The Departments decline to respond to commenters' assertions about potential implications that the rule's application to pending cases may have, such as ''mass denials'' of asylum applications and impact on future appropriations, as such comments are both unmoored from a reasonable basis in fact and wholly speculative due to the case-by-case and fact-intensive nature of many asylum-application adjudications. Further, as noted, the Departments are applying the rule prospectively, so the underlying factual premise of the commenters' concern is erroneous.

8. Miscellaneous/Other Points

8.1. Likelihood of Litigation

Comment: Commenters opposed the rule because it would ''create a flurry of litigation'' causing ''fundamental aspects of immigration law [to] remain uncertain for many years.''

Response: The Departments recognize that litigation, including the potential for an initial nationwide injunction, has become almost inevitable regarding any immigration policy or regulation that does not provide a perceived benefit to aliens, and they are aware that litigation will likely follow this rule, just as it has others of similar scope. *Cf. DHS* v. *New York,* 140 S. Ct. 599, 599 (2020) (Gorsuch, J. concurring in the grant of a stay) (''On October 10, 2018, the Department of Homeland Security began a rulemaking process to define the term 'public charge,' as it is used in the Nation's immigration laws. Approximately 10 months and 266,000 comments later, the agency issued a final rule. Litigation swiftly followed, with a number of States, organizations, and individual plaintiffs variously alleging that the new definition violates the Constitution, the Administrative Procedure Act, and the immigration laws themselves. These plaintiffs have urged courts to enjoin the rule's enforcement not only as it applies to them, or even to some definable group having something to do with their claimed injury, but as it applies to *anyone.*''). The Departments are also aware of the pernicious effects of nationwide injunctions. *See, e.g., Trump* v. *Hawaii,* 138 S. Ct. 2392, 2424–25 (2018) (Thomas, J. concurring) (''Injunctions that prohibit the Executive Branch from applying a law or policy against anyone—often called 'universal' or 'nationwide' injunctions—have become increasingly common. District courts, including the one here, have begun imposing universal injunctions without considering their authority to grant such sweeping relief. These injunctions are beginning to take a toll on the Federal court system—preventing legal questions from percolating through the Federal courts, encouraging forum shopping, and making every case a national emergency for the courts and for the Executive Branch.'' (footnote omitted)). The Departments do not believe, however, that the inevitability of litigation over contested issues is a sufficient basis to stop them from exercising statutory and regulatory prerogatives in furtherance of the law and the policies of the Executive Branch. Accordingly, the Departments decline the invitation to withdraw the rule due to the threat of litigation.

8.2. DHS Officials

Comment: Commenters also argued that the proposed rule is procedurally invalid due to concerns with the authority of multiple DHS officials. Commenters stated that the rule is invalid because of the service of Ken Cuccinelli at USCIS. For example, commenters cited *L.M.–M.* v. *Cuccinelli,* 442 F. Supp. 3d 1 (D.D.C. 2020), in support of the argument that ''Mr. Cuccinelli's unlawful appointment invalidates any regulations that might be put into effect, implemented, or adopted during his tenure at USCIS.'' Commenters further noted that Mr. Cuccinelli began serving as the head of USCIS over one year ago, on June 10, 2019, despite the 210-day limitation for temporary appointments to senate-confirmed positions implemented by the Federal Vacancies Reform Act of 1998 (''FVRA''), Public Law 105–277, sec. 151, 112 Stat. 2681, 2681–612 through 2618–13 (codified at 5 U.S.C. 3346).

Similarly, commenters stated that Acting Secretary Chad Wolf and Chad Mizelle, the Senior Official Performing the Duties of the General Counsel, both are serving in violation of the FVRA and, accordingly, both lack signature authority that has force or effect. *See* 5 U.S.C. 3348(d)(1).

Response: Neither the NPRM nor this final rule was signed by Mr. Cuccinelli. Thus, the status of Mr. Cuccinelli's service within the Department is immaterial to the lawfulness of this rule. The NPRM and this final rule were signed by Chad Mizelle, the Senior Official Performing the Duties of the General Counsel for DHS, and not by Ken Cuccinelli. As indicated in the proposed rule at Section V.H, Chad Wolf, the Acting Secretary of Homeland Security, reviewed and approved the proposed rule and delegated the signature authority to Mr. Mizelle.

Secretary Wolf is validly acting as Secretary of Homeland Security. On April 9, 2019, then-Secretary Nielsen, who was Senate confirmed, used the authority provided by 6 U.S.C. 113(g)(2) to establish the order of succession for the Secretary of Homeland Security. This change to the order of succession applied to any vacancy. This exercise of the authority to establish an order of succession for DHS pursuant to 6 U.S.C. 113(g)(2) superseded the FVRA and the order of succession found in Executive Order 13753, 81 FR 90667 (Dec. 9, 2016). As a result of this change, and pursuant to 6 U.S.C. 113(g)(2), Kevin K. McAleenan, who was Senate-confirmed as the Commissioner of CBP, was the next successor and served as Acting Secretary without time limitation. Acting Secretary McAleenan subsequently amended the Secretary's order of succession pursuant to 6 U.S.C. 113(g)(2), placing the Under Secretary for Strategy, Policy, and Plans position third in the order of succession, below the positions of the Deputy Secretary and Under Secretary for Management. Because the Deputy Secretary and Under Secretary for Management positions were vacant when Mr. McAleenan resigned, Mr. Wolf, as the Senate-confirmed Under Secretary for Strategy, Policy, and Plans, was the next successor and began serving as the Acting Secretary.

Further, because he has been serving as the Acting Secretary pursuant to an order of succession established under 6 U.S.C. 113(g)(2), the FVRA's prohibition on a nominee's acting service while his or her nomination is pending does not apply, and Mr. Wolf remains the Acting

[89] For example, the rule states that the Secretary or Attorney General, subject to an exception, will not favorably exercise discretion in adjudicating an asylum application for an alien who has failed to satisfy certain tax obligations. 8 CFR 208.13(d)(2)(i)(E) and 1208.13(d)(2)(i)(E). That provision applies only to asylum applications filed on or after the effective date of the rule. However, the rule does not preclude the consideration of unfulfilled tax obligations as a discretionary consideration in adjudicating a pending asylum application based on established case law that may be applied to pending applications. *See, e.g., Matter of A–H–,* 23 I&N Dec. at 782–83 (''Moreover, certain additional factors weigh against asylum for respondent: Specifically, respondent testified that he received money from overseas for his political work, yet he never filed income tax returns in the United States and his children nevertheless received financial assistance from the Commonwealth of Virginia. Respondent's apparent tax violations and his abuse of a system designed to provide relief to the needy exhibit both a disrespect for the rule of law and a willingness to gain advantage at the expense of those who are more deserving.'' (footnote omitted)). In short, existing law will continue to apply to asylum applications filed prior to the effective date of this rule, regardless of whether that law is altered or incorporated into the rule.

Secretary notwithstanding President Trump's September 10 transmission to the Senate of Mr. Wolf's nomination to serve as DHS Secretary. *Compare* 6 U.S.C. 113(a)(1)(A) (cross-referencing the FVRA without the ''notwithstanding'' caveat), *with id.* 113(g)(1)–(2) (noting the FVRA provisions and specifying, in contrast, that section 113(g) provides for acting secretary service ''notwithstanding'' those provisions); *see also* 5 U.S.C. 3345(b)(1)(B) (restricting acting officer service under section 3345(a), in particular, by an official whose nomination has been submitted to the Senate for permanent service in that position).

That said, there have been recent challenges to whether Mr. Wolf's service is invalid, resting on the erroneous contentions that the orders of succession issued by former Secretary Nielsen and former Acting Secretary McAleenan were invalid. The Departments believe those challenges are not based on an accurate view of the law. But even if those contentions are legally correct—meaning that neither former Secretary Nielsen nor former Acting Secretary McAleenan issued a valid order of succession under 6 U.S.C. 113(g)(2)—then the FVRA would have applied, and Executive Order 13753 would have governed the order of succession for the Secretary of Homeland Security from the date of Nielsen's resignation.

The FVRA provides an alternative basis for an official to exercise the functions and duties of the Secretary temporarily in an acting capacity. In that alternate scenario, under the authority of the FVRA, Mr. Wolf would have been ineligible to serve as the Acting Secretary of DHS after his nomination was submitted to the Senate, *see* 5 U.S.C. 3345(b)(1)(B), and Peter Gaynor, the Administrator of the Federal Emergency Management Agency (''FEMA''), would have—by operation of Executive Order 13753—become eligible to exercise the functions and duties of the Secretary temporarily in an acting capacity. This is because Executive Order 13753 pre-established the President's succession order for DHS when the FVRA applies. Mr. Gaynor would have been the most senior official eligible to exercise the functions and duties of the Secretary under that succession order, and thus would have become the official eligible to act as Secretary once Mr. Wolf's nomination was submitted to the Senate. *See* 5 U.S.C. 3346(a)(2). Then, in this alternate scenario in which, as assumed above, there was no valid succession order under 6 U.S.C. 113(g)(2), the submission of Mr. Wolf's nomination to the Senate would have restarted the FVRA's time limits. *See* 5 U.S.C. 3346(a)(2).

Out of an abundance of caution, and to minimize any disruption to DHS and to the Administration's goal of maintaining homeland security, on November 14, 2020, with Mr. Wolf's nomination still pending in the Senate, Mr. Gaynor exercised the authority of Acting Secretary that he would have had (in the absence of any governing succession order under 6 U.S.C. 113(g)(2)) to designate a new order of succession under 6 U.S.C. 113(g)(2) (the ''Gaynor Order'').[90] In particular, Mr. Gaynor issued an order of succession with the same ordering of positions listed in former Acting Secretary McAleenan's November 2019 order. The Gaynor Order thus placed the Under Secretary for Strategy, Policy, and Plans above the FEMA Administrator in the order of succession. Once the Gaynor Order was executed, it superseded any authority Mr. Gaynor may have had under the FVRA and confirmed Mr. Wolf's authority to continue to serve as the Acting Secretary. Hence, regardless of whether Mr. Wolf already possessed authority pursuant to the November 8, 2019, order of succession effectuated by former Acting Secretary McAleenan (as the Departments have previously concluded), the Gaynor Order provides an alternative basis for concluding that Mr. Wolf currently serves as the Acting Secretary.[91]

On November 16, 2020, Acting Secretary Wolf ratified any and all actions involving delegable duties that he took between November 13, 2019, through November 16 2020, including the NPRM that is the subject of this rulemaking.

Under section 103(a)(1) of the Act, 8 U.S.C. 1103(a)(1), the Secretary is charged with the administration and enforcement of the INA and all other immigration laws (except for the powers, functions, and duties of the President, the Attorney General, and certain consular, diplomatic, and Department of State officials). The Secretary is also authorized to delegate his or her authority to any officer or employee of the agency and to designate other officers of the Department to serve as Acting Secretary. *See* INA 103, 8 U.S.C. 1103, and 6 U.S.C. 113(g)(2). The HSA further provides that every officer of the Department ''shall perform the functions specified by law for the official's office or prescribed by the Secretary.'' 6 U.S.C. 113(f). Thus, the designation of the signature authority from Acting Secretary Wolf to Mr. Mizelle is validly within the Acting Secretary's authority.

8.3. Article I Immigration Courts

Comment: At least one commenter, the former union representing immigration judges, expressed a belief that the immigration courts and the BIA should be moved from within DOJ in the Executive Branch into an independent article I court system.[92] The commenter indicated that such a move would address ''political influence'' and ensure ''neutral decision making.''

Response: Immigration judges are required to adjudicate cases in an ''impartial manner,'' 8 CFR 1003.10(b); they exercise ''independent judgment and discretion,'' *id.;* and they ''should not be swayed by partisan interests or public clamor,'' EOIR, *Ethics and Professionalism Guide for Immigration*

[90] Mr. Gaynor signed an order that established an identical order of succession on September 10, 2020, the day Mr. Wolf's nomination was submitted, but it appears he signed that order before the nomination was received by the Senate. To resolve any concern that his September 10 order was ineffective, Mr. Gaynor signed a new order on November 14, 2020. Prior to Mr. Gaynor's new order, the U.S. District Court for the District of New York issued an opinion concluding that Mr. Gaynor did not have authority to act as Secretary, relying in part on the fact that DHS did not notify Congress of Administrator Gaynor's service, as required under 5 U.S.C. 3349(a). *See Batalla Vidal* v. *Wolf,* No. 16CV4756NGGVMS, 2020 WL 6695076, at *9 (E.D.N.Y. Nov. 14, 2020). The Departments disagree that the FVRA's notice requirement affects the validity of an acting officer's service; nowhere does section 3349 indicate that agency reporting obligations are tied to an acting officer's ability to serve.

[91] On October 9, 2020, the U.S. District Court for the District of Columbia issued an opinion indicating that it is likely that section 113(g)(2) orders can be issued by only Senate-confirmed secretaries of DHS and, thus, that Mr. Gaynor likely had no authority to issue a section 113(g)(2) succession order. *See Nw. Immigrant Rights Project* v. *United States Citizenship & Immigration Servs.,* No. CV 19–3283 (RDM), 2020 WL 5995206, at *24 (D.D.C. Oct. 8, 2020). This decision is incorrect because the authority in section 113(g)(2) allows ''the Secretary'' to designate an order of succession, *see* 6 U.S.C. 113(g)(2), and an ''acting officer is vested with the same authority that could be exercised by the officer for whom he acts.'' *In re Grand Jury Investigation,* 916 F.3d 1047, 1055 (D.C. Cir. 2019). The Acting Secretary of DHS is accordingly empowered to exercise the authority of ''the Secretary'' of DHS to ''designate [an] order of succession.'' 6 U.S.C. 113(g)(2). In addition, this is the only district court opinion to have reached such a conclusion about the authority of the Acting Secretary, and the Departments are contesting that determination.

[92] On November 2, 2020, the Federal Labor Relations Authority ruled that immigration judges are management officials for purposes of 5 U.S.C. 7103(a)(11), and, thus, excluded from a bargaining unit pursuant to 5 U.S.C. 7112(b)(1). *U.S. Dept. of Justice, Exec. Office for Immigration Review and National Association of Immigration Judges, Int'l Fed. of Prof. and Tech. Engineers Judicial Council 2,* 71 FLRA No. 207 (2020). That decision effectively decertified the union that previously represented a bargaining unit of non-supervisory immigration judges.

Judges, sec. VIII (Jan. 26, 2011), *https://www.justice.gov/sites/default/files/eoir/legacy/2013/05/23/EthicsandProfessionalismGuideforIJs.pdf.* To the extent that a union which represented immigration judges suggests that the members of its former bargaining unit do not engage in ''neutral decision making'' or are currently swayed by partisan influence in derogation of their ethical obligations, the Departments respectfully disagree, and note that the issue is one to be resolved between the former union and the members of its former bargaining unit, rather than through a rulemaking. The Departments are also unaware of any complaints filed by the former union regarding any specific immigration judges who have failed to engage in neutral decision making. In short, the commenter's premise is unfounded in either fact or law.

Otherwise, the recommendation is both beyond the scope of this rulemaking and the Departments' authority. Congress has the sole authority to create an article I court. *E.g.* 26 U.S.C. 7441 (''There is hereby established, under article I of the Constitution of the United States, a court of record to be known as the United States Tax Court.''). Despite this authority, Congress has provided for a system of administrative hearings for immigration cases, *see, e.g.,* INA 240, 8 U.S.C. 1229a (laying out administrative procedures for removal proceedings), which the Departments believe should be maintained. *Cf. Strengthening and Reforming America's Immigration Court System: Hearing before the Subcomm. on Border Sec. & Immigration of the S. Comm. on the Judiciary,* 115th Cong. (2018) (written response to Questions for the Record of James McHenry, Director, EOIR) (''The financial costs and logistical hurdles to implementing an Article I immigration court system would be monumental and would likely delay pending cases even further.'').

9. Severability

Comment: Some commenters disagreed with the Departments' inclusion of severability provisions in the rule. *See* 8 CFR 208.25, 235.6(c), 1003.42(i), 1208.25, 1212.13, 1235.6(c). For example, at least one commenter stated that the severability provisions conflict with the premise that all the provisions in the rule are related. Another commenter disagreed with the severability provisions, stating that the rule should instead be struck in its entirety.

Response: The changes made by the rule function sensibly independent of the other provisions. As a result, the Departments included severability language for each affected part of title 8 CFR. 8 CFR 208.25, 235.6(c), 1003.42(i), 1208.25, 1212.13, 1235.6(c). In other words, the Departments included these severability provisions to clearly illustrate the Departments' belief that the severance of any affected sections ''will not impair the function of the statute as a whole'' and that the Departments would have enacted the remaining regulatory provisions even without any others. *See K Mart Corp.* v. *Cartier, Inc.,* 486 U.S. 281, 294 (1988) (discussing whether an agency's regulatory provision is severable). The Departments disagree that this severability analysis is impacted by the interrelatedness of either the provisions of this rule or the affected parts more generally. Indeed, it is reasonable for agencies, when practical, to make multiple related changes in a single rulemaking in order to best inform the public and facilitate notice and comment.

III. Regulatory Requirements

A. Administrative Procedure Act

This final rule is being published with a 30-day effective date as required by the Administrative Procedure Act. 5 U.S.C. 553(d).

B. Regulatory Flexibility Act

The Departments have reviewed this regulation in accordance with the Regulatory Flexibility Act, *see* 5 U.S.C. 601 *et seq.,* and, as explained more fully above, have determined that this rule will not have a significant economic impact on a substantial number of small entities, *see* 5 U.S.C. 605(b). This regulation affects only individual aliens and the Federal government. Individuals do not constitute small entities under the Regulatory Flexibility Act. *See* 5 U.S.C. 601(6).

C. Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by state, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

D. Congressional Review Act

The Office of Information and Regulatory Affairs has determined that this final rule is not a major rule as defined by section 804 of the Congressional Review Act. This rule will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets. *See* 5 U.S.C. 804(2).

E. Executive Orders 12866, 13563, and 13771

This final rule is considered by the Departments to be a ''significant regulatory action'' under section 3(f)(4) of Executive Order 12866 because it raises novel legal or policy issues. Accordingly, the regulation has been submitted to the Office of Management and Budget (''OMB'') for review.

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of using the best available methods to quantify costs and benefits; reducing costs; harmonizing rules; and promoting flexibility.

The final rule would change or provide additional clarity for adjudicators across many issues commonly raised by asylum applications and would potentially streamline the overall adjudicatory process for asylum applications. Although the regulation will improve the clarity of asylum law and help streamline the credible fear review process, the regulation does not change the nature of the role of an immigration judge or an asylum officer during proceedings for consideration of credible fear claims or asylum applications. Notably, immigration judges will retain their existing authority to review de novo the determinations made by asylum officers in a credible fear proceeding, and will continue to control immigration court proceedings. In credible fear proceedings, asylum officers will continue to evaluate the merits of claims for asylum, withholding of removal, and CAT protection for possible referral to an immigration judge. Although this rule expands the bases on which an asylum officer may determine that a claim does not merit referral (and, as a consequence, make a negative fear determination), the alien will still be able to seek review of that negative fear

determination before the immigration judge.

Immigration judges and asylum officers are already trained to consider all relevant legal issues in assessing a credible fear claim or asylum application, and the final rule does not implement any changes that would make adjudications more challenging than those that are already conducted. For example, immigration judges already consider issues of persecution, nexus, particular social group, frivolousness, firm resettlement, and discretion in assessing the merit of an asylum application, and the provision of clearer standards for considering those issues in this rule does not add any operational burden or increase the level of operational analysis required for adjudication. Accordingly, the Departments do not expect the changes to increase the adjudication time for immigration court proceedings involving asylum applications or for reviews of negative fear determinations.

Depending on the manner in which DHS exercises its prosecutorial discretion for aliens potentially subject to expedited removal, the facts and circumstances of each individual alien's situation, DHS's interpretation or the relevant regulations, and application of those regulations by individual adjudicators, the changes may decrease the number of cases of aliens subject to expedited removal that result in a full hearing on an application for asylum. In all cases, however, an alien will retain the opportunity to request immigration judge review of DHS's initial fear determination.

The Departments are implementing changes that may affect any alien subject to expedited removal who makes a fear claim and any alien who applies for asylum, statutory withholding of removal, or protection under the CAT regulations. The Departments note that these changes are likely to result in fewer asylum grants annually due to clarifications regarding the significance of discretionary considerations and changes to the definition of ''firm resettlement.'' However, because asylum applications are inherently fact-specific, and because there may be multiple bases for denying an asylum application, neither DOJ nor DHS can quantify precisely the expected decrease. As of September 30, 2020, EOIR had 589,276 cases pending with an asylum application. EOIR, *Workload and Adjudication Statistics: Total Asylum Applications* (Oct. 13, 2020), *https://www.justice.gov/eoir/page/file/1106366/download.* In FY 2019, at the immigration court level, EOIR granted 18,816 asylum applications and denied 45,285 asylum applications. *See* 85 FR at 36289. An additional 27,112 asylum applications were abandoned, withdrawn, or otherwise not adjudicated. *Id.* As of January 1, 2020, USCIS had 338,931 applications for asylum and for withholding of removal pending. *Id.* at 36289 & n.44. In FY 2019, USCIS received 96,861 asylum applications, and approved 19,945 such applications. *Id.* at 36289 & n.45.

The Departments expect that the aliens most likely to be impacted by this rule's provisions are those who are already unlikely to receive a grant of asylum under existing law. Assuming DHS places those aliens into expedited removal proceedings, the Departments have concluded that it will be more likely that they would receive a more prompt adjudication of their claims for asylum or withholding of removal than they would under the existing regulations. Depending on the individual circumstances of each case, this rule would mean that such aliens would likely not remain in the United States—for years, potentially—pending resolution of their claims.

An alien who is ineligible for asylum may still be eligible to apply for the protection of withholding of removal under section 241(b)(3) of the Act, 8 U.S.C. 1231(b)(3), or withholding of removal under regulations issued pursuant to the legislation implementing U.S. obligations under Article 3 of the CAT. *See* INA 241(b)(3), 8 U.S.C. 1231(b)(3); 8 CFR 208.16, 208.17 through 208.18, 1208.16, and 1208.17 through 1208.18. For those aliens barred from asylum under this rule who would otherwise be positively adjudicated for asylum, it is possible they would qualify for withholding (provided a bar to withholding did not apply separate and apart from this rule). To the extent there are any direct impacts of this rule, they would almost exclusively fall on that population. Further, the full extent of the impacts on this population is unclear and would depend on the specific circumstances and personal characteristics of each alien, and neither DHS nor DOJ collects such data at such a level of granularity.

Overall, the Departments assess that operational efficiencies will likely result from these changes, which could, inter alia, reduce the number of meritless claims before the immigration courts, provide the Departments with the ability to more promptly grant relief or protection to qualifying aliens, and ensure that those who do not qualify for relief or protection are removed more efficiently than they are under current rules.

F. Executive Order 12988: Criminal Justice Reform

This rule will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with section 6 of Executive Order 13132, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

G. Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995, 44 U.S.C 3501–3512, agencies are required to submit to OMB, for review and approval, any reporting requirements inherent in a rule. The changes made in this final rule required DHS to revise USCIS Form I–589, Application for Asylum and for Withholding of Removal, OMB Control Number 1615–0067. DOJ and DHS invited public comments on the impact to the proposed collection of information for 60 days. *See* 85 FR at 36290.

DOJ and DHS received multiple comments on the information collection impacts of the proposed rule. Commenters expressed concern that the proposed revisions significantly increase the time and cost burdens for aliens seeking protection from persecution and torture, as well as adding to the burden of immigration lawyers, asylum officers, advocacy organizations, and immigration judges. DHS and DOJ have summarized all of the comments related to information collection and have provided responses in a document titled ''Form I–589 Public Comments and Response Matrix,'' which is posted in the rulemaking docket EOIR–2020–0003 at *https://www.regulations.gov/.* As a result of the public comments, DHS has increased the burden estimate for the Form I–589 and has updated the supporting statement submitted to OMB accordingly. The supporting statement can be found at *https://www.reginfo.gov/.* The updated abstract is as follows:

USCIS Form I–589

Overview of Information Collection

(1) *Type of Information Collection:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Application for Asylum and for Withholding of Removal.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I–589; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or households. Form I–589 is necessary to determine whether an alien applying for asylum or withholding of removal in the United States is classified as a refugee and is eligible to remain in the United States.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–589 is approximately 114,000, and the estimated hourly burden per response is 18.5 [93] hours. The estimated number of respondents providing biometrics is 110,000, and the estimated hourly burden per response is 1.17 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual burden associated with this collection of information in hours is 2,237,700.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $70,406,400.[94]

H. Signature

The Acting Secretary of Homeland Security, Chad F. Wolf, having reviewed and approved this document, has delegated the authority to electronically sign this document to Chad R. Mizelle, who is the Senior Official Performing the Duties of the General Counsel for DHS, for purposes of publication in the **Federal Register**.

List of Subjects

8 CFR Part 208

Administrative practice and procedure, Aliens, Immigration, Reporting and recordkeeping requirements.

8 CFR Part 235

Administrative practice and procedure, Aliens, Immigration, Reporting and recordkeeping requirements.

8 CFR Part 1003

Administrative practice and procedure, Aliens, Immigration, Legal services, Organization and functions (Government agencies).

8 CFR Part 1208

Administrative practice and procedure, Aliens, Immigration, Reporting and recordkeeping requirements.

8 CFR Part 1235

Administrative practice and procedure, Aliens, Immigration, Reporting and recordkeeping requirements.

8 CFR Part 1244

Administrative practice and procedure, Aliens, Immigration, Reporting and recordkeeping requirements.

DEPARTMENT OF HOMELAND SECURITY

Accordingly, for the reasons set forth in the preamble, 8 CFR parts 208 and 235 are amended as follows:

PART 208—PROCEDURES FOR ASYLUM AND WITHHOLDING OF REMOVAL

■ 1. The authority citation for part 208 continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1158, 1226, 1252, 1282; Title VII of Public Law 110–229; 8 CFR part 2.

■ 2. Amend § 208.1 by adding paragraphs (c) through (g) to read as follows:

§ 208.1 General.

* * * * *

(c) *Particular social group.* For purposes of adjudicating an application for asylum under section 208 of the Act or an application for withholding of removal under section 241(b)(3) of the Act, a particular social group is one that is based on an immutable or fundamental characteristic, is defined with particularity, and is recognized as socially distinct in the society at question. Such a particular social group cannot be defined exclusively by the alleged persecutory acts or harms and must also have existed independently of the alleged persecutory acts or harms that form the basis of the claim. The Secretary, in general, will not favorably adjudicate claims of aliens who claim a fear of persecution on account of membership in a particular social group consisting of or defined by the following circumstances: Past or present criminal activity or association (including gang membership); presence in a country with generalized violence or a high crime rate; being the subject of a recruitment effort by criminal, terrorist, or persecutory groups; the targeting of the applicant for criminal activity for financial gain based on perceptions of wealth or affluence; interpersonal disputes of which governmental authorities were unaware or uninvolved; private criminal acts of which governmental authorities were unaware or uninvolved; past or present terrorist activity or association; past or present persecutory activity or association; or status as an alien returning from the United States. This list is nonexhaustive, and the substance of the alleged particular social group, rather than the precise form of its delineation, shall be considered in determining whether the group falls within one of the categories on the list. No alien shall be found to be a refugee or have it decided that the alien's life or freedom would be threatened based on membership in a particular social group in any case unless that person articulates on the record, or provides a basis on the record for determining, the definition and boundaries of the alleged particular social group. A failure to define, or provide a basis for defining, a formulation of a particular social group before an immigration judge shall waive any such claim for all purposes under the Act, including on appeal. Any waived claim on this basis shall not serve as the basis for any motion to reopen or reconsider for any reason, including a claim of ineffective assistance of counsel unless the alien complies with the procedural requirements for such a motion and demonstrates that counsel's failure to define, or provide a basis for defining, a formulation of a particular social group constituted egregious conduct.

(d) *Political opinion.* For purposes of adjudicating an application for asylum under section 208 of the Act or an application for withholding of removal under section 241(b)(3) of the Act, a political opinion is one expressed by or imputed to an applicant in which the applicant possesses an ideal or conviction in support of the furtherance of a discrete cause related to political control of a State or a unit thereof. The Secretary, in general, will not favorably adjudicate claims of aliens who claim a fear of persecution on account of a political opinion defined solely by generalized disapproval of, disagreement with, or opposition to criminal, terrorist, gang, guerilla, or other non-state organizations absent expressive behavior in furtherance of a cause against such organizations related

[93] This estimate is higher than the estimate provided in the NPRM because USCIS reevaluated its projections and determined that the hourly burden per response was likely to be higher than USCIS had initially estimated, which also increased the total estimated public burden (in hours).

[94] This estimate is higher than the estimate provided in the NPRM because USCIS reevaluated its projections in response to public comments suggesting that the monetary cost was likely to be higher than USCIS had initially estimated.

to efforts by the State to control such organizations or behavior that is antithetical to or otherwise opposes the ruling legal entity of the State or a legal sub-unit of the State. A person who has been forced to abort a pregnancy or to undergo involuntary sterilization, or who has been persecuted for failure or refusal to undergo such a procedure or for other resistance to a coercive population control program, shall be deemed to have been persecuted on account of political opinion, and a person who has a well-founded fear that he or she will be forced to undergo such a procedure or subject to persecution for such failure, refusal, or resistance shall be deemed to have a well-founded fear of persecution on account of political opinion.

(e) *Persecution.* For purposes of screening or adjudicating an application for asylum under section 208 of the Act or an application for withholding of removal under section 241(b)(3) of the Act, persecution requires an intent to target a belief or characteristic, a severe level of harm, and the infliction of a severe level of harm by the government of a country or by persons or an organization that the government was unable or unwilling to control. For purposes of evaluating the severity of the level of harm, persecution is an extreme concept involving a severe level of harm that includes actions so severe that they constitute an exigent threat. Persecution does not encompass the generalized harm that arises out of civil, criminal, or military strife in a country, nor does it encompass all treatment that the United States regards as unfair, offensive, unjust, or even unlawful or unconstitutional. It does not include intermittent harassment, including brief detentions; threats with no actual effort to carry out the threats, except that particularized threats of severe harm of an immediate and menacing nature made by an identified entity may constitute persecution; or, non-severe economic harm or property damage, though this list is nonexhaustive. The existence of laws or government policies that are unenforced or infrequently enforced do not, by themselves, constitute persecution, unless there is credible evidence that those laws or policies have been or would be applied to an applicant personally.

(f) *Nexus.* For purposes of adjudicating an application for asylum under section 208 of the Act or an application or withholding of removal under section 241(b)(3) of the Act, the Secretary, in general, will not favorably adjudicate the claims of aliens who claim persecution based on the following list of nonexhaustive circumstances:

(1) Interpersonal animus or retribution;

(2) Interpersonal animus in which the alleged persecutor has not targeted, or manifested an animus against, other members of an alleged particular social group in addition to the member who has raised the claim at issue;

(3) Generalized disapproval of, disagreement with, or opposition to criminal, terrorist, gang, guerilla, or other non-state organizations absent expressive behavior in furtherance of a discrete cause against such organizations related to control of a State or expressive behavior that is antithetical to the State or a legal unit of the State;

(4) Resistance to recruitment or coercion by guerilla, criminal, gang, terrorist or other non-state organizations;

(5) The targeting of the applicant for criminal activity for financial gain based on wealth or affluence or perceptions of wealth or affluence;

(6) Criminal activity;

(7) Perceived, past or present, gang affiliation; or,

(8) Gender.

(g) *Evidence based on stereotypes.* For purposes of adjudicating an application for asylum under section 208 of the Act or an application for withholding of removal under section 241(b)(3) of the Act, evidence offered in support of such an application which promotes cultural stereotypes about a country, its inhabitants, or an alleged persecutor, including stereotypes based on race, religion, nationality, or gender, shall not be admissible in adjudicating that application, provided that nothing in this paragraph shall be construed as prohibiting the submission of evidence that an alleged persecutor holds stereotypical views of the applicant.

■ 3. Amend § 208.2 by adding paragraph (c)(1)(ix) to read as follows:

§ 208.2 Jurisdiction.

* * * * *

(c) * * *

(1) * * *

(ix) An alien found to have a credible fear of persecution, reasonable possibility of persecution, or reasonable possibility of torture in accordance with §§ 208.30, 1003.42, or 1208.30.

* * * * *

■ 4. Amend § 208.5 by revising the first sentence of paragraph (a) to read as follows:

§ 208.5 Special duties toward aliens in custody of DHS.

(a) *General.* When an alien in the custody of DHS requests asylum or withholding of removal, or expresses a fear of persecution or harm upon return to his or her country of origin or to agents thereof, DHS shall make available the appropriate application forms and shall provide the applicant with the information required by section 208(d)(4) of the Act, including in the case of an alien who is in custody with a positive credible fear or reasonable fear determination under 8 CFR 208.30 or 208.31, and except in the case of an alien who is in custody pending a credible fear determination under 8 CFR 208.30 or a reasonable fear determination pursuant to 8 CFR 208.31. * * *

* * * * *

■ 5. Amend § 208.6 by revising paragraphs (a) and (b) and adding paragraphs (d) and (e) to read as follows:

§ 208.6 Disclosure to third parties.

(a) Information contained in or pertaining to any application for refugee admission, asylum, withholding of removal under section 241(b)(3) of the Act, or protection under regulations issued pursuant to the Convention Against Torture's implementing legislation, records pertaining to any credible fear determination conducted pursuant to § 208.30, and records pertaining to any reasonable fear determination conducted pursuant to § 208.31, shall not be disclosed without the written consent of the applicant, except as permitted by this section or at the discretion of the Secretary.

(b) The confidentiality of other records kept by DHS and the Executive Office for Immigration Review that indicate that a specific alien has applied for refugee admission, asylum, withholding of removal under section 241(b)(3) of the Act, or protection under regulations issued pursuant to the Convention Against Torture's implementing legislation, or has received a credible fear or reasonable fear interview, or received a credible fear or reasonable fear review shall also be protected from disclosure, except as permitted in this section. DHS will coordinate with the Department of State to ensure that the confidentiality of those records is maintained if they are transmitted to Department of State offices in other countries.

* * * * *

(d)(1) Any information contained in an application for refugee admission, asylum, withholding of removal under section 241(b)(3) of the Act, or

protection under regulations issued pursuant to the Convention Against Torture's implementing legislation, any relevant and applicable information supporting that application, any information regarding an alien who has filed such an application, and any relevant and applicable information regarding an alien who has been the subject of a reasonable fear or credible fear determination may be disclosed:

(i) As part of an investigation or adjudication of the merits of that application or of any other application under the immigration laws,

(ii) As part of any State or Federal criminal investigation, proceeding, or prosecution;

(iii) Pursuant to any State or Federal mandatory reporting requirement;

(iv) To deter, prevent, or ameliorate the effects of child abuse;

(v) As part of any proceeding arising under the immigration laws, including proceedings arising under the Act; and

(vi) As part of the Government's defense of any legal action relating to the alien's immigration or custody status including petitions for review filed in accordance with 8 U.S.C. 1252.

(2) If information may be disclosed under paragraph (d)(1) of this section, the disclosure provisions in paragraphs (a), (b), and (c) of this section shall not apply.

(e) Nothing in this section shall be construed as prohibiting the disclosure of information contained in an application for refugee admission, asylum, withholding of removal under section 241(b)(3)(B) of the Act, or protection under regulations issued pursuant to the Convention Against Torture's implementing legislation, information supporting that application, information regarding an alien who has filed such an application, or information regarding an alien who has been the subject of a reasonable fear or credible fear determination:

(1) Among employees and officers of the Department of Justice, the Department of Homeland Security, the Department of State, the Department of Health and Human Services, the Department of Labor, or a U.S. national security agency having a need to examine the information for an official purpose; or

(2) Where a United States Government employee or contractor has a good faith and reasonable belief that disclosure is necessary to prevent the commission of a crime, the furtherance of an ongoing crime, or to ameliorate the effects of a crime.

■ 6. Amend § 208.13 by revising paragraphs (b)(3) introductory text and (b)(3)(ii) and adding paragraphs (b)(3)(iii) and (iv) and (d) to read as follows:

§ 208.13 Establishing asylum eligibility.

* * * * *

(b) * * *

(3) *Reasonableness of internal relocation.* For purposes of determinations under paragraphs (b)(1)(i) and (ii) and (b)(2) of this section, adjudicators should consider the totality of the relevant circumstances regarding an applicant's prospects for relocation, including the size of the country of nationality or last habitual residence, the geographic locus of the alleged persecution, the size, reach, or numerosity of the alleged persecutor, and the applicant's demonstrated ability to relocate to the United States in order to apply for asylum.

* * * * *

(ii) In cases in which the persecutor is a government or is government-sponsored, it shall be presumed that internal relocation would not be reasonable, unless DHS establishes by a preponderance of the evidence that, under all the circumstances, it would be reasonable for the applicant to relocate.

(iii) Regardless of whether an applicant has established persecution in the past, in cases in which the persecutor is not the government or a government-sponsored actor, or otherwise is a private actor, there shall be a presumption that internal relocation would be reasonable unless the applicant establishes, by a preponderance of the evidence, that it would be unreasonable to relocate.

(iv) For purposes of determinations under paragraphs (b)(3)(ii) and (iii) of this section, persecutors who are private actors—including persecutors who are gang members, officials acting outside their official capacity, family members who are not themselves government officials, or neighbors who are not themselves government officials—shall not be considered to be persecutors who are the government or government-sponsored absent evidence that the government sponsored the persecution.

* * * * *

(d) *Discretion.* Factors that fall short of grounds of mandatory denial of an asylum application may constitute discretionary considerations.

(1) The following are significant adverse discretionary factors that a decision-maker shall consider, if applicable, in determining whether an alien merits a grant of asylum in the exercise of discretion:

(i) An alien's unlawful entry or unlawful attempted entry into the United States unless such entry or attempted entry was made in immediate flight from persecution in a contiguous country or unless such entry or attempted entry was made by an alien under the age of 18 at the time the entry or attempted entry was made;

(ii) The failure of an alien to apply for protection from persecution or torture in at least one country outside the alien's country of citizenship, nationality, or last lawful habitual residence through which the alien transited before entering the United States unless:

(A) The alien received a final judgment denying the alien protection in such country;

(B) The alien demonstrates that he or she satisfies the definition of ''victim of a severe form of trafficking in persons'' provided in 8 CFR 214.11; or

(C) Such country or all such countries were, at the time of the transit, not parties to the 1951 Convention relating to the Status of Refugees, the 1967 Protocol relating to the Status of Refugees, or the Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment; and

(iii) An alien's use of fraudulent documents to enter the United States, unless the alien arrived in the United States by air, sea, or land directly from the applicant's home country without transiting through any other country.

(2)(i) The Secretary, except as provided in paragraph (d)(2)(ii) of this section, will not favorably exercise discretion under section 208 of the Act for an alien who:

(A) Immediately prior to his arrival in the United States or en route to the United States from the alien's country of citizenship, nationality, or last lawful habitual residence, spent more than 14 days in any one country unless:

(*1*) The alien demonstrates that he or she applied for protection from persecution or torture in such country and the alien received a final judgment denying the alien protection in such country;

(*2*) The alien demonstrates that he or she satisfies the definition of ''victim of a severe form of trafficking in persons'' provided in 8 CFR 214.11; or

(*3*) Such country was, at the time of the transit, not a party to the 1951 Convention relating to the Status of Refugees, the 1967 Protocol relating to the Status of Refugees, or the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment;

(B) Transits through more than one country between his country of citizenship, nationality, or last habitual residence and the United States unless:

(*1*) The alien demonstrates that he or she applied for protection from persecution or torture in at least one such country and received a final judgment denying the alien protection in that country;

(*2*) The alien demonstrates that he or she satisfies the definition of ''victim of a severe form of trafficking in persons'' provided in 8 CFR 214.11; or

(*3*) All such countries were, at the time of the transit, not parties to the 1951 Convention relating to the Status of Refugees, the 1967 Protocol relating to the Status of Refugees, or the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment;

(C) Would otherwise be subject to § 208.13(c) but for the reversal, vacatur, expungement, or modification of a conviction or sentence, unless the alien was found not guilty;

(D) Accrued more than one year of unlawful presence in the United States, as defined in sections 212(a)(9)(B)(ii) and (iii) of the Act, prior to filing an application for asylum;

(E) At the time the asylum application is filed with DHS has:

(*1*) Failed to timely file (or timely file a request for an extension of time to file) any required Federal, State, or local income tax returns;

(*2*) Failed to satisfy any outstanding Federal, State, or local tax obligations; or

(*3*) Has income that would result in tax liability under section 1 of the Internal Revenue Code of 1986 and that was not reported to the Internal Revenue Service;

(F) Has had two or more prior asylum applications denied for any reason;

(G) Has withdrawn a prior asylum application with prejudice or been found to have abandoned a prior asylum application;

(H) Failed to attend an interview regarding his asylum application with DHS, unless the alien shows by a preponderance of the evidence that:

(*1*) Exceptional circumstances prevented the alien from attending the interview; or

(*2*) The interview notice was not mailed to the last address provided by the alien or his or her representative and neither the alien nor the alien's representative received notice of the interview; or

(I) Was subject to a final order of removal, deportation, or exclusion and did not file a motion to reopen to seek asylum based on changed country conditions within one year of those changes in country conditions.

(ii) Where one or more of the adverse discretionary factors set forth in paragraph (d)(2)(i) of this section are present, the Secretary, in extraordinary circumstances, such as those involving national security or foreign policy considerations, or cases in which an alien, by clear and convincing evidence, demonstrates that the denial or referral (which may result in the denial by an immigration judge) of the application for asylum would result in exceptional and extremely unusual hardship to the alien, may favorably exercise discretion under section 208 of the Act, notwithstanding the applicability of paragraph (d)(2)(i). Depending on the gravity of the circumstances underlying the application of paragraph (d)(2)(i), a showing of extraordinary circumstances might still be insufficient to warrant a favorable exercise of discretion under section 208 of the Act.

■ 7. Revise § 208.15 to read as follows:

§ 208.15 Definition of ''firm resettlement.''

(a) An alien is considered to be firmly resettled if, after the events giving rise to the alien's asylum claim:

(1) The alien resided in a country through which the alien transited prior to arriving in or entering the United States and—

(i) Received or was eligible for any permanent legal immigration status in that country;

(ii) Resided in such a country with any non-permanent but indefinitely renewable legal immigration status (including asylee, refugee, or similar status but excluding status such as of a tourist); or

(iii) Resided in such a country and could have applied for and obtained any non-permanent but indefinitely renewable legal immigration status in that country;

(2) The alien physically resided voluntarily, and without continuing to suffer persecution or torture, in any one country for one year or more after departing his country of nationality or last habitual residence and prior to arrival in or entry into the United States, provided that time spent in Mexico by an alien who is not a native or citizen of Mexico solely as a direct result of being returned to Mexico pursuant to section 235(b)(2)(C) of the Act or of being subject to metering would not be counted for purposes of this paragraph; or

(3)(i) The alien is a citizen of a country other than the one where the alien alleges a fear of persecution and the alien was present in that country after departing his country of nationality or last habitual residence and prior to arrival in or entry into the United States; or

(ii) The alien was a citizen of a country other than the one where the alien alleges a fear of persecution, the alien was present in that country after departing his country of nationality or last habitual residence and prior to arrival in or entry into the United States, and the alien renounced that citizenship after arriving in the United States.

(b) The provisions of 8 CFR 1240.8(d) shall apply when the evidence of record indicates that the firm resettlement bar may apply. In such cases, the alien shall bear the burden of proving the bar does not apply. Either DHS or the immigration judge may raise the issue of the application of the firm resettlement bar based on the evidence of record. The firm resettlement of an alien's parent(s) shall be imputed to the alien if the resettlement occurred before the alien turned 18 and the alien resided with the alien's parents at the time of the firm resettlement unless the alien establishes that he or she could not have derived any permanent legal immigration status or any non-permanent but indefinitely renewable legal immigration status (including asylee, refugee, or similar status but excluding status such as of a tourist) from the alien's parent.

■ 8. Amend § 208.16 by revising paragraphs (b)(3) introductory text and (b)(3)(ii) and adding paragraphs (b)(3)(iii) and (iv) to read as follows:

§ 208.16 Withholding of removal under section 241(b)(3)(B) of the Act and withholding of removal under the Convention Against Torture.

* * * * *

(b)(3) *Reasonableness of internal relocation.* For purposes of determinations under paragraphs (b)(1) and (2) of this section, adjudicators should consider the totality of the relevant circumstances regarding an applicant's prospects for relocation, including the size of the country of nationality or last habitual residence, the geographic locus of the alleged persecution, the size, reach, or numerosity of the alleged persecutor, and the applicant's demonstrated ability to relocate to the United States in order to apply for withholding of removal.

* * * * *

(ii) In cases in which the persecutor is a government or is government-sponsored, it shall be presumed that internal relocation would not be reasonable, unless DHS establishes by a preponderance of the evidence that, under the totality of the circumstances, it would be reasonable for the applicant to relocate.

(iii) Regardless of whether an applicant has established persecution in the past, in cases in which the

persecutor is not the government or a government-sponsored actor, or otherwise is a private actor, there shall be a presumption that internal relocation would be reasonable unless the applicant establishes, by a preponderance of the evidence, that it would be unreasonable to relocate.

(iv) For purposes of determinations under paragraphs (b)(3)(ii) and (iii) of this section, persecutors who are private actors, including but not limited to persecutors who are gang members, public officials who are not acting under color of law, or family members who are not themselves government officials or neighbors who are not themselves government officials, shall not be considered to be persecutors who are the government or government-sponsored absent evidence that the government sponsored the persecution.

* * * * *

■ 9. Amend § 208.18 by revising paragraphs (a)(1) and (7) to read as follows:

§ 208.18 Implementation of the Convention Against Torture.

(a) * * *

(1) Torture is defined as any act by which severe pain or suffering, whether physical or mental, is intentionally inflicted on a person for such purposes as obtaining from him or her or a third person information or a confession, punishing him or her for an act he or she or a third person has committed or is suspected of having committed, or intimidating or coercing him or her or a third person, or for any reason based on discrimination of any kind, when such pain or suffering is inflicted by or at the instigation of or with the consent or acquiescence of a public official acting in an official capacity or other person acting in an official capacity. Pain or suffering inflicted by a public official who is not acting under color of law shall not constitute pain or suffering inflicted by or at the instigation of or with the consent or acquiescence of a public official acting in an official capacity or other person acting in an official capacity, although a different public official acting in an official capacity or other person acting in an official capacity could instigate, consent to, or acquiesce in the pain or suffering inflicted by the public official who is not acting under color of law.

* * * * *

(7) Acquiescence of a public official requires that the public official, prior to the activity constituting torture, have awareness of such activity and thereafter breach his or her legal responsibility to intervene to prevent such activity. Such awareness requires a finding of either actual knowledge or willful blindness. Willful blindness means that the public official acting in an official capacity or other person acting in an official capacity was aware of a high probability of activity constituting torture and deliberately avoided learning the truth; it is not enough that such public official acting in an official capacity or other person acting in an official capacity was mistaken, recklessly disregarded the truth, or negligently failed to inquire. In order for a public official to breach his or her legal responsibility to intervene to prevent activity constituting torture, the official must have been charged with preventing the activity as part of his or her duties and have failed to intervene. No person will be deemed to have breached a legal responsibility to intervene if such person is unable to intervene, or if the person intervenes but is unable to prevent the activity that constitutes torture.

* * * * *

■ 10. Revise § 208.20 to read as follows:

§ 208.20 Determining if an asylum application is frivolous.

(a) For applications filed on or after April 1, 1997, and before January 11, 2021, an applicant is subject to the provisions of section 208(d)(6) of the Act only if the alien received the notice required by section 208(d)(4)(A) of the Act and a final order by an immigration judge or the Board of Immigration Appeals specifically finds that the alien knowingly filed a frivolous asylum application. An application is frivolous if:

(1) Any of the material elements in the asylum application is deliberately fabricated, and the immigration judge or the Board is satisfied that the applicant, during the course of the proceedings, has had sufficient opportunity to account for any discrepancies or implausible aspects of the claim.

(2) Paragraphs (b) through (f) of this section shall only apply to applications filed on or after January 11, 2021.

(b) For applications filed on or after January 11, 2021, an asylum officer may determine that the applicant knowingly filed a frivolous asylum application and may refer the applicant to an immigration judge on that basis, so long as the applicant has received the notice required by section 208(d)(4)(A) of the Act. For any application referred to an immigration judge, an asylum officer's determination that an application is frivolous will not render an applicant permanently ineligible for immigration benefits unless an immigration judge or the Board makes a finding of frivolousness as described in paragraph 1208.20(c).

(c) For applications filed on or after January 11, 2021, an asylum application is frivolous if it:

(1) Contains a fabricated material element;

(2) Is premised upon false or fabricated evidence unless the application would have been granted without the false or fabricated evidence;

(3) Is filed without regard to the merits of the claim; or

(4) Is clearly foreclosed by applicable law.

(d) If the alien has been provided the warning required by section 208(d)(4)(A) of the Act, he or she need not be given any additional or further opportunity to account for any issues with his or her claim prior to the entry of a frivolousness finding.

(e) An asylum application may be found frivolous even if it was untimely filed.

(f) A withdrawn asylum application may also be found frivolous unless:

(1) The alien wholly disclaims the application and withdraws it with prejudice;

(2) The alien is eligible for and agrees to accept voluntary departure for a period of no more than 30 days pursuant to section 240B(a) of the Act;

(3) The alien withdraws any and all other applications for relief or protection with prejudice; and

(4) The alien waives his right to appeal and any rights to file, for any reason, a motion to reopen or reconsider.

(g) For purposes of this section, a finding that an alien knowingly filed a frivolous asylum application shall not preclude the alien from seeking withholding of removal under section 241(b)(3) of the Act or protection under the regulations issued pursuant to the Convention Against Torture's implementing legislation.

■ 11. Add § 208.25 to read as follows:

§ 208.25 Severability.

The provisions of part 208 are separate and severable from one another. In the event that any provision in part 208 is stayed, enjoined, not implemented, or otherwise held invalid, the remaining provisions shall nevertheless be implemented as an independent rule and continue in effect.

■ 12. Amend § 208.30 by:

■ a. Revising the section heading; and

■ b. Revising paragraphs (a), (b), (c), (d) introductory text, (d)(1) and (2), (d)(5) and (6), (e) introductory text, (e)(1) through (5), (e)(6) introductory text, (e)(6)(ii), (e)(6)(iii) introductory text,

(e)(6)(iv), the first sentence of paragraph (e)(7) introductory text, and paragraphs (e)(7)(ii), (f), and (g).

The revisions read as follows:

§ 208.30 Credible fear of persecution, reasonable possibility of persecution, and reasonable possibility of torture determinations involving stowaways and applicants for admission who are found inadmissible pursuant to section 212(a)(6)(C) or 212(a)(7) of the Act, whose entry is limited or suspended under section 212(f) or 215(a)(1) of the Act, or who failed to apply for protection from persecution in a third country where potential relief is available while en route to the United States.

(a) *Jurisdiction.* The provisions of this subpart B apply to aliens subject to sections 235(a)(2) and 235(b)(1) of the Act. Pursuant to section 235(b)(1)(B) of the Act, DHS has exclusive jurisdiction to make the determinations described in this subpart B. Except as otherwise provided in this subpart B, paragraphs (b) through (g) of this section are the exclusive procedures applicable to stowaways and applicants for admission who are found inadmissible pursuant to section 212(a)(6)(C) or 212(a)(7) of the Act and who receive fear interviews, determinations, and reviews under section 235(b)(1)(B) of the Act. Prior to January 1, 2030, an alien physically present in or arriving in the Commonwealth of the Northern Mariana Islands is ineligible to apply for asylum and may only establish eligibility for withholding of removal pursuant to section 241(b)(3) of the Act or withholding or deferral of removal under the regulations issued pursuant to the Convention Against Torture's implementing legislation.

(b) *Process and Authority.* If an alien subject to section 235(a)(2) or 235(b)(1) of the Act indicates an intention to apply for asylum, or expresses a fear of persecution or torture, or a fear of return to his or her country, the inspecting officer shall not proceed further with removal of the alien until the alien has been referred for an interview by an asylum officer in accordance with this section. An asylum officer shall then screen the alien for a credible fear of persecution, and as necessary, a reasonable possibility of persecution and reasonable possibility of torture. An asylum officer, as defined in section 235(b)(1)(E) of the Act, has the authorities described in 8 CFR 208.9(c) and must conduct an evaluation and make a determination consistent with this section.

(c) *Treatment of dependents.* A spouse or child of an alien may be included in that alien's fear evaluation and determination, if such spouse or child:

(1) Arrived in the United States concurrently with the principal alien; and

(2) Desires to be included in the principal alien's determination. However, any alien may have his or her evaluation and determination made separately, if he or she expresses such a desire.

(d) *Interview.* The asylum officer will conduct the interview in a nonadversarial manner, separate and apart from the general public. The purpose of the interview shall be to elicit all relevant and useful information bearing on whether the alien can establish a credible fear of persecution, reasonable possibility of persecution, or reasonable possibility of torture. The asylum officer shall conduct the interview as follows:

(1) If the officer conducting the interview determines that the alien is unable to participate effectively in the interview because of illness, fatigue, or other impediments, the officer may reschedule the interview.

(2) At the time of the interview, the asylum officer shall verify that the alien has received in writing the relevant information regarding the fear determination process. The officer shall also determine that the alien has an understanding of the fear determination process.

* * * * *

(5) If the alien is unable to proceed effectively in English, and if the asylum officer is unable to proceed competently in a language the alien speaks and understands, the asylum officer shall arrange for the assistance of an interpreter in conducting the interview. The interpreter must be at least 18 years of age and may not be the alien's attorney or representative of record, a witness testifying on the alien's behalf, a representative or employee of the alien's country of nationality, or, if the alien is stateless, the alien's country of last habitual residence.

(6) The asylum officer shall create a summary of the material facts as stated by the alien. At the conclusion of the interview, the officer shall review the summary with the alien and provide the alien with an opportunity to correct any errors therein.

(e) Procedures for determining credible fear of persecution, reasonable possibility of persecution, and reasonable possibility of torture.

(1) An alien establishes a credible fear of persecution if there is a significant possibility the alien can establish eligibility for asylum under section 208 of the Act. ''Significant possibility'' means a substantial and realistic possibility of succeeding. When making such a determination, the asylum officer shall take into account:

(i) The credibility of the statements made by the alien in support of the alien's claim;

(ii) Such other facts as are known to the officer, including whether the alien could avoid any future harm by relocating to another part of his or her country, if under all the circumstances it would be reasonable to expect the alien to do so; and

(iii) The applicability of any bars to being able to apply for asylum or to eligibility for asylum set forth at section 208(a)(2)(B)–(C) and (b)(2) of the Act, including any bars established by regulation under section 208(b)(2)(C) of the Act.

(2) An alien establishes a reasonable possibility of persecution if there is a reasonable possibility that the alien would be persecuted on account of his or her race, religion, nationality, membership in a particular social group, or political opinion in the country of removal. When making such determination, the officer will take into account:

(i) The credibility of the statements made by the alien in support of the alien's claim;

(ii) Such other facts as are known to the officer, including whether the alien could avoid a future threat to his or her life or freedom by relocating to another part of the proposed country of removal and, under all circumstances, it would be reasonable to expect the applicant to do so; and

(iii) The applicability of any bars at section 241(b)(3)(B) of the Act.

(3) An alien establishes a reasonable possibility of torture if there is a reasonable possibility that the alien would be tortured in the country of removal, consistent with the criteria in 8 CFR 208.16(c), 8 CFR 208.17, and 8 CFR 208.18. The alien must demonstrate a reasonable possibility that he or she will suffer severe pain or suffering in the country of removal, and that the feared harm would comport with the other requirements of 8 CFR 208.18(a)(1) through (8). When making such a determination, the asylum officer shall take into account:

(i) The credibility of the statements made by alien in support of the alien's claim, and

(ii) Such other facts as are known to the officer, including whether the alien could relocate to a part of the country of removal where he or she is not likely to be tortured.

(4) In all cases, the asylum officer will create a written record of his or her determination, including a summary of the material facts as stated by the alien, any additional facts relied on by the officer, and the officer's determination of whether, in light of such facts, the alien has established a credible fear of persecution, reasonable possibility of persecution, or reasonable possibility of torture. In determining whether the alien has a credible fear of persecution, as defined in section 235(b)(1)(B)(v) of the Act, or a reasonable possibility of persecution or torture, the asylum officer shall consider whether the alien's case presents novel or unique issues that merit consideration in a full hearing before an immigration judge.

(5)(i)(A) Except as provided in paragraph (e)(5)(ii) or (iii) or paragraph (e)(6) or (7) of this section, if an alien would be able to establish a credible fear of persecution but for the fact that the alien is subject to one or more of the mandatory bars to applying for asylum or being eligible for asylum contained in section 208(a)(2)(B)–(D) and (b)(2) of the Act, including any bars established by regulation under section 208(b)(2)(C) of the Act, then the asylum officer will enter a negative credible fear of persecution determination with respect to the alien's eligibility for asylum.

(B) If an alien described in paragraph (e)(5)(i)(A) of this section is able to establish either a reasonable possibility of persecution (including by establishing that he or she is not subject to one or more of the mandatory bars to eligibility for withholding of removal contained in section 241(b)(3)(B) of the Act) or a reasonable possibility of torture, then the asylum officer will enter a positive reasonable possibility of persecution or torture determination, as applicable. The Department of Homeland Security shall place the alien in asylum-and-withholding-only proceedings under 8 CFR 208.2(c)(1) for full consideration of the alien's claim for withholding of removal under section 241(b)(3) of the Act or withholding or deferral of removal under the regulations issued pursuant to the implementing legislation for the Convention Against Torture.

(C) If an alien described in paragraph (e)(5)(i)(A) of this section fails to establish either a reasonable possibility of persecution (including by failing to establish that he or she is not subject to one or more of the mandatory bars to eligibility for withholding of removal contained in section 241(b)(3)(B) of the Act) or a reasonable possibility of torture, the asylum officer will provide the alien with a written notice of decision, which will be subject to immigration judge review consistent with paragraph (g) of this section, except that the immigration judge will review the fear findings under the reasonable possibility standard instead of the credible fear of persecution standard described in paragraph (g) of this section and in 8 CFR 1208.30(g).

(ii) If the alien is found to be an alien described in 8 CFR 208.13(c)(3), then the asylum officer shall enter a negative credible fear determination with respect to the alien's application for asylum. The Department shall nonetheless place the alien in asylum-and-withholding-only proceedings under 8 CFR 208.2(c)(1) for full consideration of the alien's claim for withholding of removal under section 241(b)(3) of the Act, or for withholding or deferral of removal under the regulations issued pursuant to the implementing legislation for the Convention Against Torture, if the alien establishes, respectively, a reasonable possibility of persecution or torture. However, if an alien fails to establish, during the interview with the asylum officer, a reasonable possibility of either persecution or torture, the asylum officer will provide the alien with a written notice of decision, which will be subject to immigration judge review consistent with paragraph (g) of this section, except that the immigration judge will review the fear of persecution or torture findings under the reasonable possibility standard instead of the credible fear standard described in paragraph (g) of this section and in 8 CFR 1208.30(g).

(iii) If the alien is found to be an alien described in 8 CFR 208.13(c)(4), then the asylum officer shall enter a negative credible fear determination with respect to the alien's application for asylum. The Department shall nonetheless place the alien in asylum-and-withholding-only proceedings under 8 CFR 208.2(c)(1) for full consideration of the alien's claim for withholding of removal under section 241(b)(3) of the Act or withholding of deferral of removal under the regulations issued pursuant to the implementing legislation for the Convention Against Torture if the alien establishes, respectively, a reasonable possibility of persecution or torture. However, if an alien fails to establish, during the interview with the asylum officer, a reasonable possibility of either persecution or torture, the asylum officer will provide the alien with a written notice of decision, which will be subject to immigration judge review consistent with paragraph (g) of this section, except that the immigration judge will review the fear of persecution or torture findings under the reasonable possibility standard instead of the credible fear standard described in paragraph (g) of this section and in 8 CFR 1208.30(g).

(6) Prior to any determination concerning whether an alien arriving in the United States at a U.S.-Canada land border port-of-entry or in transit through the U.S. during removal by Canada has a credible fear of persecution, reasonable possibility of persecution, or reasonable possibility of torture, the asylum officer shall conduct a threshold screening interview to determine whether such an alien is ineligible to apply for asylum pursuant to section 208(a)(2)(A) of the Act and subject to removal to Canada by operation of the Agreement Between the Government of the United States and the Government of Canada For Cooperation in the Examination of Refugee Status Claims from Nationals of Third Countries (''Agreement''). In conducting this threshold screening interview, the asylum officer shall apply all relevant interview procedures outlined in paragraph (d) of this section, provided, however, that paragraph (d)(2) of this section shall not apply to aliens described in this paragraph (e)(6). The asylum officer shall advise the alien of the Agreement's exceptions and question the alien as to applicability of any of these exceptions to the alien's case.

* * * * *

(ii) If the alien establishes by a preponderance of the evidence that he or she qualifies for an exception under the terms of the Agreement, the asylum officer shall make a written notation of the basis of the exception, and then proceed immediately to a determination concerning whether the alien has a credible fear of persecution, reasonable possibility of persecution, or reasonable possibility of torture under paragraph (d) of this section.

(iii) An alien qualifies for an exception to the Agreement if the alien is not being removed from Canada in transit through the United States and:

* * * * *

(iv) As used in paragraphs (e)(6)(iii)(B), (C), and (D) of this section only, ''legal guardian'' means a person currently vested with legal custody of such an alien or vested with legal authority to act on the alien's behalf, provided that such an alien is both unmarried and less than 18 years of age, and provided further that any dispute with respect to whether an individual is a legal guardian will be resolved on the basis of U.S. law.

(7) When an immigration officer has made an initial determination that an alien, other than an alien described in

paragraph (e)(6) of this section and regardless of whether the alien is arriving at a port of entry, appears to be subject to the terms of an agreement authorized by section 208(a)(2)(A) of the Act, and seeks the alien's removal consistent with that provision, prior to any determination concerning whether the alien has a credible fear of persecution, reasonable possibility of persecution, or a reasonable possibility of torture, the asylum officer shall conduct a threshold screening interview to determine whether the alien is ineligible to apply for asylum in the United States and is subject to removal to a country (''receiving country'') that is a signatory to the applicable agreement authorized by section 208(a)(2)(A) of the Act, other than the U.S.-Canada Agreement effectuated in 2004. * * *

* * * * *

(ii) If the alien establishes by a preponderance of the evidence that he or she qualifies for an exception under the terms of the applicable agreement, or would more likely than not be persecuted on account of his or her race, religion, nationality, membership in a particular social group, or tortured, in the receiving country, the asylum officer shall make a written notation to that effect, and may then proceed to determine whether any other agreement is applicable to the alien under the procedures set forth in this paragraph (e)(7). If the alien establishes by a preponderance of the evidence that he or she qualifies for an exception under the terms of each of the applicable agreements, or would more likely than not be persecuted on account of his or her race, religion, nationality, membership in a particular social group, or tortured, in each of the prospective receiving countries, the asylum officer shall make a written notation to that effect, and then proceed immediately to a determination concerning whether the alien has a credible fear of persecution, reasonable possibility of persecution, or a reasonable possibility of torture, under paragraph (d) of this section.

* * * * *

(f) *Procedures for a positive fear determination.* If, pursuant to paragraph (e) of this section, an alien stowaway or an alien subject to expedited removal establishes either a credible fear of persecution, reasonable possibility of persecution, or a reasonable possibility of torture:

(1) DHS shall issue a Notice of Referral to Immigration Judge for asylum-and-withholding-only proceedings under 8 CFR 208.2(c)(1).

(2) Parole of the alien may be considered only in accordance with section 212(d)(5) of the Act and 8 CFR 212.5 of this chapter.

(g) *Procedures for a negative fear determination.* (1) If, pursuant to paragraphs (e) and (f) of this section, an alien stowaway or an alien subject to expedited removal does not establish a credible fear of persecution, reasonable possibility of persecution, or reasonable possibility of torture, DHS shall provide the alien with a written notice of decision and inquire whether the alien wishes to have an immigration judge review the negative determination, in accordance with section 235(b)(1)(B)(iii)(III) of the Act and this § 208.30. The alien must indicate whether he or she desires such review on a Record of Negative Fear Finding and Request for Review by Immigration Judge. If the alien refuses to make an indication, DHS shall consider such a response as a decision to decline review.

(i) If the alien requests such review, DHS shall arrange for detention of the alien and serve him or her with a Notice of Referral to Immigration Judge, for review of the negative fear determination in accordance with paragraph (g)(2) of this section.

(ii) If the alien is not a stowaway and does not request a review by an immigration judge, DHS shall order the alien removed with a Notice and Order of Expedited Removal, after review by a supervisory officer.

(iii) If the alien is a stowaway and the alien does not request a review by an immigration judge, DHS shall complete removal proceedings in accordance with section 235(a)(2) of the Act. (2) Review by immigration judge of a negative fear determination.

(i) Immigration judges shall review negative fear determinations as provided in 8 CFR 1208.30(g). DHS, however, may reconsider a negative credible fear finding that has been concurred upon by an immigration judge after providing notice of its reconsideration to the immigration judge.

(ii) DHS shall provide the record of any negative fear determinations being reviewed, including copies of the Notice of Referral to Immigration Judge, the asylum officer's notes, the summary of the material facts, and other materials upon which the determination was based, to the immigration judge with the negative fear determination.

■ 13. Amend § 208.31 by revising paragraphs (f) and (g) to read as follows:

§ 208.31 Reasonable fear of persecution or torture determinations involving aliens ordered removed under section 238(b) of the Act and aliens whose removal is reinstated under section 241(a)(5) of the Act.

* * * * *

(f) *Removal of aliens with no reasonable fear of persecution or torture.* If the asylum officer determines that the alien has not established a reasonable fear of persecution or torture, the asylum officer shall inform the alien in writing of the decision and shall inquire whether the alien wishes to have an immigration judge review the negative decision, using the Record of Negative Reasonable Fear Finding and Request for Review by Immigration Judge, on which the alien must indicate whether he or she desires such review. If the alien refuses to make an indication, DHS shall consider such a response as a decision to decline review.

(g) *Review by immigration judge.* The asylum officer's negative decision regarding reasonable fear shall be subject to review by an immigration judge upon the alien's request. If the alien requests such review, the asylum officer shall serve him or her with a Notice of Referral to Immigration Judge. The record of determination, including copies of the Notice of Referral to Immigration Judge, the asylum officer's notes, the summary of the material facts, and other materials upon which the determination was based shall be provided to the immigration judge with the negative determination. In the absence of exceptional circumstances, such review shall be conducted by the immigration judge within 10 days of the filing of the Notice of Referral to Immigration Judge with the immigration court. Upon review of the asylum officer's negative reasonable fear determination:

(1) If the immigration judge concurs with the asylum officer's determination that the alien does not have a reasonable fear of persecution or torture, the case shall be returned to DHS for removal of the alien. No appeal shall lie from the immigration judge's decision.

(2) If the immigration judge finds that the alien has a reasonable fear of persecution or torture, the alien may submit an Application for Asylum and for Withholding of Removal.

(i) The immigration judge shall consider only the alien's application for withholding of removal under 8 CFR 1208.16 and shall determine whether the alien's removal to the country of removal must be withheld or deferred.

(ii) Appeal of the immigration judge's decision whether removal must be

withheld or deferred lies with the Board of Immigration Appeals. If the alien or DHS appeals the immigration judge's decision, the Board shall review only the immigration judge's decision regarding the alien's eligibility for withholding or deferral of removal under 8 CFR 1208.16.

PART 235—INSPECTION OF PERSONS APPLYING FOR ADMISSION

■ 14. The authority citation for part 235 continues to read as follows:

Authority: 8 U.S.C. 1101 and note, 1103, 1183, 1185 (pursuant to E.O. 13323, 69 FR 241, 3 CFR, 2003 Comp., p. 278), 1201, 1224, 1225, 1226, 1228, 1365a note, 1365b, 1379, 1731–32; Title VII of Public Law 110–229; 8 U.S.C. 1185 note (section 7209 of Public Law 108–458); Public Law 112–54.

■ 15. Amend § 235.6 by revising paragraphs (a)(1)(ii) and (a)(2)(i) and (iii) and adding paragraph (c) to read as follows:

§ 235.6 Referral to immigration judge.

(a) * * *

(1) * * *

(ii) If an immigration officer verifies that an alien subject to expedited removal under section 235(b)(1) of the Act has been admitted as a lawful permanent resident or refugee, or granted asylum, or, upon review pursuant to § 235.3(b)(5)(iv) of chapter I, an immigration judge determines that the alien was once so admitted or granted asylum, provided that such status has not been terminated by final administrative action, and the DHS initiates removal proceedings against the alien under section 240 of the Act.

* * * * *

(2) * * *

(i) If an asylum officer determines that the alien does not have a credible fear of persecution, reasonable possibility of persecution, or reasonable possibility of torture, and the alien requests a review of that determination by an immigration judge; or

* * * * *

(iii) If an immigration officer refers an applicant in accordance with the provisions of 8 CFR 208.30 or 8 CFR 208.31.

* * * * *

(c) The provisions of part 235 are separate and severable from one another. In the event that any provision in part 235 is stayed, enjoined, not implemented, or otherwise held invalid, the remaining provisions shall nevertheless be implemented as an independent rule and continue in effect.

DEPARTMENT OF JUSTICE

Accordingly, for the reasons set forth in the preamble, 8 CFR parts 1003, 1208, 1212, 1235, and 1244 are amended as follows:

PART 1003—EXECUTIVE OFFICE FOR IMMIGRATION REVIEW

■ 16. The authority citation for part 1003 continues to read as follows:

Authority: 5 U.S.C. 301; 6 U.S.C. 521; 8 U.S.C. 1101, 1103, 1154, 1155, 1158, 1182, 1226, 1229, 1229a, 1229b, 1229c, 1231, 1254a, 1255, 1324d, 1330, 1361, 1362; 28 U.S.C. 509, 510, 1746; sec. 2 Reorg. Plan No. 2 of 1950; 3 CFR, 1949–1953 Comp., p. 1002; section 203 of Public Law 105–100, 111 Stat. 2196–200; sections 1506 and 1510 of Public Law 106–386, 114 Stat. 1527–29, 1531–32; section 1505 of Public Law 106–554, 114 Stat. 2763A–326 to–328.

■ 17. Amend § 1003.1 by revising paragraph (b)(9) to read as follows:

§ 1003.1 Organization, jurisdiction, and powers of the Board of Immigration Appeals.

* * * * *

(b) * * *

(9) Decisions of Immigration Judges in asylum proceedings pursuant to § 1208.2(b) and (c) of this chapter.

* * * * *

■ 18. Amend § 1003.42 by revising the section heading and paragraphs (a), (b), (d) through (g), (h)(1), and the last sentence in paragraph (h)(3) and adding paragraph (i) to read as follows:

§ 1003.42 Review of credible fear of persecution, reasonable possibility of persecution, and reasonable possibility of torture determinations.

(a) *Referral.* Jurisdiction for an immigration judge to review a negative fear determination by an asylum officer pursuant to section 235(b)(1)(B) of the Act shall commence with the filing by DHS of the Notice of Referral to Immigration Judge. DHS shall also file with the notice of referral a copy of the written record of determination as defined in section 235(b)(1)(B)(iii)(II) of the Act, including a copy of the alien's written request for review, if any.

(b) *Record of proceeding.* The Immigration Court shall create a Record of Proceeding for a review of a negative fear determination. This record shall not be merged with any later proceeding involving the same alien.

* * * * *

(d) *Standard of review.* (1) The immigration judge shall make a de novo determination as to whether there is a significant possibility, taking into account the credibility of the statements made by the alien in support of the alien's claim, whether the alien is subject to any mandatory bars to applying for asylum or being eligible for asylum under section 208(a)(2)(B)–(D) and (b)(2) of the Act, including any bars established by regulation under section 208(b)(2)(C) of the Act, and such other facts as are known to the immigration judge, that the alien could establish his or her ability to apply for or be granted asylum under section 208 of the Act. The immigration judge shall make a de novo determination as to whether there is a reasonable possibility, taking into account the credibility of the statements made by the alien in support of the alien's claim, whether the alien is subject to any mandatory bars to eligibility for withholding of removal under section 241(b)(3)(B) of the Act, and such other facts as are known to the immigration judge, that the alien would be persecuted on account of his or her race, religion, nationality, membership in a particular social group, or political opinion in the country of removal, consistent with the criteria in 8 CFR 1208.16(b). The immigration judge shall also make a de novo determination as to whether there is a reasonable possibility, taking into account the credibility of the statements made by the alien in support of the alien's claim and such other facts as are known to the immigration judge, that the alien would be tortured in the country of removal, consistent with the criteria in 8 CFR 1208.16(c), 8 CFR 1208.17, and 8 CFR 1208.18.

(2) If the alien is determined to be an alien described in 8 CFR208.13(c)(3) or 8 CFR 1208.13(c)(3) and is determined to lack a reasonable possibility of persecution or torture under 8 CFR 208.30(e)(5)(ii), the Immigration Judge shall first review de novo the determination that the alien is described in 8 CFR 208.13(c)(3) or 8 CFR 1208.13(c)(3) prior to any further review of the asylum officer's negative fear determination.

(3) If the alien is determined to be an alien described in 8 CFR 208.13(c)(4) or 8 CFR 1208.13(c)(4) and is determined to lack a reasonable possibility of persecution or torture under 8 CFR 208.30(e)(5)(iii), the immigration judge shall first review de novo the determination that the alien is described in 8 CFR 208.13(c)(4) or 8 CFR 1208.13(c)(4) prior to any further review of the asylum officer's negative fear determination.

(e) *Timing.* The immigration judge shall conclude the review to the maximum extent practicable within 24 hours, but in no case later than 7 days after the date the supervisory asylum officer has approved the asylum officer's

negative credible fear determination issued on the Record of Negative Credible Fear Finding and Request for Review.

(f) *Decision.* (1) The decision of the immigration judge shall be rendered in accordance with the provisions of 8 CFR 1208.30(g)(2). In reviewing the negative fear determination by DHS, the immigration judge shall apply relevant precedent issued by the Board of Immigration Appeals, the Attorney General, the Federal circuit court of appeals having jurisdiction over the immigration court where the Request for Review is filed, and the Supreme Court.

(2) No appeal shall lie from a review of a negative fear determination made by an Immigration Judge, but the Attorney General, in the Attorney General's sole and unreviewable discretion, may direct that the Immigration Judge refer a case for the Attorney General's review following the Immigration Judge's review of a negative fear determination.

(3) In any case the Attorney General decides, the Attorney General's decision shall be stated in writing and shall be transmitted to the Board for transmittal and service as provided in 8 CFR 1003.1(f). Such decision by the Attorney General may be designated as precedent as provided in 8 CFR 1003.1(g).

(g) *Custody.* An immigration judge shall have no authority to review an alien's custody status in the course of a review of a negative fear determination made by DHS.

(h) * * *

(1) *Arriving alien.* An immigration judge has no jurisdiction to review a determination by an asylum officer that an arriving alien is not eligible to apply for asylum pursuant to the 2002 U.S.-Canada Agreement formed under section 208(a)(2)(A) of the Act and should be returned to Canada to pursue his or her claims for asylum or other protection under the laws of Canada. *See* 8 CFR 208.30(e)(6). However, in any case where an asylum officer has found that an arriving alien qualifies for an exception to that Agreement, an immigration judge does have jurisdiction to review a negative fear finding made thereafter by the asylum officer as provided in this section.

* * * * *

(3) * * * However, if the asylum officer has determined that the alien may not or should not be removed to a third country under section 208(a)(2)(A) of the Act and subsequently makes a negative fear determination, an immigration judge has jurisdiction to review the negative fear finding as provided in this section.

* * * * *

(i) *Severability.* The provisions of part 1003 are separate and severable from one another. In the event that any provision in part 1003 is stayed, enjoined, not implemented, or otherwise held invalid, the remaining provisions shall nevertheless be implemented as an independent rule and continue in effect.

PART 1208—PROCEDURES FOR ASYLUM AND WITHHOLDING OF REMOVAL

■ 19. The authority citation for part 1208 continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1158, 1226, 1252, 1282; Title VII of Public Law 110–229.

■ 20. Amend § 1208.1 by adding paragraphs (c) through (g) to read as follows:

§ 1208.1 General.

* * * * *

(c) *Particular social group.* For purposes of adjudicating an application for asylum under section 208 of the Act or an application for withholding of removal under section 241(b)(3) of the Act, a particular social group is one that is based on an immutable or fundamental characteristic, is defined with particularity, and is recognized as socially distinct in the society at question. Such a particular social group cannot be defined exclusively by the alleged persecutory acts or harm and must also have existed independently of the alleged persecutory acts or harm that forms the basis of the claim. The Attorney General, in general, will not favorably adjudicate claims of aliens who claim a fear of persecution on account of membership in a particular social group consisting of or defined by the following circumstances: past or present criminal activity or association (including gang membership); presence in a country with generalized violence or a high crime rate; being the subject of a recruitment effort by criminal, terrorist, or persecutory groups; the targeting of the applicant for criminal activity for financial gain based on perceptions of wealth or affluence; interpersonal disputes of which governmental authorities were unaware or uninvolved; private criminal acts of which governmental authorities were unaware or uninvolved; past or present terrorist activity or association; past or present persecutory activity or association; or, status as an alien returning from the United States. This list is nonexhaustive, and the substance of the alleged particular social group, rather than the precise form of its delineation, shall be considered in determining whether the group falls within one of the categories on the list. No alien shall be found to be a refugee or have it decided that the alien's life or freedom would be threatened based on membership in a particular social group in any case unless that person first articulates on the record, or provides a basis on the record for determining, the definition and boundaries of the alleged particular social group. A failure to define, or provide a basis for defining, a formulation of a particular social group before an immigration judge shall waive any such claim for all purposes under the Act, including on appeal. Any waived claim on this basis shall not serve as the basis for any motion to reopen or reconsider for any reason, including a claim of ineffective assistance of counsel unless the alien complies with the procedural requirements for such a motion and demonstrates that counsel's failure to define, or provide a basis for defining, a formulation of a particular social group was both not a strategic choice and constituted egregious conduct.

(d) *Political opinion.* For purposes of adjudicating an application for asylum under section 208 of the Act or an application for withholding of removal under section 241(b)(3) of the Act, a political opinion is one expressed by or imputed to an applicant in which the applicant possesses an ideal or conviction in support of the furtherance of a discrete cause related to political control of a State or a unit thereof. The Attorney General, in general, will not favorably adjudicate claims of aliens who claim a fear of persecution on account of a political opinion defined solely by generalized disapproval of, disagreement with, or opposition to criminal, terrorist, gang, guerilla, or other non-state organizations absent expressive behavior in furtherance of a cause against such organizations related to efforts by the State to control such organizations or behavior that is antithetical to or otherwise opposes the ruling legal entity of the State or a legal sub-unit of the State. A person who has been forced to abort a pregnancy or to undergo involuntary sterilization, or who has been persecuted for failure or refusal to undergo such a procedure or for other resistance to a coercive population control program, shall be deemed to have been persecuted on account of political opinion, and a person who has a well-founded fear that he or she will be forced to undergo such a procedure or subject to persecution for

such failure, refusal, or resistance shall be deemed to have a well-founded fear of persecution on account of political opinion.

(e) *Persecution.* For purposes of adjudicating an application for asylum under section 208 of the Act or an application for withholding of removal under section 241(b)(3) of the Act, persecution requires an intent to target a belief or characteristic, a severe level of harm, and the infliction of a severe level of harm by the government of a country or by persons or an organization that the government was unable or unwilling to control. For purposes of evaluating the severity of the level of harm, persecution is an extreme concept involving a severe level of harm that includes actions so severe that they constitute an exigent threat. Persecution does not encompass the generalized harm that arises out of civil, criminal, or military strife in a country, nor does it encompass all treatment that the United States regards as unfair, offensive, unjust, or even unlawful or unconstitutional. It does not include intermittent harassment, including brief detentions; threats with no actual effort to carry out the threats, except that particularized threats of a severe harm of immediate and menacing nature made by an identified entity may constitute persecution; or, non-severe economic harm or property damage, though this list is nonexhaustive. The existence of government laws or policies that are unenforced or infrequently enforced do not, by themselves, constitute persecution, unless there is credible evidence that those laws or policies have been or would be applied to an applicant personally.

(f) *Nexus.* For purposes of adjudicating an application for asylum under section 208 of the Act or an application for withholding of removal under section 241(b)(3) of the Act, the Attorney General, in general, will not favorably adjudicate the claims of aliens who claim persecution based on the following list of nonexhaustive circumstances:

(1) Interpersonal animus or retribution;

(2) Interpersonal animus in which the alleged persecutor has not targeted, or manifested an animus against, other members of an alleged particular social group in addition to the member who has raised the claim at issue;

(3) Generalized disapproval of, disagreement with, or opposition to criminal, terrorist, gang, guerilla, or other non-state organizations absent expressive behavior in furtherance of a discrete cause against such organizations related to control of a State or expressive behavior that is antithetical to the State or a legal unit of the State;

(4) Resistance to recruitment or coercion by guerilla, criminal, gang, terrorist or other non-state organizations;

(5) The targeting of the applicant for criminal activity for financial gain based on wealth or affluence or perceptions of wealth or affluence;

(6) Criminal activity;

(7) Perceived, past or present, gang affiliation; or,

(8) Gender.

(g) *Evidence based on stereotypes.* For purposes of adjudicating an application for asylum under section 208 of the Act or an application for withholding of removal under section 241(b)(3) of the Act, evidence offered in support of such an application which promotes cultural stereotypes about a country, its inhabitants, or an alleged persecutor, including stereotypes based on race, religion, nationality, or gender, shall not be admissible in adjudicating that application, provided that nothing in this paragraph shall be construed as prohibiting the submission of evidence that an alleged persecutor holds stereotypical views of the applicant.

■ 21. Amend § 1208.2 by adding paragraph (c)(1)(ix) to read as follows:

§ 1208.2 Jurisdiction.

* * * * *

(c) * * *

(1) * * *

(ix) An alien found to have a credible fear of persecution, reasonable possibility of persecution, or reasonable possibility of torture in accordance with § 208.30, § 1003.42, or § 1208.30.

* * * * *

■ 22. Amend § 1208.5 by revising the first sentence of paragraph (a) to read as follows:

§ 1208.5 Special duties toward aliens in custody of DHS.

(a) *General.* When an alien in the custody of DHS requests asylum or withholding of removal, or expresses a fear of persecution or harm upon return to his or her country of origin or to agents thereof, DHS shall make available the appropriate application forms and shall provide the applicant with the information required by section 208(d)(4) of the Act, including in the case of an alien who is in custody with a positive credible fear determination under 8 CFR 208.30 or a reasonable fear determination pursuant to 8 CFR 208.31, and except in the case of an alien who is in custody pending a credible fear determination under 8 CFR 208.30 or a reasonable fear determination pursuant to 8 CFR 208.31. * * *

* * * * *

■ 23. Amend § 1208.6 by revising paragraphs (a) and (b) and adding paragraphs (d) and (e) to read as follows:

§ 1208.6 Disclosure to third parties.

(a) Information contained in or pertaining to any application for refugee admission, asylum, withholding of removal under section 241(b)(3) of the Act, or protection under regulations issued pursuant to the Convention Against Torture's implementing legislation, records pertaining to any credible fear determination conducted pursuant to § 208.30, and records pertaining to any reasonable fear determination conducted pursuant to § 208.31, shall not be disclosed without the written consent of the applicant, except as permitted by this section or at the discretion of the Attorney General.

(b) The confidentiality of other records kept by DHS and the Executive Office for Immigration Review that indicate that a specific alien has applied for refugee admission, asylum, withholding of removal under section 241(b)(3) of the Act, or protection under regulations issued pursuant to the Convention Against Torture's implementing legislation, or has received a credible fear or reasonable fear interview, or received a credible fear or reasonable fear review shall also be protected from disclosure, except as permitted in this section. DHS will coordinate with the Department of State to ensure that the confidentiality of those records is maintained if they are transmitted to Department of State offices in other countries.

* * * * *

(d)(1) Any information contained in an application for refugee admission, asylum, withholding of removal under section 241(b)(3) the Act, or protection under regulations issued pursuant to the Convention Against Torture's implementing legislation, any relevant and applicable information supporting that application, any information regarding an alien who has filed such an application, and any relevant and applicable information regarding an alien who has been the subject of a reasonable fear or credible fear determination may be disclosed:

(i) As part of an investigation or adjudication of the merits of that application or of any other application under the immigration laws;

(ii) As part of any State or Federal criminal investigation, proceeding, or prosecution;

(iii) Pursuant to any State or Federal mandatory reporting requirement;

(iv) To deter, prevent, or ameliorate the effects of child abuse;

(v) As part of any proceeding arising under the immigration laws, including proceedings arising under the Act; and

(vi) As part of the Government's defense of any legal action relating to the alien's immigration or custody status, including petitions for review filed in accordance with 8 U.S.C. 1252.

(2) If information may be disclosed under paragraph (d)(1) of this section, the disclosure provisions in paragraphs (a), (b), and (c) of this section shall not apply.

(e) Nothing in this section shall be construed as prohibiting the disclosure of information contained in an application for refugee admission, asylum, withholding of removal under section 241(b)(3)(B) of the Act, or protection under the regulations issued pursuant to the Convention Against Torture's implementing legislation, any relevant and applicable information supporting that application, information regarding an alien who has filed such an application, or information regarding an alien who has been the subject of a reasonable fear or credible fear determination:

(1) Among employees of the Department of Justice, the Department of Homeland Security, the Department of State, the Department of Health and Human Services, the Department of Labor, or a U.S. national security agency having a need to examine the information for an official purpose; or

(2) Where a United States government employee or contractor has a good faith and reasonable belief that disclosure is necessary to prevent the commission of a crime, the furtherance of an ongoing crime, or to ameliorate the effects of a crime.

■ 24. Section 1208.13 is amended by revising paragraphs (b)(3) introductory text and (b)(3)(ii) and adding paragraphs (b)(3)(iii) and (iv), (d), and (e) to read as follows:

§ 1208.13 Establishing asylum eligibility.

* * * * *

(b) * * *

(3) *Reasonableness of internal relocation.* For purposes of determinations under paragraphs (b)(1)(i) and (ii) and (b)(2) of this section, adjudicators should consider the totality of the relevant circumstances regarding an applicant's prospects for relocation, including the size of the country of nationality or last habitual residence, the geographic locus of the alleged persecution, the size, numerosity, and reach of the alleged persecutor, and the applicant's demonstrated ability to relocate to the United States in order to apply for asylum.

* * * * *

(ii) In cases in which the persecutor is a government or is government-sponsored, it shall be presumed that internal relocation would not be reasonable, unless the Department of Homeland Security establishes by a preponderance of the evidence that, under all the circumstances, it would be reasonable for the applicant to relocate.

(iii) Regardless of whether an applicant has established persecution in the past, in cases in which the persecutor is not the government or a government-sponsored actor, or otherwise is a private actor, there shall be a presumption that internal relocation would be reasonable unless the applicant establishes, by a preponderance of the evidence, that it would be unreasonable to relocate.

(iv) For purposes of determinations under paragraphs (b)(3)(ii) and (iii) of this section, persecutors who are private actors—including persecutors who are gang members, officials acting outside their official capacity, family members who are not themselves government officials, or neighbors who are not themselves government officials—shall not be considered to be persecutors who are the government or government-sponsored absent evidence that the government sponsored the persecution.

* * * * *

(d) *Discretion.* Factors that fall short of grounds of mandatory denial of an asylum application may constitute discretionary considerations.

(1) The following are significant adverse discretionary factors that a decision-maker shall consider, if applicable, in determining whether an alien merits a grant of asylum in the exercise of discretion:

(i) An alien's unlawful entry or unlawful attempted entry into the United States unless such entry or attempted entry was made in immediate flight from persecution in a contiguous country or unless such entry or attempted entry was made by an alien under the age of 18 at the time the entry or attempted entry was made;

(ii) The failure of an alien to apply for protection from persecution or torture in at least one country outside the alien's country of citizenship, nationality, or last lawful habitual residence through which the alien transited before entering the United States unless:

(A) The alien received a final judgment denying the alien protection in such country;

(B) The alien demonstrates that he or she satisfies the definition of ''victim of a severe form of trafficking in persons'' provided in 8 CFR 214.11; or

(C) Such country or countries were, at the time of the transit, not parties to the 1951 Convention relating to the Status of Refugees, the 1967 Protocol relating to the Status of Refugees, or the Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment; and

(iii) An alien's use of fraudulent documents to enter the United States, unless the alien arrived in the United States by air, sea, or land directly from the applicant's home country without transiting through any other country.

(2)(i) The Attorney General, except as provided in paragraph (d)(2)(ii) of this section, will not favorably exercise discretion under section 208 of the Act for an alien who:

(A) Immediately prior to his arrival in the United States or en route to the United States from the alien's country of citizenship, nationality, or last lawful habitual residence, spent more than 14 days in any one country unless:

(*1*) The alien demonstrates that he or she applied for protection from persecution or torture in such country and the alien received a final judgment denying the alien protection in such country;

(*2*) The alien demonstrates that he or she satisfies the definition of ''victim of a severe form of trafficking in persons'' provided in 8 CFR 214.11; or

(*3*) Such country was, at the time of the transit, not a party to the 1951 Convention relating to the Status of Refugees the 1967 Protocol relating to the Status of Refugees, or the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment;

(B) Transits through more than one country between his country of citizenship, nationality, or last habitual residence and the United States unless:

(*1*) The alien demonstrates that he or she applied for protection from persecution or torture in at least one such country and the alien received a final judgment denying the alien protection in such country;

(*2*) The alien demonstrates that he or she satisfies the definition of ''victim of a severe form of trafficking in persons'' provided in 8 CFR 214.11; or

(*3*) All such countries through which the alien transited en route to the United States were, at the time of the transit, not parties to the 1951 Convention relating to the Status of Refugees, the 1967 Protocol relating to the Status of Refugees, or the Convention against Torture and Other

Cruel, Inhuman or Degrading Treatment or Punishment;

(C) Would otherwise be subject to § 1208.13(c) but for the reversal, vacatur, expungement, or modification of a conviction or sentence unless the alien was found not guilty;

(D) Accrued more than one year of unlawful presence in the United States, as defined in sections 212(a)(9)(B)(ii) and (iii) of the Act, prior to filing an application for asylum;

(E) At the time the asylum application is filed with the immigration court or is referred from DHS has:

(*1*) Failed to timely file (or timely file a request for an extension of time to file) any required Federal, State, or local income tax returns;

(*2*) Failed to satisfy any outstanding Federal, State, or local tax obligations; or

(*3*) Has income that would result in tax liability under section 1 of the Internal Revenue Code of 1986 and that was not reported to the Internal Revenue Service;

(F) Has had two or more prior asylum applications denied for any reason;

(G) Has withdrawn a prior asylum application with prejudice or been found to have abandoned a prior asylum application;

(H) Failed to attend an interview regarding his or her asylum application with DHS, unless the alien shows by a preponderance of the evidence that:

(*1*) Exceptional circumstances prevented the alien from attending the interview; or

(*2*) The interview notice was not mailed to the last address provided by the alien or the alien's representative and neither the alien nor the alien's representative received notice of the interview; or

(I) Was subject to a final order of removal, deportation, or exclusion and did not file a motion to reopen to seek asylum based on changed country conditions within one year of the changes in country conditions.

(ii) Where one or more of the adverse discretionary factors set forth in paragraph (d)(2)(i) of this section are present, the Attorney General, in extraordinary circumstances, such as those involving national security or foreign policy considerations, or cases in which an alien, by clear and convincing evidence, demonstrates that the denial of the application for asylum would result in exceptional and extremely unusual hardship to the alien, may favorably exercise discretion under section 208 of the Act, notwithstanding the applicability of paragraph (d)(2)(i). Depending on the gravity of the circumstances underlying the application of paragraph (d)(2)(i), a showing of extraordinary circumstances might still be insufficient to warrant a favorable exercise of discretion under section 208 of the Act.

(e) *Prima facie eligibility.* (1) Notwithstanding any other provision of this part, upon oral or written motion by the Department of Homeland Security, an immigration judge shall, if warranted by the record, pretermit and deny any application for asylum, withholding of removal under section 241(b)(3) of the Act, or protection under the regulations issued pursuant to the Convention Against Torture's implementing legislation if the alien has not established a prima facie claim for relief or protection under applicable law. An immigration judge need not conduct a hearing prior to pretermitting and denying an application under this paragraph (e)(1) but must consider any response to the motion before making a decision.

(2) Notwithstanding any other provision of this part, upon his or her own authority, an immigration judge shall, if warranted by the record, pretermit and deny any application for asylum, withholding of removal under section 241(b)(3) of the Act, or protection under the regulations issued pursuant to the Convention Against Torture's implementing legislation if the alien has not established a prima facie claim for relief or protection under applicable law, provided that the immigration judge shall give the parties at least 10 days' notice prior to entering such an order. An immigration judge need not conduct a hearing prior to pretermitting and denying an application under this paragraph (e)(2) but must consider any filings by the parties within the 10-day period before making a decision.

§ 1208.14 [Amended]

■ 25. Amend § 1208.14 by

■ a. Removing the words ''§ 1235.3(b) of this chapter'' in paragraphs (c)(4)(ii) introductory text and (c)(4)(ii)(A) and adding in their place the words ''§ 235.3(b) of chapter I''; and

■ b. Removing the citations ''§ 1208.30'' and ''§ 1208.30(b)'' in paragraph (c)(4)(ii)(A) and adding in their place the words ''§ 208.30 of chapter I''.

■ 26. Revise § 1208.15 to read as follows:

§ 1208.15 Definition of ''firm resettlement.''

(a) An alien is considered to be firmly resettled if, after the events giving rise to the alien's asylum claim:

(1) The alien resided in a country through which the alien transited prior to arriving in or entering the United States and—

(i) Received or was eligible for any permanent legal immigration status in that country;

(ii) Resided in such a country with any non-permanent but indefinitely renewable legal immigration status (including asylee, refugee, or similar status but excluding status such as of a tourist); or

(iii) Resided in such a country and could have applied for and obtained any non-permanent but indefinitely renewable legal immigration status in that country;

(2) The alien physically resided voluntarily, and without continuing to suffer persecution in any one country for one year or more after departing his country of nationality or last habitual residence and prior to arrival in or entry into the United States, provided that time spent in Mexico by an alien who is not a native or citizen of Mexico solely as a direct result of being returned to Mexico pursuant to section 235(b)(2)(C) of the Act or of being subject to metering would not be counted for purposes of this paragraph; or

(3)(i) The alien is a citizen of a country other than the one where the alien alleges a fear of persecution and the alien was present in that country after departing his country of nationality or last habitual residence and prior to arrival in or entry into the United States, or

(ii) the alien was a citizen of a country other than the one where the alien alleges a fear of persecution, the alien was present in that country after departing his country of nationality or last habitual residence and prior to arrival in or entry into the United States, and the alien renounced that citizenship after arriving in the United States.

(b) The provisions of 8 CFR 1240.8(d) shall apply when the evidence of record indicates that the firm resettlement bar may apply. In such cases, the alien shall bear the burden of proving the bar does not apply. Either DHS or the immigration judge may raise the issue of the application of the firm resettlement bar based on the evidence of record. The firm resettlement of an alien's parent(s) shall be imputed to the alien if the resettlement occurred before the alien turned 18 and the alien resided with the alien's parents at the time of the firm resettlement unless he or she could not have derived any permanent legal immigration status or any non-permanent but indefinitely renewable legal immigration status (including asylee, refugee, or similar status but

excluding status such as of a tourist) from the alien's parent.

■ 27. Amend § 1208.16 by revising paragraphs (b)(3) introductory text and (b)(3)(ii) and adding paragraphs (b)(3)(iii) and (iv) to read as follows:

§ 1208.16 Withholding of removal under section 241(b)(3)(B) of the Act and withholding of removal under the Convention Against Torture.

* * * * *

(b) * * *

(3) *Reasonableness of internal relocation.* For purposes of determinations under paragraphs (b)(1) and (2) of this section, adjudicators should consider the totality of the relevant circumstances regarding an applicant's prospects for relocation, including the size of the country of nationality or last habitual residence, the geographic locus of the alleged persecution, the size, reach, or numerosity of the alleged persecutor, and the applicant's demonstrated ability to relocate to the United States in order to apply for withholding of removal.

* * * * *

(ii) In cases in which the persecutor is a government or is government-sponsored, it shall be presumed that internal relocation would not be reasonable, unless the DHS establishes by a preponderance of the evidence that, under all the circumstances, it would be reasonable for the applicant to relocate.

(iii) Regardless of whether an applicant has established persecution in the past, in cases in which the persecutor is not the government or a government-sponsored actor, or otherwise is a private actor, there shall be a presumption that internal relocation would be reasonable unless the applicant establishes, by a preponderance of the evidence, that it would be unreasonable to relocate.

(iv) For purposes of determinations under paragraphs (b)(3)(ii) and (iii) of this section, persecutors who are private actors, including persecutors who are gang members, public official who are not acting under color of law, or family members who are not themselves government officials or neighbors who are not themselves government officials, shall not be considered to be persecutors who are the government or government-sponsored absent evidence that the government sponsored the persecution.

* * * * *

■ 28. Amend § 1208.18 by revising paragraphs (a)(1) and (7) to read as follows:

§ 1208.18 Implementation of the Convention Against Torture.

(a) * * *

(1) Torture is defined as any act by which severe pain or suffering, whether physical or mental, is intentionally inflicted on a person for such purposes as obtaining from him or her or a third person information or a confession, punishing him or her for an act he or she or a third person has committed or is suspected of having committed, intimidating or coercing him or her or a third person, or for any reason based on discrimination of any kind, when such pain or suffering is inflicted by, or at the instigation of, or with the consent or acquiescence of, a public official acting in an official capacity or other person acting in an official capacity. Pain or suffering inflicted by a public official who is not acting under color of law shall not constitute pain or suffering inflicted by, or at the instigation of, or with the consent or acquiescence of, a public official acting in an official capacity or other person acting in an official capacity, although a different public official acting in an official capacity or other person acting in an official capacity could instigate, consent to, or acquiesce in the pain or suffering inflicted by the public official who is not acting under color of law.

* * * * *

(7) Acquiescence of a public official requires that the public official, prior to the activity constituting torture, have awareness of such activity and thereafter breach his or her legal responsibility to intervene to prevent such activity. Such awareness requires a finding of either actual knowledge or willful blindness. Willful blindness means that the public official acting in an official capacity or other person acting in an official capacity was aware of a high probability of activity constituting torture and deliberately avoided learning the truth; it is not enough that such public official acting in an official capacity or other person acting in an official capacity was mistaken, recklessly disregarded the truth, or negligently failed to inquire. In order for a public official to breach his or her legal responsibility to intervene to prevent activity constituting torture, the official must have been charged with preventing the activity as part of his or her duties and have failed to intervene. No person will be deemed to have breached a legal responsibility to intervene if such person is unable to intervene, or if the person intervenes but is unable to prevent the activity that constitutes torture.

* * * * *

■ 29. Revise § 1208.20 to read as follows:

§ 1208.20 Determining if an asylum application is frivolous.

(a) For applications filed on or after April 1, 1997, and before January 11, 2021, an applicant is subject to the provisions of section 208(d)(6) of the Act only if the alien received the notice required by section 208(d)(4)(A) of the Act and a final order by an immigration judge or the Board of Immigration Appeals specifically finds that the alien knowingly filed a frivolous asylum application. An application is frivolous if:

(1) Any of the material elements in the asylum application is deliberately fabricated, and the immigration judge or the Board is satisfied that the applicant, during the course of the proceedings, has had sufficient opportunity to account for any discrepancies or implausible aspects of the claim.

(2) Paragraphs (b) through (f) shall only apply to applications filed on or after January 11, 2021.

(b) For applications filed on or after January 11, 2021, an asylum officer may determine that the applicant knowingly filed a frivolous asylum application and may refer the applicant to an immigration judge on that basis, so long as the applicant has received the notice required by section 208(d)(4)(A) of the Act. For applications referred to an immigration judge, an asylum officer's determination that an application is frivolous will not render an applicant permanently ineligible for immigration benefits unless an immigration judge or the Board makes a finding of frivolousness as described in paragraph (c) of this section.

(c) For applications filed on or after January 11, 2021, an asylum application is frivolous if it:

(1) Contains a fabricated material element;

(2) Is premised upon false or fabricated evidence unless the application would have been granted without the false or fabricated evidence;

(3) Is filed without regard to the merits of the claim; or

(4) Is clearly foreclosed by applicable law.

(d) If the alien has been provided the warning required by section 208(d)(4)(A) of the Act, he or she need not be given any additional or further opportunity to account for any issues with his or her claim prior to the entry of a frivolousness finding.

(e) An asylum application may be found frivolous even if it was untimely filed.

(f) A withdrawn asylum application may be found frivolous unless:

(1) The alien wholly disclaims the application and withdraws it with prejudice;

(2) The alien is eligible for and agrees to accept voluntary departure for a period of no more than 30 days pursuant to section 240B(a) of the Act;

(3) The alien withdraws any and all other applications for relief or protection with prejudice; and

(4) The alien waives his right to appeal and any rights to file, for any reason, a motion to reopen or reconsider.

(g) For purposes of this section, a finding that an alien filed a knowingly frivolous asylum application shall not preclude the alien from seeking withholding of removal under section 241(b)(3) of the Act or protection under the regulations issued pursuant to the Convention Against Torture's implementing legislation.

■ 30. Add § 1208.25 to read as follows:

§ 1208.25 Severability.

The provisions of part 1208 are separate and severable from one another. In the event that any provision in part 1208 is stayed, enjoined, not implemented, or otherwise held invalid, the remaining provisions shall nevertheless be implemented as an independent rule and continue in effect.

■ 31. Amend § 1208.30 by revising the section heading and paragraphs (a), (b) introductory text, (b)(2), (e), and (g) to read as follows:

§ 1208.30 Credible fear of persecution, reasonable possibility of persecution, and reasonable possibility of torture determinations involving stowaways and applicants for admission who are found inadmissible pursuant to section 212(a)(6)(C) or 212(a)(7) of the Act or whose entry is limited or suspended under section 212(f) or 215(a)(1) of the Act, or who failed to apply for protection from persecution in a third country where potential relief is available while en route to the United States.

(a) *Jurisdiction.* The provisions of this subpart B apply to aliens subject to sections 235(a)(2) and 235(b)(1) of the Act. Pursuant to section 235(b)(1)(B) and 8 CFR 208.30, DHS has exclusive jurisdiction to make fear determinations, and the immigration judges have exclusive jurisdiction to review such determinations. Except as otherwise provided in this subpart B, paragraphs (b) through (g) of this section and 8 CFR 208.30 are the exclusive procedures applicable to stowaways and applicants for admission who are found inadmissible pursuant to section 212(a)(6)(C) or 212(a)(7) of the Act and who receive fear interviews, determinations, and reviews under section 235(b)(1)(B) of the Act and 8 CFR 208.30. Prior to January 1, 2030, an alien physically present in or arriving in the Commonwealth of the Northern Mariana Islands is ineligible to apply for asylum and may only establish eligibility for withholding of removal pursuant to section 241(b)(3) of the Act or withholding or deferral of removal under the regulations issued pursuant to the Convention Against Torture's implementing legislation.

(b) *Treatment of dependents.* A spouse or child of an alien may be included in that alien's fear evaluation and determination, if such spouse or child:

* * * * *

(2) *Desires to be included in the principal alien's determination.* However, any alien may have his or her evaluation and determination made separately, if he or she expresses such a desire.

* * * * *

(e) *Determination.* For the standards and procedures for asylum officers in conducting credible fear of persecution, reasonable possibility of persecution, and reasonable possibility of torture interviews and in making positive and negative fear determinations, see 8 CFR 208.30. The immigration judges will review such determinations as provided in paragraph (g) of this section and 8 CFR 1003.42.

* * * * *

(g) *Procedures for negative fear determinations*—(1) *Review by immigration judge of a mandatory bar finding.* (i) If the alien is determined to be an alien described in 8 CFR 208.13(c)(3) or 8 CFR 1208.13(c)(3) and is determined to lack a credible fear of persecution or a reasonable possibility of persecution or torture under 8 CFR 208.30(e)(5)(ii), the immigration judge shall first review de novo the determination that the alien is described in 8 CFR 208.13(c)(3) or 8 CFR 1208.13(c)(3). If the immigration judge finds that the alien is not described in 8 CFR 208.13(c)(3) or 8 CFR 1208.13(c)(3), then the immigration judge shall vacate the determination of the asylum officer, and DHS may commence asylum-and-withholding-only proceedings under 8 CFR 1208.2(c)(1). If the immigration judge concurs with the determination that the alien is an alien described in 8 CFR 208.13(c)(3) or 8 CFR 1208.13(c)(3), the immigration judge will then review the asylum officer's negative determinations regarding credible fear and regarding reasonable possibility made under 8 CFR 208.30(e)(5)(iv) consistent with paragraph (g)(2) of this section, except that the immigration judge will review the fear of persecution or torture findings under the reasonable possibility standard instead of the credible fear (''significant possibility'') standard described in paragraph (g)(2).

(ii) If the alien is determined to be an alien described as ineligible for asylum in 8 CFR 208.13(c)(4) or 8 CFR 1208.13(c)(4) and is determined to lack a reasonable possibility of persecution or torture under 8 CFR 208.30(e)(5)(v), the immigration judge shall first review de novo the determination that the alien is described as ineligible for asylum in 8 CFR 208.13(c)(4) or 8 CFR 1208.13(c)(4). If the immigration judge finds that the alien is not described as ineligible for asylum in 8 CFR 208.13(c)(4) or 8 CFR 1208.13(c)(4), then the immigration judge shall vacate the determination of the asylum officer, and DHS may commence asylum-and-withholding-only proceedings under 8 CFR 1208.2(c)(1). If the immigration judge concurs with the determination that the alien is an alien described as ineligible for asylum in 8 CFR 208.13(c)(4) or 8 CFR 1208.13(c)(4), the immigration judge will then review the asylum officer's negative decision regarding reasonable possibility made under 8 CFR 208.30(e)(5)(v) consistent with paragraph (g)(2) of this section, except that the immigration judge will review the fear of persecution or torture findings under the reasonable possibility standard instead of the credible fear of persecution standard described in paragraph (g)(2).

(2) *Review by immigration judge of a negative fear finding.* (i) The asylum officer's negative decision regarding a credible fear of persecution, reasonable possibility of persecution, and reasonable possibility of torture shall be subject to review by an immigration judge upon the applicant's request, in accordance with section 235(b)(1)(B)(iii)(III) of the Act. If the alien refuses to make an indication, DHS will consider such a response as a decision to decline review.

(ii) The record of the negative fear determination, including copies of the Notice of Referral to Immigration Judge, the asylum officer's notes, the summary of the material facts, and other materials upon which the determination was based shall be provided to the immigration judge with the negative fear determination.

(iii) A fear hearing will be closed to the public unless the alien states for the record or submits a written statement that the alien is waiving that requirement; in that event the hearing shall be open to the public, subject to

the immigration judge's discretion as provided in 8 CFR 1003.27.

(iv) Upon review of the asylum officer's negative fear determinations:

(A) If the immigration judge concurs with the determination of the asylum officer that the alien has not established a credible fear of persecution, reasonable possibility of persecution, or reasonable possibility of torture, the case shall be returned to DHS for removal of the alien. The immigration judge's decision is final and may not be appealed.

(B) If the immigration judge finds that the alien, other than an alien stowaway, establishes a credible fear of persecution, reasonable possibility of persecution, or reasonable possibility of torture, the immigration judge shall vacate the Notice and Order of Expedited Removal, and DHS may commence asylum-and-withholding-only proceedings under 8 CFR 1208.2(c)(1), during which time the alien may file an application for asylum and for withholding of removal in accordance with 8 CFR 1208.4(b)(3)(i). Such application shall be considered de novo in all respects by an immigration judge regardless of any determination made under this paragraph.

(C) If the immigration judge finds that an alien stowaway establishes a credible fear of persecution, reasonable possibility of torture, or reasonable possibility of torture, the alien shall be allowed to file an application for asylum and for withholding of removal before the immigration judge in accordance with 8 CFR 1208.4(b)(3)(iii). The immigration judge shall decide the application as provided in that section. Such application shall be considered de novo in all respects by an immigration judge regardless of any determination made under this paragraph. Such decision on that application may be appealed by either the stowaway or DHS to the Board of Immigration Appeals. If a denial of the application for asylum and for withholding of removal becomes final, and deferral of removal has not otherwise been granted pursuant to 8 CFR 1208.17(a), the alien shall be removed from the United States in accordance with section 235(a)(2) of the Act. If an approval of the application for asylum, withholding of removal, or, as pertinent, deferral of removal becomes final, DHS shall terminate removal proceedings under section 235(a)(2) of the Act.

■ 32. Amend § 1208.31 by revising paragraphs (f) and (g) to read as follows:

§ 1208.31 Reasonable fear of persecution or torture determinations involving aliens ordered removed under section 238(b) of the Act and aliens whose removal is reinstated under section 241(a)(5) of the Act.

* * * * *

(f) *Removal of aliens with no reasonable fear of persecution or torture.* If the asylum officer determines that the alien has not established a reasonable fear of persecution or torture, the asylum officer shall inform the alien in writing of the decision and shall inquire whether the alien wishes to have an immigration judge review the negative decision, using the Record of Negative Reasonable Fear Finding and Request for Review by Immigration Judge, on which the alien must indicate whether he or she desires such review. If the alien refuses to make an indication, DHS shall consider such a response as a decision to decline review.

(g) *Review by Immigration Judge.* The asylum officer's negative decision regarding reasonable fear shall be subject to review by an immigration judge upon the alien's request. If the alien requests such review, the asylum officer shall serve him or her with a Notice of Referral to the Immigration Judge. The record of determination, including copies of the Notice of Referral to the Immigration Judge, the asylum officer's notes, the summary of the material facts, and other materials upon which the determination was based shall be provided to the immigration judge with the negative determination. In the absence of exceptional circumstances, such review shall be conducted by the immigration judge within 10 days of the filing of the Notice of Referral to the Immigration Judge with the immigration court. Upon review of the asylum officer's negative reasonable fear determination:

(1) If the immigration judge concurs with the asylum officer's determination that the alien does not have a reasonable fear of persecution or torture, the case shall be returned to DHS for removal of the alien. No appeal shall lie from the immigration judge's decision.

(2) If the immigration judge finds that the alien has a reasonable fear of persecution or torture, the alien may submit an Application for Asylum and for Withholding of Removal. Such application shall be considered de novo in all respects by an immigration judge regardless of any determination made under this paragraph.

(i) The immigration judge shall consider only the alien's application for withholding of removal under 8 CFR 1208.16 and shall determine whether the alien's removal to the country of removal must be withheld or deferred.

(ii) Appeal of the immigration judge's decision whether removal must be withheld or deferred lies with the Board of Immigration Appeals. If the alien or DHS appeals the immigration judge's decision, the Board shall review only the immigration judge's decision regarding the alien's eligibility for withholding or deferral of removal under 8 CFR 1208.16.

PART 1212—DOCUMENTARY REQUIREMENTS: NONIMMIGRANTS; WAIVERS; ADMISSION OF CERTAIN INADMISSIBLE ALIENS; PAROLE

■ 33. The authority citation for part 1212 continues to read as follows:

Authority: 8 U.S.C. 1101 and note, 1102, 1103, 1182 and note, 1184, 1187, 1223, 1225, 1226, 1227, 1255; 8 U.S.C. 1185 note (section 7209 of Public Law 108–458); Title VII of Public Law 110–229.

■ 34. Add § 1212.13 to read as follows:

§ 1212.13 Severability.

The provisions of part 1212 are separate and severable from one another. In the event that any provision in part 1212 is stayed, enjoined, not implemented, or otherwise held invalid, the remaining provisions shall nevertheless be implemented as an independent rule and continue in effect.

§ 1212.14 [Amended]

■ 35. Amend § 1212.14 in paragraph (a)(1)(vii) by removing the words ''§ 1235.3 of this chapter'' and adding in their place the words ''§ 235.3 of chapter I''.

PART 1235—INSPECTION OF PERSONS APPLYING FOR ADMISSION

■ 36. The authority citation for part 1235 continues to read as follows:

Authority: 8 U.S.C. 1101 and note, 1103, 1183, 1185 (pursuant to E.O. 13323, 69 FR 241, 3 CFR, 2003 Comp., p. 278), 1201, 1224, 1225, 1226, 1228, 1365a note, 1379, 1731–32; Title VII of Public Law 110–229; 8 U.S.C. 1185 note (section 7209 of Public Law 108–458).

§§ 1235.1, 1235.2, 1235.3, and 1235.5 [Removed and Reserved]

■ 37. Remove and reserve §§ 1235.1, 1235.2, 1235.3, and 1235.5.

■ 38. Amend § 1235.6 by:

■ a. Removing paragraphs (a)(1)(ii) and (iii);

■ b. Redesignating paragraph (a)(1)(iv) as paragraph (a)(1)(ii) and revising it;

■ c. Revising paragraphs (a)(2)(ii) and (iii); and

■ d. Adding paragraph (c).

The revisions and addition read as follows:

§ 1235.6 Referral to immigration judge.

(a) * * *

(1) * * *

(ii) If an immigration officer verifies that an alien subject to expedited removal under section 235(b)(1) of the Act has been admitted as a lawful permanent resident or refugee, or granted asylum, or, upon review pursuant to § 235.3(b)(5)(iv) of chapter I, an immigration judge determines that the alien was once so admitted or granted asylum, provided that such status has not been terminated by final administrative action, and DHS initiates removal proceedings against the alien under section 240 of the Act.

* * * * *

(2) * * *

(i) If an asylum officer determines that an alien does not have a credible fear of persecution, reasonable possibility of persecution, or reasonable possibility of torture, and the alien requests a review of that determination by an immigration judge; or

* * * * *

(iii) If an immigration officer refers an applicant in accordance with the provisions of § 208.30 or § 208.31.

* * * * *

(c) The provisions of part 1235 are separate and severable from one another. In the event that any provision in part 1235 is stayed, enjoined, not implemented, or otherwise held invalid, the remaining provisions shall nevertheless be implemented as an independent rule and continue in effect.

PART 1244—TEMPORARY PROTECTED STATUS FOR NATIONALS OF DESIGNATED STATES

■ 39. The authority citation for part 1244 continues to read as follows:

Authority: 8 U.S.C. 1103, 1254, 1254a note, 8 CFR part 2.

■ 40. Amend § 1244.4 by revising paragraph (b) to read as follows:

§ 1244.4 Ineligible aliens.

* * * * *

(b) Is an alien described in section 208(b)(2)(A) of the Act.

Chad R. Mizelle,

Senior Official Performing the Duties of the General Counsel, U.S. Department of Homeland Security.

Dated: December 2, 2020.

William P. Barr,

Attorney General.

Licensing Amendments

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: The Office of the Comptroller of the Currency (OCC) is amending its rules relating to policies and procedures for corporate activities and transactions involving national banks and Federal savings associations to update and clarify the policies and procedures, eliminate unnecessary requirements consistent with safety and soundness, and make other technical and conforming changes.

DATES: The final rule is effective on January 11, 2021, except for instruction 15g which is effective on December 11, 2020.

FOR FURTHER INFORMATION CONTACT: For additional information, contact Christopher Crawford, Counsel, Valerie Song, Assistant Director, Heidi M. Thomas, Special Counsel, or Rima Kundnani, Senior Attorney, Chief Counsel's Office, (202) 649–5490; or Karen Marcotte, Director for Licensing Activities, (202) 649–7297, Office of the Comptroller of the Currency, 400 7th Street SW, Washington, DC 20219. For persons who are deaf or hearing impaired, TTY, (202) 649–5597.

SUPPLEMENTARY INFORMATION:

I. Background

Twelve CFR part 5 sets forth the OCC's requirements for national banks and Federal savings associations that seek to engage in certain corporate transactions or activities. It addresses the range of an institution's existence from chartering to dissolution and includes, among other things, business combinations, branching matters, operating subsidiaries, and dividend payments. In some cases, a national bank or Federal savings association is required to apply to engage in a certain transaction or activity while in other situations the bank or savings association must submit a notice to the OCC either for informational purposes or as a means for providing the OCC with the opportunity to object to the transaction or activity. On March 5, 2020, the OCC issued a notice of proposed rulemaking (proposal) to revise part 5.[1] This proposal is part of the OCC's continual review of its regulations to eliminate outdated or otherwise unnecessary provisions and to clarify or revise requirements imposed on national banks and Federal savings associations where possible and when not inconsistent with safety and soundness.[2]

The OCC received six substantive written comments on this proposal. These comments and the OCC's response are discussed in the next section of this *Supplementary Information.*

II. Description of the Final Rule

Rules of General Applicability (Part 5, Subpart A)

Twelve CFR part 5, subpart A, sets forth the OCC's generally applicable rules and procedures for corporate activities and transactions of national banks and Federal savings associations. The OCC proposed substantive and technical changes to subpart A as explained below.

Rules of General Applicability (§ 5.2) Section 5.2(b) provides that the OCC may adopt materially different procedures for a particular filing or class of filings in exceptional circumstances or for unusual transactions after providing notice to the applicant and any other party that the OCC determines should receive notice. The proposal would increase the OCC's flexibility to address unusual situations by providing that the OCC may adopt materially different procedures as it deems necessary and then using the term ''exceptional circumstances or unusual transactions'' as examples, but not limitations, as to when the OCC may deem it necessary to adopt materially different procedures. One commenter expressed concern that the phrase ''as it deems necessary'' seemed vague and suggested the OCC note specific instances where flexibility is needed to eliminate vagueness.

The OCC disagrees with this commenter. The final rule includes examples—for exceptional circumstances or unusual transactions—that are intended to explain when the OCC may act while not limiting its ability in unforeseen cases where additional flexibility may be needed. Therefore, the OCC adopts this change as proposed.

Definitions (§ 5.3) Section 5.3 defines terms that are used throughout part 5. The OCC proposed several new definitions to this section. First, the OCC proposed definitions for ''nonconforming assets'' and ''nonconforming activities.'' The OCC uses, but does not define, these terms in §§ 5.23 and 5.24 (conversions to a Federal savings association or national bank, respectively) and § 5.33 (business combinations). The OCC proposed these definitions to mean assets or activities that are impermissible for a national bank or a Federal savings association, as applicable, to hold or conduct, or if permissible, are nonetheless held or conducted in a manner that exceeds limits applicable to national banks or Federal savings associations. Under this proposed definition, the term ''assets'' includes a national bank's or Federal savings association's investments in subsidiaries or other entities. The OCC did not receive any comments on these definitions and adopts them as proposed.

Second, the OCC proposed to define the term ''previously approved activity'' to mean, in the case of a national bank, an activity approved in published OCC precedent for a national bank, an operating subsidiary of a national bank, or a non-controlling investment of a national bank; and in the case of a Federal savings association, an activity approved in published OCC or Office of Thrift Supervision (OTS) precedent for a Federal savings association, an operating subsidiary of a Federal savings association, or a pass-through investment of a Federal savings association.[3] The OCC proposed this definition to provide more clarity given the repeated use of this standard in §§ 5.34, 5.36, 5.38, and 5.58. One commenter discussed this definition. This commenter requested that the OCC clarify that this definition includes a previous OCC approval for any bank, not only the bank in question. The intention of this definition is to apply to

[1] The proposed rule was published in the **Federal Register** on April 2, 2020. 85 FR 18728.

[2] These periodic reviews are in addition to the OCC's decennial review of its regulations as required by the Economic Growth and Regulatory Paperwork Reduction Act (EGRPRA). Public Law 104–208 (1996), codified at 12 U.S.C. 3311(b). Section 2222 of EGRPRA requires that, at least once every 10 years, the OCC along with the other Federal banking agencies and the Federal Financial Institutions Examination Council (FFIEC) conduct a review of their regulations to identify outdated or otherwise unnecessary regulatory requirements imposed on insured depository institutions. Specifically, EGRPRA requires the agencies to categorize and publish their regulations for comment, eliminate unnecessary regulations to the extent that such action is appropriate, and submit a report to Congress summarizing their review. The agencies completed their second EGRPRA review on March 30, 2017 and published their report in the **Federal Register**. 82 FR 15900 (March 30, 2017).

[3] The OCC notes that this definition would not apply to an activity that a statute, regulation, or court decision has subsequently made impermissible.

all previously approved activities. To clarify this, the OCC has changed ''an activity'' to ''any activity'' in this definition in the final rule.

The preamble to the proposed rule also noted that for references to previously approved activities, national banks and Federal savings associations may consult the OCC's publications *Comparison of the Powers of National Banks and Federal Savings Associations* and *Activities Permissible for National Banks and Federal Savings Associations, Cumulative.*[4] In response to the commenter, the OCC clarifies that these documents are not exclusive examples of where to find published OCC precedent. The OCC also publishes interpretive letters and corporate decisions that may be used as precedent in its monthly Interpretations and Actions.[5] This commenter also suggested that the OCC publish its unpublished interpretive letters regarding permissible activities. The OCC notes that it endeavors to publish all pertinent interpretive letters.

Third, the OCC defines the term ''well capitalized'' differently in various sections of part 5 by cross-referencing to other OCC rules. The OCC proposed to add a definition of ''well capitalized'' to § 5.3 that incorporates these cross-references so that the individual cross-references in other sections are no longer needed. The OCC received no comments on this change and adopts it in the final rule as proposed, with one technical change to make a cross-reference citation more specific. As noted in the preamble to the proposed rule, this new definition does not make any substantive changes.

Fourth, the OCC proposed to add the term ''well managed'' to § 5.3. Currently, part 5 contains two different definitions of ''well managed.'' Consistent with section 5136A of the Revised Statutes (12 U.S.C. 24a), § 5.39 generally defines ''well managed'' for purposes of financial subsidiaries as a 1 or 2 composite rating under the Uniform Financial Institutions Rating System and at least a rating of 2 for management. By contrast, §§ 5.34 and 5.38, governing national bank and Federal savings association operating subsidiaries, respectively, generally define ''well managed'' as a 1 or 2 composite rating without reference to the management rating. Sections 5.35 (bank service company investments), 5.36 (other equity investments by a national bank), and 5.58 (Federal savings association pass-through investments) cross-reference to the §§ 5.34 or 5.38 definition. Additionally, § 5.59(h)(2)(ii)(A) requires a Federal savings association to be well managed to be eligible for expedited review when acquiring or establishing a service corporation.

The OCC proposed a single definition of ''well managed'' applicable throughout part 5 to eliminate confusion between the two definitions and to further the OCC's supervisory objectives.[6] The financial subsidiary statute, 12 U.S.C. 24a, defines ''well managed'' to include the management rating, and the OCC proposed to use this definition for national banks and Federal savings associations. The proposal also defined ''well managed'' for Federal branches and agencies of foreign banks as meaning the composite ROCA supervisory rating (which rates risk management, operational controls, compliance and assets quality) of 1 or 2, and at least a rating of 2 for risk management.

The OCC received one comment on this proposed definition. This commenter opposed the inclusion of management rating in a definition of ''well managed,'' except as required by statute. It stated that the financial subsidiary statutory definition of ''well managed'' was intended for new non-traditional activities, not core banking activities, and that using the new ''well managed'' definition could cause some banks to conduct activities in the bank rather than the subsidiary. The commenter noted that this could create safety and soundness issues because the bank would no longer benefit from having the activities conducted in a separate entity. In addition, this commenter stated that, in any event, the CAMELS management rating is in need of change.

The OCC disagrees with this commenter. As the OCC explained in the preamble to the proposed rule, the OCC believes that a single definition of ''well managed'' would enhance bank safety and soundness and provide a clearer and more consistent standard for national banks and Federal savings associations. In addition, the OCC finds that the components reflected in an entity's management rating, such as bank controls, are relevant to the establishment of operating subsidiaries, investments in bank service companies, other equity investments of a national bank and pass-through investments of a Federal savings association, and Federal savings association investments in service corporations. As explained in the preamble to the proposed rule, a national bank, Federal savings association, or Federal branch or agency with a 2 composite rating but a 3 management, or risk management, rating warrants additional scrutiny. Further, the OCC notes that the definition of ''well managed'' in Regulation K (international banking) and Regulation Y (bank holding companies) of the Board of Governors of the Federal Reserve System (Federal Reserve Board) also includes both composite and management ratings.[7]

This commenter also requested that if the OCC adopts the proposed ''well managed'' definition, the definition should include reasonable exceptions to the associated filing requirements. However, the proposed definition provides that it applies unless the OCC otherwise determines in writing. This provision allows the OCC to make exceptions in certain cases as warranted.

Finally, this commenter requested a transition period in event a bank receives a new rating, noting that without such a transition period a bank might be required to file an application where it already has begun negotiating or entering into an agreement to, for example, make a non-controlling investment, or otherwise relied on the fact that only an after-the-fact notice would be required. Specifically, the commenter recommended that the required ''compliance date'' of a new rating, particularly if it creates new requirements for the bank, should be several months after it is assigned or there should be an exception for any agreement already entered into at the

[4] These references are available at *https://www.occ.gov/publications-and-resources/publications/banker-education/files/pub-comparison-powers-national-banks-fed-sav-assoc.pdf* and *https://www.occ.gov/publications-and-resources/publications/banker-education/files/pub-activities-permissible-for-nat-banks-fed-saving.pdf.*

[6] There is one instance of the term ''well managed'' in current part 5 that does not follow this definition. Specifically, 12 CFR 5.59(e)(7)(i) requires that each Federal savings association ''be well managed and operate safely and soundly.'' This provision is not directly applicable to any filing procedures but is rather a general statement of appropriate management and safety and soundness standards. For example, pursuant to § 5.59(e)(7)(ii) the OCC may limit a Federal savings association's investment in a service corporation, or limit or refuse to permit any activity of a service corporation, for supervisory, legal, or safety or soundness reasons.

[7] *See* 12 CFR 211.2(z); 12 CFR 225.2(s). Additionally, the OCC notes that the definition of ''well managed'' in Regulation Y applies to both expedited processing, *see, e.g.,* 12 CFR 225.14(c)(2), and for an entity qualifying to be a financial holding company, *see, e.g.,* 12 CFR 225.82. These are analogous, for example, to the revised usage of ''well managed'' for processing procedures to establish an operating subsidiary in § 5.34 and for a national bank qualifying to invest in a financial subsidiary in § 5.39, respectively.

time the rating is assigned. The OCC disagrees. For safety and soundness reasons, a national bank's or Federal savings association's rating should apply to all its activities as of the date the OCC issues the rating. Furthermore, a national bank or Federal savings association may mitigate any rating changes by including appropriate regulatory approval clauses in agreements with third parties.

For the reasons discussed above, the OCC adopts the definition of ''well managed'' as proposed.

The proposed rule also noted that the OCC was considering an amendment to the definition of ''short-distance relocation.'' Currently, moving the premises of a branch or main office of a national bank or a branch or home office of a Federal savings association is a short-distance relocation if the move is within: (1) A one-thousand foot-radius of the site if the branch, main office, or home office is located within a principal city of a metropolitan statistical area (MSA); (2) a one-mile radius of the site if the branch, main office, or home office is not located within a principal city but is located within an MSA; or (3) a two-mile radius of the site if the branch, main office, or home office is not located within an MSA. Under the branch relocation provisions in § 5.30 (national banks) and § 5.31 (Federal savings associations) and the main office and home office relocation provisions in § 5.40, short-distance relocations have a shorter public comment and OCC approval period than other relocations. Additionally, the OCC finds the short-distance relocation provision to be equivalent to a ''relocation'' for the purposes of branch closings under section 42 of the Federal Deposit Insurance Act (FDI Act) (12 U.S.C. 1831r–1).

The preamble to the proposed rule noted that the OCC was considering doubling the distances for short-distance relocations to allow greater flexibility and to reduce regulatory burden for office relocations. The preamble noted that any amended definition would not apply to a branch that would be relocated from a low- or moderate-income (LMI) area to a non-LMI area.

The OCC received three comments on this possible amendment. One commenter supported the change and agreed that it would promote flexibility and reduce regulatory burden without depriving customers of appropriate notice. However, the commenter expressed concerns about having a separate standard for LMI areas because it could affect statistics on bank closures by more heavily weighing branch relocations in LMI areas relative to relocation in non-LMI areas. Another commenter stated that the expanded definitions for ''short distance relocations'' should not apply when the branch is relocated from an LMI tract to another LMI tract in addition to the suggested exclusion for branches relocated from an LMI tract to a non-LMI tract. The third commenter stated that the suggested definition may disproportionately adversely impact LMI persons and that the OCC should exempt branches in LMI areas or that largely service LMI customers from the definition change. Further, this commenter advocated no change to the definition, noting that it is not only LMI customers who would be inconvenienced.

The OCC has decided not to expand the distances in the definition of ''short-distance relocation'' in the final rule. In light of these public comments and after further reviewing this suggestion, the OCC believes that a bifurcated definition would increase burden on national banks without providing a compensating benefit. In addition, the exception may cause confusion for banks if a census tract LMI status changes. However, any increase in distance without excluding LMI tracts would negatively affect LMI communities. Therefore, the current definition of ''short distance relocation'' remains unchanged.

Finally, the OCC proposed technical changes to § 5.3. The OCC received no comments on these technical changes and adopts them as proposed. First, current § 5.3 defines ''applicant'' as a ''person or entity that submits a notice or application to the OCC under'' part 5. However, this usage of the term ''applicant'' is confusing because it covers persons who submit an application or a notice. Accordingly, the final rule changes the term ''applicant'' to ''filer'' to more clearly cover both a person who files an application or a notice. The final rule makes conforming changes throughout part 5.

Second, the final rule adds a new definition for ''Appropriate Federal banking agency'' that cross-references the definition contained in section 3(q) of the FDI Act, 12 U.S.C. 1813(q).

Third, the final rule adds a new definition clarifying that ''MSA'' means metropolitan statistical area as defined by the Director of the Office of Management and Budget (OMB).[8]

Fourth, part 5 currently defines ''notice'' to mean a submission notifying the OCC that a national bank or Federal savings association intends to engage in or has commenced certain activities or transactions. The definition notes that the specific meaning depends on context and ''may require the filer to obtain prior OCC approval before engaging in the activity or transaction.'' As described later in this *Supplementary Information,* the final rule generally changes the term ''notice'' to ''application'' for activities or transactions that require prior OCC approval. Therefore, the final rule removes the quoted language from the definition.

Fifth, the final rule adds abbreviations for the former OTS, the Federal Deposit Insurance Corporation (FDIC), and generally accepted accounting principles as used in the United States (GAAP) to make their use consistent throughout part 5.

Finally, to reflect the more current regulatory drafting style, the final rule removes the paragraph designations in § 5.3 and makes conforming changes to cross-references in § 5.3 and other OCC rules.

The final rule also makes additional technical corrections by removing the phrase ''as defined in § 5.3'' and related language throughout part 5. The definitions in § 5.3 apply to all of part 5 so these cross-references are not necessary.

Filing required (§ 5.4) Section 5.4 requires a depository institution to file an application or notice with the OCC to engage in certain corporate activities and transactions and provides general information on this filing requirement. Section 5.4(f) currently encourages a potential filer to contact the appropriate OCC licensing office to determine the need for a prefiling meeting, and it specifically provides that the OCC decides whether to require a prefiling meeting on a case-by-case basis. The proposal included more general guidance on when a filer should seek a prefiling meeting with the OCC. Specifically, the OCC proposed to include a new sentence advising potential filers with novel, complex, or unique proposals to contact the appropriate OCC licensing office early in the development of the proposal to help identify and consider relevant policy issues. The OCC received no comments on this change and adopts it as proposed.

[8] According to the OMB,''[t]he general concept of a metropolitan statistical area is that of an area containing a large population nucleus and adjacent communities that have a high degree of integration with that nucleus.'' 75 FR 37246 (June 28, 2010). These standards are then applied to census data to delineate the metropolitan statistical areas.

Additionally, the OCC proposed to move the certification requirement in current § 5.13(h) to new § 5.4(g). Current § 5.13(h) requires filers to certify that material submitted to the OCC contains no material misrepresentations or omissions. The OCC also may review and verify any information filed in connection with a notice or an application. Section 5.13(h) further provides that material misrepresentations or omissions may be subject to enforcement actions and other penalties, including criminal penalties under 18 U.S.C. 1001. As discussed below, the OCC proposed to revise § 5.13(h) to clarify the procedures regarding nullification of decisions. The certification requirement in § 5.13(h) does not fit well in the revised provision so the OCC proposed to move it to § 5.4 with other provisions relating to the form of the filing, as new paragraph (g).

The OCC received one comment on new § 5.4(g). This commenter stated that because proposed § 5.4(g) makes no mention of a legal standard for culpability, it is unclear whether a filer would be subject to criminal penalties even if a material misrepresentation or omission were not made knowingly and willfully. The commenter suggested that in order to provide clarity regarding the applicable legal standard to which criminal penalties may apply when signing a certification, the OCC should amend proposed § 5.4(g) to qualify that filers who ''knowingly and willfully'' make material misrepresentations or omissions in a filing may be subject to enforcement and criminal penalty under 18 U.S.C. 1001. The commenter also suggested that the OCC update its standard forms accordingly. However, the OCC is not the appropriate agency to make representations about the specific elements of a criminal statute. Further, the OCC notes that the existing phrasing of ''may be subject to enforcement action and other penalties'' in the rule text indicates that section 1001 may or may not be applicable given the circumstances of a particular case, and that every misrepresentation or omission will not necessarily lead to a violation of section 1001. Section 1001 only would be applicable if the misrepresentation or omission meets the standard for a violation set forth in section 1001. Therefore, the OCC declines to address this comment in § 5.4(g).

Filing fees (§ 5.5) Section 5.5(a) provides the procedure for submitting filing fees to the OCC. The current rule requires payment to the OCC by check, money order, cashier's check, or wire transfer. The OCC proposed updating this provision by providing that a filer can pay the fees by check payable to the OCC or by other means acceptable to the OCC. The OCC received no comments on this change and adopts it as proposed. The OCC notes that it does not currently charge filing fees for licensing filings and is not imposing any fees as part of this final rule.

Investigations (§ 5.7) Section 5.7 provides the OCC with examination and investigation authority related to a filing. As discussed in the ''Background Investigations'' booklet of the *Comptroller's Licensing Manual,* the OCC routinely engages in background investigations of filers and other individuals involved in filings for new charters, changes in bank control, and changes in directors and senior executive officers. As part of these background investigations, the OCC collects fingerprints and submits them to the Federal Bureau of Investigation for a national criminal history background check. The OCC proposed adding a new paragraph (b) to § 5.7 to codify this procedure. The OCC also proposed conforming changes to other sections in part 5 to clarify when it collects fingerprints. The OCC received one comment in support of these changes. The final rule includes these changes as proposed.

Public availability, Comments, and Hearings and other meetings (§§ 5.9, 5.10, 5.11) Section 5.9 addresses the public availability and confidential treatment of filings. Section 5.10 provides the process for public comment periods and the submission of public comments. Section 5.11 provides the process for hearings and public and private meetings. The OCC proposed changing the terms ''application'' to ''filing'' and ''applicant'' to ''filer'' in these sections to reflect the more general terminology proposed in this rule. Furthermore, each of these sections currently uses the term ''interested persons'' to refer to persons other than the filer who seek to interact with a filing or related procedure. The OCC understands the term ''interested persons'' to mean any person who is or may wish to be involved in the licensing process. Such a person may, but need not, have particular financial, pecuniary, or other interest in the transaction itself, the filer, or other party to the transaction. In the proposal, the OCC invited comment about whether the term ''interested persons'' is sufficiently clear, or whether a change in terminology would be helpful to indicate the breadth of this provision. The OCC received no comments on changing the terms ''application'' to ''filing'' and ''applicant'' to ''filer'' and adopts these changes in the final rule. Further the OCC received no comments in the term ''interested persons'' and so does not change this term in the final rule.

Decisions (§ 5.13) Section 5.13 contains the OCC's procedures for acting on a filing. Paragraph (a)(2) of this section provides the procedures for the OCC's expedited review, including extending the time frame for reviewing or removing a filing from expedited review. Specifically, the OCC may change the expedited review procedures if it concludes that the filing, or an adverse comment regarding the filing, presents a significant supervisory, Community Reinvestment Act (CRA) [9] (if applicable), or compliance concern or raises a significant legal or policy issue requiring additional OCC review. Paragraph (a)(2)(ii) of § 5.13 provides that the OCC will not change the expedited procedures if it determines, among other things, that an adverse comment does not raise a significant supervisory, CRA (if applicable), or compliance concern or a significant legal or policy issue, or is frivolous or filed primarily as a means of delaying action on the filing. The OCC proposed adding non-substantive comments to this list to better align the regulation with OCC policy. The proposal stated that the OCC considers a comment to be ''non-substantive'' if it is: (1) A generalized opinion that a filing should or should not be approved; or (2) a conclusory statement, lacking factual or analytical support.

The OCC received three comments on this proposed change. One commenter supported the addition of ''non-substantive'' to the list of items that do not remove a filing from expedited processing stating that this change would provide commenters with a clear standard and reduce unfair or unnecessary delays where a comment lacks factual or analytical support.

Another commenter opposed this change stating that it would increase the risk that the OCC could arbitrarily classify comments as non-substantive. The OCC disagrees with this commenter. For example, in the analogous context of informal rulemaking under the Administrative Procedure Act (APA),[10] agencies need only ''consider and respond to significant comments'' received during the public comment period.[11] Courts have not interpreted the APA as requiring agencies to respond to

[9] 12 U.S.C. 2901 *et seq.*

[10] 5 U.S.C. 551 *et seq.*

[11] *See, e.g., Perez* v. *Mortg. Bankers Ass'n,* 575 U.S. 92, 96 (2015).

insubstantial comments.[12] As stated by the Supreme Court, ''administrative proceedings should not be a game or a forum to engage in unjustified obstructionism by making cryptic and obscure reference to matters that 'ought to be' considered and then, after failing to do more to bring the matter to the agency's attention, seeking to have that agency determination vacated on the ground that the agency failed to consider matters 'forcefully presented.' '' [13]

The regulation's requirement that a party seeking relief must provide sufficient and supported information to warrant review of its claim is fully consistent with established principles that wholly speculative or unsupported comments need not be addressed.[14] Further, the receipt of a large number of comments that set forth a particular view regarding a proposal does not necessarily render those comments ''significant'' or material [15] if they do not contain the requisite level of analytical or substantive content.

The situation also may be analogized with the standards applicable to setting forth minimally viable claims in litigation. A Federal plaintiff has an ''obligation to provide the 'grounds' of his 'entitle[ment] to relief' [that] requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do.'' [16] ''Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice.'' [17]

The OCC believes that either of these standards, as expressed by the Supreme Court, are analogous to those proposed for a comment on a licensing filing to warrant a change to expedited procedures. The requirement that a comment not be ''non-substantive'' to be considered reflects that the OCC will not ''accept as true a legal conclusion couched as a factual allegation.'' [18] Similarly, the requirement is consistent with the APA's provisions governing formal rulemaking proceedings.[19] Thus, a comment containing merely a conclusory statement would not be sufficient to change the expedited processing procedures. It is appropriate for the OCC to require that a comment must have factual and analytical support to allow the OCC to determine that one of the concerns set forth in § 5.13(a)(1) has indeed been raised, thus warranting additional OCC review.[20]

Accordingly, the OCC believes that the criteria for being ''non-substantive'' set forth in the amendment provides a clear standard for when the OCC will consider a comment to be non-substantive and provides commenters with guidance on submitting views on a filing. Further, the OCC notes that if a commenter believes that the OCC inadequately considered a comment, they may have grounds to challenge the OCC's licensing decision under the APA.

This commenter also stated that the final rule should describe the procedure by which the OCC would notify the commenter if the OCC determines a comment to be non-substantive and the procedure for re-submission of the comment. The OCC also disagrees with this comment. The OCC does not intend to notify a commenter that it finds its comment non-substantive. As indicated above, the OCC believes the provision as proposed adequately explains the OCC's standards for non-substantive comments and that these standards should inform commenters when the OCC would find a comment to be non-substantive.

Another commenter requested the OCC to define and explain the term ''significant'' as used in the current rule to describe supervisory, CRA, and compliance concerns and to provide the criteria it would use to determine the significance of concerns. In response to this comment, the OCC intends ''significant'' as used in the current and final rule to mean a ''substantive'' comment that raises material concerns requiring a longer review period to determine the impact on the application. A ''substantive'' comment is one that includes specific, concrete statements raising an issue on the relevant subject with supporting argument and material. A comment may be ''substantive'' but not ''significant'' if it does not raise concerns for which the OCC would need a longer time period to review to determine their impact on the application (*e.g.,* they are relatively minor or can be addressed in other ways). The OCC notes that it considers all comments received.

This commenter also requested that the final rule clarify whether a ''prior filing'' means a filing from the current filer or a different bank that shares the same assessment area. This provision is referring to the current filer. As requested by the commenter, the final rule includes language to clarify this point.

Current § 5.13(a)(2)(ii) also provides that the OCC will not change the expedited procedures if the adverse comment raises a CRA concern that the OCC determines has been satisfactorily resolved. The current rule states that the OCC considers a CRA concern to be satisfactorily resolved if the OCC previously reviewed (*e.g.,* in an examination or application) a concern presenting substantially the same issue in substantially the same assessment area during substantially the same time, and the OCC determines that the concern would not warrant denial or imposition of a condition on approval of the application. The OCC proposed amending this provision to expand what is meant by ''previously reviewed'' to include other supervisory activity, in addition to an examination, and a prior filing, which includes notices and applications.

One commenter read this proposed amendment to mean that the OCC would not consider a comment to be substantive if it addresses an issue the OCC previously resolved during an examination or application and as such opposed this change, noting that it would increase the arbitrariness of the OCC's rulings. However, the commenter misreads the proposal. The proposal does not classify an already addressed issue as non-substantive. Instead, a CRA concern that has been satisfactorily resolved is currently, and remains in the final rule, a separate basis for not changing expedited processing under

[20] *Cf. Twombly,* 550 U.S. at 556 (requiring that an antitrust complaint contain ''enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement'').

§ 5.13(a)(2). The only proposed change to this provision was to broaden the types of activities in which the concern had already been addressed. The commenter does not address this aspect of the proposal. Further, as stated in the ''Public Notice and Comments'' booklet of the *Comptroller's Licensing Manual,* ''[t]he OCC construes these standards [for satisfactorily resolved CRA concerns] narrowly. The OCC may consider a CRA concern to be unresolved, for example, if the agency receives new information on a matter that it reviewed previously.'' [21]

The OCC also proposed amending the introductory text to paragraph (a)(2) to reflect that some expedited review procedures in part 5 do not require the national bank or Federal savings association to be an eligible bank or eligible savings association, as defined in § 5.3. In addition, the OCC proposed clarifying paragraphs (a)(2)(i) and (ii) by revising the punctuation and sentence structure so that it is easier to read.

For these reasons, the OCC adopts these proposed amendments to § 5.13 (a)(2) with the change discussed above. Additionally, the OCC is making additional technical amendments to paragraph (a)(2)(iii) to conform with the general change in terminology from ''application'' to ''filing'' in rules of general applicability.

Paragraph (h) of § 5.13 provides that the OCC may nullify a decision on a filing if: (1) The OCC discovers a material misrepresentation or omission after the OCC has rendered a decision on the filing; (2) the decision is contrary to law, regulation, or OCC policy; or (3) the OCC granted the decision due to clerical or administrative error or a material mistake of law or fact. The OCC's decisions on filings generally contain a statement that the ''OCC may modify, suspend or rescind this approval if a material change in the information on which the OCC relied occurs prior to the date of the transaction to which the decision pertains.'' The OCC proposed revising paragraph (h) to clarify that the OCC may nullify a decision on a filing either prior to or after consummation of the transaction and that the OCC may nullify a decision based on a material misrepresentation or omission in any information provided to the OCC in the filing or supporting materials. Additionally, the OCC proposed adding a new paragraph (i) that would provide that the OCC may modify, suspend, or rescind a decision on a filing if a material change in the information or circumstance on which the OCC relied occurs prior to the date of the consummation of the transaction to which the decision pertains. The OCC received no comments on these amendments to § 5.13(g) and new § 5.13(i) and adopts them as proposed. As explained in the preamble to the proposed rule, these revisions are intended to clarify that nullification is based on the facts, law, and policy as they existed at the time of the OCC's decision. By contrast, modification, suspension, or rescission is based on a change in facts or circumstance from the time of the OCC's decision until consummation of the transaction to which the decision pertains.

As indicated previously in this *Supplementary Information,* the final rule moves the provisions in current § 5.13(h) regarding certification of the submitted filing and penalties for material misrepresentation and omissions in a filing to new paragraph § 5.4(g).

Organizing a National Bank or Federal Savings Association (§ 5.20)

Section 5.20 provides the procedures and requirements involved in organizing a *de novo* national bank or Federal savings association. The OCC proposed two new definitions to § 5.20(d). First, the OCC proposed defining ''principal shareholder'' as a person who directly or indirectly or acting in concert with one or more persons or companies, or together with members of their immediate family, will own, control, or hold 10 percent or more of the stock of the proposed national bank or Federal savings association. This definition is consistent with the definition used in the ''Background Investigations'' booklet of the *Comptroller's Licensing Manual* and the instructions for the Interagency Biographical and Financial Report.[22] The OCC proposed this definition in conjunction with provisions related to background checks and fingerprint collections in § 5.20(i)(3), discussed below.

Second, the OCC proposed clarifying that the term ''organizer'' means a member of the organizing group. This definition is not clearly stated in current § 5.20.

The OCC received no comments on these new definitions and adopts them as proposed.

Paragraph (i) contains procedures for filing a charter application. The OCC proposed a new paragraph (i)(3) requiring each proposed organizer, director, executive officer, or principal shareholder to submit to the OCC the information prescribed in the Interagency Biographical and Financial Report and legible fingerprints. New paragraph (i)(3) permits the OCC to request additional information, if appropriate, and waive the requirements of that paragraph if the OCC determines it to be in the public interest. The OCC received no comments on this provision and adopts it as proposed. As discussed in the ''Charters'' booklet of the *Comptroller Licensing Manual,* the OCC generally conducts routine background checks on insiders, including proposed organizers, directors, executive officers, and controlling shareholders. This revision to § 5.20(i), which is consistent with the final rule's background investigation changes in § 5.7(b), codifies this process and authorizes the collection of fingerprints for charter applications.

The OCC also proposed a number of technical changes to § 5.20. First, in the definition of ''organizing group'' in § 5.20(d)(7), the OCC proposed to change the term ''persons'' to ''individuals'' to more accurately reflect who may make up an organizing group. One commenter stated that further clarity is needed for changing this term. The OCC proposed this change to clarify that only individuals and not entities may serve in the organizing group, as provided by 12 U.S.C. 21. Section 21 states that ''[a]ssociations for carrying on the business of banking . . . . may be formed by any number of natural persons, not less in any case than five.'' However, to be as consistent as possible with this statute, the final rule instead changes the term ''persons'' to ''natural persons.'' Although 12 U.S.C. 21 only applies to national banks, this definitional change applies to both national banks and Federal savings associations. Second, in § 5.20(g)(4)(ii), the OCC proposed to change the phrase ''withdrawal of preliminary approval'' to ''nullification or rescission of preliminary approval'' to align with the terminology in proposed §§ 5.13(h) and (i). Third, in § 5.20(i), the OCC proposed to change the term ''spokesperson'' to ''contact person'' in redesignated paragraph (i)(5) to conform to the use of this term in other paragraphs of this section. Fourth, in redesignated

[21] ''Public Notice and Comments'' booklet of the *Comptroller's Licensing Manual,* Version 1.1, Nov. 2017, p. 8. The OCC note's that one commenter requested that this language regarding new information be included in the regulatory text. However, the OCC believes that it is not necessary to include this language in the rule, and that the inclusion of this language in the *Supplementary Information* of this final rule and in the *Licensing Manual* provides adequate explanation for how OCC construes as ''previously reviewed.''

[22] The Interagency Biographical and Financial Report is available on the OCC's website at *https://www.occ.gov/static/licensing/form-ia-biographical-financial-report.pdf.*

paragraph (i)(5), the OCC proposed to change the term ''interested parties'' to ''relevant parties,'' which more accurately describes who the OCC should notify of its decision on an application. Lastly, the OCC proposed to remove the reference to 12 CFR part 197 in § 5.20(i), redesignated paragraph (i)(6)(iii), because the OCC has removed this regulation. The remaining citation, 12 CFR part 16, now applies to both national banks and Federal savings associations. The OCC received no comments on these technical changes and therefore adopts them as proposed, with an additional technical correction of cross-references in redesignated paragraph (i)(6)(i).

The final rule makes one new technical correction to § 5.20. It removes the reference to 12 CFR part 195, the Federal savings association CRA rule, in § 5.20(e)(2)(ii) as of December 11, 2020. The OCC recently amended 12 CFR part 25 to include Federal savings associations and removed 12 CFR part 195 as of October 1, 2020.[23]

Federal Mutual Savings Association Charter and Bylaws (§ 5.21)

Section 5.21 governs the procedures and requirements for charters and bylaws of Federal mutual savings associations. Pursuant to paragraph (f)(2), charter amendments are generally subject to prior approval by the OCC although, under paragraph (g), most applications for charter amendments are subject to expedited review and deemed approved as of the 30th day after filing unless the OCC notifies the filer that it has denied the amendment, or the amendment is not eligible for expedited review. An application is not eligible for expedited review if the charter amendment would render more difficult or discourage a merger, proxy contest, the assumption of control by a mutual account holder of the association, or the removal of incumbent management or involves a significant issue of law or policy. Paragraph (g) further provides that a notice is required within 30 days after adoption if the filer adopts the optional charter amendments contained in paragraph (g) without change.

The OCC proposed to reorganize these provisions to clarify the procedures Federal mutual savings associations must follow in adopting charter amendments, to align the terminology in § 5.21 with general usage in part 5, and to make other clarifying changes. As indicated in the preamble to the proposed rule, the OCC does not intend these changes to be substantive. The OCC received no comments on these amendments to § 5.21 and adopts them as proposed, with technical amendments. Specifically, the final rule amends paragraphs (j)(2) to reflect the changes made by the OCC's interim final rule on Director, Shareholder, and Member Meetings.[24] These amendments do not make any substantive changes to paragraph (j)(2) as proposed.

As a result of the final rule, all of this section's procedural requirements for adopting charter amendments are located in paragraph (f)(2). These amendments clarify that charter amendments are subject to a three-part regime: Application with expedited review, standard application, or notice. As a result, revised paragraph (g) now only contains provisions relating to optional charter amendments. Additionally, the final rule adds a new paragraph (f)(3) specifying that a charter amendment is effective once it is: (1) Approved by the OCC, if approval is required under paragraph (f)(2); and (2) adopted by the association provided the association follows the requirements of its charter in adopting the amendment. The final rule also makes a clarifying amendment to paragraph (g)(2) to reflect that change of a Federal savings association's title does not require prior OCC notice under § 5.42, as is implied by the current paragraph (g)(2).[25] The OCC intends no substantive change with this amendment.

Current paragraph (j) of § 5.21 governs the bylaws for Federal mutual savings associations. Paragraph (j)(2)(viii) requires the bylaws to specify that the Federal mutual association's board of directors consist of no fewer than five nor more than fifteen members unless the OCC has authorized a higher or lower number. However, unlike the corresponding provision for Federal stock savings associations, 12 CFR 5.22(l)(2), paragraph (j)(2)(viii) does not explicitly address numbers of directors authorized by the former OTS. Accordingly, the final rule revises this paragraph to explicitly acknowledge that authorizations by the former OTS remain effective.

Current paragraph (j)(3) contains the filing requirements for changes to Federal mutual savings association bylaws. Currently, all bylaw amendments require some sort of filing with the OCC. As with the charter amendments discussed above, the OCC reorganizes these provisions in the final rule to clarify the procedures Federal mutual savings associations must follow in adopting bylaw amendments and to align the terminology with that used in part 5. The OCC also is eliminating the filing requirement for savings associations that adopt without change the OCC's model or optional bylaws, thereby reducing burden for these Federal mutual savings associations. As a result, these amendments specify that bylaw amendments are subject to a four-part regime: Application with expedited review, standard application, notice, and no filing required. As with the charter amendments, the final rule provides that a bylaw amendment is effective after approval by the OCC, if required, and adoption by the association, provided that the association follows the requirements of its charter and bylaws in adopting the amendment. Additionally, the final rule makes two additional technical changes. First it corrects a cross reference in paragraph (j)(3)(i)(A) to correctly refer to paragraph (j)(3)(i)(B). Second, it changes the heading of proposed paragraph (j)(3)(ii) from ''Notice requirement'' to ''Corporate governance election and notice requirement'' to better reflect the subject of this paragraph.

As discussed later in this *Supplementary Information,* the OCC proposed technical changes throughout part 5, including replacing the word ''shall'' with another appropriate word or words. These technical changes, as well as other minor proposed wording changes, are included in the model charter and bylaw provisions provided

[23] *See* 85 CFR 34734 (June 5, 2020).

[24] *See* 85 FR 31943 (May 28, 2020). Because the final rule includes the changes made by the interim final rule, the OCC is not issuing a separate rulemaking to finalize the part 5 changes made by the interim final rule. Among other things, this interim final rule amended §§ 5.21 and 5.22 to permit an association's bylaws to provide for telephonic or electronic participation of members and shareholders, as applicable, at both annual and special meetings. These amendments also provide that members or shareholders participating telephonically or electronically at these meetings will be deemed present in person for purposes of the quorum requirement in §§ 5.21(j)(2)(v) or 5.22(k)(5), as applicable. In addition, this interim final rule requires Federal savings associations to have procedures in place for telephonic and electronic participation and provides associations with a choice of procedures to follow based on elected State corporate governance procedures, the Delaware General Corporation Law, or the Model Business Corporation Act. Further, this interim final rule clarifies that stock Federal savings associations may provide for telephonic or electronic participation at all board of directors meetings, as currently provided for mutual Federal savings associations. The OCC received one substantive comment letter on this interim final rule, which supported its amendments. In response to a request for comment in the preamble to this interim final rule, this commenter opposed any new risk management standards to mitigate any security risks arising from telephonic or electronic meetings, noting that new standards would be unnecessary given current safeguards and regulatory requirements. The OCC is not imposing any new risk management standards for telephonic or electronic meetings through this part 5 final rule.

[25] When provisions for Federal savings associations were added to § 5.42, the OCC did not include the prior rule's advance notice requirement. *See* 80 FR 28383 (May 15, 2015).

in revised § 5.21. As indicated in the preamble to the proposed rule, the OCC does not intend these technical changes to require any changes on the part of Federal mutual savings associations that use the current model language. Further, the OCC does not intend these technical changes to have any effect on the provisions or effectiveness of a Federal mutual savings association's current charter or bylaws.

Federal Stock Savings Association Charter and Bylaws (§ 5.22)

Section 5.22 governs the procedures and requirements for Federal stock savings association charters and bylaws. Section 5.22 generally parallels § 5.21, which applies to Federal mutual savings association charters and bylaws. The OCC proposed equivalent changes to § 5.22 as proposed for § 5.21. The OCC also proposed two additional technical amendments to § 5.22. Section 5.22 contains sample charter and bylaw provisions, and paragraph (g)(7) provides an optional ''Section 8'' for Federal stock savings association charters following mutual to stock conversions. This optional section contains a definition of ''acting in concert.'' The OCC proposed minor wording changes to this definition for consistency with the definition of this term in the OCC's change in bank control regulation, § 5.50. The OCC also proposed correcting a cross-reference to 12 CFR part 192 in paragraph (e). The OCC received no comments on the revisions to § 5.22 and adopts them as proposed, with additional technical amendments. First, as discussed above regarding § 5.21, the final rule amends paragraph (g)(1) to reflect that change of a Federal savings association's title does not require prior OCC notice under § 5.42. Second, the final rule corrects the cross-reference in paragraph (i) to the form ''Federal stock charter.'' Third, the final rule changes the heading in proposed paragraph (j)(2)(ii) from ''Notice requirement'' to ''Corporate governance election and notice requirement'' to better reflect the subject of this paragraph. Fourth, the final rule amends paragraphs (k)(1) and (l)(3) and (8) to reflect the changes made by the OCC's interim final rule on Director, Shareholder, and Member Meetings.[26] Fifth, the final rule corrects cross-references in paragraphs (k)(2) and (k)(4)(ii). Finally, the final rule amends paragraph (m)(2) to remove the sentence that provides that employment contracts shall conform with 12 CFR 163.39 because the OCC removed § 163.39 in a separate final rule.[27]

Conversion To Become a Federal Savings Association (§ 5.23) and Conversion To Become a National Bank (§ 5.24)

Sections 5.23 and 5.24 are largely parallel rules that provide the procedures and standards for OCC review and approval of an application by an institution to convert to a Federal savings association or national bank, respectively. The OCC proposed a number of amendments to these sections and did not receive any comments. Therefore, the OCC adopts these amendments as proposed.

First, § 5.23(d)(2)(ii)(A) and 5.24(e)(2)(i) each require the president or other duly authorized officer to sign the conversion application. OCC applications also require an authorized signature. However, these sections are the only provisions in part 5 that require an authorized officer to sign the application. The final rule removes §§ 5.23(d)(2)(ii)(A) and 5.24(e)(2)(i) because the OCC does not find it necessary to specify this signature requirement in a regulation.

Second, the ''Conversions to Federal Charter'' booklet of the *Comptroller's Licensing Manual* indicates that filers should include a list of directors and senior executive officers of the converting institution as well as a list of individuals, directors, and shareholders who directly or indirectly, or acting in concert with one or more persons or companies, or together with members of their immediate family, do or will own, control, or hold 10 percent or more of the converting institution's stock. It is necessary for the OCC to have a complete list of these individuals because the OCC generally conducts routine background investigations as part of the application process. The final rule codifies these requirements in §§ 5.23(d)(2)(ii) and 5.24(e)(2). Additionally, the final rule makes a technical change to redesignated § 5.23(d)(2)(ii)(F) to correctly reference § 5.58 for Federal savings association equity investments, rather than § 5.36, which applies to national banks.

Furthermore, as proposed, the final rule adds a new paragraph to each of these rules, §§ 5.23(d)(2)(iv) and 5.24(e)(4), providing that the OCC may require directors and senior executive officers of the converting institution to submit the Interagency Biographical and Financial Report and legible fingerprints. This amendment codifies the background investigation process set forth in the ''Conversions to Federal Charter'' booklet of the *Comptroller's Licensing Manual* and specifically authorizes the collection of fingerprints for conversion applications, consistent with the background investigation changes proposed to other sections in this final rule.

Sections 5.23(d)(4) and 5.24(h) provide for expedited review for conversion from an eligible national bank to a Federal savings association, and vice versa. Currently, this conversion application is deemed approved as of the 60th day after the OCC receives the filing. As noted in the preamble to the proposed rule, the OCC believes that it can review and decide these conversion applications in a shorter period because it already supervises an entity eligible to use the expedited review process. Accordingly, the final rule decreases the time period for the expedited review to 45 days. The final rule also makes a technical change to § 5.23(d)(4) to remove the modifier ''national'' before bank as the defined term in § 5.3 is ''eligible bank.'' This deletion does not change the scope of institutions eligible for expedited review as only a national bank, and not a State bank, may be an eligible bank under the definition in § 5.3.

Fiduciary Powers of National Banks and Federal Savings Associations (§ 5.26)

Section 5.26 contains the application requirements and processes for a national bank or Federal savings association to engage in the exercise of fiduciary powers. Paragraph (e)(2)(i)(C) requires a national bank or Federal savings association to submit sufficient biographical information on proposed trust management personnel as part of an application for fiduciary powers. The OCC proposed two changes to this paragraph and did not receive any comments. Therefore, the OCC adopts them as proposed. Because the scope of the term ''trust management personnel'' in paragraph (e)(2)(i)(C) is unclear, the final rule clarifies that the biographical information is required for proposed senior trust management personnel, as identified by the OCC. The final rule also provides that the application required in paragraph (e)(2)(i)(C) include, if requested by the OCC, the Interagency Biographical and Financial Report and legible fingerprints for these individuals, consistent with the background investigation changes made to other sections of part 5 by this final rule.

Section 5.26(e)(6) requires a national bank or Federal savings association to submit a written notice to the OCC no later than 10 days after it begins

[26] *See* 85 FR 31943 (May 28, 2020).

[27] *See* 85 FR 42630 (July 14, 2020).

previously approved fiduciary activities in additional States. The OCC proposed to reorganize this paragraph with no substantive changes. No commenters discussed this reorganization and the OCC adopts it as proposed. Under the final rule, paragraph (e)(6)(i) generally requires a written notice after the national bank or Federal savings association begins any of the activities specified in 12 CFR 9.7(d) in a new State. Paragraph (e)(6)(ii) requires the notice to include the new States, the fiduciary activities to be conducted, and the extent to which the activities differ materially from the fiduciary activities currently conducted. Paragraph (e)(6)(iii) provides that no notice is required if the information required by paragraph (e)(6)(ii) is provided by other means, such as in a merger application. Finally, the final rule redesignates current paragraph (iii), which provides that no notice is required if the national bank or Federal savings association is conducting only activities ancillary to its fiduciary business through a trust representative office or otherwise, as paragraph (iv).

One commenter discussed § 5.26(e)(5), which the OCC did not propose to amend. This provision requires a national bank or Federal savings association that has ceased to conduct previously approved fiduciary powers for 18 consecutive months to provide the OCC with a new notice as set forth by this section 60 days prior to commencing any fiduciary activity. The commenter requested that the OCC change this 18 month time period to five years. The commenter noted that five years would be consistent with 12 U.S.C. 92a(k), which allows the OCC to revoke the authority to engage in fiduciary activities if the national bank has not exercised it for five consecutive years. The OCC disagrees with this commenter's recommendation and continues to believe, as discussed when the OCC originally adopted this requirement in 2015, that an 18-month time period is appropriate to ensure that the management and condition of a national bank or Federal savings association has not changed since the OCC's original approval of the fiduciary activities.[28] Further, this 18-month notification period enables the OCC to allocate supervisory resources to evaluate the institution when it resumes fiduciary activities. Lastly, § 5.26(e)(5) requires notice to the OCC, and not OCC approval. Therefore, the OCC does not find this requirement to be overly burdensome.

Establishment, Acquisition, and Relocation of a Branch of a National Bank (§ 5.30)

Section 5.30 describes the application procedures to establish and relocate a national bank branch. Paragraph (d) provides definitions applicable to § 5.30. The OCC proposed two amendments to paragraph (d). First, paragraph (d)(1)(i) lists certain types of facilities that are considered branches. The OCC proposed to reorder this list so that the reference to 12 U.S.C. 36(c) applies only to seasonal agencies and not to the other types of facilities. Second, paragraph (d)(1)(iii) specifies that remote service units (RSUs) and certain types of offices are not within the definition of ''branch.'' The OCC proposed to clarify this provision by adding both a cross-reference to the description of RSUs contained in 12 CFR 7.4003 [29] and a reference to automated teller machines (ATMs), including interactive ATMs, codifying OCC Interpretive Letter No. 1165 (August 2019).[30] As discussed in this interpretive letter, a national bank establishment of an interactive ATM does not constitute establishing a branch if the machine meets the definition of an ATM used for purposes of 12 U.S.C. 36 consistent with OCC interpretations, and the nature of the interactions between the customer and remote bank personnel are delimited as would be the case with an RSU. The OCC received no comments on these amendments and adopts them as proposed.

One commenter requested that the OCC amend the definition of ''mobile branch'' in § 5.30(d)(5) to clarify that a mobile branch may be located at one location for up to four months without requiring an application for a temporary branch. Currently, paragraph (d)(5) defines ''mobile branch'' as a branch of a national bank, other than a messenger service branch, that does not have a single, permanent site, and includes a vehicle that travels to various public locations to enable customers to conduct their banking business. Pursuant to this definition, a mobile branch may provide services at various regularly scheduled locations or it may be open at irregular times and locations such as at county fairs, sporting events, or school registration periods. The OCC agrees that the rule does not clearly indicate how long a mobile branch may serve one location before losing its status as a mobile branch and that clarity and uniformity on this point would be helpful. Further, the OCC finds that locating a mobile branch at one location for a limited period of time without having to continuously move it back and forth to this location to prevent it from losing its status as a mobile branch would be useful in certain circumstances, especially during emergency situations such as weather-related emergencies or during the current COVID–19 pandemic. Therefore, the OCC is clarifying in the final rule that a mobile branch may be stationed continuously at a single location within the geographic area it is approved to serve for a period of up to four months. The OCC views this new language as interpretive. The OCC notes that a mobile branch is only permitted in States where a State bank is permitted to establish a mobile branch. Because State statutes restricting mobile branch locations are applicable to national banks, if a State statute restricts how long a mobile branch could serve a given location, that restriction is applicable to national bank mobile branches in that State.

In the preamble to the proposed rule, the OCC noted that it is considering one additional change to the definition of ''branch'' in paragraph (d). Paragraph (d)(1)(ii)(B) provides that a facility is not a branch if it is located at the site, or is an extension, of an approved main office or branch office of the national bank. The rule further provides that the OCC determines whether a facility is an extension of an existing main office or branch office on a case-by-case basis. However, the rule deems a drive-in or pedestrian facility located within 500 feet of a public entrance to an existing main office or branch office to be an extension of the existing main office or branch office, provided the functions performed at the drive-in or pedestrian facility are limited to functions that are ordinarily performed at a teller window, without the OCC's case-by case analysis. The OCC requested comment on expanding this 500 foot distance to 1,500 feet. One commenter supported this increase. However, after further review, the OCC has concluded that 500 feet is a more appropriate limit for a facility to have the benefit of automatic treatment as an extension of the main office or branch.[31] Furthermore, a

[28] *See* 80 FR 28345, at 28365 (May 18, 2015).

[29] The OCC notes that it has proposed to renumber 12 CFR 7.4003 to 12 CFR 7.1027 in a separate rulemaking. *See* 85 FR 40794 (July 7, 2020). The OCC will update this cross-reference in § 5.30 if it finalizes this renumbering.

[30] OCC Interpretive Letter No. 1165, Legal Requirements for the Establishment of Interactive Automated Teller Machines (August 2019), available at *https://www.occ.gov/topics/charters-and-licensing/interpretations-and-actions/2019/int1165.pdf.*

[31] The OCC also stated that it was considering the same change for a drive-in or pedestrian office of

facility at a distance greater than 500 feet may still be considered an extension of the main office or branch based on the OCC's case-by-case analysis. The OCC believes this current rule provides adequate flexibility without the need to increase the regulatory distance threshold.

Finally, the OCC proposed a technical change to paragraph (f), which provides the procedures for establishing a national bank branch. Paragraph (f)(1) requires each national bank that proposes to establish a branch to submit an application to the OCC, except in the case of messenger services as specified in paragraph (f)(2). However, paragraph (f)(3) provides that if a national bank proposes to establish a branch jointly with one or more national banks or other depository institutions, only one of the national banks must submit a branch application and this bank may act as agent for the other institutions. Even if a single application is submitted for a joint branch, the OCC still considers the relevant factors for each national bank. The OCC proposed including paragraph (f)(3) as an additional exception to the application requirement in paragraph (f)(1), thereby conforming these two paragraphs. The OCC received no comments on this change and adopts it as proposed.

Establishment, Acquisition, and Relocation of a Branch and Establishment of an Agency Office of a Federal Savings Association (§ 5.31)

Section 5.31 describes application and notice procedures for the establishment, acquisition, or relocation of a Federal savings association branch. Paragraph (j), implementing section 5(m) of the Home Owners' Loan Act (HOLA) (12 U.S.C. 1464(m)), requires a Federal or State savings association to obtain prior OCC approval to establish or move a branch or move its principal office in the District of Columbia. The OCC proposed to add a new paragraph (j)(3) to clarify that a branch in the District of Columbia includes any location at which accounts are opened, payments are received, or withdrawals made, including ATMs that perform one or more of these functions. This amendment implements court opinions finding that ATMs that accept deposits or disburse funds against a customer's account constitute a branch.[32] Although Congress amended 12 U.S.C. 36(j) to remove ATMs and RSUs from the definition of a national bank ''branch,'' Congress has not similarly amended section 5(m) of the HOLA. Therefore, the OCC and OTS have long taken the position that an ATM established by a savings association in the District of Columbia constitutes a branch requiring approval. The OCC did not receive any comments on this proposed amendment and adopts it as proposed. Because new paragraph (j)(3) codifies the OCC's existing legal interpretation, the OCC believes that this amendment does not add any regulatory burden to savings associations.

Business Combinations Involving a National Bank or Federal Savings Association (§ 5.33)

Section 5.33 provides the application requirements and procedures for business combinations involving national banks and Federal savings associations, such as mergers, consolidations, and certain purchase and assumption transactions. The OCC proposed several changes to this section.

Paragraph (e) of § 5.33 sets forth policies the OCC considers when evaluating business combinations. Paragraph (e)(1)(ii)(F) provides that the OCC will not approve a transaction that would violate the deposit concentration limit in 12 U.S.C. 1828(c)(13). Only interstate merger transactions as defined 12 U.S.C. 1828(c)(13)(C)(i) are subject to this deposit concentration limit. The OCC proposed adding a reference to 12 U.S.C. 1828(c)(13)(C)(i) in paragraph (e)(1)(ii)(F) for clarity. The OCC did not receive any comments on this change and adopts it as proposed.

Paragraph (e)(1)(iii) provides the OCC's policy for evaluating business combinations under the CRA. Under 12 U.S.C. 2903(a)(2), the OCC must evaluate an insured national bank's or Federal savings association's CRA record when evaluating its application for a business combination. The OCC proposed three changes to paragraph (e)(1)(iii). First, the OCC proposed a new paragraph (e)(1)(iii)(A) to better describe the OCC's review of a business combination and to more closely track the statutory language under which the OCC is required to assess the track record of the applicant. This paragraph specifies that the OCC takes into account the filer's CRA record of performance in considering an application for a business combination. It also states that the OCC's conclusion of whether the CRA performance is or is not consistent with approval of an application is considered in conjunction with the other factors in § 5.33, codifying the OCC's practice of evaluating all policy factors in light of the whole application as set forth in the OCC's Policies and Procedures Manual (PPM–6300–2).

One commenter supported the clarification that the OCC will consider the institution's CRA's performance in conjunction with the other factors in § 5.33, stating that this change is consistent with statutory requirements and codifies existing OCC practice. Another commenter said that it would break with precedent to remove the provision providing that the OCC will take into account the CRA record of the target institution. This commenter also stated that this change would impair the public's ability to comment and render the OCC unable to fully consider the public benefit of the proposed merger as required by the CRA statute. The commenter stated that only a review of the CRA performance of both the target and the acquiring bank provides a full understanding of likely future CRA performance and the resultant bank's ability to meet the convenience and needs of the communities it serves.

The OCC disagrees with this commenter. The OCC's review of an institution's CRA performance is retrospective, while the OCC's review of a business combination application is prospective. As noted in the preamble to the proposed rule, OCC practice is to consider and evaluate a filer's record of performance under the CRA and, more broadly, the filer's plans and ability to enable the combined organization to serve the convenience and needs of its communities. Thus, the target's CRA record will inform the convenience and needs analysis but is not in of itself a factor in the OCC's review of the application. Additionally, the OCC notes that public benefit is not a statutory factor the OCC must consider despite the comment's reference to it as such. [33] The OCC therefore adopts this new paragraph (e)(1)(iii)(A) as proposed.

Second, the OCC proposed a new paragraph (e)(1)(iii)(B) to recognize the expanded community reinvestment compliance review required by 12 U.S.C. 1831u(b)(3) when the filing national bank would have a branch or bank affiliate immediately following the transaction in any State in which the filer had no branch or bank affiliate immediately before the transaction. Specifically, this new paragraph provides that the OCC considers the CRA record of performance of the filer and its resulting bank affiliates and the filer's record of compliance with

a Federal savings association, in 12 CFR 5.31. To maintain consistency between national bank and Federal association rules, the OCC also declines to move forward with expanding the 500 foot distance rule to 1,500 feet in § 5.31.

[33] *See* 12 U.S.C. 1828(c)(5).

applicable State community reinvestment laws when required by 12 U.S.C. 1831(b)(3). The OCC received no comments on this new paragraph and adopts it as proposed.

Third, the OCC proposed a new paragraph (e)(1)(iii)(C) requiring the filer to disclose whether it has entered into and disclosed a covered agreement, as defined in 12 CFR 35.2, in accordance with 12 CFR 35.6 and 35.7. These regulations implement the CRA sunshine requirements of section 48 of the FDI Act, 12 U.S.C. 1831y. Requiring disclosure of any covered agreements will better permit the OCC to review the filer's CRA record and any CRA-related comments on the filing. One commenter supported the disclosure of these covered agreements. Therefore, the OCC adopts this new paragraph as proposed. The final rule also includes a technical amendment that changes the heading of paragraph (e) from ''*Policy*'' *to* ''*Policy and related filing requirements*'' to better reflect the contents of this paragraph.

This commenter also stated that the regulators should work with community groups and banks on the development of a process for recognizing these agreements during the merger application process and for their implementation to become a factor on CRA performance evaluations. The OCC agrees that these agreements may provide the OCC with context on the credit needs of the community served during the application process. However, the OCC and the other Federal banking regulators have long held the position that these agreements are private agreements between depository institutions and private parties. Therefore, the Federal banking regulators do not monitor compliance with, nor enforce, these agreements.[34] Because they are private agreements, a bank's compliance with these agreements should not be a factor in the OCC's decision on an application.

The OCC noted in the preamble to the proposed rule that it is considering whether to require a filer to memorialize and publish any discussion between the filer and any third party with respect to the development of any community reinvestment plan, community benefit plan, or similar plan in connection with a business combination. Two commenters opposed this idea. One commenter stated that the requirement to memorialize discussions would be burdensome, frivolous, and extraneous because all relevant information is included in the final plan. This commenter also stated that such a requirement may cause disagreements about what is covered and what constitutes an acceptable level of memorialization. In addition, this commenter noted that this requirement would discourage community participation in discussions for these agreements. The second commenter stated that this requirement could have a chilling effect on discussions between filers and third parties causing them to be less candid during these discussions, reducing the likelihood of reaching an agreement. This commenter also stated that the filer and third party may disagree in the way in which the discussion has been memorialized. Lastly this commenter noted that this requirement would duplicate the CRA sunshine requirements in 12 CFR part 35, which provides the circumstances under which these discussions should be made public.

The OCC disagrees with these comments and is adding a new paragraph in the final rule requiring that the national bank or Federal savings association submitting a business combination filing must provide summaries of, or documents relating to, all substantive discussions with respect to the development of the content of a covered agreement submitted pursuant to new paragraph (e)(1)(iii)(C)(*1*). This summary must include the names of participants, dates, and synopsis of these discussions. The OCC believes that memorializing and disclosing discussions between a national bank or Federal savings association and a community group during the development of an agreement promotes transparency and results in a fairer and more robust agreement for both the financial institution and the community served by the institution, furthering the intent of the CRA Sunshine statute as well as providing the OCC with additional context during the application process on the credit needs of the community served. The OCC does not expect minor or trivial communications to be memorialized; for example, discussions regarding scheduling or staffing need not be documented. However, national banks and Federal savings associations will need to memorialize and disclose substantive discussions pertaining to the content of a plan. This documentation may consist of summaries or transcripts of the discussions, or work product produced to further the negotiations, such as summaries of suggested terms of the plan. Further, to avoid conflicts between the institution and the community group, the institution may share the documentation with the community group prior to disclosure. Because national banks and Federal savings associations already should be documenting these discussions in the course of normal business operations, and because many of the documents are already produced as part of the negotiating process, the OCC believes that any additional burden placed on banks and savings associations will be minimal and will be outweighed by the benefit of ensuring transparency in the development of these plans in connection with a business combination.

The OCC also proposed a new paragraph (e)(1)(iv) to state that the OCC considers the standards and requirements contained in 12 U.S.C. 1831u for interstate merger transactions between insured banks, when applicable. Current paragraph (h) describes the application of 12 U.S.C. 1831u to combinations between insured banks with different home states. As part of the reorganization of paragraphs (g) and (h), discussed below, the OCC proposed instead to include its review of the 12 U.S.C. 1831u factors in paragraph (e)(1) for clarity. The OCC received no comments on this change and adopts it as proposed.

Paragraph (e)(8)(ii) requires a national bank or Federal savings association with one or more classes of securities subject to registration under sections 12(b) or (g) of the Securities Exchange Act of 1934 to file preliminary proxy material or information statements with the Director, Securities and Corporate Practices Division (SCP) of the OCC. As a result of an internal reorganization, the OCC proposed replacing the reference to SCP in paragraph (e)(8)(ii) with the OCC Chief Counsel's Office. The OCC received no comments on this change and adopts it as proposed.

Paragraph (g) provides procedures for different types of consolidations and mergers. Paragraph (o) provides general procedures for approval of Federal savings association business combinations. These paragraphs provide detailed procedures for national banks and Federal savings associations engaging in several different types of business combinations. Some of these requirements are imposed by statute. Specifically, 12 U.S.C. 215 and 215a provide procedures for consolidations and mergers, respectively, between national banks and State or national banks located in the same State resulting in a national bank. Similarly, 12 U.S.C. 214 through 214d provide procedures for consolidations and

[34] *See* the Interagency Questions and Answers Regarding Community Reinvestment, Q&A § __ .29(b)—2, 81 FR 48506 (July 25, 2016).

mergers between national banks and State banks located in the same State resulting in a State bank. Other consolidation and merger transactions described in § 5.33 do not have any statutory procedures, including interstate consolidations and mergers involving a national bank under 12 U.S.C. 215a–1; consolidations and mergers of national banks and Federal savings associations under 12 U.S.C. 215c and 1467a(s); consolidations and mergers of Federal savings associations and State banks, State savings associations, State trust companies, or credit unions under 12 U.S.C. 1464(d)(3)(A) and 1467a(s); and mergers of national banks with their non-bank affiliates under 12 U.S.C. 215a–3.

In order to increase flexibility and reduce regulatory burden for national banks and Federal savings associations involved in business combinations for which procedural requirements are not specified by statute, the OCC proposed a number of changes to these procedural provisions. First, the OCC proposed that a national bank may follow the procedures for mergers and consolidations under sections 2 and 3 of the National Bank Consolidation and Merger Act (NBCMA) currently provided in paragraph (g) for the specific transaction.

Second, the OCC proposed that a national bank or Federal savings association may elect to follow the procedures applicable to a State bank or State savings association, respectively, chartered by the State in which the national bank's main office or the Federal savings association's home office is located. In connection with this election, the OCC proposed rules of construction so that the State procedures function logically for national banks and Federal savings associations. Specifically, any references to a State agency in the applicable State procedures would be read as referring to the OCC. Additionally, unless otherwise specified in Federal law, all filings required by the applicable State procedures would be made to the OCC. Requiring filings prescribed by State law to be made with the OCC, rather than a State agency, is consistent with past OCC practice for certain transactions under State corporate governance procedures adopted pursuant to 12 CFR 7.2000.[35]

Third, the OCC proposed that the national bank or Federal savings association that is the acquiring institution in a transaction may follow a *de minimis* procedure that does not require a shareholder vote pursuant to proposed § 5.33(p) if certain criteria are met. Proposed § 5.33(p) is similar to the *de minimis* exception to general shareholder voting requirements for Federal stock savings associations in current § 5.33(o)(3)(ii), which applies if the transaction does not involve an interim savings association; the Federal savings association charter does not change; each share of stock outstanding will be identical to an outstanding share or treasury share after the effective date of the transaction; and either no stock or securities convertible into stock will be issued or delivered under the plan of combination, or the authorized unissued shares or treasury shares of the resulting Federal savings association to be issued or delivered, plus those initially issuable upon conversion of any securities to be issued or delivered, do not exceed 15 percent of the total shares of voting stock outstanding immediately prior to the effective date of the consolidation or merger.

The OCC proposed making this *de minimis* exception available to a national bank engaging in transactions not subject to statutory procedural requirements as well as a Federal stock savings association in new paragraph (p) with two revisions. First, the OCC proposed permitting certain combinations involving an interim bank or savings association. Specifically, a national bank or Federal stock savings association engaging in a transaction involving an interim bank or interim saving association would potentially be able to use the procedures in paragraph (p) if the existing shareholders of the national bank or Federal stock savings association would directly hold the shares of the resulting national bank or Federal stock savings association. In promulgating an amendment to the predecessor to current § 5.33(o)(3)(ii), the Federal Home Loan Bank Board, the predecessor to OTS, stated that ''[a]lthough the ownership interests of shareholders of a reorganizing association generally do not undergo substantive change upon a reorganization into holding company form, the Board believes that shareholders should, nevertheless, be given an opportunity to approve or disapprove a plan of reorganization.'' [36] The OCC believes that in a transaction involving reorganization into a holding company structure, shareholders of the national bank or Federal stock savings association should have the opportunity to vote. However, the OCC believes that a national bank or Federal stock savings association may engage in transactions involving interim banks or savings association that do not involve holding company reorganizations where shareholder votes are not necessary, if the rest of the requirements of proposed paragraph (p) are met.

Second, to provide additional flexibility, the OCC also proposed increasing the maximum issuance of shares eligible under this procedure for both national banks and Federal savings associations from 15 percent of total outstanding shares to 20 percent. This change mirrors the 20 percent threshold in similar procedures under Delaware law.[37]

The new procedural options described above would apply to: (1) Consolidations and mergers of national banks and Federal savings associations under 12 U.S.C. 215c and 1467a(s), resulting in either a national bank or Federal savings association; (2) consolidations and mergers of Federal savings associations and State banks, State savings associations, State trust companies, or credit unions under 12 U.S.C. 1464(d)(3)(A) and 1467a(s), resulting in either a Federal savings association or another entity; and (3) mergers of national banks with their non-bank affiliates under 12 U.S.C. 215a–3, resulting in either a national bank or a non-bank affiliate.

The new procedural options also would apply to interstate consolidations and mergers involving a national bank under 12 U.S.C. 215a–1 based on a revised analysis of the NBCMA. As indicated in the preamble to the proposed rule, the OCC formerly opined in licensing decisions that 12 U.S.C. 215a–1 incorporates the provisions of 12 U.S.C. 215 for consolidations and 12 U.S.C. 215a for mergers.[38] Twelve U.S.C. 215a–1 is the codification of section 4 of the NBCMA, which was enacted by section 102(b)(4)(D) of the Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994.[39] Twelve U.S.C. 215 and 215a are codifications of sections 2 and 3 of the NBCMA, respectively. Section 4 of the NBCMA states that ''a national bank may engage in a consolidation or merger *under this Act* with an out-of-State bank if the consolidation or merger is approved'' (emphasis added) [40] under 12 U.S.C. 1831u, which sets out requirements for interstate mergers of insured banks. In prior licensing decisions, the OCC interpreted ''under this Act'' to mean that an interstate

[35] *See, e.g.,* OCC Conditional Approval No. 859 (July 2008).

[36] 47 FR 17797 at 17799 (Apr. 26, 1982).

[39] Public Law 103–328, 108 Stat. 2338, 2351.

[40] 12 U.S.C. 215a–1(a).

consolidation or merger authorized under section 4 of the NBCMA is a consolidation or merger under section 2 or 3 of the NBCMA, respectively, and thus subject to the procedural provisions of those sections with respect to shareholder vote, dissenter's rights, and other matters as well as the substantive provisions addressing corporate succession, transfer of assets, liabilities, property, rights and interests including fiduciary appointments, and the status of the resulting bank (collectively ''corporate succession provisions''). In other words, section 4 extended sections 2 and 3, which cover consolidations and mergers between banks located in the same state, to also cover consolidations and mergers between banks with different home states. The OCC therefore implemented the NBCMA in § 5.33(h) by applying these provisions of sections 2 and 3 of the NBCMA to transactions authorized under section 4 of the NBCMA.

However, after further analysis, the OCC believes that the proper reading of section 4 of the NBCMA is that it does not directly incorporate any provisions of sections 2 or 3 of the NBCMA. As noted above, the OCC previously focused on the phrase ''under this Act'' as imposing the requirements of sections 2 and 3 on a merger conducted under section 4. However, the statutory language is ambiguous and does not require the OCC to incorporate any of the provisions in sections 2 or 3 of the NBCMA. Upon further consideration, the OCC believes the text taken in its entirety may be read as merely specifying the source of the authority and imposing the requirement that the consolidation or merger be approved under section 1831u, but not imposing additional requirements or conditions with which the bank must comply. As there are no other sections of the NBCMA under which an interstate merger between banks with different home States could be conducted in cases in which the acquiring bank does not have branches in the same State as the target bank, [41] ''under this Act'' can be read to refer only to section 4 itself. Since section 4 of the NBCMA, 12 U.S.C. 215a–1, does not contain any substantive or procedural provisions, there are no statutory procedures for interstate bank mergers under 12 U.S.C. 215a–1 resulting in a national bank. Therefore, the new proposed procedures described above apply to these section 4 transactions.

In addition to new paragraph (p), the OCC proposed implementing the changes discussed above through revisions to paragraphs (g), (h), and (o). Specifically, the OCC proposed redesignating current paragraphs (g)(2), (g)(3), (g)(6), and (g)(7) as paragraphs (g)(3), (g)(6), (g)(7), and (g)(9), respectively. The proposal included new paragraph (g)(2) that provides procedures for interstate consolidations and mergers under 12 U.S.C. 215a–1 resulting in a national bank and paragraph (g)(8) providing procedures for interstate mergers between an insured national bank and an insured State bank resulting in a State bank. Procedures for these transactions are currently contained in paragraph (h). New paragraphs (g)(2) and (g)(8) include an option to follow the procedures for intrastate mergers resulting in a national bank or State bank in paragraphs (g)(1) and redesignated paragraph (g)(7), respectively. The proposal also included in new and redesignated paragraphs (g)(2), (g)(3), (g)(4), (g)(5), (g)(6), and (g)(8) a reference to a national bank making an election under paragraph (h). Revised paragraph (h) would permit a national bank to elect to follow the procedures of the laws of the State which the national bank association has elected to follow pursuant to 12 CFR 7.2000(b) or to use the *de minimis* procedure in new paragraph (p) if applicable. Further, the proposal included a new corporate succession provision in new paragraph (g)(2)(iv) for interstate mergers resulting in a national bank to ensure that the resulting bank succeeds to the rights, franchises, and interests, including the fiduciary appointments, of the consolidating or merging banks. The proposal also included coordinating revisions to cross-references to paragraph (g).

For Federal savings associations, the OCC proposed reorganizing paragraph (o) to contain the election procedures. Revised paragraph (o)(1)(i) permits a Federal savings association to follow the procedures applicable to a State savings association chartered by the State where the Federal savings association's home office is located or to follow the standard procedures in revised paragraph (o)(2). As discussed above for national banks, revised paragraph (o)(1)(ii) would direct Federal savings associations to read references to State agencies as the OCC and to make filings generally with the OCC.

Revised paragraph (o)(2) would contain the procedures in current paragraphs (o)(1) and (o)(3) governing board and shareholder votes, respectively. The proposal changed the *de minimis* exception to the shareholder voting requirement in current paragraph (o)(3)(ii), redesignated by the proposal as paragraph (o)(2)(ii)(B), to a cross-reference to new paragraph (p) and redesignated current paragraph (o)(2) regarding the Federal savings association's change in name or home office as paragraph (o)(3). Finally, the OCC proposed a technical amendment to revised paragraph (o)(2)(ii)(A), replacing the citation to 12 CFR 152.4 with the current citation, 12 CFR 5.22.

The OCC received one comment on these proposed procedures, which focused on national bank business combinations conducted under section 4 of the NBCMA. This commenter stated that the proposal contradicts prior OCC public precedent. The OCC acknowledges this is a reversal of the OCC's prior interpretation of section 4. However, an agency is permitted to change its position on an interpretation of law.[42] As noted above, the statutory language is ambiguous. The OCC's change of position is based on the OCC's belief, after further review, that reading the language in section 4 of the NBCMA in its entirety as authorizing a consolidation or merger with an out-of-State bank under the NBCMA if it is approved pursuant 12 U.S.C. 1831u, but not importing the substantive or procedural requirements of sections 2 and 3 into section 4 through oblique terminology is more in accordance with the statutory language. Moreover, the OCC notes that this commenter did not identify any reliance concerns implicated by the change in position, nor did the OCC receive any such comments from OCC-regulated entities

[41] An acquiring bank that has branches in the same State as the target bank but has a different home State than the target bank is also ''located'' in the same State as the target bank for purposes of sections 2 or 3. In this case, while the banks have different home states, the transaction can be conducted either under section 4 or under sections 2 or 3. *See Ghiglieri* v. *NationsBank of Texas, N.A.,* 1998 U.S. Dist. LEXIS 6637 (N.D. Texas, May 6, 1998); OCC Corporate Decision No. 98–19 (April 2, 1998).

[42] *See, e.g., Perez* v. *Mortgage Bankers Association,* 575 U.S. 92 (2015); *Federal Communications Commission* v. *Fox Television Stations,* 556 U.S. 502 (2009) (an agency must provide a reasonable explanation for the change in position. The depth of explanation depends on the degree of the change. The agency also should take into account the reliance interests of parties who have relied on the agency's prior interpretation.) *See also National Cable & Telecommunications Association* v. *Brand X internet Services.,* 545 U.S. 967, 981–82 (2005) (agency reconsiderations of prior interpretations entitled to judicial deference so long as the agency adequately explains the reasons for the change); *Motor Vehicle Manufacturers Association of the U.S., Inc.* v. *State Farm Mutual Automobile Insurance Company,* 463 U.S. 29, 43 (1983) (''agency must examine the relevant data and articulate a satisfactory explanation for its action including a 'rational connection between the facts found and the choice made' '').

that could conceivably have such an interest.

This commenter also stated that the proposal contradicts prior OCC licensing decisions and has contradictory results, arguing that if sections 2 and 3 of the NBCMA cannot now be used to authorize a combination of a national bank with an out-of-State bank, then the OCC would need to reverse its prior interpretation set forth in previous business combination approvals that a bank is located in a State for purposes of sections 2 and 3 by virtue of having a branch in that State. The OCC disagrees with this point. As noted above, sections 2 and 3 authorize consolidations and mergers between insured banks that are located in the same State. Section 4 authorizes mergers between insured banks with different home States if the merger is approved under 12 U.S.C. 1831u. It stands on its own and is not tied to sections 2 and 3. However, the OCC is not changing its interpretation of sections 2 and 3 that was involved in the prior business combination approvals to which the commenter refers, namely, that an acquiring bank that has a different home State than the target bank but that has a branch in the target bank's State is located in the target bank's State for purposes of section 2 and 3.[43] The OCC continues to believe such banks could engage in the transaction under the authority of section 2 or 3 or, alternatively, could engage in the transaction under section 4. Neither the revised interpretation of section 4 nor the prior interpretation affects the applicability of sections 2 or 3 to such transactions. An interstate merger that must be conducted under section 4 because the acquiring bank is not located in the same State as the target bank would be conducted under the procedures that apply for transactions under section 4 at the time of the application (whether the procedures of section 2 or 3 of the NBCMA as under the current rule or the procedures available under the proposed rule). Thus, the commenter failed to distinguish between a transaction conducted under section 4 and following the procedures of sections 2 or 3, as in the OCC's prior interpretation of section 4, and a transaction conducted under sections 2 or 3.

In addition, this commenter argues that the proposed change may raise issues with respect to the Tenth Amendment, citing *Hopkins Federal Savings & Loan Association* v. *Cleary,*[44] noting that section 4 does not contain a ''not in contravention of State law'' provision. Sections 2 and 3 contain such a provision, and under the OCC's prior interpretation of section 4, that provision would have been incorporated into section 4. Under the OCC's new interpretation, this provision is not incorporated, and the commenter claims that raises an issue. The OCC does not agree that such language is needed in Section 4. Sections 2 and 3 include State banks within their scope, authorizing them to consolidate or merge with a national bank, but by virtue of a non-contravention provision in those sections, a State bank may not engage in a business combination pursuant to sections 2 and 3 with a national bank if it would contravene State law. However, section 4 (interpreted as a stand-alone provision, not incorporating sections 2 and 3) is directed only at national banks; it does not refer to State banks. Therefore, the OCC's proposal with respect to transactions authorized under section 4 does not affect State banks. A State bank can engage in an interstate merger with a national bank if the State bank has authority to do so under State law.

The commenter similarly suggests that failure to include a ''not in contravention of State law'' provision with respect to corporate succession in mergers conducted under section 4 raises issues under *Hopkins.* However, as noted, an interstate merger of a national bank and a State bank under section 4, resulting in a national bank, would occur only if the State bank had authority to engage in the merger under State law. Moreover, a Federal law providing for corporate succession and the transfer of property, fiduciary appointments, and other relationships in a merger with a resulting national bank does not raise the same concerns as a Federal law purporting to authorize a State bank to convert into a Federal institution, as in *Hopkins.*

Lastly, this commenter stated that the OCC did not adequately explain the proposed change regarding interim transactions appropriate for *de minimis* transactions. Per proposed § 5.33(g) and (o), a national bank or Federal savings association that is the acquiring institution in a transaction may elect not to have a shareholder vote if a vote is not required by statute and certain criteria are met, including the *de minimis* nature of the transaction. The proposed *de minimis* procedures in § 5.33(p) are similar to existing Federal savings association *de minimis* procedures except for two changes. First, they permit the use of the procedures for transactions that use interim charters that are not holding company reorganizations provided that the existing shareholders of the national bank or Federal savings association will directly hold the shares of the resulting national bank or Federal savings association and the national bank's articles or Federal savings association's charter is not changed. Second, they increase the maximum issuance of shares under this procedure from 15% total outstanding shares to 20%. The current Federal savings association regulation for *de minimis* transactions excludes those involving an interim because such transactions were commonly used in a reorganization to form a holding company and the OCC believes that shareholders in these transactions should have a vote. However, it is possible to have a transaction that involves an interim in which the existing institution and its shareholders continue as the surviving institution after the transaction in a manner that meets the requirements set out in the rule that the existing shareholders of the national bank or Federal savings association directly hold the shares of the resulting national bank or Federal savings association and the national bank's articles or Federal savings association's charter is not changed. In this case, there is no reason not to allow the acquiring institution to use the procedures in proposed paragraph (p).

For the reasons stated above, the OCC adopts the proposed procedures that a national bank or Federal savings association may elect for business combinations for which there are no statutory procedural requirements.

Current paragraph (k) of § 5.33 requires a national bank or Federal savings association engaging in a consolidation or merger in which it is not the filer and the resulting institution to file a notice with the OCC advising of its intention. This requirement currently applies even when the surviving institution is another national bank or Federal savings association. Because the OCC already supervises the surviving institution and has acted on the application for consolidation or merger, the OCC proposed removing

[43] *See Ghiglieri* v. *NationsBank of Texas, N.A.,* 1998 U.S. Dist. LEXIS 6637 (N.D. Texas, May 6, 1998); OCC Corporate Decision No. 98–19 (April 2, 1998). The prior OCC decisions referred to by the commenter, Corporate Decision No. 2001–29 (September 28, 2001); Conditional Approval No. 687 (April 25, 2005); Conditional Approval No. 1105 (Aug. 11, 2014), were instances of such transactions and were conducted under the authority of section 3, not under section 4.

[44] 296 U.S. 315, 337 (1935) (ruling that a statute allowing State-chartered institutions to convert to Federal charters without regard to State law violated the Tenth Amendment).

this requirement for the disappearing national bank or Federal savings association in this type of transaction and making a conforming revisions to paragraph (g). In such a case, the OCC already has the information that it needs to process termination and ensure that the disappearing national bank or Federal savings association has met all applicable requirements. The OCC received one comment on this provision, which supported the change. The OCC therefore adopts this change as proposed. The final rule also makes technical amendments to cross-references in paragraph (k)(4).

Current paragraph (n) provides authority for, and limits on, certain business combinations for Federal savings associations. In addition to consolidations, mergers, and other specified forms of business combinations, this paragraph addresses ''other combinations,'' the definition of which in § 5.33(d)(10) includes the transfer of any deposit liabilities to another insured depository institution, credit union, or other institution. Paragraph (n)(2)(iii) provides special requirements for mutual savings associations. Specifically, if any combining savings association is a mutual savings association, the resulting institution must be a mutually held depository institution insured by the FDIC, unless the transaction is approved under 12 CFR part 192 governing mutual to stock conversions or the transaction involves a mutual holding company organization under 12 U.S.C. 1467a(o) or a similar transaction under State law. Under the definition of ''other combination,'' § 5.33(n)(2)(iii) applies to any transfer of deposit liabilities, such as the sale of a branch, even if the mutual savings association still exists as an ongoing institution after the transaction. Accordingly, a branch sale would not be permissible unless the sale is to an insured mutual institution or either the mutual to stock or mutual holding company reorganization exception applied. The OCC proposed revising paragraph (n)(2)(iii) to state that a consolidation or merger involving a mutual savings association or the transfer of all or substantially all of the deposits of a mutual savings association must result in a mutually held depository institution insured by the FDIC unless one of the exceptions applies.

As noted in the preamble to the proposed rule, the OCC did not intend paragraph (n)(2)(iii) to apply to this type of transfer of deposit liabilities when it last amended this provision in 2015 (2015 Final Rule).[45] In fact, § 5.33(n)(4), which requires mutual savings associations to provide notice to accountholders of a proposed account transfer and to give them the option of retaining the account in the transferring Federal savings association if the account liabilities are transferred to an uninsured institution, contemplates just such an account transfer. In addition, the anomalous reading of § 5.33(n)(2)(iii) was not present in the pre-integration version of the Federal savings association combination rules.[46] Former 12 CFR 146.2(a)(4) contained a similar restriction on the resulting institution being a mutually held savings association with similar exceptions. However, § 146.2(a) applied to combinations, which was defined in 12 CFR 152.13(b)(1) as a merger or consolidation with another depository institution, or an acquisition of all or substantially all of the assets or assumption of all or substantially all of the liabilities of a depository institution by another depository institution. Accordingly, a branch purchase or other transfer of less than substantially all deposits was not a combination and thus not subject to the restrictions in § 146.2(a)(4). Furthermore, in the preamble to the 2015 Final Rule, the OCC did not describe paragraph (n)(2)(iii) as applying to transfers of less than substantially all deposits.[47]

The OCC did not receive any comments on this change to paragraph (n)(2)(iii) and adopts it as proposed.

The OCC also proposed adding an additional exception to paragraph (n)(2)(iii), as new paragraph (n)(2)(iii)(C). The OCC and OTS have permitted transactions where a mutual savings association transferred all of its deposits to a non-mutual savings association institution followed by the voluntarily liquidation of the mutual savings association. These transactions are subject to approvals or non-objections by the OCC. However, the literal reading of § 5.33(n)(2)(iii) may not permit such transactions. Accordingly, the OCC proposed adding a new exception to the requirement that the resulting institution be an insured mutual institution when the transaction is part of a voluntary liquidation for which the OCC has provided non-objection under § 5.48. The OCC received no comments on this change and adopts it as proposed.

Finally, the OCC proposed technical amendments to paragraph (l) to correct a typographical error and to revise paragraph (o)(2)(ii)(A) to replace the citation to 12 CFR 152.4 with the current citation, 12 CFR 5.22. The OCC received no comments on these technical amendments and adopts them as proposed. The final rule makes additional technical amendments to paragraphs (o)(2)(ii)(A) and (o)(2)(ii)(C) to correct cross-references, paragraphs (f)(3) and (g)(6) to properly reflect the reorganization of paragraph (g), and paragraph (g) to conform headings to the plural form.

Two commenters suggested changes to § 5.33 that were not included in the proposed rule. One of these commenters suggested that prefiling discussions between the OCC and national banks filing to engage in a business combination be memorialized and made public after the bank submits its application. The OCC notes that § 5.33 does not contain a requirement for prefiling meetings but that these meetings may occur. This commenter asserts that publication of these discussions would promote fairness and transparency and deter the OCC from giving unfair advantage to certain banks. The OCC disagrees with this commenter. Prefiling discussions generally concern confidential business and often supervisory information, which may not be disclosed. The OCC therefore is not including this suggestion in its final rule.

The other commenter suggested a change to § 5.33(e)(1)(ii), which lists the policies that the OCC considers when evaluating a business combination under the Bank Merger Act. Specifically, this commenter requested a change to paragraph (e)(1)(ii)(D), which states that the OCC considers the effectiveness of any insured depository institution involved in the business combination in combating money laundering activities, including in overseas branches. This commenter requested that the OCC change this provision to provide that, as the OCC proposed with respect to CRA, the OCC's conclusion of whether the filer's effectiveness in combatting money laundering activities is consistent with approval of an application be considered in conjunction with the other factors in § 5.33. The OCC disagrees with the commenter. CRA is a separate statute and is not included in the Bank Merger Act. However, 12 U.S.C. 1828(c)(11) requires the OCC to consider, among other factors, the effectiveness of insured depository

[45] 80 FR 28346 (May 18, 2015).

[46] The 2015 Final Rule integrated many licensing rules that apply to national banks and Federal savings associations.

[47] The OCC stated, ''in a merger or consolidation with a mutual Federal savings association, a mutual savings association must be the resulting institution.'' 80 FR 28346 at 28374 (May 18, 2015).

institutions' efforts in combating money laundering when evaluating proposals subject to the Bank Merger Act. The current regulatory text repeats this statutory requirement. In addition, banks with significant Bank Secrecy Act deficiencies may not have the capability to put in place sufficient controls to mitigate additional money laundering or terrorist financing risks associated with significant corporate activities.

Operating Subsidiaries of a National Bank (§ 5.34)

Section 5.34 provides the licensing requirements for a national bank's acquisition or establishment of an operating subsidiary or commencement of a new activity in an existing operating subsidiary. Paragraph (e)(2)(i) specifies what entities may qualify as an operating subsidiary. Paragraph (e)(2)(i)(A) requires that the national bank must have the ability to control the management and operations of the subsidiary and no other person or entity exercises effective operating control over the subsidiary or has the ability to influence the subsidiary's operations to an extent equal to or greater than that of the bank. The OCC proposed to clarify this provision by requiring that no other person or entity has the ability to exercise effective control or influence over the management or operations of the subsidiary to an extent equal to or greater than that of the bank or an operating subsidiary thereof. The OCC also proposed conforming amendments to current § 5.34(e)(5)(A)(3)(*i*), redesignated by the proposed rule as § 5.34(f)(2)(i)(C)(*l*), which contains a parallel requirement for operating subsidiary filings. Redesignated § 5.34(f)(2)(i)(C)(*l*) provides additional requirements for how the national bank must effectively control the operating subsidiary to be eligible to submit a notice to the OCC instead of an application to establish or engage in an activity in an operating subsidiary. The OCC received no comments on these changes and adopts them as proposed.

Section 5.34(e)(2)(ii) identifies certain subsidiaries that are not operating subsidiaries for purposes of § 5.34. The OCC proposed to replace the word ''subsidiaries'' with ''entities'' to further clarify the exclusion. The OCC received no comments on this change and adopts it as proposed.

The OCC also proposed a new paragraph (e)(2)(ii)(C) to specify that a trust formed for purposes of securitizing assets held by the bank as part of its banking business would not be considered an operating subsidiary. This proposal would codify the OCC's position that securitization trusts generally do not qualify as operating subsidiaries because of the bank's limited control over the trust and because beneficial interests in trusts lack many of the indicia of traditional equity. The OCC received two comments on this new paragraph. One commenter supported removing securitization trusts from the definition of operating subsidiary, but also proposed excluding trusts formed for the purpose of holding securities, off-lease property, real estate, and other assets held in satisfaction of debt previously contracted (DPC assets) from this definition. The OCC does not agree with this suggested change. The parent bank likely will have actual control and management of trusts holding securities, off-lease property, real estate, and other DPC assets. Therefore, the reasons for excluding securitization trusts from the definition of operating subsidiary are unlikely to be present for these trusts identified by the commenter.

A second commenter disagreed with the proposed change asserting that the OCC has not indicated any authority for the proposition that securitization trusts are not operating subsidiaries or non-controlling investments. The commenter also stated that the OCC has not adequately discussed the intent or expected impact of the proposal. As indicted above, the OCC generally has not treated the securitization trust as an operating subsidiary. The interests in securitization trusts typically are not the equivalent of ''equity'' for purposes of 12 CFR 5.34, 5.36, 5.38, and 5.58, and do not provide indicia of ''control'' for purposes of 12 CFR 5.34 and 5.38. Rather, the beneficial interest or any other interests retained in a securitization trust are more akin to economic interests than to traditional equity interests. The beneficial interests do not give rise to traditional voting power associated with equity interests in a corporation or LLC. Furthermore, securitization trusts are generally structured simply as a set of instructions for administering the securitization that are difficult to change. Given these factors, the bank does not control the trust in the traditional sense of directing its operations.

For the reasons discussed above, the OCC adopts new paragraph (e)(2)(ii)(C) as proposed.

Paragraph (e)(5) of § 5.34 provides the procedures for operating subsidiary filings. The OCC proposed to redesignate the majority of paragraph (e)(5) as paragraph (f) and to redesignate current paragraph (e)(6), addressing grandfathered operating subsidiaries, as paragraph (g). The OCC also proposed conforming revisions to cross-references. The OCC received no comments on these technical changes and adopts them as proposed.

Redesignated § 5.34(f)(2) contains the requirements for a national bank to qualify for the notice process for operating subsidiary filings. In addition to meeting additional control requirements and being well capitalized and well managed, paragraph (f)(2)(i)(A) permits a national bank to file a notice instead of an application if the activity is listed in paragraph (e)(5), redesignated by the proposal as paragraph (f)(5). The OCC proposed to expand the scope of this requirement to include any activity that is substantively the same as a previously approved activity and that will be conducted in accordance with the same terms and conditions applicable to the previously approved activity. As discussed previously in this *Supplementary Information,* the OCC proposed to define ''previously approved activity'' in § 5.3 to mean, for national banks, any activity approved in published OCC precedent for a national bank, an operating subsidiary of a national bank, or a non-controlling investment of a national bank.[48] The OCC noted in the preamble to the proposed rule that the expansion of the notice requirement to activities that are substantively the same as previously approved activities does not relieve the national bank from the requirement to ensure that the operating subsidiary is only conducting permissible activities and would not affect the OCC's ability to take action if the OCC finds that the activities are not permissible or are conducted in an unsafe or unsound manner.

The proposal also raised as an alternative removing all filing requirements for national bank operating subsidiaries noting that a filing would not be required if the activity was conducted in the bank. Under this alternative, a national bank would be able to acquire or establish an operating subsidiary or commence a new activity in an existing operating subsidiary without filing a notice or application if the activity to be engaged in by the operating subsidiary is a permissible bank activity, provided the operating subsidiary meets the ownership and structural aspects currently required for notice and the national bank is well capitalized and well managed.

One commenter supported this alternative noting that no filing would be required if the activity were performed in the bank and contending

[48] As discussed, the final rule changes ''an activity approved'' to ''any activity approved.''

that there are safety and soundness reasons to reduce regulatory obstacles to conducting an activity in an operating subsidiary.[49] However, upon further consideration, the OCC has determined not to pursue this alternative at this time. The OCC would like experience with the new notice provision for an activity that is substantively the same as a previously approved activity before making a decision on removing all filings for operating subsidiaries. Therefore, the OCC is not including this change in the final rule.

This commenter also argued that the OCC should extend the proposal to fiduciary powers, stating that operating subsidiaries should be able to rely on the fiduciary powers of the parent national bank or Federal savings association without notifying or seeking approval from the OCC, so long as the parent national bank or Federal savings association was not required to notify or seek approval from the OCC prior to engaging in permissible bank activities. The commenter argued that this change would also obviate the need for many national banks and Federal savings associations to register an operating subsidiary as an investment adviser under the Investment Advisers Act of 1940 (Advisers Act) when the subsidiary is exercising its investment discretion on behalf of its customers or providing investment advice for a fee under 12 CFR part 9 and therefore would substantially reduce regulatory burden.

The OCC disagrees with this comment. Regardless of the OCC's decision regarding the alternative proposal, the provision regarding fiduciary powers and investment advice activity is special and distinct. Current § 5.34(e)(5)(vii)(B) does not require an investment advisory subsidiary to be registered. Rather, the provision provides that if the subsidiary is registered, the national bank or Federal savings association need not have fiduciary powers, but if the subsidiary is not registered, then the national bank or Federal savings association must have fiduciary powers. This requirement is necessary to ensure that there will be some applicable law that will govern the conduct of the subsidiary, whether it is the Advisers Act or 12 CFR part 9.

The commenter further recommended that if the OCC does not eliminate filings for operating subsidiary fiduciary activities, the OCC should add the exercise of fiduciary powers to the list of activities for which no advance filing is required under 12 CFR 5.34(e)(5)(vi). The OCC disagrees with this recommendation because the proposal to expand the activities eligible for notice under § 5.34(e)(5)(v) to include all previously approved activities would already include most national bank subsidiary fiduciary activities.

The commenter also argues that subsidiaries engaging in the activities listed in § 5.34(e)(5)(v) are an example of why a bank's ability to establish an operating subsidiary should not be tied to the bank's management rating, as required by the proposed definition of ''well managed.'' The commenter contends that if a bank is well capitalized and has a satisfactory composite rating, it should be able to establish, without a separate regulatory approval, a subsidiary to engage in activities listed in § 5.34(e)(5)(v), such as the management and disposition of DPC assets. The commenter requests that the OCC retain the existing definition of ''well managed'' for this section, instead of the proposed definition which includes the management rating. The OCC disagrees with this comment. If a bank is not ''well managed'' it may lack sufficient internal controls and processes to properly manage an operating subsidiary, such as one managing DPC assets. As such, an application should be required. If the bank is well managed and well capitalized, it need only file a notice once, as it can rely on the provision in current § 5.34(e)(5)(vi) to form additional subsidiaries engaging in the same activity without any additional filing.

The commenter also suggests that, in the event that the OCC decides to retain some filing requirements, the OCC use a notice rather than an application when a national bank intends to acquire as an operating subsidiary an entity that engages in *de minimis* activities not permissible for a national bank. The OCC does not agree with this comment. Although *de minimis*-type provisions did exist in the past, all were removed after the passage of the Gramm-Leach-Bliley Act, Public Law 105–102. In addition, a financial subsidiary provides an alternative existing mechanism if a national bank wishes to use a subsidiary to conduct limited activities not permissible for a national bank.

For the reasons discussed above, the OCC adopts redesignated § 5.34(f) as proposed, with two technical amendments. First, the final rule removes unnecessary cross-references to § 5.3 for the definitions of ''well capitalized,'' ''well managed, '' and ''previously approved activity.'' As indicated above, the definitions in § 5.3 apply to all of part 5 so these cross-references are unnecessary. Additionally, the final rule corrects a cross-reference to redesignated § 5.34(f) in § 5.34(c) regarding ownership requirements applying to a foreign bank rather than its Federal branch. The OCC inadvertently did not adjust the current cross-reference in § 5.34(c) to § 5.34(e)(5)(i)(B) when it restructured the rule in 2008.[50] The final rule restores the cross-reference to the ownership requirement to file a notice under § 5.34, as was originally promulgated in 2001.[51]

Current paragraph (e)(7) requires national banks to file an annual report with the OCC describing operating subsidiaries that do business directly with consumers. The OCC publishes this information on its website. The OCC proposed to remove this requirement to reduce burden and because it generally duplicates information contained elsewhere, such as the FFIEC's National Information Center (NIC). In addition, the majority of the operating subsidiaries reported are now subject to the jurisdiction of the Consumer Financial Protection Bureau, and not the OCC, for most consumer law issues. The OCC received one comment on this proposal. The commenter supported the proposal and agreed that the existing regulation is redundant. The final rule therefore removes the requirement as proposed.

Bank Service Company Investments by a National Bank or Federal Savings Association (§ 5.35)

Section 5.35 addresses national bank and Federal savings association investments in bank service companies as authorized by the Bank Service Company Act (BSCA) (12 U.S.C. 1861–1867). Pursuant to section 2 of the BSCA (12 U.S.C. 1862), paragraph (i) of § 5.35 provides that a national bank or Federal savings association may not invest more than 10 percent of its capital and surplus in a bank service company. In addition, paragraph (i) also provides that the national bank's or Federal savings association's total investments in all bank service companies may not exceed five percent of the national bank's or Federal savings association's total assets. However, section 2 of the BSCA also specifies that the investment

[49] This commenter also discussed having this alternative amendment apply to Federal savings associations. However, this alternative would not permissible for Federal savings associations because section 18(m) of the FDI Act (12 U.S.C. 1828(m)) requires a Federal savings associations to file a notice with the OCC when establishing, acquiring, or conducting a new activity in an operating subsidiary.

[50] *See* 73 FR 22216, 22238 (Apr. 24, 2008).

[51] *See* 12 CFR 5.34(c), (e)(5)(i)(B) (2002).

limitations in section 5(c)(4)(B) of the HOLA apply to Federal savings associations with regard to bank service company investments. This limitation is not currently included in paragraph (i). Accordingly, the OCC proposed to revise paragraph (i) to directly reference the limitations in section 2 of the BSCA. The OCC also proposed a technical correction to the title of this section that would remove the extraneous word ''investment.'' The OCC received no comments on the changes it proposed to § 5.35 and adopts them in the final rule as proposed with additional technical changes. Specifically, the final rule does not include the unnecessary cross reference to § 5.3 for the definitions of ''well capitalized'' and ''well managed'' in paragraph (f). The final rule also corrects a reference to the FDI Act in paragraph (d)(3).

Other Equity Investments by a National Bank (§ 5.36)

Section 5.36 provides the procedures for national banks to make certain types of equity investments. Paragraphs (e) and (f) provide the procedures and requirements for a national bank to make a non-controlling investment that is not prescribed by other OCC rules. The OCC proposed to clarify the types of national bank equity investments that are subject to § 5.36 by adding a new definition to paragraph (c) that would define ''non-controlling investment'' to mean an equity investment made pursuant to 12 U.S.C. 24(Seventh) that is not governed by procedures prescribed by another OCC rule. Additionally, the OCC proposed to specify in the definition that the term ''non-controlling investment'' does not include a national bank holding interests in a trust formed for the purposes of securitizing assets held by the bank as part of its banking business or for the purposes of holding multiple legal titles of motor vehicles or equipment in conjunction with lease financing transactions. This would codify the OCC's interpretation that these interests do not have sufficient indicia of ownership and control to qualify as an equity investment for purposes of § 5.36. The OCC also proposed a conforming change to paragraphs (e) and (f). The OCC received no comments to the new definition and conforming amendments and adopts them in the final rule as proposed.

For a national bank to make a noncontrolling investment, current § 5.36 requires a filing with the OCC that: (1) Describes the structure of the investment and the activity or activities conducted by the enterprise in which the bank is investing; (2) describes how the bank has the ability to prevent the enterprise from engaging in impermissible activities or has the ability to withdraw its investment; (3) describes how the investment is convenient and useful to the bank in carrying out its business and not a mere passive investment; (4) certifies that the bank's loss exposure is limited; and (5) certifies that the enterprise agrees to be subject to OCC supervision and examination, subject to the limitations and requirements of section 45 of the FDI Act (12 U.S.C. 1831v) and section 115 of the Gramm-Leach-Bliley Act (12 U.S.C. 1820a).

A national bank must file an application with the OCC to make a non-controlling investment unless it qualifies for the notice procedure in § 5.36(e). A national bank may file a notice if: (1) The investment meets the above requirements; (2) the enterprise engages in activities that are listed in § 5.34(e)(5)(v) (permissible operating subsidiary activities) or an activity that is substantively the same as that contained in published OCC precedent approving a non-controlling investment by a national bank or its operating subsidiary; and (3) the bank is well managed and well capitalized. As with operating subsidiary notices, the OCC proposed to expand the activities eligible for notice for non-controlling investments to all previously approved activities, as defined in proposed § 5.3. This definition includes activities approved for national banks and their operating subsidiaries, in addition to previously approved non-controlling investments. The proposal also reorganized paragraph (e) and made conforming changes to paragraphs (e)(2) and (e)(4). Additionally, the OCC stated that it is considering an alternative amendment removing the filing requirement for non-controlling investments in enterprises engaging in bank permissible activities, as discussed above for national bank operating subsidiaries.

The OCC received one comment relating to § 5.36(e), supporting the alternative amendment. However, for the reasons noted in the discussion on § 5.34, Operating subsidiaries, the OCC declines to include this alternative in the final rule.

This commenter also recommended that if the OCC retains the notice requirements and limits the use of a notice to banks meeting the proposed definition to ''well managed'' in § 5.3, the OCC should make exceptions to these filing requirements for investments that help to meet the credit needs of the community and for investments below a specified threshold. As noted above in its discussion of comments on the definition of ''well managed'' in § 5.3, the OCC finds that the components reflected in an entity's management rating, such as bank controls, are relevant to the establishment of other equity investments of a national bank and that a national bank with a 2 composite rating but a 3 management, or risk management, rating warrants additional scrutiny. This rationale is generally applicable, regardless of the size of the investment, including for investments that help meet the credit needs of the community.

For these reasons, the OCC adopts these changes to § 5.36(e) as proposed, with technical amendments to remove unnecessary cross-references to § 5.3.

As noted, whether a national bank is filing a notice under paragraph (e) or an application under paragraph (f), the current rule requires the enterprise in which the bank will make a non-controlling investment to agree to OCC supervision and examination. The OCC proposed to amend paragraph (f), redesignated as paragraph (f)(1), to permit national banks to file an application for prior approval to invest in an enterprise that has not agreed to be subject to OCC supervision and examination. Additionally, the OCC proposed a new paragraph (f)(2) to provide for expedited review of certain applications for investments in enterprises that do not agree to OCC supervision and examination that pose minimal risk to the national bank's safety and soundness. An application under proposed paragraph (f)(2) would be deemed approved by the OCC within 10 days after the application is received if five additional requirements are met. First, the enterprise must engage in permissible bank activities as described in proposed paragraph (e) of this section. Second, the national bank must be well managed and well capitalized. These two requirements parallel the requirements for filing a notice. Third, the book value of the national bank's non-controlling investment for which the application is submitted must not be more than 1% of the bank's capital and surplus. Fourth, no more than 50% of the enterprise may be owned or controlled by banks or savings associations subject to examination by an appropriate Federal banking agency or credit unions insured by the National Credit Union Association. Many enterprises in which national banks make non-controlling investments are owned by a consortium of banks and savings associations and provide services to their owners and others. Given the potentially complex

interactions between these enterprises and their owners and the additional risks posed to the owners, the OCC believes that OCC supervision and examination of these enterprises is necessary for the safety and soundness of the investing national banks and Federal savings associations. Accordingly, the proposed rule did not permit investments in these entities without their commitment to OCC supervision and examination, and therefore expedited review of these investments would not be available. Finally, the OCC must not have notified the national bank that the application has been removed from expedited review, or that the expedited review process has been extended, pursuant to the standards contained in § 5.13(a)(2).

The OCC received one comment on these proposed amendments to § 5.36(f), which supported the proposed changes. The OCC therefore adopts these amendments to paragraph (f) as proposed, with one technical change in wording for clarity. As explained in the preamble to the proposed rule, the OCC believes that these amendments will give national banks greater flexibility to make permissible non-controlling investments, while giving the OCC an opportunity for an in-depth review of the proposed investment to ensure there is no inappropriate risk to the national bank's safety and soundness. Furthermore, the OCC believes that this added flexibility will in particular facilitate national bank investments in financial technology (fintech) companies, which will enhance the ability of national banks to enter into strategic partnerships and to develop innovative products, services, and processes while ensuring the OCC receives adequate information to supervise the attendant banking activities.[52]

In addition, the OCC proposed adding a new paragraph (g) to § 5.36 to permit a national bank to make a non-controlling investment without a filing to the OCC in certain circumstances. Specifically, a national bank would be permitted to make a non-controlling investment without an application or notice if the activities of the enterprise are limited to those activities previously reported by the bank in connection with making or acquiring a non-controlling investment; the activities in the enterprise continue to be legally permissible for a national bank; the bank's non-controlling investment will be made in accordance with any conditions imposed by the OCC in approving any prior non-controlling investment in an enterprise conducting these same activities; and the bank is able to make the representations and certifications specified in amended §§ 5.36(e)(3) through (e)(7). As a conforming amendment, the OCC proposed to redesignate current paragraphs (g) through (i) as paragraphs (h) through (j), respectively.

The OCC received no comments on new paragraph (g) and the conforming amendments and adopts the revisions as proposed, with two technical changes to correct a cross-reference in paragraph (h)(1) to reflect the redesignation and to remove an unnecessary cross-reference to § 5.3 in redesignated paragraph (i). As stated in the preamble to the proposed rule, the national bank would already have a non-controlling investment in an entity conducting particular activities, and the OCC finds that there would be little risk in the bank making an additional non-controlling investment in an entity conducting the same activities. Furthermore, the OCC finds that non-controlling investments pose similar risks to national banks as operating subsidiaries, and new paragraph (g) would parallel current § 5.34(e)(5)(vi), redesignated in the final rule as § 5.34(f)(6), which permits national banks to make investments in operating subsidiaries without a filing. Therefore, the OCC believes that the revisions to paragraph (g) will reduce burden without jeopardizing the national bank's safety and soundness.

Redesignated paragraph (j) provides exceptions to the rules of general applicability. The OCC proposed to remove the exception to § 5.9, public availability, because some of these investments may be of public interest. Further, the proposal would permit the OCC to determine that some or all provisions in §§ 5.8, 5.10, and 5.11 apply if it concludes that an application presents significant or novel policy, supervisory, or legal issues. This proposed paragraph (j) would parallel the equivalent provision for operating subsidiary filings in current § 5.34(e)(5)(iii). The OCC received one comment to these changes to paragraph (j). The commenter opposed making the public availability requirements of § 5.9 applicable to non-controlling investment filings on the grounds that the information included in those filings could be competitive information and the commenter contended that a bank cannot rely on the OCC deeming this information confidential. Therefore, the commenter argued that the proposed change would have a chilling effect on equity investments by banks. The commenter also stated that the public will learn about bank noncontrolling investments when the bank or firm in which the bank invested announces the investment.

The OCC has reconsidered this proposed amendment in light of this comment. A noncontrolling investment filing differs from an operating subsidiary filing. Although confidential information can be redacted in both of these types of filings when made available to the public, the fact that a national bank is making a noncontrolling investment in an entity may itself be considered confidential information until the national bank or entity announces the investment. Therefore, the OCC is not removing the exception to § 5.9, public availability, for § 5.36 filings as proposed. However, the OCC is adopting in the final rule the proposed provision that permits the OCC to determine that some or all of the provisions in §§ 5.8, 5.10, and 5.11 apply if it concludes that an application presents significant or novel policy, supervisory, or legal issues, with the addition of § 5.9 to this sentence.

Investment in National Bank or Federal Savings Association Premises (§ 5.37)

Section 5.37 describes the procedures for national bank and Federal savings association investment in bank premises. Paragraph (d)(1)(i) provides that the procedures of § 5.37 are applicable to investments in the stocks, bonds, debentures, or other obligations of any corporation holding the premises of the national bank or Federal savings association in addition to direct investments in the bank premises. Twelve CFR 7.1000 provides the authority for national bank and Federal savings association investments in bank premises.[53] In addition to the investments listed in § 5.37(d)(1)(i), § 7.1000(a)(3) provides that national banks and Federal savings associations may hold bank premises through a subsidiary organized as a corporation, partnership, or similar entity (*e.g.,* a limited liability company). The OCC proposed to revise § 5.37(d)(1)(i) to recognize the permissibility of holding bank premises through partnerships and similar entities, such as limited liability companies, so that it is consistent with § 7.1000(a)(3). In addition, the OCC proposed to remove the definition of ''capital and surplus'' in § 5.37 as it is redundant with the definition of this

[52] Notwithstanding this amendment, if the enterprise in which the national bank invests also provides services to the national bank, it may be subject to the examination and regulation under the Bank Service Company Act. *See* 12 U.S.C. 1867(c).

[53] The OCC notes that it has proposed to redesignate 12 CFR 7.1000 as 12 CFR 7.1024 in a separate rulemaking. *See* 85 FR 40794 (July 7, 2020).

term in § 5.3. The OCC also proposed adding § 5.9, public availability, to the exceptions to rules of general applicability in § 5.37(d)(5). Finally, the OCC proposed to correct a technical error in paragraph (a), replacing ''12 U.S.C. 317d'' with ''12 U.S.C. 371d.''

The OCC received no comments on these changes and adopts them as proposed, with two technical changes to remove an unnecessary cross-reference to § 5.3 in paragraph (d)(3)(i) and to conform a cross-reference in paragraph (d)(4).

Operating Subsidiaries of a Federal Savings Association (§ 5.38)

Section 5.38 provides the application requirements for a Federal savings association's acquisition or establishment of an operating subsidiary or commencement of a new activity in an existing operating subsidiary when required by section 18(m) of the FDI Act (12 U.S.C. 1828(m)). Section 5.38 is largely parallel to § 5.34 for national bank operating subsidiaries, except that where a national bank would file a notice, a Federal savings association would file an application eligible for expedited review. Accordingly, the OCC proposed coordinating revisions to § 5.38 including: (1) Revising the standard for qualifying subsidiaries in paragraph (e)(2)(i)(A); (2) excluding securitization trusts from the scope of the section in new paragraph (e)(2)(iii)(C); (3) redesignating paragraphs (e)(5), (e)(6), and (e)(7) as paragraphs (f), (g), and (h), respectively; (4) expanding the activities eligible for expedited review to include activities substantially the same as a previously approved activity (as proposed to be defined in § 5.3) and conducted in accordance with the same terms and conditions applicable to the previously approved activity, in redesignated paragraph (f)(2)(ii)(B); (5) expanding the entities eligible for expedited review to include certain trusts where the Federal savings association or its operating subsidiary is the sole beneficiary and has the ability to replace the trustee at will, in redesignated paragraphs (f)(2)(ii)(C) and (D); and (6) explicitly recognizing that the control required by redesignated paragraphs (f)(2)(ii)(D) may be met through an operating subsidiary of the Federal savings association. In addition, the OCC proposed technical changes that would remove the definitions of ''well capitalized'' and ''well managed'' from § 5.38, as with § 5.34, and replace the word ''subsidiary'' with the more appropriate word ''entity'' in the introductory text of paragraph (e)(2)(iii). The OCC received no comments on these proposed amendments and the OCC adopts them as proposed, with one technical change to remove unnecessary cross-references to § 5.3 in paragraph (f).

In addition, the OCC proposed to correct an inadvertent omission in the 2015 Final Rule by amending redesignated § 5.38(f)(2)(ii)(D)(*1*), which contains requirements for how a Federal savings association must effectively control an operating subsidiary to be eligible for expedited review of an application. Although the OCC made changes in the 2015 Final Rule to current §§ 5.34(e)(2)(i)(A), 5.34(e)(5)(ii)(A)(*3*)(*i*), and 5.38(e)(2)(i)(A) to address commenter's concerns regarding the application of the rule to joint ventures,[54] the OCC did not make corresponding conforming changes to current § 5.38(e)(5)(ii)(B)(*4*)(*i*), redesignated in the proposal as § 5.38(f)(2)(ii)(D)(*1*). However, all of these provisions should contain parallel language. Accordingly, the OCC proposed to revise redesignated § 5.38(f)(2)(ii)(D)(*1*) so that it parallels current § 5.34(e)(5)(ii)(A)(*3*)(*i*), redesignated in this proposal as § 5.34(f)(2)(i)(C)(*1*). The OCC received no comments on this change and adopts it as proposed.

Financial Subsidiaries of a National Bank (§ 5.39)

Section 5.39 describes the procedures for national bank acquisition of, and conduct of activities in, a financial subsidiary pursuant to section 5136A of the Revised Statutes.[55] Paragraph (h)(5)(ii) of § 5.39 specifies that the restrictions contained in section 23A(a)(1)(A) of the Federal Reserve Act [56] do not apply to a covered transaction between a bank and its financial subsidiary. However, section 609 of the Dodd-Frank Wall Street Reform and Consumer Protection Act removed this section 23A exclusion. Accordingly, the OCC proposed to remove paragraph (h)(5)(ii).

The OCC also proposed to clarify the approval process for financial subsidiary activities. First, consistent with other changes in part 5, the OCC proposed to change the terminology for filings under § 5.39 from notice to application. The OCC did not intend any substantive change in standards or procedures as a result of this proposal.

Second, as the OCC recognized in the initial proposal for § 5.39, section 24a states that OCC approval shall be based solely upon statutory factors.[57] Accordingly, the OCC initially proposed the current procedures for § 5.39 upon the understanding that the approval may occur upon a bank's submission of information demonstrating satisfaction of the statutory criteria.[58] In the current proposal, the OCC proposed to add a new paragraph (i)(3) specifying that an application is deemed approved upon filing of the information required by the procedures of paragraphs (i)(1) or (i)(2) within the time frames provided.

Finally, the OCC proposed technical changes to paragraph (d) that would remove the definitions of ''appropriate Federal banking agency,'' ''well capitalized,'' and ''well managed.''

The OCC received no comments specific to the amendments it proposed to § 5.39 and adopts them as proposed with technical changes that remove an unnecessary cross-reference to § 5.3 in paragraph (g) and correct a cross-reference in paragraph (h)(5), and with other technical changes to citations.

Change in Location of a Main Office of a National Bank or Home Office of a Federal Savings Association (§ 5.40)

The final rule makes a technical correction to § 5.40. Among other things, § 5.40(c)(2)(ii) requires a Federal savings association to obtain shareholder approval required under its charter if relocating its home office outside the limits of its city, town, or village, and must amend its charter. Because this provision applies to both Federal stock savings associations and Federal mutual savings associations, the OCC is amending this provision to include member approval as Federal mutual savings associations have members and not shareholders.

National Bank Director Residency and Citizenship Waivers (New § 5.43)

The OCC proposed a new § 5.43 to provide procedures for waivers of the national bank director residency and citizenship requirements. Section 5146 of the Revised Statues (12 U.S.C. 72) requires every director of a national bank to be a citizen of the United States and that a majority of the directors reside in the State, Territory, or District where the national bank is located, or within one hundred miles of the location of the office of the bank. These requirements reflect the principle of local ownership and control of national banks. Twelve U.S.C. 72 provides the Comptroller the discretion to waive the residency requirement and to waive the citizenship requirement for not more than a minority of the total number of directors.

[58] *Id.*

The OCC has processed requests for waivers of the residency and citizenship requirements for many years. The ''National Bank Director Waivers'' booklet of the *Comptroller's Licensing Manual* currently describes the procedures for requesting and granting waivers. The OCC proposed codifying these procedures in a new 12 CFR 5.43 to better clarify and structure the waiver process. The OCC received no comments on this new section and adopts these provisions as proposed, with the changes discussed below.

Specifically, paragraph (a) of § 5.43 sets forth the authority for the regulation, 12 U.S.C. 72 and 93a, the latter of which grants the OCC general rulemaking authority. Paragraph (b) sets forth the scope of the section as describing the procedures for the OCC to waive the residency and citizenship requirements.

Paragraph (c) sets forth the application procedures. Under paragraph (c)(1), a national bank would file a written application with the OCC to request a waiver of the residency requirement. Paragraph (c)(1) also provides that the OCC may grant this waiver for individual directors or for any number of director positions. The OCC typically grants residency waivers for a certain number of directors on the board rather than to specific individuals, but the final rule increases flexibility by permitting either procedure. As a clarifying change, the final rule provides that the waiver is valid until the OCC revokes it in accordance with paragraph (d) of this section, or, if granted on an individual basis, until the individual no longer serves on the board.

Under paragraph (c)(2), a national bank may request a waiver of the citizenship requirements for individuals who comprise up to a minority of the total number of directors by filing a written application with the OCC. Paragraph (c)(2) also provides that the OCC may grant a waiver on an individual basis. Given the more prescriptive nature of the citizenship requirement and the greater background investigation that the OCC undertakes on proposed non-citizen directors, OCC practice is to grant waivers to individuals and not to a designated number of directors. Accordingly, the final rule specifies in paragraph (c)(2) that a citizenship waiver is valid until the individual leaves the board or the OCC revokes the waiver in accordance with paragraph (d), discussed below.

Paragraph (c)(3)(i) requires the subject of a citizenship waiver application to submit the information prescribed in the Interagency Biographical and Financial Report. Paragraph (c)(3)(ii) provides that the OCC may require additional information about the subject of a citizenship waiver application, including legible fingerprints, if appropriate. This paragraph also permits the OCC to waive any of the information requirements if the OCC determines that doing so is in the public interest. The final rule makes a technical correction to the cross-reference in this paragraph.

Paragraph (c)(4) provides exceptions to the rules of general applicability. Specifically, §§ 5.8 (public notice), 5.9 (public availability), 5.10 (comments), and 5.11 (hearings and other meetings) do not apply to applications for citizenship waivers. As noted in the preamble to the proposed rule, the OCC believes the applications will largely consist of information specific to a bank's internal practice as well as private information about the individuals subject to the waiver applications. Accordingly, these applications should not be publicly available nor subject to public notice, comment, or hearings.

Paragraph (d) provides procedures for the OCC's revocation of a residency or citizenship waiver. Under these procedures, the OCC will provide written notice before a revocation to the national bank and affected director(s) of its intention to revoke the waiver and the basis for its intention. The OCC recognizes that discretion in revoking residency and citizenship waivers is premised upon the guarantee of due process. Accordingly, this paragraph provides the bank and the affected director(s) the opportunity to respond in writing to the OCC's intention to revoke a waiver within 10 calendar days, unless the OCC determines that a shorter period is appropriate in light of relevant circumstances. The OCC will consider the written responses of the bank and affected director(s), if any, prior to deciding whether or not to revoke a residency or citizenship waiver. The OCC will notify the national bank and the director of the OCC's decision to revoke a residency or citizenship waiver in writing. If the director appeals pursuant to paragraph (e), this waiver decision is effective upon the director's receipt of the decision of the Comptroller, an authorized delegate, or the appellate official, to uphold the initial decision to revoke the residency or citizenship waiver. If the director does not appeal, the revocation is effective at the expiration of the period to appeal. As stated in the preamble to the proposed rule, the OCC believes the decision to revoke a waiver is consistent with the Comptroller's authority to grant a waiver even though 12 U.S.C. 72 does not contain any specific provisions for revoking a waiver. Absent this authority many residency waivers effectively would be perpetual as the OCC generally grants residency waivers for a designated number of director positions. Further, changing geo-political circumstances may in some circumstances warrant the revocation of citizenship waivers, particularly if foreign governments are unduly influencing directors' activities with regard to a national bank.

Paragraph (e) provides an appeals process for a director whose residency or citizenship waiver the OCC has decided to revoke. This appeals process parallels the appeals process provided for disapprovals of directors and senior executive officers in 12 CFR 5.51, and provides review by the Comptroller, an authorized delegate, or a designated appellate official. As proposed, a director may appeal on the grounds that the reasons for the initial decision to revoke were contrary to fact or arbitrary and capricious. The final rule provides that either the director or the national bank, or both, may make this appeal. This change corrects an inadvertent omission in the proposed rule and is consistent with the language in § 5.51. The Comptroller, an authorized delegate, or the appellate official will independently determine whether the reasons given for the initial decision to revoke are contrary to fact or arbitrary and capricious. If they determine either to be the case, the Comptroller, an authorized delegate, or the appellate official may reverse the initial decision to revoke the waiver. The final rule also corrects the cross-reference in paragraph (e)(4) for the effective date of a revocation.

Paragraph (f) provides that waivers outstanding on the effective date of the final rule remain in effect, unless revoked pursuant to paragraph (d). The OCC adopts this provision as proposed with a technical change for clarity. The final rule removes the language ''notwithstanding paragraph (c)(2)'' and instead adds a reference to a waiver no longer being in effect because the individual is no longer on the board, as provided in paragraph (c).

Increases in Permanent Capital of a Federal Stock Savings Association (§ 5.45)

Section 5.45 sets out the OCC's rules addressing increases in permanent capital by a Federal savings association organized in stock form. The OCC proposed two technical amendments to this section. The OCC received no

comments to these technical changes and adopts them as proposed. Specifically, the final rule changes the term ''Federal savings association'' or ''savings association'' to ''Federal stock savings association'' each time it appears, except as used in the defined term ''eligible savings association,'' to more accurately reflect the scope of this section. Second, the final rule replaces the reference to 12 CFR part 197 in paragraph (h) with 12 CFR part 16, which now applies to Federal savings associations.

The OCC invited comment on another possible change to § 5.45. Under the current rule, Federal savings associations that meet the criteria for an eligible savings association described in § 5.3 may have their applications for capital increases, when required, reviewed under an expedited process. The OCC requested comment on whether it should amend its regulations so that only well capitalized and well managed Federal savings associations are eligible to request expedited review of their applications for capital increases. The preamble to the proposed rule explained that if the OCC makes this change to § 5.45 in the final rule, it would also amend its other capital filing-related rules in part 5 based on this same rationale, §§ 5.46 (Changes in permanent capital of a national bank), 5.47 (Subordinated debt issued by a national bank), 5.55 (Capital distributions by Federal savings associations), and 5.56 (Inclusion of subordinated debt securities and mandatorily redeemable preferred stock as Federal savings association supplementary (tier 2) capital).

The OCC received no comments specifically on the changes proposed or suggested for § 5.45. As discussed further below regarding § 5.46, the OCC believes that the current standard for evaluating capital filings, including the compliance rating, is appropriate. Therefore, the OCC adopts the amendments to § 5.45 as proposed.

Changes in Permanent Capital of a National Bank (§ 5.46)

Section 5.46 sets out the OCC's rules addressing changes in permanent capital for a national bank. Paragraph (g)(1)(ii) provides that prior OCC approval is required for an increase in permanent capital in certain cases. In addition, pursuant to 12 U.S.C. 57, paragraph (i)(3) of § 5.46 requires a bank to submit a notice to the appropriate licensing office after it completes an increase in capital, regardless of whether prior approval is required. The OCC proposed to clarify these procedures for increases in capital requiring prior approval by referencing paragraph (i)(3) in the introductory text of paragraph (g)(1)(ii) and removing it from paragraph (g)(1)(ii)(C). The OCC also proposed to clarify the introductory text of paragraph (g)(1)(ii) to specifically indicate that an application to increase a national bank's permanent capital may be eligible for expedited review under paragraph (i)(2). The OCC received no comments to these changes.

Paragraph (h) provides that a national bank must apply and obtain the OCC's prior approval for any reduction in its permanent capital. Paragraph (i)(2) provides expedited review procedures and currently provides that an eligible bank may request approval for decreasing its capital for up to four consecutive quarters. The OCC proposed a number of amendments to paragraphs (h) and (i) to add flexibility for national banks and to clarify procedures. First, the OCC proposed to amend paragraph (h) to permit a national bank to request approval in a standard application for a reduction in capital for multiple quarters. The request need only specify a total dollar amount for the requested period and need not specify amounts for each quarter. As a result, a national bank may request approval for a reduction in permanent capital over more than four consecutive quarters. However, this request would not be eligible for expedited review so that the OCC may have the time to carefully review the request. Second, the OCC proposed to add flexibility to the expedited process in paragraph (i)(2) by specifying that an eligible national bank need only state the total dollar amount rather than per-quarter reductions in requests for four-quarter decreases. As a conforming change, the OCC proposed to amend paragraph (i)(5) to clarify that the OCC's approval of a capital change does not expire within one year of the date of the approval if the OCC specifies a longer period.

The OCC received one comment on this proposal, which supported the proposed amendments. This commenter also recommended amending the criteria for an eligible bank in the context of requesting approval for decreasing its capital for four consecutive quarters. The commenter recommended adopting a single eligibility standard for all part 5 filings and other procedures that takes into account the criteria that are most relevant to the activity at hand, which, in this section, would relate to the bank's capital levels. However, the commenter stated that if a uniform standard is not adopted, then the OCC should not require a bank to receive a consumer compliance rating (or any other single component rating) of at least 2 in order to meet the eligible bank standard for changes to its permanent capital through the expedited review process. The commenter recommended that the OCC instead employ a standard for eligibility that relates to the bank's capital levels.

The OCC disagrees with this commenter's recommendation. The OCC believes that a consistent definition of ''eligible bank'' is appropriate across part 5. Further, ''eligible bank'' status only results in expedited processing. Since a bank has to file an application regardless of whether it is an ''eligible bank,'' the suggested change does not reduce burden. Finally, the OCC believes that expedited treatment for a bank with a consumer compliance rating lower than 2 is not appropriate when considering a capital reduction. For the reasons discussed above, the OCC has not made any changes to the final rule in response to this comment and adopts the amendments to § 5.46 as proposed.

Subordinated Debt Issued by a National Bank (§ 5.47)

Section 5.47 describes the requirements applicable to a national bank's issuance of subordinated debt, including subordinated debt intended for inclusion in tier 2 capital. The OCC proposed numerous changes to this section. Specifically, the OCC proposed to add a new definition of ''subordinated debt document'' to § 5.47(c) to mean any document pertaining to an issuance of subordinated debt, and any renewal, extension, amendment, modification, or replacement thereof, including the subordinated debt note, and any global note, pricing supplement, note agreement, trust indenture, paying agent agreement, or underwriting agreement. The OCC also proposed conforming revisions throughout § 5.47 to better reflect this terminology. The OCC received one comment on this new definition stating that the definition of ''subordinated debt document'' is broad. The OCC disagrees with this comment because the ''subordinated debt document'' definition is intended to capture the scope of documents that could impact a bank's compliance with the OCC's regulatory requirements. Therefore, the OCC adopts this definition as proposed. This change clarifies that a national bank should submit with their applications all material documents needed for the OCC to review the application for compliance with its regulatory requirements. The OCC reviews ancillary securities

documents to ensure that they do not contain language that conflicts with required disclosures or statements made in the subordinated debt note. The OCC notes that this list of documents in the definition is illustrative and not exclusive. The final rule makes a conforming change in paragraph (c) to remove the proposed numbering of the definitions.

Paragraph (d)(3)(ii) contains a list of statements and descriptions that a national bank must clearly and accurately disclose in the subordinated debt note. The OCC proposed adding language to paragraph (d)(3)(ii)(C) to clarify that a national bank is only required to disclose the OCC's authority under 12 CFR 3.11 to limit certain distributions if the disclosure requirement is applicable to the subordinated debt issuance. The OCC received no comments on this new language and adopts it as proposed. Under the final rule, a national bank is only required to incorporate this disclosure language into a subordinated debt note if the issuing bank, or any successor institution to the issuing bank, would have discretion under the terms of the subordinated debt to permanently or temporarily suspend payments without triggering an event of default. The OCC believes that this amendment will provide flexibility and reduce burden by permitting national banks to omit the provisions when warranted.

The OCC also proposed to add a new paragraph (d)(3)(ii)(D) that would require a national bank to disclose in a subordinated debt note that the subordinated debt obligation may be fully subordinated to interests held by the U.S. government in the event that the national bank enters into a receivership, insolvency, liquidation, or similar proceeding. This proposed requirement mirrors the language in 12 CFR 3.20(d)(1)(xi), which requires advanced approaches banks to disclose this information in the governing agreement, offering circular, or prospectus of an instrument to be included in tier 2 capital. The proposal also made a conforming change to the paragraph (e) introductory text to remove the reference to advanced approaches national banks. The OCC received no comments on this new paragraph or the conforming change and adopts them as proposed. As stated in the preamble to the proposal, the OCC believes that disclosing this information to potential investors in subordinated debt is beneficial for all national banks, even those that are not advanced approaches banks or that do not intend to include the debt in tier 2 capital.

Paragraphs (f)(1)(ii) and (h) govern the procedures for a national bank to include subordinated debt in tier 2 capital. Currently, these provisions provide that a national bank may not include subordinated debt as tier 2 capital unless it has filed a notice with the OCC and received notification from the OCC that the subordinated debt qualifies as tier 2 capital. The OCC proposed to make these paragraphs consistent with the general usage in part 5 by changing the terminology from notice to application. The OCC also proposed clarifying changes to these paragraphs. The OCC received no comments on these changes and adopts then as proposed. The OCC does not intend these changes to be substantive.

Additionally, the OCC proposed to provide explicit regulatory authority for a national bank to seek approval to include subordinated debt as tier 2 capital before issuance of the subordinated debt in paragraphs (f)(1)(ii) and (h)(1). National banks routinely seek confirmation from the OCC that subordinated debt will qualify as tier 2 capital prior to issuance to mitigate the risk of issuing nonqualifying subordinated debt. This paragraph codifies this practice. Relatedly, the OCC proposed a conforming revision to paragraph (h)(2)(ii), which requires the application to include the amount and date of receipt of funds, to permit submission of the projected amount and date of receipt. The OCC also proposed to add a new paragraph (h)(2)(iii) requiring the application to include the interest rate or expected calculation method for the interest rate for the subordinated debt. This paragraph would assist the OCC in reviewing applications for inclusion of the subordinated debt in tier 2 capital. The OCC received no comments on these changes and adopts them as proposed. Under the final rule, and as with current practice, the OCC will not provide final approval that the subordinated debt qualifies as tier 2 capital until after the debt is issued and final pricing is available.

Paragraphs (f)(2)(ii) and (g)(1)(ii) require OCC approval for a national bank to prepay subordinated debt. The approval requirements for prepayment of subordinated debt include specific additional requirements for prepayment that is in the form of a call option. Specifically, a national bank seeking to prepay subordinated debt in the form of a call option is required to provide: (1) A statement explaining why the national bank believes that following the proposed prepayment the national bank would continue to hold an amount of capital commensurate with its risk; or (2) a description of the replacement capital instrument that meets the criteria for tier 1 or tier 2 capital under 12 CFR 3.20, including the amount of such instrument, and the time frame for issuance. As noted in the preamble to the proposed rule, the OCC has found that the distinction between prepayment and prepayment in the form of a call option is immaterial to OCC review, that the additional requirements are generally satisfied in most prepayment applications, and that the additional information is helpful for the OCC to determine the impact of the prepayment on the national bank's capital levels and safety and soundness. Accordingly, the OCC proposed having a single procedure for the prepayment of subordinated debt that would incorporate the requirements for prepayment in the form of a call option. The proposal contained a coordinating revision to paragraph (g)(2)(ii) regarding OCC approval. The OCC received no comments on these changes and adopts them as proposed.

Currently, § 5.47 does not explicitly require a national bank to make a filing with the OCC if the national bank makes a material change to its outstanding subordinated debt note or any related subordinated debt documents. The OCC proposed to add new paragraphs (f)(3) and (g)(1)(iii) to ensure that subordinated debt issuances remain compliant with OCC regulatory requirements, including the requirements for inclusion in tier 2 capital. These revisions would require OCC approval for a material change to an existing subordinated debt document if the bank would have been required to receive OCC approval to issue the security under paragraph (f)(1) or to include it in tier 2 capital under paragraph (h). An application to make a material change would include: (1) A description of the proposed changes; (2) a statement of whether the national bank is subject to or required to file a capital plan with the OCC, and if so, how the proposed change conforms to the capital plan; (3) a copy of the revised subordinated debt documents reflecting all proposed changes; and (4) a statement that the proposed changes to the subordinated debt documents comply with all applicable laws and regulations.

The OCC received one comment letter suggesting that the OCC not implement this OCC approval requirement for material changes to subordinated debt documents. The commenter stated that the ''material change'' standard is imprecise, the ''subordinated debt document'' definition is broad, and the overall requirement would increase

burden. The commenter also argued against tying the application requirements to the bank's consumer compliance rating, which is a component of whether a bank is an ''eligible bank'' under 12 CFR 5.3 and therefore subject to certain procedural requirements.

The OCC disagrees with this comment and is finalizing the OCC approval requirement for material changes as proposed. The OCC reviews subordinated debt documents for compliance with the OCC's licensing requirements at 12 CFR 5.47 and the OCC's capital component eligibility criteria at 12 CFR 3.20. The OCC reviews ancillary securities documents to ensure that they do not contradict the statements and disclosures made in the primary documents. As previously explained, the ''subordinated debt document'' definition is intended to capture the scope of documents that could impact a bank's compliance with the OCC's regulatory requirements.

The OCC uses the ''eligible bank'' criteria as a proxy for determining the appropriate level of review for subordinated debt issuance and prepayment actions. As discussed elsewhere in this *Supplementary Information,* the OCC believes that expedited treatment for a bank with a consumer compliance rating lower than 2 is not appropriate. Because the terms of a subordinated debt document govern the rights and obligations of the issuing bank throughout the lifetime of the security, the OCC's supervisory interest in reviewing subordinated debt documents for regulatory compliance extends past the security's date of issuance.

The commenter also requested, in the event the OCC finalized this provision as proposed, that the OCC confirm that approval would only be required in the event that the bank would have been required to receive approval to issue the security under 12 CFR 5.47(f)(1) or to include it in tier 2 capital under 12 CFR 5.47(h). In response, the OCC notes that a bank would only have to seek OCC approval of a change to a subordinated debt document if: (1) The change is material and (2) at the time of issuance of the security, the bank would have been required to receive OCC approval to issue the security under 12 CFR 5.47(f)(1) or to include it in tier 2 capital under 12 CFR 5.47(h). In response to the comment that the ''material change'' standard is imprecise, the OCC notes that it would not consider a change to a subordinated debt document to be material if it consists entirely of technical or administrative changes to the subordinated debt document, such as a change to a filing address or filing procedure. The OCC would consider a change to be material if it pertains to subjects covered by the OCC regulatory requirements at 12 CFR 3.20 and 12 CFR 5.47, such as pricing and maturity, rights and obligations of the lender and borrowers, and required regulatory disclosures.

Finally, the OCC proposed to make certain stylistic changes to the rule text of § 5.47 that are not intended to impact the substantive requirements applicable to national banks. The OCC received no comments on these changes and adopts them as proposed.

Change in Control of a National Bank or Federal Savings Association; Reporting of Stock Loans (§ 5.50)

Section 5.50 sets forth the procedures and standards for changes in control of national banks and Federal savings associations. Paragraph (d)(8) contains a definition of insured depository institution. However, that term is not used within § 5.50. Accordingly, the OCC proposed to replace that definition with the definition of ''depository institution,'' to mean a depository institution as defined in section 3(c)(1) of the FDI Act (12 U.S.C. 1813(c)(1)).

Paragraph (f)(3)(iv) states that an applicant may request a hearing by the OCC within 10 days of receipt of a notice disapproving a change in control and that following final agency action under 12 CFR part 19, further review by the courts is available. Paragraph (f)(6) provides that the OCC will notify the proposed acquiror in writing of a disapproval within three days and will indicate the basis of its disapproval. For clarity, the OCC proposed combining these provisions in a revised paragraph (f)(6). The OCC also proposed to add language stating that this disapproval notice will inform the filer of the availability of a hearing. Additionally, the OCC proposed a new paragraph (f)(6)(iii) specifying that if a filer fails to request a hearing with a timely request, the notice of disapproval constitutes a final and unappealable order. This language is currently included in 12 CFR 19.161 and the OCC stated in the preamble to the proposal that it believes the language also should be included in § 5.50 to put filers on notice of the implications of failure to request a hearing in a timely manner.

Finally, paragraph (g)(2)(i) provides procedures for the OCC's release of information related to a change in control notice, including publication of information in the OCC's Weekly Bulletin. The OCC proposed revising this provision to reflect the information that the OCC publishes in the Weekly Bulletin in practice, namely the date of filing, the disposition of the notice and date thereof, and the consummation date of the transaction, if applicable.

The OCC received no comments on these changes to § 5.50 and adopts them as proposed.

Changes in Directors and Senior Executive Officers of a National Bank or Federal Savings Association (§ 5.51)

Section 5.51 implements section 914 of the Financial Institutions Reform, Recovery, and Enforcement of 1989 (12 U.S.C. 1831i). Section 914 requires a national bank or Federal savings association to provide prior notice to the OCC of the proposed addition of any individual to the board of directors or the employment of any individual as a senior executive officer of a bank if, among other things, the bank is in troubled condition. Paragraph (c)(4) defines ''senior executive officer'' to mean the president, chief executive officer, chief operating officer, chief financial officer, chief lending officer, chief investment officer, and any other individual the OCC identifies in writing to the national bank or Federal savings association who exercises significant influence over, or participates in, major policy making decisions of the bank or savings association without regard to title, salary, or compensation. The term also includes employees of entities retained by a national bank or Federal savings association to perform functions in lieu of directly hiring the individuals, and the individual functioning as the chief managing official of the Federal branch of a foreign bank. The OCC proposed to add chief risk officer to the definition of senior executive officer given the increase in that role at many national banks and Federal savings associations. The OCC received no comments to this change and adopts it as proposed.

Paragraph (c)(7) provides the definition of ''troubled condition,'' which is one of the circumstances in which a national bank or Federal savings association is required to file a notice under § 5.51. Pursuant to paragraph (c)(7)(ii), this definition includes a national bank or Federal savings association that is subject to a cease and desist order, a consent order, or a formal written agreement, unless otherwise informed in writing by the OCC. The OCC proposed to amend paragraph (c)(7)(ii) to specify that the cease and desist order, consent order, or formal written agreement must require the bank or savings association to improve its financial condition for the institution to be considered in ''troubled condition'' solely as a result of the

enforcement action. The OCC expects to inform a bank in writing when an enforcement action does not require action to improve the financial condition of the bank. The OCC's general policy is not to apply troubled condition status to national banks or Federal savings associations solely as a result of cease and desist orders, consent orders, or formal written agreements that do not require improvement in the financial condition of the bank or savings association, such as enforcement actions that address certain compliance-related deficiencies that do not affect the financial condition of the bank or savings association. Typically, the OCC has noted in these actions that the bank or savings association is not in troubled condition as a result of the action. The proposal updated the definition of troubled condition in § 5.51 to align with the OCC's current supervisory practice. The OCC noted in the preamble to the proposal that this practice is consistent with that of the Federal Reserve Board and the FDIC, and the proposed revision would align the OCC's regulations with the Federal Reserve Board's and FDIC's regulations implementing section 914.[59] The OCC received a comment in response to this proposed amendment that strongly supported the revised definition of ''troubled condition.'' Therefore, the OCC finalizes this definition as proposed.

Capital Distributions by Federal Savings Associations (§ 5.55)

Section 5.55 provides standards and procedures for capital distributions made by Federal savings associations. Paragraph (d)(2) defines ''capital'' as total capital, computed under 12 CFR part 3. The OCC proposed to delete this definition as unnecessary because all references to ''capital'' are either in relation to the defined term ''capital distribution'' or contain an explicit reference to calculations under 12 CFR part 3. Additionally, the OCC proposed a new definition of ''control,'' to have the same meaning as in section 10(a)(2) of the HOLA (12 U.S.C. 1467a(a)(2)), and to use this term to describe control relationships, rather than the current use of the term ''subsidiary'' in § 5.55. The OCC did not receive any comments on these updated definitions and adopts them as proposed.

Current paragraph (e)(1) of § 5.55 requires a Federal savings association to file an application if it is not an eligible savings association. Current paragraphs (e)(2) and (g)(2) of § 5.55 require eligible savings associations to file a notice if certain requirements are met. Consistent with other changes in part 5, the OCC proposed to change the terminology for notice to application and to make corresponding changes throughout § 5.55. As a result, filings that are currently notices would be applications subject to expedited review. In addition, the OCC proposed to reorganize paragraphs (e) and (g) to clarify the procedures; however no substantive change is intended. The OCC also proposed additional stylistic revisions to current paragraph (e)(4) of § 5.55 to clarify that the notice mentioned in this paragraph is that of the notice filed with the Federal Reserve Board. The OCC did not receive any comments on these changes and adopts them as proposed with clarifying technical changes.

The OCC proposed a substantive change to the application procedures. Current paragraph (e)(1)(ii) requires a Federal savings association to file an application if the total amount of all its capital distributions (including the proposed capital distribution) for the applicable calendar year exceeds its net income for that year to date plus retained net income for the preceding two years. Under 12 CFR 5.64(c)(2), a national bank may calculate its dividends in excess of a single year's current net income by offsetting certain excess dividends against retained net income from each of the prior two years, with the potential to incorporate net income from up to four years prior to the current year when determining the maximum dividend payout possible without prior OCC approval. To provide additional flexibility, the OCC proposed to permit a Federal savings association to conduct this calculation when determining whether this application requirement applies. Specifically, if the capital distribution is from retained earnings, a Federal savings association would be able to calculate the aggregate limitation for a capital distribution in accordance with 12 CFR 5.64(c)(2), substituting ''capital distributions'' for ''dividends'' in that section. The OCC did not receive any comments on this change to the application procedures and adopts it as proposed with a confirming change to a citation.

Paragraph (f)(2) provides that the capital distribution application may include a schedule proposing capital distributions over a specified period, not to exceed 12 months. The OCC proposed to remove this 12-month limitation to allow a Federal savings association more flexibility for its distributions and to align this provision with the analogous national bank provision, 12 CFR 5.46(i)(1)(ii). The OCC did not receive any comments on the removal of this 12-month limitation and adopts it as proposed.

Additionally, the OCC proposed a new paragraph (g)(3) to clarify the appropriate OCC filing office for capital distribution applications and notices. In general, a Federal savings association would file with the appropriate OCC licensing office. However, the Federal savings association must submit the application to the appropriate OCC supervisory office if the application involves solely a cash dividend from retained earnings or involves a cash dividend from retained earnings and a concurrent cash distribution from permanent capital. The OCC did not receive any comments on this change, and the OCC adopts it as proposed.

Finally, the OCC proposed to reorganize paragraph (h), which addresses OCC review of an application, by providing separate paragraphs for OCC denials and approvals. As a result, paragraph (h)(1) would address OCC denials and include the majority of current paragraph (h) and paragraph (h)(2) would address OCC approvals. In doing so, the proposal clarified that the OCC may approve an application in whole or in part and that the OCC may waive any waivable prohibition or condition to permit a distribution. The proposal also changed the cross-reference in the current introductory text to the more appropriate paragraph (e)(1). The OCC did not receive any comments on these changes to paragraph (h) of § 5.55 and adopts them as proposed.

Inclusion of Subordinated Debt Securities and Mandatorily Redeemable Preferred Stock as Federal Savings Association Supplementary (Tier 2) Capital (§ 5.56)

Section 5.56 provides the requirements and procedures for a Federal savings association to include subordinated debt and mandatorily redeemable preferred stock (collectively, ''covered securities'') in tier 2 capital. Paragraph (b) provides the filing procedures, including the application and notice procedures. Under § 5.56, the OCC must approve an application or notice before a Federal savings association may include covered securities as tier 2 capital. As with § 5.47, the OCC proposed to make this process consistent with the general usage in part 5 by changing the terminology from notice to application where appropriate throughout § 5.56. The proposal also clarified that a savings association may not include covered securities in tier 2 capital until the OCC approves the application and

[59] *See* 12 CFR 225.71(d) (Board); 12 CFR 303.101(c) (FDIC).

the securities are issued. This change is not intended to be substantive.

Paragraph (b)(2) requires an application and prior approval from the OCC for a Federal savings association to prepay covered securities included in tier 2 capital. Similar to the national bank requirement in § 5.47, paragraphs (b)(2)(ii) and (h) of § 5.56 contain additional application requirements for OCC review of prepayments in the form of a call option. As provided in the discussion for § 5.47 in this *Supplemental Information,* and for the same reasons, the OCC proposed to incorporate the application requirements currently applicable to prepayment in the form of a call option to all prepayment applications. The OCC also proposed one additional technical change in § 5.56(b)(2) to replace a reference to ''a tier 1 or tier 2 instrument'' to refer to ''tier 1 or tier 2 capital.''

Paragraph (d)(1) contains disclosure requirements for covered securities. The OCC proposed to add a new paragraph (d)(1)(i)(H) to require the covered security to state that it may be fully subordinated to interests held by the U.S. government in the event that the savings association enters into a receivership, insolvency, liquidation, or similar proceeding. As discussed above regarding § 5.47, a Federal savings association that is an advanced approaches institution must make this disclosure under 12 CFR 3.20(d)(1)(xi). As stated in the preamble to the proposed rule, the OCC believes that disclosing this information to potential investors in the covered security is beneficial for all Federal savings associations, even those that are not advanced approaches Federal savings associations or that do not intend to include the debt in tier 2 capital.

In addition, the OCC proposed to replace the reference to 12 CFR part 197 in paragraphs (b)(1)(iii) and (d)(2)(i) of § 5.56 with 12 CFR part 16, which now applies to Federal savings associations. The OCC also proposed to make certain purely stylistic changes to the rule text of § 5.56 that are not intended to impact the substantive requirements applicable to Federal savings associations.

The OCC received no comments to any changes proposed to § 5.56 and adopts them as proposed. The final rule also makes a technical correction to the statutory reference to the definition of accredited investor in paragraph (d)(2)(ii).

Pass-Through Investments by a Federal Savings Association (§ 5.58)

Section 5.58 provides the licensing procedures for Federal savings associations making pass-through investments. Although based on different authority, § 5.58 is largely analogous to the provisions in § 5.36 governing national bank non-controlling investments. Accordingly, the OCC proposed amendments to § 5.58 similar to those proposed for § 5.36, and for the same reasons.

First, the OCC proposed to amend paragraph (d), Definitions, by defining ''pass-through investment'' as an investment authorized under 12 CFR 160.32(a). As discussed in this *Supplemental Information* for the proposed definition of ''non-controlling investment'' in § 5.36, the proposed definition for ''pass-through investment'' would exclude a Federal savings association holding interests in a trust formed for the purposes of securitizing assets held by the bank as part of its business or for the purposes of holding multiple legal titles of motor vehicles or equipment in conjunction with lease financing transactions. The OCC received no comments on the proposed definition of ''pass-through investment'' and adopts it as proposed.

The OCC also proposed to amend paragraph (d) by removing the definitions of ''well capitalized'' and ''well managed'' because the proposed rule defined these terms in § 5.3. The OCC received no comments on these changes and adopts them as proposed, with a technical change that removes unnecessary cross-references to § 5.3 in paragraph (e).

Second, the OCC proposed to expand the activities eligible for notice to include activities that are substantially the same as previously approved activities, as proposed to be defined in § 5.3. In making this change, the proposal reorganized paragraph (e) and made conforming changes to paragraphs (e)(2) and (e)(4). Additionally, the OCC stated in the preamble to the proposed rule that it is considering removing the filing requirement for pass-through investments in enterprises engaging in activities permissible for a Federal savings association, as discussed above for national bank operating subsidiaries and non-controlling investments. Under the alternative, the OCC would not remove the filing requirement if the enterprise would be a subsidiary of the Federal savings association for purposes of section 18(m) of the FDIA Act (12 U.S.C. 1828(m)), which generally requires a Federal savings association to provide 30-days prior notice to the OCC before establishing or acquiring a subsidiary defined in section 3(w)(4) of the FDI Act (12 U.S.C. 1813(w)(4)).

The OCC received no comments to the alternative proposal in § 5.58 directly, but did receive comments to the similar alternative proposal for operating subsidiaries, § 5.34, and noncontrolling investments of national banks, § 5.36. For the reasons noted in the discussion on § 5.34, Operating subsidiaries in this *Supplemental Information,* the OCC declines to include this alternative in the final rule.

Third, the OCC proposed to revise paragraph (f)(1) of § 5.58 to permit a Federal savings association to file an application to make a pass-through investment in an entity that does not agree to OCC supervision and examination. The proposal redesignated paragraph (f)(2) as paragraph (f)(3) and added a new paragraph (f)(2) providing for expedited review for certain applications. The qualifications for expedited review are equivalent to those in proposed § 5.36(f). The OCC received no direct responses to this proposal but as discussed in this *Supplemental Information* received one comment in support of the similar proposal for noncontrolling investments of national banks under § 5.36. The OCC adopts these proposed changes to § 5.58(f), with clarifying technical changes, for the same reasons discussed in the corresponding change to § 5.36. The final rule also makes conforming changes to redesignated paragraph (f)(3) to reflect that a Federal savings association may make a pass-through investment requiring a filing under 12 U.S.C. 1828(m) in an entity that has not agreed to OCC supervision and examination.

Fourth, the OCC proposed to add a new paragraph (g) that would permit a Federal savings association to make a pass-through investment without a notice or application to the OCC. The standards would be equivalent to those in proposed § 5.36(g) except that the enterprise must not be a subsidiary of the Federal savings association for purposes of section 18(m) of the FDI Act. In such a case, an application would be required under § 5.58(f)(2). The OCC received no comments on new paragraph (g) and adopts it as proposed. Additionally, the final rule corrects a cross-reference in redesignated paragraph (h)(1).

Finally, the OCC proposed to amend redesignated paragraph (j) to provide exceptions to the rules of general applicability in the same manner as proposed § 5.36(j). As with this amendment to § 5.36, the OCC has not removed the proposed exception to public availability, § 5.9, in the final rule. However, as with § 5.36, the OCC is adopting in the final rule the proposed provision that permits the OCC to determine that some or all of

these rules of general applicability apply if it concludes that the application presents significant or novel policy, supervisory, or legal issues, with the addition of § 5.9 to this sentence.

§ 5.59 Service Corporations of Federal Savings Associations.

Section 5.59 provides procedures governing OCC review and approval of filings by Federal savings associations to establish or acquire, or to conduct new activities in existing, service corporations pursuant to the authority provided in section 5(c)(4)(B) of the HOLA, 12 U.S.C. 1464(c)(4)(B). An application under this section is eligible for expedited review if, among other things, the Federal savings association is ''well capitalized'' and ''well managed.'' However, this section currently does not define ''well managed.'' The proposal applied the proposed definition of ''well managed'' in § 5.3 to this term as used in § 5.59. The final rule adopts this amendment as proposed, with one technical change that removes the cross-reference to § 5.3 in paragraph (h)(2)(ii)(A). As indicated elsewhere in this **SUPLEMENTARY INFORMATION**, because the definitions in § 5.3 apply to all of part 5, this cross-reference is not necessary.

Earnings Limitation Under 12 U.S.C. 60 (§ 5.64)

Section 5.64 describes the calculations for earnings available for dividends under 12 U.S.C. 60. Paragraph (d) provides special rules for what the OCC referred to as ''surplus surplus,'' which is an amount in capital surplus in excess of capital stock that the national bank can demonstrate came from earnings in prior periods. A national bank had been required to retain a certain percentage of net income as capital surplus whenever it paid dividends. In addition, a variety of statutes and regulations established limits for banks based on permanent capital, including capital surplus, and ignored any amounts in retained earnings, which provided an incentive for banks to shift earnings into permanent capital. After Congress revised the statutes to provide more flexibility to include retained earnings as capital for purposes of the statutory limits, the OCC permitted banks to distribute these surplus surplus funds as dividends rather than as reductions in permanent capital given the surplus surplus funds' origin as earnings rather than paid in capital. As these statutory and regulatory changes occurred decades ago, national banks have not needed to create new surplus surplus for many years but may still incur recordkeeping burden associated with identifying regulatory surplus surplus within capital surplus. Accordingly, the OCC proposed to remove the concept of surplus surplus and associated procedures described in paragraph (d). The OCC received no comments on these proposed changes and finalizes them as proposed. The OCC notes that removal of paragraph (d) will not prevent a bank from distributing amounts contained in the capital surplus accounts. A national bank may make an appropriate filing under 12 CFR 5.46 for a reduction in capital to distribute these funds.

Dividends Payable in Property Other Than Cash (§ 5.66)

Section 5.66 provides procedures for payment of dividends in non-cash property by national banks. This section currently provides that these dividends are equivalent to a cash dividend in an amount equal to the actual current value of the property, even if the bank previously has charged down or written off the property. Before the dividend is declared, the bank should show the excess of the actual value over book value on its books as a recovery and should declare the dividend in the amount of the full book value (equivalent to the actual current value) of the property being distributed. The OCC proposed to revise this section to clarify that the dividend is equivalent to a cash dividend in an amount equal to the actual current value of the property, regardless of whether the book value is higher or lower under GAAP. The OCC also proposed to apply this valuation methodology to all non-cash dividends, not just those for property that has been charged down or written off. Further, the amendment would provide that the bank should show the difference between the actual value and book value on its books as gain or loss, as applicable, prior to recording the non-cash dividend reflecting the actual value of the property. The OCC received no comments on these changes and adopts them as proposed. As stated in the preamble to the proposed rule, the OCC believes this approach better reflects the value of the property being distributed from the bank, particularly in cases where the non-cash property was recorded at historical cost under GAAP.

Fractional Shares (§ 5.67)

Section 5.67 provides a number of potential arrangements that a national bank may adopt to avoid the issuance of fractional shares. The OCC proposed to simplify this section for a national bank by retaining only one of these options, the remittance of the cash equivalent of the fraction not being issued to those to whom fractional shares would otherwise be issued. The OCC believes this procedure is the simplest and is the predominant method of disposing of fractional shares today. Other options in the current rule include issuing warrants for fractional shares or permitting shareholders to purchase additional fractions up to one whole share. While the OCC permitted these methods historically, these methods can create significant recordkeeping costs today when bank stock may be traded in ''round lots'' of 100 shares or more. The OCC received no comments on this change and adopts it as proposed. Because a transaction that would result in the issuance of fractional shares will generally require an application with the OCC, revised § 5.67 maintains flexibility for banks by permitting the bank to propose an alternate method in the application for the stock issuance, which could include one of the options being removed from the rule.

Federal Branches and Agencies (§ 5.70)

Section 5.70 provides the filing procedures for corporate activities and transactions involving Federal branches and agencies of foreign banks. Consistent with the background investigation changes proposed to other sections, the OCC proposed adding a new paragraph (d)(3) to explicitly permit the OCC to require any senior executive officer of a Federal branch or agency submitting a filing to submit an Interagency Biographical and Financial Report and legible fingerprints.

The OCC received no comments to this new paragraph and adopts it as proposed.

Additional Issues and General Comments

Digital and remote filings. One commenter encouraged the OCC to advance digital and remote filing procedures, such as digital signatures and virtual notarization. The OCC has already updated its licensing regulation to encourage the use of electronic filings, including permitting digital signatures in the OCC's Central Application Tracking System (CATS). Further, the OCC is unable to update to virtual notarization because notarization is governed by State law.

Public input. One commenter generally opposed the proposed changes for procedures outlining public input. The commenter further expressed that it is more difficult for community organizations to offer meaningful input under these proposed procedures, which limits the OCC's ability to determine whether an application

achieves a public benefit. The OCC disagrees with this comment. The OCC notes that ''public benefit'' is not a factor for any licensing filings, rather the OCC is seeking public comments that provide meaningful and substantive information about a bank's CRA performance. Only such comments can assist the OCC in its evaluation of a transaction.

CRA ratings. Generally, the OCC requires a rating of at least ''Satisfactory'' for approval of a filing. In response to the CRA ratings used in §§ 5.30, 5.31, 5.33, 5.40, one commenter suggested that a CRA rating of less than ''Satisfactory'' should not automatically preclude approval of a filing. The OCC is not adopting this commenter's recommendation. OCC policy provides that if an applicant bank has an overall less than ''Satisfactory'' rating, the OCC provides enhanced scrutiny of covered applications by the bank. Further, proposed § 5.33(e)(1)(iii)(A) makes clear that the CRA consideration is in conjunction with the other factors.

One commenter requested that the OCC codify the policies in PPM 5000–43 and Bulletin 2018–23 regarding CRA downgrades. The commenter also asserted that the OCC should allow expedited reexamination if a bank believes it has remediated a CRA concern. The OCC notes that this comment is outside the scope of this rulemaking.

Public comment period. One commenter questioned the proposed rule's compliance with the notice requirements of the APA noting that the Notice of Proposed Rulemaking was published on the OCC website on March 5, 2020, but not in the **Federal Register** until April 2, 2020, with the comment period ending May 4, 2020.[60] The commenter is incorrect about the requirements of the APA. The OCC notes that the APA does not provide a minimum comment period and that the generally recommended time for comment is 60 days.[61] Here, the public had notice of the proposal for 60 days beginning on March 5 when the OCC provided notice of the proposal on its website and issued a news release and OCC Bulletin on the proposal. Moreover, the proposal was published in the **Federal Register** for 32 days.[62]

General Technical Changes

The OCC proposed numerous technical changes throughout 12 CFR part 5. The OCC received no comments on these changes and adopts them as proposed, with additional conforming changes. Specifically, the final rule:

- Replaces the word ''shall'' with ''must,'' ''will,'' or other appropriate language, which is the more current rule writing convention for imposing an obligation and is the recommended drafting style of the **Federal Register**;
- Generally replaces the term ''notice'' with the term ''application'' where prior OCC approval is required, thereby conforming the terminology to the licensing action provided in the provision (notices would continue to include informational filings to the OCC as well as certain transactions that the OCC has the power to disapprove, such as changes in control);
- Amends the expedited review provisions throughout part 5 to refer to the OCC removing a filing from expedited review rather than making a determination that the filing is not eligible for expedited review to accord with the language and procedure in § 5.13(a)(2).
- Revises citations to the U.S. Code and the Code of Federal Regulations by adjusting cross-references, making citations more specific, and using consistent style;
- Updates and standardizes references to the OCC website;
- Simplifies gender references by replacing ''his or her'' with the neutral ''their;''
- Uniformly capitalizes the word ''State,'' in conformance with **Federal Register** drafting style; and
- Replaces the terms ''bank'' and ''savings association'' with ''national bank'' or ''Federal savings association,'' respectively, where appropriate.

The OCC also is adopting in this final rule additional corrections to cross-references and citations throughout part 5. Further, the OCC is adopting technical changes that update the cross-reference to the § 5.3 definition of ''eligible bank'' in 12 CFR 3.701(f)(1)(vi) and the cross-reference to the § 5.3 definition of ''appropriate OCC licensing office'' in 12 CFR 7.2008(c).

III. Regulatory Analyses

A. Paperwork Reduction Act

Paperwork Reduction Act

Certain provisions of the proposed rulemaking contain ''collection of information'' requirements within the meaning of the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3521). In accordance with the requirements of the PRA, the OCC may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number.

The OCC reviewed the final rule and determined that it revises certain information collection requirements previously cleared by OMB under OMB Control No. 1557–0014. The OCC submitted the information collection requirements at the proposed rule stage. OMB neither approved nor disapproved the submission, requiring OCC to resubmit the collection at the final rule stage. Therefore, the OCC has submitted the revised information collection to OMB for review under section 3507(d) of the PRA (44 U.S.C. 3507(d)) and section 1320.11 of the OMB's implementing regulations (5 CFR 1320).

Current Actions

The final rule:

- Adds new definitions to add clarity and consistency across part 5. This includes proposing a single definition *well managed* applicable throughout part 5. 12 CFR 5.3.
- Requires each proposed organizer, director, executive officer, or principal shareholder to submit information prescribed in the Interagency Biographical and Financial Report and legible fingerprints. This amendment merely codifies current application requirements and will not result in a change in burden. 12 CFR 5.20.
- Eliminates the bylaw amendment notice requirement for Federal savings associations that adopt without change the OCC's model or optional bylaws set forth in the rule. 12 CFR 5.21, 5.22.
- Requires that applications to convert to a Federal savings association or national bank include: A list of directors and senior executive officers of the converting institution; and a list of individuals, directors, and shareholders who directly or indirectly, or acting in concert with one or more persons or companies, or together with members of their immediate family, do or will own, control, or hold 10 percent or more of the converting institution's stock. This amendment merely codifies current

[60] This commenter also objected to the OCC issuing the rulemaking during the COVID–19 pandemic. However, the OCC believes that it is important to move forward with updating its rules so that national banks and Federal savings associations can better address current economic issues. Furthermore the pandemic should not prevent the OCC from meeting its obligations to provide oversight and ensure the safety and soundness of OCC regulated banks and the Federal banking system.

[61] *See* E.O. 12866, section 6(a).

[62] The OCC, as well as the FDIC and Federal Reserve Board, have published other rules in the **Federal Register** for only 30 days. *See e.g.,* 84 FR 9940 (Mar. 19, 2019), 84 FR 24296 (May 24, 2019), and 84 FR 59970 (Nov. 7, 2019).

application requirements and will not result in a change in burden. 12 CFR 5.23(d)(2)(ii), 5.24(e)(2).

• Permits the OCC to require directors and senior executive officers of a converting institution to submit the Interagency Biographical and Financial Report and legible fingerprints. This amendment merely codifies current application requirements and will not result in a change in burden. 12 CFR 5.23, 5.24.

• Requires that applications for national banks or Federal savings associations that wish to engage in the exercise of fiduciary powers include, if requested by the OCC, the Interagency Biographical and Financial Report and legible fingerprints. 12 CFR 5.26.

• Requires a filer of a business combination application under CRA to disclose whether it has entered into and disclosed a covered agreement, as defined in 12 CFR 35.2. A filer must also provide summaries of, or documents related to, all substantive discussions with respect to the development of the content of a CRA sunshine agreement. 12 CFR 5.33(e)(1)(iii).

• Removes the requirement that a disappearing national bank or Federal savings association consolidating or merging with another OCC-supervised institution provide a notice to the OCC. § 5.33(g), (k).

• For national bank operating subsidiaries, expands the after the fact notice for national banks to activities that are substantially the same as previously approved activities that will be conducted in accordance with the same terms and conditions applicable to the previously approved activity. Expands the list of eligible entities to include trusts provided that the bank or operating subsidiary has the ability to replace the trustee at will and be the sole beneficial owner of the trust. 12 CFR 5.34.

• Removes the requirement for a national bank to file an annual report identifying its operating subsidiaries that do business directly with consumers and are not functionally regulated. 12 CFR 5.34.

• For national bank non-controlling investments and Federal savings association pass-through investments, expands the activities eligible for notice to activities that are substantially the same as previously approved activities. 12 CFR 5.36, 5.58.

• Allows national banks and Federal savings associations to file an application to make a non-controlling investment or a pass-through investment, respectively, in an enterprise that has not agreed to be subject to OCC supervision and examination. 12 CFR 5.36(f), 5.58(f).

• Allows national banks and Federal savings associations to make non-controlling investments or a pass-through investments, respectively, without a filing if the activities of the enterprise are limited to those previously reported to the OCC in connection with a prior investment. 12 CFR 5.36, 5.58.

• For Federal savings association operating subsidiaries, expands the expedited approval process for Federal savings associations to include activities that are substantially the same as previously approved activities that will be conducted in accordance with the same terms and conditions applicable to the previously approved activity. Expands the list of eligible entities to include trusts provided that the Federal savings association or operating subsidiary has the ability to replace the trustee at will and be the sole beneficial owner of the trust. 12 CFR 5.38.

• Permits national banks to request approval for a reduction in permanent capital for multiple quarters. 12 CFR 5.46.

• Regarding subordinated debt notes, allows national banks to omit inapplicable provisions when warranted, and require national banks to disclose in subordinated debt notes that the subordinated debt obligation may be fully subordinated to interests held by the U.S. government in the event that the national bank enters into a receivership, insolvency, liquidation, or similar proceeding. 12 CFR 5.47.

• Revises the standard for when prior approval is required for a national bank's issuance of subordinated debt and for prepayment of any subordinated debt that is not included in tier 2 capital 12 CFR 5.47(f).

• Requires OCC approval for a material change to an existing subordinated debt document if the national bank would have been required to receive OCC approval to issue the security under § 5.47(f)(1) or to include it in tier 2 capital under § 5.47(h). 12 CFR 5.47.

• Adds the position of *chief risk officer* to the definition of senior executive officer. This change requires prior OCC approval for the employment of an individual as a chief risk officer by a national bank or Federal savings association in troubled condition. 12 CFR 5.51.

• Requires a covered security (inclusion of subordinated debt and mandatorily redeemable preferred stock) issued by a Federal savings association to state that it may be fully subordinated to interests held by the U.S. government in the event that the savings association enters into a receivership, insolvency, liquidation, or similar proceeding. 12 CFR 5.56.

• Permits the OCC to require any senior executive officer of a Federal branch or agency submitting a filing to submit an Interagency Biographical and Financial Report and legible fingerprints. This amendment merely codifies current application requirements and will not result in a change in burden. 12 CFR 5.70.

Title of Information Collection: Licensing Manual.

Frequency: Event generated.

Affected Public: Businesses or other for-profit.

Estimated number of respondents: 3,698.

Total estimated annual burden: 12,981 hours.

Comments are invited on:

a. Whether the collections of information are necessary for the proper performance of the agencies' functions, including whether the information has practical utility;

b. The accuracy or the estimate of the burden of the information collections, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of the information collections on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

All comments will become a matter of public record. Comments on aspects of this notice that may affect reporting, recordkeeping, or disclosure requirements and burden estimates should be sent to the addresses listed in the **ADDRESSES** section of this document. A copy of the comments may also be submitted to the OMB desk officer by mail to U.S. Office of Management and Budget, 725 17th Street NW, #10235, Washington, DC 20503; facsimile to (202) 395–6974; or email to *oira_submission@omb.eop.gov,* Attention, Federal Banking Agency Desk Officer.

B. Regulatory Flexibility Act Analysis

In general, the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires an agency, in connection with a final rule, to prepare a Regulatory Flexibility Analysis describing the impact of the rule on small entities (defined by the SBA for purposes of the RFA to include commercial banks and savings

institutions with total assets of $600 million or less and trust companies with total revenue of $41.5 million or less). However, under section 605(b) of the RFA, this analysis is not required if an agency certifies that the rule would not have a significant economic impact on a substantial number of small entities and publishes its certification and a short explanatory statement in the **Federal Register** along with its rule.

The OCC currently supervises approximately 1,163 institutions (commercial banks, trust companies, Federal savings associations, and branches or agencies of foreign banks, collectively banks), of which 745 are small entities.[63] To measure whether a rule will have a ''significant economic impact,'' the OCC focuses on the potential costs of the rule to OCC-supervised small entities, consistent with guidance on the RFA published by the Office of Advocacy of the Small Business Administration.[64] Because the rule applies to all OCC-supervised depository institutions, the final rule would affect all small OCC-supervised entities, and thus a substantial number of them.

The OCC classifies the economic impact of total costs on an OCC-regulated entity as significant if the total costs for the entity in a single year are greater than 5 percent of total salaries and benefits, or greater than 2.5 percent of total non-interest expense. The OCC estimates that the monetized direct cost of this rulemaking will range from a low of approximately $4,600 per bank (40 hours × $115 per hour[65]) to a high of approximately $18,400 per bank (160 hours × $115 per hour).[66] Using the upper bound average direct cost per bank, the OCC finds the compliance costs will have a significant economic impact on no more than 18 small banks, which is not a substantial number.[67] Therefore, the OCC finds that this final rule does not have a significant economic impact on a substantial number of small entities supervised by the OCC. Accordingly, a Regulatory Flexibility Analysis is not required.

C. Unfunded Mandates Reform Act of 1995

The OCC has analyzed the final rule under the factors in the Unfunded Mandates Reform Act of 1995 (UMRA) (2 U.S.C. 1501 *et seq.*). Under this analysis, the OCC considered whether the final rule includes a Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year, adjusted annually for inflation (currently $157 million). The UMRA does not apply to regulations that incorporate requirements specifically set forth in law.

Based on the OCC estimate that the monetized direct cost of this rulemaking would range from a low of approximately $4,600 per bank to a high of approximately $18,400 per bank, the OCC's overall estimate of the total effect of the final rule ranges from approximately $5.4 million to approximately $21.4 million for the approximately 1,163 institutions supervised by the OCC. Therefore, the OCC finds that the final rule does not trigger the UMRA cost threshold. Accordingly, the OCC has not prepared the written statement described in section 202 of the UMRA.

D. Riegle Community Development and Regulatory Improvement Act of 1994

Pursuant to section 302(a) of the Riegle Community Development and Regulatory Improvement Act of 1994 (RCDRIA) (12 U.S.C. 4802(a)), in determining the effective date and administrative compliance requirements for new regulations that impose additional reporting, disclosure, or other requirements on insured depository institutions, the OCC must consider, consistent with the principles of safety and soundness and the public interest: (1) Any administrative burdens that the rule would place on depository institutions, including small depository institutions and customers of depository institutions; and (2) the benefits of the rule. The has considered the changes made by this final rule and believes that the overall effective date of January 11, 2021 will provide OCC-regulated institutions with adequate time to comply with the rule.[68] With respect to administrative compliance requirements, the OCC has considered the administrative burdens and the benefits of this final rule and believes that any burdens are necessary for safety and soundness and proper OCC supervision. The final rule's benefits include increased flexibility for filing procedures, elimination of redundant or unnecessary reporting requirements consistent with safety and soundness, and updated policies and procedures that increase clarity and reduce ambiguity for banks seeking compliance with 12 CFR part 5 requirements. Further discussion of the consideration by the OCC of these administrative compliance requirements is found in other sections of the final rule's **SUPPLEMENTARY INFORMATION** section.

E. Effective Date

The APA[69] requires that a substantive rule must be published not less than 30 days before its effective date, except for: (1) Substantive rules which grant or recognize an exemption or relieve a restriction; (2) interpretative rules and statements of policy; or (3) as otherwise provided by the agency for good cause.[70] The January 11, 2021 effective date of this final rule for all but one of its amendments meets the APA effective date requirements, as it will take effect at least 30 days after its publication date of December 11, 2020. One technical amendment takes effect on December 11, 2020. This amendment removes the reference to 12 CFR part 195, the Federal savings association CRA rule, in § 5.20(e)(2)(ii) because the OCC recently amended 12 CFR part 25 to include Federal savings associations and removed 12 CFR part 195 as of October 1, 2020.[71] Because this is a technical amendment that aligns § 5.20(e)(2)(ii) with revised part 25, the OCC believes

[63] The OCC bases its estimate of the number of small entities on the SBA's size thresholds for commercial banks and savings institutions, and trust companies, which are $600 million and $41.5 million, respectively. Consistent with the General Principles of Affiliation 13 CFR 121.103(a), the OCC counts the assets of affiliated financial institutions when determining if it should classify an institution as a small entity. The OCC used December 31, 2019, to determine size because a ''financial institution's assets are determined by averaging the assets reported on its four quarterly financial statements for the preceding year.'' *See* footnote 8 of the U.S. Small Business Administration's *Table of Standards.*

[64] *See,* ''A Guide for Government Agencies; How to Comply with the Regulatory Flexibility Act,'' (pp. 18–20), *available at: https://www.sba.gov/sites/default/files/advocacy/How-to-Comply-with-the-RFA-WEB.pdf.*

[65] This per hour dollar amount is based on the U.S. Bureau of Labor Statistics data for wages (by industry and occupation).

[66] The OCC believes that substantially all of banks' direct costs will be associated with reviewing the final rule and, when necessary, modifying policies and procedures to correct any inconsistencies between banks' internal policies and the final modified rules. The overall impact estimate of the final rule is a conservative one because it is difficult to monetize the potential offsetting benefits associated with the final changes. Benefits from these changes will accrue over the long-term and are therefore more difficult to monetize for purposes of this estimate.

[67] The OCC's threshold for a substantial number of small entities is five percent of OCC-supervised small entities, or 37 as of December 31, 2019.

[68] The OCC is making one technical change that takes effect on December 11, 2020. This amendment removes the reference to 12 CFR part 195, the Federal savings association CRA rule, in § 5.20(e)(2)(ii) because the OCC recently amended 12 CFR part 25 to include Federal savings associations and removed 12 CFR part 195 as of this date.

[69] Codified at 5 U.S.C. 551 *et seq.*

[70] 5 U.S.C. 553(d).

[71] *See* 85 CFR 34734 (June 5, 2020).

it has good cause to issue this rule without a delayed effective date.

Pursuant to section 553(b)(B) of the APA, general notice and the opportunity for public comment are not required with respect to a rulemaking when an ''agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.'' [72] As described in the final rule's **SUPPLEMENTARY INFORMATION** section, the final rule includes a number of technical, clarifying, or conforming amendments that the OCC did not include in its proposed rule. Because these amendments are not substantive and merely correct or clarify the rule, update the rule to reflect current law, or fix citation and regulatory text format, the OCC believes that public notice of these changes is unnecessary and therefore that it has good cause to adopt these changes without notice and comment.

F. Congressional Review Act

For purposes of the Congressional Review Act, the Office of Management and Budget (OMB) makes a determination as to whether a final rule constitutes a ''major rule.'' [73] If a rule is deemed a ''major rule'' by OMB, the Congressional Review Act generally provides that the rule may not take effect until at least 60 days following its publication.[74]

The Congressional Review Act defines a ''major rule'' as any rule that the Administrator of the Office of Information and Regulatory Affairs of the OMB finds has resulted in or is likely to result in: (1) An annual effect on the economy of $100,000,000 or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) a significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets.[75]

OMB has determined that this final rule is not a major rule. As required by the Congressional Review Act, the OCC will submit the final rule and other appropriate reports to Congress and the Government Accountability Office for review.

[72] 5 U.S.C. 553(b)(3)(A).

[73] 5 U.S.C. 801 *et seq.*

[74] 5 U.S.C. 801(a)(3).

[75] 5 U.S.C. 804(2).

List of Subjects

12 CFR Part 3

Administrative practice and procedure, Capital, National banks, Federal savings associations, Risk.

12 CFR Part 5

Administrative practice and procedure, Federal savings associations, National banks, Reporting and recordkeeping requirements, Securities.

12 CFR Part 7

Computer technology, Credit, Derivatives, Federal savings associations, Insurance, Investments, Metals, National banks, Reporting and recordkeeping requirements, Securities, Security bonds.

For the reasons set out in the preamble, the OCC proposes to amend 12 CFR chapter I as follows:

PART 3—CAPITAL ADEQUACY STANDARDS

■ 1. The authority citation for part 3 continues to read as follows:

Authority: 12 U.S.C. 93a, 161, 1462, 1462a, 1463, 1464, 1818, 1828(n), 1828 note, 1831n note, 1835, 3907, 3909, 5412(b)(2)(B), and Pub. L. 116–136, 134 Stat. 281.134 Stat. 281.

§ 3.701 [Amended]

■ 2. Amend § 3.701(f)(1)(vi) by removing the phrase ''12 CFR 5.3(g)'' and adding in its place the phrase ''12 CFR 5.3''.

PART 5—RULES, POLICIES, AND PROCEDURES FOR CORPORATE ACTIVITIES

■ 3. The authority citation for part 5 is revised to read as follows:

Authority: 12 U.S.C. 1 *et seq.,* 24a, 35, 93a, 214a, 215, 215a, 215a–1, 215a–2, 215a–3, 215c, 371d, 481, 1462a, 1463, 1464, 1817(j), 1831i, 1831u, 2901 *et seq.,* 3101 *et seq.,* 3907, and 5412(b)(2)(B).

§ 5.2 [Amended]

■ 4. Amend § 5.2 by:

■ a. In paragraph (b), removing the word ''filings,'' and adding in its place the phrase ''filings as it deems necessary, for example,'' and removing the word ''applicant'' and adding in its place the word ''filer''; and

■ b. In paragraph (c), removing the phrase ''on the OCC's Internet Web page''.

■ 5. Revise § 5.3 to read as follows.

§ 5.3 Definitions.

As used in this part:

Application means a submission requesting OCC approval to engage in various corporate activities and transactions.

Appropriate Federal banking agency has the meaning set forth in section 3(q) of the Federal Deposit Insurance Act, 12 U.S.C. 1813(q).

Appropriate OCC licensing office means the OCC office that is responsible for processing applications or notices to engage in various corporate activities or transactions, as described at *www.occ.gov.*

Appropriate OCC supervisory office means the OCC office that is responsible for the supervision of a national bank or Federal savings association, as described in subpart A of 12 CFR part 4.

Capital and surplus means:

(1) For qualifying community banking organizations that have elected to use the community bank leverage ratio framework, as set forth under the OCC's Capital Adequacy Standards at part 3 of this chapter:

(i) A qualifying community banking organization's tier 1 capital, as used under § 3.12 of this chapter; plus

(ii) A qualifying community banking organization's allowance for loan and lease losses or adjusted allowances for credit losses, as applicable, as reported in the national bank's or Federal savings association's Consolidated Report of Condition and Income (Call Report); or

(2) For all other national banks and Federal savings associations:

(i) A national bank's or Federal savings association's tier 1 and tier 2 capital calculated under the OCC's risk-based capital standards set forth in part 3 of this chapter, as applicable, as reported in the Call Report, respectively; plus

(ii) The balance of the national bank's or Federal savings association's allowance for loan and lease losses or adjusted allowances for credit losses, as applicable, not included in the institution's tier 2 capital, for purposes of the calculation of risk-based capital described in paragraph (2)(i) of this definition, as reported in the Call Report.

Depository institution means any bank or savings association.

Eligible bank or eligible savings association means a national bank or Federal savings association that:

(1) Is well capitalized under § 5.3;

(2) Has a composite rating of 1 or 2 under the Uniform Financial Institutions Rating System (CAMELS);

(3) Has a Community Reinvestment Act (CRA), 12 U.S.C. 2901 *et seq.,* rating of ''Outstanding'' or ''Satisfactory,'' if applicable;

(4) Has a consumer compliance rating of 1 or 2 under the Uniform Interagency

Consumer Compliance Rating System; and

(5) Is not subject to a cease and desist order, consent order, formal written agreement, or Prompt Corrective Action directive (*see* 12 CFR part 6, subpart B) or, if subject to any such order, agreement, or directive, is informed in writing by the OCC that the bank or savings association may be treated as an ''eligible bank or eligible savings association'' for purposes of this part.

Eligible depository institution means:

(1) With respect to a national bank, a State bank or a Federal or State savings association that meets the criteria for an ''eligible bank or eligible savings association'' under § 5.3 and is FDIC-insured; and

(2) With respect to a Federal savings association, a State or national bank or a State savings association that meets the criteria for an ''eligible bank or eligible savings association'' under § 5.3 and is FDIC-insured.

FDIC means the Federal Deposit Insurance Corporation.

Filer means a person or entity that submits a notice or application to the OCC under this part.

Filing means an application or notice submitted to the OCC under this part.

GAAP means generally accepted accounting principles as used in the United States.

MSA means metropolitan statistical area as defined by the Director of the Office of Management and Budget.

Nonconforming assets and nonconforming activities mean assets or activities, respectively, that are impermissible for national banks or Federal savings associations to hold or conduct, as applicable, or, if permissible, are held or conducted in a manner that exceeds limits applicable to national banks or Federal savings associations, as applicable. Assets include investments in subsidiaries or other entities.

Notice, in general, means a submission notifying the OCC that a national bank or Federal savings association intends to engage in or has commenced certain corporate activities or transactions. The specific meaning of *notice* depends on the context of the rule in which it is used and may provide the OCC with authority to disapprove the notice or may be informational requiring no official OCC action.

OTS means the former Office of Thrift Supervision.

Previously approved activity means:

(1) In the case of a national bank, any activity approved in published OCC precedent for a national bank, an operating subsidiary of a national bank, or a non-controlling investment of a national bank; and

(2) In the case of a Federal savings association, any activity approved in published OCC or OTS precedent for a Federal savings association, an operating subsidiary of a Federal savings association, or a pass-through investment of a Federal savings association.

Principal city means an area designated as a ''principal city'' by the Office of Management and Budget.

Short-distance relocation means moving the premises of a branch or main office of a national bank or a branch or home office of a Federal savings association within a:

(1) One thousand foot-radius of the site if the branch, main office, or home office is located within a principal city of an MSA;

(2) One-mile radius of the site if the branch, main office, or home office is not located within a principal city, but is located within an MSA; or

(3) Two-mile radius of the site if the branch, main office, or home office is not located within an MSA.

Well capitalized means:

(1) In the case of a national bank or Federal savings association, the capital level described in 12 CFR 6.4(b)(1);

(2) In the case of a Federal branch or agency, the capital level described in 12 CFR 4.7(b)(1)(iii); or

(3) In the case of another depository institution, the capital level designated as ''well capitalized'' by the institution's appropriate Federal banking agency pursuant to section 38 of the Federal Deposit Insurance Act (12 U.S.C. 1831*o*).

Well managed means:

(1) In the case of a national bank or Federal savings association:

(i) Unless otherwise determined in writing by the OCC, the national bank or Federal savings association has received a composite rating of 1 or 2 under the Uniform Financial Institutions Rating System in connection with its most recent examination, and at least a rating of 2 for management, if such a rating is given; or

(ii) In the case of a national bank or Federal savings association that has not been examined by the OCC, the existence and use of managerial resources that the OCC determines are satisfactory.

(2) In the case of a Federal branch or agency of a foreign bank:

(i) Unless determined otherwise in writing by the OCC, the Federal branch or agency has received a composite ROCA supervisory rating (which rates risk management, operational controls, compliance, and asset quality) of 1 or 2 at its most recent examination, and at least a rating of 2 for risk management, if such a rating is given; or

(ii) In the case of a Federal branch or agency that has not been examined by the OCC, the existence and use of managerial resources that the OCC determines are satisfactory.

(3) In the case of another depository institution:

(i) Unless otherwise determined in writing by the appropriate Federal banking agency, the institution has received a composite rating of 1 or 2 under the Uniform Financial Institutions Rating System (or an equivalent rating under an equivalent rating system) in connection with the most recent examination or subsequent review of the depository institution and, at least a rating of 2 for management, if such a rating is given; or

(ii) In the case of another depository institution that has not been examined by its appropriate Federal banking agency, the existence and use of managerial resources that the appropriate Federal banking agency determines are satisfactory.

■ 6. Amend § 5.4 by:

■ a. In paragraph (a), removing the word ''shall'' and adding in its place the word ''must'';

■ b. In paragraph (b), removing the phrase ''on the OCC's Internet Web page'';

■ c. In paragraph (c), removing the word ''applicant'' wherever it appears and adding in its place the word ''filer'';

■ d. In paragraph (d):

■ i. Removing the phrases ''An applicant'' and ''an applicant'' and adding in their place the phrases ''A filer'' and ''a filer'', respectively; and

■ ii. Removing the phrase ''the OCC's Internet Web page at'';

■ e. In paragraph (e), removing the phrase ''An applicant'' and adding in its place the phrase ''A filer'';

■ f. Revising paragraph (f); and

■ g. Adding paragraph (g).

The addition and revision read as follows:

§ 5.4 Filing required.

* * * * *

(f) *Prefiling meeting.* Before submitting a filing to the OCC, a potential filer is encouraged to contact the appropriate OCC licensing office to determine the need for a prefiling meeting. The OCC decides whether to require a prefiling meeting on a case-by-case basis. Submission of a draft business plan or other relevant information before any prefiling meeting may expedite the filing review process. A potential filer considering a novel,

complex, or unique proposal is encouraged to contact the appropriate OCC licensing office to schedule a prefiling meeting early in the development of its proposal for the early identification and consideration of policy issues. Information on model business plans can be found in the Comptroller's Licensing Manual.

(g) *Certification.* A filer must certify that any filing or supporting material submitted to the OCC contains no material misrepresentations or omissions. The OCC may review and verify any information filed in connection with a notice or an application. Any person responsible for any material misrepresentation or omission in a filing or supporting materials may be subject to enforcement action and other penalties, including criminal penalties provided in 18 U.S.C. 1001.

■ 7. Amend § 5.5 by revising paragraph (a) to read as follows:

§ 5.5 Filing fees.

(a) *Procedure.* A filer must submit the appropriate filing fee, if any, in connection with its filing. Filing fees must be paid by check payable to the OCC or by other means acceptable to the OCC. Additional information on filing fees, including where to file, can be found in the Comptroller's Licensing Manual. The OCC generally does not refund the filing fees.

* * * * *

■ 8. Amend § 5.7 by redesignating paragraph (b) as paragraph (c) and adding a new paragraph (b) to read as follows:

§ 5.7 Investigations.

* * * * *

(b) *Fingerprints.* For certain filings, the OCC collects fingerprints for submission to the Federal Bureau of Investigation for a national criminal history background check.

* * * * *

§ 5.8 [Amended]

■ 9. Amend § 5.8 by:

■ a. In paragraph (a), removing the phrase ''An applicant shall publish'' and adding in its place the phrase ''A filer must publish'' and removing the phrase ''the applicant proposes'' and adding in its place the phrase ''the filer proposes'';

■ b. In paragraphs (a) and (b), removing the word ''shall'' and adding in its place the word ''must'';

■ c. In paragraphs (b) and (g)(1), removing the word ''applicant'' and adding in its place the word ''filer'';

■ d. In paragraphs (c) and (d), removing the phrase ''applicant shall'' and adding in its place the phrase ''filer must''; and

■ e. In paragraphs (e) and (g) introductory text, removing the phrase ''an applicant'' and adding in its place the phrase ''a filer''.

§ 5.9 [Amended]

■ 10. Amend § 5.9 by:

■ a. In paragraph (b), in the second sentence, removing the word ''Applicants'' and adding in its place the word ''Filers''; and

■ b. In paragraph (c), in the first sentence, removing the word ''applicant'' and adding in its place the word ''filer''.

§ 5.10 [Amended]

■ 11. Amend § 5.10 by:

■ a. In paragraphs (b)(2)(i) and (b)(3), removing the word ''applicant'' and adding in its place the word ''filer'';

■ b. In paragraph (b)(2)(ii), removing the word ''application'' and adding in its place the word ''filing''; and

■ c. In paragraph (b)(3), revising the paragraph heading by removing the word ''*Applicant*'' and adding in its place the word ''*Filer*''.

§ 5.11 [Amended]

■ 12. Amend § 5.11 by:

■ a. In paragraphs (a), (e), and (g)(2), removing the word ''shall'' wherever it appears and adding in its place the word ''must'';

■ b. In paragraphs (a), (d)(1), (e), (g)(1), and (g)(2), removing the word ''applicant'' and adding in its place the word ''filer'';

■ c. In paragraph (c), removing the word ''shall'' and adding in its place the word ''will'';

■ d. In paragraphs (e) and (f), removing the phrase ''his or her'' and adding in its place the word ''their'';

■ e. In paragraph (h), removing the word ''applicant's'' and adding in its place the word ''filer's''; and

■ f. In paragraph (i)(1) removing the phrase ''an application'' and adding in its place the phrase ''a filing'' and removing the phrase ''the application'' and adding in its place the phrase ''the filing''; and

■ g. In paragraph (i)(2), removing the phrase ''an applicant'' and adding in its place the phrase ''a filer''.

§ 5.12 [Amended]

■ 13. Amend § 5.12 by removing the phrase ''an application'' and adding in its place the phrase ''a filing''.

■ 14. Amend § 5.13 by:

■ a. In paragraphs (a) introductory text and (b)(1), (d), and (g), removing the phrase ''the applicant'' wherever it appears and adding in its place the phrase ''the filer'';

■ b. Revising paragraph (a)(2);

■ c. In paragraph (b)(3), removing the phrase ''The applicant'' and adding in its place the phrase ''The filer'';

■ d. In paragraph (c), removing the phrase ''an applicant'' and adding in its place the phrase ''a filer'';

■ e. In paragraph (f), removing the phrase ''An applicant'' and adding in its place the phrase ''A filer'';

■ f. In paragraph (g), removing the word ''applicant's'' and adding in its place the word filer's'';

■ g. Revising paragraph (h); and

■ h. Adding paragraph (i).

The revisions and addition read as follows:

§ 5.13 Decisions.

(a) * * *

(2) *Expedited review.* The OCC grants qualifying national banks and Federal savings associations expedited review within a specified time after filing or commencement of the public comment period for certain filings.

(i) The OCC may extend the expedited review period or remove a filing from expedited review procedures if it concludes that the filing, or an adverse comment regarding the filing, presents a significant supervisory, CRA (if applicable), or compliance concern or raises a significant legal or policy issue requiring additional OCC review. The OCC will provide the filer with a written explanation if it decides not to process an application from a qualifying national bank or Federal savings association under expedited review pursuant to this paragraph.

(ii) Adverse comments that the OCC determines do not raise a significant supervisory, CRA (if applicable), or compliance concern or a significant legal or policy issue; are frivolous, non-substantive, or filed primarily as a means of delaying action on the filing; or raise a CRA concern that has been satisfactorily resolved do not affect the OCC's decision under paragraph (a)(2)(i) of this section. The OCC considers a comment to be non-substantive if it is a generalized opinion that a filing should or should not be approved or a conclusory statement, lacking factual or analytical support. The OCC considers a CRA concern to have been satisfactorily resolved if the OCC previously reviewed (*e.g.,* in an examination, other supervisory activity, or a prior filing made by the current filer) a concern presenting substantially the same issue in substantially the same assessment area during substantially the same time, and the OCC determines that the

concern would not warrant denial or imposition of a condition on approval of the application.

(iii) If a bank or savings association makes a filing for any activity or transaction that is dependent upon the approval of another filing under this part, or if requests for approval for more than one activity or transaction are combined in a single filing under applicable sections of this part, none of the subject filings may be deemed approved upon expiration of the applicable time periods, unless all of the filings are subject to expedited review procedures and the longest of the time periods expires without the OCC issuing a decision or notifying the bank or savings association that the filings are not eligible for expedited review under the standards in paragraph (a)(2)(i) of this section.

* * * * *

(h) *Nullifying a decision.* The OCC may nullify any decision on a filing either prior to or after consummation of the transaction if:

(1) The OCC discovers a material misrepresentation or omission in any information provided to the OCC in the filing or supporting materials;

(2) The decision is contrary to law, regulation, or OCC policy thereunder; or

(3) The decision was granted due to clerical or administrative error, or a material mistake of law or fact.

(i) *Modifying, Suspending, or Rescinding a Decision.* The OCC may modify, suspend, or rescind a decision on a filing if a material change in the information or circumstance on which the OCC relied occurs prior to the date of the consummation of the transaction to which the decision pertains.

■ 15. Amend § 5.20 by:

■ a. In paragraph (b), paragraph (e)(1)(iii) introductory text, and paragraphs (h)(1)(i), (h)(2), (h)(3)(i), (h)(5)(i), (h)(5)(ii), (h)(5)(iii), (h)(7), (i)(2), (k)(1), (l)(1), and (l)(2), removing the word ''shall'' wherever it appears and adding in its place the word ''must'';

■ b. In paragraph (d)(2), removing the phrase ''section 2'' and adding in its place ''section 2(a)(2)'' and removing the phrase ''section 10'' and adding in its place ''section 10(a)(2)'';

■ c. Redesignating paragraphs (d)(7) and (8) as paragraphs (d)(8) and (9), respectively, and adding new paragraphs (d)(7) and (d)(10);

■ d. In redesignated paragraph (d)(8), adding the word ''natural'' before the word ''persons''; and

■ e. In redesignated paragraph (d)(9), removing the phrase ''an applicant'' and adding in its place the phrase ''a filer'';

■ f. In paragraph (e)(1)(ii)(A), removing the word ''applicants'' and adding in its place the word ''filers'';

■ g. Effective December 11, 2020, revising paragraph (e)(2);

■ h. In paragraph (e)(3), removing the phrase ''Federal Deposit Insurance Corporation (FDIC)'' and adding in its place the word ''FDIC'';

■ i. In paragraph (g)(4)(ii), removing the word ''shall'' and adding in its place the word ''may'' and removing the phrase ''withdrawal of preliminary approval'' and adding in its place the phrase ''nullification or rescission of a preliminary approval'';

■ j. In paragraphs (i)(1) and (j)(2), removing the word ''applicant'' and adding in its place the word ''filer'';

■ k. Redesignating paragraphs (i)(3) through (5) as paragraphs (i)(4) through (i)(6) and adding a new paragraph (i)(3);

■ l. In redesignated paragraph (i)(4), removing the word ''shall'' wherever it appears and adding in its place the word ''must'';

■ m. In redesignated paragraph (i)(5), removing the phrase ''spokesperson and other interested persons'' and adding in its place the phrase ''contact person and other relevant parties'';

■ n. In redesignated paragraph (i)(6)(i), removing the phrase ''paragraph (i)(5)(iii)'' wherever it appears and adding in its place the phrase ''paragraph (i)(6)(iii)'';

■ o. In redesignated paragraphs (i)(6)(ii)(A) and (B), and (iii) and (iv), removing the word ''shall'' wherever it appears and adding in its place the word ''must'';

■ p. In redesignated paragraph (i)(6)(iii), removing the phrase ''or part 197'';

■ q. Revising paragraph (j)(1); and

■ r. In paragraphs (k)(2) and (l)(1), removing the phrase ''An applicant'' wherever it appears and adding in its place the phrase ''A filer''.

The additions and revision read as follows:

§ 5.20 Organizing a national bank or Federal savings association.

* * * * *

(d) * * *

(7) *Organizer* means a member of the organizing group.

* * * * *

(10) *Principal shareholder* means a person who directly or indirectly or acting in concert with one or more persons or companies, or together with members of their immediate family, will own, control, or hold 10 percent or more of the voting stock of the proposed national bank or Federal savings association.

(e) * * *

(2) *Community Reinvestment Act.* Twelve CFR part 25 requires the OCC to take into account a proposed insured national bank's or Federal savings association's description of how it will meet its CRA objectives.

* * * * *

(i) * * *

(3) *Biographical and financial reports*—(i) Each proposed organizer, director, executive officer, or principal shareholder must submit to the appropriate OCC licensing office:

(A) The information prescribed in the Interagency Biographical and Financial Report, available at *www.occ.gov;* and

(B) Legible fingerprints.

(ii) The OCC may require additional information about any proposed organizer, director, executive officer, or principal shareholder, if appropriate. The OCC may waive any of the information requirements of this paragraph if the OCC determines that it is in the public interest.

* * * * *

(j) * * *

(1) Notifies the filer prior to that date that the filing has been removed from expedited review, or the expedited review process is extended, under § 5.13(a)(2); or

* * * * *

■ 16. Amend § 5.21 by:

■ a. In paragraph (d), removing the word ''shall'' and adding in its place the word ''do'';

■ b. In paragraph (e) introductory text, removing the word ''shall'' and adding in its place the word ''must'' in the first and second sentence; and removing the word ''shall'' and adding in its place the word ''will'' in the last sentence;

■ c. In the form ''Federal Mutual Charter'' following paragraph (e):

■ i. Removing the phrase ''shall be'' and adding in its place the word ''is'' in Section 2 and Section 7;

■ ii. In Section 6:

■ A. Removing the phrase ''shall be permitted'' and adding in its place the phrase ''is permitted'';

■ B. Removing the phrase ''shall cast'' and adding in its place the phrase ''may cast''; and

■ C. Removing the phrase ''accounts shall be'' and adding in its place the phrase ''accounts are'';

■ iii. In Section 7:

■ A. Removing the phrase ''shall be'' and adding in its place the word ''is'';

■ B. Removing the phrase ''shall not'' and adding in its place the phrase ''may not''; and

■ iv. Removing the word ''shall'' and adding in its place the word ''will'' wherever it appears in Section 8 and Section 9;

■ d. Revising paragraph (f)(2) and adding paragraph (f)(3);

■ e. Revising paragraph (g) introductory text;
■ f. Revising paragraph (g)(1):
■ g. In paragraph (g)(2), removing the phrase ''has complied'' and adding in its place the word ''complies'';
■ h. Revising paragraph (i); and
■ g. Revising paragraph (j).

The revisions and addition read as follows.

§ 5.21 Federal mutual savings association charter and bylaws.

* * * * *

(f) * * *

(2) *Form of filing*—(i) *Application requirement.* Except as provided in paragraph (f)(2)(ii) of this section, a Federal mutual savings association must file the proposed charter amendment with, and obtain the prior approval of, the OCC.

(A) *Expedited review.* Except as provided in paragraph (f)(2)(i)(B) of this section, the charter amendment will be deemed approved as of the 30th day after filing, unless the OCC notifies the filer that the amendment is denied or that the amendment contains procedures of the type described in paragraph (f)(2)(i)(B) of this section and is not eligible for expedited review, provided the association follows the requirements of its charter in adopting the amendment.

(B) *Amendments exempted from expedited review.* Expedited review is not available for a charter amendment that would render more difficult or discourage a merger, proxy contest, the assumption of control by a mutual account holder of the association, or the removal of incumbent management; or involve a significant issue of law or policy.

(ii) *Notice requirement.* No application under paragraph (f)(2)(i) of this section is required if the text of the amendment is contained within paragraphs (e) or (g) of this section. In such case, the Federal mutual savings association must submit a notice with the charter amendment to the OCC within 30 days after adoption.

(3) *Effectiveness.* A charter amendment is effective after approval by the OCC, if required pursuant to paragraph (f)(2) of this section, and adoption by the association, provided the association follows the requirements of its charter in adopting the amendment.

(g) *Optional charter amendments.* The following charter amendments are subject to the notice requirement in paragraph (f)(2)(ii) of this section if adopted without change:

(1) *Purpose and powers.* Add a second paragraph to section 4, as follows:

Section 4. Purpose and powers. * * * The association has the express power: (i) To act as fiscal agent of the United States when designated for that purpose by the Secretary of the Treasury, under such regulations as the Secretary may prescribe, to perform all such reasonable duties as fiscal agent of the United States as may be required, and to act as agent for any other instrumentality of the United States when designated for that purpose by any such instrumentality; (ii) To sue and be sued, complain and defend in any court of law or equity; (iii) To have a corporate seal, affixed by imprint, facsimile or otherwise; (iv) To appoint officers and agents as its business requires and allow them suitable compensation; (v) To adopt bylaws not inconsistent with the Constitution or laws of the United States and rules and regulations adopted thereunder and under this Charter; (vi) To raise unlimited capital by accepting payments on savings, demand, or other accounts, as are authorized by rules and regulations made by the OCC, and the holders of all such accounts or other accounts as will, to such extent as may be provided by such rules and regulations, be members of the association and will have such voting rights and such other rights as are thereby provided; (vii) To issue notes, bonds, debentures, or other obligations, or securities, provided by or under any provision of Federal statute as from time to time is in effect; (viii) To provide for redemption of insured accounts; (ix) To borrow money without limitation and pledge and otherwise encumber any of its assets to secure its debts; (x) To lend and otherwise invest its funds as authorized by statute and the rules and regulations of the OCC; (xi) To wind up and dissolve, merge, consolidate, convert, or reorganize; (xii) To purchase, hold, and convey real estate and personalty consistent with its objects, purposes, and powers; (xiii) To mortgage or lease any real estate and personalty and take such property by gift, devise, or bequest; and (xiv) To exercise all powers conferred by law. In addition to the foregoing powers expressly enumerated, this association has the power to do all things reasonably incident to the accomplishment of its express objects and the performance of its express powers.

* * * * *

(i) *Availability of chartering documents.* A Federal mutual savings association must make available a true copy of its charter and bylaws and all amendments thereto to accountholders at all times in each office of the savings association, and must upon request deliver to any accountholders a copy of such charter and bylaws or amendments thereto.

(j) *Bylaws for Federal mutual savings associations*—(1) *In general.* A Federal mutual savings association must operate under bylaws that contain provisions that comply with all requirements specified by the OCC in this paragraph and that are not otherwise inconsistent with the provisions of this paragraph; the association's charter; and all other applicable laws, rules, and regulations *provided that,* a bylaw provision inconsistent with the provisions of this paragraph may be adopted with the approval of the OCC. Bylaws may be adopted, amended or repealed by a majority of the votes cast by the members at a legal meeting or a majority of the association's board of directors. The bylaws for a Federal mutual savings bank must substitute the term ''savings bank'' for ''association''. The term ''trustee'' may be substituted for the term ''director''.

(2) *Requirements.* The following requirements are applicable to Federal mutual savings associations:

(i) *Annual meetings of members.* (A) An association must provide for and conduct an annual meeting of its members for the election of directors and at which any other business of the association may be conducted. Such meeting must be held at any convenient place the board of directors may designate, and at a date and time within 150 days after the end of the association's fiscal year. The association's bylaws may provide for telephonic or electronic participation of members at an annual meeting. Members participating in an annual meeting telephonically or electronically will be deemed present in person for purposes of the quorum requirement in paragraph (j)(2)(v) of this section.

(B) At each annual meeting, the officers must make a full report of the financial condition of the association and of its progress for the preceding year and must outline a program for the succeeding year.

(C) If the association's bylaws provide for telephonic or electronic participation in member meetings, the association must follow the procedures for telephonic or electronic participation of the State corporate governance procedures it is permitted to elect pursuant to paragraph (j)(3)(ii) of this section, if those State corporate governance procedures include telephonic or electronic participation procedures; the Delaware General Corporation Law, Del. Code Ann. Tit. 8 (1991, as amended 1994, and as

amended thereafter) (with ''member'' substituting for ''stockholder''); or the Model Business Corporation Act (with ''member'' substituting for ''shareholder''), provided, however, that such procedures are not inconsistent with applicable Federal statutes and regulations and safety and soundness. The association must indicate the use of these procedures in its bylaws.

(ii) *Special meetings of members.* Procedures for calling any special meeting of the members and for conducting such a meeting must be set forth in the bylaws. The board of directors of the association or the holders of 10 percent or more of the voting capital must be entitled to call a special meeting. The association's bylaws may provide for telephonic or electronic participation of members at a special meeting pursuant to the procedures specified in paragraph (j)(2)(i)(C) of this section. Members participating in a special meeting telephonically or electronically will be deemed present in person for purposes of the quorum requirement in paragraph (j)(2)(v) of this section. For purposes of this paragraph, ''voting capital'' means FDIC-insured deposits as of the voting record date.

(iii) *Notice of meeting of members.* Notice specifying the date, time, and place of the annual or any special meeting and adequately describing any business to be conducted must be published for two successive weeks immediately prior to the week in which such meeting will convene in a newspaper of general circulation in the city or county in which the principal place of business of the association is located, or mailed postage prepaid at least 15 days and not more than 45 days prior to the date on which such meeting will convene to each of its members of record. A similar notice must be posted in a conspicuous place in each of the offices of the association during the 14 days immediately preceding the date on which such meeting will convene. The bylaws may permit a member to waive in writing any right to receive personal delivery of the notice. When any meeting is adjourned for 30 days or more, notice of the adjournment and reconvening of the meeting must be given as in the case of the original meeting.

(iv) *Fixing of record date.* The bylaws must provide for the fixing of a record date and a method for determining from the books of the association the members entitled to vote. Such date may not be more than 60 days nor fewer than 10 days prior to the date on which the action, requiring such determination of members, is to be taken. The same determination must apply to any adjourned meeting.

(v) *Member quorum.* Any number of members present and voting, represented in person or by proxy, at a regular or special meeting of the members constitutes a quorum. A majority of all votes cast at any meeting of the members determines any question, unless otherwise required by regulation. At any adjourned meeting, any business may be transacted that might have been transacted at the meeting as originally called. Members present at a duly constituted meeting may continue to transact business until adjournment.

(vi) *Voting by proxy.* Procedures must be established for voting at any annual or special meeting of the members by proxy pursuant to the rules and regulations of the OCC. Proxies may be given telephonically or electronically as long as the holder uses a procedure for verifying the identity of the member. All proxies with a term greater than eleven months or solicited at the expense of the association must run to the board of directors as a whole, or to a committee appointed by a majority of such board.

(vii) *Communications between members.* Provisions relating to communications between members must be consistent with § 144.8 of this chapter. No member, however, may have the right to inspect or copy any portion of any books or records of a Federal mutual savings association containing:

(A) A list of depositors in or borrowers from such association;

(B) Their addresses;

(C) Individual deposit or loan balances or records; or

(D) Any data from which such information could be reasonably constructed.

(viii) *Number of directors, membership.* The bylaws must set forth a specific number of directors, not a range. The number of directors may not be fewer than five nor more than fifteen, unless a higher or lower number has been authorized by the OTS prior to July 21, 2011 or by the OCC. Each director of the association must be a member of the association. Directors may be elected for periods of one to three years and until their successors are elected and qualified, but if a staggered board is chosen, provision must be made for the election of approximately one-third or one-half of the board each year, as appropriate. State-chartered savings banks converting to Federal savings banks may include alternative provisions for the election and term of office of directors so long as such provisions are authorized by the OCC, and provide for compliance with the standard provisions of this paragraph no later than six years after the conversion to a Federal savings association.

(ix) *Meetings of the board.* The board of directors determines the place, frequency, time, procedure for notice, which must be at least 24 hours unless waived by the directors, and waiver of notice for all regular and special meetings. The board also may permit telephonic or electronic participation at meetings. The bylaws may provide for action to be taken without a meeting if unanimous written consent is obtained for such action. A majority of the authorized directors constitutes a quorum for the transaction of business. The act of a majority of the directors present at any meeting at which there is a quorum will be the act of the board.

(x) *Officers, employees and agents.* (A) The bylaws must contain provisions regarding the officers of the association, their functions, duties, and powers. The officers of the association must consist of a president, one or more vice presidents, a secretary, and a treasurer or comptroller, each of whom must be elected annually by the board of directors. Such other officers and assistant officers and agents as may be deemed necessary may be elected or appointed by the board of directors or chosen in such other manner as may be prescribed in the bylaws. Any two or more offices may be held by the same person, except the offices of president and secretary.

(B) Any officer may be removed by the board of directors with or without cause, but such removal, other than for cause, must be without prejudice to the contractual rights, if any, of the person so removed. Termination for cause, for purposes of this section and § 5.22, includes termination because of the person's personal dishonesty; incompetence; willful misconduct; breach of fiduciary duty involving personal profit; intentional failure to perform stated duties; willful violation of any law, rule, or regulation (other than traffic violations or similar offenses) or final cease and desist order; or material breach of any provision of an employment contract.

(xi) *Vacancies, resignation or removal of directors.* In the event of a vacancy on the board, the board of directors may, by its affirmative vote, fill such vacancy, even if the remaining directors constitute less than a quorum. A director elected to fill a vacancy may serve only until the next election of directors by the members. The bylaws must set out the procedure for the resignation of a director. Directors may be removed only for cause, as defined in

paragraph (j)(2)(x)(B) of this section, by a vote of the holders of a majority of the shares then entitled to vote at an election of directors.

(xii) *Powers of the board.* The board of directors has the power to exercise any and all of the powers of the association not expressly reserved by the charter to the members.

(xiii) *Nominations for directors.* The bylaws must provide that nominations for directors may be made at the annual meeting by any member and must be voted upon, except, however, the bylaws may require that nominations by a member must be submitted to the secretary and then prominently posted in the principal place of business at least 10 days prior to the date of the annual meeting. However, if such provision is made for prior submission of nominations by a member, then the bylaws must provide for a nominating committee, which, except in the case of a nominee substituted as a result of death or other incapacity, must submit nominations to the secretary and have such nominations similarly posted at least 15 days prior to the date of the annual meeting.

(xiv) *New business.* The bylaws must provide procedures for the introduction of new business at the annual meeting.

(xv) *Amendment.* Bylaws may include any provision for their amendment that would be consistent with applicable law, rules, and regulations and adequately addresses its subject and purpose.

(A) Amendments will be effective:

(*1*) After approval by a majority vote of the authorized board, or by a majority of the vote cast by the members of the association at a legal meeting; and

(*2*) After receipt of any applicable regulatory approval.

(B) When an association fails to meet its quorum requirement, solely due to vacancies on the board, the bylaws may be amended by an affirmative vote of a majority of the sitting board.

(xvi) *Miscellaneous.* The bylaws also may address any other subjects necessary or appropriate for effective operation of the association.

(3) *Form of filing*—(i) *Application requirement.* Except as provided in paragraphs (j)(3)(ii) or (j)(3)(iii) of this section, a Federal mutual savings association must file the proposed bylaw amendment with, and obtain the prior approval of, the OCC.

(A) *Expedited review.* Except as provided in paragraph (j)(3)(i)(B) of this section, the bylaw amendment will be deemed approved as of the 30th day after filing, unless the OCC notifies the filer that the bylaw amendment is denied or that the amendment contains procedures of the type described in paragraph (j)(3)(i)(B) of this section and is not eligible for expedited review, provided the association follows the requirements of its charter and bylaws in adopting the amendment.

(B) *Amendments not subject to expedited review.* A bylaw amendment is not subject to expedited review if it would render more difficult or discourage a merger, proxy contest, the assumption of control by a mutual account holder of the association, or the removal of incumbent management; involve a significant issue of law or policy, including indemnification, conflicts of interest, and limitations on director or officer liability; or be inconsistent with the requirements of this paragraph or with applicable laws, rules, regulations, or the association's charter.

(ii) *Corporate governance election and notice requirement.* A Federal mutual association may elect to follow the corporate governance procedures of the laws of the State where the home office of the institution is located, provided that such procedures are not inconsistent with applicable Federal statutes, regulations, and safety and soundness, and such procedures are not of the type described in paragraph (j)(3)(i)(B) of this section. If this election is selected, a Federal mutual association must designate in its bylaws the provision or provisions from the body of law selected for its corporate governance procedures, and must submit a notice containing a copy of such bylaws, within 30 days after adoption. The notice must indicate, where not obvious, why the bylaw provisions meet the requirements stated in paragraph (j)(3)(i)(B) of this section.

(iii) *No filing required.* No filing is required for purposes of paragraph (j)(3) of this section if a bylaw amendment adopts the language of the OCC's model or optional bylaws without change.

(4) *Effectiveness.* A bylaw amendment is effective after approval by the OCC, if required, and adoption by the association, provided that the association follows the requirements of its charter and bylaws in adopting the amendment.

(5) *Effect of subsequent charter or bylaw change.* Notwithstanding any subsequent change to its charter or bylaws, the authority of a Federal mutual savings association to engage in any transaction is determined only by the association's charter or bylaws then in effect.

■ 17. Amend § 5.22 by:

■ a. In paragraph (d), removing the word ''shall'' and adding in its place the word ''do'';

■ b. In paragraph (e) introductory text removing the word ''shall'' wherever it appears and adding in its place the word ''must'' and removing ''§ 192.3(c)(13)'' and adding in its place ''§ 192.485'';

■ c. In the form ''Federal Stock Charter'' following paragraph (e):

■ i. In *Section 2,* removing the phrase ''shall be'' and adding in its place the word ''is'';

■ ii. Revising *Section 5;*

■ iii. In *Section 6,* removing the phrase ''shall not be entitled'' and adding in its place the phrase ''are not entitled'';

■ iv. In *Section 7,* removing the phrase ''shall be'' and adding in its place the phrase ''will be'' and removing the phrase ''shall not be'' and adding in its place the phrase ''may not be''; and

■ v. In *Section 8,* removing the phrase ''shall be'' and adding in its place ''may be'';

■ d. Revising paragraph (f)(2) and adding paragraph (f)(3);

■ e. Revising paragraph (g) introductory text;

■ f. In paragraph (g)(1), removing the phrase ''has complied'' and adding in its place the word ''complies'';

■ g. Revising paragraph (g)(4);

■ h. Removing the word ''shall'' wherever it appears and adding in its place the word ''will'' in paragraph (g)(6); and

■ i. Revising paragraph (g)(7);

■ j. In paragraph (h):

■ i. Removing the phrase ''shall file'' and adding in its place the word ''files'';

■ ii. Removing the phrase ''for approval'' and adding in its place the phrase ''pursuant to paragraph (f)(2)(i) of this section'';

■ iii. Removing the word ''state'' and adding in its place the word ''State''; and

■ iv. Removing the phrase ''shall not'' and adding in its place the phrase ''may not'';

■ k. In paragraph (i), removing the phrase ''under (c) of this part'' and adding in its place ''in the form ''Federal Stock Charter'' in paragraph (e) of this section'';

■ l. Revising paragraphs (j)(2) and (3);

■ m. In paragraph (j)(4), removing the phrase ''shall be'' and adding in its place the word ''is'':

■ n. Revising paragraphs (k)(1) through (7);

■ o. Revising paragraphs (l)(1) through (10);

■ p. In paragraph (m)(1) removing the phrase ''shall be a president'' and adding in its place the phrase ''must consist of a president''; removing the phrase ''shall be elected'' and adding in its place the phrase ''must be elected''; and removing the word ''chairman'' and

adding in its place the word ''chair''; and

■ q. In paragraph (m)(2) removing the phrase ''shall be'' and adding in its place the phrase ''will be'' and removing the last sentence; and

■ r. Revising paragraph (n).

The addition and revisions read as follows.

§ 5.22 Federal stock savings association charter and bylaws.

* * * * *

(e) * * *

Federal Stock Charter

* * * * *

Section 5. Capital stock. The total number of shares of all classes of the capital stock that the association has the authority to issue is __, all of which is common stock of par [or if no par is specified then shares have a stated] value of __per share. The shares may be issued from time to time as authorized by the board of directors without the approval of its shareholders, except as otherwise provided in this Section 5 or to the extent that such approval is required by governing law, rule, or regulation. The consideration for the issuance of the shares must be paid in full before their issuance and may not be less than the par [or stated] value. Neither promissory notes nor future services may constitute payment or part payment for the issuance of shares of the association. The consideration for the shares must be cash, tangible or intangible property (to the extent direct investment in such property would be permitted to the association), labor, or services actually performed for the association, or any combination of the foregoing. In the absence of actual fraud in the transaction, the value of such property, labor, or services, as determined by the board of directors of the association, is conclusive. Upon payment of such consideration, such shares are deemed to be fully paid and nonassessable. In the case of a stock dividend, that part of the retained earnings of the association that is transferred to common stock or paid-in capital accounts upon the issuance of shares as a stock dividend is deemed to be the consideration for their issuance.

Except for shares issued in the initial organization of the association or in connection with the conversion of the association from the mutual to stock form of capitalization, no shares of capital stock (including shares issuable upon conversion, exchange, or exercise of other securities) may be issued, directly or indirectly, to officers, directors, or controlling persons of the association other than as part of a general public offering or as qualifying shares to a director, unless the issuance or the plan under which they would be issued has been approved by a majority of the total votes eligible to be cast at a legal meeting. The holders of the common stock exclusively possess all voting power. Each holder of shares of common stock is entitled to one vote for each share held by such holder, except as to the cumulation of votes for the election of directors, unless the charter provides that there will be no such cumulative voting. Subject to any provision for a liquidation account, in the event of any liquidation, dissolution, or winding up of the association, the holders of the common stock will be entitled, after payment or provision for payment of all debts and liabilities of the association, to receive the remaining assets of the association available for distribution, in cash or in kind. Each share of common stock must have the same relative rights as and be identical in all respects with all the other shares of common stock.

* * * * *

(f) * * *

(2) *Form of filing*—(i) *Application requirement.* Except as provided in paragraph (f)(2)(ii) of this section, a Federal stock savings association must file the proposed charter amendment with, and obtain the prior approval of the OCC.

(A) *Expedited review.* Except as provided in paragraph (f)(2)(i)(B) of this section, the charter amendment will be deemed approved as of the 30th day after filing, unless the OCC notifies the filer that the amendment is denied or that the amendment contains procedures of the type described in paragraph (f)(2)(ii)(B) of this section and is not subject to expedited review, provided the association follows the requirements of its charter in adopting the amendment.

(B) *Amendments exempted from expedited review.* Expedited review is not available for a charter amendment that would render more difficult or discourage a merger, tender offer, or proxy contest, the assumption of control by a holder of a block of the association's stock, the removal of incumbent management, or involve a significant issue of law or policy.

(ii) *Notice requirement.* No application under paragraph (f)(2)(i) of this section is required if the amendment is contained within paragraphs (e) or (g) of this section. In such case, the Federal stock savings association must submit a notice with the charter amendment to the OCC within 30 days after adoption.

(3) *Effectiveness.* A charter amendment is effective after approval by the OCC, if required, and adoption by the association, provided the association follows the requirements of its charter in adopting the amendments.

(g) *Optional charter amendments.* The following charter amendments are subject to the notice requirement in paragraph (f)(2)(ii) of this section if adopted without change:

* * * * *

(4) *Capital stock.* A Federal stock association may amend its charter by revising Section 5 to read as follows:

Section 5. Capital stock. The total number of shares of all classes of capital stock that the association has the authority to issue is __, of which __is common stock of par [or if no par value is specified the stated] value of __per share and of which [list the number of each class of preferred and the par or if no par value is specified the stated value per share of each such class]. The shares may be issued from time to time as authorized by the board of directors without further approval of shareholders, except as otherwise provided in this Section 5 or to the extent that such approval is required by governing law, rule, or regulation. The consideration for the issuance of the shares must be paid in full before their issuance and may not be less than the par [or stated] value. Neither promissory notes nor future services may constitute payment or part payment for the issuance of shares of the association. The consideration for the shares must be cash, tangible or intangible property (to the extent direct investment in such property would be permitted), labor, or services actually performed for the association, or any combination of the foregoing. In the absence of actual fraud in the transaction, the value of such property, labor, or services, as determined by the board of directors of the association, will be conclusive. Upon payment of such consideration, such shares will be deemed to be fully paid and nonassessable. In the case of a stock dividend, that part of the retained earnings of the association that is transferred to common stock or paid-in capital accounts upon the issuance of shares as a stock dividend will be deemed to be the consideration for their issuance.

Except for shares issued in the initial organization of the association or in connection with the conversion of the association from the mutual to the stock form of capitalization, no shares of capital stock (including shares issuable upon conversion, exchange, or exercise of other securities) may be issued, directly or indirectly, to officers, directors, or controlling persons of the

association other than as part of a general public offering or as qualifying shares to a director, unless their issuance or the plan under which they would be issued has been approved by a majority of the total votes eligible to be cast at a legal meeting.

Nothing contained in this Section 5 (or in any supplementary sections hereto) entitles the holders of any class of a series of capital stock to vote as a separate class or series or to more than one vote per share, except as to the cumulation of votes for the election of directors, unless the charter otherwise provides that there will be no such cumulative voting: *Provided,* That this restriction on voting separately by class or series does not apply:

i. To any provision which would authorize the holders of preferred stock, voting as a class or series, to elect some members of the board of directors, less than a majority thereof, in the event of default in the payment of dividends on any class or series of preferred stock;

ii. To any provision that would require the holders of preferred stock, voting as a class or series, to approve the merger or consolidation of the association with another corporation or the sale, lease, or conveyance (other than by mortgage or pledge) of properties or business in exchange for securities of a corporation other than the association if the preferred stock is exchanged for securities of such other corporation: *Provided,* That no provision may require such approval for transactions undertaken with the assistance or pursuant to the direction of the OCC or the Federal Deposit Insurance Corporation;

iii. To any amendment which would adversely change the specific terms of any class or series of capital stock as set forth in this Section 5 (or in any supplementary sections hereto), including any amendment which would create or enlarge any class or series ranking prior thereto in rights and preferences. An amendment which increases the number of authorized shares of any class or series of capital stock, or substitutes the surviving association in a merger or consolidation for the association, is not considered to be such an adverse change.

A description of the different classes and series (if any) of the association's capital stock and a statement of the designations, and the relative rights, preferences, and limitations of the shares of each class of and series (if any) of capital stock are as follows:

A. *Common stock.* Except as provided in this Section 5 (or in any supplementary sections thereto) the holders of the common stock exclusively possess all voting power. Each holder of shares of the common stock is entitled to one vote for each share held by each holder, except as to the cumulation of votes for the election of directors, unless the charter otherwise provides that there will be no such cumulative voting.

Whenever there has been paid, or declared and set aside for payment, to the holders of the outstanding shares of any class of stock having preference over the common stock as to the payment of dividends, the full amount of dividends and of sinking fund, retirement fund, or other retirement payments, if any, to which such holders are respectively entitled in preference to the common stock, then dividends may be paid on the common stock and on any class or series of stock entitled to participate therewith as to dividends out of any assets legally available for the payment of dividends.

In the event of any liquidation, dissolution, or winding up of the association, the holders of the common stock (and the holders of any class or series of stock entitled to participate with the common stock in the distribution of assets) will be entitled to receive, in cash or in kind, the assets of the association available for distribution remaining after: (i) Payment or provision for payment of the association's debts and liabilities; (ii) distributions or provision for distributions in settlement of its liquidation account; and (iii) distributions or provision for distributions to holders of any class or series of stock having preference over the common stock in the liquidation, dissolution, or winding up of the association. Each share of common stock will have the same relative rights as and be identical in all respects with all the other shares of common stock.

B. *Preferred stock.* The association may provide in supplementary sections to its charter for one or more classes of preferred stock, which must be separately identified. The shares of any class may be divided into and issued in series, with each series separately designated so as to distinguish the shares thereof from the shares of all other series and classes. The terms of each series must be set forth in a supplementary section to the charter. All shares of the same class must be identical except as to the following relative rights and preferences, as to which there may be variations between different series:

a. The distinctive serial designation and the number of shares constituting such series;

b. The dividend rate or the amount of dividends to be paid on the shares of such series, whether dividends are cumulative and, if so, from which date(s), the payment date(s) for dividends, and the participating or other special rights, if any, with respect to dividends;

c. The voting powers, full or limited, if any, of shares of such series;

d. Whether the shares of such series are redeemable and, if so, the price(s) at which, and the terms and conditions on which, such shares may be redeemed;

e. The amount(s) payable upon the shares of such series in the event of voluntary or involuntary liquidation, dissolution, or winding up of the association;

f. Whether the shares of such series are entitled to the benefit of a sinking or retirement fund to be applied to the purchase or redemption of such shares, and if so entitled, the amount of such fund and the manner of its application, including the price(s) at which such shares may be redeemed or purchased through the application of such fund;

g. Whether the shares of such series are convertible into, or exchangeable for, shares of any other class or classes of stock of the association and, if so, the conversion price(s) or the rate(s) of exchange, and the adjustments thereof, if any, at which such conversion or exchange may be made, and any other terms and conditions of such conversion or exchange.

h. The price or other consideration for which the shares of such series are issued; and

i. Whether the shares of such series which are redeemed or converted have the status of authorized but unissued shares of serial preferred stock and whether such shares may be reissued as shares of the same or any other series of serial preferred stock.

Each share of each series of serial preferred stock must have the same relative rights as and be identical in all respects with all the other shares of the same series.

The board of directors has authority to divide, by the adoption of supplementary charter sections, any authorized class of preferred stock into series, and, within the limitations set forth in this section and the remainder of this charter, fix and determine the relative rights and preferences of the shares of any series so established.

Prior to the issuance of any preferred shares of a series established by a supplementary charter section adopted by the board of directors, the association must file with the OCC a dated copy of that supplementary section of this charter established and designating the

series and fixing and determining the relative rights and preferences thereof.

* * * * *

(7) *Anti-takeover provisions following mutual to stock conversion.* Notwithstanding the law of the State in which the association is located, a Federal stock association may amend its charter by renumbering existing sections as appropriate and adding a new section 8 as follows:

Section 8. Certain Provisions Applicable for Five Years. Notwithstanding anything contained in the Association's charter or bylaws to the contrary, for a period of [specify number of years up to five] years from the date of completion of the conversion of the Association from mutual to stock form, the following provisions will apply:

A. *Beneficial Ownership Limitation.* No person may directly or indirectly offer to acquire or acquire the beneficial ownership of more than 10 percent of any class of an equity security of the association. This limitation does not apply to a transaction in which the association forms a holding company without change in the respective beneficial ownership interests of its stockholders other than pursuant to the exercise of any dissenter and appraisal rights, the purchase of shares by underwriters in connection with a public offering, or the purchase of less than 25 percent of a class of stock by a tax-qualified employee stock benefit plan as defined in 12 CFR 192.25.

In the event shares are acquired in violation of this section 8, all shares beneficially owned by any person in excess of 10 percent will be considered ''excess shares'' and will not be counted as shares entitled to vote and may not be voted by any person or counted as voting shares in connection with any matters submitted to the stockholders for a vote.

For purposes of this section 8, the following definitions apply:

1. The term ''person'' includes an individual, a group acting in concert, a corporation, a partnership, an association, a joint stock company, a trust, an unincorporated organization or similar company, a syndicate or any other group formed for the purpose of acquiring, holding or disposing of the equity securities of the association.

2. The term ''offer'' includes every offer to buy or otherwise acquire, solicitation of an offer to sell, tender offer for, or request or invitation for tenders of, a security or interest in a security for value.

3. The term ''acquire'' includes every type of acquisition, whether effected by purchase, exchange, operation of law or otherwise.

4. The term ''acting in concert'' means (a) knowing participation in a joint activity or parallel action towards a common goal of acquiring control whether or not pursuant to an express agreement, or (b) a combination or pooling of voting or other interests in the securities of an issuer for a common purpose pursuant to any contract, understanding, relationship, agreement or other arrangement, whether written or otherwise.

B. *Cumulative Voting Limitation.* Stockholders may not cumulate their votes for election of directors.

C. *Call for Special Meetings.* Special meetings of stockholders relating to changes in control of the association or amendments to its charter may be called only upon direction of the board of directors.

* * * * *

(j) * * *

(2) *Form of filing*—(i) *Application requirement.* Except as provided in paragraphs (j)(2)(ii) or (j)(2)(iii) of this section, a Federal stock savings association must file the proposed bylaw amendment with, and obtain the prior approval of, the OCC.

(A) *Expedited review.* Except as provided in paragraph (j)(2)(i)(B) of this section, the bylaw amendment will be deemed approved as of the 30th day after filing, unless the OCC notifies the filer that the application is denied or that the amendment contains procedures of the type described in paragraph (j)(2)(i)(B) of this section and is not eligible for expedited review, provided the association follows the requirements of its charter and bylaws in adopting the amendment.

(B) *Amendments exempted from expedited review.* Expedited review is not available for a bylaw amendment that would:

(*1*) Render more difficult or discourage a merger, tender offer, or proxy contest, the assumption of control by a holder of a large block of the association's stock, or the removal of incumbent management; or

(*2*) Be inconsistent with paragraphs (k) through (n) of this section, with applicable laws, rules, regulations or the association's charter or involve a significant issue of law or policy, including indemnification, conflicts of interest, and limitations on director or officer liability.

(ii) *Corporate governance election and notice requirement.* A Federal stock association may elect to follow the corporate governance procedures of: The laws of the State where the home office of the association is located; the laws of the State where the association's holding company, if any, is incorporated or chartered; Delaware General Corporation law; or The Model Business Corporation Act, provided that such procedures may be elected to the extent not inconsistent with applicable Federal statutes and regulations and safety and soundness, and such procedures are not of the type described in paragraph (j)(2)(i)(B) of this section. If this election is selected, a Federal stock association must designate in its bylaws the provision or provisions from the body or bodies of law selected for its corporate governance procedures, and must file a notice containing a copy of such bylaws, within 30 days after adoption. The notice must indicate, where not obvious, why the bylaw provisions meet the requirements stated in paragraph (j)(2)(i)(B) of this section.

(iii) *No filing required.* No filing is required for purposes of paragraph (j)(2) of this section if a bylaw amendment adopts the language of the OCC's model or optional bylaws without change.

(3) *Effectiveness.* A bylaw amendment is effective after approval by the OCC, if required, and adoption by the association, provided that the association follows the requirements of its charter and bylaws in adopting the amendment.

* * * * *

(k) * * *

(1) *Shareholder meetings.* (i) *In general.* A meeting of the shareholders of the association for the election of directors and for the transaction of any other business of the association must be held annually within 150 days after the end of the association's fiscal year. Unless otherwise provided in the association's charter, special meetings of the shareholders may be called by the board of directors or on the request of the holders of 10 percent or more of the shares entitled to vote at the meeting, or by such other persons as may be specified in the bylaws of the association.

(ii) *Location of shareholder meetings.* (A) *In general.* All annual and special meetings of shareholders of the association may be held at any convenient place the board of directors may designate. The association's bylaws may provide for the telephonic or electronic participation of shareholders in these meetings. Shareholders participating in an annual or special meeting telephonically or electronically will be deemed present in person for purposes of the quorum requirement in paragraph (k)(5) of this section.

(B) *Procedures for telephonic or electronic participation.* If the

association's bylaws provide for telephonic or electronic participation in shareholder meetings, the association must elect to follow corporate governance procedures for these meetings pursuant to paragraph (j)(2)(ii) of this section that include procedures for telephonic or electronic participation in shareholder meetings. The association must indicate the use of these elected procedures in its bylaws.

(2) *Notice of shareholder meetings.* Written notice stating the place, day, and hour of the meeting and the purpose or purposes for which the meeting is called must be delivered not fewer than 20 nor more than 50 days before the date of the meeting, either personally or by mail, by or at the direction of the chair of the board, the president, the secretary, or the directors, or other persons calling the meeting, to each shareholder of record entitled to vote at such meeting. If mailed, such notice will be deemed to be delivered when deposited in the mail, addressed to the shareholder at the address appearing on the stock transfer books or records of the association as of the record date prescribed in paragraph (k)(3) of this section, with postage thereon prepaid. When any shareholders' meeting, either annual or special, is adjourned for 30 days or more, notice of the adjourned meeting must be given as in the case of an original meeting. Notwithstanding anything in this section, however, a Federal stock association that is wholly owned is not subject to the shareholder notice requirement.

(3) *Fixing of record date.* For the purpose of determining shareholders entitled to notice of or to vote at any meeting of shareholders or any adjournment thereof, or shareholders entitled to receive payment of any dividend, or in order to make a determination of shareholders for any other proper purpose, the board of directors must fix in advance a date as the record date for any such determination of shareholders. Such date in any case may not be more than 60 days and, in case of a meeting of shareholders, not less than 10 days prior to the date on which the particular action, requiring such determination of shareholders, is to be taken. When a determination of shareholders entitled to vote at any meeting of shareholders has been made as provided in this section, such determination will apply to any adjournment thereof.

(4) *Voting lists.* (i) At least 20 days before each meeting of the shareholders, the officer or agent having charge of the stock transfer books for the shares of the association must make a complete list of the stockholders of record entitled to vote at such meeting, or any adjournments thereof, arranged in alphabetical order, with the address and the number of shares held by each. This list of shareholders must be kept on file at the home office of the association and is subject to inspection by any shareholder of record or the stockholder's agent during the entire time of the meeting. The original stock transfer book will constitute *prima facie* evidence of the stockholders entitled to examine such list or transfer books or to vote at any meeting of stockholders. Notwithstanding anything in this section, however, a Federal stock association that is wholly owned is not subject to the voting list requirements.

(ii) In lieu of making the shareholders list available for inspection by any shareholders as provided in paragraph (k)(4)(i) of this section, the board of directors may perform such acts as required by paragraphs (a) and (b) of Rule 14a–7 of the General Rules and Regulations under the Securities and Exchange Act of 1934 (17 CFR 240.14a–7) as may be duly requested in writing, with respect to any matter which may be properly considered at a meeting of shareholders, by any shareholder who is entitled to vote on such matter and who must defray the reasonable expenses to be incurred by the association in performance of the act or acts required.

(5) *Shareholder quorum.* A majority of the outstanding shares of the association entitled to vote, represented in person or by proxy, constitutes a quorum at a meeting of shareholders. The shareholders present at a duly organized meeting may continue to transact business until adjournment, notwithstanding the withdrawal of enough shareholders to leave less than a quorum. If a quorum is present, the affirmative vote of the majority of the shares represented at the meeting and entitled to vote on the subject matter will be the act of the stockholders, unless the vote of a greater number of stockholders voting together or voting by classes is required by law or the charter. Directors, however, are elected by a plurality of the votes cast at an election of directors.

(6) *Shareholder voting*—(i) *Proxies.* Unless otherwise provided in the association's charter, at all meetings of shareholders, a shareholder may vote in person or by proxy executed in writing by the shareholder or by a duly authorized attorney in fact. Proxies may be given telephonically or electronically as long as the holder uses a procedure for verifying the identity of the shareholder. Proxies solicited on behalf of the management must be voted as directed by the shareholder or, in the absence of such direction, as determined by a majority of the board of directors. No proxy maybe valid more than eleven months from the date of its execution except for a proxy coupled with an interest.

(ii) *Shares controlled by association.* Neither treasury shares of its own stock held by the association nor shares held by another corporation, if a majority of the shares entitled to vote for the election of directors of such other corporation are held by the association, may be voted at any meeting or counted in determining the total number of outstanding shares at any given time for purposes of any meeting.

(7) *Nominations and new business submitted by shareholders.* Nominations for directors and new business submitted by shareholders must be voted upon at the annual meeting if such nominations or new business are submitted in writing and delivered to the secretary of the association at least five days prior to the date of the annual meeting. Ballots bearing the names of all the persons nominated must be provided for use at the annual meeting.

* * * * *

(l) * * *

(1) *General powers and duties.* The business and affairs of the association must be under the direction of its board of directors. Directors need not be stockholders unless the bylaws so require.

(2) *Number and term.* The bylaws must set forth a specific number of directors, not a range. The number of directors may not be fewer than five nor more than fifteen, unless a higher or lower number has been authorized by the OTS prior to July 21, 2011 or the OCC. Directors must be elected for a term of one to three years and until their successors are elected and qualified. If a staggered board is chosen, the directors must be divided into two or three classes as nearly equal in number as possible and one class must be elected by ballot annually.

(3) *Regular meetings.* The board of directors determines the place, frequency, time and procedure for notice of regular meetings. The bylaws may provide for telephonic or electronic participation at these meetings.

(4) *Quorum.* A majority of the number of directors constitutes a quorum for the transaction of business at any meeting of the board of directors. The act of the majority of the directors present at a meeting at which a quorum is present will be the act of the board of directors, unless a greater number is prescribed by regulation of the OCC.

(5) *Vacancies.* Any vacancy occurring in the board of directors may be filled by the affirmative vote of a majority of the remaining directors even with less than a quorum of the board of directors. A director elected to fill a vacancy may serve only until the next election of directors by the shareholders. Any directorship to be filled by reason of an increase in the number of directors may be filled by election by the board of directors for a term of office continuing only until the next election of directors by the shareholders.

(6) *Removal or resignation of directors.* (i) At a meeting of shareholders called expressly for that purpose, any director may be removed only for cause, as termination for cause is defined in § 5.21(j)(2)(x)(B), by a vote of the holders of a majority of the shares then entitled to vote at an election of directors. Associations may provide for procedures regarding resignations in the bylaws.

(ii) If less than the entire board is to be removed, no one of the directors may be removed if the votes cast against the removal would be sufficient to elect a director if then cumulatively voted at an election of the class of directors of which such director is a part.

(iii) Whenever the holders of the shares of any class are entitled to elect one or more directors by the provisions of the charter or supplemental sections thereto, the provisions of this section apply, in respect to the removal of a director or directors so elected, to the vote of the holders of the outstanding shares of that class and not to the vote of the outstanding shares as a whole.

(7) *Executive and other committees.* The board of directors, by resolution adopted by a majority of the full board, may designate from among its members an executive committee and one or more other committees. No committee may have the authority of the board of directors with reference to: The declaration of dividends; the amendment of the charter or bylaws of the association; recommending to the stockholders a plan of merger, consolidation, or conversion; the sale, lease, or other disposition of all, or substantially all, of the property and assets of the association otherwise than in the usual and regular course of its business; a voluntary dissolution of the association; a revocation of any of the foregoing; or the approval of a transaction in which any member of the executive committee, directly or indirectly, has any material beneficial interest. The designation of any committee and the delegation of authority thereto does not operate to relieve the board of directors, or any director, of any responsibility imposed by law or regulation.

(8) *Notice of special meetings.* Written notice of at least 24 hours regarding any special meeting of the board of directors or of any committee designated thereby must be given to each director in accordance with the bylaws, although such notice may be waived by the director. The attendance of a director at a meeting constitutes a waiver of notice of such meeting, except where a director attends a meeting for the express purpose of objecting to the transaction of any business because the meeting is not lawfully called or convened. Neither the business to be transacted at, nor the purpose of, any meeting need be specified in the notice or waiver of notice of such meeting. The bylaws may provide for telephonic or electronic participation at a special meeting.

(9) *Action without a meeting.* Any action required or permitted to be taken by the board of directors at a meeting may be taken without a meeting if a consent in writing, setting forth the actions so taken, is signed by all of the directors.

(10) *Presumption of assent.* A director of the association who is present at a meeting of the board of directors at which action on any association matter is taken is presumed to have assented to the action taken unless their dissent or abstention is entered in the minutes of the meeting or unless a written dissent to such action is filed with the person acting as the secretary of the meeting before the adjournment thereof or is forwarded by registered mail to the secretary of the association within five days after the date on which a copy of the minutes of the meeting is received. Such right to dissent does not apply to a director who voted in favor of such action.

* * * * *

(n) *Certificates for shares and their transfer*—(1) *Certificates for shares.* Certificates representing shares of capital stock of the association must be in such form as determined by the board of directors and approved by the OCC. The name and address of the person to whom the shares are issued, with the number of shares and date of issue, must be entered on the stock transfer books of the association. All certificates surrendered to the association for transfer must be cancelled and no new certificate may be issued until the former certificate for a like number of shares has been surrendered and cancelled, except that in the case of a lost or destroyed certificate a new certificate may be issued upon such terms and indemnity to the association as the board of directors may prescribe.

(2) *Transfer of shares.* Transfer of shares of capital stock of the association may be made only on its stock transfer books. Authority for such transfer may be given only by the holder of record or by a legal representative, who must furnish proper evidence of such authority, or by an attorney authorized by a duly executed power of attorney and filed with the association. The transfer may be made only on surrender for cancellation of the certificate for the shares. The person in whose name shares of capital stock stand on the books of the association is deemed by the association to be the owner for all purposes.

■ 18. Amend § 5.23 by:

■ a. In paragraph (b)(2), removing the phrase ''an industrial bank or a credit union, chartered in'' and adding in its place the phrase ''an industrial bank, or a credit union chartered in'';

■ b. In paragraphs (c), (d)(2)(ii) introductory text, (e), and (f)(1), removing the word ''shall'' wherever it appears and adding in its place the word ''must'';

■ c. In paragraphs (c), (d)(1), and (d)(2)(i), removing the word ''applicant'' wherever it appears and adding in its place the word ''filer'';

■ d. In paragraph (c), removing the phrase ''Federal Deposit Insurance Corporation (FDIC)'' and adding in its place the word ''FDIC'';

■ e. Removing paragraph (d)(2)(ii)(A), redesignating paragraphs (d)(2)(ii)(B) through (K) as paragraphs (d)(2)(ii)(A) through (J), respectively and adding new paragraphs (d)(2)(ii)(K) and (d)(2)(ii)(L);

■ f. In redesignated paragraph (d)(2)(ii)(D), removing the phrase ''state-chartered'' and adding in its place the phrase ''State-chartered'' and removing the word ''state'' and adding in its place the word ''State'';

■ g. In redesignated paragraph (d)(2)(ii)(F), removing the citations ''§ 5.36, § 5.38'' and adding in their place ''§ 5.38, § 5.58'';

■ h. In redesignated paragraph (d)(2)(ii)(G), removing the comma after the phrase ''engages in'';

■ i. In redesignated paragraph (d)(2)(ii)(I), removing the word ''state'' and adding in its place the word ''State'' wherever it appears and removing the word ''and'' after the phrase ''after conversion;'';

■ j. In redesignated paragraph (d)(2)(ii)(J), removing the period after the phrase ''from the OCC'' and adding in its place a semicolon;

■ k. In paragraph (d)(2)(iii), removing the word ''HOLA'' and adding in its

place ''Home Owners' Loan Act (12 U.S.C. 1464(c))'';
■ l. Redesignating paragraphs (d)(2)(iv) through (v) as paragraphs (d)(2)(v) through (vi) and adding a new paragraph (d)(2)(iv);
■ m. In redesignated paragraph (d)(2)(vi), removing the word ''applicant'' and adding in its place the word ''filer'';
■ n. Revising paragraph (d)(4);
■ o. In paragraph (e), removing the phrase ''an applicant'' and adding in its place the phrase ''a filer'';
■ p. In paragraph (f)(1), removing the word ''state'' and adding in its place the word ''State''; and
■ q. In paragraph (g) removing the phrase ''shall continue'' and adding in its place the word ''continues'' and removing the phrase ''shall be'' and adding in its place the word ''is''.

The additions and revision read as follows.

§ 5.23 Conversion to become a Federal savings association

* * * * *

(d) * * *

(2) * * *

(ii) * * *

(K) Include a list of directors and senior executive officers, as defined in § 5.51, of the converting institution; and

(L) Include a list of individuals, directors, and shareholders who directly or indirectly, or acting in concert with one or more persons or companies, or together with members of their immediate family, do or will own, control, or hold 10 percent or more of the institution's voting stock.

* * * * *

(iv) The OCC may require directors and senior executive officers of the converting institution to submit the Interagency Biographical and Financial Report, available at *www.occ.gov,* and legible fingerprints.

* * * * *

(4) *Expedited review.* An application by an eligible bank to convert to a Federal savings association charter is deemed approved by the OCC as of the 45th day after the filing is received by the OCC, unless the OCC notifies the filer prior to that date that the filing has been removed from expedited review, or the expedited review process is extended, under § 5.13(a)(2).

* * * * *

■ 19. Amend § 5.24 by:
■ a. In paragraphs (b), (c)(1), (c)(2), (d), (e)(2) introductory text, and (e)(3), removing the word ''state'' wherever it appears and adding in its place the word ''State'';
■ b. In paragraphs (b), (e)(2) introductory text, and (f), removing the word ''shall'' wherever it appears and adding in its place the word ''must'';
■ c. In paragraph (c)(2), removing the word ''*state*'' and adding in its place the word ''*State*'';
■ d. In paragraphs (d), and (e)(1), removing the word ''applicant'' wherever it appears and adding in its place the word ''filer'';
■ e. Removing paragraph (e)(2)(i) and redesignating paragraphs (e)(2)(ii) through (x) as paragraphs (e)(2)(i) through (ix), respectively, and adding paragraphs (e)(2)(x) and (xi);
■ f. In redesignated paragraphs (e)(2)(iv) and (e)(2)(ix), removing the word ''state'' wherever it appears and adding in its place the word ''State'';
■ g. At the end of redesignated paragraph (e)(2)(viii), removing the word ''and'';
■ h. At the end of redesignated paragraph (e)(2)(ix), removing the period and adding in its place a semicolon;
■ i. Redesignating paragraphs (e)(4) through (5) as paragraphs (e)(5) through (6), respectively, and adding a new paragraph (e)(4);
■ j. In redesignated paragraph (e)(6), removing the word ''applicant'' and adding the word ''filer'' in its place;
■ k. Revising paragraph (h); and
■ l. In paragraph (i):
■ i. In the first sentence, removing the phrase ''shall continue'' and adding in its place the word ''continues''; and
■ ii. In the second sentence, removing the phrase ''shall be'' and adding in its place the word ''is''.

The additions and revisions read as follows.

§ 5.24 Conversion to become a national bank.

* * * * *

(e) * * *

(2) * * *

(x) Include a list of directors and senior executive officers, as defined in § 5.51, of the converting institution; and

(xi) Include a list of individuals, directors, and shareholders who directly or indirectly, or acting in concert with one or more persons or companies, or together with members of their immediate family, do or will own, control, or hold 10 percent or more of the institution's voting stock.

* * * * *

(4) The OCC may require directors and senior executive officers of the converting institution to submit the Interagency Biographical and Financial Report, available at *www.occ.gov,* and legible fingerprints.

* * * * *

(h) *Expedited review.* An application by an eligible savings association to convert to a national bank charter is deemed approved by the OCC as of the 45th day after the filing is received by the OCC, unless the OCC notifies the filer prior to that date that the filing has been removed from expedited review, or the expedited review process is extended, under § 5.13(a)(2).

* * * * *

§ 5.25 [Amended]

■ 20. Amend § 5.25 by:
■ a. In the section heading and in paragraphs (b), (c), (d)(1), (d)(2), (d)(3)(i), and (d)(4), removing the word ''state'' wherever it appears and adding in its place the word ''State''
■ b. In paragraphs (b), (d)(3)(i), and (d)(3)(ii) introductory text, removing the word ''shall'' wherever it appears and adding in its place the word ''must''; and
■ c. In paragraphs (d)(1) and (d)(3)(i), removing the phrase ''defined in 214(a)'' wherever it appears and adding in its place the phrase ''defined in 12 U.S.C. 214(a)''.

■ 21. Amend § 5.26 by:
■ a. In paragraph (a), removing the phrase ''12 U.S.C. 92a and'' and adding in its place the phrase ''12 U.S.C. 92a,'';
■ b. In paragraphs (b)(2) and (b)(4), removing the phrase ''Office of Thrift Supervision'' wherever it appears and adding in its place the word ''OTS'';
■ c. In paragraphs (b)(3), (b)(4), (e)(1)(ii), (e)(1)(iii), (e)(2)(i)(B), (e)(2)(i)(E), and (e)(2)(iii)(B), removing the word ''state'' wherever it appears and adding in its place the word ''State''; and
■ d. In paragraph (e)(2)(i) introductory text, removing the word ''shall'' and adding in its place the word ''must'';
■ e. Revising paragraph (e)(2)(i)(C);
■ f. In paragraph (e)(2)(ii), removing the word ''applicant'' and adding in its place the word ''filer''; and
■ g. Revising paragraphs (e)(3) and (6).

.

The revisions read as follows.

§ 5.26 Fiduciary powers of national banks and Federal savings associations.

* * * * *

(e) * * *

(2) * * *

(i) * * *

(C) Sufficient biographical information on proposed senior trust management personnel, as identified by the OCC, to enable the OCC to assess their qualifications, including, if requested by the OCC, legible fingerprints and the Interagency Biographical and Financial Report, available at *www.occ.gov;*

* * * * *

(3) *Expedited review.* An application by an eligible bank or eligible savings

association to exercise fiduciary powers is deemed approved by the OCC as of the 30th day after the application is received by the OCC, unless the OCC notifies the bank or savings association prior to that date that the filing has been removed from expedited review, or the expedited review process is extended, under § 5.13(a)(2).

* * * * *

(6) *Notice of fiduciary activities in additional States.* (i) Except as provided in paragraphs (e)(6)(iii) through (iv) of this section, a national bank or Federal savings association with existing OCC approval to exercise fiduciary powers must provide written notice to the OCC no later than 10 days after it begins to engage in any of the activities specified in § 9.7(d) of this chapter in a State in addition to the State or States described in the application for fiduciary powers that the OCC has approved.

(ii) A notice submitted pursuant to paragraph (e)(6)(i) of this section must identify the new State or States involved, identify the fiduciary activities to be conducted, and describe the extent to which the activities differ materially from the fiduciary activities the national bank or Federal savings association previously conducted.

(iii) No notice under paragraph (e)(6)(i) of this section is required if the national bank or Federal savings association provides the information required by paragraph (e)(6)(ii) of this section through other means, such as a merger application.

(iv) No notice is required if the national bank or Federal savings association is conducting only activities ancillary to its fiduciary business through a trust representative office or otherwise.

* * * * *

■ 22. Amend § 5.30 by:

■ a. In paragraphs (b), (f)(1), (f)(4), (g), (h)(1), and (j), removing the word ''shall'' wherever it appears and adding in its place the word ''must'';

■ b. In paragraph (c)(2), removing ''12 CFR 5.24'' and adding in its place ''§ 5.24'';

■ c. Revising paragraphs (d)(1)(i) and (iii);

■ d. In paragraph (d)(2), removing the word ''*state*'' and adding in its place the word ''*State*'';

■ e. In paragraphs (d)(2), (d)(3), (g), and (h)(4), removing the word ''state'' wherever it appears and adding in its place the word ''State'';

■ f. In paragraph (d)(5), adding a sentence after the second sentence;

■ g. In paragraph (f)(1), removing the phrase ''paragraph (f)(2)'' and adding in its place the phrase ''paragraphs (f)(2) or (f)(3)''; and

■ h. In paragraph (f)(6), removing the phrase ''is not eligible for expedited review, or the expedited review process is extended, under § 5.13(a)(2)'' and adding in its place the phrase ''has been removed from expedited review, or the expedited review process is extended, under § 5.13(a)(2)''.

The revisions read as follows.

§ 5.30 Establishment, acquisition, and relocation of a branch of a national bank.

* * * * *

(d) * * *

(1) * * *

(i) A branch established by a national bank includes a seasonal agency described in 12 U.S.C. 36(c), a mobile facility, a temporary facility, an intermittent facility, or a drop box.

* * * * *

(iii) A branch does not include a remote service unit (RSU) as described in 12 CFR 7.4003. This encompasses RSUs that are automated teller machines (ATMs), including interactive ATMs. A branch also does not include a loan production office, a deposit production office, a trust office, an administrative office, a data processing office, or any other office that does not engage in at least one of the activities in paragraph (d)(1) of this section.

* * * * *

(5) * * * A mobile branch may be stationed continuously at a single location within the geographic area it is approved to serve for a period of up to four months. * * *

■ 23. Amend § 5.31 by:

■ a. In paragraph (a) removing the period after ''1464'' and adding in its place a comma; and adding a comma after ''2907'';

■ b. In paragraphs (b), (f)(1)(i), (f)(3), (i), (j)(2), and (k)(2)(ii) removing the word ''shall'' and adding in its place the word ''must'' wherever it appears;

■ c. In paragraph (c)(2), removing ''12 CFR 5.23'' and adding in its place ''§ 5.23'' and removing ''12 CFR 5.33'' and adding in its place ''§ 5.33'';

■ d. In paragraphs (c)(3) and paragraph (j)(1), removing the word ''HOLA'' and adding in its place the phrase ''Home Owners' Loan Act'' wherever it appears;

■ e. In paragraph (d)(1), removing the word ''*office*'';

■ f. In paragraph (d)(2), removing the word ''*state*'' and adding in its place the word ''*State*'';

■ g. In paragraphs (d)(2), (g)(2), and (j)(2), removing the word ''state'' and adding in its place the word ''State'' wherever it appears;

■ h. In paragraph (f)(1)(iii), removing the word ''Federal'' and removing the phrase ''is not eligible for expedited review, or the expedited review process is extended, under § 5.13(a)(2)'' and adding in its place the phrase ''has been removed from expedited review, or the expedited review process is extended, under § 5.13(a)(2)'';

■ i. In paragraph (f)(2)(ii), removing the phrase '', as defined in § 5.3(l)'';

■ j. In paragraph (f)(2)(iii) introductory text, removing the phrase ''as defined in § 5.3(g)'';

■ k. In the heading to paragraph (j), removing the word ''*HOLA*'' and adding in its place ''*Home Owners' Loan Act*''; and

■ k. Adding paragraph (j)(3).

The addition reads as follows.

§ 5.31 Establishment, acquisition, and relocation of a branch and establishment of an agency office of a Federal savings association.

* * * * *

(j) * * *

(3) For purposes of 12 U.S.C. 1464(m)(1), a branch in the District of Columbia includes any location at which accounts are opened, payments are received, or withdrawals are made. This includes an Automated Teller Machine that performs one or more of these functions.

* * * * *

§ 5.32 [Amended]

■ 24. Amend § 5.32 by:

■ a. In paragraphs (c), (f), (h)(1), and (h)(2), removing the word ''shall'' and adding in its place the word ''must'' wherever it appears ;

■ b. In paragraph (d)(1), removing the phrase ''shall be'' and adding in its place the word ''is'';

■ c. In paragraph (d)(2)(i), removing the word ''shall'' and adding in its place the word ''will'';

■ d. In paragraph (e), removing the phrase ''his or her'' and adding in its place the word ''their'';

■ e. In paragraph (f), removing the word Applicants'' and adding in its place the word ''Filers''; and

■ f. In paragraph (h)(1), removing the phrase ''An applicant'' and adding in its place the phrase ''A filer''; and

■ g. In paragraph (h)(2), removing the word ''applicant'' and adding in its place the word ''filer''.

■ 25. Revise § 5.33 to read as follows:

§ 5.33 Business combinations involving a national bank or Federal savings association.

(a) *Authority.* 12 U.S.C. 24(Seventh), 93a, 181, 214a, 214b, 215, 215a, 215a–1, 215a–3, 215b, 215c, 1462a, 1463, 1464, 1467a, 1828(c), 1831u, 2903, and 5412(b)(2)(B).

(b) *Scope.* This section sets forth the provisions governing business combinations and the standards for:

(1) OCC review and approval of an application by a national bank or a Federal savings association for a business combination resulting in a national bank or Federal savings association; and

(2) Requirements of notices and other procedures for national banks and Federal savings associations involved in other combinations in which a national bank or Federal savings association is not the resulting institution.

(c) *Licensing requirements.* As prescribed by this section, a national bank or Federal savings association must submit an application and obtain prior OCC approval for a business combination when the resulting institution is a national bank or Federal savings association. As prescribed by this section, a national bank or Federal savings association must give notice to the OCC prior to engaging in any other combination where the resulting institution will not be a national bank or Federal savings association.[1] A national bank must submit an application and obtain prior OCC approval for any merger between the national bank and one or more of its nonbank affiliates.

(d) *Definitions.* For purposes of this section:

(1) *Bank* means any national bank or any State bank.

(2) *Business combination* means:

(i) Any merger or consolidation between a national bank or a Federal savings association and one or more depository institutions or State trust companies, in which the resulting institution is a national bank or Federal savings association;

(ii) In the case of a Federal savings association, any merger or consolidation with a credit union in which the resulting institution is a Federal savings association;

(iii) In the case of a national bank, any merger between a national bank and one or more of its nonbank affiliates;

(iv) The acquisition by a national bank or a Federal savings association of all, or substantially all, of the assets of another depository institution; or

(v) The assumption by a national bank or a Federal savings association of any deposit liabilities of another insured depository institution or any deposit accounts or other liabilities of a credit union or any other institution that will become deposits at the national bank or Federal savings association.

(3) *Business reorganization* means either:

(i) A business combination between eligible banks and eligible savings associations, or between an eligible bank or an eligible savings association and an eligible depository institution, that are controlled by the same holding company or that will be controlled by the same holding company prior to the combination; or

(ii) A business combination between an eligible bank or an eligible savings association and an interim national bank or interim Federal savings association chartered in a transaction in which a person or group of persons exchanges its shares of the eligible bank or eligible savings association for shares of a newly formed holding company and receives after the transaction substantially the same proportional share interest in the holding company as it held in the eligible bank or eligible savings association (except for changes in interests resulting from the exercise of dissenters' rights), and the reorganization involves no other transactions involving the bank or savings association.

(4) *Company* means a corporation, limited liability company, partnership, business trust, association, or similar organization.

(5) For business combinations under paragraphs (g)(4) and (5) of this section, a company or shareholder is deemed to *control* another company if:

(i) Such company or shareholder, directly or indirectly, or acting through one or more other persons owns, controls, or has power to vote 25 percent or more of any class of voting securities of the other company; or

(ii) Such company or shareholder controls in any manner the election of a majority of the directors or trustees of the other company. No company is deemed to own or control another company by virtue of its ownership or control of shares in a fiduciary capacity.

(6) *Credit union* means a financial institution subject to examination by the National Credit Union Administration Board.

(7) *Home State* means, with respect to a national bank, the State in which the main office of the national bank is located and, with respect to a State bank, the State by which the bank is chartered.

(8) *Interim national bank or interim Federal savings association* means a national bank or Federal savings association that does not operate independently but exists solely as a vehicle to accomplish a business combination.

(9) *Nonbank affiliate* of a national bank means any company (other than a bank or Federal savings association) that controls, is controlled by, or is under common control with the national bank.

(10) *Other combination* means:

(i) Any merger or consolidation between a national bank or a Federal savings association and one or more depository institutions or State trust companies, in which the resulting institution is not a national bank or Federal savings association;

(ii) In the case of a Federal stock savings association, any merger or consolidation with a credit union in which the resulting institution is a credit union;

(iii) The transfer by a national bank or a Federal savings association of any deposit liabilities to another insured depository institution, a credit union or any other institution; or

(iv) The acquisition by a national bank or a Federal savings association of all, or substantially all, of the assets, or the assumption of all or substantially all of the liabilities, of any company other than a depository institution.

(11) *Savings association* and *State savings association* have the meaning set forth in section 3(b) of the Federal Deposit Insurance Act, 12 U.S.C. 1813(b).

(12) *State trust company* means a trust company organized under State law that is not engaged in the business of receiving deposits, other than trust funds.

(e) *Policy and related filing requirements*—(1) *Factors*—(i) *In general.* When the OCC evaluates any application for a business combination, the OCC considers the following factors:

(A) The capital level of any resulting national bank or Federal savings association;

(B) The conformity of the transaction to applicable law, regulation, and supervisory policies;

(C) The purpose of the transaction;

(D) The impact of the transaction on safety and soundness of the national bank or Federal savings association; and

(E) The effect of the transaction on the national bank's or Federal savings association's shareholders (or members in the case of a mutual savings association), depositors, other creditors, and customers.

(ii) *Bank Merger Act.* When the OCC evaluates an application for a business combination under the Bank Merger Act, the OCC also considers the following factors:

(A) *Competition.* (*1*) The OCC considers the effect of a proposed

[1] Other combinations, as defined in paragraph (d)(10) of this section, do not require an application under this section. However, some may require an application under § 5.53.

business combination on competition. The filer must provide a competitive analysis of the transaction, including a definition of the relevant geographic market or markets. A filer may refer to the Comptroller's Licensing Manual for procedures to expedite its competitive analysis.

(*2*) The OCC will deny an application for a business combination if the combination would result in a monopoly or would be in furtherance of any combination or conspiracy to monopolize or attempt to monopolize the business of banking in any part of the United States. The OCC also will deny any proposed business combination whose effect in any section of the United States may be substantially to lessen competition, or tend to create a monopoly, or which in any other manner would be in restraint of trade, unless the probable effects of the transaction in meeting the convenience and needs of the community clearly outweigh the anticompetitive effects of the transaction. For purposes of weighing against anticompetitive effects, a business combination may have favorable effects in meeting the convenience and needs of the community if the depository institution being acquired has limited long-term prospects, or if the resulting national bank or Federal savings association will provide significantly improved, additional, or less costly services to the community.

(B) *Financial and managerial resources and future prospects.* The OCC considers the financial and managerial resources and future prospects of the existing or proposed institutions.

(C) *Convenience and needs of community.* The OCC considers the probable effects of the business combination on the convenience and needs of the community served. The filer must describe these effects in its application, including any planned office closings or reductions in services following the business combination and the likely impact on the community. The OCC also considers additional relevant factors, including the resulting national bank's or Federal savings association's ability and plans to provide expanded or less costly services to the community.

(D) *Money laundering.* The OCC considers the effectiveness of any insured depository institution involved in the business combination in combating money laundering activities, including in overseas branches.

(E) *Financial stability.* The OCC considers the risk to the stability of the United States banking and financial system.

(F) *Deposit concentration limit.* The OCC will not approve a transaction that would violate the deposit concentration limit in 12 U.S.C. 1828(c)(13) for interstate merger transactions, as defined in 12 U.S.C. 1828(c)(13)(C)(i).

(iii) *Community Reinvestment Act*—(A) *In General.* The OCC takes into account the filer's Community Reinvestment Act (CRA) record of performance in considering an application for a business combination. The OCC's conclusion of whether the CRA performance is or is not consistent with approval of an application is considered in conjunction with the other factors of this section.

(B) *Interstate mergers under 12 U.S.C. 1831u.* The OCC considers the CRA record of performance of the filer and its resulting bank affiliates and the filer's record of compliance with applicable State community reinvestment laws when required by 12 U.S.C. 1831u(b)(3).

(C) *CRA Sunshine.* A filer must:

(*1*) Disclose whether it has entered into and disclosed a covered agreement, as defined in 12 CFR 35.2, in accordance with 12 CFR 35.6 and 35.7; and

(*2*) Provide summaries of, or documents relating to, all substantive discussions with respect to the development of the content of a covered agreement disclosed in (e)(1)(iii)(C)(*1*) that include the names of participants, dates, and synopsis of the discussions.

(iv) *Interstate mergers under 12 U.S.C. 1831u.* The OCC considers the standards and requirements contained in 12 U.S.C. 1831u for interstate merger transactions between insured banks, when applicable.

(2) *Acquisition and retention of branches.* A filer must disclose the location of any branch it will acquire and retain in a business combination, including approved but unopened branches. The OCC considers the acquisition and retention of a branch under the standards set out in § 5.30 or § 5.31, as applicable, but it does not require a separate application.

(3) *Subsidiaries.* (i) A filer must identify any subsidiary, financial subsidiary investment, bank service company investment, service corporation investment, or other equity investment to be acquired in a business combination and state the activities of each subsidiary or other company in which the filer would be acquiring an investment. The OCC does not require a separate application or notice under §§ 5.34, 5.35, 5.36, 5.38, 5.39, 5.58, and 5.59.

(ii) A national bank filer proposing to acquire, through a business combination, a subsidiary, financial subsidiary investment, bank service company investment, service corporation investment, or other equity investment of any entity other than a national bank must provide the same information and analysis of the subsidiary's activities, or of the investment, that would be required if the filer were establishing the subsidiary, or making such investment, pursuant to §§ 5.34, 5.35, 5.36, or 5.39.

(iii) A Federal savings association filer proposing to acquire, through a business combination, a subsidiary, bank service company investment, service corporation investment, or other equity investment of any entity other than a Federal savings association must provide the same information and analysis of the subsidiary's activities, or of the investment, that would be required if the filer were establishing the subsidiary, or making such investment, pursuant to §§ 5.35, 5.38, 5.58, or 5.59.

(4) *Interim national bank or interim Federal savings association*—(i) *Application.* A filer for a business combination that plans to use an interim national bank or interim Federal savings association to accomplish the transaction must file an application to organize an interim national bank or interim Federal savings association as part of the application for the related business combination.

(ii) *Conditional approval.* The OCC grants conditional preliminary approval to form an interim national bank or interim Federal savings association when it acknowledges receipt of the application for the related business combination.

(iii) *Corporate status.* An interim national bank or interim Federal savings association becomes a legal entity and may enter into legally valid agreements when it has filed, and the OCC has accepted, the interim national bank's duly executed articles of association and organization certificate or the Federal savings association's charter and bylaws. OCC acceptance occurs:

(A) On the date the OCC advises the interim national bank that its articles of association and organization certificate are acceptable or advises the interim Federal savings association that its charter and bylaws are acceptable; or

(B) On the date the interim national bank files articles of association and an organization certificate that conform to the form for those documents provided by the OCC in the Comptroller's Licensing Manual or the date the interim Federal savings association files

a charter and bylaws that conform to the requirements set out in this part 5.

(iv) *Other corporate procedures.* A filer should consult the Comptroller's Licensing Manual to determine what other information is necessary to complete the chartering of the interim national bank as a national bank or the interim Federal savings association as a Federal savings association.

(5) *Nonconforming assets.* (i) A filer must identify any nonconforming activities and assets, including nonconforming subsidiaries, of other institutions involved in the business combination that will not be disposed of or discontinued prior to consummation of the transaction. The OCC generally requires a national bank or Federal savings association to divest or conform nonconforming assets, or discontinue nonconforming activities, within a reasonable time following the business combination.

(ii) Any resulting Federal savings association must conform to the requirements of sections 5(c) and 10(m) of the Home Owners' Loan Act (12 U.S.C. 1464(c) and 1467a(m)) within the time period prescribed by the OCC.

(6) *Fiduciary powers.* (i) A filer must state whether the resulting national bank or Federal savings association intends to exercise fiduciary powers pursuant to § 5.26(b).

(ii) If a filer intends to exercise fiduciary powers after the combination and requires OCC approval for such powers, the filer must include the information required under § 5.26(e)(2).

(7) *Expiration of approval.* Approval of a business combination, and conditional approval to form an interim national bank or interim Federal savings association, if applicable, expires if the business combination is not consummated within six months after the date of OCC approval, unless the OCC grants an extension of time.

(8) *Adequacy of disclosure.* (i) A filer must inform shareholders of all material aspects of a business combination and must comply with any applicable requirements of the Federal securities laws and securities regulations of the OCC. Accordingly, a filer must ensure that all proxy and information statements prepared in connection with a business combination do not contain any untrue or misleading statement of a material fact, or omit to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading.

(ii) A national bank or Federal savings association filer with one or more classes of securities subject to the registration provisions of section 12(b) or (g) of the Securities Exchange Act of 1934, 15 U.S.C. 78*l*(b) or 78*l*(g), must file preliminary proxy material or information statements for review with the Director, Bank Advisory, OCC, Washington, DC 20219. Any other filer must submit the proxy materials or information statements it uses in connection with the combination to the appropriate OCC licensing office no later than when the materials are sent to the shareholders.

(f) *Exceptions to rules of general applicability*—(1) *National bank or Federal savings association filer*—(i) *In general.* Sections 5.8, 5.10, and 5.11 do not apply to this section. However, if the OCC concludes that an application presents significant or novel policy, supervisory, or legal issues, the OCC may determine that some or all provisions in §§ 5.8, 5.10 and 5.11 apply.

(ii) *Statutory notice.* If an application is subject to the Bank Merger Act or to another statute that requires notice to the public, a national bank or Federal savings association filer must follow the public notice requirements contained in 12 U.S.C. 1828(c)(3) or the other statute and §§ 5.8(b) through 5.8(e), 5.10, and 5.11.

(2) *Interim national bank or interim Federal savings association.* Sections 5.8, 5.10, and 5.11 do not apply to an application to organize an interim national bank or interim Federal savings association. However, if the OCC concludes that an application presents significant or novel policy, supervisory, or legal issues, the OCC may determine that any or all parts of §§ 5.8, 5.10, and 5.11 apply. The OCC treats an application to organize an interim national bank or interim Federal savings association as part of the related application to engage in a business combination and does not require a separate public notice and public comment process.

(3) *State bank, or State savings association, State trust company, or credit union as resulting institution.* Sections 5.7 through 5.13 do not apply to transactions covered by paragraphs (g)(7) through (g)(9) of this section.

(g) *Provisions governing consolidations and mergers with different types of entities*—(1) *Consolidations and mergers under 12 U.S.C. 215 or 215a of a national bank with other national banks and State banks as defined in 12 U.S.C. 215b(1) resulting in a national bank.* A national bank entering into a consolidation or merger authorized pursuant to 12 U.S.C. 215 or 215a, respectively, is subject to the approval procedures and requirements with respect to treatment of dissenting shareholders set forth in those provisions.

(2) *Interstate consolidations and mergers under 12 U.S.C. 215a–1 resulting in a national bank*—(i) With the approval of the OCC, an insured national bank may consolidate or merge with an insured out-of-State bank, as defined in 12 U.S.C. 1831u(g)(8), with the national bank as the resulting institution.

(ii) Unless it has elected to follow the procedures set out in paragraph (h) of this section, the resulting national bank entering into the consolidation or merger must comply with the procedures of 12 U.S.C. 215 or 215a, as applicable.

(iii) Unless it has elected to follow the procedures applicable to State banks under paragraph (h)(1)(i), any national bank that will not be the resulting bank in a consolidation or merger pursuant to 12 U.S.C. 215a–1 must comply with the procedures of 12 U.S.C. 215 or 215a, as applicable.

(iv) *Corporate existence.* The corporate existence of each bank participating in a consolidation or merger continues in the resulting national bank, and all the rights, franchises, property, appointments, liabilities, and other interests of the participating bank are transferred to the resulting national bank, as set forth in 12 U.S.C. 215(b), (e) and (f) or 12 U.S.C. 215a(a), (e), and (f), as applicable.

(3) *Consolidations and mergers of a national bank with Federal savings associations under 12 U.S.C. 215c resulting in a national bank.* (i) With the approval of the OCC, any national bank and any Federal savings association may consolidate or merge with a national bank as the resulting institution by complying with the following procedures:

(A) Unless it has elected to follow the procedures set out in paragraph (h) of this section, a national bank entering into the consolidation or merger must follow the procedures of 12 U.S.C. 215 or 215a, respectively, as if the Federal savings association were a national bank.

(B)(*1*) A Federal savings association entering into the consolidation or merger must comply with the requirements of paragraph (n) of this section and follow the procedures set out in paragraph (o) of this section.

(*2*) For purposes of this paragraph (g)(3), a combination in which a national bank acquires all or substantially all of the assets, or assumes all or substantially all of the liabilities, of a Federal savings association will be treated as a

consolidation for the Federal savings association.

(ii)(A) Unless the national bank has elected to follow the procedures set out in paragraph (h) of this section, national bank shareholders who dissent from a plan to consolidate may receive in cash the value of their national bank shares if they comply with the requirements of 12 U.S.C. 215 as if the Federal savings association were a national bank.

(B) Unless the Federal savings association has elected to follow the procedures applicable to State savings associations pursuant to paragraph (o)(1)(i)(A) of this section, Federal savings association shareholders who dissent from a plan to consolidate or merge may receive in cash the value of their Federal savings association shares if they comply with the requirements of 12 U.S.C. 215 or 215a as if the Federal savings association were a national bank.

(C) Unless the national bank or Federal savings association has elected to follow the procedures applicable to State banks or State savings associations, respectively, pursuant to paragraph (h)(1)(i) or (o)(1)(i)(A) of this section, respectively, the OCC will conduct an appraisal or reappraisal of the value of a national bank or Federal savings association held by dissenting shareholders in accordance with the provisions of 12 U.S.C. 215 or 215a, as applicable, except that the costs and expenses of any appraisal or reappraisal may be apportioned and assessed by the Comptroller as he or she may deem equitable against all or some of the parties. In making this determination the Comptroller will consider whether any party has acted arbitrarily or not in good faith in respect to the rights provided by this paragraph.

(iii) The consolidation or merger agreement must address the effect upon, and the terms of the assumption of, any liquidation account of any participating institution by the resulting institution.

(4) *Mergers of a national bank with its nonbank affiliates under 12 U.S.C. 215a–3 resulting in a national bank.* (i) With the approval of the OCC, a national bank may merge with one or more of its nonbank affiliates, with the national bank as the resulting institution, in accordance with the provisions of this paragraph, provided that the law of the State or other jurisdiction under which the nonbank affiliate is organized allows the nonbank affiliate to engage in such mergers. If the national bank is an insured bank, the transaction is also subject to approval by the FDIC under the Bank Merger Act, 12 U.S.C. 1828(c).

(ii) Unless it has elected to follow the procedures set out in paragraph (h) of this section, a national bank entering into the merger must follow the procedures of 12 U.S.C. 215a as if the nonbank affiliate were a State bank, except as otherwise provided herein.

(iii) A nonbank affiliate entering into the merger must follow the procedures for such mergers set out in the law of the State or other jurisdiction under which the nonbank affiliate is organized.

(iv) The rights of dissenting shareholders and appraisal of dissenters' shares of stock in the nonbank affiliate entering into the merger must be determined in the manner prescribed by the law of the State or other jurisdiction under which the nonbank affiliate is organized.

(v) The corporate existence of each institution participating in the merger continues in the resulting national bank, and all the rights, franchises, property, appointments, liabilities, and other interests of the participating institutions are transferred to the resulting national bank, as set forth in 12 U.S.C. 215a(a), (e), and (f) in the same manner and to the same extent as in a merger between a national bank and a State bank under 12 U.S.C. 215a(a), as if the nonbank affiliate were a State bank.

(5) *Mergers of an uninsured national bank with its nonbank affiliates under 12 U.S.C. 215a–3 resulting in a nonbank affiliate.* (i) With the approval of the OCC, a national bank that is not an insured bank as defined in 12 U.S.C. 1813(h) may merge with one or more of its nonbank affiliates, with the nonbank affiliate as the resulting entity, in accordance with the provisions of this paragraph, provided that the law of the State or other jurisdiction under which the nonbank affiliate is organized allows the nonbank affiliate to engage in such mergers.

(ii) Unless it has elected to follow the procedures applicable to State banks under paragraph (h)(1)(i) of this section, a national bank entering into the merger must follow the procedures of 12 U.S.C. 214a, as if the nonbank affiliate were a State bank, except as otherwise provided in this section.

(iii) A nonbank affiliate entering into the merger must follow the procedures for such mergers set out in the law of the State or other jurisdiction under which the nonbank affiliate is organized.

(iv)(A) National bank shareholders who dissent from an approved plan to merge may receive in cash the value of their national bank shares if they comply with the requirements of 12 U.S.C. 214a as if the nonbank affiliate were a State bank. The OCC may conduct an appraisal or reappraisal of dissenters' shares of stock in a national bank involved in the merger if all parties agree that the determination is final and binding on each party and agree on how the total expenses of the OCC in making the appraisal will be divided among the parties and paid to the OCC.

(B) The rights of dissenting shareholders and appraisal of dissenters' shares of stock in the nonbank affiliate involved in the merger must be determined in the manner prescribed by the law of the State or other jurisdiction under which the nonbank affiliate is organized.

(v) The corporate existence of each entity participating in the merger continues in the resulting nonbank affiliate, and all the rights, franchises, property, appointments, liabilities, and other interests of the participating national bank are transferred to the resulting nonbank affiliate as set forth in 12 U.S.C. 214b, in the same manner and to the same extent as in a merger between a national bank and a State bank under 12 U.S.C. 214a, as if the nonbank affiliate were a State bank.

(6) *Consolidations and mergers of a Federal savings association with other Federal savings associations, national banks, State banks, State savings banks, State savings associations, State trust companies, or credit unions resulting in a Federal savings association.* (i) With the approval of the OCC, a Federal savings association may consolidate or merge with another Federal savings association, a national bank, a State bank, a State savings association, a State trust company, or a credit union with the Federal savings association as the resulting institution by complying with the following procedures:

(A)(*1*) The filer Federal savings association must comply with the requirements of paragraph (n) of this section and follow the procedures set out in paragraph (o) of this section.

(*2*) For purposes of this paragraph (g)(6), a combination in which a Federal savings association acquires all or substantially all of the assets, or assumes all or substantially all of the liabilities, of another other participating institution will be treated as a consolidation for the acquiring Federal savings association and as a consolidation by a Federal savings association whose assets are acquired, if any.

(B)(*1*) Unless it has elected to follow the procedures applicable to State banks under paragraph (h)(1)(i) of this section, a national bank entering into a merger or consolidation with a Federal savings

association when the resulting institution will be a Federal savings association must comply with the requirements of 12 U.S.C. 214a and 12 U.S.C. 214c as if the Federal savings association were a State bank. However, for these purposes the references in 12 U.S.C. 214c to ''law of the State in which such national banking association is located'' and ''any State authority'' mean ''laws and regulations governing Federal savings associations'' and ''Office of the Comptroller of the Currency'' respectively.

(*2*) Unless the national bank has elected to follow the procedures applicable to State banks under paragraph (h)(1)(i) of this section, national bank shareholders who dissent from a plan to merge or consolidate may receive in cash the value of their national bank shares if they comply with the requirements of 12 U.S.C. 214a as if the Federal savings association were a State bank. The OCC will conduct an appraisal or reappraisal of the value of the national bank shares held by dissenting shareholders in accordance with the provisions of 12 U.S.C. 214a, except that the costs and expenses of any appraisal or reappraisal may be apportioned and assessed by the Comptroller as he or she may deem equitable against all or some of the parties. In making this determination the Comptroller will consider whether any party has acted arbitrarily or not in good faith in respect to the rights provided by this paragraph.

(C)(*1*) A Federal savings association entering into a merger or consolidation with another Federal savings association when the resulting institution will be the other Federal savings association must comply with the requirements of paragraph (n) of this section and the procedures of paragraph (o) of this section.

(*2*) Unless the Federal savings association has elected to follow the procedures applicable to State savings associations under paragraph (o)(1)(i)(A), Federal savings association shareholders who dissent from a plan to merge or consolidate may receive in cash the value of their Federal savings association shares if they comply with the requirements of 12 U.S.C. 214a as if the other Federal savings association were a State bank. The OCC will conduct an appraisal or reappraisal of the value of the Federal savings association shares held by dissenting shareholders in accordance with the provisions of 12 U.S.C. 214a, except that the costs and expenses of any appraisal or reappraisal may be apportioned and assessed by the Comptroller as he or she may deem equitable against all or some of the parties. In making this determination the Comptroller will consider whether any party has acted arbitrarily or not in good faith in respect to the rights provided by this paragraph.

(*3*) Unless the Federal savings association has elected to follow the procedures applicable to State savings associations under paragraph (o)(1)(i)(A), the plan of merger or consolidation must provide the manner of disposing of the shares of the resulting Federal savings association not taken by the dissenting shareholders of the Federal savings association.

(D)(*1*) A State bank, State savings association, State trust company, or credit union entering into a consolidation or merger with a Federal savings association when the resulting institution will be a Federal savings association must follow the procedures for such consolidations or mergers set out in the law of the State or other jurisdiction under which the State bank, State savings association, State trust company, or credit union is organized.

(*2*) The rights of dissenting shareholders and appraisal of dissenters' shares of stock in the State bank, State savings association, or State trust company, entering into the consolidation or merger will be determined in the manner prescribed by the law of the State or other jurisdiction under which the State bank, State savings association, or State trust company is organized.

(ii) The consolidation or merger agreement must address the effect upon, and the terms of the assumption of, any liquidation account of any participating institution by the resulting institution.

(7) *Consolidations and mergers under 12 U.S.C. 214a of a national bank with State banks resulting in a State bank as defined in 12 U.S.C. 214(a)*—(i) *In general.* Prior OCC approval is not required for the merger or consolidation of a national bank with a State bank as defined in 12 U.S.C. 214(a). Termination of a national bank's existence and status as a national banking association is automatic, and its charter cancelled, upon completion of the statutory and regulatory requirements for engaging in the consolidation or merger and consummation of the consolidation or merger.

(ii) *Procedures.* A national bank desiring to merge or consolidate with a State bank as defined in 12 U.S.C. 214(a) when the resulting institution will be a State bank must comply with the requirements and follow the procedures of 12 U.S.C. 214a and 214c and must provide notice to the OCC under paragraph (k) of this section.

(iii) *Dissenters' rights and appraisal procedures.* National bank shareholders who dissent from a plan to merge or consolidate may receive in cash the value of their national bank shares if they comply with the requirements of 12 U.S.C. 214a. The OCC conducts an appraisal or reappraisal of the value of the national bank shares held by dissenting shareholders as provided for in 12 U.S.C. 214a.

(iv) *Liquidation account.* The consolidation or merger agreement must address the effect upon, and the terms of the assumption of, any liquidation account of any participating institution by the resulting institution.

(8) *Interstate consolidations and mergers between an insured national bank and insured State banks resulting in a State bank.*—(i) *In general.* Prior OCC approval is not required for the merger or consolidation of an insured national bank with an insured out-of-State State bank, as defined in 12 U.S.C. 1831u(g)(8), with the State bank as the resulting institution, that has been approved by the appropriate Federal banking agency for the State bank. Termination of a national bank's existence and status as a national banking association is automatic, and its charter cancelled, upon completion of the statutory and regulatory requirements for engaging in the consolidation or merger and consummation of the consolidation or merger.

(ii) *Procedures.* Unless it has elected to follow the procedures applicable to State banks under paragraph (h)(1)(i) of this section, the national bank entering into the consolidation or merger must comply with the procedures of 12 U.S.C. 214a, as applicable.

(iii) *Notice.* The national bank must provide a notice to the OCC under paragraph (k) of this section.

(9) *Consolidations and mergers of a Federal savings association with State banks, State savings banks, State savings associations, State trust companies, or credit unions resulting in a State bank, State savings bank, State savings association, State trust company, or credit union*—(i) *Policy.* Prior OCC approval is not required for the merger or consolidation of a Federal savings association with a State bank, State savings bank, State savings association, State trust company, or credit union when the resulting institution will be a State institution or credit union. Termination of a national bank's or Federal savings association's existence and status as a national banking association or Federal savings association is automatic, and its charter cancelled, upon completion of the

statutory and regulatory requirements for engaging in the consolidation or merger and consummation of the consolidation or merger.

(ii) *Procedures.* (A) A Federal savings association desiring to merge or consolidate with a State bank, State savings bank, State savings association, State trust company, or credit union when the resulting institution will be a State institution or credit union must comply with the requirements of paragraph (n) of this section and the procedures of paragraph (o) of this section and must provide notice to the OCC under paragraph (k) of this section.

(B) For purposes of this paragraph (g)(9), a combination in which a State bank, State savings bank, State savings association, State trust company, or credit union acquires all or substantially all of the assets, or assumes all or substantially all of the liabilities, of a Federal savings association must be treated as a consolidation by the Federal savings association.

(iii) *Dissenters' rights and appraisal procedures.* (A) Unless the Federal savings association has elected to follow the procedures applicable to State savings associations under paragraph (o)(1)(i)(A), Federal savings association shareholders who dissent from a plan to merge or consolidate may receive in cash the value of their Federal savings association shares if they comply with the requirements of 12 U.S.C. 214a as if the Federal savings association were a national bank. The OCC conducts an appraisal or reappraisal of the value of the Federal savings association shares held by dissenting shareholders only if all parties agree that the determination will be final and binding. The parties also must agree on how the total expenses of the OCC in making the appraisal will be divided among the parties and paid to the OCC.

(B) Unless the Federal savings association has elected to follow the procedures applicable to State savings associations under paragraph (o)(1)(i)(A), the plan of merger or consolidation must provide the manner of disposing of the shares of the resulting State institution not taken by the dissenting shareholders of the Federal savings association.

(iv) *Liquidation account.* The consolidation or merger agreement must address the effect upon, and the terms of the assumption of, any liquidation account of any participating institution by the resulting institution.

(h) *Procedural requirements for national bank combinations*—(1) *Permissible elections.* A national bank participating in a combination pursuant to paragraph (g)(2), (g)(3), (g)(4), (g)(5), (g)(6), or (g)(8) of this section may elect to follow with respect to the combination:

(i) The procedures applicable to a State bank chartered by the State where the national bank's main office is located; or

(ii) Paragraph (p) of this section, if applicable.

(2) *Rules of Construction.* For purposes of paragraph (h)(1) of this section:

(i) Any references to a State agency in the applicable State procedures should be read as referring to the OCC; and

(ii) Unless otherwise specified in Federal law, all filings required by the applicable State procedures must be made to the OCC.

(i) *Expedited review for business reorganizations and streamlined applications.* A filing that qualifies as a business reorganization as defined in paragraph (d)(3) of this section, or a filing that qualifies as a streamlined application as described in paragraph (j) of this section, is deemed approved by the OCC as of the 15th day after the close of the comment period, unless the OCC notifies the filer that the filing is not eligible for expedited review, or the expedited review process is extended, under § 5.13(a)(2). An application under this paragraph must contain all necessary information for the OCC to determine if it qualifies as a business reorganization or streamlined application.

(j) *Streamlined applications.* (1) A filer may qualify for a streamlined business combination application in the following situations:

(i) At least one party to the transaction is an eligible bank or eligible savings association, and all other parties to the transaction are eligible banks, eligible savings associations, or eligible depository institutions, the resulting national bank or resulting Federal savings association will be well capitalized immediately following consummation of the transaction, and the total assets of the target institution are no more than 50 percent of the total assets of the acquiring bank or Federal savings association, as reported in each institution's Consolidated Report of Condition and Income filed for the quarter immediately preceding the filing of the application;

(ii) The acquiring bank or Federal savings association is an eligible bank or eligible savings association, the target bank or savings association is not an eligible bank, eligible savings association, or an eligible depository institution, the resulting national bank or resulting Federal savings association will be well capitalized immediately following consummation of the transaction, and the filers in a prefiling communication request and obtain approval from the appropriate OCC licensing office to use the streamlined application;

(iii) The acquiring bank or Federal savings association is an eligible bank or eligible savings association, the target bank or savings association is not an eligible bank, eligible savings association, or an eligible depository institution, the resulting bank or resulting Federal savings association will be well capitalized immediately following consummation of the transaction, and the total assets acquired do not exceed 10 percent of the total assets of the acquiring national bank or acquiring Federal savings association, as reported in each institution's Consolidated Report of Condition and Income filed for the quarter immediately preceding the filing of the application; or

(iv) In the case of a transaction under paragraph (g)(4) of this section, the acquiring bank is an eligible bank, the resulting national bank will be well capitalized immediately following consummation of the transaction, the filers in a prefiling communication request and obtain approval from the appropriate OCC licensing office to use the streamlined application, and the total assets acquired do not exceed 10 percent of the total assets of the acquiring national bank, as reported in the bank's Consolidated Report of Condition and Income filed for the quarter immediately preceding the filing of the application.

(2) Notwithstanding paragraph (j)(1) of this section, a filer does not qualify for a streamlined business combination application if the transaction is part of a conversion under part 192 of this chapter.

(3) When a business combination qualifies for a streamlined application, the filer should consult the Comptroller's Licensing Manual to determine the abbreviated application information required by the OCC. The OCC encourages prefiling communications between the filers and the appropriate OCC licensing office before filing under paragraph (j) of this section.

(k) *Exit notice to OCC*—(1) *Notice required.* As provided in paragraphs (g)(7)(ii), (g)(8)(iii), and (g)(9)(ii) of this section, a national bank or Federal savings association engaging in a consolidation or merger in which it is not the filer and the resulting institution must file a notice rather than an application to the appropriate OCC licensing office advising of its intention.

(2) *Timing of notice.* The national bank or Federal savings association must submit the notice at the time the application to merge or consolidate is filed with the responsible agency under the Bank Merger Act, 12 U.S.C. 1828(c), or if there is no such filing then no later than 30 days prior to the effective date of the merger or consolidation.

(3) *Content of notice.* The notice must include the following:

(i)(A) A short description of the material features of the transaction, the identity of the acquiring institution, the identity of the State or Federal regulator to whom the application was made, and the date of the application; or

(B) A copy of a filing made with another Federal or State regulatory agency seeking approval from that agency for the transaction under the Bank Merger Act or other applicable statute;

(ii) The planned consummation date for the transaction;

(iii) Information to demonstrate compliance by the national bank or Federal savings association with applicable requirements to engage in the transactions (*e.g.,* board approval or shareholder or accountholder requirements); and

(iv) If the national bank or Federal savings association submitting the notice maintains a liquidation account established pursuant to part 192 of this chapter, the notice must state that the resulting institution will assume such liquidation account.

(4) *Termination of status.* The national bank or Federal savings association must advise the OCC when the transaction is about to be consummated. Termination of a national bank's or Federal savings association's existence and status as a national banking association or Federal savings association is automatic, and its charter cancelled, upon completion of the statutory and regulatory requirements and consummation of the consolidation or merger. When the national bank or Federal savings association files the notice under paragraph (k)(1) of this section, the OCC provides instructions to the national bank or Federal savings association for terminating its status as a national bank or Federal savings association, including surrendering its charter to the OCC immediately after consummation of the transaction.

(5) *Expiration.* If the action contemplated by the notice is not completed within six months after the OCC's receipt of the notice, a new notice must be submitted to the OCC, unless the OCC grants an extension of time.

(l) *Mergers and consolidations; transfer of assets and liabilities to the resulting institution.* (1) In any consolidation or merger in which the resulting institution is a national bank or Federal savings association, on the effective date of the merger or consolidation, all assets and property (real, personal and mixed, tangible and intangible, choses in action, rights, and credits) then owned by each participating institution or which would inure to any of them, immediately by operation of law and without any conveyance, transfer, or further action, become the property of the resulting national bank or Federal savings association. The resulting national bank or Federal savings association is deemed to be a continuation of the entity of each participating institution, and will succeed to such rights and obligations of each participating institution and the duties and liabilities connected therewith.

(2) The authority in paragraph (l)(1) of this section is in addition to any authority granted by applicable statutes for specific transactions and is subject to the National Bank Act, the Home Owners' Loan Act, and other applicable statutes.

(m) *Certification of combination; effective date.* (1) When a national bank or Federal savings association is the filer and will be the resulting entity in a consolidation or merger, after receiving approval from the OCC, it must complete any remaining steps needed to complete the transaction, provide the OCC with a certification that all other required regulatory or shareholder approvals have been obtained, and inform the OCC of the planned consummation date.

(2) When the transaction is consummated, the filer must notify the OCC of the consummation date. The OCC will issue a letter certifying that the combination was effective on the date specified in the filer's notice.

(n) *Authority for and certain limits on business combinations and other transactions by Federal savings associations.* (1) Federal savings associations may enter into business combinations only in accordance with this section, the Bank Merger Act, and sections 5(d)(3)(A) and 10(s) of the Home Owners' Loan Act (12 U.S.C. 1464(d)(3)(A) and 1467a(s)).

(2) A Federal savings association may consolidate or merge with another depository institution, a State trust company or a credit union, may engage in another business combination listed in paragraphs (d)(2)(iv) and (v) of this section, or may engage in any other combination listed in paragraph (d)(10), provided that:

(i) The combination is in compliance with, and receives all approvals required under, any applicable statutes and regulations;

(ii) Any resulting Federal savings association meets the requirements for insurance of accounts; and

(iii) A consolidation or merger involving a mutual savings association or the transfer of all or substantially all of the deposits of a mutual savings association must result in a mutually held depository institution that is insured by the FDIC, unless:

(A) The transaction is approved under part 192 governing mutual to stock conversions;

(B) The transaction involves a mutual holding company reorganization under 12 U.S.C. 1467a(o) or a similar transaction under State law; or

(C) The transaction is part of a voluntary liquidation for which the OCC has provided non-objection under § 5.48.

(3) Where the resulting institution is a Federal mutual savings association, the OCC may approve a temporary increase in the number of directors of the resulting institution provided that the association submits a plan for bringing the board of directors into compliance with the requirements of § 5.21(e) within a reasonable period of time.

(4)(i) The Federal savings associations described in paragraph (n)(4)(ii) of this section below must provide affected accountholders with a notice of a proposed account transfer and an option of retaining the account in the transferring Federal savings association. The notice must allow affected accountholders at least 30 days to consider whether to retain their accounts in the transferring Federal savings association.

(ii) The following savings associations must provide the notices:

(A) A Federal mutual savings association transferring account liabilities to an institution the accounts of which are not insured by the Deposit Insurance Fund or the National Credit Union Share Insurance Fund; and

(B) Any Federal mutual savings association transferring account liabilities to a stock form depository institution.

(o) *Procedural requirements for Federal savings association approval of combinations*—(1) *In general*—(i) *Permissible elections.* A Federal savings association participating in a combination may elect to follow the applicable procedures with respect to the combination:

(A) The procedures applicable to a State savings association chartered by the State where the Federal savings association's home office is located: or

(B) The standard procedures provided in paragraph (o)(2) of this section.

(ii) *Rules of Construction.* For purposes of paragraph (o)(1)(i) of this section:

(A) Any references to a State agency in the applicable State procedures should be read as referring to the OCC; and

(B) Unless otherwise specified in Federal law, all filings required by the applicable State procedures must be made to the OCC.

(2) *Standard procedures*—(i) *Board approval.* Before a Federal savings association files a notice or application for any consolidation or merger, the combination and combination agreement must be approved by majority vote of the entire board of each constituent Federal savings association in the case of Federal stock savings associations or a two-thirds vote of the entire board of each constituent Federal savings association in the case of Federal mutual savings associations.

(ii) *Shareholder vote*—(A) *General rule.* Except as otherwise provided in this paragraph (o)(2)(ii), an affirmative vote of two-thirds of the outstanding voting stock of any constituent Federal stock savings association is required for approval of a consolidation or merger. If any class of shares is entitled to vote as a class pursuant to § 5.22(g)(4), an affirmative vote of a majority of the shares of each voting class and two-thirds of the total voting shares is required. The required vote must be taken at a meeting of the savings association.

(B) *General exception.* Stockholders of the resulting Federal stock savings association need not authorize a consolidation or merger if the transaction meets the requirements of paragraph (p) of this section.

(C) *Exceptions for certain combinations involving an interim association.* Stockholders of a Federal stock savings association need not authorize by a two-thirds affirmative vote consolidations or mergers involving an interim Federal savings association or interim State savings association when the resulting Federal stock savings association is acquired pursuant to the regulations of the Board of Governors of the Federal Reserve System at 12 CFR 238.15(e) (relating to the creation of a savings and loan holding company by a savings association). In those cases, an affirmative vote of 50 percent of the shares of the outstanding voting stock of the Federal stock savings association plus one affirmative vote is required. If any class of shares is entitled to vote as a class pursuant to the charter provisions in § 5.22(g)(4), an affirmative vote of 50 percent of the shares of each voting class plus one affirmative vote is required. The required votes must be taken at a meeting of the association.

(3) *Change of name or home office.* If the name of the resulting Federal savings association or the location of the home office of the resulting Federal savings association will change as a result of the business combination, the resulting Federal savings association must amend its charter accordingly.

(4) *Mutual member vote.* Notwithstanding any other provision of this section, the OCC may require that a consolidation, merger or other business combination be submitted to the voting members of any mutual savings association participating in the proposed transaction at duly called meetings and that the transaction, to be effective, must be approved by such voting members.

(p) *Exception to voting requirements.* Shareholders of a resulting national bank or Federal stock savings association need not authorize a consolidation or merger if:

(1) Either:

(i) The transaction does not involve an interim bank or an interim savings association; or

(ii) The transaction involves an interim bank or an interim savings association and the existing shareholders of the national bank or Federal stock savings association will directly hold the shares of the resulting national bank or Federal stock savings association;

(2) The national bank's articles of association or the Federal stock savings association's charter, as applicable, is not changed;

(3) Each share of stock outstanding immediately prior to the effective date of the consolidation or merger is to be an identical outstanding share or a treasury share of the resulting national bank or Federal stock savings association after such effective date; and

(4) Either:

(i) No shares of voting stock of the resulting national bank or Federal stock savings association and no securities convertible into such stock are to be issued or delivered under the plan of combination; or

(ii) The authorized unissued shares or the treasury shares of voting stock of the resulting national bank or Federal stock savings association to be issued or delivered under the plan of merger or consolidation, plus those initially issuable upon conversion of any securities to be issued or delivered under such plan, do not exceed 20 percent of the total shares of voting stock of such national bank or Federal stock savings association outstanding immediately prior to the effective date of the consolidation or merger.

■ 26. Amend § 5.34 by:

■ a. In paragraph (a), removing ''3101 *et seq.*'' and adding in its place ''and 3102(b).'';

■ b. In paragraph (c), removing the phrase ''(e)(5)(i)(B) of this section shall apply'' and adding in its place the phrase ''(f)(2)(i)(C)(*2*) of this section applies'';

■ c. Revising paragraph (d);

■ d. In paragraphs (e)(1)(i)(B), (e)(3), and (e)(4)(ii), removing the word ''state'' and adding in its place the word ''State'' wherever it appears;

■ e. Revising paragraph (e)(2)(i)(A);

■ f. In paragraph (e)(2)(i)(C), removing the phrase ''generally accepted accounting principles (GAAP)'' and adding in its place the word ''GAAP'';

■ g. In paragraph (e)(2)(ii) introductory text, removing the phrase ''following subsidiaries'' and adding in its place the phrase ''following entities'';

■ h. In paragraph (e)(2)(ii)(A), removing the phrase ''part 24; and'' and adding in its place the phrase ''12 CFR part 24;'';

■ i. Removing the period and adding in its place ''; and'' in paragraph (e)(2)(ii)(B);

■ j. Adding paragraph (e)(2)(ii)(C);

■ k. In paragraph (e)(2)(iii)(B), removing the word ''shall'' and adding in its place the word ''may'';

■ l. In paragraphs (e)(4)(i) and (e)(4)(ii), removing the word ''shall'' and adding in its place the word ''will'';

■ m. Removing paragraph (e)(7);

■ n. Redesignating paragraphs (e)(5) and (e)(6) as paragraphs (f) and (g), respectively ; and

■ o. Revising redesignated paragraph (f).

The addition and revisions read as follows.

§ 5.34 Operating subsidiaries of a national bank.

* * * * *

(d) *Definition.* For purposes of this section, *authorized product* means a product that would be defined as insurance under section 302(c) of the Gramm-Leach-Bliley Act (15 U.S.C. 6712) that, as of January 1, 1999, the OCC had determined in writing that national banks may provide as principal or national banks were in fact lawfully providing the product as principal, and as of that date no court of relevant jurisdiction had, by final judgment, overturned a determination by the OCC that national banks may provide the

product as principal. An authorized product does not include title insurance, or an annuity contract the income of which is subject to treatment under section 72 of the Internal Revenue Code of 1986 (26 U.S.C. 72).

(e) * * *

(2) * * *

(i) * * *

(A) The bank has the ability to control the management and operations of the subsidiary, and no other person or entity has the ability to exercise effective control or influence over the management or operations of the subsidiary to an extent equal to or greater than that of the bank or an operating subsidiary thereof;

* * * * *

(ii) * * *

(C) A trust formed for purposes of securitizing assets held by the bank as part of its banking business.

* * * * *

(f) *Procedures*—(1) *Application required.* (i) Except for an operating subsidiary that qualifies for the notice procedures in paragraph (f)(2) of this section or is exempt from application or notice requirements under paragraph (f)(6) of this section, a national bank must first submit an application to, and receive prior approval from, the OCC to establish or acquire an operating subsidiary or to perform a new activity in an existing operating subsidiary.

(ii) The application must explain, as appropriate, how the bank ''controls'' the enterprise, describing in full detail structural arrangements where control is based on factors other than bank ownership of more than 50 percent of the voting interest of the subsidiary and the ability to control the management and operations of the subsidiary by holding voting interests sufficient to select the number of directors needed to control the subsidiary's board and to select and terminate senior management. In the case of a limited partnership or limited liability company that does not qualify for the notice procedures set forth in paragraph (f)(2) of this section, the bank must provide a statement explaining why it is not eligible. The application also must include a complete description of the bank's investment in the subsidiary, the proposed activities of the subsidiary, the organizational structure and management of the subsidiary, the relations between the bank and the subsidiary, and other information necessary to adequately describe the proposal. To the extent that the application relates to the initial affiliation of the bank with a company engaged in insurance activities, the bank must describe the type of insurance activity in which the company is engaged and has present plans to conduct. The bank must also list for each State the lines of business for which the company holds, or will hold, an insurance license, indicating the State where the company holds a resident license or charter, as applicable. The application must state whether the operating subsidiary will conduct any activity at a location other than the main office or a previously approved branch of the bank. The OCC may require a filer to submit a legal analysis if the proposal is novel, unusually complex, or raises substantial unresolved legal issues. In these cases, the OCC encourages filers to have a prefiling meeting with the OCC. Any bank receiving approval under this paragraph is deemed to have agreed that the subsidiary will conduct the activity in a manner consistent with published OCC guidance.

(2) *Notice process only for certain qualifying filings.* (i) Except for an operating subsidiary that is exempt from application or notice procedures under paragraph (f)(6) of this section, a national bank that is well capitalized and well managed may establish or acquire an operating subsidiary, or perform a new activity in an existing operating subsidiary, by providing the appropriate OCC licensing office written notice prior to, or within 10 days after, acquiring or establishing the subsidiary, or commencing the new activity, if:

(A) The activity is listed in paragraph (f)(5) of this section or, except as provided in paragraph (f)(2)(ii) of this section, the activity is substantively the same as a previously approved activity and the activity will be conducted in accordance with the same terms and conditions applicable to the previously approved activity;

(B) The entity is a corporation, limited liability company, limited partnership, or trust; and

(C) The bank or an operating subsidiary thereof:

(*1*) Has the ability to control the management and operations of the subsidiary and no other person or entity has the ability to exercise effective control or influence over the management or operations of the subsidiary to an extent equal to or greater than that of the bank or an operating subsidiary thereof. The ability to control the management and operations means:

(*i*) In the case of a subsidiary that is a corporation, the bank or an operating subsidiary thereof holds voting interests sufficient to select the number of directors needed to control the subsidiary's board and to select and terminate senior management;

(*ii*) In the case of a subsidiary that is a limited partnership, the bank or an operating subsidiary thereof has the ability to control the management and operations of the subsidiary by controlling the selection and termination of senior management;

(*iii*) In the case of a subsidiary that is a limited liability company, the bank or an operating subsidiary thereof has the ability to control the management and operations of the subsidiary by controlling the selection and termination of senior management; or

(*iv*) In the case of a subsidiary that is a trust, the bank or an operating subsidiary thereof has the ability to replace the trustee at will;

(*2*) Holds more than 50 percent of the voting, or equivalent, interests in the subsidiary and:

(*i*) In the case of a subsidiary that is a limited partnership, the bank or an operating subsidiary thereof is the sole general partner of the limited partnership, provided that under the partnership agreement, limited partners have no authority to bind the partnership by virtue solely of their status as limited partners;

(*ii*) In the case of a subsidiary that is a limited liability company, the bank or an operating subsidiary thereof is the sole managing member of the limited liability company, provided that under the limited liability company agreement, other limited liability company members have no authority to bind the limited liability company by virtue solely of their status as members; or

(*iii*) In the case of a subsidiary that is a trust, the bank or an operating subsidiary thereof is the sole beneficial owner of the trust; and

(*3*) Is required to consolidate its financial statements with those of the subsidiary under GAAP.

(ii) A national bank must file an application under paragraph (f)(1) of this section if a State has or will charter or license the proposed operating subsidiary as a bank, trust company, or savings association.

(iii) The written notice must include a complete description of the bank's investment in the subsidiary and of the activity conducted and a representation and undertaking that the activity will be conducted in accordance with OCC policies contained in guidance issued by the OCC regarding the activity. To the extent that the notice relates to the initial affiliation of the bank with a company engaged in insurance activities, the bank must describe the type of insurance activity in which the

company is engaged and has present plans to conduct. The bank also must list for each State the lines of business for which the company holds, or will hold, an insurance license, indicating the State where the company holds a resident license or charter, as applicable. Any bank receiving approval under this paragraph is deemed to have agreed that the subsidiary will conduct the activity in a manner consistent with published OCC guidance.

(3) *Exceptions to rules of general applicability.* Sections 5.8, 5.10, and 5.11 do not apply to this section. However, if the OCC concludes that an application presents significant or novel policy, supervisory, or legal issues, the OCC may determine that some or all provisions in §§ 5.8, 5.10, and 5.11 apply.

(4) *OCC review and approval.* The OCC reviews a national bank's application to determine whether the proposed activities are legally permissible under Federal banking laws and to ensure that the proposal is consistent with safe and sound banking practices and OCC policy and does not endanger the safety or soundness of the parent national bank. As part of this process, the OCC may request additional information and analysis from the filer.

(5) *Activities eligible for notice.* The following activities qualify for the notice procedures in paragraph (f)(2) of this section, provided the activity is conducted pursuant to the same terms and conditions as would be applicable if the activity were conducted directly by a national bank:

(i) Holding and managing assets acquired by the parent bank or its operating subsidiaries, including investment assets and property acquired by the bank through foreclosure or otherwise in good faith to compromise a doubtful claim, or in the ordinary course of collecting a debt previously contracted;

(ii) Providing services to or for the bank or its affiliates, including accounting, auditing, appraising, advertising and public relations, and financial advice and consulting;

(iii) Making loans or other extensions of credit, and selling money orders, savings bonds, and travelers checks;

(iv) Purchasing, selling, servicing, or warehousing loans or other extensions of credit, or interests therein;

(v) Providing courier services between financial institutions;

(vi) Providing management consulting, operational advice, and services for other financial institutions;

(vii) Providing check guaranty, verification and payment services;

(viii) Providing data processing, data warehousing and data transmission products, services, and related activities and facilities, including associated equipment and technology, for the bank or its affiliates;

(ix) Acting as investment adviser (including an adviser with investment discretion) or financial adviser or counselor to governmental entities or instrumentalities, businesses, or individuals, including advising registered investment companies and mortgage or real estate investment trusts, furnishing economic forecasts or other economic information, providing investment advice related to futures and options on futures, and providing consumer financial counseling;

(x) Providing tax planning and preparation services;

(xi) Providing financial and transactional advice and assistance, including advice and assistance for customers in structuring, arranging, and executing mergers and acquisitions, divestitures, joint ventures, leveraged buyouts, swaps, foreign exchange, derivative transactions, coin and bullion, and capital restructurings;

(xii) Underwriting and reinsuring credit related insurance to the extent permitted under section 302 of the Gramm-Leach-Bliley Act (15 U.S.C. 6712);

(xiii) Leasing of personal property and acting as an agent or adviser in leases for others;

(xiv) Providing securities brokerage or acting as a futures commission merchant, and providing related credit and other related services;

(xv) Underwriting and dealing, including making a market, in bank permissible securities and purchasing and selling as principal, asset backed obligations;

(xvi) Acting as an insurance agent or broker, including title insurance to the extent permitted under section 303 of the Gramm-Leach-Bliley Act (15 U.S.C. 6713);

(xvii) Reinsuring mortgage insurance on loans originated, purchased, or serviced by the bank, its subsidiaries, or its affiliates, provided that if the subsidiary enters into a quota share agreement, the subsidiary assumes less than 50 percent of the aggregate insured risk covered by the quota share agreement. A ''quota share agreement'' is an agreement under which the reinsurer is liable to the primary insurance underwriter for an agreed upon percentage of every claim arising out of the covered book of business ceded by the primary insurance underwriter to the reinsurer;

(xviii) Acting as a finder pursuant to 12 CFR 7.1002 to the extent permitted by published OCC precedent for national banks; [2]

(xix) Offering correspondent services to the extent permitted by published OCC precedent for national banks;

(xx) Acting as agent or broker in the sale of fixed or variable annuities;

(xxi) Offering debt cancellation or debt suspension agreements;

(xxii) Providing real estate settlement, closing, escrow, and related services; and real estate appraisal services for the subsidiary, parent bank, or other financial institutions;

(xxiii) Acting as a transfer or fiscal agent;

(xxiv) Acting as a digital certification authority to the extent permitted by published OCC precedent for national banks, subject to the terms and conditions contained in that precedent;

(xxv) Providing or selling public transportation tickets, event and attraction tickets, gift certificates, prepaid phone cards, promotional and advertising material, postage stamps, and Electronic Benefits Transfer (EBT) script, and similar media, to the extent permitted by published OCC precedent for national banks, subject to the terms and conditions contained in that precedent;

(xxvi) Providing data processing, and data transmission services, facilities (including equipment, technology, and personnel), databases, advice and access to such services, facilities, databases and advice, for the parent bank and for others, pursuant to 12 CFR 7.5006 to the extent permitted by published OCC precedent for national banks;

(xxvii) Providing bill presentment, billing, collection, and claims-processing services;

(xxviii) Providing safekeeping for personal information or valuable confidential trade or business information, such as encryption keys, to the extent permitted by published OCC precedent for national banks;

(xxix) Providing payroll processing;

(xxx) Providing branch management services;

(xxxi) Providing merchant processing services except when the activity involves the use of third parties to solicit or underwrite merchants; and

(xxxii) Performing administrative tasks involved in benefits administration.

(6) *No application or notice required.* A national bank may acquire or

[2] *See, e.g.,* the OCC's monthly publication ''Interpretations and Actions.'' Beginning with the May 1996 issue, electronic versions of ''Interpretations and Actions'' are available at *www.occ.gov.*

establish an operating subsidiary, or perform a new activity in an existing operating subsidiary, without filing an application or providing notice to the OCC, if the bank is well managed and well capitalized and the:

(i) Activities of the new subsidiary are limited to those activities previously reported by the bank in connection with the establishment or acquisition of a prior operating subsidiary;

(ii) Activities in which the new subsidiary will engage continue to be legally permissible for the subsidiary;

(iii) Activities of the new subsidiary will be conducted in accordance with any conditions imposed by the OCC in approving the conduct of these activities for any prior operating subsidiary of the bank; and

(iv) The standards set forth in paragraphs (f)(2)(i)(B) and (C) of this section are satisfied.

(7) *Fiduciary powers.* (i) If an operating subsidiary proposes to accept fiduciary appointments for which fiduciary powers are required, such as acting as trustee or executor, then the national bank must have fiduciary powers under 12 U.S.C. 92a and the subsidiary also must have its own fiduciary powers under the law applicable to the subsidiary.

(ii) Unless the subsidiary is a registered investment adviser, if an operating subsidiary proposes to exercise investment discretion on behalf of customers or provide investment advice for a fee, the national bank must have prior OCC approval to exercise fiduciary powers pursuant to § 5.26 and 12 CFR part 9.

(8) *Expiration of approval.* Approval expires if the national bank has not established or acquired the operating subsidiary or commenced the new activity in an existing operating subsidiary within 12 months after the date of the approval, unless the OCC shortens or extends the time period.

* * * * *

■ 27. Amend § 5.35 by:

■ a. Revising the section heading;

■ b. In paragraph (a), adding the word ''and'' before ''5412(b)(2)(B),''

■ c. In paragraphs (b) and (d)(6), removing the word ''shall'' and adding in its place the word ''must'';

■ d. In paragraphs (d)(2), (d)(3), (g)(2), and (g)(4), removing the word ''state'' and adding in its place the word ''State'' wherever it appears;

■ e. In paragraph (d)(2) removing the phrase ''section 3 of the Federal Deposit Insurance Act'' and adding in its place the phrase ''section 3(a)(3) of the Federal Deposit Insurance Act, 12 U.S.C. 1813(a)(3)'';

■ f. In paragraph (d)(3):

■ i. After the words ''an insured bank'', removing the phrase ''(as defined in section 3 of the Federal Deposit Insurance Act)'' and adding in its place the phrase ''(as defined in section 3(h) of the Federal Deposit Insurance Act, 12 U.S.C. 1813(h))'';

■ ii. After the words ''a savings association'', removing the phrase ''(as defined in section 3 of the Federal Deposit Insurance Act)'' and adding in its place the phrase ''(as defined in section 3(b)(1) of the Federal Deposit Insurance Act, 12 U.S.C. 1813(b)(1))'';

■ iii. Removing the phrase ''Federal Deposit Insurance Corporation'' and adding in its place the word ''FDIC'';

■ g. In paragraph (d)(4), removing the phrase ''section 3 of the Federal Deposit Insurance Act'' and adding in its place the phrase ''section 3(c)(2) of the Federal Deposit Insurance Act, 12 U.S.C. 1813(c)(2)'';

■ h. Revising paragraph (f)(2)(ii)(A);

■ i. In paragraph (f)(2)(ii)(B), removing the phrase ''§ 5.34(e)(5)(v) or § 5.38(e)(5)(v)'' and adding in its place the phrase ''§ 5.34(f)(5) or § 5.38(f)(5)''; and

■ j. Revising paragraph (i).

The revision and addition read as follows.

§ 5.35 Bank service company investments by a national bank or Federal savings association.

* * * * *

(f) * * *

(2) * * *

(ii) * * *

(A) The national bank or Federal savings association is well capitalized and well managed; and

* * * * *

(i) *Investment limitations.* A national bank or Federal savings association must comply with the investment limitations specified in 12 U.S.C. 1862.

* * * * *

■ 28. Amend § 5.36 by:

■ a. In paragraph (a), removing the phrase ''and 93a.'' and adding in its place the phrase ''93a, and 3101 *et seq.*'';

■ b. In paragraph (b), removing the phrase ''and 5.37'' and adding in its place the phrase ''5.37, and 5.39'';

■ c. Revising paragraph (c);

■ d. Revising paragraph (e) introductory text;

■ e. In paragraph (e)(1), removing the word ''state'' and adding in its place the word ''State'' wherever it appears;

■ f. Revising paragraphs (e)(2) through (4)

■ g. Revising paragraph (f);

■ h. Redesignating paragraphs (g) through (i) as paragraph (h) through (j);

■ i. Adding new paragraph (g);

■ j. In redesignated paragraph (h)(1), removing ''(g)(1)'' wherever it appears and adding in its place (h)(1);

■ k. Revising redesignated paragraphs (i) and (j).

The addition and revisions read as follows.

§ 5.36 Other equity investments by a national bank.

* * * * *

(c) *Definitions.* For purposes of this section:

(1) *Enterprise* means any corporation, limited liability company, partnership, trust, or similar business entity.

(2) *Non-controlling investment* means an equity investment made pursuant to 12 U.S.C. 24(Seventh) that is not governed by procedures prescribed by another OCC rule. A *non-controlling investment* does not include a national bank holding interests in a trust formed for the purposes of securitizing assets held by the bank as part of its banking business or for the purposes of holding multiple legal titles of motor vehicles or equipment in conjunction with lease financing transactions.

* * * * *

(e) *Non-controlling investments; notice procedure.* Except as provided in paragraphs (f), (g), and (h) of this section, a national bank may make a non-controlling investment, directly or through its operating subsidiary, in an enterprise that engages in an activity described in § 5.34(f)(5) or in an activity that is substantively the same as a previously approved activity by filing a written notice. The bank must file this written notice with the appropriate OCC licensing office no later than 10 days after making the investment. The written notice must:

* * * * *

(2) State:

(i) Which paragraphs of § 5.34(f)(5) describe the activity; or

(ii) If the activity is substantively the same as a previously approved activity:

(A) How the activity is substantively the same as a previously approved activity;

(B) The citation to the applicable precedent; and

(C) That the activity will be conducted in accordance with the same terms and conditions applicable to the previously approved activity;

(3) Certify that the bank is well capitalized and well managed at the time of the investment;

(4) Describe how the bank has the ability to prevent the enterprise from engaging in activities that are not set forth in § 5.34(f)(5) or not contained in published OCC precedent for previously

approved activities, or how the bank otherwise has the ability to withdraw its investment;

* * * * *

(f) *Non-controlling investment; application procedure*—(1) *In general.* A national bank must file an application and obtain prior approval before making or acquiring, either directly or through an operating subsidiary, a non-controlling investment in an enterprise if the non-controlling investment does not qualify for the notice procedure set forth in paragraph (e) of this section because the bank is unable to make the representation required by paragraph (e)(2) or the certifications required by paragraphs (e)(3) or (e)(7) of this section. The application must include the information required in paragraphs (e)(1) and (e)(4) through (e)(6) of this section and, if possible, the information required by paragraphs (e)(2), (e)(3), and (e)(7) of this section. If the bank is unable to make the representation set forth in paragraph (e)(2) of this section, the bank's application must explain why the activity in which the enterprise engages is a permissible activity for a national bank and why the filer should be permitted to hold a non-controlling investment in an enterprise engaged in that activity. A bank may not make a non-controlling investment if it is unable to make the representations and certifications specified in paragraphs (e)(1) and (e)(4) through (e)(6) of this section.

(2) *Expedited review.* An application submitted by a national bank is deemed approved by the OCC as of the 10th day after the application is received by the OCC if:

(i) The national bank makes the representation required by paragraph (e)(2) and the certification required by paragraph (e)(3) of this section;

(ii) The book value of the national bank's non-controlling investment for which the application is being submitted is no more than 1% of the bank's capital and surplus;

(iii) No more than 50% of the enterprise is owned or controlled by banks or savings associations subject to examination by an appropriate Federal banking agency or credit unions insured by the National Credit Union Association; and

(iv) The OCC has not notified the national bank that the application has been removed from expedited review, or the expedited review process is extended, under § 5.13(a)(2).

(g) *Non-controlling investment; no application or notice required.* A national bank may make or acquire, either directly or through an operating subsidiary, a non-controlling investment in an enterprise without an application or notice to the OCC, if the:

(1) Activities of the enterprise are limited to those activities previously reported by the bank in connection with the making or acquiring of a non-controlling investment;

(2) Activities of the enterprise continue to be legally permissible for a national bank;

(3) The bank's non-controlling investment will be made in accordance with any conditions imposed by the OCC in approving any prior non-controlling investment in an enterprise conducting these same activities; and

(4) The bank is able to make the representations and certifications specified in paragraphs (e)(3) through (e)(7) of this section.

* * * * *

(i) *Non-controlling investments by Federal branches.* A Federal branch that is well capitalized and well managed may make a non-controlling investment in accordance with paragraph (e) of this section in the same manner and subject to the same conditions and requirements as a national bank, and subject to any additional requirements that may apply under 12 CFR 28.10(c).

(j) *Exceptions to rules of general applicability.* Sections 5.8, 5.9, 5.10, and 5.11 do not apply to this section. However, if the OCC concludes that an application presents significant or novel policy, supervisory, or legal issues, the OCC may determine that some or all provisions in §§ 5.8, 5.9, 5.10, and 5.11 apply.

§ 5.37 [Amended]

■ 29. Amend § 5.37 by:

■ a. In paragraph (a), removing ''317d'' and adding in its place ''371d'';

■ b. Removing paragraph (c)(3);

■ c. In paragraph (d)(1)(i) and (d)(3)(i), removing the word ''shall'' and adding in its place the word ''must'' it appears;

■ d. In paragraph (d)(1)(i), removing the phrase ''any corporation'' and adding in its place the phrase ''any corporation, partnership, or similar entity (*e.g.,* a limited liability company)'';

■ e. In paragraph (d)(3)(i), removing the phrase ''as defined in 12 CFR part 6'';

■ f. In paragraph (d)(4), removing ''12 CFR 5.59'' and adding in its place ''§ 5.59''; and

■ g. In paragraph (d)(5), adding '' 5.9,'' after ''5.8,'' wherever it appears.

■ 30. Amend § 5.38 by:

■ a. In paragraph (a), adding the word ''and'' before ''5412(b)(2)(B)'';

■ b. In paragraph (b), adding ''(12 U.S.C. 1828(m))'' after the word ''Act'';

■ c. Removing and reserving paragraph (d);

■ d. Revising paragraph (e)(2)(i)(A);

■ e. In paragraph (e)(2)(i)(C), removing the phrase ''generally accepted accounting principles (GAAP)'' and adding in its place the word ''GAAP'';

■ f. In paragraph (e)(2)(iii) introductory text, removing the phrase ''following subsidiaries'' and adding in its place the phrase ''following entities'';

■ g. Removing the word ''and'' at the end of paragraph (e)(2)(iii)(A);

■ h. In paragraph (e)(2)(iii)(B), removing the period and adding in its place ''; and'';

■ i. Adding new paragraph (e)(2)(iii)(C);

■ j. In paragraph (e)(2)(iv)(B), removing the word ''shall'' and adding in its place the word ''may'';

■ k. In paragraph (e)(3), removing the word ''state'' and adding in its place the word ''State'';

■ l. In paragraph (e)(4)(i), removing the word ''shall'' and adding in its place the word ''must'';

■ m. Redesignating paragraphs (e)(5) through (7) as paragraphs (f) through (h);

■ n. Revising redesignated paragraph (f); and

■ o. In redesignated paragraph (h), removing the word ''shall'' wherever it appears and adding in its place the word ''may''.

The addition and revisions read as follows.

§ 5.38 Operating subsidiaries of a Federal savings association.

* * * * *

(e) * * *

(2) * * *

(i) * * *

(A) The savings association has the ability to control the management and operations of the subsidiary, and no other person or entity has the ability to exercise effective control or influence over the management or operations of the subsidiary to an extent equal to or greater than that of the savings association or an operating subsidiary thereof;

* * * * *

(iii) * * *

(C) A trust formed for purpose of securitizing assets held by the savings association as part of its business.

* * * * *

(f) *Procedures*—(1) *Application required.* (i) A Federal savings association must first submit an application to, and receive prior approval from, the OCC to establish or acquire an operating subsidiary, or to perform a new activity in an existing operating subsidiary.

(ii) The application must explain, as appropriate, how the savings association ''controls'' the enterprise, describing in full detail structural arrangements

where control is based on factors other than savings association ownership of more than 50 percent of the voting interest of the subsidiary and the ability to control the management and operations of the subsidiary by holding voting interests sufficient to select the number of directors needed to control the subsidiary's board and to select and terminate senior management. In the case of a limited partnership or limited liability company that does not qualify for the expedited review procedure set forth in paragraph (f)(2) of this section, the savings association must provide a statement explaining why it is not eligible. The application also must include a complete description of the savings association's investment in the subsidiary, the proposed activities of the subsidiary, the organizational structure and management of the subsidiary, the relations between the savings association and the subsidiary, and other information necessary to adequately describe the proposal. To the extent that the application relates to the initial affiliation of the savings association with a company engaged in insurance activities, the savings association must describe the type of insurance activity in which the company is engaged and has present plans to conduct. The savings association must also list for each State the lines of business for which the company holds, or will hold, an insurance license, indicating the State where the company holds a resident license or charter, as applicable. The application must state whether the operating subsidiary will conduct any activity at a location other than the home office or a previously approved branch of the savings association. The OCC may require a filer to submit a legal analysis if the proposal is novel, unusually complex, or raises substantial unresolved legal issues. In these cases, the OCC encourages filers to have a prefiling meeting with the OCC. Any savings association receiving approval under this paragraph is deemed to have agreed that the subsidiary will conduct the activity in a manner consistent with published OCC guidance.

(2) *Expedited review.* (i) An application to establish or acquire an operating subsidiary, or to perform a new activity in an existing operating subsidiary, that meets the requirements of this paragraph is deemed approved by the OCC as of the 30th day after the filing is received by the OCC, unless the OCC notifies the filer prior to that date that the filing has been removed from expedited review, or the expedited review process is extended under § 5.13(a)(2). Any savings association receiving approval under this paragraph is deemed to have agreed that the subsidiary will conduct the activity in a manner consistent with published OCC guidance.

(ii) An application is eligible for expedited review if all of the following requirements are met:

(A) The savings association is well capitalized and well managed;

(B) The activity is listed in paragraph (f)(5) this section or is substantively the same as a previously approved activity and the activity will be conducted in accordance with the same terms and conditions applicable to the previously approved activity;

(C) The entity is a corporation, limited liability company, limited partnership or trust; and

(D) The savings association or an operating subsidiary thereof:

(*1*) Has the ability to control the management and operations of the subsidiary and no other person or entity has the ability to exercise effective control or influence over the management or operations of the subsidiary to an extent equal to or greater than that of the savings association or an operating subsidiary thereof. The ability to control the management and operations means:

(*i*) In the case of a subsidiary that is a corporation, the savings association or an operating subsidiary thereof holds voting interests sufficient to select the number of directors needed to control the subsidiary's board and to select and terminate senior management;

(*ii*) In the case of a subsidiary that is a limited partnership, the savings association or an operating subsidiary thereof has the ability to control the management and operations of the subsidiary by controlling the selection and termination of senior management;

(*iii*) In the case of a subsidiary that is a limited liability company, the savings association or an operating subsidiary thereof has the ability to control the management and operations of the subsidiary by controlling the selection and termination of senior management; or

(*iv*) In the case of a subsidiary that is a trust, the savings association or an operating subsidiary thereof has the ability to replace the trustee at will;

(*2*) Holds more than 50 percent of the voting, or equivalent, interests in the subsidiary, and:

(*i*) In the case of a subsidiary that is a limited partnership, the savings association or an operating subsidiary thereof is the sole general partner of the limited partnership, provided that under the partnership agreement, limited partners have no authority to bind the partnership by virtue solely of their status as limited partners;

(*ii*) In the case of a subsidiary that is a limited liability company, the savings association or an operating subsidiary thereof is the sole managing member of the limited liability company, provided that under the limited liability company agreement, other limited liability company members have no authority to bind the limited liability company by virtue solely of their status as members; or

(*iii*) In the case of a subsidiary that is a trust, the savings association or an operating subsidiary thereof is the sole beneficial owner of the trust; and

(*3*) Is required to consolidate its financial statements with those of the subsidiary under GAAP. A filer proposing to qualify for expedited review must include in the application all necessary information showing the application meets the requirements.

(3) *Exceptions to rules of general applicability.* Sections 5.8, 5.10, and 5.11 do not apply to this section. However, if the OCC concludes that an application presents significant or novel policy, supervisory, or legal issues, the OCC may determine that some or all provisions in §§ 5.8, 5.10, and 5.11 apply.

(4) *OCC review and approval.* The OCC reviews a Federal savings association's application to determine whether the proposed activities are legally permissible under Federal savings association law and to ensure that the proposal is consistent with safe and sound banking practices and OCC policy and does not endanger the safety or soundness of the parent Federal savings association. As part of this process, the OCC may request additional information and analysis from the filer.

(5) *Activities eligible for expedited review.* The following activities qualify for the expedited review procedures in paragraph (f)(2) of this section, provided the activity is conducted pursuant to the same terms and conditions as would be applicable if the activity were conducted directly by a Federal savings association:

(i) Holding and managing assets acquired by the parent savings association or its operating subsidiaries, including investment assets and property acquired by the savings association through foreclosure or otherwise in good faith to compromise a doubtful claim, or in the ordinary course of collecting a debt previously contracted;

(ii) Providing services to or for the savings association or its affiliates, including accounting, auditing,

appraising, advertising and public relations, and financial advice and consulting;

(iii) Making loans or other extensions of credit, and selling money orders and travelers checks;

(iv) Purchasing, selling, servicing, or warehousing loans or other extensions of credit, or interests therein;

(v) Providing management consulting, operational advice, and services for other financial institutions;

(vi) Providing check payment services;

(vii) Acting as investment adviser (including an adviser with investment discretion) or financial adviser or counselor to governmental entities or instrumentalities, businesses, or individuals, including advising registered investment companies and mortgage or real estate investment trusts;

(viii) Providing financial and transactional advice and assistance, including advice and assistance for customers in structuring, arranging, and executing mergers and acquisitions, divestitures, joint ventures, leveraged buyouts, swaps, foreign exchange, derivative transactions, coin and bullion, and capital restructurings;

(ix) Underwriting and reinsuring credit life and disability insurance;

(x) Leasing of personal property;

(xi) Providing securities brokerage;

(xii) Underwriting and dealing, including making a market, in savings association permissible securities and purchasing and selling as principal, asset backed obligations;

(xiii) Acting as an insurance agent or broker for credit life, disability, and unemployment insurance; single property interest insurance; and title insurance;

(xiv) Offering correspondent services to the extent permitted by published OCC precedent for Federal savings associations;

(xv) Acting as agent or broker in the sale of fixed annuities;

(xvi) Offering debt cancellation or debt suspension agreements;

(xvii) Providing escrow services;

(xviii) Acting as a transfer agent; and

(xix) Providing or selling postage stamps.

(6) *Redesignation.* A Federal savings association that proposes to redesignate a service corporation as an operating subsidiary must submit a notification to the OCC at least 30 days prior to the redesignation date. The notification must include a description of how the redesignated service corporation meets all of the requirements of this section to be an operating subsidiary, a resolution of the savings association's board of directors approving the redesignation, and the proposed effective date of the redesignation. The savings association may effect the redesignation on the proposed date unless the OCC notifies the savings association otherwise prior to that date. The OCC may require an application if the redesignation presents policy, supervisory, or legal issues.

(7) *Fiduciary powers.* (i) If an operating subsidiary proposes to accept fiduciary appointments for which fiduciary powers are required, such as acting as trustee or executor, then the Federal savings association must have fiduciary powers under section 5(n) of the Home Owners' Loan Act, 12 U.S.C. 1464(n), and the subsidiary also must have its own fiduciary powers under the law applicable to the subsidiary.

(ii) Unless the subsidiary is a registered investment adviser, if an operating subsidiary proposes to exercise investment discretion on behalf of customers or provide investment advice for a fee, the Federal savings association must have prior OCC approval to exercise fiduciary powers pursuant to § 5.26 (or a predecessor provision) and 12 CFR part 150.

(8) *Expiration of approval.* Approval expires if the Federal savings association has not established or acquired the operating subsidiary, or commenced the new activity in an existing operating subsidiary within 12 months after the date of the approval, unless the OCC shortens or extends the time period.

■ 31. Amend § 5.39 by:

■ a. Revising paragraph (a);

■ b. In paragraph (b), removing the phrase ''a notice'' and adding in its place the phrase ''an application'', and removing ''§ 5.34(e)(5)'' and adding in its place ''§ 5.34(f)'';

■ c. In paragraph (b) and paragraph (e)(1) introductory text, removing ''(12 U.S.C. 24a)'' and adding in its place ''(12 U.S.C. 24a(a)(2)(A)(i))'';

■ d. In paragraphs (b), (h)(2), and (j)(1)(ii), removing the word ''shall'' and adding in its place the word ''must'' wherever it appears;

■ e. In paragraph (d)(1), removing the phrase ''shall have'' and adding in its place the word ''has'';

■ f. Removing paragraphs (d)(2), (d)(11) and (d)(12) and redesignating paragraphs (d)(3) through (d)(10) as paragraphs (d)(2) through (d)(9);

■ g. In paragraphs (e)(1)(ii) and (j)(2), removing the word ''state'' and adding in its place the word ''State'' wherever it appears;

■ h. In paragraph (f)(1), removing the phrase ''Gramm-Leach-Bliley Act (GLBA)), 113 Stat. 1407–1409, (15 U.S.C. 6712 or 15 U.S.C. 6713)'' and adding in its place the phrase ''Gramm-Leach-Bliley Act, (15 U.S.C. 6712 or 15 U.S.C. 6713))'';

■ i. In paragraph (f)(3), removing ''(12 U.S.C. 1843) of the Bank Holding Company Act'' and adding in its place ''of the Bank Holding Company Act (12 U.S.C. 1843(k)(4)(H) or (I))'', and removing the phrase ''GLBA, 113 Stat. 1381'' and adding in its place the phrase ''Gramm-Leach-Bliley Act (12 U.S.C. 1843 note)'';

■ j. In paragraph (h)(2), removing the phrase ''generally accepted accounting principles'' and adding in its place the word ''GAAP'';

■ k. In paragraph (h)(5) introductory text, removing the phrase ''paragraph (a)(6)'' and adding the phrase ''paragraph (d)(5)'';

■ l. Revising paragraph (h)(5)(i);

■ m. Removing and reserving paragraph (h)(5)(ii);

■ n. In paragraphs (h)(5)(vi), removing the word ''GLBA'' and adding in its place the phrase ''Gramm-Leach-Bliley Act'';

■ o. Removing the phrase ''shall be'' and adding in its place the word ''is'' in paragraph (h)(6);

■ p. Revising paragraph (i);

■ q. In paragraph (j)(1)(i), removing the phrase ''OCC shall'' and adding in its place the phrase ''OCC will'' and removing the phrase ''shall be'' and adding in its place the word ''is''; and

■ r. In paragraph (k), removing the word ''GLBA'' and adding in its place the phrase ''Gramm-Leach-Bliley Act''.

The revisions read as follows.

§ 5.39 Financial subsidiaries of a national bank.

(a) *Authority.* 12 U.S.C. 24a and 93a.

* * * * *

(h) * * *

(5) * * *

(i) A financial subsidiary is deemed to be an affiliate of the bank and is not deemed to be a subsidiary of the bank;

* * * * *

(i) *Procedures to engage in activities through a financial subsidiary.* A national bank that intends, directly or indirectly, to acquire control of, or hold an interest in, a financial subsidiary, or to commence a new activity in an existing financial subsidiary, must obtain OCC approval through the procedures set forth in paragraph (i)(1) or (i)(2) of this section.

(1) *Certification with subsequent application.* (i) At any time, a national bank may file a ''Financial Subsidiary Certification'' with the appropriate OCC licensing office listing the bank's depository institution affiliates and certifying that the bank and each of

those affiliates is well capitalized and well managed.

(ii) Thereafter, at such time as the bank seeks OCC approval to acquire control of, or hold an interest in, a new financial subsidiary, or commence a new activity authorized under section 5136A(a)(2)(A)(i) of the Revised Statutes (12 U.S.C. 24a(a)(2)(A)(i)) in an existing subsidiary, the bank may file an application with the appropriate OCC licensing office at the time of acquiring control of, or holding an interest in, a financial subsidiary, or commencing such activity in an existing subsidiary. The application must be labeled ''Financial Subsidiary Application'' and must:

(A) State that the bank's Certification remains valid;

(B) Describe the activity or activities conducted by the financial subsidiary. To the extent the application relates to the initial affiliation of the bank with a company engaged in insurance activities, the bank should describe the type of insurance activity that the company is engaged in and has present plans to conduct. The bank must also list for each State the lines of business for which the company holds, or will hold, an insurance license, indicating the State where the company holds a resident license or charter, as applicable;

(C) Cite the specific authority permitting the activity to be conducted by the financial subsidiary. (Where the authority relied on is an agency order or interpretation under section 4(c)(8) or 4(c)(13), respectively, of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(8) or (c)(13)), a copy of the order or interpretation should be attached);

(D) Certify that the bank will be well capitalized after making adjustments required by paragraph (h)(1) of this section;

(E) Demonstrate the aggregate consolidated total assets of all financial subsidiaries of the national bank do not exceed the lesser of 45 percent of the bank's consolidated total assets or $50 billion (or the increased level established by the indexing mechanism); and

(F) If applicable, certify that the bank meets the eligible debt requirement in paragraph (g)(3) of this section.

(2) *Combined certification and application.* A national bank may file a combined certification and application with the appropriate OCC licensing office at least five business days prior to acquiring control of, or holding an interest in, a financial subsidiary, or commencing a new activity authorized pursuant to section 5136A(a)(2)(A)(i) of the Revised Statutes (12 U.S.C. 24a(a)(2)(A)(i)) in an existing subsidiary. The written application must be labeled ''Financial Subsidiary Certification and Application'' and must:

(i) List the bank's depository institution affiliates and certify that the bank and each depository institution affiliate of the bank is well capitalized and well managed;

(ii) Describe the activity or activities to be conducted in the financial subsidiary. To the extent the application relates to the initial affiliation of the bank with a company engaged in insurance activities, the bank should describe the type of insurance activity that the company is engaged in and has present plans to conduct. The bank must also list for each State the lines of business for which the company holds, or will hold, an insurance license, indicating the State where the company holds a resident license or charter, as applicable;

(iii) Cite the specific authority permitting the activity to be conducted by the financial subsidiary. (Where the authority relied on is an agency order or interpretation under section 4(c)(8) or 4(c)(13), respectively, of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(8) or (c)(13)), a copy of the order or interpretation should be attached);

(iv) Certify that the bank will remain well capitalized after making the adjustments required by paragraph (h)(1) of this section;

(v) Demonstrate the aggregate consolidated total assets of all financial subsidiaries of the national bank do not exceed the lesser of 45% of the bank's consolidated total assets or $50 billion (or the increased level established by the indexing mechanism); and

(vi) If applicable, certify that the bank meets the eligible debt requirement in paragraph (g)(3) of this section.

(3) *Approval.* An application is deemed approved upon filing the information required by paragraphs (i)(1) or (i)(2) of this section within the time frames provided therein.

(4) *Exceptions to rules of general applicability.* Sections 5.8, 5.10, 5.11, and 5.13 do not apply to activities authorized under this section.

(5) *Community Reinvestment Act (CRA).* A national bank may not apply under this paragraph (i) to commence a new activity authorized under section 5136A(a)(2)(A)(i) of the Revised Statutes (12 U.S.C. 24a(a)(2)(A)(i)), or directly or indirectly acquire control of a company engaged in any such activity, if the bank or any of its insured depository institution affiliates received a CRA rating of less than ''satisfactory record of meeting community credit needs'' on its most recent CRA examination prior to when the bank would file an application under this section.

* * * * *

§ 5.40 [Amended]

■ 32. Amend § 5.40 by:

■ a. In paragraph (a), adding a comma after ''2901–2907'';

■ b. Removing the word ''shall'' and adding in its place the word ''must'' wherever it appears in paragraphs (b), (c)(1), (c)(2)(i), (c)(2)(ii), and (c)(3);

■ c. In paragraph (c)(2)(ii), adding the phrase ''or member'' after the word ''shareholder''; and

■ d. In paragraph (c)(4), removing the phrase ''national bank'' and adding in its place the word ''bank'', removing the phrase ''Federal savings association'' and adding in its place the phrase ''savings association'', and removing the phrase ''is not eligible for'' and adding in its place the phrase ''has been removed from''.

■ 33. Section 5.42 is amended by:

■ a. In paragraphs (d)(1) and (d)(2), removing the word ''shall'' and adding in its place the word ''must'';

■ b. Revising paragraph (d)(3);

■ c. In paragraph (d)(4), removing ''5.13(a)'' and adding in its place ''5.13'' wherever it appears and removing the word ''application'' and adding in its place the word ''notice''.

The revision reads as follows.

§ 5.42 Corporate title of a national bank or Federal savings association.

* * * * *

(d) * * *

(3) *Amendment to charter.* A Federal savings association must amend its charter in accordance with § 5.21 or § 5.22, as applicable, to change its title.

* * * * *

■ 34. Section 5.43 is added to read as follows:

§ 5.43 National bank director residency and citizenship waivers.

(a) *Authority.* 12 U.S.C. 72 and 93a.

(b) *Scope.* This section describes the procedures for the OCC to waive the residency and citizenship requirements for national bank directors set forth at 12 U.S.C. 72.

(c) *Application Procedures*—(1) *Residency.* A national bank may request a waiver of the residency requirement for any number of directors by filing a written application with the OCC. The OCC may grant a waiver on an individual basis or for any number of director positions. The waiver is valid until the OCC revokes it in accordance with paragraph (d) of this section, or, if

granted on an individual basis, until the individual no longer serves on the board.

(2) *Citizenship.* A national bank may request a waiver of the citizenship requirements for individuals who comprise up to a minority of the total number of directors by filing a written application with the OCC. The OCC may grant a waiver on an individual basis. A citizenship waiver is valid until the individual no longer serves on the board or the OCC revokes the waiver in accordance with paragraph (d) of this section.

(3) *Biographical and Financial Reports.* (i) Each subject of a citizenship waiver application must submit to the appropriate OCC licensing office the information prescribed in the Interagency Biographical and Financial Report, available at *www.occ.gov.*

(ii) The OCC may require additional information about any subject of a citizenship waiver application, including legible fingerprints, if appropriate. The OCC may waive any of the information requirements of paragraph (c)(3)(i) if the OCC determines that doing so is in the public interest.

(4) *Exceptions to rules of general applicability.* Sections 5.8, 5.9, 5.10, and 5.11 do not apply to this section.

(d) *Revocation of waiver*—(1) *Procedure.* The OCC may revoke a residency or citizenship waiver. Before revocation, the OCC will provide written notice to the national bank and affected director(s) of its intention to revoke a residency or citizenship waiver and the basis for its intention. The bank and affected director(s) may respond in writing to the OCC within 10 calendar days, unless the OCC determines that a shorter period is appropriate in light of relevant circumstances. The OCC will consider the written responses of the bank and affected director(s), if any, prior to deciding whether or not to revoke a residency or citizenship waiver. The OCC will notify the national bank and the director of the OCC's decision to revoke a residency or citizenship waiver in writing.

(2) *Effective date.* The OCC's decision to revoke a residency or citizenship waiver is effective:

(i) If the director or national bank, or both, appeals pursuant to paragraph (e) of this section, upon the director's receipt of the decision of the Comptroller, an authorized delegate, or the appellate official, to uphold the initial decision to revoke the residency or citizenship waiver; or

(ii) If neither the director nor national bank appeals pursuant to paragraph (e) of this section, upon the expiration of the period to appeal.

(e) *Appeal.* (1) A director or national bank, or both, may seek review by appealing the OCC's decision to revoke a residency or citizenship waiver to the Comptroller, or an authorized delegate, within 15 days of the receipt of the OCC's written decision to revoke. The director or national bank, or both, may appeal on the grounds that the reasons for revocation are contrary to fact or arbitrary and capricious. The appellant must submit all documents and written arguments that the appellant wishes to be considered in support of the appeal.

(2) The Comptroller, or an authorized delegate, may designate an appellate official who was not previously involved in the decision leading to the appeal at issue. The Comptroller, an authorized delegate, or the appellate official considers all information submitted with the original application for the residency or citizenship waiver, the material before the OCC official who made the initial decision, and any information submitted by the appellant at the time of appeal.

(3) The Comptroller, an authorized delegate, or the appellate official will independently determine whether the reasons given for the initial decision to revoke are contrary to fact or arbitrary and capricious. If they determine either to be the case, the Comptroller, an authorized delegate, or the appellate official may reverse the initial decision to revoke the waiver.

(4) Upon completion of the review, the Comptroller, an authorized delegate, or the appellate official will notify the appellant in writing of the decision. If the initial decision is upheld, the decision to revoke the waiver is effective pursuant to paragraph (d)(2)(i) of this section.

(f) *Prior waivers.* Any waiver granted by the OCC before January 11, 2021 remains in effect unless revoked pursuant to paragraph (d) of this section or, for a waiver granted to an individual, until the individual no longer serves on the board.

§ 5.45 [Amended]

■ 35. Amend § 5.45 by:
■ a. In paragraphs (b), (e)(1), and (g)(5), removing the phrase ''Federal savings association'' and adding in its place ''Federal stock savings association'';
■ b. In paragraph (f)(3), removing the phrase ''savings association's'' and adding in its place ''Federal stock savings association's'';
■ c. In paragraph (g)(1) introductory text, removing the phrase ''the savings association'' and adding in its place ''the Federal stock savings association'';
■ d. In paragraphs (g)(2)(iii), (g)(4)(i) introductory text, (g)(4)(i)(C), (h), and (i), removing the phrase ''savings association'' and adding in its place ''Federal stock savings association'';
■ e. In paragraph (g)(4)(i) introductory text and paragraphs (h) and (i), removing the word ''shall'' and adding in its place the word ''must''; and
■ f. In paragraph (h), removing the number ''197'' and adding in its place ''16''.

■ 36. Amend § 5.46 by:
■ a. In paragraph (b), removing the word ''shall'' and adding in its place the word ''must'' in the first sentence and removing the word ''shall'' and adding in its place the word ''may'' in the second sentence;
■ b. Revising paragraph (g)(1)(ii);
■ c. In paragraphs (g)(2), (i)(1) introductory text, (i)(3)(i) introductory text, (i)(4), (j), and (k), removing the word ''shall'' and adding in its place the word ''must'' wherever it appears;
■ d. In paragraph (g)(2), removing the word ''applicant'' and adding in its place the word ''filer'';
■ e. Revising paragraphs (h) and (i)(2);
■ f. In paragraph (i)(5), adding the phrase, '' unless the OCC specifies a longer period'' after the word ''approval'';
■ g. In paragraph (i)(6)(i), removing the phrase ''U.S. generally accepted accounting principles'' and adding in its place the word ''GAAP''; and
■ h. In paragraph (i)(6)(ii), removing the word ''U.S.''.

The revisions read as follows.

§ 5.46 Changes in permanent capital of a national bank.

* * * * *

(g) * * *

(1) * * *

(ii) *Prior approval required.* In addition to a notice of capital increase under paragraph (i)(3) of this section, a national bank must submit an application under paragraph (i)(1) or (i)(2) of this section and obtain prior OCC approval to increase its permanent capital if the bank is:

(A) Required to receive OCC approval pursuant to letter, order, directive, written agreement, or otherwise;

(B) Selling common or preferred stock for consideration other than cash; or

(C) Receiving a material noncash contribution to capital surplus.

* * * * *

(h) *Decreases in permanent capital.* A national bank must submit an application and obtain prior approval under paragraph (i)(1) or (i)(2) of this section for any reduction of its permanent capital. A national bank may request approval for a reduction in

capital for multiple quarters. The request need only specify a total dollar amount for the requested period and need not specify amounts for each quarter.

(i) * * *

(2) *Expedited review.* An eligible bank's application is deemed approved by the OCC 15 days after the date the OCC receives the application described in paragraph (i)(1) of this section, unless the OCC notifies the bank prior to that date that the application has been removed from expedited review, or the expedited review process is extended, under § 5.13(a)(2). An eligible bank seeking to decrease its capital may request OCC approval for up to four consecutive quarters. The request need only specify a total dollar amount for the four-quarter period and need not specify amounts for each quarter. An eligible bank may decrease its capital pursuant to such a plan only if the bank maintains its eligible bank status before and after each decrease in its capital.

* * * * *

■ 37. Amend § 5.47 by:

■ a. In paragraph (b), removing the phrase ''debt notes'' and adding in its place the word ''debt'';

■ b. Revising paragraph (c);

■ c. In paragraph (d)(1)(ii), removing the phrase ''Federal Deposit Insurance Corporation (FDIC)'' and adding in its place the word ''FDIC'';

■ d. In paragraph (d)(1)(iv)(B), removing the word ''state'' and adding in its place the word ''State'';

■ e. In paragraph (d)(1)(vi), removing the word ''shall'' and adding in its place the word ''must'' the first time it appears and removing the word ''shall'' and adding in its place the word ''may'' the second time it appears;

■ f. In paragraph (d)(vii), removing the word ''shall'' and adding in its place the word ''may'';

■ g. In paragraph (d)(2) introductory text, removing the word ''note'' and adding in its place the word ''document'';

■ h. In paragraph (d)(3)(ii)(C), adding the phrase, '' if applicable to the subordinated debt issuance'' after the word ''default'';

■ i. Adding paragraph (d)(3)(ii)(D);

■ j. In paragraph (e), removing the phrase, '' including, for an advanced approaches national bank, the disclosure requirement in 12 CFR 3.20(d)(1)(xi)''; and

■ k. Revising paragraphs (f), (g) and (h).

The addition and revisions read as follows.

§ 5.47 Subordinated debt issued by a national bank.

* * * * *

(c) *Definitions.* The following definitions apply to this section:

Capital plan means a plan describing the means and schedule by which a national bank will attain specified capital levels or ratios, including a capital restoration plan filed with the OCC under 12 U.S.C. 1831o and 12 CFR 6.5.

Original maturity means the stated maturity of the subordinated debt note. If the subordinated debt note does not have a stated maturity, then original maturity means the earliest possible date the subordinated debt note may be redeemed, repurchased, prepaid, terminated, or otherwise retired by the national bank pursuant to the terms of the subordinated debt note.

Payment on subordinated debt means principal and interest, and premium, if any.

Subordinated debt document means any document pertaining to an issuance of subordinated debt, and any renewal, extension, amendment, modification, or replacement thereof, including the subordinated debt note and any global note, pricing supplement, note agreement, trust indenture, paying agent agreement, or underwriting agreement.

Tier 2 capital has the same meaning as set forth in 12 CFR 3.20(d).

(d) * * *

(3) * * *

(ii) * * *

(D) A statement that the obligation may be fully subordinated to interests held by the U.S. government in the event that the national bank enters into a receivership, insolvency, liquidation, or similar proceeding.

* * * * *

(f) *Process and procedures*—(1) *Issuance of subordinated debt*—(i) *Approval*—(A) *Eligible bank.* An eligible bank is required to receive prior approval from the OCC to issue any subordinated debt, in accordance with paragraph (g)(1)(i) of this section, if:

(*1*) The national bank will not continue to be an eligible bank after the transaction;

(*2*) The OCC has previously notified the national bank that prior approval is required; or

(*3*) Prior approval is required by law.

(B) *National bank not an eligible bank.* A national bank that is not an eligible bank must receive prior OCC approval to issue any subordinated debt, in accordance with paragraph (g)(1)(i) of this section.

(ii) *Application to include subordinated debt in tier 2 capital.* A national bank that intends to include subordinated debt in tier 2 capital must submit an application to the OCC for approval, in accordance with paragraph (h) of this section, before or within ten days after issuing the subordinated debt. Where a national bank's application to issue subordinated debt has been deemed to be approved, in accordance with paragraph (g)(2)(i) of this section, and the national bank does not contemporaneously receive approval from the OCC to include the subordinated debt as tier 2 capital, the national bank must submit an application for approval to include subordinated debt in tier 2 capital, pursuant to paragraph (h) of this section, after issuance of the subordinated debt. A national bank may not include subordinated debt in tier 2 capital unless the national bank has filed the application with the OCC and received approval from the OCC that the subordinated debt issued by the national bank qualifies as tier 2 capital.

(2) *Prepayment of subordinated debt*—(i) *Subordinated debt not included in tier 2 capital*—(A) *Eligible bank.* An eligible bank is required to receive prior approval from the OCC to prepay any subordinated debt that is not included in tier 2 capital (including acceleration, repurchase, redemption prior to maturity, and exercising a call option), in accordance with paragraph (g)(1)(ii) of this section, only if:

(*1*) The national bank will not be an eligible bank after the transaction;

(*2*) The OCC has previously notified the national bank that prior approval is required;

(*3*) Prior approval is required by law; or

(*4*) The amount of the proposed prepayment is equal to or greater than one percent of the national bank's total capital, as defined in 12 CFR 3.2.

(B) *National bank not an eligible bank.* A national bank that is not an eligible bank must receive prior OCC approval to prepay any subordinated debt that is not included in tier 2 capital (including acceleration, repurchase, redemption prior to maturity, and exercising a call option), in accordance with paragraph (g)(1)(ii) of this section.

(ii) *Subordinated debt included in tier 2 capital.* All national banks must receive prior OCC approval to prepay subordinated debt included in tier 2 capital, in accordance with paragraph (g)(1)(ii) of this section.

(3) *Material changes to existing subordinated debt documents.* A national bank must receive prior approval from the OCC in accordance with paragraph (g)(1)(iii) of this section prior to making a material change to an existing subordinated debt document if the bank would have been required to receive OCC approval to issue the

security under paragraph (f)(1)(i) of this section or to include it in tier 2 capital under paragraph (h) of this section.

(g) *Prior approval procedure*—(1) *Application*—(i) *Issuance of subordinated debt.* A national bank required to obtain OCC approval before issuing subordinated debt must submit an application to the appropriate OCC licensing office. The application must include:

(A) A description of the terms and amount of the proposed issuance;

(B) A statement of whether the national bank is subject to a capital plan or required to file a capital plan with the OCC and, if so, how the proposed change conforms to the capital plan;

(C) A copy of the proposed subordinated note and any other subordinated debt documents; and

(D) A statement that the subordinated debt issue complies with all applicable laws and regulations.

(ii) *Prepayment of subordinated debt.* A national bank required to obtain OCC approval before prepaying subordinated debt, pursuant to paragraph (f)(2) of this section, must submit an application to the appropriate OCC licensing office. The application must include:

(A) A description of the terms and amount of the proposed prepayment;

(B) A statement of whether the national bank is subject to a capital plan or required to file a capital plan with the OCC and, if so, how the proposed change conforms to the capital plan;

(C) A copy of the subordinated debt note the national bank is proposing to prepay and any other subordinated debt documents; and

(D) Either:

(*1*) A statement explaining why the national bank believes that following the proposed prepayment the national bank would continue to hold an amount of capital commensurate with its risk; or

(*2*) A description of the replacement capital instrument that meets the criteria for tier 1 or tier 2 capital under 12 CFR 3.20, including the amount of such instrument, and the time frame for issuance.

(iii) *Material changes to existing subordinated debt.* A national bank required to obtain OCC approval before making a material change to an existing subordinated debt document, pursuant to paragraph (f)(3) of this section, must submit an application to the appropriate OCC licensing office. The application must include:

(A) A description of all proposed changes;

(B) A statement of whether the national bank is subject to a capital plan or required to file a capital plan with the OCC and, if so, how the proposed change conforms to the capital plan;

(C) A copy of the revised subordinated debt documents reflecting all proposed changes; and

(D) A statement that the proposed changes to the subordinated debt documents complies with all applicable laws and regulations.

(iv) *Additional information.* The OCC reserves the right to request additional relevant information, as appropriate.

(2) *Approval*—(i) *General.* The application is deemed approved by the OCC as of the 30th day after the filing is received by the OCC, unless the OCC notifies the national bank prior to that date that the filing presents a significant supervisory or compliance concern or raises a significant legal or policy issue.

(ii) *Prepayment.* Notwithstanding this paragraph (g)(2)(i) of this section, if the application for prior approval is for prepayment, the national bank must receive affirmative approval from the OCC. If the OCC requires the national bank to replace the subordinated debt, the national bank must receive affirmative approval that the replacement capital instrument meets the criteria for tier 1 or tier 2 capital under 12 CFR 3.20 and must issue the replacement instrument prior to prepaying the subordinated debt, or immediately thereafter.[4]

(iii) *Tier 2 capital.* Following notification to the OCC pursuant to paragraph (f)(1)(ii) of this section that the national bank has issued the subordinated debt, the OCC will notify the national bank whether the subordinated debt qualifies as tier 2 capital.

(iv) *Expiration of approval.* Approval expires if a national bank does not complete the sale of the subordinated debt within one year of approval.

(h) *Application procedure for inclusion in tier 2 capital.* (1) A national bank must submit an application to the appropriate OCC licensing office in writing before or within ten days after issuing subordinated debt that it intends to include in tier 2 capital. A national bank may not include such subordinated debt in tier 2 capital unless the national bank has received approval from the OCC that the subordinated debt qualifies as tier 2 capital.

(2) The application must include:

(i) The terms of the issuance;

(ii) The amount or projected amount and date or projected date of receipt of funds;

(iii) The interest rate or expected calculation method for the interest rate;

(iv) Copies of the final subordinated debt documents; and

(v) A statement that the issuance complies with all applicable laws and regulations.

§ 5.48 [Amended]

■ 38. Amend § 5.48 in paragraphs (b), (e)(1), (e)(2)(i), (e)(3)(i) introductory text, (e)(3)(ii), (e)(3)(iii), (e)(4), (e)(5), (e)(6), and (f)(2)(ii) by removing the word ''shall'' and adding in its place the word ''must'' wherever it appears.

■ 39. Section 5.50 is amended by:

■ a. In paragraphs (b), (c)(3)(v)(B), (f)(2)(i), (f)(2)(vii), (f)(3)(ii)(B), (f)(3)(ii)(C), (g)(1) introductory text, (h), (i)(1)(i), (i)(1)(ii), (i)(4)(ii), and (i)(5), removing the word ''shall'' and adding in its place the word ''must'' wherever it appears;

■ b. In paragraph (c)(2)(iii), removing the word ''(HOLA)'';

■ c. In paragraph (d)(1)(ii), removing the phrase ''shall be'' and adding in its place the word ''is'';

■ d. In paragraph (d)(5), removing the phrase ''his or her''; and adding in its place the word ''their'';

■ e. Removing paragraph (d)(8);

■ f. Redesignating paragraphs (d)(6) through (7) as paragraphs (d)(7) through (8);

■ g. Adding new paragraph (d)(6);

■ h. In redesignated paragraph (d)(7), removing the word ''HOLA'' and adding in its place the phrase ''Home Owners' Loan Act, 12 U.S.C. 1464'';

■ i. In paragraph (f)(2)(ii) introductory text, removing the phrase ''shall be'' and adding in its place the word ''are'';

■ j. In paragraph (f)(2)(ii)(D), adding the phrase ''15 U.S.C. 78m or 78n,'' after ''1934,'';

■ k. In paragraph (f)(2)(ii)(E), removing the phrase ''defined in § 192.25 of this chapter shall'' and adding in its place the phrase ''defined in 12 CFR 192.25 is'';

■ l. In paragraph (f)(2)(iii)(A), removing ''78l'' and adding in its place ''78*l*'';

■ m. In paragraph (f)(2)(viii), removing the word ''shall'' and adding in its place the word ''will'';

■ n. In paragraph (f)(3)(i)(A), removing the phrase ''on the OCC's internet web page,'' and adding in its place the word ''at'';

■ o. In paragraphs (f)(3)(ii)(A), (f)(3)(ii)(B), (f)(3)(iii) introductory text, and (g)(1) introductory text removing the word ''applicant'' and adding in its place the word ''filer'';

■ p. In paragraph (f)(3)(ii)(C), removing the phrase ''An applicant'' and adding in its place the phrase ''A filer'';

[4] A national bank may replace tier 2 capital instruments concurrent with the redemption of existing tier 2 capital instruments.

■ q. Removing paragraph (f)(3)(iv);
■ r. Removing the phrase ''*of notice*'' in the heading of paragraph (f)(5);
■ s. Revising paragraph (f)(6);
■ t. Revising paragraph (g)(2)(i);
■ u. In paragraph (i)(1)(iii), removing the phrase ''paragraph (h)(1)(i)'' and adding in its place the phrase ''paragraph (i)(1)(i)''; and
■ v. In paragraph (i)(3)(i), removing the phrase ''paragraph (h)(1)'' and adding in its place the phrase ''paragraph (i)(1)''.

The addition and revisions read as follows.

§ 5.50 Change in control of a national bank or Federal savings association; reporting of stock loans.

* * * * *

(d) * * *

(6) Depository institution means a depository institution as defined in section 3(c)(1) of the Federal Deposit Insurance Act, 12 U.S.C. 1813(c)(1).

* * * * *

(f) * * *

(6) *Notification of disapproval.* (i) *Written notice by OCC.* If the OCC disapproves a notice, it will notify the filer in writing within three days after the decision. The OCC's written disapproval will contain a statement of the basis for disapproval and indicate that the filer may request a hearing.

(ii) *Hearing Request.* The filer may request a hearing by the OCC within 10 days of receipt of disapproval, pursuant to the procedures in 12 CFR part 19, subpart H. Following final agency action under 12 CFR part 19, further review by the courts is available. (*See* 12 U.S.C. 1817(j)(5)).

(iii) *Failure to request a hearing.* If a filer fails to request a hearing with a timely request, the notice of disapproval constitutes a final and unappealable order.

* * * * *

(g) * * *

(2) * * *

(i) Upon the request of any person, the OCC releases the information provided in the public portion of the notice and makes it available for public inspection and copying as soon as possible after a notice has been filed. In certain circumstances the OCC may determine that the release of the information would not be in the public interest. In addition, the OCC makes the date that the notice is filed, the disposition of the notice and the date thereof, and the consummation date of the transaction, if applicable, publicly available in the OCC's ''Weekly Bulletin.''

* * * * *

■ 40. Amend § 5.51 by:
■ a. Revising paragraph (a);
■ b. In paragraph (c)(4), adding the phrase ''chief risk officer,'' after the phrase ''chief investment officer,''
■ c. In paragraph (c)(7)(ii), adding the phrase ''that requires action to improve the financial condition of the national bank or Federal savings association'' after the word ''agreement'';
■ d. In paragraph (d) introductory text, and paragraphs (e)(1), (e)(6)(i)(C), (e)(6)(1)(D)(*2*), (e)(6)(i)(E), and (f)(1), removing the word ''shall'' and adding in its place the word ''must'' wherever it appears;
■ e. In paragraph (e)(6)(i)(E), removing the phrase ''his or her'' and adding in its place the word ''their'';
■ f. In paragraph (e)(8), adding ''5.9,'' after ''5.8,''; and
■ g. In paragraphs (e)(8), (f)(3), and (f)(4), removing the word ''shall'' and adding in its place the word ''will''.

The revision reads as follows.

§ 5.51 Changes in directors and senior executive officers of a national bank or Federal savings association.

(a) *Authority.* 12 U.S.C. 1831i, 3102(b), and 5412(b)(2)(B).

* * * * *

§ 5.52 [Amended]

■ 41. Amend § 5.52 by:
■ a. In paragraph (c)(1), removing the word ''shall'' and adding in its place the word ''must''; and
■ b. In paragraph (c)(2), removing ''§ 5.40(b)'' and adding in its place ''§ 5.40(c)(1)''.

§ 5.53 [Amended]

■ 42. Amend § 5.53 by:
■ a. In paragraph (c)(2)(ii), removing ''12 CFR 5.48'' wherever it appears and adding in its place ''§ 5.48''; and
■ b. In paragraph (d)(3)(i)(A), removing the phrase ''under paragraph (d)(1)'' and adding in its place ''filed under paragraph (d)(2)''.

■ 43. Amend § 5.55 by:
■ a. In paragraph (b), removing the phrase ''or notice'';
■ b. Removing paragraph (d)(2) and redesignating paragraph (d)(3) as paragraph (d)(2);
■ c. Adding a new paragraph (d)(3);
■ d. In paragraph (d)(4), removing the phrase ''generally accepted accounting principles (GAAP)'' and adding in its place the word ''GAAP'';
■ e. Revising paragraphs (e), (f), (g), and paragraph (h) introductory text;
■ f. Redesignating paragraphs (h)(1) through (h)(3) as paragraphs (h)(1)(i) through (h)(1)(iii);
■ g. Removing the last sentence of redesignated paragraph (h)(1)(iii); and
■ h. Adding new paragraph (h)(1) introductory text and paragraph (h)(2).

The additions and revisions read as follows.

§ 5.55 Capital distributions by Federal savings associations.

* * * * *

(d) * * *

(3) *Control* has the same meaning as in section 10(a)(2) of the Home Owners' Loan Act (12 U.S.C. 1467a(a)(2)).

* * * * *

(e) *Filing requirements*—(1) *Application required.* A Federal savings association must file an application with the OCC before making a capital distribution if:

(i) The Federal savings association would not be at least well capitalized or would not otherwise remain an eligible savings association following the distribution;

(ii) The total amount of all of the Federal savings association's capital distributions (including the proposed capital distribution) for the applicable calendar year exceeds its net income for that year to date plus retained net income for the preceding two years. If the capital distribution is from retained earnings, the aggregate limitation in this paragraph may be calculated in accordance with § 5.64(c)(2), substituting ''capital distributions'' for ''dividends'' in that section;

(iii) The Federal savings association's proposed capital distribution would reduce the amount of or retire any part of its common or preferred stock or retire any part of debt instruments such as notes or debentures included in capital under 12 CFR part 3 (other than regular payments required under a debt instrument approved under § 5.56);

(iv) The Federal savings association's proposed capital distribution is payable in property other than cash;

(v) The Federal savings association is directly or indirectly controlled by a mutual savings and loan holding company or by a company that is not a savings and loan holding company; or

(vi) The Federal savings association's proposed capital distribution would violate a prohibition contained in any applicable statute, regulation, or agreement between the Federal savings association and the OCC or the OTS, or violate a condition imposed on the Federal savings association in an application or notice approved by the OCC or the OTS.

(2) *No application required.* A Federal savings association may make a capital distribution without filing an application with the OCC if it does not meet the filing requirements in paragraph (e)(1) of this section.

(3) *Informational copy of Federal Reserve System notice required.* If the

Federal savings association is a subsidiary of a savings and loan holding company that is filing a notice with the Board of Governors of the Federal Reserve System (Board) for a dividend solely under 12 U.S.C. 1467a(f) and not also under 12 U.S.C. 1467a(o)(11), and no application under paragraph (e)(1) of this section is required, then the savings association must provide an informational copy to the OCC of the notice filed with the Board, at the same time the notice is filed with the Board.

(f) *Application format*—(1) *Contents.* The application must:

(i) Be in narrative form;

(ii) Include all relevant information concerning the proposed capital distribution, including the amount, timing, and type of distribution; and

(iii) Demonstrate compliance with paragraph (h) of this section.

(2) *Schedules.* The application may include a schedule proposing capital distributions over a specified period.

(3) *Combined filings.* A Federal savings association may combine the application required under paragraph (e)(1) of this section with any other notice or application, if the capital distribution is a part of, or is proposed in connection with, another transaction requiring a notice or application under this chapter. If submitting a combined filing, the Federal savings association must state that the related notice or application is intended to serve as an application under this section.

(g) *Filing procedures*—(1) *Application.* When a Federal savings association is required to file an application under paragraph (e)(1) of this section, it must file the application at least 30 days before the proposed declaration of dividend or approval of the proposed capital distribution by its board of directors. Except as provided in paragraph (g)(2) of this section, the OCC is deemed to have approved an application from an eligible savings association upon the expiration of 30 days after the filing date of the application unless, before the expiration of that time period, the OCC notifies the Federal savings association that:

(i) Additional information is required to supplement the application;

(ii) The application has been removed from expedited review, or the expedited review process is extended, under 5.13(a)(2); or

(iii) The application is denied.

(2) *Applications not subject to expedited review.* An application is not subject to expedited review if:

(i) The Federal savings association is not an eligible savings association;

(ii) The total amount of all of the Federal savings association's capital distributions (including the proposed capital distribution) for the applicable calendar year exceeds its net income for that year to date plus retained net income for the preceding two years;

(iii) The Federal savings association would not be at least adequately capitalized, as set forth in 12 CFR 6.4, following the distribution; or

(iv) The Federal savings association's proposed capital distribution would violate a prohibition contained in any applicable statute, regulation, or agreement between the savings association and the OCC or the OTS, or violate a condition imposed on the savings association in an application or notice approved by the OCC or the OTS.

(3) *OCC filing office*—(i) *Appropriate licensing office.* Except as provided in paragraph (g)(3)(ii) of this section, a Federal savings association that is required to file an application under paragraph (e)(1) of this section or an informational copy of a notice under paragraph (e)(3) of this section must submit the application or notice to the appropriate OCC licensing office.

(ii) *Appropriate supervisory office.* A Federal savings association that is required to file an application under paragraph (e)(1) of this section for capital distributions involving solely a cash dividend from retained earnings or involving a cash dividend from retained earnings and a concurrent cash distribution from permanent capital must submit the application to the appropriate OCC supervisory office.

(h) *OCC review of capital distributions.* After review of an application submitted pursuant to paragraph (e)(1) of this section:

(1) The OCC may deny the application in whole or in part, if it makes any of the following determinations:

* * * * *

(2) The OCC may approve the application in whole or in part. Notwithstanding paragraph (h)(1)(iii) of this section, the OCC may waive any waivable prohibition or condition to permit a distribution.

* * * * *

■ 44. Amend § 5.56 by:

■ a. Revising paragraph (b);

■ b. In paragraph (d)(1)(i)(F), removing the word ''and'';

■ c. In paragraph (d)(1)(i)(G), removing the period and adding in its place ''; and'';

■ d. Adding new paragraph (d)(1)(i)(H);

■ e. In paragraph (d)(2)(i), removing ''12 CFR 197.4'' and adding in its place ''12 CFR 16.7'' and removing the word ''shall'' and adding in its place the word ''may'';

■ f. In paragraph (d)(2)(ii), removing ''15 U.S.C. 77d(6)'' and adding in its place ''15 U.S.C. 77b(a)(15);

■ g. In paragraph (e)(1) introductory text, removing the phrase ''notices and'';

■ h. In paragraphs (e)(2) and (i), removing the phrase ''or notice'' wherever it appears; and

■ i. Revising paragraph (h).

The addition and revisions read as follows.

§ 5.56 Inclusion of subordinated debt securities and mandatorily redeemable preferred stock as Federal savings association supplementary (tier 2) capital.

* * * * *

(b) *Application procedures*—(1) *Application to include covered securities in tier 2 capital*—(i) *Application required.* A Federal savings association must file an application seeking the OCC's approval of the inclusion of covered securities in tier 2 capital. The savings association may file its application before or after it issues covered securities, but may not include covered securities in tier 2 capital until the OCC approves the application and the securities are issued.

(ii) *Expedited review.* The OCC is deemed to have approved an application from an eligible savings association to include covered securities in tier 2 capital upon the expiration of 30 days after the filing date of the application unless, before the expiration of that time period, the OCC notifies the Federal savings association that:

(A) Additional information is required to supplement the application;

(B) The application has been removed from expedited review or the expedited review process is extended under § 5.13(a)(2); or

(C) The OCC denies the application.

(iii) *Securities offering rules.* A Federal savings association also must comply with the securities offering rules at 12 CFR part 16 by filing an offering circular for a proposed issuance of covered securities, unless the offering qualifies for an exemption under that part.

(2) *Application required to prepay covered securities included in tier 2 capital*—(i) *In general.* A Federal savings association must file an application to, and receive prior approval from, the OCC before prepaying covered securities included in tier 2 capital. The application must include:

(A) A statement explaining why the Federal savings association believes that following the proposed prepayment the savings association would continue to hold an amount of capital commensurate with its risk; or

(B) A description of the replacement capital instrument that meets the criteria for tier 1 or tier 2 capital under 12 CFR 3.20, including the amount of such instrument and the time frame for issuance.

(ii) *Replacement covered security.* If the OCC conditions approval of prepayment on a requirement that a Federal savings association must replace the covered security with a covered security of an equivalent amount that satisfies the requirements for tier 1 or tier 2 capital, the savings association must file an application to issue the replacement covered security and must receive prior OCC approval.

* * * * *

(d) * * *

(1) * * *

(i) * * *

(H) State that the security may be fully subordinated to interests held by the U.S. government in the event that the savings association enters into a receivership, insolvency, liquidation, or similar proceeding;

* * * * *

(h) *Issuance of a replacement regulatory capital instrument in connection with prepaying a covered security.* The OCC may require a Federal savings association seeking prior approval to prepay a covered security included in tier 2 capital to issue a replacement covered security of an equivalent amount that qualifies as tier 1 or tier 2 capital under 12 CFR 3.20. If the OCC imposes such a requirement, the savings association must complete the sale of such covered security prior to, or immediately after, the prepayment.[5]

* * * * *

■ 45. Amend § 5.58 by:

■ a. In paragraph (a), adding ''and'' before ''5412(b)(2)(B)'';

■ b. Revising paragraph (d)(2) and removing paragraph (d)(3);

■ c. Revising paragraph (e) introductory text;

■ d. In paragraph (e)(1), removing the word ''state'' wherever it appears and adding in its place the word ''State'';

■ e. Revising paragraphs (e)(2) through (4);

■ f. Revising paragraph (f)(1);

■ g. Redesignating paragraph (f)(2) as paragraph (f)(3) and revising newly redesignated paragraph (f)(3);

■ h. Adding a new paragraph (f)(2);

■ i. Redesignating paragraphs (g) through (i) as paragraphs (h) through (j), respectively and adding new paragraph (g);

■ j. In the heading of redesignated paragraph (h), removing the word ''*entities*'' and adding in its place the word ''*enterprises*'';

■ k. In redesignated paragraph (h) introductory text, removing the word ''entity'' and adding in its place the word ''enterprise'';

■ l. In redesignated paragraph (h)(1), removing the phrase ''paragraph (g)(1)(i)'' wherever it appears and adding in its place the phrase ''paragraph (h)(1)'';

■ m. In redesignated paragraph (i)(3), removing the word ''non-controlling'' and adding in its place the word ''pass-through''; and

■ n. Revising redesignated paragraph (j).

The additions and revisions read as follows.

§ 5.58 Pass-through investments by a Federal savings association.

* * * * *

(d) * * *

(2) *Pass-through investment* means an investment authorized under 12 CFR 160.32(a). A *pass-through investment* does not include a Federal savings association holding interests in a trust formed for the purposes of securitizing assets held by the savings association as part of its business or for the purposes of holding multiple legal titles of motor vehicles or equipment in conjunction with lease financing transactions.

(e) *Pass-through investments; notice procedure.* Except as provided in paragraphs (f) through (i) of this section, a Federal savings association may make a pass-through investment, directly or through its operating subsidiary, in an enterprise that engages in an activity described in § 5.38(f)(5) or in an activity that is substantively the same as a previously approved activity by filing a written notice. The Federal savings association must file this written notice with the appropriate OCC licensing office no later than 10 days after making the investment. The written notice must:

* * * * *

(2) State:

(i) Which paragraphs of § 5.38(f)(5) describe the activity; or

(ii) If the activity is substantively the same as a previously approved activity:

(A) How, the activity is substantively the same as a previously approved activity;

(B) The citation to the applicable precedent; and

(C) That the activity will be conducted in accordance with the same terms and conditions applicable to the previously approved activity;

(3) Certify that the Federal savings association is well capitalized and well managed at the time of the investment;

(4) Describe how the Federal savings association has the ability to prevent the enterprise from engaging in an activity that is not set forth in § 5.38(f)(5) or not contained in published OCC (including published former OTS) precedent for previously approved activities, or how the savings association otherwise has the ability to withdraw its investment;

* * * * *

(f) * * * (1) *In general.* A Federal savings association must file an application and obtain prior approval before making or acquiring, either directly or through an operating subsidiary, a pass-through investment in an enterprise if the pass-through investment does not qualify for the notice procedure set forth in paragraph (e) of this section because the savings association is unable to make the representation required by paragraph (e)(2) or the certification required by paragraphs (e)(3) or (e)(7) of this section. The application must include the information required in paragraphs (e)(1) and (e)(4) through (e)(6) of this section and, if possible, paragraphs (e)(2), (e)(3), and (e)(7) of this section. If the Federal savings association is unable to make the representation set forth in paragraph (e)(2) of this section, the savings association's application must explain why the activity in which the enterprise engages is a permissible activity for a Federal savings association and why the filer should be permitted to hold a pass-through investment in an enterprise engaged in that activity. A Federal savings association may not make a pass-through investment if it is unable to make the representations and certifications specified in paragraphs (e)(1) and (e)(4) through (e)(6) of this section.

(2) *Expedited review.* An application submitted by a Federal savings association is deemed approved by the OCC as of the 10th day after the application is received by the OCC if:

(A) The Federal savings association makes the representation required by paragraph (e)(2) and the certification required by paragraph (e)(3) of this section;

(B) The book value of the Federal savings association's pass-through investment for which the application is being submitted is no more than 1% of the savings association's capital and surplus;

(C) No more than 50% of the enterprise is owned or controlled by banks or savings associations subject to examination by an appropriate Federal banking agency or credit unions insured by the National Credit Union Association; and

[5] A Federal savings association may replace tier 2 capital instruments concurrent with the redemption of existing tier 2 capital instruments.

(D) The OCC has not notified the Federal savings association that the application has been removed from expedited review, or the expedited review process is extended, under § 5.13(a)(2).

(3) *Investments requiring a filing under 12 U.S.C. 1828(m).* Notwithstanding any other provision in this section, if an enterprise in which a Federal savings association proposes to invest would be a subsidiary of the Federal savings association for purposes of 12 U.S.C. 1828(m) and the enterprise would not be an operating subsidiary or a service corporation, the Federal savings association must file an application with the OCC under paragraph (f)(3) of this section at least 30 days prior to making the investment and obtain prior approval from the OCC before making the investment. The application must include the information required in paragraphs (e)(1) and (e)(4) through (e)(6) of this section and, if possible, paragraphs (e)(2), (e)(3), and (e)(7) of this section. If the Federal savings association is unable to make the representation set forth in paragraph (e)(2) of this section, the savings association's application must explain why the activity in which the enterprise engages is a permissible activity for a Federal savings association and why the filer should be permitted to hold a pass-through investment in an enterprise engaged in that activity. A Federal savings association may not make a pass-through investment if it is unable to make the representations and certifications specified in paragraphs (e)(1) and (e)(4) through (e)(6) of this section.

(g) *Pass-through investments; no application or notice required.* A Federal savings association may make or acquire, either directly or through an operating subsidiary, a pass-through investment in an enterprise, without an application or notice to the OCC, if:

(i) The activities of the enterprise are limited to those to activities previously reported by the savings association in connection with the making or acquiring of a pass-through investment;

(ii) The activities in the enterprise continue to be legally permissible for a Federal savings association;

(iii) The savings association's pass-through investment will be made in accordance with any conditions imposed by the OCC or OTS in approving any prior pass-through investment conducting these activities;

(iv) The savings association is able to make the representations and certifications specified in paragraphs (e)(3) through (e)(7) of this section; and

(v) The enterprise will not be a subsidiary for purposes of 12 U.S.C. 1828(m).

* * * * *

(j) *Exceptions to rules of general applicability.* Sections 5.8, 5.9, 5.10, and 5.11 do not apply to this section. However, if the OCC concludes that an application presents significant or novel policy, supervisory, or legal issues, the OCC may determine that some or all provisions in §§ 5.8, 5.9, 5.10, and 5.11 apply.

* * * * *

■ 46. Amend § 5.59 by:

■ a. In paragraph (a), removing ''1464'' and adding in its place ''1464(c)(4)(B)'' and adding ''and'' before ''5412(b)(2)(B);

■ b. In paragraph (b) introductory text, adding ''(12 U.S.C. 1828(m))'' after the phrase ''Insurance Act'';

■ c. In paragraph (d)(2), removing the phrase ''generally accepted accounting principles (GAAP)'' and adding in its place the word ''GAAP'';

■ d. In paragraphs (e)(1), (e)(2), (f)(6)(i), and (h)(1)(ii), removing the word ''state'' and adding the word ''State'' wherever it appears;

■ e. In paragraph (e)(1), removing the phrase ''state-chartered'' and adding in its place the phrase ''State-chartered'';

■ f. In paragraph (e)(4), removing the word ''HOLA'' and adding in its place the phrase ''Home Owners' Loan Act, 12 U.S.C. 1464(c)'';

■ g. In paragraph (e)(9), removing the word ''shall'' and adding in its place the word ''must'' wherever it appears;

■ h. In paragraph (g)(1), removing the word ''HOLA'' and adding in its place the phrase ''Home Owners' Loan Act (12 U.S.C. 1464(c)(4)(B))'';

■ i. In paragraph (g)(1), removing ''§ 24.6 of this chapter'' and adding in its place ''12 CFR part 24'';

■ j. In paragraph (g)(2), removing the phrase ''HOLA and parts 5 and 160 of this chapter'' and adding in its place the phrase ''Home Owners' Loan Act (12 U.S.C. 1464(c)), this part 5, and 12 CFR part 160'';

■ k. In paragraph (g)(3), removing the word ''paragraph,'' and adding in its place the phrase ''paragraph (g),'';

■ l. In paragraph (h)(1)(i) introductory text, adding the phrase ''(12 U.S.C. 1828(m))'' after the word ''Act'';

■ m. In paragraph (h)(1)(ii), removing the phrase ''an applicant'' and adding in its place the phrase ''a filer'', and removing the word ''applicants'' and adding in its place the word ''filers'';

■ n. In paragraphs (h)(2)(i) and (h)(3), removing the word ''applicant'' and adding in its place the word ''filer'';

■ o. In paragraph (h)(2), removing the phrase ''is not eligible for expedited review under 5.13(a)(2)'' and adding in its place the phrase ''has been removed from expedited review, or the expedited review period is extended, under § 5.13(a)(2)''

■ p. Revising paragraph (h)(2)(ii)(A); and

■ q. In paragraph (h)(2)(ii)(B), removing ''§ 5.59(f).'' and adding in its place the phrase ''paragraph (f) of this section.''.

The revision reads as follows:

§ 5.59 Service corporations of Federal savings associations.

* * * * *

(h) * * *

(2) * * *

(ii) * * *

(A) The savings association is well capitalized and well managed; and

* * * * *

§ 5.62 [Amended]

■ 47. Section 5.62 is amended by removing the word ''shall'' and adding in its place the word ''must''.

§ 5.64 [Amended]

■ 48. Section 5.64 is amended by:

■ a. In paragraph (c)(2)(i), removing the word ''shall'' and adding in its place the word ''does'';

■ b. In paragraph (c)(2)(iii), removing the phrase ''paragraph (c)(2)'' and adding in its place the phrase ''paragraphs (c)(2)(i) and (c)(2)(ii)'' and removing the phrase ''shall apply'' and adding in its place the word ''applies'';

■ c. In paragraph (c)(3), removing the phrase ''paragraph (c)'' and adding in its place the phrase ''paragraphs (c)(1) and (c)(2)'' and removing the word ''shall'' and adding in its place the word ''must''; and

■ d. Removing paragraph (d).

■ 49. Revise § 5.66 to read as follows.

§ 5.66 Dividends payable in property other than cash.

In addition to cash dividends, directors of a national bank may declare dividends payable in property, with the approval of the OCC. A national bank must submit a request for prior approval of a noncash dividend to the appropriate OCC licensing office. The dividend is equivalent to a cash dividend in an amount equal to the actual current value of the property, regardless of whether the book value is higher or lower under GAAP. Before the dividend is declared, the bank should show the difference between actual value and book value on the books of the national bank as a gain or loss, as applicable, and the dividend should then be declared in the amount of the actual current value of the property being distributed.

■ 50. Revise § 5.67 to read as follows.

§ 5.67 Fractional shares.

A national bank issuing additional stock may adopt arrangements to preclude the issuance of fractional shares. The bank may remit the cash equivalent of the fraction not being issued to those to whom fractional shares would otherwise be issued. The cash equivalent is based on the market value of the stock, if there is an established and active market in the national bank's stock. In the absence of such a market, the cash equivalent is based on a reliable and disinterested determination as to the fair market value of the stock if such stock is available. The bank may propose an alternate method in the application for the stock issuance filed with the OCC.

■ 51. Amend § 5.70 by:

■ a. In paragraphs (c)(1)(iv) and (c)(1)(v), removing the word ''state'' and adding in its place the word ''State'' wherever it appears;

■ b. In paragraph (d)(1) and paragraph (d)(2) introductory text, removing the word ''shall'' and adding in its place the word ''must'' wherever it appears; and

■ c. Adding new paragraph (d)(3).

The addition reads as follows.

§ 5.70 Federal branches and agencies.

* * * * *

(d) * * *

(3) *Biographical and Financial Reports.* The OCC may require any senior executive officer of a Federal branch or agency submitting a filing to submit an Interagency Biographical and Financial Report, available at *www.occ.gov,* and legible fingerprints.

PART 7—ACTIVITIES AND OPERATIONS

■ 52. The authority citation for part 7 continues to read as follows:

Authority: 12 U.S.C. 1 *et seq.,* 25b, 29, 71, 71a, 92, 92a, 93, 93a, 95(b)(1), 371, 371d, 481, 484, 1463, 1464, 1465, 1818, 1828(m) and 5412(b)(2)(B).

§ 7.2008 [Amended]

■ 53. Amend § 7.2008(c) by removing the phrase ''12 CFR 5.3(c)'' and adding in its place the phrase ''12 CFR 5.3''.

Brian P. Brooks,

Acting Comptroller of the Currency.

FEDERAL REGISTER

Vol. 85 Friday,
No. 239 December 11, 2020

Part V

Securities and Exchange Commission

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing of Proposed Rule Change To Adopt Listing Rules Related to Board Diversity; Notice

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–90574; File No. SR–NASDAQ–2020–081]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing of Proposed Rule Change To Adopt Listing Rules Related to Board Diversity

December 4, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 1, 2020, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt listing rules related to board diversity, as described in more detail below:

(i) To adopt Rule 5605(f) (Diverse Board Representation), which would require Nasdaq-listed companies, subject to certain exceptions, (A) to have at least one director who self-identifies as a female, and (B) to have at least one director who self-identifies as Black or African American, Hispanic or Latinx, Asian, Native American or Alaska Native, Native Hawaiian or Pacific Islander, two or more races or ethnicities, or as LGBTQ+, or (C) to explain why the company does not have at least two directors on its board who self-identify in the categories listed above;

(ii) to adopt Rule 5606 (Board Diversity Disclosure), which would require Nasdaq-listed companies, subject to certain exceptions, to provide statistical information in a proposed uniform format on the company's board of directors related to a director's self-identified gender, race, and self-identification as LGBTQ+; and

(iii) to update Rule 5615 and IM–5615–3 (Foreign Private Issuers) and Rule 5810(c) (Types of Deficiencies and Notifications) to incorporate references to proposed Rule 5605(f) and Rule 5606; and

(iv) to make certain other non-substantive conforming changes.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/nasdaq/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

I. The Diversity Imperative for Corporate Boards

Over the past year, the social justice movement has brought heightened attention to the commitment of public companies to diversity and inclusion. Controversies arising from corporate culture and human capital management challenges, as well as technology-driven changes to the business landscape, already underscored the need for enhanced board diversity—diversity in the boardroom is good corporate governance. The benefits to stakeholders of increased diversity are becoming more apparent and include an increased variety of fresh perspectives, improved decision making and oversight, and strengthened internal controls. Nasdaq believes that the heightened focus on corporate board diversity by companies,[3] investors,[4] corporate governance organizations,[5] and legislators[6] demonstrates that investor confidence is enhanced when boardrooms are comprised of more than one demographic group. Nasdaq has also observed recent calls from SEC commissioners[7] and investors[8] for

companies to provide more transparency regarding board diversity.

Nasdaq conducted an internal study of the current state of board diversity among Nasdaq-listed companies based on public disclosures, and found that while some companies already have made laudable progress in diversifying their boardrooms, the national market system and the public interest would best be served by an additional regulatory impetus for companies to embrace meaningful and multi-dimensional diversification of their boards. It also found that current reporting of board diversity data was not provided in a consistent manner or on a sufficiently widespread basis. As such, investors are not able to readily compare board diversity statistics across companies.

Accordingly, Nasdaq is proposing to require each of its listed companies, subject to certain exceptions, to: (i) Provide statistical information regarding diversity among the members of the company's board of directors under proposed Rule 5606; and (ii) have, or explain why it does not have, at least two ''Diverse'' directors on its board under proposed rule 5605(f)(2). ''Diverse'' means a director who self-identifies as: (i) Female, (ii) an Underrepresented Minority, or (iii) LGBTQ+. Each listed company must have, or explain why it does not have, at least one Female director and at least one director who is either an Underrepresented Minority or LGBTQ+. Foreign Issuers (including Foreign Private Issuers) and Smaller Reporting Companies, by contrast, have more flexibility and may satisfy the requirement by having two Female directors. ''Female'' means an individual who self-identifies her gender as a woman, without regard to the individual's designated sex at birth. ''Underrepresented Minority'' means, consistent with the categories reported to the Equal Employment Opportunity Commission (''EEOC'') through the Employer Information Report EEO–1 Form (''EEO–1 Report''), an individual who self-identifies as one or more of the following: Black or African American, Hispanic or Latinx, Asian, Native American or Alaska Native, Native Hawaiian or Pacific Islander, or Two or More Races or Ethnicities. ''LGBTQ+'' means an individual who self-identifies as any of the following: Lesbian, gay, bisexual, transgender or a member of the queer community.

Under proposed Rule 5606, Nasdaq proposes to provide each company with one calendar year from the date that the Commission approves this proposal (the ''Approval Date'') to comply with the requirement for statistical information regarding diversity. Under proposed Rule 5605(f)(2), no later than two calendar years after the Approval Date, each company must have, or explain why it does not have, one Diverse director. Further, each company must have, or explain why it does not have, two Diverse directors no later than: (i) Four calendar years after the Approval Date for companies listed on the Nasdaq Global Select or Global Market tiers; or (ii) five calendar years after the Approval Date for companies listed on the Nasdaq Capital Market tier.

Nasdaq undertook extensive research and analysis and has concluded that the proposal will fulfill the objectives of the Act in that it is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system, to prevent fraudulent and manipulative acts and practices, and to protect investors and the public interest. In addition to conducting its own internal analysis as described above, Nasdaq reviewed a substantial body of third-party research and interviewed leaders representing a broad spectrum of market participants and other stakeholders to:

- Determine whether empirical evidence demonstrates an association between board diversity, shareholder value, investor protection and board decision-making;
- understand investors' interest in, and impediments to obtaining, information regarding the state of board diversity at public companies;
- review the current state of board diversity and disclosure, both among Nasdaq-listed companies and more broadly within the U.S.;
- gain a better understanding of the causes of underrepresentation on boards;
- obtain the views of leaders representing public companies, investment banks, corporate governance organizations, investors, regulators and civil rights groups on the value of more diverse corporate boards, and on various approaches to encouraging more diversity on corporate boards; and
- evaluate the success of approaches taken by exchanges, regulators, and governments in both the U.S. and foreign jurisdictions to remedy underrepresentation on boards.

While gender diversity has improved among U.S. company boards in recent years, the pace of change has been gradual, and the U.S. still lags behind other jurisdictions that have imposed requirements related to board diversity. Moreover, progress toward bringing underrepresented racial and ethnic groups into the boardroom has been even slower. Nasdaq is unable to provide definitive estimates regarding the number of listed companies that will be affected by the proposal due to the inconsistent disclosures and definitions of diversity across companies and the extremely limited disclosure of race and ethnicity information—an information gap the proposed rule addresses. Based on the limited information that is available, Nasdaq believes a supermajority of listed companies have made notable strides to improve gender diversity in the boardroom and have at least one woman on the board. Nasdaq also believes that listed companies are diligently working to add directors with other diverse attributes, although consistent with other studies of U.S. companies, Nasdaq believes the pace of progress, in this regard, is happening more gradually. While studies suggest that current candidate selection processes may result in diverse candidates being overlooked, Nasdaq also believes that the lack of reliable and consistent data creates a barrier to measuring and improving diversity in the boardroom.

Nasdaq reviewed dozens of empirical studies and found that an extensive body of academic research demonstrates that diverse boards are positively associated with improved corporate governance and financial performance. For example, as discussed in detail below in *Section II, Academic Research: The Relationship between Diversity and Shareholder Value, Investor Protection and Decision Making,* studies have found that companies with gender-diverse boards or audit committees are associated with: More transparent public disclosures and less information asymmetry; better reporting discipline by management; a lower likelihood of manipulated earnings through earnings management; an increased likelihood of voluntarily disclosing forward-looking information; a lower likelihood of receiving audit qualifications due to errors, non-compliance or omission of information; and a lower likelihood of securities fraud. In addition, studies found that having at least one woman on the board is associated with a lower likelihood of material weaknesses in internal control over financial reporting and a lower likelihood of material financial restatements. Studies also identified positive relationships between board diversity and commonly used financial metrics, including higher returns on invested capital, returns on equity, earnings per share, earnings before interest and taxation margin, asset valuation multiples and credit ratings.

Nasdaq believes there are additional compelling reasons to support the diversification of company boards beyond a link to improved corporate governance and financial performance:

• Investors are calling in greater numbers for diversification of boardrooms. Vanguard, State Street Advisors, BlackRock, and the NYC Comptroller's Office include board diversity expectations in their engagement and proxy voting guidelines.[9] The heightened investor focus on corporate diversity and inclusion efforts demonstrates that investor confidence is undermined when a company's boardroom is homogenous and when transparency about such efforts is lacking. Investors frequently lack access to information about corporate board diversity that could be material to their decision making, and they might divest from companies that fail to take into consideration the demographics of their corporate stakeholders when they refresh their boards. Nasdaq explores these investor sentiments in *Section III, Current State of Board Diversity and Causes of Underrepresentation on Boards.*

• Nasdaq believes, consistent with SEC disclosure requirements in other contexts,[10] that management's vision on key issues impacting the company should be communicated with investors in a clear and straightforward manner. Indeed, transparency is the bedrock of federal securities laws regarding disclosure, and this sentiment is reflected in the broad-based support for uniform disclosure requirements regarding board diversity that Nasdaq observed during the course of its outreach to the industry. In addition, organizational leaders representing every category of corporate stakeholders Nasdaq spoke with (including business, investor, governance, regulatory and civil rights communities) were overwhelmingly in favor of diversifying boardrooms. Nasdaq summarizes the findings of its stakeholder outreach in *Section IV, Stakeholder Perspectives.*

• Legislators at the federal and state level increasingly are taking action to encourage or mandate corporations to diversify their boards and improve diversity disclosures. Congress currently is considering legislation requiring each SEC-registered company to provide board diversity statistics and disclose whether it has a board diversity policy. To date, eleven states have passed or proposed legislation related to board diversity.[11] SEC regulations require companies to disclose whether diversity is considered when identifying director nominees and, if so, how. Nasdaq explores various state and federal initiatives in *Section V, U.S. Regulatory Framework and Section VI, Nasdaq Proposal.*

In considering the merits and shaping the substance of the proposed listing rule, Nasdaq also sought and received valuable input from corporate stakeholders. During those discussions, Nasdaq found consensus across every constituency in the inherent value of board diversity. Business leaders also expressed concern that companies—and particularly smaller companies—would prefer an approach that allows flexibility to comply in a manner that fits their unique circumstances and stakeholders. Nasdaq recognizes that the operations, size, and current board composition of each Nasdaq-listed company are unique, and Nasdaq therefore endeavored to provide a regulatory impetus to enhance board diversity that balances the need for flexibility with each company's particular circumstances.

The Exchange also considered the experience of its parent company, Nasdaq, Inc., as a public company.[12] In 2002, Nasdaq, Inc. met the milestone of welcoming its first woman, Mary Jo White, who later served as SEC Chair, to its board of directors. In her own words, ''I was the first and only woman to serve on the board when I started, but, happily, I was joined by another woman during my tenure . . . And then there were two. Not enough, but better than one.'' [13] In 2019, Nasdaq, Inc. also welcomed its first Black director. As a Charter Pledge Partner of The Board Challenge, Nasdaq supports The Board Challenge's goal of ''true and full representation on all boards of directors.'' [14]

As a self-regulatory organization, Nasdaq also is cognizant of its role in advancing diversity within the financial industry, as outlined in the Commission's diversity standards issued pursuant to Section 342 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (''Standards'').[15] Authored jointly by the Commission and five other financial regulators, the Standards seek to provide a framework for exchanges and financial services organizations ''to create and strengthen

[9] Vanguard announced in 2020 it would begin asking companies about the race and ethnicity of directors. *See* Vanguard, *Investment Stewardship 2020 Annual Report* (2020), available at: *https://about.vanguard.com/investment-stewardship/perspectives-and-commentary/2020_investment_stewardship_annual_report.pdf.* Starting in 2020, State Street Global Advisors will vote against the entire nominating committee of companies that do not have at least one woman on their boards and have not addressed questions on gender diversity within the last three years. *See* State Street Global Advisors, *Summary of Material Changes to State Street Global Advisors' 2020 Proxy Voting and Engagement Guidelines* (2020), available at: *https://www.ssga.com/library-content/pdfs/global/proxy-voting-and-engagement-guidelines.pdf.* Beginning in 2018, BlackRock stated in proxy voting guidelines they ''would normally expect to see at least 2 women directors on every board.'' *See* BlackRock Investment Stewardship, *Corporate governance and proxy voting guidelines for U.S. securities* (Jan. 2020), available at: *https://www.blackrock.com/corporate/literature/fact-sheet/blk-responsible-investment-guidelines-us.pdf.* The NYC Comptroller's Office in 2019 asked companies to adopt policies to ensure women and people of color are on the initial list for every open board seat. *See* Scott M. We are committed to ensuring diverse backgrounds are represented on our board and throughout our organization to further the success of our business and best serve the diverse communities in which we operate.'').

[15] *See* Final Interagency Policy Statement Establishing Joint Standards for Assessing the Diversity Policies and Practices of Entities Regulated by the Agencies, 80 FR 33,016 (June 10, 2015).

[their] diversity policies and practices.'' Through these voluntary Standards, the Commission and other regulators ''encourage each entity to use the[ ] Standards in a manner appropriate to its unique characteristics.'' [16] To that end, the proposed rule leverages the Exchange's unique ability to influence corporate governance in furtherance of the goal of Section 342, which is to address the lack of diversity in the financial services industry.[17] Finally, while the Exchange recognizes the importance of maximizing shareholder value, its role as a listing venue is to establish and enforce substantive standards that promote investor protection. As a self-regulatory organization, the Exchange must demonstrate to the Commission that any proposed rule is consistent with Section 6(b) of the Act because, among other things, it is designed to protect investors, promote the public interest, prevent fraudulent and manipulative acts and practices, and remove impediments to the mechanism of a free and open market. The Exchange must also balance promoting capital formation, efficiency, and competition, among other things, alongside enhancing investor confidence.

With these objectives in mind, Nasdaq believes that a listing rule designed to enhance transparency related to board diversity will increase consistency and comparability of information across Nasdaq-listed companies, thereby increasing transparency and decreasing information collection costs. Nasdaq further believes that a listing rule designed to encourage listed companies to increase diverse representation on their boards will result in improved corporate governance, thus strengthening the integrity of the market, enhancing capital formation, efficiency, and competition, and building investor confidence. To the extent a company chooses not to meet the diversity objectives of Rule 5605(f)(2), Nasdaq believes that the proposal will provide investors with additional transparency through disclosure explaining the company's reasons for not doing so. For example, the company may choose to disclose that it does not meet the diversity objectives of Rule 5605(f)(2) because it is subject to an alternative standard under state or foreign laws and has chosen to meet that standard instead, or has a board philosophy regarding diversity that differs from the diversity objectives set forth in Rule 5605(f)(2). Nasdaq believes that such disclosure will improve the quality of information available to investors who rely on this information to make informed investment and voting decisions, thereby promoting capital formation and efficiency.

Nasdaq observed that studies suggest that certain groups may be underrepresented on boards because the traditional director nomination process is limited by directors looking within their own social networks for candidates with previous C-suite experience.[18] Leaders from across the spectrum of stakeholders with whom Nasdaq spoke reinforced the notion that if companies recruit by skill set and expertise rather than title, they will find there is more than enough diverse talent to satisfy demand. In order to assist companies that strive to meet the diversity objectives of Rule 5605(f)(2), Nasdaq is proposing to provide listed companies that have not yet met its diversity objectives with free access to a network of board-ready diverse candidates and a tool to support board evaluation, benchmarking and refreshment. Nasdaq is contemporaneously submitting a rule filing to the Commission regarding the provision of such services. Nasdaq also plans to publish FAQs on its Listing Center to provide guidance to companies on the application of the proposed rules, and to establish a dedicated mailbox for companies and their counsel to email additional questions to Nasdaq regarding the application of the proposed rule. Nasdaq believes that these services will help to ease the compliance burden on companies whether they choose to meet the listing rule's diversity objectives or provide an explanation for not doing so.

II. Academic Research: The Relationship Between Diversity and Shareholder Value, Investor Protection and Decision Making

A company's board of directors plays a critical role in formulating company strategy; appointing, advising and overseeing management; and protecting investors. Nasdaq has recognized the importance of varied perspectives on boards since 2003, when the Exchange adopted a listing rule intended to enhance investor confidence by requiring listed companies, subject to certain exceptions and cure periods, to have a majority independent board.[19] Accompanying the rule are interpretive materials recognizing that independent directors ''play an important role in assuring investor confidence. Through the exercise of independent judgment, they act on behalf of investors to *maximize shareholder value* in the Companies they oversee and guard against conflicts of interest.'' [20]

a. Diversity and Shareholder Value

There is a significant body of research suggesting a positive association between diversity and shareholder value.[21] In the words of SEC Commissioner Allison Herren Lee: ''to the extent one seeks economic support for diversity and inclusion (instead of requiring economic support for the lack of diversity and exclusion), the evidence is in.'' [22]

The Carlyle Group (2020) found that its portfolio companies with two or more diverse directors had average earnings growth of 12.3% over the previous three years, compared to 0.5% among portfolio companies with no diverse directors, where diverse directors were defined as female, Black, Hispanic or Asian.[23] ''After controlling for industry, fund, and vintage year, companies with diverse boards generate earnings growth that's five times faster, on average, with each diverse board member associated with a 5% increase in annualized earnings growth.'' [24]

Several other studies also found a positive association between diverse boards and company performance. FCLTGlobal (2019) found that ''the most diverse boards (top 20 percent) added 3.3 percentage points to [return on invested capital], as compared to their least diverse peers (bottom 20 percent).'' [25] McKinsey (2015) found

Continued

that ''companies in the top quartile for racial/ethnic diversity were 35 percent more likely to have financial returns above their national industry median.'' [26] Carter, Simkins and Simpson (2003) found among Fortune 1000 companies ''statistically significant positive relationships between the presence of women or minorities on the board and firm value.'' [27] Bernile, Bhagwat and Yonker (2017) found that greater diversity on boards—including gender, ethnicity, educational background, age, financial expertise and board experience—is associated with increased operating performance, higher asset valuation multiples, lower stock return volatility, reduced financial leverage, increased dividend payouts to shareholders, higher investment in R&D and better innovation.[28] The authors observed that ''[t]his is in line with the results in Carter, Simkins, and Simpson (2003), which show a positive association between local demographic diversity and firm value.'' [29]

Several studies have found a positive association between gender diversity and financial performance. Credit Suisse (2014) found companies with at least one woman on the board had an average sector-adjusted return on equity (''ROE'') of 12.2%, compared to 10.1% for companies with no female directors, and average sector-adjusted ROEs of 14.1% and 11.2%, respectively, for the previous nine years.[30] MSCI (2016) found that U.S. companies with at least three women on the board in 2011 experienced median gains in ROE of 10% and earnings per share (''EPS'') of 37% over a five year period, whereas companies that had no female directors in 2011 showed median changes of −1% in ROE and −8% in EPS over the same five-year period.[31] Catalyst (2011) found that the ROE of Fortune 500 companies with at least three women on the board (in at least four of five years) was 46% higher than companies with no women on the board, and return on sales and return on invested capital was 84% and 60% higher, respectively.[32]

Credit Suisse (2016) found an association between LGBTQ+ diversity and stock performance, finding that a basket of 270 companies ''supporting and embracing LGBT employees'' outperformed the MSCI ACWI index by an average of 3.0% per year over the past 6 years.[33] Further, ''[a]gainst a custom basket of companies in North America, Europe and Australia, the LGBT 270 has outperformed by 140 bps annually.'' [34] Nasdaq acknowledges that this study focused on LGBTQ+ employees as opposed to directors, and that there is a lack of published research on the issue of LGBTQ+ representation on boards. However, Out Leadership (2019) suggests that the relationship between board gender diversity and corporate performance may extend to LGBTQ+ diversity:

While the precise reason for the positive correlation between gender diversity and better corporate performance is unknown, many of the reasons that gender diversity is considered beneficial are also applicable to LGBT+ diversity. LGBT+ diversity in the boardroom may create a dynamic that enables better decisionmaking, and it brings to the boardroom the perspective of a community that is a critical component of the company's consumer population and organizational talent.[35]

McKinsey (2020) found ''a positive, statistically significant correlation between company financial outperformance and [board] diversity, on the dimensions of both gender and ethnicity,'' with companies in the top quartile for board gender diversity ''28 percent more likely than their peers to outperform financially,'' and a statistically significant correlation between board gender diversity and outperformance on earnings before interest and taxation margin.[36] Moody's (2019) found that greater board gender diversity is associated with higher credit ratings, with women accounting for an average of 28% of board seats at Aaa-rated companies but less than 5% of board seats at Ca-rated companies.[37]

While the overwhelming majority of studies on the association between economic performance and board diversity, including gender diversity, present a compelling case that board diversity is positively associated with financial performance, the results of some other studies on gender diversity are mixed. For example, Pletzer et al. (2015) found that board gender diversity alone has a ''small and non-significant'' relationship with a company's financial performance.[38] Post and Byron (2014) found a ''near zero'' relationship with a company's market performance, but a positive relationship with a company's

accounting returns.[39] Carter, D'Souza, Simkins and Simpson (2010) found that ''[w]hen Tobin's Q is used as the measure of financial performance, we find no relationship to gender diversity or ethnic minority diversity, neither positive nor negative.'' [40] A study conducted by Campbell and Minguez-Vera (2007) ''suggests, at a minimum, that increased gender diversity can be achieved without destroying shareholder value.'' [41] Adams and Ferreira (2009) found that ''gender diversity has beneficial effects in companies with weak shareholder rights, where additional board monitoring could enhance firm value, but detrimental effects in companies with strong shareholder rights.'' [42] Carter et al. (2010) [43] and the U.S. Government Accountability Office (''GAO'') (2015) [44] concluded that the mixed nature of various academic studies may be due to differences in methodologies, data samples and time periods.

While there are studies drawing different conclusions, Nasdaq believes that there is a compelling body of credible research on the association between economic performance and board diversity. At a minimum, Nasdaq believes that the academic studies support the conclusion that board diversity does not have adverse effects on company financial performance. This is not the first time Nasdaq has considered whether, on balance, various studies finding mixed results related to board composition and company performance are a sufficient rationale to propose a listing rule. For example, in 2003, notwithstanding the varying findings of studies at the time regarding the relationship between company performance and board independence,[45] Nasdaq adopted listing rules requiring a majority independent board that were ''intended to enhance investor confidence in the companies that list on Nasdaq.'' [46] In its Approval Order, the SEC stated that ''[t]he Commission has long encouraged exchanges to adopt and strengthen their corporate governance listing standards in order to, among other things, enhance investor confidence in the securities markets.'' [47]

Along the same lines, even without clear consensus among studies related to board diversity and company performance, the heightened focus on corporate board diversity by investors demonstrates that investor confidence is undermined when data on board diversity is not readily available and when companies do not explain the reasons for the apparent absence of diversity on their boards. Therefore, Nasdaq believes that the proposal will enhance investor confidence that all listed companies are considering diversity in the context of selecting directors, either by including at least two Diverse directors on their boards or by explaining their rationale for not meeting that objective. Further, Nasdaq believes that the proposal is consistent with the Act because it will not negatively impact capital formation, competition or efficiency among its public companies, and will promote investor protection and the public interest.[48]

b. Diversity and Investor Protection

There is substantial evidence that board diversity enhances the quality of a company's financial reporting, internal controls, public disclosures and management oversight. In reaching this conclusion, Nasdaq evaluated the results of more than a dozen studies spanning more than two decades that found a positive association between gender diversity and important investor protections, and the assertions by some academics that such findings may extend to other forms of diversity, including racial and ethnic diversity. The findings of the studies reviewed by Nasdaq are summarized below.

Adams and Ferreira (2009) found that women are ''more likely to sit on'' the audit committee,[49] and a subsequent study by Srinidhi, Gul and Tsui (2011) found that companies with women on the audit committee are associated with ''higher earnings quality'' and ''better reporting discipline by managers,'' [50] leading the authors to conclude that ''including female directors on the board and the audit committee are plausible ways of improving the firm's reporting discipline and increasing

investor confidence in financial statements.'' [51]

A study conducted in 2016 by Pucheta-Martínez et al. concluded that gender diversity on the audit committee ''improves the quality of financial information.'' [52] They found that ''the percentage of females on [audit committees] reduces the probability of [audit] qualifications due to errors, non-compliance or the omission of information,'' [53] and found a positive association between gender diverse audit committees and disclosing audit reports with uncertainties and scope limitations. This suggests that gender diverse audit committees ''ensure that managers do not seek to pressure auditors into issuing a clean opinion instead of a qualified opinion'' when any uncertainties or scope limitations are identified.[54]

More recently, a study by Gull in 2018 found that the presence of female audit committee members with business expertise is associated with a lower magnitude of earnings management,[55] and a study conducted in 2019 by Bravo and Alcaide-Ruiz found a positive association between women on the audit committee with financial or accounting expertise and the voluntary disclosure of forward-looking information.[56] Bravo and Alcaide-Ruiz concluded that ''female [audit committee] members with financial expertise play an important role in influencing disclosure strategies that provide forward-looking information containing projections and financial data useful for investors.'' [57]

While the above studies demonstrate a positive association between gender diverse audit committees and the quality of a company's earnings, financial information and public disclosures, other studies found a positive association between board gender diversity and important investor protections regardless of whether or not women are on the audit committee.

Abbott, Parker & Persley (2012) found, within a sample of non-Fortune 1000 companies, ''a significant association between the presence of at least one woman on the board and a lower likelihood of [a material financial] restatement.'' [58] Their findings are consistent with a subsequent study by Wahid (2017), which concluded that ''gender-diverse boards commit fewer financial reporting mistakes and engage in less fraud.'' [59] Specifically, companies with female directors have ''fewer irregularity-type [financial] restatements, which tend to be indicative of financial manipulation.'' [60] Wahid suggested that the implications of her study extend beyond gender diversity:

> If you're going to introduce perspectives, those perspectives might be coming not just from male versus female. They could be coming from people of different ages, from different racial backgrounds . . . [and] [i]f we just focus on one, we could be essentially taking away from other dimensions of diversity and decreasing perspective.[61]

Cumming, Leung and Rui (2015) also examined the relationship between gender diversity and fraud, and found that the presence of women on boards is associated with a lower likelihood of securities fraud; indeed, they found ''strong evidence of a negative and diminishing effect of women on boards and the probability of being in our fraud sample.'' [62] The authors suggested that ''other forms of board diversity, including but not limited to gender diversity, may likewise reduce fraud.'' [63]

Chen, Eshleman and Soileau (2016) suggested that the relationship between gender diversity and higher earnings quality observed by Srinidhi, Gul and Tsui (2011) is ultimately driven by reduced weaknesses in internal control over financial reporting, noting that ''prior literature has established a negative relationship between internal control weaknesses and earnings quality.'' [64] The authors found that having at least one woman on the board (regardless of whether or not she is on the audit committee) ''may lead to [a] reduced likelihood of material weaknesses [in internal control over financial reporting].'' [65]

Board gender diversity also was found to be positively associated with more transparent public disclosures. Gul, Srinidhi & Ng (2011) concluded that ''gender diversity improves stock price informativeness by increasing voluntary public disclosures in large firms and increasing the incentives for private information collection in small firms.'' [66] Abad et al. (2017) concluded that companies with gender diverse boards are associated with lower levels of information asymmetry, suggesting that increasing board gender diversity is associated with ''reducing the risk of

informed trading and enhancing stock liquidity.'' [67]

Other studies have found that diverse boards are better at overseeing management. Adams and Ferreira (2009) found ''direct evidence that more diverse boards are more likely to hold CEOs accountable for poor stock price performance; CEO turnover is more sensitive to stock return performance in firms with relatively more women on boards.'' [68] Lucas-Perez et al. (2014) found that board gender diversity is positively associated with linking executive compensation plans to company performance,[69] which may be an effective mechanism to deter opportunistic behavior by management and align their interests with shareholders.[70] A lack of diversity has been found to have the opposite effect. Westphal and Zajac (1995) found that ''increased demographic similarity between CEOs and the board is likely to result in more generous CEO compensation contracts.'' [71]

c. Diversity and Decision Making

Wahid (2017) suggests that ''at a minimum, gender diversity on corporate boards has a neutral effect on governance quality, and at best, it has positive consequences for boards' ability to monitor firm management.'' [72] Nasdaq reviewed studies suggesting that board diversity can indeed enhance a company's ability to monitor management by reducing ''groupthink'' and improving decision making.

In 2009, the Commission, in adopting rules requiring proxy disclosure describing whether a company considers diversity in identifying director nominees, recognized the impact of diversity on decision making and corporate governance:

> A board may determine, in connection with preparing its disclosure, that it is beneficial to disclose and follow a policy of seeking diversity. Such a policy may encourage boards to conduct broader director searches, evaluating a wider range of candidates and potentially improving board quality. To the extent that boards branch out from the set of candidates they would ordinarily consider, they may nominate directors who have fewer existing ties to the board or management and are, consequently, more independent. To the extent that a more independent board is desirable at a particular company, the resulting increase in board independence could potentially improve governance. In addition, in some companies a policy of increasing board diversity may also improve the board's decision making process by encouraging consideration of a broader range of views.[73]

Nasdaq agrees with the Commission's suggestion that board diversity improves board quality, governance and decision making. Nasdaq is concerned that boards lacking diversity can inadvertently suffer from ''groupthink,'' which is ''a dysfunctional mode of group decision making characterized by a reduction in independent critical thinking and a relentless striving for unanimity among members.'' [74] The catastrophic financial consequences of groupthink became evident in the 2008 global financial crisis, after which the IMF's Independent Evaluation Office concluded that ''[t]he IMF's ability to correctly identify the mounting risks [as the crisis developed] was hindered by a high degree of groupthink.'' [75]

Other studies suggest that increased diversity reduces groupthink and leads to robust dialogue and better decision making. Dallas (2002) observed that ''heterogeneous groups share conflicting opinions, knowledge, and perspectives that result in a more thorough consideration of a wide range of interpretations, alternatives, and consequences.'' [76] Bernile et al. (2017) found that ''diversity in the board of directors reduces stock return volatility, which is consistent with diverse backgrounds working as a governance mechanism, moderating decisions, and alleviating problems associated with 'groupthink.''' [77] Dhir (2015) concluded that gender diversity may ''promote cognitive diversity and constructive conflict in the boardroom.'' [78] After interviewing 23 directors about their experience with Norway's board gender mandate, he observed:

> First, many respondents contended that gender diversity promotes enhanced dialogue. Interviewees frequently spoke of their belief that heterogeneity has resulted in: (1) Higher quality boardroom discussions; (2) broader discussions that consider a wide range of angles or viewpoints; (3) deeper or more thorough discussions; (4) more frequent and lengthier discussions; (5) better informed discussions; (6) discussions that are more frequently brought inside the boardroom (as opposed to being held in spaces outside the boardroom, either exclusively or in addition to inside the boardroom); or (7) discussions in which items that directors previously took for granted are drawn out and addressed—where the implicit becomes explicit. Second, and intimately related, many interviewees indicated that diversification has led to (or has the potential to lead to) better decision making processes and/or final decisions.[79]

Investors also have emphasized the importance of diversity in decision making. A group of institutional investors charged with overseeing state investments and the retirement savings of public employees asserted that ''board members who possess a variety of viewpoints may raise different ideas and encourage a full airing of dissenting views. Such a broad pool of talent can be assembled when potential board candidates are not limited by gender, race, or ethnicity.'' [80]

Nasdaq believes that cognitive diversity is particularly important on boards because in their advisory role, especially related to corporate strategy, ''the 'output' that boards produce is entirely cognitive in nature.'' [81] While in 1999, Forbes and Milliken characterized boards as ''large, elite, and episodic decision making groups that face complex tasks pertaining to strategic-issue processing,'' [82] over the past two decades, their role has evolved; boards are now more active, frequent advisors on areas such as cybersecurity, social media, and environmental, social and governance (''ESG'') issues such as climate change and racial and gender

inequality. Nasdaq believes that boards comprised of directors from diverse backgrounds enhance investor confidence by ensuring that board deliberations include the perspectives of more than one demographic group, leading to more robust dialogue and better decision making.

III. Current State of Board Diversity and Causes of Underrepresentation on Boards

While the above studies suggest a positive association between board diversity, company performance, investor protections, and decision making, there is a noticeable lack of diversity among U.S. public companies. Nasdaq is a global organization and operates in many countries around the world that already have implemented diversity-focused directives. In fact, Nasdaq-listed companies in Europe already are subject to diversity requirements.[83] This first-hand experience provides Nasdaq with a unique perspective to incorporate global best practices into its proposal to advance diversity on U.S. corporate boards. Given that the U.S. ranks 53rd in board gender diversity, according to the World Economic Forum in its 2020 Global Gender Gap Report, Nasdaq believes advancing board diversity in the U.S. is a critical business and market imperative. This same report also found that ''American women still struggle to enter the very top business positions: only 21.7% of corporate managing board members are women.'' [84] As of 2019, women directors held 19% of Russell 3000 seats (up from 16% in 2018).[85] In comparison, women hold more than 30% of board seats in Norway, France, Sweden and Finland.[86] At the current pace, the U.S. GAO estimates that it could take up to 34 years for U.S. companies to achieve gender parity on their boards.[87]

Progress toward greater racial and ethnic diversity in U.S. company boardrooms has been even slower. Over the past ten years, the percentage of African American/Black directors at Fortune 500 companies has remained between 7 and 9%, while the percentage of women directors has grown from 16 to 23%.[88] In 2019, only 10% of board seats at Russell 3000 companies were held by racial minorities, reflecting an incremental increase from 8% in 2008.[89] Among Fortune 500 companies in 2018, there were fewer than 20 directors who publicly self-identified as LGBT+, and only nine companies reported considering sexual orientation and/or gender identity when identifying director nominees.[90]

Women and minority directors combined accounted for 34% of Fortune 500 board seats in 2018.[91] While women of color represent 18% of the U.S. population, they held only 4.6% of Fortune 500 board seats in 2018.[92] Male underrepresented minorities held 11.5% of board seats at Fortune 500 companies in 2018, compared to 66% of board seats held by Caucasian/White men. Overall in 2018, 83.9% of board seats among Fortune 500 companies were held by Caucasian/White individuals (who represent 60.1% of the U.S. population), 8.6% by African American/Black individuals (who represent 13% of the U.S. population), 3.8% by Hispanic/Latino(a) individuals (who represent 19% of the U.S. population) and 3.7% by Asian/Pacific Islander individuals (who represent 6% of the U.S. population).[93] In its analysis of Russell 3000 companies, 2020 Women on Boards concluded that ''larger companies do better with their diversity efforts than smaller companies.'' [94]

Based on the limited information that is available, Nasdaq believes a supermajority of listed companies have made notable strides to improve gender diversity in the boardroom and have at least one woman on the board. Nasdaq also believes that listed companies are diligently working to add directors with other diverse attributes, although consistent with other studies of U.S. companies, Nasdaq believes the pace of progress, in this regard, is happening more gradually. Thus, and for the reasons discussed in this Section II.A.1.III, Nasdaq has concluded that a regulatory approach to encouraging greater diversity and data transparency would be beneficial.

Nasdaq reviewed academic studies on the causes of underrepresentation on boards and the approaches taken by other jurisdictions to remedy underrepresentation. Those studies suggest that the traditional director candidate selection process may create barriers to considering qualified diverse candidates for board positions. Dhir (2015) explains that ''[t]he presence of unconscious bias in the board appointment process, coupled with closed social networks, generates a complex set of barriers for diverse directors; these are the 'phantoms' that prevent entry.'' [95] In 2011, the Davies Review found that ''informal networks influential in board appointments'' contribute to the underrepresentation of women in the boardrooms of U.K. listed companies.[96] In 2017, the Parker Review acknowledged that ''as is the case with gender, people of colour within the UK have historically not had the same opportunities as many mainstream candidates to develop the skills, networks and senior leadership experience desired in a FTSE Boardroom.'' [97] In 2020, the United Kingdom Financial Reporting Council commissioned a report to analyze barriers to LGBTQ+ inclusion and promotion in the workplace. Leaders who self-identified as LGBTQ+ expressed concerns about the current

[83] On Nasdaq's Nordic and Baltic exchanges, large companies must comply with EU Directive 2014/95/EU (the ''EU Directive''), as implemented by each member state, which requires companies to disclose a board diversity policy with measurable objectives (including gender), or explain why they do not have such a policy. On Nasdaq Vilnius, companies are also required to comply with the Nasdaq Corporate Governance Code for Listed Companies or explain why they do not, which requires companies to consider diversity and seek gender equality on the board. Similarly, on Nasdaq Copenhagen, companies are required to comply with the Danish Corporate Governance Recommendations or explain why they do not, which requires companies to adopt and disclose a diversity policy that considers gender, age and international experience. On Nasdaq Iceland, listed companies must have at least 40% women on their board (a government requirement) and comply with the EU Directive.

board nomination process, which includes ''relying on personal recommendations without transparent competition or due process [and] informal 'interviewing' outside the selection process.'' [98]

These concerns are not unique to the United Kingdom. The U.S. GAO (2015) found that women's representation on corporate boards may be hindered by directors' tendencies to ''rely on their personal networks to identify new board candidates.'' [99] Vell (2017) found that ''92% of board seats [of public U.S. and Canadian technology companies] are filled through networking, and women have less access to these networks.'' [100] Deloitte and the Society for Corporate Governance (2019) found that this is also common in other industries including media, communications, energy, consumer products, financial services and life sciences.[101] They observed that although 94% of companies surveyed were looking to increase diversity among their boards, 77% of those boards looked to referrals from current directors when identifying diverse director candidates, suggesting that ''networking is still key to board succession.'' [102] Dhir (2015), in a qualitative study of Norwegian directors, observed that ''[b]oard seats tend to be filled by directors engaging their networks, and the resulting appointees tend to be of the same socio-demographic background.'' [103]

Another contributing factor may be the traditional experience sought in director nominees. Rhode & Packel (2014) observed that:

> One of the most common reasons for the underrepresentation of women and minorities on corporate boards is their underrepresentation in the traditional pipeline to board service. The primary route to board directorship has long been through experience as a CEO of a public corporation. . . . Given the low representation of women and minorities in top executive positions, their talents are likely to be underutilized if selection criteria are not broadened.[104]

Hillman et al. (2002) found that while white male directors of public companies were more likely to have current or former experience as a CEO, senior manager or director, African-American and white women directors were more likely to have specialized expertise in law, finance, banking, public relations or marketing, or community influence from positions in politics, academia or clergy.[105] Dhir (2015) suggests that ''[c]onsidering persons from other, non-management pools, such as academia, legal and accounting practice, the not-for-profit sector and politics, may help create a broader pool of diverse candidates.'' [106] Directors surveyed by the U.S. GAO also ''suggested, for example, that boards recruit high performing women in other senior executive level positions, or look for qualified female candidates in academia or the nonprofit and government sectors. . . . [I]f boards were to expand their director searches beyond CEOs more women might be included in the candidate pool.'' [107]

Investors have begun calling for greater transparency surrounding ethnic diversity on company boards, and in the past several months as the U.S. has seen an uprising in the racial justice movement, there has been an increase in the number of African Americans appointed to Russell 3000 corporate boards.[108] In a five-month span, 130 directors appointed were African American, in comparison to the 38 African American directors who were appointed in the preceding five months.[109] Although tracking the acceleration in board diversity is feasible for some Russell 3000 companies, many of the companies do not disclose the racial makeup of the board, making it impossible to more broadly assess the impact of recent events on board diversity.

IV. Stakeholder Perspectives

To gain a better understanding of the current state of board diversity, benefits of diversity, causes of underrepresentation on boards and potential remedies to address underrepresentation, Nasdaq spoke with leaders representing a broad spectrum of market participants and other stakeholders. Nasdaq sought their perspectives to inform its analysis of whether the proposed rule changes would promote the public interest and protection of investors without unduly burdening competition or conflicting with existing securities laws. The group included representatives from the investor, regulatory, investment banking, venture capital and legal communities. Nasdaq also spoke with leaders of civil rights and corporate governance organizations, and organizations representing the interests of private and public companies, including Nasdaq-listed companies. Specifically, Nasdaq obtained their views on:

- The current state of board diversity in the U.S.;
- the inherent value of board diversity;
- increasing pressure from legislators and investors to improve diverse representation on boards and board diversity disclosure;
- whether a listing rule related to board diversity is in the public interest;
- how to define a ''diverse'' director; and
- the benefits and challenges of various approaches to improving board diversity disclosures and increasing diverse representation on boards, including mandates and disclosure-based models.

The discussions revealed strong support for disclosure requirements that would standardize the reporting of board diversity statistics. The majority of organizations also were in agreement that companies would benefit from a regulatory impetus to drive meaningful and systemic change in board diversity, and that a disclosure-based approach would be more palatable to the U.S. business community than a mandate. While many organizations recognized that mandates can accelerate the rate of change, they expressed that a disclosure-based approach is less controversial and would spur companies to take action and achieve the same results. Business leaders also

[109] *Id.*

expressed concern that smaller companies would require flexibility and support to comply with any time-sensitive requirements to add diverse directors. Some stakeholders highlighted additional challenges that smaller companies, and companies in certain industries, may face finding diverse board members. Leaders from across the spectrum of stakeholders that Nasdaq surveyed reinforced the notion that if companies recruit by skill set and expertise rather than title, then they will find there is more than enough diverse talent to satisfy demand. Leaders from the legal community emphasized that any proposed rule that imposed additional burdens beyond, or is inconsistent with, existing securities laws—by, for example, requiring companies to adopt a diversity policy or include disclosure solely in their proxy statements—would present an additional burden and potentially more legal liability for listed companies.

V. U.S. Regulatory Framework

As detailed above, diversity has been the topic of a growing number of studies over the past decade and, in recent years, some investors have been increasingly advocating for greater diversity among directors of public companies.[110] Over the past year, the social justice movement has underscored the importance of having diverse perspectives and representation at all levels of decision-making, including on public company boards. In recent years, diversity has become increasingly important to the public, including institutional investors, pension funds and other stakeholders who believe that board diversity enhances board performance and is an important factor in the voting decisions of some investors.[111] Legislators increasingly are taking action to encourage corporations to diversify their boards and improve diversity disclosures.[112]

a. SEC Diversity Disclosure Requirements—Background

In 2009, the Commission sought comment on whether to amend Item 407(c)(2)(vi) of Regulation S–K to require disclosure of whether a nominating committee considers diversity when selecting a director for a position on the board.[113] The Commission received more than 130 comment letters on its proposal. According to a University of Dayton Law Review analysis of those comment letters, most were submitted by groups with a specific interest in diversity, or by institutional investors, including mutual funds, pension funds, and socially responsible investment funds.[114] Further, the analysis showed that 56 commenters addressed the issue of diversity disclosures, and only 5 of those 56 commenters did not favor such disclosure.[115] Twenty-seven of the 56 mentioned gender diversity, 18 mentioned racial diversity, and 13 mentioned ethnic diversity. However, neither the proposed rule nor the final rule defined diversity.[116]

Ten years after its adoption of board diversity disclosure rules, the Commission revisited the rules by establishing new Compliance and Disclosure Interpretations (''C&DI''). However, the Commission did not provide a definition of diversity, and therefore issuers currently are not required to disclose the race, ethnicity or gender of their directors or nominees.

Currently, Item 401(e)(1) of Regulation S–K requires a company to ''briefly discuss the specific experience, qualifications, attributes or skills that led to the conclusion that the person should serve as a director.'' [117] The C&DI clarifies that if a board considered a director's self-identified diversity characteristics (*e.g.,* race, gender, ethnicity, religion, nationality, disability, sexual orientation or cultural background) during the nomination process, and the individual consents to disclose those diverse characteristics, the Commission ''would expect that the company's discussion required by Item 401 would include, but not necessarily be limited to, identifying those characteristics and how they were considered.'' [118]

Rather than providing a specific definition of diversity, the C&DI provides a non-exhaustive list of examples of diverse characteristics that a company could consider for purposes of Item 401(e)(1), including ''race, gender, ethnicity, religion, nationality, disability, sexual orientation, or cultural background.'' [119] Additionally, the Commission stated that any description of a company's diversity policy would be expected to include ''a discussion of how the company considers the self-identified diversity attributes of nominees as well as any other qualifications its diversity policy takes into account, such as diverse work experiences, military service, or socio-economic or demographic characteristics.'' [120]

Item 407(c)(2)(vi) of Regulation S–K requires proxy disclosure regarding whether diversity is considered when identifying director nominees and, if so, how. In addition, if the board or nominations committee has adopted a diversity policy, the company must describe how the policy is implemented and its effectiveness is assessed.[121] When adopting Item 407(c)(2)(vi), the Commission explained:

We recognize that companies may define diversity in various ways, reflecting different perspectives. For instance, some companies may conceptualize diversity expansively to

[110] In 2009, when the Commission proposed enhancements to proxy disclosures, including addressing board diversity disclosures, the Commission received over 130 comment letters related to its proposal, including from corporations, pension funds, professional associations, trade unions, accounting firms, law firms, consultants, academics, individual investors and other interested parties. *See* Proxy Disclosure Enhancements, 74 FR at 68,335; *see also* David A. Katz and Laura McIntosh, *Raising the Stakes for Board Diversity,* Law.com (July 22, 2020), available at: *https://www.law.com/newyorklawjournal/2020/07/22/raising-the-stakes-for-board-diversity/?slreturn=20201017021522*; Office of the Illinois State Treasurer, *The Investment Case For Board Diversity: A Review of the Academic and Practitioner Research on the Value of Gender and Racial/Ethnic Board Diversity for Investors* 7 (Oct. 2020), available at: *https://illinoistreasurergovprod.blob.core.usgovcloudapi.net/twocms/media/doc/il%20treasurer%20white%20paper%20-%20the%20investment%20case%20for%20board%20diversity%20(oct%202020).pdf.*

include differences of viewpoint, professional experience, education, skill and other individual qualities and attributes that contribute to board heterogeneity, while others may focus on diversity concepts such as race, gender and national origin. We believe that for purposes of this disclosure requirement, companies should be allowed to define diversity in ways that they consider appropriate. As a result we have not defined diversity in the amendments.[122]

Moreover, Item 407(c)(2)(vi) does not require companies to adopt a formal policy and does not require them to explain why they have not. It also does not require public disclosure of board-level diversity statistics.

b. Complaints Surrounding Current Diversity Disclosure Requirements

Given the broad latitude afforded to companies by the Commission's rules related to board diversity and proxy disclosure, current reporting of board-level diversity statistics has been significantly unreliable and unusable to investors. This has been due to myriad data collection challenges, including the scarcity of reported information, the lack of uniformity in the information that is disclosed and inconsistencies in the definitions of diversity characteristics across companies.[123] The heightened national discourse around diversity and mounting grievances from investors surrounding transparency on board diversity prompted Nasdaq to examine the state of board diversity among its listed companies. While conducting that research, Nasdaq identified a number of key challenges, such as: (1) Inconsistent disclosure and definitions of diversity across companies; (2) limited data on diverse characteristics outside of gender; (3) inconsistent or no disclosure of a director's race, ethnicity, or other diversity attributes (*e.g.,* nationality); (4) difficult-to-extract data because statistics are often embedded in graphics; and (5) aggregation of information, making it difficult to separate gender from other categories of diversity. Investors and data analysts have raised similar criticisms.

As the Illinois Treasurer observed, the paucity of data on race and ethnicity creates barriers to investment analysis, due diligence and academic study.[124] For example, the scarcity of such data is an impediment to academics who want to study the performance impact of racially diverse boards.[125] Nasdaq is concerned that investors also face the many data collection challenges Nasdaq encountered, rendering current diversity disclosures unreliable, unusable, and insufficient to inform investment and voting decisions. Commissioner Allison Herren Lee expressed similar concerns, stating that the current SEC disclosure requirements have ''led to spotty information that is not standardized, not consistent period to period, not comparable across companies, and not necessarily reliable. . . . And the current state of disclosure reveals the shortcomings of a principles-based materiality regime in this area.'' [126]

Some stakeholders believe there is a correlation between companies that disclose the gender, racial and ethnic composition of their board and the number of diverse directors on those companies' boards.[127] Currently, the lack of reliable and consistent data makes it difficult to measure diversity in the boardroom, and a common set of standards for diversity definitions and disclosure format is greatly needed. At present, U.S. companies must navigate a complex patchwork of federal and state regulations and disclosure requirements. The limited disclosure currently provided voluntarily, which is primarily focused on gender (due in part to that data being the most readily available), fails to provide the full scope of a board's diverse characteristics.[128] It is difficult to improve what one cannot accurately measure. This lack of transparency is impacting investors who are increasingly basing public advocacy, proxy voting and direct shareholder-company engagement decisions on board diversity considerations.[129]

c. Support for Updating Diversity Disclosure Requirements

Nasdaq's surveys of investors and reviews of their disclosed policies and actions show that board diversity is a priority when assessing companies, and investors report, in some cases, relying on intuition when there is a lack of empirical, evidenced-based data. Furthermore, the continued growth of ESG investing raises the importance of quality data, given the data-driven nature of investment products such as diversity-specific indices and broader ESG funds.

Investors have a unique platform from which to engage and influence a company's position on important topics like diversity. Similarly, Nasdaq, like other self-regulatory organizations, is uniquely positioned to establish practices that will assist in carrying out Nasdaq's mandate to protect investors and remove impediments from the market. Various stakeholders, including Nasdaq, believe that clear and concise annual disclosure of board diversity information that disaggregates the data by race, ethnicity, gender identity and sexual orientation will provide the public, including key stakeholders, with a better sense of a company's approach to improving corporate diversity and the support needed to effectuate any changes. Required disclosures also would eliminate the number of shareholder proposals asking for these key metrics and the need for companies to respond to multiple investor requests for information.[130] Moreover, companies manage issues more closely and demonstrate greater progress when data is available.[131]

In 2015, nine large public pension funds who collectively supervised $1.12 trillion in assets at the time petitioned the Commission to require registrants to disclose information related to, among other things, the gender, racial, and ethnic diversity of the registrant's board nominees.[132] In 2017, Human Capital Management Coalition, which described itself as a group of institutional investors with $2.8 trillion in assets at the time, made a similar petition to the Commission.[133] More recently, in October 2020, the Illinois Treasurer spearheaded an initiative along with twenty other investor organizations, asking for all companies in the Russell

3000 Index to disclose the composition of their board, including each board member's gender, race and ethnicity.[134]

The largest proxy advisory firms have aligned their voting policies to encourage increased board diversity disclosure. Institutional Shareholder Services (''ISS''), recently adopted a new voting policy under which it will identify boards of companies in the Russell 3000 or S&P 1500 that ''lack racial and ethnic diversity (or lack disclosure of such)'' in 2021 and, beginning in 2022, will recommend voting against the chair of the nominating committee of such companies. The stated goal of the policy is ''helping investors identify companies with which they may wish to engage and to foster dialogue between investors and companies on this topic.'' [135] In 2017, proxy advisory firm Glass Lewis announced a policy regarding board gender diversity that took effect in 2019. Glass Lewis generally recommends voting against the nominating committee chair of a board that has no female members, and when making such a recommendation, the firm closely examines the company's disclosure of its board diversity considerations and other relevant contextual factors.[136] On November 24, 2020, Glass Lewis announced the publication of its 2021 Proxy Voting Policy Guidelines, which expand its board gender diversity policy to vote against nominating chairs if there are fewer than two female directors, beginning in 2022.[137] Most notably, beginning with the 2021 proxy season, the company will include an assessment report of company proxy disclosures relating to board diversity, skills and the director nomination process for companies in the S&P 500 index. According to Glass Lewis, it ''will reflect how a company's proxy statement presents: (i) The board's current percentage of racial/ethnic diversity; (ii) whether the board's definition of diversity explicitly includes gender and/or race/ethnicity; (iii) whether the board has adopted a policy requiring women and minorities to be included in the initial pool of candidates when selecting new director nominees (aka 'Rooney Rule'); and (iv) board skills disclosure.'' [138]

Congress and members of the Commission also have weighed in on the importance of improving board transparency. In 2017, Representative Carolyn Maloney introduced the ''Gender Diversity in Corporate Leadership Act of 2017,'' which proposed requiring public companies to provide proxy disclosure regarding the gender diversity of the board of directors and nominees.[139] In November 2019, the U.S. House of Representatives, with bipartisan support, passed the ''Corporate Governance Through Diversity Act of 2019,'' which requires certain registrants annually to disclose the racial, ethnic, and gender composition of their boards and executive officers, as well as the veteran status of any of those directors and officers, in their proxy statements.[140] The bill also requires the disclosure of any policy, plan or strategy to promote racial, ethnic, and gender diversity among these groups. Legislators have proposed a companion bill in the U.S. Senate.[141]

The Council of Institutional Investors (''CII''), U.S. Chamber of Commerce,[142] National Urban League, Office of New York State Comptroller and the National Association for the Advancement of Colored People praised the House of Representatives' for passing the 2019 legislation. According to the U.S. Chamber of Commerce's members and associations, it has become increasingly important to see improvements in board diversity.[143] Additionally, CII's General Counsel stated that the proxy statement disclosure requirement in the legislation ''could contribute to enhancing U.S. public company board consideration of diversity.'' [144]

More recently, SEC Commissioners have called for greater transparency surrounding ethnic diversity on company boards. In a September 2020 speech titled ''Diversity Matters, Disclosure Works, and the SEC Can Do More'' given at the CII Fall Conference, Commissioner Lee advocated advancing corporate diversity and for various approaches by which the Commission could promote diversity, including among other things, strengthening the C&DI's guidance related to disclosure of board candidate diversity characteristics.[145] Commissioner Lee stated:

> [The SEC has] largely declined to require diversity-related disclosure. In 2009, we adopted a requirement for companies to disclose if and how diversity is considered as a factor in the process for considering candidates for board positions, including any policies related to the consideration of diversity. In 2018, we issued guidance encouraging the disclosure of self-identified characteristics of board candidates. While I appreciate these measures, given that women of color hold just 4.6% of Fortune 500 board seats and less than one percent of Fortune 500 CEOs are Black, it's time to consider how to get investors the diversity information they need to allocate their capital wisely.[146]

VI. Nasdaq Proposal

a. Overview of Disclosure Requirements

Disclosure of information material to an investor's voting and investment decision is the bedrock of federal securities laws. The Exchange's listing rules require companies to comply with federal securities laws, including the registration requirements under the Securities Act of 1933. Once listed, companies are obligated to solicit proxies and file all annual and periodic reports with the Commission under the Act at the prescribed times.[147] In discharging its obligation to protect investors, Nasdaq monitors listed companies for compliance with those disclosure obligations, and the failure to do so results in a notice of deficiency or delisting.

Nasdaq believes it is well within the Exchange's delegated regulatory authority to propose listing rules designed to enhance transparency so long as they do not conflict with existing federal securities laws. For example, Nasdaq requires listed companies to publicly disclose compensation or other payments by third parties to a company's directors or

nominees, notwithstanding that such disclosure is not required by federal securities laws. In approving that proposed rule, the Commission noted:

> To the extent there are certain factual scenarios that would require disclosure not otherwise required under Commission rules, we believe that it is within the purview of a national securities exchange to impose heightened governance requirements, consistent with the Act, that are designed to improve transparency and accountability into corporate decision making and promote investor confidence in the integrity of the securities markets.[148]

Nasdaq is concerned that while investors have increasingly emphasized that they consider board diversity information to be material, the current lack of transparency and consistency makes it difficult for Nasdaq and investors to determine the state of diversity among listed companies as well as each board's philosophy regarding diversity. Investors also have voiced dissatisfaction about having to independently collect board-level data about race, ethnicity and gender identity because such investigations can be time consuming, expensive, and fraught with inaccuracies.[149] Moreover, in some instances, based on Nasdaq's own investigation, such information is either unavailable, or, if available, not comparable across companies. To the extent investors must obtain this information on their own through an imperfect process, Nasdaq is concerned that it increases information asymmetries between larger stakeholders, who are able to collect this data directly from companies, and smaller investors, who must rely on incomplete public disclosures. For all investors who take on the burden of independently obtaining the current information, there is a cost and time burden related to the data collection.

Nasdaq believes that additional disclosure regarding a board's composition and philosophy related to board diversity will improve transparency and accountability into corporate decision making. Nasdaq proposes to improve transparency regarding board diversity by requiring all listed companies to publicly disclose unbundled, consistent data utilizing a uniform, transparent framework on their website or in their proxy statement under Rule 5606. Similarly, Nasdaq proposes to promote accountability in corporate decision-making by requiring companies who do not have at least two Diverse directors on their board to provide investors with a public explanation of the board's reasons for not doing so under Rule 5605(f)(3). Nasdaq designed the proposal to avoid a conflict with existing disclosure requirements under Regulation S–K and to mitigate additional burdens for companies by providing them with flexibility to provide such disclosure on their website or in their proxy statement, and not requiring them to adopt a formal diversity policy.

Nasdaq proposes to foster consistency in board diversity data disclosure by defining ''Diverse'' under Rule 5605(f)(1) as ''an individual who self-identifies in one or more of the following categories: Female, Underrepresented Minority or LGBTQ+,'' and by adopting the following definitions under Rule 5605(f)(1):

- ''Female'' means an individual who self-identifies her gender as a woman, without regard to the individual's designated sex at birth.
- ''LGBTQ+'' means an individual who self-identifies as any of the following: lesbian, gay, bisexual, transgender or a member of the queer community.
- ''Underrepresented Minority'' means an individual who self-identifies as one or more of the following: Black or African American, Hispanic or Latinx, Asian, Native American or Alaska Native, Native Hawaiian or Pacific Islander, or Two or More Races or Ethnicities.

The terms in the proposed definition of ''Underrepresented Minority'' reflect the EEOC's categories and are construed in accordance with the EEOC's definitions.[150] The terms in the proposed definition of LGBTQ+ are similar to the identities defined in California's A.B. 979, described below, but have been expanded to include the queer community based on Nasdaq's consultation with stakeholders, including human rights organizations.[151]

In constructing its proposed definition of ''Diverse,'' Nasdaq considered various state and federal legislation, stakeholder sentiments and academic studies. For example, California requires public companies headquartered in the state to have at least one individual who self-identifies as a female on the board by 2019 under S.B. 826 [152] and at least one director who is a member of an ''underrepresented community'' by 2021 under A.B. 979.[153] S.B. 826 defines ''Female'' as ''an individual who self-identifies her gender as a woman, without regard to the individual's designated sex at birth,'' consistent with legislation proposed by New Jersey, Michigan and Hawaii related to board gender diversity.[154] A.B. 979 considers directors from underrepresented communities to be individuals who self-identify as Black, African American, Hispanic, Latino, Asian, Pacific Islander, Native American, Native Hawaiian or Alaska Native, or as gay, lesbian, bisexual or transgender. Since S.B. 826 was passed, 669 women have joined public company boards in the state and the number of public companies with all male boards has declined from 30% in 2018 to 3% in 2020.[155]

The state of Washington requires public companies whose boards are not comprised of at least 25% directors who self-identify as women by January 1, 2022 to provide public disclosures related to the board's consideration of ''diverse groups'' during the director nomination process. The state considers ''diverse groups'' to include ''women, racial minorities, and historically underrepresented groups.'' [156]

As discussed above, Congress has proposed legislation relating to disclosure of racial, ethnic, gender and veteran status among the company's directors. Section 342 of the Dodd-Frank Act defines ''minority'' as ''Black American, Native American, Hispanic American, and Asian American,'' [157] and the Diversity Assessment Report for Entities Regulated by the SEC requires the Exchange to report workforce composition data to the SEC based on

[148] *See* Order Granting Accelerated Approval of a Proposed Rule Change, 81 FR 44,400, 44,403 (July 7, 2016).

[149] *See* Petition for Amendment of Proxy Rule, *supra* note 80, at 2.

[150] While the EEO–1 report refers to ''Hispanic or Latino'' rather than Latinx, Nasdaq proposes to use the term Latinx to apply broadly to all gendered and gender-neutral forms that may be used by individuals of Latin American heritage, including individuals who self-identify as Latino/a/e.

[151] Further, Nasdaq agrees with the United Kingdom Financial Reporting Council that the acronym LGBTQ+ ''does not attempt to exclude other groups, nor does it imply that the experiences of people under its umbrella are the same.'' *See* Hay et al., *supra* note 98, at 14.

[152] *See* Cal. S.B. 826, *supra* note 112.

[153] *See* Cal. A.B. 979, *supra* note 112.

[156] *See* Wash. Subst. S.B. 6037, *supra* note 112. At least 11 states have proposed diversity-related requirements. *See* Hatcher and Latham, *supra* note 11.

[157] *See* 12 U.S.C. 5452(g)(3) and Public Law 101–73 § 1204(c)(3).

the EEOC's categories.[158] Most companies are required by law to provide similar workforce data to the EEOC through the EEO–1 Report, which requires employers to report statistical data related to race, ethnicity and gender to the EEOC.[159]

Nasdaq has designed the proposed rule to require all companies to provide consistent, comparable data under Rule 5606 by utilizing the existing EEO–1 reporting categories that companies are already familiar with, and by requiring companies to have, or publicly explain why they do not have, at least two directors who are diverse in terms of race, ethnicity, sexual orientation or gender identity under Rule 5605(f)(2). While the EEO–1 report does not currently include sexual orientation or gender identity, Nasdaq believes it is reasonable and in the public interest to include a reporting category for LGBTQ+ status in recognition of the U.S. Supreme Court's recent decision in *Bostock* v. *Clayton County* that sexual orientation and gender identity are ''inextricably'' intertwined with sex.[160]

The proposal does not preclude companies from considering additional diverse attributes, such as nationality, disability, or veteran status in selecting board members; however, the company would still have to provide the required disclosure under Rule 5605(f)(3) if the company does not also have at least two directors who are otherwise considered Diverse under Rule 5605(f)(1). Nor would the proposal prevent companies from disclosing information related to other diverse attributes of board members beyond those highlighted in the rule if they felt such disclosure would benefit investors. Nasdaq believes such disclosure would provide investors with additional information about the company's philosophy regarding broader diversity characteristics.

Overall, Nasdaq believes the proposal will enhance investor confidence that all listed companies are considering diversity of race, ethnicity, sexual orientation and gender identity in the context of selecting directors. Investors will be confident that board discussions at listed companies with at least two Diverse directors include the perspectives of more than one demographic group. They will also be confident that boardrooms without at least two Diverse directors are having a thoughtful discussion about their reasons for not doing so and publicly explaining those reasons. On balance, the proposal will advance the public interest and enhance investor confidence in the integrity of the securities markets by ensuring investors that Nasdaq is monitoring all listed companies to verify that they have at least two Diverse directors or explain why they do not, and by requiring all listed companies to provide consistent, comparable diversity disclosures.

b. Board Statistical Disclosure

Given the increased interest in, and advocacy for, improvements in board transparency related to diversity disclosure information, the Exchange is proposing to adopt new Rule 5606(a), which would require each company to publicly disclose, to the extent permitted by applicable law, information on each director's voluntary self-identified gender and racial characteristics and LGBTQ+ status.

All Nasdaq-listed companies that are subject to proposed Rule 5605(f), whether they choose to meet the diversity objectives of proposed Rule 5605(f)(2) or to explain why they do not, would be required to make the proposed Rule 5606 disclosure. This proposed rule also will assist the Exchange in assessing whether companies meet the diversity objectives of proposed Rule 5605(f). Under Rule 5606(e), Nasdaq proposes to make proposed Rule 5606 operative for listed companies one year after the SEC Approval Date of this proposal.

Pursuant to proposed Rule 5606(a), each company would be instructed to annually provide its board-level diversity data in a format substantially similar to the Board Diversity Matrix in proposed Rule 5606(a) and attached [sic] as *Exhibit 3.* The company would be required to provide the total number of directors on its board. If a director voluntarily self-identifies, each company, other than a Foreign Issuer (as defined under Rule 5605(f)(1)), would include the following in a table titled ''Board Diversity Matrix,'' in accordance with the instructions accompanying the proposed disclosure format: (1) the number of directors based on gender identity (male, female or non-binary[161]); (2) the number of directors based on race and ethnicity (African American or Black, Alaskan Native or American Indian, Asian, Hispanic or Latinx, Native Hawaiian or Pacific Islander, White, or Two or More Races or Ethnicities); and (3) the number of directors who self-identify as LGBTQ+.

Any director who chooses not to disclose a gender would be included under ''Gender Undisclosed'' and any director who chooses not to identify as any race or not to identify as LGBTQ+ would be included in the ''Undisclosed'' category at the bottom of the table. The defined terms for the race and ethnicity categories in the instructions to the Board Diversity Matrix disclosure format are substantially similar to the terms and definitions used in the EEO–1 Report.[162] LGTBQ+ is defined similarly to proposed Rule 5605(f)(1) as a person who identifies as any of the following: lesbian, gay, bisexual, transgender or a member of the queer community.

Below is an example of a Board Diversity Matrix that companies may use, which is also attached [sic] as *Exhibit 3:*

[158] *See* Securities and Exchange Commission, Diversity Assessment Report for Entities Regulated by the SEC, available at: *https://www.sec.gov/files/OMWI-DAR-FORM.pdf.*

[159] All companies with 100 or more employees are required to complete the EEO–1 Report. *See* U.S. Equal Employment Opportunity Commission, EEO–1: Who Must File, *https://www.eeoc.gov/employers/eeo-1-survey/eeo-1-who-must-file* (last accessed Nov. 27, 2020).

[160] *See Bostock* v. *Clayton Cty.,* 140 S. Ct. 1731, 1742 (2020) (''But unlike any of these other traits or actions, homosexuality and transgender status are inextricably bound up with sex. Not because homosexuality or transgender status are related to sex in some vague sense or because discrimination on these bases has some disparate impact on one sex or another, but because to discriminate on these grounds requires an employer to intentionally treat individual employees differently because of their sex.'').

[161] Although non-binary is included as a category in the proposed Board Diversity Matrix, a company would not satisfy the diversity requirement proposed by Rule 5605(f)(2) if a director self-identifies solely as non-binary.

[162] *See supra* note 159. Additionally, the EEOC does not categorize LGBTQ+ or any other sexual orientation identifier on its EEO–1 Report. The definitions of the EEO–1 race and ethnicity categories may be found in the appendix to the EEO–1 Report instructional booklet, available at *https://www.eeoc.gov/employers/eeo-1-survey/eeo-1-instruction-booklet.*

BOARD DIVERSITY MATRIX

[As of [DATE]]

Board Size:				
Total Number of Directors	#			
Gender:	Male	Female	Non-Binary	Gender undisclosed
Number of directors based on gender identity	#	#	#	#
Number of directors who identify in any of the categories below:				
African American or Black	#	#	#	#
Alaskan Native or American Indian	#	#	#	#
Asian	#	#	#	#
Hispanic or Latinx	#	#	#	#
Native Hawaiian or Pacific Islander	#	#	#	#
White	#	#	#	#
Two or More Races or Ethnicities	#	#	#	#
LGBTQ+	#			
Undisclosed	#			

Nasdaq recognizes that some Foreign Issuers, including Foreign Private Issuers as defined by the Act,[163] may have their principal executive offices located outside of the United States and in jurisdictions that may impose laws limiting or prohibiting self-identification questionnaires, particularly as they relate to race, ethnicity or LGBTQ+ status. In such countries, a Foreign Issuer may be precluded by law from requesting diversity data from its directors. Moreover, Nasdaq's definition of Underrepresented Minority proposed in Rule 5606(f)(1) may be inapplicable to a Foreign Issuer, making this Board Matrix data less relevant for such companies and not useful for investors.

As a result of these limitations, Nasdaq is proposing the option of a separate Board Diversity Matrix for Foreign Issuers. Similar to other companies, a Foreign Issuer would be required to provide the total number of directors on its board. If a director voluntarily self-identifies, the company would include the following in a table titled ''Board Diversity Matrix'': (1) The number of directors based on gender identity (male, female or non-binary [164]); (2) the number of directors who are considered underrepresented in the company's home country jurisdiction;[165] and (3) the number of directors who self-identify as LGBTQ+. An ''Underrepresented Individual in Home Country Jurisdiction'' is defined in the instructions to the Board Diversity Matrix as a person who self-identifies as an underrepresented individual based on national, racial, ethnic, indigenous, cultural, religious or linguistic identity in a Foreign Issuer's home country jurisdiction. Rule 5605(f)(2)(B)(i) also proposes the same definition for Diverse directors of Foreign Issuers.

Nasdaq is also proposing new Rule 5606(b), which would require each company to provide the disclosure required under Rule 5606(a) in either the company's proxy statement or information statement for its annual meeting for shareholders, or on the company's website. If the company elects to disclose the information on its website, the company must also submit such disclosure along with a URL link to the information through the Nasdaq Listing Center within 15 calendar days of the company's annual shareholder meeting. The proposed time period to submit the information to the Nasdaq Listing Center is aligned with the time period provided in proposed Rule 5605(f)(3) for a company to submit its explanation for why it does not have at least two Diverse directors. Disclosure of the statistical data is not in lieu of any SEC requirements for a company to disclose any required information pursuant to Regulation S–K or any other federal, state or foreign laws or regulations. As described in the instructions to the Board Diversity Matrix and Rule 5606(a), each year following the first year that a company publishes its annual Board Diversity Matrix, the company would be required to publish its data for the current and immediately prior years.

Additionally, Nasdaq is proposing Rule 5606(c), which exempts the following types of companies from proposed Rule 5606(a): acquisition companies listed under IM–5101–2; asset-backed issuers and other passive issuers (as set forth in Rule 5615(a)(1)); cooperatives (as set forth in Rule 5615(a)(2)); limited partnerships (as set forth in Rule 5615(a)(4)); management investment companies (as set forth in Rule 5615(a)(5)); issuers of non-voting preferred securities, debt securities and Derivative Securities (as set forth in Rule 5615(a)(6)); and issuers of securities listed under the Rule 5700 Series. The exemption of these companies is consistent with the approach taken by Nasdaq in Rule 5615 as it relates to certain Nasdaq corporate governance standards for board composition.

Nasdaq is also proposing Rule 5606(d) to allow for a company newly listing on Nasdaq, including a company listing in connection with a business combination under IM–5101–2, to satisfy the requirement of Rule 5606 within one year of listing on Nasdaq. The disclosure required by proposed Rule 5606(d) would be required to be included in the company's annual proxy statement or information statement for its annual meeting of shareholders or on the company's website. If the company provides such disclosure on its website, the company must also submit the disclosure and a URL link to the disclosure through the Nasdaq Listing Center no later than 15 calendar days after the company's annual shareholder meeting.

When a company does not timely provide the required disclosure, Nasdaq will notify the company that it is not in compliance with a listing requirement

[163] *See* 17 CFR 240.3b–4.

[164] Although non-binary is included as a category in the proposed Board Diversity Matrix, a company would not satisfy any aspect of the diversity requirement proposed by Rule 5605(f)(2) if a director self-identifies solely as non-binary.

[165] To clarify, although a Foreign Issuer may disclose directors that meet the requirement of Underrepresented Minority pursuant to new Rule 5605(f)(1), such disclosure may not meet the diversity objectives of new Rule 5605(f)(2)(B)(ii).

and allow the company to provide a plan to regain compliance. Consistent with deficiencies from most other rules that allow a company to submit a plan to regain compliance,[166] Nasdaq proposes to allow companies deficient under proposed Rule 5606 45 calendar days to submit a plan in accordance with Rule 5810(c)(2) to regain compliance and, based on that plan, Nasdaq can provide the company with up to 180 days to regain compliance. If the company does not do so, it would be issued a Staff Delisting Determination, which the company could appeal to a Hearings Panel pursuant to Rule 5815. Although proposed Rule 5606 is not identical to the current Commission requirements, it is similar to, and does not deviate from, the Commission's CD&I related to Items 401(e)(1) and 407(c)(2)(vi) of Regulation S–K. Moreover, the proposed rule strengthens the Commission's requirements by providing clarity to the definition of diversity and streamlining investors' desire for clear, complete and consistent disclosures. Nasdaq believes that the format of the Board Diversity Matrix and the information that it will provide offers greater transparency into a company's board composition and will enable the data to be easily aggregated across issuers.[167] Nasdaq also believes that requiring annual disclosure of the data will ensure that the information remains current and easy for investors, data analysts and other parties to track.

c. Diverse Board Representation or Explanation

Nasdaq is proposing to adopt new Rule 5605(f)(2) to require each listed company to have, or explain why it does not have, at least two members of its board of directors who are Diverse, including at least one who self-identifies as Female and one who self-identifies as an Underrepresented Minority or LGBTQ+.[168] A company does not need to provide additional public disclosures if the company discloses under Rule 5606 that it has at least two Diverse directors satisfying this requirement. The terms in the proposed definition of ''Underrepresented Minority'' reflect the EEOC's categories and are construed in accordance with the EEOC's definitions. Nasdaq has provided additional flexibility for Smaller Reporting Companies and Foreign Issuers (including Foreign Private Issuers).

Under proposed Rule 5605(f)(3), if a company satisfies the requirements of Rule 5605(f)(2) by explaining why it does not have two Diverse directors, the company must: (i) Specify the requirements of Rule 5605(f)(2) that are applicable (*e.g.,* the applicable subparagraph, the applicable diversity objectives, and the timeframe applicable to the company's market tier); and (ii) explain the reasons why it does not have two Diverse directors. Such disclosure must be provided: (i) In the company's proxy statement or information statement for its annual meeting of shareholders; or (ii) on the company's website. If the company provides such disclosure on its website, the company must also notify Nasdaq of the location where the information is available by submitting the URL link through the Nasdaq Listing Center no later than 15 calendar days after the company's annual shareholder meeting.

Nasdaq would not assess the substance of the company's explanation, but would verify that the company has provided one. If the company has not provided any explanation, or has provided an explanation that does not satisfy subparagraphs (i) and (ii) of Rule 5605(f)(3), the explanation will not satisfy the requirements of Rule 5605(f)(3). For example, it would not satisfy Rule 5605(f)(3) merely to state that ''the Company does not comply with Nasdaq's diversity rule.'' As described above, the company must specify the requirements of Rule 5605(f)(2) that are applicable and explain the reasons why it does not have two Diverse directors. For example, a company could disclose the following to satisfy subparagraph (i) of Rule 5605(f)(3): ''As a Smaller Reporting Company listed on the Nasdaq Capital Market tier, the Company is subject to Nasdaq Rule 5605(f)(2)(C), which requires the company to have, or explain why it does not have, at least two Diverse directors, including at least one director who self-identifies as Female. Under Rule 5605(f)(7), the Company is required to have at least one Diverse director by March 10, 2023, and a second Diverse director by March 10, 2026. The Company has chosen to satisfy Rule 5605(f)(2)(C) by explaining its reasons for not meeting the diversity objectives of Rule 5605(f)(2)(C), which the Company has set forth below.''

i. Effective Dates and Phase-in Period

Proposed Rule 5605(f)(7) provides a transition period before companies must fully satisfy the requirement to have two Diverse directors or explain why they do not upon the initial implementation of the rule. Under this transition rule, each company must have, or explain why it does not have, one Diverse director no later than two calendar years after SEC approval of the proposed rule (the ''Approval Date''), and two Diverse directors no later than (i) four calendar years after the Approval Date for companies listed on the Nasdaq Global Select (''NGS'') or Global Market (''NGM'') tiers, or (ii) five calendar years after the Approval Date for companies listed on the Nasdaq Capital Market (''NCM'') tier. For example, if the Approval Date is March 10, 2021, all companies would be required to have, or explain why they do not have, one Diverse director by March 10, 2023 and two Diverse directors by March 10, 2025 (for NGS/NGM companies) or March 10, 2026 (for NCM companies).

Under proposed Rule 5605(f)(5)(A), a newly listed company that was not previously subject to a substantially similar requirement of another national securities exchange will be allowed one year from the date of listing to satisfy the requirement described above. This ''phase-in'' period applies to companies listing in connection with an initial public offering, a direct listing, a transfer from another exchange or the over-the-counter market, or through a business combination with an acquisition company listed under IM–5101–2, such that the company is no longer subject to IM–5101–2 after the combination. This phase-in period will apply after the end of the transition period provided in Rule 5605(f)(7). As a result, companies listing after the expiration of the phase-in periods provided by Rule 5605(f)(7) would be provided with one year from the date of listing to satisfy the applicable requirement of Rule 5605(f)(2) to have, or explain why they do not have, at least two Diverse directors. Companies listing after the Approval Date, but prior to the expiration of the phase-in periods provided by Rule 5605(f)(7), would be

[166] Pursuant to Nasdaq Rule 5810(c)(2)(A)(iii), a company is provided 45 days to submit a plan to regain compliance with Rules 5620(a) (Meetings of Shareholders), 5620(c) (Quorum), 5630 (Review of Related Party Transactions), 5635 (Shareholder Approval), 5250(c)(3) (Auditor Registration), 5255(a) (Direct Registration Program), 5610 (Code of Conduct), 5615(a)(4)(D) (Partner Meetings of Limited Partnerships), 5615(a)(4)(E) (Quorum of Limited Partnerships), 5615(a)(4)(G) (Related Party Transactions of Limited Partnerships), and 5640 (Voting Rights). Pursuant to Nasdaq Rule 5810(c)(2)(A)(iv), a company is also provided 45 days to submit a plan to regain compliance with Rule 5250(b)(3)(Disclosure of Third Party Director and Nominee Compensation). A company is generally provided 60 days to submit a plan to regain compliance with the requirement to timely file periodic reports contained in Rule 5250(c)(1).

[167] Various stakeholders have requested easier aggregation. *See* Petition for Amendment of Proxy Rule, *supra* note 80, at 1.

[168] Nasdaq plans to publish an FAQ on the Listing Center clarifying that ''two members of its board of directors who are Diverse'' would exclude emeritus directors, retired directors and members of an advisory board.

provided with the latter of the periods set forth in Rule5605(f)(7) or one year from the date of listing.

Nasdaq believes this proposed period is consistent with the phase-in periods granted to companies for Nasdaq's other board composition requirements. For example, Rule 5615(b)(1) provides a company listing in connection with its initial public offering one year to fully comply with the compensation and nomination committee requirements of Rules 5605(d) and (e), and with the majority independent board requirement of Rule 5605(b). Similarly, SEC Rule 10A–3(b)(1)(iv)(A) allows a company up to one year from the date its registration statement is effective to fully comply with the applicable audit committee composition requirements. Nasdaq Rule 5615(b)(3) provides a one-year timeframe for compliance with the board composition requirements for companies transferring from other listed markets that do not have a substantially similar requirement.

ii. Foreign Issuers

Nasdaq recognizes that the EEOC categories of race and ethnicity may not extend to all countries globally because each country has its own unique demographic composition. However, Nasdaq observed that on average, women tend to be underrepresented in boardrooms across the globe, holding an estimated 16.9% of board seats in 2018.[169] As an official supporter of the United Nations Sustainable Stock Exchanges Initiative, Nasdaq recognizes that ensuring women have equal opportunities for leadership in economic decision making is one of the United Nations Sustainable Development Goals to be accomplished by 2030.[170] However, studies estimate that at current rates, it could take 18 [171] to 34 years [172] for U.S. companies to achieve gender parity on their boards.

Accordingly, under proposed Rule 5605(f)(2)(B), each Foreign Issuer must have, or explain why it does not have, at least two Diverse directors on its board, including at least one Female. Nasdaq proposes to provide Foreign Issuers with additional flexibility in that Foreign Issuers may satisfy the diversity requirement by having two Female directors. In addition, Foreign Issuers may also satisfy the diversity requirement by having one Female director, and an individual who self identifies as (i) LGBTQ+ or (ii) an underrepresented individual based on national, racial, ethnic, indigenous, cultural, religious or linguistic identity in the company's home country jurisdiction. Alternatively, a company could satisfy Rule 5605(f)(2)(B) by publicly explaining the company's reasons for not meeting the diversity objectives of the rule.

Nasdaq proposes to define a Foreign Issuer under Rule 5605(f)(1) as (a) a Foreign Private Issuer (as defined in Rule 5005(a)(19)) or (b) a company that: (i) Is considered a ''foreign issuer'' under Rule 3b–4(b) under the Act; [173] and (ii) has its principal executive offices located outside of the United States. This definition will include all Foreign Private Issuers (as defined in Rule 5005(a)(19)),[174] and any foreign issuers that are not foreign private issuers so long as they are also headquartered outside of the United States. This is designed to recognize that companies that are not Foreign Private Issuers but are headquartered outside of the United States are foreign companies notwithstanding the fact that they file domestic SEC reports. It is also designed to exclude companies that are domiciled in a foreign jurisdiction without having a physical presence in that country. Proposed Rule 5605(f)(5)(B) will allow any company that ceases to be a Foreign Issuer one year from the date that the company no longer qualifies as a Foreign Issuer to satisfy the requirements of Rule 5605(f).

Nasdaq also proposes to revise Rule 5615 and IM–5615–3, which currently permit a Foreign Private Issuer to follow home country practices in lieu of the requirements set forth in the Rule 5600 Series, subject to several exclusions. Nasdaq proposes to revise Rule 5615 and IM–5615–3 to add Rules 5605(f) and 5606 to the list of excluded corporate governance rules. As a result, Foreign Private Issuers must satisfy the requirements of Rule 5605(f) and 5606 and may not follow home country practices in lieu of such requirements. However, Foreign Private Issuers that elect to follow an alternative diversity objective in accordance with home country practices, or are located in jurisdictions that restrict the collection of personal data, may satisfy the requirements of Rule 5605(f) by explaining their reasons for doing so instead of meeting the diversity objectives of the rule.

iii. Smaller Reporting Companies

Nasdaq also recognizes that smaller companies, especially pre-revenue companies that depend on the capital markets to fund ground-breaking research and technological advancements, may not have the resources necessary to compensate an additional director or engage a search firm to search outside of directors' networks. In recognition of the resource constraints faced by smaller companies, Nasdaq proposes to provide each Smaller Reporting Company with additional flexibility. Specifically, these companies could satisfy the two Diverse directors objective under Rule 5605(f)(2)(C) by having two Female directors.

Like other companies, Smaller Reporting Companies could also satisfy the two Diverse directors by having one Female director and one director who self-identifies as either (i) an Underrepresented Minority, or (ii) a member of the LGBTQ+ community. Alternatively, a company could satisfy Rule 5605(f)(2)(C) by publicly explaining the company's reasons for not meeting the diversity objectives of the rule. Under Rule 5605(f)(1), Nasdaq proposes to define a Smaller Reporting Company as set forth in Rule 12b–2 under the Act.[175] Proposed Rule 5605(f)(5)(B) will allow any company that ceases to be a Smaller Reporting Company one year from the date that the company no longer qualifies as a Smaller Reporting Company to satisfy the requirements of Rule 5605(f).

iv. Cure Period

Nasdaq proposes to adopt Rule 5605(f)(6) and a new Rule 5810(c)(3)(F) to specify what happens if a company does not have at least two Diverse directors as set forth under Rule 5605(f)(2) and fails to provide the disclosure required by Rule

[169] *See* Deloitte, *Women in the Boardroom, supra* note 86.

[170] *See* United Nations Sustainable Stock Exchanges Initiative, *Gender Equality, https://www.un.org/sustainabledevelopment/gender-equality/* (last accessed Nov. 24, 2020).

[171] *See* McKinsey & Company, *supra* note 36, at 17.

[172] *See* GAO Report, *supra* note 44, at 9 (estimating ''it could take about 10 years from 2014 for women to comprise 30 percent of board directors and more than 40 years for the representation of women on boards to match that of men'').

[173] *See* 17 CFR 240.3b–4(b) (''The term foreign issuer means any issuer which is a foreign government, a national of any foreign country or a corporation or other organization incorporated or organized under the laws of any foreign country.'').

[174] Under Nasdaq Rule 5005(a)(19), the term Foreign Private Issuer has ''the same meaning as under Rule 3b–4 under the Act.''

[175] Under 12b–2 of the Act, a Smaller Reporting Company ''means an issuer that is not an investment company, an asset-backed issuer (as defined in § 229.1101 of this chapter), or a majority-owned subsidiary of a parent that is not a smaller reporting company and that: (1) Had a public float of less than $250 million; or (2) Had annual revenues of less than $100 million and either: (i) No public float; or (ii) A public float of less than $700 million.'' *See* 17 CFR 240.12b–2.

5605(f)(3).[176] Under those provisions, the Listing Qualifications Department will promptly notify the company that it has until the latter of its next annual shareholders meeting, or 180 days from the event that caused the deficiency, to cure the deficiency. The company can cure the deficiency either by nominating additional directors so that it satisfies the Diversity requirement of Rule 5605(f)(2) or by providing the disclosure required by Rule 5605(f)(3). If a company does not regain compliance within the applicable cure period, the Listings Qualifications Department would issue a Staff Delisting Determination Letter. A company that receives a Staff Delisting Determination can appeal the determination to the Hearings Panel through the process set forth in Rule 5815. Nasdaq also proposes revising Rule 5810(c)(2)(A)(iv) to make a non-substantive change clarifying that Rule 5250(b)(3) is related to ''Disclosure of Third Party Director and Nominee Compensation.''

v. Exempt Companies

Under proposed Rule 5605(f)(4), Nasdaq proposes to exempt the following types of companies from the requirements of Rule 5605(f) (''Exempt Companies''): acquisition companies listed under IM–5101–2; asset-backed issuers and other passive issuers (as set forth in Rule 5615(a)(1)); cooperatives (as set forth in Rule 5615(a)(2)); limited partnerships (as set forth in Rule 5615(a)(4)); management investment companies (as set forth in Rule 5615(a)(5)); issuers of non-voting preferred securities, debt securities and Derivative Securities (as set forth in Rule 5615(a)(6)); and issuers of securities listed under the Rule 5700 Series. Proposed Rule 5605(f)(5)(B) will allow any company that ceases to be an Exempt Company one year from the date that the company no longer qualifies as an Exempt Company to satisfy the requirements of Rule 5605(f).

Nasdaq believes it is appropriate to exempt these types of companies from the proposed rule because such companies do not have boards, do not list equity securities, or are not operating companies. These companies are already exempt from certain of Nasdaq's corporate governance standards related to board composition, as described in Rule 5615.

d. Alternatives Considered

Nasdaq considered whether requiring listed companies to have, or explain why they do not have, two Diverse directors would better promote the public interest than an alternative threshold or approach. Nasdaq's reasoned decision-making process included considering: (i) Mandate and disclosure-based approaches; (ii) higher and lower diversity objectives; (iii) longer and shorter timeframes; and (iv) broader and narrower definitions of ''Diverse.''

i. Mandate vs. Disclosure Based Approach

Globally, gender mandates range from requiring at least one woman on the board,[177] requiring two or more women based on board size,[178] or requiring 30 to 50% women on the board.[179] Some mandates vary by board size—for example, Norway imposes different standards for boards of two to three directors, four to five directors, six to eight directors, nine directors and ten or more directors.[180] California imposes a higher standard for gender diversity that boards with five directors or six or more directors must satisfy by the end of 2021 under S.B. 826, and a higher standard for underrepresented communities that boards with five to eight directors and nine or more directors must satisfy by the end of 2022 under A.B. 979. Nasdaq did not observe a common denominator among the mandates applicable to varying board sizes. However, Nasdaq considered criticism that a model based on various board sizes could subject companies to a higher threshold by virtue of adding directors.[181] Based on Nasdaq data, the average board size of its listed companies is eight directors.

Soft targets ranging from 25% to 40% women on boards have been suggested by various corporate governance codes and corporate governance organizations. For example, Rule 4.1 of the Swedish Corporate Governance Code (the ''Code'') provides that listed companies are to ''strive for gender balance on the board.'' [182] Each company's nominations committee is to publish a statement on its website at the time it issues notice of its shareholders meeting ''with regard to the requirement in rule 4.1, that the proposed composition of the board is appropriate according to the criteria set out in the Code and that the company is to strive for gender balance.'' [183] Companies are not

[176] Nasdaq proposes that existing Rules 5810(c)(3)(F) and (G) be renumbered as Rules 5810(c)(3)(G) and (H) respectively.

[177] For example, the Securities and Exchange Board of India requires public companies to have at least one woman on the board. *See* Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, Regulation 17(1)(a) (2015), available at: *https://www.sebi.gov.in/legal/regulations/jan-2020/securities-and-exchange-board-of-india-listing-obligations-and-disclosure-requirements-regulations-2015-last-amended-on-january-10-2020-_37269.html.* Similarly, the Israeli Companies Law requires public companies to have at least one woman on the board. *See* Paul Hastings, *Breaking the Glass Ceiling: Women in the Boardroom* 139 (2018), available at: *https://www.paulhastings.com/genderparity/.* In the United States, California's S.B. 826 requires public companies headquartered in California to have at least one woman on the board. *See* Cal. S.B. 826, *supra* note 112, at § 301.3(b)(3).

[178] For example, California's S.B. 826 requires public companies headquartered in California to have at least two women on the board if their board is comprised of five directors, and at least three women on the board if their board is comprised of six or more directors. *See* Cal. S.B. 826, *supra* note 112, at § 301.3(b)(1) and (2). Similar legislation has been proposed in New Jersey, Michigan and Hawaii. *See* N.J. Senate No. 3469, § 3(b)(2) (2019); Mich. S.B. 115, § 505a(2)(b) (2019); Haw. H.B. 2720, § 414–1(b)(2) (2020).

[179] For example, Norway imposes a gender quota ranging from 33%–50% depending on board size. *See* Paul Hastings, *supra* note 177, at 103. Portugal requires listed companies to have at least 33.3% women on boards by 2020. *See* Deloitte, *Women in the Boardroom, supra* note 86, at 143. Germany requires public companies with co-determined boards (at least 50% employee representation) to have at least 30% women, and all other listed companies to establish a company-defined target. *See* Ulrike Binder and Guido Zeppenfeld, Mayer Brown, *Germany Introduces Rules on Female Quota for Supervisory Boards and Leadership Positions* (March 13, 2015), available at *https://www.mayerbrown.com/en/perspectives-events/publications/2015/03/germany-introduces-rules-on-female-quota-for-super.* Belgium requires listed companies to have at least 33% women on the board. *See* Deloitte, *Women in the Boardroom, supra* note 86, at 85. Austria requires listed companies with more than 1,000 employees to have at least 30% women on the board. *See id.* at 81. Iceland requires public companies with more than 50 employees to have at least 40% women on the board. *See* Act respecting Public Limited Companies No. 2/199, Article 63, available at: *https://www.government.is/publications/legislation/lex/2018/02/06/TRANSLATION-OF-RECENT-AMENDMENTS-OF-ICELANDIC-PUBLIC-AND-PRIVATE-LIMITED-COMPANIES-LEGISLATION-2008-2010-including-Acts-13-2010-sex-ratios-and-68-2010-minority-protection-remuneration/.* France and Italy both require public companies to have at least 40% women on their boards. *See* Paul Hastings, *supra* note 177, at 91; White & Case, *Italy increases gender quotas in corporate boards of listed companies* (Jan. 29, 2020), available at: *https://www.whitecase.com/publications/alert/italy-increases-gender-quotas-corporate-boards-listed-companies*).

[180] *See* Paul Hastings, *supra* note 177, at 103.

McIntosh, Wachtell, Lipton, Rosen & Katz, *Gender Diversity and Board Quotas,* New York Law Journal (July 25, 2018), available at: *https://www.wlrk.com/webdocs/wlrknew/AttorneyPubs/WLRK.26150.18.pdf* (''California legislators dispute that the bill requires men to be displaced by women, noting that boards can simply increase their size. This may be easier said than done, however: Because the required quota increases with board size, a company with a four-man board that did not wish to force out a current director would need to add three women to accommodate the requirements of the law by 2021.'').

[182] *See* Swedish Corporate Governance Board, *The Swedish Corporate Governance Code* § 4.1 17 (eff. Jan. 1, 2020), available at: *http://www.bolagsstyrning.se/UserFiles/Koden/The_Swedish_Corporate_Governance_Code_1_January_2020.pdf.*

[183] *See* Swedish Corporate Governance Board, *Annual Report 2020* 22 (August 2020), available at:

required to comply with the Code, ''but are allowed the freedom to choose alternative solutions which they feel are better suited to their particular circumstances, as long as they openly report every deviation, describe the alternative solution they have chosen and explain their reasons for doing so.'' [184] Signifying progress, in 2019, 7% of nominations committees did not issue a statement on board gender balance, compared to 58% in 2013.[185]

In 2015, the Swedish Corporate Governance Board, which is responsible for administering the Code, established a goal to achieve representation of women on boards of small/mid cap (and Swedish companies listed on NGM Equity) and large cap companies of 30% and 35%, respectively, by 2017. Further, the Board aimed to achieve 40% representation of women on boards of all listed Swedish companies by 2020.[186] Based on data as of June 30, 2020, among listed companies, women accounted for 32.7% of board seats on small/mid cap companies and NGM Equity, 38.6% of large cap companies and 34.7% of all listed companies.[187]

In the United Kingdom, the Financial Conduct Authority requires companies with a premium listing on the London Stock Exchange to publicly disclose whether or not they comply with the Financial Reporting Council's U.K. Corporate Governance Code (the ''U.K. Code''), and if not, to explain their reasons for non-compliance.[188] Provision 23 of the U.K. Code requires each company to publicly describe ''the work of the nomination committee, including . . . the policy on diversity and inclusion, its objectives and linkage to company strategy, how it has been implemented and progress on achieving the objectives,'' [189] and Principle J states that board appointments and succession planning should, among other things, ''promote diversity of gender, social and ethnic backgrounds.'' [190] In addition, the Companies Act requires companies to disclose gender diversity statistics among the board, management and employees.[191] In 2018, the Financial Reporting Council reported that 83% of FTSE 100 and 74% of FTSE 250 companies had established a board diversity policy specifying gender, with approximately ⅓ specifying ethnicity.[192] More recently, a report commissioned by the Financial Reporting Council concluded that there is a lack of public disclosure regarding the LGBTQ+ status among directors and executives of public companies. While the report did not recommend amending Principle J of the U.K. Code to consider sexual orientation or gender identity, it emphasized that the U.K. Code ''seeks to promote diversity and inclusion of all minority groups within business'' [193] and suggested that the government ''update corporate reporting requirements to require companies to demonstrate how they intend to capture data on the sexual orientation and gender identity of staff.'' [194]

In 2011, the Davies Review called on FTSE 100 boards to achieve 25% women on boards by 2015.[195] After that milestone was achieved, the Hampton Alexander Review encouraged FTSE 350 boards to have ⅓ women by 2020, and it has been achieved by FTSE 100 companies.[196] In 2017, the Parker Review called on FTSE 100 and 250 companies to have at least one director of color by 2021 and 2024, respectively.[197] As of February 2020, approximately 37% of FTSE 100 companies surveyed and 59% of FTSE 350 companies surveyed did not have one director of color on their board.[198]

Australian Securities Exchange (''ASX'')-listed companies must comply with the ASX Corporate Governance Council's Corporate Governance Principles and Recommendations (the ''ASX Recommendations'') or explain why they do not. The ASX Recommendations require companies to have and disclose a diversity policy with measurable objectives and report on progress towards meeting those objectives. If the company is in the ASX/S&P 300, its objective for achieving gender diversity should be at least 30%.[199] The Australian government also requires companies with 100 or more employees to provide an annual report about gender equality indicators, including the gender composition of the board and the rest of the workforce.[200] In 2015, the ASX and KPMG found that 99% of S&P/ASX 200 companies and 88% of ASX 201–500 companies disclosed establishing a diversity policy rather than explaining why they do not have one.[201] As of July 2020, women account for 28.4% and 31.8% of board seats among ASX 300 and ASX 100 companies, respectively.[202]

Nasdaq observed that women account for at least 30% of the boards of the largest companies in Australia, Sweden and the United Kingdom, and in three other countries that have implemented disclosure requirements or suggested milestones on a comply-or-explain

basis: Finland, New Zealand, and Canada.[203] Nasdaq considered that countries that have implemented mandates have also seen progress in women's representation on boards, including, for example, Austria, Iceland, Belgium, France, Germany, Italy and Portugal.[204] On average, women account for 31% of board seats in countries with gender mandates.[205]

Nasdaq discussed the benefits and challenges of mandate and comply-or-explain models with over a dozen stakeholders, and while the majority of organizations were in agreement that companies would benefit from a regulatory impetus to drive meaningful and systemic change in board diversity, the majority also stated that a disclosure-based approach would be more palatable to the U.S. business community than a mandate. Most organizations Nasdaq spoke with expressed general discomfort with mandates, although they acknowledged that opposition is lessening in the wake of California's S.B. 826 [206] and A.B. 979.[207] While many recognized that mandates can force boards to act more quickly and accelerate the rate of change, they believe that a disclosure-based approach is less controversial and would spur companies to take action and achieve the same results. Some stakeholders also highlighted additional challenges that smaller companies and companies in certain industries may face finding diverse board members. In contrast, a disclosure-based framework that provides companies with flexibility would empower companies to maintain decision-making authority over their board's composition while providing stakeholders with a better understanding of the company's current board composition and its philosophy regarding diversity. This approach would better inform the investment community and enable more informed analysis of, and conversations with, companies. Nasdaq believes that these goals will be achieved through the disclosure of consistent, comparable data across companies, as would be required by the Exchange's proposed definition of Diverse.

For example, if, under Israeli law regarding board diversity, an Israeli company is required only to have a minimum of one woman on the board and such Israeli company chooses to comply with Israeli home country law in lieu of meeting the diversity objectives of Rule 5605(f)(2)(B), it may choose to disclose that ''the Company is incorporated in Israel and required by Israeli law to have a minimum of one woman on the board, and satisfies home country requirements in lieu of Nasdaq Rule 5605(f)(2)(B), which requires each Foreign Issuer to have at least two Diverse directors.'' If a U.S. company had two Diverse directors but one resigned due to unforeseen circumstances, it could disclose, for example: ''Due to the unexpected resignation of Ms. Smith this year, the Company does not have at least one director who self-identifies as Female and one director who self-identifies as an Underrepresented Minority or LGBTQ+. We intend to undertake reasonable efforts to meet the diversity objectives of Rule 5605(f)(2)(A) prior to our next annual shareholder meeting and have engaged a search firm to identify qualified Diverse candidates. However, due to unforeseen circumstances, we may not achieve this goal.'' Or a U.S. company may disclose that it chooses to define diversity more broadly than Nasdaq's definition by considering national origin, veteran status or individuals with disabilities when identifying nominees for director because it believes such diversity brings a wide range of perspectives and experiences to the board. In each case, investors will have a better understanding of the company's reasons for not having at least two Diverse directors and can use that information to make an informed investment or voting decision.

ii. Higher vs. Lower Diversity Objectives

Nasdaq observed that existing empirical research spanned companies across several countries, including the United States, Spain, China, Canada, France and Norway. Nasdaq considered that the studies related to company performance and board diversity found positive associations at various levels and measures of board diversity, including having at least one woman on the board,[208] two or more diverse directors (with diverse considered female, Black, Hispanic or Asian),[209] at least three women on the board [210] and being in the top quartile for gender and ethnic diversity.[211]

Nasdaq considered that the academic studies related to investor protection and board diversity found positive associations at various levels and measures of board diversity, including having at least one woman on the board [212] or up to 50% women on the board, and the assertions of certain academics that their findings may extend to other forms of diversity, including racial and ethnic diversity.[213] Nasdaq also reviewed academic research suggesting that ''critical mass'' is achieved by having three or more women on the board, and that having only one diverse director on the board risks ''tokenism.'' [214] Nasdaq considered that although the legislation enacted by Norway and California, and proposed by several other states, varies based on board size, the academic research considered companies across a spectrum of sizes and board sizes, including Fortune 100, S&P 500, Fortune 1000 and smaller (non-Fortune 1000) companies.

Nasdaq concluded that there is no ''one-size fits all'' approach to promoting board diversity and that the academic literature regarding the relationship between board diversity, company performance and investor protections is continuing to evolve. However, in Nasdaq's survey of academic studies described above—and of the targets or mandates promulgated by regulatory bodies and organizations worldwide—Nasdaq observed a common denominator of having at least one woman on the board. Similarly, Nasdaq observed a common denominator of having at least one director who is diverse in terms of race, ethnicity or sexual orientation among

the requirements related to, and academic research considering, board diversity beyond gender identity. Nasdaq therefore believes that a diversity objective of at least two Diverse directors provides a reasonable baseline for comparison across companies. Companies are not precluded from meeting a higher or lower alternative measurable objective. For example, a company may choose to disclose that it does not meet the diversity objectives under Rule 5605(f)(2) because it is subject to an alternative standard under state or foreign laws and has chosen to satisfy that diversity objective instead. On the other hand, many firms may strive to achieve even greater diversity than the objectives set forth in Nasdaq's proposed rule. Nasdaq believes that providing flexibility and clear disclosure when the company determines to follow a different path will improve the quality of information available to investors who rely on this information to make informed investment and voting decisions.

iii. Longer vs. Shorter Timeframes

Nasdaq considered whether an alternative timeframe for satisfying the diversity objectives of Rule 5605(f)(2) would better promote the public interest than the timeframe Nasdaq has proposed under Rule 5605(f)(7). While companies are not precluded from adding additional directors to their boards to satisfy Rule 5605(f)(2) by having two Diverse directors sooner than contemplated by the proposed rule, Nasdaq understands that some companies may need to obtain shareholder approval to amend their governing documents to allow for board expansion. Other companies may choose to replace an existing director on the board with a Diverse director, and board turnover may be low.[215] Nasdaq recognizes that it also takes substantial lead time to identify, interview and select board nominees. To provide companies with sufficient time to satisfy Rule 5605(f) by having two Diverse directors, while recognizing that investors are calling for expedient change, Nasdaq has structured its proposal similarly to the approach taken by California, where companies must achieve one target by an earlier date and satisfy the entire diversity objective at a later date. Nasdaq also considered the approaches taken by foreign jurisdictions to implement diversity objectives. For example, Belgium and France implemented diversity objectives under a phased approach that provided companies with at least five years to fully satisfy the objectives,[216] whereas Iceland and Portugal provided companies with three years or less.[217]

While companies may choose to satisfy Rule 5605(f)(2) on an alternative timeframe, a company that chooses a timeframe that is longer than the timeframes set forth in Rule 5605(f)(7) also must publicly explain its reasons for doing so. For example, an NGM-listed company that, while not technically a Smaller Reporting Company, views itself as similarly situated to a NCM-listed Smaller Reporting Company may disclose the following: ''While the Company is listed on NGM and technically qualifies as a Smaller Reporting Company, it does not file its SEC reports utilizing the Smaller Reporting Company designation. However, the Company believes that it is similarly situated to other Smaller Reporting Companies listed on NCM in terms of its annual revenues and public float, and therefore has chosen to satisfy Rule 5605(f)(2)(C) in lieu of Rule 5605(f)(2)(A) and has satisfied this requirement by having at least two Diverse directors on the board who self-identify as Female within the timeframe provided under Rule 5605(f)(7) applicable to NCM-listed companies.''

iv. Broader vs. Narrower Definition of Diverse

Nasdaq considered whether the definition of Diverse should include broader characteristics than those reported on the EEO–1 report, such as the examples provided by the Commission's CD&I, including LGBTQ+, nationality, veteran status, and individuals with disabilities. During its stakeholder outreach, Nasdaq inquired whether a broad definition of Diversity would promote the public interest. While recognizing the diverse perspectives that different backgrounds can provide, most stakeholders supported a narrower definition of Diversity focused on gender, race and ethnicity, with several supporting broadening the definition to include the LGBTQ+ community.

As discussed above, companies currently are permitted to define diversity ''in ways they consider appropriate'' under federal securities laws. One of the challenges of this principles-based approach has been the disclosure of inconsistent and noncomparable data across companies. However, most companies are required by law to report data on race, ethnicity and gender to the EEOC through the EEO–1 Report. Nasdaq believes that adopting a broad definition of Diverse would maintain the status quo of inconsistent, noncomparable disclosures, whereas a narrower definition of Diverse focused on race, ethnicity, sexual orientation and gender identity will promote the public interest by improving transparency and comparability. Nasdaq also is concerned that the broader definitions of diversity utilized by some companies may result in Diverse candidates being overlooked, and may be hindering meaningful progress on improving diversity related to race, ethnicity, sexual orientation and gender identity. For example, a company may consider diversity to include age, education and board tenure. While such characteristics may provide laudable cognitive diversity, this focus may result in a homogenous board with respect to race, ethnicity, sexual orientation and gender identity that, by extension, does not reflect the diversity of a company's communities, employees, investors or other stakeholders.

Nasdaq also believes that a transparent, consistent definition of Diverse would provide stakeholders with a better understanding of the company's current board composition and its philosophy regarding diversity if it does not have two Diverse directors. This would enable the investment community to conduct more informed analysis of, and have more informed conversations with, companies. To the extent a company chooses to satisfy the requirement of Rule 5605(f)(2) by having at least two Diverse directors on its board, it will have the ancillary benefit of making meaningful progress in improving board diversity related to race, ethnicity, sexual orientation and gender identity.

Nasdaq's review of academic research on board diversity revealed a dearth of empirical analysis on the relationship between investor protection or company performance and broader diversity characteristics such as veteran status or individuals with disabilities.[218] Nasdaq

Continued

acknowledges that there also is a lack of published research on the issue of LGBTQ+ representation on boards.[219] This may be due to a lack of consistent, transparent data on broader diverse attributes, or because there is no voluntary self-disclosure workforce reporting requirements for LGBTQ+ status, such as the EEO–1 reporting framework for race, ethnicity, and gender. In any event, it is evident that while ''[b]oardroom diversity is a topic that has gained significant traction . . . LGBT+ diversity, however, has largely been left out of the conversation.'' [220]

Nonetheless, Nasdaq believes it is reasonable and in the public interest to include a reporting category for LGBTQ+ in recognition of the U.S. Supreme Court's recent affirmation that sexual orientation and gender identity are ''inextricably'' intertwined with sex,[221] and based on studies demonstrating a positive association between board diversity and decision making, company performance and investor protections. Nasdaq also believes that the proposed rule would foster the development of data to conduct meaningful assessments of the association between LGBTQ+ board diversity, company performance and investor protections.

As noted above, the proposal does not preclude companies from considering additional diverse attributes, such as nationality, disability, or veteran status in selecting board members; however, company would still have to provide the required disclosure under Rule 5605(f)(3) if the company does not also have at least two directors who are Diverse. Nor would the proposal prevent companies from disclosing information related to other diverse attributes of board members beyond those highlighted in the rule if they felt such disclosure would benefit investors. Nasdaq believes such disclosure would help inform the evolving body of research on the relationship between broader diverse attributes, company performance and investor protection and provide investors with additional information about the company's philosophy regarding broader diversity characteristics.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[222] in general, and furthers the objectives of Section 6(b)(5) of the Act,[223] in that it is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system, to prevent fraudulent and manipulative acts and practices, and, in general, to protect investors and the public interest, for the reasons set forth below. Further, Nasdaq believes the proposal is not designed to permit unfair discrimination between issuers or to regulate by virtue of any authority conferred by the Act matters not related to the purposes of the Act or the administration of the Exchange, for the reasons set forth below.

I. Board Statistical Disclosure

Nasdaq has proposed what it believes to be a straightforward and clear approach for companies to publish their statistical data pursuant to proposed Rule 5606. The disclosure will assist investors in making more informed decisions by making meaningful, consistent, and reliable data readily available and in a clear and comprehensive format prescribed by the proposed rule. Nasdaq also believes that the disclosure format required by proposed Rule 5606 protects investors by eliminating data collection inaccuracies and decreasing costs, while enhancing investors' ability to utilize the information.

As a threshold matter, as discussed above, diversity has become an increasingly important subject and, in recent years, investors increasingly have been advocating for greater board diversity and for the disclosure of board diversity statistics. The current board diversity disclosure regime is lacking in several respects, and Nasdaq believes that its proposed Rule 5606 addresses many of the current concerns and responds to investors' demands for greater transparency into the diversity characteristics of a company's board composition by mandating disclosure and curing certain deficiencies that exist within the current SEC disclosure requirements.

Investors have expressed their dissatisfaction with having to independently collect board-level data about race, ethnicity and gender identity because such investigations can be time consuming, expensive, and fraught with inaccuracies.[224] The lack of consistency and specificity in Regulation S–K has been a major impediment for many investors and data collectors. As a general matter, the Commission's requirements have not addressed the concerns expressed by commenters that ''disclosure about board diversity was important information to investors.'' [225] Nasdaq believes that its proposed Rule 5606 addresses many of the concerns that have been raised.

Nasdaq believes that requiring the annual disclosure of a company's board diversity, as proposed in Rule 5606(a), will provide consistent information to the public and will enable investors to continually review the board composition of a company to track trends and simplify or eliminate the need for a company to respond to multiple investor requests for information about the diverse characteristics of the company's board. Requiring annual disclosures also would make information available to investors who otherwise would not be able to obtain individualized disclosures.[226] Moreover, consistent disclosures may encourage boards to consider a wider range of board candidates in the nomination process, including candidates with fewer ties to the current board.[227]

The Commission's 2009 amendments to Regulation S–K provide no definition for diversity and do not explicitly require disclosures specifically related to details about the board's gender, racial, ethnic and LGBTQ+ composition. Additionally, the Commission's CD&I does not address the definition of diversity, and it requires a registrant to disclose diversity information only in certain limited circumstances. Investors have expressed that current regulations and accompanying interpretations impair their ability to obtain clear and consistent data.[228] As a result, Nasdaq believes that proposed Rule 5606(a) protects investors and the public

''[r]etired GFOs who have honed their leadership and critical decision-making skills in a high-threat environment can bring extensive risk oversight experience to the board, which may be especially valuable in the context of today's risk landscape''). Accenture (2018) observed that companies that offered inclusive working environments for employees with disabilities achieved an average of 28% higher revenue, 30% higher economic profit margins, and 2x net income than their industry peers. *See* Accenture, *Getting to Equal: The Disability Inclusion Advantage* (2018), available at: *https://www.accenture.com/_acnmedia/PDF-89/Accenture-Disability-Inclusion-Research-Report.pdf.*

[227] *See* Proxy Disclosure Enhancements, 74 FR at 68,355 (''To the extent that boards branch out from the set of candidates they would ordinarily consider, they may nominate directors who have fewer existing ties to the board or management and are, consequently, more independent.''); Hazen and Broome, *supra* note 114, at 57–58.

[228] *See* Petition for Amendment of Proxy Rule, *supra* note 80, at 2; Petition for Rulemaking, *supra* note 123, at 7.

interest by making clear that a company's annual diversity data disclosure must include information related to gender identity, race, ethnicity and LGBTQ+ status, thereby leaving less discretion for companies to selectively disclose certain diversity information and enhancing the comparability of such data across companies. Moreover, it is in the public interest to provide clear requirements for diversity disclosure, and Nasdaq's proposed Board Diversity Matrix format provides such clarity.

Nasdaq does not intend to obligate directors to self-identify in any of the categories related to gender identity, race, ethnicity and LGBTQ+. Nasdaq believes that a director should have autonomy to decide whether to provide such information to their company. Therefore, Nasdaq believes that it is reasonable and in the public interest to allow directors to opt out of disclosing the information required by proposed Rule 5606(a) by permitting a company to identify such directors in the ''Undisclosed'' category.

Nasdaq believes that it is in the public interest to utilize the Board Diversity Matrix format for all companies as proposed in Rule 5606(a). Additionally, Nasdaq believes that the format removes any impediments to aggregating and analyzing data across all companies by requiring each company to disclose separately the number of male, female, and non-binary directors, the number of male, female, and non-binary directors that fall into certain racial and ethnic categories, and the number of directors that identify as LGBTQ+. The format allows investors to easily disaggregate the data and track directors with multiple diversity characteristics.

As discussed above, most listed companies are required by law to complete an EEOC Employer Information Report EEO–1 Form. Although outside directors generally are not employees and therefore are not covered in the EEO–1,[229] Nasdaq believes that collecting the information required by proposed Rule 5606(a) is familiar to most companies, and that it is reasonable to require disclosure of the additional board information.

Nasdaq also believes that requiring currently listed companies to comply with proposed Rule 5606 within one year from the date of Commission approval is a reasonable amount of time, given that most companies already collect similar information for certain employees. Moreover, most companies are required to prepare an annual proxy statement and update the Commission within four business days when a new director is appointed to the board.[230]

Further, Nasdaq believes that the disclosure required by proposed Rule 5606(a) will remove impediments to shareholders by making available information related to board-level diversity in a standardized manner, thereby enhancing the consistency and comparability of the information and helping to better protect investors. The proposed disclosure will also help protect investors and the public interest by enabling investors to determine the total number of diverse directors, which is information that is not consistently available in existing proxy disclosures in cases where a single director has multiple diverse characteristics. While companies can elect to make this information available either in a proxy statement or on the company's website, Nasdaq believes it is in the public interest to allow companies the option to provide the disclosure in a way they believe will be most meaningful to their shareholders.

Nasdaq recognizes that the proposed definition of Underrepresented Minority in Rule 5605(f)(1) may not apply to companies outside of the United States because each country has its own unique demographic composition. Moreover, Nasdaq's definition of Underrepresented Minority proposed in Rule 5606(f)(1) may be inapplicable to a Foreign Issuer, making this Board Matrix data less relevant for such companies and not useful for investors. Therefore, Nasdaq believes that offering Foreign Issuers the option of a separate template that requires different disclosure categories will provide investors with more accurate disclosures related to the diversity of directors among the board of a Foreign Issuer. Additionally, Nasdaq believes that providing an ''Underrepresented Individual in Home Country Jurisdiction'' category provides Foreign Issuers with more flexibility to identify and disclose diverse directors within their home countries.

The annual requirement in the proposed rule will guarantee that the information is available to the public on a continuous and consistent basis. As described in the instructions to the Board Diversity Matrix disclosure form and Rule 5606(a), each year following the first year that a company publishes the Board Diversity Matrix, the company will be required to publish its data for the current and immediately prior years. Nasdaq believes that disclosing at least two years of data allows the public to view any changes and track a board's diversity progress.

In addition to providing a means for shareholders to assess a company's board-level diversity and measure its progress in improving that diversity over time, Nasdaq believes that proposed Rule 5606 will provide a means for Nasdaq to assess whether companies meet the diversity objectives of proposed Rule 5605(f). The ability to determine satisfaction of the proposed listing rule's diversity objectives will protect investors and the public interest.

Moreover, the proposed rule provides transparency into diversity based not only on race, ethnicity, and gender identity, but also on a director's self-identified sexual orientation. Nasdaq believes that expanding the diversity characteristics beyond those which are commonly reported by companies currently will broaden the way boards view diversity, and ensure that board diversity is occurring across all protected groups.

Finally, Nasdaq believes that the proposal is not unfairly discriminatory because proposed Rule 5606 will apply to all Nasdaq-listed companies, except for the following companies: Acquisition companies listed under IM–5101–2; asset-backed issuers and other passive issuers (as set forth in Rule 5615(a)(1)); cooperatives (as set forth in Rule 5615(a)(2)); limited partnerships (as set forth in Rule 5615(a)(4)); management investment companies (as set forth in Rule 5615(a)(5)); issuers of non-voting preferred securities, debt securities and Derivative Securities (as set forth in Rule 5615(a)(6)); and issuers of securities listed under the Rule 5700 Series—which meet the definition of Exempt Companies as defined under proposed Rule 5605(f)(4). Nasdaq believes it is reasonable and not unfairly discriminatory to exempt these companies from the proposed rule because the exemption of these companies is consistent with the approach taken by Nasdaq in Rule 5615 as it relates to certain Nasdaq corporate governance standards for board composition.

Nasdaq further believes it is reasonable to provide companies with a one-year phase-in period to comply with proposed Rule 5606. Nasdaq believes there is only a *de minimis* burden placed on companies to collect the board data and prepare the Board Diversity Matrix. Moreover, as discussed above, companies already are required to gather similar information for certain employees. Therefore, Nasdaq believes that one year is

[229] The EEO–1 Form does not require a company to disclose data for outside directors because such directors are not company employees.

[230] *See* SEC Form 8–K, available at: *https://www.sec.gov/files/form8-k.pdf.*

sufficient time for companies to incorporate their directors into their data collection. Furthermore, newly listed companies have many obligations to meet under Nasdaq listing rules. Therefore, Nasdaq believes that it is reasonable under proposed Rule 5606(d) to provide newly listed Nasdaq companies, including companies listing in connection with a business combination under IM–5101–2, with one year from the time of listing to comply with the proposed rule.

II. Diverse Board Representation or Explanation

a. Removes Impediments to and Perfects the Mechanism of a Free and Open Market and a National Market System

As discussed above, studies suggest that the traditional director candidate selection process may create barriers to considering qualified diverse candidates for board positions by limiting the search for director nominees to existing directors' social networks and candidates with C-suite experience.[231] In analyzing Norway's experience in implementing a gender mandate, Dhir (2015) observed that ''[b]oard seats tend to be filled by directors engaging their networks, and the resulting appointees tend to be of the same socio-demographic background.'' [232] Dhir concluded that broadening the search for directors outside of traditional networks ''is unlikely to occur without some form of regulatory intervention, given the prevalence of homogenous social networks and in-group favoritism.'' [233] Regulatory action was effective in increasing the representation of women on boards in Norway by ''democratiz[ing] access to a space previously unavailable to women.'' [234] The number of public company board seats held by women in Norway increased from 6% in 2002 to 42% in 2020.[235] One Norwegian director ''grudgingly accept[ed] that the free market principles she held so dearly had disappointed her—and that the [mandate] was a necessary correction of market failure.'' [236]

In contrast, Nasdaq observed that other countries have made comparable progress using a disclosure-based model. Women account for at least 30% of the largest boards of companies in six countries using comply-or-explain models:[237] Australia, Finland, Sweden, New Zealand, Canada and the United Kingdom.[238] Nasdaq discussed the benefits and challenges of mandate and disclosure-based models with over a dozen stakeholders, and the majority of organizations were in agreement that companies would benefit from a regulatory impetus to drive meaningful and systemic change in board diversity, and that a disclosure-based approach would be more palatable to the U.S. business community than a mandate. While many organizations recognized that mandates can force boards to act more quickly and accelerate the rate of change, they believe that a disclosure-based approach is less controversial and would spur companies to take action and achieve the same results. Some stakeholders also highlighted additional challenges that smaller companies and companies in certain industries may face finding diverse board members. However, leaders from across the spectrum of stakeholders with whom Nasdaq spoke reinforced the notion that if companies recruit by skill set and expertise rather than title, then they will find there is more than enough diverse talent to satisfy demand.

Nasdaq also considered Commissioner Lee's observation that disclosure ''gets investors the information they need to make investment decisions based on their own judgment of what indicators matter for long-term value. Importantly, it can also drive corporate behavior.'' Specifically, she observed that:

For one thing, when companies have to formulate disclosure on topics it can influence their treatment of them, something known as the ''what gets measured, gets managed'' phenomenon. Moreover, when companies have to be transparent, it creates external pressure from investors and others who can draw comparisons company to company. The Commission has long-recognized that influencing corporate behavior is an appropriate aim of our regulations, noting that ''disclosure may, depending on determinations made by a company's management, directors and shareholders, influence corporate conduct'' and that ''[t]his sort of impact is clearly consistent with the basic philosophy of the disclosure provisions of the federal securities laws.[239]

Nasdaq believes that a disclosure-based framework may influence corporate conduct if a company chooses to meet the diversity objective of Rule 5605(f)(2) by having two Diverse directors on the board. A company may satisfy that objective by broadening the search for qualified candidates and considering candidates from other professional pathways that bring a wider range of skills and perspectives beyond traditional C-suite experience.[240] Nasdaq believes that this will help increase opportunities for Diverse candidates that otherwise may be overlooked due to the impediments of the traditional director recruitment process, which will thereby remove impediments to a free and open market and a national market system. Further, boards that choose to have at least two Diverse directors may experience other benefits from diversity that perfect the mechanism of a free and open market and national market system. As discussed above in Section II.A.1.II.b (*Diversity and Investor Protection*), and further discussed below in Section II.A.2.II.b (*Prevent Fraudulent and Manipulative Acts and Practices*), studies suggest that diversity is positively associated with reduced stock volatility,[241] more transparent public disclosures,[242] and less information asymmetry,[243] leading to stock prices that better reflect public information, and further removing impediments to and perfecting a free and open market and a national market system. Importantly, Nasdaq believes that the disclosure-based framework proposed under Rule 5605(f) will not create additional impediments to a free and open market and a national market system because it will empower

companies to maintain decision-making authority over the composition of their boards.

To the extent a company chooses not to meet the diversity objectives of Rule 5605(f)(2) to have at least two Diverse directors, Nasdaq believes that proposed Rule 5605(f)(3) will provide analysts and investors with a better understanding about the company's reasons for not doing so and its philosophy regarding diversity. Rule 5605(f) will thus remove impediments to a free and open market and a national market system by enabling the investment community to conduct more informed analyses of, and have more informed conversations with, companies. Nasdaq believes that such analyses and conversations will be better informed by consistent, comparable data across companies, which Nasdaq proposes to achieve by adopting a consistent definition of ''Diverse'' under Rule 5605(f)(1). Nasdaq further believes that providing such disclosure will improve the quality of information available to investors who rely on this information to make informed investment and voting decisions, thereby promoting capital formation and efficiency and perfecting the mechanism of a free and open market and a national market system.

b. Prevent Fraudulent and Manipulative Acts and Practices

Nasdaq's analysis discussed above in Section II.A.1.II raises the concern that the failure of homogenous boards to consider a broad range of viewpoints can result in suboptimal decisions that have adverse effects on company performance, board performance and stakeholders. Nasdaq believes that including diverse directors with a broader range of skills, perspectives and experiences may help detect and prevent fraudulent and manipulative acts and practices by mitigating ''groupthink.'' Increased board diversity also may reduce the likelihood of insider trading and other fraudulent and manipulative acts and practices.

Nasdaq reached this conclusion by reviewing public statements by investors and organizations regarding the impact of groupthink on decision making processes, as well as academic studies on the relationship between diversity, groupthink and fraud. Nasdaq observed that groupthink can result in ''self-censorship'' [244] and failure to voice dissenting viewpoints in pursuit of ''consensus without critical evaluation and without considering different possibilities.'' [245] In contrast, ''board members who possess a variety of viewpoints may raise different ideas and encourage a full airing of dissenting views. Such a broad pool of talent can be assembled when potential board candidates are not limited by gender, race, or ethnicity.'' [246]

Dhir (2015) concluded that gender diversity may ''promote cognitive diversity and constructive conflict in the boardroom'' and may be more effective at overseeing management.[247] One respondent in Dhir's survey of Norwegian directors observed that:

> I've seen situations where the women were more willing to dig into the difficult questions and really go to the bottom even if it was extremely painful for the rest of the board, but mostly for the CEO . . . when it comes to the really difficult situations, [where] you think that the CEO has . . . done something criminal . . . [o]r you think that he has done something negligent, something that makes it such that you . . . are unsure whether he's the suitable person to be in the driving seat.[248]

Another director observed that ''[i]f you have different experiences and a more diversified board, you will have different questions asked.'' [249] Dhir concluded that ''women directors may be particularly adept at critically questioning, guiding and advising management without disrupting the overall working relationship between the board and management.'' [250]

Pucheta-Martínez et al. (2016) reasoned that questioning management is a critical part of the audit committee's oversight role, along with ensuring that management does not pressure the external auditor to issue a clean audit opinion notwithstanding the identification of any uncertainties or scope limitations.[251] Otherwise, ''[a]uditors may accept the demands of management for a clean audit report when the firm deserves a scope limitation and an uncertainty qualification.'' [252] The authors found that ''the percentage of female [directors] on [audit committees] reduces the probability of [audit] qualifications due to errors, non-compliance or the omission of information,'' [253] and further found a positive association between gender-diverse audit committees and disclosing audit reports with uncertainties and scope limitations. This suggests that gender-diverse audit committees better ''ensure that managers do not seek to pressure auditors into issuing a clean opinion instead of a qualified opinion'' when any uncertainties or scope limitations are identified.[254]

Nasdaq also reviewed other studies that found a positive association between board gender diversity and important investor protections regardless of whether women are on the audit committee, and considered the assessment of some academics that their findings may extend to other forms of diversity, including racial and ethnic diversity. Nasdaq therefore believes that such findings with respect to audit committees would be expected to be more broadly applicable to the quality of the broader board's decision-making process, and to other forms of diversity, including diversity of race, ethnicity and sexual orientation.

In examining the association between broader board gender diversity and fraud, Cumming, et al. observed that ''[g]ender diversity in particular facilitates more effective monitoring by the board and protection of shareholder interests by broadening the board's expertise, experience, interests, perspectives and creativity.'' [255] They observed that the presence of women on boards is associated with a lower likelihood of securities fraud; indeed, they found ''strong evidence of a negative and diminishing effect of women on boards and the probability of being in our fraud sample.'' [256] The authors suggested that ''other forms of board diversity, including but not limited to gender diversity, may likewise reduce fraud.'' [257]

Similarly, Wahid (2017) noted that board gender diversity may ''lead to less biased and superior decision-making'' because it ''has a potential to alter group dynamics by affecting cognitive conflict and cohesion.'' [258] Wahid (2017) concluded that ''gender-diverse boards commit fewer financial reporting mistakes and engage in less fraud,'' [259] finding that companies with female directors have ''fewer irregularity-type [financial] restatements, which tend to be indicative of financial manipulation.'' [260] Wahid also suggested that other forms of diversity, including

[260] *Id.* at 23.

racial diversity, could introduce additional perspectives to the boardroom,[261] which Nasdaq believes could further mitigate groupthink.

Abbott, Parker and Persley (2012) posited that ''a female board presence contribut[es] to the board's ability to maintain an attitude of mental independence, diminish[es] the extent of groupthink and enhance[es] the ability of the board to monitor financial reporting.'' [262] They noted that ''poorer [internal] controls and the lack of an independent and questioning board-level attitude toward accounting judgments can create an opportunity for fraud.'' [263] They observed a lower likelihood of a material financial restatements stemming from fraud or error in companies with at least one woman on the board.[264]

Nasdaq believes that these studies provide substantial evidence suggesting an association between gender diverse boards or audit committees and a lower likelihood of fraud; a lower likelihood of receiving audit qualifications due to errors, non-compliance or omission of information; and a greater likelihood of disclosing audit reports with uncertainties and scope limitations. Moreover, academics have suggested that other forms of diversity, including racial and ethnic diversity, may reduce fraud and mitigate groupthink. Further, while homogenous boards may unwittingly fall into the trap of groupthink due to a lack of diverse perspectives, ''heterogeneous groups share conflicting opinions, knowledge, and perspectives that result in a more thorough consideration of a wide range of interpretations, alternatives, and consequences.'' [265] Nasdaq therefore believes that the proposed rule is designed to reduce groupthink, and otherwise to enhance the functioning of boards, and thereby to prevent fraudulent and manipulative acts and practices.

Further, the Commission has suggested that in seeking board diversity, ''[t]o the extent that boards branch out from the set of candidates they would ordinarily consider, they may nominate directors who have fewer existing ties to the board or management and are, consequently, more independent.'' [266] Nasdaq believes that the benefits of the proposed rule are analogous to the benefits of Nasdaq's rules governing and requiring director independence. In 2003, Nasdaq adopted listing rules requiring, among other things, that independent directors comprise a majority of listed companies' boards, which were ''intended to enhance investor confidence in the companies that list on Nasdaq.'' [267] The Commission observed that self-regulatory organizations ''play an important role in assuring that their listed issuers establish good governance practices,'' and concluded that the proposed rule changes would secure an ''objective oversight role'' for issuers' boards of directors, and ''foster greater transparency, accountability, and objectivity'' in that role.'' [268] Along the same lines, in approving Nasdaq's application for registration as a national securities exchange, the Commission found Nasdaq's rules governing the independence of members of boards and certain committees to be consistent with Section 6(b)(5) of the Act because they advanced the ''interests of shareholders'' in ''greater transparency, accountability, and objectivity'' in oversight and decision-making by corporate boards.[269] Nasdaq proposes to promote accountability in corporate decision-making by requiring companies who do not have at least two Diverse directors on their board to provide investors with a public explanation of the board's reasons for not doing so under Rule 5605(f)(3).

Nasdaq believes it is critical to the detection and prevention of fraudulent and manipulative acts and practices to have directors on the board who are willing to critically question management and air dissenting views. Nasdaq believes that boards comprised of directors from Diverse backgrounds enhance investor confidence by ensuring that board deliberations consider the perspectives of more than one demographic group, leading to robust dialogue and better decision making. However, Nasdaq recognizes that directors may bring diverse perspectives, skills and experiences to the board, notwithstanding that they have similar attributes. Nasdaq therefore believes it is in the public interest to permit a company that chooses not to meet the diversity objectives of Rule 5605(f)(2) to explain why it does not, in accordance with Rule 5605(f)(3)—for example, if it believes that defining diversity more broadly than Nasdaq, for example by considering national origin, veteran status and disabilities, brings a wide range of perspectives and experiences to the board. Nasdaq believes such disclosure will provide investors with a better understanding of the company's philosophy regarding diversity. This would better inform the investment community and enable more informed analyses of, and conversations with, companies. Therefore, Nasdaq believes satisfying Rule 5605(f)(2) through disclosure pursuant to Rule 5605(f)(3) is consistent with Section 6(b)(5) of the Act because it advances the ''interests of shareholders'' in ''greater transparency, accountability, and objectivity'' of boards and their decision-making processes.[270] In addition, as discussed further in Section II.A.2.II.c (*Promotes Investor Protection and the Public Interest*) below, Nasdaq believes that the proposed diversity requirement could help to reduce information asymmetry, and thereby reduce the risk of insider trading or other opportunistic insider behavior.

c. Promotes Investor Protection and the Public Interest

Nasdaq has found substantial evidence that board diversity is positively associated with more transparent public disclosures and higher quality financial reporting, thereby promoting investor protection. Specifically, studies have concluded that companies with gender-diverse boards are associated with more transparent public disclosures and less information asymmetry, leading to stock prices that better reflect public information. Gul, Srinidhi & Ng (2011) found that ''gender diversity improves stock price informativeness by increasing voluntary public disclosures in large firms and increasing the

[261] *Id.* at 24–25; *see also* Shecter, *supra* note 61 (quoting Wahid as saying that ''[i]f you're going to introduce perspectives, those perspectives might be coming not just from male versus female. They could be coming from people of different ages, from different racial backgrounds. . .. If we just focus on one, we could be essentially taking away from other dimensions of diversity and decreasing perspective.'').

[270] *Id.*

incentives for private information collection in small firms.'' [271] Bravo and Alcaide-Ruiz (2019) found a positive association between women on the audit committee with financial or accounting expertise and the voluntary disclosure of forward-looking information.[272] Abad et al. (2017) concluded that companies with gender-diverse boards are associated with lower levels of information asymmetry, suggesting that ''the policies recently implemented in several European countries to increase the presence of female directors in company boards could have beneficial effects on stock markets by reducing the risk of informed trading and enhancing stock liquidity.'' [273]

Nasdaq believes that one consequence of information asymmetry is that insiders may engage in opportunistic behavior prior to a public announcement of financial results and before the market incorporates the new information into the company's stock price. This can result in unfair gains or an avoidance of losses at the expense of shareholders who did not have access to the same information. This may exacerbate the principal-agent problem, in which the interests of a company's board and shareholders are not aligned. Lucas-Perez et al. (2014) found that board gender diversity is positively associated with linking executive compensation plans to company performance,[274] which may be an effective mechanism to deter opportunistic behavior by management and better align their interests with those of their company's shareholders.[275]

Another concern is that ''[w]hen information asymmetry is high, stakeholders do not have sufficient resources, incentives, or access to relevant information to monitor managers' actions, which gives rise to the practice of earnings management.'' [276] Earnings management ''is generally defined as the practice of using discretionary accounting methods to attain desired levels of reported earnings.'' [277] Manipulating earnings is particularly concerning to investors because ''[i]f users of financial data are 'misled' by the level of reported income, then investors' allocation of resources may be inappropriate when based on the financial statements provided by management,'' [278] thereby undermining the efficacy of the capital formation process for investors who rely on such information to make informed investment and voting decisions.

Gull et al. (2018) [279] observe that overseeing management is a crucial component of investor protection, particularly with regard to earnings management:

> The role of the board of directors and board characteristics (*i.e.* board independence and gender diversity) is usually associated with the protection of shareholder interests. . .. This role is particularly crucial with regard to the issue of earnings management, in that one of the responsibilities of boards is to monitor management.[280]

The authors of that study found that the presence of female audit committee members with business expertise is associated with a lower magnitude of earnings management. Srinidhi, Gul and Tsui (2011) observed that better oversight of management combined with lower information asymmetry leads to better earnings quality. They noted that ''[e]arnings quality is an important outcome of good governance demanded by investors and therefore its improvement constitutes an important objective of the board.'' [281] They found that companies with women on the board, specifically on the audit committee, exhibit ''higher earnings quality'' and ''better reporting discipline by managers.'' [282] They concluded that ''including female directors on the board and the audit committee are plausible ways of improving the firm's reporting discipline and increasing investor confidence in financial statements.'' [283]

Chen, Eshleman and Soileau (2016) suggested that the relationship between gender diversity and higher earnings quality observed by Srinidhi, Gul and Tsui (2011) is ultimately driven by reduced internal control weaknesses, noting that ''prior literature has established a negative relationship between internal control weaknesses and earnings quality.'' [284] Internal control over financial reporting are procedures designed ''to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP.'' [285] Weaknesses in internal controls can ''lead to poor financial reporting quality'' and ''more severe insider trading'' [286] or failure to detect a material misstatement. According to the PCAOB:

> A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.[287]

A material misstatement can occur ''as a result of some type of inherent risk, whether fraud or error (*e.g.,* management's aggressive accounting practices, erroneous application of GAAP).'' [288] The failure to prevent or detect a material misstatement before financial statements are issued can require the company to reissue its financial statements and potentially face costly shareholder litigation. Chen et al. found that having at least one woman on the board (regardless of whether or not she is on the audit committee) ''may lead [a] to reduced likelihood of material weaknesses [in internal control over financial reporting],'' [289] and Abbott, Parker and Persley (2012) found ''a significant association between the presence of at least one woman on the board and a lower likelihood of [a material financial] restatement.'' [290] Notably, while the Sarbanes-Oxley Act (''SOX'') implemented additional measures to ensure that a company has robust internal controls, the findings of Abbott et al. were consistent among a sample of pre- and post-SOX restatements, suggesting that ''an additional, beneficial layer of independence in group decision-making is associated with gender diversity.'' [291]

Nasdaq believes that the proposal to require listed companies to have at least two Diverse directors under Rule 5605(f) could help to lower information asymmetry and reduce the risk of insider trading or other opportunistic insider behavior, which would help to increase stock price informativeness and enhance stock liquidity, thereby protecting investors and promoting capital formation and efficiency. believes that information asymmetry could also be reduced by permitting companies to satisfy Rule 5605(f)(2) by publicly disclosing their reasons for not meeting its diversity objectives in accordance with Rule 5605(f)(3), because the requirement will improve the quality of information available to investors who rely on this information to make informed investment and voting decisions, which will further protect investors and promote capital formation and efficiency.

Moreover, Nasdaq believes that proposed Rule 5605(f) could foster more transparent public disclosures, higher quality financial reporting, and stronger internal control over financial reporting and mechanisms to monitor management. This could be particularly beneficial for Smaller Reporting Companies that are not subject to the SOX 404(b) requirement to obtain an independent auditor's attestation of management's assessment of the effectiveness of internal control over financial reporting, thereby promoting investor protection.

Nasdaq believes that the body of research on the relationship between economic performance and board diversity summarized under Section II.A.1.II.a above provides substantial evidence supporting the conclusion that board diversity does not have adverse effects on company financial performance, and therefore Nasdaq believes the proposal will not negatively impact capital formation, competition or efficiency among its public companies.[292] Nasdaq considered that some studies on gender diversity alone have had mixed results,[293] and that the U.S. GAO (2015) and Carter et al. (2010) concluded that the mixed results are due to differences in methodologies, data samples and time periods.[294] This is not the first time Nasdaq has considered whether, on balance, various studies finding mixed results related to board composition and company performance are sufficient rationale to propose a listing rule. For example, in 2003, notwithstanding the mixed results of studies regarding the relationship between company performance and board independence,[295] Nasdaq adopted listing rules requiring a majority independent board that were ''intended to enhance investor confidence in the companies that list on Nasdaq.'' [296] In its Approval Order, the SEC noted that ''[t]he Commission has long encouraged exchanges to adopt and strengthen their corporate governance listing standards in order to, among other things, enhance investor confidence in the securities markets;'' the Commission concluded that the independence rules would secure an ''objective oversight role'' for issuers' boards, and ''foster greater transparency, accountability, and objectivity'' in that role.[297] Nasdaq believes this reasoning applies to the current proposed rule as well. Even without clear consensus among studies related to board diversity and company performance, the heightened focus on corporate board diversity by investors demonstrates that investor confidence is undermined when data on board diversity is not readily available and when companies do not explain the reasons for the apparent absence of diversity on their boards.[298] Legislators are increasingly taking action to encourage corporations to diversify their boards and improve diversity disclosures.[299] Moreover, during its discussions with stakeholders, Nasdaq found consensus across every constituency that there is inherent value in board diversity. Lastly, it has been a longstanding principle that ''Nasdaq stands for integrity and ethical business practices in order to enhance investor confidence, thereby contributing to the financial health of the economy and supporting the capital formation process.'' [300]

For all the foregoing reasons, Nasdaq believes that proposed Rule 5605(f) will promote investor protection and the public interest by enhancing investor confidence that all listed companies are considering diversity in the context of selecting directors, either by including at least two Diverse directors on their boards or by explaining their rationale for not meeting that objective. To the extent a company chooses not to meet the diversity objectives of Rule 5605(f)(2), Nasdaq believes that the proposal will provide investors with additional disclosure about the company's reasons for doing so under Rule 5605(f)(3). For example, the company may choose to disclose that it does not meet the diversity objectives of Rule 5605(f)(2) because it is subject to an alternative standard under state or foreign laws and has chosen to satisfy that diversity objective instead. On the other hand, many firms may strive to achieve even greater diversity than the objectives set forth in our proposed rule. Nasdaq believes that providing such flexibility and clear disclosure where the company determines to follow a different path will improve the quality of information available to investors who rely on this information to make informed investment and voting decisions, thereby promoting capital formation and efficiency, and further promoting the public interest.

d. Not Designed to Permit Unfair Discrimination Between Customers, Issuers, Brokers, or Dealers

Nasdaq believes that proposed Rule 5605(f) is not designed to permit unfair discrimination among companies because it requires all companies subject to the rule to have at least two Diverse directors or explain why they do not. Further, the proposal requires at least one of the two Diverse directors to be an individual who self-identifies as Female. While the proposal provides different requirements for the second Diverse director among Smaller Reporting Companies, Foreign Issuers and other companies, Nasdaq believes that the rule is not designed to permit unfair discrimination among companies. In all cases, a company can choose to meet the diversity objectives of the entire rule or to satisfy only certain elements of the rule. Further, the proposed rule does not limit board sizes—if a board chooses to nominate a Diverse individual to the board to meet the diversity objectives of the proposed rule, it is not precluded from also nominating a non-Diverse director for an additional board seat.

i. Rule 5605(f)(2)(B): Foreign Issuers

Similar to all other companies subject to Rule 5605(f), the proposal requires all Foreign Issuers to have, or explain why they do not have, at least two Diverse directors, including one director who self-identifies as Female. However, Nasdaq proposes to provide Foreign Issuers with additional flexibility with regard to the second Diverse director. Foreign Issuers could satisfy the second director objective by including another Female director, or an individual who self-identifies as LGBTQ+ or as an underrepresented individual based on national, racial, ethnic, indigenous, cultural, religious or linguistic identity in the company's home country jurisdiction. While the proposal provides a different requirement for the second Diverse director for Foreign Issuers, Nasdaq believes it is not designed to permit unfair discrimination between Foreign Issuers and other companies because it recognizes that the unique demographic composition of the United States, and its historical marginalization of Underrepresented Minorities and the LGBTQ+ community, may not extend to all countries outside of the United States. Further, Nasdaq believes that it is challenging to apply a consistent definition of minorities to all countries globally because ''[t]here is no internationally agreed definition as to which groups constitute minorities.'' [301] Similarly, ''there is no universally accepted international definition of indigenous peoples.'' [302] Rather, the United Nations *Declaration on the Rights of Indigenous Peoples* recognizes ''that the situation of indigenous peoples varies from region to region and from country to country and that the significance of national and regional particularities and various historical and cultural backgrounds should be taken into consideration.'' [303] Accordingly, Nasdaq believes that it is not unfairly discriminatory to allow an alternative mechanism for Foreign Issuers to satisfy Rule 5605(f)(2) in recognition that the U.S.-based EEOC definition of Underrepresented Minorities is not appropriate for every Foreign Issuer. In addition, Foreign Issuers have the ability to satisfy Rule 5605(f)(2)(B) by explaining that they do not satisfy this alternative definition. Similarly, any company that is not a Foreign Issuer, but that prefers the alternative definition available for Foreign Issuers, could follow Rule 5605(f)(2)(B) and disclose its reasons for doing so.

Under the proposal, Foreign Issuer means (a) a Foreign Private Issuer (as defined in Rule 5005(a)(19)) or (b) a company that (i) is considered a ''foreign issuer'' under Rule 3b–4(b) under the Act, and (ii) has its principal executive offices located outside of the United States. For example, a company that is considered a ''foreign issuer'' under Rule 3b–4(b) under the Act and has its principal executive offices located in Ireland would qualify as a Foreign Issuer for purposes of Rule 5605(f)(2), even if it is not considered a Foreign Private Issuer under Nasdaq or SEC rules.

Nasdaq recognizes that Foreign Issuers may be located in jurisdictions that impose privacy laws limiting or prohibiting self-identification questionnaires, particularly as they relate to race or ethnicity. In such countries, a company may not be able to determine each director's self-identified Diverse attributes due to restrictions on the collection of personal information. The company may instead publicly disclose pursuant to Rule 5605(f)(3) that ''Due to privacy laws in the company's home country jurisdiction limiting its ability to collect information regarding a director's self-identified Diverse attributes, the company is not able to determine that it has two Diverse directors as set forth under Rule 5605(f)(2)(B)(ii).''

ii. Rule 5605(f)(2)(C): Smaller Reporting Companies

While the proposal provides a different requirement for the second Diverse director for Smaller Reporting Companies, Nasdaq believes that this distinction is not designed to permit unfair discrimination among companies. Nasdaq has designed the proposed rule to ensure it does not have a disproportionate economic impact on Smaller Reporting Companies by imposing undue costs or burdens. Nasdaq recognizes that Smaller Reporting Companies, especially pre-revenue companies that depend on the capital markets to fund ground-breaking research and technological advancements, may not have the resources to compensate an additional director or engage a search firm to find director candidates outside of the directors' traditional networks. Nasdaq believes that this is a reasonable basis to distinguish Smaller Reporting Companies from other companies subject to the rule.

Smaller Reporting Companies already are provided certain exemptions from Nasdaq's listing rules. For example, under Rule 5605(d)(3), Smaller Reporting Companies must have a compensation committee comprised of at least two independent directors and a formal written compensation committee charter or board resolution that specifies the committee's responsibilities and authority, but such companies are not required to grant authority to the committee to retain or compensate consultants or advisors or consider certain independence factors before selecting such advisors, consistent with Rule 10C–1 of the Act.[304] In its approval order, the SEC concluded as follows:

> The Commission believes that these provisions are consistent with the Act and do not unfairly discriminate between issuers. The Commission believes that, for similar reasons to those for which Smaller Reporting Companies are exempted from the Rule 10C–1 requirements, it makes sense for Nasdaq to provide some flexibility to Smaller Reporting Companies regarding whether the compensation committee's responsibilities should be set forth in a formal charter or through board resolution. Further . . . in view of the potential additional costs of an annual review, it is reasonable not to require a Smaller Reporting Company to conduct an annual assessment of its charter or board resolution.[305]

The Commission also makes accommodations for Smaller Reporting Companies based on their more limited resources, allowing them to comply with scaled disclosure requirements in certain SEC reports rather than the more rigorous disclosure requirements for larger companies. For example, Smaller Reporting Companies are not required to include a compensation discussion and analysis in their proxy or Form 10–K describing the material elements of the compensation of its named executive officers.[306] Eligible Smaller Reporting Companies also are relieved from the SOX 404(b) requirement to obtain an independent auditor's attestation of management's assessment of the effectiveness of internal control over

financial reporting.[307] In each case, companies may choose to comply with the more rigorous requirements in lieu of relying on the exemptions.

Any company that is not a Smaller Reporting Company, but prefers the alternative rule available for Smaller Reporting Companies, could follow Rule 5605(f)(2)(C) and disclose their reasons for doing so. As such, Nasdaq believes that the proposed alternative rule for Smaller Reporting Companies is not designed to, and does not, unfairly discriminate among companies. Lastly, Nasdaq believes that Rule 5605(f)(2)(C) is not designed to permit unfair discrimination among companies because it requires Smaller Reporting Companies to have at least one director who self-identifies as Female, similar to other companies subject to Rule 5065(f).

iii. Rule 5605(f)(3): Public Disclosure of Non-Diverse Board

Under proposed Rule 5605(f)(3), if a company determines not to meet the diversity objectives of Rule 5605(f) in its entirety, it must specify the applicable requirements of the Rule and explain its reasons for not having at least two Diverse directors. Nasdaq designed the proposal to avoid unduly burdening competition or efficiency, or conflicting with existing securities laws, by providing all companies subject to Rule 5605(f) with the option to make the public disclosure required under Rule 5605(f)(3) in the company's proxy statement or information statement for its annual meeting of shareholders or, alternatively on the company's website, provided that the company submits a URL link to such disclosure to Nasdaq through the Listing Center no later than 15 calendar days after the company's annual shareholder meeting. Nasdaq believes Rule 5605(f)(3) is not designed to permit unfair discrimination among companies because the proposed rule provides all companies subject to Rule 5605(f) the option to disclose an explanation rather than meet the diversity objectives of Rule 5605(f)(2).

Certain federal securities laws similarly permit companies to satisfy corporate governance requirements through disclosure of reasons for not meeting the applicable requirement. For example, under Regulation S–K, Item 407 requires a company to disclose whether or not its board of directors has determined that the company has at least one audit committee financial expert. If a company does not have a financial expert on the audit committee, it must provide an explanation.[308] Item 406 requires a company to disclose whether it has adopted a written code of ethics that applies to the chief executive officer and senior financial or accounting officers. If a company has not adopted such a code of ethics, it must disclose the reasons why not.[309] Item 402 regarding pay ratio disclosure defines how total compensation for employees should be calculated, but permits companies to use a different measure as long as they explain their approach.[310]

Furthermore, Nasdaq rules and SEC guidance already recognize that website disclosure can be a method of disseminating information to the public. For example, Nasdaq listing rules permit companies to provide website disclosures related to third party director compensation,[311] foreign private issuer home country practices,[312] and reliance on the exception relating to independent compensation committee members.[313] The SEC has recognized that ''[a] company's website is an obvious place for investors to find information about the company'' [314] and permits companies to make public disclosure of material information through website disclosures if, among other things, the company's website is ''a recognized channel of distribution of information.'' [315]

iv. Rule 5605(f)(4): Exempt Companies

Under proposed Rule 5605(f)(4), Nasdaq proposes to exempt the following types of companies from the requirements of Rule 5605(f) (defined as ''Exempt Companies''): acquisition companies listed under IM–5101–2; asset-backed issuers and other passive issuers (as set forth in Rule 5615(a)(1)); cooperatives (as set forth in Rule 5615(a)(2)); limited partnerships (as set forth in Rule 5615(a)(4)); management investment companies (as set forth in Rule 5615(a)(5)); issuers of non-voting preferred securities, debt securities and Derivative Securities (as set forth in Rule 5615(a)(6)); and issuers of securities listed under the Rule 5700 Series. Each of the types of Exempt Companies either has no board of directors, lists only securities with no voting rights towards the election of directors, or is not an operating company, and the holders of the securities they issue do not expect to have a say in the composition of their boards. As such, Nasdaq believes the proposal is not designed to permit unfair discrimination by excluding Exempt Companies from the application of proposed Rule 5605(f). These companies already are exempt from certain of Nasdaq's corporate governance standards related to board composition, as described in Rule 5615.

v. Rule 5605(f)(5): Phase-in Period

Proposed Rule 5605(f)(5)(A) will allow any newly listing company that was not previously subject to a substantially similar requirement of another national securities exchange one year from the date of listing to satisfy the requirements of Rule 5605(f). Proposed Rule 5605(f)(5)(B) also will allow any company that ceases to be a Foreign Issuer, a Smaller Reporting Company or an Exempt Company one year from the date that the company no longer qualifies as a Foreign Issuer, a Smaller Reporting Company or an Exempt Company, respectively, to satisfy the requirements of Rule 5605(f). This phase-in period will apply after the end of the transition period provided in Rule 5605(f)(7).

Nasdaq believes this approach is not designed to permit unfair discrimination because it provides all companies that become newly subject to the rule the same time period within which to comply. In addition, this approach is similar to other phase-in periods granted to companies listing on or transferring to Nasdaq. For example, Rule 5615(b)(1) provides a company listing in connection with its initial public offering one year to fully comply with the compensation and nomination committee requirements of Rules 5605(d) and (e), and the majority independent board requirement of Rule 5605(b). Similarly, SEC Rule 10A–3(b)(1)(iv)(A) allows a company up to one year from the date its registration statement is effective to fully comply with the applicable audit committee composition requirements. Nasdaq Rule 5615(b)(3) provides a one-year timeframe for compliance with the board composition requirements for companies transferring from other listed markets that do not have a substantially similar requirement.

[315] *Id.* at 45,867.

vi. Rule 5605(f)(7): Effective Dates/ Transition

Under proposed Rule 5605(f)(7), each company must have, or explain why it does not have, one Diverse director no later than two calendar years after the Approval Date,[316] and two Diverse directors no later than (i) four calendar years after the Approval Date for companies listed on the NGS or NGM tiers, or (ii) five calendar years after the Approval Date for companies listed on the NCM tier.

Nasdaq believes this approach is not designed to permit unfair discrimination because it recognizes that companies listed on the Nasdaq Capital Market may not have the resources necessary to compensate an additional director or engage a search firm to search for director candidates outside of the directors' traditional networks. Therefore, Nasdaq believes it is in the public interest to provide such companies with one additional year to meet the diversity objectives of Rule 5605(f), should they choose to do so. Nasdaq notes that all companies may choose to follow a timeframe applicable to a different market tier, provided they publicly describe their explanation for doing so. They also may construct their own timeframe for meeting the diversity objectives of Rule 5605(f), provided they publicly disclose their reasons for not abiding by Nasdaq's timeframe.

e. Not Designed to Regulate by Virtue of any Authority Conferred by the Act Matters Not Related to the Purposes of the Act or the Administration of the Exchange

Nasdaq believes that the proposal is not designed to regulate by virtue of any authority conferred by the Act matters not related to the purposes of the Act or the administration of the Exchange.[317] The proposal relates to the Exchange's corporate governance standards for listed companies. As discussed above, ''[t]he Commission has long encouraged exchanges to adopt and strengthen their corporate governance listing standards in order to, among other things, enhance investor confidence in the securities markets.'' [318] And because ''it is not always feasible to define . . . every practice which is inconsistent with the public interest or with the protection of investors,'' the Act leaves to SROs ''the necessary work'' of rulemaking pursuant to Section 6(b)(5).[319]

Nasdaq recognizes that U.S. states are increasingly proposing and adopting board diversity requirements, and because corporations are creatures of state law, some market participants may believe that such regulation is best left to states. However, Nasdaq considered that certain of its listing rules related to corporate governance currently relate to areas that are also regulated by states. For example, states impose standards related to quorums [320] and shareholder approval of certain transactions,[321] which also are regulated under Nasdaq's listing rules.[322] Nasdaq has adopted rules relating to such matters to ensure uniformity of such rules among its listed companies. Similarly, Nasdaq believes that the proposed rule will create uniformity among listed companies by helping to assure investors that all non-exempt companies have at least two Diverse directors on their board or publicly describe why they do not.

Further, Nasdaq believes the proposal will enhance investor confidence that listed companies that have two Diverse directors are considering the perspectives of more than one demographic group, leading to robust dialogue and better decision making, as well as the other corporate governance benefits of diverse boards discussed above in Section II.A.1.II. To the extent companies choose to disclose their reasons for not meeting the diversity objectives of Rule 5605(f)(2) pursuant to Rule 5605(f)(3), Nasdaq believes that such disclosure will improve the quality of information available to investors who rely on this information to make an informed voting decision, thereby promoting capital formation and efficiency. It has been the Exchange's longstanding principle that ''Nasdaq stands for integrity and ethical business practices in order to enhance investor confidence, thereby contributing to the financial health of the economy and supporting the capital formation process.'' [323]

In addition, as discussed in Section II.A.1.I, in passing Section 342 of the Dodd-Frank Act, Congress recognized the need to respond to the lack of diversity in the financial services industry, and the Standards designed by the Commission and other financial regulators provide a framework for addressing that industry challenge. The Standards themselves identify several focus areas, including the importance of ''Organizational Commitment,'' which speaks to the critical role of senior leadership—including boards of directors—in promoting diversity and inclusion across an organization. In addition, like the proposed rule, the Standards also consider ''Practice to Promote Transparency,'' and recognize that transparency is a key component of any diversity initiative. Specifically, the Standards provide that the ''transparency of an entity's diversity and inclusion program promotes the objectives of Section 342,'' and also is important because it provides the public with necessary information to assess an entity's diversity policies and practices.[324]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Nasdaq reviewed requirements related to board diversity in two dozen foreign jurisdictions, and almost every jurisdiction imposes diversity-focused requirements on listed companies, either through a securities exchange, financial regulator or the government. Nasdaq competes for listings globally, including in countries that have implemented a more robust regulatory reporting framework for diversity and ESG disclosures. Currently in the U.S., the Long Term Stock Exchange (''LTSE''), which includes a number of sponsors which have investment businesses, has communicated to institutional investors that it that it seeks to distinguish itself by focusing on corporate governance, including, for example, diversity and inclusion. Under Rule 14.425, companies listed on LTSE must adopt and publish a long-term stakeholder policy that explains, among other things, ''the Company's approach to diversity and inclusion.'' [325]

[316] The ''Approval Date'' is the date that the SEC approves the proposed rule.

[325] *See* Long-Term Stock Exchange Rule Book, Rule 14.425.

I. Board Statistical Disclosure

The Exchange does not believe that proposed Rule 5606 will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange believes that the adoption of Rule 5606 will not impose any undue burden on competition among listed companies for the reasons set forth below.

With a few exceptions, all companies would be required to make the same disclosure of their board-level statistical information. The average board size of a company that is currently listed on the Exchange is eight directors. Although a company would be required to disclose its board-level statistical data, directors may choose to opt out rather than reveal their diversity characteristics to their company. A company would identify such directors in the ''Undisclosed'' category. For directors who voluntarily disclose their diversity characteristics, the company would collect their responses and disclose the information in either the company's proxy statement, information statement of shareholder meeting or on the company's website, using Nasdaq's required format. While the time and economic burden may vary based on a company's board size, Nasdaq does not believe there is any significant burden associated with gathering, preparing and reporting this data. Therefore, Nasdaq believes that there will be a *de minimis* time and economic burden on listed companies to collect and disclose the diversity statistical data.

Some investors value demographic diversity, and list it as an important factor influencing their director voting decisions.[326] Investors have stated that consistent data would make its collection and analysis easier and more equitable for investors that are not large enough to demand or otherwise access individualized disclosures.[327] Therefore, Nasdaq believes that any burden placed on companies to gather and disclose their board-level diversity statistics is counterbalanced by the benefits that the information will provide to a company's investors.

Moreover, as discussed above, most listed companies are required to submit an annual EEO–1 Report, which provides statistical data related to race and gender data among employees similar to the data required under proposed Rule 5606(a). Because most companies are already collecting similar information annually to satisfy their EEOC requirement, Nasdaq does not believe that adding directors to the collection will place a significant burden on these companies. Additionally, the information requested from Foreign Issuers is limited in scope and therefore does not impose a significant burden on them.

Nasdaq faces competition in the market for listing services. Proposed Rule 5606 reflects that competition, but it does not impose any burden on competition with other exchanges. As discussed above, investors have made clear their desire for greater transparency into public companies' board-level diversity as it relates to gender identity, race, and ethnicity. Nasdaq believes that the proposed rule will enhance the competition for listings. Other exchanges can set similar requirements for their listed companies, thereby increasing competition to the benefit of those companies and their shareholders. Accordingly, Nasdaq does not believe the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

II. Diverse Board Representation or Explanation

Nasdaq believes that proposed Rule 5605(f) will not impose burdens on competition among listed companies because the Exchange has constructed a framework for similarly-situated companies to satisfy similar requirements (*i.e.,* Foreign Issuers, Smaller Reporting Companies and other companies), and has provided all companies with the choice of satisfying the requirements of Rule 5605(f)(2) by having at least two Diverse directors, or by explaining why they do not. Nasdaq believes that this will avoid imposing undue costs or burdens on companies that, for example, cannot afford to compensate an additional director or believe it is not appropriate, feasible or desirable to meet the diversity objectives of Rule 5605(f) based on the company's particular circumstances (for example, the company's size, operations or current board composition). Rather than requiring a company to divert resources to compensate an additional director, and place the company at a competitive disadvantage with its peers, the rule provides the flexibility for such company to explain why it does not meet the diversity objective.

The cost of identifying director candidates can range from nothing or a nominal fee (via personal, work or school-related networks, or board affinity organizations, as well as internal research by the corporate secretary's team) to amounts that can vary widely depending on the specific search firm and the size of the company. Some industry observers estimate board searches for independent directors cost about one-third of a director's annual compensation, while others estimate it costs between $75,000 and $150,000. The underlying figures vary; for example, one search firm generally charges $25,000 to $50,000. Nasdaq observes that total annual director compensation can range widely; median director pay is estimated at $134,000 for Russell 3000 companies and $232,000 for S&P 500 companies. Moreover, there is a wider range of underlying compensation amounts. For example, Russell 3000 directors may receive approximately $32,600 (10th percentile), or up to $250,000 (90th percentile) or more. S&P 500 directors may receive approximately $100,000 (10th percentile) or up to $310,000 (90th percentile) or more.[328] Most, if not all, of these costs would be borne in any event in the search for new directors regardless of the proposed rule. While the proposed rule might lead some companies to search for director candidates outside of already established networks, the incremental costs of doing so would be tied directly to the benefit of a broader search.

To reduce costs for companies that do not currently meet the diversity objectives of Rule 5605(f)(2), Nasdaq is proposing to provide listed companies that have not yet met their diversity objectives with free access to a network of board-ready diverse candidates and a tool to support board evaluation, benchmarking and refreshment. This offering is designed to ease the search for diverse nominees and reduce the costs on companies that choose to meet the diversity objectives of Rule 5605(f)(2). Nasdaq is contemporaneously submitting a rule filing to the Commission regarding the provision of such services. Nasdaq also plans to publish FAQs on its Listing Center to provide guidance to companies on the application of the proposed rules, and to establish a dedicated mailbox for companies and their counsel to email additional questions to Nasdaq regarding the application of the proposed rule. Nasdaq believes that these services will

[326] *See* Hunt et al., *supra* note 26.

[327] *See* Petition for Rulemaking, *supra* note 123, at 2.

[328] Total annual director compensation varies by compensation elements and structure as well as amount, which is generally based on the size, sector, maturity of the company, and company specific situation. *See* Mark Emanuel et al., Semler Brossy and the Conference Board, *Director Compensation Practices in the Russell 3000 and S&P 500* (2020 ed.), available at *https://conferenceboard.esgauge.org/directorcompensation/report.*

help to ease the compliance burden on companies whether they choose to meet the listing rule's diversity objectives or provide an explanation for not doing so.

Nasdaq also has structured the proposed rule to provide companies with at least four years from the Approval Date to satisfy Rule 5605(f)(2) so that companies do not incur immediate costs striving to meet the diversity objectives of Rule 5605(f)(2). Nasdaq also has reduced the compliance burden on Smaller Reporting Companies and Foreign Issuers by providing them with additional flexibility when satisfying the requirement related to the second Diverse director. Smaller Reporting Companies could satisfy the proposed diversity objective to have two Diverse directors under Rule 5605(f)(2)(C) with two Female directors. Like other companies, Smaller Reporting Companies also could satisfy the second director objective by including an individual who self-identifies as an Underrepresented Minority or a member of the LGBTQ+ community. Foreign Issuers could satisfy the second director objective by including another Female director, or an individual who self-identifies as LGBTQ+ or an underrepresented individual based on national, racial, ethnic, indigenous, cultural, religious or linguistic identity in the company's home country jurisdiction. Nasdaq has further reduced the compliance burdens on companies listed on the Nasdaq Capital Market tier by providing them with five years from the Approval Date to satisfy Rule 5605(f)(2), recognizing that such companies may face additional challenges and resource constraints when identifying additional director nominees who self-identify as Diverse.

For the foregoing reasons, Nasdaq does not believe that proposed Rule 5605(f) will impose any burden on competition among issuers that is not necessary or appropriate in furtherance of the purposes of the Act. Further, Nasdaq does not believe the proposed rule will impose any burden on competition among listing exchanges. As described above, Nasdaq competes with other exchanges globally for listings, including exchanges based in jurisdictions that have implemented disclosure requirements related to diversity. Within the United States, LTSE requires listed companies to adopt and publish a long-term stakeholder policy that explains, among other things, ''the Company's approach to diversity and inclusion.'' [329] Other listing venues within the United States may propose to adopt rules similar to LTSE's requirements or the Exchange's proposal if they believe companies would prefer to list on an exchange with diversity-related listing standards.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2020–081 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2020–081. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2020–081, and should be submitted on or before January 4, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[330]

J. Matthew DeLesDernier,

Assistant Secretary.

Qualifications of Accountants

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Securities and Exchange Commission (''Commission'' or ''SEC'') is adopting amendments to update certain auditor independence requirements. These amendments are intended to more effectively focus the independence analysis on those relationships or services that are more likely to pose threats to an auditor's objectivity and impartiality.

DATES:

Effective date: June 9, 2021.

Compliance dates: See Section II.G for further information on transitioning to the final amendments.

FOR FURTHER INFORMATION CONTACT: Duc Dang, Senior Special Counsel, or Natasha Guinan, Chief Counsel, Office of the Chief Accountant, at (202) 551–5300; Alexis Cunningham, or Jenson Wayne, Assistant Chief Accountants, Chief Accountant's Office, Division of Investment Management, at (202) 551–6918, or Pamela K. Ellis, Senior Counsel, Brian McLaughlin Johnson, Assistant Director, Investment Company Regulation Office, or Sirimal R. Mukerjee, Branch Chief, Investment Adviser Regulation Office, Division of Investment Management, at (202) 551–6792, U.S. Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

SUPPLEMENTARY INFORMATION: We are adopting amendments to 17 CFR 210.2–01 (''Rule 2–01'') of 17 CFR 210.01 *et seq.* (''Regulation S–X'').[1]

Table of Contents

I. Introduction

On December 30, 2019, the Commission proposed amendments to Rule 2–01 to update certain auditor independence requirements, including by focusing the requirements on those relationships and services that are more likely to threaten an auditor's objectivity and impartiality in light of current market conditions and industry practice.[2] Specifically, the Commission proposed amendments to the definitions of ''affiliate of the audit client,'' ''investment company complex,'' and ''audit and professional engagement period'' in Rule 2–01. The Commission also proposed amending requirements relating to certain loans or debtor-creditor relationships in 17 CFR 210.2–01(c)(1) (''Rule 2–01(c)(1)'') and the reference to ''substantial stockholders'' in 17 CFR 210.2–01(c)(3) (''Rule 2–01(c)(3)'' and the ''Business Relationships Rule''). Finally, the Commission proposed amendments to address inadvertent violations of the independence requirements as a result of mergers and acquisitions and to make certain miscellaneous updates.

The Commission has long recognized that an audit by an objective, impartial, and skilled professional contributes to both investor protection and investor confidence.[3] If investors do not perceive that the auditor is independent from the audit client, investors will derive less confidence from the auditor's report and the audited financial statements. As such, the Commission's auditor independence rule, as set forth in Rule 2–01, requires auditors [4] to be independent of their audit clients both ''in fact and in appearance.'' [5]

As the Commission noted in the Proposing Release, except for revisions made in connection with amendments required by the Sarbanes-Oxley Act of 2002 (''Sarbanes-Oxley Act'') [6] and the recent amendments related to certain debtor-creditor relationships,[7] many of the provisions from the 2000 Adopting Release have remained unchanged since adoption. The amendments we are adopting maintain the bedrock principle that auditors must be independent in fact and in appearance while improving the relevance of the Commission's auditor independence standards in light

of existing market conditions by more effectively focusing the independence analysis on those relationships or services that are more likely [8] to threaten an auditor's objectivity and impartiality.

Many commenters broadly supported the objectives of the proposed amendments or were generally in favor of the proposals.[9] A few commenters did not support the proposals.[10] One of these commenters expressed the view that the proposals could negatively affect investor protection and capital formation and suggested that, in lieu of the proposals, more should be done to strengthen auditor independence standards and the enforcement of such standards.[11]

While commenters were largely supportive of the proposals, we also received recommendations for modifying or clarifying certain aspects of the proposed amendments. After reviewing and considering the public comments and recommendations received, we are adopting the amendments largely as proposed. As we discuss further below, in certain cases we are adopting the proposed amendments with modifications that are intended to address comments received.

[8] As compared to the relationships and services that are deemed independence-impairing under existing Rule 2–01, but are unlikely to threaten an auditor's objectivity and impartiality and would no longer be deemed independence-impairing pursuant to the final amendments.

II. Amendments

A. Amendments to Definitions

1. Amendments to the Definitions of Affiliate of the Audit Client and the Investment Company Complex

The term ''audit client'' [12] is defined as ''the entity whose financial statements or other information is being audited, reviewed or attested'' [13] and ''any affiliates of the audit client.'' [14] The current definition of affiliate of the audit client includes, in part, ''[a]n entity that has control over the audit client, or over which the audit client has control, or which is under common control with the audit client, including the audit client's parents and subsidiaries'' and ''[e]ach entity in the investment company complex when the audit client is an entity that is part of an investment company complex.'' [15]

Under current Rule 2–01, the requirement to identify and monitor for potential independence-impairing relationships and services applies to affiliated entities, including sister entities,[16] regardless of whether the sister entities are material to the controlling entity.[17] This same requirement to identify and monitor for potential independence-impairing relationships and services applies to entities, including sister entities that are part of an investment company complex (''ICC'').[18]

The Proposing Release noted the challenges in practical application that are associated with the current definitions of affiliate of the audit client and ICC.[19] In particular, the Proposing Release noted how these definitions can result in relationships with and services to certain sister entities that are less likely to threaten an auditor's objectivity and impartiality being deemed independence-impairing under our rules.[20] To address those challenges, the Commission proposed amendments to the definitions of both affiliate of the audit client and ICC. After considering the public comments and recommendations received, we are adopting amendments to both definitions with modifications, as discussed in further detail below.

[12] 17 CFR 210.2–01(f)(6) (''Rule 2–01(f)(6)'').

[13] The term ''entity under audit'' as used herein and in the final amendments refers to this part of the Rule 2–01(f)(6) definition of audit client.

[14] *See* Rule 2–01(f)(6). For purposes of 17 CFR 210.2–01(c)(1)(i) (''Rule 2–01(c)(1)(i)'') (*Investments in Audit Clients*), entities covered by 17 CFR 210.2–01(f)(4)(ii) (''Rule 2–01(f)(4)(ii)'') or 17 CFR 210.2–01(f)(4)(iii) (''Rule 2–01(f)(4)(iii)'') are not considered affiliates of the audit client, as they are already addressed by 17 CFR 210.2–01(c)(1)(i)(E).

[15] 17 CFR 210.2–01(f)(4)(i) (''Rule 2–01(f)(4)(i)'') and 17 CFR 210.2–01(f)(4)(iv) (''Rule 2–01(f)(4)(iv)'').

[16] *See* 17 CFR 210.2–01(f)(4) (''Rule 2–01(f)(4)'') and Rule 2–01(f)(6). We use the term ''sister entities'' to refer to entities that are under common control with the entity under audit.

[17] *See* Rule 2–01(f)(4).

[18] *Id.* and 17 CFR 210.2–01(f)(14) (''Rule 2–01(f)(14)'').

[19] *See* Section II.A.1 of the Proposing Release.

[20] *Id.*

a. Amendments With Respect to Common Control and Affiliate of the Audit Client

i. Proposed Amendments

The Commission proposed amending the definition of an affiliate of the audit client set forth in Rule 2–01(f)(4)(i) to include a materiality qualifier with respect to operating companies, including portfolio companies, under common control [21] and to clarify the application of this definition to operating companies and direct auditors of an investment company or investment adviser or sponsor to the ICC definition.[22] In the Proposing Release, the Commission discussed challenges related to applying the current affiliate of the audit client and ICC definitions, including challenges related to the limited pool of available qualified auditors, ongoing monitoring for independence, and related costs.[23]

Under the proposal, a sister entity would be deemed an affiliate of the audit client ''unless the entity is not material to the controlling entity.'' The Proposing Release set forth the Commission's view that it is appropriate to exclude sister entities that are not material to the controlling entity from being considered affiliates of the audit client because an auditor's relationships and services with such sister entities do not typically pose a threat to the auditor's objectivity and impartiality and their exclusion would allow auditors and audit clients to focus on those relationships that are more likely to threaten the auditor's objectivity and impartiality.

[21] *See* Proposed Rule 2–01(f)(4)(i)(B).

[22] *See* Proposed Rule 2–01(f)(4)(ii). Specifically, the ''and'' between the second significant influence provision would be replaced by an ''or.'' Consistent with footnote 18 of the Proposing Release, the term ''operating company'' in this release refers to entities that are not investment companies, investment advisers, or sponsors, and the term ''portfolio company'' refers to an operating company that has investment companies or unregistered funds in private equity structures among its investors. In Section II.A.1.a of the Proposing Release, the Commission expressed its belief that it would be appropriate to identify the affiliates of the audit client for a portfolio company under audit using the proposed affiliate of the audit client definition, rather than the proposed ICC definition, because portfolio companies are a type of operating company that are often unrelated to each other, even though they are controlled by the same entity in the private equity structure or ICC.

[23] *See* Section II.A.1.a of the Proposing Release.

The Proposing Release noted that materiality is applied in the existing affiliate of the audit client definition in Rules 2–01(f)(4)(ii) and (iii) [24] and that the proposed materiality qualifier would be consistent, in part, with the definition of ''affiliate'' used by the American Institute of Certified Public Accountants (''AICPA'') in its ethics and independence rules.[25] The AICPA ethics and independence rules typically apply when domestic companies are not also subject to the Commission and PCAOB independence requirements. Auditors therefore have experience in applying a materiality standard when identifying affiliates, whether applying the independence rules of the Commission or the AICPA.

ii. Comments Received

Commenters generally supported the proposed changes to the definition of the affiliate of the audit client.[26] Consistent with the discussion in the Proposing Release, commenters discussed the challenges presented by the current definitions (*e.g.,* cost, difficulty of application, and impact on the available pool of qualified auditors) and agreed that introducing a materiality qualifier into the analysis would better focus the analysis on threats to an auditor's objectivity and impartiality and address some of those challenges.[27]

A few commenters opposed the proposed materiality qualifier to the affiliate of the audit client definition.[28] These commenters asserted that introducing a materiality qualifier would increase the risk that auditors would be performing audits when they are not objective and impartial, noting that there is evidence that auditors' materiality judgments vary widely.[29] One of these commenters suggested that the Commission ''examine the evidence before changing its current approach.'' [30]

In addition to these comments on the proposed amendments, we also received feedback on additional changes to the definition of affiliate of the audit client and other related changes, as discussed in more detail below.

Comments Recommending a Dual Materiality Threshold

Many commenters recommended that we further amend the common control provision in the affiliate of the audit client definition to add a materiality qualifier with respect to the entity under audit to accompany the proposed materiality qualifier with respect to the sister entity (a ''dual materiality threshold'').[31] This dual materiality threshold would result in a sister entity being deemed an affiliate of the audit client only if the entity under audit and the sister entity are each material to the controlling entity.[32]

These commenters stated that, when the entity under audit is not material to the controlling entity, services provided to or relationships with sister entities typically do not create threats to an auditor's objectivity and impartiality.[33] For example, one commenter stated that, in its experience, the entity under audit and the sister entities typically have their own governance structures, which indicates that there is no mutuality of interest between the auditor and the audit client.[34] Another commenter stated that the proposed single materiality threshold would, in fact, ''increase'' the burden on private equity firms by requiring more time and resources to monitor the ''continuously evolving universe of entities that the private firm would need to address . . .'' [35] This commenter contended that in the event the entity under audit is not material to the controlling entity, a dual materiality threshold would alleviate the burdens associated with a materiality analysis that would otherwise have to be conducted on each sister entity.

Commenters also suggested that because a dual materiality threshold is used by the AICPA and IESBA ethics and independence requirements, adopting a similar threshold would ease compliance burdens associated with the application of the affiliate definition and on-going monitoring for audit firms and clients.[36] A few commenters noted that any risks associated with a potential dual materiality threshold would be mitigated by the continued protections afforded by Rule 2–01(b).[37]

One commenter that opposed the proposed amendment noted that it also opposed the ''double trigger threshold'' of the AICPA.[38]

Other Comments on Materiality and Monitoring

In response to a request for comment as to whether the proposed amendments should include a materiality assessment between the entity under audit and sister entities, commenters generally did not support adding such a provision.[39] For example, one commenter stated that concepts of financial materiality do not lend themselves to an evaluation of relationships between sister entities, and noted that if one entity had a material investment in the other, the other provisions of the affiliate of the audit client definition would address such a relationship.[40]

Some commenters suggested that a materiality qualifier also should be applied when considering whether an entity that has control over the entity under audit (*i.e.,* a controlling entity) is

[24] Rule 2–01(f)(4)(ii) includes as an affiliate of the audit client ''an entity over which the audit client has significant influence, unless the entity is not material to the audit client.'' Rule 2–01(f)(4)(iii) includes as an affiliate of the audit client ''an entity that has significant influence over the audit client, unless the audit client is not material to the entity.''

[25] *See* AICPA Professional Code of Conduct, *available at https://pub.aicpa.org/codeofconduct/ethicsresources/et-cod.pdf.* The Proposing Release acknowledged that the proposed amendment may not result in the same number of sister entities being deemed material to the controlling entity under Commission rules and the AICPA rules. For example, in defining control, the AICPA uses the accounting standards adopted by the Financial Accounting Standards Board (''FASB''), whereas the Commission defines control in Rule 1–02(g) of Regulation S–X. Also, the AICPA affiliate definition pertaining to common control deems a sister entity as an affiliate if the entity under audit and the sister entity are each material to the entity that controls both. The proposed amendment only focused on the materiality of the sister entity to the controlling entity.

[37] *See e.g.,* letters from BDO, AICPA, AIC, and EY.

[38] *See* letter from CII. This commenter cited footnote 20 of the Proposing Release and indicated its agreement that requiring materiality between the entity under audit and the controlling entity may exclude, from the proposed definition, sister entities whose relationships with or services from an auditor would impair the auditor's objectivity and impartiality.

[39] *See e.g.,* letters from Deloitte, KPMG, RSM, and PwC.

[40] *See* letter from KPMG.

an affiliate under Rule 2–01(f)(4).[41] However, another commenter disagreed, stating that it believes parents and subsidiaries should continue to be affiliates regardless of materiality.[42]

In response to a request for comment as to whether auditors and audit clients would face challenges in applying the materiality concept in connection with the proposed amendment and whether additional guidance was needed, some commenters noted that the concept of materiality already exists within Rule 2–01, and as such, indicated that current materiality guidance is sufficient.[43] By contrast, other commenters suggested that there may be challenges in applying the materiality concept in connection with the proposed amendments,[44] and a few commenters requested additional guidance or examples.[45] One commenter suggested that to ease the burden of monitoring for compliance in connection with unforeseen changes in circumstances, the Commission should consider establishing a framework to allow auditors to address ''inadvertent independence violations that might arise when a materiality threshold is crossed.'' [46]

Some commenters suggested that the Commission reiterate the shared responsibility of audit firms and their audit clients to monitor independence, including monitoring affiliates and obtaining information necessary to assess materiality.[47] One commenter recommended the Commission clarify that, once the initial materiality assessment has been made, the auditor and audit client could satisfy their obligations under the proposed amendments by reevaluating materiality in response to significant transactions, Commission filings, or other information that become known to the auditor or the audit client through reasonable inquiry.[48] Another commenter requested the Commission discuss expectations regarding best efforts to obtain information and monitoring if, for example, certain information can only be obtained annually.[49]

Comments on ''Entity Under Audit''

In the Proposing Release, the Commission used the term ''entity under audit'' to describe the application of the proposed amendments. The Commission explained that it was using this term to refer to the entity ''whose financial statements or other information is being audited, reviewed or attested.'' [50] The quoted language is the first clause of the definition of the term ''audit client'' in Rule 2–01(f)(6). Because the definition of audit client also includes any affiliates of the audit client, the Commission used the term ''entity under audit'' to describe those entities whose financial statements were subject to audit, review, or attestation, in an attempt to avoid the potential confusion that may arise from using the term ''audit client.''

In response to this discussion, some commenters suggested that Rule 2–01 incorporate more precise usage of the terms ''audit client'' and ''entity under audit,'' which may require defining the term ''entity under audit.'' [51] Several of those commenters recommended that the term ''entity under audit'' be included in the definition of affiliate of the audit client,[52] because the term ''audit client,'' which is defined to include affiliates in the definition of affiliate of the audit client, may cause confusion. One of these commenters characterized the reference to audit client in the existing affiliate of the audit client definition as a ''circular reference.'' [53]

Comments on ''Controlling Entity'' and ''Control''

While we did not propose any amendments to the term ''control'' as defined in 17 CFR 210.1–02(g) (''Rule 1–02(g)'') of Regulation S–X, a few commenters suggested that, for private equity firms, the term ''controlling entity'' should be defined as the overall private equity firm or the ultimate parent.[54] One of these commenters requested further explanation or guidance, such as through illustrative examples, to address whether the relationship between an investment adviser and a fund it advises should be treated as a control relationship and suggested that the term ''control'' should be linked to the accounting literature.[55] While these comments pertained to entities within an ICC, the comments are relevant when the entity under audit is not an investment company or investment adviser or sponsor, but the entity under audit controls or is controlled by an investment company or investment adviser or sponsor.[56]

iii. Final Amendments

After considering the public comments and recommendations received, we are adopting amended 17 CFR 210.2–01(f)(4) (''amended Rule 2–01(f)(4)'') with certain modifications from the proposal, as described below. We considered the comments received opposing the addition of materiality to the common control provision, but continue to believe that materiality is an appropriate principle to effectively focus on relationships with and services provided to sister entities that are more likely to threaten an auditor's objectivity and impartiality.

Dual Materiality Threshold

In response to comments, we are modifying the proposed amendments to Rule 2–01(f)(4)(ii) to incorporate a dual materiality threshold such that a sister entity will be included as an affiliate of the audit client if the sister entity and the entity under audit are each material to the controlling entity. Under the final amendments, if either the sister entity or the entity under audit is not material to the controlling entity, then the sister entity will not be deemed an affiliate of the audit client pursuant to amended 17 CFR 210.2–01(f)(4)(ii) (''amended Rule 2–01(f)(4)(ii)'').[57] In the Proposing Release, the Commission suggested that requiring that the entity under audit be material to the controlling entity as part of the proposed definition may exclude sister entities whose relationships with or services from an auditor would impair the auditor's objectivity and impartiality.[58] However, after consideration of the comments received and further evaluation, we are persuaded that where the entity under audit is not material to the controlling entity, an auditor's relationships with or services provided to sister entities would generally not threaten the auditor's objectivity and impartiality. In

[58] *See* footnote 20 of the Proposing Release.

this regard, we agree that when the entity under audit is not material to the controlling entity, it is less likely that a mutuality of interest would develop as a result of relationships with or services provided to sister entities. For example, as one commenter observed, sister entities with separate governance structures, such as sister portfolio companies within an ICC, typically lack decision-making capacity over other sister entities, including an entity under audit.

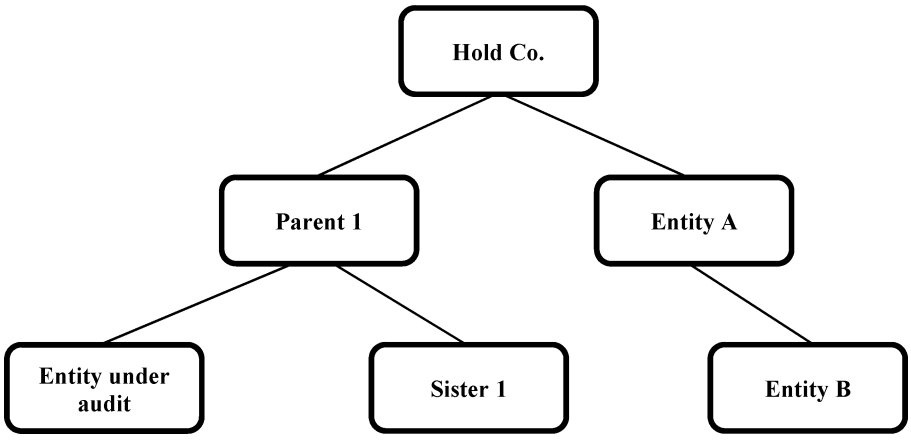
We also recognize the benefit to auditors, audit clients, and investors of reducing compliance-related challenges. The adopted dual materiality threshold may help address some commenters' concerns about the inability to obtain all relevant information needed to make a materiality determination with respect to sister entities under the proposed single materiality threshold. Under the adopted dual materiality threshold, the need to assess the materiality relationship between the entity under audit and each of the controlling entities should reduce information access concerns because, in the event the entity under audit is not material to the controlling entity, the materiality assessment would be made for fewer sister entities as compared to the proposed single materiality threshold. However, as discussed in Section II.A.1.b.ii below, the auditor's non-audit services to and relationships with sister entities that are no longer deemed affiliates as a result of applying the dual materiality threshold will continue to be subject to the principles set forth in Rule 2–01(b), and as such, knowledge of services to and relationships with such non-affiliate sister entities will be needed to sufficiently consider the general standard.

Some commenters also suggested that we incorporate a materiality qualifier in the evaluation of whether controlling entities would be considered affiliates, similar to analogous provisions in the AICPA and IESBA ethics and independence requirements. While commenters cited the benefits of having a common regime for the consideration of controlling entities, we were not persuaded that the benefits from such conformity would justify the potential risk to an auditor's objectivity and impartiality in these circumstances. In particular, commenters did not specifically highlight ongoing monitoring or other compliance challenges associated with the identification of affiliates that control an entity under audit. It does not appear that the challenges related to the changing population of potential affiliates and the ability to obtain appropriate information that occur in the common control context also exist when evaluating entities that have control over the entity under audit. In addition, the relationship between sister entities and an entity under audit is generally different than the relationship between a controlling entity and the entity under audit. The controlling entity typically has some decision-making ability or an ability to influence the entity under audit. As such, we believe an auditor's independence likely would be impaired if the auditor provides non-audit services to or engages in relationships with the controlling entity that are described in Rule 2–01(c), even in situations in which the entity under audit is not material to the controlling entity. Accordingly, we are not adopting commenters' recommendations to incorporate a materiality qualifier in the evaluation of whether controlling entities should be considered affiliates.

Entity Under Audit

We are making modifications to incorporate the term ''entity under audit'' within amended 17 CFR 210.2–01(f)(4)(i) (''amended Rule 2–01(f)(4)(i)'') and amended 17 CFR 210.2–01(f)(4)(ii) (''amended Rule 2–01(f)(4)(ii)''). Given the comments received on this point and in light of other changes we are making to the final amendments, we believe it is appropriate to replace the term ''audit client'' with ''entity under audit'' in amended Rules 2–01(f)(4)(i) and (ii). Specifically, as illustrated in the example below, we are concerned that if we do not revise this terminology, it could be applied in a manner that would negate the adopted dual materiality threshold.

Figure 1



In Figure 1, assume the controlling entities (*i.e.,* Parent 1 and Hold Co.) have control over all entities downstream from them. If amended Rules 2–01(f)(4)(i) and (ii) referred to an ''audit client'' instead of an ''entity under audit,'' Sister 1 may be deemed an affiliate of the audit client regardless of the materiality of Sister 1 or the Entity Under Audit to Parent 1 based on the following application:

- Parent 1 controls the entity under audit, which makes Parent 1 an affiliate of the audit client. Parent 1 also is an ''audit client'' because the definition of such term includes affiliates. A practitioner might then apply the control provision in amended Rule 2–01(f)(4)(i) to Parent 1 and deem Sister 1 an affiliate of the audit client, regardless of the dual materiality threshold. The practitioner would consider Sister 1 an affiliate because it is controlled by ''audit client'' Parent 1 without applying

the materiality analysis in the common control provision of amended Rule 2–01(f)(4)(ii).

Similarly, Entities A and B may be deemed affiliates of the audit client regardless of the materiality of Entity A, Entity B, or the entity under audit to Hold Co. based on the following application:

- Under the existing and amended rules, Hold Co. is an affiliate of the audit client (*i.e.,* Hold Co. has control over the entity under audit) and, as such, also is an audit client. A practitioner might then apply the control provision in amended Rule 2–01(f)(4)(i) to Hold Co. and deem both Entities A and B as affiliates of the audit client, regardless of the dual materiality threshold in amended Rule 2–01(f)(4)(ii). Again, the practitioner may deem Entities A and B to be affiliates because ''audit client'' Hold Co. controls both Entities A and B.[59]

Absent clarification, the above-illustrated application (*i.e.,* circular reading) of the final amendments could negate the Commission's objective to focus the common control provision on those relationships and services that are more likely to threaten the objectivity and impartiality of an auditor by introducing a dual materiality threshold. While the proposal did not use the term ''entity under audit'' in the rule text, we believe this modification is consistent with the proposal to separate out common control from existing Rule 2–01(f)(4)(i) and include a materiality provision within the definition. Now that the amended common control provision includes a dual materiality threshold, we believe the modification to use the term ''entity under audit'' in place of the term ''audit client'' in amended Rules 2–01(f)(4)(i) and (ii) is important to avoid any misunderstandings about how the common control provision should be applied in the final amendments.

While some commenters requested that we further amend our rules to incorporate more precise usage of the term ''entity under audit'' [60] in other paragraphs that currently refer to the ''audit client,'' those requests are beyond the scope of this rulemaking. We did not propose or seek comment on those particular amendments. Moreover, those additional amendments are not necessary to effectuate any aspect of the proposal. As such, we are not incorporating the term ''entity under audit'' into other paragraphs of the rule that currently refer to ''audit client,'' including the significant influence provisions of amended 17 CFR 210.2–01(f)(4)(iii) (''amended Rule 2–01(f)(4)(iii)'') and 17 CFR 210.2–01(f)(4)(iv) (''amended Rule 2–01(f)(4)(iv)''). However, the incorporation of ''entity under audit'' in amended Rules 2–01(f)(4)(i) and (ii), while leaving the term ''audit client'' within the significant influence provisions in amended Rules 2–01(f)(4)(iii) and (iv), does not imply a change from the historical practical application of these provisions, which has focused and should continue to focus on the entity under audit.

Assessing Materiality and Monitoring

Several commenters requested clarification and examples of the application of the proposed amendments, including the proposed materiality qualifier. In response, we are providing several examples to illustrate the application of the final amendments to particular fact patterns.

Auditors and their audit clients have a shared responsibility to monitor independence in order to satisfy, as applicable, the requirements of the federal securities laws, including Rule 2–01 and 17 CFR 210.2–02.[61] This shared responsibility between auditors and audit clients applies to all aspects of Rule 2–01, including the final amendments. This responsibility includes the monitoring of affiliates and obtaining information necessary to assess materiality. We believe this process works most effectively when management, audit committees, and audit firms work together to evaluate the auditor's compliance with the independence rules. For example, auditors and their audit clients may need to work together to identify and monitor potential affiliates based on the affiliate of the audit client definition in the independence rules. In this regard, it will be important for management to notify the auditor in a timely manner of changes in circumstances that may affect the population of potential affiliates, such as by notifying an auditor of acquisitions before the acquisitions are effective. Additionally, management should consider communicating to auditors as early as possible the intent of private companies to file a registration statement in order for the SEC and PCAOB independence rules to be considered in advance. Issuers and their audit committees may want to consider having their own policies and procedures to identify, consider, and monitor the provision of services by and relationships with the issuer's independent accountant, which may help supplement the audit firm's system of quality control.

The following are intended as illustrative examples only, and practitioners and audit clients should be aware that an assessment of materiality requires consideration of all relevant facts and circumstances, including quantitative and qualitative factors.

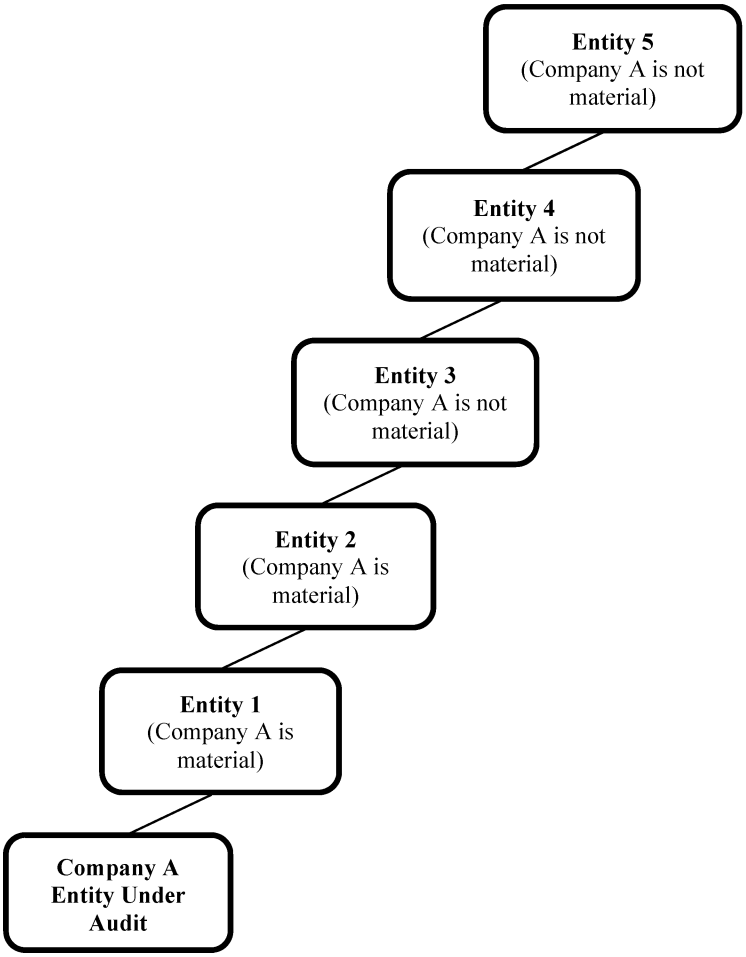
BILLING CODE 8011–01–P

[59] Relatedly, when assessing whether Entities A and B are affiliates under amended Rule 2–01(f)(4)(ii), it may otherwise be unclear to a practitioner assessing materiality of the ''audit client'' whether such assessment applies to the entity under audit or an affiliate (such as Parent 1).

[60] *See supra* note 51.

[61] For an overview of the obligations of auditors and audit clients with respect to auditor independence under the federal securities laws, please *see* footnote 101 of the Loan Provision Adopting Release.

Example 1 – Assessing Materiality of Sister Entities



BILLING CODE 8011–01–C

In this example, Company A, the entity under audit, has five controlling entities, Entities 1 through 5, with Entity 5 as the ultimate parent. Since each of Entities 1 through 5 controls Company A, directly or indirectly, each of the entities is an affiliate of Company A regardless of materiality. For purposes of this example, assume that Company A is material to Entity 1 and Entity 2 and that Company A is not material to Entity 3, Entity 4, or Entity 5. Each of Entities 1 through 5 controls other entities (*i.e.,* sister entities) other than those listed in this example. In this example, the auditor must evaluate the materiality of the sister entities controlled by each of Entity 1 and Entity 2 to determine which sister entities are affiliates of the audit client. For a sister entity controlled by Entity 1, the auditor must assess the materiality of such sister entity to Entity 1. For a sister entity controlled by Entity 2, the auditor must assess the materiality of that sister entity to Entity 2.

Example 2—Controlling and Sister Entities and Monitoring Expectations

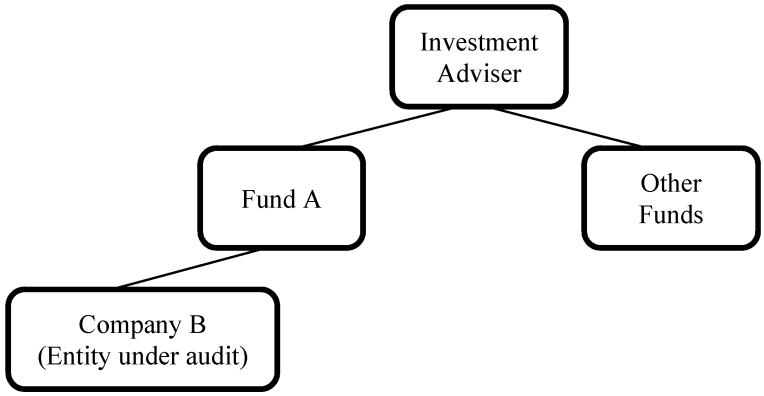
Assume the same facts as in Example 1. Company A and the controlling entities should provide the auditor with sufficient information to enable the auditor to appropriately monitor controlling entities and identify sister entities, even at the levels of Entities 3 through 5. We acknowledge the concerns raised by commenters that identifying sister entities that are not considered affiliates under the final amendments and re-assessing the materiality of the entity under audit and its sister entities may increase existing compliance burdens. However, identifying sister entities will be important for complying with the amended rules because there can be qualitative and quantitative changes that affect the materiality of such relationships, and audit firms will need to timely address when a sister entity becomes an affiliate. Such information also will be necessary for an audit firm to appropriately consider and apply Rule 2–01(b) on an ongoing basis.

After the initial materiality assessment is performed to identify potential affiliates, the auditor, with the assistance of and information provided by the audit client, should perform updated assessments based on, among other things, transactions, Commission filings, or other information that becomes known to the auditor and the audit client through reasonable inquiry. As a result, obtaining accurate organizational and financial information will be important to the auditor's and the audit client's ability to anticipate and plan for potential changes in materiality status that may lead to the identification of new affiliates at any point during the audit and professional engagement period. We understand that this likely will require additional compliance efforts and believe such efforts and the resultant costs are appropriate to ensure that an auditor is independent from its audit client for purposes of investor protection and investor confidence. To the extent the final amendments mitigate the compliance challenges associated with

independence violations or prohibitions, or allow an auditor to expand its audit or non-audit services or relationships, we expect that the auditor will weigh any related benefits against any additional monitoring and compliance costs. Also, auditors may already be familiar with the monitoring efforts related to a dual materiality threshold, as the AICPA and IESBA have analogous provisions. Where an auditor is unable to obtain the information needed to make reasonable determinations of affiliate status for sister entities, the auditor should treat such sister entities as affiliates of the audit client for the purpose of the Commission's independence requirements to avoid potentially impairing the auditor's objectivity and impartiality.

The final amendments do not include a transition framework, as requested by a commenter, to address changes in the materiality of the entity under audit or a sister entity to a controlling entity. As noted, above, we expect auditors and their clients to be able to anticipate and plan for changes in materiality and believe this approach fosters an auditor's objectivity and impartiality. To the extent that changes in materiality of the entity under audit or sister entities result in an independence violation, we encourage registrants and accountants to consult with the Commission's Office of the Chief Accountant.[62]

Example 3 – Identifying Affiliates of an Entity under Audit that is a Portfolio Company



Company B is the entity under audit and a portfolio company controlled by Fund A. Fund A is an investment company within an ICC. Company B's auditor will identify affiliates of the audit client by applying amended Rules 2–01(f)(4)(i) through (iv). While there are entities described in the ICC definition that are part of Company B's organizational structure, including Fund A and its investment adviser or sponsor, Company B's auditor, assuming it does not audit any entity described in the ICC definition, such as Fund A or the Investment Adviser, will not apply the ICC definition. Company B's auditor must apply amended Rules 2–01(f)(4)(i) through (iv) to identify affiliates, which may result in certain investment companies and investment advisers or sponsors being deemed an affiliate of the audit client.

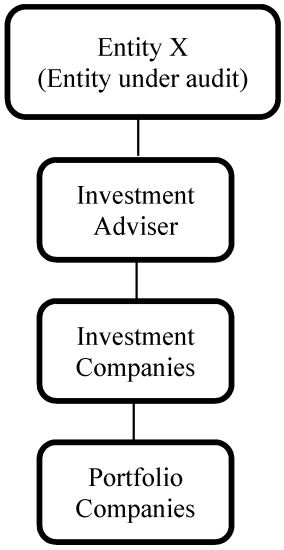
As noted above, we received a few comments related to the term ''controlling entity'' and the term ''control,''[63] which is defined in Rule 1–02(g). We are not amending Rule 1–02(g) to link the definition of ''control'' to the accounting literature as one commenter suggested. We believe the suggestion to define ''controlling entity'' solely as the overall private equity firm when assessing materiality of entities, including a portfolio company, in a private equity structure[64] could raise issues beyond the scope of the proposal that warrant further consideration. We are therefore not adopting this approach. Under Rule 1–02(g), whether the entity under audit is a subsidiary of an operating or holding company or a portfolio company within a private equity structure, all entities that are identified to have control over an entity under audit are controlling entities.

[62] *See* Section II.E.3 and amended introductory paragraph to Rule 2–01.

[63] *See supra* note 54.

[64] *Id.*

Example 4 – Application of the Affiliate of the Audit Client Definition When the Entity under Audit Controls Entities within an ICC



Entity X is the entity under audit and is not an investment company, an investment adviser, or sponsor. Entity X has a subsidiary that serves as an investment adviser to several investment companies. If the auditor is not engaged to audit the investment company or investment adviser or sponsor on a standalone basis, the auditor will apply amended Rules 2–01(f)(4)(i) through (iv) to determine the affiliates of the audit client.

We note that in determining the affiliates of Entity X, in the context of amended Rules 2–01(f)(4)(i) through (iv), it will be important to consider the relationships between the investment adviser and the investment companies it advises. Even where an investment company has an independent board that oversees the investment company's operations and approves the advisory contract, the services provided by the investment adviser are generally critical to the management of day-to-day operations and execution of policies for the investment company. Therefore, the investment adviser generally will have a controlling relationship over the investment company for purposes of Rule 1–02(g).

In this example, if the auditor audited Entity X and the investment adviser subsidiary on a standalone basis, then the auditor would have to apply both amended Rules 2–01(f)(4)(i) through (iv) as they relate to the audit of Entity X and amended Rule 2–01(f)(14) as it relates to the audit of the investment adviser.[65]

b. Proposing Release's Discussion of Rule 2–01(b)

As noted in the 2000 Adopting Release, ''[c]ircumstances that are not specifically set forth in our rule are measured by the general standard set forth in Rule 2–01(b).'' The general standard includes, in part, that the ''Commission will not recognize an accountant as independent, with respect to an audit client, if the accountant is not, or a reasonable investor with knowledge of all relevant facts and circumstances would conclude that the accountant is not, capable of exercising objective and impartial judgment on all issues encompassed within the accountant's engagement.''

The Commission explained in the Proposing Release that relationships and services affected by the proposed amendments to the affiliate of the audit client definition remain subject to the general independence standard in Rule 2–01(b).[66] The Commission also noted that such relationships and services, individually or in the aggregate, could raise independence concerns pursuant to the general standard in Rule 2–01(b) due to the nature, extent, relative importance or other aspects of the service or relationship that may make the service or relationship a threat to an auditor's objectivity and impartiality. The Commission indicated that such services or relationships should be ''easily known'' due to the nature, extent, relative importance or other aspects of the services or relationships. Although the Commission did not propose amendments to Rule 2–01(b), a number of commenters provided feedback on the application of the general independence standard in light of the proposed amendments.

i. Comments on the Proposing Release's Discussion of Rule 2–01(b)

Several commenters agreed that relationships and services with entities that would no longer be deemed affiliates should still be evaluated under Rule 2–01(b).[67] However, one commenter recommended that the Commission consider whether Rule 2–01(b) is sufficient, or whether further clarification or rulemaking might be appropriate to address situations where relationships or non-attest services provided to a sister entity that is no longer an affiliate under the proposed definitions are of a magnitude that ''eclipse'' the attest services provided within a private equity or investment company complex.[68]

A few commenters raised concerns with the Proposing Release's discussion of Rule 2–01(b).[69] One commenter

[65] This is consistent with the discussion and example included in Section II.A.1.b.i of the Proposing Release.

[66] *See* Section II.A.1 of the Proposing Release.

[67] *See e.g.,* letters from Deloitte, EY, KPMG, GT, and Crowe. Some commenters also indicated that the general standard in Rule 2–01(b) is sufficient to mitigate the risks when relationships and services, individually or in the aggregate, with sister entities that are no longer deemed affiliates under the final amendments could impact an auditor's objectivity and impartiality. *See e.g.,* letters from Deloitte, EY, and KPMG.

[68] *See* letter from BDO.

[69] *See e.g.,* letters from RSM and PwC.

asserted that the statements were inconsistent with the 2000 Adopting Release, which stated that ''[c]ircumstances that are not specifically set forth in our rule are measured by the general standard set forth in Rule 2–01(b)'' [70] and expressed concern that the Proposing Release's discussion of Rule 2–01(b) could be applied more broadly than just to the entities captured by the affiliate of the audit client definition. Another commenter asserted that it ''may be understood in practice as a change in application and operation of Rule 2–01(b).'' [71] In voicing their concerns, these commenters noted that the consideration of Rule 2–01(b) would reduce the benefits expected to result from the proposed amendments as the auditor would continue to have to track relationships and services that are being provided to entities that are no longer affiliates.[72]

One commenter disagreed with the Proposing Release's reference to ''easily known'' when describing the types of services or relationships that should be evaluated under Rule 2–01(b) as 17 CFR 210.2–01(c) (''Rule 2–01(c)'') no longer specifically addresses such items.[73] A few commenters asserted that the Proposing Release's use of ''easily known'' appears to establish an expectation of continued monitoring that may reduce the benefits, efficiencies, and cost savings expected to result from the proposed amendments.[74] Two of these commenters requested further guidance on on-going monitoring obligations if Rule 2–01(b) continues to apply to non-affiliates and requested the Commission consider clarifying the reference to ''easily known'' in the Proposing Release's discussion of the general standard by utilizing the ''knows or has reason to believe'' approach of the AICPA ethics and independence rules.[75]

ii. Application of Rule 2–01(b) to the Final Amendments

After considering the public comments and recommendations received, we affirm our view that Rule 2–01(b) applies to those relationships and services that previously were, but are no longer, covered by Rule 2–01(c) as a result of the final amendments. We do not believe that this position broadens the scope of the ''all relevant facts and circumstances'' concept in the general standard. Nor are we persuaded that this scope should be narrowed in light of the amendments we are adopting. Otherwise, for example, an auditor could have any number or magnitude of relationships with or provide services to sister entities that are no longer deemed affiliates under the final amendments—even where, for example, the importance of such relationships or services to the auditor and the controlling entity threatens the auditor's objectivity and impartiality.

In response to commenters who noted that ''easily known'' is not a defined term and requested further explanation, we are clarifying that the types of relationships and services that must be evaluated under Rule 2–01(b) are those that are known or should be known to the auditor because of the nature, extent, relative importance or other relevant aspects of the relationships or services. Consistent with our discussion in Example 2 above, auditors, with the assistance of their audit clients, are expected to have sufficient information to be able to be aware of and prepare for changes in materiality that could lead to changes in affiliate status of entities in a large corporate or ICC structure. As such, we do not expect that identifying and monitoring relationships with and services provided to non-affiliate sister entities that are known or should be known would require significant additional effort by audit firms. For example, if audit firms are performing a high volume of services for or have a number of relationships with non-affiliate sister entities, the audit firm should already know that these relationships exist.

As noted in Section II.A.1.a.iii, the final amendments will more effectively focus the independence rules and reduce the time and attention that auditors and audit committees spend avoiding or addressing compliance challenges that arise under the existing rules and should permit auditors and audit committees to use their resources more effectively to the benefit of investors. Nothing in the final amendments is intended to change the application of the general independence standard in Rule 2–01(b). As the Commission noted in the 2000 Adopting Release and in the rule text for Rule 2–01(c), paragraph (c) is a ''non-exclusive'' specification of circumstances. As such, while Rule 2–01(c) enumerates specific circumstances that are inconsistent with Rule 2–01(b), the general standard of Rule 2–01(b) may encompass relationships and services that are not otherwise deemed independence-impairing by Rule 2–01(c).

c. Amendments to the Investment Company Complex Definition

i. Proposed Amendments

The Commission proposed to amend Rule 2–01(f)(4) to clarify that, with respect to an entity under audit that is an investment company or an investment adviser or sponsor, the auditor and the audit client should look to proposed Rule 2–01(f)(14) (*i.e.,* the ICC definition) to identify affiliates of the audit client and not to proposed Rule 2–01(f)(4).[76] The Commission also proposed to amend the ICC definition in Rule 2–01(f)(14) to provide additional clarity by incorporating the term ''entity under audit'' into Rule 2–01(f)(14) to focus the analysis from the perspective of the entity under audit and to explicitly define the term ''investment company'' to include unregistered funds for the purpose of the ICC definition.[77] In the Proposing Release, the Commission indicated that the proposed amendments were designed to more effectively focus the independence analysis on the entity under audit, including unregistered funds under audit, and align that analysis with the independence analysis required for all investment companies.

In addition to the proposed amendments to clarify certain aspects of the ICC definition, the Commission proposed to include a materiality qualifier in the common control provision of the ICC definition to align with the proposed amendments to the affiliate of the audit client definition.[78] To further align with the affiliate of the audit client definition, the Commission proposed including a significant influence provision in the ICC definition.[79] Both of these proposed

[70] *See* letter from RSM (citing to the 2000 Adopting Release at 65 FR 76030). *See infra* discussion in Section II.A.1.b.ii.

[71] *See* letter from PwC.

[72] *See e.g.,* letters from RSM and PwC.

[73] *See* letter from RSM.

[74] *See e.g.,* letters from PwC, RSM, and AIC.

[75] *See* letters from PwC and AIC.

[76] The proposed amendment would replace the existing ''and'' that appears at the end of existing Rule 2–01(f)(4)(iii) with an ''or'' in order to direct auditors of an investment company or an investment adviser or sponsor to the ICC definition. In the final amendments, the ''or'' now appears at the end of amended Rule 2–01(f)(4)(iv) and before amended 17 CFR 210.2–01(f)(4)(v).

[77] We use the term ''unregistered fund'' in this release to refer to entities that are not considered investment companies pursuant to the exclusions in Section 3(c) of the Investment Company Act of 1940 [15 U.S.C. 80a–3(c)].

[78] *See* Proposed Rule 2–01(f)(14)(i)(D)(*1*).

[79] *See* Proposed Rule 2–01(f)(14)(i)(E). The existing definition of ''audit client'' in Rule 2–01(f)(6), for the purpose of Rule 2–01(c)(1)(i), excludes entities that are affiliates only by virtue of the significant influence provisions in existing Rules 2–01(f)(4)(ii) and (iii). To align the treatment of affiliates due to significant influence under proposed Rule 2–01(f)(14)(i)(E) with those in the affiliate of the audit client definition, the Commission proposed an amendment to the ''audit client'' definition in Rule 2–01(f)(6) to similarly exclude entities identified under proposed Rule 2–01(f)(14)(i)(E).

amendments were meant to provide consistency between the definitions of affiliate of the audit client and ICC in light of the proposed amendment specifying that auditors of an investment company or investment adviser or sponsor would apply proposed Rule 2–01(f)(14) to identify affiliates of such entity under audit.

The Commission explained in the Proposing Release that while it was introducing a materiality qualifier in the common control provision, it was retaining within the scope of the ICC definition any investment company that has an investment adviser or sponsor that is an affiliate of the audit client—regardless of whether such sister investment companies are material to the shared investment adviser or sponsor.[80]

The Commission also noted that while the proposed amendments to the ICC definition would alter the composition of entities that would be deemed affiliates of the audit client principally due to a materiality qualifier being added for sister entities, the general independence standard in Rule 2–01(b) would continue to apply.[81] The Commission stated its belief that the proposed amendments to the ICC definition would provide clarity and address certain compliance challenges, including challenges related to the number of related entities or the volume of acquisitions and dispositions in ICCs, and more effectively focus the ICC definition on those relationships and services that are more likely to threaten auditor objectivity and impartiality.[82]

ii. Comments Received

Comments on Overall Approach to ICC Definition

Commenters generally supported the Commission's proposal to clarify that with respect to an entity under audit that is an investment company or an investment adviser or sponsor, the auditor and the audit client should look solely to the ICC definition to identify affiliates of the audit client,[83] and no commenters specifically opposed the proposed approach.

Several commenters expressly agreed with the proposed references to ''entity under audit'' in Rule 2–01(f)(14),[84] and no commenters specifically opposed the proposed references.

Some commenters supported the Commission's proposal to include within the meaning of the term investment company, for the purposes of the ICC definition, entities ''that would be an investment company but for the exclusions provided by Section 3(c) of the Investment Company Act.'' [85] For example, one commenter stated that under the current rules, ''it was not clear if unregistered funds would be part of the [ICC] definition, which created uncertainty and inconsistency in practice.'' [86] Another commenter stated that, if adopted, the inclusion of unregistered funds within the ICC definition would enable ''the asset management industry holistically [to] serve the interests of investors and provide for more consistent treatment across fund businesses.'' [87] No commenters expressly opposed this proposed amendment.

Many commenters who were supportive of the proposed amendments also requested clarification on the application of the proposed definitions to specific fact patterns, including the following circumstances:

- An investment adviser is the entity under audit and is both an issuer and parent entity; [88]
- An operating company is the entity under audit and has sister entities that include an investment company or an investment adviser or sponsor,[89] or the operating company under audit has a subsidiary that is an investment adviser that manages investment companies; [90] and
- The entity under audit is an investment company with sister funds advised by the same investment adviser, and such sister funds control portfolio companies.[91]

Regarding other general aspects of the proposed ICC definition, one commenter sought clarification about whether the reference to investment adviser or sponsor in the proposed ICC definition also would include custodians.[92] A different commenter requested that we revise the ICC definition to separately address affiliates of an investment company and affiliates of an investment adviser or sponsor.[93]

Comments on Proposed Rule 2–01(f)(14)(i)(D)(*1*)—Common Control and Materiality

Many commenters supported the inclusion of a materiality qualifier within proposed Rule 2–01(f)(14)(i)(D)(*1*), the common control provision of the proposed ICC definition.[94] Consistent with feedback received in response to the proposed materiality qualifier for operating companies under common control,[95] some commenters expressed the view that the materiality qualifier would not increase the risk to auditor objectivity and impartiality.[96] A few commenters, consistent with their feedback on the affiliate of the audit client definition, also recommended that proposed Rule 2–01(f)(14)(i)(D)(*1*) include a dual materiality threshold that would include consideration of whether the entity under audit is material to the controlling entity.[97]

However, the two commenters that opposed the proposed materiality qualifier in the affiliate of the audit client definition also opposed, for similar reasons, the inclusion of such a qualifier in the proposed ICC amendments.[98]

While some commenters indicated that auditors would not experience significant challenges or burdens with

[80] *See* Proposed Rule 2–01(f)(14)(i)(F).

[81] *See* Section II.A.1.b of the Proposing Release.

[82] *See* Section II.A.1 of the Proposing Release.

[83] *See e.g.,* letters from NYSSCPA, CAQ, Deloitte, BDO, EY, KPMG, RSM, GT, Crowe, and ICI/IDC. One commenter recommended that the final amendments specify that the ICC definition applies when the entity obtains an audit ''for SEC reporting or compliance purposes.'' *See* letter from KPMG. We believe this concept is implied by the requirements to apply Rule 2–01 in certain applicable provisions of the Federal securities laws.

[84] *See e.g.,* letters from NYSSCPA, Deloitte, BDO, EY, KPMG, and GT.

[85] *See e.g.,* letters from Deloitte, EY, KPMG, Crowe, and RSM.

[86] *See* letter from Crowe.

[87] *See* letter from EY.

[88] *See e.g.,* letters from CAQ and ICI/IDC. Consistent with the discussion in Section II.A.1 of the Proposing Release, where an auditor is auditing only an investment company or investment adviser or sponsor, such auditor would look to the amended ICC definition to identify affiliates of the audit client. Even where the investment adviser under audit is an issuer and a parent entity, the final amendments dictate that the adviser's auditor look solely to the amended ICC definition to identify affiliates of the audit client.

[89] *See e.g.,* letters from CAQ and Deloitte. The discussion in Section II.A.1.a.iii, above, including Example 3, illustrates how to apply the amended definitions where an auditor audits only a portfolio company.

[90] *See* letter from EY. The discussion in Section II.A.1.a.iii, above, including Example 4, illustrates how to apply the amended definitions in response to this circumstance.

[91] *See e.g.,* letters from CAQ, BDO, EY, KPMG, Crowe, and AIC. The discussion in Section II.A.1.c.iii, including Example 5, below, illustrates how to apply the amended definitions in response to this circumstance. One commenter raised a related fact pattern and suggested aligning the proposed amendments with the recent amendments to the Loan Provision. *See* letter from PwC.

[92] *See* letter from EY; *see also infra* note 118.

[93] *See* letter from RSM. We do not see a compelling reason to adopt this approach and create separate provisions for these related entities within an ICC. Additionally, such an approach may be duplicative and add unnecessary complexity to the amended ICC definition.

assessing materiality in the ICC context,[99] other commenters voiced concerns or noted that additional guidance about the application of materiality would be helpful.[100] Some commenters noted the importance of access to current financial information of controlling entities and sister entities for auditors and their clients if the proposed amendments were adopted.[101] In this regard, some commenters requested that the Commission address the shared responsibility of auditors, their audit clients, and audit committees.[102]

In response to a request for comment regarding potential application challenges in the Proposing Release, one commenter indicated there may be challenges in applying the materiality qualifier because the current definition does not require an assessment of materiality of sister entities in the context of the ICC.[103] The commenter suggested that such challenges could be addressed by auditors, the Commission, and companies working together to develop consistent practices and protocols for providing the information needed by auditors to maintain compliance with the independence rules. Similarly, another commenter requested guidance on the timing and frequency of monitoring materiality in the ICC context. The commenter suggested the Commission clarify that, if the sister investment adviser or a fund advised by such sister investment adviser were not deemed material to the controlling entity after an initial assessment, then the auditor could satisfy its obligation to monitor materiality on an ongoing basis in response to significant transactions, SEC filings, or other information that becomes known to the auditor, or the audit client, through reasonable inquiry.[104]

Under the proposal, auditors and audit clients would have to assess the materiality of sister entities to their controlling entity even if the sister entities' investment advisers are not material to the entity that controls both the sister entities and the entity under audit. In response to a request for comment regarding whether auditors should have to assess the materiality of sister investment companies to a controlling entity even where the investment advisers for such sister investment companies are not material to a controlling entity, commenters generally thought requiring such assessment would be appropriate to account for instances when a controlling entity may have an investment in an investment company that would make the investment company material to the controlling entity even though the investment company's adviser is not material to the same controlling entity.[105]

Comments on Proposed Rule 2–01(f)(14)(i)(F)—Inclusion of Investment Companies Advised or Sponsored by an Affiliate Investment Adviser or Sponsor

In the Proposing Release, the Commission requested comment regarding whether proposed Rule 2–01(f)(14)(i)(F), which would include within an ICC any investment company that has any investment adviser or sponsor that is an affiliate of the audit client pursuant to proposed Rules 2–01(f)(14)(i)(A) through (D), should be adopted. Several commenters supported the continued inclusion of sister investment companies under proposed Rule 2–01(f)(14)(i)(F), regardless of the materiality of the sister investment companies once an investment adviser is deemed to be an affiliate under Rules 2–01(f)(14)(i)(A) through (f)(14)(i)(D).[106] However, one commenter stated that not including a materiality qualifier in proposed Rule 2–01(f)(14)(i)(F) renders the relief intended by the common control provision in the proposed ICC definition ''inconsequential.'' [107] Another commenter, while supportive of proposed Rule 2–01(f)(14)(i)(F), recommended that the reference to proposed Rule 2–01(f)(14)(i)(D) be removed from proposed Rule 2–01(f)(14)(i)(F) with respect to investment companies advised by sister investment advisers, because the proposed provision appeared to be inconsistent with other proposed provisions that would include a materiality qualifier for sister entity affiliates.[108]

Comments on Proposed Rule 2–01(f)(14)(i)(E)—the Significant Influence Provision

Some commenters expressly supported the proposed amendment to introduce a significant influence provision in proposed Rule 2–01(f)(14)(i)(E),[109] and no commenters specifically opposed the proposed amendment. One commenter, while not explicitly supporting or objecting, recommended that the Commission reiterate the statement from the Loan Provision Adopting Release that provides guidance on how to apply significant influence in an investment company context.[110]

Commenters that addressed this aspect of the proposal also supported the proposed conforming amendment to Rule 2–01(f)(6) to reference the proposed significant influence provision in the ICC definition.[111]

iii. Final Amendments

Overall Approach to ICC Definition

After considering the public comments and recommendations received, we are adopting, substantially as proposed, amendments to the ICC definition in amended 17 CFR 210.2–01(f)(14) (''amended Rule 2–01(f)(14)''), with modifications to address the concerns and suggestions raised by commenters and to align the ICC definition with the final amendment related to the dual materiality threshold in amended Rule 2–01(f)(4)(ii) discussed above.[112]

Consistent with the proposal, the final amendments to Rule 2–01(f)(4), the affiliate of the audit client definition, direct an auditor of an investment company or investment adviser or sponsor to apply the ICC definition in amended Rule 2–01(f)(14) to identify affiliates. As proposed, the amended ICC definition uses the term ''entity under audit'' as the starting point for the analysis of entities included within the ICC definition.[113] We also are adopting

[100] *See e.g.,* letters from NYSSCPA, GT, RSM, KPMG, PwC and ICI/IDC.

[101] *See e.g.,* letters from RSM, GT, KPMG, PwC, ICI/IDC, and Fund AC Chairs.

[102] *See e.g.,* letters from PwC and EY.

[103] *See* letter from KPMG.

[104] *See* letter from ICI/IDC. *See also* letters from Deloitte (expressing a similar view as it relates to both Rule 2–01(f)(4) and Rule 2–01(f)(14)) and PwC (suggesting a transition framework to address inadvertent independence violations that arise out of an unexpected change in the population of affiliates for reasons other than a merger or acquisition).

[105] *See e.g.,* letters from EY, KPMG, and RSM. One commenter noted that this situation is ''not likely to be common.'' *See* letter from EY. Another commenter requested additional guidance to foster consistent application. *See* letter from KPMG.

[106] *See e.g.,* letters from BDO, EY, KPMG, and ICI/IDC.

[107] *See* letter from RSM. Specifically, the commenter stated that all entities with a common investment adviser or sponsor should not automatically be deemed affiliates when other common control entities that are not material to the controlling entity are not deemed affiliates.

[108] *See* letter from KPMG.

[109] *See e.g.,* letters from CAQ, BDO, EY, KPMG, and RSM.

[110] *See* letter from ICI/IDC.

[111] *See e.g.,* letters from EY, KPMG, and RSM.

[112] *See* Section II.A.1.a.iii.

[113] In addition, the final amendments make conforming technical amendments to amended 17 CFR 210.2–01(f)(14)(i) to incorporate the term ''entity under audit.'' Using the term ''entity under audit'' in those subparagraphs alleviates the need to refer to each subparagraph separately, which makes the subparagraphs more concise. The conforming amendments to the subparagraphs of amended 17 CFR 210.2–01(f)(14)(i) retain the application of the

Continued

as proposed a definition of ''investment company'' for the purpose of amended Rule 2–01(f)(14) that includes unregistered funds.[114]

Similarly, the final amendments to the ICC definition include the significant influence provision of new 17 CFR 210.2–01(f)(14)(i)(E) (''Rule 2–01(f)(14)(i)(E)'') substantially as proposed but modified to incorporate the term ''entity under audit.''

New 17 CFR 210.2–01(f)(14)(i)(D)—Common Control and Materiality

After considering the public comments and recommendations received, we are adopting, with modification, new 17 CFR 210.2–01(f)(14)(i)(D) (''Rule 2–01(f)(14)(i)(D)'') to incorporate the dual materiality threshold in the common control provision, consistent with the modification to the common control provision we are adopting for the affiliate of the audit client definition.[115]

We were persuaded by commenters that the dual materiality threshold for identifying common control affiliates will be equally helpful in reducing compliance challenges in the ICC context as in the operating company context.[116] Such alignment also provides internal consistency within Rule 2–01, which should facilitate compliance efforts by reducing the potential for confusion and inconsistency when assessing common control affiliates.

Although some commenters objected to including a materiality threshold in the ICC amendments, we do not believe the adopted approach increases the risk to auditor independence. When an entity under audit is under common control with an investment company, or an investment adviser or sponsor, and the adopted dual materiality threshold is not met, we believe there is less risk to an auditor's objectivity and impartiality from the auditor's services to or relationships with such sister entity, for the reasons discussed regarding the dual materiality threshold for the common control provision in the affiliate of the audit client definition.[117] Further, we believe any threats to independence that may exist when the entity under audit is not material to the controlling entity will be sufficiently mitigated by the general independence standard in Rule 2–01(b).[118]

In response to commenters' request for guidance, consistent with the discussion in Section II.A.1.a.iii above, we remind auditors and their audit clients of their shared responsibility to monitor independence, including monitoring affiliates and obtaining information necessary to assess materiality. We are not providing any specific guidance on materiality at this time because we understand that auditors and their audit clients have developed approaches to determine materiality in compliance with current rules, and we expect those approaches would continue to be applicable under the final amendments. Auditors, working together with their audit clients, should assess materiality for the purpose of complying with Rule 2–01, as amended, including consideration of relevant qualitative and quantitative factors. Depending on the circumstances, it may be reasonable to use certain measures, such as assets under management, when evaluating a potential affiliate in one instance, but not when evaluating a different potential affiliate. The assessment also should be attentive to the nature of the relationship, the governance structure of the entity, certain business and financial relationships, and other relevant qualitative considerations.

As noted in Section II.A.1.a.iii, understanding the organizational structure of an audit client is important when considering the general standard under Rule 2–01(b). We believe that after the initial materiality assessment to identify potential affiliates, the auditor and the audit client should conduct updated assessments based on any transactions, Commission filings, or other information that become known to the auditor or the audit client through reasonable inquiry.

New 17 CFR 210.2–01(f)(14)(i)(F)—The Provision To Include Investment Companies Advised or Sponsored by an Affiliate Investment Adviser or Sponsor

After considering the public comments and recommendations received, we are adopting, as proposed, new 17 CFR 210.2–01(f)(14)(i)(F) (''Rule 2–01(f)(14)(i)(F)''), which includes certain sister investment companies within the ICC definition regardless of materiality. We believe that this paragraph, together with the amendments to the common control provision in Rule 2–01(f)(14)(i)(D), as discussed above, will focus the scope of our independence rules on entities where relationships and services are more likely to threaten an auditor's objectivity and impartiality.

Specifically, under the existing ICC definition, sister investment advisers or sponsors and, as a result, their funds, regardless of whether the sister investment advisers or sponsors are material to the applicable controlling entities, would be included in the ICC of an investment company under audit.[119] Rule 2–01(f)(14)(i)(F) includes within the ICC definition investment advisers or sponsors identified by amended Rules 2–01(f)(14)(i)(A) through (D), which will include sister investment advisers or sponsors where a dual material relationship exists pursuant to Rule 2–01(f)(14)(i)(D) and exclude sister investment advisers or sponsors where a dual material relationship does not exist. While some commenters indicated that Rule 2–01(f)(14)(i)(F) should include a materiality qualifier, we believe that such an approach risks excluding entities where an auditor's services to or

ICC definition as described in the Proposing Release.

[114] One commenter suggested that the Commission clarify whether commodity pools are included within the meaning of the term investment company for the purpose of applying amended Rule 2–01(f)(14). *See* letter from PwC. The term investment company, for the purpose of amended Rule 2–01(f)(14), does not include a commodity pool unless that commodity pool is an investment company or would be an investment company but for the exclusions provided by Section 3(c) of the Investment Company Act of 1940.

[115] *See* Section II.A.1.a.iii.

[116] *See e.g.,* letters from EY, AIC, and CCMC. For example, CCMC expressed the view that Rule 2–01(f)(14)(i)(D) should be amended to include sister investment advisers and investment companies only when both the sister entity and the investment adviser under audit, or the investment adviser or sponsor of an investment company under audit, are material to the controlling entity.

[117] Rule 2–01(f)(14)(i)(D) retains the existing provision that includes sister entities engaged in the business of providing administrative, custodian, underwriting, or transfer agent services to any entity identified by amended 17 CFR 210.2–01(f)(14)(i)(A) (''amended Rule 2–01(f)(14)(i)(A)'') and amended 17 CFR 210.2–01(f)(14)(i)(B), regardless of materiality.

[118] One commenter sought clarification about whether Rule 2–01(f)(14) would apply to engagements required by Rule 206(4)–2(a)(6) under the Investment Advisers Act of 1940 (the ''Advisers Act Custody Rule''). *See* letter from EY; 17 CFR 275.206(4)–2(a)(6). The Advisers Act Custody Rule requires that when an investment adviser or a related person acts as a qualified custodian for client funds and securities, the investment adviser, in addition to the independent verification requirement, must annually obtain, or receive from the related person, an internal control report prepared by an independent public accountant. The Advisers Act Custody Rule defines a ''related person'' as ''any person, directly or indirectly, controlling or controlled by [the investment adviser], and any person that is under common control with [the investment adviser].'' 17 CFR 275.206(4)–2(d)(7). For purposes of this engagement, the related person qualified custodian would be the ''entity under audit'' under the final rule. Accordingly, the auditor engaged would apply amended Rule 2–01(f)(4)—not amended Rule 2–01(f)(14)—to determine the affiliates of the audit client, which would require the auditor to assess the investment adviser's materiality if under common control. In these circumstances, however, the accountant would be required to be independent of the adviser under Rule 2–01(b) regardless of the results of this materiality determination.

[119] *See* Rule 2–01(f)(14).

relationships with a sister investment company could impair an auditor's objectivity and impartiality because the sister investment company is advised or sponsored by an affiliate investment adviser or sponsor.

Where a sister investment company shares the same adviser or sponsor as an investment company under audit, we continue to believe that these entities should be included as part of the ICC in evaluating the auditor's independence, regardless of whether such sister investment company is material to the shared investment adviser or sponsor. In our view, the nature of the relationship between the investment adviser and the entity under audit that it advises presents risks to an auditor's objectivity and impartiality when the auditor has relationships with or provides services to investment companies advised by such investment adviser.

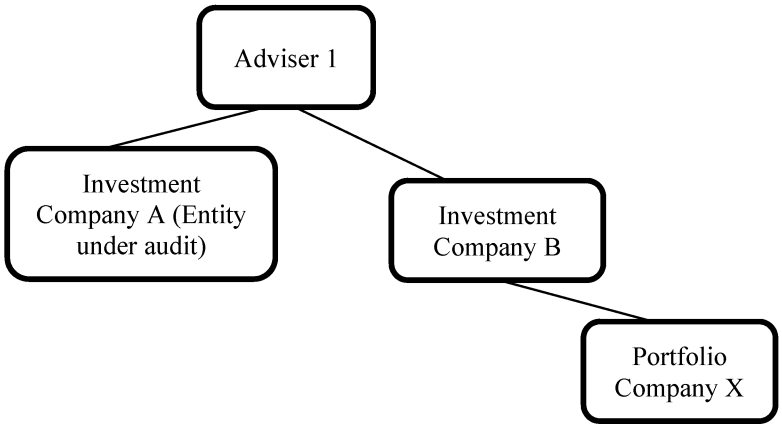
Similarly, when a sister investment adviser or sponsor is included under the dual materiality threshold, we believe that the investment companies advised or sponsored by the sister investment adviser or sponsor should be included as part of the ICC in evaluating the auditor's independence, regardless of whether such sister investment companies are material to the applicable controlling entities. Once the sister investment adviser or sponsor is included in the ICC due to the dual materiality threshold, relationships with and services to investment companies advised or sponsored by the sister investment adviser or sponsor also are more likely to pose a threat to an auditor's objectivity and impartiality.

Amended 17 CFR 210.2–01(f)(14)(i)(C)—Application to Portfolio Companies Controlled by Sister Investment Companies

As noted above, we received several comments regarding how the control provision in proposed Rule 2–01(f)(14)(i)(C) applies to portfolio companies of an affiliate sister investment company when an investment company is under audit.[120] We are mindful of the concerns raised by commenters and are adopting the control provision in amended 17 CFR 210.2–01(f)(14)(i)(C) (''amended Rule 2–01(f)(14)(i)(C)'') with modifications to apply a dual materiality threshold for portfolio companies of sister investment companies that are controlled by the investment adviser or sponsor unless the portfolio companies are engaged in the business of providing administrative, custodial, underwriting, or transfer agent services to any entity identified by amended Rules 2–01(f)(14)(i)(A) or (B). As illustrated by Example 5 below, this modification will affect only the application of the rule for portfolio companies because Rule 2–01(f)(14)(i)(F), as discussed above, will dictate when sister investment companies are included within the ICC definition.

Under a scenario where neither the investment company under audit nor the portfolio company is material to the shared investment adviser or sponsor, there is less risk to the auditor's objectivity and impartiality. The modification in amended Rule 2–01(f)(14)(i)(C) does not alter the application of the ICC definition to portfolio companies controlled by an investment company under audit, as such portfolio companies will always be included in the ICC pursuant to amended 17 CFR 210.2–01(f)(14)(i)(C)(*1*) (''amended Rule 2–01(f)(14)(i)(C)(*1*)''). The following is intended as an illustrative example only, and practitioners and audit clients should be aware that an assessment of materiality requires consideration of all relevant facts and circumstances, including quantitative and qualitative factors.

Example 5 – Application of New 17 CFR 210.2-01(f)(14)(i)(C)(*2*)



Investment Company A, the entity under audit, is advised by Adviser 1, which also advises Investment Company B. Investment Company B controls Portfolio Company X and, as a result, Adviser 1 is deemed to control Portfolio Company X. Pursuant to amended Rule 2–01(f)(14)(i)(C)(*1*), Investment Company A's auditor would include in the ICC any portfolio company controlled by Investment Company A even if the portfolio company is not material to Adviser 1. Pursuant to Rule 2–01(f)(14)(i)(F), the auditor also would include in the ICC Investment Company B even if Investment Company B is not material to Adviser 1. However, the auditor would apply the dual materiality threshold in new 17 CFR 210. 2–01(f)(14)(i)(C)(*2*) (''Rule 2–01(f)(14)(i)(C)(*2*)'') to determine if Portfolio Company X is included in the ICC in connection with Investment Company A's audit. If neither Portfolio Company X nor Investment Company A is material to Adviser 1 and Portfolio

[120] *See e.g.,* letters from CAQ, BDO, EY, KPMG, Crowe, and AIC.

Company X is not engaged in the business of providing administrative, custodial, underwriting, or transfer agent services to any entity identified by amended Rules 2–01(f)(14)(i)(A) and (B), Portfolio Company X would not be included in the ICC in connection with the audit of Investment Company A.

2. Amendment to the Definition of Audit and Professional Engagement Period

Rules 2–01(c)(1) through (5) prescribe certain circumstances the occurrence of which during the ''audit and professional engagement period'' are inconsistent with the general standard under Rule 2–01(b).[121] Under the current rule, the term ''audit and professional engagement period'' is defined differently for domestic issuers and foreign private issuers (''FPIs'')[122] that are filing, or required to file, a registration statement or report with the Commission for the first time (''first-time filers''). Specifically, 17 CFR 210.2–01(f)(5)(i) and (ii) define the audit and professional engagement period as including both the ''period covered by any financial statements being audited or reviewed'' and the ''period of the engagement to audit or review the . . . financial statements or to prepare a report filed with the Commission . . .'' (the ''look-back period''). However, 17 CFR 210.2–01(f)(5)(iii) (''Rule 2–01(f)(5)(iii)'') of the definition narrows the audit and professional engagement period for audits of the financial statements of foreign private issuers to the ''first day of the last fiscal year before the foreign private issuer first filed, or was required to file, a registration statement or report with the Commission, provided there has been full compliance with home country independence standards in all prior periods covered by any registration statement or report filed with the Commission.''

a. Proposed Amendments

The Commission proposed to amend Rule 2–01(f)(5)(iii) so that the one year look-back period for first-time filers will apply to all such filers, which would result in treating all first-time filers (*i.e.,* domestic issuers and FPIs) similarly for purposes of the independence requirements under Rule 2–01.[123]

In the Proposing Release, the Commission explained that the proposed amendment would provide parity between domestic issuers and FPIs and noted feedback that such parity may also benefit capital formation.[124] The Commission stated its belief that the proposed requirement to comply with applicable independence standards in all prior periods included in the first-time filing sufficiently mitigates the risk associated with shortening the look-back provision for domestic first-time filers. In addition, as it relates to relationships and services in prior years that would not be included in the look-back period as a result of the proposed amendment, the Commission noted that such relationships and services still would be considered under the general independence standard of Rule 2–01(b), either individually or in the aggregate.

b. Comments Received

Many commenters supported the proposed amendment to shorten the domestic company look-back period for evaluating independence compliance to the most recent year to be included in the first filing with the Commission.[125] Several commenters stated that the current requirement can result in challenges, cost, or delays to an initial public offering (''IPO'').[126] One commenter indicated that these challenges are especially relevant in the private equity environment where strategies change within a one- or two-year time frame.[127] Some commenters also noted that the current provision puts domestic issuers at a disadvantage relative to FPIs.[128]

Some commenters opposed the proposed amendment and, instead, suggested the Commission lengthen the look-back period for FPIs.[129] One of these commenters posited that entities contemplate going public for years before an IPO and, as such, the current domestic look-back period is not an ''egregious'' burden.[130] Another commenter cited the increased risk associated with ''unicorn'' IPOs and asserted that this proposed amendment would weaken the applicable independence rules when serious questions ''have arisen around accounting practices at some of the largest private companies.''[131]

A few commenters supported the Commission's view that all relationships and services in prior periods should still be evaluated under Rule 2–01(b) and that these relationships and services should be easily known.[132]

Several commenters also requested that the Commission clarify how the proposed amendment would apply to specific situations such as:

- Reverse mergers or special purpose acquisition companies, if such a transaction is being considered by an audit client that is currently an issuer;[133]
- An existing and a new audit relationship;[134] and
- When a registration statement is withdrawn and a new registration statement subsequently is filed.[135]

c. Final Amendments

After considering the public comments and recommendations received, we are adopting amended 17 CFR 210.2–01(f)(5)(iii) (''amended Rule 2–01(f)(5)(iii)'') as proposed. As noted in the Proposing Release, the staff has observed, from its independence consultation experience related to potential filings of initial registration statements, that often one factor, among many, in the auditor's objectivity and impartiality analysis is how long ago the service or relationship ended. If the service or relationship ended in the early years of the financial statements included in the initial registration statement, that fact may support a conclusion that the auditor is objective and impartial under Rule 2–01 at the time the IPO is consummated. As discussed above, a number of commenters supported the Commission's reasoning for the proposal.

We were not persuaded by the commenters who opposed the proposal and who recommended lengthening the look-back period for FPIs instead. As a general matter, we believe that lengthening the look-back period would unnecessarily increase the burden on

[121] *See* Preliminary Note 2 and Rules 2–01(c)(1) through (5).

[122] 17 CFR 240.3b–4(c). A foreign private issuer is any foreign issuer other than a foreign government, except for an issuer that (1) has more than 50% of its outstanding voting securities held of record by U.S. residents; and (2) any of the following: (i) A majority of its executive officers or directors are citizens or residents of the United States; (ii) more than 50% of its assets are located in the United States; or (iii) its business is principally administered in the United States. *See* 17 CFR 240.3b–4(c).

[123] The proposed amendment would not impact the compliance analysis related to the partner rotation provisions in 17 CFR 210.2–01(c)(6).

[124] *See* Section II.A.2 of the Proposing Release.

[125] *See e.g.,* letters from NASBA, CAQ, AICPA, Deloitte, BDO, EY, KPMG, RSM, PwC, Crowe, AIC, EQT, FEI, GT, CCMC, and Parrett.

[130] *See* letter from NYSSCPA.

[131] *See* letter from CFA.

[132] *See e.g.,* letters from Deloitte and KPMG. *But see* letters from RSM and PwC. The view expressed by RSM and PwC regarding the application of Rule 2–01(b) also applies to the discussion of its applicability in this context.

[133] *See* letter from GT.

[134] *See* letter from KPMG.

[135] *See* letters from GT and Crowe.

capital formation and impose new regulatory costs on FPIs without significantly enhancing investor protection. With respect to the comment regarding the impact of shortening the look-back period for ''unicorn'' IPOs,[136] it is not clear that financial reporting quality would be undermined or concerns, such as ''inadequate corporate governance and lax accounting practices,'' would be exacerbated by the shorter look-back period for domestic issuers. Moreover, the final amendments do not affect the auditing standards to which a company undergoing an IPO is subject. Additionally, we continue to believe that applying Rule 2–01 to the most recent fiscal year, together with the application of the general independence standard in Rule 2–01(b) and the requirement to comply with applicable independence standards for the earlier years, mitigate the risk to an auditor's objectivity and impartiality associated with the shorter look-back period.[137]

In response to some commenters' request for clarification or guidance, we note that the final amendment applies to both existing and new audit relationships. We see no proportionate investor protection benefit to introducing complexity to a first-time filer's decision whether to retain or select a new auditor by applying different standards. Where a registrant is undergoing a reverse merger that is in substance similar to an IPO, the audit client and auditor should not apply the transition framework discussed in Section II.D, but may apply the shorter look-back period under the final amendments.[138] Finally, consistent with the position taken by the staff in consultations, we are clarifying that where an issuer withdraws an initial registration statement, the re-filing of a new registration statement would be considered the issuer's first-time filing.

B. Amendments to Loans or Debtor-Creditor Relationships

1. Amendment To Except Student Loans

a. Proposed Amendment

The Loan Provision in Rule 2–01(c)(1)(ii)(A) provides that an accountant is not independent if it has any loan to or from an audit client and certain other persons related to the audit client. The Loan Provision also excepts four types of loans from its scope.[139] The Commission proposed to add an exception to 17 CFR 210. 2–01(c)(1)(ii)(A)(*1*) (''Rule 2–01(c)(1)(ii)(A)(*1*)'') for student loans obtained from a financial institution under its normal lending procedures, terms, and requirements for a covered person's educational expenses, provided the loan was obtained by the individual prior to becoming a covered person in the firm as defined in 17 CFR 210.2–01(f)(11).[140]

In the Proposing Release, the Commission indicated that limiting the exception to student loans ''not obtained while the covered person in the firm was a covered person'' would provide a familiar compliance principle as it is consistent with the limitation to the primary mortgage loan exception in current 17 CFR 210.2–01(c)(1)(ii)(A)*(1)(iv)* (''Rule 2–01(c)(1)(ii)(A)*(1)(iv)*''). The Commission also expressed the belief that obtaining a student loan as a covered person poses a higher risk to the auditor's objectivity and impartiality and creates, at a minimum, an independence appearance issue that is not present when a non-covered person obtained a similar student loan from such audit client.

The proposed amendment also limited the exclusion to student loans obtained for the covered person's educational expenses. The Commission did not propose to extend the exception to a covered person's immediate family members due to concerns, at that time, that the amount of student loan borrowings could be significant when considering student loans obtained for multiple immediate family members and thus could impact an auditor's objectivity and impartiality.

b. Comments Received

Commenters generally supported adding student loans to the list of excepted loans.[141] Many commenters recommended that the Commission expand the exception to include student loans of the covered person's immediate family members under the same terms as the proposed amendment.[142] For example, one commenter questioned the Commission's argument that ''the amount of student loan borrowings could be significant when considering student loans obtained for multiple immediate family members and thus could impact an auditor's objectivity and impartiality'' when considering that there is no similar proscription with respect to a mortgage loan, which could be substantially more significant than student loan debt in terms of absolute dollars.[143] However, another commenter agreed with the proposal not to include student loans of immediate family members in the proposed amendment.[144]

In the Proposing Release, the Commission requested comment on whether student loans of a covered person's immediate family members also should be excluded. Some commenters indicated that even if the proposed amendment were expanded to include student loans of immediate family members, there should be no limit on the amount outstanding.[145] One commenter suggested that the materiality of the loan to the covered person's net worth should be considered.[146] A few commenters indicated that Rule 2–01(b) should mitigate the risks of the amount of student loans impairing an auditor's objectivity and impartiality.[147] Without addressing immediate family members' loans, some commenters asserted that there should be no limit on the amount outstanding, similar to the existing primary residence mortgage exception.[148] We also note that certain commenters requested that the Commission clarify the scope of the term ''educational expenses'' and whether it includes expenses for room and board, tuition, books, and other educational supplies.[149]

c. Final Amendment

After considering the public comments and recommendations received, we are adopting amendments to except certain student loans from the Loan Provision with two modifications from the proposed amendments. Consistent with the recommendation of many commenters, the final amendment also will except student loans obtained by a covered person's immediate family members, as that term is defined in 17 CFR 210.2–01(f)(13). We are persuaded that there is no need to include such a limitation, especially in light of the fact that similar exclusions, such as the one

for mortgage loans, are not similarly proscribed. Also, in response to comments seeking guidance on the term ''educational expenses,'' we believe the entire balance for loans that qualify as a student loan under the applicable terms, conditions, and requirements should be within the scope of the final amendments.

The proposed amendment's reference to student loans ''obtained for a covered person's or his or her immediate family members' educational expenses'' was intended to make explicit that it is only student loans for the covered persons' and their immediate family members' educational expenses that should be covered and not loans that they undertake to pay for another person's educational expenses. That limitation continues to apply. However, we are modifying the rule text to delete this phrase to avoid potential confusion about whether ''educational expenses'' is meant as a limitation on the amount of student loans excepted.[150] The remaining terms of the exclusion are consistent with the proposal.

We are not specifying a numerical limit to the amount of outstanding student loans held by a covered person or a covered person's immediate family members that would be excepted. In light of comments received, we are persuaded that the purpose for which student loans are incurred and the standard terms associated with such loans set them apart from other debtor/creditor relationships not excepted from the Loan Rule and are less likely to threaten an auditor's objectivity and impartiality. We believe the nature of student loans and the requirement that the loans are obtained from a financial institution under its normal lending procedures, terms, and requirements mitigate the risk such loans would pose to an auditor's objectivity and impartiality. Not including a numerical limit also is consistent with the exception for mortgage loans in Rule 2–01(c)(1)(ii)(A)*(1)(iv)*.

2. Amendment To Clarify the Reference to ''A Mortgage Loan''

a. Proposed Amendment

The Commission proposed a clarifying amendment to the reference to ''a mortgage loan'' in Rule 2–01(c)(1)(ii)(A)(*1*)(*iv*) to refer to ''mortgage loans'' in the plural. As noted in the Proposing Release, Rule 2–01(c)(1)(ii)(A)(*1*)(*iv*) was not intended to exclude just one outstanding mortgage loan on a borrower's primary residence, and the Commission staff has previously provided guidance consistent with the proposed amendment.[151]

b. Comments Received

Commenters supported the proposed amendment.[152] We received no comments specifically opposing this proposed amendment. One commenter requested examples of how the proposed amendment applies to different types of mortgage loans, such as home equity or home improvement loans.[153] Another commenter suggested that the Commission consider extending the exemption to include mortgages collateralized by property other than primary residences.[154] One commenter requested that the Commission include in the adopting release the guidance discussed in Section II.B.2 of the Proposing Release regarding the situation where a borrower becomes a covered person only because of a change in the ownership in the loan.[155]

c. Final Amendment

After considering the public comments and recommendations received, we are adopting as proposed the amendment to Rule 2–01(c)(1)(ii)(A)(*1*)(*iv*) to refer to ''mortgage loans'' instead of ''a mortgage loan.'' In response to the commenter who requested examples or guidance on the application of the mortgage loan exception when a borrower has obtained different types of loans collateralized by a primary residence, we note that the Commission has previously clarified that the rationale for the mortgage loan exception focuses on the status of the covered person at the time of the loan origination.[156] The same focus applies to second mortgages, home improvement loans, equity lines of credit, and similar mortgage obligations collateralized by a primary residence obtained from a financial institution under its normal lending procedures, terms and requirements and while the borrower is not a covered person in the firm.

Also, as noted in the Proposing Release,[157] where the borrower becomes a covered person only because of a change in the ownership in the loan, and provided there is no modification in the original terms or conditions of the loan or obligation after the borrower becomes, or in contemplation of the borrower becoming, a covered person, the loan would be included within this exception.

Regarding a commenter's suggestion to extend the mortgage loan exception to loans collateralized by a non-primary residence (*e.g.,* a secondary or vacation home), we believe excepting loans on non-primary residences, which may be held for investment, would introduce increased risk to an auditor's objectivity and impartiality. As such, we do not see a compelling reason to expand the exception as suggested.

3. Amendment To Revise the Credit Card Rule To Refer to ''Consumer Loans''

a. Proposed Amendment

The Commission proposed revising 17 CFR 210.2–01(c)(1)(ii)(E) (''Rule 2–01(c)(1)(ii)(E)'') (the ''Credit Card Rule'') to replace the reference to ''credit cards'' with ''consumer loans'' and revise the provision to reference any consumer loan balance owed to a lender that is an audit client that is not reduced to $10,000 or less on a current basis taking into consideration the payment due date and available grace period. The Proposing Release set forth the Commission's view that a limited amount of debt that is routinely incurred by a covered person or any of his or her immediate family members for personal consumption, even if the audit client is the lending entity, would typically not impair an auditor's objectivity and impartiality. The proposed amendment would expand the current Credit Card Rule to encompass the types of consumer financing borrowers routinely obtain for personal consumption, such as, for example, retail installment loans, cell phone installment plans, and home improvement loans that are not secured by a mortgage on a primary residence. The Proposing Release explained that the types of consumer loans contemplated, like credit cards, would typically have a payment due date (*e.g.,* monthly).[158]

[150] With ''educational expenses'' deleted, the reference to covered persons and their immediate family members would be duplicative of the same references in 17 CFR 210.2–01(c)(1)(ii).

[151] *See* Section B. Question 1 Office of the Chief Accountant: Application of the Commission's Rules on Auditor Independence Frequently Asked Questions (June 27, 2019) (originally issued August 6, 2007) (''Auditor Independence FAQs'') (indicating the staff's view that the rationale for a mortgage on a primary residence also applies to second mortgages, home improvement loans, equity lines of credit and similar mortgage obligations collateralized by a primary residence obtained from a financial institution under its normal lending procedures, terms and requirements and while not a covered person in the firm).

[157] Section II.B.2 of the Proposing Release.

[158] Section II.B.3 of the Proposing Release.

b. Comments Received

All commenters that addressed this proposed amendment expressed their support.[159] We received no comments that specifically opposed this proposed amendment. Some commenters supported the proposed $10,000 limit,[160] while other commenters recommended raising the limit to $20,000 to account for inflation.[161] One commenter suggested an increase to $20,000 or $25,000 while citing to recent studies about consumer finances.[162] Some commenters encouraged the Commission to consider adjustments of the dollar threshold to account for inflation.[163] A few commenters requested that the Commission reconsider the limit, but did not suggest an alternative amount.[164]

In the Proposing Release, the Commission requested comment on whether further guidance was needed with respect to the reference to current basis. Some commenters indicated that the term ''current basis'' does not require further guidance.[165] A few commenters stated that the term ''consumer loans'' is well understood and does not require further defining,[166] while other commenters stated that further guidance is needed.[167] One commenter recommended that the Commission define the term ''consumer loan'' along the lines of the discussion in the Proposing Release and suggested that the rule retain a reference to ''credit cards'' for additional clarity.[168] Another commenter suggested the Commission use the term ''other consumer loans'' because, in its view, consumer loans commonly include auto, home equity, and student loans and mortgages.[169] Some commenters requested that the Commission consider whether similar exclusions should be applied to other consumer financial arrangements, such as digital payment application balances,[170] deposit overdraft protections,[171] insurance policies, leases, and deposit account balances that exceed FDIC insurance limits or are not subject to FDIC or similar insurance.[172]

c. Final Amendment

After considering the public comments and recommendations received, we are adopting as proposed amended 17 CFR 210.2–01(c)(1)(ii)(E). The amendment is intended to broaden this provision so that credit card debt and other forms of consumer financing, such as retail installment loans, cell phone installment plans, and home improvement loans that are not secured by a mortgage on a primary residence, would be excluded if the outstanding balance is $10,000 or less on a current basis. Consistent with the payment terms in the current Credit Card Rule, in assessing the current basis of a consumer loan balance, the borrower would consider the payment due date, plus any available grace period, which is typically monthly for credit cards. We considered inflationary adjustments in light of comments received asking for an increase from the proposed $10,000 outstanding balance limit. However, we are not modifying the proposed outstanding balance limit because we believe $10,000 remains a significant amount of money for an individual covered by the final amendment (*i.e.,* any covered person or his or her immediate family members). In particular, we believe that when an individual covered by the final amendment has outstanding consumer loan(s) with an audit client in excess of this amount, the auditor's objectivity and impartiality could be impaired.

The additional exclusions suggested by commenters for other consumer financial arrangements, such as digital payment application balances, among others, were not included as part of the proposal and may involve their own unique set of issues. Accordingly, the final amendment does not cover such arrangements. Also, we believe including many enumerated types of consumer loans in the rule will increase complexity of the rule and may become outdated as consumer lending arrangements evolve. As such, we have not included within Rule 2–01(f) a definition of the term ''consumer loan.'' We also did not adopt commenters' suggestions to use a term other than ''consumer loans,'' such as to retain the current reference to ''credit cards'' or to add ''other,'' as we believe the rule is sufficiently clear as to what types of loans are covered under this exception.

C. Amendments to the Business Relationships Rule

1. Proposed Amendment to the Reference to ''Substantial Stockholder''

The Commission proposed to replace the term ''substantial stockholders'' in the Business Relationships Rule with the phrase ''beneficial owners (known through reasonable inquiry) of the audit client's equity securities where such beneficial owner has significant influence over the audit client.'' Currently, Rule 2–01(c)(3) prohibits, at any point during the audit and professional engagement period, the accounting firm or any covered person from having ''any direct or material indirect business relationship with an audit client, or with persons associated with the audit client in a decision-making capacity, such as an audit client's officers, directors, or *substantial stockholders* . . . .'' (emphasis added).

In the Proposing Release, the Commission expressed its belief that referring to ''beneficial owners (known through reasonable inquiry) of the audit client's equity securities where such beneficial owner has significant influence over the audit client'' instead of ''substantial stockholders'' would improve the rule by making it clearer and less complex. In this regard, the Commission noted that ''substantial stockholder'' is not currently defined in Regulation S–X, whereas the concept of significant influence is used in the Loan Provision [173] and other aspects of the auditor independence rules.[174]

The Proposing Release also included additional guidance to explain that regardless of whether the beneficial owner owns equity securities of an audit client, including an affiliate of the audit client, the independence analysis should focus on whether the beneficial owner has significant influence over the entity under audit, as business relationships with persons with such influence could be reasonably expected to affect an auditor's objectivity and impartiality.[175]

This guidance was not intended to change the analysis when evaluating ''any direct or material indirect business relationships with an audit client.'' Under the current, proposed, and

Continued

2. Comments Received

Many commenters supported the proposal to use the significant influence concept from the Loan Provision to replace the reference to substantial stockholder in the Business Relationships Rule.[176] Commenters stated that this approach would facilitate compliance by applying a concept that is well understood.[177] Some commenters indicated the proposal would more appropriately identify those relationships that are more likely to impair an auditor's objectivity and impartiality[178] and would increase the number of qualified firms from which an issuer may choose.[179]

One commenter opposed the proposed amendment.[180] This commenter reiterated concerns regarding the concept of beneficial owner with significant influence, which the commenter previously expressed with respect to the recent amendments to the Loan Provision.[181]

Several commenters recommended that the Commission consider aligning the guidance in the Proposing Release with the Loan Provision Adopting Release to clarify that entities under common control with, or controlled by, the beneficial owner of the audit client's equity securities that has significant influence over the audit client would be excluded from the scope of the Business Relationships Rule.[182]

One commenter requested that the Commission provide examples of the types of business relationships that would be ''problematic'' based on consultations received.[183]

In the Proposing Release, the Commission requested comment on whether additional amendments are needed to address multi-company relationships. Commenters provided their views concerning multi-company relationships, including, for some, the application of Rule 2–01(b) to these situations.[184] These commenters suggested that the Commission consider these discussions and examples when considering whether to provide future guidance in this area. Some commenters explicitly noted that they do not believe further amendments are required to identify whether the auditor's objectivity and impartiality would be impaired.[185]

One commenter suggested a broad re-examination of the Business Relationships Rule due to the changes in the business environment and multi-company relationships.[186] Another commenter stated that Rule 2–01(c)(3) currently precludes many private equity firms from investing in certain multi-company relationships and that the proposed amendments do not address this issue.[187] This same commenter also noted that its recommendation to apply a dual materiality threshold in determining if a sister entity is an affiliate of the audit client would significantly alleviate the concerns around the Business Relationships Rule.

With respect to the additional guidance in the Proposing Release, many commenters expressed their support for the clarification that the focus of the significant influence analysis, as it relates to persons in a decision-making capacity, should be on the entity under audit.[188] Commenters also recommended that the Commission reiterate this guidance in the adopting release or revise the rule text to incorporate it.[189]

Two commenters requested that the Commission clarify whether this ''entity under audit'' guidance applies to officers and directors as referenced in the Business Relationships Rule.[190]

3. Final Amendments

After considering the public comments and recommendations received, we are adopting amendments to the Business Relationships Rule substantially as proposed with one modification. We are modifying the proposal to incorporate the guidance in the Proposing Release regarding the reference to ''audit client'' when identifying associated persons in a decision-making capacity, including beneficial owners. Under this approach, the independence analysis focuses on whether the associated person has decision-making capacity over the entity under audit rather than the audit client. We continue to believe that providing internal consistency between the Loan Provision and the Business Relationships Rule by leveraging the concept of ''beneficial owners (known through reasonable inquiry) of the audit client's equity securities where such beneficial owner has significant influence'' will foster compliance and consistency in application.

Regarding the comments seeking consistency with the Loan Provision in other areas, we do not agree with the recommendation that entities controlled by or under common control with the beneficial owner of the audit client's equity securities, where such beneficial owner has significant influence over the entity under audit, should be excluded from the scope of the Business Relationships Rule. We view business relationships as presenting different threats to an auditor's objectivity and impartiality than those presented by lending relationships. We also believe the focus on beneficial owners having significant influence over the entity under audit instead of the audit client properly focuses the independence analysis on the significant threats to an auditor's objectivity and impartiality—and identifying associated persons with such influence should not impose an undue compliance burden.

We agree with commenters that requested we codify the additional guidance from the Proposing Release to provide more certainty regarding the application of the final amendment to beneficial owners of equity securities of an affiliate of the audit client. As such, the final amendment to the Business Relationships Rule has been modified to refer to ''beneficial owners (known through reasonable inquiry) of the audit client's equity securities where such beneficial owner has significant influence over the *entity under audit*'' (emphasis added). Further, in response to comments seeking clarification regarding the application of the Business Relationships Rule to officers and directors, we are also amending the Business Relationships Rule to refer to ''an audit client's officers or directors that have the ability to affect decision-

---

adopted rule, any direct or material indirect business relationships with an audit client, which includes any affiliates of the audit client, would be deemed independence-impairing.

making at the entity under audit.'' This amendment clarifies that the Business Relationships Rule applies to relationships with officers or directors at an affiliate of the audit client when such person has the ability to affect decision-making at the entity under audit. This amendment does not change the application of the rule as it applies to the officers or directors of the entity under audit. Such persons are deemed to have the ability to affect decision-making at the entity under audit.

Although we requested comment on the need to address multi-company arrangements, after further consideration, we have determined that addressing such arrangements is beyond the scope of this rulemaking, which is focused on aligning the Business Relationships Rule with the Loan Provision and providing clarification regarding persons in a decision-making capacity. For similar reasons, we are not providing examples of problematic business relationships, as requested by one commenter. We also agree with the commenter that indicated that the proposed amendments to the affiliate of the audit client definition should significantly alleviate concerns around the Business Relationships Rule.[191] If auditors or their clients have specific questions related to multi-company arrangements, as noted in the introductory paragraph to amended Rule 2–01, they may consult with the Commission's Office of the Chief Accountant.

4. Conforming Amendments to the Loan Provision

The additional guidance provided in the Proposing Release regarding beneficial owners with significant influence set forth the Commission's view of the appropriate application of the Loan Provision. For clarity, we are adopting conforming amendments to the Loan Provision to reflect our view of how it applies to loans to or from officers or directors of affiliates of the audit client and beneficial owners of an affiliate of the audit client's equity securities.

D. Amendments for Inadvertent Violations for Mergers and Acquisitions

1. Proposed Amendment

For the reasons discussed in the Proposing Release,[192] the Commission introduced a transition framework to address inadvertent independence violations where the independence violation arises as a result of a corporate event, such as a merger or acquisition, and the services or relationships that are the basis for the violation would not have run afoul of applicable independence standards prior to the corporate event. The proposed amendments would require an auditor to:

- Be in compliance with the applicable independence standards related to the services or relationships when the services or relationships originated and throughout the period in which the applicable independence standards apply;
- Correct the independence violations arising from the merger or acquisition as promptly as possible under relevant circumstances associated with the merger or acquisition; and
- Have in place a quality control system as described in 17 CFR 210.2–01(d)(3) (''Rule 2–01(d)(3)'') that has the following features:
  - Procedures and controls that monitor the audit client's merger and acquisition activity to provide timely notice of a merger or acquisition; and
  - Procedures and controls that allow for prompt identification of potential violations after initial notification of a potential merger or acquisition that may trigger independence violations, but before the transaction has occurred.

2. Comments Received

Many commenters supported the proposed transition framework to allow audit firms and their clients to transition out of services or relationships that will become violations due to a merger or acquisition.[193] Commenters indicated that these inadvertent violations would not typically impair an auditor's objectivity and impartiality.[194] Some commenters also noted the potential for significant disruption when these situations arise through no action of the audit firm.[195] One commenter discussed disruption in the context of the private equity space.[196] Another commenter stated that the proposed transaction framework may increase the number of auditors a potential audit client may select or retain.[197]

A few commenters opposed the proposed transition framework.[198] One commenter indicated that it generally does not view a delay in mergers and acquisitions due to independence matters as a ''possible detriment'' to investors because auditor independence is critical to investor protection and investor confidence and it believes that ''many, if not most, mergers and acquisitions ultimately do not enhance long-term shareholder value.'' [199] Another commenter indicated that it could not support the proposal ''without additional guardrails.'' [200] This commenter suggested that the relationship or service triggering the inadvertent violation should either be terminated before the merger or acquisition is effective, or within a specified period of time (*e.g.,* three months) from the announcement date of the merger or acquisition. The commenter further stated that the ''as promptly as possible'' provision is susceptible to abuse and that these situations are better addressed by the staff on a case by case basis as the issue arises.''

One commenter recommended that the proposed transition framework should be applicable to all financial statement periods subject to compliance with Rule 2–01, such as where an entity anticipating an IPO makes an acquisition in the year subject to the one-year look-back provision as proposed.[201] The commenter's recommendation would allow a private company that engages in a merger or acquisition transaction to be able to rely on the transition framework to satisfy its independence requirements when it engages in an IPO in the following year.

Commenters generally supported the proposed quality control criteria or noted that they are sufficiently clear.[202] One commenter stated that the quality control requirement should acknowledge the applicability of the general standard with respect to the independence evaluation of the services and relationships with the new affiliate—both individually and in the aggregate.[203] Another commenter recommended that the Commission provide further guidance on the terms ''timely notice'' and ''prompt identification'' and its expectations of the procedures and controls that audit clients should have in place to inform auditors of pending transactions.[204]

In the Proposing Release, the Commission requested comment on whether certain services or relationships

should continue to be deemed independence-impairing, for example, if they result in the auditor auditing its own work. Some commenters indicated that Rule 2–01(b) appropriately addresses any threat to an auditor's objectivity and impartiality in situations where an inadvertent violation from a merger or acquisition could result in an audit firm auditing its own work.[205] Another commenter stated that the threat of auditing one's own work is mitigated by the proposed requirement to comply with applicable independence standards prior to the transaction and because periods prior to the transaction are not included in the accounting acquirer's financial statements.[206] However, several commenters expressed the view that ''under no circumstances should the auditor be permitted'' to audit its own work.[207]

Some commenters stated that a merger or acquisition that is in substance more like an IPO should be addressed by the proposed change to the definition of the ''audit and professional engagement period,'' as the compliance challenges are similar to an IPO situation.[208] However, other commenters asserted that all mergers or acquisitions should be covered by the proposed transition framework, including transactions in which private companies merge into a public shell, as these types of reverse mergers can occur with much less notice than a traditional IPO.[209]

In the Proposing Release, the Commission requested comment on the requirement to correct inadvertent violations as ''promptly as possible'' and indicated that such correction should not occur more than six months after the consummation of the merger or acquisition. Many commenters supported the maximum six-month transition period.[210] A few commenters recommended that the final rule expressly reference the six-month transition period.[211] One commenter expressed concern that the ''maximum six-month transition period will become the acceptable standard in practice.'' [212] One commenter suggested a 12- to 18-month maximum [213] while another commenter stated that a maximum period of time should not be specified.[214]

Several commenters suggested the Commission clarify that the framework applies where the triggering relationship or service is identified at or after the transaction closing but still addressed within the six-month window.[215] A few of these commenters noted that the quality control systems described in Rule 2–01(d)(3) may not, at times, identify independence-impairing relationships or services until after the close of a merger or acquisition.[216] Relatedly, some commenters indicated that there are challenges in obtaining relevant information prior to the closing of mergers or acquisitions.[217]

Several commenters questioned whether compliance with the proposed transition framework should still result in an independence violation, and stated their belief that parties that adhere to the framework should not be viewed as having incurred an independence violation.[218] Some of these commenters requested that the Commission use terms other than ''violation'' and ''lack of independence'' when discussing potentially independence-impairing relationships or services prior to the closing of a transaction.[219] One of these commenters noted that since the relationships or services are identified before the closing, it does not appear they should be called violations, since they are not technically violations until the merger or acquisition closes.[220]

A few commenters requested guidance on how matters covered by the proposed transition framework should be communicated to an audit committee.[221] One commenter indicated that if these matters are not deemed violations, then the matters would not be communicated to the audit committee.[222] However, other commenters asserted that even if these matters are not deemed violations, the matters should still be communicated to the audit committee.[223]

3. Final Amendments

After considering the public comments and recommendations received, we are adopting amended 17 CFR 210.2–01(e) (''amended Rule 2–01(e)'') substantially as proposed to include a transition provision for inadvertent independence violations where the independence violation arises as a result of a corporate event, such as a merger or acquisition, involving audit clients. We are adopting modifications from the proposed amendments to address comments received regarding the reference to ''lack of independence'' and ''violation'' in the proposed amendment that we found persuasive. For clarity, we also are replacing ''before the transaction has occurred'' with ''before the effective date of the transaction.'' The effective date of a merger or acquisition is typically identified in the transaction documents and often made public. This change is not intended to alter the application of the rule from the proposal, but only to provide clarity and consistency with commonly used terms.

We continue to believe it is appropriate to provide, in a manner consistent with investor protection, a transition framework for mergers and acquisitions to address inadvertent violations as a result of such transactions so the auditor and its audit client can transition out of services and relationships that would currently trigger an independence violation in an orderly manner. As stated in the Proposing Release, the transition framework follows the consideration of the audit firm's quality controls similar to Rule 2–01(d)(3).[224] As proposed, we are adopting the requirements associated with the transition framework.

As noted above, the Commission requested comment regarding mergers and acquisitions that are similar to IPOs. After considering the feedback received, we believe that the adopted transition framework should not apply to merger or acquisition transactions that are in substance similar to IPOs. For example, where a shell company, reporting pursuant to Sections 13 or 15(d) of the Exchange Act, engages in a merger with a private operating company, the auditor of the financial statements to be included in a Commission filing resulting from such transaction will not be able to rely on the transition framework in amended Rule 2–01(e).

[224] The Commission adopted 17 CFR 210.2–01(d) (''Rule 2–01(d)'') as a limited exception to address a covered person's violations in certain circumstances that would be attributed to an entire firm. The effect of Rule 2–01(d) is that an accounting firm with ''appropriate quality controls will not be deemed to lack independence when an accountant did not know of the circumstances giving rise to the impairment, and upon discovery, the impairment is quickly resolved.'' *See* 2000 Adopting Release, at 65 FR 76052.

Instead, such auditor should evaluate independence compliance using the look-back period contained within the ''audit and professional engagement period'' definition, as amended.[225] Consistent with the introductory paragraph in amended Rule 2–01, registrants and auditors may also consult with the Commission's Office of the Chief Accountant.

a. Amended Rule 2–01(e)(1)—Compliance With All Applicable Independence Standards

Regarding this first provision, amended 17 CFR 210.2–01(e)(1) (''amended Rule 2–01(e)(1)''), the auditor must be in compliance with any independence standards that are applicable to the entities involved in the merger or acquisition transaction from the origination of the relationships or services in question and throughout the period in which the applicable independence standards apply.

b. Amended 17 CFR 210.2–01(e)(2)—Prompt Transition

We expect that the independence-impairing service or relationship, in most instances, should and could be addressed before the effective date of the merger or acquisition. However, we understand there may be situations where it might not be possible for the audit client and the auditor to transition the independence-impairing service or relationship in an orderly manner without causing significant disruption to the audit client. In those situations, we expect the relationship or service to be addressed promptly after the effective date of the merger or acquisition.

Whether a post-transaction transition occurs promptly will depend on all relevant facts and circumstances. However, as stated in the Proposing Release, we expect any necessary actions would be taken no later than six months after the effective date of the merger or acquisition. We have not included a reference to the six-month maximum transition period in amended Rule 2–01(e), as suggested by some commenters, because we do not intend, nor do we believe it would be appropriate, for audit clients and audit firms to apply this timeline to address such services or relationships in every merger or acquisition scenario. In this regard, we agree with the commenter who suggested that specifying such a timeline in the final rule could result in it becoming the standard practice in all situations, even when a shorter transition may be reasonably attainable and more appropriate.

We also are not specifying a longer maximum transition period as several commenters recommended. We continue to believe that six months is an appropriate limit for transitioning to compliance with our independence rules, which as noted above, are important for investor protection and to promote investor confidence. As stated in the Proposing Release, audit firms and audit clients already manage to this timeline as it is consistent with international ethics and independence standards for accountants.[226]

In response to comments, we are removing references to the services and relationships identified as a result of a merger or acquisition as a ''lack of independence'' or ''violation.'' We agree that if the requirements in amended Rule 2–01(e) are met, then the relationships and services are not independence violations. As such, referring to independence violations or lack of independence may be confusing. The transition framework is intended to allow an auditor and its audit client sufficient opportunity to transition out of services and relationships in an orderly manner without impairing the auditor's independence. With respect to comments regarding whether these services or relationships should be communicated to the audit committee, auditors should follow PCAOB Rule 3526, *Communication with Audit Committees Concerning Independence*. PCAOB Rule 3526 requires communications of all relationships that may reasonably be thought to bear on independence.

c. New 17 CFR 210.2–01(e)(3)—Quality Control System

We considered comments received requesting elimination of the proposed requirement for an accounting firm to have procedures and controls to identify independence-impairing services and relationships before the transaction has occurred in order to allow for post-transaction identification. We are not adopting this suggestion. The Commission continues to stress that having a robust quality control system is paramount to maintaining auditor independence and, ultimately, investor protection.

We believe that it is reasonable to expect that an auditor and an audit client intending to rely on the benefits of the transition framework have in place robust procedures and controls that will identify services and relationships that would result in an independence violation prior to the effective date of the triggering transactions. As such, we are adopting the transition framework, as proposed, with a slight modification regarding the reference to ''effective date'' discussed above, so that it applies to services and relationships that are identified prior to the effective date of a merger or acquisition transaction.

In situations where a service or relationship resulting in an independence violation is identified subsequent to the effective date of the transaction, an audit firm and the audit client's audit committee will need to take into account all relevant facts and circumstances in their evaluation of the auditor's objectivity and impartiality in carrying out an audit of the financial statements of the combined entity. Consistent with the introductory paragraph in amended Rule 2–01, registrants and auditors may also consult with the Commission's Office of the Chief Accountant.

Regarding the suggestion that the quality control requirement acknowledge the applicability of Rule 2–01(b), we do not feel this is necessary. Rule 2–01(b) applies in all cases and expressly requires the consideration of all relevant facts and circumstances. As a result, if the transition framework is followed but the nature, extent, relative importance, or other aspect of the service or relationship impairs the auditor's objectivity and impartiality, then that service or relationship would be considered an independence violation. For example, if an auditor is found to be auditing its own work over a significant amount of the acquired business as part of the audit of the financial statements, that fact most likely would affect the auditor's independence under Rule 2–01(b).

E. Miscellaneous Amendments

1. Proposed Miscellaneous Amendments

As discussed in Section II.E of the Proposal, the Commission proposed three miscellaneous amendments to:

- Make conforming amendments throughout Rule 2–01 to replace references to ''concurring partner'' with the term ''Engagement Quality Reviewer'' to be consistent with current auditing standards that use the term ''Engagement Quality Reviewer'' or

[225] *See* Section II.A.2.c.

[226] *See* The International Code of Ethics for Professional Accountants (including International Independence Standards), section titled, ''Mergers and Acquisitions'' under, ''Part 4A-Independence for Audit and Review Engagements'' available at *https://www.ifac.org/system/files/publications/files/Final-Pronouncement-The-Restructured-Code_0.pdf*.

''Engagement Quality Control Reviewer;''

- Convert the existing Preliminary Note to § 210.2–01 into introductory text to Rule 2–01, consistent with **Federal Register** drafting requirements; and
- Delete the outdated transition provisions in existing Rule 2–01(e), which were added as part of the Commission's 2003 amendments [227] to address the existence of relationships and arrangements that predated those amendments.

2. Comments Received

Commenters that addressed this aspect of the proposal supported the proposed miscellaneous amendments.[228] No commenters expressed opposition to any of the three proposed miscellaneous amendments. Related to our technical amendment to re-designate the Preliminary Note to § 210.2–01, one commenter requested we repeat at the adopting stage our discussion in the Proposing Release that the amendment does not affect the application of the auditor independence rules.[229]

3. Final Amendments

We are adopting the three miscellaneous amendments as proposed. As noted in the Proposing Release,[230] the final amendment to convert the existing Preliminary Note to § 210.2–01 into introductory text does not affect the application of the auditor independence rules and is simply a change in rule text format.

F. Other Comments Received

Several commenters requested that the Commission collaborate with the PCAOB to evaluate and update the PCAOB independence rules and standards in light of the proposed amendments if the proposed amendments are adopted.[231] For example, PCAOB Rule 3500T provides that registered public accounting firms must comply with the more restrictive independence rule if there are differences between the SEC and PCAOB independence rules. As a result of the final amendments, there will be differences between the SEC and PCAOB independence rules. The PCAOB has publicly disclosed a plan to conform its independence rules in response to the final amendments.[232]

G. Transition

Auditors currently subject to the independence requirements of Rule 2–01 are not required to apply the final amendments until June 9, 2021 in order to have sufficient time to develop and implement processes and controls based on the final amendments. Voluntary early compliance is permitted after the amendments are published in the **Federal Register** in advance of the effective date provided that the final amendments are applied in their entirety from the date of early compliance.[233]

Compliance with the final amendments is required on a prospective basis from the earlier of the effective date or early compliance date if selected by an audit firm. Auditors are not permitted to retroactively apply the final amendments to relationships and services in existence prior to the effective date or the early compliance date if selected by an audit firm. Regarding the final amendments in Rule 2–01(c)(1)(ii)(A) and (E) and loans that were originated before the effective date or the early compliance date, but that comply with the conditions of the final amendments as of the effective date or early compliance date, an auditor may rely on the final amendments; such loans would not be considered independence violations provided the conditions for excepting such loans continue to be met.

III. Other Matters

If any of the provisions of these amendments, or the application of these provisions to any person or circumstance, is held to be invalid, such invalidity shall not affect other provisions or application of such provisions to other persons or circumstances that can be given effect without the invalid provision or application. Pursuant to the Congressional Review Act,[234] the Office of Information and Regulatory Affairs has designated these amendments as [not] a ''major rule,'' as defined by 5 U.S.C. 804(2).

IV. Economic Analysis

A. Introduction

We are adopting amendments to the auditor independence requirements in Rule 2–01 that will: (1) Amend the definition of an affiliate of the audit client to address certain affiliate relationships in common control scenarios and the ICC definition; (2) shorten the look-back period for domestic first-time filers in assessing compliance with the independence requirements; (3) add certain student loans and de minimis consumer loans to the categorical exclusions from independence-impairing lending relationships; (4) replace the reference to ''substantial stockholders'' in the Business Relationships Rule with the concept of beneficial owners with significant influence; (5) introduce a transition framework for merger and acquisition transactions to consider whether an auditor's independence is impaired; and (6) make certain miscellaneous amendments.

We are mindful of the costs and benefits of the final amendments. The discussion below addresses the potential economic effects of the final amendments, including the likely benefits and costs, as well as the likely effects on efficiency, competition, and capital formation.[235]

We note that, where possible, we have attempted to quantify the benefits, costs, and effects on efficiency, competition, and capital formation expected to result from the final amendments. In many cases, however, we are unable to quantify the economic effects because we lack information necessary to provide a reasonable estimate. For example, we are unable to quantify, with precision, the costs to auditors and audit clients of complying with the particular aspects of the auditor independence rules and the potential compliance cost savings, increase in the number of eligible auditors and potential clients, and changes in audit

[233] To the extent that auditors or audit clients have questions about application of the rules in connection with early compliance, they may contact staff in the Office of the Chief Accountant for additional transition guidance.

[234] 5 U.S.C. 801 *et seq.*

[235] Section 2(b) of the Securities Act [15 U.S.C. 77b(b)], Section 3(f) of the Exchange Act [17 U.S.C. 78c(f)], Section 2(c) of the Investment Company Act [15 U.S.C. 80a–2(c)], and Section 202(c) of the Investment Advisers Act [15 U.S.C. 80b–2(c)] require the Commission, when engaging in rulemaking where it is required to consider or determine whether an action is necessary or appropriate in the public interest, to consider, in addition to the protection of investors, whether the action will promote efficiency, competition, and capital formation. Further, Section 23(a)(2) of the Exchange Act [17 U.S.C. 78w(a)(2)] requires the Commission, when making rules under the Exchange Act, to consider the impact that the rules would have on competition, and prohibits the Commission from adopting any rule that would impose a burden on competition not necessary or appropriate in furtherance of the Exchange Act.

quality that may arise from the amendments to Rule 2–01. In the Proposing Release, we requested data to help us quantify the economic effects of the amendments, but none of the commenters provided any data or quantitative estimates.

The remainder of the economic analysis presents the baseline, anticipated benefits and costs from the final amendments, potential effects of the amendments on efficiency, competition and capital formation, and reasonable alternatives to the amendments.

B. Baseline and Affected Parties

Under current Rule 2–01, the term ''affiliate of the audit client'' includes ''an entity that has control over the audit client or over which the audit client has control'' and entities ''under common control with the audit client, including the audit client's parents and subsidiaries.'' [236] Under this definition, affiliates of the audit client include all sister entities without regard to the materiality of the sister entity or the entity under audit to the controlling entity. The term ''affiliate of the audit client'' also includes each entity in an ICC when the audit client is part of the ICC.[237] In complex organizational structures, such as large ICCs, the requirement to identify and monitor for potential independence-impairing relationships and services currently applies to affiliated entities, including sister entities, regardless of whether the affiliated entities are material to the controlling entity. The current inclusion of sister entities that are not material to the controlling entity in the auditor independence analysis creates practical challenges and imposes compliance costs on both auditors and audit clients, especially those within complex organizational structures.

Currently, ''audit and professional engagement period'' is defined differently for first-time filers, depending on whether they are domestic issuers or FPIs.[238] Specifically, when a domestic IPO registration statement includes either two or three years of audited financial statements, the auditor of a domestic first-time filer must comply with Rule 2–01 for all audited financial statement periods included in such registration statement.[239] For FPIs, the corresponding ''audit and professional engagement period'' includes only the fiscal year immediately preceding the initial filing of the registration statement or report. As a result, domestic issuers may have a higher compliance cost relative to FPIs in applying this rule.

Pursuant to Rule 2–01(c), an accountant is not independent if the accounting firm, any covered person in the firm, or any of his or her immediate family members has any loans (including any margin loans) to or from an audit client, or certain other entities or persons related to the audit client.[240] Those loans include, among others, student loans, certain mortgage loans, and credit card balances. In addition, under current rules, a business relationship between a substantial stockholder of the audit client, among others, and the auditor or covered person would be considered independence-impairing.[241]

Certain aspects of Rule 2–01 require auditor independence compliance during the audit and professional engagement period, which may include periods before, during, and after merger and acquisition transactions.[242] As a result, certain merger and acquisition transactions could give rise to inadvertent violations of the auditor independence requirements. For example, an auditor may provide management functions to a target firm and auditing services to an acquirer prior to the occurrence of an acquisition. Consequently, the acquisition may result in an auditor independence violation that had not existed prior to the acquisition.

The amendments will update the auditor independence requirements, which will affect auditors, audit clients, and any other entity that is currently or may become an affiliate of the audit client. Other parties that may be affected by the amendments include ''covered persons'' of accounting firms and their immediate family members. As discussed further below, the amendments will affect investors indirectly.

We are not able to reasonably estimate the number of current audit engagements that will be immediately affected by the amendments as we lack relevant data about such engagements. We also do not have precise data on audit clients' ownership and control structures. With respect to the amendments relating to treatment of student loans and consumer loans, there is no data readily available to us relating to how ''covered persons'' and their immediate family members arrange their financing. Similarly, there is no readily available data to quantify the number of business relationships that audit firms have with beneficial owners of an audit client's equity securities where the beneficial owner has significant influence over the audit client. As such, we are not able to identify those auditor-client relationships that would be impacted by the amendments to the Business Relationships Rule. We therefore are not able to quantify the effects of these aspects of the amendments. In the Proposing Release, we requested data in connection with the request for comment on all aspects of the economic analysis,[243] but none of the commenters provided any data or quantitative estimates with respect to these aspects of the amendments.

We have relied on information from PCAOB Forms 2 to approximate the potential universe of auditors that will be affected by the amendments.[244] According to aggregated information from PCAOB Forms 2, as of August 3, 2020, there were 1,729 audit firms registered with the PCAOB (of which 876 are domestic audit firms, with the remaining 853 audit firms located outside the United States). According to a report provided by Audit Analytics in 2020, the four largest accounting firms audit about 73% of accelerated and large accelerated filers [245] and about 49.2% of all registrants.[246]

We estimate that approximately 6,792 issuers filing on domestic forms [247] and 849 FPIs filing on foreign forms would be affected by the amendments.[248]

[236] Rule 2–01(f)(4)(i).

[237] *See* Rule 2–01(f)(4)(iv).

[238] *See* Rule 2–01(f)(5)(iii).

[239] For example, an auditor may be excluded from consideration if the auditor provided a non-audit service (*e.g.,* management functions) to a domestic filer in the third year before the firm files the registration statement for the first time. Even though the auditor has stopped providing such service to the filer starting two years prior to the firm's filing the registration statement, under the current definition, the auditor will not qualify as ''independent'' under Rule 2–01.

[240] Rule 2–01(c)(1)(ii)(A).

[241] *See* Rule 2–01(c)(3).

[242] *See* Rule 2–01(f)(5).

[243] *See* Section III.F of the Proposing Release.

[244] All registered public accounting firms must file annual reports on Form 2 with the PCAOB. To determine the number of audit firms registered with the PCAOB, we aggregated the total number of entities who filed a Form 2 with the PCAOB.

[245] Accelerated filers and large accelerated filers are defined in Rule 12b–2 of the Exchange Act of 1934 [17 CFR 240.12b–2].

[246] *See Who Audits Public Companies-2020 Edition, available at https://blog.auditanalytics.com/who-audits-public-companies-2020-edition; see also* Daniel Hood, ''Top firms' share of public co. audits creeps up,'' Accounting Today (June 5, 2020), available at: *https://www.accountingtoday.com/news/top-firms-share-of-public-co-audits-creeps-up.*

[247] This number includes fewer than 25 foreign issuers that file on domestic forms and approximately 100 business development companies.

[248] The number of issuers that file on domestic forms is estimated as the number of unique issuers, identified by Central Index Key (CIK), that filed Forms 10–K, or an amendment thereto, with the

Continued

Among the issuers that file on domestic forms, approximately 31% are large accelerated filers, 19% are accelerated filers, and 50% are non-accelerated filers.[249] In addition, we estimate that approximately 19.1% of domestic issuers are emerging growth companies,[250] and 42.5% are smaller reporting companies.[251]

The amendment related to the ''look-back'' period for assessing independence compliance will affect future domestic first-time filers, but not future FPI first-time filers. To assess the effects of this amendment, we utilized historical data for domestic IPOs. According to Thompson Reuters' Security Data Company (''SDC'') database, there were approximately 543 domestic IPOs during the period between January 1, 2017, and December 31, 2019.

The amendment related to a transition framework for merger and acquisition transactions will affect issuers that might engage in mergers and acquisitions. To assess the overall market activity for mergers and acquisitions, we examined mergers and acquisitions data from SDC. During the period from January 1, 2017, to December 31, 2019, there were 6,057 mergers and acquisitions entered into by publicly listed U.S. firms.

The amendments to the ICC definition would potentially affect registered investment companies and unregistered funds.[252] As of September 2020, there were 2,763 registered investment companies that filed annual reports on Form N–CEN. As of July 2020, there were 10,092 mutual funds (excluding money market funds) with $19,528 billion in total net assets, 2,142 exchange traded funds (''ETFs'') organized as an open-end fund or as a share-class of an open-end fund with $3,462 billion in total net assets, 666 registered closed-end funds with $307 billion in total net assets, and 13 variable annuity separate accounts registered as management investment companies on Form N–3 with $216 billion in total net assets. There also were 420 money market funds with $3,881 billion in total net assets.[253] Also, as of July 2020, there were 99 business development companies (''BDCs'') with $58 billion in total net assets.[254]

C. Potential Costs and Benefits

1. Overall Potential Costs and Benefits

We anticipate the final amendments will benefit audit firms, audit clients, and investors in several ways. First, by revising our rules to emphasize those relationships and services that are more likely to threaten auditor objectivity and impartiality, the final amendments will reduce compliance costs for audit firms and their clients. Under the amended rules, auditors and their clients will be able to focus their resources and attention on monitoring those relationships and services that pose the greatest risk to auditor independence. This will reduce overall compliance burdens without significantly diminishing investor protections.

The final amendments also may enhance the audit process by expanding the pool of eligible auditors. The potential larger pool of eligible auditors may allow audit clients to better align audit expertise with the needs of the audit engagement, which may lead to an improvement in audit quality and financial statement quality.[255] For example, audit clients in certain industries might have more complicated or very specialized businesses that would benefit from auditors with certain expertise or experience. If the pool of potential independent auditors is restricted due to provisions under current Rule 2–01 that are the subject of the final amendments, an audit client might have to choose a non-preferred audit firm, which may not provide the desired scope or quality of audit services. Because audit quality is correlated with financial reporting quality,[256] any improved financial reporting quality resulting from the final amendments will provide additional benefits by potentially reducing information asymmetry between issuers and their investors, improving firms' liquidity, and decreasing cost of capital.[257] Investors similarly will benefit from any resulting improvement in financial reporting quality.

With a larger pool of eligible auditors, audit clients could potentially avoid costs associated with searching for a new independent auditor and related costs resulting from switching from one audit firm to another, for example, when a new sister entity gives rise to an independence-impairing relationship for the entity under audit. A larger pool of potentially qualified independent auditors may promote competition among audit firms, which may lower audit fees for comparable audit quality. Reduction in audit fees would lead to cash savings for audit clients, who could further invest those savings or return those savings to investors, all of which may accrue to the benefit of investors. However, this competitive effect may be limited because the audit

Commission during calendar year 2019. The number of foreign private issuers is estimated as the number of unique issuers, identified by CIK, that filed either Form 20–F, 40–F, or an amendment thereto, with the Commission during calendar year 2019. Of FPIs with a self-reported status, approximately 37% are large accelerated filers, 21% are accelerated filers, and 42% are non-accelerated filers. Additionally, 26% are emerging growth companies.

[249] The estimates for the percentages of smaller reporting companies, accelerated filers, large accelerated filers, and non-accelerated filers are based on data obtained by Commission staff using a computer program that analyzes SEC filings, with supplemental data from Ives Group Audit Analytics.

[250] An ''emerging growth company'' is defined as an issuer that had total annual gross revenues of less than $1.07 billion during its most recently completed fiscal year. *See* 17 CFR 230.405 and 17 CFR 240.12b–2. *See* Rule 405; Rule 12b–2; 15 U.S.C. 77b(a)(19); 15 U.S.C. 78c(a)(80); and Inflation Adjustments and Other Technical Amendments under Titles I and II of the JOBS Act, Release No. 33- 10332 (Mar. 31, 2017) [82 FR 17545 (Apr. 12, 2017)]. We based the estimate of the percentage of emerging growth companies on whether a registrant claimed emerging growth company status, as derived from Ives Group Audit Analytics data as of December 2019.

[251] ''Smaller reporting company'' is defined in 17 CFR 229.10(f) as an issuer that is not an investment company, an asset-backed issuer (as defined in 17 CFR 229.1101), or a majority-owned subsidiary of a parent that is not a smaller reporting company and that: (i) Had a public float of less than $250 million; or (ii) had annual revenues of less than $100 million and either: (A) No public float; or (B) a public float of less than $700 million.

[252] Based on the current reporting requirements for unregistered funds, we do not have data readily available regarding unregistered funds that would allow us to quantify the number of unregistered funds that would be affected by the final amendments. We did not receive data regarding unregistered funds from commenters.

[253] Estimates of the number of registered investment companies and their total net assets are based on a staff analysis of Form N–CEN filings as of July 8, 2020. For open-end funds that have mutual fund and ETF share classes, which only one fund sponsor currently operates, we count each type of share class as a separate fund and use data from Morningstar to determine the amount of total net assets reported on Form N–CEN attributable to the ETF share class. As money market funds generally are excluded we report their number and net assets separately from those of other mutual funds.

[254] Estimates of the number of BDCs and their net assets are based on a staff analysis of Form 10–K and Form 10–Q filings as of July 30, 2020. Our estimate includes BDCs that may be delinquent or have filed extensions for their filings, and it excludes six wholly-owned subsidiaries of other BDCs.

profession is highly concentrated [258] with the four largest audit firms auditing about 49.2% of all registrants.[259] More specifically, as noted above, the four largest audit firms audit about 73% of accelerated and large accelerated filers.[260]

Auditors also could benefit from potentially having a broader spectrum of audit clients and clients for non-audit services as a result of the final amendments. If the amendments reduce certain burdensome constraints on auditors in complying with the independence requirements, auditors likely will incur fewer compliance costs. For example, audit firms will not need to discontinue their non-audit services or switch their audit services as a result of certain client affiliations that are no longer deemed independence-impairing under the dual materiality thresholds. In addition, the final amendments potentially could reduce auditor turnover due to changes in audit clients' organizational structure arising from certain merger and acquisition activities. The final amendments also may benefit auditors that provide non-audit services, as those audit firms, under the final amendments, will be permitted to provide such services to a sister entity, so long as either the entity under audit or the sister entity is not material to the controlling entity. Similarly, under the final amendments, audit firms that currently provide non-audit services will be able to provide auditing services to sister entities under common control as long as the dual materiality thresholds are not triggered.

There also could be certain costs associated with the final amendments. For example, if the amendments increase the risk of auditors' objectivity and impartiality being threatened by relationships and services that are no longer deemed independence-impairing, audit quality could be negatively affected and investors could have less confidence in the quality of financial reporting, which could lead to less efficient investment allocations and increased cost of capital. One commenter asserted that the final amendments would undermine the credibility of auditors, with harmful effects on investor protection and capital formation.[261] We note, however, that relationships and services impacted by the final amendments remain subject to the general independence standard in Rule 2–01(b). Additionally, auditors will incur ongoing costs associated with the monitoring of potential affiliate status if they elect to rely on the final amendments to realize the associated benefits (*e.g.,* the ability to retain or acquire new engagements that were previously deemed independence-impairing). Overall, however, we do not anticipate significant costs to investors or other market participants associated with the final amendments because the amendments address those relationships and services that are less likely to threaten auditors' objectivity and impartiality.

2. Costs and Benefits of Specific Amendments

We expect the final amendments will result in benefits and costs to auditors, audit clients, and investors, and we discuss those benefits and costs qualitatively, item by item, in this section.

a. Amendments to the Definition of an Affiliate of the Audit Client and Investment Company Complex

i. Affiliate of the Audit Client

The inclusion of all sister entities regardless of materiality in the definition of affiliate of the audit client in current Rule 2–01(f)(4) creates practical challenges and imposes compliance costs on both auditors and audit clients, especially those with complex organizational structures. As it relates to the common control provision, the proposed amendment included as affiliates of the audit client sister entities that are material to the controlling entity. As discussed in Section II.A.1.a, commenters recommended further aligning the common control provision with analogous provisions of the AICPA and IESBA ethics and independence requirements, and the final amendments now include a dual materiality threshold such that a sister entity would be deemed an affiliate of the audit client only when both the entity under audit and the sister entity are material to the controlling entity. Conditioning affiliate status on the entity under audit being material to the controlling entity, and excluding sister entities that are not material to the controlling entity, likely will reduce overall compliance burdens and challenges associated with having to resolve independence violations arising from services or relationships with sister entities. Two commenters argued that relying on materiality may increase the risk of auditors performing audits when they are not objective and impartial, citing evidence that auditors' materiality judgments vary widely.[262] While we acknowledge that the use of materiality introduces judgment compared to a bright-line test, we note that the evidence presented by these commenters, on which their conclusion is based, is not directly related to materiality assessments in the context of sister entities.

As discussed in Section II.A.1.a.iii, monitoring-related compliance burdens may not be reduced. Under the current rules, an auditor needs to examine an audit client's organizational structure and identify all sister entities that will be considered affiliates on the basis of a bright-line standard. Under the final amendments, auditors, with the assistance of their audit clients, still need to understand an audit client's organizational structure to identify any affiliates of the audit client as well as monitor for changes in the structure and materiality status of those affiliates on an on-going basis.[263] Thus, auditors may incur some incremental cost related to monitoring potential affiliate status and assessing materiality. Auditors, however, would weigh whether the associated benefits (*e.g.,* the possibilities of offering new services or entering into new relationships) are worth the incremental materiality assessment and monitoring efforts. We expect an auditor would rely on the final amendments only if the benefits of using the amendments outweigh the costs involved. If an auditor decides it does not want to incur any increased monitoring-related compliance burdens, it could treat all sister entities as affiliates and avoid the effort to assess materiality.

The final amendments related to the dual materiality threshold should reduce the overall compliance related challenges associated with the existing rule. Under existing Rule 2–01(f)(4), all sister entities are deemed affiliates. Existing Rule 2–01(f)(4) creates compliance challenges that require the auditor's and the audit client's attention to resolve or that can restrict the choices of the auditor and the audit client, even when the violations or potential violations are with sister entities that are less likely to affect an auditor's objectivity and impartiality. For example, the dual materiality threshold will help avoid the costs that audit

[261] *See* letter from CFA.

[262] *See supra* note 29.

[263] As discussed in Section II.A.1.a.iii, identifying sister entities and monitoring for potential affiliate status will be important to timely address when a sister entity may become an affiliate and is important for an audit firm to appropriately consider and apply Rule 2–01(b).

clients could incur to switch auditors where an auditor provides services to or has an existing relationship with a newly acquired sister entity and either the entity under audit or sister entity is not material to the controlling entity. These cost savings could be especially pronounced for entities with complex organizational structures that have an expansive and constantly changing list of affiliates because the final amendments may significantly reduce the number of sister entities that are deemed affiliates of the audit client.

Under the current definition of affiliate of the audit client, an auditor with desired expertise may be excluded from a firm's audit engagement consideration because, for example, the auditor currently provides non-audit services to the firm's sister entity, even though neither that entity nor the firm under audit is material to the controlling entity. The exclusion of certain auditors from an audit engagement due to their relationships with or services provided to a sister entity, in this example, might lead to the audit engagement not being matched with the most qualified auditors. Such an outcome could compromise audit quality and decrease financial reporting quality, thereby imposing compliance costs on audit clients and reducing the quality of financial information investors receive. In addition, the lack of matching between auditor expertise and necessary audit procedures and considerations for a particular audit client might result in inefficiencies in the auditing processes, which likely increases the costs of audit services (*e.g.,* audit fees).

The amended definition of affiliate of the audit client may result in an expansion of the pool of qualified auditors. With an expanded pool of eligible auditors, competition among auditors might increase, thereby reducing audit fees for audit clients.[264] However, because the market for auditing services is highly concentrated, such cost savings are likely to be limited. The expanded pool of qualified auditors also might improve matching between auditor expertise and necessary audit procedures and considerations for a particular audit client, thereby improving audit efficiency and reducing audit costs.[265] Furthermore, any improvement in matching would positively influence audit quality and financial reporting quality.[266]

The final amendments are likely to benefit investors indirectly. First, investors will benefit from any improvements in financial reporting quality that may be derived from improvements in audit quality, as discussed above.[267] Better financial reporting quality helps investors make more efficient investment decisions, thereby improving market efficiency. Second, the potential reduction in audit fees from possible increased competition among auditors and improved audit efficiency might generate cash savings to audit clients, which may be deployed in a manner that benefits investors. We acknowledge, however, that potentially this competitive effect will be limited given the concentrated nature of the audit profession, as explained above.

The final amendments also include a modification to use the term ''entity under audit'' in place of the term ''audit client'' within Rules 2–01(f)(4)(i) and (ii). As discussed in Section II.A.1.a.iii, these modifications are intended to address potential confusion that may result from an application that would negate the amendments to the common control provision. This clarification could assist audit firms and audit clients in their compliance with the independence requirements.

The dual materiality threshold in the amended definition of an affiliate of the audit client might require more efforts from audit firms and audit clients to familiarize themselves with and to apply the threshold. However, given that the materiality concept is already part of the Commission's auditor independence rules,[268] and that the analogous provisions of the AICPA and IESBA for sister entities also include a dual materiality threshold, we do not expect a significant learning curve in applying the threshold or significant incremental compliance costs for auditors.

ii. Investment Company Complex

As discussed in Section II.A.1.c above, the final amendments: (1) Direct an auditor of an investment company or an investment adviser or sponsor to Rule 2–01(f)(14) (*i.e.,* the ICC definition) to identify affiliates of the audit client and focus the ICC definition on the perspective of the entity under audit; (2) include within the meaning of the term investment company, for the purposes of the ICC definition, unregistered funds; (3) amend the common control portion of the ICC definition to incorporate the dual materiality threshold included in the amended affiliate of the audit client definition; (4) add a dual materiality threshold in the control prong of the ICC definition, for portfolio companies of sister funds controlled by an investment adviser or sponsor of an investment company under audit; and (5) include within the ICC definition entities where significant influence exists between those entities and the entity under audit.

The amendments related to the ICC definition will affect the analysis used to identify entities that are considered affiliates of registered investment companies, unregistered funds, and investment advisers or sponsors that are under audit. The final rule should lead to improved clarity in the application of the ICC definition and, for the purpose of auditor independence analysis, could facilitate compliance by audit firms and the entities they audit within an ICC with the auditor independence requirements. The improved clarity under the amended definition may result in compliance cost savings that benefit audit firms and audit clients.

The economic implications of the amended common control provision within the ICC definition are largely similar to those of the analogous provision for operating companies. For example, under the current ICC definition, an investment company under audit may have a rather restricted set of independence compliant auditors due to the current common control provisions. The amended ICC definition excludes from the affiliate analysis sister entities when both the sister entities and the entity under audit are not material to the controlling entity, which potentially reduces compliance costs for an investment company under audit.

[264] *See* Paul K. Chaney, Debra C. Jeter, and Pamela E. Shaw, Client-Auditor Realignment and Restrictions on Auditor Solicitation, 72 Acct. Rev. (1997) 433. *See also* Emilie R. Feldman, A Basic Quantification of the Competitive Implications of the Demise of Arthur Andersen, 29 R. Ind. Org. (2006) 193; Michael Ettredge, Chan Li, and Susan Scholz, Audit Fees and Auditor Dismissals in the SOX Era, 21 Acct Horizon (2011) 371; Wieteke Numan and Marleen Willekens, An Empirical Test of Spatial Competition in the Audit Market, 20 J. Acct Econ. 450 (2012); and Joseph Gerakos and Chad Syverson, Competition in the Audit Market: Policy Implications, 53 J. Acct Res. 725 (2015).

[265] This could result in some crowding-out effect, as the four largest audit firms may be deemed to be independent from more clients under the final amendments, thereby crowding out smaller audit firms. However, we believe that better matching between auditor specialization and their clients and the reduction in unnecessary auditor turnovers could potentially prevent any decline in audit quality and in the long run may improve audit quality.

[266] *See* Chen-Lung Chin, and Hsin-Yi Chin, Reducing Restatements with Increased Industry Expertise, 26 Cont. Acct. Res., (2009) 729; Michael Ettredge, James Heintz, Chan Li, and Susan Scholz, Auditor Realignments Accompanying Implementation of SOX 404 ICFR Reporting Requirements, 25 Acct Horizon (2011) 17; and Jacob Z. [267] *See supra* note 255.

[268] *See e.g.,* Rule 2–01(f)(4)(ii) and (iii).

Auditors currently engaging in relationships with or providing services to entities within an ICC that are independence-impairing under Rule 2–01(c) may become eligible to serve as an auditor to a different entity within the same ICC under the amended definition, including the amended common control provision. The potential expanded pool of eligible auditors could help registered investment companies and unregistered funds hire (and retain) auditors who have more relevant industry expertise, which could lead to better financial reporting for investment companies. Better financial reporting quality, in turn, would benefit investors in registered investment companies and unregistered funds by allowing them to make more informed investment decisions. With an expanded pool of eligible auditors, competition among auditors might increase, thereby reducing audit fees for audit clients for comparable audit quality, though potentially this competitive effect will be limited given the market concentration discussed above.

With respect to the amendments that include unregistered funds within the meaning of the term investment company for purposes of the ICC definition,[269] we believe the amendments provide a useful update to the ICC definition that was initially adopted in 2000. Specifically, we believe the final amendments provide clarity for unregistered funds, their investment advisers or sponsors, and their auditors. In addition, defining an investment company to include unregistered funds will promote consistency in the application of Rule 2–01 to registered investment companies and unregistered funds so that these two types of audit clients, which share some similar characteristics, will not be subject to disparate application of the independence rules.

We do not anticipate significant incremental costs associated with the final amendments to the ICC definition for registered investment companies, unregistered funds, investment advisers or sponsors, or their auditors as well as investment company investors. The amendments may require additional efforts from audit firms and the entities they audit within an ICC to become familiar with the application of the amended ICC definition. This may potentially lead to an initial increase in compliance costs. However, the amendments would improve the clarity of the ICC definition and therefore likely would decrease overall compliance costs after affected parties adjust to the amended definition.

The materiality test that we are adopting is already part of the Commission's auditor independence rules [270] and also is aligned with the final common control prong of the affiliate of the audit client definition. Consistent with our discussion in the preceding section, we do not expect a significant learning curve in applying the dual materiality threshold or significant incremental compliance costs for auditors or their audit clients.

As with auditors of operating companies, auditors of investment companies or investment advisers or sponsors will be required to consider significant influence when identifying affiliates of the audit client. We do not expect any significant economic effects associated with adding the ''significant influence'' provision [271] to the amended ICC definition. As discussed in Section II.A.1.c.iii above, audit clients and auditors should already be familiar with this concept as a result of the application of existing Rule 2–01(f)(4)(ii) and (iii).

b. Amendment to the Definition of Audit and Professional Engagement Period

Currently, the term ''audit and professional engagement period'' is defined differently for domestic first-time filers and FPI first-time filers.[272] A domestic IPO registration statement must include either two or three years of audited financial statements, and auditors of domestic first-time filers need to comply with Rule 2–01 for all audited financial statement periods included in the registration statement.[273] This may result in certain inefficiencies in the IPO process for domestic filers, such as the need to delay the offering or switch to a different auditor to comply with independence requirements. In comparison, for FPIs, the corresponding ''audit and professional engagement period'' includes only the fiscal year immediately preceding the initial filing of the registration statement or report. As a consequence, the current definition of the ''audit and professional engagement period'' creates disparate application of the independence requirements between domestic issuers and FPIs. To address this disparate treatment, we are amending the definition such that the one-year look-back provision applies to all first-time filers, domestic and foreign.

The final amendment to the definition of ''audit and professional engagement period'' will require domestic first-time filers to assess auditor independence over a shortened look-back period (*i.e.,* a single immediate preceding year). As a result, this amendment could help domestic firms avoid the compliance costs associated with switching auditors or delaying the filing of an initial registration statement when there is an independence-impairing relationship or service in earlier years. In this way, shortening the look-back period may promote efficiency and facilitate capital formation.

This amendment might also expand the pool of eligible auditors for domestic first-time filers. The potential increase in the number of eligible auditors for these filers could foster competition among eligible auditors and thus reduce the cost of audit services.[274] Specifically, where an audit client is looking to change auditors in connection with an IPO, an audit client would be able to select from a broader group of auditors to perform audit services, even if there were independence-impairing services or relationships in the second or third year prior to the filing of the initial registration statement. However, the audit profession is already highly concentrated, especially with respect to IPOs.[275] Consequently, any such benefit may not be significant. The expanded pool of qualified auditors also could allow the first-time domestic filers to better match auditor expertise to audit engagements. We anticipate that the improved alignment between auditor expertise and audit engagement likely will positively influence audit and financial reporting quality, thereby benefiting investors and improving market efficiency.[276]

The change in the look-back period for domestic first-time filers might lead to some financial statements in early years being audited by auditors that do not meet the Commission's current independence requirements, thus potentially compromising the integrity

[276] *See supra* note 255 and accompanying text.

and reliability of financial reporting information related to the earlier second and third years, if included in the first filing. However, this potential adverse effect would be mitigated by the requirement for these auditors to meet applicable independence requirements—such as AICPA independence requirements—for the audits of these periods and by the application of the general independence standard in Rule 2–01(b) to the relationships and services in those earlier years. In addition, there are often, if not always, internal and external governance mechanisms (*e.g.,* audit committees and underwriters) in place at first-time filers, and auditors are subject to heightened litigation risk around IPOs.[277]

c. Amendments to Loans or Debtor-Creditor Relationships

Currently, Rule 2–01 prohibits certain loans/debtor-creditor relationships and other financial interests with a few exceptions.[278] As discussed in Sections II.B.1 and 3, the final amendments will address two types of loans that are less likely to threaten an auditor's objectivity and impartiality by making the following changes: (1) Include, as part of the exceptions, student loans for a covered person and his/her immediate family members as long as the loan was obtained while the covered person was not a covered person; and (2) amend the Credit Card Rule to refer instead to ''consumer loans'' in order to except personal consumption loans such as retail installment loans, cell phone installment plans, and home improvement loans that are not secured by a mortgage on a primary residence.

The amendments to except certain student and consumer loans that are less likely to pose threats to auditors' objectivity or impartiality may alleviate some compliance burdens. For instance, audit firms will be able to reduce the level of monitoring for such student and consumer loans as part of their compliance program. The amendments would permit certain covered persons (including audit partners and staff) to be considered independent even when covered persons or their immediate family members have student loans or consumer loans with an audit client. The potential expansion of qualified audit partners and staff may allow audit firms to more readily identify audit partners and staff for a given audit engagement and improve matching between partner and staff experience with audit engagements. The improved alignment between partner and staff experience and audit engagements can increase audit efficiency and reduce audit costs. Such efficiency gains may transfer to audit clients in the form of reduced audit fees and audit delays.

Moreover, the better alignment between partner and staff experience and audit engagement may increase audit quality.[279] Since audit quality improvement increases financial reporting quality, this benefit likely will accrue to the overall investment community.[280] Finally, the final amendments may make it easier for covered persons and their immediate family members to obtain necessary consumer loans without having to determine if such loans are with audit clients of the accounting firm.

d. Amendments to the Business Relationships Rule

As discussed in Section II.C, the Business Relationships Rule currently refers to ''substantial stockholders'' to identify a type of ''person associated with the audit client in a decision-making capacity.'' [281] Under the current rule, a business relationship between a substantial stockholder of the audit client, among others, and the auditor or covered person would be considered independence-impairing. The final amendment will change the term ''substantial stockholders'' to ''beneficial owners (known through reasonable inquiry) of the audit client's equity securities where such beneficial owner has significant influence over the entity under audit'' to align this rule with changes recently made to the Loan Provision.[282] In a modification from the proposal, the final rule now codifies the guidance provided in the Proposing Release, which clarified that ''significant influence over the audit client'' is meant to focus on the entity under audit. Also, the final amendment clarifies that with respect to other persons in a decision-making capacity, such as officers and directors, the focus is similarly meant to be on the entity under audit. This amendment should improve compliance with the auditor independence rules by improving the clarity and reducing the complexity of application of the Business Relationships Rule.

There may be some additional compliance costs to auditors and audit clients associated with having to comply with a standard that now requires identifying beneficial owners of equity securities that have ''significant influence'' over the audit client, as opposed to identifying ''substantial stockholders.'' However, any such additional cost should be limited given that the concept of ''significant influence'' has been part of the Commission's auditor independence rules since 2000 as part of the definition of affiliate of the audit client.[283] We therefore do not expect a significant learning curve in applying the test for auditors and registrants.

e. Amendments for Inadvertent Violations for Mergers and Acquisitions

As discussed in Section II.D, certain merger and acquisition transactions can give rise to inadvertent violations of auditor independence requirements. For example, an auditor may provide non-audit services to a target firm and audit services to an acquirer prior to the occurrence of an acquisition. As a result, the acquisition may result in an auditor independence violation that had not existed prior to the acquisition. In this scenario, the auditor's objectivity and impartiality likely is not impaired.[284]

There may be compliance costs associated with the application of the current rule in that registrants might have to: (i) Delay mergers and acquisitions in order to comply with Rule 2–01; (ii) forgo such transactions altogether; or (iii) switch auditors or stop the relationships or services mid-stream, potentially resulting in costly disruptions to the registrant.

As discussed in Section II.D.3, the final amendments to Rule 2–01(e) establish a transition framework for mergers and acquisitions to address these costs. Under the amendments, auditors and their audit clients will be able to transition out of independence-impairing relationships or services in an orderly manner, subject to certain conditions. As such, the amendments likely will reduce audit clients' compliance costs in merger and acquisition transactions by reducing the uncertainty associated with incidences of inadvertent violations of auditor independence due to these corporate events.

[277] *See* Ray Ball and Lakshmana Shivakumar, Earnings Quality at Initial Public Offerings, 45, J. Acct. Econ. (2008) 324–349. *See also* Ramgopal Venkataraman, Joseph P. Weber and Michael Willenborg, Litigation Risk, Audit Quality, and Audit Fees: Evidence from Initial Public Offerings, 83 Acct Rev. (2008) 1315–1345.

[278] *See* Rule 2–01(c)(1)(ii).

[279] *See e.g.,* G. Bradley Bennett & Richard C. Hatfield, The Effect of the Social Mismatch between Staff Auditors and Client Management on the Collection of Audit Evidence, 88 Acct. Rev. (2013) 31–50.

[280] *See supra* note 255 and accompanying text.

[281] *See* Rule 2–01(c)(3).

[282] *See* Section II.C.4.

[283] *See e.g.,* Rule 2–01(f)(4)(ii) and (iii).

[284] *See* Section II.D.

For example, the transition framework will allow auditors and audit clients, subject to certain conditions, up to six months after the transaction effective date to terminate the independence-impairing relationships or services. As a result, this framework will help audit clients, especially those entities with complex organizational structures and those actively pursuing merger and acquisition transactions, retain an auditor that is compliant with the auditor independence requirements when they undertake mergers and acquisitions without missing out on the ideal timing for such transactions. In addition, investors may indirectly benefit from the value created through timely mergers and acquisitions and costs saved from managing inadvertent independence violations.

There may be some learning curve for auditors and audit clients as they adapt to the transition framework. However, given that the framework follows the consideration of the audit firm's quality controls similar to existing Rule 2–01(d), we do not expect a significant learning curve in applying the framework for auditors and audit clients. The framework does not alter the independence requirements for entities involved in mergers and acquisitions *per se;* rather, the framework offers a more practical approach to, and timeline for, addressing inadvertent independence violations as a result of merger and acquisition transactions. Thus, we do not anticipate significant compliance costs associated with this amendment.

D. Effects on Efficiency, Competition, and Capital Formation

We believe that the final amendments likely will improve the practical application of Rule 2–01, enhance efficiency of rule implementation, reduce compliance burdens, and increase competition among auditors. They also may facilitate capital formation.

One commenter questioned our conclusion and argued that the final amendments would undermine the credibility of auditors and have harmful effects on capital formation.[285] We disagree with the commenter's assessment. The final amendments to Rule 2–01 aim to reduce or remove certain practical challenges associated with the auditor independence analysis by focusing the analysis on those relationships and services that are more likely to pose a threat to an auditor's objectivity and impartiality. The amendments are expected to expand the pool of auditors and covered persons eligible to undertake audit engagements. As a result, audit clients should have more options for audit services and audit costs may decrease for comparable audit quality. The potential expansion of eligible auditors may also lead to better alignment between the audit client's needs and the auditor's expertise. The improved alignment between auditor expertise and audit client needs should enable auditors to perform audit services more efficiently and effectively, thus potentially reducing audit fees and increasing audit quality over the long term.

Under the final amendments, certain relationships and services between an auditor and an audit client that are currently deemed independence-impairing but are unlikely to threaten auditor objectivity and impartiality will no longer be deemed independence-impairing (subject to the general independence standard in Rule 2–01(b)), thus allowing auditors and audit clients to focus on those relationships and services that are more likely to threaten the auditor's objectivity and impartiality. To the extent that the amendments may reduce the amount of audit client or audit committee attention spent on independence questions when objectivity and impartiality is not at issue, the quality of financial reporting is likely to improve, thus allowing audit committees to focus on their other responsibilities. Furthermore, we expect that improved identification of threats to auditor independence would increase investor confidence about the quality and accuracy of the information reported. Reduced uncertainty about the quality and accuracy of financial reporting should attract capital and thus reduce the cost of capital, facilitate capital formation, and improve overall market efficiency.[286]

Under the final amendments, we expect some accounting firms to become eligible to provide audit services to new audit clients that were previously deemed independence-impairing under existing Rule 2–01. If the larger accounting firms are currently engaged in non-audit relationships with and providing services to potential audit clients that preclude such accounting firms from serving as the auditor under existing Rule 2–01, then these firms are more likely to be positively affected by the final amendments. In particular, these accounting firms may be able to compete for or retain a larger pool of audit clients. At the same time, the larger accounting firms' potentially increased ability to compete for audit clients could potentially crowd out the audit business of smaller audit firms. However, we estimate that the four largest accounting firms already perform 49.2% of audits for all registrants (or about 73% of accelerated and large accelerated filers) and more than 80% in the registered investment company space.[287] As a result, we do not expect any potential change in the competitive dynamics among accounting firms to be significant.

E. Alternatives

We considered certain alternative approaches to the final amendments, which we summarize below.

As an alternative to the dual materiality threshold for the definition of affiliate of the audit client that we are adopting, we could have adopted the single materiality threshold that was proposed in the Proposing Release. Under such an alternative, a sister entity would be deemed an affiliate of the audit client unless the entity is not material to the controlling entity, and there would be no materiality qualifier with respect to the entity under audit. Such an alternative, however, would introduce costs for both auditors and audit clients' sister entities relative to the final amendments when the entity under audit is not material to the controlling entity. For example, an auditor would not be allowed to provide certain services to sister entities even though its services with those entities would generally not threaten the auditor's objectivity and impartiality. One commenter argued that such an alternative would increase the burden on private equity firms by requiring more time and resources to monitor the ''continuously evolving universe of entities that the private firm would need to address.'' [288]

An alternative approach to the amendments to the definition of ''audit and professional engagement period'' would be to increase the look-back period for FPI first-time filers to align with the current requirement for domestic first-time filers. While this

[285] *See* letter from CFA.

[286] *See supra* note 255. *See also* Nilabhra Bhattacharya, Frank Ecker, Per Olsson, and Katherine Schipper, Direct and Mediated Associations among Earnings Quality, Information Asymmetry and the Cost of Equity, 87, Acct Rev. (2012) 449–482; and Shuai Ma. Economic Links and the Spillover Effect of Earnings Quality on Market Risk. 92 Acct Rev. (2017). 213–245.

[287] *See supra* note 246. Also, as of December 2018, there were approximately 12,577 fund series, with total net assets of $23 trillion that are covered by Morningstar Direct with identified accounting firms. There were 23 accounting firms performing audits for these investment companies. The market for these audit services was highly concentrated, as 86% of the funds were audited by the four largest accounting firms.

[288] *See* letter from AIC.

alternative would help level the playing field for both domestic and FPI first-time filers, similar to the final amendment to shorten the look-back period for a first-time domestic filer, and reduce the likelihood of potential independence-impairing relationships and services, it would increase compliance burdens for FPI first-time issuers and thus may reduce the incentives for the FPI first-time filers to list in the United States, thereby impeding capital formation and limiting investment opportunities for U.S. investors. As discussed above, we believe services or relationships that ended prior to the start of the most recently completed fiscal year are less likely to threaten an auditor's objectivity and impartiality. We do not, therefore, believe that lengthening the look-back period for FPIs would enhance investor protection in a manner that would justify an associated increase in compliance costs and a potential negative impact on capital formation.

An alternative to the complete exclusion of student loans of the covered person would be a bright-line test in which, if the percentage of the aggregate amount of the student loans of a covered person and his or her immediate family members to the total wealth of the covered person's family is below a certain threshold, then all of the students loans would be excluded from the prohibition. This alternative has the advantage of taking into consideration the importance of the student loans to the covered person's financial interests. However, this alternative, because it is a bright-line test, may lead to over-identifying or under-identifying scenarios where the auditor's objectivity and impartiality are deemed impaired, especially in cases close to the selected percentage threshold. In addition, this alternative could present operational and privacy challenges in calculating and monitoring changes to a family's total wealth.

An alternative with respect to the exclusion for consumer loans would be to increase the outstanding balance limit, currently set at $10,000. For example, several commenters suggested inflationary adjustments to the outstanding balance limit to make it as high as $20,000 or $25,000.[289] Such an increase would make it easier for covered persons to meet the requirements of the rule, and thus benefit audit clients by making it easier for them to find an auditor. Such an alternative, however, also would allow a covered person to have a significant amount of outstanding consumer loan(s) with an audit client, increasing the risk to the auditor's objectivity and impartiality and potentially negatively affecting investor protection.

Finally, the transition framework for merger and acquisition transactions includes a provision that, subject to certain conditions, allows affected auditors and audit clients to address independence-impairing relationships or services promptly, but in no event more than six months, following the effective date of the transaction. An alternative approach would be to require the independence-impairing relationship or service to be addressed within six months following the merger or acquisition announcement. A benefit of this alternative approach would be the improved timeliness of auditor compliance following merger and acquisition transactions. Under this alternative, auditors and registrants would assess independence immediately following the announcement that a definite agreement has been reached. However, some mergers and acquisitions take a long time to be completed and a substantial portion of such transactions never reach completion. As a result, an alternative window of six months following announcement of the merger or acquisition may unnecessarily increase compliance burdens and associated costs (*e.g.,* switching costs) for both affected companies and their auditors when such transactions are delayed or never successfully completed. A commenter suggested another alternative with respect to merger and acquisition transactions: To require the relationship or service triggering the inadvertent violation to be terminated before the merger or acquisition is effective.[290] Requiring termination prior to the merger and acquisition transaction, however, would generate significant costs for the auditor and the audit client, including search costs for finding a new auditor and disruption to valuable relationships and services for the company.

V. Paperwork Reduction Act

The final amendments do not impose any new ''collections of information'' within the meaning of the Paperwork Reduction Act of 1995 (''PRA''),[291] nor do they create any new filing, reporting, recordkeeping, or disclosure requirements. Accordingly, we are not submitting the final amendments to the Office of Management and Budget for review in accordance with the PRA.[292] In the Proposing Release, the Commission asked about the conclusion that the amendments would not impose any new collections of information. We did not receive any comments in response.

VI. Final Regulatory Flexibility Act Analysis

The Regulatory Flexibility Act (''RFA'')[293] requires the Commission, in promulgating rules under section 553 of the Administrative Procedure Act,[294] to consider the impact of those rules on small entities. We have prepared this Final Regulatory Flexibility Analysis (''FRFA'') in accordance with Section 604 of the RFA.[295] This FRFA relates to final amendments to Rule 2–01 of Regulation S–X. An Initial Regulatory Flexibility Analysis (''IRFA'') was prepared in accordance with the RFA and was included in the Proposing Release.

A. Need for, and Objectives of, the Final Amendments

As discussed above, the primary reason for, and objective of, the final amendments is to update certain provisions within the Commission's auditor independence requirements to more effectively focus the analysis under Rule 2–01 on those relationships or services that are more likely to pose threats to an auditor's objectivity and impartiality. Specifically, the final amendments:

- Amend the definitions of affiliate of the audit client and ICC to address certain affiliate relationships;
- Shorten the look-back period for domestic first-time filers in assessing compliance with the independence requirements;
- Add certain student loans and de minimis consumer loans to the categorical exclusions from independence-impairing lending relationships;
- Replace the reference to ''substantial stockholders'' in the Business Relationships Rule with the concept of beneficial owners with significant influence;
- Introduce a transition framework for merger and acquisition transactions to consider whether an auditor's independence is impaired; and
- Make certain other miscellaneous updates.

The reasons for, and objectives of, the final amendments are discussed in more detail in Sections I and II above.

[294] 5 U.S.C. 553.

[295] 5 U.S.C. 604.

B. Significant Issues Raised by Public Comment

In the Proposing Release, we requested comments on the IRFA. In particular, we requested comments on the number of small entities that would be subject to the proposed amendments to Rule 2–01 of Regulation S–X and the existence or nature of the potential impact of the proposed amendments on small entities discussed in the analysis. In addition, we requested comments regarding how to quantify the impact of the proposed amendments and alternatives that would accomplish our stated objectives while minimizing any significant adverse impact on small entities. We also requested that commenters describe the nature of any effects on small entities subject to the proposed amendments to Rule 2–01 of Regulation S–X and provide empirical data to support the nature and extent of such effects. Furthermore, we requested comment on the number of accounting firms with revenue under $20.5 million. We did not receive comments regarding the impact of the proposal on small entities.

C. Small Entities Subject to the Proposed Rules

The final amendments will affect small entities that file registration statements under the Securities Act, the Exchange Act, and the Investment Company Act and periodic reports, proxy and information statements, or other reports under the Exchange Act or the Investment Company Act, as well as smaller registered investment advisers and smaller accounting firms. The RFA defines ''small entity'' to mean ''small business,'' ''small organization,'' or ''small governmental jurisdiction.'' [296] The Commission's rules define ''small business'' and ''small organization'' for purposes of the Regulatory Flexibility Act for each of the types of entities regulated by the Commission. Title 17 CFR 230.157 and 17 CFR 240.0–10(a) define an issuer, other than an investment company, to be a ''small business'' or ''small organization'' if it had total assets of $5 million or less on the last day of its most recent fiscal year. We estimate that, as of December 31, 2019, there are approximately 1,056 issuers, other than registered investment companies, that may be small entities subject to the final amendments.[297] The final amendments will affect small entities that have a class of securities that are registered under Section 12 of the Exchange Act or that are required to file reports under Section 15(d) of the Exchange Act. In addition, the final amendments will affect small entities that file, or have filed, a registration statement that has not yet become effective under the Securities Act and that has not been withdrawn.

An investment company is considered to be a ''small business'' for purposes of the RFA, if it, together with other investment companies in the same group of related investment companies, has net assets of $50 million or less at the end of the most recent fiscal year.[298] We estimate that, as of June 2020, approximately 39 registered open-end mutual funds, 8 registered ETFs, 26 registered closed-end funds, and 12 BDCs are small entities.[299]

For purposes of the RFA, an investment adviser is a small entity if it:

(1) Has assets under management having a total value of less than $25 million;

(2) Did not have total assets of $5 million or more on the last day of the most recent fiscal year; and

(3) Does not control, is not controlled by, and is not under common control with another investment adviser that has assets under management of $25 million or more, or any person (other than a natural person) that had total assets of $5 million or more on the last day of its most recent fiscal year.[300] We estimate, as of June 30, 2020, that there are approximately 524 investment advisers that would be subject to the final amendments that may be considered small entities.[301]

For purposes of the RFA, a broker-dealer is considered to be a ''small business'' if its total capital (net worth plus subordinated liabilities) is less than $500,000 on the date in the prior fiscal year as of which its audited financial statements were prepared pursuant to 17 CFR 240.17a–5(d) under the Exchange Act, or, if not required to file such statements, a broker-dealer with total capital (net worth plus subordinated liabilities) of less than $500,000 on the last day of the preceding fiscal year (or in the time that it has been in business, if shorter); and that is not affiliated with any person (other than a natural person) that is not a small business or small organization.[302] As of June 30, 2020, we estimate that there are approximately 852 small entity broker-dealers that will be subject to the final amendments.[303]

Our rules do not define ''small business'' or ''small organization'' for purposes of accounting firms. The Small Business Administration (SBA) defines ''small business,'' for purposes of accounting firms, as those with under $20.5 million in annual revenues.[304] We have limited data indicating revenues for accounting firms, and we cannot estimate the number of firms with less than $20.5 million in annual revenues. As noted in the preceding section, we also did not receive any data from commenters that would enable us to make such an estimate.

D. Projected Reporting, Recordkeeping and Other Compliance Requirements

The final amendments will not impose any reporting, recordkeeping, or disclosure requirements. The final amendments will impose new compliance requirements with respect to Rule 2–01.

With respect to the final amendments related to student loans, consumer loans, and the definition of the audit and engagement period for first-time filers, we believe these amendments are less burdensome than the current requirements and will not increase costs for smaller entities, including smaller accounting firms. With respect to the final amendments to the definitions of affiliate of the audit client and ICC, these amendments will reduce the number of entities that are deemed affiliates of the audit client. As such, any additional compliance effort related to the revised definitions (such as the need to monitor the materiality of entities under common control) will be offset by the less burdensome nature of the amended definitions as compared to the current definitions.

With respect to the final amendment adding a merger and acquisition transition framework, small entities, including smaller accounting firms, will incur a new compliance burden only if an auditor and its client seek to avail themselves of the framework. As such, any additional compliance effort will be

[296] 5 U.S.C. 601(6).

[297] This estimate is based on staff analysis of issuers, excluding co-registrants, with EDGAR filings on Forms 10–K, 20–F and 40–F, or amendments thereto, filed during the calendar year of January 1, 2019, to December 31, 2019. The analysis is based on data from XBRL filings, Compustat, and Ives Group Audit Analytics.

[298] 17 CFR 270.0–10(a).

[299] This estimate is based on staff analysis of data obtained from Morningstar Direct as well as data reported to the Commission for the period ending June 30, 2020.

[300] 17 CFR 275.0–7.

[301] This estimate is based on SEC registered investment adviser responses to Item 12 of Form ADV.

[302] 17 CFR 240.0–10(c).

[303] This estimate is based on staff analysis of the most recent information available, as provided in Form X–17A–5 Financial and Operational Combined Uniform Single Reports filed pursuant to Section 17 of the Exchange Act and Rule 17a–5 thereunder.

[304] 13 CFR 121.201 and North American Industry Classification System (NAICS) code 541211. The SBA calculates ''annual receipts'' as all revenue. *See* 13 CFR 121.104.

offset in any circumstance where relationships and services prohibited under the current rule will be deemed not to impair independence under the final amendments. Overall, the adopted transition framework provides a more practical approach to, and timeline for, addressing inadvertent independence violations that arise solely due to merger or acquisition transactions and reduces some of the cost associated with such inadvertent violations.

Regarding the final amendment to the Business Relationships Rule to replace the reference to ''substantial stockholders'' with the concept of beneficial owners with significant influence, the concept of ''significant influence'' already exists in other parts of the auditor independence rules, including the recently amended Loan Provision.[305] As such, we believe that affected entities will likely be able to leverage existing practices, processes, or controls to comply with the final amendments compared to having separate compliance requirements by retaining the reference to the substantial stockholder.

Compliance with the final amendments will require the use of professional skills, including accounting and legal skills. The final amendments are discussed in detail in Section II above. We discuss the economic impact, including the estimated costs, of the final amendments in Section III (Economic Analysis) above.

E. Agency Action To Minimize Effect on Small Entities

The RFA directs us to consider alternatives that would accomplish our stated objectives while minimizing any significant adverse impacts on small entities. Accordingly, we considered the following alternatives:

- Establishing different compliance or reporting requirements that take into account the resources available to small entities;
- Clarifying, consolidating, or simplifying compliance and reporting requirements under the rules for small entities;
- Using performance rather than design standards; and
- Exempting small entities from all or part of the requirements.

In connection with the final amendments to Rule 2–01, we do not think it feasible or appropriate to establish different compliance or reporting requirements or timetables for small entities. The final amendments are designed to address compliance challenges for both large and small audit clients and audit firms, including smaller accounting firms. With respect to clarification, consolidation, or simplification of compliance and reporting requirements for small entities, the final amendments do not contain any new reporting requirements.

Some of the final amendments, such as establishing a dual materiality threshold for the common control provision in the affiliate of the audit client definition, amending the ICC definition, and incorporating the concept of ''significant influence'' into the Business Relationships Rule, will create new compliance requirements. However, the amendments to the affiliate of the audit client and the ICC definitions are less burdensome in nature when compared to the existing rules, and the amendment to the Business Relationships Rule will help with compliance by using a consistent concept that is defined and understood. These amendments are meant to better identify those relationships and services that are more likely to impair an auditor's objectivity and impartiality, thereby resulting in fewer instances where certain relationships and services would cause the auditor to violate our independence requirements, as compared to the existing rule. The flexibility that could result from the final amendments will be applicable to all affected entities, regardless of size.

With respect to using performance rather than design standards, we note that several of the final amendments are more akin to performance standards. Rather than prescribe the specific steps necessary to apply such standards, the final amendments recognize that ''materiality'' and ''significant influence'' can be implemented using reasonable judgment to achieve the intended result. Regarding the mergers and acquisitions transition framework, the final amendments do not prescribe specific procedures or processes and instead focus on requiring the performance that would lead to the identification of potential violations and how to address such violations. We believe that the use of these standards will accommodate entities of various sizes while potentially avoiding overly burdensome methods that may be ill-suited or unnecessary given the facts and circumstances.

The final amendments are intended to update the independence rules to reflect recent feedback received from the public and the Commission's experience administering those rules since their adoption nearly two decades ago and address certain compliance challenges for audit firms and their clients, including those that are small entities. Overall, the final amendments are expected to be less burdensome in nature than the existing rule. For this reason, exempting small entities from the final amendments would increase, rather than decrease, their regulatory burden relative to larger entities. The potential benefits to be derived from the final amendments discussed in the Economic Analysis apply to small entities as well as the larger entities. As such, exempting small entities from any of the final amendments would deprive them of the intended benefits and create the potential for confusion maintaining two sets of independence requirements.

VII. Codification Update

The ''Codification of Financial Reporting Policies'' announced in Financial Reporting Release No. 1 [306] (April 15, 1982) is updated by adding at the end of Section 602, under the Financial Reporting Release Number (FR–85) assigned to this final release, the text in Sections I and II of this release.

The Codification is a separate publication of the Commission. It will not be published in the Code of Federal Regulations.

VIII. Statutory Basis

The amendments described in this release are being adopted under the authority set forth in Schedule A and Sections 7, 8, 10, and 19 of the Securities Act, Sections 3, 10A, 12, 13, 14, 17, and 23 of the Exchange Act, Sections 8, 30, 31, and 38 of the Investment Company Act of 1940, Sections 203 and 211 of the Investment Advisers Act of 1940, and Section 3(a) of the Sarbanes Oxley Act of 2002.

List of Subjects in 17 CFR Part 210

Accountants, Accounting, Banks, Banking, Employee benefit plans, Holding companies, Insurance companies, Investment companies, Oil and gas exploration, Reporting and recordkeeping requirements, Securities, Utilities.

In accordance with the foregoing, the Commission amends title 17, chapter II of the Code of Federal Regulations as follows:

[305] *See* Loan Provision Adopting Release.

[306] 47 FR 21028 (May 17, 1982).

PART 210—FORM AND CONTENT OF AND REQUIREMENTS FOR FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, INVESTMENT COMPANY ACT OF 1940, INVESTMENT ADVISERS ACT OF 1940, AND ENERGY POLICY AND CONSERVATION ACT OF 1975

■ 1. The authority citation for part 210 continues to read as follows:

Authority: 15 U.S.C. 77f, 77g, 77h, 77j, 77s, 77z–2, 77z–3, 77aa(25), 77aa(26), 77nn(25), 77nn(26), 78c, 78j–1, 78l, 78m, 78n, 78o(d), 78q, 78u–5, 78w, 78ll, 78mm, 80a–8, 80a–20, 80a–29, 80a–30, 80a–31, 80a–37(a), 80b–3, 80b–11, 7202 and 7262, and sec. 102(c), Pub. L. 112–106, 126 Stat. 310 (2012), unless otherwise noted.

■ 2. Amend § 210.2–01 by
■ a. Removing Preliminary Note to § 210.2–01;
■ b. Adding an introductory paragraph;
■ c. Revising paragraphs (c)(1)(ii)(A) introductory text;
■ d. Revising paragraphs (c)(1)(ii)(A)(*1*)(*iii*) and (*iv*);
■ e. Revising paragraph (c)(1)(ii)(A)(*1*)(*iv*);
■ f. Adding paragraph (c)(1)(ii)(A)(*1*)(*v*);
■ g. Revising paragraph (c)(1)(ii)(E);
■ h. Revising paragraph (c)(2)(iii)(B)(*2*)(*i*);
■ i. Revising paragraph (c)(2)(iii)(C)(*3*)(*i*);
■ j. Revising paragraph (c)(3);
■ k. Revising paragraph (c)(6)(i)(A)(*1*);
■ l. Revising paragraph (c)(6)(i)(B)(*1*);
■ m. Revising paragraph (e);
■ n. Revising paragraph (f)(4);
■ o. Revising paragraph (f)(5)(iii);
■ p. Revising paragraph (f)(6); and
■ q. Revising paragraph (f)(14).

The revisions and additions read as follows:

§ 210.2–01 Qualifications of accountants.

Section 210.2–01 is designed to ensure that auditors are qualified and independent of their audit clients both in fact and in appearance. Accordingly, the rule sets forth restrictions on financial, employment, and business relationships between an accountant and an audit client and restrictions on an accountant providing certain non-audit services to an audit client. Section 210.2–01(b) sets forth the general standard of auditor independence. Paragraphs (c)(1) through (c)(5) of this section reflect the application of the general standard to particular circumstances. The rule does not purport to, and the Commission could not, consider all circumstances that raise independence concerns, and these are subject to the general standard in § 210.2–01(b). In considering this standard, the Commission looks in the first instance to whether a relationship or the provision of a service: Creates a mutual or conflicting interest between the accountant and the audit client; places the accountant in the position of auditing his or her own work; results in the accountant acting as management or an employee of the audit client; or places the accountant in a position of being an advocate for the audit client. These factors are general guidance only, and their application may depend on particular facts and circumstances. For that reason, § 210.2–01(b) provides that, in determining whether an accountant is independent, the Commission will consider all relevant facts and circumstances. For the same reason, registrants and accountants are encouraged to consult with the Commission's Office of the Chief Accountant before entering into relationships, including relationships involving the provision of services that are not explicitly described in the rule.

* * * * *

(c) * * *

(1) * * *

(ii) * * *

(A) * * *

(*1*) Any loan (including any margin loan) to or from an audit client, an audit client's officers or directors that have the ability to affect decision-making at the entity under audit, or beneficial owners (known through reasonable inquiry) of the audit client's equity securities where such beneficial owner has significant influence over the entity under audit. The following loans obtained from a financial institution under its normal lending procedures, terms, and requirements are excepted from this paragraph (c)(1)(ii)(A)(*1*):

* * * * *

(*iii*) Loans fully collateralized by cash deposits at the same financial institution;

(*iv*) Mortgage loans collateralized by the borrower's primary residence provided the loans were not obtained while the covered person in the firm was a covered person; and

(*v*) Student loans provided the loans were not obtained while the covered person in the firm was a covered person.

* * * * *

(E) *Consumer loans.* Any aggregate outstanding consumer loan balance owed to a lender that is an audit client that is not reduced to $10,000 or less on a current basis taking into consideration the payment due date and any available grace period.

* * * * *

(2) * * *

(iii) * * *

(B) * * *

(*2*) * * *

(*i*) Persons, other than the lead partner and the Engagement Quality Reviewer, who provided 10 or fewer hours of audit, review, or attest services during the period covered by paragraph (c)(2)(iii)(B)(*1*) of this section;

* * * * *

(C) * * *

(*3*) * * *

(*i*) Persons, other than the lead partner and the Engagement Quality Reviewer, who provided 10 or fewer hours of audit, review, or attest services during the period covered by paragraph (c)(2)(iii)(C)(*2*) of this section;

* * * * *

(3) *Business relationships.* An accountant is not independent if, at any point during the audit and professional engagement period, the accounting firm or any covered person in the firm has any direct or material indirect business relationship with an audit client, or with persons associated with the audit client in a decision-making capacity, such as an audit client's officers or directors that have the ability to affect decision-making at the entity under audit or beneficial owners (known through reasonable inquiry) of the audit client's equity securities where such beneficial owner has significant influence over the entity under audit. The relationships described in this paragraph (c)(3) do not include a relationship in which the accounting firm or covered person in the firm provides professional services to an audit client or is a consumer in the ordinary course of business.

* * * * *

(6) * * *

(i) * * *

(A) * * *

(*1*) The services of a lead partner, as defined in paragraph (f)(7)(ii)(A) of this section, or Engagement Quality Reviewer, as defined in paragraph (f)(7)(ii)(B) of this section; for more than five consecutive years; or

* * * * *

(B) * * *

(*1*) Within the five consecutive year period following the performance of services for the maximum period permitted under paragraph (c)(6)(i)(A)(*1*) of this section, performs for that audit client the services of a lead partner, as defined in paragraph (f)(7)(ii)(A) of this section, or Engagement Quality Reviewer, as defined in paragraph (f)(7)(ii)(B) of this section, or a combination of those services; or

* * * * *

(e) *Transition provisions for mergers and acquisitions involving audit clients.*

An accounting firm's independence will not be impaired because an audit client engages in a merger or acquisition that gives rise to a relationship or service that is inconsistent with this rule, provided that:

(1) The accounting firm is in compliance with the applicable independence standards related to such services or relationships when the services or relationships originated and throughout the period in which the applicable independence standards apply;

(2) The accounting firm has or will address such services or relationships promptly under relevant circumstances as a result of the occurrence of the merger or acquisition;

(3) The accounting firm has in place a quality control system as described in paragraph (d)(3) of this section that has the following features:

(i) Procedures and controls that monitor the audit client's merger and acquisition activity to provide timely notice of a merger or acquisition; and

(ii) Procedures and controls that allow for prompt identification of such services or relationships after initial notification of a potential merger or acquisition that may trigger independence violations, but before the effective date of the transaction.

(f) * * *

(4) *Affiliate of the audit client* means:

(i) An entity that has control over the entity under audit, or over which the entity under audit has control, including the entity under audit's parents and subsidiaries;

(ii) An entity that is under common control with the entity under audit, including the entity under audit's parents and subsidiaries, when the entity and the entity under audit are each material to the controlling entity;

(iii) An entity over which the audit client has significant influence, unless the entity is not material to the audit client;

(iv) An entity that has significant influence over the audit client, unless the audit client is not material to the entity; or

(v) Each entity in the investment company complex as determined in paragraph (f)(14) of this section when the entity under audit is an investment company or investment adviser or sponsor, as those terms are defined in paragraphs (f)(14)(ii), (iii), and (iv) of this section.

(5) * * *

(iii) The ''audit and professional engagement period'' does not include periods ended prior to the first day of the last fiscal year before the issuer first filed, or was required to file, a registration statement or report with the Commission, provided there has been full compliance with applicable independence standards in all prior periods covered by any registration statement or report filed with the Commission.

(6) *Audit client* means the entity whose financial statements or other information is being audited, reviewed, or attested to and any affiliates of the audit client, other than, for purposes of paragraph (c)(1)(i) of this section, entities that are affiliates of the audit client only by virtue of paragraphs (f)(4)(iii), (f)(4)(iv), or (f)(14)(i)(E) of this section.

* * * * *

(14) *Investment company complex.* (i) ''Investment company complex'' includes:

(A) An entity under audit that is an:

(*1*) Investment company; or

(*2*) Investment adviser or sponsor;

(B) The investment adviser or sponsor of any investment company identified in paragraph (f)(14)(i)(A)(*1*) of this section;

(C) Any entity controlled by or controlling:

(1) An entity under audit identified by paragraph (f)(14)(i)(A) of this section, or

(2) An investment adviser or sponsor identified by paragraph (f)(14)(i)(B) of this section. When the entity is controlled by an investment adviser or sponsor identified by paragraph (f)(14)(i)(B), such entity is included within the investment company complex if:

(i) The entity and the entity under audit are each material to the investment adviser or sponsor identified by paragraph (f)(14)(i)(B) of this section; or

(ii) The entity is engaged in the business of providing administrative, custodial, underwriting, or transfer agent services to any entity identified by paragraphs (f)(14)(i)(A) or (B) of this section;

(D) Any entity under common control with an entity under audit identified by paragraph (f)(14)(i)(A) of this section, any investment adviser or sponsor identified by paragraph (f)(14)(i)(B) of this section, or any entity identified by paragraph (f)(14)(i)(C) of this section; if the entity:

(1) Is an investment company or an investment adviser or sponsor, when the entity and the entity under audit identified by paragraph (f)(14)(i)(A) of this section are each material to the controlling entity; or

(2) Is engaged in the business of providing administrative, custodian, underwriting, or transfer agent services to any entity identified by paragraphs (f)(14)(i)(A) and (f)(14)(i)(B) of this section;

(E) Any entity over which an entity under audit identified by paragraph (f)(14)(i)(A) of this section has significant influence, unless the entity is not material to the entity under audit identified by paragraph (f)(14)(i)(A) of this section, or any entity that has significant influence over an entity under audit identified by paragraph (f)(14)(i)(A) of this section, unless the entity under audit identified by paragraph (f)(14)(i)(A) of this section is not material to the entity that has significant influence over it; and

(F) Any investment company that has an investment adviser or sponsor included in this definition by paragraphs (f)(14)(i)(A) through (f)(14)(i)(D) of this section.

(ii) An investment company, for purposes of paragraph (f)(14) of this section, means any investment company or an entity that would be an investment company but for the exclusions provided by Section 3(c) of the Investment Company Act of 1940 (15 U.S.C. 80a–3(c)).

(iii) An investment adviser, for purposes of this definition, does not include a subadviser whose role is primarily portfolio management and is subcontracted with or overseen by another investment adviser.

(iv) Sponsor, for purposes of this definition, is an entity that establishes a unit investment trust.

Federal Railroad Administration

49 CFR Parts 218, 221, and 232

[Docket No. FRA–2018–0093, Notice No. 2]

RIN 2130–AC67

Miscellaneous Amendments to Brake System Safety Standards and Codification of Waivers

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: FRA is revising its regulations governing brake inspections, tests, and equipment. The changes include the incorporation of relief from various provisions provided in long-standing waivers related to single car air brake tests, end-of-train devices, helper service, and brake maintenance. FRA is also extending the time that freight rail equipment can be ''off-air'' before requiring a new brake inspection. In addition, FRA is making various modifications to the existing brake-related regulations to improve clarity and remove outdated or unnecessary provisions. FRA expects the revisions will benefit railroads and the public by reducing unnecessary costs, creating consistency between U.S. and Canadian regulations, and incorporating the use of newer technologies demonstrated to maintain or increase safety. The rule will reduce the overall regulatory burden on railroads.

DATES: This final rule is effective December 11, 2020.

Justification for Immediate Effective Date. FRA finds that this rule relieves current regulatory restrictions, thus in accordance with 5 U.S.C. 553(d)(1), FRA has determined it is appropriate to make the rule effective upon publication.

Incorporation by Reference. The incorporation by reference of certain publications listed in the rule is approved by the Director of the Federal Register as of December 11, 2020. The incorporation by reference of certain other publications listed in the rule was approved by the Director of the Federal Register as of December 15, 2008.

FOR FURTHER INFORMATION CONTACT: Steven Zuiderveen, Senior Safety Specialist, Motive & Power Equipment Division, Office of Technical Oversight, Federal Railroad Administration, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone: 202–493–6337); Jason Schlosberg, Senior Attorney, Office of the Chief Counsel, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone: 202–493–6032).

SUPPLEMENTARY INFORMATION:

Table of Contents for Supplementary Information

I. Executive Summary

A. Purpose of the Regulatory Action

In a letter dated July 12, 2018, which is included in the public docket to this rulemaking proceeding, the Association of American Railroads (AAR) submitted a petition for rulemaking (Petition) requesting FRA relax the requirement to conduct a Class I brake test prior to operation if a train is off-air for a period of more than four hours, by extending the off-air period to twenty-four hours. On January 15, 2020, FRA issued a Notice of Proposed Rulemaking (NPRM) responding to AAR's petition, proposing codification of existing waivers related to brake systems, and making technical amendments to reduce regulatory burdens while maintaining or improving safety. 85 FR 2494, Jan. 15, 2020. This rulemaking is a result of FRA's effort to streamline and update its regulations to reflect technological advances and lessons learned through feedback from all stakeholders. AAR submitted a separate rulemaking petition in March 2019 proposing amendments to part 232 related to the industry's development of a rail car electronic air brake slip (eABS) system. FRA will address the recommendations in that petition in a separate rulemaking proceeding in Docket No. FRA–2019–0072 (the ''eABS Rule'').

B. Summary of the Major Provisions of the Regulatory Action

In this final rule, FRA is incorporating into the regulations various long-standing waivers providing conditional exceptions to existing rules concerning air brake testing, end-of-train (EOT) devices, and helper service. FRA is also extending to 24 hours the time that freight rail equipment can be ''off-air'' before requiring a new brake inspection and is making various modifications to the existing brake-related regulations for clarity and is removing outdated or unnecessary provisions.

C. Costs and Benefits of the Regulatory Action

FRA analyzed the economic impacts of this final rule over a 10-year period, and estimated its costs, cost savings, and benefits. For the final rule, FRA estimates net cost savings of $503.0 million (using a 7% discount rate), and $594.6 million (using a 3% discount rate). The results of this analysis are displayed in the table below.

TABLE E–1—TOTAL COSTS AND COST SAVINGS OVER 10 YEARS

[2017 Dollars in millions]

Section	Present value 7%	Present value 3%	Annualized 7%	Annualized 3%
Costs: Training	(*)	(*)	(*)	(*)
Cost Savings:				
Helper Link	$3.9	$4.5	$0.6	$0.5
26–C Brake Valve	0.4	0.5	0.06	0.06
D–22 Brake Valve	1.0	1.1	0.1	0.1
24 Hours Off-air	325.6	386.2	46.4	45.3
90 CFM	1.8	2.1	0.3	0.2

TABLE E–1—TOTAL COSTS AND COST SAVINGS OVER 10 YEARS—Continued

[2017 Dollars in millions]

Section	Present value 7%	Present value 3%	Annualized 7%	Annualized 3%
Single Car Air Brake Test (SCT) 24 month	150.7	176.1	21.5	20.6
SCT 48 month	19.5	23.8	2.8	2.8
Waiver Cost Savings	0.1	0.1	0.01	0.01
Government Administrative Cost Savings	0.1	0.1	0.01	0.01
Total Cost Savings	503.0	594.6	71.6	69.7
Net Cost Savings	503.0	594.6	71.6	69.7

Note: Figures may not sum in this and subsequent tables due to rounding. Net Cost Savings = Cost Savings − Costs.
* De minimis.

This final rule generally increases flexibility for the regulated entities by codifying waivers. It does not impose any new substantive requirements. This final rule will not negatively impact safety in any aspect of railroad operations and FRA does not expect any increase in end-of-train device or brake failures as a result of this rule. As noted in the Regulatory Impact Analysis (RIA) accompanying this rule, safety may be improved due to railroad employees experiencing less risk of common injuries such as slips, trips, and falls by having to perform fewer physical inspections, which would produce positive safety benefits, though these have not been quantified.

II. Background

A. Existing Regulations

FRA regulations require the air brake systems of trains, and the air brakes of individual freight cars, to be inspected and tested in certain circumstances. The regulations provide for five primary types of brake system inspections: Class I (initial terminal inspection), Class IA (1,000-mile inspection), Class II (intermediate inspection), Class III (trainline continuity inspection), and the SCT.

A Class I air brake test, also referred to as an initial terminal inspection, is a comprehensive inspection of the brake equipment on each car in an assembled train that is required to be performed at the location where a train is originally assembled, when the consist is changed pursuant to 49 CFR 232.205(a)(2) (*e.g.,* other than by adding or removing a single car or solid block of cars, removing a defective car, or picking up multiple blocks of cars under the space or trackage constraints referenced by paragraph (b)(2)), and when a train is off-air for a defined number of hours. Class I brake tests help ensure that a train is in proper working condition and capable of traveling to its destination with minimal problems en route. A Class I brake test requires the performance of a leakage test and in-depth inspection of the brake equipment (on both sides of the freight car) to ensure that each car's brake system is properly secure, does not bind or foul, and responds by applying or releasing in accordance with a specified brake pipe pressure signal. Piston travel must also be inspected and adjusted to a specified length if found not to be within a certain range of movement.[1]

A Class IA brake test—required every 1,000 miles—includes all the same elements of a Class I test, but with less stringent piston travel requirements. The most restrictive car or block of cars in a train determines the location where Class IA tests must be performed. For example, if a train travels 500 miles from its point of origination to a location where it picks up a block of cars that has travelled 800 miles since its last Class I brake test, and the crew does not perform a Class I brake test when adding the cars, then the entire train must receive a Class IA brake test within 200 miles, even though that location is only 700 miles from the train's origination.

Class II brake tests are less detailed inspections used for cars that do not have a compliant Class I inspection record that are picked up by a train at locations other than the initial terminal of the train, and where a Class I test cannot be performed. A railroad may utilize a Class II brake test where it is physically impossible to perform safely all of the requirements of the Class I brake tests; for example, where there is insufficient room to walk along both sides of the train. The Class II brake test includes a test for excessive brake pipe leakage, charging the air brakes to within 15 pounds per square inch (psi) of working pressure, making a 20-psi reduction in the brake pipe to actuate the brake, restoring pressure to working psi, releasing all brakes, and restoring full brake pipe pressure to the rear of the train. While a railroad may perform a Class II brake test, the rule requires a Class I brake test to be performed at the next available location in the car's line of travel in order to continue operating past that point. Due to the inefficiencies of this procedure, railroads generally perform the Class I brake tests in most instances where a Class II would be permitted as an alternative.

A Class III brake test must be performed any time the brake pipe is opened on an operating train. The test includes charging the air brakes to working pressure (no less than 60 psi at rear of train), making a 20-psi reduction in the brake pipe to actuate the brake on the rear car of the train, releasing the brake, and ensuring that pressure at the rear of the train is restored.

In addition to the types of air brake tests noted above, the regulations require the brakes of individual cars to be maintained periodically and tested in certain circumstances. This test is known as an SCT and is used to validate individual air brake effectiveness. An SCT is required: At least every 8 years for new or rebuilt freight cars, at least every 5 years for all other freight cars, and any time a freight car is on a shop track or repair track, if the car has not had an SCT in the previous 12 months.

A more in-depth summary, history, and analysis of the regulations affecting Class I, Class IA, Class II, and Class III brake tests, SCTs, and the operation and testing of end-of-train devices, are provided in the FRA final rule ''Freight and other non-passenger trains and equipment; brake system safety standards; end-of-train devices,'' 66 FR 4104, Jan. 17, 2001; and two subsequent modifications to that final rule that FRA promulgated in response to petitions for reconsideration, 66 FR 39683, Aug. 1, 2001, and 67 FR 17555, Apr. 10, 2002.

[1] When a car's brakes are applied, a piston in the brake cylinder travels (*i.e.,* moves), causing the brake shoe to push against the wheel to create the braking action. Piston travel must be within specified limits to be capable of producing its designed retarding force in order for FRA to consider a car's brakes to be effective.

B. FRA Waiver Authority and Process

When the existing rules do not adequately address or apply to the use of new and novel transportation technologies, industry stakeholders have often sought waiver of those rules through FRA's authorized process under subpart C to 49 CFR part 211. 49 U.S.C. 20103 (''The Secretary [of Transportation] may waive compliance with any parts of a regulation prescribed or order issued under this chapter if the waiver is in the public interest and consistent with railroad safety.''); 49 CFR 1.89(a). Each properly filed petition for a permanent or temporary waiver of a safety rule, regulation, or standard is referred to the Safety Board for decision. 49 CFR 211.41(a). The FRA Railroad Safety Board's (Safety Board) decision is typically rendered after a notice is published in the **Federal Register** and an opportunity for public comment is provided. 49 CFR 211.41(b). If a waiver petition is granted, the Safety Board may impose conditions on the grant of relief to ensure the decision is in the public interest and consistent with railroad safety. 49 CFR 211.41(c).

Activity under a waiver of regulatory compliance may generate sufficient data and experience to support an expansion of its scope, applicability, and duration. For instance, in many cases FRA has expanded the scope of certain waivers or issued the same or similar waivers to additional applicants. FRA has also extended various waivers' expiration dates. A waiver's success and its continued expansion warrant consideration of regulatory codification. Codifying a waiver, and thereby making its exemptions and requirements universally applicable, allows the entire industry to benefit from the regulatory relief the waiver provides without incurring the costs associated with seeking a waiver.

C. Petition for Rulemaking and Review of Existing Waivers

In December 2017, AAR filed a petition for waiver, on behalf of its members, from FRA's regulation requiring a Class I brake test prior to operation if a train is off-air for a period of more than four hours, contending it is too restrictive. Docket No. FRA–2017–0130. The Safety Board denied the waiver petition, finding that there was a lack of supporting data submitted with the waiver request, and that with the appropriate data, the relief requested was more appropriately addressed through the rulemaking process. Subsequently, in a letter dated July 12, 2018—included in the public docket to this rulemaking proceeding—AAR submitted a petition for rulemaking (Petition) requesting that FRA relax the requirement to conduct a Class I brake test prior to operation if a train is off-air for a period of more than four hours, by extending the off-air period to twenty-four hours. On January 15, 2020, FRA issued an NPRM responding to AAR's petition, proposing codification of existing waivers related to brake systems, and making technical amendments to reduce regulatory burdens while maintaining or improving safety. This rulemaking is a result of FRA's effort to streamline and update its regulations to reflect technological advances and lessons learned through feedback from all stakeholders.

In this final rule, FRA is also codifying waivers of compliance from rules affecting motive power and equipment (MP&E), including the aforementioned brake inspection requirements. Specifically, FRA is implementing changes to the regulations affecting: The use of EOT devices and *Helper Link* devices or similar technologies; higher air-flow on distributed powered (DP) trains; and the performance of Class I air brake tests and SCTs. FRA is also making technical corrections to existing regulations.

The waiver subject matters considered for codification are explained further below. FRA attempted to capture and identify the dockets for all substantially similar waivers affected by this rulemaking.

There may be some substantially similar waivers not identified in the NPRM and this final rule, but still affected by this rulemaking. Each affected waiver, whether specifically referenced or not, remains in force for the time being unless it expires without extension or a direct beneficiary explicitly requests and receives termination of the waiver in accordance with part 211. FRA does not intend to terminate any waivers upon the effective date of a final rule, as it is possible that there are exceptions or conditions in some existing waivers that are not specifically codified in the final rule. Terminating waivers immediately upon the effective date of a final rule may unnecessarily complicate matters, especially considering many of the waivers will simply expire soon thereafter. If a regulated entity wishes to continue a waiver's provision not captured by this final rule beyond the expiration date of that waiver, that entity can petition the Safety Board for an extension of that provision.

D. Identified Waivers

Below is a list of waiver petition dockets, organized by subject matter, which FRA has identified as potentially being affected by this final rule. The public docket for each listed waiver may be accessed at *www.regulations.gov*.

Air Flow Method

- Extending air flow limits (49 CFR 232.205(c)(1)(ii))
  - BNSF Railway (BNSF), Canadian National Railway (CN), Canadian Pacific Railway (CP), and Union Pacific Railroad (UP) Docket No. FRA–2012–0091

End-of-Train (EOT) Device

- Power source (49 CFR 232.403(f)(2))
  - Wabtec Corporation (Wabtec), Docket No. FRA–2001–9270
  - Quantum Engineering, Inc (Quantum) (now known as Siemens Industry, Inc. (Siemens)), Docket No. FRA–2006–25794
- Calibration (49 CFR 232.409(d))
  - Wabtec, Docket No. FRA–2004–18895
  - Ritron, Inc. (Ritron), Docket No. FRA–2009–0015
  - DPS Electronics, Inc. (DPS), Docket No. FRA–2012–0096
  - Siemens, Docket No. FRA–2015–0044
- Helper service (49 CFR 232.219(c))
  - BNSF, Docket No. FRA–2006–26435
  - Montana Rail Link (MRL), Docket No. FRA–2014–0013
- Marker lamp height (49 CFR 221.13(d))
  - DPS, Docket No. FRA–2015–0023
  - Siemens, Docket No. FRA–2017–0093
- Utility employee duties (49 CFR 218.22(c)(5))
  - BNSF, Docket No. FRA–2001–10660
  - Canadian Pacific Railway (CP), Docket No. FRA–2004–17989

Single Car Test

- Update to AAR Standard S–486–18 (49 CFR 232.305(a))
  - AAR, Docket No. FRA–2018–0011
- Add AAR Standard S–4027–18 (49 CFR 232.305(a))
  - BNSF and Union Pacific Railroad (UP), Docket No. FRA–2013–0030

Automated Single Car Test

- Testing periodicity (49 CFR 232.305(b)(2))
  - BNSF and UP, Docket No. FRA–2013–0030

Brake Systems for Covered Non-Freight Operations

- Add AAR Standard S–4045–13 (49 CFR 232.717(b)(2), formerly appx B, I, § 232.17(b)(2))
  - AAR, Docket No. FRA–2013–0063

E. Incorporating by Reference New and Updated Standards Under 1 CFR 51.5

As required by 1 CFR 51.5, FRA has summarized the standards it is incorporating by reference in the section-by-section analysis to this preamble. The AAR standards summarized herein, and listed in the table directly below for convenience, are reasonably available to all interested parties for inspection. The standards can be obtained from the Association of American Railroads, 425 Third Street SW, Washington, DC 20024, telephone: (202) 639–2345, email: *publications@aar.com,* website: *https://aarpublications.com.*

AAR STANDARDS INCORPORATED BY REFERENCE IN 49 CFR PART 232

Identification No.	Title	Year or edition	Section affected in 49 CFR
S–469–01	Performance Specification for Freight Brakes	2006	§ 232.103(l).
S–486–18	Code of Air Brake System Tests for Freight Equipment	2018	§ 232.305(a).
S–4027–18	Automated Single-Car Test Equipment, Conventional Brake Equipment-Design and Performance Requirements.	2018	§ 232.305(a).
S–4045–13	Passenger Equipment Maintenance Requirements	2013	§ 232.717(e)(1).
S–4200	Electronically Controlled Pneumatic (ECP) Cable-Based Brake Systems—Performance Requirements.	2014	§ 232.603(f)(1).
S–4210	ECP Cable-Based Brake System Cable, Connectors, and Junction Boxes—Performance Specifications.	2014	§ 232.603(f)(1).
S–4230	Intratrain Communication (ITC) Specification for Cable-Based Freight Train Control System.	2014	§ 232.603(f)(1).
S–4250	Performance Requirements for ITC Controlled Cable-Based Distributed Power Systems	2014	§ 232.603(f)(1).
S–4260	ECP Brake and Wire Distributed Power Interoperability Test Procedures	2008	§ 232.603(f)(1).
N/A	2020 Field Manual of the AAR Interchange Rules	2020	§ 232.717(e)(1).

The rule text already incorporates by reference the latest versions of the following AAR standards, so no updates are currently necessary: S–4220, ECP Cable-Based Brake DC Power Supply—Performance Specification (2002); S–4240, ECP Brake Equipment—Approval Procedure (2007); and S–4270, ECP Brake System Configuration Management (2008).

F. Railroad Safety Advisory Committee (RSAC) Advice and Input

FRA received substantial advice and feedback from the RSAC on the contents of this rule prior to its initiation. FRA first established the RSAC in March 1996 under Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463) to provide a forum for stakeholder groups to provide advice and recommendations to the FRA on railroad safety matters. In April 1996, the RSAC formed the Tourist and Historic Railroads and Private Passenger Car Working Group (THRWG). Since that time, the THRWG had considered numerous issues affecting tourist and historic rail operations and in August 2013, the THRWG accepted Task No. 13–01 to consider the applicability of FRA's regulations to historical or antiquated equipment that is used only for excursion, educational, recreational, or private transportation purposes. The THRWG met in Washington, DC on April 9–10, 2014, and reviewed, among other things, the safety glazing standards (49 CFR part 223) regarding the treatment of certain equipment; regulatory treatment under the freight car safety standards (49 CFR part 215) of non-commercial freight cars over 50 years old; and the scope and application of appendix B of 49 CFR part 232 (freight power brake standards). The THRWG also identified other issues involving FRA's regulatory treatment of tourist, scenic, historic, excursion, educational or recreational rail operations or private passenger rail car operations and equipment in other chapters of title 49, which FRA anticipates will be addressed in subsequent rulemakings. On December 4, 2014, the full RSAC accepted the THRWG's report. *See* RSAC Meeting Minutes, p. 12, *https://rsac.fra.dot.gov/radcms.rsac/File/DownloadFile?id=44.* Subsequently, in a July 24, 2019, meeting the THRWG reviewed and concurred with the proposed appendix B updates, which FRA is adopting, with minor revision, as new subpart H in this final rule.

G. Comments Filed

In response to the NPRM, comments were filed by: AAR and the American Short Line and Regional Railroad Association (ASLRRA) (collectively, the ''Railroads''); the American Train Dispatchers Association, the Brotherhood of Locomotive Engineers and Trainmen (BLET), the Brotherhood of Railroad Signalmen, the Brotherhood Railway Carmen Division TCU/IAM, and the International Association of Sheet Metal, Air, Rail and Transportation Workers—Transportation Division (collectively, ''Labor''); the Transport Workers Union of America (TWU); Wabtec and New York Air Brake (collectively, the ''Suppliers''); the National Transportation Safety Board (NTSB); and various individuals.

Comments related to specific proposals in the NPRM are addressed in the section-by-section analysis below (*see* part III of this preamble). FRA addresses the more general comments received directly below.

An anonymous commenter generally contests the proposal, stating that safety regulation seems to be needed and that equipment should be placed out of service until brought up to ''these standards.'' TWU states the proposed changes would reduce the current safety standards for single car air brake tests, EOT devices, helper service, and brake maintenance and inspections. While there could be significant value in creating consistency between U.S. and Canadian regulations, and in incorporating newer safety technologies, TWU said the proposals downplay the cumulative magnitude of the changes and exclusively benefit the railroads' profit margins at the expense of safety. Labor alleged that FRA is ''cherry picking'' Canadian regulations to adopt. Labor further notes that, while FRA acknowledges its obligation to regulate ''in the public interest and consistent with railroad safety,'' the NPRM appears

(according to Labor) ''in the economic interests of the railroad and consistent with carrier convenience and higher profits.''

While there are many similarities between the Canadian and U.S. railroad regulations, and further harmonization could benefit seamless international operations, it is not necessarily optimal for the two sets of regulations to mirror each other precisely. Each country's regulators have ample opportunity to observe and study one another's experiences, and take regulatory action to implement lessons learned. This measured approach allows for greater harmonization when appropriate. While there is merit in TWU's general position that any changes should be considered in the context of related regulations, TWU did not identify any particular related regulation for consideration. Similarly, the anonymous commenter generally critiques the safety measures proposed in the NPRM, but does not identify any specific measures and does not explain how any of the proposals would result in less safe rail operations.

In response to the Labor concern that the proposed rule is in railroads' economic interest, FRA's first priority is safety. Further, this rule is based on safety data from U.S. and Canadian operations performed under regulations and longstanding FRA waivers. Labor has had multiple opportunities to provide input on these waivers and this rulemaking, has been an active participant on all test waivers, and has provided comments considered by FRA during those proceedings.

Labor also commented and requested clarification on the applicability of waivers after issuance of this final rule, questioning what relief the rule would provide if railroads are still governed by the existing waivers as indicated in the NPRM and discussed above. As noted above, the purpose of this rulemaking is to extend the relief provided by the identified waivers to the entire railroad industry. While each waiver applies only to the petitioning entity or entities in defined situations, and only for a limited duration of time, this rule applies universally and eliminates the inefficiencies and uncertainties that result from having to periodically review and renew individual existing waivers. This final rule does not supersede the associated and affected waivers. While the final rule may have provisions mirroring and redundant of certain waivers, the waivers are still active and applicable. Unless this final rule differs from a particular waiver, very little should change for each entity benefiting from that waiver. However, any relief or condition remaining in an existing waiver that has not been codified by this final rule remains in force. For instance, there may be certain local conditions or extra information in the waiver not captured by this rule. It is up to each railroad or other waiver holder to decide whether it still wants or requires a waiver (or a modification to a waiver) after the final rule becomes effective.

III. Section-by-Section Analysis

Unless otherwise noted, all section references below refer to sections in title 49 of the Code of Federal Regulations (CFR).

Amendments to 49 CFR Part 218

Section 218.22 *Utility Employee*

As stated in the 1993 final rule initially adopting § 218.22, ''Protection of Utility Employees,'' this section defines the circumstances under which a utility employee may be permitted to function as a member of a train or yard crew without the benefit of blue signal protection. 58 FR 43287, 43290, Aug. 16, 1993 (1993 final rule). FRA's blue signal regulations (found at 49 CFR part 218, subpart B) generally require that when ''workers'' are on, under, or between rolling equipment: (1) Blue signals be displayed in accordance with the requirements of part 218; and (2) the rolling equipment may not be coupled to, moved, or have equipment placed to obscure the blue signal protecting the protected track. 49 CFR 218.23. The regulations define a ''worker'' as ''any railroad employee assigned to inspect, test, repair, or service railroad rolling equipment, or their components, including brake systems,'' but specifically exclude members of train and yard crews, except when they are assigned to inspect, test, repair, or service ''railroad rolling equipment that is not part of the train or yard movement they have been called to operate.'' 49 CFR 218.5.

In the NPRM, FRA proposed two modifications to § 218.22 related to blue signal protection. First, FRA proposed to replace the incorrect reference to ''subpart D'' in paragraph (c) to reflect the correct reference to the blue signal regulations in subpart B. Second, to incorporate longstanding waivers, FRA proposed to amend the list of functions in paragraph (c)(5) that a utility employee properly attached to a train or yard crew could perform without establishing blue signal protection to include the changing of a battery on a rear-end marking or EOT device, provided the battery can be changed ''without the use of tools.'' In the NPRM, FRA also invited commenters to identify other tasks that may justify being added to the list of exceptions from the blue signal requirements in the paragraph and to address the utility and feasibility of establishing a performance-based requirement as an alternative to listing specific tasks excluded from the blue signal requirements.

FRA received no comments responding to its proposal to correct the erroneous reference to subpart D in paragraph (c). Accordingly, in this final rule, FRA is adopting this proposed amendment.

In response to FRA's request for comments on the proposed revised list of functions in paragraph (c)(5), TWU commented that ''utility employees'' are often ''different employees each day or each hour, creating confusion and raising safety concerns.'' TWU suggests that this final rule permit designation of only one utility employee ''per shift/per day'' provided they are working under the 3-point protection [2] of the train crew (currently § 218.22 permits up to three utility employees to be attached to one train or yard crew at any given time).

Labor generally asserts that exempting utility employees from blue-flag protection when replacing an EOT device's battery would create an unnecessary risk because ''[i]f the switch behind the train isn't locked and another crew is free to line the switch, they could inadvertently line a switch into the train being worked upon, exposing the utility employee to unnecessary risk.'' Labor did not, however, explain why the alleged risk associated with a utility employee replacing an EOT device's battery is any different from the risks associated with a utility employee performing any of the existing functions listed in paragraph (c)(5). In addition, Labor provided no comment on the feasibility of establishing a performance-based requirement.

The Railroads support FRA's proposal to codify the longstanding waivers permitting utility employees to replace batteries on EOT devices under § 218.22. Further, the Railroads suggest that FRA delete the ''prescriptive list'' of functions applicable to utility employees and revise the rule instead to state that a properly attached utility employee working as a train crew member can perform all functions that

[2] ''3-point protection'' is a railroad operating rule that provides protection for workers who are not required to use blue signal when fouling equipment. Exact language varies by railroad (some refer to the procedure as ''set and centered''); however, the most common steps are (1) placing the locomotive generator field switch in ''off'' position, (2) centering the reverser (*i.e.,* placing the forward/reverse control in neutral), and (3) fully applying locomotive and train brakes.

a train or yard crew member can perform. Referencing the preamble of the 1993 final rule, the Railroads assert that the list represents FRA's understanding at that time ''of all the functions train or yard crew members typically performed without blue signal protection.'' Railroads Comments at p. 2. The Railroads state that the ''use of a utility employee who is a member of a train crew is now ubiquitous across the entire industry'' and that after a utility employee properly attaches to a train or yard crew, he or she becomes a member of that train crew, functions in the same manner as a train crew member, and is a part of the constant communication that occurs between members of the train crew working as a team. The Railroads also assert that allowing a properly attached utility employee working as a train crew member to perform all functions that members of the train or yard crew can perform will ''likely improve safety by reducing unnecessary accident/incident injury exposure to railroad employees caused by the physical act of establishing blue signal protection for utility employee activities that are not on the list.''

FRA finds that the Railroads' comments may have merit and more substantial updates to § 218.22 may be justified because the section has not been updated since its initial implementation almost 30 years ago. Accordingly, FRA concludes that although a more substantial update to § 218.22 may be justified, to allow appropriate notice and comment on any such update, FRA will address both the Railroads' comments and TWU's comments on § 218.22 in a subsequent rulemaking.

FRA is, however, adopting the revision to paragraph (c)(5) as proposed in the NPRM by amending the list of functions provided in that paragraph that do not require blue signal protection to include battery change-out on rear-end marking devices or end-of-train devices without tools. As noted in the NPRM, this revision effectively incorporates two longstanding waivers granted by FRA over a decade ago and under which each Class I railroad has operated successfully, with no reports of related injuries or incidents. This successful record demonstrates that the relief provided by waiver and adopted in this final rule is safe.[3]

[3] *See* Docket No. FRA–2001–10660; Docket No. FRA–2004–17989.

Amendments to 49 CFR part 221

Section 221.13 Marking Device Display

Section 221.13 includes EOT marking device display requirements. Paragraph (d) requires each marking device's centroid to be located at a minimum of 48 inches above the top of the rail. In the NPRM, FRA proposed to revise this requirement to 40 inches above the top of the rail based on two longstanding waivers that allowed the marker height measurement to be reduced to 41 and 42 inches, respectively. *See* Docket No. FRA–2015–0023; Docket No. FRA–2017–0093.

Since FRA granted the waiver petitions, no accidents attributed to the lowered marker lamp height permitted have been reported through the FRA accident reporting system. As discussed in the NPRM, FRA proposed the change to allow the use of lighter weight and newer types of EOT devices that do not use heavy batteries. FRA expects the use of these devices, which can be mounted lower than the larger devices with heavy batteries, will improve safety by lowering the risk of injury to personnel handling the devices.[4] FRA proposed a minimum height of 40 inches above the top of the rail, so as not to interfere with the top of couplers (which are typically 38″ from the top of the rail) or other safety appliances, such as end sill handholds. FRA also proposed a minimum height of 40 inches above the top of the rail to ensure that the ergonomic advantages of the newer types of EOT devices are consistently realized (*i.e.,* to avoid employees installing or maintaining the devices having to reach high or stoop low to access the devices). In proposing this change, FRA noted that the parties to the waivers had provided data showing no discernable visibility difference up to one mile away.

TWU, Labor, and the Railroads filed comments. TWU states the change in permissible height is unnecessary and should be rejected because it is not based on any safety metric. Labor has ''no quarrel'' with any EOT weight or height, but questions the viewing distance metrics of 0.5–1.0 mile. Labor asserts that FRA should measure from at least 1.5 miles away, given the increased train lengths and the additional space need to come to a safe stop without incident. The Railroads propose allowing centroids to be as low as 36″ from the top of the rail to allow for design flexibility. According to the Railroads, the testing performed in support of the waivers at 36″ , with LED-equipped lamps, provides for adequate visibility from varying angles.

FRA notes that under its waiver, DPS performed visibility field testing of marker lights placed at heights of 48 inches and 36 inches up to 2 miles away on flat, tangent track. In addition, FRA used its own experience and testing over distances up to a mile away to test and review the visibility of marker lights. Based on this testing, the data developed through the waivers, and FRA's experience, the previous threshold height of 48 inches and the new threshold height of 40 inches each permit EOT device marker light visibility from over one mile away if there are no obstructing curves or hills. In other words, on flat, tangent track, EOT marker lights at 48 inches and 40 inches are visible from 1.5 miles away. The range of 0.5–1.0 miles was cited by FRA as, oftentimes, there can to be some vertical undulation in the track or curves that could reduce the visibility below 1.5 miles. Due to the variability of light visibility, and without any comments proposing a specific safety metric, FRA was unable to develop a more reliable methodology.

FRA notes that in its requests for waivers, the manufacturers requested that the marking device's centroid be permitted to measure 41.3″ to 44.3″ from the top of rail. FRA also notes that although data submitted in the course of the waiver proceedings generally supported a 36″ marker light height, only a 40″ height has actually been tested under the waivers. In addition, a minimum marker light height of 36″ would potentially expose the device to damage from a neighboring coupler and risks fouling other safety appliances, including end sill handholds compliant with § 231.1(i)(3)(ii). Also, the lower a marker's height, the more susceptible it is to mud spray from the track bed or to damage caused by low flying ballast rock, which may adversely affect the visibility of the marker light.

In addition to changes to permissible marker light height, FRA also sought comment on the effects of using LED bulbs and the utility and feasibility of establishing a performance-based standard in lieu of the specific height requirements of this section. While FRA received no comments on bulb types or

[4] *See* DPS, ''FRA Waiver Request—49 CFR 232.221.13(d)—Marking Device Display, p. 2, Docket No. FRA–2015–0023, dated Mar. 9, 2015 (posted Mar. 12, 2015) (''A 15 lb or less End of Train Device will enhance railroad safety for all North American Railways by reducing the risk of injuries.''); DPS, ''Incoming Waiver Extension-DPS—Marking Light Centroid 2020,'' p. 2, Docket No. FRA–2015–0023, dated April 14, 2020 (posted April 24, 2020) (''A smaller lighter End of Train Device will enhance railroad safety for all North American railroads by reducing the risk of injuries.'').

the effects of using LED bulbs, the Railroads expressed support for replacing the technical height requirement with a performance-based standard addressing minimum distance and visibility requirements, claiming markers may become obsolete as train separation technologies continue to advance. The Railroads, however, provided no meaningful suggestion for such a standard.

After considering all available waiver and testing data, and all comments received in response to the NPRM's proposal to revise paragraph (d) of § 221.13, FRA concluded that additional flexibility in marker height could be allowed without adversely affecting marker visibility. Accordingly, in this final rule, FRA is revising paragraph (d) to require the centroid of any marking device to be located above the coupler, where its visibility is not obscured and it does not interfere with an employee's access to, or use of, any other safety appliance on the car.

Appendix A to Part 221 Procedures for Approval of Rear End Marking Devices

As proposed in the NPRM, to correct typographical errors, FRA is modifying ''perscribed'' to ''prescribed'' in paragraph (a)(1)(2)(ii) and ''peformed'' to ''performed'' in paragraph (b)(3)(ii).

Amendments to 49 CFR Part 232

Section 232.1 Scope

Paragraph (b) of § 232.1 describes how the scope of Part 232 would change in phases after the January 2001 publication of the final rule that created Part 232. Paragraph (c) and the final phrase of paragraph (d) include similarly antiquated instructions. Because the dates in these paragraphs have passed and are no longer relevant, as proposed in the NPRM, FRA is removing paragraph (b)'s historical schedule, paragraph (c) in its entirety, and the final phrase in paragraph (d) providing for earlier optional compliance. FRA is also moving paragraph (d) to paragraph (c).

Section 232.5 Definitions

Section 232.5 defines certain terms as they are used in Part 232. The existing rule text refers to certain provisions of § 232.1 to account for varying effective dates and its inapplicability to appendix B. Since those dates have passed, and appendix B is being moved to Subpart H, these cross-references are no longer necessary and are therefore being deleted from the introductory paragraph of § 232.5.

In the NPRM, FRA proposed to update the definition of ''Air flow method indicator, AFM'' to clarify that the definition includes digital, as well as analog, AFM indicators, and to specify that a digital version must have markings of equivalent or finer resolution to that specified by FRA for an analog device.

FRA also proposed to add definitions for the terms ''Air repeater unit, ARU'' and ''APTA.'' FRA's proposed definition of ARU recognized that a specialized car, other rolling equipment, or containers in well cars could be used as an ARU by providing an additional brake pipe source responding to air control instructions from a controlling locomotive using a communication system such as a distributed power system. For an item to be considered an ARU under this definition, the communications must be akin to a distributed power system to ensure accurate and sufficient responses. The purpose and use of the technology, not its physical description, determines whether an item is an ARU. FRA purposefully recognizes this distinction to avoid limiting innovation and future options.

Commenters concurred with FRA's proposal to update the ''Air flow method indicator, AFM'' definition and add the new definitions for the terms ''Air repeater unit, ARU'' and ''APTA.'' Accordingly, FRA is adopting the revisions to this section as proposed.

In this final rule FRA is also adding a definition of the term ''brake pipe gradient.'' In the existing rules (*e.g.,* §§ 232.103(m) and 232.205(c)) and as discussed in the NPRM, FRA often describes the readily measured change in psi of air pressure between the front and rear of the train. This differential is often referred to as a ''brake pipe gradient'' or ''taper'' due to the shape of the graph line of the pressure as it reduces from source of air to rear of train. In certain circumstances, the brake pipe gradient also measures the pressure between additional air sources such as an ARU or distributed power unit (DPU). To ensure a common understanding of this term, FRA is defining ''Gradient, brake pipe'' in this final rule.

Section 232.11 Penalties

This section contains provisions regarding penalties. As noted in the NPRM, the section contains references to specific penalty amounts that change over time as a result of the statutory requirement to periodically update penalties for inflation. Accordingly, in the NPRM, FRA proposed to replace the references to specific penalty amounts with general references to the minimum civil monetary penalty, ordinary maximum civil monetary penalty, and aggravated maximum civil monetary penalty. FRA also proposed additional language referring readers to 49 CFR part 209, appendix A, where FRA specifies statutorily provided civil penalty amounts updated for inflation and to FRA's website (*www.fra.dot.gov)* which contains a schedule of civil penalty amounts used in connection with this part.

As the Railroads note in their comments, the *www.fra.dot.gov* website address now defaults to FRA's new website address at *www.railroads.dot.gov*. FRA has updated the regulatory text accordingly. Interested parties may check FRA's website for any future changes to its civil penalty schedules.

Section 232.17 Special Approval Procedure

In comments responding to proposed § 232.407, the Railroads asked for language permitting the use of new and innovative technologies that could enhance or replace EOT devices or their capabilities. While § 232.407 already provides for the use of an alternative technology to perform the same function, this concern is best addressed and clarified by including an opportunity for interested parties to seek and potentially receive special approval of such alternatives under § 232.17. Accordingly, FRA has included § 232.407 in the list of sections affected by § 232.17.

Section 232.103 General Requirements for All Train Brake Systems

This section sets forth general requirements for brake systems of trains and incorporates the 1999 version of AAR's ''Performance Specification for Freight Brakes'' (AAR Standard S–469–47) at § 232.103(l). In the NPRM, FRA provided a regulatory history of the applicable regulations, orders, and standards (*see* 85 FR 2494, 2499, Jan. 17, 2020) and proposed to update this reference to incorporate the presently-available version of this AAR standard. AAR Standard S–469–01 defines and prescribes requirements for power brakes and appliances for operating power brake systems. Accordingly, FRA is updating the citation to the presently available S–469, and to reflect AAR's correct address.

The Railroads submitted comments concurring with FRA's proposal to update the incorporation by reference, but encouraged amendments to the incorporation by reference regulations to provide for more timely codifications of updated industry standards. The incorporation by reference regulations,

found at 1 CFR part 51, are under the purview of the Director of the Federal Register. Because FRA has no authority to amend those regulations, we cannot address the Railroads' concerns.

Labor expressed concern under this section regarding high air flow rates and the reduction of 8 psi regarding pressure taper limits. FRA discusses those concerns below in the section-by-section discussion of § *232.205—Class I brake test-initial terminal inspection.*

Although not proposed in the NPRM, in reviewing comments to this section, FRA determined a need to revise § 232.103(m) to make clear that if a train experiences a brake pipe gradient greater than 15 psi, it must be stopped at the next available location and inspected for leaks. This is not a substantive revision, but merely conforms paragraph (m) of this section to paragraph (c) of § 232.205 to remove any confusion. As currently written, the ''15-psi gradient for trains en route'' provision in that paragraph could be read to apply only to trains tested with an AFM indicator. Such a reading, however, is incorrect and directly conflicts with § 232.205(c), which requires a train's gradient to be no more than 15 psi, regardless of whether brake pipe pressure is measured using the leakage test or with an AFM indicator. *See also* 66 FR 4104, 4169, Jan. 17, 2001 (''[T]he AFM should be permitted as an alternative on any train provided the 15-psi gradient is maintained on the train . . . The brake-pipe gradient of 15 psi has been retained for both the leakage and air flow method of train brake testing.''). Accordingly, FRA is revising § 232.103(m) to conform the ''15-psi gradient for trains en route'' provision to the corresponding provision in § 232.205(c).

Section 232.203 Training Requirements

Section 232.203 contains training requirements for operators, and for employees who perform brake system inspections, tests, or maintenance. Specifically, paragraph (c) requires railroads to adopt and comply with a training program specifically addressing the testing, operation, and maintenance of two-way EOT devices for employees who are responsible for testing, operation, and maintenance of the devices. In the NPRM, FRA expressed concern with the safety risks associated with the loss of communication events between the controlling locomotive and the EOT device. As discussed in the NPRM, radio communication between the controlling locomotive and the EOT device is critical to proper brake functioning. If communications are interrupted, an EOT device will not be able to initiate emergency braking when requested. Under existing § 232.407(g), communication between the EOT device and the controlling locomotive can be lost for up to 16 minutes and 30 seconds before the engineer is notified. If an engineer encounters a situation necessitating an emergency brake application during a loss of communication, the engineer may have to request an emergency brake application multiple times before the system responds.

Accordingly, in the NPRM, FRA sought comments on the frequency and duration of communication losses; what operational and technological solutions for communication loss the industry has considered and implemented; what should be done to ensure an emergency signal is sent and received by the system when needed even in the event of a temporary communications loss; and what has and should be done to alert the locomotive engineer that a loss of communication has occurred.

The Railroads' response listed factors that may affect the frequency and duration of communication losses and some ''comprehensive solutions'' they have implemented and will continue to implement—including repeaters; high-gain EOT antennas; event, fault, and data-logging technologies; and the design and installation of multicast repeating capabilities and more robust hardware—to help mitigate such losses. The Railroads are also looking at the next generation of EOT devices currently under development, which are expected to utilize advanced communications strategies and more robust hardware design. The Railroads, however, offered no truly comprehensive solutions to address the risk of extended losses of communications in the interim.

The NTSB filed public comments suggesting that FRA revise § 232.405 to require a shorter duration between failed communication checks before the engineer is notified. Until the EOT device receives a head-end confirmation of having received a message regarding a communication loss, NTSB recommends that FRA require each telemetry system (*i.e.,* the communication system between an EOT device and the controlling locomotive) to initiate continuously an emergency brake command transmission until a confirmation message or a decrease in brake pipe pressure message is received. Labor similarly recommended that FRA require telemetry systems to continuously initiate an emergency brake until the subject train comes to a complete stop. In addition, Labor recommended that telemetry systems enforce a complete safe stop upon loss of communications lasting longer than 4 minutes and 59 seconds.

FRA appreciates the Railroads' explanation of technologies and efforts it uses, or plans to use, to mitigate concerns relating to telemetry communications loss. While most of those identified have yet to materialize, FRA looks forward to considering them in the future.

FRA agrees in principle with the desire of NTSB and Labor to minimize the potential impact of communication losses. However, neither NTSB nor Labor provided any evaluation of the anticipated impacts of the recommended actions (that FRA require each telemetry system to initiate continuously an emergency brake command transmission until a confirmation message or a decrease in brake pipe pressure message is received, or that FRA require that telemetry systems enforce a complete safe stop upon loss of communications lasting longer than 4 minutes and 59 seconds), estimate of the resulting costs to the railroads and the public, or quantified the safety benefits of the recommended actions. Given that there are thousands of telemetry systems in use throughout the railroad industry today, FRA finds that the costs of requiring such a change would be significant and FRA does not currently have sufficient data to determine the likely resulting benefits. Accordingly, it is premature at this time to adopt either of the recommended solutions because the potential impacts of the recommended solutions are not yet understood.

Instead, to address the safety risks involved with potential losses of communication, FRA is revising the training requirements at § 232.203(c) to ensure that employees who operate EOT equipment are trained in the limitations and proper use of the equipment's emergency application signal and loss of communications indicator.

Section 232.205 Class I Brake Test-Initial Terminal Inspection

Section 232.205 contains the requirements for conducting Class I brake tests-initial terminal inspections. Pursuant to § 232.205, a Class I brake test must be performed when a train is initially assembled, the consist is changed in certain ways (by adding or removing cars), or a train is off-air for more than four hours. Section 232.205 provides two methods for conducting Class I brake tests on standard pressure-maintaining brake valves: (1) A leakage test; or (2) an air flow test method.

Based on data submitted by AAR in support of their Petition, including data garnered from Canadian rail operations, FRA (in the NPRM) proposed extending the duration of the off-air limitation.[5] FRA also proposed revisions to the brake pipe leakage requirements during certain Class I air brake tests, and requirements associated with the calibration of AFM indicators used to conduct Class I brake tests using the air flow test method.

In the NPRM, FRA also sought comments on its analysis leading to the proposal, including the accuracy and sufficiency of the data on which it based the NPRM. FRA requested comment on the reasons underlying Canada's lower rates of air-brake-related failures that would better inform FRA of the off-air requirement's impact. In addition, FRA requested comment on whether a time off-air tracking system is necessary or if there are other means for FRA to determine the amount of time equipment is left off a source of compressed air. FRA also requested comment on potential regulatory alternatives to a time off-air limit that would address the same safety risks and ensure that, despite equipment being off-air for any length of time, the equipment's air brakes are in proper working order.

Generally, the Railroads, Suppliers, and at least two individual commenters, submitted comments in support of the proposed revisions, while Labor and other commenters expressed concern about the proposed revisions. For the reasons explained below, in this final rule FRA is adopting revisions to this section as proposed and, in response to comments received, FRA is clarifying certain requirements related to the use of ARUs.

Off-Air Requirement

As noted above, and as discussed in more detail in the preamble to the NPRM (*see* 85 FR 2499), under the existing regulation, if a train or other equipment (*e.g.,* individual cars) is left unattached to any air source (*e.g.,* locomotive, yard air) for more than four hours, it must receive a Class I brake test prior to further operation of the train. 49 CFR 232.205(a)(3). Moreover, to ensure that an air brake system did not degrade, and to allow a railroad to delay a full-train Class I test in many circumstances, under the existing regulation equipment off-air for more than four hours may require a Class I or II test prior to being added to an en route train, and will require a Class III brake test prior to being operated in revenue service. 49 CFR 232.209(a)(1) and 232.211(a)(3)–(a)(5). This requirement also affects yard air applications. 49 CFR 232.217(c)(1). For a more detailed discussion of requirements related to Class I brake tests and a substantial history and analysis of the off-air requirement, *see* 66 FR 4103, 4122, Jan. 17, 2001.

In the NPRM, FRA proposed to extend the four-hour off-air requirement to 24 hours. The Railroads and Suppliers submitted comments supporting FRA's proposal to increase the off-air requirement from 4 to 24 hours. The Railroads assert that the data provided by AAR cited in the NPRM shows that ''time off-air is now not relevant to safe air brake functioning'' and that improvements in air brake components have ''greatly reduced'' brake pipe leakage. Citing Canada's experience, and supplying TTCI test data as further support, the Railroads state that there is no safety detriment to cars being off-air for 24 or 48 hours or more. Further, the Railroads assert that although FRA revised the air brake regulations in 2001, those revisions did not reflect the safety enhancements that had been gained since the 1950's and that further brake system improvements have been made since 2001 concerning brake pipe leakage-mitigation and moisture and contaminate removal. In response to FRA's request for comment on the data on which the NPRM was based, the Railroads expressed their confidence in the accuracy and sufficiency of the data.

The Railroads also contend that extending the amount of time that equipment may be left off-air without requiring another Class I brake inspection would result in positive financial, environmental, and operational benefits. A larger time window for equipment to remain off-air would reduce the amount of time locomotives would stand idling, which may disturb communities with noise, vibration, and emissions. In addition, the larger time window could result in trains clearing highway-rail grade crossings more expeditiously in certain circumstances by allowing trains to be cut at crossings while awaiting a crew change. According to the Railroads, permitting 24-hours off-air would reduce idling that results in an annual $2 million in fuel savings and a 3,600-ton reduction of carbon dioxide emissions.

A separate comment filed by an individual asserted that a primary benefit of the proposal would be to help decrease each railroad's fuel consumption and carbon footprints. This commenter notes that extending the time off-air limitation would allow railroads to shut down locomotives rather than leave them idling to keep air in cars' brake lines.[6]

In its comments, TWU contends AAR's supporting factors for this proposal—the ''alleged'' technological advancements and the interest in aligning U.S. and Canadian regulations—were the same used by AAR, and rejected by FRA, in the final rule published January 17, 2001. Quoting extensively from that rule, TWU posits that ''while some technology has progressed, none of [that final rule's] logic has been undermined.'' Specifically, TWU states that although air dryers or other moisture-mitigating systems may indicate progress, not all locomotives are equipped with these systems and these systems do not eliminate the freeze-up problems caused by moisture. Moreover, noting that AAR's tests with these technologies were performed on a consist of only 20 hopper and gondola cars, TWU asserts that the testing conditions fell ''well short'' of replicating actual conditions in the industry and do not consider trains consisting of 80 to 100 or more cars, each car's age and condition, extreme climates, or old and water-saturated yard air plants.

TWU also contends that aligning U.S. regulations with the off-air hours permitted by Canada ignores each country's differing safety structures and other factors. Labor also objects to FRA's attempt to harmonize with Canadian regulations, alleging that FRA is ''cherry picking'' Canadian standards without holistically considering Canada's much more stringent standards. Neither TWU or Labor provide any substantive information or comment on Canada's alleged differing safety structure or more stringent standards.

In addition, Labor commented that extensions to the off-air requirement should be handled collaboratively through the RSAC process. Labor asserts that in 2001, FRA supported a four-hour off-air requirement partially out of concern about the potential for vandalism to affect braking systems negatively. Labor contends there is no data suggesting anything has changed. Labor also asserts that, instead of extending the off-air requirement, and thus reducing the number of inspections performed, FRA should require better walking conditions at inspection locations to mitigate employee risk. Labor argues AAR's position describing

[5] *See also* amendments to §§ 232.209, 232.211 and 232.217 in this final rule.

[6] Environmental issues, like those referenced by the comments summarized in this paragraph, are considered in section IV.D, *infra,* and in this final rule's Regulatory Impact Analysis.

the four-hour off-air limit as ''too restrictive'' is merely subjective. According to Labor, the four-hour off-air rule should remain because four hours is necessary in cold weather conditions where freeze-ups can occur and vandalism continues to exist. Labor also contends that the time and costs associated with brake tests are less than any potential damages resulting from a defect. Like TWU, Labor believes that FRA should develop its own data, and not rely on AAR data, regarding the number of slips, trips, and falls.[7]

One individual commenter—an employee and mechanical officer of multiple freight and passenger railroads—expressed support for the proposal to extend the off-air limitation to 24 hours. This commenter asserted that reinspection of cars adds significant risk to employees, citing the requirements for employees to establish blue signal protection, setting necessary switches and derails, and walking the train two complete times to observe the set and release.

Another individual commenter, a freight conductor, suggests that FRA analyze the impact of the proposed extension of the off-air requirement on brake cylinder piston extension timing, rather than on the rate of line-of-road failures (expressed as emergency brake applications), for which a specific mechanical cause was not found. The commenter states that in his experience he has found that typically between 2%–5% of the car brakes will not initially apply during a test of a fully charged system.[8]

After consideration of all comments submitted to the docket and all available data, FRA concludes that extending the existing 4-hour off-air limitation to 24-hours is justified. The technological improvements to the air brake systems, introduced and proliferated both before and subsequent to FRA's 2001 rule, have been beneficial in improving the overall health of brake systems. Moreover, the supporting information comparing Canadian and U.S. operations provided in Appendix 7 to AAR's Petition clearly demonstrates the safety of extending the permitted off-air limit to 24 hours. In favor of the reliability of these data is the fact that they include same-railroad results (based on CN and CP data) showing fewer undesired and unintended emergency brake applications occurring in Canada than in the U.S. *See* AAR Petition for Rulemaking, July 12, 2018, Appendix 7, Slide 4. While the TTCI technology test data submitted by AAR are based on a sound premise, FRA did not rely on the TTCI technical test data alone to support this rule given the small sample size (*i.e.,* 20 cars tested over the course of 5 days) and the much more relevant safety information from the Canadian railroads' operational data that spanned a full year.

FRA expects that a reduced number of brake inspections based on a 24-hour off-air limit will lead to a reduced number of injuries that can occur during those inspections (*e.g.,* slips, trips, and falls), though FRA does not have sufficient data to determine quantifiable safety benefits. FRA finds Labor's argument that the data AAR submitted quantifying slips, trips, and falls incurred during brake tests to be misplaced because the data is based on data submitted by Labor's own constituents to their employing railroads. The railroads, in turn, compile and submit the data each month to FRA as required by FRA's accident/incident reporting regulations (49 CFR part 225). FRA then aggregates the submitted data and such aggregated data is then available on FRA's public database located at *https://safetydata.fra.dot.gov.* Thus, FRA considers these data to be of the type the agency routinely relies upon to inform its rulemakings, as is done here.

FRA does not share Labor's concerns about vandalism of air brakes. FRA's accident database contains no information indicating that vandalism of air brakes has had any significant relationship to air brake-caused accidents. Labor has not submitted any data to support its concerns and no other commenters provided any information on vandalism.

FRA further notes that Labor provided no data to support its belief that the costs of more frequent Class I brake tests, as presently performed, are significantly less than the costs resulting from accidents that could have been avoided by the performance of such tests. Regarding Labor's recommendation that FRA mandate ''better walking conditions,'' FRA notes this is outside of the scope of this rule. Finally, despite Labor's desire to involve the RSAC process, FRA does not anticipate that asking RSAC to address this matter would provide any additional meaningful insight into the technical validity of extending the off-air limitation period.

With regard to the individual commenter's concern that he has to apply brakes a second time for 2–5% of the freight cars he inspects, he does not correlate this experience with the length of time the affected cars have been off-air. FRA notes that regardless of whether equipment is off-air for four or 24 hours, 100% of the brakes must apply for a Class I brake test to be successful.

A multitude of variables affect brake system integrity (*e.g.,* environmental factors such as temperature and humidity, operational factors,[9] age, and overall condition of the equipment). The longer equipment remains off air, the greater opportunity these factors have to affect brake system integrity. Moreover, despite the many technical advancements in air brake technology, the structure of conventional air brake systems on rail equipment involves many car-to-car connections, which by nature cause the systems to experience gradual leaks once removed from an air source. For example, as noted in the NPRM, in its 2013 report on the Lac-Mégantic, Quebec accident, the Transportation Safety Board of Canada (TSB) cited two previous instances of air brake failures concerning rail equipment that, when left off-air, leaked and unintentionally released. Accordingly, absent universal installation, use, and regulatory oversight of acceptable brake health effectiveness and monitoring technologies (*e.g.,* wheel temperature detectors, electronic brake valves, eABS),[10] besides triggers such as mileage or reclassification, time off air remains the only metric for ensuring brake system integrity. While FRA intends to address some of these technologies in future proceedings, no commenter has identified an alternative to a time off-air limit that would address the same safety risks.

The Railroads commented that FRA's discussion of the TSB report ''does not promote public confidence in the agency's objective and fact-based approach to rulemaking.'' However, FRA believes that considering an objective, fact-based report, from Canada's equivalent of the NTSB, to be the exact type of action that would inspire public confidence in the

[7] Labor also objects to AAR's request (in its separate eABS rulemaking petition) to consider increasing the allowed mileage between brake inspections when railroads use an eABS system. Labor's comments are outside the scope of this rulemaking and FRA will address Labor's comments on this issue in the appropriate rulemaking proceeding (*i.e.,* the eABS rule).

[8] The commenter also questions why FRA restricts block swapping and seeks clarification on Class I test requirements for cars added to trains en route. Because those issues appear to be beyond the scope of this rulemaking, FRA declines to discuss them here. For an explanation of the block swapping limitations under § 232.205, please refer to the preamble of the 2001 final rule. *See, e.g.,* 66 FR 4104, 4119 and 4168, Jan. 17, 2001.

[9] Examples of operational factors may include the use of power braking, train length, time taken to inspect equipment, and quality of compressed air from locomotives or yard air plants.

[10] *See, e.g.,* Docket Nos. FRA–2005–21613, FRA–2016–0018, FRA–2018–0049, FRA–2019–0072.

transparency and thoroughness of the agency's rulemaking process.

Recognizing that Canada permits equipment to remain off-air without a brake inspection for up to 48 hours upon notification to Transport Canada (TC),[11] as noted in the NPRM, FRA requested comment on potentially extending the off-air limit to 48 hours in certain circumstances. FRA also sought comment on how often this provision is utilized in Canada and under what circumstances it is used. FRA received no comments or information in response to the extent of this provision's use in Canada. Citing the technological improvements in air brakes discussed above, the Railroads, however, suggest that FRA should universally extend the off-air limitation to 48 hours. The Railroads assert that equipment is ''routinely permitted to be off-air for 48 hours'' without approval from TC. Alternatively, if FRA chooses to adopt a universal 24-hour off-air rule, with a 48-hour limit only applicable in certain circumstances, the Railroads state they should be permitted to designate a list of ''extended off-air locations'' where equipment may remain off-air for up to 48 hours without requiring a new Class I air brake test.

The Suppliers fully support allowing a 48-hour off-air restriction, believing it is appropriate to align these regulations with the Canadian Rule that demonstrates the successful implementation of increased off-air time.

While the Railroads and Suppliers expressed support for allowing a 48-hour off-air restriction, FRA received no comments in response to requests for comment on the Canadian experience with such an allowance, nor any comments on the potential applicability of the notification procedures in §§ 232.207(c)(2) and 232.213(a)(1). FRA understands TC receives only a small number of 48-hour off-air notifications per year (no more than 12), primarily from two locations during three-day holiday weekends or special situations such as labor strikes. Such sparse use of Canada's 48-hour provision does not make it routine, as the Railroads suggest.

Because there is not sufficient data demonstrating the safety impact of extending the off-air limit beyond 24 hours, in this final rule, FRA is not extending the limit beyond 24 hours.

As noted in the NPRM, FRA remains concerned with its ability to provide oversight concerning cars left off-air for extended periods of time. While FRA has historically used train and car movement records, the presence of any ground air sources, and witness interviews to verify equipment's time off-air, those tools will likely prove insufficient over 24 hours. In the NPRM, FRA did not propose a specific solution to this concern, but sought comment on whether a requirement for tracking off-air time is necessary or whether there are other means by which FRA could determine the amount of time equipment is left off a source of compressed air. FRA asked for comment on what types of tracking systems are available and how tracking data should be maintained. FRA also sought comment on the potential burden or benefit of a tracking requirement.

In their comments, the Railroads do not support an off-air time tracking requirement, claiming that railroads already track off-air time and there is no one-size-fits all solution. The Railroads, however, do not explain or provide any information as to how industry currently tracks each equipment's time-off-air. The Railroads also do not provide any insight into how, if the off-air limit is extended to 24 hours, FRA could determine the amount of time specific equipment is left off-air. Instead, the Railroads point to FRA's rule allowing the use of ECP brakes (§ 232.607(b)(4)(i)). The ECP brake rule permits trains operating in ECP brake mode to remain off-air for 24 hours between Class I brake tests and also does not include any method for tracking equipment's time off-air.

ECP brakes are fundamentally different than traditional air brakes. ECP brake systems have self-diagnostic capabilities (*i.e.,* ECP brake systems self-report system health in real time to the operator). Therefore, § 232.607's allowance for freight trains operating in ECP brake mode to remain off-air for 24 hours is not an appropriate indicator of whether a time off-air tracking system is needed for traditional freight equipment.

Despite the above concerns, FRA is not establishing a time-tracking requirement in this final rule. Such a requirement is more appropriately considered in the eABS Rule. FRA notes, however, that railroads remain legally obligated to comply with the off-air requirement adopted in this final rule. As such, railroads will need to adopt and comply with a methodology to determine that the equipment in its trains comply with the new off-air rule. FRA will continue to monitor each railroad's implementation of the off-air requirement and appropriately utilize its available oversight and enforcement tools (including civil penalties) to enforce its compliance.

Brake Pipe Leakage Limit

As explained in the NPRM, § 232.205, as currently written, provides two methods for conducting Class I brake tests on pressure-maintaining brake valves such as the standard 26–L brake valve: (1) A leakage test; or (2) an air flow method test. *See* § 232.205(c)(1)(i), (ii). It is physically impossible to prevent all leakage from a train's brake pipe given the mechanical connections between cars' air hoses (*i.e.,* a certain amount of air will always leak through the mechanical connections) and each method of testing measures the pressure drop in a train's brake pipe in different ways. The leakage test measures the amount of compressed air that leaks from the brake pipe, while the air flow test method measures the amount of compressed air the pressure maintaining valve puts back into the brake pipe to maintain the line's pressure. Regardless of the test method employed, § 232.205 requires the pressure at the rear of the train to be within 15 psi of the pressure that the train will be operated at (known as the ''gradient'' or ''pressure taper'').

When conducting a Class I test using the air flow method, paragraph (c)(1)(ii)(B) prohibits brake pipe leakage from exceeding 60 cubic feet per minute (CFM). In the NPRM, FRA proposed increasing the limit to 90 CFM when a DPU or an ARU is utilized.

The traditional air flow test is measured from a single point of air flow, at the controlling locomotive of the train. In other words, the traditional air flow test measures the amount of air the controlling locomotive's brake system is putting back into the train's brake pipe. Because the air originates at a single source (the controlling locomotive) and travels sequentially through each car's air brake system, each connected via a mechanical air hose, gradually the pressure in the train's brake pipe tapers off. DP trains have locomotives located at two or more locations in the train, providing a more uniform distribution of power to reduce in-train forces and provide multiple supplies of air brake pressure and control. Similarly, air brake repeater boxcars or containers mounted in well cars, and other equipment serving the same purpose as these ARUs, have been used to provide multiple sources of air brake pressure and control. Because use of DP locomotives and ARUs provide multiple

[11] *See* Railway Freight and Passenger Train Brake Inspection and Safety Rule (''Canadian Rule''), section 11.2(b), Transport Canada, Oct. 27, 2014, available at *https://www.tc.gc.ca/eng/railsafety/rules-tco0184-139.htm#section11* (''A No.1 brake test is not required on: A block swap of cars that have been off-air for no more than 24 hours or 48 hours after notifying the department.''). A copy of this rule is included in Appendix 3 of AAR's Petition.

sources of air, the total leakage from the brake pipe can be greater than 60 CFM, as long as each individual source of air is controlling a portion of the brake pipe that leaks less than 60 CFM, causing the overall average brake pipe pressure to be better controlled than it would be with a single source of air.

As explained in more detail in the NPRM, since 2011, Canadian railroads have operated with the higher air flow limit of 90 CFM on DP trains. Under a waiver issued by FRA in Docket No. FRA–2012–0091 (test waiver), several Class 1 railroads in the U.S. have tested and operated with air flow limits of 90 CFM on DP trains. With the exception of one unintentional brake release that occurred during testing, all trains tested in the U.S. were operated safely and without incident. Of the one train that experienced an unintentional brake release, the test committee overseeing the operations concluded that the occurrence was an anomaly and not related to the test.

In the NPRM, FRA proposed to revise § 232.205(c)(ii)(B) to allow the use of a combined 90 CFM air flow limit on DP and ARU-equipped trains, provided railroads implement operating rules to ensure compliant operation of a train if air flow exceeds these parameters after the Class I brake test is completed. The combined air flow is derived by the sum of the air flow from all air sources in the train. Comments were filed by the Railroads, Labor, and an individual commenter.

The Railroads concur with FRA's proposal to permit the use of 90 CFM and a requirement to update each railroad's operating rules to address its use. An individual commenter expressed a high level of confidence in the safe use of 90 CFM during a leakage test with additional air sources. According to the commenter, adding air sources, especially during cold weather conditions, could mitigate risk and even allow the safe use of a 160 CFM limit.

Labor expressed concern regarding high air flow rates and the reduction of 8 psi regarding pressure taper limits.[12] Labor believes 90 CFM is too high a limit, because ''greater air compressor power should mean need less effort expended and less overall airflow due to having more compressors working to maintain pressure [sic].'' Labor seeks additional information on the unintentional release that occurred during the test waiver in the U.S. Labor also notes that the NPRM is silent regarding how an ARU, as defined, will be inspected, tested and maintained. According to Labor, an ARU is a locomotive appurtenance and its operation should comply with part 229, including the daily inspection requirements, because it functions as a part of the controls of a train's air brake system.

It appears that Labor misinterprets the effect of the 8-psi reduction in brake pipe pressure. FRA notes that a conventional end-of-train brake pipe supply is permitted a pressure taper of up to 15 psi. *See* § 232.103(m). In the test waiver issued by FRA in Docket No. FRA–2012–0091, the test committee found that the amount of leakage that would cause a 15-psi pressure taper on a conventional end-of-train air source (*i.e.,* where brake pipe gradient is measured from the rear of the train) only creates an 8-psi pressure ''sag'' between two DP locomotives.[13] This condition not only provides more available braking power than a compliant conventional train with a permitted 15-psi pressure taper, but provides a train that responds to brake control signals in approximately one-half the time, arguably resulting in a safer train.

Labor further states concerns that its crews are being required to operate trains with AFM indicator readings over ''100 psi.'' This is a misunderstanding of the AFM indicator. The AFM indicator tells the engineer the leakage of his brake pipe in CFM, not in psi. Nonetheless, if Labor is concerned that railroads are instructing employees to operate trains in non-compliance with these regulations, FRA encourages Labor to contact an appropriate representative of FRA's Office of Railroad Safety to investigate the specific matter.

In response to Labor's comment seeking information about the unintentional release during the test waiver, FRA notes that Labor was fully involved in the test waiver on which FRA based its proposal. *See* Docket No. FRA–2012–0091. Individual engineers completed test reports for each train operated and three BLET members were part of the test committee where they ultimately supported a 90 CFM limit. Each test report required the operating engineer to report information related to the train's operations (*e.g.,* equipment identification, route, temperature, air flow at origination and en-route, brake system performance and whether any unintentional release occurred). Ultimately, the entire test committee came to a consensus that the single unintentional brake release was an anomaly and insignificant to the test.[14]

With regard to Labor's assertion that use of 90 CFM is unsafe, FRA notes that Labor's comment does not consider the use of additional air sources such as a DP or ARU, which is the fundamental basis of FRA's proposal. As FRA explained above, the additional air sources provided by a DPU or ARU reduces the gradient within the brake pipe, maintains a higher overall pressure, and provides a quicker response to air brake reductions; resulting in faster brake applications. Each additional compressor from a DP locomotive or an ARU reduces the stress on any one compressor, likely making the system more safe. FRA does not agree with Labor's characterization of an ARU as an appurtenance automatically subject to the requirements of part 229. Under the Locomotive Inspection Act (the ''Act,'' 49 U.S.C. 20701), a locomotive and its ''appurtenances'' must be ''in proper condition and safe to operate'' before it can be placed in service. FRA's Locomotive Safety Standards (49 CFR part 229) implement the Act. Under the Act, if a locomotive or appurtenance of a locomotive does not meet the ''in proper condition and safe to operate'' standard, it may not be placed in service. *See* 49 CFR 229.7.

Because the use of an ARU is optional and not necessary for a locomotive to be ''in proper condition and safe to operate,'' an ARU is not an appurtenance to the locomotive under the Act. While Labor argues an ARU is an appurtenance, ''because it functions

[12] Labor noted its comments regarding the proposed allowance for higher air flow under *Section 232.103–General requirements for all train brake systems,* but FRA is discussing them in the context of § 232.205 as this is where FRA proposed to codify the requirements.

[13] On a DPU-equipped train, the gradient can be a ''sag,'' as the graph line of the pressure will assume a catenary curve between the air sources. The depth of the sag is not readily measured (without ECP or similar technology) and is not presently regulated. In this particular example, the 8-psi pressure was rounded up from 7.5 psi, representing the nadir midpoint of a 15-psi pressure taper.

[14] According to the test report, the relevant unintentional release resulted from a mechanical problem concerning the mid-train DPU's main reservoir compressor governor, which caused the main reservoir's air pressure to fluctuate outside its normal range. More specifically, the affected equipment included an 8,902 foot, 12,248-ton manifest train operated January 8, 2015. The DPU was in 2x1x0 configuration (mid-train unit), and the train was operating at temperatures between −2 °F and −8 °F. The engineer reported that ''DP main reservoir would drop when standing and lower brake pipe below equalizing reservoir pressure. [He] would have to take deeper sets greater than 15 psi to hold the train due to fluctuation in main reservoir pressure on the DP.'' The railroad commented that brake pipe flow on the lead locomotive remained in the low 20 CFMs, but acknowledged the engineer was having issues with the main reservoir pressure on the DPU. The railroad concluded that the main reservoir problems could have resulted in the reported unintentional release. The test committee concurred with the railroad's findings. The problem with the main reservoir of the DP unit was mechanical, and not related to the subject study of the test.

as a part of the controls of a train's air brake system,'' it is more akin to an EOT device in its relationship to a locomotive; it receives commands but is not a component of a locomotive. Moreover, an ARU differs from a locomotive in that it does not have motive traction power. Without a propelling motor or control stand, an ARU cannot be considered a locomotive per §§ 229.5 or 232.5. Accordingly, an ARU is not automatically subject to part 229.

With respect to Labor's concern about the inspection, safety, and maintenance of each ARU, FRA notes that ARUs are subject to the applicable requirements in parts 215 and 232. Indeed, an ARU shares many features and operations of a locomotive that is subject to part 229. For example, an ARU may contain a locomotive air brake system (automatic function, but not independent), a diesel generator, an air compressor, and a DP control unit. Most ARUs also likely include electrical wiring, internal walkways, rotating equipment, and main reservoir pressure air tanks, which could expose employees to the same hazards as a locomotive, if poorly maintained.

In the NPRM, FRA proposed a definition for, and considered the use of, ARUs. In response to Labor's comments on that proposed definition, FRA is clarifying how, under the existing regulations, each ARU must be properly maintained and functional for its safe operation. Because each ARU shares features with both locomotives and freight cars, each such element must comply with the appropriate regulatory requirement.

The components of an ARU that are the same as those for a freight car must continue to be inspected in compliance with parts 215 and 232 and the components that are similar to a locomotive must be inspected in accordance with part 229. Accordingly, in paragraph (c)(9), FRA is specifying that each ARU operating in accordance with part 232 must comply with parts 215 and 232, and, as appropriate, the relevant sections of part 229. While an ARU may share many features of a locomotive, it does not have a propelling motor, or a control stand for employees. *See* § 229.5 for the definition of ''locomotive.'' Thus, an ARU is not a locomotive. FRA recognizes, however, that certain elements of ARUs provide the same functionality as locomotives (*e.g.,* they compress air, modulate the brake pipe, or otherwise control the train's movement). Accordingly, to help ensure those features are functioning properly (as Labor notes in their comments), they must be inspected. New paragraph (c)(9) specifies that an ARU's locomotive-like features must receive a pre-trip inspection in accordance with § 229.21 each time the train receives a Class I air brake test at its initial terminal. For example, depending on the construction and functionality of specific ARUs, applicable part 229 rules may include those concerning periodic air brake maintenance (§§ 229.29–33), general requirements (§§ 229.41–45), brake systems (§§ 229.46, 229.49–53, 229.59), electrical systems (§§ 229.83–87, 229.91), internal combustion equipment (§§ 229.95–97, 229.101), and cabs, floors, and passageways (§ 229.119(c)).

Similar to how FRA treats passenger equipment (*see* § 238.309(f)), because an ARU is not a locomotive, FRA is not requiring the inspection to be documented on form FRA F 6180–49A. Instead, FRA is requiring the inspection to be recorded on a form with substantially the same information and that otherwise complies with § 229.21.

In light of the proven safety and efficacy of the test waiver, and after consideration of the comments filed in this rulemaking, FRA is adopting the proposed new § 232.205(c)(1)(ii)(B), which permits the use of a 90 CFM air flow limit on each train equipped with a DPU or ARU. To ensure the same level of safety intended by FRA during the waiver, but to allow for continued flexibility, FRA is requiring each railroad to implement operating rules intended to ensure compliant operation of a train if air flow exceeds the required parameters after the Class I brake test is completed. A railroad may consider using the test waiver's conditions as a template or starting point when drafting their operating rules on this subject. While FRA appreciates the Railroads' and the individual commenter's comments in support of a higher CFM limit and notes that additional research is being performed to look at longer trains and higher air flow, currently, FRA's experience and data only supports a 90 CFM limit with additional air sources.

AFM Indicator Calibration

Current § 232.205(c)(1)(iii) requires air flow indicator calibration at least every 92 days and prohibits the calibration of air flow test orifices at temperatures below 20 °F. As noted in the NPRM, to calibrate each device accurately, the entire AFM system—not just the test orifices—must be calibrated at not less than 20 °F. In the NPRM, FRA proposed clarifying within the regulation that the temperature of the AFM indicator and the test orifices must be considered during calibration to ensure accuracy.

The Railroads concur that AFM indicator temperature should be considered during calibration. In addition, the railroads state that the quarterly reports required under the waiver referenced in the NPRM are no longer necessary. Further, while the Railroads support codification of FRA guidance regarding the handling of an inoperative or out-of-calibration AFM indicator, they urge FRA to adopt the 184-day periodic maintenance schedule for certain systems.

In their comments, Labor did not contest the proposal, but raised related concerns. Labor states that, ''a traditional form of leakage test method should also be used in temperatures less than 20 °F. Moreover, if an AFM cannot be calibrated without taking temperature into account, temperature also should be taken into account to verify the instrument's readings.'' Labor also believes that AFM indicators are appurtenances that should be regulated under part 229, because once installed they are no longer optional.

The Railroads' comment regarding adopting the 184-day periodic maintenance schedule is outside the scope of this rulemaking. In addition, while quarterly reports are required as part of the ongoing test waiver's conditions, FRA did not propose to codify that requirement.[15] Moreover, that particular test waiver remains under consideration. Any conclusions based on its early findings would be premature. FRA's purpose of referring to this waiver in the NPRM was solely to identify the AFM indicator temperature issue in support of the proposed requirement that the AFM indicator temperature must also be considered.

If the AFM indicator is calibrated at a temperature above 20 °F, its use will still be acceptable at lower temperatures. Using ideal gas law calculations, the permitted variation of ±3 CFM can be expressed as a variation of approximately 100 °F. Therefore, if an AFM indicator is precisely calibrated at 70 °F, its calibration should be in tolerance from 20° to 120 °F. Theoretically (by calculation), at 20 °F, an AFM reading of 60 CFM would be an air flow of 57.2 CFM. Where V = volumetric flow in CFM, and T = temperature of air into the AFM (absolute units in °R), with $V_1 = 60$ CFM, $T_1 = 70$ °F, $T_2 = 20$ °F we calculate V_2 from equation

$$\frac{(V_2 - V_1)}{V_1} = \frac{1}{2} \cdot \frac{(T_2 - T_1)}{T_{1\,(\text{absolute})}}$$

[15] If a railroad believes certain waiver conditions, including quarterly reports, are no longer necessary, then the railroad is welcome to request revision or rescission of that waiver.

(Note $T_1 = 460 + 70 = 530$): $V_2 = 57.2$ CFM. Because this error is on the ''safe'' side of the air flow rule (*i.e.,* in colder temperatures the AFM indicator will display more air leakage than is actually occurring), FRA is confident in the safe use of an AFM indicator at lower temperatures.

In response to the Labor comment that an AFM indicator is an appurtenance to the locomotive, FRA disagrees because its use is optional under § 232.205(c) and unnecessary for a locomotive to be ''in proper condition and safe to operate.'' Accordingly, the daily inspection requirements of part 229 do not apply to an AFM indicator. However, as proposed in the NPRM, FRA is adopting new paragraph (c)(1)(iv) which requires the recording of the last date of calibration on Form FRA F6180–49A (locomotive ''blue card''). While that Form applies to locomotives, the field provided for AFM indicator calibration has been included as a matter of convenience for compliance with and enforcement of new § 232.205(c)(1)(iv) instead of requiring a second form for non-appurtenances.

To clarify the rules applicable to noncompliant or out-of-calibration AFM indicators, as proposed, FRA is adding a new paragraph (c)(1)(v). This new paragraph prohibits the use of an AFM indicator not in compliance with part 232 and requires tagging a noncompliant AFM indicator in accordance with § 232.15(b), with the tag to be placed in a conspicuous location of the controlling locomotive cab.

Section 232.207 Class IA Brake Tests—1,000-Mile Inspection

Although not proposed in the NPRM, due to an internal agency reorganization, FRA is removing references to the FRA Regional Administrator in § 232.207(c)(2).

Section 232.209 Class II Brake Tests—Intermediate Inspection

FRA is amending the off-air requirements of this section without change from the NPRM. Please refer to the off-air requirements analysis provided for § 232.205.

Section 232.211 Class III Brake Tests-Trainline Continuity Inspection

FRA is amending the off-air requirements of this section without change from the NPRM. Please refer to the off-air requirements analysis provided for § 232.205.

Section 232.213 Extended Haul Trains

Under existing § 232.213, a railroad may be permitted to move a train up to, but not exceeding, 1,500 miles between brake tests and inspections if the railroad designates a train as an extended haul train and the train meets certain requirements.[16] For a train to qualify as an extended haul train, paragraph (a)(1) requires the railroad to, in writing, designate the train as an extended haul train and provide certain information to FRA, including ''[t]he type or types of equipment the train will haul.'' *See* 49 CFR 232.213(a)(1)(iii). Railroads have complied with § 232.213(a)(1)(iii) by periodically supplying FRA with spreadsheets identifying their extended haul trains and providing the required information.

In the NPRM, FRA reminded railroads of the need to identify, with sufficient clarity, the type of equipment being hauled in extended haul trains. FRA also sought comments and information on how to achieve such clarity, what level of description FRA should expect, and how to otherwise differentiate extended haul trains for oversight purposes. Noting that § 232.213 no longer provides for an inbound inspection of all extended haul trains, and paragraphs (a)(5) and (a)(6) contain certain requirements related to that previous inbound inspection requirement, FRA proposed to modify those paragraphs to remove the outdated references to inbound inspections.

In response to FRA's request for comments on types of equipment, the Railroads expressed the view that the type of equipment used in an extended haul train has no bearing on the safe operation of that train or its brakes and that the requirement to report the information to FRA is outdated. Accordingly, the Railroads recommended that § 232.213(a)(1)(iii) be deleted.

While the information required under § 232.213(a)(1)(iii) is useful to FRA for focusing inspection resources, FRA agrees with the Railroads comments that it is not otherwise necessary. Accordingly, in this final rule, FRA is deleting paragraph (a)(1)(iii) and redesignating paragraph (a)(1)(iv) as paragraph (a)(1)(iii).[17]

In the NPRM, FRA proposed to add a new paragraph (8) to this section that would provide railroads the flexibility to designate different inspection and test locations for extended haul trains in certain circumstances. FRA mirrored proposed new paragraph (8) on the notification procedures of § 232.207(c)(2), which allow railroads to change the location of Class IA brake tests without prior notice to FRA in certain emergency situations. Codification of this practice would provide the railroads a flexible reporting procedure, and ultimately regulatory certainty, to address emergency circumstances involving extended haul operations. Due to an internal reorganization, FRA is also removing the reference to the Regional Administrator in paragraph (8).

While the Railroads concur with FRA's proposed new paragraph (8), TWU objects to the paragraph, asserting that § 232.213 should not be altered in any way. TWU states that sufficient flexibility already exists and that the proposal would allow railroads ''more latitude to close more yards and further reduce the number of Carmen available to perform'' Class I inspections.[18] TWU also notes that, if FRA did not codify the proposed flexibility, a railroad could still modify its designated inspection locations by submitting an updated extended haul train list complying with § 232.213(a).

However, requiring such a process could frustrate railroads' ability to respond to emergency situations and the process would provide no safety benefit. Accordingly, FRA is adopting new paragraph (a)(8) as proposed in the NPRM.

With respect to paragraphs (a)(5) and (6), the Railroads concurred with FRA's proposed removal of the outdated references to inbound inspections in those paragraphs and there were no other comments. FRA is, therefore, adopting the revisions to paragraphs (a)(5) and (a)(6) as proposed.

In the NPRM, FRA also requested comments on potential regulatory alternatives to the existing extended haul provisions of § 232.213, potential improvements that could be made to the section to clarify or expand the provision, or whether this provision

[16] On March 1, 2019, AAR submitted a petition for rulemaking that, if granted, would allow rail cars with a valid eABS record to travel up to 2,500 miles between brake tests and inspections. In this proceeding, FRA is addressing only foundational requirements, such as the 24-hour off-air proposal, that could support the full implementation of eABS. However, FRA expects to address this issue in the eABS Rule.

[17] FRA notes that paragraph (a)(1)(iv), which is being redesignated as paragraph (a)(1)(iii), requires each railroad to provide to FRA ''the locations where all train brake and mechanical inspections and tests will be performed'' for each designated extended haul train. *See* 49 CFR 232.213(a)(1)(iv). In other words, the submission must include the location of *every* expected brake and mechanical inspection, not only the Class I inspections performed by a qualified mechanical inspector, on the designated train.

[18] In its comments, TWU purports to offer alternative rule text, but merely restates the existing text of § 232.213(a)(6). Accordingly, FRA was unable to consider any particular revisions to the rule text that TWU may have contemplated.

could be eliminated by the adoption of certain alternative standards or requirements. For example, the section currently distinguishes between an inspection conducted by a qualified mechanical inspector (QMI) and a qualified person (QP) (both of which are defined in § 232.5). FRA requested comments and data on whether this distinction is still justified and necessary.

In response to this request for comment, the Railroads assert that the distinction between QMIs and QPs is no longer justified. According to the Railroads, ''there is no difference between the safety of trains that receive a QMI test as compared to those tested by a QP.'' However, the Railroads did not provide any data to support this assertion. Although the issue of distinguishing between QMI and QP inspections is relevant to any discussion of extending the mileage trains may travel between brake inspections, without sufficient data, FRA is unable to eliminate the distinction between QMIs and QPs at this time. However, FRA intends to consider this issue further in the eABS Rule. FRA encourages railroads to provide any data relevant to the safety distinctions and synergies between QMI and QP inspections in that rulemaking proceeding.

In its comments, the Railroads also recommended that FRA permit all trains receiving an initial terminal Class I brake test by a: (1) QP to operate up to 1,500 miles, and (2) by a QMI to operate up to 2,000 miles, without requiring an intermediate (*e.g.,* Class IA) brake test and with an unrestricted number of pick-ups and set-offs. To have the benefit of public comment on this recommendation, FRA expects to fully consider this recommendation in the eABS Rule.

Section 232.217 Train Brake Tests Conducted Using Yard Air

FRA is amending the off-air requirements of this section without change from the NPRM. Please refer to the off-air requirements analysis provided for § 232.205.

Section 232.219 Double-Heading and Helper Service

Section 232.219 provides regulations for the operation of double-headed and helper locomotives in a train including when *Helper Link* or a similar technology is used to control the emergency brake function on helper locomotive consists. As explained in the NPRM, the section, as written, is appropriate for a train with an EOT device; however, the section is incompatible with trains that are not equipped with traditional EOT devices, including ECP-brake operated trains and trains with DP units in lieu of an EOT device. To address this issue, in response to requests from two railroads, FRA issued waivers from this requirement for ECP brake-configured train consists and DP consists with one or more DP (non-helper) locomotives on the rear. *See* Docket Nos. FRA–2006–26435 and FRA–2014–0013. Since granting these waivers, there has been no known negative impact on safety involving these operations.

In the NPRM, FRA proposed to codify these waivers by adding a new paragraph (d) to § 232.219 to permit the use of a properly installed and tested EOT device on the helper locomotive that is cut-in to the train line air supply, provided railroads develop and implement associated operating rules consistent with parts 221 (concerning marker light display) and 232 (concerning EOT device installation and testing) and the conditions established in the waivers discussed above.

Both the Railroads and Labor support codifying these waivers, but Labor urges FRA not to eliminate paragraph (c)(3). In response to Labor's comment, FRA notes that it did not intend to eliminate paragraph (c)(3), which includes a maintenance requirement for *Helper Link* devices used on DP- or ECP-equipped trains. To enhance clarity in light of Labor's comment, FRA is adopting the substance of proposed paragraph (d) as new paragraph (c)(3) and existing paragraph (c)(3), which requires periodic testing and calibration of devices subject to § 232.219, is being redesignated as paragraph (c)(4).

A usage under new (c)(3) must still meet the requirements of (c)(1) and (c)(2). All usages must meet the requirements of the new (c)(4).

Section 232.305 Single Car Air Brake Tests

Section 232.305(a) requires each SCT to be performed in accordance with the Sections 3.0 (''Tests-Standard Freight Brake Equipment'') and 4.0 (''Special Tests'') of AAR Standard S–486–04 (2004) (''Code of Air Brake System Tests for Freight Equipment''), Section E of the AAR Manual of Standards and Recommended Practices (Jan. 1, 2004), or an alternative standard approved by FRA in accordance with § 232.307. Under the processes outlined in § 232.307, which allows the industry to request FRA approval of modifications to a currently acceptable SCT procedure, FRA approved the use of AAR Standard S–486–18 in May 2018. *See* Docket No. FRA–2018–0011. The purpose of S–486 is to provide a means of making a general check on the condition of the brake equipment on cars as called for in the Filed Manual of the AAR Interchange Rules. Only Sections 4 and 5 are codified, as these are the tests that ensure safe operation of individual freight car brakes to comply with the Safety Appliance Act. Other sections of the Standard contain supplemental information that are not codified to provide flexibility to be updated without meeting Federal requirements. These include troubleshooting guidance and information on the maintenance and construction of the physical testing devices. Accordingly, in the NPRM, FRA proposed to update AAR Standard S–486–04 to AAR Standard S–486–18.[19] FRA received no comments in response to its proposal to incorporate the updated AAR Standard S–486 and is incorporating the updated standard as proposed.

FRA also proposed to incorporate in paragraph (a), AAR Standard S–4027, which provides an automated process to perform a SCT with an automated single car test device (ASCTD). As explained in the NPRM, AAR Standard S–4027 provides for two types of automated single cars tests: (1) An automated test using an ASCTD connected to the end of a freight car; and (2) an automated test performed from the side of a car using the four-pressure manifold. FRA had conditionally approved a test waiver permitting BNSF and UP to perform SCTs with an ASCTD using AAR Standard S–4027 in lieu of AAR Standard S–486–4. *See* Docket No. FRA–2013–0030. In the NPRM, FRA detailed the test committee consensus process and its positive results and findings under that test waiver for 800,000 SCTs performed on freight cars over 4.5 years. No opposing comments were filed on the process, results, findings, or the standard itself and FRA is incorporating the standard as proposed.

Paragraph (b) identifies the events triggering a required single car air brake test. For instance, under paragraph (b)(2), ''a railroad shall perform a single car air brake test on a car when a car is on a shop or repair track . . . for any reason and has not received a single car air brake test within the previous 12-month period.'' Based on the results performed by the tests under Docket No. FRA–2013–0030, and the ability of the subject technology to provide a more comprehensive testing of the braking

[19] FRA notes that in the NPRM's preamble, FRA erroneously referred to Sections 4 and 5 of AAR Standard S–486, when the appropriate references were Sections 3 and 4. 85 FR at 2503.

system, FRA proposed requiring a SCT on each car on a shop or repair track for any reason that has not received a SCT with an end-of-car ASCTD within the previous 24-month period or with a four-pressure ASCTD within the previous 48-month period.

As FRA noted in the preamble to the NPRM, FRA based this proposal on the test waiver's findings that, after 4.5 years, cars tested with end-of-car ASCTDs experienced an 18% reduction in the rate of repeat brake failures, while a four-pressure test experienced a 58% reduction. ASCTDs generally identify more air brake system defects than other tests in the categories of air components, control valves and pipe brackets, valves and subsystems. Data from the test waiver has also shown that a car tested with an end-of-car ASCTD is 26% less likely to have an AAR-condemnable wheel impact load detector indication, and ASCTD tests with four-pressure showed a 70% reduction.

TWU opposes lengthening the minimum testing requirement from 12-months to 24–48 months, arguing that carriers ''could be missing deficiencies that will turn into a major incident or derailment.'' Noting FRA's assertion in the NPRM's preamble that, on a daily basis, thousands of individual freight cars are overdue for their SCT, TWU notes that there is an ''overabundance'' of furloughed mechanical employees. As such, TWU suggests that, ''[r]ather than lowering the standards,'' FRA should penalize railroads for ''intentionally undermining safety.'' Labor states that FRA should enforce the existing requirements on the thousands of overdue cars rather than ''move the goalposts.'' TWU and Labor also object to removing the ''repair yard provision'' for SCTs.

The Railroads support the ASCTD rules as proposed, but contest FRA's concern regarding the number cars overdue their SCTs.

In response to TWU and Labor's comments, FRA notes that it did not propose to change the rules as they concern application of a conventional SCT. To the contrary, FRA continues to require a SCT on each car appearing on a repair track at more than 12 months since its previous test using conventional testing equipment and would not remove the repair yard provision as it currently exists for any tests.

Instead, FRA's proposal would only extend the time allowed between each SCT conducted using an ASCTD under AAR Standard S–4027. Because AAR Standard S–4027 provides a highly repeatable test methodology with more accurate results, railroads can make more effective repairs, which may help reduce the backlog referenced in TWU's concerns.

In addition to the repair track provision of paragraph (b)(2), paragraphs (c) and (d) require a SCT on each car no less than 8 years after it was built or rebuilt, and no less than every 5 years thereafter. In the NPRM, FRA requested comments on the need to maintain these requirements.

In response, the Railroads urge FRA to delete any time-based test cycles and to instead adopt ''performance-based triggers (*e.g.,* identified via the study of data on actual line-of-road issues).''

While FRA understands the Railroads' request to replace the time-based test triggers required under paragraphs (b)(2), (c), and (d) with a performance standard relying on ''line-of-road'' capabilities, the request is unsupported by any specific performance standard, analysis, or data. Accordingly, FRA cannot implement the Railroad's request at this time.

For the reasons outlined above, in this final rule FRA is adopting the changes proposed to paragraph (b)(2), but not paragraphs (c) and (d).

Section 232.307 Modification of the Single Car Air Brake Test Procedures

Existing § 232.307 provides a procedure for industry to seek modification of the single car air brake test procedures in § 232.305(e). As discussed in the section-by section analysis for § 232.603 below, in response to FRA's NPRM proposal to modify § 232.603, the Railroads commented that proposed paragraph (g) of that section was confusing because it referred to the existing procedures in § 232.307, which in turn only referred to § 232.305(a). In this final rule, FRA is revising § 232.307, so that incorporated industry standards for air brake maintenance and testing may be updated utilizing the procedures of that section. When utilizing § 232.307, a petitioner will be required to specify the part, section, and paragraph for which modification is requested. Presently, §§ 232.305 and 232.603 refer to § 232.307. This final rule adds references to §§ 232.717 (addressing tourist, scenic, historic, and excursion operations braking systems) and 232.409 (addressing inspection and testing of EOT devices). Consistent with these revisions, FRA is also updating the title of § 232.307 to eliminate the specific reference to single car air brake test procedures and to refer more generally to ''brake test procedures.''

Section 232.403 Design Standards for One-Way End-of-Train Devices

Section 232.403 includes design standards for one-way EOT devices. In the NPRM, FRA proposed to modify paragraphs (d)(6) and (f)(4), which include shock requirements for rear and front units, referring to a 0.1 second window. In the NPRM, FRA indicated that the 0.1 second interval in paragraphs (d)(6) and (f)(4) is too large for maintaining a peak shock threshold and is likely a typographical or other error from a previous rulemaking. Accordingly, FRA proposed to make the shock requirements in these paragraphs the same as the 0.01 second peak shock threshold in AAR Standards S–9152 and S–9401. The only comment received supported correcting this typographical error, and therefore, FRA is adopting the proposed revisions to paragraphs (d)(6) and (f)(4).

Paragraph (g)(2) currently requires a minimum EOT device battery life of 36 hours at 0 °C. As noted in the NPRM, manufacturers have developed EOT devices that rely less on batteries and more on an internal, air-powered generator, which converts mechanical energy—created by the brake pipe air pressure—into electricity used to power the EOT device.

In the NPRM, FRA proposed codifying two long-standing waivers providing relief from this requirement for EOT devices using an air-powered generator as a power source. *See* Docket Nos. FRA–2006–25794 and FRA–2001–9270. In these waivers, FRA required each subject EOT device to include a back-up battery with a minimum operating life of 12 hours at 0 °C and the railroads to submit reports on the devices' usage and performance.

As noted in the NPRM, to date, FRA has not received any reports of accidents due to EOT device operations under these waivers. Accordingly, FRA proposed a new paragraph (g)(3) to provide for use of an air-powered generator as a primary power source as long as it operates with a backup battery with a minimum of 12 hours of continuous power at 0 °C. This change will improve efficiency and is consistent with railroad safety.

The Railroads agree with FRA's proposal to require that each back-up battery to an EOT device's air-powered generator be capable of providing 12 hours of continuous power at 0 °C. The Railroads also suggest FRA adopt a flexible, performance-based provision addressing EOTs generally and provide alternative language to accommodate future developments, such as the use of

other power sources or EOT devices becoming obsolete.

Labor supports requiring a back-up battery to each EOT device's air-powered generator, but believes it should include more than 12 hours of energy and provide subsequent crews with power-level notifications.

Various manufacturers and railroads have already, under the waivers, built and installed 12-hour back-up batteries. Labor has not provided any data, examples, or other information showing why 12 hours would be insufficient. To require a number higher than 12 hours would create a potentially unnecessary yet substantial burden on manufacturers and railroads to remove existing batteries and purchase and install new batteries. While a longer back-up battery life may provide a convenience to users, it would result in no new safety benefits. Moreover, current manufactured units may not be able to accept batteries with different specifications. Similarly, to require power notifications such as a percentage or other spectrum of available power would require modification of all affected EOT systems and batteries. With approximately 27,000 EOT devices registered in Umler, Labor has provided no data on the impact on the railroads and the public of such a requirement.

Although FRA is open to a performance-based approach to powering EOT devices, no performance standard was proposed or otherwise offered in this proceeding. FRA notes the Railroads' prediction that EOT devices may be rendered obsolete, but the Railroads provided no evidence, alternatives, or timelines showing such a possibility. While a suitable performance standard is not currently feasible, FRA is modifying the language of §§ 232.17(a) and (b), and 232.407(c) to provide special approval procedure consideration for the introduction of new and novel alternative technologies that serve the same or similar purposes as EOT devices in the interest of maintaining regulatory flexibility for future innovation.

For the reasons discussed above, in this final rule FRA is modifying paragraph (g)(2) and adding new paragraph (g)(3) as proposed.

Section 232.407 Operations Requiring Use of Two-Way End-of-Train Devices; Prohibition on Purchase of Nonconforming Devices

Section 232.407 addresses operations requiring the use of two-way EOT devices.

Although not specifically proposed in the NPRM, FRA is modifying paragraph (e)(1) to clarify that because an ARU (as defined in this final rule) is equipped with telemetry as defined for EOT devices in existing subpart E, an ARU may be used under the (e)(1) exception for the requirement for the use of a two-way EOT device. At least one Class I railroad operating in Canada uses an ARU in this manner and as long as an ARU performs the same function as an EOT device or DPU, and is operated and regulated in the same manner, such an allowance is warranted. As discussed in more detail in the analysis of the new definition of ''ARU'' in § 232.5 above, similar to the use of a DP locomotive currently contemplated under (e)(1), an ARU may communicate with, and receive wireless commands from a controlling locomotive to help regulate the brake system's air supply and pressure.

In the NPRM, FRA proposed to modify paragraph (f)(2), which addresses battery charging requirements for two-way EOT devices. Specifically, FRA proposed adding language to the end of the paragraph to require the testing of air-powered, generator-equipped devices to determine the ''residual charge'' of the back-up battery before initiating operation. As FRA explained in the NPRM, this requirement is ''meant to ensure that the generator back-up battery has a minimal residual charge, which will ensure that it is working properly and is capable of temporarily powering the EOT device should the air-powered generator fail.'' 85 FR 2505.

In their comments, Labor supports mandatory testing of each EOT device's back-up batteries, but asserts that FRA should use the term ''sufficient charge.''

The Railroads concur with FRA's proposed language in paragraph (f)(2) requiring the testing of air-powered-generator-equipped devices to determine the charge of the back-up battery before initiating operation. However, the Railroads urge FRA to adopt language to accommodate power sources other than batteries.

While FRA requires a primary battery to be sufficiently charged under paragraph (f)(2), under the waiver allowing the use of an air-powered generator, FRA prohibited the use of a dead battery. To comply with that condition, the suppliers manufactured EOT devices with a ''minimum charge'' indication showing that the battery has enough residual charge to accept charging from the air-powered generator. Labor has not provided any data or information showing why either a ''residual charge'' or ''minimum charge'' indication is insufficient and FRA is reluctant to require manufacturers to incur costs to change the indication without a sufficient safety justification.

Thus, in this final rule, FRA is using the term ''minimum charge.'' FRA understands a minimal charge of a back-up power source to mean it has a sufficient residual charge to accept charging from the air-powered generator. Passing the initiation test is evidence that the back-up power source has the required minimum charge.

While FRA agrees that other power sources may be considered, existing paragraphs (b) and (c) already provide for ''alternative technology to perform the same function.'' In response to the Railroads' comment, FRA is clarifying these paragraphs and providing for the consideration of such alternative technologies under the special approval procedure defined under § 232.17. *See also* the discussion of §§ 232.17 above.

Paragraph (f)(2) also requires that each EOT device's battery be sufficiently charged at its initial terminal or other installation point and throughout the train's trip to ensure that it will remain operative until the train reaches its destination. Although this is not a new requirement, the Railroads also request that FRA clarify the meaning of the phrase ''until the train reaches its destination.''

FRA addressed this issue in the preamble of the 1997 final rule. *See* 62 FR 278, 289, 294–95, Jan. 2, 1997. FRA recognizes that the amount of a battery's charge differs based on several variables, including the trip length. The railroad has the initial responsibility for determining how to comply with this performance standard, which can be based on manufacturer recommendations, scientific or mathematical studies, or experience. If an EOT device's battery dies before destination, that is evidence that the railroad did not comply with this requirement. This requirement, however, would not necessarily apply to air-power generators or back-up power sources. Air-powered generators are not expected to hold a full trip's worth of energy at the initial terminal of a train, because they are designed to charge continually during the train's operation. FRA has set a different charge standard for back-up power sources.

Section 232.409 Inspection and Testing of End-of-Train Devices

Section 232.409 includes requirements for EOT device inspection and testing. More specifically, existing paragraph (d) requires each EOT device's telemetry equipment be tested at least every 368 days for accuracy and calibrated, if necessary, in accordance with the manufacturer's specifications

and procedures. In the NPRM, FRA proposed instead to require telemetry equipment be tested and calibrated in accordance with its manufacturer's specifications and procedures, without requiring a maximum time interval between tests. FRA also proposed to add a new paragraph (e) to address comparison testing requirements for EOT device air pressure sensors.

FRA based its proposed revision to paragraph (d) on the reduced need for periodic telemetric equipment calibration due to technological advances that include continuous feedback such as phase-lock loop (PLL). A PLL feedback system consists generally of a reference oscillator in addition to radio telemetry components. The reference oscillator sets the communications frequency for the radio telemetry components. If the radio telemetry components are not able to achieve the communications frequency set by the reference oscillator, then the radio will go into a fail-safe mode and will not operate.

As explained in the NPRM, for EOT devices using PLL or a similar feedback loop technology, FRA granted multiple waivers from the 368-day calibration requirement for the radio portion only under the conditions that vendors apply a weather-resistant label on each applicable EOT device and manufacturers file annual reports on the rate of inoperable devices. *See, e.g.,* Docket Nos. FRA–2015–0044; FRA–2012–0096; FRA–2009–0015; and FRA–2004–18895. FRA required manufacturers to file annual reports on the rate of inoperable devices to ensure the devices continued to operate safely over time without a calibration requirement. Based on the relatively long-term experience under the above-noted waivers, and the data supplied in the annual reports, the continuous self-check circuitry of PLL technology ensures better overall safety given the potential for human error during periodic calibration. FRA's proposed revision to paragraph (d) was based on data garnered from the required annual reporting on these waivers, summarized in the renewal applications contained in the applicable waiver dockets. However, this does not include the pressure sensor components of EOT devices.

The Railroads agree with the proposed revision to paragraph (d). However, TWU believes FRA should continue to require calibration every 368 days for all non-PLL units. According to TWU, not providing for FRA verification of EOT device calibration would incentivize carriers to underreport communication losses. Labor concurs that PLL technology reduces the need for telemetry calibration and supports continued application of the maximum calibration period under § 232.409 to EOT devices not yet PLL-equipped.

FRA understands TWU's concern. However, FRA expects that manufacturers will continue to set appropriate calibration intervals for non-PLL radios. Given the level of safety attained with calibrations performed at least every 368-days and that any change could create operational or legal exposure on a technology the industry no longer produces, FRA does not expect manufacturers to change such intervals significantly. In addition, as proposed in the NPRM and adopted in this final rule, if a manufacturer does not set a periodic calibration interval for any unit (including legacy non-PLL units), the manufacturer will be required to report under paragraph (f)(2).

While TWU states that incorporating this allowance into regulations may incentivize underreporting of communications losses, it provides no analysis or data to support that prediction. Nevertheless, as further discussed below, under new paragraph (f) a manufacturer must describe in its annual report to FRA each time it repairs or reconditions a radio for an EOT device if it does not establish a calibration period for the device. Any underreporting would be a violation of this requirement. Accordingly, in this final rule, FRA is adopting its proposed revision to paragraph (d).

Despite the waivers, and their codification in paragraph (d), each EOT device and its operation still must comply with the applicable requirements of part 229. Specifically, paragraphs (a) and (b) of § 229.27 require comparison testing at least every 368 days with a test gauge, or self-test designed for this purpose, for each device that: (1) Engineers use to aid in the control or braking of a train or locomotive; and (2) provides an indication of air pressure electronically. Because the air pressure sensor in the EOT device is used by the locomotive engineer to control the train, it is similar to the gauges in the cab and must comply with parts 229 and 232. Although § 229.27 applies to the air pressure sensor in an EOT device, because the air pressure reading at the EOT device is used to control the train, FRA proposed a cross-reference to § 229.27 in proposed new paragraph (e) of § 232.409 for clarification purposes.

Under existing § 229.27, an annual test must be performed on each device used by the engineer to aid in the control or braking of the train or locomotive that provides an indication of air pressure electronically (pressure sensors). For instance, each EOT-device-equipped train relies on the pressure sensor to ensure compliant train handling, and in accordance with the pressure gradient requirements of §§ 232.103(m) and 232.205(c) and the Class III brake test performance requirements of § 232.211(c). Unlike the PLL radio portion of each EOT device, a pressure sensor does not self-test and react to pressure calibration drift.

Labor submitted comments agreeing that all EOT devices must comply with § 229.27. On the other hand, the Railroads commented that proposed paragraph (e) is not necessary. Instead, the Railroads recommended that FRA adopt alternative language requiring comparison testing in accordance with manufacturer's specifications similar to that proposed in § 232.403.

Although commenters provided no data, technology, or other specific risk-mitigating alternative that would justify modifying the generally-applicable requirements related to comparison testing of EOT device pressure sensors, FRA finds that device manufacturers should have the required expertise to evaluate their own devices and determine if such devices could be successfully comparison tested on an alternative schedule or by an alternative process. Accordingly, to allow manufacturers the flexibility to develop alternative comparison testing standards for EOT device pressure sensors, FRA is revising proposed paragraph (e) to specify that the air pressure sensor contained in the EOT device must be tested by the processes and frequency identified in § 229.27 or by manufacturer specifications approved under § 232.307. If approved under § 232.307, railroads using the applicable EOT device may apply the testing standard accordingly.

Despite the positive experience under the waivers and FRA's confidence in PLL technology, the frequency of the reference oscillator in an EOT device may, over time, ''drift'' outside of its accepted frequency range, which may affect a device remaining in communication with the front- or head-of-train device. In electrical engineering, and particularly in telecommunications, ''frequency drift'' is the unintended and generally arbitrary offset of an oscillator from its nominal frequency. Frequency drift that is not recognized during device initiation or otherwise by the EOT device's self-check circuitry, may prevent the device from failing in a safe manner, and can only be corrected during calibration. Until recently, FRA had not received any reports of PLL-

equipped radios experiencing frequency drift. However, since publication of the NPRM, FRA has been made aware of potential frequency drift in a very small percentage (less than 0.1%) of PLL transceivers covered under waiver FRA–2009–0015. Given this new information, FRA seeks to ensure this problem does not become more widespread, and is therefore codifying the waiver's annual reporting requirement for devices without calibration intervals specified by the manufacturer. This additional requirement will enable FRA and radio manufacturers to track any potential increase in frequency drift occurrences and ensure proper calibration intervals. These reports could also provide information that is useful to formulate a future performance standard. Paragraph (f) requires manufacturers to submit annual reports regarding certain transceivers to provide a means for FRA to monitor transceiver performance periodically, if they choose not to set a calibration period. If a manufacturer of telemetry transceiver equipment has multiple transceiver model types without recommended finite calibration periods, then the information required must be provided by model type in their reporting. This will not be a new burden to the manufacturers as they have already been providing this information to FRA pursuant to the waivers.

As noted in the NPRM, and in the discussion of § 232.203 above, FRA remains concerned with the safety risks associated with the reported and unreported loss of communications events between the controlling locomotive and the EOT device. As noted above, FRA understands that railroads are working to develop and implement solutions, but it does not appear that a feasible technological solution is yet available. Accordingly, as noted above, to address the safety risks involved with potential losses of communication, FRA is revising the training requirements at § 232.203(c) to ensure that employees that operate EOT equipment are trained in the limitations and proper use of the emergency application signal and the loss of communications indicator of the equipment to enable them to take effective action in the event of a communications loss.[20]

Section 232.603 Design, Interoperability, and Configuration Management Requirements

Section 232.603 contains the design, interoperability, and configuration management requirements for ECP brakes. In the NPRM, FRA proposed to revise paragraphs (a) and (d), move paragraph (f) to (g), and add a new paragraph (f) to meet the formatting and structure requirements for incorporation by reference under 1 CFR part 51. FRA also proposed to update the standards incorporated by reference in in paragraphs (a)(1), (a)(2), (a)(4), (a)(6), and (a)(7). For a discussion of the purposes of these standards, please see the NPRM.

FRA did not receive comments on the revisions and updates to paragraphs (a), (d), and (f). The purposes of the standards are as follows: S–4200 ensures uniform and consistent functionality and performance of ECP freight brake systems from different manufacturers; S–4210 provides the qualification test procedure to verify that the designed components have high reliability, will withstand harsh environmental conditions, and have a minimum 8-year operating life; S–4230 facilitates freight car and locomotive interoperability without limiting the proprietary design approaches used by individual suppliers and defines the requirements for an intratrain communications (ITC) system for freight equipment in revenue interchange service; S–4250 ensures uniform, consistent, and interoperable functionality and performance between devices developed by different manufacturers, by defining the high-level performance requirements to operate multiple locomotives via an ITC network; and S–4260 identifies the test procedure that individual suppliers would complete to establish the interoperability baseline among ECP/WDP (wire distributed power) systems that comply with the AAR S–4200 series of standards. Accordingly, FRA adopts those changes as proposed.

The Railroads commented that proposed paragraph (g) is confusing, because it refers to existing procedures to update an incorporated by reference standard in § 232.307, which in turn references § 232.305(a). In this final rule, FRA is clarifying § 232.307, so that incorporated industry standards for air brake maintenance may be updated in a consistent and efficient manner. When utilizing § 232.307, a petitioner will be required to specify the part, section, and paragraph for which modification is requested. Presently, §§ 232.305, 232.603, and 232.717 refer to § 232.307.

Subpart H Tourist, Scenic, Historic, and Excursion Operations Braking Systems

Appendix B was created to preserve part 232 as it existed prior to the 2001 final rule, and was intended to apply to tourist, scenic, historic, and excursion operations.[21] As proposed in the NPRM, this final rule is moving appendix B, with some revisions, to a new subpart H (§§ 232.700–232.719). FRA is only discussing those provisions of new subpart H that received public comments or have changed from the NPRM. The remaining provisions are being finalized as proposed, and not discussed here again.

In § 232.717 of the NPRM, FRA proposed to reference Rule 4 of the ''2020 Field Manual of the AAR Interchange Rules'' (''AAR Field Manual''). However, FRA has since realized that AAR Standard S–4045–13, which was referenced in proposed paragraph 232.717(b)(2), makes clear that the use of Rule 3 of the AAR Field Manual is also required for the maintenance of freight valves used on passenger equipment. Thus, to pinpoint the applicable rules more accurately for the convenience of the reader, all references to the AAR Field Manual in § 232.717 will include both Rules 3 and 4, which are concerned with the testing of railroad air brakes and with the maintenance of air brake valves and parts, respectively.[22]

In the NPRM, FRA indicated it was adding a paragraph (b)(2) to § 232.717. However, FRA notes that § 232.17 in appendix B, which became § 232.717 in proposed subpart H, already included a paragraph (b)(2). Accordingly, FRA notes that it is not ''adding'' a paragraph (b)(2), but rather just revising the paragraph as it existed previously in appendix B.

Labor commented about the proposed ''significant relaxation'' of current maintenance practices and operating requirements in 232.717(b), including the ''cleaned, repaired, lubricated, and tested'' periodic inspection requirements for 26–C and D–22 brake valves. According to Labor, while a relaxed periodicity of these practices may be appropriate to apply to the state-of-the-art locomotives used in pilot programs by the Class I railroads, extending the same relief to the ''motive power fleet that is the oldest in the

[20] *See* section-by-section analysis of § 232.203 above.

[21] On May 31, 2001, FRA issued an update to part 232. Some of the prior rule text was preserved in section I of appendix B to part 232, which remained applicable to tourist, scenic, historic, or excursion railroads on the general system of transportation, who have not been required to operate under present parts 232 or 238. *See* §§ 232.1(d) and 232.3(c)(5); 66 FR 4104, 4145–46, 4214, Jan. 17, 2001.

[22] FRA notes that this final rule incorporates by reference the January 1, 2020, version of AAR Rules 3 and 4. Prior to publication of this final rule, however, AAR issued updated versions of each of these Rules and FRA anticipates incorporating the updated AAR rules in a future rulemaking proceeding.

nation'' is not justified.[23] TWU's comments were similar to Labor's.

As proposed, paragraph (b)(2) changed brake inspection requirements from referencing AAR Standard S–045 to referencing AAR Standard S–4045–13, which establishes, for passenger equipment cars operating in the U.S. and Canada, standard maintenance practices and operating requirements, including the periodic inspection requirements for air brake cleaning, repairing, lubricating, and testing (known in the industry as ''clean, oil, test, and stencil'' or ''COT&S''). AAR Standard S–4045–13, would extend the timeline related to periodic brake valve inspections, and is based upon the safety experience of the waiver at Docket No. FRA–2013–0063 [24] and experience with the extended period for inspections at 49 CFR 238.309(d)(2) and (3) for conventional passenger equipment. As a result, railroads using 26–C type valves would now be required to test those valves every 48 months (instead of 36 months). Similarly, railroads using D–22 type valves would now be required to test those valves every 36 months (instead of 24 months).

Labor appears to incorrectly believe the relief provided in the waiver was the same as that provided under Docket No. FRA–2005–21613, which extended the service life of locomotive electronic brake valves (EBVs). This is the only recent docket that meets the description of Labor's concern. FRA notes that Amtrak has operated 26–C passenger car control valves for 48 months between inspections under the PB–94–3 waiver since July 1995 (codified at § 238.309 in May 1999), while railroads not subject to part 238 have operated under the subsequent waivers since April 2012. Passenger railroads have operated D–22 passenger car control valves for 1,104 days between inspections under § 238.309(d)(3) since 1999. In all cases, these waivers extended the periodic inspection interval for only 12 months and were based on over fifty years of operating experience,[25] plus confirming testing performed as part of the waiver investigations. The railroads have not reported any safety problems while under those waivers. By contrast, the locomotive EBV waiver that extended periodic inspection intervals for up to 5 years involves novel designs, requiring continuous product upgrades during the course of the waiver, and required a test committee to witness inspection and tear-down of several brake unit types on a biannual basis. Passenger car control valves with a long and successful service history do not require the same scrutiny and oversight.

The safety case provided, and the lack of negative safety data arising from the aforementioned control valve waivers, justifies the 12-month extension for each periodic inspection of a 26–C or D–22 valve provided by updated AAR Standard S–4045–13. Such an extension also aligns the inspection periods for 26–C and D–22 control valves on all railroads, thus reducing confusion. Accordingly, this final rule updates paragraph (b)(2) to reference AAR Standard S–4045–13.

Currently, appendix B does not require tourist, scenic, historic, and excursion railroads to develop a plan for servicing obsolete brake equipment. Accordingly, in the NPRM, FRA proposed § 232.717(c) within the new subpart H to allow tourist, scenic, historic, and excursion railroads to develop a compliant plan for servicing obsolete brake equipment. Under paragraph (c), these railroads—when utilizing equipment not covered by an applicable, available, and incorporated AAR standard—would have to maintain the equipment in a safe and suitable condition for service according to a railroad's written maintenance plan. A compliant maintenance plan, including its COT&S component and a periodic attention schedule, must be based upon a standard appropriate to the equipment. For example, a compliant plan might utilize a recognized industry standard or a former AAR interchange standard, to the extent it is modified to account for the unique operating conditions of the particular tourist railroad operation. The railroad must make its written maintenance plan available to FRA upon request.

While FRA expects some individual railroads may develop their own written maintenance plans, FRA understands that an industry organization (HeritageRail Alliance) may develop a consensus standard for the periodic maintenance of this brake equipment. FRA did not propose a formal approval process for each tourist, scenic, historic, and excursion railroad plan, as this would not be feasible from a regulatory standpoint, for both the railroads and FRA, and such a requirement would not enhance safety under subpart H. However, when evaluating maintenance plans during the course of regular inspections, FRA will consider the appropriate AAR-published valve standard in the last version (*e.g.,* 1992 for the ''AB'' control valve) of the AAR Code of Rules or the AAR Field Manual before a valve type was made obsolete, the usage of the equipment, and the railroad's voluntarily scheduled SCTs.[26]

Labor and TWU object to proposed paragraph (c), claiming it releases FRA from its regulatory responsibilities and allows affected railroads to self-regulate with their own inspection plans. According to Labor, paragraph (c) attempts to fix a problem that does not exist and would place a burden on those railroads with few resources.

In discussions between FRA and various tourist and historic railway industry associations, the railroads governed under former appendix B, now subpart H, have requested regulatory guidance on the applicability of those rules on discontinued brake valves. Moreover, under Section 415 of the Rail Safety Improvement Act of 2008, Congress directed FRA to study air brake maintenance regulatory compliance on diesel locomotives for tourist and historic railroads. The NPRM proposed changes consistent with Congress' direction and the railroads' requests to provide regulatory certainty and to reduce their compliance burdens. For instance, under the previous language of § 232.17 of appendix B, affected railroads were left without compliance guidance or regulatory protection each time AAR removed a brake type (*e.g.,* the ''AB'' brake) from the AAR Field Manual. FRA recognizes these ''obsolete'' brake valves may continue to be operated on older equipment while remaining compliant with § 232.103(l) (formerly § 232.3 of appendix B), and finds that each railroad is in a better position to determine how to maintain its (generally non-interchanged) equipment for its own operating environment. The

[23] Labor appears to believe incorrectly that the D–22 and 26–C brake valves are locomotive brake valves. As explained further below, there is a 25-year waiver history of extending these passenger car valves by 12 months.

[24] The waiver issued in Docket No. FRA–2013–0063 allowed railroads to utilize AAR Standard S–4045–13 in lieu of the obsolete AAR S–045. That waiver was the third waiver FRA issued related to inspection and testing frequency of passenger air brake control valves. *See also* Docket Nos. PB 94–3 (July 26, 1995) and FRA–2011–0070. The 1995 waiver was replaced by § 238.309, established by the final rule published at 64 FR 25660, May 12, 1999. The 2011 and 2013 waivers extended the flexibility afforded by § 238.309 to certain passenger equipment cars.

[25] The D–22 valve has been in use since the mid-1930s and the 26–C valve has been in use since the early 1950s.

[26] FRA notes that many of the former AAR Standards are presently available within *Annex A—Equipment-Dependent Instructions* of APTA Standard PR–M–S–005–98, Rev.4—*Code of Tests for Passenger Car Equipment Using Single Car Testing,* which is incorporated by reference in part 238. *See* Docket No. FRA–2018–0097. A copy of *Annex A* is also available in the docket of this rulemaking for review.

purpose of the new § 232.717(c) is to provide those railroads with a regulatory path going forward. Given the increasing quantity of obsolete equipment, and that the current rules in subparts A–G of part 232 reflect more modern technologies, these railroads require some level of flexibility to address their own equipment and operations. Without this change, railroads will be left to determine, at their own discretion, what rules apply to brake valves once they are no longer addressed in the applicable industry standard.

The new § 232.717(c) provides flexibility, while ensuring that railroads subject to § 232.717 remain under FRA oversight. Given these railroads' low accident or incident rate,[27] their limited (seasonal) operations, and FRA's experienced inspectors familiar with local conditions performing oversight, FRA is confident that paragraph (c) will provide regulatory clarity and improve safety.

FRA sought comments on how to manage future changes to industry standards while ensuring future compliance with 1 CFR part 51 (incorporation by reference). FRA did not receive comments on how to better manage this process. However, the Railroads encourage amendments to **Federal Register** incorporation by reference regulations to generally allow for more timely regulatory updates to standards incorporated by reference. FRA notes that the Railroads' comments regarding the incorporation by reference of standards under 1 CFR 51 is an issue under the authority of the Office of the Federal Register, not FRA.

IV. Regulatory Impact and Notices

A. E.O. 12866 and 13771, Congressional Review Act, and DOT Regulatory Policies and Procedures

This final rule is a significant regulatory action within the meaning of Executive Order 12866 (E.O. 12866) and DOT's Administrative Rulemaking, Guidance, and Enforcement Procedures in 49 CFR part 5. Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as not a 'major rule', as defined by 5 U.S.C. 804(2). In addition, this rule is considered an E.O. 13771 deregulatory action. Details on the estimated cost savings of this rule can be found in the rule's Regulatory Impact Analysis, which FRA has prepared and placed in the docket (docket number FRA–2018–0093). The analysis details estimated costs and cost savings that those regulated by the rule are likely to see over a 10-year period.

In this final rule, FRA is codifying several motive power and equipment waivers providing conditional exceptions to existing rules concerning air brake testing (including Class I air brake tests and SCTs), EOT devices, brake valves, and helper service. In particular, FRA is extending the time freight rail equipment can be off-air before requiring a new brake inspection. Furthermore, FRA is making technical corrections to existing brake-related regulations.

FRA estimated the impacts of this final rule. The results of this analysis are presented in the table below.

TOTAL COSTS AND COST SAVINGS OVER 10 YEARS

[2017 Dollars in millions]

Section	Present value 7%	Present value 3%	Annualized 7%	Annualized 3%
Costs: Training	(*)	(*)	(*)	(*)
Cost Savings:				
Helper Link	$3.9	$4.5	$0.6	$0.5
26–C Brake Valve	0.4	0.5	0.06	0.06
D–22 Brake Valve	1.0	1.1	0.1	0.1
24 Hours Off-air	325.6	386.2	46.4	45.3
90 CFM	1.8	2.1	0.3	0.2
SCT 24 month	150.7	176.1	21.5	20.6
SCT 48 month	19.5	23.8	2.8	2.8
Waiver Cost Savings	0.1	0.1	0.01	0.01
Government Administrative Cost Savings	0.1	0.1	0.01	0.01
Total Cost Savings	503.0	594.6	71.6	69.7
Net Cost Savings	503.0	594.6	71.6	69.7

Net Cost Savings = Cost Savings − Costs.
* De minimis.

Over a 10-year period of analysis, the present value of net cost savings are $503.0 million (using a 7% discount rate), and $594.6 million (using a 3% discount rate). The annualized cost savings are $71.6 million (using a 7% discount rate) and $69.7 million (using a 3% discount rate).

By way of explaining the above table, in response to comments from the NTSB and labor organizations, FRA is adding a requirement for railroads to train employees on loss of communication and limitations of the emergency brake signal. This provision is a new requirement and will add slightly to the training employees receive already on using EOT devices. FRA estimates the cost at $1,566 primarily for the railroads using two-way end-of-train devices to update their existing training plans.

Turning to cost savings, among the EOT device waivers incorporated into the final rule, the waiver allowing a train equipped with *Helper Link* (or similar technology) to use an alternative air brake test procedure will benefit railroads using this system. The *Helper Link* technology reduces employees' time in uncoupling the helper locomotive from the train so that it may be turned around to help other trains ascend steep grades. FRA bases its estimate of cost savings on this reduced labor time. For the 26–C and D–22 type brake valves, FRA is extending the time before these types of valves need to be inspected and cleaned, resulting in fewer tests and labor savings. FRA is also extending, from 4 hours to 24 hours, the time before a Class I brake

[27] Since 2010, tourist, historic, and excursion railroads have had no brake-caused train fatalities and 21 motive power and equipment-related accidents.

test must be conducted on rail equipment that is not connected to a source of compressed air prior to being operated in a train again. FRA estimates railroads will accrue savings from performing fewer brake tests, less locomotive idling time to keep rail cars on compressed air (including reduced fuel consumption), and less use of yard air sources. This provision will result in annualized cost savings of $46 million (using a 7% discount rate), the largest category of cost savings. Furthermore, in an EPA comment to the NPRM, it was noted that reduced locomotive idling time will also reduce emissions and pollutants therein. FRA has estimated these potential benefits will total approximately $14.2 million (annualized using a 7% discount rate), and $16.8 million (annualized using a 3% discount rate). However, due to uncertainty regarding these benefits, FRA has not accounted for them in the primary analysis.

Similar to the flexibility provided by other waivers, permitting an increase in brake pipe leakage to 90 CFM under certain conditions will allow railroads to conduct air brake tests without having to wait for additional crews (to test in higher daytime temperatures), or run shorter trains. The efficiencies gained through codifying the 90 CFM waiver are monetized in the table above. FRA found the maintenance requirements for air repeater units are already standard industry practice. In addition, for situations where a railroad can substitute an air repeater unit for a DP locomotive or EOT device, the railroad will save the opportunity cost of that equipment by employing it elsewhere. Finally, FRA expects large cost savings by increasing the time between single car air brake tests from 12 to 24 months for automated tests, and to 48 months for automated tests using a four-pressure receiver. FRA estimates the longer interval between tests for rail cars using automated tests (about 1.1 million freight cars out of 1.6 million freight cars in service) will result in the monetized time savings shown in the table.

Separately, FRA expects the regulated community to submit fewer waiver requests, and requests for waiver extensions, to FRA for the regulatory parts subject to this final rule. FRA generally approves waivers for five years and may extend them upon request. Given the final rule codifies these waivers, railroads and suppliers will save the cost of applying and re-applying for these waivers. These collective savings are represented in the Waiver Cost Savings category in the table, with a comparable savings in terms of government time to review these waivers and renewals.

FRA estimates this final rule will only impose minimal costs on the industry. This final rule generally increases flexibility for the regulated entities by codifying waivers and in certain circumstances, providing additional flexibility in meeting some regulatory requirements. The rule does not impose any new substantive requirements. Railroads and suppliers may choose voluntarily to take advantage of the flexibilities under this final rule. However, under proposed § 232.409(e), FRA is providing EOT device manufacturers additional flexibility in conducting the required testing by reiterating the existing requirement that EOT device air pressure sensors need to be tested annually, or in accordance with alternative test procedures developed by the EOT device manufacturer and approved by FRA. FRA is not accounting for these costs in the overall analysis for this rulemaking, but acknowledges railroads may incur a burden to calibrate the air pressure sensor on the EOT device, as they do under the existing regulation. The burdens are further described in the regulatory evaluation accompanying this final rule.

As is discussed in the preamble above, FRA does not believe that these provisions will have a negative impact on the safety of railroad operations. In fact, codifying several of the waivers may result in positive safety benefits for railroad employees. In general, the EOT device waivers, appendix B updates, 24-hour off-air, and automated single car tests will all reduce the frequency of air brake tests and inspections. Fewer brake tests and inspections will reduce the time employees are walking on potentially uneven ground such as track ballast (typically crushed stone), and reduce their chances of slipping, tripping, or falling. Also, railroad employees may reduce their chances of injury because they would spend less time moving in and around rail cars while connecting and disconnecting equipment for the brake test and checking equipment such as the brake pipe. For air brake tests conducted in yards, less frequent brake tests would likely result in employees reducing their exposure to adjacent train traffic. FRA has not quantified these safety benefits because it does not have injury data specifically from conducting brake tests, but has described the parameters that may reasonably reduce the risk of injury.

B. Regulatory Flexibility Act and E.O. 13272

The Regulatory Flexibility Act of 1980 ((RFA) 5 U.S.C. 601 *et seq.*) and Executive Order 13272 (67 FR 53461, Aug. 16, 2002) require agency review of proposed and final rules to assess their impacts on small entities. Regulations issued by the U.S. Small Business Administration (SBA) generally require agencies to prepare an initial regulatory flexibility analysis (IRFA) describing the impact of the proposed rule on small entities when issuing a proposed rule. (5 U.S.C. 603(a)). Section 605 of the RFA allows an agency to certify a rule, in lieu of preparing an analysis, if the proposed rulemaking is not expected to have a significant economic impact on a substantial number of small entities.'' [28] To help the public comment on the potential small business impacts of the rulemaking, FRA prepared an IRFA to accompany the NPRM.

In this final rule, FRA is codifying various long-standing waivers that provide conditional exceptions to the existing rules concerning air brake testing and inspection, end-of-train (EOT) devices, brake valves, and helper service (*i.e., Helper Link* devices or similar technologies). In addition, FRA is extending the length of time freight rail equipment can be disconnected from a source of compressed air, or ''off-air,'' before needing a new brake inspection to be placed back in operation. FRA is also using this opportunity to clarify certain provisions of the brake regulations and to remove outdated or unnecessary provisions. FRA estimates this final rule provides the opportunity for small entities to use their employees and railroad equipment more efficiently, resulting in cost savings.

FRA did not receive any comments directly related to the IRFA. In consideration of comments received to the rulemaking, FRA made changes to the final rule that will affect small entities, but not to a significant degree. FRA is requiring manufacturers of telemetry equipment installed in the EOT device to continue to file an annual report to FRA if they do not specify a calibration period for their devices. This provision will enable FRA to monitor instances of frequency drift in a small percentage of this equipment. This report is a continuation of a report filed as a condition of a previous waiver. FRA

[28] *See* U.S. Small Business Office of Advocacy, *A Guide for Government Agencies: How to Comply with the Regulatory Flexibility Act,* p. 25, August 2017, available at *https://advocacy.sba.gov/resources/the-regulatory-flexibility-act/a-guide-for-government-agencies-how-to-comply-with-the-regulatory-flexibility-act/.*

is also adding a requirement for employee training to reduce possible accidents from communication loss from the front of the train to the rear of the train, applicable to railroads that use two-way EOT devices.

Description of Small Entities Impacted by the Final Rule

In consultation with the SBA, FRA has published a final statement of agency policy that formally establishes ''small entities'' or ''small businesses'' as railroads, contractors, and hazardous materials shippers that meet the revenue requirements of a Class III railroad as set forth in 49 CFR 1201.1–1, which is $20 million or less in inflation-adjusted annual revenues, and commuter railroads or small governmental jurisdictions that serve populations of 50,000 or less. *See* 68 FR 24891, May 9, 2003 (codified at Appendix C to 49 CFR part 209). FRA is using this definition for the final rule. For other entities, the same dollar limit in revenues governs whether a railroad, contractor, rail equipment supplier, or other respondent is a small entity.

This final rule will be applicable to all railroads, although not all changes will be relevant to all railroads. Based on the railroads required to report accident/incidents to FRA under 49 CFR part 225, out of 751 railroads (excluding passenger service railroads that are subject to their own brake standards), FRA estimates there are approximately 735 Class III railroads; with 692 of them operating on the general system. These are of varying size, with some a part of larger holding companies. Therefore, this rule will impact a substantial number of small railroads.

FRA is aware of four firms manufacturing EOT devices for sale in the United States, and a firm that supplies the radio used for telemetry in EOT devices. Of the EOT device manufacturers, only DPS Electronics, Inc. is a small entity with about $5 million to $10 million in annual revenues and about 15 employees. The other firms, Siemens Industry Inc., Wabtec Railway Electronics, and Progressive Rail are larger companies with access to their larger parent companies' resources. Ritron, Inc. manufacturers the radio used in many firms' EOT devices and is a small entity with about $16 million in annual revenue and 90 employees.[29] Therefore, this rule will impact a substantial percentage of suppliers (40 percent).

Economic Impacts on Small Entities

FRA has determined that the impact on small entities will not be significant. In particular, the extension of time that freight rail equipment can be off-air before requiring a new brake test and inspection will result in significant cost savings from conducting fewer tests. FRA expects another important benefit will be better crew management. On a small railroad, employees often ''wear several hats,'' that is, perform several types of jobs, ranging from office work to train operations. Under the final rule, these railroads will be able to make available for other railroad jobs the time an employee would have spent conducting a brake test. The provision will likely increase the efficiency of labor resources, to some degree. Small railroads that do not operate newer types of equipment, such as EOT devices with air powered generators, can continue to perform tests in substantially the same manner as before this final rule.

In a change from the NPRM, Ritron may choose to continue to file an annual report to FRA if it does not specify a calibration period. If Ritron chooses the report option, FRA estimates this report will take 12 hours to do and cost about $800 per year, or $854 when annualized using a 7 percent discount rate.[30] FRA estimates this cost, or reduction in cost savings, as a percent of Ritron's annual revenues (about $16 million) to be minimal at 0.006 percent.[31] The safety reason for these reports is to enable FRA to ascertain the performance of the PLL radios (*i.e.,* transceivers) over time.

FRA estimates the new training requirement will affect about 10 percent of Class III railroads that operate trains with the two-way EOT devices subject to this requirement, or 69 small railroads. Analogous to estimating these costs in the primary RIA analysis for all railroads, the cost for Class III railroads is estimated as primarily the cost for railroads to modify their training plans. Specifically, FRA estimates 15 minutes to revise training plans (done at the same time when training plans are reviewed generally). Railroads already train their train crews how to initiate an emergency brake application in a locomotive, so the marginal time to add this requirement will be minimal. FRA estimates this total cost is $1,242, or only $18 per railroad.[32] FRA determines this cost is not significant. Furthermore, this cost is only accounted for in the first year of the rule. (ASLRRA reports the average freight revenue per Class III railroad is $4.8 million per year.[33])

In addition, suppliers that make railroad EOT devices will be positively affected. In the past, they have applied to FRA for waivers for technological improvements to their devices, and their waivers are incorporated in this final rule, saving the cost to file a waiver renewal.

Certification

Consistent with the findings of FRA's IRFA, and the lack of any comments received on it, I certify that this rule will not have a significant economic impact on a substantial number of small entities.

C. Paperwork Reduction Act

FRA is submitting the information collection requirements in this final rule to the Office of Management and Budget (OMB) for approval under the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.* The sections that contain the new and current information collection requirements and the estimated time to fulfill each requirement are as follows:

[29] These suppliers would also be considered small entities under SBA size standards based on NAICS codes. FRA determined that these firms can be categorized under NAICS code 336999 All other transportation equipment manufacturing, with a corresponding size standard of 1,000 employees. *See* 13 CFR 121.201.

[30] Cost = 1 manufacturer * 12 hours * $66.51 per hour = $798. Wage rate sourced from the Bureau of Labor Statistics pay for Electrical and Electronics Engineers at *https://www.bls.gov/ooh/architecture-and-engineering/electrical-and-electronics-engineers.htm* as accessed April 28, 2020. The base wage was adjusted for 2017 dollars using the BLS Inflation Calculator, and burdened for benefits (30% of compensation per BLS Guidance). See primary analysis in the RIA for detailed explanation.

[31] Calculation: About $1,000 in annualized report cost/$16,000,000 annual revenues = 0.0000625 ≈ 0.006%

[32] Cost = Cost to revise training = 69 Class III railroads * (15 minutes/60 minutes) * $72.01 per hour (STB Professional and Administrative rate) = $1,242.22. Cost per affected railroad = $1,242/69 railroads = $18.00 per railroad.

[33] ASLRRA, *Short Line and Regional Railroad Facts and Figures,* p. 10 (2014 pamphlet) [hereinafter *Facts and Figures*].

[34] Totals may not add due to rounding.

[35] The dollar equivalent cost is derived from the Surface Transportation Board's Full Year Wage A&B data series using the appropriate employee group hourly wage rate that includes 75 percent overhead charges.

All estimates include the time for reviewing instructions, searching existing data sources, gathering or maintaining the needed data, and reviewing the information. For information or a copy of the paperwork package submitted to OMB, contact Ms. Hodan Wells, Information Collection Clearance Officer, Office of Railroad Safety, Federal Railroad Administration, at 202–493–0440.

Organizations and individuals desiring to submit comments on the collection of information requirements should direct them to Ms. Hodan Wells via email at *Hodan.Wells@dot.gov.*

OMB is required to make a decision concerning the collection of information requirements contained in this rule between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication. FRA is not authorized to impose a penalty on persons for violating information collection requirements that do not display a current OMB control number, if required. The current OMB control number for 49 CFR 229 is 2130–0008.

D. Environmental Impact

FRA has evaluated this final rule consistent with the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*), the Council of Environmental Quality's NEPA implementing regulations at 40 CFR parts 1500–1508, and FRA's NEPA implementing regulations at 23 CFR part 771 and determined that it is categorically excluded from environmental review and therefore does not require the preparation of an environmental assessment (EA) or environmental impact statement (EIS). Categorical exclusions (CEs) are actions identified in an agency's NEPA implementing regulations that do not normally have a significant impact on the environment and therefore do not require either an EA or EIS. *See* 40 CFR 1508.4. Specifically, FRA has determined that this final rule is categorically excluded from detailed environmental review pursuant to 23 CFR 771.116(c)(15), ''[p]romulgation of rules, the issuance of policy statements, the waiver or modification of existing regulatory requirements, or discretionary approvals that do not result in significantly increased emissions of air or water pollutants or noise.''

The purpose of this rulemaking is to revise FRA's regulations governing brake inspections, tests, and equipment to reduce unnecessary costs and incentivize innovation, while improving or maintaining rail safety. This rule does not directly or indirectly impact any environmental resources and will not result in significantly increased emissions of air or water pollutants or noise. Instead, the final rule is likely to result in safety benefits. In analyzing the applicability of a CE, FRA must also consider whether unusual circumstances are present that would warrant a more detailed environmental review. *See* 23 CFR 771.116(b). FRA calculated quantifiable reductions in air emissions related to reduced idling in the cost-benefit analysis for this rulemaking. However, these reductions are likely to result in environmental benefits and do not necessitate further environmental documentation. FRA has concluded that no such unusual circumstances exist with respect to this final regulation and it meets the requirements for categorical exclusion under 23 CFR 771.116(c)(15).

Pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations, FRA has determined this undertaking has no potential to affect historic properties. *See* 16 U.S.C. 470. FRA has also determined that this rulemaking does not approve a project resulting in a use of a resource protected by Section 4(f). *See* Department of Transportation Act of 1966, as amended (Pub. L. 89–670, 80 Stat. 931); 49 U.S.C. 303.

Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, and DOT Order 5610.2(a) (91 FR 27534 May 10, 2012) require DOT agencies to achieve environmental justice as part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects, including interrelated social and economic effects, of their programs, policies, and activities on minority populations and low-income populations. The DOT Order instructs DOT agencies to address compliance with Executive Order 12898

and requirements within the DOT Order in rulemaking activities, as appropriate. FRA has evaluated this final rule under Executive Order 12898 and the DOT Order and has determined it would not cause disproportionately high and adverse human health and environmental effects on minority populations or low-income populations.

E. Federalism Implications

E.O. 13132, ''Federalism'' (64 FR 43255, Aug. 10, 1999), requires FRA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' ''Policies that have federalism implications'' are defined in the Executive Order to include regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' Under E.O. 13132, the agency may not issue a regulation with federalism implications that imposes substantial direct compliance costs and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments or the agency consults with State and local government officials early in the process of developing the regulation. Where a regulation has federalism implications and preempts State law, the agency seeks to consult with State and local officials in the process of developing the regulation.

FRA has analyzed this final rule in accordance with the principles and criteria contained in E.O. 13132. This final rule generally codifies existing waivers or makes technical amendments to existing FRA regulations. FRA has determined that this final rule has no federalism implications, other than the possible preemption of state laws under 49 U.S.C. 20106. Therefore, the consultation and funding requirements of E.O. 13132 do not apply, and preparation of a federalism summary impact statement for the proposed rule is not required.

F. Unfunded Mandates Reform Act of 1995

Pursuant to section 201 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, 2 U.S.C. 1531), each Federal agency shall, unless otherwise prohibited by law, assess the effects of Federal regulatory actions on State, local, and tribal governments, and the private sector (other than to the extent that such regulations incorporate requirements specifically set forth in law). Section 202 of the Act (2 U.S.C. 1532) further requires that before promulgating any general notice of proposed rulemaking that is likely to result in the promulgation of any rule that includes any Federal mandate that may result in expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more (adjusted annually for inflation) in any 1 year, and before promulgating any final rule for which a general notice of proposed rulemaking was published, the agency shall prepare a written statement detailing the effect on State, local, and tribal governments and the private sector. This final rule would not result in such an expenditure, and thus preparation of such a statement is not required.

G. Energy Impact

E.O. 13211 requires Federal agencies to prepare a Statement of Energy Effects for any ''significant energy action.'' 66 FR 28355, May 22, 2001. FRA evaluated this final rule in accordance with E.O. 13211 and determined that this regulatory action is not a ''significant energy action'' within the meaning of the E.O.

E.O. 13783, ''Promoting Energy Independence and Economic Growth,'' requires Federal agencies to review regulations to determine whether they potentially burden the development or use of domestically produced energy resources, with particular attention to oil, natural gas, coal, and nuclear energy resources. *See* 82 FR 16093, March 31, 2017. FRA determined this final rule would not burden the development or use of domestically produced energy resources.

List of Subjects

49 CFR Part 218

Occupational safety and health, Penalties, Railroad employees, Railroad safety, and Reporting and recordkeeping requirements.

49 CFR Part 221

Railroad safety.

49 CFR Part 232

Incorporation by reference, Power brakes, Railroad safety, Securement, Two-way end-of-train devices.

V. The Rule

For the reasons discussed in the preamble, FRA amends parts 218, 221, and 232 of chapter II, subtitle B of title 49, Code of Federal Regulations as follows:

PART 218—RAILROAD OPERATING PRACTICES

■ 1. The authority citation for part 218 is revised to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20131, 20138, 20144, 20168, 28 U.S.C. 2461, note; and 49 CFR 1.89.

■ 2. Amend § 218.22 by revising paragraphs (c) introductory text and (c)(5) to read as follows:

§ 218.22 Utility employee.

* * * * *

(c) A utility employee may be assigned to and serve as a member of a train or yard crew without the protection otherwise required by subpart B of part 218 of this chapter only under the following conditions:

* * * * *

(5) The utility employee is performing one or more of the following functions: Set or release handbrakes; couple or uncouple air hoses and other electrical or mechanical connections; prepare rail cars for coupling; set wheel blocks or wheel chains; conduct air brake test to include cutting air brake components in or out and position retaining valves; inspect, test, install, remove or replace a rear end marking device or end of train device; or change batteries on the rear end marking device or the end of train device if the change may be accomplished without the use of tools. Under all other circumstances, a utility employee working on, under, or between railroad rolling equipment must be provided with blue signal protection in accordance with §§ 218.23 through 218.30 of this part.

* * * * *

PART 221—REAR END MARKING DEVICE—PASSENGER, COMMUTER AND FREIGHT TRAINS

■ 3. The authority citation for part 221 is revised to read as follows:

Authority: 49 U.S.C. 20103, 20107; 28 U.S.C. 2461, note; and 49 CFR 1.89.

■ 4. Amend § 221.13 by revising paragraph (d) to read as follows:

§ 221.13 Marking device display.

* * * * *

(d) The centroid of the marking device must be located above the coupler, where its visibility is not obscured and it does not interfere with an employee's access to, or use of, any other safety appliance on the car.

■ 5. Amend appendix A to part 221 by revising paragraphs (a)(2)(ii) and (b)(3)(ii) to read as follows:

Appendix A to Part 221—Procedures for Approval of Rear End Marking Devices

* * * * *

(a) * * *

(2) * * *

(ii) The results of the tests performed under paragraph (i) of this subsection demonstrate marking device performance in compliance with the standard prescribed in 49 CFR 221.15;

* * * * *

(b) * * *

(3) * * *

(ii) The results of the tests performed under paragraph (i) of this subsection demonstrate marking device performance in compliance with the standard prescribed in 49 CFR 221.15;

* * * * *

PART 232—BRAKE SYSTEM SAFETY STANDARDS FOR FREIGHT AND OTHER NON–PASSENGER TRAINS AND EQUIPMENT; END–OF–TRAIN DEVICES

■ 6. The authority citation for part 232 is revised to read as follows:

Authority: 49 U.S.C. 20102–20103, 20107, 20133, 20141, 20301–20303, 20306, 21301–20302, 21304; 28 U.S.C. 2461, note; and 49 CFR 1.89.

■ 7. Amend § 232.1 by revising paragraphs (b) and (c) and removing paragraph (d) to read as follows:

§ 232.1 Scope.

* * * * *

(b) Except as otherwise specifically provided in this paragraph or in this part, railroads to which this part applies must comply with all the requirements contained in this part.

(c) Except for operations identified in § 232.3(c)(1), (4), and (6) through (8), all railroads part of the general railroad system of transportation must operate pursuant to the requirements in subpart H of this part (which contains the requirements in this part 232 as they existed on May 31, 2001), until they are either required to operate pursuant to the requirements contained in subparts A through G of this part or the requirements contained in part 238 of this chapter.

■ 8. Amend § 232.3 by revising paragraph (c) introductory text to read as follows:

§ 232.3 Applicability.

* * * * *

(c) Except as provided in § 232.1(c) and paragraph (b) of this section, this part does *not* apply to:

* * * * *

■ 9. Amend § 232.5 by revising the introductory text and removing the definition of ''Air Flow Indicator, AFM'' and adding definitions for ''Air flow method indicator, AFM,'' ''Air repeater unit, ARU,'' ''APTA,'' and ''Gradient, brake pipe'' in alphabetical order to read as follows:

§ 232.5 Definitions.

The definitions in this section are intended to clarify the meaning of terms used in this part.

* * * * *

Air flow method indicator, AFM means a calibrated air flow measuring device used as required by the air flow method (AFM) of qualifying train air brakes and with information clearly and legibly displayed in analog or digital format and visible in daylight and darkness from the engineer's normal operating position. Each AFM indicator includes:

(1) Markings from 10 to 80 cubic feet per minute (CFM), in increments of 10 CFM or less; and

(2) Numerals indicating 20, 40, 60, and 80 CFM for continuous monitoring of air flow.

Air repeater unit, ARU means a car, container, or similar device that provides an additional brake pipe air source by responding to air control instructions from a controlling locomotive using a communication system such as a distributed power system.

APTA means the American Public Transportation Association.

* * * * *

Gradient, brake pipe means the difference in brake pipe pressure, usually measured in pounds per square inch (psi), between each air supply source (*e.g.,* locomotive, distributed power unit, or ARU) or between an air supply source and the rear car of the train when the brake system is fully charged under existing leakage and temperature conditions.

* * * * *

■ 10. Amend § 232.11 by revising paragraph (a) to read as follows:

§ 232.11 Penalties.

(a) Any person (including but not limited to a railroad; any manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any employee of such owner, manufacturer, lessor, lessee, or independent contractor) who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least the minimum civil monetary penalty and not more than the ordinary maximum civil monetary penalty per violation, except that: Penalties may be assessed against individuals only for willful violations, and, where a grossly negligent violation or a pattern of repeated violations has created an imminent hazard of death or injury to individuals, or has caused death or injury, a penalty not to exceed the aggravated maximum civil monetary penalty per violation may be assessed. See 49 CFR part 209, appendix A. Each day a violation continues shall constitute a separate offense. FRA's website at *https://railroads.dot.gov/* contains a schedule of civil penalty amounts used in connection with this part.

* * * * *

■ 11. Amend § 232.17 by revising paragraph (a), and revising and republishing paragraph (b) to read as follows:

§ 232.17 Special approval procedure.

(a) *General.* The following procedures govern consideration and action upon requests for special approval of a plan under § 232.15(g); an alternative standard under § 232.305 or § 232.603; an alternative technology under § 232.407(b) or (c); or a single car test procedure under § 232.611; and pre-revenue service acceptance testing plans under subpart F of this part.

(b) *Petitions for special approval of an alternative standard or test procedure.* Each petition for special approval of a plan under § 232.15(g); an alternative standard under § 232.305 or § 232.603; an alternative technology under § 232.407(b) or (c); or a single car test procedure under § 232.611 shall contain:

(1) The name, title, address, and telephone number of the primary person to be contacted with regard to review of the petition;

(2) The plan, alternative standard, alternative technology, or test procedure proposed, in detail, to be submitted for or to meet the particular requirement of this part;

(3) Appropriate data or analysis, or both, for FRA to consider in determining whether the plan, alternative standard, alternative technology, or test procedure, will be consistent with the guidance under § 232.15(f), if applicable, and will provide at least an equivalent level of safety or otherwise meet the requirements contained in this part; and

(4) A statement affirming that the railroad has served a copy of the petition on designated representatives of its employees, together with a list of the

names and addresses of the persons served.

* * * * *

■ 12. Amend § 232.103 by revising paragraphs (l) and (m) to read as follows:

§ 232.103 General requirements for all train brake systems.

* * * * *

(l) Except as otherwise provided in this part, all equipment used in freight or other non-passenger trains must, at a minimum, meet the Association of American Railroads (AAR) Standard S–469, ''Freight Brakes- Performance Specification,'' Revised 2006 (contained in AAR Manual of Standards and Recommended Practices, Brakes and Brake Equipment), also referred to as AAR Standard S–469–01. The Director of the **Federal Register** approves this incorporation by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. You may obtain a copy from the Association of American Railroads, 425 Third Street SW, Washington, DC 20024, telephone: (202) 639–2345, email: *publications@aar.com,* website: *https://aarpublications.com*. You may inspect a copy of the document at the Federal Railroad Administration, Docket Clerk, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone: (855) 368–4200) or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fedreg.legal@nara.gov,* or go to: *www.archives.gov/federal-register/cfr/ibr-locations.html*.

(m) An en route train shall be stopped at the next available location, inspected for leaks in the brake system, and provided with corrective action, if the train experiences:

(1) A brake pipe gradient of greater than 15 psi; or

(2) A brake pipe air flow of greater than that permitted by this part, when the air flow has been qualified by the Air Flow Method as provided for in subpart C of this part and the indication does not return to within the limits in a reasonable time.

* * * * *

■ 13. Amend § 232.203 by revising paragraph (c) to read as follows:

§ 232.203 Training requirements.

* * * * *

(c) A railroad that operates trains required to be equipped with a two-way end-of-train telemetry device pursuant to subpart E of this part, and each contractor that maintains such devices, shall adopt and comply with a training program that specifically addresses:

(1) The testing, operation, and maintenance of two-way end-of-train devices for employees who are responsible for the testing, operation, and maintenance of the devices; and

(2) For operating employees the limitations and proper use of the emergency application signal and the loss of communication indication between front-of-train and rear-of-train devices.

* * * * *

■ 14. Amend § 232.205 by revising paragraph (a)(3), revising and republishing paragraphs (b) and (c)(1), adding paragraph (c)(9), and revising paragraph (e) to read as follows:

§ 232.205 Class I brake test-initial terminal inspection.

(a) * * *

(3) A location where the train is off-air for a period of more than 24 hours.

(b) Except as provided in § 232.209, each car and each solid block of cars added to a train shall receive a Class I brake test as described in paragraph (c) of this section at the location where it is added to a train unless:

(1) The solid block of cars is comprised of cars from a single previous train, the cars of which have previously received a Class I brake test and have remained continuously and consecutively coupled together with the train line remaining connected, other than for removing defective equipment, since being removed from its previous train and have not been off-air for more than 24 hours; or

(2) The solid block of cars is comprised of cars from a single previous train, the cars of which were required to be separated into multiple solid blocks of cars due to space or trackage constraints at a particular location when removed from the previous train, provided the cars have previously received a Class I brake test, have not been off-air more than 24 hours, and the cars in each of the multiple blocks of cars have remained continuously and consecutively coupled together with the train line remaining connected, except for the removal of defective equipment. Furthermore, these multiple solid blocks of cars shall be added to a train in the same relative order (no reclassification) as when removed from the previous train, except for the removal of defective equipment.

(c) A Class I brake test of a train shall consist of the following tasks and requirements:

(1) Brake pipe leakage shall not exceed 5 psi per minute or air flow shall not exceed 60 cubic feet per minute (CFM).

(i) *Leakage Test.* The brake pipe leakage test shall be conducted as follows:

(A) Charge the air brake system to the pressure at which the train will be operated, and the pressure at the rear of the train shall be within 15 psi of the pressure at which the train will be operated, but not less than 75 psi, as indicated by an accurate gauge or end-of-train device at the rear end of train;

(B) Upon receiving the signal to apply brakes for test, make a 20-psi brake pipe service reduction;

(C) If the locomotive used to perform the leakage test is equipped with a means for maintaining brake pipe pressure at a constant level during a 20-psi brake pipe service reduction, this feature shall be cut out during the leakage test; and

(D) With the brake valve lapped and the pressure maintaining feature cut out (if so equipped) and after waiting 45–60 seconds, note the brake pipe leakage as indicated by the brake-pipe gauge in the locomotive, which shall not exceed 5 psi per minute.

(ii) *Air Flow Method Test.* When a locomotive is equipped with a 26–L brake valve or equivalent pressure maintaining locomotive brake valve, a railroad may use the Air Flow Method Test as an alternate to the brake pipe leakage test. The Air Flow Method (AFM) Test shall be performed as follows:

(A) Charge the air brake system to the pressure at which the train will be operated, and the pressure at the rear of the train shall be within 15 psi of the pressure at which the train will be operated, but not less than 75 psi, as indicated by an accurate gauge or end-of-train device at the rear end of train; and

(B) Use a calibrated AFM indicator to measure air flow. A train equipped with at least one distributed power unit or an air repeater unit providing a source of brake pipe control air from two or more locations must not exceed a combined flow of 90 cubic feet per minute (CFM). Otherwise, the air flow must not exceed 60 CFM. Railroads must develop and implement operating rules to ensure compliant operation of a train if air flow exceeds these parameters after the Class I brake test is completed.

(iii) The AFM indicator must be calibrated for accuracy at periodic intervals not to exceed 92 days. The AFM indicator and all test orifices must be calibrated at temperatures of not less than 20 °F. AFM indicators must be accurate to within ±3 standard cubic feet per minute (CFM) at 60 CFM air flow.

(iv) For each AFM indicator, its last date of calibration must be recorded and certified on Form F6180–49A.

(v) An AFM indicator not incompliance with this part must:

(A) Not be used, including in the performance of a leakage test or to aid in the control or braking of the train;

(B) Be tagged in accordance with § 232.15(b) and include text that it is ''inoperative'' or ''overdue''; and

(C) Be placed with its tag in a conspicuous location of the controlling locomotive cab.

* * * * *

(9) Although an air repeater unit is not a locomotive or appurtenance under part 229, an air repeater unit operated in accordance with this part must:

(i) Receive an inspection in accordance with § 229.21 where and when an inspection is required in accordance with § 232.205(a)(1); and

(ii) Otherwise comply with part 229 as applicable to those parts that provide compressed air, modulate the brake pipe, and otherwise control the movement of the train. All remaining parts are subject to the inspection requirements of parts 215 and 232.

* * * * *

(e) A railroad must notify the locomotive engineer that the Class I brake test was satisfactorily performed, whether the equipment to be hauled in his train has been off-air for a period of more than 24 hours, and provide the information required in this paragraph to the locomotive engineer or place the information in the cab of the controlling locomotive following the test. The information required by this paragraph may be provided to the locomotive engineer by any means determined appropriate by the railroad; however, a written or electronic record of the information must be retained in the cab of the controlling locomotive until the train reaches its destination. The written or electronic record must contain the date, time, number of freight cars inspected, and identify the qualified person(s) performing the test and the location where the Class I brake test was performed.

* * * * *

■ 15. Amend § 232.207 by revising paragraph (c)(2) to read as follows:

§ 232.207 Class IA brake tests—1,000-mile inspection.

* * * * *

(c) * * *

(2) In the event of an emergency that alters normal train operations, such as a derailment or other unusual circumstance that adversely affects the safe operation of the train, the railroad is not required to provide prior written notification of a change in the location where a Class IA brake test is performed to a location not on the railroad's list of designated locations for performing Class IA brake tests, provided that the railroad notifies FRA's Associate Administrator for Safety within 24 hours after the designation has been changed and the reason for that change.

■ 16. Amend § 232.209 by revising and republishing paragraph (a) to read as follows:

§ 232.209 Class II brake tests—intermediate inspection.

(a) At a location other than the initial terminal of a train, a Class II brake test must be performed by a qualified person, as defined in § 232.5, on the following equipment when added to a train:

(1) Each car or solid block of cars, as defined in § 232.5, that has not previously received a Class I brake test or that has been off-air for more than 24 hours;

(2) Each solid block of cars, as defined in § 232.5, that is comprised of cars from more than one previous train; and

(3) Except as provided in paragraph (a)(4) of this section, each solid block of cars that is comprised of cars from only one previous train, the cars of which have not remained continuously and consecutively coupled together with the train line remaining connected since being removed from the previous train. A solid block of cars is considered to have remained continuously and consecutively coupled together with the train line remaining connected since being removed from the previous train if it has been changed only by removing defective equipment.

(4) Each solid block of cars that is comprised of cars from a single previous train, the cars of which were required to be separated into multiple solid blocks of cars due to space or trackage constraints at a particular location when removed from the previous train, if they are not added in the same relative order as when removed from the previous train or if the cars in each of the multiple blocks of cars have not remained continuously and consecutively coupled together with the train line remaining connected, except for the removal of defective equipment.

* * * * *

■ 17. Amend § 232.211 by revising paragraphs (a)(3) through (5) to read as follows:

§ 232.211 Class III brake tests-trainline continuity inspection.

(a) * * *

(3) At a point, other than the initial terminal for the train, where a car or a solid block of cars that is comprised of cars from only one previous train the cars of which:

(i) Have remained continuously and consecutively coupled together with the trainline remaining connected, other than for removing defective equipment, since being removed from its previous train that has previously received a Class I brake test; and

(ii) That has not been off-air for more than 24 hours is added to a train;

(4) At a point, other than the initial terminal for the train, where a solid block of cars that is comprised of cars from a single previous train is added to a train, provided:

(i) The solid block of cars was required to be separated into multiple solid blocks of cars due to space or trackage constraints at a particular location when removed from the previous train;

(ii) The cars have previously received a Class I brake test;

(iii) Have not been off-air more than 24 hours; and

(iv) The cars in each of the multiple blocks of cars have remained continuously and consecutively coupled together with the train line remaining connected, except for the removal of defective equipment. Furthermore, these multiple solid blocks of cars must be added to the train in the same relative order (no reclassification) as when removed from the previous train, except for the removal of defective equipment; or

(5) At a point, other than the initial terminal for the train, where a car or a solid block of cars that has received a Class I or Class II brake test at that location, prior to being added to the train, and that has not been off-air for more than 24 hours, is added to a train.

* * * * *

■ 18. Amend § 232.213 by:

■ a. Removing paragraph (a)(1)(iii);

■ b. Redesignating paragraph (a)(1)(iv) as (a)(1)(iii);

■ c. Revising paragraph (a)(5);

■ d. Revising and republishing paragraph (a)(6); and

■ e. Adding paragraph (a)(8).

The revisions and addition read as follows:

§ 232.213 Extended haul trains.

(a) * * *

(5) The train must have no more than one pick-up and one set-out en route, except for the set-out of defective equipment pursuant to the requirements of this chapter. Cars added to the train en route must be inspected pursuant to

the requirements contained in paragraphs (a)(2) through (5) of this section at the location where they are added to the train.

(6) In order for an extended haul train to proceed beyond 1,500 miles, the following requirements shall be met:

(i) If the train will move 1,000 miles or less from that location before receiving a Class IA brake test or reaching destination, a Class I brake test must be conducted pursuant to § 232.205 to ensure 100 percent effective and operative brakes.

(ii) If the train will move greater than 1,000 miles from that location without another brake inspection, the train must be identified as an extended haul train for that movement and must meet all the requirements contained in paragraphs (a)(1) through (5) of this section. Such trains must receive a Class I brake test pursuant to § 232.205 by a qualified mechanical inspector to ensure 100 percent effective and operative brakes, a freight car inspection pursuant to part 215 of this chapter by an inspector designated under § 215.11 of this chapter, and all cars containing non-complying conditions under part 215 of this chapter must either be repaired or removed from the train.

* * * * *

(8) In the event of an emergency that alters normal train operations, such as a derailment or other unusual circumstance that adversely affects the safe operation of the train, the railroad is not required to provide prior written notification of a change in the location where an extended haul brake test is performed to a location not on the railroad's list of designated locations for performing extended haul brake tests, provided that the railroad notifies FRA's Associate Administrator for Safety within 24 hours after the designation has been changed and the reason for that change.

* * * * *

■ 19. Amend § 232.217 by revising paragraph (c)(1) to read as follows:

§ 232.217 Train brake tests conducted using yard air.

* * * * *

(c) * * *

(1) If the cars are off-air for more than 24 hours, the cars must be retested in accordance with § 232.205(c) through (f).

* * * * *

■ 20. Amend § 232.219 by revising the section heading and revising and republishing paragraph (c) to read as follows:

§ 232.219 Double-heading and helper service.

* * * * *

(c) If a helper locomotive utilizes a Helper Link device or a similar technology, the locomotive and device shall be equipped, designed, and maintained as follows:

(1) The locomotive engineer shall be notified by a distinctive alarm of any loss of communication between the device and the two-way end-of-train device of more than 25 seconds;

(2) A method to reset the device shall be provided in the cab of the helper locomotive that can be operated from the engineer's usual position during operation of the locomotive. Alternatively, the helper locomotive or the device shall be equipped with a means to automatically reset the device, provided that the automatic reset occurs within the period time permitted for manual reset of the device; and

(3) When helping trains equipped with distributed power or ECP brakes on the rear of the train, and utilizing a *Helper Link* device or a similar technology, a properly installed and tested end-of-train device may be utilized on the helper locomotive. Railroads must adopt and comply with an operating rule consistent with this chapter to ensure the safe use of this alternative procedure.

(4) The device shall be tested for accuracy and calibrated if necessary according to the manufacturer's specifications and procedures every 365 days. This shall include testing radio frequencies and modulation of the device. A legible record of the date and location of the last test or calibration shall be maintained with the device.

■ 21. Amend § 232.305 by revising paragraphs (a) and (b)(2) and adding paragraph (f) to read as follows:

§ 232.305 Single car air brake tests.

(a) Single car air brake tests must be performed by a qualified person in accordance with either Section 3.0, ''Tests-Standard Freight Brake Equipment,'' and Section 4.0, ''Special Tests,'' AAR Standard S–486–18; Section 3.0, ''Single-Car Test Requirements,'' Section 4.0, ''Special Tests,'' and Section 13.0 ''4-Pressure Single-Car Test Requirements,'' AAR Standard S–4027–18; an alternative procedure approved by FRA pursuant to § 232.17; or a modified procedure approved in accordance with the provisions contained in § 232.307.

(b) * * *

(2) A car is on a shop or repair track, as defined in § 232.303(a), for any reason and has not received either:

(i) A manual single car air brake test (AAR Standard S–486) within the previous 12-month period;

(ii) An automated single car air brake test (AAR Standard S–4027 §§ 3.0 and 4.0) within the previous 24-month period;

(iii) Or a 4-pressure single car air brake test (AAR Standard S–4027 § 13.0) within the previous 48-month period;

* * * * *

(f) The Director of the Federal Register approves the incorporation by reference of the standards required in this section into this section in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. You may inspect a copy of the material at the Federal Railroad Administration, Docket Clerk, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone: 855–368–4200). You may also inspect the material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fedreg.legal@nara.gov,* or go to: *www.archives.gov/federal-register/cfr/ibr-locations.html.* You may obtain the material from the following source(s):

(1) Association of American Railroads (AAR), 425 Third Street SW, Washington, DC 20024, telephone: (202) 639–2345, email: *publications@aar.com,* website: *https://aarpublications.com.*

(i) AAR Standard S–486, ''Code of Air Brake System Tests for Freight Equipment—Single Car Test,'' Revised 2018 (contained in AAR Manual of Standards and Recommended Practices, Brakes and Brake Equipment), also referred to as AAR Standard S–486–18.

(ii) AAR Standard S–4027, ''Automated Single-Car Test Equipment, Conventional Brake Equipment—Design and Performance Requirements,'' Revised 2018 (contained in AAR Manual of Standards and Recommended Practices, Brakes and Brake Equipment), also referred to as AAR Standard S–4027–18.

(2) [Reserved]

■ 22. Amend § 232.307 by revising the section heading and revising and republishing paragraph (a) to read as follows:

§ 232.307 Modification of brake test procedures.

(a) *Request.* The AAR or other authorized representative of the railroad industry may seek modification of brake test procedures prescribed in this chapter. The request for modification shall be submitted to the Associate Administrator for Safety, Federal Railroad Administration, 1200 New Jersey Avenue SE, Washington, DC 20590 and shall contain:

(1) The name, title, address, and telephone number of the primary person to be contacted with regard to review of the modification;

(2) The section and paragraph at issue, and the modification, in detail, to be substituted for a particular procedure prescribed in this chapter;

(3) Appropriate data or analysis, or both, for FRA to consider in determining whether the modification will provide at least an equivalent level of safety; and

(4) A statement affirming that the railroad industry has served a copy of the request on the designated representatives of the employees responsible for the equipment's operation, inspection, testing, and maintenance under this part, together with a list of the names and addresses of the persons served.

* * * * *

■ 23. Amend § 232.403 by revising paragraph (d)(6) and revising and republishing paragraphs (f)(4) and (g) to read as follows:

§ 232.403 Design standards for one-way end-of-train devices.

* * * * *

(d) * * *

(6) During a shock of 10 g. peak for 0.01 seconds in any axis.

* * * * *

(f) * * *

(4) The front unit shall be designed to meet the requirements of paragraphs (d)(2), (3), (4), and (5) of this section. It shall also be designed to meet the performance requirements in this paragraph under the following environmental conditions:

(i) At temperatures from 0 °C to 60 °C;

(ii) During a shock of 10 g. peak for 0.01 seconds in any axis.

(g) *Radio equipment.* (1) The radio transmitter in the rear unit and the radio receiver in the front unit shall comply with the applicable regulatory requirements of the Federal Communications Commission (FCC) and use of a transmission format acceptable to the FCC.

(2) If power is supplied by one or more batteries only, the operating life must be a minimum of 36 hours at 0 °C.

(3) If power is supplied by a generator—an air turbine or alternative technology—a backup battery or similar energy storage device is required with a minimum of 12 hours continuous power at 0 °C in the event the generator stops functioning as intended.

■ 24. Amend § 232.407 by revising paragraphs (b), (c), (e)(1), and (f)(2) to read as follows:

§ 232.407 Operations requiring use of two-way end-of-train devices; prohibition on purchase of nonconforming devices.

* * * * *

(b) *General.* All trains not specifically excepted in paragraph (e) of this section shall be equipped with and shall use either a two-way end-of-train device meeting the design and performance requirements contained in § 232.405 or a device using an alternative technology approved by FRA pursuant to § 232.17 to perform the same function.

(c) *New devices.* Each newly manufactured end-of-train device purchased by a railroad shall be a two-way end-of-train device meeting the design and performance requirements contained in § 232.405 or a device using an alternative technology approved by FRA pursuant to § 232.17 to perform the same function.

* * * * *

(e) * * *

(1) Trains with a locomotive, locomotive consist, or air repeater unit located at the rear of the train that is capable of making an emergency brake application, through a command effected by telemetry or by a crew member in radio contact with the controlling locomotive.

* * * * *

(f) * * *

(2) The rear unit batteries must be sufficiently charged at the initial terminal or other point where the device is installed and throughout the train's trip to ensure that the end-of-train device will remain operative until the train reaches its destination. Air-powered generator equipped devices must be tested for a minimum charge at installation before initiating generator operation.

* * * * *

■ 25. Amend § 232.409 by revising paragraph (d) and adding paragraphs (e) and (f) to read as follows:

§ 232.409 Inspection and testing of end-of-train devices.

* * * * *

(d) The telemetry equipment must be tested for accuracy and calibrated if necessary according to the manufacturer's specifications and procedures. If the manufacturer's specifications requires periodic calibration of the telemetry equipment, the date and location of the last calibration or test and the name or unique employee identifier of the person performing the calibration or test must be legibly displayed on a weather-resistant sticker affixed to the outside of both the front unit and the rear unit; however, if the front unit is an integral part of the locomotive or is inaccessible, then the information may be recorded on Form FRA F6180–49A instead, provided that the serial number of the unit is recorded.

(e) The air pressure sensor contained in the end-of-train device must be tested by the processes and frequency identified in § 229.27 or by manufacturer specifications approved under § 232.307. The date and location of the test and the name or unique employee identifier of the person performing the test must be legibly displayed on a weather-resistant marking device affixed to the outside of the unit.

(f) Each manufacturer of telemetry transceiver equipment must either:

(1) Establish and communicate publicly to its customers a reasonable recommended calibration period; or

(2) Submit to FRA an annual report including:

(i) The total number of transceivers—itemized by model name, number, or type—sold to date;

(ii) The number of transceivers that have been reported as inoperative or otherwise malfunctioning or returned for servicing; and

(iii) The number of transceivers reported or returned for service with frequency modulation or transmit power outside of either manufacturer's specifications or FCC-approved specifications.

■ 26. Amend § 232.603 by revising paragraphs (a) introductory text, (d), and (f) and adding paragraph (g) to read as follows:

§ 232.603 Design, interoperability, and configuration management requirements.

(a) *General.* A freight car or freight train equipped with an ECP brake system must, at a minimum, meet the Association of American Railroads (AAR) standards contained in the AAR Manual of Standards and Recommended Practices related to ECP brake systems listed in paragraph (g) of this section; an alternate standard approved by FRA pursuant to § 232.17; or a modified standard approved in accordance with the provisions contained in paragraph (g) of this section.

* * * * *

(d) *Exceptions.* (1) A freight car or freight train equipped with a standalone ECP brake system is excepted from the requirement in § 232.103(l) referencing AAR Standard S–469–01, ''Freight Brakes—Performance Specification.''

* * * * *

(f) *Modification of standards.* The AAR or other authorized representative of the railroad industry may seek

modification of the industry standards identified in or approved pursuant to paragraph (g) of this section. The request for modification will be handled and shall be submitted in accordance with the modification procedures contained in § 232.307.

(g) *Incorporation by reference.* The Director of the Federal Register approves the incorporation by reference of the standards required in this section into this section in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. You may inspect a copy at the Federal Railroad Administration, 1200 New Jersey Avenue SE, Washington, DC, 202–493–6300 or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fedreg.legal@nara.gov,* or go to: *www.archives.gov/federal-register/cfr/ibr-locations.html.* You may obtain the material from the following source(s):

(1) Association of American Railroads, 425 Third Street SW, Washington, DC 20024, telephone: (202) 639–2345, email: *publications@aar.com,* website: *https://aarpublications.com.*

(i) AAR S–4200, ''Electronically Controlled Pneumatic (ECP) Cable-Based Brake Systems—Performance Requirements,'' Revised 2014, (contained in AAR Manual of Standards and Recommended Practices, Brakes and Brake Equipment).

(ii) AAR S–4210, ''ECP Cable-Based Brake System Cable, Connectors, and Junction Boxes—Performance Specifications,'' Revised 2014, (contained in AAR Manual of Standards and Recommended Practices, Brakes and Brake Equipment).

(iii) AAR S–4220, ''ECP Cable-Based Brake DC Power Supply—Performance Specification,'' Version 2.0, Revised 2002, (contained in AAR Manual of Standards and Recommended Practices, Electronically Controlled Brake Systems).

(iv) AAR S–4230, ''Intratrain Communication Specification for Cable-Based Freight Train Control System,'' Version 4.1, Revised 2014, (contained in AAR Manual of Standards and Recommended Practices, Brakes and Brake Equipment).

(v) AAR S–4240, ''ECP Brake Equipment—Approval Procedure,'' Adopted 2007, (contained in AAR Manual of Standards and Recommended Practices, Electronically Controlled Brake Systems).

(vi) AAR S–4250, ''Performance Requirements for ITC Controlled Cable-Based Distributed Power Systems,'' Version 3.0, Revised 2014, (contained in AAR Manual of Standards and Recommended Practices, Brakes and Brake Equipment).

(vii) AAR S–4260, ''ECP Brake and Wire Distributed Power Interoperability Test Procedures,'' Revised 2008 (contained in AAR Manual of Standards and Recommended Practices, Brakes and Brake Equipment).

(viii) AAR S–4270, ''ECP Brake System Configuration Management,'' Adopted 2008, (contained in AAR Manual of Standards and Recommended Practices, Electronically Controlled Brake Systems).

(2) [Reserved]

* * * * *

■ 27. Add Subpart H to read as follows:

Subpart H—Tourist, Scenic, Historic, and Excursion Operations Braking Systems

Sec.

§ 232.700 Applicability.

(a) Except as provided in paragraph (b) of this section, this subpart applies to standard gage railroads.

(b) This subpart does not apply to:

(1) A railroad that operates only on track inside an installation which is not part of the general railroad system of transportation; or

(2) Rapid transit operations in an urban area that are not connected with the general railroad system of transportation.

(c) As used in this subpart, carrier means ''railroad,'' as that term is defined by 49 CFR 232.5

§ 232.701 Power brakes; minimum percentage.

On and after September 1, 1910, on all railroads used in interstate commerce, whenever, as required by the Safety Appliance Act as amended March 2, 1903, any train is operated with power or train brakes, not less than 85 percent of the cars of such train shall have their brakes used and operated by the engineer of the locomotive drawing such train, and all power-brake cars in every such train which are associated together with the 85 percent shall have their brakes so used and operated.

§ 232.702 Drawbars; standard height.

Not included in this subpart. Moved to 49 CFR part 231.

§ 232.703 Power brakes and appliances for operating power-brake systems.

Requirements are contained in 49 CFR 232.103(l).

§ 232.710 General rules; locomotives.

(a) Air brake and hand brake equipment on locomotives including tender must be inspected and maintained in accordance with the requirements of the Locomotive Inspection and United States Safety Appliance Acts and related orders and regulations of the Federal Railroad Administrator (FRA).

(b) It must be known that air brake equipment on locomotives is in a safe and suitable condition for service.

(c) Compressor or compressors must be tested for capacity by orifice test as often as conditions require but not less frequently than required by law and orders of the FRA.

(d) Main reservoirs shall be subjected to tests periodically as required by law and orders of the FRA.

(e) Air gauges must be tested periodically as required by law and orders of the FRA, and whenever any irregularity is reported. They shall be compared with an accurate deadweight tester, or test gauge. Gauges found inaccurate or defective must be repaired or replaced.

(f)(1) All operating portions of air brake equipment together with dirt collectors and filters must be cleaned, repaired and tested as often as conditions require to maintain them in a safe and suitable condition for service, and not less frequently than required by law and orders of the FRA.

(2) On locomotives so equipped, hand brakes, parts, and connections must be inspected, and necessary repairs made as often as the service requires, with date being suitably stenciled or tagged.

(g) The date of testing or cleaning of air brake equipment and the initials of the shop or station at which the work was done shall be placed on a card displayed under transparent covering in the cab of each locomotive unit.

(h)(1) Minimum brake cylinder piston travel must be sufficient to provide proper brake shoe clearance when brakes are released.

(2) Maximum brake cylinder piston travel when locomotive is standing must not exceed the following:

	Inches
(i) Steam locomotives:	
(A) Cam type of driving wheel brake	3½
(B) Other types of driving wheel brakes	6
(C) Engine truck brake	8
(D) Engine trailer truck brake	8
(E) Tender brake (truck mounted and tender bed mounted)	8
(F) Tender brake (body mounted)	9
(ii) Locomotives other than steam:	
(A) Driving wheel brake	6
(B) Swivel type truck brake with brakes on more than one truck operated by one brake cylinder	7
(C) Swivel type truck brake equipped with one brake cylinder	8
(D) Swivel type truck brake equipped with two or more brake cylinders	6

(i)(1) Foundation brake rigging, and safety supports, where used, must be maintained in a safe and suitable condition for service. Levers, rods, brake beams, hangars and pins must be of ample strength and must not bind or foul in any way that will affect proper operation of brakes. All pins must be properly applied and secured in place with suitable locking devices. Brake shoes must be properly applied and kept approximately in line with treads of wheels or other braking surfaces.

(2) No part of the foundation brake rigging and safety supports shall be closer to the rails than specified by law and orders of the FRA.

(j)(1) Main reservoir leakage: Leakage from main air reservoir and related piping shall not exceed an average of 3 pounds per minute in a test of three minutes' duration, made after the pressure has been reduced 40 percent below maximum pressure.

(2) Brake pipe leakage: Brake pipe leakage must not exceed 5 pounds per minute after a reduction of 10 pounds has been made from brake pipe air pressure of not less than 70 pounds.

(3) Brake cylinder leakage: With a full service application of brakes, and with communication to the brake cylinders closed, brakes must remain applied not less than five minutes.

(4) The main reservoir system of each unit shall be equipped with at least one safety valve, the capacity of which shall be sufficient to prevent an accumulation of pressure of more than 10 pounds per square inch above the maximum setting of the compressor governor fixed by the chief mechanical officer of the carrier operating the locomotive.

(5) A suitable governor shall be provided that will stop and start the air compressor within 5 pounds above or below the pressures fixed.

(6) Compressor governor when used in connection with the automatic air brake system shall be so adjusted that the compressor will start when the main reservoir pressure is not less than 15 pounds above the maximum brake-pipe pressure fixed by the rules of the carrier and will not stop the compressor until the reservoir pressure has increased not less than 10 pounds.

(k) The communicating signal system on locomotives when used in passenger service must be tested and known to be in a safe and suitable condition for service before each trip.

(l) Enginemen when taking charge of locomotives must know that the brakes are in operative condition.

(m) In freezing weather drain cocks on air compressors of steam locomotives must be left open while compressors are shut off.

(n) Air pressure regulating devices must be adjusted for the following pressures:

	Pounds
(1) Locomotives:	
(i) Minimum brake pipe air pressure:	
(A) Road Service	70
(B) Switch Service	60
(ii) Minimum differential between brake pipe and main reservoir air pressures, with brake valve in running position	15
(iii) Safety valve for straight air brake	30–55
	30–68
(iv) Safety valve for LT, ET, No. 8–EL, No. 14 El, No. 6–DS, No. 6–BL and No. 6–SL equipment	30–75
(v) Safety valve for HSC and No. 24–RL equipment	30–50
(vi) Reducing valve for independent or straight air brake	50
(vii) Self-lapping portion for electro-pneumatic brake (minimum full application pressure)	30–50
(viii) Self-lapping portion for independent air brake (full application pressure)	40–60
(viiii) Reducing valve for air signal	50
(x) Reducing valve for high-speed brake (minimum).	
(2) Cars:	
(i) Reducing valve for high-speed brake	58–62
(ii) Safety valve for PS, LN, UC, AML, AMU and AB–1–B air brakes	58–62
(iii) Safety valve for HSC air brake	58–77
(iv) Governor valve for water raising system	60
(v) Reducing valve for water raising system	20–30

§ 232.711 Train air brake system tests.

(a) Supervisors are jointly responsible with inspectors, enginemen and trainmen for condition of train air brake and air signal equipment on motive power and cars to the extent that it is possible to detect defective equipment by required air tests.

(b) Communicating signal system on passenger equipment trains must be tested and known to be in a suitable condition for service before leaving terminal.

(c) Each train must have the air brakes in effective operating condition, and at no time shall the number and location of operative air brakes be less than permitted by Federal requirements. When piston travel is in excess of 10½ inches, the air brakes cannot be considered in effective operating condition.

(d) Condensation must be blown from the pipe from which air is taken before connecting yard line or motive power to train.

§ 232.712 Initial terminal road train airbrake tests.

(a)(1) Each train must be inspected and tested as specified in this section by a qualified person at points—

(i) Where the train is originally made up (initial terminal);

(ii) Where train consist is changed, other than by adding or removing a solid block of cars, and the train brake system remains charged; and

(iii) Where the train is received in interchange if the train consist is changed other than by:

(A) Removing a solid block of cars from the head end or rear end of train;

(B) Changing motive power;

(C) Removing or changing the caboose; or

(D) Any combination of the changes listed in paragraphs (a)(1)(iii)(A), (B), and (C) of this section. Where a carman is to perform the inspection and test under existing or future collective bargaining agreement, in those circumstances a carman alone will be considered a qualified person.

(2) A qualified person participating in the test and inspection or who has knowledge that it was made shall notify the engineer that the initial terminal road train air brake test has been satisfactorily performed. The qualified person shall provide the notification in writing if the road crew will report for duty after the qualified person goes off duty. The qualified person also shall provide the notification in writing if the train that has been inspected is to be moved in excess of 500 miles without being subjected to another test pursuant to either this section or § 232.713 of this part.

(b) Each carrier shall designate additional inspection points not more than 1,000 miles apart where intermediate inspection will be made to determine that:

(1) Brake pipe pressure leakage does not exceed five pounds per minute;

(2) Brakes apply on each car in response to a 20-pound service brake pipe pressure reduction; and

(3) Brake rigging is properly secured and does not bind or foul.

(c) Train airbrake system must be charged to required air pressure, angle cocks and cutout cocks must be properly positioned, air hose must be properly coupled and must be in condition for service. An examination must be made for leaks and necessary repairs made to reduce leakage to a minimum. Retaining valves and retaining valve pipes must be inspected and known to be in condition for service. If train is to be operated in electro-pneumatic brake operation, brake circuit cables must be properly connected.

(d)(1) After the airbrake system on a freight train is charged to within 15 pounds of the setting of the feed valve on the locomotive, but to not less than 60 pounds, as indicated by an accurate gauge at rear end of train, and on a passenger train when charged to not less than 70 pounds, and upon receiving the signal to apply brakes for test, a 15-pound brake pipe service reduction must be made in automatic brake operations, the brake valve lapped, and the number of pounds of brake pipe leakage per minute noted as indicated by brake pipe gauge, after which brake pipe reduction must be increased to full service. Inspection of the train brakes must be made to determine that angle cocks are properly positioned, that the brakes are applied on each car, that piston travel is correct, that brake rigging does not bind or foul, and that all parts of the brake equipment are properly secured. When this inspection has been completed, the release signal must be given and brakes released and each brake inspected to see that all have released.

(2) When a passenger train is to be operated in electro-pneumatic brake operation and after completion of test of brakes as prescribed by paragraph (d)(1) of this section the brake system must be recharged to not less than 90 pounds air pressure, and upon receiving the signal to apply brakes for test, a minimum 20 pounds electro-pneumatic brake application must be made as indicated by the brake cylinder gage. Inspection of the train brakes must then be made to determine if brakes are applied on each car. When this inspection has been completed, the release signal must be given and brakes released and each brake inspected to see that all have released.

(3) When the locomotive used to haul the train is provided with means for maintaining brake pipe pressure at a constant level during service application of the train brakes, this feature must be cut out during train airbrake tests.

(e) Brake pipe leakage must not exceed 5 pounds per minute.

(f)(1) At initial terminal piston travel of body-mounted brake cylinders which is less than 7 inches or more than 9 inches must be adjusted to nominally 7 inches.

(2) Minimum brake cylinder piston travel of truck-mounted brake cylinders must be sufficient to provide proper brake shoe clearance when brakes are released. Maximum piston travel must not exceed 6 inches.

(3) Piston travel of brake cylinders on freight cars equipped with other than standard single capacity brake, must be adjusted as indicated on badge plate or stenciling on car located in a conspicuous place near the brake cylinder.

(g) When test of airbrakes has been completed the engineman and conductor must be advised that train is in proper condition to proceed.

(h) During standing test, brakes must not be applied or released until proper signal is given.

(i)(1) When train airbrake system is tested from a yard test plant, an engineer's brake valve or an appropriate test device shall be used to provide increase and reduction of brake pipe air pressure or electro-pneumatic brake application and release at the same or a slower rate as with engineer's brake valve and yard test plant must be connected to the end which will be nearest to the hauling road locomotive.

(2) When yard test plant is used, the train airbrakes system must be charged and tested as prescribed by paragraphs (c) to (g) of this section inclusive, and when practicable should be kept charged until road motive power is coupled to train, after which, an automatic brake application and release test of airbrakes on rear car must be made. If train is to be operated in electro-pneumatic brake operation, this test must also be made in electro-pneumatic brake operation before proceeding.

(3) If after testing the brakes as prescribed in paragraph (i)(2) of this section the train is not kept charged until road motive power is attached, the brakes must be tested as prescribed by paragraph (d)(1) of this section and if

train is to be operated in electro-pneumatic brake operation as prescribed by paragraph (d)(2) of this section.

(j) Before adjusting piston travel or working on brake rigging, cutout cock in brake pipe branch must be closed and air reservoirs must be drained. When cutout cocks are provided in brake cylinder pipes, these cutout cocks only may be closed and air reservoirs need not be drained.

§ 232.713 Road train and intermediate terminal train air brake tests.

(a) *Passenger trains.* Before motive power is detached or angle cocks are closed on a passenger train operated in either automatic or electro-pneumatic brake operation, except when closing angle cocks for cutting off one or more cars from the rear end of train, automatic air brake must be applied. After recouping, brake system must be recharged to required air pressure and before proceeding and upon receipt of proper request or signal, application and release tests of brakes on rear car must be made from locomotive in automatic brake operation. If train is to be operated in electro-pneumatic brake operation, this test must also be made in electro-pneumatic brake operation before proceeding. Inspector or trainman must determine if brakes on rear car of train properly apply and release.

(b) *Freight trains.* Before motive power is detached or angle cocks are closed on a freight train, brakes must be applied with not less than a 20-pound brake pipe reduction. After recoupling, and after angle cocks are opened, it must be known that brake pipe air pressure is being restored as indicated by a rear car gauge or device. In the absence of a rear car gauge or device, an air brake test must be made to determine that the brakes on the rear car apply and release.

(c)(1) At a point other than an initial terminal where a locomotive or caboose is changed, or where one or more consecutive cars are cut off from the rear end or head end of a train with the consist otherwise remaining intact, after the train brake system is charged to within 15 pounds of the feed valve setting on the locomotive, but not less than 60 pounds as indicated at the rear of a freight train and 70 pounds on a passenger train, a 20-pound brake pipe reduction must be made and it must be determined that the brakes on the rear car apply and release. As an alternative to the rear car brake application and release test, it shall be determined that brake pipe pressure of the train is being reduced as indicated by a rear car gauge or device and then that brake pipe pressure of the train is being restored as indicated by a rear car gauge or device.

(2) Before proceeding it must be known that brake pipe pressure as indicated at rear of freight train is being restored.

(3) On trains operating with electro-pneumatic brakes, with brake system charged to not less than 70 pounds, test must be made to determine that rear brakes apply and release properly from a minimum 20 pounds electro-pneumatic brake application as indicated by brake cylinder gauge.

(d)(1) At a point other than a terminal where one or more cars are added to a train, after the train brake system is charged to not less than 60 pounds as indicated by a gauge or device at the rear of a freight train and 70 pounds on a passenger train. A brake test must be made by a designated person as described in § 232.712(a)(1) to determine that brake pipe leakage does not exceed five (5) pounds per minute as indicated by the brake pipe gauge after a 20-pound brake pipe reduction has been made. After the test is completed, it must be determined that piston travel is correct, and the train airbrakes of these cars and on the rear car of the train apply and remain applied, until the release signal is given. As an alternative to the rear car brake application and release portion of the test, it shall be determined that brake pipe pressure of the train is being reduced as indicated by a rear car gauge or device and then that brake pipe pressure of the train is being restored as indicated by a rear car gauge or device. Cars added to a train that have not been inspected in accordance with § 232.712 (c) through (j) must be so inspected and tested at the next terminal where facilities are available for such attention.

(2)(i) At a terminal where a solid block of cars, which has been previously charged and tested as prescribed by § 232.712 (c) through (j), is added to a train, it must be determined that the brakes on the rear car of the train apply and release. As an alternative to the rear car application and release test, it shall be determined that brake pipe pressure of the train is being reduced as indicated by a rear car gauge or device and then that brake pipe pressure of the train is being restored as indicated by a rear car gauge or device.

(ii) When cars which have not been previously charged and tested as prescribed by § 232.712 (c) through (j) are added to a train, such cars may either be given inspection and tests in accordance with § 232.712 (c) through (j), or tested as prescribed by paragraph (d)(1) of this section prior to departure in which case these cars must be inspected and tested in accordance with § 232.712 (c) through (j) at next terminal.

(3) Before proceeding it must be known that the brake pipe pressure at the rear of freight train is being restored.

(e)(1) Transfer train and yard train movements not exceeding 20 miles, must have the air brake hose coupled between all cars, and after the brake system is charged to not less than 60 pounds, a 15-pound service brake pipe reduction must be made to determine that the brakes are applied on each car before releasing and proceeding.

(2) Transfer train and yard train movements exceeding 20 miles must have brake inspection in accordance with § 232.712 (c)–(j).

(f) The automatic air brake must not be depended upon to hold a locomotive, cars or train, when standing on a grade, whether locomotive is attached or detached from cars or train. When required, a sufficient number of hand brakes must be applied to hold train, before air brakes are released. When ready to start, hand brakes must not be released until it is known that the air brake system is properly charged.

(g) As used in this section, device means a system of components designed and inspected in accordance with § 232.719.

(h) When a device is used to comply with any test requirement in this section, the phrase brake pipe pressure of the train is being reduced means a pressure reduction of at least five pounds and the phrase brake pipe pressure of the train is being restored means a pressure increase of at least five (5) pounds.

§ 232.714 Inbound brake equipment inspection.

(a) At points where inspectors are employed to make a general inspection of trains upon arrival at terminals, visual inspection must be made of retaining valves and retaining valve pipes, release valves and rods, brake rigging, safety supports, hand brakes, hose and position of angle cocks and make necessary repairs or mark for repair tracks any cars to which yard repairs cannot be promptly made.

(b) Freight trains arriving at terminals where facilities are available and at which special instructions provide for immediate brake inspection and repairs, trains shall be left with air brakes applied by a service brake pipe reduction of 20 pounds so that inspectors can obtain a proper check of the piston travel. Trainmen will not close any angle cock or cut the locomotive off until the 20-pound service reduction has been made.

Inspection of the brakes and needed repairs should be made as soon thereafter as practicable.

§ 232.715 Double heading and helper service.

(a) When more than one locomotive is attached to a train, the engineman of the leading locomotive shall operate the brakes. On all other motive power units in the train the brake pipe cutout cock to the brake valve must be closed, the maximum main reservoir pressure maintained and brake valve handles kept in the prescribed position. In case it becomes necessary for the leading locomotive to give up control of the train short of the destination of the train, a test of the brakes must be made to see that the brakes are operative from the automatic brake valve of the locomotive taking control of the train.

(b) The electro-pneumatic brake valve on all motive power units other than that which is handling the train must be cut out, handle of brake valve kept in the prescribed position, and air compressors kept running if practicable.

§ 232.716 Running tests.

When motive power, engine crew or train crew has been changed, angle cocks have been closed except for cutting off one or more cars from the rear end of train or electro-pneumatic brake circuit cables between power units and/or cars have been disconnected, running test of train air brakes on passenger train must be made, as soon as speed of train permits, by use of automatic brake if operating in automatic brake operation or by use of electro-pneumatic brake if operating in electro-pneumatic brake operation. Steam or power must not be shut off unless required and running test must be made by applying train air brakes with sufficient force to ascertain whether or not brakes are operating properly. If air brakes do not properly operate, train must be stopped, cause of failure ascertained and corrected and running test repeated.

§ 232.717 Freight and passenger train car brakes.

(a) *Testing and repairing brakes on cars while on shop or repair tracks.*

(1) When a freight car having brake equipment due for periodic attention is on shop or repair tracks where facilities are available for making air brake repairs, brake equipment must be given attention in accordance with the requirements of Rules 3 and 4 of the 2020 Field Manual of the AAR Interchange Rules (AAR Field Manual); or an alternative procedure approved by FRA under paragraph (d) of this section. Brake equipment shall then be tested by use of a single car testing device as prescribed by § 232.305.

(2)(i) When a freight car having an air brake defect is on a shop or repair track, brake equipment must be tested by use of a single car testing device as prescribed by § 232.305.

(ii) All freight cars on shop or repair tracks shall be tested to determine that the air brakes apply and release. Piston travel on a standard body mounted brake cylinder which is less than 7 inches or more than 9 inches must be adjusted to nominally 7 inches. Piston travel of brake cylinders on all freight cars equipped with other than standard single capacity brake, must be adjusted as indicated on badge plate or stenciling on car located in a conspicuous place near brake cylinder. After piston travel has been adjusted and with brakes released, sufficient brake shoe clearance must be provided.

(iii) When a car equipped for use in passenger train service not due for periodical air brake repairs, as indicated by stenciled or recorded cleaning dates, is on shop or repair tracks, brake equipment must be tested by use of single car testing device as prescribed by the applicable standards referenced in § 232.305 or by the American Public Transportation Association (APTA) standard referenced in § 238.311(a) of this chapter. Piston travel of brake cylinders must be adjusted if required, to the standard travel for that type of brake cylinder. After piston travel has been adjusted and with brakes released, sufficient brake shoe clearance must be provided.

(iv) Before a car is released from a shop or repair track, it must be known that brake pipe is securely clamped, angle cocks in proper position with suitable clearance, valves, reservoirs and cylinders tight on supports and supports securely attached to car.

(b) *Clean, repair, lubricate and test (COT&S).* (1) Brake equipment on cars other than passenger cars must be cleaned, repaired, lubricated and tested (''COT&S'') as often as required to maintain it in a safe and suitable condition for service but not less frequently than as required by Rules 3 and 4 of the AAR Field Manual.

(2) Brake equipment on passenger cars must be cleaned, repaired, lubricated and tested (''COT&S'') as often as necessary to maintain it in a safe and suitable condition for service but not less frequently than as required in Standard S–4045–13 in the Manual of Standards and Recommended Practices of the AAR or an alternative procedure approved by FRA pursuant to § 232.717(d).

(c) *Discontinued brake systems.* For a brake system once, but no longer, included in AAR's current Code of Rules or Code of Tests (presently known as the Field Manual of the AAR Interchange Rules or the Manual of Standards and Recommended Practices), the brake system must be maintained in a safe and suitable condition for service according to a railroad's written maintenance plan. The maintenance plan, including its COT&S component and a periodic attention schedule, must be based upon a standard appropriate to the equipment. The railroad must comply with and make its written maintenance plan available to FRA upon request.

(d) *Modification of standards.* The AAR or other authorized representative of the railroad industry may seek modification of the industry standards identified in or approved pursuant to paragraph (a) of this section. The request for modification will be handled and must be submitted in accordance with the modification procedures contained in § 232.307 of this part.

(e) *Incorporation by Reference.* The Director of the Federal Register approves the incorporation by reference of the standards required in this section into this section in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. You may inspect a copy of the material at the Federal Railroad Administration, Docket Clerk, 1200 New Jersey Avenue SE, Washington, DC 20590 (telephone: 855–368–4200). You may also inspect the material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fedreg.legal@nara.gov,* or go to: *www.archives.gov/federal-register/cfr/ibr-locations.html.* You may obtain the material from the following source(s):

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws**.

Last List December 10, 2020

Public Laws Electronic Notification Service (PENS)

PENS is a free email notification service of newly enacted public laws. To subscribe, go to *https://listserv.gsa.gov/cgi-bin/wa.exe?SUBED1=PUBLAWS-L&A=1*

Note: This service is strictly for email notification of new laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.
