changes demonstrate the rule would in fact regulate small entities, namely the law firms or other organizations who appear before the Departments.

Response: The Departments agree with commenters that the rule is a ''significant regulatory action.'' As stated in the proposed rule at section V.D, the rule was considered a ''significant regulatory action.'' 85 FR at 36289. As a result, the rule was submitted to the Office of Management and Budget for review, and the Departments included the required analysis of the rule's costs and benefits. *Id.* at 36289–90.

Regarding commenters' concerns that the analysis failed to consider intangible costs like alleged costs to the United States' reputation or the lost ''talent, diversity, and innovation'' from asylees,

[85] The Departments note that reliance on *CSX Transportation* is misplaced because that case involved the agency's consideration of costs to determine a maximum relief penalty amount and was not related to the consideration of costs in the context of an agency's required cost-benefit analysis.

the Departments note that such alleged costs are, in fact, the nonquantifiable opinions of the commenters. The Departments are not required to analyze opinions. Even if commenters' opinions about intangible concepts without clear definitions could be translated into measurable or qualitatively discrete considerations the Departments are unaware of any standard or metric to evaluate the cost of concepts such a country's reputation or ''innovation.'' Moreover, the fact-specific nature of asylum applications and the lack of granular data on the facts of every asylum application prevent the Departments from quantifying particular costs. Further, although Executive Order 12866 observes that nonquantifiable costs are important to consider, the order requires their consideration only to the extent that they can be usefully estimated, and the Departments properly assessed the rules using appropriate qualitative considerations. *See* 85 FR at 36289–90.

As stated above in Section II.C.6.9 of this preamble, each of the Departments' regulations stands on its own. This regulation is not ''inconsistent, incompatible, or duplicative'' with other proposed or final rules published by the Departments, and the Departments disagree with the implication that all rules that would affect one underlying area of the Act, such as asylum eligibility, must be issued in one single rulemaking to comply with Executive Order 12866. *Cf. Ctr. for Biological Diversity* v. *EPA,* 722 F.3d 401, 410 (D.C. Cir. 2013) (agencies have discretion to address an issue through different rulemakings over time).

As noted in the NPRM, the Departments believe that the rule will provide a significant net benefit by allowing for the expeditious and efficient resolution of asylum cases by reducing the number of meritless claims before the immigration courts, thereby providing the Departments with ''the ability to more promptly grant relief or protection to qualifying aliens.'' 85 FR at 36290. These benefits will ensure that the Departments' case volumes do not increase to an insurmountable degree, which in turn will leave additional resources available for a greater number of asylum seekers. Contrary to commenters' claims, the rule will not prevent aliens from submitting asylum applications or receiving relief or protection in appropriate cases. Moreover, the rule is not imposing any new costs on asylum seekers. Additionally, any costs imposed on attorneys or representatives for asylum seekers will be minimal and limited to the time it will take to become familiar with the rule. Immigration practitioners are already subject to professional responsibility rules regarding workload management, 8 CFR 1003.102(q)(1), and are already accustomed to changes in asylum law based on the issuance of new precedential decisions from the BIA or the courts of appeals.

Also, although becoming familiar with such a decision or with this rule may require a certain, albeit small, amount of time, any time spent on this process will likely be offset by the future benefits of the rule. Indeed, one purpose of the rule is to encourage clearer and more efficient adjudications, *see e.g.,* 85 FR at 36290, thus reducing the need for practitioners to become familiar with the inefficient, case-by-case approach that is currently employed for adjudicating issues such as firm resettlement. In addition, the Departments note that the prospective application of the rule will further diminish the effect of the rule on practitioners, as no practitioners will be required to reevaluate any cases or arguments that they are currently pursuing.

The Departments also reject the assertion that the rule would have a significant impact on small entities. The rule applies to asylum applicants, who are individuals, not entities. *See* 5 U.S.C. 601(6). The rule does not limit in any way the ability of practitioners to accept cases, manage dockets, or assess fees. Indeed, nothing in the rule in any fashion regulates the legal representatives of such individuals or the organizations by which those representatives are employed, and the Departments are unaware of cases in which the RFA's requirements have been applied to legal representatives of entities subject to its provisions, in addition to or in lieu of the entities themselves. *See* 5 U.S.C. 603(b)(3) (requiring that an RFA analysis include a description of and, if feasible, an estimate of the number of ''small entities'' to which the rule ''will apply''). To the contrary, case law indicates that indirect effects on entities not regulated by a proposed rule are not subject to an RFA analysis. *See, e.g., Mid-Tex Elec. Co-op, Inc.* v. *FERC,* 773 F.2d 327, 342–43 (D.C. Cir. 1985) (''[W]e conclude that an agency may properly certify that no regulatory flexibility analysis is necessary when it determines that the rule will not have a significant economic impact on a substantial number of small entities that are subject to the requirements of the rule. . . . Congress did not intend to require that every agency consider every indirect effect that any regulation might have on small businesses in any stratum of the national economy. That is a very broad and ambitious agenda, and we think that Congress is unlikely to have embarked on such a course without airing the matter.''); *Cement Kiln Recycling Coalition* v. *EPA,* 255 F.3d 855, 869 (D.C. Cir. 2001) (''Contrary to what [petitioner] supposes, application of the RFA does turn on whether particular entities are the 'targets' of a given rule. The statute requires that the agency conduct the relevant analysis or certify 'no impact' for those small businesses that are 'subject to' the regulation, that is, those to which the regulation 'will apply.'. . . The rule will doubtless have economic impacts in many sectors of the economy. But to require an agency to assess the impact on all of the nation's small businesses possibly affected by a rule would be to convert every rulemaking process into a massive exercise in economic modeling, an approach we have already rejected.'' (citing *Mid-Tex,* 773 F.2d 327 at 343)); *see also White Eagle Co-op Ass'n* v. *Conner,* 553 F.3d 467, 480 (7th Cir. 2009) (''The rule that emerges from this line of cases is that small entities directly regulated by the proposed [rulemaking]—whose conduct is circumscribed or mandated—may bring a challenge to the RFA analysis or certification of an agency. . . . However, when the regulation reaches small entities only indirectly, they do not have standing to bring an RFA challenge.'').

Further, DOJ reached a similar conclusion in 1997 involving a broader rulemaking regarding asylum adjudications. *See* Inspection and Expedited Removal of Aliens; Detention and Removal of Aliens; Conduct of Removal Proceedings; Asylum Procedures, 62 FR 444, 453 (Jan. 3, 1997) (certifying that the rule would not have a significant impact on a substantial number of small entities because it ''affects only Federal government operations'' by revising the procedures for the ''examination, detention, and removal of aliens''). That conclusion was reiterated in the interim rule, 62 FR 10312, 10328 (Mar. 6, 1997), which was adopted with no noted challenge or dispute. This final rule is similar, in that it, too, affects only the operations of the Federal government by amending a subset of the procedures the government uses to process certain aliens. The Departments thus believe that the experience of implementing the prior rule supports their conclusion that there is no evidence that the current rule will have a significant impact on small entities as contemplated by the RFA or an applicable executive order.

6.10. Trafficking Victims Protection Reauthorization Act

Comment: Commenters argued that the proposed rule violates the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008 (''TVPRA''), Public Law 110–457, 122 Stat. 5044, by failing to consider its impact on applications for relief submitted by UAC. Specifically, commenters cited the TVPRA's instruction that ''[a]pplications for asylum and other forms of relief from removal in which an unaccompanied alien child is the principal applicant shall be governed by regulations which take into account the specialized needs of unaccompanied alien children and which address both procedural and substantive aspects of handling unaccompanied alien children's cases.'' 8 U.S.C. 1232(d)(8). Commenters averred that the rule fails to consider how UAC are subjected to and affected by persecution and other harm as well as the particular vulnerabilities of UAC.

Moreover, commenters argued that the proposed rule violates both the text and the spirit of the TVPRA by creating additional hurdles that increase the risk that UAC will be unable to meaningfully participate in the adjudication of their claims for relief. Specifically, commenters averred that it was unlikely that Congress would have provided protections to UAC from the bars to asylum related to the one-year filing deadline and the safe third country, only to then allow immigration judges to pretermit applications for asylum without a hearing.

One organizational commenter criticized the proposed rule's lack of ''meaningful discussion'' regarding how the new procedures would interact with USCIS's initial jurisdiction over applications for asylum from UAC. Commenters also stated that the proposed rule may result in confusion if an immigration judge exercises jurisdiction over a UAC's application that is pending before USCIS. If this were to occur, commenters alleged, the UAC may be required to submit two applications for asylum and also be required to demonstrate an exception to the one-year filing deadline that would not have been applicable to the application before USCIS.

Commenters also asserted that the new discretionary factor regarding accrual of one year or more of unlawful presence would act as a bar to asylum in direct contradiction of Congress's recognition of the need to exempt UACs from the one-year filing deadline. Although commenters acknowledged that this is a discretionary factor and not an outright bar, commenters asserted that even including this as a discretionary factor is contrary to Congress's intent.

Commenters stated that, based on the proposed regulatory language and accompanying preamble language, it is unclear whether asylum officers would be permitted to render a determination that an asylum application is frivolous for UAC who file defensive applications before USCIS in the first instance. By permitting the asylum officer to focus on matters that may be frivolous if the asylum officer identifies indicators of frivolousness, commenters asserted, the interview would become adversarial, in contradiction of Congress's purpose of granting UAC the non-adversarial, child-appropriate setting of an asylum interview for initial review of the asylum application.

Response: As recognized in the proposed rule, UAC[86] are not subjected to expedited removal. *See* 8 U.S.C. 1232(a)(5)(D)(i). Regarding the remainder of the rule, the rule does not violate the TVPRA. The TVPRA enacted multiple procedures and protections specific to UAC that do not apply to other similarly-situated asylum applicants. Although UAC are not subject to either the safe third country exception or the requirement to file an application within one year following the alien's arrival in the United States, INA 208(a)(2)(E), 8 U.S.C. 1158(a)(2)(E), Congress did not exempt UAC from all bars to asylum eligibility. As a result, UAC, like all asylum seekers, (1) may not apply for asylum if they previously applied for asylum and their application was denied, INA 208(a)(2)(C), 8 U.S.C. 1158(a)(2)(C), and (2) are ineligible for asylum if they are subject to any of the mandatory bars at section 208(b)(2)(A)(i)–(vi) of the Act, 8 U.S.C. 1158(b)(2)(A)(i)–(vi), or if they are subject to any additional bars implemented pursuant to the Attorney General's and Secretary's authority to establish additional limitations on asylum eligibility by regulation, *see* INA 208(b)(2)(C), 8 U.S.C. 1158(b)(2)(C). That Congress did not exempt UAC from all bars indicates congressional intent to hold UAC to the same standards to establish eligibility for asylum as other similarly situated applicants unless specifically exempted.

Contrary to commenters' suggestion, this rule does not alter asylum officers' jurisdiction over asylum applications from UAC. *See* INA 208(b)(3)(C), 8 U.S.C. 1158(b)(3)(C). If UAC are placed in removal proceedings under section 240 of the Act, 8 U.S.C. 1229a, and raise asylum claims, immigration judges will continue to refer the claims to asylum officers pursuant to the TVPRA, consistent with the asylum statute and procedures in place prior to the promulgation of this rule. *See* INA 208(b)(3)(C), 8 U.S.C 1158(b)(3)(C). Those asylum officers will determine whether the UAC are eligible for asylum on the basis of this rule. This rule does not affect any other procedure or protection implemented by the TVPRA.

The Departments disagree that the rule undermines the spirit of the TVPRA by adding accrual of unlawful presence for one year or more as a negative discretionary factor. Although the NPRM may have been unclear on the point, its citation to INA 212(a)(9)(B) and (C), 8 U.S.C. 1182(a)(9)(B) and (C), 85 FR at 36284, indicated that its intent was for the phrase ''unlawful presence'' to have the same meaning as in INA 212(a)(9)(B)(ii) and (iii), 8 U.S.C. 1182(a)(9)(B)(ii) and (iii). Under INA 212(a)(9)(B)(iii)(I), 8 U.S.C. 1182(a)(9)(B)(iii)(I), aliens under the age of 18, such as UAC, do not accrue unlawful presence. Thus, commenters' concerns are unfounded, and the Departments are clarifying that point in the final rule.

Further, the Departments have concluded that the safeguards in place for allowing asylum officers to make a finding that an asylum application is frivolous are sufficient to protect UAC in the application process.[87] Even if an asylum officer finds an application is frivolous, the application is referred to an immigration judge, who provides review of the determination. The asylum officer's determination does not render the applicant permanently ineligible for immigration benefits unless the immigration judge or the BIA also makes a finding of frivolousness. 8 CFR 208.20(b), 1208.20(b). Further, asylum officers continue to conduct child appropriate interviews by taking into account age, stage of language development, background, and level of sophistication. *See* USCIS, Interviewing Procedures for Minor Applicants (Aug. 6, 2020), *https://www.uscis.gov/humanitarian/refugees-and-asylum/asylum/minor-children-applying-for-asylum-by-themselves.*

Finally, the Departments note that, for UAC who are not eligible for asylum

[86] UAC are children who (1) have no lawful immigration status in the United States, (2) are under the age of 18, and (3) do not have a parent or legal guardian in the United States or, if in the United States, available to provide care and physical custody. 6 U.S.C. 279(g)(2).

[87] As a practical matter, the Departments note that the statutory mens rea requirement that a frivolous asylum application be ''knowingly'' filed will likely preclude a frivolousness finding against very young UAC.

under this rule but who may still be eligible for withholding of removal under section 241 of the Act, 8 U.S.C. 1231, or protection under the CAT regulations, DOJ is cognizant of the ''special circumstances'' often presented by juvenile respondents in immigration proceedings. DOJ's immigration judges may make certain modifications to ordinary courtroom proceedings to account for juvenile respondents that would not be made for adult respondents. *See* EOIR, Operating Policies and Procedures Memorandum 17–03: Guidelines for Immigration Court Cases Involving Juveniles, Including Unaccompanied Alien Children 4–6 (Dec. 20, 2017), *https://www.justice.gov/eoir/file/oppm17-03/download; see also id. at 7 (directing immigration judges to take* ''*special care*'' *in cases involving UAC by, for example, expediting the consideration of requests for voluntary departure).*

In short, the Departments have fully considered whether the rule will have any particular impacts on UAC that are not already accounted for in existing law or are not addressed in the rule itself. The Departments have also fully considered commenters' concerns. Thus, for the reasons given above, the Departments believe that the rule does not have an unlawful impact on minors in general or on UAC in particular.

7. Retroactive Applicability

Comment: One organization stated generally that nearly all of the NPRM's provisions are illegally retroactive in effect. Multiple commenters noted that, although the NPRM seeks to make its frivolous definition prospective only in application, *see* 85 FR at 36304, it is silent as to whether its other provisions would apply retroactively. As a result, one organization claimed, the inference is that the Departments intend each of the NPRM's remaining provisions to apply to applications that are pending at the time the rule becomes effective. The organization alleged that this would violate the presumption against retroactivity, noting that a regulation cannot be applied retroactively unless Congress has provided a clear statement that the agencies may promulgate regulations with that effect. *See INS* v. *St. Cyr,* 533 U.S. 289, 316–17 (2001). The organization also claimed there is no statute authorizing the Departments to promulgate regulatory changes to asylum that have retroactive effect, contending the provisions of the NPRM would either impair rights concerning, or place new disabilities on, asylum applications already filed. The organization alleged that the proposed changes in the NPRM would harm asylum seekers.

At least one organization claimed that the NPRM's substantive standards would have an impermissible retroactive effect on pending applications. One organization alleged that each standard, including the list of bars to the favorable exercise of discretion, would overrule BIA precedent, attempt to overrule Federal appellate court precedent, shift burdens of proof, or otherwise change settled law. Another organization noted that there are currently more than 300,000 asylum cases pending before the asylum office and almost 1.2 million cases pending before the U.S. immigration courts, many of which include asylum applications. The organization argued that, if the rule is finalized, the Departments ''must clarify'' that its provisions will not be applied retroactively.

One commenter claimed that if the rule is enacted with the retroactive provisions intact, it will immediately be enjoined.

At least one commenter expressed concern that, if the NPRM is applied retroactively, there will be ''mass denials which violate due process,'' and the Departments will be ''tied up in Federal court for the next decade.'' At least one commenter contended that Congress will cease to fund the Departments because it will recognize that the money will be used to fund the attorney fees of litigants pursuant to the Equal Access to Justice Act ''after countless litigants prevail in their suits against [the Departments].''

At least one commenter claimed that, because the Supreme Court is currently attempting to ''reign in the administrative state'' and Congress is ''fed up'' with agency waste, the Departments are ''signing their own death warrants'' by seeking to enact the proposed rule. At least one commenter suggested the Departments' goal is to ''[s]hut down legal immigration by convincing Congress to defund the only agencies capable of adjudicating immigration petitions,'' suggesting this is ''treasonous'' and claiming that those who want to end legal immigration are in the extreme minority. At least one commenter emphasized that legal immigration is beneficial to the national economy but suggested this does not matter if those who care ''are not in a position to stop the train before it drives off a cliff.''

At least one organization claimed that the hundreds of thousands of pending asylum applications implicate a reliance interest in ''the state of the law as it stands.'' At least one organization alleged that this reliance interest is ''further prejudiced'' by the 30-day comment period allowed by the Departments, contending that ''in one swoop, previously eligible applicants may find themselves ineligible without any warning.''

Another organization expressed particular concern for LGBTQ applicants, claiming that applying the rule's standards to over 800,000 pending applications violates Fifth Amendment due process rights that apply ''equally to all people in the United States.'' One organization emphasized that the rule would apply to individuals, many of whom have U.S.-born children, who have already applied for asylum and are waiting on a hearing or interview.

Response: Although the Departments believe that substantial portions of the rule are most appropriately classified as a clarification of existing law rather than an alteration of prior substantive law, *see Levy* v. *Sterling Holding Co., LLC,* 544 F.3d 493, 506 (3d Cir. 2008) (''Thus, where a new rule constitutes a clarification—rather than a substantive change—of the law as it existed beforehand, the application of that new rule to pre-promulgation conduct necessarily does *not* have an impermissible retroactive effect, regardless of whether Congress has delegated retroactive rulemaking power to the agency.'' (emphasis in original)), they nevertheless recognize that the potential retroactivity of the rule was not clear in the NPRM. Accordingly, to the extent that the rule changes any existing law, the Departments are electing to make the rule prospective to apply to all asylum applications—including applications for statutory withholding of removal and protection under the CAT regulations—filed on or after its effective date and, for purposes of the changes to the credible fear and related screening procedures, and reasonable fear review procedures, to all aliens apprehended or otherwise encountered by DHS on or after the effective date.[88] Nevertheless, to the extent that the rule merely codifies existing law or authority, nothing in the rule precludes adjudicators from

[88] In addition to serving as a bar to refugee admission and the granting of asylum, the concept of firm resettlement also operates as a bar to the adjustment of status of an asylee. INA 209(b)(4), 8 U.S.C. 1159(b)(4); 8 CFR 209.2(a)(1)(iv) and 1209.2(a)(1)(iv). Consistent with the prospective nature of the rule, the Departments will apply the new regulatory definitions of ''firm resettlement'' in 8 CFR 208.15 and 1208.15 for purposes of INA 209(b)(4), 8 U.S.C. 1159(b)(4), only to aliens who apply for asylum, are granted asylum, and then subsequently apply for adjustment of status, where all of these events occur on or after the effective date of this rule.

applying that existing authority to pending cases independently of the prospective application of the rule.[89]
